Scope To provide funding for existing projects that experience unforeseen circumstances such as accelerations or delays.

Justification This project allows Roads the flexibility with project implementation. It is to cover costs for unforeseen circumstances and developments not anticipated at the time of budget adoption. Not having the flexibility of this project to expediently transfer appropriation will limit the ability of Roads to proactively manage active projects to minimize costs and/or damage to county assets.

Scope This project allows Roads to respond to emerging needs of citizens and the roadway system.

Justification Given the current financial situation and the accelerating rate of decline of the system condition, Roads is by necessity becoming a more reactive rather than proactive agency. The Quick Response master project will supply funds for sub-projects that arise during the year that require immediate attention. Projects can include emergency repairs associated with storm damage or other infrastructure deterioration or damage, unanticipated pedestrian or vehicle safety needs or other emerging issues.

Scope To preserve the roadway infrastructure using cost effective resurfacing treatments and minor roadway rehabilitation to extend the useful life of existing roadways.

Justification Two of the goals in the 2014 Strategic Plan for Road Services are to address safety concerns and to preserve and maintain the existing roadway network. This program will protect road users and maintain the system by applying preventative treatments which are key to preserving the roadway system, improving its functional condition and reducing deterioration. Applying the right cost effective treatment at the right time can extend the useful life of the roadways. With more than 1 million trips per day occurring on the county's roads, the roadway system enables the movement of people and goods, and serves residents, commerce and other users, making it an important tool for the region's economic vitality. Therefore, preserving the overall condition of the roadway system will benefit mobility, aligning with the County Executive's priority of Regional Mobility. If these repairs are not performed, it may lead to higher lifecycle costs, increased risks and more user delays.

Scope To replace and preserve aging drainage systems and associated roadway features in compliance with current codes and standards.

Justification Two of the goals in the 2014 Strategic Plan for Road Services are to address safety concerns and to preserve and maintain the existing roadway network. This program will protect road users, and improve and maintain the roadway structure by eliminating failed or failing drainage systems, restoring structural capacity and preventing water damage to public and private properties. Generally, the solution is replacing the failed system but it could also include new pipe or catch basins to collect water that is adversely affecting the road system or private property. Another goal of the strategic plan is to meet regulatory requirements and standards. This program's work is regulated by federal statutes, state laws and regulations, and King County Code. It also applies King County Strategic Climate Action Plan principles by designing systems to minimize future flooding and recycling a majority of the waste material generated during construction. Preserving the existing roadway network will benefit mobility, aligning with the County Executive's priority of Regional Mobility. If the road drainage system is not maintained, there could be possible injuries to road users, damage to public and private property, liability for water flow that is displaced, icy road conditions in the winter, premature failure due to soil saturation, and road closures.

Scope To identify and prioritize existing guardrail to be refurbished or upgraded to current standards.

Justification The division's top priority in the 2014 Strategic Plan for Road Services is to address safety concerns on the roadway network. This program will improve the safety of the system by upgrading existing guardrail and guardrail end terminals. This includes identifying and replacing existing end terminals that do not meet current standards. This project will also install guideposts on the guardrail according to federal standards. Other work includes raising guardrail to current standard height recommended by WSDOT Design Standards. Upgrading existing guardrail and guardrail end terminals will make the roads safer and may lessen the severity of crashes.

Scope To perform high priority preservation and maintenance projects to attempt to keep the aging bridge inventory serviceable and safe for the traveling public.

Justification Two of the goals in the 2014 Strategic Plan for Road Services are to address safety concerns and to preserve and maintain the existing roadway network. As there are no bridge replacements in the current six-year capital program because of revenue shortfalls, the need for maintenance repairs are on the rise in an attempt to keep bridges serviceable and safe for the traveling public. Regular federally mandated routine inspections identify repairs for the bridges. These repairs are prioritized based on: structural safety, traffic safety and the potential to reduce frequent maintenance. These repairs may include load upgrades, scour mitigation, redecking, bridge rail repairs or retrofits, superstructure and substructure repairs, painting, etc. Preserving the county's bridges will benefit mobility, aligning with the County Executive's priority of Regional Mobility. If they are not repaired or maintained, these structures will degrade faster, and will need to be posted for load restrictions or closed to the public.

Scope To improve the safety of the roadway network by removing roadside obstacles within the clear zone of the road right-of-way.

Justification The division's top priority in the 2014 Strategic Plan for Road Services is to address safety concerns on the roadway network. The program identifies and removes or mitigates objects next to roadways that vehicles leaving the roadway might otherwise hit, creating clear zones. These zones create space for a driver to stop safely or regain control of a vehicle that has left the road, increasing the possibility of a safe recovery and reducing the instances and severity of crashes. This program will identify and remove or mitigate non-yielding or non-breakaway objects that are more than 6 inches high, such as trees, boulders, stumps, mailboxes, fences and utility poles in the clear zone. The clear zone is an area clear of objects for a minimum of 10 feet from the outside painted lane edge line on roads without curbing.

Scope To improve the safety of the roadway network by making improvements to reduce the rate of collisions on roads in unincorporated King County.

Justification The division's top priority in the 2014 Strategic Plan for Road Services is to address safety concerns on the roadway network. This program will improve the safety of the system by making improvements which are intended to reduce the occurrence of collisions at locations or on road segments identified in the 2016 High Collision Safety reports. Some of the improvements include, but are not limited to, traffic control signs and pavement markings.

Scope To improve the safety of students, pedestrians and others using roads near schools in unincorporated King County by implementing traffic calming measures as needed.

Justification The division's top priority in the 2014 Strategic Plan for Road Services is to address safety concerns on the roadway network. This multi-decade program uses a variety of approaches to improve the safety of pedestrians and other users in school zones in unincorporated King County. These approaches include, but are not limited to, safety-related signs, marked crosswalks, radar activated speed signs, flashing beacons or paved sidewalks. Implementing these traffic calming measures and projects will help to protect all users of the roadway network within the school zone.

Scope To provide funding for existing projects that experience unforeseen circumstances such as accelerations or delays.

Justification This project allows Roads the flexibility with project implementation. It is to cover costs for unforeseen circumstances and developments not anticipated at the time of budget adoption. Not having the flexibility of this project to expediently transfer appropriation will limit the ability of Roads to proactively manage active projects to minimize costs and/or damage to county assets.

Scope To make drainage and pavement improvements on Old Cascade Highway, and to construct a turnaround on the highway at the west bank of the Miller River.

Justification This project will make improvements to damaged and remaining portions of the Old Cascade Highway. In January 2011, a winter flood tore through the Skykomish Valley and changed the course of the Miller River. The flood destroyed a 100-foot section of the Old Cascade Highway, severing it into two sole access roads on both sides of the river, and left the Miller River Bridge #999W damaged and cut off from the road. In order to maintain the use of this sole source road and to prevent possible additional damage, this project will improve the drainage and resurface a portion of the existing roadway. In addition, a turnaround on the west side of Old Cascade Highway will be constructed to provide a safer terminus and a portion of the pavement from the river bank to the turnaround will be removed.

Scope To construct a roundabout at the intersection of Issaquah Hobart Road SE and Cedar Grove Road SE.

Justification Issaquah Hobart Road SE is a road connecting the city of Issaquah to state Highway 18, and the communities of Hobart and Maple Valley. The road is heavily congested during the morning and afternoon peak travel times. This project will replace the three-way intersection at Cedar Grove Road SE that is controlled by a traffic light and will construct a roundabout. The installation of a roundabout will allow traffic to continuously flow through the intersection, thus reducing delays along the saturated corridor.

Status Programmed to start in 2019

King County Road Services Division 2018 Proposed CIP Ver 3

Scope Construct a sidewalk on the west side of Renton Avenue S between 68th Avenue S and S 112th Street, a paved walking surface on the east side of Renton Avenue between 68th Avenue S and S 116th Place, and bicycle lanes on each side of Renton Avenue within the project area.

Justification This non-motorized project will improve the safety of pedestrians and other users in the Renton Avenue corridor and fills a gap in the sidewalk system in unincorporated King County. The project aligns with the County Executive's priorities of Equity and Social Justice and Regional Mobility. The existing walking surface is not compliant with the Americans with Disabilities Act, and it varies from a grass or gravel shoulder to a 4 foot wide uneven, overgrown asphalt walkway to a 6 foot wide paved shoulder. In addition, the existing bicycle lanes are less than 5 feet wide. This road section is a walk route for the Lakeridge and Campbell Hill elementary schools with a total student population of 915 and a 1 mile walk radius. The project area is within an equity and social justice community.

Status Programmed to start 2018. PE Funding awarded.

Revenue Sources

33436 A WA ST Dept of Transportati	0	750,000	4,500,000	0	0	0	0	0	4,500,000
Annual Revenue Total	0	750,000	4,500,000	0	0	0	0	0	4,500,000

Scope Construct a sidewalk and a bicycle lane on the west side of 8th Avenue SW from SW 100th Street to SW 108th Street, a sidewalk and a bicycle lane on the north side of SW 102nd Place between 4th Avenue SW and 6th Avenue SW, and a sidewalk on the east side and a parking area on the west side of 6th Avenue SW from SW 102nd Street to just south of SW 100th Street. In addition, install an intersection improvement at 8th Avenue SW and SW 108th Street, and install beacons at various crossings and pathways surrounding Mount View Elementary, White Center Heights Elementary and Cascade Middle schools.

Justification This non-motorized project will improve the safety of pedestrians and other users in the White Center community and fills a gap in the sidewalk system in unincorporated King County. The project aligns with the County Executive's priorities of Equity and Social Justice, and Regional Mobility. The existing walking surfaces along each section are not compliant with the Americans with Disabilities Act, ranging from one-half-foot of asphalt plus uneven gravel or grass shoulder to 6 feet of asphalt adjacent to the travel lanes. These roadways are identified by the Highline School District as a school walk route and provide access to elementary, middle and senior high schools within one mile. Collision data along the corridor and at these intersections justify these safety improvements. The route is used by those visiting a YWCA, a King County public library and a Seattle/King County Public Health Clinic located within one-half-mile of the project. The project area is within an equity and social justice community and abuts the King County Housing Authority, Greenbridge public and mixed use housing development.

Status Project recommended for 2018 grant call.

Scope Design and construct a mini-roundabout at 8th Avenue SW and SW 108th Street, including a rectangular rapid flashing beacon at the west crosswalk, improvements to the sidewalks, ramps to be compliant with the Americans with Disabilities Act, and other safety improvements.

Justification This project will improve the safety of pedestrians and other users in the White Center community. The intersection was identified as a High Collision Location in King County's report in 2016. The project aligns with the County Executive's priorities of Equity and Social Justice, and Regional Mobility. The intersection is part of a designated "safe route to school" for four Highline schools, and connects to proposed project 1129600 RSD Highline School District Improvements. On-site observations by Road Services Division staff indicate that some drivers fail to yield the right-of-way to pedestrians -- many of which are students. In addition, pedestrian ramps on all quadrants of the intersection are not compliant with the Americans with Disabilities Act.

Scope Design and construct a mini-roundabout at the intersection of SE 176th Street and SE 171st Way, modify sidewalks and reconstruct ramps to be compliant with the Americans with Disabilities Act.

Justification This project will improve the safety of vehicles and other roadway users in the Fairwood community. SE 176th Street connects multi-family residential developments with a busy commercial area. The intersection was identified as a High Collision Location in King County’s reports in 2013 and 2016. The geometry of this intersection is complex and may be confusing for users. In addition, SE 171st Way intersects with SE 176th Street at a skewed angle. Traffic on this segment of SE 176th Street exceeds the posted speed limit, according to a recent speed study. Mini-roundabouts have been effective at reducing collision rates at intersections and they are also effective at reducing conflicts resulting from a skewed intersection such as this.

Scope This project designs and constructs a single-lane roundabout at the intersection of S 360th Street and Military Road S.

Justification This project will improve the safety of motorized and non-motorized users in south King County. This intersection was identified as a High Collision Location in King County's report in 2016. It is currently controlled by a two-way stop. However, northbound left turning traffic and eastbound left turning traffic must compete with heavy southbound traffic on Military Road during the afternoon commute. Roundabouts have been effective at reducing collision rates at intersections, and providing traffic calming for the local neighborhood.

Scope This project designs and constructs a mini-roundabout at the intersection of SW 102nd Street and 8th Avenue SW.

Justification This project will improve the safety of motorized and non-motorized users in the White Center community, and aligns with the County Executive's priorities of Equity and Social Justice, and Regional Mobility. The White Center Elementary School is located on the northeast corner of the intersection, the White Center Heights Park is on the southeast corner and METRO bus stops for two routes are just north of the intersection. In addition, the intersection is part of a walk to school route for the White Center Heights Elementary School and the Cascade Middle School. These destinations result in regular pedestrian traffic at the intersection. On-site observations by Road Services Division staff indicate that many drivers exhibit unsafe driving behaviors around large numbers of pedestrians -- many of which are students. In addition, congestion at the location during drop off and pick up times for the elementary school also creates a safety concern for pedestrians and other users of the intersection.

Status Preliminary Design

King County Road Services Division 2018 Proposed CIP Ver 3

1131333 Flood Control District

Various location in the unincorporated area of King County

Scope This master project will facilitate the transparency of the Flood Control District projects. King County Flood Control District preliminary projects will be evaluated, and if determined feasible, implemented as subprojects of this master.

Justification At the direction of the King County Flood Control District Executive Committee, the Water and Land Resources Division developed a list of preliminary locations where recurring flood events on county roads have isolated or have the potential to isolate communities.
