CAPITAL FACILITIES PLAN

Approved by Board of Directors Resolution No. 937

The Enumclaw School District No. 216 hereby provides to the King County Council, City of Enumclaw and City of Black Diamond, this Capital Facilities Plan documenting present and future school facility requirements of the District. The plan contains all elements required by the Growth Management Act and King Code 21A, including a six (6) year financing plan component.

Executive Summary

In accordance with King County Code 21A.43, this update has been prepared by the Enumclaw School District No. 216 to reflect current conditions in facility usage and needs.

The District's service area includes areas of unincorporated King County, the City of Black Diamond, and the City of Enumclaw. Currently, the District serves a student population of about 4,388 (Oct. 2008) students in kindergarten through grade 12. Current enrollment, along with projections presented herein, indicates that the enrollment growth will continue over the next six years.

Following a period of little to no growth, the District anticipates healthy enrollment gains as a result of growth projected to begin within the six-year planning period (and continue beyond the six year planning period). In particular, the City of Black Diamond is currently reviewing a proposed development of 1,250 dwelling units and a second proposed project of approximately 4,800 residential dwelling units (both developments have primarily single family homes). Using current student generation rates, this could mean that the District's enrollment will grow by approximately 3,548 new students at full build out (using conservative estimates and the best known information regarding unit types). In addition, there is a third potential project of approximately 1,400 dwelling units as well as other smaller scale development within the City of Black Diamond. In the City of Enumclaw, the District is likely to be impacted by growth now that the City of Enumclaw has lifted its sewer moratorium. In addition, the City of Enumciaw is currently reviewing annexation options, which could lead to additional residential development. Finally, there is ongoing, though limited, development in the unincorporated area of King County that is located within the District. With this cumulative potential new development, the District will likely need to add student capacity at all three grade levels. Section IV of this Plan identifies the District's anticipated long term planning with regard to the development within the City of Black Diamond.

This Plan includes the capacity projects planned by the District during this planning period. The District has identified a need during this six-year planning period for additional elementary capacity in the Black Diamond area. As noted above, the District will also need substantial capacity additions in the long-term planning period in response to development activity throughout the District and particularly within the City of Black Diamond. Future updates to this Plan will reflect planning needs in response to growth.

Section I: Six-Year Enrollment Projection

This plan update is based on the anticipated number of students expected to be enrolled through 2014 and beyond. The six-year projection (2009-2014) will assist in determining short term needs and form the basis for assessing the need for impact fees.

Enrollment projections are most accurate for the initial years of the forecast period. Moving further into the future, more assumptions about economic conditions and demographic trends in the area affect the projection. In the event that enrollment growth slows, plans for new facilities can be delayed. It is much more difficult, however, to initiate new projects or speed projects up in the event enrollment growth exceeds the projections. Regular updates of both the enrollment projections and the Capital Facilities Plan (CFP) are essential to good facility planning.

The District relies on two population forecasts for purposes of projecting student enrollment. The first is an estimate by the Superintendent of Public Instruction (OSPI). OSPI estimates future enrollment through 2014 using the cohort survival method. This method estimates how many students in one year will attend the next grade in the following year. Due to the fact that the cohort survival method does not incorporate in-migration, particularly from anticipated new development within the District, these projections are considered highly conservative. See <u>Appendix A</u>.

The second forecast is a modified cohort analysis, which uses the cohort projections as a base and then incorporates assumptions based on known new residential development proposals within the District. See <u>Appendix B</u>. Because this analysis incorporates the expected in-migration to the District from new development, the District uses this analysis for purposes of determining capacity needs throughout the six years of this planning period. Using the modified enrollment projections, the District's enrollment is expected to increase over the six years of this Plan.

With regard to the expected enrollment from the expected 6,050 dwelling units in Black Diamond, the District anticipates, using best known information to date, that building will commence in 2011 (and continue for a period of fifteen years of more thereafter). As such, the enrollment impacts from these two developments begin to show during the last years of this Plan period. Future updates to this Plan will provide additional and updated information regarding these projects and the impacts on District enrollment. ¹

Note that the District uses a headcount enrollment figure because full-day kindergarten has, for several years, been uniform across the District. Due to the state budget, for the 2009-10 school year, the District is moving to a half-day kindergarten with an option to pay (either directly or through scholarships) for full-day kindergarten. The District is also pursuing funding for a pilot full-day kindergarten program. At this time, it is unclear how the funding changes will affect the full-day kindergarten enrollment figures. For this reason, the District is continuing to plan for full-day kindergarten space needs and will re-evaluate this program in the next plan update.

¹ Similarly, the District intends to closely monitor development in the City of Enumclaw (where the current sewer moratorium was recently lifted and annexation options are being studied) in order to further assess the potential and real impacts to student enrollment. Future updates to this Plan will reflect new enrollment information.

Using the modified cohort survival projections, a total enrollment of 4,772 (HC) is expected in 2014. In other words, the District expects the enrollment of 384 additional students between 2008 and 2014. See Table 1.

Table 1: Projected Student Enrollment 2008-2014

| Projection | 2008* | 2009 | 2010 | 2011 | 2012 | 2013 | 2014 | Actual Change | Percent Change |

| (HC) | | | | | | | | | |

^{*} Actual enrollment (October 1, 2008).

Section II: Current Enumclaw School District "Standard of Service"

In order to determine the capacity of the District's facilities, the King County Code 21A refers to a "standard of service" that each school district must establish in order to ascertain its overall capacity.

The standard of service is based upon the number of classrooms available at each school and the desired average class load district-wide. A favorable class size is used to promote the standard and quality of educational programs the residents of the Enumclaw School District expect and support through the passage of levies and bonds.

Rooms designed for special use are not counted as classrooms. Portables used for classrooms are employed on an interim basis only. When additional permanent classrooms are available portables are removed from service, transferred to other locations, or used for non-classroom purposes.

Current Standards of Service for Elementary Students:

Average district wide class size for grades K-4 should not exceed 23 students.

Average district wide class size for grades 5 should not exceed 26 students.

Elementary school permanent capacity should be between 400 and 500 students.

Class size may vary from building to building based upon different influencing factors at each school.

Students may be provided music instruction, physical education, and lunch in a separate classroom or facility.

Students may have scheduled time in a special computer lab.

Special Education for student with disabilities may be provided in a self-contained classroom with a maximum capacity of 10-12 depending on the program.

Identified students will also be provided other educational opportunities in classrooms and/or special spaces for programs designated as follows:

English as a Second Language (ESL)

Integrated Programs & Resource Rooms (for special remedial assistance)

Education for Disadvantage Students (Chapter 1)

Gifted Education

Other Remediation Programs

Learning Assisted Program (LAP)

School Adjustment Programs for severely behavior-disordered students

Hearing Impaired

Mild, Moderate and Severe Developmental Disabilities

Developmental Kindergarten

Preschool Handicapped

Early Childhood Education Assistance Programs (ECEAP)

All of the above special programs require specialized classroom space; thus, the full-time student capacity of buildings housing these programs is reduced. Students leave their regular classroom for a period of time to receive instruction in these special programs. When programs change, program capacity fluctuates and the plan is updated annually to reflect the change in program and capacity.

Current Standards of Service for Secondary Students:

The standards of service outlined below reflect only those programs and educational opportunities provided to secondary students which directly affect the capacity of the school buildings.

Average district wide class size for grades 6-8 should not exceed 28 students.

Middle school permanent capacity should be between 500 and 550 students.

Average district wide class size for grades 9-12 should not exceed 28 students.

High school permanent capacity should not exceed 1,300 students.

Special Education for students with disabilities may be provided in a classroom with a capacity of 10-15 depending on program.

Identified students will also be provided other educational opportunities in classrooms and/or special spaces for programs designated as follows:

Instrumental and Vocal Music

Integrated Programs & Resource Rooms (for special remedial assistance)

Computer Labs

Honors (Gifted) and Advanced Placement Programs

Basic Skills Programs

Variety of Vocational Education Programs

i.e.: Home & Family Life, Business Education (Keyboarding, Accounting, Sales & Marketing, etc.), Woods, Agriculture, Technology, Auto Shop, Drafting, Etc.

Many of these programs require specialized classroom space and can reduce the permanent capacity of the school buildings. In addition, an alternative (continuation) program with limited capacity and enrollment is provided for secondary students at Collins High School and the Collins Extension Center, cooperative programs with Sumner and White River School districts housed in Buckley.

Each schools' available capacity will vary with the type of programs and space utilization in the building. When a large number of portables are added to site to add capacity, other support facilities, such as gymnasiums, lunch areas, halls, etc. become inadequate.

Section III: Inventory and Projected Six-Year Enrollment Capacity of Schools

Currently, the District has permanent program capacity to house 4,352 students based on the District's Standard of Service as set forth in Section II. Approximately 100 students are served by Collins High School and JR High and the Collins Extension Center program in Buckley. Students come from the Enumclaw, White River, Orting and Sumner School Districts. Children attending Collins High School, JR High and Collins Extension Center are counted as students in the White River School District. Portable classroom capacity for 440 students brings the total capacity to 4,792. A summary of the current enrollment and proposed capacity, and the breakdown at each grade span, is as follows:

Table 2: Summary of Capacity

| 2008-09 Current | Permanent Capacity | Portable Capacity | Total Capacity | Oct 2008 Enrollment (HC) | Surplus Capacity w/o Portables | Surplus Capacity w/ Portables |
|--------------------|-----------------------|----------------------|-------------------|--------------------------------|--------------------------------------|-------------------------------------|
| Elementary | 1,916 | 220 | 2,136 | 1,861 | 55 | 275 |
| Middle School | 1,092 | 0 | 1,092 | 1,089 | 3 | |
| Senior High | 1,344 | 220 | 1,564 | 1,438 | -220 | 126 |
| District Total | 4,352 | 440 | 4,792 | 4,388 | -162 | 401 |

Included in this Plan is an inventory of the District's schools by type, address and current capacity. See Table 3. In the fall of 2005, the District closed J.J. Smith Elementary due to the age and condition of the building. Because the building does not meet current educational instruction requirements, the District would need to comprehensively modernize or completely replace the building before it could be used for classroom instruction. While the building remains on the District's inventory, the District is unable to use the building for instructional purposes. As such, J.J. Smith is not included in the District's inventory for purposes of this Capital Facilities Plan.

Based on the enrollment forecasts, current inventory and program capacity, current standard of service, portable capacity, and construction of new classroom spaces, the District anticipates having sufficient capacity to house students during the next two to three years. However, with the planned new development commencing in the City of Black Diamond and potential development in the City of Enumclaw and King County during the six year planning period, the District anticipates needing to add additional student capacity in the short term. Table 4 analyzes projected enrollment and capacity.

TABLE 3: Inventory SummaryAn inventory of existing permanent school facilities including the locations and capacities of those facilities is provided below.

| Existing Facility | Location | Capacity ¹ |
|--|---|-----------------------|
| Black Diamond Elementary | 25314 Baker Street Black Diamond, WA 98010 | 193 |

| | | | | | | | |

2008 enrollment is actual (based upon October 2008 reported enrollment).

^{*}Note: the District uses headcount enrollment projections due to the fact that all-day kindergarten is uniform across the District.

^{**}The existing Black Diamond Elementary School will be closed for reconstruction. Students will be temporarily housed in portables or at other school sites.

^{***}The new Black Diamond Elementary School, with expanded capacity, is scheduled to open.

Section IV: The District's Planning and Construction Plan

Trigger of Construction

Planning for new schools and additions to existing schools is triggered by comparing the enrollment forecasts with District capacity. Projected available student capacity was derived by subtracting projected student enrollment from existing school capacity for each of the six years in the forecast period (2009-2014). Capacity needs are expressed in terms of "Surplus/(Deficit) of Perm. Capacity." A "(Deficit)" in permanent capacity means that there will be unhoused students (who will likely be served in portable classrooms, in classrooms where class size exceeds State standards, Board expectations and/or contractually negotiated agreements within the local school district). The unhoused student levels are shown in Table 5. Note: for purposes of assessing capacity, the District has included the capacity improvements that are planned over the six year planning period. As previously discussed in this Plan, the District intends to monitor development and enrollment growth and will continue to assess the need for any capacity additions in future updates to this Plan.

Facility Needs (2009-2014)

Based upon present information, it appears that the District should plan for additional elementary school capacity in the Black Diamond area. At the present time, the District anticipates that this will be accomplished with a replacement of and capacity addition at the existing Black Diamond Elementary School. Notably, creating capacity in this area of the District will also ensure that elementary schools in other areas of the District are not overcrowded. The projects listed in Table 5 are anticipated based upon information available at the present time and are only preliminary planning estimates. Future updates to this Plan will reflect actual planning decisions.

Facility Needs (Long Term)

Based upon present information regarding the development activity within the City of Black Diamond, the District is planning for long term needs in the Black Diamond area. The District anticipates that, based upon service standards and enrollment projections, the two projects currently under review will necessitate the need for four new elementary schools, two new middle schools, and one new high school. The third project that has been identified in the Black Diamond area would necessitate, at a minimum, an additional elementary school. The District is uncertain at this time regarding long term additional capacity needs that may result from development within the City of Enumclaw and unincorporated King County. The District will continue to monitor development activity and related capacity needs. Future updates to this Plan will reflect the planning needs in response to long term growth impacts.

General Considerations

The decision and ability to actually construct a new school facility involve multiple factors not wholly within the control of the District. The availability of funds is the biggest consideration; whether those funds are generated from locally approved bonds, state construction funds, impact fees, or mitigation payments.

The District is also currently researching the possible modernization/replacement of one or more of its existing facilities. This decision will be based upon the need for new facilities due to the age of the facilities and educational program needs. Modernization/replacement projects will generally not include new capacity additions. Future updates to this Plan will reflect actual planning decisions.

 *Replacement of existing Black Diamond Elementary and related new capacity.

Section V: Capital Facilities Financing Plan

The Six-Year Finance Plan shown on Table 6 demonstrates how the District intends to fund new construction and improvements to school facilities for the years of 2009-2014. The financing plan and impact fee calculation formula also differentiate between capacity and noncapacity projects.

The District's ability to accomplish its building program is dependent on the following funding sources:

- Passage of general obligation bonds by District voters
- · Collection of school mitigation and impact fees
- State equalization funds

General Obligation Bonds

Bonds are typically used to fund construction of new schools and other capital improvement projects. A 60% voter approval is required to pass a bond. Bonds are then retired through collection of property taxes. The District will need to present a bond proposal to its voters for the replacement of the existing Black Diamond Elementary School within the six years of this Plan.

State Equalization Funds

State Equalization Funds come from the Common School Construction Fund. Bonds are sold on behalf of the fund then retired from revenues accruing predominantly from the sale of renewable resources (i.e. timber) from State school lands set aside by the Enabling Act of 1889. If these sources are insufficient to meet needs, the Legislature can appropriate funds or the State Board of Education can establish a moratorium on certain projects.

School districts may qualify for State Equalization Funds for specific capital projects. To qualify, a project must first meet a State established criteria of need. This is determined by a formula that specifies the amount of square footage the State will help finance to provide permanent structures for the unhoused enrollment projected for the district. If a project qualifies, it can become part of a State prioritization system. This system prioritizes allocation of available funding resources to school districts statewide based on seven prioritization categories. Funds are then disbursed to the districts based on a formula which calculates district assessed valuation per pupil relative to the whole State assessed valuation per pupil to establish the percent of the total project cost to be paid by the State. The State contribution can range from less than half to more than 70% of the project's cost.

State Equalization Funds can only be applied to major school construction projects. Site acquisition and minor improvements are not eligible to receive matching funds from the State. Because availability of State Equalization Funds has not been able to keep pace with the rapid enrollment growth occurring in many of Washington's school districts, equalization funds from the State may not be received by a school district until

after a school has been constructed. In such cases, the District must "front fund" a project. That is, the District must finance the complete project with local funds (the future State's share coming from funds allocated to future District projects). When the State share is finally disbursed (without accounting for escalation) the future District project is partially reimbursed.

Because of the method of computing State Equalization, the official percentage match portion calculated by the State does not typically equal the actual percentage of total facility cost. The State Equalization Ratio for the Enumciaw School District is approximately 55.35%. Notably, this only applies to costs that the State considers eligible for equalization. Land costs and other development costs are not considered eligible for State Equalization Funds. Furthermore, the State only allows 90 square feet per elementary student while the District's service standard requires more square feet per student. This additional space must be funded with local dollars. For a typical project that has maximum State funding, less that 50% of the total project costs will covered by state match dollars.

Mitigation Payments and School Impact Fees

For development in those jurisdictions that have not adopted a school impact fee ordinance, the District relies on mitigation required under the State Environmental Policy Act and related statutes.

In those jurisdictions where a school impact fee ordinance is in place, the District requests that an impact fee be collected by the permitting agency for the construction of any new residential dwelling unit.

Fees assessed are based on the new enrollment growth in the District. By law, new development cannot be assessed impact fees to correct existing deficiencies.

Impact fees have been calculated utilizing the formula in the King County Ordinance 11621. The resulting figures are based on the District's cost per dwelling unit to purchase land for school sites, make site improvements, construct schools and purchase, install or relocate temporary facilities (Portables). Credits have also been applied in the formula to account for State Equalization Funds to be reimbursed to the District and projected future property taxes to be paid by the owner of a dwelling unit.

The District's cost per dwelling unit is derived by multiplying the cost per student by the applicable student generation rate per dwelling unit. King County Ordinance 11621 defines "Student Factor" as "the number derived by a school district to describe how many students of each grade span are expected to be generated by a dwelling unit. Student factors shall be based on district records of average actual student generation rates for new developments constructed over a period of not more than five (5) years prior to the date of the fee calculation; provided that, if such information is not available in the district, the data from adjacent districts, districts with similar demographics, or county wide averages may be used."

Enumclaw School District's student generation factors are based on the 2009 average of student factors from surrounding districts in King County. See Table 7. The surrounding districts include Auburn, Issaquah, Kent, and Lake Washington.

Table 7 - Summary of Student Generation Rate (SGR)

Single Family Dwelling Unit:

| | Auburn | Issaquah | Kent | Lk. Wash | Average |
