

Conservation Futures (CFT) Project Descriptions

Suburban City CFT Project:

1047246 Kent – Huse Property Acquisition

The goal of this project is to acquire property for passive recreational use, trail access, and a buffer to Soos Creek Park. The City of Kent Parks Department purchased the property, but had a budget shortfall of \$125,000, for which it requested additional CFT funds to help make up the difference.

1047222 Clark Lake

This is a City of Kent project to acquire remaining inholdings at Clark Lake Park, located on SE 240th Street on the east side of the Kent Plateau. There are three remaining parcels in the park for which CFT funds have been available for over five years, however there are currently not willing sellers of those parcels. The last two remaining small inholdings in the park, which together total one acre, will be added to the project scope, as one of them is a willing seller. \$125,000 will be reallocated from this project to the City of Kent Huse project, which has a project funding shortfall.

Seattle CFT Projects:

1116261 SEA Smith Cove Park Addition

\$625,000 in CFT funds will be reallocated to this project from the abandoned First Hill Open Space CFT project, also in Seattle.

1112180 University District Urban Center Park

This project received Conservation Futures funding by Ordinance 17232 with supplemental funding by Ordinance 17349, under the condition that Seattle would identify a final open space site for approval by King County. King County approves Seattle's selection of the site on 9th Avenue NE, adjacent to Christy Park and south of NE 43rd Street in the University District.
