King County South Entry

Subject:

Project Cost Estimate

Comments:

The total estimated project cost for the South Entry is \$7,842,000. The initial phase through September 2007 to complete the design work and then either bid or negotiate (MACC) the construction cost would cost \$375,000. Key estimate assumptions and alternates are as follows:

Assumptions/Exclusions – The park will be redone and funded by the City of Seattle. These costs are not included. A new remote loading facility would be constructed at the south end of the existing tunnel (next to Dilling Way) and deliveries would come through the existing tunnel. It is assumed that the Third Avenue building entry will be closed and the existing security screening equipment will be relocated to this new entry point. Construction escalation for fourteen months has been included based on an annual rate of 10%. A project contingency of 20% has been included per your instructions.

Schedule Basis - Initial funding would be appropriated by King

County this year. Design would be completed from March through August 2007. The general contractor would be given notice to proceed in September 2007 allowing shop drawings and material fabrication to commence. Construction at the site would run from January 2008 through August 2008.

<u>Alternates</u> – Three alternates were also estimated and are not included in the total cost.

- A steel and glass entry canopy would cost \$300,000.
- Demolition of the existing tunnel and replacement with a new tunnel structure including an underground turnaround area at the south face of the Courthouse would cost \$1,590,000. This would provide two travel lanes in this tunnel again.
- An automated conveyance system in the tunnel for transporting goods to and from the Courthouse to the remote loading facility would cost approximately \$585,000. This alternative would not be necessary if you choose to rebuild the tunnel in the alternate described above.
