

CHAPTER 7 PARKS, OPEN SPACE, AND CULTURAL RESOURCES

The quality of life in King County is directly linked to the quality of the region's environment, with its diverse landscapes reaching from Puget Sound to the Cascade Mountains, scenic beauty and the variety of cultural and recreational opportunities that enriches lives. These vital natural and cultural resources contribute to the physical, mental, and emotional well-being of county residents and are integral to attracting employment and business activity. The policies in this chapter focus on the $((\epsilon))\underline{C}$ ounty's role as a regional leader in acquiring and protecting its system of $((\epsilon))\underline{C}$ ounty-owned parks, forests, natural areas, trails and other open spaces. In addition to protecting these natural resources, the $((\epsilon))\underline{C}$ ounty promotes a high quality of life by supporting cultural opportunities such as music, theater, ethnic heritage museums, literary activities, public art collections, urban historic districts, ((and)) rural landmarks<u>, and Indian tribal cultural and historic resources</u>.

6 7 8

II I. Parks, Recreation and Open Space

12 The Growth Management Act requires cities and counties to identify open space corridors within and between 13 ((U))urban ((Growth A))areas, including lands useful for recreation, wildlife habitat, trails, and connection of 14 critical areas. The ((e))County's designation of open space includes those lands that are part of the King County 15 open space system as well as state parks and natural resource conservation areas and federal wilderness areas in 16 unincorporated King County. See the Land Use Map ((is)) located at the end of Chapter 1, Regional Growth Management Planning. The Growth Management Act states that counties are the providers of regional services 17 18 and local rural services, while cities are the appropriate providers of local urban services. As the regional 19 government, King County manages a regional open space system of parks, regional trails, natural or ecological 20 areas and working resource lands. While the cities are the managers of local parks, trails and open space lands in the incorporated portions of the Urban Growth Area, King County will continue to be the provider of local 21 22 parks, trails and open space lands in the Rural Area, ((and)) Natural Resource Lands, and the urban 23 unincorporated area. 24 25 ((Population growth and associated development continue to transform the county's landscape as forested and 26 open lands have been converted to urban uses resulting in the fragmentation of wildlife corridors and riparian 27 habitat, as well as the depletion of working resource lands and open vistas.)) The policies in this section provide 28 guidance for the open space system of lands the ((e))County owns and manages to protect and restore the health 29 of natural systems, provide recreational opportunities, shape community character, and help sustain agriculture 30 and forestry economics. Additional benefits ((of the open space and regional trails systems)) beyond recreation 31 include providing transportation alternatives as well as health benefits from physical activity and access to the 32 outdoors for those who have mobility disabilities. Large forested parks and natural areas help maintain air 33 quality, water quality and quantity, and help mitigate the effects of climate change. Parks and green spaces also 34 provide stress relief, rest and relaxation and contribute to improved mental health and well-being. The policies 35 also reinforce the ((e))County's focus on linking components of the open space system with an emphasis on 36 completing the regional trails system, connecting riparian habitat, and reducing forestland fragmentation. 37 38 Regional recreation and multiuse parks serve a countywide population and provide high-quality, developed 39 facilities that support multiple events, large group gatherings, and special events. Passive parks serve less formal, 40 organized or intense activities. Local ((rural)) park sites provide for active and passive recreation close to home. 41 The Regional Trails ((System)) network forms the foundation for King County and other agencies' shared use 42 path networks that reach broadly throughout the county linking cities, other counties, and the state, and offering extensive recreation opportunities. In addition to service recreational users, ((T)) the Regional Trails ((System is 43 44 also an essential part of King County's multimodal transportation system, providing)) network also provides 45 interconnected ((nonmotorized travel)) active transportation options. Local trails provide circulation within local communities and access to the larger ((r))Regional ((t))Trails ((system)) network. 46

47

48 Natural areas and working forest sites can provide opportunities for informal, low intensity and low impact 49 activities which enable the understanding, appreciation and significance of natural resources. Passive recreation 50 use of these sites requires little infrastructure, although amenities such as backcountry trails and trailhead 51 facilities may be needed to accommodate appropriate types and levels of public use. Natural areas often contain 52 undeveloped or un-developable acreage that is managed primarily to support habitat to provide ecological 53 benefits and contribute to biodiversity. Forested areas provide carbon sequestration and reduction in greenhouse 54 gas emissions, and play a role in adaptation to climate change. 55 56 For the purposes of the King County open space system, "regional" means sites and facilities that are large in 57 size and serve communities from long distances and multiple jurisdictions. "Local" means sites and facilities 58 that serve unincorporated communities and are smaller sites servicing close-to-home park and recreation needs. 59 60 ((P-101 For the purposes of the King County open space system: "regional" shall define 61 sites and facilities that are large in size, have unique features or characteristics 62 or significant ecological value, and serve communities from many jurisdictions; and "local" shall define sites and facilities that serve unincorporated 63 communities predominately in the Rural Area and Natural Resource Lands.)) 64

65

A. ((The Regional)) <u>King County's</u> Open Space System of Parks, Trails, Natural Areas and Working Resource Lands

68 The policies in this chapter provide the basis to develop a contiguous and functional open space system, 69 connecting and including recreation and multiuse parks, natural areas, working resource lands and regional 70 trails. The components of this vital system contribute to the physical, mental and emotional well-being of county 71 residents. ((Other publicly owned lands such as Farmland Preservation Program and Flood Hazard 72 Management properties also contribute to the system and its environmental benefits.)) The Open Space System 73 Map shows these publicly-owned open space lands and provides the basis for identifying the linkages necessary 74 to strengthen the physical and functional connectivity of the ((e))<u>C</u>ounty's open space system. The following 75 policies reinforce the importance of the ((e))<u>C</u>ounty's open space system, and guide planning and management of 76 appropriate recreational opportunities that best meet regional and local ((rural)) unincorporated needs, preserve 77 ecologically significant resources and protect working resource lands. 78 79 P-102 King County shall be a regional ((leader in the provision of a regional)) provider

80	0	<u>of an</u> open space system consisting of <u>regional and local</u> parks, regional <u>and</u>
81	1	backcountry trails, natural areas, working resource lands, and flood hazard
82	2	management lands. The regional network of open space(($m{s}$)) <u>should</u> provide(($m{s}$))
83	3	benefits to all county residents <u>equitably</u> including: recreation facilities,
84	4	conservation of natural and working resource lands, improving air and water
85	5	quality, ((flood hazard management)) and related programs and services, thereby

86		contributing to the physical, mental <u>,</u> and emotional well-being of county
87		residents.
88		
89	P-103	King County ((will)) <u>shall</u> preserve wildlife corridors, riparian habitat, contiguous
90		forest land, as well as open space areas separating ((U)) <u>u</u> rban ((A)) <u>a</u> reas from <u>the</u>
91		Rural Area((s)) and Natural Resource Lands as part of its open space system.
~~		

92

93 B. Components of ((the Regional)) <u>King County's</u> Open Space System

King County's regional open space system contains lands with many functions including: active and passive recreation; special purpose sites such as pools and trails; natural areas, with educational, scientific, wildlife habitat, cultural or scenic values; working resource lands including agriculture and forest((-))lands; and community-defining systems, including physical and or visual buffers between areas of urban and rural development. Many sites within the open space system serve more than one function, but each site generally serves a primary role within the system.

100

101 **1. Recreation Sites**

102 Regional Parks

103 King County's regional ((recreation)) parks and facilities accommodate a wide range of ((active and passive)) 104 recreational activities. Recreation sites that make up a functional system include: highly developed sites with 105 organized, scheduled activities such as soccer and softball; ((passive or low impact recreation sites that include 106 ((both physical activities and less intense activities such as)) informal play, trail use, and picnicking; and multiuse 107 sites that include a ((combination of active recreation and passive)) spectrum of recreation ((with less intensely 108 developed facilities and natural areas)) opportunities. ((Regional recreation parks serve a broad spectrum of 109 users. These parks and their facilities include those not generally viable for serving individual communities alone 110 due to site or specialized facility requirements or the unique nature of the offering requiring a broader user base 111 to support them.)) Regional parks include recreational facilities that rely on a broad user base, require a large area, include a specialized facility, or offer a unique experience. 112 113 114 P-104 King County shall provide regional parks and recreational facilities that serve 115 users from multiple neighborhoods and communities. Regional parks include 116 unique sites and facilities that should be equitably and geographically 117 distributed. 118 119 Educational and interpretive programming promotes appropriate and enjoyable use of the park system, increases 120 public awareness of the park system's resources and values, and builds support and stewardship for the system 121 and its resources. Programming and special events provide activities and entertainment that attract people to the 122 parks. 123

Attachment 2

((2016)) <u>2024 King County</u> Comprehensive Plan – ((updated December 6, 2022)) <u>Adopted TBD</u> <u>Attachment A to</u>Ordinance ((18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555)) <u>TBD</u>

124	P-105	King County should facilitate affordable and culturally((-))_accessible	
125		educational, interpretive <u>.</u> and aquatic programs on ((c)) <u>C</u> ounty-owned properties	
126		that further the enjoyment, understanding and appreciation of the natural,	
127		cultural, and recreational resources of the park system and the region.	
128			
129	P-106	King County should facilitate and seek regional and national programs and	
130		special events at regional sites and facilities.	
131			
132	2. Loca	Il Parks <u>, Trails, and Open Spaces</u>	
133	In the Rural A	rea, the large geographic area and dispersed populations, individual lots, low residential density	
134	and economies	of site management dictate fewer and smaller individual park sites than in urban areas. Nearby	
135	regional parks	and other open spaces also provide recreational opportunities in the Rural Area and Natural	
136	Resource Land	ls. King County's role in the Rural Area and Natural Resource Lands ((will)) reflect <u>s</u> rural levels	
137	of service. Kin	g County also provides local parks in unincorporated urban areas and the County's role in these	
138	parks reflect urban levels of service. These vital local parks, local trails, and recreational facilities contribute to		
139	the physical, mental, and emotional well-being of county residents.		
140			
141	P-107	King County shall provide local parks, trails and other open spaces in ((the Rural	
142		Area)) unincorporated areas. Local parks, trails and other open spaces that	
143		complement the regional system should be provided in each community ((in	
144		Rural Areas)) to meet local recreation <u>and open space</u> needs and enhance	
145		environmental <u>quality</u> and ((visual quality)) <u>view corridors</u> .	
146			
147	P-108	King County should provide local parks within ((rural)) <u>unincorporated</u>	
148		communities with fields and other facilities that provide opportunities for active	
149		sports. These facilities shall be in addition to and compatible with King County's	
150		regional parks.	
151			
152	<u>P-108a</u>	King County shall consider equity in the development and acquisition of its open	
153		space system to help reduce health disparities and promote environmental	
154		justice.	
155			

156 3. Regional Trails ((System)) <u>Network</u>

The Regional Trails ((System)) <u>network</u> is a major element of the county's greater open space system that
provides opportunities for recreation and ((nonmotorized transportation)) <u>active transportation</u>, as well as
corridors often used by wildlife. This system contributes to the health and well-being of ((both county residents))
<u>trail users</u> and the environment. King County is home to one of the largest ((nonmotorized)) regional trail
networks in the North America. King County and local jurisdictions collectively offer ((approximately)) <u>over</u>
300 miles of shared-use (multi-purpose) paved and unpaved paths connecting communities and linking Puget

163 Sound urban areas with Rural Areas, Natural Resource Lands and the Cascade Mountains. ((These facilities are

- 164 classified as shared use paths by the Federal Highway Administration and are a component of the federally-
- 165 designated regional transportation plan administered by the Puget Sound Regional Council. The)) King County
- 166 government stewards some 175 miles of the overall network. The remaining portions of the network are
- 167 managed by local cities, the Port of Seattle, and Washington State.
- 168

169 Regional trails are ((non-motorized facilities)) used for bicycling, walking, jogging, skating, horseback riding

- 170 where appropriate, and other activities. The paths provide both recreational opportunities and mobility options,
- 171 connecting users in neighborhoods and communities with schools, parks, employment, and other important
- destinations. Regional trails may be paved or soft-surface (gravel) or a combination of both. The network
- 173 reaches more than 30 cities throughout King County, and use is extensive. It has been estimated that ((12
- 174 million bicycle and pedestrian)) millions of trips are made on the network in King County annually. These paths
- serve a wide range of land uses, both urban and rural. They link urban centers, business districts,

176 neighborhoods, universities, schools, parks, and transportation centers. They run through cities, along

- 177 waterfronts and scenic shorelines, through river valleys and farmlands, and into the Cascade forests.
- 178

While intended originally as recreational amenities and linear parks, the regional trails in King County have
evolved to provide not only extensive recreation, but also important active transportation opportunities, and
social and cultural venues. Today, thousands of daily trips are made on paths such as the Burke-Gilman Trail
between suburban cities and Seattle.

183

184 Recreation remains the primary use, but ((an increasing number of those)) some trips are made for work and 185 school, combining the healthy recreational benefits of cycling and walking with the workday commute. The 186 trails are also used for a variety of special activities that enrich life in the central Puget Sound region, from 187 art-related treks to community fundraisers to long-distance cycling events.

188

189 Regional trails in King County now include ((not only)) decades-old popular routes like the Burke-Gilman 190 Trail((, but also)) and trails networking many landscapes and destinations. Routes follow abandoned railroad 191 lines, water pipeline and power line corridors, river levees, and other special features or they may establish their 192 own alignments as they seek out practical courses between destinations. More interconnections provide more 193 travel opportunities. Paths access parks and scenic landscapes, but they also now serve urban centers, major 194 transit facilities, and other important everyday destinations. Future facilities will continue to provide the joint 195 benefits of recreation and regional mobility. More information regarding King County's Regional Trails 196 ((System)) network including the proposed future regional trails plan, the Regional Trails Needs Report, can be 197 found in ((the Appendices)) Appendix C2. 198

199P-109King County shall complete <u>and maintain</u> a regional trails ((system)) <u>network</u>,200((linking trail corridors to form a countywide network)) to provide recreational201opportunities and to allow for transportation and wildlife corridor uses to

- 202contribute to the health and wellbeing of both trail users and the environment.203King County ((will)) shall continue to primarily own the land necessary for the204operation and management of the trail ((system)) network and pursue205public-private funding opportunities for development and maintenance, while206ensuring opportunities for access for all King County residents.
- 207
- Policies related to the planning, development, and management of the Regional Trails ((System)) <u>network</u> can be found in the King County ((Parks)) Open Space Plan: Parks, Trails, and Natural Areas, a functional plan of the

King County Comprehensive Plan. Additional policies can also be found in Chapter 8, Transportation.

210 211

227

212 ((Eastside Rail Corridor)) Eastrail

213 ((The Eastside Rail Corridor)) Eastrail provides a ((rare and)) unique opportunity to develop a major north-214 south, dual use (((recreational trail and public transportation))) corridor in support of active transportation and 215 transit mobility ((through transit, nonmotorized and active transportation, including access to transit outside the 216 corridor)), consistent with its federal railbanked status. The owners share ((other)) multiple objectives for the 217 corridor including accommodating utilities, parks, recreation, and cultural amenities, and encouraging equitable 218 access to these facilities, and to housing and jobs, in support of economic opportunity for all King County residents. ((The corridor will be the focus of regional trail planning and development by King County Parks)) 219 220 King County is actively developing the regional trail component of Eastrail, connecting regional growth centers, 221 urban communities, other regional trails, and both local and high-capacity transit. The trail will connect to 222 existing major regional trail corridors including the Mountains to Sound/I-90 Trail, State Route 520 Trail, 223 Sammamish River Trail, Lake to Sound Trail, and others. ((The trail will provide opportunities for safe 224 recreation and mobility as a component of King County's Regional Trails System and provide opportunities for 225 environmental benefits to the region.)) The trail will help enhance the quality of life of the region's residents by 226 providing important recreation and mobility options for adjacent land uses.

228	((P-110a)) <u>P-110</u>	((The Eastside Rail Corridor regional trail shall be developed)) <u>King County shall</u>
229		develop Eastrail in coordination with the other trail owners, other jurisdictions,
230		local and state agencies, utilities with property interests, and nonprofit and
231		private partners to enhance regional recreation and mobility and connectivity
232		between regional growth centers, urban communities, other regional trails, and
233		local and high-capacity transit, consistent with a commitment to dual use
234		(recreational trail and public transportation), and consistent with federal
235		railbanking. ((The trail will enhance the quality of life by providing important
236		recreation and mobility options for adjacent land uses.)) The trail corridor shall
237		include high-quality landscaping and environmental features, where appropriate,
238		to enhance the trail experience and to provide ecological benefits to the region.
239		
240	((P-110	King County shall include the planning and development of a regional trail in the
241		Eastside Rail Corridor, to enhance regional recreation and mobility. This facility

	<u>Attachment A</u>	((2016)) <u>2024 King County</u> Comprehensive Plan – ((updated December 6, 2022)) <u>Adopted TBD</u> <u>to</u> Ordinance ((18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555)) <u>TBD</u>	
242		will be planned and developed in coordination with other owners of BNSF's	
243		former interests, and in close coordination with King County Department of	
244		Transportation and other state and local agencies, in support of the commitment	
245		to dual use (recreational trail and public transportation), consistent with federal	
246		railbanking, and multiple objectives of King County and the other owners. ((The	
247		trail will be identified in King County's regional trails plan, the Regional Trails	
248		Needs Report, as a priority capital facility.	
249			
250	P-110b	The Eastside Rail Corridor regional trail shall be developed to the most current	
251		regional trail standards, ensuring safe recreation and mobility in accessing trails,	
252		streets, and transit consistent with a commitment to dual use (recreational trail	
253		and public transportation), and consistent with federal railbanking. The trail	
254		corridor will include high-quality landscaping and environmental features where	
255		appropriate to enhance the trail experience and to provide ecologic benefits to	
256		the region.	
257			
258	4.)) Multi-Us	e Sites	
259	Each portion of a m	ulti-use site will be developed and managed to support the level of use or conservation	
260	appropriate to that p	portion of the site.	
261			
262	P-110c	Multi-use sites <u>should</u> include lands that have areas of environmental value, but	
263		also may accommodate extensive public access and active and/or passive	
264		recreation opportunities.	
265			
266	5. Natural	Areas	
267	The King County of	pen space system includes many sites owned by King County whose primary purpose is to	
268	conserve and restore	ecological value. These sites may allow varying types of public use that do not harm the	
269	ecological resources	of the site. These sites include many scenic and environmental features of King County's	
270	landscape, which pla	ay a role in protecting a diversity of vegetation and fish and wildlife important to the beauty	
271	and character of the region. King County ((will)) focus <u>es</u> on linking natural areas to create regional open space		
272	corridors of greenways and waterways along the major natural systems, such as rivers and shorelines.		
273	-		
274	Preserving these area	as in partnership with other agencies, <u>Indian tribes</u> , private groups and individuals will	
275	-	ues including environmental and economic benefits of air and water quality, surface water	
276	management, aquifer recharge, ((and)) fish and wildlife habitat preservation and enhancement, and preservation		
270	-	ural and historic resources.	
278	<u>or monun tribui culti</u>	And and motore reported.	
210			

279	P-111	((King County will manage its)) <u>Management of</u> natural areas <u>owned by King</u>
280		<u>County shall</u> ((to)) protect, preserve <u>,</u> and enhance important natural resource
281		habitat, biological diversity, and the ecological integrity of natural systems.
282		
283	P-112	((King County shall recognize and protect t)) <u>T</u> he natural character and ecological
284		value of its natural areas <u>owned by King County shall be protected</u> . These areas
285		are important for preserving fish and wildlife and their habitat, native vegetation,
286		((and)) features of scientific and educational value <u>, and Indian tribal cultural and</u>
287		historic resources. Development and public use may be limited to preserve the
288		natural state and reduce disturbance of the natural <u>and cultural</u> resources. Site
289		improvements should be focused on providing educational and interpretive
290		opportunities. Public access should be directed to the less fragile portions of a
291		site to ensure continued protection of the ecological resources.
292		

293

6. Working Resource Lands

294 The ((e))County's open space system includes lands owned by King County that are managed as working farms 295 and forests. The ((c))County has purchased these properties ((in fee or less than fee ownership)) with the 296 intention of conserving the resource use on the site. County ownership and management of these lands 297 conserves the resource land base, allowing the resource activity to continue, while contributing to the local 298 ((rural)) economy, providing healthy foods, reducing carbon emissions associated with importing food into the 299 region, providing education about agriculture and forestry, and providing passive recreational opportunities on 300 some properties. The ((e))County's policies to conserve farmland and encourage agriculture are discussed in 301 Chapter 3, Rural Areas and Natural Resource Lands.

302

303 Farmland

304 ((The Farmland Preservation Program is a county program that preserves farmland through the purchase of development rights. The farms in the Farmland Preservation Program generally remain in private ownership. 305 306 The county has purchased a farm outright in a few cases, with the intention of reselling the land without the 307 development rights to a private farmer.)) The County occasionally acquires farmland, either to address farmland 308 access issues or as part of an acquisition for other purposes, such as habitat protection, food risk reduction, or 309 recreational access. Although the County usually intends to resell farmland to a private farmer while retaining a Farmland Preservation Program easement, some farmland has strategic importance to advancing County 310 311 initiatives and priorities and will be retained in County ownership long-term. The ((e))County has developed a 312 program to lease farms ((to small scale farmers)) until such time that the property ((can be)) is resold. 313 314 P-113 Farmland owned by King County shall: 315 _((c))Contribute to the preservation of contiguous tracts of agricultural a. 316 land; and

317 b. ((make affordable farmland evailable for use by small-scale and new 318 farmser)) Provide access to farmland for beginning, low-income, 319 historically underserved, and socially disadvantaged farmers. 320 P-114 321 P-114 322 ((B))best ((M))management practices, ((I))Integrated ((P))best ((M))management, 323 and other sustainable farming methods. 324 P-115 The use and management of farmlands owned by King County shall be 326 consistent with any requirements imposed by the funding program used to 327 purchase each property and shall serve to meet and enhance the objectives of 328 the King County Agriculture Program. 329 Forestland 330 Forestland 331 One goal of the King County Open Space System is the conservation of forestland, through acquisition of land or 332 conservation easements, to decrease threat of conversion resulting from development and fragmentation, as well 333 as promote the understanding of the importance of forest management practices and contribute to the 334 retention of a contiguous forest. 335 retention of a contiguous forest. 344 These properties contain val		<u>Attachment /</u>		16)) <u>2024 King County</u> Comprehensive Plan — ((updated December 6, 2022)) <u>Adopted TBD</u> nance ((18427, as amended by Ordinances 18623, 18810, 19034, 19146, and 19555)) <u>TBD</u>

(IB))best (IM))management practices, (II))integrated (IP))best (IM))management, and other sustainable farming methods. P-115 The use and management of farmlands owned by King County shall be consistent with any requirements imposed by the funding program used to purchase each property and shall serve to meet and enhance the objectives of the King County Agriculture Program. Pone goal of the King County Open Space System is the conservation of forestland, through acquisition of land or conservation casements, to decrease threat of conversion resulting from development and fragmentation, as well as promote the understanding of the importance of forest management, including restoration of the forests to more natural conditions. The working forests owned by King County are generally very large parcels of land (several hundred acres or more) that support sustainable forest management practices and contribute to the reterition of a contiguous forest. These properties contain valuable fish and wildlife habitat, provide environmental services (such as stormwater management, clean air and water and carbon sequestration), and help mitigate the impacts of climate change, as well as provide high-quality passive recreation, scenic vistas, and educational((<i>A</i>)) and interpretation opportunities. P-116 Working forest land and conservation easements owned by King County shall	320			
323 and other sustainable farming methods. 324 9-115 The use and management of farmlands owned by King County shall be 326 consistent with any requirements imposed by the funding program used to 327 purchase each property and shall serve to meet and enhance the objectives of 328 the King County Agriculture Program. 329 Forestland 330 Cone goal of the King County Open Space System is the conservation of forestland, through acquisition of land or 331 One goal of the King County Open Space System is the conservation of forestland, through acquisition of land or 332 conservation easements, to decrease threat of conversion resulting from development and fragmentation, as well 333 as promote the understanding of the importance of forest management, including restoration of the forests to 334 more natural conditions. The working forests owned by King County are generally very large parcels of land 335 (several hundred acres or more) that support sustainable forest management practices and contribute to the 336 retention of a contiguous forest. 337 These properties contain valuable fish and wildlife habitat, provide environmental services (such as stormwater 336 management, clean air and water and carbon sequestration), and help mitigate the impacts of climate change, as	321	P-114	Farm	ers leasing properties owned by King County shall use ((A)) <u>a</u> gricultural

 Forest land owned by King County shall provide a balance between sustainable

 358
 timber production, conservation and restoration of resources, and appropriate

 359
 public use.))

360

361 7. Backcountry Trails

362 Backcountry trails are not a separate open space category; rather they are facilities located within King County's multi-use sites, forest lands and natural areas. These trails allow visitors to directly experience the county's 363 364 beautiful natural environment as found in its forests, meadows, and marine and fresh water shoreline. Unlike 365 multi-purpose regional trails that network urban and rural landscapes throughout the county, these soft-surface 366 trails are intended for ((passive)) outdoor recreation and appreciation and enjoyment of a natural experience with 367 forest and trees, streams and wetlands, shorelines and birds and wildlife. Where backcountry trails are 368 developed on lands containing fish ((and)), wildlife, and cultural resources, development and management of 369 such trails is undertaken so as to minimize the impacts on those resources. 370

371P-118aKing County ((will)) shall continue to provide and manage a backcountry trail372system on its lands in collaboration with other public and private landholders373and consistent with its Trail Programmatic Permit.

374

375 8. Other Open Spaces

Preservation of open space in the county reaches beyond the ((e))<u>C</u>ounty owned system. Large areas of the
county are owned and managed by federal agencies, the state, and other local jurisdictions that manage the land
for environmental protection, resource production, or a wide range of recreational ((opportunities)) uses.
Additionally, open space benefits are often provided by private land((-))owners managing their land in ways that
protect the environment, conserve natural resources, or provide scenic vistas. ((King County acquires property
for other reasons, such as flood hazards or providing needed public facilities. These lands can also provide open
space conservation benefits.))

383

384P-118bKing County shall encourage and pursue partnerships and mutually beneficial385agreements with public agencies, Indian tribes, nonprofit and community386organizations, and the private sector to fund, program, manage, and steward387sites and facilities for public recreation and natural resource protection388consistent with the classification, role, and use of said sites and facilities.

389

King County has acquired lands and manages facilities along major river and stream systems for the primary
purpose of floodplain management and flood hazard management. Major streams and rivers are vital
components of the ((e))County's open space system, therefore the flood hazard management lands contribute
critical links in the ((e))County's open space network. ((The King County Flood Control District will continue
to maintain flood hazard management land and facilities within available funding levels.)) The ((e))County will
also seek innovative measures for maintaining and improving flood hazard management, reducing maintenance

costs, integrating flood hazard management and recreational opportunities, and achieving wildlife habitatprotection and salmon recovery.

398

399 C. ((Achieving)) Sustaining and Growing the Open Space System

400 Parks and other ((e))County-owned open space lands ensure a quality of life today and a legacy to future generations. In King County, many types of open spaces and fish and wildlife habitat remain in private 401 ownership and may be subject to future development. King County's Land Conservation Initiative guides the 402 403 collaborative strategy to accelerate the preservation of natural lands, working farms and forests, urban green 404 space, and trails in the next 30 years. To ensure that these lands and resources are protected and to offer an 405 alternative to acquisition, the ((e))County offers landowners a wide variety of tools to preserve their property. ((Policies outlining strategies for using these tools can be found in Chapters 3, Rural Areas and Natural Resource 406 Lands. 4. Housing and Human Services, and 7, Parks, Open Space and Cultural Resources.)) 407

408

409 Cooperation, coordination and partnerships with public agencies, private groups and individuals are necessary to 410 develop the regional parks and open space system, to meet existing needs for park and recreation facilities and to 411 accommodate the needs of growth. The Mountains-to-Sound Greenway National Heritage Area, along the I-90 412 corridor, is a successful model for coordination of efforts by public and private entities to protect the backbone of 413 the ((e))County's open space system. King County will achieve the multiple benefits of resource protection and 414 recreation by building partnerships and coordinating with providers and user groups of the parks and open space system. Working together, stewardship can be fostered and these lands and facilities can be enhanced, restored 415 416 and operated more economically and efficiently to benefit all county residents.

417

418 **1. Priorities**

419	P-119	Open space lands should be acquired to expand and enhance the open space
420		system as identified in the King County Open Space Plan: Parks, ((Regional))
421		Trails and Natural Areas.
422		
423	P-120	Regional trail corridors should be acquired when identified in King County's
424		Regional Trails Needs Report or other trails plans.
425		
426	P-121	King County shall consider equity in the location, development, and acquisition
427		of its open space system to help in the reduction of health disparities and in the
428		promotion of <u>racial,</u> social, and environmental justice.
429		

430	2.	Criteria
431	P-122	Lands preserved for public parks, regional trails, or other open space should
432		provide multiple benefits whenever possible.
433		
434	P-123	Decisions on acquisition and development of park, regional trail, and other open
435		space sites should consider funding needs for <u>public engagement, initial</u>
436		<u>stewardship, site development,</u> long((-)) <u>-</u> term maintenance <u>,</u> and operations.
437		
438	P-124	A variety of measures should be used to acquire, protect, manage, and develop
439		regional and local parks, regional trails, and open space. Measures can include:
440 441		((c)) <u>C</u> ounty funding and other funding mechanisms, grants, partnerships,
441		incentives, regulations, dedications <u>,</u> and contributions from residential and commercial development based on their service impacts and trades of lands and
443		shared development activities.
444		
445	3.	Managing the System
446		caretaker of ((200)) <u>205</u> parks, 175 miles of regional trails, more than ((200)) <u>250</u> miles of backcountry
447		$\frac{28,000}{25,000}$) $\underline{32,000}$ acres of open space, and (($\underline{145,000}$)) $\underline{150,000}$ acres of conservation easements, King
448		is one of the region's important providers and managers of public lands. As such, the principles and
449	-	that guide stewardship and management of these lands and resources are critical to ensure these assets
450	continu	e to contribute to the region's quality of life now and for future generations.
451	D 405	
452 453	P-125	Management of the regional open space system of parks, regional trails, natural areas and working resource lands ((is)) <u>shall be</u> guided by the King County Open
455 454		Space Plan: Parks, Trails and Natural Areas.
455		
456	P-126	Development and management of parks, regional trails and open space sites
457		should be consistent with the purposes of their acquisition and in consideration
458		of their funding sources.
459		
460	P-127	Open space lands shall be classified to identify their role in the open space
461		system and the purpose of the acquisition as recreation site, <u>regional</u> trail,
462		natural area ((park, multiuse site, or)) <u>,</u> working ((resource land)) <u>forestland, or</u>
463		<u>multi-use site</u> .
464		
465	((P-128	
466		the open space system and work aggressively to implement multiple and
467 468		appropriate strategies to fiscally sustain the open space system.))
400		

469	P-128a	King County should develop management plans (such as master plans, forest
470		stewardship plans or site management guidelines) that outline goals and
471		objectives and management recommendations for sites within the open space
472		system as appropriate.
473		
474	P-128b	King County's use of pesticides and fungicides ((will)) <u>shall</u> be based on
475		integrated pest management principles.
476		
477	P-128c	King County shall support activities at County parks that advance public health,
478		provide clean environments, and avoid exposure to harmful products, such as
479		tobacco and vaping products, ((in order)) to promote play, physical activity, and
480		family and community connection.
481		
100		Os andination and Darks anaking
482	4.	Coordination and Partnerships
483	P-129	Recognizing the value of open space in promoting social and economic health
484		and wellness across the county, King County shall be a leader in establishing
485		partnerships with cities, adjacent counties, Indian tribes, state and federal
486		agencies, school and special purpose districts, community organizations,
487		non((-))profit organizations, land((-))owners <u>,</u> and other residents. The ((c)) <u>C</u> ounty
488		and these partners should work to <u>:</u>
489		a. Support and strengthen the linkages between rural, resource, and urban
490		communities' use and maintenance of these open spaces;
491		<u>b.</u> ((p))Promote and protect all aspects of environmental quality, while
492		addressing equity <u>and racial</u> and social justice goals to complete the
493		regional parks and open space system through joint planning and
494		management of local and regional sites and facilities.
495		
496	P-130	In the Urban <u>Growth</u> Area, King County shall work in partnership with other
497		jurisdictions to facilitate annexation and transfer of local parks((, and local trails))
498		and other open space sites to cities or other providers to ensure continued
499		service to the community.
500		
501	((P-131	King County should work with cities to share operational and maintenance costs
502		of parks and other open spaces in unincorporated areas in which a substantial
503		portion of the users are from incorporated areas.))
504		
505	P-132	King County ((will)) <u>shall</u> encourage and support volunteer efforts to maintain
506		and enhance programs, sites, and facilities.
507		

508 5 .	Public	Partici	pation
----------------	--------	----------------	--------

509	P-133	King County ((will)) <u>shall</u> encourage and seek <u>public</u> input, advice and
510		participation ((from the public)) in decisions about ((management of)) the open
511		space system ((that relate to key issues such as funding, planning, acquisition,
512		development and stewardship)) and to advance equitable access to parks and
513		<u>trails</u> .
514		
515	P-134	King County ((will invite and involve a wide variety of interests via a diversity of
516		individuals, groups and agencies)) shall engage the public using approaches
517		consistent with the County's equity and <u>racial and</u> social justice <u>goals and</u>
518		policies. King County ((will intentionally engage communities that are the most
519		affected by proposals and plans)) shall provide equitable access for historically
520		underrepresented and historically underserved populations in public
521		engagement and access to the open space system.
522		
523	P-135	King County ((will)) <u>shall</u> use a variety of <u>equitable engagement</u> methods to
524		ensure public involvement from all county residents, such as public meetings,
525		advisory groups, surveys, web and social media postings, news releases, park
526		site signage, mailing lists, newsletters <u>,</u> and through various community groups
527		(including Community Service Areas). These methods ((will)) <u>shall</u> allow for
528		early, continuous, and broad public participation.
529		

530 II. Cultural Resources

531 Cultural resources make a significant contribution to the quality of life in King County. Arts and heritage 532 organizations, public art ((and)), historic and archaeological properties, and Indian tribal celebrations and 533 traditional cultural events contribute to the region's economic vitality, play an essential role in cultural tourism, and contribute significantly to the county's overall quality of life. As King County grows, the need to protect, 534 535 support and enhance cultural opportunities and resources is essential ((in order)) to sustain livability. King 536 County plays an important role in supporting the region's cultural life. 4Culture, a County-chartered Public Development Authority serves as the county's cultural services agency. 4Culture has operational responsibility 537 538 for advancing the work of the cultural community in King County by advocating for, supporting, promoting, and 539 enhancing:

540 • arts;
541 • heritage;
542 • preservation; and
543 • public art.

4Culture(('s)) and the King County ((h))<u>H</u>istoric ((p))<u>P</u>reservation ((p))<u>P</u>rogram work together to provide((s))
 funding, advocacy, assistance, and support in preserving and conserving the county's historical and archeological

- resources through projects and programs including: interpretation, community education and outreach, cultural
- 548 tourism, and rehabilitation of historical resources((. The King County Historic Preservation Program, housed in
- 549 the County's Department of Natural Resources and Parks, also plays an important role ensuring)) and to ensure
- that historic properties throughout King County are protected and enhanced.
- 551

558

King County government can lead by example through stewardship and wise management of its own cultural
resources. Historic public buildings and facilities, such as bridges and roads, can be preserved and continue to be
used; other historic resources can be converted to public use. As set by policy ED-106, found in Chapter 10,
Economic Development, ((in order)) to enhance the region's quality of life and economic vitality, the ((e))County
will engage in programs and projects to protect cultural resources and promote expanded cultural opportunities
for the county's residents and visitors.

- 559 P-201 King County shall be a steward of cultural resources under its control. It shall 560 identify and evaluate cultural resources, preserve public art works and significant historic properties, and interpret and provide public access to them 561 562 whenever appropriate. County departments and divisions shall collaborate with 563 the Historic Preservation Program to nominate eligible properties for landmark 564 designation. 565 P-202 King County shall consider equity and racial, social, and environmental justice in 566 its promotion and protection of cultural resources. 567 568 569 P-203 King County shall encourage preserving, reusing and recycling historic buildings 570 in its facilities planning and other relevant actions. King County shall assist in 571 encouraging interested parties in pursuing preservation, restoration, and 572 repurposing projects, particularly in those doing repairs and/or upgrades 573 themselves.
- 574

575 A. Relationships

576 County residents need arts and heritage opportunities. These include both attendance-driven programs and 577 projects, as well as more localized, community-orientated opportunities of hands-on participation and education. 578 The county's cultural system is comprised of regional and local arts and heritage organizations, individuals and 579 venues. It also involves relationships with both public and private entities to preserve the region's history, as well 580 as to enhance placement of art in public places. As such, cultural resource management crosses jurisdictional 581 boundaries and involves countless public and private entities and artists throughout the region. The range and 582 complexity of cultural activity in the region requires coordination and cooperation. King County, through its 583 creation of 4Culture, provides this regional coordination and leadership.

584			
585	While 4Culture is not a ((e))County department, the ((e))County and 4Culture maintain a unique cooperative		
586	relationship. Historically over 95((%)) <u>percent</u> of 4Culture's budget has been funded by King County resources		
587	from either dedicated tax revenue or capital improvement project budgets. The council approves the executive's		
588	nominations for membership on 4Culture's board. Three councilmembers serve on 4Culture's board. The		
589	council annually receives briefings from 4Culture on its work program and to discuss plans for the coming year.		
590	Therefore, it is through 4Culture that King County maintains its regional role with regard to cultural resource		
591	management.	agii 4Culture that King County maintains its regional fole with regard to cultural resource	
	management.		
592	D 204	King County shall support the retention and promotion of the region's sultural	
593	P-204	King County shall support the retention and promotion of the region's cultural	
594 595		legacy, promote cultural education, and encourage the preservation and	
595 596		celebration of cultural diversity and creativity.	
	D 205	King County shall support and an ourse development of regional sultural	
597	P-205	King County shall support and encourage development of regional cultural	
598		organizations, facilities, and services that address a countywide audience or are	
599		dedicated to unique and significant cultural themes or disciplines.	
600	D 200		
601	P-206	King County shall support and encourage community cultural organizations,	
602 603		facilities, and services to provide opportunities for local access and participation	
603 604		by all residents throughout the county.	
604 605	P-207	King County shall an anyward availance and vitality in the arts by supporting	
	P-207	King County shall encourage excellence and vitality in the arts by supporting	
606 607		opportunities for attendance at and participation in diverse arts and cultural	
608		activities throughout the county.	
	D 200	King County shall nursus its sultural resource goals by working with residents	
609 610	P-208	King County shall pursue its cultural resource goals by working with residents, property owners, cultural organizations, public agencies, <u>Indian</u> tribes, schools	
611		and school districts, and others.	
612			
613	P-209	King County shall provide leadership in pursuing its cultural resource goals by	
614	F-203	actively advancing the protection, enhancement, and ongoing use of	
615		((c)) <u>C</u> ounty-owned and other cultural resources, and by promoting	
616		intergovernmental cooperation and partnerships for the preservation and use of	
617		cultural resources.	
618			
619	P-210	King County shall partner with cities to protect and enhance historic resources	
620		and public art located within city boundaries and <u>Potential ((a))Annexation</u>	
620		((a)) <u>A</u> reas.	
622		((- <u>//-</u>	
022			

623 B. Arts, Heritage, and Public Art

624 The region's artistic environment parallels its natural features in variety and richness. Its arts organizations, 625 artists and opportunities are widely known and valued for their diversity and excellence in music, theater, dance, literary activity, and visual arts. Museums, historical societies, heritage groups, historians, archivists, folklorists, 626 627 and other heritage specialists enrich community life and provide rich cultural experiences for county residents 628 and visitors. Without preservation and stewardship of local history by these groups, the county's rich history 629 would be lost. 630 631 P-211 King County shall support, preserve and enhance its heritage by encouraging 632 opportunities for public attendance and participation in diverse heritage activities 633 throughout the county. 634 635 P-212 The King County executive and the King County council shall regularly seek advice from 4Culture on programs, policies and regulations that support, enrich, 636 637 and increase access to the arts, public art, and King County's heritage. 638 639 Public art means art for shared public space in King County, including King County buildings and infrastructure. 640 King County's public art collection includes portable, permanently sited and architecturally integrated artworks 641 that help define ((e)) county buildings as cultural spaces. Public art also includes art installed or incorporated in 642 places developed by others, but accessible to the public. Public art enhances community character and diversity, 643 sparks imagination, and provides a direct cultural experience for county residents and visitors every day. For 644 new or changing communities, public art is a powerful contributor to local character, sense of place and 645 belonging. Public art can also help mitigate the adverse effects of new development. 646 P-213 King County shall incorporate public art in its construction and mitigation 647 648 projects, as well as its undertakings involving public-private partnerships, and development authorities that include public funds or resources or have publicly 649 650 accessible components. 651 652 P-214 Maintenance and conservation shall be a consideration in the development and 653 management of public art. 654 C. **Historic Preservation** 655 656 Preservation of historic properties provides multiple benefits. Historic properties maintain a tangible connection

with the past and contribute to community understanding, character, and diversity. Preservation saves energy,
conserves existing housing and commercial buildings, and retains historically significant open space. Historic
properties also play a major role in attracting tourists. The mission of the King County Historic Preservation
Program, housed in the County's Department of Natural Resources and Parks, is to conserve existing historic
housing, commercial buildings and other significant properties and foster heritage tourism throughout county. It

662	provides technical and other assistance to cities lacking preservation programs. It also supports the work of the		
663	King County Landmarks Commission.		
664			
665	P-215	The King County executive and the King County council shall regularly seek	
666		advice from the Landmarks Commission on programs, policies and regulations	
667		that support and enhance preservation and protection of significant historic	
668		properties.	
669			
670	Many municipalities do not have sufficient resources to administer an historic preservation program. As a result		
671	the history of the	region is endangered. Comprehensive and coordinated protection of significant historic	
672	properties is neces	ssary ((in order)) to ensure that King County's history is preserved.	
673			
674	P-216	King County shall administer a historic preservation program to identify, protect	
675		and enhance historic properties throughout the region.	
676			
677	Historic preservat	ion is an ongoing process that requires identification, evaluation, designation and protection of	
678	significant properties, and attention to long-term enhancement and interpretation. Historic properties are often		
679	destroyed through neglect. Regular maintenance and other management practices that protect historic properties		
680	are critical to long-term preservation. King County government can lead by example through stewardship and		
681	wise management of its own historic properties.		
682			
683	P-217	King County shall acquire and preserve historic properties for use by ((c)) <u>C</u> ounty	
684		and other public agencies and shall give priority to occupying historic buildings	
685		whenever feasible.	
686			
687	Review of development proposals and other actions affecting historic properties resources is necessary ((in		
688	order)) to elimina	te or minimize adverse effects of development or changing land use. Archaeological sites are	
689	particularly sensitive and endangered because they are not visible and may be unexpectedly encountered. King		
690	County government can also protect historic properties through careful planning and review of its own		
691	undertakings, bot	h directly and in partnerships with private parties and other agencies.	
692			
693	P-218	King County shall establish comprehensive review and protection procedures for	
694		historic properties affected by public and private projects.	
695			
696	P-219	King County may condition public and private projects ((in order)) to protect	
697		historic properties. King County agencies shall coordinate with the Historic	
698		Preservation Program to provide consistent review and mitigation for their	
699		projects and undertakings throughout the county.	
700			

701	P-220	King County shall encourage land uses and development that retain and enhance	
702		significant historic properties and sustain historic community character. County	
703		building and zoning codes and other regulations and standards should provide	
704		flexibility to accommodate preservation and reuse of historic properties. Zoning	
705		actions should take into account the effects of zoning on historic properties.	
706			
707	P-221	King County shall maintain an inventory of historic properties ((in order)) to	
708		guide its historic preservation decision making.	
709			
710	Preservation requires active support by governments and cooperation with property owners. Incentives such as		
711	tax reduction, revolving loans, transfer of development rights, expedited permitting, reduced permit fees, zoning		
712	flexibility, technical assistance, and other measures can be used to encourage preservation. As set by policy		
713	ED-208, found in Chapter 10, Economic Development, the $((\epsilon))C$ ounty $((shall))$ assists businesses, property		
714	owners, and other jurisdictions in preserving and enhancing historic properties, including historic business		
715	districts, through a variety of incentives and economic development measures.		
716
