Proposed No.: 2013-0386

AMENDMENT TO PROPOSED MOTION 2013-0386, VERSION 2

On page 6, beginning on line 119 delete everything through line 120 and insert:

"A. The council is deeply concerned about the serious potential impacts of new coal export terminals in Washington and Oregon on transportation, public health, climate pollution, water and air quality, marine animals in the Salish sea and its islands and minority and low-income populations."

On page 7, beginning on line 149 after "Interior" delete "for a moratorium on" and insert "to examine"

On page 7, line 150 after "basin" delete "pending" and insert "including"

EFFECT: This amendment replaces the statement opposing coal export terminals with a statement expressing serious concerns. The amendment deletes the request for a moratorium on new and federal coal leases in the Powder River basin and instead requests the United States of Department of Interior examine new and expanded coal leases.
