3307	14 TO MT BAKER TRANSIT CENTER IS CHRONICALLY LATE EVERY WEEK DAY, THAT'S A PAIN IN THE ASS WHEN TRYING TO MAKE A CONNECTION. EVENTUALLY YES I GET WHERE I WANT TO GO ALBEIT HAVING TAKEN LONGER THAN IT SHOULD.	11/6/2014 3:43 PM
3308	Often I have to go downtown and then get a bus to go somewhere, which takes a lot of time. I would also like to see the buses be cleaner.	11/6/2014 3:42 PM
3309	I work downtown and I often use Express buses to the University District for Activities at the UW. Good service.	11/6/2014 3:42 PM
3310	Yes, for the most part. Direct buses work the best. Excited for Link to come to Northgate.	11/6/2014 3:42 PM
3311	I can get pretty much everywhere I want to go with transit.	11/6/2014 3:42 PM
3312	Yes every time.	11/6/2014 3:42 PM
3313	Yes although it often takes time.	11/6/2014 3:42 PM
3314	My commute is awkward, I have to walk down the side of Beacon hill from the 60 or over several blocks from the Sodo Busway. Otherwise, yes.	11/6/2014 3:41 PM
3315	yes.... slowly but surely	11/6/2014 3:41 PM
3316	It's really easy to get from my house to downtown and back. It simply takes waaaaay too long to get from here to Capitol Hill or the airport, which forces me to drive (something I'd rather avoid).	11/6/2014 3:41 PM
3317	For the most part, yes. The bus options available in Ravenna / University Village area are pretty poor, especially on the weekends, though.	11/6/2014 3:41 PM
3318	Pretty much, sure. I take the bus a lot less now that I have a car though especially for long trips like to Northgate or the airport. The bus is great for getting to events downtown, because boy do I ever not want to drive to downtown.	11/6/2014 3:40 PM
3319	Since the 30 was restricted to peak hour, I don't do much on the weekends. I take the 74 X to work, which has started taking 20 minutes more since the last service change. Coming home, the 7XX series buses are unreliable and overcrowded, so the time it takes to get home varies greatly.	11/6/2014 3:40 PM
3320	yes but it takes too long. They are inefficient, especially at loading and unloading.	11/6/2014 3:40 PM
3321	Route 3 and 4 are very crowded; the need clearly exists for a better mechanism for patients of Harborview, especially those in wheelchairs Why not contract with Uber to provide service to folks with transportation needs that are disabled?	11/6/2014 3:40 PM
3322	Not easily and not in a timely manner. It takes two buses and over an hour to go ten miles.	11/6/2014 3:40 PM
3323	They do, except for Fremont, which is a much longer trip than necessary from QA and Downtown considering their actual distance away from both QA and Downtown.	11/6/2014 3:40 PM
3324	Great for now.	11/6/2014 3:40 PM
3325	yes	11/6/2014 3:39 PM
3326	Yes, although Lake City to Fremont takes a long time using transit.	11/6/2014 3:39 PM
3327	Yes, for most options. Getting to Seatac airport is not generally practical on transit for the flights we take.	11/6/2014 3:39 PM
3328	Yes, but there is no place to leave my car on Lake City Way if I need to take the bus.	11/6/2014 3:39 PM
3329	I take the #60 from Beacon Hill near Vets Hospital, direct to Broadway on Capitol Hill. Wish it were more frequent.	11/6/2014 3:39 PM
3330	I find my transit options are good; they allow me to avoid owning a car. I would like transit times to improve, though, and hope that increased ridership will reduce traffic while increasing vehicle frequency.	11/6/2014 3:39 PM
3331	They work fine for me on a day to day basis.	11/6/2014 3:39 PM
3332	Mostly well, bus delays (often due to traffic) can cause big problems, especially when one uses walking and busses only to get around (e.g. to appointments that are time sensitive). I can get to most places, but also, with the bus cuts, it takes me longer to get places, because the busses don't run that often so to make the connection you have to start the trip early (for example, it takes me about an hour and 15 minutes to get to mapleleaf on a Saturday....it takes only about 10 minutes to drive.) Mostly, I feel that even the express routes (especially the new rapid transit bus lines) don't seem to be all that much faster than the regular bus. On high volume routes (e.g. the 8 eastbound), traffic causes delays and crowded buses and then even when the bus comes, there is no space on the bus to take passengers.	11/6/2014 3:38 PM

3333	Transit works but is often too slow or I have to wait too long for a connecting bus. Peak commute time buses are too crowded.	11/6/2014 3:38 PM
3334	Yes - 1) I take the #316 from home to downtown then transfer to # 10 or #43 to work on capitol hill. Reverse in the evening to home Or . . .2) drive to the Northgate Park and Ride, take the #41 to the Convention center , then take the #10 or #43 up to work on Capitol Hill. Reverse in the evening to home.	11/6/2014 3:38 PM
3335	No. They don't work at all. Most of the time I end up walking several miles due to over-crowded, inconsistent buses and lack of other options.	11/6/2014 3:38 PM
3336	Very well - essentially door to door within 2 blocks.	11/6/2014 3:38 PM
3337	Transit gets me to some of the places I go that are already on a route of some kind such as the university or downtown on weekends. I don't use it to go to Capitol Hill or Queen Anne or the airport--places that require too many connections. I would be willing to take light rail to the airport from Westlake Center right now except that most of the time I'm flying out on a very early flight and transit doesn't go often or early enough for me to get to the airport in time for a 6 am flight.	11/6/2014 3:37 PM
3338	Sundays are tough because my bus is only once an hour. I manage to get where I want to go but it takes time and sometimes transfers.	11/6/2014 3:37 PM
3339	yes -- but I look forward to when I can take Light Rail from the airport all the way to UW campus area.	11/6/2014 3:37 PM
3340	Ok for me	11/6/2014 3:37 PM
3341	I have lived in Seattle for 45 years and never had a car or other vehicle-- only use transit and it is great	11/6/2014 3:37 PM
3342	My bus route is great. The only problem is the holiday schedule between Christmas and New Years.	11/6/2014 3:37 PM
3343	No, the no. 8 bus doesn't really go to the Pike/Pine corridor	11/6/2014 3:37 PM
3344	Yes	11/6/2014 3:36 PM
3345	I have to walk about a mile to take a direct bus or add about 30 minutes to my commute to take two busses to walk less.	11/6/2014 3:36 PM
3346	Pretty good bus service to the Lake City/Victory Heights neighborhood where I stay.	11/6/2014 3:36 PM
3347	It takes me a lot longer than I would prefer due to service cuts and infrequent/early ending service. I often decide to drive because it is faster and more cost efficient even though I would prefer to take the bus.	11/6/2014 3:36 PM
3348	The bus works ok, but it takes an hour to get to work, whereas taking a motorcycle on the I5 express lanes only takes 20 minutes. Going home, the buses are often so crowded I have to wait for the next bus, and it drops me off more than half a mile away from my final destination so I have to walk in the rain.	11/6/2014 3:36 PM
3349	East-west travel is extremely difficult by bus. Too many routes require several connections to make an east-west trip, or require you to go downtown and then go back north.	11/6/2014 3:36 PM
3350	Need cross town routes more than north-south routes.	11/6/2014 3:36 PM
3351	some times	11/6/2014 3:36 PM
3352	Mostly. But I get stuck in traffic going towards the Montlake bridge a lot on 23rd ave.	11/6/2014 3:35 PM
3353	pretty much but only because I live and work in the center core. I have many clients that live in renton or federal way and travel 2 hours just to get to a dr appt	11/6/2014 3:35 PM
3354	Yes	11/6/2014 3:35 PM
3355	YES	11/6/2014 3:35 PM
3356	Usually. Except for the VA hospital which takes too long.	11/6/2014 3:35 PM
3357	Takes to long to get downtown.	11/6/2014 3:35 PM
3358	I get where I want to go, but the trip out of downtown up to 145th & 15th is very slow, on very crowded buses.	11/6/2014 3:35 PM
3359	They are very good. I miss the #47! Please consider re-instating it. Yes, Capitol Hill is served by 49, 60, 9, and 43. But a lot of seniors and people with disabilities used the 47. Now they need to walk many more blocks to use the bus, because the 47 is gone.	11/6/2014 3:34 PM

3360	They work very well. I take express bus 301 or 303 from Shoreline/Richmond Beach to work every day. If I know I am going to be staying late in the city I park at Northgate instead because its easier to get to past 7:30pm.	11/6/2014 3:34 PM
3361	Yes, I commute most often from West Seattle to Downtown, Downtown to Fremont or UW area. It works fine.	11/6/2014 3:34 PM
3362	Yes, but a couple of wishes: 1. Link direct 2. More frequencies	11/6/2014 3:34 PM
3363	Most, but not all.	11/6/2014 3:34 PM
3364	For the most part yes.	11/6/2014 3:34 PM
3365	No.	11/6/2014 3:33 PM
3366	Yes, but as I use a cane I often cannot find an open seat due to students sitting in the front of the bus.	11/6/2014 3:33 PM
3367	Yes they are perfect how they are right now. Just don't cut the 31 bus because it is my only way home.	11/6/2014 3:32 PM
3368	50/50	11/6/2014 3:32 PM
3369	Only the buses to and from uw	11/6/2014 3:32 PM
3370	In general they currently work, however, better connections to SeaTac and West Seattle would be great. I think also it could be faster to get from Capitol Hill to Fremont/Ballard	11/6/2014 3:26 PM
3371	Transit will get me where I want to go, however I rarely use transit for late night or early morning trips due to a lack of frequency or an excessive number of transfers. It takes too long to travel into/out of the University District. There are not enough crosstown routes; most service is oriented around downtown Seattle.	11/6/2014 3:09 PM
3372	Yes. The changes to the 30 (not serving Seattle Center or Fremont directly) were manageable. The loss of mid day and weekend service has been harmful. However, I can generally get where I want to go on Metro.	11/6/2014 10:49 AM

Q6 What are the top three things that prevent you from using public transportation, or make it difficult for you to use it? (choose up to 3)

Answered: 3,751 Skipped: 336

Answer Choices	Responses
It takes too long to get to my destination	65.82% 2,469
Stations/stops are too far away from my home, work, school, etc.	20.95% 786
Bus/train schedules are not reliable	35.51% 1,332
Service isn't frequent enough	47.75% 1,791
I have to transfer	37.40% 1,403
Buses/trains are too crowded	33.59% 1,260

Obstacles due to limited mobility or disability	1.20%	45
Service isn't offered early enough/late enough	26.77%	1,004
Service isn't available on weekends	13.76%	516
Buses, trains aren't clean or comfortable	5.84%	219
Stations, stops, buses, or trains aren't safe	8.74%	328
Total Respondents: 3,751		

#	Why?	Date
1	On good days, when I was able to walk, I could beat the bus back up the hill from work downtown. The 43 is not reliable. When I need to get to work, and the bus never shows up.	12/4/2014 7:06 PM
2	I am less likely to take a bus if it takes me a while to get there or if I have to get off one bus and get on another just to go a relatively short distance. Also, I have been on buses that are so crowded, they don't even stop because they cannot accomodate any more passengers. This makes it stressful and not comfortable. Uber is my go to service when I need to get somewhere fast.	12/4/2014 3:38 PM
3	the early mornings are a little sparce	12/4/2014 3:25 PM
4	Service is horrible and unavailable. When it is available, it is overcrowded by university students, which could be alleviated with more busses	12/4/2014 2:15 PM
5	I don't know why busses are not on schedule. Other large cities seem to manage transit schedules.	12/4/2014 12:54 PM
6	I am unable to take the bus to work on the weekends due to limited frequency. It would also be nice to have the 31 extended or the 32 run more frequently.	12/4/2014 11:44 AM
7	buses are always late and over crowded	12/4/2014 11:41 AM
8	Not sure what this is asking	12/4/2014 10:51 AM
9	Sometimes I will opt to drive instead if it will take too long to get somewhere or the timing does not work out	12/4/2014 10:44 AM
10	At times, it can take twice as long to take the metro bus as it does to drive alone, especially if a transfer is required.	12/4/2014 9:15 AM
11	i take 3 buses to work the 7 48 75 takes along time some time.	12/4/2014 9:13 AM
12	There is too much time between transfers and sometimes the second bus I have to take does not arrive on time.	12/4/2014 8:25 AM
13	It would be nice if the Sounder Train had a train traveling south that came before 3:12pm. Maybe have a train around 1pm another at around 2pm and then commence with the regular afternoon/evening schedule. Some days I get off work early, but it takes twice as long to get back home using transit since I have to take 3 buses vs just one bus and the train. If I know ahead of time that I am leaving early, I just skip transit and drive my vehicle.	12/4/2014 8:08 AM
14	Too many transfers. For a car ride that would take 15 minutes. Sometimes takes 1hour 30 minutes by bus one-way. Not worth the bus ride my time is more important. Not really accessible with a small child.	12/3/2014 4:57 PM
15	It is hard to choose transit when it takes significantly longer than driving and parking. Also, difficult if service isn't frequent enough that you can just wait for a bit and the bus will show up. Transferring would be okay if service were more reliable, but transferring with infrequent buses and unreliable service can mean delays of an hour or more.	12/3/2014 1:46 PM
16	My bus line is extemely crowded (E Line).	12/3/2014 10:37 AM
17	The Car2Go boundary ends at S. Orcas St. but I'd like to get down to Othello without a car which means taking the light rail. Late at night, I don't feel comfortable taking the light rail to Othello then walking the 1/4 to my nearby destination.	12/3/2014 10:32 AM
18	I am a nurse and if I stay over for an extra 4 hours on top of my 12 hour shift, the last bus at my stop come at 1130 PM . I dont get out to my stop before then agfter giving report.	12/3/2014 9:38 AM

19	Due to budget cuts and service reductions, routes have been reduced or removed, existing service now takes much longer, you cannot count on buses to arrive or depart on time (which affects my decision to take them to meetings or even work) and if you miss a bus or a bus is drastically late, there are less options so you can take another bus to try to make up time.	12/3/2014 9:12 AM
20	For the size of Seattle, and our increasing traffic problems our transit system should be more frequent and reliable, such as it is in San Francisco and Denver for example. When it's unreliable, people stop taking it, less money coming in and less people riding results in routes being cut - it's a vicious cycle. Taking public transit should be promoted as it is a wonderful advantage for those living in a large metropolitan area. Seattle is a big city and it should act like it.	12/3/2014 8:51 AM
21	I tried using light rail to go to work in SeaTac, but for one thing, the light rail route is not direct to the airport, takes a long time, then if you don't get off and take the bus in Tukwila, you have a long walk to the bus stops south of the airport. Not at all well-thought-out in my opinion.	12/3/2014 8:06 AM
22	I try to get to work by 6AM so I can leave early for a class and be home in time to pick up my daughter from school. There is no bus around my house that can accommodate my schedule (see prior page for details.). When I miss a bus, I have to wait for at least 30 minutes for the next one. Door to door, it takes me 15 minutes in a car, compared to 50 minutes by bus.	12/2/2014 8:52 PM
23	Since the bus schedules are dependent on traffic, I am not keen on taking buses that require transfers when I may end up arrive late or missing a transfer that departed early. Infrequent bus stops that require waiting can be inconvenient due to time waiting.	12/2/2014 6:18 PM
24	Busses run infrequently at night. I sometimes have to cut evening meetings short to get to Lake City before 9:30 or 10 pm. I sometimes have to really hustle to catch an evening bus. It's a drag waiting 40 to 60 minutes in the dark wet cold. So I often just don't go to evening events, movies, entertainment, etc.	12/2/2014 5:17 PM
25	I usually use 71, which runs half empty until 65th & 15th, after which it gets very crowded as it continues through the U District. However that bothers me less than the fact it takes forever to get down Eastlake and that cars are allowed to block Howell St preventing the bus from approaching th tunnel.	12/2/2014 4:14 PM
26	Work to home is 2-3 buses (whether 355 is on time or not), a one-hour + trip for 5 miles in the city. Biking is 30 minutes.	12/2/2014 3:37 PM
27	If I'm not going to and from the downtown core or the eastside - I'm considered fractional.	12/2/2014 3:26 PM
28	Also, it's too expensive. For about the same price, I can drive and park my car at work. If it were cheaper to take the bus, I would be more likely to bus to work. Driving is much more convenient and works out to only about a dollar more per day.	12/2/2014 3:01 PM
29	Transfers are ill timed. Some of the time I can beat the bus walking 15 minutes on the second half of my trip. bus times are not accurate - nor are some of the apps that estimate the times.	12/2/2014 2:46 PM
30	The issue is that bus transit get's stuck in traffic mostly. Bicycles tend to be more dependable during peak hours when transit is mixed with on street traffic.	12/2/2014 2:10 PM
31	Lack of parking is the only real reason I don't use busses more frequently.	12/2/2014 12:59 PM
32	Convenience is pretty poor. I'll usually pick up my wife in a car2go in Eastlake on Saturday night because the buses come so infrequent and the time it takes to transfer is pretty inefficient. A transfer from Eastlake to downtown to central district can take an hour, while a car2go can take 10 minutes.	12/2/2014 12:56 PM
33	I have to change which stops I use to avoid problems	12/2/2014 11:39 AM

34	<p>I continue to ride public transportation because I do not have a car - so I have no other option. I am seriously considering purchasing a car due being subjected to all the items I selected above for the last 20 years. I think much can be learned from the transition from route 54/54X to the C line. As a rider, the transition has been brutal - due to the elimination of schedules and stops, and overcrowding. Please take these hard learned lessons into account: Do not eliminate printed schedules unless a particular route has a bus arriving every 5 minutes. Thank you for making a printed C line schedule! Buses are now overcrowded to the point riders are unable to get on buses they have been waiting for. Overcrowding is dangerous. I have a neighbor who was seriously injured when riding an overcrowded bus came to an abrupt stop and another passenger slammed her into a pole. Overcrowded buses are simply not safe! Do not design the new routes/schedules for overcrowded buses! Additionally the transition from route 54/54X to the C line removed many stops - this is not the correct answer - It is better to continue to have Express and Local buses like the 21/21X. It is not fair to elderly and disabled riders to remove the only stops they are able to access. Please do not do this to the North end as well! Many elderly and disabled 54 riders were forced to other transportation options due to removed stops. On a more positive note, I really like the one bus away electronic reader boards that were recently installed downtown. I strongly feel that comprehensive reader boards, like the one at 3rd & Pike, will increase ridership. I was saddened when the TV monitors were removed from the Northgate Transit center. The single line reader boards like on the C line in West Seattle are also helpful and may help to increase ridership. I like having overhead lights at the stops - it makes me feel safer. I also like the flashing light stop button for use in the dark - these really help ensure that a bus will not pass you by. I really dislike that the C line stops only have one seat in under the shelter - this is Seattle it rains 3/4 of the year here - put the seats in the shelter! Thanks for listening and taking this all into consideration!</p>	12/2/2014 11:33 AM
35	<p>I was using the community transit bus 860 from Everett Mariner park and ride into the university district and get of at NE 45th Street and Roosevelt Way, but my start time was changed. The only bus that will get me to work by 6:30 am is the route 66 bus from Northgate to the University district.</p>	12/2/2014 11:11 AM
36	<p>BECAUSE THE SERVICE IT IS TERRIBLE. KING METRO IS ONE OF THE WORST PUBLIC TRANSPORTATION SERVICES I HAVE EXPERIENCED WORLDWIDE. WORST THAN AFRICAN COUNTRIES OR THIRD WORLD. UNSAFE DIRTY DISGUSTING. NEPOTISM IT IS EMINENT IN AN INEFFICIENT INSTITUTION AS KING COUNTY</p>	12/2/2014 11:01 AM
37	<p>Sunday all-around reduced service makes it very difficult to run basic errands, visit people and places across town, and attend church. The 68 is my most convenient bus from and on weekday evenings the last route out of Northgate TC is 6:48pm. Would like to see 68's service hours extended to 10pm evenings and possibly some servie on Sundays.</p>	12/2/2014 11:00 AM
38	<p>The 41 only runs every hour late at night and so I wait at work for a while before catching the 75 to connect with the 41 so I am not waiting outside on Lake City late at night.</p>	12/2/2014 10:46 AM
39	<p>I love using the OneBusAway app, but it isn't always reliable.</p>	12/2/2014 10:40 AM
40	<p>Frequent trips - similar to how the subways run in larger cities. I believe more people would use public transportation if there was not the concern for missing your bus/train and then wasting 30 minutes when you need to get to work.</p>	12/2/2014 10:26 AM
41	<p>It takes me 1 hour and 30 minutes to bus from home to office - I have to walk 10 min to take bus 8, then change to 43/48 on E John and 23rd, then to 75 or 30 at UW. If one is late (and often time it is the case), I miss all following connections, which is at least 15 min of wait time when a missed connection happens. While I understand the problem of why buses are late (some of these buses run through streets that have major congestion which could delay the service), I don't see how things can be improved unless there is dedicated bus lane for rush hours to avoid late buses.</p>	12/2/2014 10:19 AM
42	<p>I have to use a Sound Transit bus to get between 3rd and Pike/Pine to my work on Boren and Olive. I have to transfer to get to work, and to get home.</p>	12/2/2014 10:07 AM
43	<p>Refer to question 5</p>	12/2/2014 9:51 AM
44	<p>Buses are useful for getting downtown or to the UW during the workday. The low frequency of buses during the evenings and weekend make using them impractical. If you want to go somewhere besides downtown or the UW, using a bus is not practical. Also, metro badly needs to increases the number of buses on routes/times where the buses are crowded, sometimes not even having enough room requiring them to leave passengers at the bus stop. Furthermore, when there are games or events downtown, metro needs to increase the number of buses, as the buses are currently at capacity and do not have room for the extra passengers.</p>	12/2/2014 9:50 AM
45	<p>Getting to downtown is difficult because transferring is difficult if we miss a 7.</p>	12/2/2014 9:34 AM

46	I take the 41 to work almost every day. I drive to the Northgate Transit Center and then ride to Convention Place and get off. In the morning I usually get on the first 41 bus that shows up. But leaving from Convention Place I usually wait for the 3rd 41 bus to show up, as the 1st and 2nd buses are packed. I am grateful that the transit supervisor that is stationed there helps pack people on the bus, but it is still a hassle to wait for buses.	12/2/2014 9:17 AM
47	There are many reasons public transportation doesn't work well for me. I usually have to transfer to get anywhere, and that means waiting for the next bus which adds time and makes trips take too long. I don't think the buses ever get cleaned and I always slide around on the vinyl seats every time the driver stops or goes. I have the one bus away app but you still never really know when the bus is actually going to arrive which makes planning transfers a challenge and is also not enjoyable when waiting outside in the cold or rain. Many bus stops, especially downtown, have a considerable amount of homeless and drug users. Their unpredictability makes me want to avoid those areas. For example, 3rd & Pike is just a sketchy area and I would not want to be there late at night or when it is dark out. Also, there is often no room on the bus. I am a person, not a sardine. All in all, I am glad public transportation is an option but it takes too much time, energy, and planning.	12/2/2014 9:10 AM
48	You serve us, not the other way around. I'm not concerned about driver happiness. I would like to see drivers equipped with a numbered badge so when complaints are lodged against specific drivers - they are either disciplined, reeducated, or terminated. Metro's "describe the driver" is an excuse. Issue - 15 minutes late to a destination is unacceptable. Having drivers turn off the bus sign - to terminal - and turning on the sign again is unacceptable. Unless drivers are terminated (I'm referring to the senior drivers) there will be no improvement.	12/2/2014 8:52 AM
49	Morning buses are packed. Also using two different transit systems to go from Eastlake to Seatac is time consuming.	12/2/2014 8:52 AM
50	Generally I don't have much of a problem, but sometime it is inconvenient to have a very crowded bus or people riding the bus that seem unsafe.	12/2/2014 8:18 AM
51	During certain times of the day (non-peak) the 30 does not run and this creates havoc getting to work by Magnuson park.	12/2/2014 8:10 AM
52	Having to transfer and it taking too long are often related. When you have to transfer and then wait for who knows how long for your transfer to come along it makes taking the bus less appealing than taking a car.	12/2/2014 8:02 AM
53	the 75 at 3:10 is crowded i wish they get a bigger bus	12/2/2014 7:43 AM
54	Bus doesn't stop close to Met Park West at 1100 Olive Way,	12/2/2014 7:32 AM
55	The number one frustration I have with Metro at this time is the difference in the way my Orca card functions when riding the bus, as opposed to the light rail... On the bus, I hold my card against the reader upon entering, the reader chimes green, and I get on...the bus does not need to read my card again when I exit... On the light rail, as you well know, I'm sure, it doesn't work this way... Instead, one must touch external readers prior to boarding the train, and touch external readers again upon exit...this requires the system to be able to understand a faulty read, and correct on the fly, as the pairing of 'reads' is critical to the process...each entry must have a corresponding exit... Unfortunately, the system doesn't handle faulty reads well, and there is no person present to assist...I found myself in danger of missing my train simply because my card didn't chime green, EVEN THOUGH THE CARD WAS PAID CURRENT! Without option, I chose to board the train anyway, and was eventually accosted by security guards, who proceeded to photograph my driver's license and ORCA card, accuse me of using the train unlawfully, and implying that if I were caught in such a place again, I would be prosecuted... Please note that both security personnel admitted the card was paid current, and valid for use... I replied I would not use the train again as long as such an idiotic card system was in play, and I haven't...and I won't... Make the card system on the train work just like the bus...on-board readers scanned at entry, with no corresponding exit scan... Above all, NEVER treat a paying customer like a criminal...this is EXTREMELY bad behavior, and publicity, as I have since been very vocal about how I was treated... Given that public transportation is, by definition, largely subsidized, the fare paid by the rider is token, in comparison (pun intended)... One might advise to treat the customer as a welcomed guest, and always be willing to err on the side of the customer being right...the money involved simply isn't worth the conflict...	12/2/2014 7:31 AM
56	If it is the weekend or evening, sometimes it is easier to just drive since I feel safer, stay warmer and generally travel faster. During the week - to and from work - is generally the best for taking the bus for me.	12/2/2014 7:24 AM
57	metro busses are filthy but i make myself ride to save money. riding adds 40 minutes each way to my commute but there are no other routes that don't require me to transfer.	12/2/2014 7:23 AM
58	It takes 30 minutes to drive from my home in Sammamish to work at Seattle Children's if I leave at 5:30 AM. It would take a minimum of 1.25 hours to make that same trip by bus.	12/2/2014 6:59 AM
59	Sometimes a bus won't come at all, or will be so full it won't stop. If the next one doesn't come for another half and hour it can be hard to plan arrival times.	12/2/2014 6:52 AM

60	Budget cuts to transportation have made traveling via Metro Bus very difficult.	12/2/2014 6:07 AM
61	It takes me 1 hour 30 minutes to ride the bus to work because of transfers and schedules. It takes me 15 minutes to drive. I work 12 hour shifts so the time is really a deterrent. If it were only one bus, it would be better and faster.	12/1/2014 10:36 PM
62	I live in Bellevue and work in Seattle,night shift, and on weekends.	12/1/2014 10:11 PM
63	It's not worth spending 300% more of my life sitting on a bus. :(12/1/2014 10:08 PM
64	The bus works for me chiefly because I live near Lynn St, which has one express bus (66) that also stops here. For most of Eastlake, Metro seems to think we a no-mans land that has no purpose but for express buses to drive through without stopping. A couple of stops by some of the other express buses really wouldn't hurt instead of having only one bus serving most of the area even though multiple buses drive right down Eastlake.	12/1/2014 9:52 PM
65	See answer to number 5. On a good weekend day, it takes 8 minutes to hop on I-5 and get from my apartment to the hospital. Normally... 45 minutes. I get nervous taking the buses because the schedule is unreliable and so is whether or not the bus will show up on time or whether or not the bus will get to the next stop on time. On weekends, a bus that comes every 30 minutes makes taking a bus on the weekends so sketchy. If the bus that I am on takes too long to get to the next stop, then I miss the next bus I'm supposed to be on and then I have to wait 30 minutes. I usually just start walking. Walking seems to be faster and more reliable than anything I've ever dealt with having to do with traffic in this city.	12/1/2014 9:20 PM
66	Orthopedic issues make walking up and down steep hills challenging and standing in the bus in standing room only conditions difficult -- particularly when it is not obvious to others that you have challenges.	12/1/2014 8:19 PM
67	More frequent service would reduce transfer times and decrease my commute time significantly.	12/1/2014 7:58 PM
68	Sometimes the bus I am waiting for is so late that the following bus is right behind it....	12/1/2014 7:56 PM
69	Especially for going to/from Ballard from anywhere but downtown, the bus ride is extremely long and unreliable.	12/1/2014 7:23 PM
70	Transit from Capitol hill to Fremont & Ballard (and back) takes incredibly long and is simply not worth it.	12/1/2014 5:55 PM
71	A lot of buses don't stop on Eastlake Ave. Would make sense for either 72 or 73 to stop at least a couple of stops.	12/1/2014 5:51 PM
72	Having to stand on the bus is a MAJOR problem. Bus is a good option if I can work on it while commuting. If I have to stand, it not only eliminates that possibility, but it's very uncomfortable and quite dangerous (given quick starts and stops). If it doesn't improve, I likely will stop using transit. From Kenmore, service is decent during peak hours, but marginal otherwise, and many transfers are really poor, requiring waits of up to 30 minutes. I don't mind if the transit trip takes 15 minutes longer than driving, but an 30-60 minutes longer because of waiting at transfers, inability to board a full bus, or unreliable service is too long.	12/1/2014 5:34 PM
73	I have to transfer to a shuttle to get to work. The one way route takes too long.	12/1/2014 5:34 PM
74	As I previously stated, it would have taken me three buses and more than five total hours to go 11 miles from Northeast Seattle to Bellevue (I could actually have walked it faster if pedestrian traffic were allowed on the 520 bridge). As a nurse, my workday is not the standard one or most people. I am already working when many people are just waking up for the day, and am sometimes still working after most people have gone to bed.	12/1/2014 5:23 PM
75	If I am going to Roosevelt and 45th, it can take a lot longer on the bus and I have to pick up children.	12/1/2014 5:23 PM
76	When commuting to work in the morning on the 28 (from 8th Ave & NW Market st to 3rd Ave & Pike St), the most convenient stop to get me to work is still 0.5 mile from work.	12/1/2014 4:58 PM
77	I do not feel safe at night in the dark when I am traveling alone. Bus tunnel is an improvement in downtown Seattle	12/1/2014 4:40 PM
78	The schedules are very appropriate, but unfortunately are not reliable often, especially during rush hour. It is often the case that the One Bus Away app will mention delays of 30-45 minutes on an arrival, which leads to a lot of people either taking a taxi or walking. This definitely needs improvement. The overcrowding of some buses is also problematic as often times the buses will stop but can only take less than half the people waiting. I have offered my spot to elderly riders in the past, but I had to miss the bus myself and had to wait for the next bus to arrive.	12/1/2014 4:33 PM
79	The last pick up time at 45th/Roosevelt is 5pm ish. Need later pick up times (atleast until 6pm) for business hours/working people.	12/1/2014 4:32 PM
80	will often drive downtown or to Seattle Center for evening events since schedule is less frequent and takes more time to get home. 75 often late in evening - between 6 & 7 PM. One-Bus-Away helps when leaving work so I don't have to stand at the stop as long.	12/1/2014 4:31 PM

81	Any transfer is usually 20-30 minutes.	12/1/2014 4:20 PM
82	The Montlake Freeway Station is not safe.	12/1/2014 4:19 PM
83	On the bus, it often takes almost an hour to get from Northeast Seattle to downtown, or from Queen Anne to Northeast Seattle, no matter what time of the day it is. Whereas in my car it will only take 20 minutes. If I miss my bus, often I have to wait another half an hour to catch the next one.	12/1/2014 4:04 PM
84	The longer it takes me to get to and from work, the less time I have with my family	12/1/2014 4:04 PM
85	Only at night have I ever had an issue. But if I need to run into work late at night it is sometimes more convenient to drive	12/1/2014 4:01 PM
86	65 and 75 bus routes from children's are rarely on time.	12/1/2014 3:59 PM
87	All three checked boxes relate to the time it takes to get where I'm going. I don't usually mind one transfer per trip, but multiple transfers and long wait times are definitely an obstacle to my using transit for more of my trips.	12/1/2014 3:56 PM
88	Busses are constantly late and overcrowded.	12/1/2014 3:53 PM
89	I feel like the 556 is always crowded during peak commute times, but I am fortunate to get on the route early enough so that I always am able to get a seat. When I get on even a couple stops later, there is often only enough room to stand. I always feel safe on my commute, but there have been a couple times in downtown seattle or the International District when I've wished the stop was better lit.	12/1/2014 3:49 PM
90	It takes so much longer to take a bus anywhere than it does to drive, I end up driving when I would rather not. It takes two buses to get from Capitol Hill to any neighborhood North of the University District, which adds an additional 20 minutes to travel time.	12/1/2014 3:43 PM
91	Most routes to my neighborhood stop running at 12:30am, so I cannot stay out. There are no direct routes from Fremont to capitol hill and so it takes a long time.	12/1/2014 3:42 PM
92	The fact that service is not frequent enough makes our commute more difficult, both because we have to wait, sometimes 30 minutes or more for a bus, and because it causes the buses to be over crowded, sometimes so much that a full bus passes us by and we have to wait for the next bus on our route.	12/1/2014 3:40 PM
93	All buses must go up into the UW instead of in front of the stadium on Montlake Blvd. This adds a lot of commute time with no value for me, since I must commute from Montlake / Cap Hill to Seattle Children's Hospital on Sand Point Way.	12/1/2014 3:40 PM
94	Park and rides are too full to park	12/1/2014 3:39 PM
95	If I have to get from one place to the next and it takes 30 min in a car, it usually takes 1 1/2 hours on a bus and working two jobs I have to get to places on time and quickly.	12/1/2014 3:38 PM
96	Route 183's limitations.	12/1/2014 3:36 PM
97	Difficult to get to Children's Hospital and 70th & Sandpoint Way from Downtown with any frequency	12/1/2014 3:33 PM
98	Routes that go through UW campus can run very slowly in the evening and be really crowded with students. It's a bit discouraging for the commuters who don't need those stops (ie. getting on at Children's Hospital and getting off in Fremont)	12/1/2014 3:30 PM
99	Late night services are too infrequent to some of my destinations.	12/1/2014 3:30 PM
100	Buses need to be reliable and efficient or people will choose to drive since Seattle already has a car-centric infrastructure. It is enraging when buses simply do not show up and there is no information about when the next bus will come or why there is a delay. It makes it very difficult to rely on buses to make it to jobs or school or other important appointments with time dealines. The pros of using bus services must outweigh the cons.	12/1/2014 3:29 PM
101	TRAFFIC. TOUGH TIMES. PEOPLE ARE SWEATY, SMELLY AND HOMELESS, SOMETIMES ALL 3...	12/1/2014 3:29 PM
102	Would be nice to have Commuter Buses that stop at UW, continue on to Seattle Children's Hospital. Having to transfer to another bus or shuttle makes the commute too long	12/1/2014 3:29 PM
103	Park and Ride lots are too full! I can't find a parking spot at the Northgate P & R. About once or twice a week, I can't get on a 522 or 312 because they are too crowded. It's hard to watch 3 packed buses go by when it's raining or cold...but if more people are taking the bus, that's great, but that says we need more buses or more frequent service from downtown to the NE end.	12/1/2014 3:28 PM

104	Express services should extend to 9:30a and to 7pm. 64X, or 76 both cap at 8:15a or so in the morning. As schools start at 9:30a, sometimes dropping kids by 8:15a makes it difficult to get to work as there are no express busses from the NE.	12/1/2014 3:27 PM
105	See my other comments.	12/1/2014 3:27 PM
106	The buses I take most tend to go through very congested parts of town that can be very painfully slow and unreliable at rush hour- the 44 and the 70 express buses going from the U District to downtown in the PM peak. Other routes that I have greatly appreciated such as the 28 express and the 355 only run at peak times.	12/1/2014 3:25 PM
107	The buses I get in the afternoon commute are often very crowded. Sometimes I have to wait for several buses to go by before there is room to get on.	12/1/2014 3:22 PM
108	Spending 3 hours a day getting to and from work due to the current bus routes makes buses the last resort for me.	12/1/2014 3:21 PM
109	Often, if the bus is full the driver won't even stop to say there will be another bus soon. The buses are not reliable probably due to the downtown traffic. The sidewalks are unsafe w/ groups of drunks/addicts wandering around. They often get out of hand screaming and staggering all over. Or there are people asking you for money.	12/1/2014 3:21 PM
110	Bus closures when UW is closed affect my commute to work. The buses come early even though one bus away says that it is running 10 minutes behind. It would be nice if the app was able to update better/more frequently to get an accurate reading.	12/1/2014 3:19 PM
111	specific routes get used more during certain times of day. waiting for your bus then see 3-4 other buses for the same route go pass you with no one on them.	12/1/2014 3:16 PM
112	Don't understand why there isn't an express light rail from downtown to airport. It's too slow on train, stops everywhere, Doesn't go to Greenlake area yet, but eventually will in like 2023, if I'm still alive then, so have to transfer, will likely get more use out of it once it goes all the way to Northgate. Could catch at Roosevelt.	12/1/2014 3:15 PM
113	My two main routes, 64X and 76, are rush hour only.	12/1/2014 3:14 PM
114	It feels more efficient to drive when it takes much quicker then busing	12/1/2014 3:14 PM
115	1) Connections are often not timed well (i.e. waiting 30 minutes between buses) - turing what is a 20 - 30 minute drive (even with traffic, or a 35 minute bike ride into over an hour bus time. 2) The last option from downtown to my home (north Magnolia) leaves downtown around 10:15-ish - with the Ballard Locks closing at 9pm, it prohibits using Metro if there are late night meetings and/or events. Similarly, it is equally challenging getting to work for early morning meetings, etc.	12/1/2014 3:13 PM
116	The amount of time it would take to get to my destination is to unreasonable to justify the trip.	12/1/2014 3:12 PM
117	#75 stops too frequently on Sand Point Way. Takes as long to get from 125th to Seattle Children's as it does for me to get from 125th to my home in Woodinville.	12/1/2014 3:12 PM
118	I know many people who have stopped riding the 197 because it's too crowded.	12/1/2014 3:12 PM
119	1. I use a walker. 2. Transfers are time-consuming and frequently involve waiting in unpleasant (cold, dark, uneven ground, uncovered, wet) surrounding 3. If I cannot get fairly close to my destination (see 1. above), I will not attempt a trip	12/1/2014 3:11 PM
120	At times it is more simple / faster to simply walk to a certain bus stop (or just walk in general).	12/1/2014 3:11 PM
121	i often have to wait 30min or more to get home from work in the evening.	12/1/2014 3:11 PM
122	It takes me 20 minutes to get to work in my car. In comparing that to 1.25 - 2 hours one way by bus. When I get off of work time does not match up with a bus schedule or if it does, the bus does not come when scheduled to so then I think I have missed it. I like the idea that more people are using it but often the bus rules are broken by unruly passengers - playing music too loud, eating raw meat, or threatening the driver. Transfers have a time limit which I thing should be more lenient - like for 6 hours..	12/1/2014 3:10 PM
123	Too many transfers for many destinations	12/1/2014 3:10 PM
124	Minimum of 3 transfres to get form my home in Seatac to Childrens hospital	12/1/2014 3:09 PM
125	usually I have to drive due to family reasons (drop off kids). Otherwise 65 schedule is great - please don't change it!	12/1/2014 3:06 PM
126	They would prevent me from taking the bus.	12/1/2014 3:05 PM

127	I live in Lynnwood, and work in Laurelhurst. If I didn't drive part way, it would typically take me two buses, one of which runs so infrequently that my trip would be nearly 90 minutes each way on a good. Regardless, I typically have evening commitments to get to, so cannot always take bus.	12/1/2014 3:04 PM
128	N/A I only use public transportation.	12/1/2014 3:03 PM
129	When I need a really early morning or late night options (especially from the airport) I end up having to take a cab or Uber.	12/1/2014 3:03 PM
130	I mostly feel safe navigating Seattle but there are times when as a single woman travelling alone I don't feel OK - there are times & neighborhoods where I won't walk alone or take the bus on my own if I can possibly avoid it	12/1/2014 3:03 PM
131	Buses are late, sometimes they don't even show up, and then I miss the too few connections that are available to me.	12/1/2014 3:02 PM
132	Need an earlier Sound Transit train and one later then 6:12	12/1/2014 3:00 PM
133	I have to drive to Northgate transit center. It would be nice if I could just walk from my house.	12/1/2014 2:59 PM
134	At peak times the buses where I often get on are so crowded that it is occasionally not possible to fit anyone else on, and passengers have to wait for another bus. That is a problem when they only come every 20 min or so. Also it would be nice to have reliable timetables that are up to date with buses being late. I have also had times where a bus was 2-3 min early, and left while I was hurrying up to the busstop.	12/1/2014 2:58 PM
135	The bus stop by my house is in a very dark area, with not too much light. The bus driver's tend to forget about my bus stop, or miss me by accident.	12/1/2014 2:58 PM
136	Safety is always number one, and I don't feel that the majority of stops I use are safe - at least I do not consider them safe (downtown, Eastlake, U District). Busses not running on schedule is frustrating.	12/1/2014 2:57 PM
137	I use the bus	12/1/2014 2:56 PM
138	busses come late all the time and are way too crowded	12/1/2014 2:56 PM
139	Commuting isn't that bad, but it can be inefficient at times. Like having two of the same bus back to back to each other.	12/1/2014 2:55 PM
140	If transfers do not connect conveniently (seamlessly) or the wait time for the next bus is too long it is very discouraging, especially in bad weather or later at night. Your questions regarding transfers did not really address one of the main issues that they be seamless. Ensure that the rider exits the bus and can enter the next one at the same spot in most cases so that there is no watching a connecting bus leave without the rider while attempting to cross streets ect to access the connecting route. Also it is not necessarily more efficient to unload an entire bus where most passengers will transfer onto another bus. This makes it so that two buses have to take the time to load and unload all those workers, wheelchairs, slightly disabled, strollers and shoppers, when only once would have saved time to the entire system. Also shorter routes tend to be less productive with a greater share of time used for turning around. Make sure all routes will be productive when planning changes.	12/1/2014 12:28 AM
141	I live way too far from a stop.	11/30/2014 10:23 PM
142	buses are crowded	11/30/2014 2:58 PM
143	We need express buses to malls/Ikea to reduce traffic. More express (no stops except downtown) buses/trains from downtown to major destinations. Bus stops are filthy.	11/30/2014 1:37 PM
144	I do not feel comfortable using the bus at night, i don't feel it is safe at the downtown stations, or even on the buses themselves.	11/30/2014 10:37 AM
145	The bus takes a long time to get places but still convenient since I don't have a car in Seattle	11/30/2014 10:28 AM
146	See above - and thanks for asking!	11/28/2014 12:53 PM
147	Having to take multiple modes of transport or multiple connections to get somewhere discourages use of public transport.	11/28/2014 12:04 PM
148	I'm currently pregnant, and then have to pay someone to watch my kiddos when I am not at home, so I am motivated to get home as soon as possible to see my family and save money as welll.	11/28/2014 10:54 AM
149	Transfer waits are unreliable. No restrooms at transfer stations that I know of...safety is a huge concern. And for where I live, I have to make at least two transfers plus transfer to a shuttle to get to work. That basically takes my "entire" day....	11/28/2014 10:38 AM

150	my transfer takes at least 25 minutes waiting for the next bus which adds a lot of time to my daily commute. Since the schedule is not always reliable, I also need to take an earlier bus as I can not guarantee that mine will get me there on time.	11/28/2014 12:03 AM
151	Buses are can get stuck in traffic, while stopping at many stops. This means when they reach my stop they are full. When I have to transfer, it makes it much less likely that I'll go to a destination, especially bus-to-bus transfers, since the schedules aren't always accurate.	11/27/2014 10:51 AM
152	Currently, it takes about an hour and 10 minutes one way to get from MLK Wy S & S Graham St to the University of Washington via transit, a 7 mile trip. The schedule for the Route 8, albeit not as bad as it used to be, is rather unreliable in terms of schedule and frequency. The Light Rail, although still stuttering a bit when reaching International District/Chinatown Station, runs much better than it used to. The 72X and 73X busses are very crowded in the mornings and afternoon, sometimes in both directions, with standing room only being the norm. Generally the ride itself is reasonably quick, except if it is heading towards Downtown in the afternoon, where the routing through South Lake Union surface streets is an awful hindrance.	11/27/2014 12:15 AM
153	i work until 7:30 in the evening. Bus service drops off precipitously before then.	11/26/2014 11:14 PM
154	getting from capitol hill to u village takes more than one bus	11/26/2014 7:16 PM
155	It would be great for moms if buses got to the park and rides earlier in the afternoon to pick up kids from school. (3pm)	11/26/2014 6:56 PM
156	Automobile congestion delays buses and makes it take too long to travel by either method.	11/26/2014 4:02 PM
157	Options checked above are self-explanatory	11/26/2014 3:37 PM
158	Because it is uncomfortable and stressful to be jammed in a crowded bus first thing in the morning. Cranky people also are slow to move and glare at you when you try to exit.	11/26/2014 3:10 PM
159	Everything goes downtown vs east to west within the city. It doesn't make sense to go downtown to get from Ballard to the UW	11/26/2014 3:03 PM
160	i can guess that busses will be off of their schedule so transferring from one route to another can be difficult if the time between the two is minimal - so i probably won't make the transfer and i have to aim for the next bus which always adds larger chunks of time to my traveling. sometimes it is just worth it to drive and have to worry about parking/paying for parking if i don't have the freedom to spend a majority of the day on the bus.	11/26/2014 2:52 PM
161	1- need to get from north seattle to redmond 7am 2- I've been assaulted on a Metro bus and have seen multiple fights.	11/26/2014 1:27 PM
162	* I can ride my bike faster than the bus. * The bus always requires me to transfer to get somewhere interesting. * Rush hour is a joke.	11/26/2014 1:21 PM
163	Bring back late service	11/26/2014 12:54 PM
164	I do still take the bus but, as stated above, the infrequency service does lead me to drive in some instances. For example, I will often drive if I know I'm going to be out late-ish in neighborhoods that would require multiple transfers (i.e. Ballard and Capitol Hill) since I can't afford the hours it would take me to get home.	11/26/2014 12:53 PM
165	Traffic on I-5 in the morning at 6 AM, or so, used to be fairly good for about 5 years. Since Fall 2014 it has become much more crowded and the 586 bus from Tacoma to UW at 5:44 is often late. The 3:38 or 4:08 PM 586 in the afternoon is almost always late and can be 30 to 60 minutes late routinely. This creates a 12 - 13 hour work day. Using the Sounder train is more reliable, but takes a long time, costs more and requires an additional transfer from train to bus to bus. No carpool goes to my work location. The 75 bus on Sand Point Way is often blocked due to traffic backups on Sand Point Way and Montlake. The 30 bus has a reduced number or runs.	11/26/2014 11:14 AM
166	If I have to take 2 transfers just to get to a work shuttle, I will likely ride my motorcycle to work instead. I like 7 miles from work, but using public transport it takes 45 minutes to get to work. I can drive in 22. When going home from the University District, it is awful. I have to take a shuttle to get near a bus stop and then there is only 1 bus option that doesn't require 1 or more transfers. Bus service is never even close to on time after 4 pm in the University District. It has taken me 2.5 hours to get home before from Seattle Children's Hospital. As for non work outings, if I have to make more than 1 transfer, it's often not worth the time or effort so I end up riding my motorcycle.	11/26/2014 10:37 AM
167	The connections for metro coming to bus tunnel in the morning don't get one there in time to get the first light rail train for catching early flights.	11/26/2014 10:26 AM

168	There are no bus stops that are close to my house that will get me all the way to seattle in a timely manner. The kent sounder doesnt run late enough for my work schedule	11/26/2014 9:30 AM
169	If I miss a bus, I may need to wait 1/2 hour or longer for the next one. Usually, my schedule does not allow for that kind of needed flexibility. I prefer direct access, even if that means driving to get there. That is somewhat transferring, but at least I have control over when that part of the commute would happen.	11/26/2014 8:38 AM
170	9 times out of 10 I can get to where I want to go quicker by walking or cycling than by taking the bus, which as of late is in general infuriatingly late - the schedules seem to mean little these days. IMHO it's way worse to pretend you have enough resources to still cover the routes you have and then not be able to live up to it than to admit it and cut back to a level of service you can actually provide.	11/26/2014 8:27 AM
171	Afternoon travel: buses are frequently not on time. It takes up to 2 hours from when I leave work after an already long day to get home. I can get there in half that time by driving -	11/26/2014 7:54 AM
172	I need to arrive for work on time, and because of the unreliability of the buses, I generally have to plan to arrive for work 10-15 minutes before my shift start time to ensure I'm not late. If there were more routes, or the routes were more reliable (particularly since I have to make a transfer), I would be able to plan my schedule better.	11/26/2014 7:31 AM
173	The stop at Westlake Center and at Rainier Beach in the pre-dawn hours that I ride usually is scary. I am not comfortable as a woman waiting by myself for nearly 20 minutes to catch the transfer from light rail to the bus in the morning.	11/26/2014 7:21 AM
174	I do not like transferring because either the gap in the middle (waiting for the next bus) is quite big, and sometimes there are no nearby places where I can either wait cool in the summer or warm in the winter or dry in the rain, also if it's too short I barely make it or don't make it on time and the next one on average takes 20 minutes getting there. Sometimes the buses are too crowded (Need I say more) I would at times like to leave early or leave late (especially with school or work) and the buses don't run as early or as late. So it limits my time and the work I can get done. And well I would appreciate more lighting or if the stops were put in more populated areas, but a heavy emphasis on the lighting and sitting with a roof. Just so the bus can see us and we can feel more safe when we are out at night.	11/26/2014 6:15 AM
175	I have a sleeping syndrome. So I can take the 6 am bus transfer and take another bus just to show up at 8 or so. That is the case for Everett and Renton Boeing campuses	11/26/2014 12:14 AM
176	During rush hour in particular, my bus that goes through south lake union is packed like sardines. Too many amazon employees getting off work at the same time. More frequent buses through that area at those times would mean I don't have to leave an extra 45 min to get to work.	11/25/2014 10:50 PM
177	It doubles or triples my already-too-long commute.	11/25/2014 6:31 PM
178	Service during evening rush hour from downtown to the U District is way too crowded. Although I work above Westlake station I often walk to University Station to make sure I get a place on the bus, otherwise full buses will pass me by. Most passengers get out on NE Campus Parkway so after that the bus is mostly empty, very inefficient. Service needs to be increased on weekends, I'll typically Uber or Car2Go back later at night (anything past 9) because I don't want to wait a half hour or more for a bus (or I don't feel safe doing so). Express service stops at night so it's worth it to spend more on Uber than have it take twice as long (or more) to get home.	11/25/2014 4:42 PM
179	I don't work a 9-5 job. Buses are cater to those people. Not enough service on the weekends.	11/25/2014 3:53 PM
180	Tried the "express bus" once from Federal way and it was awful and took way too long. I couldn't move as it was so crowded. The smell of alcohol first thing in the morning is not something I enjoy.	11/25/2014 3:07 PM
181	Why what? Buses are often many minutes late; by contrast, I've missed 3 buses recently because they departed BEFORE their scheduled time at a time point. Schedules are not reliable. Buses are very crowded. Rapid Ride E buses routinely bypass stops because they have no more room. Same with 41, 75, 66, 67 and other routes, and even more frequently these buses are packed to the absolute gills. An additional problem is that routes don't connect well to light rail and don't run reliably either early or late enough to make it convenient to use transit to/from the airport for flights.	11/25/2014 3:02 PM
182	From my home to Seattle Children's Hospital it takes two buses to get less than 5 miles.	11/25/2014 2:41 PM
183	Where I live I am 3/4 to a mile from the closest bus stop. I often do not feel safe taking the bus to Seattle destinations at night or alone.	11/25/2014 2:37 PM
184	it is a hassel to have to travel to downtown just to get to Rainier Beach area. A bus should be offered to run down MLK from Skyway to RB. curently we have to take the 101	11/25/2014 2:16 PM
185	Not enough parking at station closest to my home.	11/25/2014 2:07 PM

186	The 47 used to go from my house to downtown and back so I used to take that....I can't get up to Children's hospital without transferring and the handoff both ways never works out. (75/32 to 49 or 71/2/3 or vice versa).	11/25/2014 2:00 PM
187	Route 41 is way too crowded in the evenings. Buses are usually full by the time the hit Westlake Tunnel Station.	11/25/2014 1:14 PM
188	I have repeatedly had to get off a bus or stop waiting for a bus and use a Uber to get to my destination. I no longer trust public transportation to get to SeaTac on time for flights due to so many missing or horribly late buses.	11/25/2014 12:55 PM
189	It just seems for a lot of the places I want to go, the routes don't match up well and I have a lot of waiting time during transfers. If I can, I plan errands in-between, but depending on the location, that's not always possible. Frequency (regular and weekends) is the biggest issue for this problem. If a bus comes only once an hour and your transferring (and the first bus is late, or slow, etc.) then it's a drag.	11/25/2014 12:54 PM
190	Buses leaving Convention Place tunnel stop are often overcrowded by the time they exit the tunnel. Why not "start" a route at Convention place? Particularly for 71, 72, 73, 74 (and express).	11/25/2014 12:52 PM
191	If I take buses which stop near my house (169, 157) the problems I mentioned above arises. For 169, I have to walk one mile to get to the first stop and then I have to transfer and 169 takes too long to get to south Renton P&R (parking is full) and to downtown. For 157 I don't need transfer, but service isn't offered late (especially on the way back from Seattle) and it takes too long due to traffic. As a result, I end up taking the sounder train which I take from Tukwila station due to the fact that there isn't enough car parking at Kent station.	11/25/2014 12:38 PM
192	These things don't stop me from using public transpo, but they do prevent it from being easy and efficient.	11/25/2014 12:32 PM
193	I need to drop off elementary school children on way to work and on way home and could not reach work or childcare in time using public transportation. I live 8 miles from work. I can drive 7 miles along Lake Washington BLVD without before reaching a traffic light for a commute of 15 minutes. It would require be to take 3 buses and a commute of 1 hr and 55 minutes each way.	11/25/2014 12:26 PM
194	Need to add additional cars especially during peak hours	11/25/2014 12:22 PM
195	Having to drive to a transit station, take a train to seattle, hop on a bus to a shuttle stop, then take a shuttle to my work destination is inconvenient and time consumung, but it is better than driving in traffic.	11/25/2014 12:17 PM
196	The commute between West Seattle (Alki) and the U District is long and requires 2-3 buses to get me to my destination. I normally telecommute on Fridays, and for good reason - I had to be on-site on Friday, Nov. 21, and it took me 2.5 hours to get home Friday afternoon.	11/25/2014 11:38 AM
197	It would be nice to see Emergency call boxes, better lighting and current schedules for that stop (not just some other stop)	11/25/2014 11:36 AM
198	Stated above.	11/25/2014 11:36 AM
199	I need to return home from North Seattle College after night class (so around 10 pm), to 25th and 57th NE. Currently, this isn't possible. Transfers are VERY inconvenient if buses aren't on time. With MetroTransit, unfortunately, you have to assume that you will always miss your transfer, because if by some miracle your first bus isn't late, the second one may well leave early.	11/25/2014 11:34 AM
200	The uncertainty of not knowing how long I will wait for a bus or how long my commute will last, makes taking public transportation less appealing.	11/25/2014 11:24 AM
201	getting from work to school at 5pm sometimes requires waiting for several buses (because the 71, 72, 73 buses are full by the time they reach Convention Station) Usually I get a ride home because there are not frequent enough buses going from U-district to West Seattle after class (9:30pm). My daughter drives from West Seattle to U-district to pick me up.	11/25/2014 11:13 AM
202	There are many times where I don't feel comfortable with some of the sketchy people with mental disorders on these buses. There's a specific asian woman on one of the buses (66 I think) who sits there, talks to herself, and then proceeds to smack herself in the head very hard and loud. I'm seriously scared she's going to get all violent with me. If you look at her she starts getting verbal, loud and foul language. It's scary.	11/25/2014 11:08 AM
203	The 44 is so overcrowded that it's sometimes impossible to get on in the U-District headed toward Ballard. And, because it runs on a busy street, it seems like the west bound busses are never on time. Last week I saw that my bus was late, so I started walking from 9th & 45th. The bus I was waiting for didn't catch up to me until I was at Stone Way!	11/25/2014 11:04 AM
204	We need more cross-town transit options. I don't know why it should take over an hour to get to a place I could drive to in 10 minutes.	11/25/2014 10:58 AM

205	The 8 is notoriously over-crowded and massively late in the morning. The unreliability of the 8 ensures I get to work at unpredictable times. Additionally, taking two busses to travel what would take 20 minutes by car is shameful.	11/25/2014 10:43 AM
206	Currently, my bus trip from my house to work is perfect. But if they cut down on the frequency of the buses, or if I had to transfer, or if I couldn't get the bus in time to be at my job by 7am, then I would choose another way to get to work.	11/25/2014 10:40 AM
207	Sometimes traffic from Seattle Childrens HOspital is horrible and it takes nearly an hour to get to King Street Station, missing the train and having to wait for the next train.	11/25/2014 10:38 AM
208	I don't like to transfer busses several times to get somewhere that is a 30 min drive. IE. Home in MLT to work in Seattle.	11/25/2014 10:37 AM
209	I would never transfer buses downtown at night - it doesn't feel safe at all. And sometimes the connections are way too long to make sense, so a cab is a better option.	11/25/2014 10:31 AM
210	The current morning commute is great. I find the stop at 2nd and pike incredibly dangerous and there is lots of drug activity going on and harrassment of people who are just waiting to get home after a long day at work. It also would be nice to have busses more frequently show up and/or on time. It's hard to wait 25 minutes when I can't make my connection.	11/25/2014 10:28 AM
211	I have no choice but to use public transportation, but these things make my commute more aggravating.	11/25/2014 10:27 AM
212	I don't like to transfer because too many times my first bus ran late and I missed my second and then I had to wait a half hour or more for the next.	11/25/2014 10:21 AM
213	I am williing to wait 10-15 mintues, but after that it is time wasted from my life...i can drive to work in less time than waiting for the always late 271 in the AM	11/25/2014 10:21 AM
214	Sometimes I need to get somewhere fast, and depending on my starting point and my destination, public transit just takes much longer than driving or cabbing. I think buses and trains are safe, but depending on the time of day, the walk to/from the stop and/or waiting at the stop is questionable in terms of safety. This isn't necessarily anything that can be addressed, it is just a fact of life. As a woman, I'm not waiting at a bus stop alone at 11 pm in certain parts of this city.	11/25/2014 10:17 AM
215	I primarily use public transportation. If I have to transfer more than once, I will not go to a location. If I have to go north to downtown to go back south, I will not go to a location unless needed. to transfer. I find this annoying and it does limit options on where I travel. Service on some routes isn't available on weekends (Route 9). This limits going to capitol hill because the 8 takes nearly three times as long to get to the same destination. (Broadway and John). It takes too long to get to my destination. Same reason as above.	11/25/2014 10:16 AM
216	I work at odd shift, 9am to 9pm. Getting to work is fine, getting off is the problem. Buses arent frequent enough.	11/25/2014 10:14 AM
217	Primarily bus delays and overcrowding (due to insufficient service or clogged roadways that buses get trapped in, see the 8 route)	11/25/2014 10:12 AM
218	I still take the bus to and from work and when I can but a lot of the time, it takes twice as long to get somewhere (North Seattle to Ballard or Northgate to Downtown) and the buses are usually crowded. I can't tell you how many times I have missed a bus due to it leaving early or standing around waiting for the bus to come because it's late. I understand it being a few minutes late (5 min) but sometimes I'll wait around for 15-30 min for a bus to arrive. I know there's not much that can be done due to traffic but I actually plan when I take the bus.	11/25/2014 10:08 AM
219	I tend to plan ahead so I understand if it may take a bit long to get where I need to go but feel it is worth it by not having to drive - park - get frustrated with traffic!!! Would like it to run earlier if possible/feasable.	11/25/2014 10:08 AM
220	A transfer would not be that big of a deal if the bus schedule was more reliable. My biggest consistent reliable is if I miss the 8:17 am (75) leaving the Transit center, the 8:28 is always 10-15 minutes late and then the bus that should have been a double is now a single and has to pick up two loads worth of people. It's also reliable that the 3:40 (75) leaving SCH will be 10-20 minutes late and again a large group of people have formed and now it's only a single bus and on this route the driver will just stop picking people up. With this kind of unreliability you can't take a route with a transfer unless you want to double or triple your commute time.	11/25/2014 10:06 AM

221	I live south in Renton and if I take the Light Link Rail to Westlake, I then have to come out and wait for a shuttle from Seattle Children's Hospital to pick me up and then drive through morning/afternoon traffic to get me to and from the tunnel. This whole process takes me just about as long to drive on my own to work. I just recently started using the Light Link and the second day I rode the train there was a physical fight between a man and a woman. The train was stopped, but where it stopped there were no security in place, so the man and woman were separated, but allowed to stay on the train. It made me feel very uncomfortable and unsafe. Also, there are MANY riders along the route I take that get on the train reeking of marijuana. I think there needs to be better security and screening of these people that ride this type of transportation.	11/25/2014 10:05 AM
222	A 45 minute drive can take 2 hours by bus when you have to transfer 2-3 times. For one-way trips that might be okay but usually I'm going there and coming back. That means 1.5 hours by car equals up to 4 hours by bus.	11/25/2014 10:03 AM
223	I find it relatively easy to get to work, but getting home is usually a process. The transfers are mismatched and the bus that's the fastest stops running early. It generally takes me 20-25 minutes to get to work on the bus. It would take me 15 minutes to drive from my work to my home, but because of schedules and transfer issues, the same route usually takes 45-60 minutes. There are actually days it would be faster for me to walk home even though its uphill the entire way.	11/25/2014 9:54 AM
224	They make it difficult because I am not guaranteed to get on the bus even if I go to the station and wait for 10 minutes for the next bus (due to it being too crowded). The inconsistency of the schedule of the 271 also makes it difficult to guess when I need to be at my bus stop (which I have to drive to) because its inconvenient to park elsewhere and try to get on a bus.	11/25/2014 9:52 AM
225	Driving takes an hour, but upwards of 2 1/2 hours.	11/25/2014 9:51 AM
226	My main reason for not taking transit would be the times the bus leaves/arrives where I need it, and how many times I need to transfer.	11/25/2014 9:51 AM
227	Have you been on the 5 or 358? No need to answer why those routes and stops along it are unsafe. I have been harrassed both on the bus and in the shelter at the stop and have been afraid each time. See above answer for the length of time and transfer issues.	11/25/2014 9:49 AM
228	I do occasionally worry about location of my stops, especially the one downtown. There isn't cover for the rain and lots of transits are around. Thankfully I ride during business hours so I'm never 'alone'.. but I also never feel safe. You never see safety officers or police patrolling either.	11/25/2014 9:48 AM
229	see above	11/25/2014 9:18 AM
230	There are no buses that go to my work so I have to walk quite a ways so end up driving more often then I'd like.	11/24/2014 11:02 PM
231	I consistently attend events that run late into the night; it's common for transit service to cease circa 12AM, which poses a problem for me. I also have trouble with transit schedules that don't line up with specific times I have to be somewhere.	11/24/2014 10:04 PM
232	The times posted on the bus stop signs are normally 10-20 minutes off during peak time (traffic). Solution: Run some more buses during peak times.	11/24/2014 9:29 PM
233	A transfer is difficult to make on time if buses are running late. Not enough late/early service also makes it more difficult to use transit. Less weekend service is another reason I may choose to drive instead of use transit.	11/24/2014 6:09 PM
234	Traveling West Seattle to Northgate but it is about as fast as it could be.	11/24/2014 3:15 PM
235	Answers speak for themselves	11/24/2014 3:03 PM
236	Oh, crowded busses... The number 41 in the evening going north. I need a Lake City bound bus, not just 125th and 5th unless I want to walk nearly an extra mile, and because neither the drivers or the loaders seem to recognize that for those of us who need the bus headed to Lake City have a much longer wait than those that just need to get to the Northgate Transit Station, I am forever on overcrowded busses. By prioritizing riders and having those who only need to get to Northgate wait the small amount of time between those busses the crowding could be much better controlled. My guess is that this is not the only route with these issues, there must be others that you do this type of extended trips for some passengers and shorter trips for those headed only to a major transfer station, but it would be wonderful if you somehow managed to train drivers and loaders in how to manage this issue. However when I mention it to them they look at me as though it has never occurred to them that there might be passengers that are waiting specifically for the longer routed busses. It's very frustrating.	11/24/2014 2:21 PM
237	I have been in other cities and if you miss a bus, there is another one in 6-10 minutes not every half hour like here. Also when the bus is late, this is not reliable and the only way to know is with an app and not everyone has Smart Phones. I think Real Time Tables are at bus stops on Aurora Avenue and it would help to have them at every stop. It is frustrating to not know if the bus is even going to come.	11/24/2014 12:09 PM

238	Restated from question 5: My concerns with service are as follows: 1. overcrowded buses bypassing stops as they are unable to accommodate any more passengers at peak times, especially during events like a baseball game downtown, etc. 2. buses stuck in traffic gridlock; more bus-only lanes or bus-only during rush-hour lanes where possible would certainly help. 3. safety. Many area's of the city are sketchy. I generally take the first bus I can in the 3rd & pine/pike area of downtown. The city does a piss poor job of making people feel safe in the downtown core. They need to get the gang-bangers the hell out of downtown! 4. the light rail is awesome as it moves quickly without being heavily subjected to street traffic.	11/24/2014 10:44 AM
239	Heading home after happy hour or a concert can be tricky, because buses don't always run late enough to transfer to the light rail. Buses heading to and from the UW to downtown are usually crowded (specifically express buses).	11/24/2014 10:38 AM
240	The Sunday service on the route 50 is only every 60 minutes. Consequently I don't use that bus on Sundays and don't go a lot of places because hourly service is too unreliable.	11/24/2014 10:29 AM
241	SERVICES ISN'T FREQUENT ENOUGH, SERVICE ISN'T OFFERED EARLY BEFORE 5AM OR LATE ENOUGH AFTER 6PM, I HAVE TO TRANSFER.	11/24/2014 9:40 AM
242	*Sounder trains and express buses run only during typical "going-to/going-from" work times from Monday through Friday and aren't available past 6-ish PM or during work hours on the weekend. *Local buses tend to have a lot of "party-crasher" riders at night who under-pay or don't pay at all but the drivers have to keep their schedules and protect the safety of the rest of us so they don't do anything. We need more security on the buses AND people in authority who will follow-through with threats to arrest or eject people who disrupt and/or don't pay. * Drivers either need to uphold the "no-food and no-drink" rules. The people who eat on the buses and trains are also the ones most likely to throw their trash (and leaking drinks) on the floors or behind the seats. * Drivers need to refuse to transport people who have offensive body odor. Not only do they prevent the seats near them from being filled but they leave behind their odor when they leave and our clean clothes are contaminated. [The bigger problem here is that a lot of those people would gladly be cleaner but have no shower facilities available to them ... but that is not Metro's responsibility.]	11/24/2014 9:20 AM
243	I can put up with quit a bit, but when it rains and is cold -and I have to transfer buses, it becomes a bigger deal. Also, at night it would be helpful to be able to take a bus that didn't require me to walk or hang out in places I find uncomfortable at night- like University Ave.	11/24/2014 8:34 AM
244	Often times by the time I walk to the bus stop, wait for the bus, and take the bus somewhere, I can bike there just as fast. So a lot of the times I end up just biking.	11/24/2014 8:33 AM
245	Dirtiness/Safety issues aren't really the fault or within the purview of transit to fix. Some transit clients have poor personal hygiene and I feel uncomfortable around some clients due to their actions (yelling, soliciting, fighting) sometimes on the bus and sometimes at stops, particularly Pioneer Square.	11/24/2014 8:31 AM
246	Since buses don't have their own lanes here, they are often just as slow as traffic. I prefer to bike often because it's faster. With trips where I would have to transfer, I'm likely to use a different mode because that's so annoying.	11/24/2014 8:09 AM
247	after 7pm the service levels in kent drop wait times start increasing also service is not frequent enough and end too early in the evening on Sundays	11/23/2014 9:33 PM
248	No weekend service in my neighborhood. During the week, buses are standing room only, and often pass by stops because they are full. They are usually late during the evening rush.	11/23/2014 9:14 PM
249	When I have to transfer buses, it is really important that the buses are on time. If the bus is late by five minutes, that's understandable, but if it's always late by ten or fifteen minutes, something is wrong. In particular, there are some drivers that are consistently late.	11/23/2014 7:34 PM
250	-Funding cuts unfortunately	11/23/2014 3:51 PM
251	I have had situations where the 44 was too crowded during morning peak hours, and new passengers couldn't board, and had to wait for a later bus. This definitely disincentives taking the bus for me.	11/23/2014 2:06 PM
252	Can not rely on Metro at 5AM Monday thru Friday. Took away connections from downtown Seattle into the U District. I would be forced to walk up a big hill to make a connection that leaves 3 minutes after getting off of a Sound Transit bus. I'm disabled and can't walk that fast or that far in 3 minutes. Next bus would make me late by at least 30 minutes if not more. NOT ACCEPTABLE. Not every one works 9-5 jobs. Many people need to get to work long before that. Look at the first ST bus out of Tacoma...it leaves at 4:10AM. Its packed to the gills. Many people on that bus rely on transfers to Metro buses. Many don't make it due to Metro taking away service at 5AM.	11/23/2014 11:22 AM
253	Not enough buses, time and money. People eat on the bus, there is graffiti on the seats	11/22/2014 6:59 PM
254	Buses are slow, late, not frequent enough and then overcrowded. I still ride the bus but it is very disappointing.	11/22/2014 1:21 PM

255	I want to get places in either the same or quicker (relative to other options). Walking to/from stops/stations are a drag in bad weather or carrying heavy items. Transferring with heavy items is difficult.	11/22/2014 12:42 PM
256	We used the bus when we had it.	11/22/2014 8:33 AM
257	I only use the bus device for work transportation. I use car sharing for errands and other activities because it isn't as convenient. As far as work transportation I would also like to see more convenient options. I only had 1 route that I used to use that was a one route option (which increased my walk after getting off the bus) but it was discontinued.	11/22/2014 8:10 AM
258	ST route 510 was discontinued for the Seattle - Everett trips that I used to take. ST 512 has many more stops, so takes much longer, and does not go all the way to my destination. If I ride buses from home to work, it requires 3 transfers and more than 1.5 hours to go 26 miles, primarily on I-5.	11/22/2014 1:41 AM
259	Currently I don't have to transfer. If I had to transfer, it would definitely be a disincentive to ride the bus.	11/21/2014 8:50 PM
260	Most of my routes are every 30 minutes, and several are habitually late (31/32), so transfers get missed. Downtown stops on 3rd avenue don't feel super safe at night.	11/21/2014 8:01 PM
261	Rt. 7 Extremely dirty Rt. 120 very dirty	11/21/2014 7:23 PM
262	Transferring adds time and uncertainty. It is almost always faster to drive except to UW, Harborview, and VA (because parking is so onerous).	11/21/2014 7:09 PM
263	I have no car. I depend on public transit and my two feet to get where I need to.	11/21/2014 3:58 PM
264	Use Metro to get to work and back. Otherwise use car.	11/21/2014 2:41 PM
265	My main complaint is the Lynnwood Transit Park and Ride never seems to have enough parking.	11/21/2014 2:35 PM
266	Really? I suggest you try to rely solely on public transportation and have an active social life.	11/21/2014 1:56 PM
267	I am get out from work about 7:30 pm ,so I have too wait too long to get a bus.	11/21/2014 1:28 PM
268	Transfer in the U-District from ST 586 to Metro 72 or 73 takes a while.	11/21/2014 12:55 PM
269	The buses are often late, sometimes hopelessly so. A 20-minute trip becomes 30 to 40 minutes in the afternoon.	11/21/2014 11:33 AM
270	I am happy that there is public transit to most of the places I need to get to, however, I have to adapt to the bus's schedule, sometimes I miss my next bus right after getting off one, when driver communication and awareness could have aided in smoother transfers; cooperation between county operators could be strengthened; While living in Skagit Valley, If I missed the last bus, a transit officer has on multiple occasions driven me to my destination out of courtesy, I never relied on that regularly, but when I was stranded at a bus station late at night it was nice to have a person there to help me get where I was going on behalf of the transit system. That issue isn't as apparent in the larger cities, but that assistance was well appreciated and made my transit experience better. The cleanliness of buses is equally determinate by the standards and behavior of it's riders, as it is of the transit employees, and I believe that if the Transit systems raised their standards, the riders may act more respectfully, and out of appreciation for the service, rather than acting out of frustration for lack of attention by other riders, or rebellion by those who may not see or appreciate the value in a public transportation system.	11/21/2014 10:13 AM
271	Waiting around too long for transfers is tougher when I have my two little kids with me. One transfer is ok, but more than that is too inconvenient with little kids.	11/21/2014 9:43 AM
272	I obviously can't tell you why service isn't offered late enough or on weekends (after 9, buses in U district die out quick, especially around U ville). But if a route takes me more than 2 buses to get there, I usually reconsider and just don't go..there's a fear factor of messing up and missing a bus, becoming stranded in an unfamiliar location. Or just that most people consider it a hassle.	11/21/2014 9:17 AM
273	Sometimes it is the way it is	11/21/2014 8:50 AM
274	there should be more frequent and late night service on weekends when patrons tend to spend more quality time.	11/21/2014 8:34 AM
275	southbound 124 boarding at 112th is almost always at least 10 minutes late. route 41northbound approx 6:10 pm monday nights (only night i go that direction) gets so overcrowded that there is not even enough standing room! Gets so stuffy with no ventilation that it can get hard to breathe! (stuffiness problem is cured after exiting the tunnel when ventilation is turned on)	11/20/2014 10:10 PM
276	There is poor service on 15th Ave S on Beacon Hill.	11/20/2014 10:08 PM
277	I can't get to work/home on time to meet obligations. My entire family would only take the bus downtown on weekends (rather than driving) if it were available (but weekend service has been eliminated).	11/20/2014 10:05 PM

278	Sometimes when things are too slow or service ends early I have to resort to a taxi or uber.	11/20/2014 9:56 PM
279	I normally work 8-5 but often work until 5:30 or six so have no choice but to take the 586. It would be great if there was another ST train in the evening. The last one now leaves at 6:12 but with the heavy traffic between the U.W and downtown Seattle, one never is sure to make it in time.	11/20/2014 9:54 PM
280	The 48 needs the same type service on Sundays/holidays that it has the rest of the week. It also needs larger buses on summer weekends when folks are coming to Green Lake from all over. Larger buses also needed on UW game days. Weekday mornings whe UW in session are very crowded in spite of extra service added.	11/20/2014 9:52 PM
281	Mid-day options narrow, for instance, the 556 going from Bellevue to Northgate. Sometimes, the bus leaves late, even though it's been sitting for a few minutes at the departure point and past its departure time, the 234 at Bellevue Transit Center in this case. Other times, the connectivity link is missing, e.g. the CT 130 to the ST 535 at Lynnwood Transit Center, or the ST 535 or the Metro 342 with the 235 at Totem Lake. Sometimes, it would seem that interlining would alleviate the concerns of those of us who transfer a fair amount. With Sound Transit, there are cities like Shoreline that have gotten short-changed, only paying sales taxes, but getting nothing but the future of light rail, the 145th station on a dreadful street for traffic (for decades!), but which the city and applicable state officials successfully got their way due to false arguments, e.g. pooh-poohing 175th due to "too much traffic" when 145th has 1/3 more than 175th does, and dissing 155th as a choice for "being a quiet neighborhood street" when 185th, which was selected, is an even-quieter neighborhood street than 155th and with an identical cross-section. As for bus service, the off-peak stops are on the Seattle side of 145th when a ST bus route that actually had a stop within the city limits would have been a smarter investment, perhaps traveling to the south end, such as to Sea-Tac.	11/20/2014 9:29 PM
282	See my answer above in 5.	11/20/2014 7:40 PM
283	I dislike all the ads covering the windows of the Sound Transit busses, and the larger busses have very few window seats and most of them have only partial views outside.	11/20/2014 5:30 PM
284	There is a HOLE in the schedule weekday evenings around 7pm and Saturday around 5:30 pm when Route 70 stops running and before the 71, 72 and 73 begin local service. This has left me looking to transfer in the tunnel at 5:45pm on a Saturday only to see that these buses are still running as Expresses and prompting me to go up to 3rd Ave only to find that the 70 made its final Northbound run before 5:35pm forcing me to then go back down into the tunnel to wait until after 6pm to catch a local. That's a lengthy description of an obvious and easily remedied problem. The 70 should not stop running until the Express buses have switched over to local service. Better yet, allow the 71x,72x and 73x to make limited stops on Eastlake like the 66x.	11/20/2014 5:21 PM
285	When routes are changed, it seems like transfers are not taken into consideration. When a bus regularly misses a useful transfer by just a minute or two, it wouldn't take much to fix it. When a transfer is missed, you often have to wait 20-30 minutes for the next bus. Also, it's more useful to build in redundancy--where there's more than one option--which is less and less the case downtown, where you can catch a bus going north+west, but have to walk 2 blocks to catch one going north+east.	11/20/2014 5:01 PM
286	I don't want to spend hours on different buses. I get anxious about missing a stop or a transfer. I also get upset when buses only come every 20 minutes and one of them never shows up. I often stand around waiting for 25-30 minutes for the next bus.	11/20/2014 4:37 PM
287	there's nothing more frustrating than getting to a transfer point and seeing your second bus take off before you are able to get off the bus you are on...the schedules do not always line up right (buses are often running late and sometimes taking off early). One Bus Away has been great for my commute, however. At least I can somewhat plan ahead for a late or early bus. It seems metro buses do not get as much priority in traffic as they deserve. Northbound on Rainier Ave in the morning (rush hour) is awful, the buses just sit and wait sometimes.	11/20/2014 4:27 PM
288	As stated above, missing a bus often means having to wait another half-hour for the next bus. During weekends and late at night, it may mean waiting an hour.	11/20/2014 3:55 PM
289	The time to go by bus is twice that of going by private car.	11/20/2014 3:37 PM
290	Service is limited mid-day for commuter buses. Park & rides reach parking capacity early in the morning and those that have available capacity do not have mid-day service or frequent enough connecting service. I need to be able to get from downtown Seattle to Everett park & rides mid-day in case I have to come home unexpectedly. Need better connecting service from downtown Seattle to First Hill. Some ST routes like 512 are too crowded. Current Metro routes are overcrowded.	11/20/2014 3:22 PM
291	the route 101 HAS NOT HAD ANY True Service UPGRADES IN 10 Years. And Yet the 150 and 106 have been upgraded	11/20/2014 2:40 PM

292	I am fortunate that transit works well for me, but I am a person with a lot of relative privilege in terms of my residential location, income, and access. I recognize that it is not nearly as easy or accessible for others.	11/20/2014 1:55 PM
293	I could take the train from Auburn, but it isn't always realistic for me to make the last train out of Seattle at 5:40 if I'm working until 5:00.	11/20/2014 12:30 PM
294	Too many stops on the 373 route - especially with duplicate service from other buses. It's a joke to call it 'Express.' We all wish it was a true 'Express.' The 373 & 271 are pretty reliable, other buses, however, have horrible reliability at times during the day... Sometimes 2 or 3 buses showing up back to back when one hasn't been through in 30 minutes. I would love to use the bus more on the weekend, but service can be terrible! Of course, it depends on where you're going. Rapid Ride ruined taking the bus to Magnolia and Ballard - 1. Some of the great routes were canceled 2. Rapid Ride is not rapid 3. Less of the area is served.	11/20/2014 12:19 PM
295	Route 25 slowly weaves through the UW Campus before it slowly weaves its way through Montlake Neighborhoods to arrive at City Center worksites. The 25 route is too inefficient for folks living NE of UW travelling to the city center for work but it is good for Montlake and UWMC folks going downtown. Routes 31,32, 65 and 75 slowly weave their way through UW campus where I have to wait 10 - 15 min on Campus Way for a 71 - 74 to get me to Pioneer Square. 4 -6 pm afternoon travel on the 71 - 74 often feel unsafe due to overcrowding on these routes. They don't come nearly as frequent as the schedule shows. They are often delayed by the light rail trains so large crowds of people gather on the University and Westlake Platforms waiting for a 70s bus. Other routes like the 41, 150 or 105 will pass through multiple times before a 70s route bus arrives. The 41 and other non 70 buses usually have seating or standing space but 70s often pass up stops because they can't take on more passengers in the tunnel. The 75 and 65 routes through UW have been using the small buses rather than the large accordion type during afternoon rush hour. The small buses get overcrowded quickly to unsafe levels - stop using the small buses on this route during afternoon rush hour.	11/20/2014 11:34 AM
296	243 worked. Now my wife if force to transfer in the rain...stand on a crowded bus. For what? Terrible service to Bellevue from Seattle. Awful, awful decision making on Metro's part. Should she drive and clog up your bus routes even more???	11/20/2014 11:18 AM
297	I have seen a lot of buses come too late or not at all. It is really frustrating when I arrange my schedule to catch a bus and it came 10 minutes early or 30 minutes late.	11/20/2014 11:18 AM
298	Most of the time it is great, but sometimes the busses don't run as often, like during UW vacations and weekends.	11/20/2014 11:11 AM
299	N/A	11/20/2014 10:25 AM
300	I live close to work	11/20/2014 10:20 AM
301	If I want to catch an early morning flight from SEATAC. I can't use public transportation. The earliest flight I can probably catch using public transit would be a flight after 8:30 a.m. When you need to take a bus before transferring to light rail There is no way you can make an earlier flight. Furthermore, light rail doesn't start early enough to get passengers to early morning flights. And, when you flight is delayed getting to Seattle, you can be out of luck taking light rail home. Its a total bummer...especially when you've paid for a transit pass.	11/20/2014 10:13 AM
302	At rush hours the 70s are so crowded that I often have to watch several fully loaded buses pass, making me late. Routes like the 1, 7, and 36 are frequently populated with menacing people, many of whom clearly have mental problems and could be violent. Buses like the 36 and 49 are incredibly dirty; I cringe every time I have to ride them.	11/20/2014 9:56 AM
303	Takes a long time due to local buses that make a lot of stops, and are often overcrowded. Eliminating every other stop could help. Crowds increase loading /unloading times, and make it difficult to do anything on the trip - barely enough space of your own to pull out a small book or e-reader, and if you're standing you're constantly moving around to accommodate on/off movements. There are some seriously unbalanced people who board buses or roam downtown Seattle/U-District. I don't have solutions, but I recognize the problem isn't Metro, but having to worry about whether a mentally ill person will create a dangerous situation on a crowded bus raises everyone's stress level.	11/20/2014 9:48 AM
304	SLU needs Link :)	11/20/2014 9:47 AM
305	Bus 25 runs only on weekdays and then only about once every 70 minutes between the hours of 6 am and 6 pm. All other buses to get downtown are not close to many of us living in the Harvard-Belmont-Bellevue area of Capital Hill, and are uphill making it more difficult to get to the stops on Broadway Ave E.	11/20/2014 8:00 AM
306	I am lazy	11/20/2014 2:16 AM
307	Many of the 70, 71X - 73X buses that pass through the University of Washington are overcrowded.	11/20/2014 12:16 AM

308	It seems like every route goes through downtown and involves a transfer. Because it takes too long, and rides aren't frequent, I can't just get on a bus - I have to carefully plan out when I'll leave, and how I'll get there.	11/19/2014 10:38 PM
309	SLU traffic impedes bus and trolley movement. UDistrict buses can be too crowded. Stops downtown or in the Central Area can be rough - although I see good efforts underway. Keep working at it.. waiting for a bus in the dark, alone, can be daunting.	11/19/2014 9:00 PM
310	The first 372 from Bothell to the UW in the morning (I get on in Kenmore) at 5:51am is a small bus. A number of riders are standing early on in the run. Need a larger bus. It's even worse in the afternoon runs. The bus is usually full to capacity with riders standing all the way to the back of the bus. Sometimes full before it gets to the last stop on campus.	11/19/2014 8:53 PM
311	i really can't com[plain because the busses have been very helpful and on target for me.	11/19/2014 7:47 PM
312	The stop isn't safe because it's right where cars turn right and they come around the corner very quick and not very lit when it's dark.	11/19/2014 5:35 PM
313	Sometimes I have to leave earlier because no no bus from Redmond to UW late on.	11/19/2014 5:26 PM
314	I get downtown from my home takes at least an hour, partly due to bus waits. Buses from downtown to campus and vice versa are often over crowded and cant pick up every passenger. Same thing leaving campus to lake city/standpoint direction.	11/19/2014 5:18 PM
315	I usually work at UW until after 6pm, but by then the 68 doesn't run any more. If I work past 7:30, there's only 1 bus per hour up 25th Ave NE.	11/19/2014 5:13 PM
316	The reasons I have selected are self-explanatory.	11/19/2014 4:32 PM
317	if need to transfer to 2 other buses (3 bus schedules need to be coordinated)	11/19/2014 4:26 PM
318	My car is faster even if it is hard to find parking. The onebusaway app is not reliable and buses are never on schedule. I feel like I am going to get sick or something because of how the buses pack people in. The ebola in US makes me not want to be in crowded areas like a bus.	11/19/2014 3:52 PM
319	If it takes too long to get to my destination I might rather take a different form of transportation. Transferring is not preferable because I might miss the transfer and be stuck somewhere for a while. And the crowded buses sometimes don't even open their doors because they can't fit anyone else.	11/19/2014 3:48 PM
320	Express service is not offered late enough in the evening from downtown to the Ravenna neighborhood. Even when it is offered, I sometimes wait for an express bus (76, 77, 306, 312) that never arrives when I should have just taken a slower bus that goes through the University District (71, 72, 73), and then end up taking one of those slower buses in the end anyways, getting home very late. This all just makes me want to take my bicycle instead, but extreme weather sometimes forces me back to the bus.	11/19/2014 3:32 PM
321	The city keeps building giant condos in West Seattle, but the buses have been eliminated and are WAY to CROWDED!!!	11/19/2014 2:36 PM
322	Transfers downtown or that require walking under Aurora in Fremont don't feel safe. Why doesn't metro have more surface bus security downtown?	11/19/2014 2:29 PM
323	Bus is out of way to my workplace, so I have to get another bus to get into my workplace	11/19/2014 1:46 PM
324	The station is about a 20 minute walk from my house, though their are infrequent buses connecting my neighborhood to the station. Once at the station, the buses downtown are already packed by the time I get on - typically standing room only and people left on the platform. The overcrowded buses are too hot, uncomfortable, and sometimes smelly. However, none of these issues stop me from taking the bus.	11/19/2014 1:21 PM
325	NA	11/19/2014 1:13 PM
326	I wish there is a light rail station near UW, since the northbound buses from downtown can be very crowded (especially if you board at Westlake or Convention Place stations).	11/19/2014 12:54 PM
327	If I have to transfer, it adds considerably to the travel time and I'd rather drive. The service east to west or west to east is particularly bad. It would be nice, for example, to get from Ravenna to Ballard via 65th St. without transferring.	11/19/2014 12:52 PM
328	frequency significantly drops off outside of rush hour. reliable, frequent transit will allow me to take it to for dinner in the evening or on weekends. it should just be about commuting to work.	11/19/2014 12:47 PM

329	To get to my church on Sundays, from Kent Station to Overcomer Covenant Church, 33415 Military Rd S, Auburn, WA, I have take the 180 to Auburn Transit Center, transfer to the 181, after waiting 20 plus minutes. Then a 20-25 minute walk from 320th and Military Road to the church.	11/19/2014 12:23 PM
330	I usually take the bus to downtown Seattle, which is usually fine on the weekdays, but if I am running late or need to get to an interview, sometimes I avoid the buses altogether because the bus does not come on time (early or late or not at all) and sometimes it takes far too long to get to my destination. A 10 minute drive takes 30-40 minutes on the bus, and sometimes saving myself the time, especially when my schedule is tight is the reason why I don't use public transportation sometimes.	11/19/2014 11:52 AM
331	the closes bus route is 13 miles away. the train doesn't run late enough.	11/19/2014 11:46 AM
332	Services like One Bus Away are helpful - but for people to count on buses to get places on time they need to be reliable. They need to come on time, nearly all the time. And if they aren't going to be on time, there needs to be a way to communicate that to riders.	11/19/2014 11:37 AM
333	I think one reason it takes so long to go by bus is that there are far too many stops. Particularly on 65th st.	11/19/2014 11:33 AM
334	See notes above. No direct route from where I live (Wedgwood) to places I would like to be able to take the bus - Northgate in particular. Route to downtown is too indirect and slow.	11/19/2014 11:22 AM
335	It gets very cold in the winter waiting for a bus outdoors. I would rather see smaller buses and more frequency.	11/19/2014 11:13 AM
336	If it takes too long to get to my destination, either because the bus makes too many stops or because I have to walk too far, then that makes me not want to use the bus. There are some trips I make using Metro that take the better part of an hour to complete, when driving would take under twenty minutes if I had my own car. Infrequent service is especially a problem when connecting from one bus to another. A 15- or 30-minute wait in the middle of a trip is especially annoying.	11/19/2014 11:03 AM
337	The 510 from Everett to Seattle is ridiculously crowded, and the South Everett Freeway Station park and ride gets filled to capacity very early in the morning. The 513 only comes during the morning and evening during rush hour and I am stuck downtown during the day. I have gone home sick twice and had to walk from one park and ride to another where my car was parked.	11/19/2014 11:01 AM
338	I would like the 542 to be offered later than 6 pm. Also, I would like a direct bus route (without transfers) from the UW to Sammamish because transfers are too cumbersome, especially with the 269 being offered at such limited times.	11/19/2014 11:00 AM
339	The main reason I hesitate to use metro is because most stops have no shelter from the elements and limited seating for standing. But mostly no shelter	11/19/2014 10:59 AM
340	used to be able to walk to the bus but am currently rehabbing my back	11/19/2014 10:48 AM
341	Busses through Kirkland that travel onto I-5 are always late, slow, and unpredictable.	11/19/2014 10:46 AM
342	Light rail and bus service either isn't available early or late enough and/or I would not feel safe using it. Particularly to/from SeaTac.	11/19/2014 10:33 AM
343	A trip to Northgate using a bus requires a transfer downtown, which is out-of-direction travel. Route 41 service frequency degrades significantly during the weekend. like 30 minutes service on Sundays.	11/19/2014 10:25 AM
344	See previous answer	11/19/2014 10:06 AM
345	not good park and ride options	11/19/2014 10:01 AM
346	The bus is usually not on time, so it is difficult to take it to & from work (Fremont - UW). I am usually late to work, and late picking up my child at school on the way back.	11/19/2014 9:45 AM
347	The buses and stations are clean enough and safe enough. The biggest obstacle is if I want to go someplace and the 375 stops running. Then I have to go to a back up plan of connecting to a 522, someplace. I work early, and the train works wonderful to get into seattle.	11/19/2014 9:31 AM
348	Walking a great distance in the dark to catch the bus is not worth it to me. The U-district is not safe. There are certain streets/stops that drug dealers just loiter for hours at the stops. So during the months of more darkness and blistry weather I prefer to drive.	11/19/2014 9:16 AM
349	I used to take the bus from West Seattle to downtown on the weekends (56 or 57). The need to do so from the Alaska junction makes it more timely and convenient to simply drive. Other commentary provided above.	11/19/2014 9:09 AM

350	Route 197 6:45 bus is ALWAYS late and gets me to work late. There should be a bus time in between the earliest and the 6:45 since the 6:45 is closer to the 7 o'clock bus most of the time anyway. By the time the 6:45 bus comes it is too crowded...mostly standing room. Many times in the evenings since I am picked up at the last stop before the freeway (UWMC) there is only standing room. An hour and a half is a long time to stand after a hard day of work.	11/19/2014 8:39 AM
351	The light rail doesn't get to the airport early enough for most of my flights. It's hard to take my daughter to ballet because of too many transfers.	11/19/2014 8:38 AM
352	It only makes sense for people to use public transport if it is more convenient than using their own cars. The lack of East-West routes in particular and long waits for transfers make taking the bus to most places a lengthy ordeal.	11/19/2014 8:24 AM
353	Late night service does not really exist on Friday and Saturday night	11/19/2014 8:10 AM
354	I have a service dog and long, hot, crowded bus rides are really hard on him.	11/19/2014 7:41 AM
355	They generally can get me where I need to go but are often not available when I need to get places in the morning before 7 am or on the weekends after 7 pm. Often I have to take multiple buses or have long wait times (>45 minutes) to get where I'm going in the morning, late evening/night, or weekend.	11/18/2014 11:40 PM
356	Lack of reliability + transfer = nightmare. If you want people to accept transfers as a way of doing business, reliability has to be tightened up. (For instance, stop using 5 minutes late as equaling "on time.") If I'm transferring *to Link*, I can pretty much rest easy because of semi-dedicated right-of-way. If I'm transferring *to Metro*, I'm always going to worry.	11/18/2014 9:11 PM
357	The routes from downtown north or infrequent and too slow	11/18/2014 9:00 PM
358	Long commute not that safe walking to bus stop late at night. Have to walk down to 12th and Jackson from Seattle University to get bus that takes me home when I stay on campus. This is after #9 express stops running.	11/18/2014 8:52 PM
359	Route 44 takes a lot of people to work or school. The buses get overly packed during the start of school and when it's cold out. It bothers me that during the peak times, short buses are on the route. We are packed like sardines, I will sometimes wait for the next bus if bus tracker says it's right behind or I'll walk home and drive my car because usually it's that way when the buses are late & I find it hard to stand so long with little personal space and I have a shoulder problem.	11/18/2014 8:10 PM
360	My regular express buses during commuter hours are good buses, but are often very crowded. It would be great if there were more frequent trips or if they ran a little later (until 9:00 or 9:30). Catching a bus in the evening downtown after regular commuter hours - if I were to stay downtown to go out to dinner or a show, for example - doesn't feel safe. I wouldn't do it alone if it was dark (in the winter) but I do occasionally do it with friends.	11/18/2014 8:00 PM
361	Weekend water taxi service to Vashon would be great. Faster travel from one side of downtown to the other would help. Bus overcrowding happens too often.	11/18/2014 7:53 PM
362	Because of traffic & metro's poor service & route planning.	11/18/2014 7:49 PM
363	Taking the bus is almost always the slowest option. Buses spend way too much time stuck in traffic, even on the weekends. More transit-only lanes or other improvements to make transit faster are essential!	11/18/2014 7:34 PM
364	Sometimes the bus routes just take a really long time to get where I need to go and they don't stop close enough to my house. Especially now in the winter having to walk a ways from my stop to the bus might make me choose something else.	11/18/2014 6:31 PM
365	Not that it isn't frequent enough, but the northbound 65 schedule is timed so that Jane Addams Middle School students JUST miss a bus as they get out of school (leading to a half-hour wait). Delay this bus by 10 minutes or so!	11/18/2014 6:31 PM
366	Time spent and overall convenience of transit should be competitive with driving plus parking. I find that over medium distances in Seattle (a few miles) that tends to be the case. Over short distances, walking is often faster (not a problem, per se), and over longer distances driving is usually much faster. I think part of it is that buses here make SO many stops. Sometimes every other block! In addition, social problems like homelessness and mental illness spill over onto the buses, which can make things unpleasant. In general the bus drivers are great at de-escalating, but they can't take the place of a comprehensive social services net. This is especially a problem on the 3/4 (of the lines I ride).	11/18/2014 6:24 PM

367	When I was using the bus everyday for work, often a bus route/time would be on the schedule, but no bus would come. When my commute got longer, it was no longer an option to take the bus because there was not a reliable route home late at night. I would also need to allow over an hour to get to/from capitol hill & northgate, whereas it usually takes about 12 minutes by car.	11/18/2014 6:15 PM
368	There is no direct bus that links the University Village area to downtown or to the University District.	11/18/2014 5:51 PM
369	The biggest no-go for me is if I have to transfer. That's a big deterrent.	11/18/2014 5:50 PM
370	I live between Greenlake and Wallingford (Tangletown) so I have to walk 10 minutes. Getting around on the weekends could be helpful just for convenience.	11/18/2014 5:49 PM
371	Service continues to be cut and limits options. Also, service doesn't always connect well between buses or run often enough.	11/18/2014 5:32 PM
372	I worry about some neighborhoods not being safe at night for waiting for buses - not really a bus problem, more a seattle crime problem.	11/18/2014 5:27 PM
373	Getting between Capitol Hill and Ballard or Fremont can be time consuming compared to driving, particularly due to low frequencies (or non-existent) after midnight. The 8 is also not very reliable.	11/18/2014 5:21 PM
374	I have to go downtown first to go about anywhere, which is fine, but again- East to West is a huge issue.	11/18/2014 4:40 PM
375	Crowdedness hasn't been a significant problem for me, but I do avoid after-work times.	11/18/2014 4:38 PM
376	I live on capitol hill and would like to regularly ride metro to child's school, then commute to UWMC, but 49 does not run often enough. There is a 725 bus then not another one til 745 or 750 - the 49 often runs late.	11/18/2014 4:37 PM
377	Not enough busses	11/18/2014 4:20 PM
378	I do have to drive my car to Vashon Highway to catch a bus to the Vashon ferry since the 119 bus doesn't come to Maury Island early enough for me to catch my 5:20 ferry. And the days I take the 6:30 water taxi home, there is no longer a 119 waiting. Given the chance, I would leave my car at home gladly! I already explained about the crowded university express buses (in the evening to downtown). The same goes for the C Line from downtown to West Seattle the times I take it home in the evening due to a water taxi cancellation or other issue.	11/18/2014 4:18 PM
379	Buses are always late and the last train from King St station south leaves at 6:12pm. It makes it difficult to leave work after 4:15pm to make the train.	11/18/2014 3:52 PM
380	Budget cuts are not your fault. I take the bus or train whenever I can but sometimes it just doesn;t work.	11/18/2014 3:33 PM
381	Buses heading north from the U-District in the afternoon are terribly unpredictable and very often come late, or sometimes not at all. Special rush hour routes such as the 309 end too early at both ends of the day for my husband, who is not a morning person and works more like 9:30-6. Getting across town takes forever. I can drive to View Ridge in 12 minutes but have to switch buses 2 or 3 times and/or walk 20 minutes up and down big hills to get there by bus, which takes 60-90 minutes. Although my 2-yr-old loves buses and begs to take the bus, I just don't have time to commute that way to his daycare. Buses like the 65 or 75 do not extend to my neighborhood and only run along the bottom of the "ridge".	11/18/2014 3:30 PM
382	I would not use the link if I had to transfer too many times or it took longer than the ST 586 bus (already can be up to 2 hour commute if traffic is bad).	11/18/2014 3:18 PM
383	i frequently take te commuter route from lakecity to downtown. After the 306 was deleted, the 312 bus got so crowded that sometimes it can't even stop at our stop. I would like to take busses as opposed to taxis on late nights or weekends, but find that thos buses are not very consistent with stayin on schedule and can take too long to get home.	11/18/2014 2:16 PM
384	No direct connections from my neighborhood (South Park) to major hubs, so a slower/infrequent bus is required, or I have to drive to where I can access more direct routes. Once I'm in the car, it's easier to go as far as I can (to be able to find free street parking), park, and either walk or bus the rest of the way.	11/18/2014 2:10 PM
385	Traffic is a major reason The cut in service for the 590 series makes it very difficult to get to Seattle in the middle of the day. Because of the cut in service the buses are intensely crowded at times.	11/18/2014 1:59 PM
386	waiting in 40degree weather for a bus for 30+ minutes is not fun. the transit cuts are not shown on google maps/ one bus away, so i wait for a bus that never comes.	11/18/2014 1:57 PM
387	I use public transit every day, so nothing is preventing me from using it. The late buses (often VERY late) are the hardest part of relying on the bus service. I often wait 15-25 minutes for the #8 bus.	11/18/2014 1:40 PM

388	I am well positioned to travel to many parts of Seattle, but getting south of downtown or to the eastside is cumbersome and time consuming.	11/18/2014 1:35 PM
389	The stop I get on at (36th and Dayton Ave N in Fremont) only has two different bus routes, and when a bus is late, there is a long gap in service. By the time I get on the bus on a weekday morning it is usually full.	11/18/2014 1:21 PM
390	Too many stops along the way, bad/disruptive people at high-traffic stops (from Pike through Belltown).	11/18/2014 12:59 PM
391	Being on the overcrowded bus causes me to have some anxiety. I'm allergic to a lot of fragrances, etc., which is sometimes bad enough to impact my breathing. The smaller seats on the new buses are hard and too small. The Rapid Ride buses just feel like cattle cars. Lots of places to stand, but no places to sit. The population is getting older, not younger.	11/18/2014 12:58 PM
392	Ferrys are dirty and crowded. Buses are unpleasant. Trian is good, but too slow. There is nothing "rapid" about "rapid ride".	11/18/2014 12:41 PM
393	On the weekends it is especially a hassle to get anywhere beyond the main routes. Also certain bus routes just aren't reliable in terms of timing their respective arrivals to various stops.	11/18/2014 12:20 PM
394	Places that take 10 minutes by car can take an hour or more by bus. Especially if there are multiple transfers. Limited run times late at night on the weekends makes getting to certain areas difficult, especially for people who work evening shifts. Heavily used routes are very crowded during rush hour, and the smaller buses are being used for these high traffic areas. Bus management could be improved in this area.	11/18/2014 12:19 PM
395	I use public transportation without a problem.	11/18/2014 12:04 PM
396	These are the top three reasons I decide to drive when I'd rather be busing.	11/18/2014 11:57 AM
397	transferring takes too long and buses are never on time. I also get off work too late on occasion.	11/18/2014 11:57 AM
398	One big issue is that if you aren't standing out by the street and are sitting in the shelter, the bus will go right by without even stopping to see if anyone is in the shelter. I have had the bus miss me several times because I was in the shelter due to rain or while I was looking for my U Pass card. This seems like a civil rights violation to me because what if you are old or disabled and have to sit down? It must be terrible for people who really can't stand out by the street to catch the bus driver's attention.	11/18/2014 11:56 AM
399	Both working at the UW, my wife and I usually park there and then take the bus to get Downtown to go to a show at the 5th Ave Theatre or a game at the stadiums. It is usually standing room only getting Downtown at 5pm for dinner and coming back to the U-District after the show/game can be a bit dicey as there are plenty of unsavory characters on the buses and at the stops at that hour. I'm looking forward to the light rail connection, but I'm not sure it will solve any of these issues. At least it should alleviate some of the stop-and-go traffic the bus gets stuck in getting downtown at 5pm.	11/18/2014 11:55 AM
400	I am very sick and tired of having to stand up on the crowded bus!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!! We are usually packed into the aisles of the bus like sardines. I only get to sit down about 50% of the time (both directions - to and from work). THERE NEED TO BE MORE BUSES TO AND FROM MOUNTLAKE TERRACE TRANSIT CENTER during peak commute times!	11/18/2014 11:35 AM
401	The 71/71x, 72,72x, and 73/73x are completely unreliable in terms of schedule. They seem to come whenever they feel like it. when I get to Pioneer Square at 6pm and am ready to go home the bus can arrive any time from 6:00pm to 6:25pm. There seem to be plenty of 150 routes which nobody ever seems to use. The majority of the people use the 41 or the 70's but even the 41 outnumber the 70's by a 2 to 1 ratio. As a result the 70's are always extremely crowded and uncomfortable to ride. The buses are are often dirty and the bus drivers don't do anything about disruptive passengers. I have seen many drivers allow homeless or unstable individuals on the bus without paying the fare either because they feel sorry for them or because they feel intimidated and don't want to deal with them. This makes taking the bus uncomfortable because nobody wants to sit next to a vagrant or unstable person for safety concerns.	11/18/2014 11:33 AM
402	Because there is not a direct route from my house to downtown seattle	11/18/2014 11:29 AM
403	see my previous answer	11/18/2014 11:14 AM
404	Infrequent service during later hours contribute to unsafe feeling at stops.	11/18/2014 11:07 AM
405	I live directly on the route 107. My current work commute on transit would entail taking the 107 to light rail to another bus downtown. That is too many transfers. According to the online trip planner there are three options (none make much sense to me) which range from 93-100 minutes. My car commute is between 50-60 minutes and I can be clean, warm and listen to radio or podcasts, and run errands on the way.	11/18/2014 11:05 AM

406	To get to seattle center by bus is an hour compared to 15-20 by car. The buses don't	11/18/2014 11:03 AM
407	I use the bus everyday to get to and from work. On the weekends I want to go on my schedule so I drive. It is somewhat stressful trying to make the bus every morning.	11/18/2014 11:00 AM
408	Having to transfer typically means it will take longer than me just driving myself and I would rather get to my destination in a timely manner. I feel the timing of buses is not frequent, especially during the morning commute. Bus number 43 consistently on every bus I have take has a strong musty smell- appears to be really old and outdated- really makes it uncomfortable to be on that bus for very long.	11/18/2014 10:58 AM
409	197 Southbound Transit to Federal Way Transit Center doesn't start operation until 12:30pm, then there's a significant gap in service from 1:30-3pm and the last service is 6pm. 197 Northbound Transit from Federal Way to UW Campus Seattle in the mornings are very crowded. By the time the Transit gets to the Kent-Des Stop there are ppl standing already. Same issues traveling Southbound on the evening, ppl are standing by when the bus reaches the last stop at UW Medical Center	11/18/2014 10:42 AM
410	72 is almost ALWAYS late. I try not to take it after 5PM because it's always at least 15 minutes late, and crowded. OneBusAway does not always account for the lateness either, so I end up waiting for a bus that says it's on time, has arrived and left, but actually doesn't show up for another 20 minutes.	11/18/2014 10:32 AM
411	See above.	11/18/2014 10:02 AM
412	This is not an everyday issue (late buses/too crowded)	11/18/2014 9:58 AM
413	See answer to previous question. Cutbacks in service have been annoying, but I have adapted. I generally travel by Metro and just walk a lot more than I used to because the stops are further from my home, and I don't want to lose time transferring.	11/18/2014 9:56 AM
414	Evening (5-7pm) buses are often significant behind schedule (30+ minutes). This makes transferring challenging.	11/18/2014 9:53 AM
415	Again, the buses are too late/infrequent to make it a dependable mode of transportation.	11/18/2014 9:48 AM
416	My daily commute (Eastlake to downtown and the reverse in the afternoon commute) is often bogged down and simply overcrowded with too many people, making each stop an ordeal with people getting on and off, adding extra time to the commute. I think there need to be more buses to mitigate this problem or the bus schedule needs to be better staggered so that not everyone is trying to get on the bus and crowding it.	11/18/2014 9:47 AM
417	See comment #5. For example: I live in Madrona and prefer to take transit to the UW where I work. It is easy for me to take the #8 and transfer to the #43 or #48 because the latter routes are very frequent. However, in the evening when I am going the opposite way, the delays in the #8 coming from downtown are too lengthy and I do not feel safe waiting around at the bus stop. Therefore, I will either get a car2go or have to take the route to a stop where I feel safer waiting.	11/18/2014 9:46 AM
418	Several of the buses I can take to the University District either take to long (44) Or don't come on schedule (31 or 32). Or bunch up. I know how long it takes me to walk, bike, or drive and that is predictable & dependable.	11/18/2014 9:46 AM
419	The 72 bus is the best bus for me to get home. In the evenings it only runs once an hour, so I end up getting on the 71 or 73, and walking 10-20 blocks from the nearest stop. Not so bad in the summer, but this winter has been cold.	11/18/2014 9:45 AM
420	I actually don't like to drive in the city, and would prefer to bus most places rather than try to find parking, etc. But, I also prefer to be on time. When I take the bus, I have to give up control of that entirely. Anything could happen. So I end up taking a bus or two earlier than I would need to most days for the fact that 2-3 times a week, my bus is exceptionally late, and I barely make it 'on-time'. It's also pretty uncomfortable when the bus is always full. Standing-room only. The time I could be using to catch up on books, e-mail, etc is wasted as a sardine.	11/18/2014 9:38 AM
421	Most of the time biking is faster than the bus for the places I'm going. For longer trips, like to work, there are too many transfers and service is too infrequent.	11/18/2014 9:34 AM
422	Also have children so need to drop off and pick up from school/child care	11/18/2014 9:32 AM
423	Sometimes there are places I want to go but because there are so many transfers it takes a long time and is not worth it.	11/18/2014 9:13 AM
424	None of the options apply to my reason for using the car rather than the bus on weekends. I need to have acar to carry all of my groceries, gym bag, yoga mat, etc.	11/18/2014 9:12 AM
425	The time it takes to use transit from home does not make it efficient for me to use. I usually drive to a P&R and catch a bus there.	11/18/2014 9:12 AM

426	Why are stations/stops too far away from my home/work? I'd like to know why, too!	11/18/2014 9:06 AM
427	If I have to get on the freeway, I will probably just continue driving. I have had 2 instances this quarter where my bus was over 1 1/2 hours late on arrival at UW, one instance the bus was 2 hours late to my bus stop. I would be more likely to take the bus if later morning and later evening service was available.	11/18/2014 9:00 AM
428	I ride regardless but these (and all the others) make it a really unpleasant experience quite often.	11/18/2014 8:57 AM
429	for example the 75 cuts down service when UW is on break.	11/18/2014 8:55 AM
430	Class gets out at 9:50 +/- 10 mins, last 271 bus to Issaquah is at 10:20. If an when class runs over, I need to leave early to get home, else I am stranded.	11/18/2014 8:50 AM
431	I do use public transportation.	11/18/2014 8:44 AM
432	It would be easier to take one of the 70's buses to the U District, but I've had 1-3 buses go by because they were full. I end up taking the 43. In the evenings, if I miss the last express, I have to ask for a ride from California junction, or plan on more than 2 hours to get home on the 22. On weekends, bus service is way too infrequent	11/18/2014 8:43 AM
433	Not properly synced with phone application.	11/18/2014 8:43 AM
434	I don't like standing on the bus if I have to go very far (like downtown). Taking a bus from my home on Camano Island isn't possible. If I take the Stanwood bus to downtown, then catch a connection back north to UW, it takes me more than 4 hours per day to commute.	11/18/2014 8:36 AM
435	UNRELIABLE. Can not count on getting somewhere at a specific time.	11/18/2014 8:30 AM
436	Same reason as with the last two questions. To take transit east/west requires a lot of walking and out of the way transfers.	11/18/2014 8:27 AM
437	I allow more than an hour to get from the UW to Colman dock, but frequently end up missing the ferry because the bus gets stuck in traffic. Or the buses fill up and go by without even picking anyone up, because there isn't even room for any more to even stand in the aisle.	11/18/2014 8:21 AM
438	Well I think some of it can be counted on as just everyday bad luck (ie a bus breaks down or there is an accident somewhere) but the D line is always packed so full that the doors can barely close in the morning, Also the 8 and the 9 are almost always running a few minutes behind sometimes up to 15 to 20 minutes, that can be very frustrating	11/18/2014 8:21 AM
439	My commute from UW to Redmond has improved with the addition of the 542 bus. But it only runs in the morning from 6-9 and afternoon from 3-6. It should be available for more of the day. Yesterday my flight landed at Sea-Tac at 10:25. After a 5 hour flight I then spent 2 hours getting from Sea-Tac to my home in Redmond: I took the Light Link rail to Westlake and then the 545 to Redmond and then a car from the Park and Ride. If I had driven to the airport I would have been home by 11:30. This is a significant time difference and why I rarely use public transport to get to the airport.	11/18/2014 7:57 AM
440	The buses/trains are overcrowded, services aren't offered on weekends, and services aren't available due to funding issues	11/18/2014 7:56 AM
441	I live on Alki and the buses (56) that used to go later are no longer running past 7pm. must take 3 busses to get to alki the Rapid C bus line is so crowded, you must stand from downtown to west seattle..very uncomfortable	11/18/2014 7:56 AM
442	Parking fills up early at the Sounder Stations	11/18/2014 7:52 AM
443	There aren't enough buses or whomever makes the schedules has decided upon these times.	11/18/2014 7:51 AM
444	Traffic on I-5.	11/18/2014 7:36 AM
445	They get me where I want to go, but often the buses are packed full and I have to wait for the next bus several times a week. There is no shelter for the bus stop on Rainier Ave S at S Stevens, right outside the Mount Baker Station. The 7 & 9 buses along Rainier Ave S are always dirty and feel unsafe.	11/18/2014 7:32 AM
446	I normally use Metro in one form or another since the 70's. I just know if I really need to be somewhere after work, to drive. The night commute gets too hung up with buses trying to get back to downtown to start the later routes. For example I drove today so I could get to a 4:30 PM event, however, when I do drive I pick up a fellow bus rider and bring her into work. It would be nice not to have to transfer in the morning, but that would not stop me from taking the bus.	11/18/2014 7:21 AM

447	I ride the bus every week day (ST 556) but the complaints I have are 1) the afternoon buses are always too crowded so there are not enough of them, and 2) they don't start early enough in the afternoon. The ST 556 runs every half hour while the 542 seems to run every 15 minutes. I think you could add a couple more 556 buses and still have them full.	11/18/2014 7:07 AM
448	stand around and wait wait wait, then the bus comes it's mobbed, takes forever to get downtown. Stops at every lights, every stop.	11/18/2014 6:24 AM
449	I'm busy! Standing at the bus stop feels unproductive. I always say: "When you're on the bus, Seattle has the greatest bus system! When you're waiting for the bus, the system sucks." (I say this while I'm waiting.)	11/18/2014 5:55 AM
450	If I can walk somewhere in the time that I would be waiting for a bus and get there sooner, it's not worth waiting for the bus. There are times when I've waited and been late for events because of waiting.	11/18/2014 2:48 AM
451	Really hard to pick just 3, pretty much all but the last 2 apply. Over the 25 years I've been in Seattle, Metro seems to have gradually reduced service and reliability. Service frequency has eroded, there's been a campaign to eliminate bus stops that's swept through the city, and the buses to my neighborhood are often standing room only until 10-11 pm, and are sometimes too full to even take any more passengers. Transfers are frequently required, and require inconvenient amounts of walking at some major transfer points (Montlake/UW Hospital) or don't even exist at key points in some major transportation corridors (a lot of travel options and flexibility would be opened up, for example, if there were actual transfer points at the I-5/520 or I-5/I-90 interchanges). Some travel corridors that currently require transfers (Bellevue-Tacoma, Redmond-Tacoma, etc.) would benefit from direct service.	11/18/2014 2:15 AM
452	Safety and cleanliness is fine. It's not reliable in terms of time..sometimes it is, sometimes it isn't. Need more buses and more routes. Maybe clean up some of the complicated routes and make things more streamlined (e.g. transfer buses arrive at the same time). Can reduce the need of funding.	11/17/2014 11:39 PM
453	During rush hours (around 4-ish 5), bus like 372 are always so crowded on University of Washington campus. Sometimes, I've wait 20 min for the bus to come. And, even when the bus has arrived, it is so crowded that the bus can't take any more people. Thus, I have to wait another minutes for another bus to come.	11/17/2014 11:39 PM
454	I don't want to say why. I do want to add that station signs and directions are not clear for non-regular bus riders.	11/17/2014 11:38 PM
455	Seattle traffic and weather can cause a bus to come 30 minutes late. Since they come so rarely I often have to wait up to 30 minutes. It really sucks to not have a 197 at 9:00am for days I start classes at 10:30am and it sucks that the latest it ever comes is at 6:19pm since most events in my department are late at night and because I would much rather finish my homework at school and leave at 8pm or so rather than be forced to leave 6pm.	11/17/2014 11:29 PM
456	Don't like wasting time or feeling unsafe.	11/17/2014 11:23 PM
457	Many bus schedules have been changed in recent years so that they do not accommodate for my work and school schedule. Also there will often be no buses connecting the Eastside to University district after 10:20 which is not late enough for student schedules.	11/17/2014 11:09 PM
458	Transferring busses always seems like a hassle. I'm way more likely to take the bus if I know I can get to my destination with one route. A few times (since the first round of bus cuts) the bus has been too crowded for me to get on so I've had to walk home (or wait for the next one with no guarantee that it won't also be too crowded). Sometimes I just don't want to take the bus when I know I could get a ride from a friend or drive to save time.	11/17/2014 11:05 PM
459	Too frequent stops prolong the trip. A frequency of less than every 20 minutes is inadequate.	11/17/2014 10:54 PM
460	If I ride my bike it takes half the time and is easier. I generally love the bus system here, and I think more people would be willing to take if stops were more convenient, the BRT was actually fast enough to satisfy need, the regular bus system was quicker, and if there were fewer people on each bus.	11/17/2014 10:53 PM
461	1. Sometimes if I miss a bus the next bus does not come around until an hour later. Waiting isn't too bad until it gets freezing cold. 2. Frequently at certain times, people need to stand or even wait for the next bus because it's too crowded. 3. People have places to go on weekends and not everyone has a car.	11/17/2014 10:49 PM
462	I actually feel like the stops on the 43 line in Capitol Hill are too close together. For example, there are stops at 15th and 16th avenue. I think 1/4 of stops could be removed, and rest adjust, and get a faster route for the 43.	11/17/2014 10:34 PM
463	I am rarely unsettled by people on buses, however, buses that go by hospitals, particularly on Madison, after Broadway and I-5 have some very loud, angry, unsettling people, I don't know what to suggest, other than perhaps an occasional security or police presence.... not regularly, but randomly.	11/17/2014 10:32 PM

464	Although I am glad I have great bus routes available to me I still think there could be some improvements. For instance, I waited at the bus stop one day when it was raining and freezing cold for an hour and a half and in that time two buses should have arrived but did not show up. The service is typically around every 30 minutes which is very infrequent considering the route the buses take. Especially in the mornings when every bus I get on is full of other passengers and is standing room only. More frequent bus times would be great and really needed. It would also be great if there could be more bus shelters and seats in the more local areas for instance on 36th/55th street or on the corner of 39th/55th as there is no bus shelter nearby all of these stops, having more shelters would be awesome particularly with the rain, wind and bitterly cold weather.	11/17/2014 10:24 PM
465	I can get to work but have to change 3 buses in various and sundry directions to get home at night!!	11/17/2014 10:03 PM
466	I use the bus for transportation to locations that don't involve school more than I use the bus for commuting. So, being able to get to these places on the weekend would be helpful.	11/17/2014 10:03 PM
467	With all of the recent route cuts/cut-backs, many buses are either unavailable or overfilled (or "overfilled", where passengers who are standing DON'T MOVE ALL THE WAY BACK, which honestly is infuriating when I'm trying to get to a destination at a reasonable time). Occasionally I have run into issues with bus service not being offered early/late enough of on weekends/holidays.	11/17/2014 10:02 PM
468	In the mornings, the 556 is very crowded even coming every 30 minutes. Also, when i take the 271 home from University of Washington it takes 1.5 hours.	11/17/2014 10:01 PM
469	sometimes i need to go home late.... (route 271)	11/17/2014 9:46 PM
470	Time to destination: East-West transit has been most problematic for me. Eastlake to some Capitol Hill destinations is about 12 mins by car but 45 mins by bus, likewise with Eastlake/Capitol Hill to Madrona/Denny Blaine. Barriers like I-5 and the Arboretum force the routes to be somewhat roundabout. Reliability: I don't have a smartphone so I can't check onebusaway when I am out and about. Rush hour traffic makes schedules irrelevant so if I really need to be somewhere on time, I will leave extra early (thus missing work time) because I know I can't trust the schedule. More transit-only lanes could help with this. I was excited to see the electronic bus schedules downtown and in the u-district but dismayed when I discovered that they don't display real-time data. Frequency: With some routes the frequency is great, but when the bus only comes every half hour it can be risky to make a trip that includes a transfer. If the first bus is running late and you miss the transfer, it could cause you to be at least a half hour later than expected. This is doubly unpleasant in inclement weather.	11/17/2014 9:39 PM
471	Typically I transfer between two routes to get to the UWMC. Usually the two routes I use aren't the most reliable and are often very crowded when I reach my destination (E Line and the 48 mainly, the 5 usually isn't too bad though. The 355 tends to fall extremely late when traveling Northbound, is often very packed when using 40ft buses, and all the seats are usually filled when 60ft buses are used.)	11/17/2014 9:38 PM
472	Most days also have to take my kids to school on the way to work which is not near home so it is a long and round about way. Would like to take bus more often with family on weekends but service not that frequent on weekends	11/17/2014 9:32 PM
473	The major difficulty I face with using public transportation is that it takes too long to get to my destination. Because of the compounding effect of stops and transfers, the farther I need to go by bus, the more the time it takes to get there increases over the time it would take me to drive to my destination. I have often cancelled trips because I can't fit the travel time into my busy schedule. Second, the services don't come frequently enough. On longer trips, I often have to wait for 15-30 minutes between transfers, which really extends my travel time. Third, the buses and trains are too crowded during peak hours, especially in the University District and on the Sounder. This makes it really difficult to get to where I need to go any weekday afternoon.	11/17/2014 9:29 PM
474	Buses (70s) can be very crowded, transferring may lead me to wait for up to half an hour for a bus home.	11/17/2014 9:18 PM
475	Express buses are limited to peak hour, work late or have activity after work commute requires transfers and significant time increase.	11/17/2014 9:14 PM
476	The routes I usually use to get various places aren't the same on weekdays and weekends, so it tends to take a lot longer on weekends to get to my destination.	11/17/2014 9:02 PM
477	Service simply doesn't run early and late enough for my schedule, routes that I used to take have been cut, and now if I did try to bus I would cause me almost two hours to commute one way to get across town -- I simply don't have time for that.	11/17/2014 8:50 PM

478	I frequently use the 48 and 71/72/73, which are certainly among the most crowded routes in Seattle. With the cut of the 48X, the regular 48 became standing room only at my stop, so I rarely take it now and walk to the UW campus/U-District destinations. Running more frequently would alleviate the problem. The 71/72/73 also don't run frequently enough during peak hours, though I appreciate their relative speed in getting to downtown. A few times I've had uncomfortable waits, or decided to walk, during early mornings and late nights. I may resort to rideshare services or not taking the trip at all in these situations.	11/17/2014 8:46 PM
479	I usually ride my bike because I know how long it will take. I definitely avoid the bus if I have to transfer because it takes too long.	11/17/2014 8:42 PM
480	It takes about thirty minutes more to get to the UW or downtown Seattle by bus than by car. If you miss a suburban bus (238, 245) you're almost guaranteed to get to your destination 20 minutes late. In theory, bus schedules align with other schedules, but in practice buses often don't make good connections and it's easy to be stuck waiting for 15+ minutes.	11/17/2014 8:26 PM
481	I can't get to the VA. It's hard/takes too long to get to ballard and fremont from Capitol Hill - no direct way. There is only one bus (12) that gets me sort of close to Harborview. 11 and 60 do not run often enough. Otherwise I take the bus everywhere. Unfortunately, even after the LINK is built I will live too far from the Capitol Hill station to make it worth walking there to then get right to UW. It will still be much faster for me to use the 43, assuming it still runs as frequently.	11/17/2014 8:17 PM
482	When I'm working late, I prefer to take the bus instead of walking home alone, so late buses are important to me. It's also harder to catch a bus on Sundays.	11/17/2014 8:16 PM
483	Usually I do not need to go far, so it takes the same amount of time to wait, then take the bus as it does to just walk there.	11/17/2014 8:14 PM
484	I usually work on weekends, nightshift on the UW hospital. There is long wait in the morning and I have to take two buses.	11/17/2014 8:06 PM
485	It is frustrating to see three or four of the same numbered buses come and go from a stop while waiting for my bus. I understand there are numbers being crunched to find the correct ratios of buses to ridership but when my ride should be quick and easy and it is sometimes faster to walk home it gets frustrating.	11/17/2014 8:00 PM
486	Taking 3 buses to go 9 miles to community college is ridiculous. Additionally, the bus to downtown doesn't run on weekends so I would have to transfer and it takes too long.	11/17/2014 7:59 PM
487	If I drive, it takes 30-40 minutes to get to the University of Washington. If I take the bus it sometimes takes up to two hours. I can't study on the bus so my grades and class performance is affected. My first class starts at 12:30. Classes that I need aren't offered earlier. This restricts me from riding the Sounder Train which would take 20 minutes to get to Seattle. The last train to Seattle is at 8:30.	11/17/2014 7:53 PM
488	After it gets dark or when its really dark in the morning, I don't feel safe in some areas. There needs to be more police presence to keep the riff raff out of the bus stops	11/17/2014 7:40 PM
489	The E line stops sometimes can be a little sketchy.	11/17/2014 7:40 PM
490	I just want more frequent buses.	11/17/2014 7:39 PM
491	The bus has many stops which typically take a lot of time to get to and many times there isn't a late bus to take me near my home on Weekdays. It would be nice to have a light rail connecting between main transit centers to take stress off of the buses and to provide a quicker option for those wanting a direct route.	11/17/2014 7:24 PM
492	To get to far distances (Federal Way) from where I am, there's only one direct bus with limited hours to/from. Otherwise, have to transfer and get to downtown which adds another 30 minutes onto the 45 min-1 hour ride.	11/17/2014 7:19 PM
493	Sometimes it takes more than twice as long to get to my chosen destination if I take the bus as opposed to taking a private car. Sometimes if I have to go really far, I need to transfer, and the transfers only work if the bus schedules are on time. I have wanted to take the water taxi to alki beach on the weekends, but the water taxi does not run on weekends.	11/17/2014 7:17 PM
494	Some of the buses are so crowded that I have to wait for the next one. They also aren't very accurate in the time frame that they say that the buses will be there. I often wait a long time. I wish they would run later and earlier as well, also run more on the weekends.	11/17/2014 7:12 PM
495	Sometimes it is faster if I ride my bike to get around because traffic is so bad. The buses are also very crowded sometimes and I feel unsafe standing or have to wait for multiple buses until one is empty. Some stations are also somewhat secluded or in areas I feel unsafe (I have seen people dealing drugs etc.)	11/17/2014 7:08 PM

496	Sometimes due to a late bus, I miss my transfer bus and have to wait 20 or more minutes in downtown for the next one.	11/17/2014 6:59 PM
497	It would take me an extra hour to get to work if I bussed, it only takes me 10 minutes if I drive. (From View Ridge to South Lake Union). This is due to transfers, bus timing and proximity.	11/17/2014 6:48 PM
498	I tend to move at off periods, very early or very late.	11/17/2014 6:48 PM
499	Because I have cerebral Palsy when I walk to bus stop for 10 minutes from home near Fred Meyer on Lake City Way, And I ride bus for one or two hours to doctor appointment every Mondays, I transfer to #11, #43 or #44 both area, Capiot Hill or University of Washington for appointment.....	11/17/2014 6:38 PM
500	I prefer biking because I don't have to worry about timing (I'm not very good at judging how long the walk to my stop should take) or deal with people.	11/17/2014 6:19 PM
501	my time is valuable to me	11/17/2014 6:10 PM
502	Routes being cut has made certain buses very very crowded, which leads to them often not arriving on time.	11/17/2014 5:59 PM
503	Because buses don't come frequently enough, or they get stacked in each other. Also transferring	11/17/2014 5:57 PM
504	The bus I'm currently taking to get to school at UW is an hour and a half each way without traffic, upwards of 2+ hours each way with traffic. The light rail would be amazing, but there's not nearly enough parking available. I've heard from many people that if they get to the parking lot even a few minutes past 7, they have to drive, which defeats the purpose of public transit a little bit. The sounder has a similar problem, but least for the sounder there's another park and ride nearby. The I-5 stop for the Kent-Des Moines park and ride, particularly southbound, is incredibly dangerous. The area itself is pretty rough, but I'm surprised more people haven't been hit trying to get to the park and ride. You have to cross 3 different on and off ramps to I-5, there's not nearly enough lighting nor walk signals. I will add that some of the buses really aren't clean, this is definitely more on the side of the patrons, but the buses can get pretty disgusting (the 167 I believe, I saw a man in a suit spit phlegm on the floor of the bus, there's been garbage on the 150 that had been there for at least 2 days, pretty strong and foul smells). It's a more stark comparison when I see the sound transit buses go by (expresses that go right past kent or des moines in some cases) that look comfortable and clean and are rarely full, and then I have to keep waiting for my bus which are the exact opposite.	11/17/2014 5:48 PM
505	Buses are too crowded and not very reliable in terms of timing.	11/17/2014 5:46 PM
506	I rarely venture to locations where I have to take 2 buses to get there, it's more stressful to worry about making transfers when some buses only come once every 30 minutes	11/17/2014 5:41 PM
507	I often need to be on campus until 6:30pm or later, and my bus options to get home at that time are non-existent or so infrequent as to be unfeasible (every 60 minutes). In the mornings, it can take more than double the time to get to work on the bus vs. driving alone, forcing me to lose valuable sleep if I want to ride the bus.	11/17/2014 5:27 PM
508	The lack of frequency and need of transfer combine to lengthen my trip, while the need of transfer and crowding combine to make my trip more difficult.	11/17/2014 5:21 PM
509	Currently it takes too long to get from Rainier Ave. S. & S. Othello to the University of Washington at 15th & Pacific. Historically, Metro buses running between Downtown and Rainier Beach often contain rowdy young people and smelly homeless people, making it unsafe, unpleasant, and uncomfortable. Currently the Link Light Rail is quieter and cleaner, but it is not safe to walk in the dark along S. Othello - between Othello Station and Rainier Ave. S. (or Seward Park Ave. S.). It is not safe to wait at Othello station for the # 50 bus which does not run frequently enough. People are targeted getting on and off of the Light Rail at the Othello and Rainier Beach Stations. FYI - I've lived in Southeast Seattle for almost 30 years. It takes 40 minutes to drive to work, park, and walk to my office. It takes an hour and a half to take the bus or light rail, both of which require transfers.	11/17/2014 5:20 PM
510	There are times when I am walking at night from various U District locations back to campus. I would like to use the bus because it is night however there are often homeless people right by the stops. This would not be a problem if they did not try to talk to me, tell me to smile, ask me about myself. It makes me uncomfortable and I would rather just walk all the way back to campus than wait for a bus. I like to go to midnight releases, but since the buses stop running before midnight releases get out I have to take a car to get there so I have it to get home.	11/17/2014 5:12 PM
511	Basically it has to do with time to destination and the more transfer and the more waiting it takes too long.	11/17/2014 5:10 PM
512	One late bus, miss a transfer bus and have to wait 30-45 min for nxt one	11/17/2014 5:07 PM
513	I tend to be out late on weekends and service isn't frequent enough or timely enough at such hours to depend on. In the mornings I often opt out of bussing because the crowds going to UW campus are not worth dealing with.	11/17/2014 5:03 PM

514	The above applies to getting from the Eastside (e.g, Eastgate P-R) to Sea-Tac airport. Buses don't run late or on weekends when families travel and the transfers are not convenient.	11/17/2014 5:01 PM
515	The #74 is always overcrowded because it goes through the Univ. District. It stops so frequently going down University Way that it really does not work efficiently as a commuter express bus.	11/17/2014 4:58 PM
516	Need better evening options on Vashon, even if a smaller bus. Not many riders but for those needing Metro, the service is critical. Buses to/from West Seattle are often very crowded.	11/17/2014 4:58 PM
517	71, 72, 73 express buses are frequently late and very crowded. This makes it hard to connect with the water taxi to Vashon, which only runs every hour so I have a very long wait if I miss it.	11/17/2014 4:54 PM
518	There are moments when I am out late at night and the buses don't run anymore. Also, sometimes I could be in a rush and taking the bus takes too long as a bus is typically slower than a car and also you have to wait for it to arrive. There are also rare moments when some buses are so full that I cannot get on.	11/17/2014 4:50 PM
519	A lot of the express buses from the UW do not run often enough up to northgate after 6:30pm for me to be able to stay late on campus and expect to get home at a reasonable hour. Pretty much once the 373 stops running it sometimes becomes a wait of more than an hour for the 73 to take me home due to traffic or some other scheduling issues.	11/17/2014 4:44 PM
520	Montlake park and ride is full by 0800, so I have to take the 0740 bus to make sure I get a spot to park.	11/17/2014 4:41 PM
521	It should not take 2-3 buses and 40+ minutes to get from the U-District to Ballard.	11/17/2014 4:40 PM
522	Too many stops. Bus 48 always crowded. Bus 70 always empty. Need more buses on 48.	11/17/2014 4:38 PM
523	The frequency of buses and coverage significantly drops as the distance increases from downtown or densely populated areas. Another major problem is safety of transit centers outside of populated areas - ie. Burien TC.	11/17/2014 4:33 PM
524	Top three for each bus. 48: Takes too long, not reliable and buses too crowded. 355: Stops too far from home, service isn't frequent enough and I have to transfer.	11/17/2014 4:24 PM
525	If it takes too long to get somewhere, I get motion sick. Crowdedness also makes me feel sick, and I tend to catch other's illnesses more often when I'm forced into close proximity. Weekends are the best for me to go down to the international district.	11/17/2014 4:24 PM
526	Nothing is going to stop me from taking Metro, but I think Metro can improve. Frequency of buses and reliability are most important to me. I really get anxious if I have an appointment downtown and there is the choice of a bus that arrives 10-15 minutes before the appointment. That is not enough time to build in a cushion so I feel obligated to take the bus that gets there 40-45 minutes before my appointment time. This wastes my time and gives me no place to hang out for the extra time because the time is excessive but I've ridden the bus for 35 years now and I know that I need to plan for a bus not showing up because that is what happens every once in a while.	11/17/2014 4:21 PM
527	Late evenings it is difficult to get back to the Federal Way Transit Center from the University district and it takes too long to transfer between buses to get there, so I usually drive if I know I am staying late. Often my regular bus, 197, is too crowded, both in the mornings and the evenings.	11/17/2014 4:19 PM
528	My bus is often 15 minutes late and occasionally doesn't show up at all. Most of my bus drivers are kind or indifferent but some are quite rude.	11/17/2014 4:18 PM
529	There are not safely signaled crossings for a blind person. This is particularly bad on some of the residential streets that are now effectively arterials such as N 40th. Drivers simply don't pay close attention so crossing streets to get to the return stop (or primary) often requires going out of my way to find a safe crossing.	11/17/2014 4:11 PM
530	I do use it, but I am afraid to use it at night.	11/17/2014 4:11 PM
531	Back when I was commuting from Kent or UW to the Seattle Humane Society in eastgate (Bellevue), the bus options took way too long, and didn't run on the weekends and didn't start running early enough to get me to work on time (6:00am). Getting back from shows or events in Fremont is a struggle late at night because service stops at midnight.	11/17/2014 4:08 PM
532	Bus steps are way too steep. Seattle's hills are terribly steep. Long walk from home to nearest bus stop.	11/17/2014 4:03 PM
533	Some stops are not safe enough to wait for a bus at.	11/17/2014 4:03 PM
534	none of the buses from downtown to and from Burien are express buses meaning they all take at least an hour and fifteen minutes to get to Burien or Downtown depending on the direction I am going.	11/17/2014 4:02 PM

535	Usually faster to ride my bicycle.	11/17/2014 4:01 PM
536	see above	11/17/2014 3:59 PM
537	I take the 48 from Mount Baker Station to the UW and back at least three times a week. The bus ride is ridiculously long as the bus stops to often. Please, please, please add an express bus to this route.	11/17/2014 3:55 PM
538	Late night service is infrequent and can also be sketchy.	11/17/2014 3:54 PM
539	Why was parking at light rail not included on the above question?	11/17/2014 3:53 PM
540	commuter lanes are now used heavily during the commute, Busses sometimes don't even use the commuter lanes, maybe because they are so full. This means busses can't get where they need to on time and makes using the buss no better than driving. Adding a 4 person/ buss lane during the commute as well as a 2 person commute lane (using over head reader boards)... maybe have them pay to use to make everyone happy... would put more people in busses and car pools and speed up the movement of people.	11/17/2014 3:53 PM
541	I do like that you guys offer a route directly from Wallingford to the U-District without transfers, it is great! The thing is the 44 is usually really crowded, especially in the mornings. You really have to leave early if you want to make it to your destination on time, as sometimes you will have to wait for a 2nd 44 bus to get going. The bus is usually very crowded and I've had been stepped on or bumped into many times (on accident, due to the sheer amount of people standing). The schedule is reliable during off-peak times, but can be hit or miss on peak times, it really depends on if the bus has room for you or not.	11/17/2014 3:52 PM
542	At least with the 555/556, the routes only run for certain morning hours and certain evening hours, which can be frustrating when needing to get to my destination around noon (although I usually opt for the 271 instead in that case)	11/17/2014 3:52 PM
543	Tough to pick just 3 as all of the above options are major concerns. Weekend service is a major concern since the 61 was cut in Ballard. With the lack of routes and service not being frequent enough, I have to plan well in advance of taking the bus to ensure I have enough time to get there. Also, schedules for buses are NEVER reliable.	11/17/2014 3:51 PM
544	Again, most of the difficulty encountered is with over crowding (during peak hours) and buses not being reliable (not on time).	11/17/2014 3:49 PM
545	My schedule has become much less flexible since I became a mother last year. When trying to get to daycare before 6PM, when they close, I cannot feasibly leave work and bus home to get my car to pick up my son.	11/17/2014 3:44 PM
546	Also, it's tough with kids. I have a 3-month old and 5-year old, and it's hard dealing with the stroller, especially if the bus is crowded.	11/17/2014 3:43 PM
547	Bus station is close but not covered. Not pleasant to wait for a bus.	11/17/2014 3:41 PM
548	Not sure what "Why?" is aiming for. The top issues I experience are when there are no direct routes (or even reasonable transfer times) to where I want to go (hence, it takes too long to get there) and that infrequent service/overcrowded buses make me miss my time window (or the bus skips my stop entirely), totally throwing off my schedule. When I have to get to a meeting, this is not acceptable, and I must find alternate routes.	11/17/2014 3:39 PM
549	271 is super inefficient.	11/17/2014 3:39 PM
550	When I seldom do not use transit, I do so because I need to go somewhere else later in the day on an unpredictable schedule; it is due to no fault of your own.	11/17/2014 3:36 PM
551	Late night service options are often limited.	11/17/2014 3:31 PM
552	Getting a bus to Westlake Center early in the morning on weekends to get to the airport for an early flight has been a challenge. I've had to take airport shuttles instead which is not ideal for cost reasons.	11/17/2014 3:31 PM
553	I have spent too many days and evenings waiting for a bus that took over 15-20 minutes to arrive (the schedule never seemed accurate). I also travel with my dog - for these reasons I drive alone.	11/17/2014 3:27 PM
554	I need the train to go home on the weekends. Most buses don't run late enough for me.	11/17/2014 3:25 PM
555	Buses to Sammamish are so few and far between and usually I travel either mid day or after 6pm, when there are no buses. I'm not sure if the 927 was cancelled or just runs few times a day.	11/17/2014 3:18 PM
556	For the first answer, the service was cut. Second, it doesn't run during the middle of the day, and only runs every 30 minutes. Third, when I miss my bus I have to take an alternate route that usually means I am outside for a while.	11/17/2014 3:17 PM

557	I do not feel safe when waiting for the bus alone in downtown Seattle after dark; I am concerned about becoming a victim of crime.	11/17/2014 3:14 PM
558	I would opt to use the bus in several settle neighborhoods to attend late night events, however most do not run past bar time	11/17/2014 3:14 PM
559	I have to take a bus through downtown in order to get up north. This, and transferring (usually twice) to get up north adds an extra half hour to my commute.	11/17/2014 3:13 PM
560	We need more buses to Renton from U. District. We have 4 buses in the morning and 5 buses in the evening. But we have more people riding the bus. I see much more buses to Bellevue compared with Renton. We have people standing in the bus almost every day. We would like to have another bus around 6:00 pm. Now the last bus is at 5:06 pm.	11/17/2014 3:11 PM
561	My main issue with the bus system is that the bus schedules are not reliable. Since parking is very expensive in the U-District, I rely almost exclusively on the bus to get to and from work. However, I have to check One Bus Away every evening before I leave work to see if my bus (the 355X) will be on time. It is often 10-20 minutes late, which means that I end up taking a different bus in a different part of the neighborhood that takes much longer and requires me to transfer later on.	11/17/2014 3:11 PM
562	If I'm 15 mins late to work I will be fired. With such infrequent buses if one is late I'm in deep trouble.	11/17/2014 3:11 PM
563	Reliability is key! The OneBusAway app has helped a great deal with this but it would be wonderful if buses were more on schedule.	11/17/2014 3:11 PM
564	This question makes no sense. Why what?	11/17/2014 3:09 PM
565	As stated above, buses East-West are too full or stalled in traffic and don't stay on schedule.	11/17/2014 3:08 PM
566	Not reliable: I often choose to walk rather than take the bus because it's usually faster than waiting for and taking the bus. If I knew certainly when the bus would arrive, I would use it more often, but often waiting has too much variability. Buses that are consistently late make it difficult to be on time for obligations, and I often have to show up 30 minutes early to compensate for this. I have to transfer: Travelling from the Greenwood/Shoreline area to the University of Washington and back again requires a minimum of one transfer. This is my daily commute and leads to a decent amount of anxiety about being on time to make the transfer to the next bus. Too crowded: The single largest detractor from my bus experience. I have a bad back and am often in significant pain when standing on a bus. Almost all of my buses lately have been standing room only, which leads to significant discomfort for the majority of my commute.	11/17/2014 3:07 PM
567	The buses I would take I use for appointments or work, and because I do not find their timing to be accurate I usually walk an extra 20-30 min or bike.	11/17/2014 3:06 PM
568	I'm a smaller female and have been targeted by aggressive males on public transit. Not cool.	11/17/2014 3:04 PM
569	Way too often the Community Transit run #871 in the afternoon to the UW campus just doesn't show up! Then everyone waits for the next bus and we are packed like sardines. The 871 doesn't come to campus early enough the morning when I am staffing events, so I have to drive to work. When I have medical appointments in the U District after work I have to take the 810 and it does not stop at the Edmonds Park & Ride. That means I can't park there in the morning. I've been wanting to park there in the morning so I can at least be sure I have a seat. We have way too many people that have to stand all the way to and from work from MLT to the UW. I want to take the Sounder train from Edmonds to Tacoma and back on some weekdays, but the last train from Tacoma that would connect with the train in Seattle leaves at 4:25. That's too early! There need to be runs leaving Tacoma up to 6:00 p.m. at night on weekdays.	11/17/2014 3:03 PM
570	Travel time increases when transfers are added to what used to be direct routes. Also, the increased walking distance to stops for alternative routes in addition to a transfer. These two just make the time needed too long compared to time by car. Compare 1 hour 15 minutes vs. 20 minutes by car.	11/17/2014 3:02 PM
571	I have no problem with my weekday commutes. Typically I bike or walk, opting for bus transit only when weather is particularly inclement. On weekends, buses don't run as often as I would like, makes transfers more difficult.	11/17/2014 3:01 PM
572	In some cases, there are no buses for more than a 45 minute period going from the university district to Lake City because of the odd 73 schedule where every other bus only goes to 65th St. As a rider, this makes it much harder to plan around.	11/17/2014 2:59 PM
573	Sometimes the transportation is running really late and make everything on my schedule late.	11/17/2014 2:59 PM
574	Difficult to move East-West in the city (i.e. View Ridge/Wedgwood to Ballard/Fremont) because there are few routes that go East-West. Riders are forced to transfer several times and it takes a long time.	11/17/2014 2:59 PM

575	There are not enough buses.	11/17/2014 2:57 PM
576	If I wanted to work late I would have to take the later (of two) 424 buses and get home REALLY late, so I drive on such days. Similarly, if I wanted to leave work early, I would have to take the CT 510 to Everett and then transfer to a Monroe-bound bus -- not a very good connection -- so I drive on such days!	11/17/2014 2:54 PM
577	I used One Bus Away a lot. But the schedule for bus 271 in Bellevue was so unreliable that it showed the bus already departed while it came 10 minutes later that I almost missed it.	11/17/2014 2:53 PM
578	Time is valuable and I can't always spend it waiting for a bus every day. Also it's upsetting when a bus drives right by me because it's already full and there is no more room.	11/17/2014 2:52 PM
579	66 only runs every half hour or so.	11/17/2014 2:51 PM
580	Often I leave class early to catch the 70 @ 7:15 pm going north. Otherwise I have to wait 30 min. Often this bus is so crowded it sometimes has to turn people away. I get on early enough (at the UWMC stop) that I have always made it (so far) but often it is so crowded I sometimes worry I won't make it. Maybe there should be another service that runs at a 7:30 pm pick-up at the UWMC/ Garfield/ Benton Lane	11/17/2014 2:50 PM
581	I'm on a tight schedule with Work and getting my daughter from after school care. The 48 is my major route and it is so unreliable that I've had to take a taxi several times because it just wasn't showing up	11/17/2014 2:49 PM
582	Many of the times I use public transportation, it is for long, but walkable distances. Therefore I find if I'm not sure the bus will be on time because of the Montlake bridge delays or no weekend service, I will walk. For longer distances, I find it better to carpool to avoid long multiple-transfer trips and getting stuck in a place because the bus stops running at night.	11/17/2014 2:45 PM
583	I will do one transfer on a regular basis but not two. Then there are too many variables and I wait too long for transit	11/17/2014 2:42 PM
584	The service from Maple Valley (#143) does not run often enough or late enough, and does not connect timely to #167. Buses sometimes do not show up or are late or are short buses when it should be an articulated one - so people are standing for an hour on the bus. The new buses with the hard blue seats and no head rest are very uncomfortable! They have a metal pole running along the back of the seat that hurts if you fall asleep and hit your head. It also seems dangerous at highway speeds to have a metal pole on the seat in front of you. If the commute is over an hour a hard seat and metal pole means you can not get comfortable at all. It's fine for a short, in-city route where speeds are low and riders are on the bus for a few blocks. But it isn't when the riders are on the bus for 45 minutes to an hour or longer. Why can't you use Sound Transit buses? New Metro buses are punishing to sit in for more than 10 minutes.	11/17/2014 2:41 PM
585	I take metro transit all the time. The only time i don't is that if I have to haul something....or for example trying to get from ballard to south park...that is a tricky thing to do within 2 hours. and night service is even tougher.	11/17/2014 2:40 PM
586	becast it easier to the busnone	11/17/2014 2:37 PM
587	The 31 and 32 buses are almost never on time, sometimes they're early and leave before I get to the bus stop to catch it or they're about 15 minutes late.	11/17/2014 2:33 PM
588	Express service from the University District to Everett became longer when the 510 was largely discontinued. Added time (10-20 minutes each way) adds up & is discouraging.	11/17/2014 2:33 PM
589	I can usually get to where I am going but since routes were cut or reorganized before the most recent cuts, I have to go further to get to a main route, particularly ones to downtown. I live in Queen Anne. I can only imagine how difficult it is for those who live further out from the central neighborhoods.	11/17/2014 2:29 PM
590	On a daily commute, with coffee, a lunch, and change of shoes, etc. it is not appealing to get on a bus and have to stand in a suffocating crowd. The traffic on the routes also makes it nearly impossible to predict transit time, while driving alone yields more consistent numbers.	11/17/2014 2:27 PM
591	There is 1 bus near my home that doesn't start running early enough for me to get to work in the morning so I have to drive to the Transit center.	11/17/2014 2:26 PM
592	I now travel with a 3 year old and 1 year old. It is generally faster (even if more expensive) to drive them around than it is to load them onto a bus with a diaper bag and stroller, taking up space and possibly arriving at our destination late.	11/17/2014 2:24 PM

593	I have to walk half a mile to the nearest metro bus stop to get to seatac light link rail on the Metro 156. The 156 travels from 164th turning right on 34th avenue south, and then left on south 166th. Turns right on 34th Ave South on the corner is the bus stop. It's dark by the time I get off at 140th ave south and south 166th street, and have to walk home. I have to metro it to seatac light link rail, get off at the chinatown/id tunnel stop, get on a 71, 72, or 73 to the U district, then catch a bus that goes through campus taking me close to the Miller Building.	11/17/2014 2:23 PM
594	I would actually choose more of the above.	11/17/2014 2:22 PM
595	In particular, commuting on the 43 or 48 from Capitol Hill to the U-District and back is a very crowded experience. I also refer to the need for (in particular), more frequent service from downtown at night.	11/17/2014 2:20 PM
596	Very concerned about recent armed robberies (muggings) at the Columbia City station and in the U District. The #8 bus is frequently behind schedule. It is difficult to coordinate connections with the #48 at Mount Baker bus bay.	11/17/2014 2:20 PM
597	The crowding problem only applies to mornings, wherein the more frequent busses are very much appreciated, but there still never seems to be enough room.	11/17/2014 2:20 PM
598	During peak hours all the routes past my home turn into Express routes and skip South Lake Union. I would have to transfer in the U-district. When the connections are bad there have been times when I could almost walk it as fast. South Lake Union needs better service DURING THE PEAK times. It has had tremendous growth and not everyone lives in the suburbs. I'd have to go way out of my way to transfer downtown and come back or walk back. The SLU trolley is a joke. I can out walk that thing.	11/17/2014 2:19 PM
599	Universally, there is usually only 1 viable option for a bus in any of the neighborhoods outside of those directly surrounding the Alaska Junction and they are all local routes (taking too much time to reach a destination to make taking the bus realistic). Additionally, the RapidRide bus coverage is meager, and so limited that by the time I got to a stop, I could be on the highway (which is why I don't take it)...and I would STILL have to transfer. West Seattle also has several, large, mixed-use communities (SFR, condos, apt and low-income housing) as well as proliferate condo developments popping up that are severely under-serviced by mass transit. This causes a significant percentage of the population to commute via car to work and amenities. Given the lack of arterial transportation routes in the West Seattle region, this condenses commuter volumes into primary areas slowing down the overall commute and increasing the likelihood of collisions - simply because everyone is driving in the same areas. This, of course, leads to substantial delays if there is a traffic incident in any of these areas or inclement weather (which pretty much strands residents of this area all together). Additionally, even 5 years ago, I felt much more save riding the bus because I could read or work without having to worry about someone boarding the bus with a gun and robbing me (without recourse). Also, many of the stops in West Seattle (and the greener areas of Seattle in general) are REALLY poorly lit and in the fall and winter months or early in the mornings/late in the evenings can be really unsafe for single riders (like me).	11/17/2014 2:18 PM
600	When I try to ride on Metro at the Westlake tunnel station at 5-7 pm, there are many people waiting for buses. The buses (71, 72, 73 etc to the U district) are usually full of passengers, and they do not stop my station. I am claustrophobic and I do not want to wait in the tunnel with the crowd,	11/17/2014 2:17 PM
601	Particularly late night service is not offered late enough and as a woman, I would not feel comfortable with other types of transportation that i can afford (walking alone). Also, there are a number of places I have attempted to go where there is no stop nearby which is frustrating as it limits my mobility in the city.	11/17/2014 2:17 PM
602	I have to schedule so much into my busy days that a trip that takes an hour is not going to be able to replace a quick car ride.	11/17/2014 2:16 PM
603	If I don't get a Metro express, it can take too long to get downtown and may require transfers. When I go to Tacoma or Oly on business, it is cumbersome to get from the UW or my home in Edmonds to the Sounder station downtown.	11/17/2014 2:16 PM
604	If I have to transfer, I'm much more likely to just get in my car as opposed to using public transit.	11/17/2014 2:16 PM
605	Sometimes by a certain stop, the bus is already full. Another issue I face is that a specific bus route (75) doesn't go by as often as others buses go by.	11/17/2014 2:16 PM
606	I work second shift and if I get off a few minutes late there is no bus home for me. I must walk or taxi after 11:33pm. Also occasionally working the weekends means I have to drive, because the service changes so much from the weekdays. The buses frequently get bogged down on the route, especially going in at Roosevelt High School around 2:30pm. There should be a 73 65th street only southbound bus added at this time to help with the congestion and possibly a second 48. I am late to work 4/5 days a week by just a few minutes because of this.	11/17/2014 2:15 PM

607	On routes that don't have frequent service the unpredictable wait times make trips too long, especially if they involve a transfer. I would bus more often to see family in Kirkland if it did not involve a transfer at 520 interchange. I ride the bus very often on routes that have service about every 10 mins or less, particularly if I have more than one bus I can hop on.	11/17/2014 2:14 PM
608	I used to ride Sound Transit commuter train, and the service was always delayed and/or cancelled due to mechanical issues, etc. I currently choose to drive because the only bus options from West Seattle from where I live is the 120 or the 21 (which is being reduced in Sept. 2015) to the downtown area. But then I need to transfer to at least 2 or more buses to get my daughter to school (near Sandpoint/Children's hospital), and then I need to get to the UW campus where there is no parking. So I currently drive to my daughter's school area, park my car and take the bus to UW campus. West Seattle area was the only area I could afford to live without moving so far south (where the commute would take just as long).	11/17/2014 2:12 PM
609	I use 31 & 32 every morning and have to stand. Peak times need more buses and mid days need less.	11/17/2014 2:12 PM
610	1) I rather sleep in an extra hour instead of waking up early to catch the bus/light rail to get to work on time. 2) Buses get crowded especially when everyone gets off work and if the weather is rainy or cold. 3) It's an inconvenience to have to make several transfers and have an hour and a half travel time whereas if I drive it'll take me 20 minutes to get to and from work.	11/17/2014 2:12 PM
611	To wait 30 or 40 minutes in the cold, during this time of year, and dark, at the CT 119 stop, does not make me happy.	11/17/2014 2:10 PM
612	The buses being on time is contingent on traffic and the trains stop often and leave at odd intervals instead of on the hour. And then buses from other cities don't go back in the mornings. You have to wait till afternoon to head back home.	11/17/2014 2:09 PM
613	Certain routes are more reliable than others but I have noticed a lot of late buses on routes headed downtown from both Phinney Ridge and Magnolia. I work nights twice a week until 10pm and at that time I have to walk a half mile to reach a bus home. Commuting from Phinney Ridge I have to transfer to get to work which adds to the length of time it takes to get to work.	11/17/2014 2:09 PM
614	It takes at least an hour to get anywhere, and if I miss a bus, the next one comes too late for me to make appointments or be on time. If I'm going to or from the airport, the Link system doesn't run early enough to get me there before my flight, and the last trip from the airport at night happens before my flight lands.	11/17/2014 2:08 PM
615	I take the bus about three times a week however, now that gas has gone down I drive a little more often. It just takes so long to go from the UW to Burien, sometimes as much as 1 and 1/2 hours. On off peak hours I can drive it in about 25 minutes, during peak about 40 - 50 minutes.	11/17/2014 2:07 PM
616	I think more frequent, reliable and timely service would make things easier.	11/17/2014 2:07 PM
617	Coordinating bus transfers is difficult and usually results in spending a lot of time waiting for the next bus. Inevitably it seems like I've just missed the bus I'm trying to catch then have to wait up to 30 minutes for the next one.	11/17/2014 2:07 PM
618	These issues come down to convenience and sometimes riding public transit is much more inconvenient than driving my personal vehicle.	11/17/2014 2:06 PM
619	I'm lazy college student.	11/17/2014 2:06 PM
620	I take a certain amount of pride in having a strong stomach and a generally unflappable disposition. But, I don't judge others for their squeamishness and weakness of will. Some of these buses are quite horrid. The regular riders of these buses are stalwarts and proletarians! We can take it! We pay taxes *and* we pay for transit. We are just that hard. Should we have to take it? Should we have to continue to ride in these turnip trucks with windows and working heaters? Well, we will, I suppose. We will keep riding these broken machines and we will proudly proclaim to the world, to all of the cities on earth who have better, more comprehensive transit systems -- Copenhagen, Seoul, Melbourne, Hong Kong, Berlin, Paris, New York, Taipei (TAIPEI, fergawdsakes!) -- than do we: We can take and we will take it, since Seattle "leadership" cares more about expensive buses for the few that don't ride than the terrible buses for the many who do.	11/17/2014 2:04 PM
621	The routes I take are really popular during commute. So I now walk 90% of the time. I ride only when I have a commitment or have to carry extra items to work.	11/17/2014 2:04 PM
622	See above answers.	11/17/2014 2:04 PM
623	not enough direct routes, takes too long and no options for late nights.	11/17/2014 2:02 PM
624	I have disabilities including fatigue, so taking long rides can leave me without the energy to do what I intended.	11/17/2014 2:01 PM

625	Sometimes the bus doesn't stop where I need to get on because it is already too crowded and then I have to wait for the next one, which makes me late. This happens frequently when I take the bus to UW. Transferring is unreliable because sometimes the first bus is late and that makes me miss the second one. If the trip takes too long, I won't go or I will find a way to take a car to my destination.	11/17/2014 1:59 PM
626	I'm a teenage girl and it's a little sketchy going to the bus stop alone at night.	11/17/2014 1:58 PM
627	Lots of delays for buses, and then when the bus does show up, it is too crowded and I can't get on.	11/17/2014 1:56 PM
628	I live in the Northern U district and its a far walk to UW. So catching a bus to the campus hub is unreliable to make a transfer because none of the buses run frequent enough/aren't reliably on schedule. For example, I caught the 71 to campus to transfer to the 75 and I had to wait 25 mins because the 71 was running late and the 75 only runs every half hour.	11/17/2014 1:56 PM
629	Silly question - you tell me why.	11/17/2014 1:55 PM
630	A lot of times it just doesn't feel worth it to spend 40 minutes on a crowded bus when I could spend ~10 minutes driving to that same destination. Except in special circumstances (e.g. going with friends), transferring feels risky because I fear the first bus will be late, the second bus will show up early, or the second bus will never show up.	11/17/2014 1:54 PM
631	Because there aren't enough service options on/for the Eastside. I do rely on Metro services daily to get to and from Seattle for work, however.	11/17/2014 1:54 PM
632	In all my years of riding metro, I've only ever ridden one bus that was on time. Either retime routes to account for delays, or enforce a stricter policy on timeliness. In Japan, if bullet train or subway conductors/drivers are late by more than one minute more than once in their career, they are fired. The Japanese subway and bullet trains are always on time :)	11/17/2014 1:54 PM
633	parking at the NGate park in ride. No available. need more spaces	11/17/2014 1:54 PM
634	If I'm scheduled late, I'm stuck waiting for upwards of forty minutes. Same on weekends sometimes. It's just uncomfortable in the rain and the winter and things.	11/17/2014 1:54 PM
635	I work at a restaurant that is only open for dinner. I get off late and, on top of that, I don't always know when my shift will end. Sometimes I end up having to wait 30+ minutes for the right bus to pick me up, late at night, often in the cold/rain. Sometimes, even after waiting, the buses don't stop because they are too full (usually after Mariners, Sounders, or Seahawks games). It takes on average about an hour from when I get off work until I get off the bus at home if I take the bus (SLU to Wedgwood). This takes about 15 minutes if I have a car/can get a ride.	11/17/2014 1:53 PM
636	I would honestly choose all of the above if I could. These are all issues that I find myself and everyone who commutes around me complaining about, and they seem to be getting worse and worse with every budget cut.	11/17/2014 1:52 PM
637	I'm not sure what this question is asking. Those check marks are pretty self explanatory I think	11/17/2014 1:52 PM
638	Even though I am glad not to drive, I still feel like it takes a long time in traffic for even the buses to travel and so it really deters me from going downtown when I would otherwise. I don't have a problem with walking, so as long as I can get into the relative area I am fine but I don't feel like I can count on transportation to show up with regularity and travel efficiently, save the light rail which I feel quite positive about.	11/17/2014 1:52 PM
639	At certain times on the 71X/72X/73X, the busses are completely packed.	11/17/2014 1:52 PM
640	I can't stay at work later than 5:15pm because the last bus from MI Park and Ride to my apartment is at 6pm.	11/17/2014 1:52 PM
641	I often need to be on campus on weekends, and it's easier for me to drive than to bus because the bus would take at least an hour, since my commuter bus runs only on weekdays. Also, I would love it if the 373 had a 7.30 pm bus. I am always done by then, but not always by 6.30. It could be a small bus. Finally, I have had multiple instances of buses not showing up, or showing up half an hour late. I complained about it and things seem to have improved somewhat since.	11/17/2014 1:51 PM
642	Transfers increase the overall transit time, thus it's faster to just drive myself. Driving also gives me more flexibility.	11/17/2014 1:49 PM
643	I drive on days when I have to make several multi-stop trips. Service isn't frequent enough to travel all around the city in a short amount of time.	11/17/2014 1:49 PM
644	I am a college student and I work as well so I feel that certain places I would like to go explore, the Hill for instance, I feel it would take far too long to get to by bus and it really wouldn't be all that worth it to spend so much time on the buses I would need to take to get there. I can study on the bus but that isn't comfortable.	11/17/2014 1:47 PM

645	I am very concerned about the UW Express continuing. Even with the Link, this bus is the quickest way for me to get to work.	11/17/2014 1:47 PM
646	I stopped taking the 586 Sound Transit bus because the morning bus was crowded most days and also it started getting me to my destination 15 plus minutes later than usual. I like the train for the most part but the transferring and longer walk are a deterrent	11/17/2014 1:46 PM
647	If it takes over 45 minutes to get somewhere that would normally be a 10-20 minute drive, I don't usually go. I live on Capitol Hill, and I sometimes decline invitations for events in Ballard or the northern part of South Lake Union because of how long it would take to get there. I'm looking forward to the light rail providing easier access to Northgate and Bellevue. It's already a great way to get to and from the airport.	11/17/2014 1:45 PM
648	30 minute frequency on route 32 is far too infrequent.	11/17/2014 1:44 PM
649	The Sounder train runs only infrequently The Sound Transit buses have horribly rude passengers who refuse to follow bus rules (everyone eats on the bus, and I have food allergies) The Sound Transit ST590 does not go to South Lake Union The Sound Transit buses do not feel safe late at night.	11/17/2014 1:44 PM
650	Transfers can make transit use difficult	11/17/2014 1:43 PM
651	Transferring is difficult because of unreliable times; I often find that I need to schedule in up to an extra hour in order to ensure I can make my connection and get to where I need to be on time. Also, if I choose to bus when I have my bike with me (usually because I'm too tired to bike up hills/caught in a bad rain storm with inadequate gear for the day), I will sometimes have to wait for the next bus because the bike rack is full.	11/17/2014 1:43 PM
652	Probably because the state is paying too much for over crowded prisons to fund public transit in a widely dispersed city.	11/17/2014 1:43 PM
653	Because there is always a lot of people getting on the bus at the University District.	11/17/2014 1:43 PM
654	After work buses runs to crowded and ether to late or to early .	11/17/2014 1:40 PM
655	Particularly night time service is so reduced that I either can't use transit when I want to go out or I don't patronize businesses because I don't want to drive.	11/17/2014 1:40 PM
656	Essentially my only complaint is that buses don't run as late as I'd like (specifically the 60, weekdays and especially weekends)	11/17/2014 1:40 PM
657	My biggest problem is how crowded the buses are that I take.	11/17/2014 1:39 PM
658	I usually only drive to work when I want to the UW's IMA at 3924 Montlake Blvd NE and there is NO bus service that doesn't involve 10+ min walk in Seattle's rainy weather.	11/17/2014 1:38 PM
659	Buses runs late sometimes and connection is missed; traffic issues cause delays; safety an issue sometimes.	11/17/2014 1:37 PM
660	Transfers add a lot of time to a bus trip and makes it not worth catching the bus if it will take 3 or more times longer than driving. Also, if a bus only runs once or twice an hour and you need to transfer to it, you can end up waiting a very long time at the intermediate step of the journey.	11/17/2014 1:36 PM
661	The main reason I ride my bike most days is because busses can sometimes be very crowded. Especially on very cold or rainy days.	11/17/2014 1:36 PM
662	Any way we could make the busses all more like the rapid ride where we could enter at any door? I feel like that would make things go a lot faster!	11/17/2014 1:35 PM
663	Transferring is great when timed correctly! But many times it just doesn't work out.	11/17/2014 1:35 PM
664	My current commute is one hour each way. I can bike that in a bit over half an hour (when my bike is working, and if the sun is shining or I feel like getting wet). It's a fifteen minute drive. The 27 used to go straight to Fremont. That was pretty awesome. Except it didn't come around too often, so I'd end up delaying my commute to make it shorter. Now, I have to transfer no matter what, so I'm taking the 3/4 much more often.	11/17/2014 1:35 PM
665	I commute during peek times and the buses don't arrive, are late, and then are overcrowded	11/17/2014 1:35 PM
666	I don't use public transit when I plan to purchase things that may be difficult to carry on board.	11/17/2014 1:35 PM

667	Some of the time, eventually I can usually get where I want to go but definitely not in a timely manner. It takes 1.5-2 hours (one way) to get to work each morning, if I drove this would be a 20 min commute. About 3 weeks ago my bus was late every day from 2 hours to 20 mins each day. This is unacceptable, my only other choice is to drive in or to leave 2.5 hours before I start work and get to work 1 hour early because the transfers are a little better. I am coming from 79th St SE & Evergreen way in Everett, and work for the UW at the Seattle Campus. If the transfers were as good at 6 AM as they are at 5AM my commute would be much better, all I can think of is more frequent service could get us there.	11/17/2014 1:34 PM
668	N/a	11/17/2014 1:34 PM
669	I'm 65.....arthritis is curtailing (somewhat) my mobility, so the distance to get to a bus stop is now a factor in my transportation options	11/17/2014 1:34 PM
670	See above	11/17/2014 1:34 PM
671	After the 205X got canceled. The ST 550/554 and the routes 71-73 is a lot more crowded and some people can't get to school on time because of it	11/17/2014 1:34 PM
672	the 43 articulated coaches are very smelly and dirty. I have frequently seen bird feces on the seats and the general smell of the bus is very bad.	11/17/2014 1:33 PM
673	Busses are crowded during commute times because more people want to ride then space available. 303 is often standing room only both directions when I commute at high peak commuter hours.	11/17/2014 1:33 PM
674	Sometimes, the buses are running late and if I have a schedule planned out according to that bus, I could be late because the bus is late. I have seen buses that are up to 15 minutes late.	11/17/2014 1:32 PM
675	In recent months the buses are more crowded and I have to stand. Standing is not always easy for me with a large bag. When I am downtown the 12 does not come as frequently as the schedule says. Downtown bus stops have moved and I have to walk farther to get to one (after I've figured out which one will be appropriate).	11/17/2014 1:31 PM
676	I can drive myself faster, safer and without standing in the rain. Taking the bus Mon-Fri to get from West Seattle to UW apparently always requires a transfer, downtown, at an uncovered stop.	11/17/2014 1:31 PM
677	In some situations the bus take 3 times longer than driving.	11/17/2014 1:31 PM
678	Transfers, and full busses make getting a wheelchair on the bus annoying. Plus some drivers are less than helpful...	11/17/2014 1:30 PM
679	sometimes the bus leaves early or over-crowded and leaves passengers	11/17/2014 1:29 PM
680	If shopping, carrying stuff -- I generally go shopping on foot or by car.	11/17/2014 1:29 PM
681	Late afternoon/evening 65 bus from UW campus to Wedgwood is always extremely crowded.	11/17/2014 1:28 PM
682	Traffic can cause delays for the bus network and there are time when destinations aren't convenient to stops.	11/17/2014 1:27 PM
683	I feel like that question is self-explanatory	11/17/2014 1:27 PM
684	Link light rail from Downtown to Sea-Tac does not start early enough in the morning or run late enough at night for many early morning/late night flights.	11/17/2014 1:26 PM
685	It takes an hour or more to get to Fremont from my house, which is a 15-minute drive, and usually those buses are all running late.	11/17/2014 1:25 PM
686	The most difficult thing is trying to find the most direct route, having to transfer and line up schedules is difficult.	11/17/2014 1:25 PM
687	I have walked home (about 1 hour, 10 minutes) when I missed the last bus that goes north from campus. I don't use Metro for non-work trips due to length of time it takes to reach my destination and/or number of transfers. It is frustrating to miss a bus by 3 bus lengths when I am running for it as it pulls away, wait for a bus that is quite delayed for unknown reasons (sometimes never comes) when the schedules are far enough apart anyway, or see multiple buses for another route come and go while I'm still waiting for my bus.	11/17/2014 1:23 PM
688	The recent bus cuts have affected me significantly, and I am not as mobile as I used to be because fewer buses go by my house and to my most common destinations.	11/17/2014 1:23 PM
689	It would be nice to have more express routes. One option for me to get home has 100 stops along the way. I never take this route.	11/17/2014 1:23 PM

690	Some stops do not have bus schedules, when they do they are out of date or the bus is not lining up correctly with the times posted, and the app "One Bus Away" can have large variations in approximate wait times and can fluctuate drastically. Overall it is still cheaper to use an ORCA pass than pay for parking, and during the middle of the day the time it takes to get to my destination with public transit is about the same or only just slightly longer than it would take to drive and find parking even with buses not being on great schedule or having multiple buses not line up schedule wise. Public transit passes, such as the the ORCA card are also much more likely to be subsidized by a company or organization, which improves the cost-usefulness ratio.	11/17/2014 1:22 PM
691	See question 5	11/17/2014 1:22 PM
692	During my field season (see above) I worked weekends as well as weekdays. On Sundays I usually had to drive because service in my area (S Kirkland park and ride) began too late. On the weekends, it would be nice to take the bus from Kirkland to downtown Seattle and know we had a safe ride home. However, bus only come every hour after about 8:30 and there are few things are irritating than wanted to go home at midnight and realizing you have to wait another hour for a bus.	11/17/2014 1:20 PM
693	There are thugs at Othello and Mt. Backer stations	11/17/2014 1:19 PM
694	I do not have the same work hours from day to day. Transit service is often too infrequent or too slow (i.e., no express service) outside of rush hours.	11/17/2014 1:19 PM
695	Some routes stops do not run that late for being in a big city. Also, I have had unsafe things happen to be on a bus and at a bus stop before, so it is good to be looking at ways to make those spaces feel safer.	11/17/2014 1:18 PM
696	Yes, why aren't the buses running more frequently? Why do they often stink?	11/17/2014 1:18 PM
697	Due to traffic and poor street conditions. Can be crowded due to frequency. Shifts start/end early/late.	11/17/2014 1:18 PM
698	Sometimes, driving a car is just easier when the stop is too far away (or there are too many transfers).	11/17/2014 1:17 PM
699	too much construction in Allen town (SLU)	11/17/2014 1:16 PM
700	Metro is well used and the equipment is tired looking and never clean enough. Why do drivers let non-paying customers on the bus?	11/17/2014 1:16 PM
701	I also deal with errands that take me all over North Seattle. Driving is more convenient for them.	11/17/2014 1:16 PM
702	Buses are almost always crowded, and there is no train on the weekend so it makes it harder	11/17/2014 1:15 PM
703	The bus service around 5 pm is not reliable. Often, the bus is late and then it becomes even more crowded which is uncomfortable for the passengers and it takes extra time for people to get on and off the bus. I would like to see an extra 372 bus added in from the UW to north Seattle. Also, there have been times I have not been able to ride a bus because they are too full. I do not consider this good customer service.	11/17/2014 1:14 PM
704	Buses that run along Eastlake up by my building stop running frequently after about 5:00 so I usually walk or drive.	11/17/2014 1:14 PM
705	Again, let me say that I love Community Transit for commuting to work. However the bus service within Lynnwood literally sucks. My car broke down three months ago, and was in the garage for over a week. So, not having a vehicle meant that I had to walk from my home off of 180th west of hwy 99 to the transit. That's about 2.2 miles. And, part of that meant I had to cross hwy 99, which was fine in the early morning, but very dangerous in the afternoons. There is no light at 52nd and hwy 99, and if I walked on 188th to hwy 99, I would have to climb a large hill, and it would at at least a half-mile. So, dodging traffic at 99 and 52nd was really the only option. There is a south bound bus stop on the west side, but that just travels south to the King County line. But there's nothing on the east side of 99 near that intersection. I checked the website to see if I could get to the LTC on the bus, but the south bound stop at 180th would mean I'd be walking further than if I crossed 99. There are a lot of apartments on 52nd southbound from hwy 99 at 180th. It just seems like there should be bus service available. Like I said, I would be happy to catch a bus to the transit center if there was one available. Like I said, I would be happy to catch a bus to the transit center if there was one available. I'm not sure whether Community Transit bus service in Lynnwood is funded by the city, or through a broader tax base, but if at all possible I would like to advocate for more frequent and broader area service. Thank you for listening, and know that I very much appreciate Community Transit, and the wonderful drivers that get us to where we need to be. Sharon Hall	11/17/2014 1:12 PM
706	For example, my main weekday bus to Harborview is the 5:50 a.m. 545 from Redmond Park and Ride to 5th and Jefferson. I start work about 6:30 to 6:45. On weekends the first 545 isn't until 6:30 so I have to ride the 522 from Kenmore P&R to 2nd and James and walk up the big hill to 9th and James to get to Harborview.	11/17/2014 1:11 PM

707	Some mornings I choose to walk because crowded buses are delayed and unreliable to get me to work on time. Sometimes I choose a cab over a bus to capitol hill because the buses don't come as frequently as I would like and the stops are too far from my house.	11/17/2014 1:11 PM
708	1. The Mountlake Terrace P&R fills very early now, making it hard to get to transit options at this location. Currently I park 1/4 mile away and walk, but nearby parking places are beginning to fill up too. 2. Very recently bus service has become wildly unpredictable; buses are sometimes 30+ minutes late but are sometimes exactly on time. 3. The most efficient bus routes use the carpool-only exit at 5th at Madison for rapid access to/from downtown. However, only a few morning routes use this option (I catch the route 413 at 9:05am). Combining these three, for my morning commute I have to park 1/4 mile from the P&R and walk to catch a specific bus that may be on time or 30 minutes late; this is not a reliable commute in to work. Conversely, on the way home I can catch either the 413 or 435 routes, which provides 4 different buses between 5:00pm and 5:30pm, and multiple later options. This means I can get a reliable trip home regardless of traffic conditions by catching whatever bus show up next. Suggestions: 1. Buses from the north should alter routes to use the bus/carpool-only exits more. The Stewart Street exit is become a major roadblock delaying transit trips by 10-30 minutes compared with those using the special exits. 2. Reliability (which is extremely important for work commuting) is all about a backup option. Any single bus can be delayed by any amount or never even show up. When there are multiple options at about the same time, then schedules and timeliness become irrelevant because I just catch whichever option comes next. When the 435 began to stop at MTPR, my average evening commute time plummeted because the odds of two different buses being lost or badly off schedule are much lower than one single bus. Similarly, at 5:20pm I know I can catch a bus soon regardless of traffic, because if everything is 20 minutes late I just catch the bus that should have been there 20 minutes ago.	11/17/2014 1:11 PM
709	Time is important and we have already spent 1 hour one way for the waiting time and the time on the bus. Transferring option will add another more time to the commute time. If we pay for bus fares, we all should have a seat on the bus. You know how congested I-405 is currently. If it takes longer for us to work to use transit to work, we might have to drive, which puts more cars on the road.	11/17/2014 1:11 PM
710	542 isn't frequent enough	11/17/2014 1:10 PM
711	Sometimes the bus is 5 or 10 minutes late, making me late to work. If I take an earlier, I get there way too early since the buses are so infrequent.	11/17/2014 1:09 PM
712	over crowded at times for the early morning sometime bus doesn't show no notification when this happens	11/17/2014 1:08 PM
713	I do not like being on overly crowded buses/transit.	11/17/2014 1:08 PM
714	N/A	11/17/2014 1:08 PM
715	Living in West Seattle, I often choose to drive because of the amount of time it takes to take multiple bus routes, especially to places North of the ship canal. I'd really like to see the water taxi have an extra run at 9:15 during the winter.	11/17/2014 1:07 PM
716	The Seattle transit system is built on a misconception which leads to limited ridership. Here is the main problem: You are trying to take the service to everyone's doorstep so they could get to where they want to go without having to make a transfer. This creates enormously long routes which henceforth become unreliable due to nobody's fault but the length of the route. A much better working system is what one sees in most large cities with a working public transit system: there should be fast routes covering long distances and local service that takes people to these fast routes. Then make the fast routes frequent enough that someone taking the connecting service would not have to wait very long for the transfer. The LINK light rail and the RapidRide buses are a good way to go, but not nearly enough. There are still areas where the only option is to take a local bus that takes its time to go around the neighbourhood to pick everyone up and then make its way to (say) downtown. You don't see these buses in Manhattan. ADDED LATER: Seeing your later questions, it seems that you are trying to do exactly this. Good! I totally support that. Please make it happen!	11/17/2014 1:06 PM
717	The bus I use most is the 197 from i-5 freeway and s 272nd st to uw seattle. The route is perfect however the first route from my house to uw isn't until 12:45 so when I am out of class at 9:30 I must wait for 3 hours to get on the bus and go home. Other routes home take almost 2 hours of riding the bus. The last bus to uw in the morning leaves before 8am and some days I do not have class until 11:30 so I am at school 3 hours early. Sometimes in the morning the busses are only 10 minutes apart so everyone cramps onto the earlier one over packing them so I get off and wait for the next on at the next bus stop in those cases. Other routes though have 45 minute to Horgan between others. Having them evenly spread out would make some less full and easier to plan in the morning.	11/17/2014 1:06 PM
718	I have a car - I would like to take transit more often, but I am usually running late & so it is more easy to drive - I usually take the bus when I am not on a schedule; Also, weather can be a factor - if it is raining or cold, I will drive rather than take transit	11/17/2014 1:06 PM

719	I drive when I am in a time crunch; otherwise, take the bus	11/17/2014 1:06 PM
720	Near my home at 145th NE and Lake City Way, we take the 306, 312, 372, and 522 regularly. With the recent cuts to the 306 and 312, morning and afternoon commutes have been extremely difficult, as buses are often full before they even get to 125th St., so many riders are left stranded at stops. Traffic on Lake City Way has been dramatically increased lately also, so the commute takes a lot longer than it used to. The 372 is the only option for getting to and from UW campus, and its last stop from UW HUB is at 9:40, so it prevents me from being able to stay late at the library to study. I wish the 372 came more often, and later into the night, or that there was a more direct route to LCW, like up 15th to LCW.	11/17/2014 1:05 PM
721	limited service to UW from Renton	11/17/2014 1:05 PM
722	See above comment about buses from UW to Capitol Hill and early transit to airport. I can get to the P&R in my area from UW but there is only one possible route from there to my neighborhood and it is infrequent enough that it is VERY difficult to sync my bus from UW to the one up the hill to my neighborhood and my daughter's school to pick her up on time. That route is also notoriously late. Kenmore to Seattle Ctr and Pike Place is a pain (unless things have changed since I last tried).	11/17/2014 1:02 PM
723	The cuts have made the 48 a cattle car, specifically southbound in the morning and northbound in the evening. I wish there were ways to get to bars and nightclubs on Cap Hill more easily from all around the city on weekends.	11/17/2014 1:02 PM
724	Drivers do not even stop because the busses are too full. Since this is a judgement call by the driver, they need more training to help them gauge when a bus is crowded v. when a bus is really full and may become unsafe with so many passengers. I would rather be on a crowded bus, than left in the dark, cold, and wet stop. The next bus is often more than 20 minutes later and it can take me 50 minutes to get to my stop. Also, the service to Magnolia (Rt 31) does not run often enough and does not run throughout Magnolia. I have to transfer, but once again, the frequency of the coordinating bus (Rt 24) is so irregular and infrequent, I can walk it faster than take the bus. The bus stops are getting run down and the garbage is not regularly emptied at stops that do not get high traffic.	11/17/2014 1:01 PM
725	It takes too long to get to my destination because the bus schedule is not reliable, the buses aren't frequent enough, and I have to wait for my infrequent transfer to show up untimely.	11/17/2014 1:01 PM
726	It sometimes takes me an hour to get home when I only spend 20 minutes actually on the bus simply because the buses are late or too crowded for me to enter.	11/17/2014 1:01 PM
727	I use Metro primarily for my daily commute; on-time, reliable and frequent buses is my #1 priority.	11/17/2014 1:00 PM
728	There have been many times when the 44 bus is extremely crowded and I as well as others have been left at my stop. On several occasions, I have walked to my destination ~35-40 minutes away, and arrived faster than the next bus.. which may not have been able to let me board either. I don't know what the solution to this problem is because I don't know the cause (too few buses at peak times? buses with limited capacity sent out instead of buses with regular capacity? car traffic at WA-99 and I-5 affecting bus traffic along the route so all buses are running late?), but it does not make for a pleasant or reliable commute.	11/17/2014 12:59 PM
729	Late nights at work can often make it difficult to use transit. Stops aren't often the safest place to hangout and wait for buses that don't run as often. I need to leave events an hour early sometimes in order to make a bus to get to my destination. I also have to coordinate my schedule with the ferry system--and that can also add more time.	11/17/2014 12:59 PM
730	I take the bus to church on Sundays, and it doesn't run frequently enough or stop close enough to my church to be convenient. I volunteer in White Center on Wednesdays, and using the bus takes twice the time that it would to just drive there.	11/17/2014 12:59 PM
731	I'd like to use the Sounder/Link light rail to get from Tacoma to U District but having to transfer to a bus after getting downtown takes a lot of time	11/17/2014 12:59 PM
732	6 block walk from bus to work isn't a problem when the weather is decent; becomes a problem when weather is both freezing and wet.	11/17/2014 12:59 PM
733	Buses are often delayed. Transferring is normally fine on the weekdays with a 10 minute or so gap but on weekends, the gap in between buses is much longer. Travelling on weekends doubles my commute time because of the waits in between.	11/17/2014 12:58 PM
734	Commuting to the University of Washington - Seattle campus from Burien and back means that it takes me about an hour, usually an hour and a half to get to my house or school, either way. I feel like that is a little too long sometimes, however, I also always have to transfer to different buses or transit options to get home or to school, and that means more of my time is taken up. Also, the 71, 72, and 73 buses are always crowded both in the morning, afternoon and going to the UW as well as going from the UW.	11/17/2014 12:57 PM

735	I commute to Issaquah from the UW campus. My bus comes every half hour, which is pretty good, but still a hassle if I miss it. My commute gets much harder after 6:30pm when the last 556 leaves UW. If I want to stay on campus to work or socialize, I have to take a 271, which is crowded and takes much longer to get to my destination.	11/17/2014 12:57 PM
736	Crowded for bikes... need for more bike capacity.	11/17/2014 12:56 PM
737	Sometimes the buses gets really crowded and they have to turn passengers away which results in an extra 30 minutes or so wait for another bus. There are some buses that aren't available during the weekends so you have to figure out another bus route which sometimes results in 2 or 3 different buses to get to your destination rather than one. There's been numerous times when I've boarded a bus and there's a certain smell or people have left trash all over the bus. I know it's hard to control this but it would be nice to have nice clean buses like the sound transit for Seattle.	11/17/2014 12:56 PM
738	I'm a student, work full-time and have a family. I don't have time to waste. The bus is usually too crowded and noisy to do anything meaningful while riding.	11/17/2014 12:56 PM
739	It is more difficult to get to places up north on public transportation because my house and probably others' is about a mile away from the closest stop. (Lake Forest Park Towne Center)	11/17/2014 12:56 PM
740	I have to arrive by a certain time for classes and/or work which results in over an hour commute to go 10 miles. I am required to leave super early or arrive late due to the infrequent service. Finally, the stops aren't near my work or school and adds an additional 15 minute walk.	11/17/2014 12:56 PM
741	I don't like to transfer buses, as I am always afraid I will miss the transfer. When I take transit, I drive to a park & ride to catch the bus.	11/17/2014 12:56 PM
742	Hard to get from Green Lake to Capitol Hill w/o transfer. Late night options from UDist/Capitol Hill not as robust as needed.	11/17/2014 12:56 PM
743	Why spend 45 minutes to get to work when it only takes 15 to drive?	11/17/2014 12:55 PM
744	I don't know why this occurs.	11/17/2014 12:55 PM
745	Sound transit buses are nice. Metro buses, especially the 43, tend to not be nearly as clean.	11/17/2014 12:55 PM
746	I sometimes want to connect the 5 and 44 routes--but they are not timed to connect at all. By the time the 44 has made a few stops it's often standing room only. The buses themselves on the 44 route are old and smelly.	11/17/2014 12:54 PM
747	More service to UW earlier and later in the day. I use 167 express and getting on 405 with multiple stops is a pain when I live in Renton.	11/17/2014 12:53 PM
748	If service were more frequent, buses wouldn't be as crowded. I don't think there's much that can be done about how long it takes, aside from opening the Light Rail station at UW sooner.	11/17/2014 12:53 PM
749	Especially during the school year, buses between Fremont and Wallingford are often very crowded during rush hour, and buses between Wallingford and downtown are always very crowded - well beyond standing room only - during rush hour. Many buses are also often very late, the 16 notoriously so. Rapid Ride buses are much better, but often don't have stops near me. The buses are also often confusingly numbered for newcomers. Two buses with the same number might have different routes, or two buses with the same route might have different numbers. For example, the 43 sometimes goes to UW, and sometimes becomes a 44 into Ballard. The 44 sometimes stops at UW and sometimes continues on to Capitol Hill. Why not just number them differently: the 42 (or whatever) goes between Ballard and UW, the 43 goes between UW and Capitol Hill, and the 44 goes between Ballard and Capital Hill?	11/17/2014 12:53 PM
750	I live on the bottom of Capitol Hill - of my closest routes, route 47 was discontinued and route 25 runs so infrequently I can't count on it. I have to hike up the hill or just walk.	11/17/2014 12:53 PM
751	Trying to get from Point A to Point B can be a pain when there are delays of upwards of 30-45 minutes (which happens frequently on my routes home). I have also felt unsafe at times with other passengers who violate social norms while riding.	11/17/2014 12:53 PM
752	The bus I ride in the morning and in the afternoon is very limited and only runs in peak hours (143), and it also does not run on weekends. There is another bus in my area but it is far away from where I live and runs only once an hour in the evening (168). In university district, the 71, 72, 73 buses are always very crowded and many times too full even to accept passengers, especially at the campus parkway stop. This then causes a delay in getting to where I need to go because then several buses have to come by before there is one that can actually accept passengers.	11/17/2014 12:52 PM

753	From my home to down town, it takes a more than 1 hour bus ride. I can drive there in 15 minutes. (ie Wedgwood to Seattle Center). There are three buses near my house, but all come at the same exact time, so if I miss one, I have to wait 30 minutes. This doesn't make sense. There should be one of three different buses coming at least every 15 minutes, with the same one coming every 30. If you spaced these out accordingly, you could potentially have a bus arriving every 45 minutes, but stagger with surrounding buses to cut back on service, but keep options open to people.	11/17/2014 12:52 PM
754	The trip to the University of Washington and back home is direct with no transfers. Every other route takes two or more transfers, making the length of the trip uninviting. The bus route I take is at the peak times and the buses are packed full with riders standing in the isles. The Metro buses are very uncomfortable with over-stuffed plastic seats and constant contact with other passengers, especially with over-weight passengers. With every pothole, and there are numerous potholes throughout the routes, the bus pitches and slams and is very loud.	11/17/2014 12:51 PM
755	I mostly use it for locations that I can get to directly without needing to transfer. Traffic can be bad, which slows things down and could make you miss a connection. That's why I don't like to take the bus places where I would need to transfer. Those routes also end up taking much longer than driving.	11/17/2014 12:51 PM
756	When I go to school, I have to be driven to the nearest light rail station, then take that to anywhere downtown and then take 71x,72x, or 73x to u district and then walked to university of washington. It's difficult because I have to transfer and it wastes time and it's a hassle. Also the lightrail is too far away from my house to walk so I have to be driven because waiting for a bus to take me there would take too long and then taking the bus to downtown instead will take too long.	11/17/2014 12:51 PM
757	Community transit seems to do a bad job making even schedules. Ex: see large portion of common routing for 860/880.	11/17/2014 12:51 PM
758	some UW stations (i.e. 11th St and 45th) or on the UW Ave are not perceived as safe (for women or anyone) early or post work hours (in dark); concerning aggressive indigent population, and it is understood that these areas have regularity of crimes committed (thanks to the UW police blotter notifications) involving assault (i.e. some gun/knife crimes), theft, etc. that take place there or near there.	11/17/2014 12:49 PM
759	When I commute to school from Kent to University of Washington Seattle, often times I have evening classes and will have to miss the last scheduled train time and have to take 2 buses to get back to where I live. Taking the train over the bus definitely cuts down the transportation time, which is why i prefer taking the bus. Services not offered on the weekend means I have to drive by myself causing me to pay for gas on my car.	11/17/2014 12:49 PM
760	Since the cut backs getting to work on time is much, much harder. My first bus, the 29 is normally six to twelve minutes late making catching my connection nearly impossible. The 255 also seems to have a hard time leaving Westlake station on time. My fourth concern is that the newer buses are less comfortable and have less seating. I have a bad new and prolonged standing, and especially standing with shopping bags, is painful.	11/17/2014 12:48 PM
761	Connections at transit centers are not timed well.	11/17/2014 12:48 PM
762	Above reasons are pretty self explanatory and also driving would take me less than half the time it does to bus it to work (even when stuck in traffic).	11/17/2014 12:47 PM
763	Later at night or after a certain hour I will not use public transportation to and from some areas or I will avoid transfers in certain locations for some of the reasons listed above.	11/17/2014 12:47 PM
764	Beacon Hill to U District is not currently fast or easy. When Link station in U District opens, that will be more convenient, but take a very long time via downtown and Capitol Hill.	11/17/2014 12:47 PM
765	Buses do not show up when the time table says it will. Also, the one bus away app sometimes lies when the buses will come or say a bus has departed when it hasn't even arrived yet. Also, one time the bus came a minute early and I just missed it because I was a block away.	11/17/2014 12:47 PM
766	Less frequent routes on Sundays provide barriers to traveling via the bus. Transferring is a problem because it adds another 30 minutes to travel time, at least.	11/17/2014 12:46 PM
767	It's the only way i can get to the airport, and the bus takes a long time, then I have to transfer to the Light Rail after riding the bus.	11/17/2014 12:46 PM
768	Park and Rides run out of parking	11/17/2014 12:46 PM
769	Since I own a car sometimes it's faster and more reliable and safer (at night) to drive because it will take me 10 minutes versus 20-30 minutes and then my waiting time for the bus. If routes came frequently enough every 15 mins then I would likely choose to bus over drive.	11/17/2014 12:45 PM
770	Shouldn't that be obvious from the responses?	11/17/2014 12:45 PM

771	It is always a cost-benefit analysis of trying to determine if it is worth the extra time for the bus versus cycling, walking, or car2go.	11/17/2014 12:45 PM
772	I have never had a bus arrive on time. Coming from another state where you could set your watch by the buses, Seattle routes are a complete disappointment.	11/17/2014 12:45 PM
773	I'm a fairly avid transit user, but the three reasons I've selected above are the most frequent hindrances. I find that buses are often late/early and that it can sometimes be luck that leads to catching a bus on time. Because I live far away and the express buses run less frequently than others, I selected that option. And the number one reason I might opt to take my own car or to look for another option is because sometimes the bus is just slower. I find this is actually more true of the local Seattle Metro buses than the commuter express buses.	11/17/2014 12:44 PM
774	If I'm working late, service is too infrequent and then after dark - I often don't want to ride because of safety concerns.	11/17/2014 12:44 PM
775	It is VERY crowded on the metro buses from Downtown to U District, especially during the morning when there are students as well as those that work for the UW and other people. Parking fills up really quickly at Park and Rides.	11/17/2014 12:44 PM
776	It's faster and more convenient to drive or ride my bike, so I do that.	11/17/2014 12:43 PM
777	On weekends, service on most routes near my home either stops completely, or becomes very infrequent.	11/17/2014 12:43 PM
778	Living in Shoreline, the bus options are very limited.	11/17/2014 12:43 PM
779	See above	11/17/2014 12:43 PM
780	The buses near my home don't run late enough (past 8:30pm) or at all on the weekends. The weekday buses are often late, especially in the mornings.	11/17/2014 12:43 PM
781	Light trail line at night needs more security.	11/17/2014 12:43 PM
782	I can always drive much faster from Renton to the U-District than taking transportation, (saving me an hour each day if I drive), and it seems like there is no rhyme or reason to which bus arrives each day on my route. Some days the seating is just right, but many days lately it is standing room only, which is terrible when traffic is bad.	11/17/2014 12:42 PM
783	Buses through the University of Washington (such as the 65 to Wedgewood or the 75 to Northgate) are often completely full by the time they arrive on campus. The bus will be running 10-20 minutes late, and then will be followed a few minutes later by an on time bus that is nearly empty. Of course as a rider you never know which one will be late / on time / full / empty... so it's very inconsistent and frustrating. For example, it seems like the 75 northbound carries about half the passengers to a destination between UW Campus and Magnuson, and the other half between Magnuson and Northgate... so maybe multiple bus numbers or an express could ease the heavy passenger congestion during morning and evening commute hours.	11/17/2014 12:42 PM
784	The E-Line is always packed. No real option to travel from U-District to South Lake Union.	11/17/2014 12:42 PM
785	I would much rather use public transportation in the evenings to go to cultural events and to entertainment like music, theater, movies, restaurants. I could do this easily in Boston and Washington DC. I don't ever do this in Seattle because of limited service and choices.	11/17/2014 12:41 PM
786	if you miss a connection, the time until the next bus is often too long	11/17/2014 12:41 PM
787	I have to transfer. They are ALWAYS full, I almost never get a seat, and sometimes they are so full I cannot get on.	11/17/2014 12:41 PM
788	I will not take a bus if I have to transfer. Especially if I am commuting to work.	11/17/2014 12:40 PM
789	At times some route 586 buses are eliminated and converted to 590 buses causing standing room lines for 586 riders. As nice as the MCI buses are they were configured for long distance carriers. Not short hall trips. The seats are a bit small and the entry and exit step are far too steep for entering or leaving. Many of the drivers struggle with the wheel chair accommodation mechanical s causing delays. Many people (faculty,staff and students need access to the UW Seattle campus on weekends.	11/17/2014 12:40 PM
790	I think that some stops could use some better lighting. Such as the ones in Capital Hill	11/17/2014 12:40 PM
791	I don't take the bus to the gym (24 Hour Fitness at Northgate) because there is no fast/efficient transportation there from my home near 67th and Linden. The E is often very crowded and it's difficult to get on at 65th and Woodlawn. The 44 can also be an issue at 46th.	11/17/2014 12:39 PM
792	It's not convenient.	11/17/2014 12:39 PM

793	Should have dedicated bus lanes on arterial streets (Eastlake Ave., 1 5th ave in U district, some major road in Cap. hill)	11/17/2014 12:39 PM
794	I always find myself waiting for longer than 15 minutes, which is offputting.	11/17/2014 12:39 PM
795	not enough space, lots of traffic, makes me late to school	11/17/2014 12:38 PM
796	When the light rail was proposed, it needed to provide service that is quicker than driving. We are not looking to commute at the same or slower speeds than a car. I offered Japan as an example. Evidently this was not a top priority for building the multi-billion dollar system. I can ride my bike faster than the bus and it is more reliable.	11/17/2014 12:37 PM
797	Buses go past without stopping because they are full. There are no places to sit. Buses take too long to get downtown when they make stops along Eastlake.	11/17/2014 12:37 PM
798	I usually bike in which takes about 20 minutes faster door to door. Recently due to surgery I had to stop biking for 2 months, and it is during this time that most of the my experience with the bus system has occurred.	11/17/2014 12:37 PM
799	It's very hard to get to Greenlake from the View Ridge/Sandpoint area. I have to either bike the entire way, or ride a 71 (2 miles from my house) to Roosevelt and University Way and then bike the rest of the way. This is a very big challenge in my daily life and I'm very seriously considering buying a car even though I prefer to use public transportation.	11/17/2014 12:36 PM
800	see above	11/17/2014 12:35 PM
801	All rides at rush hour are full and standing room only.	11/17/2014 12:35 PM
802	The length of time round trip adds 3 hours to my work day. This is not acceptable.	11/17/2014 12:34 PM
803	BUS 73 SOMETIMES DID NOT COME IN THE MORNINGS. I CATCH IT AT 6:15 AM. THAT MADE ME LATE FOR WORK.	11/17/2014 12:34 PM
804	Can be over an hour between home and UW because of transfers. Bus stops on Rainier Ave can be cold, rainy, dark and not safe.	11/17/2014 12:34 PM
805	Community Transit doesn't run on Sundays.	11/17/2014 12:34 PM
806	How can I choose only 3? All of these are reasons I don't ride the bus.	11/17/2014 12:34 PM
807	-The 3/4 would be a convenient one for me but it is like a jailhouse riot and a barfight on wheels. Feels totally unsafe and often it is. Too stressful! -The 60 is my main bus to/from work and to pick up my daughter on weekends on 14th & Fir, but it is too infrequent on weekends so we end up waiting for 20 mins or more at Broadway & Yesler for our return trip to Broadway & Thomas. Currently the nearest bus stop to 14th & Fir is at Broadway and Yesler and the 27 doesn't seem to run on weekends. The 9 would be a great option but unfortunately does not run on weekends and it looks like the Yesler and Boren stop is closed (no signs anymore) but I can't find any information about it. -When I have to work at 6:45 am, the only bus option is the 60 at 6:05 am, the next one is not until 6:38, which does not get me to work until 6:50 or later. Would be great if the bus started running every 20 mins at 6am. -Some stops tend to become homeless camps or sitting rooms for people who are drunk/on drugs etc. I know Metro is not a police force, but is it unreasonable to expect that riding the bus with your young child will not turn into a dangerous situation?	11/17/2014 12:32 PM
808	I would hate to be a bus driver because they have to put up with a lot of passengers "behaving badly." I know people who refuse to take the bus, take certain routes, or go at certain times of the day because of inappropriate passenger behavior...If parking weren't such a hassle, I'd drive for these reasons, too. I've witnessed several "unpleasant scenes" and once nearly called 911 when I thought a driver might get attacked.	11/17/2014 12:32 PM
809	The 197, the 73/72 x are very crowded. The 197 could have another morning run-by the time it gets to Kent/DM P&R it is completely full, we often have to stand or are crammed into those INCREDIBELY UNCOMFORTABLE sideways seats. You have to lean forward if you're the last to sit down.	11/17/2014 12:32 PM
810	These are "wish list" items that I would appreciate seeing improvement; but not critical.	11/17/2014 12:32 PM
811	Both the 66 and 67 are regularly late, especially in the afternoon headed north bound.	11/17/2014 12:32 PM
812	The buses are so packed when people get off work. Also, I travel through the University District and so the buses fill up with students very quickly. I still use the bus then because its for work, but on the weekends I prefer to drive places due to the frequency.	11/17/2014 12:31 PM
813	You need to differentiate in question 6. METRO BUSSES are extremely unreliable. TRAINS have been reliable in my experience. Also, Sound Transit busses tend to be more reliable than Metro busses.	11/17/2014 12:31 PM

814	Shorter to drive downtown from the north end of Seattle then ride a bus. 30 and 74 stop service at 7pm. Sometimes busses are very late or skipped altogether so the next bus is crowded.	11/17/2014 12:31 PM
815	The bus route I live closest to (#25) does not run on weekends or later in the evening, so it makes it difficult to get to destinations or get home safely. As stated above, there need to be buses that run along Montlake Blvd because it is unsafe to walk in that area when it is dark.	11/17/2014 12:30 PM
816	When leaving work (UW campus) late at night, the buses don't always come frequently enough and I will take a cab. Getting to Ballard or downtown from my home in Capitol Hill takes too long, so I walk downtown and take a cab or drive to Ballard	11/17/2014 12:29 PM
817	Again, my issue with the 48 bus is that it is usually late, then three 48 buses show up at UW at the same time. With child care pick up and a busy job, a timely bus really makes a huge difference!	11/17/2014 12:29 PM
818	I used to park at Northgate Transit Center and take the 67 to and from my job at UW. However, as my daughter's after-school pick-up schedule grew more complex and my work hours became slightly less flexible, this ceased to be a reliable option and I started commuting by car.	11/17/2014 12:28 PM
819	parking at park and ride is ALWAYS full	11/17/2014 12:28 PM
820	Many locations are not served by Metro - for anywhere outside of Seattle, you have access through other transit agencies to park-n-rides but without a car, those destinations are useless. Buses are more crowded than ever and sometimes I get skipped trying to go home because a bus is at capacity. I have to wait for the next one. This is especially true for buses serving the University district during rush hour.	11/17/2014 12:27 PM
821	I do not own a car and so am reliant on public transportation. I have been using Metro for more than 30 years and it generally works well. I also know the economics of public transportation makes it difficult to maintain high service levels. One annoyance that comes repeatedly is the #36 "link" from the Othello Light Rail Station. Passengers debarking from the train will be waiting for the walk light as a 36 goes around the corner from MLK to Othello and pass the stop without waiting for folks to cross the road. There are often half a dozen of us, and we often try to catch the drivers' eye, but the busses don't wait the 30-45 seconds for the light to change. This is very frustrating - especially in inclement weather - and also encourages unsafe jaywalking as younger folks try to dash for the bus (I've seen one boy almost get hit by a car). If the drivers notice that a train is at the station, could they be instructed to wait until passengers can cross the road?	11/17/2014 12:27 PM
822	I currently have 3 legs to my trip: train, express bus and another bus. The time between getting to where one of the legs starts and when the bus or train arrives makes the trip longer. Sometimes I miss a connection which makes the trip even longer. If I miss the first connection it cascades to the other legs to make the trip even longer still. When leaving the UW I used to try to catch the express bus to King Street station at the most obvious stop. After seeing a full bus drive past that stop I now walk further to another stop prior to the obvious stop just to get on the bus. The problem happens less often when the students are on break.	11/17/2014 12:27 PM
823	Seats are too cramped. Worse than an airplane.	11/17/2014 12:27 PM
824	Some routes are notoriously late, especially during peak times - such as the 48 leaving from the Central District and heading north. Other routes I don't choose because they are too infrequent and so I choose a different travel option. For example, I will drive to Northgate Mall partly because it takes at least 30 minutes by bus, but can be there in 10 minutes by car. Weather impacts ridership and so most routes I take are packed when it is raining.	11/17/2014 12:26 PM
825	2 hours to go 23 miles with 2 transfers from home to work. Too long for public transportation from Everett to UW. It's only 30 minutes to drive my own (at the right time). An hour with a Vanpool.	11/17/2014 12:26 PM
826	Bus goes on 15-20 min. break before finishing route. Finish route and then go on break. All bus routes need more frequent service if you really want people to get out of cars. Once every 45 min. to 1 hour service is too long. Then wait 20 minutes for bus to finish route is ridiculous. Then you justify cutting out route because no one will ride bus on your assinine schedule.	11/17/2014 12:26 PM
827	For me, early morning or late evening busses are very infrequent for my use.	11/17/2014 12:26 PM
828	If there was parking at all the light rail stations I would use it much more.	11/17/2014 12:25 PM
829	See previous comment. I've found that, with transferring, getting from my home in N. Ballard to the UW takes an hour and 15 minutes -- to go 4 miles!	11/17/2014 12:25 PM
830	Fremont to Capitol Hill takes an hour via bus due to transfer, and fifteen to twenty minutes via car. Going to Northgate from Fremont can be dodgy on weekends with infrequent service, so I have to wait for a while with my shopping goods/groceries.	11/17/2014 12:24 PM

831	I often make trips where the first leg is reliable and not too crowded but the second leg busses (most frequently over capitol hill and near UWMC) are late/come in quick succession followed by long delays and are extremely overcrowded.	11/17/2014 12:24 PM
832	Why does the 44/43 always smell like musty mildew and homeless people? So stinky.	11/17/2014 12:24 PM
833	Honestly, I could check off two more: service is not frequent enough and transfers. I prefer not to transfer on my daily commute. Already it takes well over an hour for me to get from my home to work and back without having to deal with a layover. Also, there is no parking at the nearest park and ride because it is too small and people from other areas fill it up before residents of the local area can use it.	11/17/2014 12:24 PM
834	I commute from Capitol Hill and U District, and am able to walk the distance. If it's a nice day I'll walk home from work. Sometimes, if I anticipate the bus being crowded I'll walk home, but it is never a case where the bus pulls up, it's too crowded, and I don't get on.	11/17/2014 12:24 PM
835	Busses are often packed; sometimes I have to stand for 45 minutes or more on a ride.	11/17/2014 12:24 PM
836	Route 120 is almost always over-crowded. Route 43 bus is too hot during the summer and often smells bad. Route 50 doesn't run frequently enough - if i miss my 5:30pm bus, i have to wait a half hour. To get from UW Medical Center to Delridge Way SW takes me about an hour and half between transfers, etc. and even longer if i miss one of the buses or don't get on it because it is too overcrowded.	11/17/2014 12:23 PM
837	There are several lines running from downtown to Fremont/Wallingford that I would never consider using because it is too dangerous to ride as a single female. I would never bus from Cap Hill to Ballard because it would take over an hour to get there. It's not practical as an option.	11/17/2014 12:23 PM
838	I often end up driving because I either have to walk a long way to get to a bus stop or transfer - and the bus arrival times are erratic enough that I have to leave much earlier than I otherwise would have because I have to allow time for missing the transfer.	11/17/2014 12:23 PM
839	If I need to work on a weekend, I have to drive in as Community Transit does not do commuter routes on weekends. I have not tried Metro on a weekend - would have to drive further to find a route.	11/17/2014 12:23 PM
840	I get car sick easily- it always seems to happen if I have to stand on a bus that's crowded and has the heat turned up. It's a HORRIBLE feeling when you're stuck in traffic with no stop for another 15-20 minutes. I now will never get on a bus if I can't sit down, which means I often have to wait for one or more buses to go by to get on.	11/17/2014 12:23 PM
841	It's also really difficult to deal with the fact that none of the transit stations have restrooms. I know that the city of Seattle doesn't see this as a problem in terms of fair public services but for many people, this type of travel is difficult if they have children or health problems.	11/17/2014 12:23 PM
842	a short bus is used during prime commuting hours. Such as 5pm-5:20pm Bus drivers are not pro-active about asking riders to move to the back of the bus so service takes a really long time while people scrunch into the front of the bus and stare at those in the middle that are not moving to the back. The UPass is expensive. Why is it so expensive compared to the low, low price that King County employees pay???	11/17/2014 12:22 PM
843	Stop downtown Pine & 3rd feels very unsafe. Sometimes bus smells so bad (#3) I've had to get off the bus (someone defecated on the bus??) The stops at Northgate are too far apart (#41, going North) from the Library all the way to 112th St.--it's very difficult to change buses, and to get to the N. side of Northgate without a very long walk. Also the stop on the #41 on Lake City Way is really too far from the corner to be able to change to #30 very easily. I would put some benches or covered areas there too. I'd put an overpass over Lake City Way--it's so dangerous to try and cross there (127th St.?) or even at 125th St. I hate that the #41 doesn't go all the way to Lake City during Rush Hour, it's very frustrating. Thanks.	11/17/2014 12:22 PM
844	There is really a fourth and that is that service is fairly good if you work a very consistant schedule. I don't and when I've had to rely on the bus after rush hour, I've had to wait up to 20 minutes after I was finally finished working for the day and then I have been dumped out mid-way from my destination, told that the bus was called back to the transit center, having to wait another 15 minutes for another one. If I've work a long day already, I don't want to add this extra time on to my day. Also, the buses on route 48 are filthy, smelly, moldy. I have been late to work too many times to count because the electric buses on route 48 get stuck or broken, sometimes in very inconvenient places, and other electric buses cannot get around them or we have to wait for another one, etc ... The electric buses on route 48 are also miserably jolting and this is especially unpleasant during the afternoon commute, when most of the buses are standing room only. In short, I gave up the bus commute to work. I will try rapid transit when it starts to see if it is any better. I have lived in Washington, DC and Paris, France, and I know what good public transportation is. This ain't it.	11/17/2014 12:22 PM

845	The first 197 to the UDistrict is full by the time it reaches our stop If you would take a look at the number of seats on the bus and the number of people that get on, you can easily tell but no one seems to get it. Also, the bus is always late when we have a specific driver on the route.	11/17/2014 12:22 PM
846	don't know why	11/17/2014 12:22 PM
847	Other: no smoking zones at stops aren't enforced.	11/17/2014 12:21 PM
848	Working in service night life industry it is impossible to get any form of public transportation after 2am. Light rail drops people off on Beacon Hill in the middle of the night.	11/17/2014 12:21 PM
849	Clean: metro very grubby CT is good	11/17/2014 12:21 PM
850	Almost no service in west Ballard (Sunset Hill).	11/17/2014 12:20 PM
851	Transferring adds considerable time to trips, U District evening routes extremely crowded on 31 and 32 between 5 & 6:30. Mornings may be too, but I go to work at 7am.	11/17/2014 12:20 PM
852	because there is nothing close and convenient to home, I must drive to either a light rail station or to the south renton park and ride. Unfortunately parking at these locations fills quickly. S. Renton is generally full by 6:30 am for weekday commutes, and light rail parking is usually not available during any special events (sounders games, etc.)	11/17/2014 12:20 PM
853	If the Sounder is a few minutes late, I miss my first bus and then that makes me miss my second bus.	11/17/2014 12:20 PM
854	The biggest problem is passengers that refuse to share the seat. It's a HUGE problem!	11/17/2014 12:20 PM
855	I think I told you above, but buses should have complete priority over cars. I'm for a "lane of shame" that you have to be in if you're driving alone. It should take two hours to get to the 520 bridge if you're alone in a car, and five minutes if you're not.	11/17/2014 12:19 PM
856	As I mentioned in another comment, it's incredibly frustrating that the same travel route can take 30 minutes...or an hour and a half. Some variability is expected, but that level of variability is too much for casual travel (the example being a trip from Capitol Hill to Phinney Ridge.)	11/17/2014 12:19 PM
857	I currently commute from two different locations during the week: Lake City and the Newcastle area in South Bellevue. I have investigated the resources available, but the current schedules don't work with my work schedule, plus with the scheduled elimination of the one on the eastside, it would require changing buses 2-3 times each way.	11/17/2014 12:19 PM
858	I am now commuting with my infant, which makes commuting by bus less comfortable. It is difficult to walk to/from the distance from the bus stops to my destinations, especially in bad weather. I could travel faster and more comfortably if I take my car.	11/17/2014 12:19 PM
859	Especially once school started, I was no longer guaranteed to get on the first bus that comes to my regular stop.	11/17/2014 12:19 PM
860	Park and rides are often too full, so it's easier to bypass them and drive. If more park and rides were expanded for more parking spaces, I know many people who would be more inclined to use them.	11/17/2014 12:19 PM
861	The 3 most pressing transit issues are: Service frequency needs to be increased. Service frequency needs to be increased. Service frequency needs to be increased. Waiting for 20 minutes in the rain even once can discourage a transit user from ever using it again. This leads to more traffic congestion, more cars on the road, more pollution, more release of carbon into the air. What is the hidden cost of increased automotive use? That cost should be considered when Seattle government makes its decisions where to allocate funding for transit. If that hidden cost were considered, it would likely save Seattle money to run all light rail and bus lines every 10-15 minutes.	11/17/2014 12:18 PM
862	The biggest obstacle is that the Park & Ride is full every morning for most Park & Rides in Bellevue. The second biggest obstacle is that the bus I take leaves every 30-40 minutes. Therefore, the time frame to use the bus to get to work is much more inflexible than using a car.	11/17/2014 12:18 PM
863	I believe more delays are caused not by Seattle's traffic, but by insufficient room on the buses at 5pm rush hour. People have to try to "move back" and "squeeze in" and wait a lot longer at each stop for individuals to clamor over other people to make their way to the door of a very full bus - this causes too much delay overall.	11/17/2014 12:18 PM
864	I still use public transportation (I don't have a car), but the issues above make it less convenient than it could be.	11/17/2014 12:18 PM
865	traveling from the Eastside to Harborview by Metro bus typically takes a minimum of 1.5 hours because of unreliable and infrequent schedules, transferring, and missing routes.	11/17/2014 12:18 PM

866	Additionally, the stops are not close to my home and work, and require quite a bit of walking, on top of needing to transfer to get from Ballard/Fremont to the U-District/University of Washington. The schedules are highly unreliable due to traffic and infrequent service, and the buses being overcrowded. When the buses are too crowded and the driver will not let anyone else on, it does not matter that the schedule is reliable, because it means another missed bus because too many people need a ride without more service.	11/17/2014 12:18 PM
867	I am hoping the 271 and 556 are not canceled when the train comes to UW. The 550 takes a long time to get from downtown Seattle to downtown Bellevue with many stops. Google in Fremont to Downtown Bellevue in the evening is a significant challenge if I just miss the transfer to the 550 bus and have to wait 30 minutes for the next 550. I ride this only a few times a year so I wouldn't make it a priority for improvement. The old 358 bus and it's rapid ride replacement are well known (recently talked to a rider) as a bus I would never ride due to questionable people. I considered moving to Northgate but am concerned about evening safety at the transit center.	11/17/2014 12:18 PM
868	My primary Metro route #39 was discontinued to get to route 48 and now I would have to use route #50 and 7 just to get to route 48. Three buses to go about 10 miles is stupid.	11/17/2014 12:18 PM
869	Busses are quite smelly.	11/17/2014 12:18 PM
870	The bus is always crowded during peak hours. It would be great if you utilize the longer bus so accomodate more passengers during the hours of 7am-9am and 4pm-6pm. I noticed the shorter bus are being utilized around those times and the longer bus in non-peak hours which does not make sense.	11/17/2014 12:17 PM
871	Even with apps like One bus away, service can be erratic. I've had countless times where the app will say a bus has arrived, and it never does. This makes planning extremely difficult. And since I often have to transfer, the buses aren't coordinated well to prevent long delays...the timing is way off. I also think there are too many stops on some routes. There is no reason there should be that many stops on 65th north of the univ district.	11/17/2014 12:17 PM
872	if I leave early around noon-1:30 the timing works for me to meet up at the ST park n ride on the freeway in south Everett anything later takes me 2 hrs to get home	11/17/2014 12:17 PM
873	I do use public transportation; the two checks above are what I deal with.	11/17/2014 12:17 PM
874	I only take the bus to work because it is convenient, but not going for my errands. Wish I could take the train to work but that would be a far drive from where I live.	11/17/2014 12:16 PM
875	Nothing prevents me from using public transportation. My service is excellent.	11/17/2014 12:16 PM
876	I live in Ballard and commute to U District. There used to be a route (#46) that was great, it bypassed 45th street and Wallingford which was quicker than the 44. I wish the 46 or something similar to it would come back. Also, I've noticed the use of shorter buses on the 44 route, especially during peak rush hour times and it would be great to limit or not have those smaller buses on a very crowded route.	11/17/2014 12:16 PM
877	The route for the SoundTransit 556 is not reliable in the evening. I work 7-4-5 days a week. The bus ride in the morning from Issaquah Transit Center is 35 minutes give or take a couple of minutes. The bus ride in the morning from U-District is always 50-55 minutes to the Issaquah Transit Center.	11/17/2014 12:16 PM
878	The 16 southbound is severely crowded in the mornings and evenings. The 44 east and west is irregular- unlike the 16, the 44 can't be easily tracked with 1busaway.	11/17/2014 12:16 PM
879	Light rail parking lots nr Seatac are overcrowded...impossible to find parking spot.	11/17/2014 12:16 PM
880	-I don't know why the schedules aren't reliable but One Bus Away has been a huge help. -Having to transfer is a pain, and I often miss my transfer because the first bus is late. -There are too many people and not enough buses.	11/17/2014 12:15 PM
881	I take a 532 bus from Everett and then transfer in Lynnwood. Last Thursday the 532 broke down. When I made it to Lynnwood, I missed the connection. I was 40 minutes late to work.	11/17/2014 12:15 PM
882	As mentioned earlier, my route doesn't run during the daytime once peak hours are over. It also runs only every 30 minutes while buses such as the 48 and 542 appear to run every 15 minutes or less during peak times. I watch many of the buses go by waiting for my 556 in the afternoon and by the time we reach UW Medical Center, people are standing. I don't understand why there cannot be a few more buses added during the afternoon commute. Also, my bus ride is a long one. My Sound Transit route used to offer wi-fi which I really enjoyed as I could use my Kindle to watch a TV show, read my e-mail, etc. Now the wi-fi is gone for some reason. I thought it was a great incentive to ride. I also find that there are not enough handicapped parking spaces at the transit center. On the first level I believe there are two spots marked handicapped. Many days both of these spots were taken as were all spots close to the exit to the bus even though I arrive at 5 in the morning. Couldn't there be fewer park and wait spots (which are never filled up) and more handicapped parking?	11/17/2014 12:14 PM

883	There is a significant increase in ridership once UW is in session, to the point where I need to take 1 or 2 buses earlier in order to still get to work on time (in the mornings, 7-8am). Beginning of UW quarters usually results in about 10-15 people being left behind at University station, and no passengers let on at Westlake or Convention Place (this is on the 71, 72, 73X).	11/17/2014 12:14 PM
884	The stops seem to be too close together causing the buses to stop too frequently. The buses which come from downtown are often late. Service not offered early enough to make many morning flights out of SeaTac.	11/17/2014 12:14 PM
885	I start work at 0630 on the Eastside. 520 corridor buses favor the Seattle bound in the morning. All my co-workers drive because of this. They would do the bus if it came earlier	11/17/2014 12:14 PM
886	The traffic police do not monitor traffic lights (particularly around REI) prior to entering the bus tunnel. The bus sometimes needs to wait through 5 or more green lights to move forward.	11/17/2014 12:14 PM
887	Evening and weekend bus service was recently cut near my home (NE 195th St and 35th Ave NE in Lake Forest Park). This makes it very difficult for my au pair to travel around Seattle in the evenings and on weekends.	11/17/2014 12:13 PM
888	I take the bus every week day.	11/17/2014 12:13 PM
889	Mostly I use Metro without incident, but the buses are reliably late, certain locations take forever to get to, and cutting some route times (like with the 60) is inconvenient.	11/17/2014 12:13 PM
890	Park and Ride (at Greenlake) is full even when I arrive by 7:20 or 7:30. 44 and 48 too crowded when departing U District.	11/17/2014 12:13 PM
891	They're too crowded and people are always falling into one another on the 167.....	11/17/2014 12:13 PM
892	And temperature control is poor - I freeze in the colder months	11/17/2014 12:13 PM
893	If the bus is reliable, safe, and gets me to an easy walk of my destination I'm happy to take it. When I drive I have to factor in parking. Depending on where I'm going and what time of day that can make a big difference.	11/17/2014 12:12 PM
894	With busses running only every thirty minutes plus having to transfer, it makes it very difficult to pan to pick up kids at school, etc or go anywhere without using up half the day	11/17/2014 12:12 PM
895	I generally ride during peak times and almost always have to stand on the bus in both directions. It's annoying, crowded and uncomfortable.	11/17/2014 12:12 PM
896	High ridership routes due to density in South Lake Union.	11/17/2014 12:12 PM
897	1. No accessible bus stop East-bound near 202 and 106th Ave NE (no cross walk) 2. Missing pedestrian walk from 109th towards 106th (City of Redmond is aware of this issue)	11/17/2014 12:12 PM
898	The decreased service during holiday or summer time makes ut really hard for me to get to work.	11/17/2014 12:12 PM
899	I can drive across the bridge to work in 15 minutes so the bus's 35 minutes can be a problem at times.	11/17/2014 12:12 PM
900	--	11/17/2014 12:11 PM
901	See #5	11/17/2014 12:10 PM
902	44 is too slow and too crowded rapid ride D is too slow	11/17/2014 12:10 PM
903	n/a. I use it daily.	11/17/2014 12:10 PM
904	I generally have tight time constraints, and meeting them with the public transit options can be tough (based on stop locations, need for transfer or just how long it takes).	11/17/2014 12:09 PM
905	The amount of time it takes for me to get from one place to another (for example, Greenlake to the Eastside) is not worth the effort for me to use public transportation.	11/17/2014 12:09 PM
906	To get to SeaTac, have to take 71 downtown, then transfer to light rail. This will change in 2016 with the new station at UW	11/17/2014 12:09 PM
907	It works quite well!	11/17/2014 12:08 PM
908	Transfers are a headache because the buses do not always run on time and as a result I have missed multiple buses.	11/17/2014 12:08 PM
909	Rush hour. Also Park & Rides fill up quickly - note not all users are Metro riders (Construction workers use lots)	11/17/2014 12:07 PM

910	It would be nice if I had an express bus I could take from the king st station to SLU or if the link went that far maybe. My biggest issue is that I have to leave work early to make it to king st in time for the sounder train	11/17/2014 12:07 PM
911	closest stop from home to work was moved to a corner on Sandpoint that is busy	11/17/2014 12:05 PM
912	If I miss a bus due to it coming every 30 min.; I'm not going to wait 30 min. in the cold when I can easily take my car.	11/17/2014 12:02 PM
913	Express service on my north Seattle route ends too early in the morning and too early in the evening	11/17/2014 11:34 AM
914	I can get to and from work fine enough but doing anything in the evenings is extremely difficult-to-impossible thanks to no or infrequent evening hours or extensive transfers.	11/17/2014 11:32 AM
915	The afternoon buses, I take the 556 at 4PM from 15th and Pacific, has been increasingly erratic, and late by as much as half an hour.	11/17/2014 11:26 AM
916	I most often take 77, 312, or 41, which are great in terms of frequency & efficiency, but are still all quite crowded during regular commuting hours. Having an additional late run for the 77 in the morning and the evening would allow me to take the 77 more often vs. having to take similarly crowded "express" through the U District during these times to get downtown & return to 80th and 15th Ave. NE.	11/17/2014 11:22 AM
917	The busses are packed on my commute and its not rare that I have to watch the bus just roll by because there is no room. Its not reliable for me as I can't wait to grab the next one or sit around for the bus to get through traffic.	11/17/2014 11:03 AM
918	I need to arrive to work on time and though the 44 bus usually leaves Ballard on time, it can get stuck in traffic in Wallingford and end up late arriving in the U District. The bus is usually crowded and in the summer has no a/c so I avoided taking it during the warmer months. In the time it takes me to walk to the bus stop in Ballard and ride the bus to UW, I can drive my car and park it in Wallingford and walk to work without worrying about being late/stuck on the bus in traffic.	11/17/2014 9:01 AM
919	I would LOVE to ride the train to work but I start at 7AM and the first train going south arrives at King Street Station at 6:45 and there simply is no way to get to Swedish First Hill in 15 minutes. I've asked Sound Transit to move their train up by 5 minutes to remedy this and they will not consider it. If you're going north there are multiple options that would allow you to arrive by 7AM at First Hill. When the trolley finally starts up it would be wonderful if it were timed so the 7AM people coming from the north and arriving at King Street Station at 6:45 could make it to work in time to First Hill. Also when they leave First Hill at 3:30 it would be great to get to the first train going north at 4:05PM from King Street Station	11/17/2014 8:33 AM
920	Why what? You need to clarify this question. Buses take too long because stops are too frequent and they lack busways and traffic light pre-emption. Need to add a bus to Rt. 43 at around 6:20 am at Summit and Olive Way.	11/16/2014 9:16 PM
921	weekend explained above.	11/16/2014 8:59 PM
922	There is a transit option for my daily commute, but it is very long and doesn't run often enough for my schedule, so I opt to drive alone to and from my work/school day. I save time and money that way. Though I'd rather bus/train there, if the option were more feasible for my situation.	11/16/2014 7:08 PM
923	i live on roosevelt way- i would love to be able to take a bus from my street (n.e 88th) to downtown seattle. THE BUSES that go downtown (66,73,and the commuter bus #77 does not run during the day/ evening or weekends. WITH budget cuts inthe past years, the bus stops are further apart, and the routes are more infrequent. especially on weekends. I use my car exclusively on weekends because the bus service is not convenient	11/16/2014 7:06 PM
924	I carpool and it only takes 20 minutes	11/16/2014 4:13 PM
925	The lack of bus service between midnight and 6 am forces my co-workers and I to either live within walking distance of work, or to drive. The system caters to 9-5 latte shift workers.	11/16/2014 2:52 PM
926	Why what? Why does it take too long? Because I have to transfer multiple times. Why do I have to transfer? Because there aren't enough routes and connections don't match up. Ans why isn't service frequent enough? Hmm, might that be because of route reducing and cancelling? Its not rocket science here people.	11/16/2014 11:12 AM
927	The Link light rail needs to run until at least 2:30 or 3 am on Friday & Saturday nights.	11/16/2014 10:34 AM
928	I used to be able to take 1 bus from my house to Seattle Rep Theater and McCaw Hall and back but now I can't	11/15/2014 11:02 PM
929	buses don't run late, and when they do, it's infrequent. i like to go out at night.	11/15/2014 5:37 PM
930	I use public transit whenever possible, but late a night (after midnight) it is difficult to find direct access from Belltown or Downtown to Capital Hill.	11/15/2014 11:46 AM

931	Not knowing when a bus is actually coming is very frustrating -- this is particularly true of the tunnel buses because 2) there is no cell service to see onebusaway 2) the buses can't properly transmit their locations while they are in the tunnel.	11/15/2014 11:08 AM
932	Buses are cut in half in summer.	11/15/2014 10:24 AM
933	Commuting home from downtown I regularly see huge delays in the bus tunnel for the 76 and the 316; they are simply not reliable. Every week I seem to have a frustrating episode. Commuting south to downtown in the morning, the 76 is usually at standing capacity and pretty often ends up skipping the last stop due to overcrowding. When my work days are longer, outside of normal peak times, it is easy to take the 71/72/73 home but they are way over capacity. Also taking those buses after 7pm means roughly a 50 minute trip which is ridiculous for the 6 mile distance.	11/15/2014 8:48 AM
934	Sometimes I don't have the time to go from work and get the bus so I'll drive.	11/15/2014 8:33 AM
935	Some locations are impossible to bus to (example U-Village)	11/14/2014 11:46 PM
936	It can be hard to access the bus in the morning if the park and ride is full. There definitely aren't enough parking spots.	11/14/2014 11:08 PM
937	I use the bus for my commute but not for errands on the weekend or errands after I get home from work.	11/14/2014 8:49 PM
938	Most significant is that it takes too long to get to destination. Often, if you combine walking time plus travel time on a bus (particularly if there's a transfer involved), a trip that might take 15 min by car is often an hour travel time. It's not doable on many days.	11/14/2014 5:11 PM
939	over crowding frequently make my bus late and evening downtown traffic makes bus service unreliable	11/14/2014 5:04 PM
940	71/76 lines can get unreasonably crowded in mornings, to the point that passengers may be left behind or safety within bus becomes an issue. Having some people stand is understandable, but these lines can go a bit overboard.	11/14/2014 11:25 AM
941	I could easily check all of those, not just the 3 I selected. Schedules are unreliable enough that I have to add generous buffer time to my travel, to allow for things like buses that just never show up or are so late they pull up along with the next scheduled bus - not such a bad thing on an every-10-minutes route, but on a 30-minute frequency or longer route, it's pretty awful. Even trying to use the trip planner is a pain, if I select "least walking" as an option from my home address, it directs me to a bus stop that's closer - except for being up flights of street stairs.	11/14/2014 11:15 AM
942	Route 47 was cut and there are no park and rides close to my home	11/14/2014 11:02 AM
943	The "two-seat ride" model is catastrophic, especially combined with poor reliability and low frequency. It makes it extremely difficult to arrive anywhere *on time* without building in significant buffer times to make up for Metro's shortcomings.	11/14/2014 10:57 AM
944	Returning home late from the U District or Capitol Hill is inconvenient and, at times, unsafe. I have to re-plan my entire evening around catching both busses home, and often resort to either walking home from the U District (also not always safe) or simply driving to Capitol Hill to give more flexibility on when we can return home.	11/14/2014 10:55 AM
945	If I have to pickup my daughter at daycare, I can't rely on the bus to be ontime, or once I'm on it get me home within a minimum period of time. Commuter bus options end after 8:30am, and frequently don't show up.	11/14/2014 10:49 AM
946	During peak hours the buses serving Pike/Pine are overfull, often skipping stops due to overcrowding. This is terribly annoying and turns people off of using the Metro services. On weekends, this corridor is also underserved, but less so. This is such a heavy urban concentration... why is Pike/Pine neglected this way?	11/14/2014 10:44 AM
947	Weekend service was eliminated on the 27 and is scheduled to be eliminated on 14 (near 30th Ave.S.) Schedules were changed so that bus I take for work does not always arrive before bus I transfer to.	11/14/2014 9:43 AM
948	With so many people headed to the U-District the 70's busses are crowded. I can only take the 72 to get home, so I either need to aggressively get on the 72 or take another 70's bus and transfer to the 72 down the line.	11/14/2014 9:29 AM
949	Montlake is a nightmare for pedestrians hoping to transfer. It's the busiest transfer point outside downtown yet there is no way to get anywhere on foot without crossing 4-8 lanes of traffic.	11/14/2014 9:10 AM
950	I can sometimes drive to work twice as fast as the bus takes because I can take back routes and the bus gets stuck in traffic. We need more dedicated lanes.	11/14/2014 7:50 AM
951	Trip planner algorithms are shirt and nor at all helpful in finding smart routes for places I've never been before. It used to be better	11/14/2014 7:36 AM

952	As I said above - Time is the limiting factor with all of my transit trips - If I travel at off peak times, it is more timely and convenient for me to drive my personal vehicle as opposed to wait for an infrequent bus. The fact that it would take me 3 hours to bus from my parents' in Kent to the U-District on a Sunday is absurd. I am lucky that I have a car and have that option - but taking public transportation with off peak frequency is not worth my time.	11/14/2014 12:32 AM
953	One of my jobs is in White Center and I work in Ballard. The bus would take an hour and a half. There are numerous places in the city I just can't reliably take the bus to. Transfers are unreliable because one or the other bus is often late, and the system is set up with infrequent buses. Transferring isn't a big deal in a transit system where headways are, say, five minutes, but in Seattle transferring is a source of stress because it may lead to a 20-30 minute wait in the middle of a trip. If I picked a fourth thing, it would be crowding. It's uncomfortable and unsafe.	11/13/2014 11:50 PM
954	To get to places I usually go, I would have to transfer.	11/13/2014 11:03 PM
955	Transfers often incur a delay of >30 minutes to the journey. bus service has often stopped by the time I need to catch it to get home if I am going away for a while I have to drive and use commercial parking.	11/13/2014 10:57 PM
956	it's also difficult to figure out a route.	11/13/2014 7:28 PM
957	It's hard to get from neighborhood to neighborhood unless you're coming from downtown or a transportation hub like the u-district.	11/13/2014 5:58 PM
958	- There is nothing worse than showing up for your bus and realizing it is late by 5, 10, 15 even 20 minutes. Especially in the winter/when it is dark. - This is also why I try to avoid transfers as much as possible. Sometimes you don't know if you're going to catch the next bus, especially if it runs infrequently. - Crowded buses are the worst. It's just a fact.	11/13/2014 4:23 PM
959	Return trip is the worst mainly because of UW students who disembark on the first or second stop at U-district coming from Downtown, then the buses are less busy. The link light rail will most likely fix this issue of having too many rider on my routes and not enough buses going to U-District which I have to pass on the way home.	11/13/2014 3:36 PM
960	Link station is too far away for my parents as they have difficulty walking with luggage	11/13/2014 3:24 PM
961	There's limited service on Sundays, so when I go to church, I arrive 1 hour before it starts. When I go from Lynnwood to Bellevue, the bus stops before 6pm (too early).	11/13/2014 3:07 PM
962	I find that I have to have lots of time to get to and from my destination if I want to use the bus, because the bus is invariably late, and occasionally doesn't show up at all, so I have to be willing to not be on time to get to my destination, or plan to take a lot longer to get there than if I took my car. Generally taking the car can be much simpler and easier than taking the bus, provided you have parking wherever you are going. That is the one hangup I have about taking a car; parking can be impossible to find and/or expensive.	11/13/2014 2:39 PM
963	I get out of work in the evenings. The express routes out of Seattle are not available late evening. Some bus options require I transfer, which I understand the logic for why, but the transfer can add a half hour to hour to my commute motivating me to drive.	11/13/2014 2:29 PM
964	Thirty minute headway sometimes is too long. Buses to and from downtown are often overcrowded.	11/13/2014 2:24 PM
965	I currently commute to Olympia from Seattle which is a 2.5 hour bus ride.	11/13/2014 2:09 PM
966	I sometimes work in the evenings, not getting off work until 9:30 or 10pm, and as much as I would love to use transit I end up driving my car because I don't feel safe waiting at the bus stop at that hour (buses for the routes I use only run every 30 minutes that late in the evening).	11/13/2014 1:52 PM
967	The buses I can take near my home run on half hour schedules and during commute Times are often standing room only.	11/13/2014 1:41 PM
968	Instead of schedules, all busses should run on frequencies. Especially busses in a 15min or less. Watching 3-4 43s or 8s all clumped together because they are always trying to adhere to an impossible schedule is annoying. Also, delays b/c of cash payments and too frequent stops increase transit time unnecessarily.	11/13/2014 1:18 PM
969	sometimes it's quicker to walk than ride the 8	11/13/2014 1:16 PM
970	Most buses from my neighborhood require transfers in the U district near 45th and the Ave. I don't feel safe hanging around there for 15 or 20 minutes in the middle of the day, and won't even consider it after dark.	11/13/2014 1:13 PM

971	I find, for example, that I can easily walk from my workplace on First Hill to SLU in about 30 minutes. I can make it to FHCRC in 45 minutes on foot. If I can walk someplce faster on foot, why should I take a bus? OK, when it is raining, I do tend to take th bus regardless) For some routes, service if not frequent enough, but the routes I use most currently are pretty good. Metro is pretty good about running longer buses if one complains, but in particular, evening rush hour will have buses crowded with people and their shopping. Mornign and it is people and their backpacks. At times it seems like most people require the space of two when the bags and backpacks are taken into consideration.	11/13/2014 1:08 PM
972	If I have to wait 30 minutes for a bus to leave, and risk that the 49 will be delayed by 10 minutes, I might as well just get an Uber.	11/13/2014 12:56 PM
973	I still bus commute despite these obstacles because the 520 toll is too expensive to pay twice every day.	11/13/2014 12:39 PM
974	from swedish to eastside after work hours like 7:35 to 7:45 pm when all the nurses get off work.	11/13/2014 12:33 PM
975	I work weekends at Swedish, I would like to see more frequency on weekends.	11/13/2014 12:29 PM
976	I live in Lake City. This means most of my trips, except those directly to the District, involve a transfer and two buses or light rail and a bus. I would like to see more regular evening and Sunday service. It is easy to get to events Downtown or on Capitol Hill but much more difficult to get home because service frequency drops to every half hour after 8 oclock. I can't really attend a late movie on Capitol Hill during the annual film festival because when I get out it can take me up to 2 hours to get home. If we go to the Mariners game we have to leave by 10PM to insure we can get a bus home at a reasonable time. We can't really take the bus to church, because the 65 runs only every half hour on Sunday and it is the only bus that runs north and south on 35th ave NE.	11/13/2014 11:16 AM
977	Why? Because you are inept and have mismanaged Metro for years. You lie and deceive telling voters a few years back that if we voted for a tax increase it would save our service. The tax passed and you still eliminated my express route. I live in the Northend and service is terrible -- and you're going to eliminate the 72. Meanwhile the communities west of I-5 get the newer buses and service. You have NO credibility --	11/13/2014 11:08 AM
978	I use alternate transportation during week days - and ok in the morning, but it is a LONG trip home at night - bad traffic is the worst. On weekends I will use transit most of the time - but it takes twice as long to go some places.	11/13/2014 10:42 AM
979	I'm very busy, and often can't get everything done if I were to only use buses.	11/13/2014 10:24 AM
980	Busses to the U District from Downtown give me panic attacks they are so crowded. We need more service.	11/13/2014 10:12 AM
981	I am a regular bus commuter - I don't own a vehicle - but have had to revise my routes because weekend service has been suspended. It now takes a lot longer to get out and home during weekends or non-peak times.	11/13/2014 9:46 AM
982	Primarily, the express bus routes don't run early / late / frequently enough.	11/13/2014 9:35 AM
983	The combination of a transfer and an unreliable route (*cough* the 8 *cough*) is so frustrating.	11/13/2014 9:02 AM
984	I'm feeling the strain of recent bus cuts - it takes longer, requires more transfers between routes and is generally more frustratingly crowded than it used to be.	11/13/2014 8:34 AM
985	sometimes it takes an hour to go 4 miles, when I am on my motorcycle I can do the same trip in 10 minutes.	11/13/2014 8:34 AM
986	The 316 has needed more buses in rotation for years. Always packed.	11/13/2014 8:33 AM
987	I work nights.	11/13/2014 8:25 AM
988	Buses are too crowded and infrequent during rush hour, need more of them Buses should be available at night after the bars close to prevent drunk driving	11/13/2014 8:21 AM
989	Why? Because Metro has too many routes and not enough service on any of them. Because buses sharing a tunnel with trains is a terrible idea. I want to also select overcrowding as a major problem but that exceeds my limit of three responses. Overcrowding IS an obstacle to those with mobility and disability concerns.	11/13/2014 7:41 AM
990	Sometimes I'll see three buses coming the other direction that I'm headed in; then I know I'll be waiting a long time for the 49, 70, etc.	11/13/2014 5:51 AM
991	Frequency, extended hours, convenient routes that minimize transit times	11/13/2014 2:07 AM
992	The westbound 545 is frequently overcrowded during rush hour, especially so when there's a bit of rain and the buses are frequently delayed.	11/12/2014 10:17 PM
993	I don't have any difficulties. Service is great where I live (on 15th near Ravenna park): it's frequent and there are lots of buses to choose from with the 48 on 15th and the 70s on University Way. However, when I've taken the 70s downtown during rush hour they were crowded.	11/12/2014 10:11 PM

994	My rush hour commute Ballard (15th&Market) and Downtown (3rd & Seneca) via D-line or 15x seems to work fine but much of the time the bus is slowed by traffic and my driver occasionally turns passengers away because there is no room left on the bus.	11/12/2014 10:05 PM
995	The 71 goes past both Roosevelt High School and the University District, which means that it fills to the brim with students every day. I have seen buses so full that there was literally no place to stand, let alone sit.	11/12/2014 10:02 PM
996	Limited drivers, limited/changed routes and times due to voters resulting in changes both for Metro as well as riders. (Transfers, due to other traffic though) OVERpopulation OVERcrowds EVERYTHING, limits money due to too many necessities needed to supply the OVERpopulation, its circular, everything comes round.	11/12/2014 9:35 PM
997	I love the concept of riding public transit, but sometimes, particularly on the weekends, the frequency of bus is such that it makes it really not convenient to do something at a particular time. I tend to schedule my life around transit.	11/12/2014 9:18 PM
998	Infrequent, unreliable service makes it hard to trust metro to get me to work on time or get me home. I took 2 young children to a beach in Madison park on the #11 bus several times this summer, only to find we couldn't get back for 30 min to an hour because of infrequent service or because onebusaway app mistakenly said a bus would arrive that never did.	11/12/2014 9:15 PM
999	Having to wait 20-30 minutes for a bus, especially in inclement weather or at night is not acceptable. Plus there are not enough connecting buses to make going to yoga in the morning in Fremont, then to work downtown, and then back home to Ravenna Spring AFTER rush hour convenient. I would love to have public transport from the stadium district or Seattle Center or Benaroya to where I live late at night so I could CONVENIENTLY take it to and from athletic events and concerts, but that's not available now.	11/12/2014 8:52 PM
1000	Peak hour trains always crowded Bus stop on Pike and 3rd feel unsafe, lots of homeless and sketchy people around the area	11/12/2014 7:55 PM
1001	The buses are often caught in traffic, making them slow and unreliable. Additionally, >10 minute walks to a bus is too far.	11/12/2014 5:58 PM
1002	I work a swing shift and only a car ferry ride from Southworth or driving through Tacoma is feasible for returning home after midnight.	11/12/2014 5:29 PM
1003	The buses are never on time, and the posted bus schedules at stops do not match the schedules online. The end result is showing confusion and frustration about when the bus will get to its stop.	11/12/2014 5:16 PM
1004	why aren't they safe? BECAUSE THE SPD isn't patrolling? people are desperate? Ridiculous question.	11/12/2014 4:38 PM
1005	My biggest reason for not taking transit to Airport is service not early enough in the morning for a flight before 7 am. For a tall guy (6'1") like myself, leg room on Link Light Rail is tight and unforgiving. With the downtown transfer, in-transit time can be long, especially during non-peak hours.	11/12/2014 4:35 PM
1006	Too much of our public transportation relies on existing road infrastructure and is therefore dependent on existing road conditions, which with higher a population in the city is getting worse. We need more public transportation with its own right-of-way, like the light rail. The existing system on our roadways will only take longer to get to destinations in the future and become more unreliable as our population grows, there seems to be no alternative to mass transit with its own right-of-way.	11/12/2014 4:35 PM
1007	The 41 Metro bus is subjected to many delays when I-5 is backed up. When working in Northgate I've waited upwards of 30-50mins for a southbound bus after multiple northbound 41s pass the opposite side of the street. I wish some of the northbound buses would be redirected to go southbound and get back on schedule at times like that.	11/12/2014 4:33 PM
1008	Tendency for late buses	11/12/2014 4:25 PM
1009	It takes a very long time to walk to the bus stop, wait for the bus, ride the bus, walk to my destination sometimes. if there's a transfer involved, it can take even longer, especially when there's traffic (more often than not), so I miss my transfer. There aren't enough buses on the road which makes every bus more crowded - it's standing room only and we're packed in like sardines every day on my bus home from work (the 44, at 5pm).	11/12/2014 4:23 PM
1010	I would use public transportation more if, like the NY subway, I could go to a station/stop and know that a train/bus would be there in 5-10 minutes, and if I had to transfer it was only once, and that train/bus would also be there in 5-10 minutes -- and if I could get around town fairly quickly.	11/12/2014 4:09 PM
1011	The light rail is very clean and fast. Buses are crowded, slower and some people who cause some anxieties sometimes.	11/12/2014 4:08 PM

1012	There is no direct route from Capitol Hill to the International District	11/12/2014 3:27 PM
1013	When I look at the ratio of time on the bus versus time in a care, and it takes 6x longer to ride the bus, I get frustrated. I certainly expect to spend longer on the bus (and walking to/from it as well), but at times it seems like the routes stop much too frequently. Examples would be most of the routes up/down Madison such as the 10. Additionally, going from Capitol Hill or the CD to the Eastside is a very short drive, but unless the 545 works for you, transit options are not attractive.	11/12/2014 3:23 PM
1014	These things are self-explanatory. Public transit should be convenient and reliable. This is rarely true on the routes I take.	11/12/2014 3:18 PM
1015	My time is scarce. I need to be able to get where I'm going within 30 minutes. I also need to know that if I take transit somewhere for an appointment, I don't have to figure in an extra half hour to an hour of travel time because the bus is so far behind schedule. That said, I'll note that I recently moved back to Seattle after moving away in 1999. It's *much* easier to travel within the city now because so many more bus routes are running every 10-15 min. as opposed to every 30 min. Waiting 10-15 min. to catch a bus is acceptable; waiting 30 min. for a bus isn't.	11/12/2014 3:12 PM
1016	As mentioned above, buses are consistently late, a few minutes is fine but over 5 and beyond 10 is incredibly frustrating. Because of this I am often late to my destination, but catching the earlier bus would make me arrive way too early, leaving me with wasted time. It's either 20-30 minutes early or 5-10 minutes late, would be great if schedules were adjusted for the constant lateness so I'm just 5-10 minutes early.	11/12/2014 3:10 PM
1017	Just what I said -- takes too long, buses aren't frequent enough, I have to transfer and wait for another bus.	11/12/2014 2:56 PM
1018	Reliability of Route 12 can be tough due to automobile traffic. In particular, Marion St. eastbound to First Hill in the afternoon would be a great candidate for bus priority and/or removing parking between 2nd and 6th avenue. And autos trying to get to I-5.	11/12/2014 2:55 PM
1019	The routes I take the most (Downtown/Capitol Hill) are swift and efficient. Getting to Ballard/Fremont/U-district takes much longer than I'd like. I notice the OneBusAway app is frequently incorrect and difficult to understand. It also doesn't show me which bus to take to get to my destination; only (routinely inaccurate) arrival times. I have no idea how people from out of town or without smart phones get anywhere using public transportation.	11/12/2014 2:54 PM
1020	N/A	11/12/2014 2:48 PM
1021	Too many people are on the bus because they run late or early, there would be another bus running after that one but buses take too long to get to the destination.	11/12/2014 2:34 PM
1022	While it is true that I am able to get anywhere I want to go, there are times when I really don't want to have to wait for a bus or train, especially in the cold or rain.	11/12/2014 2:09 PM
1023	Can't stay late at restaurants, bars late events past 11:00pm or so.	11/12/2014 1:26 PM
1024	I can drive myself in half the time it takes to use a bus. Buses are subject to traffic, then add the time for additional stops. Light Rail in the 522 corridor would be ideal (and also to Fremont/Ballard/Queen Anne), preferably below grade. This way it would not be subject to street traffic and could run on a reliable schedule.	11/12/2014 1:19 PM
1025	No direct routes between my main destinations. Buses are delayed by traffic.	11/12/2014 1:17 PM
1026	As I said, bus service to and from capitol hill is very unreliable, particularly in the evening. Would love to see that improved. Also, I live on northeast Cap Hill. No good bus service (absent a transfer) from P square/ID to that area.	11/12/2014 1:12 PM
1027	See answer to question #5.	11/12/2014 1:07 PM
1028	Also, lack of bus stop shelters. They just removed the new one at Broadway and John. Bizarre.	11/12/2014 12:36 PM
1029	Because Buses are slow, often not on time, and if the first bus is late, there is a strong chance I will miss the bus I am trying to transfer to.	11/12/2014 12:24 PM
1030	Buses never come on schedule. I'll see two 14 buses come back to back, after waiting for 20 minutes.	11/12/2014 12:11 PM
1031	I don't know	11/12/2014 12:05 PM
1032	Safety at night is always the top consideration for women. Transferring at night in dicey locations presents further obstacles. An hour-and-a-half or more by bus to a location accessible in a halfhour by car simply doesn't make sense.	11/12/2014 11:57 AM
1033	too many hills in this city	11/12/2014 11:49 AM

1034	Stories of gangs and violence on buses and on the link between downtown and seatac	11/12/2014 11:45 AM
1035	(What does why mean? I assume "why do the above-named things prevent you?") Bus routes are inefficient and not well designed to get people from point A to point B. Often they are stuck in traffic for long periods of time and/or stop every 2 blocks. This is not helpful. Buses are never on time. *The assumption of all riders is that the schedule is invalid.* This is not a way to run a bus service. We need more support to our drivers so that they can handle bus routes and delays effectively. Speaking of which... If drivers are spending 1/2 their time trying to get people to move back to let more people on, they will never be on time. We need more buses, more frequency. The conditions riding most buses at rush hour are inexcusable.	11/12/2014 11:38 AM
1036	There are no busses in my neighborhood (well, the 25, but it takes an hour+ to get downtown and runs extremely infrequently)	11/12/2014 11:35 AM
1037	Parking, multiple transfers, and length of trip are huge obstacles for traveling between Kent and Seattle.	11/12/2014 11:32 AM
1038	few direct options from where I live to where I work; transfer points are small and disconnected from one another	11/12/2014 11:22 AM
1039	I've been skipped over by buses that were too crowded to let me on. It is often quicker to just drive. Also it can take up to an hour to wait for a bus, ride it to the closest stop, then get off while just walking there takes 30 min.	11/12/2014 11:18 AM
1040	I don't think the buses going up to Capital Hill are clean or safe. Sometimes they are smelly. Taking the bus takes longer than carpooling. Taking the bus requires transferring and waiting out in the cold and rain. A link light rail connecting Federal Way to existing locations would be great!	11/12/2014 11:16 AM
1041	Besides the busses being uncomfortable and the route too long for a 4 mile destination, the drivers are not safe. I see numerous busses run red lights every single day and greatly exceed the speed limit frequently.	11/12/2014 11:01 AM
1042	I work an unusual schedule at UW and Harborview. My commute time isn't until 9AM and the commuter buses straight to UW no longer run or run infrequently.	11/12/2014 10:46 AM
1043	Transfers often fail when one bus is late. Too many smokers in bus shelters & bus stops.	11/12/2014 10:24 AM
1044	Its always hassle to find the right time to take the first bus in order to transition and transfer to another bus smoothly. The buses dont necessarily go hand in hand and one bus arrives earlier than the other.	11/12/2014 10:16 AM
1045	I live approximately 10.5 miles from my work location. I can take the bus, but it takes an hour to get to work (best case). In order to take the train to work (which I would love to do), I have to bus/drive south 1.5 miles to take the train north to Seattle. By the time the train passes my house, I could have been at work if I drove. Then, when I arrive at the station in Seattle, I have to take a bus. If there was another stop around Boeing Access Rd, I would take the train.	11/12/2014 10:13 AM
1046	Poor Service	11/12/2014 9:46 AM
1047	I don't know, ask your drivers.	11/12/2014 8:41 AM
1048	If I miss the 2 the 12, 11, and 10 all seem to depart at the same time so I cannot walk to catch one of them.	11/12/2014 8:32 AM
1049	I am not comfortable riding the bus late at night and I do not allow my teenage daughter alone. There are too many drunk men, panhandlers and older teens around bus stops and I never see Metro Security monitoring them. Examples: The #10 stop toward Capitol Hill at the Convention Center. This stop is dirty, dark and almost always have a large number of men harassing people. The #25 stops in front of TOPS but there are panhandles with open containers at the corner. I have called the police before when they begin hassling kids but I would never let my daughter catch the bus to downtown at that stop.	11/12/2014 8:17 AM
1050	The Rapid Ride C line is always standing room only from before the last stop in West Seattle on it's way to down town Seattle.	11/12/2014 7:55 AM
1051	As stated above, bus #50 is not timed well to connect with bus #9 at Rainier Ave S and Genesee in the early morning hours. Bus #7/#9 shelter on east side of Rainier Ave S/Genesee is not lit nor is the adjacent parking lot. Lots of loitering in the parking area/bus stop. NEEDS to have appropriate lighting in the dark mornings/shorter days during fall and winter especially. It is a heavily used route and bus stop.	11/12/2014 7:46 AM
1052	Something has to be done about the #8 bus and/or the traffic problems on Denny. Why did the city approve all of this new construction in the South Lake Union area but not do anything about the increased traffic flows. The route for #8 is well travelled and much needed in this area. I know it might not be possible, but a dedicated bus lane along Denny would be great.	11/12/2014 7:31 AM
1053	I chose many because they are true	11/12/2014 7:01 AM

1054	I find that late at night when I am at a bar with friends we have to walk home. It would be safer if we had a bus to use so people would not drive under the influence even if they are within legal limit. Sometimes I have a tight window in order to make it to an event and with the unreliability of bus schedules I have to go half and hour or more in advance to ensure i make it on time.	11/12/2014 1:11 AM
1055	Sometimes to I take the 8 home from capitol hill and then catch the E or 5 to Fremont after evening classes at Seattle central. The eight is very infrequent at night and often behind schedule, it can make getting home a bit of an ordeal, so often I end up driving.	11/12/2014 12:13 AM
1056	see answers to #5. Also, there have been so many times when a bus came EARLY and so I missed it, and then the next bus came late. So the time between buses is sometimes very long.	11/12/2014 12:12 AM
1057	I use public transport in the Redmond/Seattle area because its easily accessible. Anything beyond that is a nightmare to transport to.	11/12/2014 12:09 AM
1058	I love taking buses eastbound but the bus routes seem geared toward getting downtown only. Which is fine when i need to go downtown! Also- the time to load handicapped folks seems to drastically slow down bus times. There should be an easier way to do this. Having the driver do load/unload seems weird - and takes forever. Maybe make a better loading option, or allow other riders to be certified to load so it is faster? Or offer handicapped-only rides?	11/12/2014 12:02 AM
1059	I take buses to go to schools and I have been late for an exam because the bus never showed up or late. It also takes twice or 3 times as much time to get somewhere compared to driving. And I ALWAYS have to transfer; you can end up waiting for the transfer bus half an hour in the rain...	11/11/2014 11:59 PM
1060	Other side of Roosevelt not adequately covered.	11/11/2014 11:25 PM
1061	The #8 suffers from serious overcapacity, which exacerbates its schedule issues.	11/11/2014 10:18 PM
1062	Transfer to 41 from 347/348 is uneven with delay or missed transfers.	11/11/2014 9:38 PM
1063	No longer a bus (75/330)from magnuson Park area to Shoreline Community College or near Shoreline City Hall.	11/11/2014 9:08 PM
1064	Car traffic gets in the way. Keep up the process of transit-priority lanes. Get the freeway traffic off Denny so the 8 can get through. Re-connect the street grid north of Denny (underway, yeah!) so freeway traffic jams do not get in the way of people just trying to get around their city. Add a ped/bike connection across I-5 between Denny and Lakeview.	11/11/2014 8:03 PM
1065	I think one of the most important things is that the bus stops are safe. Ive been at bus stops late at times sometimes because I have a couple evening classes and I've been approached many times by people who have tried to sexually harass me or harass me in other ways and that's the biggest reason why I hate taking busses at night, especially in the winter when it gets dark really early. I feel that if there were lamp posts at the bus stop (some bus stops are completely in the dark with no covered area) I would feel much safer but still I feel more could be done to improve safety.	11/11/2014 7:23 PM
1066	I don't know.	11/11/2014 7:03 PM
1067	Most bus lines are based on going through downtown. My life moves between Georgetown, Capitol Hill and Ballard, so transfers and multiple waiting time sfor hte multiple trips always adds up. I	11/11/2014 6:45 PM
1068	I would prefer to not have to transfer from where I live - I have to take the bus to the light rail station. this is in part why it takes too long to get to my destinations. the other reason my destinations take so long is because the buses are slow because of traffic congestion, etc	11/11/2014 6:45 PM
1069	Buses frequently take indirect, meandering routes which tack on time. They are also unpredictable, and highly variable on commute times. Some days my commute (which should be about 30 minutes) can be 30 minutes long, and some days it takes an hour and a half. I have also noticed a recent increase in bus breakdowns on metro. This is Very unsafe - I have had to walk on the freeway during rush hour to switch buses twice in the last few months.	11/11/2014 5:24 PM
1070	The train ride is one hour long from Everett to Seattle. So, door to door, with walking or driving to the parking and ride, it takes me two hours. Driving door to door is 45 minutes. The Sounder Train is not reliable once the winter storms come and service is shut down due to landslides. There are only two buses out of Snohomish to Seattle in the morning: 5:15 am (get to work too early) or 6:30 am (arrive at work late due to traffic). When I take the train, I go down to the bus tunnel and catch a bus or light rail to Pioneer Square station, then, need to walk or wait for the trolley to go up First Hill (adding 1/2 hour time).	11/11/2014 4:24 PM
1071	Buses sit in the same traffic as my car, but then make a ton of stops.	11/11/2014 4:09 PM

1072	Not everyone has a 9-5 life. We should have a bus system that follows the patterns of life in our city.	11/11/2014 3:55 PM
1073	545 is chronically overcrowded	11/11/2014 3:41 PM
1074	The 211 was cut and there is no easy and quick transit option from the King Street Station to Swedish Cherry Hill	11/11/2014 3:27 PM
1075	Used to take the bus but did not like the full buses, transfer and waiting times. A distance of 5 miles easily took 40 minutes. That was okay if I had a seat and could work but not if the bus is full. Until the Northgate Expansion is completed it would be great if there was a bus from intersection NE65th St to the UW light rail station.	11/11/2014 3:23 PM
1076	Bus service is either too infrequent or unreliable for transfers, and there aren't enough bus lanes. Buses are just so slow.	11/11/2014 2:36 PM
1077	Usually I only drive if I know that I won't get somewhere on time using the bus. There are some parts of the system where stops are way too CLOSE together, which really slows down a trip. I take the 12 a lot, and there are way too many stops along 19th Ave. On the 8, there just aren't enough buses during peak hours. So many people stack up at the stops that it takes an eternity for people to get off and on at some stops. Also, the traffic on Denny is so bad that this bus is just painfully slow.	11/11/2014 2:01 PM
1078	I have had several incidents where I have felt very unsafe from male passengers on the bus. I understand this is not something that can really be policed. I would appreciate more bus stops that have lights and covered areas.	11/11/2014 2:00 PM
1079	Connection wait times are too long when transferring bus routes. Train/light rail stations do not have parking lots.	11/11/2014 1:37 PM
1080	I DO USE PUBLIC TRANSPORTATION TO WORK 99% OF THE TIME. COMMUNITY TRANSIT TO DOWN TOWN, THEN UP THE HILL WITH METRO.	11/11/2014 1:32 PM
1081	The 64 seems to be canceled a lot.	11/11/2014 1:28 PM
1082	Also I'll often just walk rather than pay the \$2.25 or \$2.50 for a short trip.	11/11/2014 1:24 PM
1083	Nothing prevents me from using public transportation - it's basically my only option.	11/11/2014 1:10 PM
1084	Not enough parking to take a later commute. Too crowded coming home.	11/11/2014 12:40 PM
1085	Travelling on routes 71/71X, 72/72X, 73/73X from downtown to the u-district (at nearly any time of day) is very uncomfortable. The buses are extremely overcrowded, passengers and operators are often angry/irritable as a result. These are high traffic routes, especially during peak hours. I board the bus at University Station downtown (weekdays, usually around 5:30-6:00 PM) and these routes are always standing room only, and most times passengers are instructed to "face forward" to pack as many people as possible onto the bus. It is absurd to pay \$2.50 in bus fare to have such an uncomfortable commute. To make matters worse, the buses on these high volume routes are often dirty, with trash and spills. It is deplorable.	11/11/2014 12:33 PM
1086	I mostly want to use transit later at night - or on weekends. I walk to my office Monday through Friday.	11/11/2014 12:33 PM
1087	The evening schedule is never reliable, sometimes I wonder if I'll even get home if I miss the early evening bus. I've had to take uber home a couple of times because my regular bus never came (after the first evening bus, it just doesn't show up). Or sometimes they are too crowded in the evening and the bus driver won't let you on, which makes me late getting home. Also, people should not be allowed on the bus with garbage. I ride bus 1,14, 7 and I've seen people with bags of empty cans get on frequently, spilling nasty liquid all over the bus and taking up space. It's gross.	11/11/2014 12:30 PM
1088	For the 5 bus I very frequently have to wait through multiple buses to be able to catch one that will let me on	11/11/2014 12:29 PM
1089	We live in Magnolia and bus service for the 33 is soon to be changed. We currently have a 0.3 mile walk to the bus stop. When the route change it will be closer to 0.5 - 0.6 miles away. We used to have friends that would take the 33 to Discovery Park. When this service is changed, there will no longer be access to the north end of the park. we also used to take the 24 downtown, which was fine in the morning, but horrible in the afternoons if you are commuting after 5:30 p.m. There would often be a 45 minute wait for the bus, and then three buses come at the same time. We no longer take the bus downtown for work due to this inconvenience.	11/11/2014 12:15 PM
1090	I almost never travel within the Eastside by bus because frequency is not good nights or weekends. I sometimes avoid travel to Capitol Hill/First Hill or Ballard by bus because of extremely long travel times.	11/11/2014 12:01 PM
1091	The 10 has too many stops in one area. There are nearly 5 or 6 blocks of one stop per block along 15th where there should be 3 stops. I wouldn't mind walking a bit farther if the bus were more frequent or faster to my destination.	11/11/2014 11:58 AM
1092	I am 83 and retired. Have access to a car.	11/11/2014 11:53 AM

1093	Heavy student ridership around Seattle Central college	11/11/2014 11:50 AM
1094	The service times are not reliable. I have to transfer to get to another bus...and often, I am either late, just missed it and have to wait for the next one. Or the bus arrives but it is too full for me to get on making me wait for the next one.	11/11/2014 11:45 AM
1095	Service does not start early enough in the morning, and is spaced out too much (frequency). Transportation across the city can take a long time. If we are more than one person, a car is much easier.	11/11/2014 11:39 AM
1096	Transferring, except in ideal cases, can add anywhere from 15-30 minutes to a trip	11/11/2014 11:32 AM
1097	I wish the schedule was more reliable.	11/11/2014 11:30 AM
1098	WHY are they not clean and comfortable? WHY are buses too crowded? WHY does it take too long to get to my destination? transfers and frequency of service.	11/11/2014 11:26 AM
1099	The availability and sometimes it takes too long. I can walk there faster.	11/11/2014 11:22 AM
1100	Holidays like Veteran's Day - early bus was not running	11/11/2014 11:21 AM
1101	-	11/11/2014 11:21 AM
1102	If I am going downtown to work and am working late into the night, knowing when I do go home I'm going to have to wait an hour to catch what would be the last bus to where my car is parked. I'm gonna consider other options besides the bus which include driving alone.	11/11/2014 11:17 AM
1103	Unreliable connections make me feel really stupid when a trip doesn't connect and takes an extra half hour. I have a car, so the time and money calculus is almost always in favor of driving; I just don't want to add to city traffic and don't mind reading on the bus.	11/11/2014 10:55 AM
1104	To many people who don't have fare.	11/11/2014 10:55 AM
1105	The bus is often over crowded due to lack of service available.	11/11/2014 10:29 AM
1106	More often then not, busses will not show up or do not run past a certain time. I have been stranded on occasion because busses have stopped running.	11/11/2014 10:21 AM
1107	See question 5	11/11/2014 10:16 AM
1108	NA	11/11/2014 10:11 AM
1109	I am in grad school at Seattle U and take night classes that get out at 8:40pm. To get home, I usually walk to the convention center station or the University station and take the 255 bus to Kirkland, but I still have to wait at least 15 minutes for the next scheduled bus. It doesn't seem like there are very many options for students in night school.	11/11/2014 10:00 AM
1110	None of the Above. I do commute daily	11/11/2014 9:57 AM
1111	Particularly for service into and out of Ravenna, transfers are the order of the day. I have previously had terrible luck with transfers taking far too long, so I now avoid them. I suspect Ravenna has a much smaller per capita bus ridership, which explains the comparative dearth of service, but one of the chicken-egg problems is that people won't ride a bus if there's no bus to ride. Commute hours on any of the faster buses are usually crowded to the point that the bus has to skip past stops where people are waiting to board, which is completely unacceptable. I've been on E buses where I had to stand the whole time, and we spent half an hour transiting from 3rd to Aurora going north -- traffic isn't Metro's problem to solve, but packed standing-room-only bus service makes that pretty uncomfortable.	11/11/2014 9:49 AM
1112	Particularly during peak hours, buses can be overcrowded and people can't even get on the buses or long load times result in bunching--can we experiment with different seat/door configurations on our new buses more similar to ones I've seen in Vancouver BC or San Francisco with more room for standing vs. two seats on each side. I will more likely use an expensive taxi or other service to get to and from various destinations on the weekend.	11/11/2014 9:29 AM
1113	The wrap-around adds on buses that cover-up passenger windows really discourage me from riding, since I don't want to look at the world as if I had cataracts. I'm not against ads, just against ads hat block the windows through hard-to-see-through plastic. Also, many drivers turn off the lights in the entire front half of the bus, making the buses feel dangerous.	11/11/2014 9:15 AM
1114	I think the answers speak for themselves. We need better service on the whole and we need to stop bending to rich people who don't want buses in their area.	11/11/2014 9:06 AM

1115	The 25, which is the most convenient geographically for me, is usually 20+ minutes behind schedule in the evenings. Which sometimes helps since the last bus in the evening leaves downtown at 6PM. It also just runs once an hour, though it is usually standing room only in the mornings.	11/11/2014 8:48 AM
1116	Transfers are fine, but only if timed well. E-W connections are terrible. And infrequent routes with a need to transfer makes a trip take too long.	11/11/2014 8:43 AM
1117	or i'm dragging a bunch of stuff so have to drive.	11/11/2014 8:29 AM
1118	- Outbound buses that use Pike/Pine from Downtown to Capitol Hill often get stuck in congestion caused by Boren/Pike intersection. The worse WB Boren is the worse buses get backed up. - The 255 is very unreliable. This makes it hard to use the service. - Inbound PM buses that use the I-5 SB off-ramp can take over 10 minutes to get to the DSTT from the I-5 SB offramp at Stewart. - I'd like to see better bus connections with Link even if this means less service downtown. Better connections between Westlake Station/Capitol Hill station and the First Hill and SLU neighborhoods are needed. These are dense neighborhoods and fast/frequent/reliable connections to Link are necessary.	11/11/2014 8:24 AM
1119	When I am leaving work, I am lucky that I take the bus at the University Street station heading North. Depending on the time of day and the route, we often pass up Convention Place because we are too full. I feel bad for those commuters. Meanwhile, like four different 255s have passed them.	11/11/2014 8:10 AM
1120	During the week, the crowding makes the bus very difficult to use. On weekends, I think of using the bus to go downtown or to Seattle Center but then reject it because it takes so much longer to get there. And now, there is no weekend service from near my house.	11/11/2014 7:58 AM
1121	See comments above	11/11/2014 7:58 AM
1122	Seems that the 43 from UW Med Center to Capitol Hill is hung up in Montlake traffic and late. Peak traffic at 5:00 PM buses are stuffed full of people, many standing until we reach 19th and Thomas or 15th and Thomas.	11/11/2014 7:13 AM
1123	The bus tunnel is absurd in the evening. I can stand there and watch 41 after 41 go streaming by, but my 71/76 is rarely on time, and often, 10-20 minutes late. Then by the time it gets to the convention center it's so full that they can maybe fit a couple people on. A ride downtown in the morning on the 76 is about 20 minutes. In the evening the reverse commute is usually an hour. That's ridiculous.	11/10/2014 11:25 PM
1124	if it takes longer to get there by bus, I may opt to take a car2go or uber. if I have to transfer, it adds to travel time - especially if there is more than a 5 minute wait between buses.	11/10/2014 10:30 PM
1125	There is no direct bus between Capitol Hill and the VA. When the light rail in Capitol Hill is running, Will there be frequent direct buses between the Beacon Hill light rail station and the VA?	11/10/2014 9:10 PM
1126	The area around 3rd/4th and Pike/Pine is extremely unnerving, and I am a large, young male who can take care of himself. I wish Seattle PD would patrol the area more often, if not constantly.	11/10/2014 8:24 PM
1127	I prefer to only take one bus to my destination. On occasion I will take a route where I have to transfer, but more than likely I will drive my car instead of having to transfer	11/10/2014 8:18 PM
1128	Traffic is awful in South Lake Union	11/10/2014 8:17 PM
1129	I mostly use a commuter bus, and then surface buses around the U District and Greenwood. The 48 takes an exceptionally long time because it stops too frequently in some neighborhoods. The Ghost bus situation incredibly frustrating - when Onebusaway indicates a bus just passed your stop and it never actually came is one of the worst things to experience.	11/10/2014 8:14 PM
1130	Mt Baker Light Rail Station is scary at night. Hard to get to NE Seattle/Magnuson area from Capitol Hill area.	11/10/2014 7:30 PM
1131	Currently take the 312, which was cut due to Metro cuts. Stops at 95th and 85th on Lake City Way often now get passed by because buses are too full, plus number of times bus comes has decreased so longer waits when a bus goes by full. So my current option is not so great. I do eventually get into downtown, however my trip takes longer.	11/10/2014 7:20 PM
1132	Since buses are rarely on time, knowing that a transfer involved can really be the deciding factor for whether or not it seems worth it to me to make the trip to whatever the destination is, since I know that my already lengthy two-bus ride will be even longer due to delays with both of the buses involved.	11/10/2014 7:03 PM
1133	I have an invisible disability, but look like a healthy 20-something so it's hard to stand on a crowded bus. And super awkward to ask for a seat.	11/10/2014 6:55 PM
1134	The 2 takes almost as long as walking during rush hour	11/10/2014 6:15 PM

1135	Reliability is a huge concern for me. I bike often, because I know it will take me a certain amount of time (no worries about traffic). On the other hand, I never know how long a bus will take. Dedicated bus lanes with no chokepoints would be a huge improvement. Roosevelt Way NE needs a road diet for safety reasons. That's one place where a dedicated bus lane can go (it's also on Seattle's Transit Master Plan) in the near future. That could speed up service and improve reliability quite a bit, as an alternative to going through congested parts of The Ave or 15th Ave NE.	11/10/2014 6:08 PM
1136	Some stops like 3rd & Pike/Pine are really nasty after dark. Lots of drug deals and panhandlers make waiting there unpleasant and sometimes frightening.	11/10/2014 5:44 PM
1137	Sometimes at night if we go to a play or other event downtown we drive just because it's a little creepy to take transit at night and the times between buses is longer.	11/10/2014 5:33 PM
1138	Recently the biggest issue has been buses stuck in traffic. From talking with coworkers they figure that if they're going to get stuck in traffic anyway, they may as well just do so in their own cars instead of with a bunch of other people on the bus. We really need to get the buses out of traffic with a lot more 24/7 bus-only corridors throughout the city.	11/10/2014 5:29 PM
1139	Train departs too early for medical staff that work 12 hour shifts,	11/10/2014 5:11 PM
1140	laziness	11/10/2014 5:11 PM
1141	Some routes run infrequently or are limited to rush hour times	11/10/2014 5:05 PM
1142	Traffic messes everything up. Adds to time and unreliability. Transferring also does not seem good as the schedules may not be reliable or frequent enough.	11/10/2014 4:55 PM
1143	i often use busses to get home, and it is still an issue for seemingly low-income riders who can be unruly. I've seen this on the light rail as well. there is a definite drug problem in seattle's less fortunate.	11/10/2014 4:50 PM
1144	#2 bus is not frequent enough, especially on weekends. Link Light rail needs to run to and from the airport earlier and later. It is hard to catch the 6 am - 7 am flights with Link Light rail.	11/10/2014 4:31 PM
1145	If I worked downtown it would be easier and faster to get to work. Overcrowding is an issue, regularly, on routes 71x, 72x, 73x	11/10/2014 4:30 PM
1146	For example, I live in Cap Hill and work on Northlake Way. It takes me 45 minutes to get door to door. My bicycle takes 15 minutes.	11/10/2014 4:12 PM
1147	Buses don't run early enough to catch early flights at SEA-TAC airport and enough of them don't run late enough (or consistently enough) to take after midnight.	11/10/2014 4:06 PM
1148	My commute from NE Seattle to downtown Bellevue is only 20-25 minutes by car. My preference has always been to take the bus to decrease the number of vehicles on the road, but I have my limits. I used to be able to take one bus Metro 243 from NE Seattle to downtown Bellevue, and although it took longer than driving I was okay with it. The 243 bus was eliminated in the Metro service cuts in September, and I draw the line at having to take 2 separate buses for my short commute.	11/10/2014 4:05 PM
1149	I can't risk being late to work, and sometimes, especially if I have a transfer, I'd have to leave very early to make sure I get there on time, considering buses are often either early or late.	11/10/2014 4:05 PM
1150	I take the 41 and even though I get on at the University Street Station when trying to get to Northgate, at time the bus is so crowded that I cannot get on.	11/10/2014 4:04 PM
1151	I use the bus daily but some stops are pretty sketchy... 125th & Lake City Way is really bad all times of day.	11/10/2014 3:55 PM
1152	Most frustrating aspect of transit is the added time transferring takes.	11/10/2014 3:53 PM
1153	It seems that buses and ESPECIALLY light rail has too many stops, from international station out to the airport it takes 40mins on a good day or late at night. There should be more express trains to that area. Adding the UW/CH area is just going to add more time and not fix the issues.	11/10/2014 3:47 PM
1154	Buses are often late, and then frequently get stuck in traffic with single-occupant vehicles.	11/10/2014 3:27 PM
1155	Taking the bus can take four or more times longer than driving or getting an Uber. And that's IF it shows up. Many lines are reliable. The 8 is NOT reliable.	11/10/2014 3:21 PM
1156	Using a taxi or carpooling when needing to be transported at a late hour or when visiting a neighborhood or regional city that is not easily accessible from my home via bus.	11/10/2014 3:00 PM
1157	See prior comment	11/10/2014 2:59 PM

1158	Sometimes I like to come to work before first 41 leaves Northgate P&R and other routes don't come frequently enough.	11/10/2014 2:57 PM
1159	The only time I don't take the bus/train is when it is too late at night and doesn't feel safe to anymore. Then I turn to Lyft.	11/10/2014 2:55 PM
1160	Many people use bus to shelter and are mentally unstable	11/10/2014 2:54 PM
1161	I generally dislike riding the bus because it's difficult to predict when I will get to a destination, and it generally takes about 1/2 hour longer than it could if I had only taken my bike.	11/10/2014 2:49 PM
1162	Some buses do not go directly to my destination and transferring can take more time to travel. There are no services available on weekends.	11/10/2014 2:47 PM
1163	I an nervous to take public transit after 9 pm. I have safety concerns particularly on the E line.	11/10/2014 2:40 PM
1164	The 8 bus is reliably late, enough so that a group of people at my bus stop have started carpooling in Uber down the same road as the 8 bus route. Because it is consistently late, more people end up trying to squeeze on the buses. I have occasionally been denied service or asked to get off the bus because of overcrowding.	11/10/2014 2:40 PM
1165	76 route in the evening to Wedgewood is often late	11/10/2014 2:29 PM
1166	I am from a city where there was only public transportation. buses and trains came frequently and often. In order to count Seattle a big city, public transportation needs to be improved a great deal. Frequency and at all hours.	11/10/2014 2:21 PM
1167	The drivers drive safely, but I sometimes feel unsafe due to other riders on board. And the last bus I rode smelled strongly of marijuana (I'm pretty sure someone was toking up in the way back). It's bad enough having to smell drunks and folks who haven't bathed in a long time on board, or having to inhale smoke at bus stops, but I draw the line at having to inhale someone else's secondhand smoke on board. I got off, and haven't been on a bus since. I'd rather deal with the expense of driving and parking than have to face that.	11/10/2014 2:18 PM
1168	I'm NOT happy when us regular riders get bumped off by sports fans!	11/10/2014 2:07 PM
1169	Now that the rain has started, I can count on the buses to be anywhere from 5-20 minutes late. Haven't ever had a bus on time on a rainy day. Buses are usually overcrowded and the heating is turned on uncomfortably high.	11/10/2014 2:07 PM
1170	The first train from Westlake to SeaTac departs after 5 am. This is not convenient for early morning (6:00 - 6:30 am) flights.	11/10/2014 2:06 PM
1171	See above	11/10/2014 2:05 PM
1172	some parts of the city are devoid of bus service either on weekends or late at night (especially on Sundays)	11/10/2014 2:04 PM
1173	Sometimes I get off work in Downtown Seattle so late in the evening/night that the buses are on a one per hour basis. I do not feel safe being in the tunnel or on the streets at a bus stop that late, alone and waiting for that length of time to get safely on a bus.	11/10/2014 2:03 PM
1174	Obvious	11/10/2014 2:02 PM
1175	More frequent service would solve many of the other problems. It doesn't matter so much if you have to transfer or if you don't know when the next bus is supposed to come IF the buses come every 5-10 minutes anyway.	11/10/2014 2:01 PM
1176	Well I want to go places on weekends but there's no uh bus from Redmond to Seattle really on weekends.	11/10/2014 1:55 PM
1177	Also the cost is high	11/10/2014 1:54 PM
1178	Services generally work well but it has seemed in the past couple of years the 49 has become less frequent and less reliable. Also, as the number of cars in South Lake Union and Denny make these roads into parking lots, it becomes less helpful to get on a bus that is also stuck in traffic! Looking forward to more light rail options and a street car with its own lane and traffic lights so I have a reason not to be sitting in my own car	11/10/2014 1:42 PM
1179	The 545 frequently has damaged seats (near the front of the bus) which hurts when the length of the journey is 35-40 minutes or more. The stations near Pioneer Square do not feel safe at night (after dark). If buses could be made more frequent during rush hours and reduced during non-peak hours, that would help a lot!	11/10/2014 1:41 PM
1180	I generally spend 2-3 times as much time taking transit as I would if I drove.	11/10/2014 1:40 PM
1181	The 590 makes only 1 stop until it arrives at 2nd and Seneca. Other busses make stops all along 2nd - the 590 should too to make it more accessible. Some of the bus stops are not safe for a single woman at night.	11/10/2014 1:39 PM

1182	Often times the bus takes way too long. Especially if it's late and then I miss a transfer. I do ride the bus almost everyday, but sometimes I choose to drive because I know the bus will take too long.	11/10/2014 1:31 PM
1183	Certain routes just don't run as often as I would need them to be an efficient method of transportation to-and-from my destinations.	11/10/2014 1:26 PM
1184	Not enough direct/express buses	11/10/2014 1:24 PM
1185	It takes me just as long to bike home from work than to take the bus. This is mostly due to transfer times and infrequent service. Also, the bus riding experience can be unpleasant because buses make jerking motions when going uphill or stopping that induces nausea.	11/10/2014 1:21 PM
1186	A combination of infrequent buses and unreliable time schedules, make it very difficult to plan trips for high priority events (work, church) using transit. Except for the light rail, which is always timely.	11/10/2014 1:19 PM
1187	It just takes a long time. Transit should ease traffic problems, but the bus can only do so much.	11/10/2014 1:18 PM
1188	If I know I'm working late I have to drive. Otherwise it can take a very long time to get home.	11/10/2014 1:15 PM
1189	Unless there is a bus available right away, it is often faster to bike between the U district and downtown than to take a bus (not usually true at peak times).	11/10/2014 1:13 PM
1190	I can't think of any bus I take regularly that has lower than 15-minute headways. That's simply not frequent service. The bare minimum for frequent service is 10-minute headways, and 5 minutes is better. The difference between riding a frequent-service bus and an infrequent bus isn't quantitative; it's qualitative. Riders think about the two service levels differently: one is a pain to ride, the other is literally a no-brainer.	11/10/2014 1:10 PM
1191	Better frequency for buses would be great. Finish the First Hill Streetcar already! Build more light rail; we should be ashamed how far behind we are from where we ought to be. One annoying this is, for example at Pike & 4th, the buses seem to depart at the same time. So a 43 and 49 will depart a minute or so apart. I can take both, so spacing out the departures would seem to be a no-brainer to increase frequency for many riders.	11/10/2014 1:07 PM
1192	To get from Capitol Hill to Ballard, for example, is a heroic journey by bus. It requires at least one transfer; the buses are slow and get stuck in traffic. As the crow flies it's not far, but to actually get there is an ordeal. Driving is a little better but the traffic is still very bad. If I had a dinner date in Ballard I would have to allow at least two hours to get there by bus - that's ridiculous. By car it would be 30-45 minutes depending on traffic.	11/10/2014 1:06 PM
1193	It's a long haul from Capitol Hill to GRCC in Auburn. If I have evening/night classes then my margin of error for missing a connection home is VERY tight.	11/10/2014 1:06 PM
1194	Having a Sunday schedule is a joke. I feel like a second class citizen when I have things to do on Sunday and realize "oh, it's Sunday, I can't do anything because the bus stops too early and doesn't run often enough."	11/10/2014 1:02 PM
1195	I wish I could take the Link lightrail to my early A.M. flights- the train does not run early enough. Would also be nice if it ran late on weekends for bar patrons and employees	11/10/2014 12:59 PM
1196	If I have to transfer and the bus/train schedule isn't reliable, then it takes too long to get to my destination. Also, there are a lot of great north-south routes, but the east-west routes (Capitol Hill to Queen Anne, Ballard, Fremont, West Seattle, etc.) are lacking.	11/10/2014 12:55 PM
1197	Sometimes busses get caught in traffic. Light rail will eliminate this problem.	11/10/2014 12:55 PM
1198	Not enough busses heading to Northgate on any given night between 6 and 7, or more accurately, their too crowded to allow additional people by the time they get to Convention Place Station. I would be happy to take the 49 to the U District and transfer to the 73 if I thought I wouldn't have to wait on the Ave for up to 45 minutes or more for the next 73 to roll around. Usually it is a long time between buses.	11/10/2014 12:55 PM
1199	Routes 72 and 73 go through the U-District, and that takes very long. Busses tend to run late in the morning and after 5:00 pm.	11/10/2014 12:52 PM
1200	Sometimes it does take a bit longer to get to my destination over driving but really my primary reason for skipping public transportation is that my personal schedule is too random. I use my car because it offers me the best scheduling flexibility. I also load a lot of boxes.	11/10/2014 12:49 PM
1201	I do use transit during the week, but usually not on weekends. Even when I do use transit to get into town on the weekend, I still have to drive part of the way because it's too complicated and expensive to go the whole distance via transit.	11/10/2014 12:48 PM
1202	If my bus commute is over an hour (including transfer time) then I'll 90% of the time just take a taxi instead. I don't feel safe at the stops along Third Avenue downtown. There needs to be extra security at those stops downtown.	11/10/2014 12:46 PM

1203	Unsavory people and bad behavior on buses are a deterrent to riders.	11/10/2014 12:43 PM
1204	Because you guys don't have enough funding.	11/10/2014 12:37 PM
1205	I work odd hours, and it is not unusual for me to have to wait over an hour for the bus. Safety is a concern when it is very late/early and dark, and I'm generally alone.	11/10/2014 12:29 PM
1206	I often have to wait and let 2-3 buses pass before I can actually get on an Everett bus to get to downtown Seattle due to overcrowding. Parking at the South Everett Freeway station needs to be improved to allow more commuters to leave their vehicle. I often have to be dropped off as parking lot is full by 6:15 am.	11/10/2014 12:29 PM
1207	I absolutely refuse to ride the #3 and #4 buses anymore. I lived on 17th and Jefferson for a year. Riding that bus was enough for a lifetime. I was called "faggot" more times than I can remember, was threatened, etc and no one ever did anything. So not safe feeling. Otherwise, buses have been good for me, though I have witnessed people passing 5ths around he bus, masturbating, flossing and nail trimming, it hasn't been that bad.	11/10/2014 12:27 PM
1208	Route 7/49 is too slow for me to ride it regularly. Route 9 is not available on weekends. Express buses from the Eastside can get really crowded by the time they get to my stop at Rainier Avenue Freeway Station.	11/10/2014 12:19 PM
1209	I live in Renton Highlands, so there's only one bus (the 105) that can get me anywhere (i.e. to Renton Transit Center), but it's a long walk to the nearest bus stop from my house. Most of the time I drive to a park-and-ride and catch a bus there.	11/10/2014 12:19 PM
1210	I am a resident at UWMC and HMC and often times have to be at work by 6 am and leave after 7 pm. At these times, there is no direct service from my house (the first 373 gets to 15th/125th at 6:27 AM and the last 373 from UWMC leaves at 6:30 pm). The 373 is a 25 minute trip. If I'm working early morning or late night, I have to make a connection downtown or at northgate, making it a 50-60 minute trip. Before 6 am or after 7 pm, it is a 12-15 minute trip by car.	11/10/2014 12:17 PM
1211	Route 2 works fine for me.	11/10/2014 12:16 PM
1212	Some buses are very crowded during peak hours. It is uncomfortable to wait for buses at some of the downtown bus stops (particularly those on 3rd Avenue between Pike and Pine). For routes serving Capitol Hill from Downtown Seattle. There should be an additional bus stop between 4th and Pike and the Convention Center.	11/10/2014 12:14 PM
1213	I absolutely do NOT mind transfers. I would love it if there was a connector bus that just made laps around my neighborhood, getting people to and from the light rail.	11/10/2014 12:14 PM
1214	See comments regarding #30 above. Also, a little effort on some of the stations could go a long way. At Westlake Center you can pretty much be assured that at least one escalator or elevator will always be broken. This situation hit its high (or low) point recently when both elevators at the 3rd Avenue end of Westlake Station were out of service, and each had a sign telling people to use the other one. Also, more security is needed at the entrance of the Westlake Station. There are security personnel down in the tunnel itself, but more is needed at the entrance to deal with people sleeping in the entrances or panhandling. This is probably the top reason that will cause me to find different routes or discontinue using Metro.	11/10/2014 12:12 PM
1215	When on Public transportation I have encountered people who appear/act mentally ill or who are intimidating.	11/10/2014 12:12 PM
1216	There are no direct routes from Capitol Hill to anywhere but downtown.	11/10/2014 12:00 PM
1217	Frequent delays, even when using One Bus Away to gauge bus time. Early bus arrivals leave early so hard to follow any schedule.	11/10/2014 12:00 PM
1218	The 71-74 busses are always packed.	11/10/2014 12:00 PM
1219	Occasionally, I like to come into work very early in the morning to catch up on some things before the rest of the office gets in. The routes I have historically taken don't run early enough. Living in Beacon Hill, I don't take transit anywhere north of Downtown. I drive to those destinations because the trip takes too long. I also typically drive to Capitol Hill because the 60 doesn't get me far enough east. Luckily, these destinations are really only for leisure, shopping, etc., so I can go on nights and weekends. I also wish the shorter headways on the 50 continued up until 10AM.	11/10/2014 11:55 AM
1220	It's just quicker to go by car, meaning I don't have to get up as early.	11/10/2014 11:55 AM
1221	In addition to the above checked items, the service isn't frequent enough, I have to transfer, service isn't offered early enough or late enough, and the buses have historically been too crowded (back in 1987, I had to travel up from Auburn to Seattle to work. I was pregnant at the time, and there was not only not enough seats, but there was hardly any standing room.) These conditions have not improved since that time.	11/10/2014 11:53 AM

1222	Insufficient parking at link stations means a one-mile walk each way from my house to the station. Train is frequently standing-room only, makes exiting / boarding train difficult. TOO MANY PEOPLE WITH LUGGAGE on the light rail - need to provide storage places so they don't block the aisles. Do like the sound transit buses, put luggage racks over seats. Door-to-door trip on public transit takes me one full hour; driving takes me 30 minutes; not much incentive to take the train. Light rail is extremely slow through the bus tunnel, as the train has to wait for buses. Wheelchair ramps on buses cause much delays, as does confusion from tourists / infrequent travelers who can't figure out why both buses and trains run in the tunnel. Ditch cash, go to ticket / card only boarding, with turnstiles in tunnel stations, like all other major cities with good public transit. Hugely insufficient number of trains during football and baseball games.	11/10/2014 11:53 AM
1223	I live in the city specifically because I don't want to spend an hour each day commuting. It takes an hour total (thirty minutes each way) for me to take the bus to work from home and back again in the evening.	11/10/2014 11:53 AM
1224	park & ride is full 30 minutes before I need to park to catch my bus - too cold to arrive early and sit in the car	11/10/2014 11:51 AM
1225	I have been unable to use bus/lightrail for the airport when the flight is too early. If I had limited mobility, the light rail would not be possible to use, as it lets you off so much farther away from the terminal than the express buses used to. East/West connections are inefficient (see earlier comments above). Connections to Ballard or Crown Hill from Pinehurst/Lake City involve multiple transfers or going miles out of the way When I worked in White Center, the schedule made taking the bus impractical (a 6 hour a day commute when considered round trip)	11/10/2014 11:48 AM
1226	The 15X is packed on the 7:15 AM run. Transferring may be hit or miss with the 3 or 4 depending on traffic.	11/10/2014 11:48 AM
1227	My transfers are long and I have to wait for upwards of half an hour to get to and from where I'm going, depending on the bus schedule, whether they're late, on time or even early. It's fairly unreliable.	11/10/2014 11:47 AM
1228	One big problem is the lack of crosswalks along Greenwood between 130th and 137th. I have to get off a stop early unless I want to walk across 4 lanes of fast traffic. Transferring downtown takes a lot of extra time. The #5 "express" bus doesn't go far enough north. Why not have the express serve the points further north and the non-express serve closer in????	11/10/2014 11:47 AM
1229	transportation during rush hour is usually very reliable, but terribly crowded. the last few weeks, we've been yelled at to stuff everyone in. While that's laudable, its difficult for many passengers, e=specially older ones, who have difficulty standing facing forward because there's not enough to brace themselves. transportaiton on weekends or at other times is just not available for some busses and for others its too unreliable.	11/10/2014 11:38 AM
1230	the bus stop @ pike & boren is a major drug stop	11/10/2014 11:38 AM
1231	Too slow!	11/10/2014 11:38 AM
1232	Going out at night can be difficult on the bus. Later running busses to/from areas with bars/nightlife would be great.	11/10/2014 11:36 AM
1233	There are just too many people trying to get around. This is especially true for routes serving downtown. And people are just generally messy.	11/10/2014 11:31 AM
1234	It would take me 1.5 hours to get from Issaquah to South Lake Union (I live in North Bend). I want a direct route from Issaquah.	11/10/2014 11:28 AM
1235	I have a lot of family obligations, so if I have to walk farther, or alter my work schedule because buses don't run early enough in the morning, then I'm going to drive so that I don't run the risk of being late for an appointment. Inevitably, whenever I try to use the bus to string together work and other obligations, the bus is late or never shows up (I make a point of arriving at the stop early). It is difficult to respond to family emergencies by bus.	11/10/2014 11:26 AM
1236	The fast buses to Roosevelt (316/76) run on very limited hours. The other buses to the Roosevelt neighborhood take too long going through the U district	11/10/2014 11:25 AM
1237	I picked the 3 above by default. All my stops are very close to/from my destinations, and i don't use it on weekends so those difficulties are not prevalent in my own schedule.	11/10/2014 11:24 AM
1238	On my primary route (the 77), service is very unreliable mornings and evening, with frequent late or missed service, and when that happens, full buses, often leading to more missed service.	11/10/2014 11:23 AM
1239	One major problem is crossing over Mercer street on the #3 & 4 buses. The traffic blocks the lanes and the bus can't get to the bus stop or it takes a lot of time to get over Mercer street.	11/10/2014 11:21 AM
1240	Particularly in the evening, as everyone leaves the downtown core, sometimes a single bus isn't enough for everyone waiting. Often times, the traffic is so bad that several buses of the same number bunch up. The 12 is notoriously bad in this regard, making bus travel not a better alternative to driving.	11/10/2014 11:19 AM

1241	<p>Bus Schedules Not Reliable: The 8 bus from my house into work never comes when it says it's going to come. If it's going to be 15 minutes late every time then the schedule should just be updated to reflect the accurate times. Also, on a side note...somebody should tell the 8 bus drivers that they drive like bats out of hell and its the only bus where I feel like I consistently need to hang on to the hand rails while it's moving. Maybe it's because they are always behind schedule so they drive 10 miles over the speed limit constantly trying to catch up. Unsafe: There are always homeless, sketchy guys both on my bus and at the stops on either end of my commute. Don't even get me started on the stops on 3rd avenue or in the tunnel. Takes too long: From Madison Valley/Central District the routes are limited and its nearly impossible to take a bus to Fremont/Ballard/Greenlake area conveniently.</p>	11/10/2014 11:17 AM
1242	<p>The statements I checked are true, but do not prevent me from using Metro.</p>	11/10/2014 11:12 AM
1243	<p>Sometimes I hear rude comments or vulgar language directed toward me. I have also seen other bus riders using drugs/alcohol on the bus and it made me uncomfortable.</p>	11/10/2014 11:10 AM
1244	<p>Frequency, frequency, frequency. People hate transfers only because frequency sucks. Nobody hates transferring to the Link, for instance.</p>	11/10/2014 11:09 AM
1245	<p>The 8 is the worst. Always gets stuck in traffic at Denny and makes a totally stupid detour on Yesler/Jackson. I would take the 8 way more if not for that dumb 2-block detour.</p>	11/10/2014 11:08 AM
1246	<p>Quite often, the buses are running late or early and it is hard to tell when it will actually show up. Of course I understand this, but sometimes if I'm running late I stress about missing my bus. Taking the bus downtown can be uncomfortable with so many people riding on it, angry bus drivers and drunk homeless people. I ride the bus every day to and from work and sometimes it is hard to even find a spot to stand. I know it is hard to do much about the homeless population, however there have been times when I've seen a drunk man pee his pants on the bus or a woman vomit on the bus. Very uncomfortable in such a tight space. I don't particularly run into the "service isn't offered early enough/late enough" option, but my friend does. She works at Nordstrom downtown and has to bus in at 4am at least once a week, but the option is not available for her.</p>	11/10/2014 11:07 AM
1247	<p>The downtown bus stop by my home has very limited hours so I drive to the Northgate P&R. I can only park in the lot on Fridays, it is too full M-TH. I usually end up parking somewhat illegally on the 3rd floor of the parking ramp past the "no commuter parking beyond here" sign because the ramp is full, the parking lot is full, the overflow lot is full...you get the picture. Then I walk east out of the parking garage to a bus stop before the transit center so that I can almost guarantee I'll be able to squeeze on to the next 41.</p>	11/10/2014 11:06 AM
1248	<p>BECAUSE YOU CANCELED ROUTE 47. 800 people used that daily. It only did a circuit from Bellevue Avenue to downtown. That is a lot of people in a few blocks. It was used to get downtown and back during primary commuter hours. METRO could have saved it as a COMMUTER ROUTE 5 am to 10 am and then 3 pm to 10 pm but NO, had to cancel it. YOU WILL ALL BE VOTED AGAINST NEXT ELECTION.</p>	11/10/2014 11:05 AM
1249	<p>I have had to turn down plans to places that take too long to get to from my home (Fremont, Georgetown). Sometimes if I am out at night I find that the bus home has stopped running, which is really frustrating! It also worries me that other people might get stranded if they can't afford a cab/Uber or even worse drive drunk after a night out b/c there aren't bus options for them after a certain hour. Even if late night buses have low ridership, they should still be available as a safety measure! I've also had to take expensive shuttles to the airport before because I had to leave before the buses began running.</p>	11/10/2014 11:04 AM
1250	<p>Scheduling is very inconsistent, often because of street traffic</p>	11/10/2014 11:04 AM
1251	<p>First, while some schedules are incredible reliable, others, like the 255 are often late for no discernible reason. I use the bus to commute and for a person living near the beginning of the route (in Totem Lake), it's mind boggling that the bus can be 15 or 20 minutes late at least once a week. The bus is frequently (three times a week) ten minutes late. Also, for some reason there have been a number of drivers who have difficulty merging with traffic, and take an inordinate amount of time doing so. I recognize that driving an articulating bus is not easy, but I expect my driver to know how to do it. Second, for a city that has a clear demand for night life on Capitol Hill and in downtown Seattle, it's strange that bus service on many routes shuts down at midnight/11:30PM. You would expect there would at least be a skeleton route that left when the bars closed at 2 AM. It prevents me from staying out later than I would like to. Finally, it takes a long time to get where you need to go. This is partly because of natural features like our lakes that make traversing them difficult, but there are several things that can be done in the mean time. In suburban areas, stops are well spread out, but in densely populated areas, there are places where stops are two or three blocks from one another and are redundant. It slows the route down when stops are so close together that the vast majority of people can walk the distance to the next several stops. Redundant stops should be eliminated. Next, there are a number of regions that are either indirectly connected by bus, or not connected at all. Capitol Hill and the East Side are, at best, connected by two or more buses, and it is not convenient to go there by transit. This is strange, especially because Capitol Hill is bounded in the north by the 520 bridge and decently close to I-90 in the south (by way of First Hill).</p>	11/10/2014 11:03 AM

1252	Primary issue for me is transfers. Even a single transfer is enough to make me drive if the distance is too far to conveniently walk (<2 miles). In general, I've found it to be faster to bus+walk or just drive than to attempt a transfer,	11/10/2014 11:02 AM
1253	The 11 runs about half as often as the 8. If I miss my bus, I have to wait longer for the next one and miss my transfer downtown. Also, if I want to go into Capitol Hill proper, I can't stay out very late or I'll end up having to walk home.	11/10/2014 11:01 AM
1254	There are simply too many stops. There is no need for a stop every 2 blocks.	11/10/2014 11:01 AM
1255	Frequently the bus is too crowded and we reject people at the upcoming stops. Sometimes it takes up to an hour just to get from my stop on 3rd and bell to the Pink Elephant (Denny), which is only a few blocks. Some riders just go farther north to get on so they're not waiting on the bus all that time, but by the time we get there the bus is full and they have to wait for the next one anyway. I have also been harassed on the bus repeatedly by the same person (and seen other women deal with this also) and no one does anything, and the bus driver does not ask them to leave. Then you have to get off before your stop just to avoid it, adding even more time to your trip. I think there should be a clear phone number on every bus on the bulletin boards for who to call if you're being harassed. Or a place where you can text a picture of that person? In case they get off to avoid talking to anyone	11/10/2014 10:57 AM
1256	I get anxious when the bus is too crowded or when it takes too long.	11/10/2014 10:56 AM
1257	Roughly 1.5 hrs for a trip that takes 18 minutes in a car.	11/10/2014 10:55 AM
1258	It's all about convenience. I travel to multiple destinations in a day, so with a car I know I can get where I need to go. I'd love to have more efficient and convenient mass transit, I would happily use it.	11/10/2014 10:54 AM
1259	Traveling between 28th & Madison and Pioneer Square, a transfer is required downtown, adding significantly to the trip time.	11/10/2014 10:50 AM
1260	Self employed, need to quickly move from one neighborhood to the next one.	11/10/2014 10:49 AM
1261	I'm primarily concerned with the fact that many of my routes have been way too busy and increasingly uncomfortable as of late. I wouldn't mind that it takes so long to get where I need to go if I knew I could catch the first bus I wait for while commuting in the mornings.	11/10/2014 10:47 AM
1262	I moved near Mt. Baker Link Station because of it could take me to the airport easily. But since there were several robbery (with and without gun) incidents, now I don't feel safe walking home from the Link station anymore.	11/10/2014 10:46 AM
1263	See comments above.	11/10/2014 10:44 AM
1264	See above. More Sunday services are needed. Also direct routes between Northgate and Eastside.	11/10/2014 10:43 AM
1265	My primary routes are the 16 and the 26, which are notorious for overcrowding and delays.	11/10/2014 10:42 AM
1266	If I take the bus to or from work, I generally take the 8. However, it is extremely crowded, the schedule is not even close to being accurate, and I can walk up Denny faster than the bus during rush hour. I'm usually lucky enough to getting a spot standing, but the majority of the time, the bus has to skip stops after mine because there is no room to pick anyone else up.	11/10/2014 10:42 AM
1267	With the reduction in the number of buses that are on my route (312), I have to drive to a location further up the route so that I don't have to stand.	11/10/2014 10:39 AM
1268	I have to transfer 1-2 times which adds a lot of travel time - plus a 10-15 minute walk just to get to a bus stop.	11/10/2014 10:37 AM
1269	I hate transferring because the schedules NEVER line up the way they should. The schedules are pretty unreliable; I use the OneBusAway app, and it often is just dead wrong. Transferring feels mentally like it extends the journey by a lot, even if the schedules worked perfectly, because you can just never rely on making the transfer easily. The end result is that it often takes too long.	11/10/2014 10:35 AM
1270	I have found myself waiting for buses for over an hour, and with transfer times, It has taken up to four hours to get from Capitol Hill to residence in Bellevue (just off of 8th street which is a main vein).	11/10/2014 10:35 AM
1271	Park and Rides fill up quickly. If I can't find a spot I can't take the bus. Traffic is consistently delaying buses and making it take much longer to get to work.	11/10/2014 10:35 AM
1272	It would be nice if the transfer ticket lasted longer.	11/10/2014 10:33 AM

1273	1) The quickest bus route still leaves me with a mile to walk to work. 2) Buses are often late - especially when coming home. Of course, you can't count on it, because sometimes they're early and then you're SOL. 3) I had to change my work schedule because I couldn't get on the buses leaving around 5:20pm. It would take me about 2 hours just to get home.	11/10/2014 10:31 AM
1274	Evening service is so infrequent.	11/10/2014 10:31 AM
1275	Because the county is ripping a basic social service out of the public's hands instead of imposing an income tax on wealthy companies and wealthy individuals.	11/10/2014 10:29 AM
1276	While bus travel times are often not too much slower than driving (I guess that depends on the bus), waiting for the bus adds unavoidable time to a trip. When you throw in a transfer, the total trip takes too long to be practical. If there were buses running every 5 min or so, this would be less of a concern, but as that's not the case, I'm pretty much limited to routes with direct connections.	11/10/2014 10:27 AM
1277	I will not recommend light rail to the airport to certain people at certain times due to past covered-by-media incidents. The Westlake bus tunnel seems to be without security, and the entrances are a convenient place for loitering. Stops without benches or cover/shade can be a bummer - particularly at Broadway and Pike heading south. When traveling with kids or pregnant wife, standing in heat or rain for 12 minutes is rough.	11/10/2014 10:27 AM
1278	If buses had priority lanes that allowed them to pass through stalled traffic in areas like Mercer St/South Lake Union, they would be a more favored option.	11/10/2014 10:25 AM
1279	getting out of seattle after work (around 5 pm) the buses are consistently late. Sometimes 20 plus minutes.	11/10/2014 10:21 AM
1280	Collecting fares on the bus takes needless time. Do Orca only, but tap outside the bus. If someone doesn't pay their fare, who cares? I would rather get home 20 minutes earlier and pay \$8 more a year in taxes, than wait for the crazy lady to fumble with her coin purse to get the 20 cents. At every stop.	11/10/2014 10:20 AM
1281	Buses have become increasingly crowded and less reliable. I suppose it has to do with recent Metro service cuts.	11/10/2014 10:18 AM
1282	Intimidation. The more people packed into the bus the more I feel like I had better know what I'm doing or else I'm disrupting a very delicate machine.	11/10/2014 10:17 AM
1283	The buses aren't frequent enough and the schedules aren't reliable therefore making the number of people waiting for the bus increases thus creating a very packed bus that can get very hot and uncomfortable. Depending on where you get on, there may not even be enough room for you so you'll have to wait for the next bus. Or the next, next bus. On a few occasions, it has been faster to walk to the destination than wait for a bus.	11/10/2014 10:12 AM
1284	Canceled route (47) was the closest route to home from Downtown . Now taking 43/49 from Downtown to Capitol Hill. Sometimes skip taking the (8) from Queen Ann to Capitol Hill due to overcrowding.	11/10/2014 10:12 AM
1285	When it takes 45 minutes to get 5 miles I could go in 12 minutes via car and 20 minutes via bike, why would I bus?	11/10/2014 10:11 AM
1286	None of the above. I currently use Public transportation as it is my only transportation option other than walking.	11/10/2014 10:09 AM
1287	Again, 30's schedule has been severely cut. 74 is an express and only runs limited hours. So I can't stay for a movie because I won't walk at night in the U-district, it is much too sketchy.	11/10/2014 10:09 AM
1288	In order checked above: Getting from neighborhood to neighborhood outside of downtown, when the areas don't border one another, takes way too long. Getting from Fremont to Capitol Hill or First Hill is too inconvenient. I would use the new Link stops in U-District and Capitol Hill more frequently if they were closer to my home or a direct line from my home neighborhood to the nearest Link stop. Buses during commuting times are often packed tight. The 5, 16 and 26 in the mornings often have to skip stops because they can't fit any more people.	11/10/2014 10:08 AM
1289	I live in Wedgwood and getting downtown is challenging since the 76 has limited hours and the 71 takes too long since it goes through the University District.	11/10/2014 10:07 AM
1290	Especially with the recent cuts, bus schedules seem to be becoming more erratic. This causes busses to become more crowded when the bus does get to my stop. More frequent busses would be helpful, but I think that the real issue is timing. I recognize that this is a difficult problem to solve, but I think that if busses could be on time (+- 2 minutes), I think that would solve several other issues. (crowding, frequency issues, etc.)	11/10/2014 10:07 AM
1291	Sunday service can be too difficult to use for routes that are only running every 30 minutes. I choose not to use transit many Sundays for activities outside of my neighborhood. Buses to the University District and beyond from Lower Queen Anne take so long, I tend to never go up there. Traffic on Denny Way from Lower Queen Anne to the Denny triangle area is terrible, and make the 8 route to Capitol Hill extremely slow and sometimes unreliable.	11/10/2014 10:06 AM

1292	Buses get way too full now. It's incredibly uncomfortable and can feel unsafe for women in crowded areas. Stations don't feel safe - when it's dark, not well lit, and in an unsafe area, particularly for youth or women. I've been in a bus that got stuck in traffic, came late, and I arrived at my destination 30 minutes late. That is just unacceptable.	11/10/2014 10:02 AM
1293	with traffic as bad as it is i fear transfers, the second bus is always on time. This is a bigger deal for me if I want to go to the east side, I really with Metro would not jsut use Seattle as teh core, but also look at making Bellevue, Renton, Redmond (Have lived in all of them). Just as much of a core as seattle when it comes to busses. If I stay in Renton with my partner, I would have to drive to Kenndale, park in the neighborhood and catch a bus on the side of the freeway to get to the UW. If there was a fast (other than 240 which goes forever) bus that went Renton - Bellevue, then I could transfer to a bus going to the U-District. Seattle has major bus routes .5 miles apart from each other running north to south. The eastside doesn't. I realize the lay out is different but the traffic cannot be ignored.	11/10/2014 10:01 AM
1294	i'll walk/bike/drive myself if it's a weekend trip or a quick trip	11/10/2014 10:01 AM
1295	I would love to be able to bus to/from Capitol Hill easily but I don't always feel safe standing at a bus stop alone and taking multiple transfers just to get to another Seattle Neighborhood decreases the likelihood I will use public transportation. More likely to use direct service like Uber than bus from Captiol Hill to Ballard.	11/10/2014 10:00 AM
1296	I can ride my bike from Ravenna to downtown faster than the bus... I ride the same route as the 66 and pass it.	11/10/2014 9:59 AM
1297	Service unreliable/infrequent at night.	11/10/2014 9:55 AM
1298	Routes were cut so half the buses are so crowded I can't get on to go home.	11/10/2014 9:55 AM
1299	I have to park near the Alaska Junction to take the bus. Due to construction projects in the neighborhood there is limited parking.	11/10/2014 9:41 AM
1300	Generally these things are not a big issue, but on occasion buses don't run, or don't run late enough on weekends to make taking them an option. Also some stations/stops simply aren't safe.	11/10/2014 9:40 AM
1301	Metro buses are dated, can get easily crowded, and generally uncomfortable compared to ST buses and Link light rail.	11/10/2014 9:32 AM
1302	The 25 takes longer from Laurelhurst to UW than it takes the 71, 72, 73 to get from UW to downtown. Not very efficient or convenient. Also, the 25 is not very frequent.	11/10/2014 9:30 AM
1303	also the number 4 or 3 bus is scary with many homeless people on it.	11/10/2014 9:26 AM
1304	I can drive to work in 20 minutes but riding the bus would take nearly 50 minutes.	11/10/2014 9:26 AM
1305	if i have to transfer i usually just wont go....since i travel to these farther destinations in the evening or on the weekend (when i have time) the buses are not running enough...therefore i have to wait 30 minutes for a transfer...transfers on the weekend and evenings just take too long.	11/10/2014 9:24 AM
1306	There are not any obstacles! I use public transportation over driving my vehicle.	11/10/2014 9:19 AM
1307	Routes are bogged down by traffic. Consider transit only corridors such as no cars on Pine from 3 -6.	11/10/2014 9:14 AM
1308	The times that I've taken the bus are few and far between because I find that it takes a ridiculous amount of time to get to destination. I am better off driving or biking everywhere.	11/10/2014 9:08 AM
1309	Lack of dedicated transit lanes, and reliance on buses, means that transit is stuck in the same mess as general traffic. This means, in the peak hours, service is unreliable and frequently delayed by a significant percentage of the overall trip time. For example, it can often take nearly an hour to travel from 5th and jackson, to my residence in Fremont/Wallingford. This is so close to the time it takes me to walk the equivalent difference as to be laughable. Additionally, limited service outside of peak hours means transit's utility is vastly decreased for trips that begin earlier in the day, but end after frequent serves winds down. When the buses are running, they're stuck in traffic, and when there's no traffic, the buses aren't running. U-Link opening in 2016 will provide a fantastic alternative (and hopefully run late enough on the weekends [3am!]) to the bus when traveling from downtown to points north of the ship canal, where South Lake Union traffic on Mercer and Denny, and the associated I-5 feeder mess, grinds the grid to a near-standstill during peak hours. I hope that the City can work with Metro and Sound Transit to coordinate good cross-town transit along the 35th-ish corridor to leverage this utility with service that is above the atrocious level provided currently on Metro Route 44 (which is often walking speed).	11/10/2014 9:04 AM
1310	I spend 2 hours every morning to get from Sumner to UWMC. one train and two buses, two transfers I spend 2 hours every evening to get from UWMC to Sumner. one train and one bus, and one walk, I get where I want but, never quick	11/10/2014 8:57 AM

1311	The service in and out of ballard is not adequate. Too many commuters too few buses. The transfer up to cherry hill is also crowded, and adds 30 minutes to an already long commute. It takes me 20 minutes to drive and 1.5 hrs to commute by metro bus. I just cant justify taking that time away from my family.	11/10/2014 8:56 AM
1312	If I could choose another it would be that buses are not clean.	11/10/2014 8:55 AM
1313	I do take the buses all the time and they are great. I think there should be more buses on the weekend since that is when people have the time to shop, etc. if people knew they could take the bus and frequently, more people would use them because parking is horrendous.	11/10/2014 8:48 AM
1314	Earliest train leaving Seattle in the afternoon is 4:05 which sometimes changes my commute to taking the Bainbridge/Seattle ferry to get home to Kingston, WA. Also, I wish there was at least 1 train option to Seattle (and back) on the weekends from Edmonds outside of game days.	11/10/2014 8:43 AM
1315	As I mentioned, I've lived in two urban areas (Capitol Hill, and now Columbia City), and I've found that I've had to walk a fair amount to stops, which I don't mind. We don't need to bus stopping every quarter mile... Understanding better how to PLAN my trips, via the website would be more of a priority to me. I take the most direct route, as I'd think most would. In fact, if a tranfer is involved, I likely wouldn't take the bus. Time is money. On occasion the bus can be a bit 'grungy'. People should show more respect for the space.	11/10/2014 8:42 AM
1316	Bus times too close or too far from ferry/water taxi/connecting bus arrival to get to work on time, and 1-2 transfers just take too long	11/10/2014 8:40 AM
1317	The combination of all these things results in some awful commutes. Having a bus arrive late, to then subsequently make me late for the transfer, then sometimes not being able to board a bus due to rush hour commuters, makes things very difficult.	11/10/2014 8:33 AM
1318	Work schedules in healthcare typically start at 0700; not enough options on weekends to get to work on time (via route 49); need good lighting at bus stops especially where stops have been eliminated Safety with passengers picked up from shelters	11/10/2014 8:32 AM
1319	When I have to work in Renton I drive because the bus takes far too long.	11/10/2014 8:28 AM
1320	I would love it if the Sounder train had earlier/later times and operated on the weekends.	11/10/2014 8:28 AM
1321	Mid day service frequency is an issue (especially to Redmond TC) as well as lack of amenities at key transfer stations	11/10/2014 8:25 AM
1322	The geniuses that designed light rail didn't provide a Park-n-Ride. Consequently, I had to park several blocks away on a dangerous street. My vehical got broke into costing me hundreds of dollars. I will never do that again (ride light rail). The 106 now takes a scenic route through Georgetown? Why? The 211 is canceled? It takes 25 minutes to go from 3rd and James to 15th and Jefferson. The wait at 3rd and James is scarry to say the least.	11/10/2014 8:24 AM
1323	I would take the bus to Capitol Hill a lot more, and thus visit Capitol Hill a lot more, except for the 9 doesn't run on weekends or in the evenings. When planning to go from Rainier Valley to north Seattle where many of my family and friends live, I'd rather take one bus than transfer because so often the buses are late and then I have to wait 15-30 minutes at an outdoors bus stop in downtown when it's potentially inclement weather. I'd rather drive the 15 minutes than have an hour+ commute to travel 7 miles through the city. Metro used to have so many more bus routes that would continue north-south which were great, but they've cut so many (i.e. the 16 turning into the 42.)	11/10/2014 8:18 AM
1324	There is NO visable attempt to get bus schdugles coordinated. Examply the 3/4 has lots of riders that transfer at the jail to the commuter busses MOST of the time the 3/4 just misses the 413 at that stop causing a 20 minute delay for the next buss. If Metro and community transit could get the 413 and the 3/4 to arrive at the same time it would save me 15 to 20 minutes. Almost every morning I see the 3/4 cross in front of the 413 while the 413 is stoped at red light on jefferson. If the 3/4 was 5 minutes latter or the 413 was 5 minutes earlier the transfer could be made.	11/10/2014 8:09 AM
1325	Buses are VERY packed during commute times...	11/10/2014 8:09 AM
1326	I think we need to expand service (more trips more often) and that could solve a lot of problems.	11/10/2014 8:04 AM
1327	my commute takes much longer after the 265 was cut plus I have to walk and it's really pleasent in the rain.	11/10/2014 8:03 AM
1328	NA	11/10/2014 7:43 AM

1329	My top three are out of my control. Surveys like this make me feel like you are listening but services always decrease. They keep building these crazy huge apartment buildings without parking and expect people to pay for and ride those bikes planted in very specific locations or take public transit but then the transit services always decrease. That would be ok in a smaller city but.....	11/10/2014 6:53 AM
1330	Not convenient enough for some travel needs.	11/10/2014 1:09 AM
1331	At some bus stops I have to wait alone for a 1x per hour bus and am frightened that I will get mugged or be harassed because I am a female. This can be anywhere in the city. At the major surface stops near 3rd & Pike / Pine I am uncomfortable with loitering transients and intoxicated people and am sometimes harassed, sometimes because I am female.	11/10/2014 1:04 AM
1332	citizens lacking moral fiber	11/10/2014 12:44 AM
1333	1. As noted, many routes to jobs in my field would take multiple hours and transfers and are simply unreasonable. 2. If I have to walk a distance and I am not well enough, I have to DRIVE to the Park and Ride a mile away. Northgate Transit Center doesn't have enough parking, especially in lighted areas, and there is no security. If I'm already in my car and driving 2 miles, it's just easier to drive the 6 miles instead. 3. Reliability: Not only don't they run on time, but buses--even those with plenty of room--have actually gone zooming right past a bus stop full of people. I now stand out near the road and flag them down at risk to my person. Also, sometimes one bus is so late that the next bus on that route comes at the same time. Moronic. 4. Frequency: If it's going to be an hour to the next bus or even half an hour in the bitter cold, WHY WOULDN'T I DRIVE? 5. Transferring in the winter means putting your hat, coat, gloves BACK on, walking outside, waiting AGAIN for a bus that might or might not show up in a bus station that might or might not have ANY PLACE TO SIT. I drive, I win, the environment loses, we all die. 6. Obstacles: Because I don't LOOK like I have a disability most of the time (right know I have a major surgical brace, but it's not that obvious), the driver doesn't lower the bus for me to get in. Eve if I'm using a rolling grocery cart, which I then have to lift. Shredded knees, damaged spine: my favorites. 7. Timing: I am often out too late to get home by bus--or at least to get home QUICKLY without waiting at a bus stop with a bunch of thugs (a couple of weeks ago at Lake City Library ~27th). It has been awhile, but people have gotten mugged at NE 115th and 15th Ave. NE. I don't want to stand there for an hour at 11 p.m. after the opera or book group and look like a target. 8. Clean/comfortable: Try coming back from SeaTac with your luggage. There's no place to put it. Again, the buses are overcrowded, overheated, humid, muggy, stuffy, and gross. And if I don't wash my hands with antiseptic, I'm guaranteed to catch an upper respiratory infection. You can place money on it. 9. Stations: As mentioned--there were gang-type guys showing off the stuff they stole and bragging about their crimes at the Lake City Library pickup. Muggings at 15th and 115th. Scary people getting off the bus at 19th Ave. NE and Northgate Way behind me. No security, insufficient parking and lighting at Northgate Transit. Do you REALLY THINK I'm going to go to a parking garage at the closed mall late at night? I don't. ALSO, as I mentioned, many bus stops are uncomfortable. No seating, or people are smoking inside.	11/10/2014 12:42 AM
1334	Access to transit is not safe without sidewalks and bicycle facilities protected from cars. I frequently travel with children and the roads are not safe to walk on or near. Excessive speed, sight distance issues and unimproved muddy shoulders concern me enough to warrant driving on many days. My experience trying to see and navigate around cyclists in dark wet conditions makes me not want to do that, and more aware of the value of protected facilities. Shelters need to be more functional and more artistic too. They are the place where transit really exists in a community. Should be inviting.	11/10/2014 12:37 AM
1335	First, it shouldn't take me 60 minutes to go from Greenlake to Queen Anne without having to jog up 150 steps and a steep block with a backpack on when I could do it in a car in 10 minutes. And even if I did, the schedules aren't usually there at some stops on Taylor. Since I don't have a smartphone, I can't check one bus away. But even that is messy, using a patchwork of transponders instead of actual gps, so I never know when my bus is going to come. Lastly, the only good transfer points make me have to backtrack through Belltown. And since they rerouted the 16 to take E Line routing into Belltown (why did they do that when the tunnel digging doesn't affect the 3/4?), making my transfers much more difficult.	11/9/2014 11:17 PM
1336	Most of these complaints involve Bellevue-Seatac Airport. It seems as Bellevue grows and has more downtown business/residents/travelers, it should be able to support good bus service to Seatac airport. I'm surprised how many local people in Bellevue don't even KNOW there's a bus to the airport now. The biggest problems are the timing doesn't match flight schedules (need earlier AM service to catch early flights and schedules should be coordinated with peak flying times better) and that the bus makes too many stops that don't seem to be very busy. I wonder if an Express Bus (even one that only ran hourly, given the right hours), would be able to build enough ridership. Or, perhaps, it's worth it for Bellevue Govt. to subsidize to help support business/travel/residents.	11/9/2014 10:38 PM

1337	- Change from the 510 to the 512 added an hour to my daily commute - Closure of the stop at Wetmore & Wall means I now have to use a stop (Broadway & 34th) that is a considerable distance from my work and does not feel safe. That stop is located between a county mental health triage center and a sex shop; loiterers and other bus patrons at that stop have propositioned me, harassed me with questions about whether I patronized the sex shop, and in the middle of the afternoon on a Saturday a young man chased me down the block asking me if he could f*\$! me and wouldn't stop asking me UNTIL I OUTFRAN HIM A FULL BLOCK FROM THE STOP. I have been a bus commuter in every city I've ever lived in and have never experienced anything as scary and disturbing as this stop. I have tried making the connection from Everett Station to the Wetmore & Wall stop via Everett Transit, but it is 5-10 min slower than walking. - Schedule says a 512 bus will arrive at Olive & Terry just after 7:15am. Twice last week I arrived at the stop at 7:08am and no bus arrived until after 7:45am. I was late for work and missed important meetings. When the bus did arrive, both times it was standing room only. For a city bus, that's fine, but not for a long trip up I-5 at 60mph. (It was tremendously frustrating each of those mornings to stand at the stop and see FOUR 545s go in the span of 40 min and ZERO 512s. It really feels like the poorer communities of Lynnwood/Everett are getting the short end of the stick while Microsoft commuters get frequent and reliable service.)	11/9/2014 10:30 PM
1338	Buses should stop every two blocks (every three blocks at the most). If you want people to take the bus, you need to make it convenient. Plus, many people who take the bus are elderly or handicapped. You have eliminated the stop at 6th & Pike which goes up to Capitol Hill and potential riders must walk from 4th Avenue to 9th Avenue (5 long blocks UPHILL). The buses that stop currently at 6th & Pike only run during a couple peak hours in the afternoon--not enough to warrant eliminating that stop, especially since there are five long blocks between the current stops in the heart of downtown.	11/9/2014 9:13 PM
1339	Light Rail is unreliable in the tunnel (and too infrequent) due to congestion from the buses. There should be fewer buses in the tunnel so that we can get the most bang for our Light Rail buck.	11/9/2014 8:33 PM
1340	The combination of needing to transfer with service not running frequently enough results in it taking too long to get to my destination--i.e. I end up driving.	11/9/2014 7:36 PM
1341	Why? You tell us...	11/9/2014 7:21 PM
1342	It can take a long time to take a bus from Capitol Hill to Queen Anne, Fremont or Ballard, involving waits and transfers.	11/9/2014 7:13 PM
1343	It needs to arrive when we expect it to or we'll find a more reliable way...	11/9/2014 6:46 PM
1344	Over the Summer, my bus didn't come multiple times, and so I waited at my bus stop for another half hour waiting for the next bus - hoping it would come. Also, my stop is dark, unlit, and sometimes the bus just sails right passed, even though I flash my little flashlight.	11/9/2014 6:22 PM
1345	If I drive to work, it takes 20 minutes. When I take an express bus, then transfer to a local to get to work, it takes an hour to an hour and 15 minutes, travel and wait time. I take the bus, even though I waste over 2 hours of my day commuting IN CITY(Crown Hill - Cherry Hill) because parking is expensive and extremely limited. Route 28X isn't very frequent, and the scheduling is bizarre. Routes 3, 4 and 48 are completely unreliable at best.	11/9/2014 5:43 PM
1346	Certain lines I use, the 8 and the 48 and 49 come to mind, can be off their schedule by 10 or even 15 minutes	11/9/2014 5:29 PM
1347	I believe urban neighborhoods can support a higher level of ridership early morning/late evening and weekends, particularly Sundays. Many residents are ready to use transit for more than just commuting, but this will require higher levels of service outside of traditional periods. Rapidly growing south Lake Union neighborhood clearly needs large increases in transit service, and not just via downtown.	11/9/2014 4:28 PM
1348	I must allow 93 minutes door-to-door to get to work on time from home. That's nuts. Carpooling with my husband more than halves that transit time.	11/9/2014 4:11 PM
1349	When planning a trip there is usually a limited time frame to schedule my travel; if there are transfers, no nearby stop, or other difficulties I will choose driving. Doing a major shopping trip means I will take the car. In traveling to the suburbs my choice would almost always be by car. In my neighborhood I often walk to nearby shopping areas. Transport is not necessary.	11/9/2014 3:47 PM
1350	From Kenmore (Lake City area), it is too difficult to get anywhere west of I-5 and it would take far too long. Sound Transit needs to study a Bothell-to-Ballard underground light rail (subway) line. The bus services are never reliable because they share the roads with other single-occupancy vehicles - trains do not. A Ballard-Bothell rail line would bypass all traffic congestion (3rd worst in country?) and would be reliable, clean and four-times faster than taking the bus to the DSTT to transfer for NW Seattle. Until then, the least Sound Transit can do is start a Bothell-Ballard bus line.	11/9/2014 3:36 PM

1351	Metro buses and Transit meet my current needs fairly well. It is cheaper than driving myself even if it does take longer at times. The 70 series buses between downtown and the University are very crowded during rush hour. They often run into long delays getting into downtown and into the tunnel.	11/9/2014 3:22 PM
1352	I got used to very frequent bus and train service in Chicago; when you know you can just show up and not worry about schedules, it is MUCH easier to use transit. Here, I have to plan my trips ahead of time and often it's not as fast as biking.	11/9/2014 3:07 PM
1353	We need double to amount of at express busses.	11/9/2014 2:31 PM
1354	I walk from 16th Ave E and E. Highland to 1100 Eastlake Ave E because it would take longer to take the bus (2 or 3 transfers depending on how direct the route is). I wish the Link Light rail would run later at night -especially on Sundays. When I fly into Seatac it is frequently at about 11 pm. Like Light Rail has shut down and I need to take a cab.	11/9/2014 1:20 PM
1355	The combo of the two is a deal breaker on weekends. If I want to go to Ballard or Northgate from my home on Captol Hill, I have to go downtown to transfer. I can drive it in a fraction of the time. Time is really important for me.	11/9/2014 12:58 PM
1356	Regarding crowding and infrequent service, see question 5. Regarding safety, it's very common for riders to be harassed or threatened on stops, or on buses that run through 4th and pike/pine. On several occasions I've seen people threaten bus drivers when asked for a transfer or fare, and even seen one individual throw fireworks at cars and buses. There were police stationed nearby inside the bars at GameWorks and the CheeseCake Factory, who clearly saw this, and didn't care at all. Generally speaking, it seems like if it's after ~5PM when most businesses are closed downtown, the police don't care and just act as private security for the few businesses still open.	11/9/2014 10:34 AM
1357	If I have to transfer and my bus is delayed (say I'm taking the 48 to the 44 to get to Ballard), but the 44's are bunched up in the U-District I can end up waiting 20 minutes for a transfer. If I'm going to Pioneer Square, I usually get off the 10 around 5th and walk the rest of the way because going from 3rd to 1st, and then along 1st takes forever.	11/9/2014 10:09 AM
1358	Despite the above three occasional difficulties, I could absolutely not get along without Metro. Even with its difficulties it is irreplaceable. Sure wish there were a faster way of boarding people in wheelchairs; this is in my experience the one main thing (aside from serious congestion or specific events) that makes on-time service difficult for drivers to provide.	11/9/2014 10:03 AM
1359	Metro administrative overhead is eating the hard earned tax money being given to it, causing a reduction in service hours. This has been the case for over a decade now, and I-695 was used as the convenient dodge to start this destruction of our transit system. With the removal of the regional equity system, Metro funds are being centralized into the urban core, where they are least needed since those individuals have the most transportation options. The urban core needs less busses, and the suburban/rural regions much more. This is what one calls "increasing the transportation footprint", something Metro was given money to do by the taxpayers but neglected to actually do (instead deciding to add runs to existing parts of the transportation footprint). Every route coordinator should be fired for incompetence. It is their job to have reroute possibilities for busses to ensure they are not late. Every time a Metro route is 10+ minutes late, either the driver or route coordinator should be immediately fired without severance. The tardiness of our busses is uncalled for, unprofessional, and downright rude.	11/9/2014 9:57 AM
1360	Hard to stay out late in a lot of Seattle that shouldn't be. Hard to rely on for regular trips, especially w transfers, because schedules aren't kept reliably/frequently. I love the routes that work for me, but except a small area it isn't reliable enough.	11/9/2014 9:32 AM
1361	The transfers often lead to missed connections. The missed connections are due to traffic delays or sometimes lackadaisical drivers. This can make me seriously late and make transit use miserable. The traffic delays are due to poor transit prioritization when the bus is trapped behind single occupancy vehicles when the HOV lane ends.	11/9/2014 9:30 AM
1362	If the transit option is too time consuming, it's just easier to hire an Uber or drive my own car.	11/9/2014 8:54 AM
1363	None of the above. The cost is what prevents me from taking it. I can generally get to my destination less expensively by car.	11/9/2014 8:40 AM
1364	Getting to work in the morning by 6:00 AM is the problem. I take the first #71 bus in the morning at 4:55 AM after climbing up a steep hill to the bus stop 3 blocks away. If that #71 is late I miss my transfer to #3 downtown which makes me late to work.	11/9/2014 4:12 AM
1365	Slow buses are frustrating and take up alot of time out of my day.	11/9/2014 1:48 AM

1366	Transferring between buses that run on a half-hour schedule is a hoax. This is particularly true on the weekend. Given the latest feeling of being unsafe on Capitol Hill, I would like to take the bus home rather than walking, but I can't because the buses don't run that late. On a rainy day, when having the option between a crowded bus and walking in the rain, I prefer the latter.	11/9/2014 1:21 AM
1367	When a bus comes every 20 minutes and its 15 minutes late I consider that unreliable. This is what wastes 30-45 min of my commute.	11/9/2014 12:46 AM
1368	The three reasons are all linked. Because service is fairly infrequent, each transfer can add an extra 15-20 minutes, thus making what should be a relatively short ride a rather long one, e.g. from Ravenna to South Lake Union (where you have to take a 71 or 68/372 and then transfer to 70) or to Bellevue TC (transferring to 271).	11/9/2014 12:41 AM
1369	The only time I choose to drive over public transportation is when I know I'm going to coming home late and I refuse to be downtown at the 4th and Pike stop anytime past 10pm.	11/8/2014 10:33 PM
1370	Slow, never on time and far too unsafe.	11/8/2014 10:17 PM
1371	Current transit service focuses too much on 9 to 5 weekday commuters. This service is valuable, but in order for Seattle to become a city where people do not have to own cars, off-hours transit service needs to be expanded, as well as night-owl service.	11/8/2014 10:01 PM
1372	None of the above. I use transit out of choice and necessity.	11/8/2014 9:56 PM
1373	buses are stuck in same traffic as cars	11/8/2014 9:45 PM
1374	When the 77 doesn't run, I take the 41, though it isn't nearly as convenient. But there are times that the 41 doesn't run often enough, which makes alternate travel options better. For example, we used a car2go to get to the Seahawks game last week, since we had a 30 minute wait for the next bus. The buses are really crowded. Luckily I get on the 77 or 41 headed north after work, at the Int'l District station, so I can get on. But by the time the bus gets to the Convention Place stop, there's not enough room for people. And I don't get why there aren't tons more buses at the Int'l Dist station after Seahawks and Mariners games. There are always huge waits there, and it seems like KC Metro could run more buses from there, to other main stations (like Northgate), just to get people away from the stadiums.	11/8/2014 9:34 PM
1375	SAFETY at light rail stations	11/8/2014 9:04 PM
1376	I live in NE Burien and work a late swing shift. Also, I worry about safety a lot on the LLR.	11/8/2014 7:12 PM
1377	I have a very limited amount of free time, so if a bus ride will take longer than 45 minutes or if there is a transfer that may not happen smoothly, I will often just not take the trip. I have the luxury of living on Capitol Hill which means I can walk to basic amenities like shopping, restaurants and the library. I will often just walk downtown instead of taking the bus since the schedules can be unreliable and I can save the \$2.50.	11/8/2014 6:45 PM
1378	Arriving at seatac late the light rail doesn't get all the way to city. Everybody gets kicked off and transfers to the bus ! Unsafe.	11/8/2014 6:18 PM
1379	See above answers to #5. Also, weekend buses, as they aren't often express buses, tend to take too long to get to my destination. For the airport directly from my home in Roosevelt, it often takes far too long between the bus, transfer, train - as the express buses often aren't running when my flights are there. But I don't fly very often. My husband travels for business and usually takes a cab or drives.	11/8/2014 5:27 PM
1380	Too expensive.	11/8/2014 5:27 PM
1381	I typically leave Capitol Hill for Redmond at 5:30am	11/8/2014 5:18 PM
1382	Bused are normally late and not reliable enough yo get to wotk	11/8/2014 4:51 PM
1383	The top concern is that some service takes too much time. I have found that it's a combination of closely spaced stops in dense areas. For instance, the E-line makes stops every two blocks between Pine St & Bell St, and every five blocks or less between N 76th and N 115th. There's even a stop with 3 blocks of spacing (at 155th and 152nd) Also, there are riders who are still using cash. Metro should begin to think for progressively in fare structure and policies and accessibility that encourages riders to use ORCA. People fumbling for change slows the bus down.	11/8/2014 4:38 PM
1384	Often when there are schedule or stop changes the signs telling you are not put up in a timely manner and I don't find out about them until the day it happens. This is very frustrating.	11/8/2014 4:36 PM

1385	Getting from my home to Capitol Hill takes about 15-20 minutes by Uber, and about 60-80 minutes by bus. That's a huge time differential, and it's magnified by the fact that I need to get home from wherever I'm going. It's similarly bad for virtually every trip pair I can think of. Please note that I have absolutely no objection to transfers. I understand very well that well-chosen connection points can create a bus network that is far faster and more frequent than a spaghetti mess of one-seat rides. I think a lot of the objection to transfers in today's network comes from two things. First, most buses come very infrequently. Waiting an average of 7.5 minutes for a 15-minute bus is bad enough if it's your first bus (though it's mitigated by the fact that you don't have to go to the bus stop until the bus is 2-3 minutes away.) But waiting an extra 7.5 minutes for a second 15-minute bus is a lot worse, and it's compounded by the fact that you have nothing to do but wait. For a round-trip involving two 15-minute routes, that's a total of 30 minutes of *expected* waiting time. Unreliability could make it a lot worse. It's also worse if any of the buses only come every 20 minutes or every 30 minutes. But note that even 15-minute frequency means a whole lot of waiting! By comparison, imagine that both buses came every 5 minutes. Then your expected wait time for the whole round-trip would be 10 minutes, which really isn't any worse than a taxi, or the time to find a parking space. Second, the "connection experience" leaves much to be desired. Connection points are often in unsafe or poorly-lit areas, and fully exposed to the elements. The height of buses (even low-floor ones), and the tight aisles, can make it difficult to board or exit, especially if you have mobility impairments, or children, or lots of luggage. Compare this to the experience of connecting between two different subway lines. There's a level walkway all the way from the station entrance to the subway train itself. You'll wait in a well-lit and warm area. There are enough other passengers to make the area feel safe. Connecting between two buses (or between a bus and a train) won't ever be as good as connecting between two trains. But it can be a heck of a lot better than it is now -- and if it was, I think we'd see far fewer people objecting to transfers.	11/8/2014 3:34 PM
1386	I don't like waiting in the dark for bus in evening when they run infrequently	11/8/2014 3:29 PM
1387	Primarily because weekend service is limited compared to weekday service	11/8/2014 3:06 PM
1388	Buses are overcrowded, infrequent, and extremely unreliable. Sometimes walking is faster. Sometimes I walk uphill up Denny and not only beat the 8 but TWO 8 buses!! Buses are a complete and total mess in this city.	11/8/2014 2:50 PM
1389	We need better and more accurate GPS coverage for the one-bus-away application.	11/8/2014 2:06 PM
1390	Straight to or from Downtown from home and work home are usually not a problem, but trying to stay car free for anything else is problematic due to infrequency, too many transfers, or just not feeling safe.	11/8/2014 1:51 PM
1391	I live deep in suburbia for age reasons.	11/8/2014 1:21 PM
1392	UW and downtown are hubs. South Lake Union isn't, which given Amazon/Fred Hutch/SCCA existence, is just odd. I bought a house happy that 71 passes nearby, but THEN it's only 71x which goes to Downtown during peak hours...bypassing south lake union! this was very sad to learn.	11/8/2014 1:17 PM
1393	Many buses have poor transfer connections with the link. The link needs more early morning trips heading northbound to downtown Seattle, the 255 needs better routing through totem lake and more early morning trips.	11/8/2014 1:11 PM
1394	Bus schedule along 1st Ave. South to and from downtown Seattle is unreliable. Link light rail from downtown Seattle to airport does not begin early enough to allow catching a flight before 7:00 a.m.	11/8/2014 12:29 PM
1395	I have to transfer and it seems like the routes are not set up to allow for this because I usually just miss the connecting route and I'm forced to wait 20-25 minutes rain or shine.	11/8/2014 12:12 PM
1396	Would like something more direct from First Hill to Fremont, Capitol Hill, etc. While it's not a long walk from 7th down to 3rd Ave, the stops on 3rd Ave are a little sketchy on weekends and off-hours during the day. While I've never seen anything bad happen, and they may not actually BE unsafe, sometimes they just have that FEEL of unsafe. Lots of vagrants/beggars around that area (transit riders are a captive audience, after all).	11/8/2014 12:01 PM
1397	More trains, or smaller vehicles that run only up main thoroughfares would be nice. Also, after I work at NOAA, I go to the gym at Magnuson, but the 30 stops running by the time I'm done exercising, so I have to get a ride.	11/8/2014 11:58 AM
1398	I live on Bellevue Avenue East. The 47 bus used to be my best way to at least begin to get somewhere.	11/8/2014 11:57 AM
1399	I have no idea why the organization decided to implement unreliable and infrequent service or limit service to narrow windows if time.	11/8/2014 11:56 AM
1400	Fare system: pay to the driver should be discontinued or charged more to encourage use of Orca cards.	11/8/2014 11:50 AM
1401	Usually in the morning the E Rapid Ride is crowded. Generally at night there are locations that I do not feel safe due to poor lighting or location.	11/8/2014 11:48 AM
1402	Transferring between buses is always very risky--one bus running late, or missing a connection, can completely wreck travel plans.	11/8/2014 11:27 AM

1403	Stairs too high on some buses. People don't move from longitudinal (front) seats to accomodate my mobility impairment. Both buses that "serve" VA stop far from entrances. Luggage from airport rail riders blocks seats. Rail cars designed with too much seating space lost to doors. Only standing space on rail is near doors blocking entrance/egress. RapidRide stops too far apart: you have gained speed at expense of custome convenience.	11/8/2014 10:50 AM
1404	No bus stops near work, although there used to be. I have to walk about a mile to get from 5th & Jackson to Pier 36 (near Safeco)	11/8/2014 10:46 AM
1405	Sometimes I need to transport more things than is feasible to carry on a bus.	11/8/2014 10:42 AM
1406	Because it sucks to stand in the rain for 15-20 fucking minutes when the bus was supposed to be there but is no longer on time due to picking up 15 cripples along the way, getting later and later all day long until they get to rush hour and can't get within an hour of the posted schedule. Then 3 buses in a row come along because they were all backed up taking their breaks at the same time. Fuck you people make it hard to ride the damn bus.	11/8/2014 10:23 AM
1407	I take the bus daily to commute to my workplace in Redmond. This works well. What doesn't work, and should in my opinion: evening visits to Capitol Hill - the bus takes too long. Trips to the airport: it takes way too long! Plus the 1/3 mile walk at the airport is a deal breaker when you have luggage. I still hope it will be possible to take the train back from the airport, get off at Husky stadium and get a quick connection to a bus to get to the U-District.	11/8/2014 10:17 AM
1408	Often it takes too long to get to my destination because buses make several stops along the way. I know these are definitely necessary, but it still takes more time to get to where I'm going. Often service isn't frequent enough when I'm trying to travel at night from unsafe areas. Buses are always overcrowded at rush hour on weeknights, and many times I've seen people be denied entry onto the buses because there simply isn't enough room. I find that I have to be strategic about where I get on the bus, because if I get on a bus one stop too late, there may not be enough room to get on. This has happened to me many times, and it's pretty frustrating.	11/8/2014 9:58 AM
1409	I would like earlier service to downtown in the morning on weekends. busses don't have enough time at the end of the line so they leave late far too often.	11/8/2014 9:27 AM
1410	Too many routes have big gaps between buses so connections are either "just missed" or "wait 45 minutes".	11/8/2014 8:59 AM
1411	We take public transportation, so none of the above stops us for using it. More frequent weekend service would be welcome.	11/8/2014 8:47 AM
1412	The stop nearest my work is up a steep hill on a poorly lit street with no sidewalks. #124 @ 130th and International Blvd.	11/8/2014 8:41 AM
1413	See above	11/8/2014 7:53 AM
1414	If I have to get somewhere on time, I have to weigh the risk of buses being late against the time it takes to leave early enough to mitigate the risk of bus delays; on weekends and evenings, this generally means I drive. Since service isn't increased for sports events and festivals, it becomes unsafe to ride due to over-crowding and poor behavior of fellow riders (generally the result of intoxication). There is generally bird poop on the seat backs, and I have seen dried saliva on Windows and plastic partitions. Sorry, I can't pick just three.	11/8/2014 7:01 AM
1415	For me it is most important to have frequent, reliable service in key places so that I can use transit as a way to get around generally without a schedule. The key metric is travel time (including waiting). I would gladly transfer between buses or bus/train, as long as I can get places quickly. I live south of seattle and commute regularly, but also use transit within the city for various trips. I have to drive to a park-and-ride as the nearest bus stop to my house is over a mile away and uphill. The biggest penalty for this is the time of the walk. I like using Link light rail because it is doesn't require knowing a schedule with frequent service, and is generally clean. I wish the tracks were smoother towards the south end. It shakes a lot and is hard to use a laptop at times. I need the transit system to work as a whole so I can easily get to/from various places to a main line quickly. I encourage buses to require orca to speed boarding.	11/8/2014 4:53 AM
1416	No good service to Coast Guard Base @ Pier 36 Need to walk 4/5 blocks from home to catch bus that doesn't travel through downtown. Often I have multiple stops which can be difficult by bus/light rail Late evening service is unreliable.	11/8/2014 4:17 AM
1417	Sometimes it's faster and more convenient to drive than to take public transportation to go where I was to go, more so if I have to carry many items that are not light, like books and equipment.	11/8/2014 1:40 AM
1418	It takes so long to get anywhere. I can take 45 minutes of buses to get somewhere or drive in 12 minutes.	11/8/2014 12:23 AM

1419	If my daily commute takes a long time, that's a huge deterrent to riding the bus, because it doesn't take long for that to really wear you down. Once a commute starts to creep over an hour (one way), that's when I seriously start to consider whether it's worth it. I hate transfers, because even if they don't actually add much more time to the ride, they do tend to make it FEEL longer and more difficult. Transferring is a big deterrent for me in the winter and fall, since it's dark, cold, and raining so much of the time. For my old commute between the Central District and Pioneer Square, I would endure any sort of weather, because it was just one bus. Make it two buses though, and those nasty, rainy mornings start to feel like much more of a hurdle. Having to stand on a crowded bus all the way to Bellevue—getting all hot and sweaty in the summers or in your winter coat—is never a fun way to start your day. I've actually gotten in the habit of waking up and getting to work earlier, and riding my first bus a couple stops further along so I can catch my connecting bus earlier in its route before the seats fill up. The 271 runs pretty frequently and generally isn't a problem, but only with the aforementioned habits have I eliminated instances of not getting a seat. If I had to push those habits even further I'd start to take the bus far less.	11/8/2014 12:21 AM
1420	101 is crowded and often runs late due to I5 conjection	11/7/2014 11:58 PM
1421	Service is generally great in the central area. If we have to travel outside the central area, we will drive as the bus connections are ghastly.	11/7/2014 11:56 PM
1422	TAKES TOO LONG - costs too much - I'd have to transfer 3 times just to go to work, bus schedule isn't reliable too, that light rail mess is too slow from the airport to Downtown, it shouldn't take over 40 mins and that Rainier Valley area is super ghetto and not a safe place to even go through.	11/7/2014 11:54 PM
1423	Trips to areas across town take too long or are inconvenient.	11/7/2014 11:13 PM
1424	Poor planning for the West Seattle Junction area. The buses are too crowded and get stuck in traffic on SR 99.	11/7/2014 10:56 PM
1425	I take the bus to work but let us say I need to go grocery shopping (unplanned). Even though the grocery store is only a couple miles away it would take too long because the service is not frequent enough. Going to other destinations takes too long and requires transfers, which are hard to coordinate. Much easier to driver. Taking a bus later in the evening, especially if you are a woman, can be uncomfortable.	11/7/2014 10:32 PM
1426	In many cases service frequency drops dramatically at night, and also traffic is a big problem causing delays. Especially on routes through downtown that do not use the tunnel, or go on freeways where there is no HOV lane available, or the express lanes are in the opposite direction.	11/7/2014 9:52 PM
1427	On numerous occasions I and others I know have been harassed at bus stops around the city and on the buses. There have been many times that loud abusive drunk people have been allowed on the bus even though they go on to create problems. In these situations the drivers will not ask these people to get off.	11/7/2014 9:35 PM
1428	The biggest nuisances I have found are a lack of integrating the bus/light rail connections at Mt Baker, and the light rail not running late enough from the airport	11/7/2014 9:15 PM
1429	Speed and ease of timing departures prime reasons for choosing bike, car2go, or uber over transit.	11/7/2014 9:10 PM
1430	Downtown tunnel Westlake and Pioneer Square stations are poorly lit (University Street station is well lit), ID station southbound is also poorly lit and partially exposed to rain. 71 buses are frequently dirty and interior lights are out.	11/7/2014 9:08 PM
1431	Buses are crowded due to infrequency of routes and scheduling cuts. Downtown is already unsafe along 3rd Ave. Sometimes I'd rather pay Uber to drive me home than wait another half hour for a bus on 3rd & Pine.	11/7/2014 8:50 PM
1432	My commuter bus does not run on the weekends or in the evening (after 5:30). Sometimes I need to stay after 5 pm for work, so I have to make alternate plans to get home. This can mean that I have to make connections in the evening and often wait longer for the buses. Sometimes I arrange for a ride or to drive if I have to stay late for meetings on UW campus.	11/7/2014 8:34 PM
1433	The 23rd Ave corridor is greatly underserved with ththe volume of riders on this line to rush hour. I often watch 3-4 #43 buses pass buy in front of the U.W. Hospital bus stop on Pacific before my evening southbound #48 arrives. When it does is very crowded.	11/7/2014 8:28 PM
1434	you dont offer service any more that doesn't go through dt seattle	11/7/2014 8:22 PM
1435	We need bus priority lanes on major arterials.	11/7/2014 8:07 PM
1436	There are three busses that run from near my house into downtown. The fastest option (64X) is completely unreliable. The other two options (71 and 76) take over an hour during peak travel times.	11/7/2014 8:03 PM

1437	Too long: Transit (+ car!) commute: I walk, bus or pronto downtown to catch the 522. Get off at the Kenmore P&R and drive my car the last couple of miles = 1 hour +. Car: 22 minutes. This comparison is even worse in the evenings, even though my car also gets stuck in traffic. It is insane that the buses have no dedicated lanes on major routes. Frequency: Missing a bus is a big deal if the bus comes every half hour. It makes it so that I can never just leave work when I am done. . . I need to strategize about getting home. This is draining and distracting from my work and all adds to deterring me from taking transit. Reliability: Traffic should not stop buses on major routs. There should be dedicated lanes the whole way, including on the interstate. As it is, if there is anywhere I need to be in any kind of normal time range, I can't count on bus transit.	11/7/2014 7:31 PM
1438	I can't take transit to work for the above 3 reasons. If I could easily bus to Bothell, I'd try to find a way to leave my car there during the week to take from the bus stop the few miles to and from work. Currently, it just won't work.	11/7/2014 7:25 PM
1439	I think being able to jump on a bus every 10-20 minutes is reasonable vs. alternatives. However, if your goal is providing cheap access to an alternative, you've already succeeded, and you've already maxed out the part of the population that can't afford alternatives. If your goal is to show the larger part of the population that typically doesn't use bus service that this is an equal alternative to using Car2Go, or your personal vehicle, then you've got to find a way to demonstrate some level of operational efficiency from point A to point B. Not all routes, but more routes need priority so it is on time and/or faster from destination to destination.	11/7/2014 7:00 PM
1440	The 76 takes so long in the evening, and the schedule isn't that reliable so I often spend even more time waiting in the bus tunnel for a late bus. It is also very crowded, but because I have a very early stop that is not as much of an issue for me.	11/7/2014 6:20 PM
1441	The downtown stops are terrifying and dangerous. Something has to change. On my commute daily, I'm asked to buy drugs, to become a prostitute, and see people shooting up and smoking crack. DAILY. 4th and Pike and 3rd and Pine are the worst. Busses are in desperate need of updating. They smell so bad (even when vagrants are not on them), that they have occasionally made me dry heave. New busses, please!	11/7/2014 5:54 PM
1442	Transferring is never a problem for me if both legs are frequent! Once I didn't go to a thing on Mercer Island because I knew I'd have to wait 29 rainy minutes if I missed a 550.	11/7/2014 5:36 PM
1443	Local bus lines take too long for cross-town trips.	11/7/2014 5:22 PM
1444	None of these really apply to me. My only real complaint is Community Transit's continued inability to provide info to OneBusAway. I mean for the love of christ, how hard is it to get that together?	11/7/2014 5:19 PM
1445	It takes too long - this isn't a huge deal. I expect it, but it does make me hesitate once in a while. Service isn't frequent enough - this is about the Sounder train going south in the morning from Seattle or North in the evening to Seattle. This is basically non existent. I have to transfer - I hate that and almost never take a route when I have to.	11/7/2014 5:17 PM
1446	Service should be frequent to at least 10 p.m. Service needs to start earlier in the day so that the first trips into Seattle arrive between 5:00 and 5:15 a.m.	11/7/2014 5:05 PM
1447	Working retail the hours don't run early/late enough during the holiday season when the malls are open late	11/7/2014 5:04 PM
1448	Please empower drivers to not tolerate loud or obnoxious passengers. Obviously drunk or disorderly passengers should be kicked off the bus as soon as possible -- nobody would mind. People would be very relieved.	11/7/2014 5:01 PM
1449	There is only bus service from the Admiral district of West Seattle to downtown during rush hour. It's already a 2-bus commute to get to work at the University of Washington during rush hour, but at any other time - i.e., if I have to work late, or go into work on the weekends, or go home in the middle of the day, it takes three buses for me to get to work. It takes up a lot of my time, and makes me think about driving more - which I'd rather not do, if there were better transit options.	11/7/2014 4:49 PM
1450	See my answer for #5	11/7/2014 4:41 PM
1451	Many of the bus stops are not well lit, making it very unsafe, especially when it gets dark outside. Some of the routes I take get very crowded (I'm looking at you #8!) and the bus is so full it won't even stop. Transferring can cause long waits, especially if the bus is late, and it takes a really long time to get to certain destinations.	11/7/2014 4:34 PM
1452	I work evenings, so I'm often have to wait half an hour to an hour for a bus. I often feel uncomfortable waiting at dark bus-stops for that long.	11/7/2014 4:31 PM
1453	See above explanation. Only rush hour service and steep climb up from Lake WA Blvd to # 14 or long walk to #2 in Madrona Park.	11/7/2014 4:28 PM
1454	I love being able to take transit to the airport, but getting from 85th/Greenwood to Seatac can take up to 2 hours including the transfer downtown.	11/7/2014 4:27 PM

1455	Broken sidewalks, drug dealing on First Hill/Madison stops, aggressive and uncivil street behaviors on downtown Seattle streets as I wait for transfers, increased loitering and uncivil behavior in Freeway Park, poor bus stop lighting, lack of "one bus away" signals in bus tunnel. That is a huge irritation - If you could fix one thing, get internet connectivity in the tunnels, so we can tell when our buses are going to arrive!	11/7/2014 4:19 PM
1456	The three reasons I mention above are the top three reasons for not taking public transportation on a trip that does not include Downtown as one end point. As clarification, if the service is frequent enough, there are factors that seem to make the service unreliable and make it take too long to arrive. If the service is fast - it seems like its never frequent enough. But - the most frequent reason is lack of reliability and the effect it has on taking too long to get to the destination. Adding routes that are 10-minute frequency into the evenings and mid-days would be good too.	11/7/2014 4:15 PM
1457	It takes a long time to get to the Eastside from Seattle, and some express buses do not operate on weekends.	11/7/2014 4:15 PM
1458	In the later hours of the day, I dislike riding the bus because of certain people that make me uncomfortable ride the bus later in the day. Also it is often more efficient to drive than take the bus because it takes less time, while part of that is waiting for the next bus to get which are close to a half hour apart during non peak hours.	11/7/2014 4:12 PM
1459	Light Rail stations and downtown bus stops are full of open crime. The back of the #7 is basically a drug market. I often don't feel safe waiting for the bus at more remote stops. Rush hour buses are packed with no place to sit or sometimes even no place to stand. Buses are consistently late and trips take a lot longer than estimated on maps. Weekend bus schedules are especially erratic. Scheduled buses sometimes "disappear," especially on weekends. I've waited an hour for the 99 before.	11/7/2014 4:10 PM
1460	Capitol Hill and downtown bus riding are not very safe at night.	11/7/2014 3:59 PM
1461	I try to take routes that are somewhat on time. Who has time to wait an extra 15-20 mins when a bus is late? Driving is an option for me, so if a bus is regularly more than 5-10 mins late I will just drive instead. As I mentioned before, I avoid short transfers. It's a waste of time. Buses not being frequent enough is more of a concern if I have to transfer. If the first bus is late and just misses a connection and I have to wait 30 mins for the next bus, I will just drive instead. I don't have time for that... Who does?	11/7/2014 3:56 PM
1462	It is faster to go by car	11/7/2014 3:55 PM
1463	See previous comment.	11/7/2014 3:45 PM
1464	1. No early/late service to the airport from light rail. 2. No reasonable way to get to Alki Beach area during the day from North Seattle 3. Late Afternoon bus schedules from downtown are unreliable	11/7/2014 3:45 PM
1465	72. Route 72 is almost always late (more than 7 minutes). And, on Sunday, it is really hard to catch one (only runs once per hour and is very, very late).	11/7/2014 3:35 PM
1466	I can handle one transfer, but two or more is too inconvenient because all timing has to work right. Sometimes, I don't take the bus because I know I'm going to be out late and don't really like waiting for a transfer in an area that isn't well populated and lit up.	11/7/2014 3:33 PM
1467	I don't mind transferring when each of the buses/trains come frequently, but I hate having to transfer when 1) the transfer location is unsafe/unpleasant (like any freeway station or the stops near I5) or 2) the bus I'm transferring to comes less than half-hourly. I would like more dedicated bus lanes in places where traffic is horrible, like the Denny/Mercer area.	11/7/2014 3:25 PM
1468	Sometimes I have concerns on the cleanliness and rudeness of passengers, or even safety concerns which aren't addressed even when submitting complaints to metro.	11/7/2014 3:20 PM
1469	Why? Seems like budget cuts. Metro bus service to my NE Seattle neighborhood has been cut quite a bit in recent years. Routes cut (#79, #306), number of trips reduced (#77). Infrequent, unreliable trips means leaving super early for work, or risking being late. Infrequent, unreliable trips after 6 pm when I need to get home after working the night shift make me feel unsafe, and I need to get home to bed so I can get up for day shift the next morning.	11/7/2014 3:05 PM
1470	Frequency and reliability of existing service prevent me from using transit to entertainment options later in the evening. Additionally, when traveling on buses, there are often delays related to buses not being able to quickly navigate streets due to congestion (e.g., The number 8 bus between Queen Anne Ave and Capitol Hill along DENNY WAY.) Managing traffic corridors to ensure buses have clear access is imperative to removing the frustrations with trying to reach destinations and being delayed. Also, based on the current ridership on Sound Transit's Link Light Rail EXCEEDING projections, it is increasingly uncomfortable and frustrating how crowded the trains get during peak commuting hours; evenings and mornings. Additional Link trains should be added to improve capacity or peak communte times need to be extended to manage the increase ridership.	11/7/2014 2:55 PM

1471	One of my primary complaints is that stops are spaced too closely together, which dramatically increases travel times. This has an indirect effect of increasing the number of service hours necessary to maintain a given level of frequency on a route, and thus reduces the frequency achievable for a given level of public expenditure. This in turn results in increased crowding as the same number of people are forced onto a smaller number of vehicles per hour. Wider stop spacing also makes it more economical to implement off-vehicle fare payment (pay stations) and all-door boarding at every stop, further reducing dwell times and increasing speed (and thus frequency and reduced crowding). I did not check "schedules are not reliable" because if you are running buses anywhere near the frequency that an urban transit system demands, then schedules should be irrelevant. Obviously, Metro isn't there yet. I would also appreciate more comfortable seating similar to those found on Sound Transit buses.	11/7/2014 2:54 PM
1472	There should be more frequency around the clock for major N/S and E/W routes like the 44, 5, D, E, etc.	11/7/2014 2:50 PM
1473	Direct routes work well, but transferring to another bus takes too much time. Taking a bus to light rail works great.	11/7/2014 2:39 PM
1474	Some of the Capitol hill routes have really old buses that don't seem to ever get a deep cleaning.	11/7/2014 2:35 PM
1475	nothing prevents me really. Sometimes destination and timing and amount of luggage make car more convenient.	11/7/2014 2:35 PM
1476	no direct route from capitol hill to pioneer square	11/7/2014 2:34 PM
1477	Transfers are unreliable b/c of bus delays. Buses are late and take too long.	11/7/2014 2:19 PM
1478	They buses don't come often enough and are often overcrowded. They are not easy walking distance from my home. They are often smelly or too hot or too cold. Sometimes there are creepy people on the buses who cause disturbances or are noisy or sometimes too dirty or smelly to sit next to. I hate standing in the rain waiting for a transfer or waiting for late buses. The buses are seldom on time. The buses get stuck in traffic - if I'm stuck in traffic, why not be stuck in my own car which is more predictable and which does not smell bad, and which actually takes me to the places I need to go without having to stand in the rain and wait?	11/7/2014 2:11 PM
1479	would love sounder weekend service to get home to see family on weekends.	11/7/2014 2:00 PM
1480	Infrequent service means that many errands like going to stores can be a problem if I have to wait in the rain for 15 minutes on one end.	11/7/2014 1:56 PM
1481	The 8 is always stuck on eastbound Denny behind all the SOV trying to get on 1-5 south	11/7/2014 1:48 PM
1482	If I'm often travelling after 10pm, service, especially to/from the eastside is extremely infrequent.	11/7/2014 1:34 PM
1483	If it is going to take me over an hour to get to the place that it would take 15 or 20 minutes to drive to, I just don't have that kind of time to waste.	11/7/2014 1:32 PM
1484	I live 12.6 miles from my job. I finish at 7pm. The 101 arrives at 6:58 pm and the next one is at 7:28 pm. I either wait for the 7:28 and get home at 8:05 pm or take the 106 at 7:06 pm and get home at 8:00 pm. (international station to Renton TC). Once the peak rush hour is over the options are far between and limited.	11/7/2014 1:29 PM
1485	Living on Cap Hill, I can get many places very easily and quickly. What's difficult is north of canal, since I almost always have to transfer. Because of the "interesting" people on the Cap Hill buses in the evening, I don't ride a bus after 7 pm.	11/7/2014 1:25 PM
1486	If I need to be at an appointment in U-District from Capitol Hill, it should not take me an 1+ hours to get to a destination that takes 15 minutes by car.	11/7/2014 1:25 PM
1487	What do you mean, why? The above reasons speak for themselves.	11/7/2014 1:24 PM
1488	I still use it, because I have to, but: I have to assume the bus that OUGHT to get me there on time will be late and take the earlier one instead -- which leaves me standing in the rain and/or cold for 15-20 minutes waiting for my transfer. I have to be resigned to it taking me an hour and a half or more to get home from work (less than 10 miles) because my first bus runs chronically late so I miss my transfer more often than not. I have to plan where I make my transfer based not on convenience or time, but on the fact that the bus will eventually be SRO so I have to get on it at a point BEFORE that happens because if I stand on a moving bus for an hour and a half I won't be able to walk when I get off.	11/7/2014 1:22 PM
1489	Frequency and speed of service. Frequency can overcome unreliability, and dedicated paths can improve both speed and reliability without needing additional frequency.	11/7/2014 1:17 PM
1490	Getting to places other than downtown off peak is very difficult unless during a commute period especially outside of the inner neighborhoods.	11/7/2014 1:14 PM
1491	My local stop was reduced - Route 30 - so I can't take it to the U-district farmer's market anymore.	11/7/2014 1:02 PM

1492	Sometimes the bus just doesn't come for some unknown reason.	11/7/2014 12:55 PM
1493	It should not take me longer to get to work on public transit than in my vehicle. Otherwise, what is the point? Also, if you do not pay have to pay to park your car, transit is actually more expensive.	11/7/2014 12:43 PM
1494	the 2 bus takes me 25-30 minutes to get from 27th and union to 7th and Stewart. I have walked it in 30-35 minutes before. Not nearly quick enough	11/7/2014 12:42 PM
1495	Because Metro is poorly managed	11/7/2014 12:36 PM
1496	Reason one. It is often impractical to carry much on bus or train, not only for room, but because it can be too hard to carry stuff from or to stops. There isn't a solution to this, but it is the many reason I don't use public transportation.	11/7/2014 12:33 PM
1497	Many of the buses I ride take too long to reach my destination. They are often stuck in traffic or don't have their own transit lanes. Also, some routes - such as freeway buses - get stuck in traffic, but don't take the side streets to reach downtown.	11/7/2014 12:27 PM
1498	I am disabled and can only walk two blocks. I must sit when waiting for a transfer. They don't want me to use a wheelchair because and I will get weaker. So if the transfer doesn't have a place to sit I can't go to my destination. I also hate waiting for buses for half an hour. It's ridiculous.	11/7/2014 12:25 PM
1499	The only route that serves my home neighborhood is a peak-only shuttle route. That route, specifically, is relatively reliable, but only comes once every 30 minutes to an hour, and is not timed well with any connecting bus routes, only the Sounder train, and only in the direction commuting to Seattle in the morning and back in the afternoon. I work in Tacoma, not Seattle. Moreover, if I were to wait for the Sounder to Tacoma, which does not align with my work schedule, the buses from Tacoma Sounder Station to Old Town are not aligned with the Sounder Train arrival and are also very infrequently, only coming every 60 to 90 minutes. I can drive this entire route in under 30 minutes, making bus completely illogical.	11/7/2014 12:19 PM
1500	The route I take most often is the 74 and it only runs in the morning and afternoon on weekdays. It also takes 40 minutes as opposed to 20 minutes driving.	11/7/2014 12:16 PM
1501	This is the biggest impediment. I'll ride a single bus even if it takes a long time, rather than transferring, which is unpredictable in the real world. Through-routes and longer routes are great for this. If you're transferring between two "every 15-minute" routes, which sounds fine on paper, you still have to add in 15 minutes to your commute time in case you miss the second bus. If you're travelling a short distance (Harborview to 23rd/Jackson, for example), this is unacceptable. (This is why the 4 is so great!)	11/7/2014 12:11 PM
1502	Having to switch buses, usually in the University District or Downtown can be very time-consuming. The more direct a bus line is, the more likely I am to use it.	11/7/2014 12:05 PM
1503	One noticeably difficult spot: The buses going from 3rd Avenue downtown to Harborview Medical Center (up James St. to 9th Ave) are mostly crammed/packed until those getting off at Harborview get off. Rush hour particularly, it's usually standing room only if you get on at 3rd & James, up to Harborview. In my dreams a shuttle bus would do that "downtown to Harborview" route & take care of those Harborview attendees, leaving the regular buses to get to their routes on time & without being packed in like sardines. That uphill on James St. to 9th is where buses have most often broken down on the 3/4 routes I normally ride. Also, after the Seattle Center stops, the 3/4 buses heading to downtown change into either the 2/3/4 (the 3 become as 4 and the 4 becomes a 3 - why???) and you suddenly find yourself on a route you didn't want - drivers announcing they changing to a different number would help.	11/7/2014 12:02 PM
1504	I would use public transportation more often if service was more frequent. I understand that sometime buses are delayed, or trips cancelled suddenly, but since trips are so infrequent, it can make turn short trips into long delays.	11/7/2014 12:00 PM
1505	My answer is self-evident. If the stops were on 1st Avenue where I live I would be a daily user, as I was before the service on 1st Avenue was completely eliminated. I now use my car twice as often as I did before the changes.	11/7/2014 12:00 PM
1506	Crowding on the 70-series busses is a huge problem, particularly in the evening. I prefer the 74, but will take 71, 72, 73 or 76 if any of them come first. I frequently get left on the platform at Westlake due to overcrowding.	11/7/2014 11:58 AM
1507	Because people leave trash on the buses. Is there a trash can on the bus that refuse could be disposed of?	11/7/2014 11:57 AM
1508	bus service in the downtown tunnel is slow at rush hour due to too many buses and delays loading buses	11/7/2014 11:55 AM

1509	Not enough late night service for entertainment trips. There are certain parts of the city I would like to reach from Capitol Hill or University District for a night out but refrain from doing so because the transit service does not run late enough for the return trip home. For commuting, I think transit service is great but it can be frustrating when stuck in traffic with other cars. I wish there was some way to reward transit riders with exclusive travel lanes because bus riders are more efficiently using roads than single-occupancy commuters.	11/7/2014 11:54 AM
1510	Uncovered bus stops are really unpleasant when it's raining	11/7/2014 11:52 AM
1511	why what? I use public transportation all the time, but when I DON'T is for those reasons that I checked	11/7/2014 11:44 AM
1512	Lack of frequency on my home line is a big factor for me wanting to pursue other modes.	11/7/2014 11:40 AM
1513	As a pedestrian I witness Metro drivers going through red lights, speeding through yellow lights, blocking crosswalks due to not being able to clear the intersection (in addition to blocking the intersection for other vehicles), speeding down avenues and streets going 40-50 mph; in general most drivers I witness are not very good at driving!	11/7/2014 11:40 AM
1514	Work to home is just over a mile, but its usually faster to walk than take a bus.	11/7/2014 11:39 AM
1515	Seattle's transit system is in the process of being built out so it is not comprehensive and doesn't work as a transit SYSTEM yet. Hopefully there is the political will to accelerate towards that goal. Why do we not have this yet in the year 2014? http://www.seattlesubway.org/ We have two sports stadiums—one of which was built against the public's will.	11/7/2014 11:30 AM
1516	Crowded long bus rides are the top reason. For instance, the commute from Northgate Transit to Downtownon the 41 takes a long time for it being only 7 miles and no stops between.	11/7/2014 11:28 AM
1517	It's often just as fast to walk (and walking is free).	11/7/2014 11:21 AM
1518	cost	11/7/2014 11:20 AM
1519	In order to connect to Link light rail @ Othello Station, I'd need to take the route 50. The first time available in my area is a little past 6:30 a.m. and I need to be at work at 6:30. For the evening commute it is fine if there isn't a broken bus in the tunnel. That's the variable that makes me nervous because I have to pick up kids after work and I'm charged \$1/minute that I'm late. Tunnel isn't reliable for train timing when buses are in there breaking down and holding up time waiting for people to board.	11/7/2014 11:18 AM
1520	If you have to transfer, pfff forget it. That means waiting around outside for 15 minutes minimum, usually. And if it's a Sunday? Or after 7? Then you might be stuck waiting 1/2 hour in the dark and cold somewhere, just a sitting duck for any rando who passes by.	11/7/2014 11:17 AM
1521	The last 25 is at 630 leaving downtown	11/7/2014 11:15 AM
1522	Going to the airport for very early flights on the weekend can be very cumbersome. I have walked from my residence at 25th and John to Westlake for Link service, since the 11 or 43 start their services later than Central Link. There's that strange night bus, but the schedule/routing is crazy weird to figure out. SLUT service is horribly restrictive. It's service day is awfully short compared to other rail systems, and the headways are really, really long...more often than not, it's just faster to walk than wait for a tram. The quality of the service (cleanliness, comfort) is very good, though.	11/7/2014 11:14 AM
1523	I5 congestion. SR520 congestion. Idiotic HOV lanes on SR520.	11/7/2014 11:05 AM
1524	The peak (and thus more frequent buses) should extend from 9am to 10am and 6pm to 7pm to better reflect current work hours. Also, if you could speed up the buses by adding priority lanes and signals, removing stops that are frequently congested by cars (see route 8 east along Denny Way), etc, it'd shave off minutes of each trip, and thus compete better with biking/walking/driving.	11/7/2014 11:03 AM
1525	I dont mind the long trip, but I do mind the over crowding and having to wait for hours to even get on a bus.	11/7/2014 11:02 AM
1526	The areas I go between have a lot of bus routes - but the bus only comes often enough on weekdays at peak hours. Otherwise, not enough service to be worth it.	11/7/2014 11:01 AM
1527	what do you mean why? who wrote this survey? you just asked me the top three things that prevent me from using pub transit, now you are asking why those things prevent me?	11/7/2014 10:57 AM

1528	Destinations in different neighborhoods, even if they are not geographically that far, can be extremely difficult to plan trips to. Service between Capitol Hill and downtown is good, and service between Central District and downtown, but not between Capitol Hill and Central District, so I end up having to double back through downtown twice or experience long waits between infrequent buses and/or long walks at night in neighborhoods and streets that aren't well lit or safe-feeling. This discourages traveling on nights and weekends when I would otherwise use Metro services.	11/7/2014 10:54 AM
1529	Mu husband texted me on his way home that "a rider is peeing into a beer bottle on the bus" last week, and another was swearing at every other rider. I can handle all that, but not so comfortable telling my guests to take the 10 or 43.	11/7/2014 10:48 AM
1530	It is easier and quicker to just ask for a ride from a friend, especially late at night.	11/7/2014 10:47 AM
1531	Bus service in the later hours of the evening is extremely unreliable, and I am much less likely to use it during that time.	11/7/2014 10:38 AM
1532	Because it takes too long to get to my destination, service isn't frequent enough, and buses are too crowded. this is self explanatory.	11/7/2014 10:34 AM
1533	I'd like to see the SLU Street Car run more frequently, or even consistently. I get out of work sometimes around 9:30PM and I don't see the times displayed on the digital message board quite frequently, and if I do, a 20 minute wait seems not worth waiting for (I'll use my legs) or Pronto. It seems much of the street car should have it's own dedicated lane to increase productivity and reliability.	11/7/2014 10:30 AM
1534	B/C Metro took away our 17 local and replaced with a useless 61 which was doomed to fail from the beginning.	11/7/2014 10:30 AM
1535	Buses getting stuck in traffic means that it is hard to time how long a trip takes. Also, makes the arrival of buses hard to predict. This dissuades me from going somewhere if I have to transfer as I am taking two buses that could be late and extend the entire travel time	11/7/2014 10:24 AM
1536	Between Cap Hill and Downtown, I can walk faster than the bus goes during the morning rush hour. If I miss one bus, I often can't wait for the next one - plus, not enough frequency means all the buses are overcrowded and unpleasant (not my top 3 reasons, but still a consideration). The 9X is not available on weekends and the 7X was cancelled - getting to and from the south end on transit on the weekends is a joke. I would much rather ride the bus but these days we don't even bother trying on weekends.	11/7/2014 10:24 AM
1537	Used to take the 555 from downtown/Pioneer Square to Issaquah for social events after work. But the return leg at 8-9pm had such low frequency that it made the trip a real pain - being tied to an alert where I had to drop everything and leave if I didn't want to wait another half hour.	11/7/2014 10:13 AM
1538	Do you guys ride the bus? I shouldn't have to explain this to you if you do, and if you don't, I don't see why you are working on this.	11/7/2014 10:02 AM
1539	Bus service is usually good but transfers take up a lot of time. All of the busses seem to come in/out around Steward street in Seattle, but Seattle is growing North (SLU) and South (SODO) so transfers are necessary.	11/7/2014 9:59 AM
1540	The 12 and the 2, in particular, are often stuck in traffic. BRT treatments on Madison, with exclusive bus lanes and signal priority, would make a huge difference. Also, moving the 2 from Spring/Seneca onto Madison would be fantastic -- it would be much more reliable (waiting at the library and watching the 2 sit through multiple cycles at 4th is so painful) and would provide great frequency along Madison.	11/7/2014 9:55 AM
1541	With the recent Metro cuts, the closet bus stop is a ways away from my house especially when its really rainy and windy out.	11/7/2014 9:54 AM
1542	Worst issue: Service isn't frequent enough. 15-minute service should be standard at least for peak hours. Second worst: Buses are not reliable. Buses should have grade-separated lanes wherever possible. Third worst (much lower): Have to walk a long way in an unsafe environment to reach buses in Canyon Park. Not sure what can be done about that realistically, though.	11/7/2014 9:53 AM
1543	Buses are too slow because they're stuck in the same traffic as the cars. No bus stop near my home. No N/S bus service on 202 between Woodinville and Redmond.	11/7/2014 9:49 AM
1544	Overwhelmingly it's a time issue. Sometimes what should be a 15 or 20min drive will take over an hour on the bus - especially with kids that can be very hard. It's also hard if I'm leaving work at 5pm and need to make it to pick my kids up before childcare closes. If I am trying to make it to my daughter's busstop, I can't have a 10% chance of being 20min late!	11/7/2014 9:45 AM

1545	Quirks in scheduling, esp in PM, make riding the bus inconvenient--often notice that there are no buses to the U District/NE Seattle for 15-20min, then several in a row; similar pattern in the U District, so that even though my house is served by several bus lines within 0.5mi, I often have longish waits between transfers.	11/7/2014 9:42 AM
1546	Too many routes are legacies from Seattle Transit days and don't reflect service needs (demand and requery) of the 21st Century. World War 2 ended 70 years ago! Update the routes and scheduling now!	11/7/2014 9:37 AM
1547	because you took away bus # 42	11/7/2014 9:34 AM
1548	1. There are no convenient bus routes near my house. 2. Bus service near my house is not frequent enough to be useful. 3. I have to transfer twice (bus, train, bus, and then walk) to get to work.	11/7/2014 9:33 AM
1549	See my written comments above. I believe I have addressed these three things. I try to make a go with public transportation but lately, the issues are getting more pronounced. My husband does not understand why take buses that eat up too much time (90 minutes on a weekend to get from Issaquah to UW is 60 minutes more than it would by car, on weekends = 2 hrs of wasted time roundtrip and that's just the travel time--wait time isn't included).	11/7/2014 9:28 AM
1550	More demand than service, would by my uneducated guess	11/7/2014 9:26 AM
1551	Overcrowding, unreliability, and infrequent service all discourages people from using transit for anything other than commuting downtown.	11/7/2014 9:25 AM
1552	I ride my bike everywhere! I can leave when I want and don't have to wait more if I'm already a few minutes late. Buses seem so stuffy and inflexible by comparison. BUT! once there's light rail within decentish walking distance to my house (assuming I can continue to afford living on capitol hill which seems...maybe not possible) I'll totally use that to get to the airport mostly. Or maybe Columbia City.	11/7/2014 9:24 AM
1553	I'm a native Seattleite and can't emphasize enough that the crime and vagrancy around the Westlake tunnel station and park are MAJOR deterrents to me using transit services in the area (not to mention the bus stop at Third Avenue & Main). I know Mayor Murray is putting more SPD officers on the street, but this will take a while to realize and in the meantime more immediate resources are needed to get illicit activity off the streets. People who live, work and visit downtown don't feel safe using the services we are all paying a lot for. In the last 4 years or so, Downtown Seattle has gone downhill in a marked and alarming way. It's become an embarrassment, cesspool, and eyesore. I appreciate the partnership between the King County Metro Sheriff's office and the SPD to address the issue -- Operation Happy Holidays last year was an outstanding program that needs to be instituted YEAR-ROUND. We are all smart people. Seattle boasts one of the savviest technology centers in the world, with top talent brimming everywhere. Surely we can get fix this.	11/7/2014 9:22 AM
1554	My buses are hosed on home Seahawks or early Mariner's games, so I usually drive those days.	11/7/2014 9:19 AM
1555	See #5 above.	11/7/2014 9:16 AM
1556	For most destinations it isn't worth it to wait more than 10-15 min just to get on the bus; transfers compound that problem. Particularly a problem when going out in the evening.	11/7/2014 9:16 AM
1557	I do not own a smart phone, and each time I need to transfer, I feel like I am increasing my chances for getting lost. Transferring and waiting for buses for longer periods of time than is necessary is also difficult b/c it makes planning my day more challenging and requires more time than I have.	11/7/2014 9:15 AM
1558	See #5.	11/7/2014 9:10 AM
1559	I know that the electric trolleys are being replaced, but I can't touch anything on the 43 without feeling like I'll get a communicable disease.	11/7/2014 9:08 AM
1560	For me, the frequency and bus stop locations are very adequate. I have a few options that I can use in my daily commute, and one of the lines is always coming within 15 minutes or so. But the issue is just the time it takes to get across town. The U Link will be a great relief in that it will offer a speedy way to get downtown. I currently don't live near the U District, I think it would be important to prioritize service enhancements on lines that will deliver passengers to the new Link stations.	11/7/2014 9:07 AM
1561	Faster for me to drive (or even walk sometimes) than the current bus schedule.	11/7/2014 9:06 AM
1562	Bus routes/transfers are inconvenient (vry) enuf to make almost impossible for rme.	11/7/2014 8:59 AM
1563	Link takes too long to get to the airport, as convenient as it is. Twice as long as driving, unfortunately.	11/7/2014 8:58 AM

1564	We need a backbone of frequent corridors that are NOT BOGGED DOWN BY TRAFFIC. Right now, there are only two reliable ways to get around town- biking and walking (and Link is probably fairly reliable, but I don't live in the right part of town for it). We need to make transit way more reliable. Why are 20 people in a private car more important than the 60 people packed on the bus? We need more dedicated lanes, queue jumps, and signal priority. The recent improvements made to the 44 line helped a lot, similar efforts should be made on all lines. And we should have off-board payment and all-door boarding everywhere. While I'm dreaming, we should also have buses with fewer seats or fold-up seats that run the shorter, crowded routes to fit more people on. (Like to Capital Hill or Fremont).	11/7/2014 8:55 AM
1565	The 71, 72, 73 buses that I take to the U District are packed pretty much every trip, and I catch mine at the Int'l District station. Once the Link Light Rail is up and running to the 43rd and 12th St station, it will take a lot of pressure off the 70x buses. Fingers crossed.	11/7/2014 8:52 AM
1566	Being able to get home in a timely fashion is just as important to me as getting to work on time.	11/7/2014 8:52 AM
1567	If I have an early morning or laate night flight, transit isn't always my best bet. I'm airline crew, and if there is a 6 AM flight, the crew should be at the airport around 1 hr. 30 minutes before the flight departs, and that isn't always possible using transit.	11/7/2014 8:46 AM
1568	Overcrowded hot stuffy buses are the worst. It makes walking preferable or taking the light rail.	11/7/2014 8:45 AM
1569	You need to offer MORE busses during Convention Place Events, sporting events, big concerts, etc. Us "every day users" get bumped off by the "occasional user" and that becomes so frustrating!!	11/7/2014 8:44 AM
1570	light rail did a good job of enforcing metro bus regs, but the buses are a dirty, frequently with out of control people. The bus drivers can't enforce the rules; nor should they have to. An effort, with more transit police is needed. I've taken the buses for years, but most of my friends and family members wouldn't even consider it after giving it a try. To dress to go to work and sit on a filthy bus, with random menacing behavior, not the way to start a day of work in the city.	11/7/2014 8:40 AM
1571	Buses get stuck in traffic just the same as cars. They bunch up -- three buses of a single route in a minute or two, then none for 45 minutes. Bus lanes -- one more time, everyone all together now -- BUS. LANES. Having to detour into Downtown to get to further afield destinations is a bit annoying. It would be nice if Renton and Southcenter could be connected to Seattle in ways other than through downtown. Not having a good connection between Renton and Rainier Valley is a problem -- the 106 isn't good enough.	11/7/2014 8:38 AM
1572	These are the problems left after I shape my life around transit options.	11/7/2014 8:36 AM
1573	explained in previous question.	11/7/2014 8:33 AM
1574	The 'C' line is always mobbed. The Water Taxi is consistently on time and reliable.	11/7/2014 8:32 AM
1575	I would like to connect to the train station from my home but getting back home on Sunday keeps me from taking the bus to the train	11/7/2014 8:31 AM
1576	i prefer to walk when i can because the buses on the 43 and 49 are dirty, never on time and take as long as walking to/from work because they stop SO frequently. it's unnecessary.	11/7/2014 8:30 AM
1577	I use Metro every weekday, but it does take at least an hour to get to work and another hour to get home. I would use Metro more, such as on the weekends for shopping, etc., but my route does not operate on weekends.	11/7/2014 8:29 AM
1578	Transferring can easily add 30 minutes to a route and make taking public transit unfeasible. It is difficult to swallow spending 1 hour on the bus when driving can get you there in 15-20 minutes. This wasn't a provided option, but the pricing structure also works poorly - if I didn't have a bus pass, it would cost me the same amount of money to go 2 blocks from my house, as it costs to go 15 miles to Bellevue.	11/7/2014 8:29 AM
1579	I use public transportation but I have the above notations just as anyone else might have.	11/7/2014 8:26 AM
1580	Though it's not Metro or STs fault, chronic traffic that clogs bus routes is a problem. As someone that relies on transit to do the lion's share of travel (especially in the winter when it's cold and rainy), I have to accept that my bus will be late and take a long time to get to my destination. For those riders that THINK transit may be a suitable option for them, congestion and the issues it causes on buses, especially during rush hour, is a huge deterrent and likely curbs ridership. Focused energy and policy should be placed on creating and enforcing bus-only lanes, creating street design that prioritizes buses, and make it easier, predictable, and reliable for riders (especially new or timid rider) to access transit.	11/7/2014 8:23 AM

1581	My commuter route is notorious for being unreliable. There's no reason for me to use the more reliable routes to get to downtown if it's not running anymore, or I wonder about whether it will show up. Drivers are often rotated on and off of it. Transferring isn't so bad, particularly if it's between frequently-running buses. That's why it takes me an hour to get to work, in less traffic, and only 30-45 minutes to get home: the buses home run much more frequently so I don't have to try to hit a mark with my transfer. My last commuter route (the only one that goes within a mile of my office) leaves downtown Seattle at 8:40 AMish. If I go in later to work for any reason (i.e. doctor's appointment, late meetings, etc.), there is no practical bus to take, particularly because nothing goes down 1st anymore...they've all moved further away to 4th Ave S.	11/7/2014 8:22 AM
1582	Getting to Capitol hill from NE Seattle is surprisingly difficult. Actually getting to anywhere except downtown from NE Seattle is difficult.	11/7/2014 8:22 AM
1583	Transfers often tack on extra 1/2 or even a full hour on my commute for the "layover" at the connecting bus stop. (Especially trying to get to Shoreline and Greenwood from Capitol Hill). There needs to be closer coordination with transfers, or the creation of more direct routes.	11/7/2014 8:21 AM
1584	I use it, but these are the 3 top drawbacks.	11/7/2014 8:18 AM
1585	Service is not run late enough on the weekend. Metro and Sound Transit and the City of Seattle need to begin offering late night service on Friday and Saturday night at a minimum--until after bar close--as most big cities do. Runs up until 2:30 a.m. would be sufficient and very helpful. When travelling within the city, I exclusively utilize my feet, a Pronto bike or bus--I refuse to drive my car as traffic is too much without adding myself to the equation. However, infrequent service to many neat areas such as getting to many of our great, large parks means I avoid neighborhoods such as Magnolia completely and have yet to make it to Discovery Park, Carkeek Park, Seward Park and many others--this also includes the fact that getting to these locations takes too long on transit.	11/7/2014 8:17 AM
1586	Travelling with my toddler daughter can be difficult on the bus. Transferring is not a problem if frequency is high.	11/7/2014 8:16 AM
1587	I choose only direct routes, and will not usually embark on a trip requiring more than one ride; otherwise I drive.	11/7/2014 8:16 AM
1588	Why does it take too long? Buses run late; sometimes they don't show up; when you miss a connection because of a late bus there is likely to be a long wait for the next bus; trips involving 2 transfers or more can take much longer than trip planner indicates. Why are bus/train schedules not reliable? I don't know about trains, but buses commonly run behind schedule and sometimes don't show up. (Most of the time they do show up EVENTUALLY, but you really remember the times that they don't!) Why is service not frequent enough? If the interval between buses is 15 min. or less, the problem that late buses and missed buses creates when trying to connect a connection is greatly diminished.	11/7/2014 8:15 AM
1589	The buses I use to commute to work are 10, 11 and 49. I occasionally ride the 43 to go home. From work in Belltown, I ride any bus on 3rd Ave that will take me from Virginia to Pike. The issues: I am on one of the last stops before downtown so buses are usually crowded. I usually wait for the next one if that's an option. The big issue is access. I look for a bus has a flat entrance (no steps) as I don't want to ask for the lift (I use a cane). I avoid the 10 and most 11's. The 43 and 49 are somewhat more usable. I don't see ANY reason to use buses with steps: many, many riders have mobility issues. Needing to deploy the lift a lot really slows things down. The Rapid Ride buses are the way to go	11/7/2014 8:15 AM
1590	In the city busses are unreliable. Frequently late or slightly early no matter what time of day it is so a lot of time is wasted waiting. I also find that local busses are not synced up well with commuter busses. For example if I wanted to catch the 49 from Broadway to UW to transfer to the 372 northbound, I will typically arrive and either see the 372 pulling away or miss it by 5 minutes causing a 25-30 minute wait for my next bus. This seems to happen at both ends. Coming and going I typically wait close to 25 minutes for my "commuter busses"	11/7/2014 8:07 AM
1591	Unclear what you're asking. "Service not available on weekends" is under Metro control ... you don't offer it possibly because of cost and lower ridership than during the week. "Takes too long" - Metro spoke-and-wheel model makes it VERY DIFFICULT to get cross town - requires transfers AND a lot of time. By-the-way, those newer busses are FREEZING in the back half of the bus (yes, both articulated and standard). Temperature control is WAY WORSE than in the older buses which I like.	11/7/2014 8:04 AM
1592	I don't usually travel distances that are very far apart, and sometimes transit is twice as slow as driving would be. Those are the times that I ride my scooter or car2go. Also, waiting for a bus that is ten minutes late is a big frustration that puts me in a bad mood.	11/7/2014 8:03 AM

1593	Buses are often slow, unpleasant, dirty, and costly compared to the alternatives. Anything under 2 miles is often faster to walk than wait for and then take a bus. During rush hour when the 10 is full and delayed, anything under 4 miles is often faster to walk (meaning walking all the way to downtown is faster and more pleasant than taking the bus to downtown from Capitol Hill). For anything requiring a transfer (like Capitol Hill to Ballard), biking is far faster than taking the bus. Finally, for a family of four, driving and parking downtown is the same price as round-trip bus tickets and a lot faster and more pleasant. These are hard problems to solve, but one thing I think Metro could consider is surge pricing. If it was free or near free to ride the bus outside of peak times, I'd ride it more and I bet other people with flexible work schedules would shift their work and meeting hours outside of rush hour times. Since Metro's costs almost certainly are entirely driven by trying to provide needed capacity for peak times like rush hour, it might cost very little to shift to a surge pricing model.	11/7/2014 8:02 AM
1594	I have to transport things that are too large or inconvenient for the bus	11/7/2014 7:59 AM
1595	Reliability is a problem only because of bus frequency If a bus is late or full I am at the stop 20-30 min	11/7/2014 7:58 AM
1596	The 49 can take up to 20 minutes to get from 4th/Pike to upper Broadway, which is literally walking speed. Since Ulink will only take 2 minutes to make the same trip, optimizing the bus network for connections to Link makes great sense. Local service on Broadway probably doesn't need to go all the way Downtown, and ultra-frequent service on Pine St should continue for local trips to Downtown (boost frequency on Routes 10 or 11?)	11/7/2014 7:55 AM
1597	I would probably use transit to get to other parts of town, like ballard for example, but it takes 40+ minutes or requires transfers. When you introduce a transfer--coupled with buses not always adhering to their schedule--you can have long wait times between connections	11/7/2014 7:39 AM
1598	I hate transferring downtown via light rail to bus, but with the new cap hill station that will be fixed. The 12 is not frequent enough.	11/7/2014 7:38 AM
1599	It's amazing to me how long some of the bus routes take! There are SO many stops - every other block, often. There are times when I can walk faster than bussing. Transfers make the problem worse, of course. The lack of progress on mental health and homelessness issues also greatly impacts the experience of taking public transit, especially in downtown Seattle, through 3rd ave and on the 3/4. I don't think there's much public transit authorities can do on this, but it's worth remembering how these issues connect for the average rider experience.	11/7/2014 7:36 AM
1600	Stations, stops, buses, or trains aren't safe: 3rd/Pike mostly	11/7/2014 7:27 AM
1601	Not knowing if busses are delayed is a significant problem. I used to use the dated "one bus away" app, but since I pick up the bus daily from the Pioneer Square tunnel, the app doesn't work because there is no service in the tunnel. A secure Wi-Fi or digital information boards offering real-time bus information would be immensely helpful.	11/7/2014 7:16 AM
1602	The best example I can think of right now is that I have friends in South Park who I never go visit because the best route there doesn't run on weekends, which is the only time I that I am able.	11/7/2014 7:15 AM
1603	In Wedgwood, you are pretty much stuck outside of normal commute hours unless you want to transfer. I would like to take transit with my kids, but it is difficult without transferring to get where we need to go.	11/7/2014 7:07 AM
1604	Sodo light rail and busway are poorly lit.	11/7/2014 6:52 AM
1605	I have to stand or sit on side facing seats. Arthritis makes this impossible	11/7/2014 6:48 AM
1606	72 is the best bus for me, but it is slow, doesn't come often enough and in the late afternoon is often 20-30 minutes late. It is freezing cold waiting for it in the winter.	11/7/2014 6:48 AM
1607	I live within walking distance to the Light Rail station on Capitol Hill so if the Route 101 was made a feeder Route between Rainier Beach and Renton riders would have much more frequent service between Seattle and Renton.	11/7/2014 6:36 AM
1608	I am only familiar with one route (Metro #66) so when I want to go somewhere else, it's easier just to drive rather than figure out how to get there on public transportation.	11/7/2014 6:26 AM
1609	I have a toddler and I'm a working mom. I want to spend as much time with him as possible. Taking the bus doubles my commute time.	11/7/2014 6:21 AM
1610	Can you also please do better at communicating that people should not smoke in or 25 feet around bus shelters and stops? Plaster those things with signs and enforce it. Also, the stop at Pine and 3rd is absolutely disgusting and I feel unsafe there. Can you please work with the city to clean it up and all the scary people who congregate there?	11/7/2014 6:18 AM
1611	Nothing prevents me from using public transportation. I haven't owned a car for over 10 years.	11/7/2014 5:51 AM

1612	These things don't make me stop using them but they make me unhappy. I use the bus because it is the right thing to do financially and environmentally; when I can get a seat it allows me to read and relax on my commute. But I hate waiting for late buses. I hate being smashed like a sardine in a can and standing in the aisle all the way downtown. And I hate the way there is no really accurate way to know when your bus is coming. I use one bus away but it has it's limitations. I especially hate waiting for a bus going northbound in the transit tunnel. Why is there no display showing which buses are en-route and when they will arrive? Seems like a simple thing to track and you do it for the rapid rides.	11/7/2014 5:20 AM
1613	Reliability ... Times that buses don't stop at a bus stop ... for instance lately it's been raining but if you use the covered area for the bus stop they are not near the where the bus driver thinks you should be to stop "standing close enough to the pole ... or waiting for the bus but not seeing them in time to wave them down like a taxi etc	11/7/2014 12:44 AM
1614	To get to work (Bellevue transit center) from North Capitol Hill (Broadway & E. Roy), I have to take awkward routes to Montlake freeway station and transfer (e.g, 49 to 271 or 43 to 271), hoping the 520 is flowing clearly. Another option is to walk or bus to the Convention Place station and take the 550. Busing to Convention Place or walking takes about 20 to 25 minutes, on top of the really slow 550 "Express"	11/7/2014 12:21 AM
1615	particularly, it is hard to wait for the bus to U-district during the rush hour hour around 4:30p.m Also, sometimes the smell is not good in the bus, especially during the raining time	11/7/2014 12:04 AM
1616	The frequency and the lack of late night options are really limiting.	11/6/2014 11:54 PM
1617	As I mentioned above, for some trips I need to allow a lot of time. This can be taken up not just by the riding, but also by waiting, transferring, and walking to and from stops.	11/6/2014 11:53 PM
1618	For all of them? When it takes too long to get to my destination, I'm late. Stops can be convenient but they also can be fairly far away from where I need to be. After concerts, there are rarely any buses running after midnight so I have to walk long distances home in the dark. It's not very safe that way.	11/6/2014 11:23 PM
1619	Cap Hill <-> Wallingford / Ballard / Fremont takes time and (depending on time of day) transfers that can involve long waits.	11/6/2014 11:22 PM
1620	If I arrive at Seatac around 5:00 PM, it takes less than an hour to get home by light rail and bus. If I arrive at 11:00 PM, it takes about 2.5 hrs, which is too long.	11/6/2014 10:58 PM
1621	There are often two wheelchairs already on the bus and so I am forced to wait.	11/6/2014 10:38 PM
1622	Most destinations require a transfer, with daytime frequencies as low as 30 minutes, the wait and transfer points becomes an undue burden. Other modes of transportation are just more convenient then. Don't interpret this as "People don't like to transfer, lets build more 1 seat routes". I am saying the exact opposite, I'd rather have a network of 20 routes running every 10 minutes than one with 60 routes running every 30. And not just be a bit. A sparse high frequency network that makes transfers easy is orders of magnitude more useful.	11/6/2014 10:37 PM
1623	For example: It's very difficult from Issaquah to Bothell or Kirkland.	11/6/2014 10:37 PM
1624	routes 68 and 372 dont worrk on sunday. So i have to walk to catch route 30 or route 31 32 75 or 65	11/6/2014 10:32 PM
1625	It's very difficult to get from Redmond to Fremont.	11/6/2014 10:28 PM
1626	The 545 from Redmond doesn't stop on First Hill in the evening.	11/6/2014 10:27 PM
1627	Metro deleted the 17 local which provided one seat, although slow, travel from Ballard to downtown Seattle. Route 61 which replaced it was eliminated because of lack of patronage, no surprise since it went nowhere useful. Many riders simply walked to 24th Ave NW, particularly if they lived east of 32nd Ave NW. It didn't help that it ran bumper to bumper with the 17X in the morning, and frequently ran just ahead of the 40 towards Ballard, making a 1/2 hour wait for the next 61 to 32nd Ave NW. In many instances, it requires walking across multiple lanes of traffic to change buses, e.g. Market & 15th ave NW, and Leary and 15th Ave NW. I have frequently missed the D line because of the problem of crossing too many lanes. Metro staff should be required to ride the bus, no parking provided at the work place.	11/6/2014 10:21 PM
1628	Multiple routes to the same key destinations increases frequency but often means headways are inconsistent. Traffic during peak times means schedules are unreliable. Add in crowded buses and service that drops off after 7pm and it takes too long to get anywhere by bus.	11/6/2014 10:05 PM
1629	I work downtown, but live in Lake Forest Park. As a result, there is only one late night option for me that comes within reasonable distance of my house (the 347), meaning that after a certain time of night I more or less must hire a cab.	11/6/2014 10:03 PM

1630	After performances in Town Hall, ACT, Benaroya, sometimes it is an hour between buses...and it is scary waiting downtown alone or in the company of sketchy people.	11/6/2014 10:01 PM
1631	It takes me 15 minutes to drive or 60 minutes to take the bus each way. I have better things to do with 90 minutes of my day than wait for or stand on an overcrowded bus.	11/6/2014 10:00 PM
1632	1. I cannot stand on an overcrowded bus for long trips and have to sit down, so I often have to travel across town and pass up buses to get a seat 2. Buses don't run early enough in mornings and /or weekends since I have to transfer	11/6/2014 9:55 PM
1633	Too long/Transfer: the two are really one for me. The need to transfer is what makes the trip longer than I'd like. Early enough: I really prefer more frequent service between 5:30 and 6:30as getting to the University early is important to me.	11/6/2014 9:55 PM
1634	Bus stops should be better lit at night. Lengthy waits at transfers are hard during winter when it's cold and dark.	11/6/2014 9:54 PM
1635	There are too many bus stops making an 8 mile trip into downtown Seattle a one-hour commute. I believe people can walk a block and half extra. There is not need to have a bus stop every other block, as long as there are safe sidewalks for people to walk on.	11/6/2014 9:49 PM
1636	The 545 is always packed and the 930 doesn't run enough throughout the day.	11/6/2014 9:47 PM
1637	Buses getting stuck in traffic	11/6/2014 9:35 PM
1638	It takes a long time already to get from A to B, but often I have to wait half an hour for a bus to come, increasing transit time.	11/6/2014 9:30 PM
1639	Stations/stops are too close together, buses are stuck in traffic, xfer at UW takes too long (often a 20 minute wait)	11/6/2014 9:30 PM
1640	limited service on weekend mornings to downtown. Disabled riders sometimes making a bus late by 5:00 to 10 minutes due to unforeseen issues.	11/6/2014 9:28 PM
1641	See above about 3rd and Pike safety issue. I have been verbally harassed on buses as well (mostly on the way to or from the U District), but most rides are uneventful if not pleasant. The time cost of using public transportation is one of only two reasons I haven't sold my car. Getting to the opposite side of Lake Union from a given point is never a good experience and is even worse on public transportation. Also I can't get to 3rd & Virginia for a 6 am class.	11/6/2014 9:27 PM
1642	I really think the LINK should run later on weekends nights. It would be much better if the last train left around two am as I'm sure many people would want to take a train as opposed to a taxi/uber/Lyft. Also the first train to downtown restricts my work schedule. If it could get to downtown by 4:45 it would work much better for me.	11/6/2014 9:24 PM
1643	(In regards to the final choice:) Getting to and from bus stops, and especially during transfers, is extraordinarily onerous and often unsafe because of the often poor placement of those stops. Bus stops should be placed nearer to obvious destinations and safe street crossings; stops at transfer points should neither be more than a block away from each other nor require the crossing of more than one major arterial.	11/6/2014 9:10 PM
1644	Shift work, late nights, weekends and holiday service makes it difficult to get the University of Washington Medical Center	11/6/2014 9:07 PM
1645	Service to west ballard 17 has been cut.	11/6/2014 8:58 PM
1646	All 3 issues generally interconnected.	11/6/2014 8:57 PM
1647	There are multiple times when the bus schedule is not reliable. The rapid rides are additional pain that didn't need to be created. Since the Rapid Rides came about, metro can't seem to budget well enough and it's reached the public due to their advertised cuts. It's highly upsetting to the county as a whole knowin that jobs, and sufficient bussing was compromised. Unacceptable.	11/6/2014 8:52 PM
1648	it's really disappointing when nice stops / shelters are installed for Metro patrons only to be taken over by people just "hanging out" in & around the shelter making the stop less than desirable. One big example of this is what happened to the rapid ride shelter on 3rd & Virginia in Seattle. I often don't feel comfortable at that stop which only gets worse come winter dark & rain. Also why does Metro spend so much on things like wi-fi, etc in these times of economic crises for public transportation ?? GREAT idea in good financial times but right now all people really want is to be able to get to & from work reliably , safely & maybe even having a seat to sit in on the way !! Right now the discomfort of overcrowding etc outweighs & cancels out the hope of making the bus more attractive by offering wifi and such.	11/6/2014 8:50 PM
1649	It takes two transfers to go from Beacon Hill to Northgate. (Bus 60 to Link to Bus 41) b	11/6/2014 8:30 PM

1650	It's all about the commute time, for me. The 48 could come every 5 minutes and still get crowded in the morning and after work. The whole U-district could use a separate system just for local commuters. Why do UW students need to use a bus from Loyal Heights to get 10 blocks very day? The 48 is over committed. It takes people North-South *and* East-West, *and* across the freeway, *and* to Greenlake, *and* to/from the U-District, *and* within the U-District. The 48X was hard to use because it was so infrequent, but it was the perfect route for me and served a real need. If it wasn't effective, fine, but there just aren't enough 48 busses to do the job, now.	11/6/2014 8:28 PM
1651	None	11/6/2014 8:17 PM
1652	Only two buses make stops within walking distance of my house. One only runs during peak hours, and both only come every half an hour and are consistently 15 minutes late. These routes only travel north-south, so it is very hard to go east-west without transferring to multiple buses. Places that would take 15 minutes to drive to require an hour and many transfers to reach by bus.	11/6/2014 8:13 PM
1653	There is only one bus line near by that goes near my house, and it only leaves every half hour, which is actually not so bad, but can be annoying if you need to transfer to another bus that only goes every half hour.	11/6/2014 8:13 PM
1654	Recent cuts eliminated direct services	11/6/2014 8:08 PM
1655	Re: Heading South to Town with Morning Commute: Not enough buses that stop around 120th , 110th and Lake City Way. The buses that stop there, are already full from earlier stops. Would like to see some routes start from there, not from Bothell so that we are not considered the near to last stop.	11/6/2014 7:46 PM
1656	I also find it difficult with a baby.	11/6/2014 7:45 PM
1657	I find the buses from the U District to Downtown to be frequent enough, but getting from any non-downtown neighborhood to any other non-downtown neighborhood is an ordeal because there generally aren't as many routes to choose from and they tend not to run frequently enough to really be useful.	11/6/2014 7:40 PM
1658	Still use it daily but on special trips I have to really plan ahead but Google maps and Metro tip planned are great helps....love trip planner...	11/6/2014 7:33 PM
1659	everything depends on the individual style of the driver that day. some are really fast and you have to run to catch the bus and some are super slow and always late. I ride the 30 to the U-District where I need to catch an express to downtown but your stupid schedule makes it virtually impossible to catch one of the 73x's that run down the Ave. They are running only a couple of minutes apart and the second bus is almost empty but instead of waiting for my bus to catch up he pulls away from each stop just as we pull up behind him. The next bus will be overcrowded and late and it too will be followed by a mostly empty bus a few minutes later. I call this phenomenon the "Metro Shuffle".	11/6/2014 7:31 PM
1660	The people who use public transport aren't always clean.	11/6/2014 7:31 PM
1661	I don't mind transferring if it is reliable and shortens overall travel time!	11/6/2014 7:28 PM
1662	What do you mean, why? Who wrote this survey? The answers are self evident. How do I know why Metro decided to eviscerate the schedules or made routes so infrequent that if you miss a bus you have to wait too long for the next one? Why is the eastbound 3/4 route invariably ridiculously late right after 5 when people just want to get home?	11/6/2014 7:19 PM
1663	Drivers pass up stops for various reasons. Buses are late due to (presumably) traffic. Freeway buses are no faster than driving; freeway buses need to use alternate routing when I-5 is too slow. Trains do not run late or early enough to/from the airport. Service frequency drops off too abruptly too early after rush-hour. Service is not early enough for early work shifts.	11/6/2014 7:18 PM
1664	It is impossible to try take a bus and get to work before 6 am which is very frustrating. My job has stayed in the same spot for the last nine years while I have changed neighborhoods and I wish there would be a few early busses. Currently I mostly use the 44 and am losing my mind with how crowded it gets, especially when like this morning the bus was a small one.	11/6/2014 7:08 PM
1665	To get to work, I can take one bus to International District Station, but then have to walk the last mile to the growing business district south of the stadiums.	11/6/2014 7:02 PM
1666	I wish there were buses or Link trains departing early enough from downtown to catch the first morning flights out of the airport (between 5 and 6 AM). Maybe that means a first train departing Westlake between 3-4 AM. I also wish Link connections didn't require long walks and grade changes at key transfer points (Sea-Tac Airport, King Street Station). Please invest in making those transfers faster and easier.	11/6/2014 6:50 PM
1667	Most important are reliability, frequency and time to destination. I can walk if a station or stop is a little further away.	11/6/2014 6:46 PM

1668	Being a young adult and a car free person, I want to be able to visit places in the city when I am not at work, and this can be difficult to do relying on the bus. More frequency & service is very important to be to be able to continue to rely on public transit I without a car.	11/6/2014 6:41 PM
1669	My daily commute is a fairly straight shot 4 - 5 miles from home to work. Public transportation options require that I either walk half a mile to get to bus that makes trip direct (shorter) vs. shorter walk to a bus that takes much longer. Also, what about pro-rating bus fares for length of ride: short ride = smaller fee?	11/6/2014 6:39 PM
1670	If its too slow I have better uses of my time. If its unreliable it makes transferring unreliable and makes the trip longer. If its not frequent enough it effectively makes the trip longer since I arrive early and have to waste time.	11/6/2014 6:36 PM
1671	I almost always avoid the 8 from 3:30p to 7pm M-F. You can walk faster up the hill. Aurora Exit/On ramp and Denny I-5 on ramp congest traffic. Not enough bus service to handle Cornish, Amazon and Seattle Central students.	11/6/2014 6:31 PM
1672	I have to transfer twice to get to/from work, and the transfer waits are terrible after 6. Inside of commute hours, I frequently have to wait a long time because the bus is too crowded to board. Also, it's impossible to get to SeaTac for the earliest flights of the day.	11/6/2014 6:29 PM
1673	What? One of my trips twice a week involves getting from my office at 3rd & Madison to Boylston and Olive and then from there to Queen Anne Ave N and Lee Street is 3 or 4 buses. I usually end up walking the 2 miles from my office to Boylston/Olive and then either walking from there to 1st and Mercer to catch a bus to the top of Queen Anne OR waiting a long time for a No. 8 that will let me off at the bottom of Queen Anne where I can transfer to a 2 or 13 going up the hill. Depending on the lateness of the hour, weather conditions and the like, I either catch a bus on 1st and Mercer to get to Lee St or walk. That's just one why. When you have no transportation other than your feet or a bus, it gets complicated in Seattle. I moved here from Portland, Oregon. Way different there.	11/6/2014 6:19 PM
1674	Starting a commute of say the 304 at 3:30 and stopping at 5:30 is rather silly. Most Americans need to work until 6pm so its rather silly to see empty busses at 3:30 and people needing to transfer just to get home during rush hour because a bus line stops it's commute before rush hour is over.	11/6/2014 6:06 PM
1675	Many of these may apply, but I use public transportation regardless. I'm a public transport enthusiast.	11/6/2014 6:06 PM
1676	I live 2.3 miles away from work. The bus route to get there (the 8) is a straight shot, almost entirely on one street. It takes nearly an hour to get home at night because traffic on Denny is such a nightmare. Nothing Metro can solve alone, but it does mean I'd rather ride my scooter in the rain than triple the length of my commute to take the bus.	11/6/2014 6:00 PM
1677	Nothing is ever on time! It's ridiculous that the 277 sometimes runs 30 minutes late.	11/6/2014 5:59 PM
1678	Why can I only pick three? All of these items apply. I use transit because I live in an area that does not have ample parking and I don't own a car. I rely on the bus 90% of the time and I spend about two hours everyday commuting because the bus is late or slow.	11/6/2014 5:55 PM
1679	Getting to an evening meeting is easy, getting home is a very different matter. Long waits later at night make me uneasy as I am now a senior. Try being an only woman at 3rd and Pine at 10:30 at night with an ever changing group of young males for 40 minutes.	11/6/2014 5:54 PM
1680	It can often take one hour to get from work to the Seattle Center. If I drive, I cut the time in half.	11/6/2014 5:52 PM
1681	I cannot take the bus to work as the service doesn't start early enough and the stops are not near enough to home & work (Boeing Everett). It also prevents me from taking the bus around the Hill and to the Fremont/Greenlake area as there are no direct routes and the schedule is infrequent (especially on weekends) so its just easier to walk or drive given the time and amount of travel that's out of my way required if I take the bus. Also, given how early bus service stops, the bus is unreliable transit because though I live centrally, I can easily get stranded somewhere overnight.	11/6/2014 5:50 PM
1682	I love transit but I need it to work for my schedule. It's often not a reasonable option for a trip to another neighborhood.	11/6/2014 5:48 PM
1683	542 should have weekend routes; need later services in general.	11/6/2014 5:48 PM
1684	I have many of these issues, but I wouldn't say that they prevent me from using transit. It's the nature of the beast. But in Seattle, it's a hell of a lot better for commuting then driving on I-90 during peak times of the day. Yes, it will be a dream when I can easily get to a train from the east side and take that all the way to a Husky game. That will be amazing.	11/6/2014 5:47 PM
1685	Buses at night are crowded and people are unruly and misbehaved.	11/6/2014 5:46 PM

1686	I used to take the bus to work because it takes 5 minutes, but the buses are so crowded during rush hour so I walk instead. I would rather walk in the pouring rain than take a crowded bus for 5 minutes. Especially since the crowds also mean longer delays, which tend to be between 5 and 20 minutes.	11/6/2014 5:46 PM
1687	Busses don't arrive as scheduled even on simple routes like #30. And wait times for any of 71/72/73 to Downtown can sometimes be puzzling considering frequency of trips.	11/6/2014 5:43 PM
1688	first item is for Seattle Center. second item marked is special events at Seattle Center and buses that drive right through in the tunnel after games.	11/6/2014 5:41 PM
1689	On the weekends I might opt to take the bus if they were running on the weekends (some don't) and running more frequently on the weekend than they do now. On my weekday commute, I get on the bus in the morning fairly early along the route so I always have a seat, but by the time we get to the freeway (this is the 77 in the AM) the busses are packed with people standing. If I had to stand all the time like that I might not take the bus as frequently as I do.	11/6/2014 5:34 PM
1690	The stations were obviously designed by people who never intend to ride the bus. In fact, the design often causes passengers to walk out of their way, even circle around their intended crosswalk.	11/6/2014 5:34 PM
1691	I am much more likely to take public transportation if I don't have to transfer or can transfer to the light rail. I really dislike transferring between buses. I like taking the 75/32 to the Seattle Center, but we don't do so for events like the Opera because 1. the opera gets out around the time of the last 32 bus and we don't want to get stranded. Because everyone gets out at the same time, there is a real danger of not being about to get on the bus or having to stand for an hour.	11/6/2014 5:34 PM
1692	For cross town trips it usually takes far too long to get from neighborhood to neighborhood. For me, the worst trip is between E John St & 24th Ave E on Capitol Hill and NW Market St & 22nd Ave NW in Ballard. In theory, a transfer from the 43 to the 44 should be relatively direct. In my experience, however, the 43 is usually unreliable, running late, and just misses the 44 in the U District (usually follows about 1-2 blocks behind). This means at least a 15 minute wait for the next one. The 44 then gets stuck in traffic or makes frequent stops for riders. This is a 20 minute drive but it takes over an hour via transit. I'm a fan of designing a network based on transfers instead of myriad point-to-point routes, but the connections must be between services that are frequent, reliable, and fast. Currently that is not the case for a large number of my trips.	11/6/2014 5:33 PM
1693	Any transfer automatically adds 20 minutes to travel time. I do a lot more moving around on the weekends when I am not at work and need more of the buses at convenient times/frequency.	11/6/2014 5:32 PM
1694	Working outside of normal commuting hours and sometimes in locations far from transit, such as the San Michelle Winery, make it difficult to use transit.	11/6/2014 5:30 PM
1695	Transit delays in downtown Seattle during the evening commute can make for a long and crowded bus trip. Service not beginning early enough makes it difficult to catch early airport flights. Traffic delays impact reliability of bus schedule.	11/6/2014 5:25 PM
1696	I don't take the bus if I have to transfer since I usually don't have the option of being late and I cannot rely on the buses to stay on schedule to make the transfer.	11/6/2014 5:20 PM
1697	Drug and Drunk people on THIRD AVENUE (Pike & Pine) always we can't walk and is not safe	11/6/2014 5:19 PM
1698	Buses are mostly reliable, but there are times when they are late or don't show up. When I have to transfer, the bus I'm on often gets to Northgate just as the one I want is leaving, so I have to wait another 30 minutes.	11/6/2014 5:16 PM
1699	Running the 312 and the 306 all the time would be great for downtown access - it's very slow now outside of commuter hours.	11/6/2014 5:15 PM
1700	In the weather we have here in Seattle, eight months out of the year, I cannot dress professionally as my job requires, and wait at bus stops, slog from the bus stop to the Light Rail, etc. Because many times the 106 will come while the Light Rail users are waiting to cross MLK Jr Way to catch the bus, the driver sees them, but doesn't wait. During our dark months-between November and March-it can be a bit sketchy waiting at the 106 bus stop at MLK and Henderson.	11/6/2014 5:11 PM
1701	The reliability of the 44 has improved, but it is still bad during peak times. It often is crowded, which isn't helped by occasionally running 40 foot coaches instead of articulated ones.	11/6/2014 5:10 PM
1702	There are no convenient train times to go to Tacoma	11/6/2014 5:10 PM
1703	Some buses are very crowded at times (71, 72, 73) Some stops/waiting areas not particularly safe at times	11/6/2014 5:09 PM

1704	I always allow some cushion in case a bus is late, but when it's 30 minutes late that is a serious problem. Metro drivers are generally excellent drivers with great people skills! But sometimes one doesn't show up for work, or a bus breaks down leaving commuters in the lurch. Being late for work on some days just isn't acceptable, and once I came within a whisker of missing the once-daily Amtrak train for a trip out of state because there was a trainee driving the Route 5 bus that day. For several months the regular Route 5 driver was from 20 to 30 minutes late on the morning commute route, and when I asked why, she said she always had to stop at Shoreline Community College to use the bathroom, and some days the bathroom was closed for cleaning and she had to wait for the janitor to finish. I understand about human biological needs, but that explanation for making 30 or more people late to work every day absolutely took the cake. Transfers double the opportunity for lost time due to unpredictability of traffic, drivers & equipment, and in addition one finds oneself out in the weather on in the dark on an unfamiliar and sometimes sketchy street corner.	11/6/2014 5:08 PM
1705	Some buses (recently the 512 on one occasion) do not show up as scheduled, and I've had to drive to make it to work on time. Reliability is extremely important when commuting. Some routes (66x) operate on what I believe to be the perfect frequency, while others seem to be too infrequent. Personally, the 26 is a very convenient and useful bus, but I often have to use a different, less convenient route because it is so infrequent.	11/6/2014 5:08 PM
1706	Add: In some cases, service isn't direct enough, even with transfers. All answers above apply to when I choose not to use transit for certain trips.	11/6/2014 5:02 PM
1707	Intervals between buses of 15 minutes or less are acceptable. Intervals of 30 minutes or more are not. Lately, buses are more crowded than they used to be, especially at rush hours.	11/6/2014 5:02 PM
1708	Not sure why you're asking why... so I'll use this as a free form comment box. Paper transfers need to be interchangeable between agencies. My ORCA card doesn't last long enough to get me on my second bus most of the time. Any time I catch a bus in Lakewood, I basically have to run to the International District and hope the 71 is sitting there ready to depart. Any delays force me to pay extra. Also, when my transfers do expire, it's usually only 30 seconds expired, or something really stupid like that. I get REALLY MAD because if I had a paper transfer, the bus driver would just accept it. I estimate King County Metro has stolen at least \$20 from me due to ORCA transfers not working.	11/6/2014 5:01 PM
1709	75 bus is overcrowded	11/6/2014 4:59 PM
1710	I have mobility issues. I have been going through treatment for multiple foot issues and it is painful to walk more than a block.	11/6/2014 4:58 PM
1711	I still take the buses because I have to.	11/6/2014 4:58 PM
1712	Takes too long due to transfers Reduced or no service on weekends for some routes	11/6/2014 4:58 PM
1713	Mostly I am very pleased with the busses. Problems do present when going to farther places or working late.	11/6/2014 4:56 PM
1714	I don't even take the bus when I'm in Seattle much anymore because they're always completely packed, and as a petite woman, I hate putting up with inappropriate behavior from male passengers. I'd rather ride my bicycle for free on my own schedule, and have a much less stressful experience.	11/6/2014 4:55 PM
1715	I sometimes worry that the frequency can be too much of a wait depending on traffic on the roads as well as the capacity and handicapped people on buses/trains. I sometimes worry I may miss my connection.	11/6/2014 4:55 PM
1716	Too many mentally unstable, drunk, smelly, and aggressive passengers on busses and vagrants at bus stops. We call the bus stops at 3rd and Pike and 3rd and Virginia the "Bus Stops from Hell". We need more presence from Transit Police.	11/6/2014 4:54 PM
1717	Another thing--I don't like to stand in the rain at 5 AM with my suitcase! (Not much you can do about that one)	11/6/2014 4:54 PM
1718	One of my biggest challenges is that my current buses are overcrowded (it only got worse with Metro's service cuts), stops are being removed (so one has to walk longer distances to get to transit). Since the service cuts went into effect, most buses on the routes I travel have been running late, they are not reliable, they are way over crowded (ie leaving 20+ people behind at a stop and having to skip additional stops). Having to transfer more than once is also too difficult to navigate. Buses don't connect well, so each transfer can add at least 15 minutes of wait time to a trip - sometimes longer if its not a peak travel time.	11/6/2014 4:52 PM
1719	The routes and schedules all contribute to the 3 factors I chose above.	11/6/2014 4:52 PM
1720	add routes for 167 outside of rush hour	11/6/2014 4:51 PM

1721	The weekend bus schedules, even on Capitol Hill, are too few and far between. As said, if I have to transfer more than once, or sometimes even once, I usually won't ride the bus. Even without transfers, sometimes it is simply faster to take a different method than the bus. Light rail will be a huge improvement, but we need more DEDICATED BUS LANES.	11/6/2014 4:49 PM
1722	TOO MANY BUS STOPS DO NOT PROTECT PEOPLE FROM THE WEATHER OR BUSY TRAFFIC ON ARTERIALS WITH SPEEDS OF 35MPH IT RAINS HERE SIX MONTHS IN A ROW, AND SOMETIMES STANDING IN THE WIND, RAIN, AND COLD ON CONCRETE ISN'T HEALTHY!	11/6/2014 4:48 PM
1723	You also took away the 47 route making me walk 20 minutes longer to get to a bus to downtown.	11/6/2014 4:48 PM
1724	Have you ever taken the late night busses into the city on a weekday? It's not a safe feeling environment (despite statistically not being worse than any other place I suspect). The routes are often sparse and filled with the types that don't make people feel safe, which discourages their use even more. Outside that, the distance to get on the stop is often prohibitive. I could transfer from a closer one to a main line, but that just adds more work.	11/6/2014 4:47 PM
1725	Even the Metro tracker does not reliably predict arrivals and departures in the bus tunnel. The Express buses to the U District do not run after 6:45 PM, and I frequently leave work after that time. All the buses are too crowded; unless they arrive--some late, some early--all at once.	11/6/2014 4:45 PM
1726	I live under 15 minutes away by car from Columbia City, Georgetown, Capitol Hill, downtown, Mount Baker, Seward Park, and Hillman City. That said, there are many times when I'd rather take transit. But when it the travel time starts edging past twice as long to get there (and in many cases three or four times as long as driving), I end up in the car instead, even though I'd rather not be driving and looking for parking. This is particularly true on the weekends.	11/6/2014 4:42 PM
1727	Buses aren't frequent enough, travel too slowly, and don't run late enough to be useful for many trips.	11/6/2014 4:42 PM
1728	I would be willing to transfer if it means that Metro could provide a more reliable, frequent schedule. Route 2, the bus that I often use, is very often behind schedule because it gets tied up in traffic in Belltown and downtown with several turns and with competing with traffic trying to access the freeway.	11/6/2014 4:41 PM
1729	Re: transfer: To get to one of my main destinations I can drive for 10 minutes or take two buses and take over 45 minutes. Cross-town transit is not sufficient.	11/6/2014 4:40 PM
1730	- Travelling from 85th and 20th to anywhere that isn't downtown is very difficult to do in a timely fashion using the bus.	11/6/2014 4:38 PM
1731	i am also handicapped, use a stick.	11/6/2014 4:38 PM
1732	I wish there was some security patrolling the bus stations in the U District.	11/6/2014 4:37 PM
1733	Takes over an hour for bus by my house to get me to a transit center. No parking at transit centers by 645-7am No sounder service by 8 am	11/6/2014 4:36 PM
1734	I can workaroud many of the others - length I can bring work or reading. I like to walk so what I consider walking distance is quite long. I find that I have to cut a social event short if I'm taking transit back.	11/6/2014 4:35 PM
1735	My biggest complaint is that going from East Green Lake to Capitol Hill takes entirely too long. 40 minutes bare minimum if there's zero traffic and you make the connecting bus on time. This will no doubt improve when U-Link is open, but the infrequency of the 48 past 10 pm or on Sundays (30 minute headways) are a major barrier. A similar complaint is that East Green Lake to central Ballard takes WAY too long. 30-40 minutes compared to a 10-15 minute car trip. Better connectivity between neighborhoods (vs. neighborhood to downtown and vice versa) is a problem. Required transfers are unreliable due to traffic and infrequent buses. I wouldn't mind transferring nearly as much if there were timed transfers and/or very frequent headways. Otherwise, you get stuck waiting 28 minutes for an every-30-minute bus because you just missed the last one. I have had issues with overcrowding on the 76 and 316 in the mornings at the final stop before I-5 on Ravenna Blvd. These days, the last 76 of the morning is almost always crush-loaded. During the summer, I experienced several passups of the final 76 of the morning, resulting in my being 30-40 minutes late to work downtown because I needed to walk to the nearest 66 stop and wait 10+ minutes. A few of these passups happened because the driver mistakenly believed the bus to be full when in fact people were just excessively bunched up at the front of the bus. I called Metro to complain whenever that happened, about three or four times. That hasn't occurred in several months, thankfully.	11/6/2014 4:34 PM
1736	I would never transfer unless its a frequent connection such as 23rd to the Eastside at Montlake Freeway station or hoping into the transit tunnel or with SoundTransit. Any trip more than 40 mins is too long. walking to 23rd or John street is only relevant for longer trips (to and from the east side or Seatac) or very complicated transportation challenges (i.e., taking the 8 to Seattle Center for a concert)	11/6/2014 4:34 PM

1737	Like I said, with budget cuts and a lack of interest by most people, transit has really reduced its services. Taking a bus from downtown to my home in Ravenna at night takes an hour or more (it used to take a half-hour). The system downtown of paying before you enter causes serious delays. The buses are already late and then, they just get later and later as people board.	11/6/2014 4:34 PM
1738	It is more difficult if the travel is to be in the evenings and on the weekends.	11/6/2014 4:32 PM
1739	I use pt to get to work but rarely anything else. That will change somewhat when the light rail is expanded.	11/6/2014 4:30 PM
1740	I would use public transportation more if it didn't take so long and the need to transfer.	11/6/2014 4:29 PM
1741	It is often faster for me to walk where I am going (between South Lake Union and downtown or Capitol Hill, most frequently) than to take a bus and/or streetcar. The transit options between these neighborhoods often get delayed in traffic during the times of day when I am commuting.	11/6/2014 4:28 PM
1742	To get to downtown, for instance, from east of UW, a rider needs at least one transfer and lots of time to reach destination. To get to the airport takes at least three.	11/6/2014 4:27 PM
1743	The 60 is a good connection to Capitol Hill, but its service falls off early in the evening making it impractical. During peak times service frequency is 30min and that's limiting. The clientele on the bus going to and leaving Harbourview can be questionable as well.	11/6/2014 4:23 PM
1744	As long as there is space on the buses, it works for me. When there is not, that is a problem.	11/6/2014 4:22 PM
1745	Traffic	11/6/2014 4:22 PM
1746	Transfers are a problem because of the length of time one has to wait, especially from downtown to campus Park Way for a 75 or 30. Because of the traffic light at Brooklyn, the desired bus pulls away from the campus stop while the bus from town is waiting for the light to change. Often one has to physically run from one bus to the other. There is often a long wait between local and buses going downtown on a weekend at campus park way from 75 Often drive to UW as buses don't seem to coordinate to end of class time in the evening.	11/6/2014 4:21 PM
1747	It shouldn't take an hour to get to the Uptown Theatre by bus, when it only takes 15-20 minutes by car (excepting time spent trying to park). The transfer and frequency issue go together, as I have to make sure that the bus I'm riding in arrives early enough at the transfer stop so that, if it's delayed, I can still make my connection -- something that would either be remedied by more-frequent service, or by more direct routes. On the other hand, if everything is running on-time, there's also the possibility that I will arrive 30 minutes early.	11/6/2014 4:19 PM
1748	I ride the bus everyday so this question isn't pertinent to me. But those times that I choose not to take it, the reason is generally because routes aren't convenient. And my overall top complaint about riding the bus is that it is just packed to and from downtown every single day.	11/6/2014 4:18 PM
1749	If we had more tax money, with tax equity - taxing the rich more through state income tax and tighter corporate taxes, we could better fund transportation. We need more density. We need trains!	11/6/2014 4:18 PM
1750	This is just for the buses, as I don't have this issue with the light rail. But again, the buses are sometimes just way too crowded that I can't get a seat, which--for a ride that sometimes lasts 45 minutes in traffic--is a long time to stand.	11/6/2014 4:17 PM
1751	I would prefer to take the bus more often, but when I know I am going to work late, I do not feel safe waiting for my bus at the 3rd and Pike bus stop (I generally take the 2, 13 or 29). This is particularly a problem in the winter months, when any evening commute generally happens in the dark. I suspect improved lighting would help, as with other stops through Belltown, but it has resulted in me driving more than I would like.	11/6/2014 4:16 PM
1752	If I have to walk far, depend on unreliable schedules or transfer from one unreliable schedule to another driving becomes more attractive.	11/6/2014 4:15 PM
1753	I live in Duvall and work in downtown Seattle. The last bust home to Duvall leaves Redmond at like 7PM. If I take the bus all the way from home I cannot work late at all. The 545 bus is slow. The super awesome new bus ramps at Evergreen Point and Yarrow point are completely pointless. These awesome stops should have been installed at 50th and 40th on 520. Dozens and dozens of people are trying to get on the bus at 50th/40th. Usually less than 3 people use the Evergreen point / Yarrow point stops. The 545 wastes a ton of time on the 40th/50th on/off ramps in the morning. We have to creep along with traffic.	11/6/2014 4:13 PM
1754	I work over 50 miles from where I live, and across a county line. There isn't anything direct. Transfers eat up a lot of time. The Sounder Train doesn't run late enough or early enough for either direction of my daily commute. I can't use Sounder Train on weekends to visit friends/family living in other cities/counties.	11/6/2014 4:13 PM
1755	They keep cutting service to Magnolia. And we pay A LOT of property taxes!	11/6/2014 4:13 PM

1756	During rush hour, things work well, but later in the evening waits are much longer (which is uncomfortable in parts of downtown - 3rd and James). UW to downtown is tough - really crowded and few direct routes - have to hike far to get to a bus	11/6/2014 4:13 PM
1757	Outlying stops (outside of downtown core) are located in dark, unlit, exposed or KNOWN DANGEROUS areas! Drivers frequently cannot see riders waiting at stops and either don't stop or stop too quickly for safe boarding. The main reason I don't ride more frequently is the continuing issue of a rather large percentage of riders who DONT PAY UPON BOARDING!! I can't blame the drivers from avoiding potential violent confrontations but there has to be a better way of insuring ALL passengers pay their fare.	11/6/2014 4:11 PM
1758	If a bus only comes only every 20-30 min, that is too long of a wait if you happen to miss one because it came a few minutes early. Some schedules seem off - the bus comes way too late when I need to be on time to something. If I have an event that is extra early or late, then bus service is often not useful.	11/6/2014 4:10 PM
1759	Takes too long - traffic. It's great as it's an "express" bus but nothing express about Seattle traffic. There are NO stops near my house to get to my destination and the federal way stop for 197 is 20 minutes from my house then you add 1+ hr commute... By the time the bus picks up at my stop, it's standing room only. We do need an earlier 197 to alleviate that but I know not all buses are like that.	11/6/2014 4:09 PM
1760	It should not take a bus 1 hr to travel the same distance a car can travel in 15 minutes.	11/6/2014 4:09 PM
1761	what do you mean "why"? if something is 10 miles away and I have to take three buses and wait 30 minutes between transfers, then that "takes too long". You're asking me why the busses are too crowded? I think it's because there are more people that there are seats. But I might be wrong; I'm not a transportation analyst.	11/6/2014 4:08 PM
1762	late evenings to/from Ballard are not frequent enough	11/6/2014 4:07 PM
1763	We're not a first-class transit region without 24-hour service options. The more convenient service is the more likely I am to use it, referring specifically to frequency. Some of my preferred destinations require more than one transfer, which, combined with infrequent service, makes for less attractive transit.	11/6/2014 4:06 PM
1764	I need to pick my daughter up from school at a particular time, and with infrequent and slow buses, I can't make that trip reliably by bus.	11/6/2014 4:05 PM
1765	I don't like having to travel downtown in order to get anywhere.	11/6/2014 4:04 PM
1766	It's starting to get dangerous to walk home from public transit. People are targeting public transit riders in crimes	11/6/2014 4:04 PM
1767	Test test	11/6/2014 4:01 PM
1768	There are still buses that do not have lifts. Many trips I take either require too many transfers or the route takes over 1hr to get where it is going; both issues can be difficult for me (I have brain fatigue issues).	11/6/2014 4:00 PM
1769	Burien to UWMC buses crowded since service cuts. Link Light rail very crowded at evening rush hour. Have to transfer Downtown Seattle to get to UWMC when travelling from home in Burien.	11/6/2014 3:57 PM
1770	connections in the U District after about 6:30 aren't good. The last #74 leaves downtown by 6:45, the #30 doesn't run after about 6:30 and the #75 service drops back to every 30 minutes so making a connection from another route can mean a lengthy wait on Campus Parkway	11/6/2014 3:56 PM
1771	It is difficult to plan and arrive on time when bus schedules are unreliable.	11/6/2014 3:55 PM
1772	Increase frequency from every 30 minutes to 15 minutes would be more suitable. On weekends I end up driving my own car rather than try to use the bus for convenience. I like having a bus stop within 5 minutes walk from house.	11/6/2014 3:55 PM
1773	49 is totally jammed in the a.m. with students from U District to Seattle Central and does not come frequently enough THROUGH THE NEIGHBORHOOD in a.m. to accommodate workers to downtown. Coming home, everyone jumps on to get to CAPITAL HILL, then it's empty THROUGH the neighborhoods to home. So when the tunnel/shuttle comes in... Please still continue to think about bus service THROUGH THE NEIGHBORHOODS, because the 49 is the only one picking us up.	11/6/2014 3:55 PM
1774	Too many cuts to service to and around the eastside and Renton.	11/6/2014 3:55 PM
1775	The bus never comes on time and most of the time two come at once rather than one every ten minutes. The ride from the u district takes between 30 and 60 minutes. And I'm lucky to get a seat they are so crowded. Often the bus can't hold everyone. Also there isn't any good direct route from upper Kent/covington to the u district.	11/6/2014 3:54 PM
1776	The way the schedules line up, I often have to wait 20-25 minutes to transfer buses. That makes a long ride even longer. If I can drive in 20 minutes, but it takes 1.5 hours to go by bus... driving is going to win every time.	11/6/2014 3:54 PM

1777	There are no reliable bathroom facilities along the route.	11/6/2014 3:53 PM
1778	545 is always crammed to the point where I've had them stop at Montlake where I get on and then actually not let anyone else on because they are so full, at which point I have to wait for the next one, putting me very far behind schedule in my travels. It takes an hour and 2-3 buses to get from Ed Hill in Redmond to Cap Hill in Seattle which is just a generally giant investment of time. Ed Hill has only 1 route, the 221, and it runs only every 30-40 mins which makes it inconvenient.	11/6/2014 3:52 PM
1779	There are frequent issues with buses being late and unreliable, or sometimes if they are late they are overcrowded. There are not enough dedicated bus lanes around the city (especially in the U-District), which means buses get stuck in traffic and become slower and more unpredictable. Additionally, when I have to transfer, that means dealing with 2 or more bus lines that are running on unpredictable schedules and could mean 10-20+ minutes of wasted time waiting for another bus to come.	11/6/2014 3:52 PM
1780	Reduced service on weekends can be very inconvenient	11/6/2014 3:51 PM
1781	With a great amount of effort on my part, transit does get me "near" to any other places (other than work) I wish to go. If it were easier to reach other places using transit, I would take transit much more, and travel much more. As well, because of the restrictions on public transit access, it limits places that I can work, live, and recreate in.	11/6/2014 3:51 PM
1782	Also scary, mentally ill passengers. But also definitely, dirty buses. Once I saw an old chicken leg bone on the steps of the back door of #49. That's very unsanitary.	11/6/2014 3:51 PM
1783	I use Metro because I believe it is the responsible thing to do, but as service deteriorates, it has become a very unpleasant experience.	11/6/2014 3:50 PM
1784	Bus stop is located near my home which is wonderful. Easy to get downtown and to connect to light rail.	11/6/2014 3:50 PM
1785	I will drive part way to work when I have obligations after work that require long bus rides home or long bus ride and connection to the light rail.	11/6/2014 3:49 PM
1786	Ballard/Fremont to the UW is a overcrowded route (standing room only most days).	11/6/2014 3:49 PM
1787	Why? I can get on my bus and handle the transfers but sometimes my bus is late and I miss the transfer and end up waiting in bad weather for the next bus and the neighborhood is unfamiliar and slightly unsavory.	11/6/2014 3:48 PM
1788	I use it a lot. However, it is frustrating that the LINK does not run all night or at least until 3am. I end up spending a lot on a taxi any time I want to go out on a Friday or Saturday night.	11/6/2014 3:48 PM
1789	Third Avenue and Pine/Pike stop is terrible.	11/6/2014 3:48 PM
1790	The current driver is constantly late because he leaves the 1st stop late.	11/6/2014 3:47 PM
1791	My main issue is using public transport at night. It is a bit scary in downtown and even in the U.Dist.	11/6/2014 3:46 PM
1792	It would be nice to have more direct service without transfer. (Shoreline to UW and UW back to Shoreline).	11/6/2014 3:45 PM
1793	Time to drive is much less than taking the bus. I would rather take the bus and not worry about parking etc. But getting east - west in north seattle is really slow on the bus. The only option is the 48 or the 44. Very limited. Nothing on 65th.	11/6/2014 3:44 PM
1794	Express buses only run until around 8:30 AM	11/6/2014 3:44 PM
1795	See above	11/6/2014 3:43 PM
1796	Usually when it takes me too long to get somewhere it's because I have one or more transfers. I would love it if there were a bus that looped through capitol hill to SLU, Queen Anne, Ballard, Wallingford, The U district, back to capitol hill. I think a lot of people would love this and it would get a lot of use.	11/6/2014 3:43 PM
1797	Time is important. It's silly when a car can get somewhere in 20 minutes and the bus takes two transfers and an hour due to delays and unreliable/infrequent service. If traffic is so bad that driving is also exceedingly slow, then ideally public transit provides a more viable and efficient option. As it stands now, it is rare that transit is a better option -- at best it is an equal option in terms of cost and time.	11/6/2014 3:43 PM
1798	AT PEAK HOURS IN MORNING 9 EXPRESS GOING TO CAPITOL HILL IS PACKED AND IT IS ALWAYS THE SHORT BUS. THIS IS A VERY BUSY ROUTE WITH MEDICAL WORKERS GOING TO FIRST HILL AND STUDENTS GOING TO SEATTLE CENTRAL. FROM 7:45 TO 9AM THE BUSES ARE LIKE SARDINE CANS.	11/6/2014 3:43 PM
1799	The homeless problem is something beyond the control of Metro, but they mar an otherwise pleasant transit experience.	11/6/2014 3:42 PM

1800	It's impractical for me to take the bus downtown from the Children's Hospital area because it takes so long.	11/6/2014 3:42 PM
1801	Everything in Seattle takes either 30 or 60 minutes to get to by transit. It's just absurd, this doesn't make sense.	11/6/2014 3:41 PM
1802	Sometimes the issue is getting back from my destination, like I would be willing to bus there but I'll probably be tired at the end of the night and prefer to drive back. For drinking on cap hill I solve this problem with cabs. The only reason I dislike transfers is the possibility of missing the connection and having to wait a long time for the transfer. That's a bummer because it makes it a lot harder to estimate how long the trip will take, and because it's frustrating to have to suspend a trip in the middle of getting to where I'm going in order to have to wait at another bus stop.	11/6/2014 3:40 PM
1803	All of the above comments are about the King County Metro buses. Sound transit is great.	11/6/2014 3:40 PM
1804	??? I just said why in #6	11/6/2014 3:40 PM
1805	I am recovering from a hip injury, and I am too intimidated by the prospect of a crowded bus to ride to work on them right now. I normally don't have a problem with it, but I'm afraid of not getting a seat right now while i am healing, and going up and down the steep hills of Seattle from the bus stop to my office doesn't work for me now either. Once I heal, I will go back to driving to the park and ride at Northgate or walking the couple of blocks from my house to the closest bus stop. Also, I don't like going in the tunnel, so that is why I drive to the park and ride so I can take the #303 and avoid the tunnel. I happened to be at the bus stop at Westlake in the tunnel the night the girl got beat up by a couple of other girls while the "security officer" looked on. I haven't felt safe in the tunnel since that happened.	11/6/2014 3:39 PM
1806	Route 40, 26, and 28 are always very crowded often skipping my stop when going from South Lake Union to Fremont.	11/6/2014 3:39 PM
1807	Bus transit generally works for my daily commute. When I have to work late I often drive, because I don't feel safe waiting at bus stops in the University District in the evening. Bus service doesn't work well for getting to the airport because of having to transfer and because the times often don't work well with our flights.	11/6/2014 3:39 PM
1808	Proposed changes to #60 had it originating in Renton!!!! Goodness, what an opportunity for delays. This really is a poor idea, and with the new Seattle METRO funding passing in the election, how the heck will that work for a route that starts in the county and finishes in Seattle?	11/6/2014 3:39 PM
1809	I suspect all of my issues are due lower ridership from to others opting to drive themselves rather than take public transit.	11/6/2014 3:39 PM
1810	We put public transportation where the money is, not where the people need it. The street car? Along a line that nobody uses, meanwhile buses are over-crowded and running WAY over capacity.	11/6/2014 3:38 PM
1811	I live on Beacon Hill so I have to take the 36 route or walk down hill to get a bus on MLK. Either way is a half mile.	11/6/2014 3:38 PM
1812	Because some of my destinations require transferring two or more times, it takes too long to get to my destination. If buses ran more frequently, making transfers wouldn't be so harrowing or time-consuming (if you miss a connection and have to wait another 20 minutes, it's not worth it). Going to the airport, as I mentioned above, requires frequent, reliable bus service to the train and train service to the airport that starts before 5 am in order to make it viable for people trying to catch early flights.	11/6/2014 3:37 PM
1813	I use transit a lot and don't usually have problems. But the times I use my car is when the service isn't frequent enough -- usually after the afternoon peak times.	11/6/2014 3:37 PM
1814	rush hour crowding esp from Ballard to UW and from U District to downtown	11/6/2014 3:37 PM
1815	I wish the real-time reporting was more reliable. Too many ghost buses in certain locations makes it hard to rely upon the real-time arrival tools.	11/6/2014 3:36 PM
1816	I often travel with my small son and he can't sit on transit as long as I can.	11/6/2014 3:35 PM
1817	aside from the light rail getting to outlying king county areas can take hours	11/6/2014 3:35 PM
1818	48 is consistently delayed in the evenings after 5pm. There is a lot of crowding on the busses. I would like transit to run 24hr/day. I would ride the busses more than I do now.	11/6/2014 3:35 PM
1819	It is much easier and much faster to drive to the VA hospital.	11/6/2014 3:35 PM
1820	Some buses are so crowded that I'd rather walk, which is a pain in the winter, in the dark, in heavy rain or snow. Takes so much longer. Would love to use the bus to get to the light rail at Westlake and go to or from the airport, but the buses don't run early or late enough to do that all the time.	11/6/2014 3:34 PM

1821	Mostly, the commute from West Seattle to UW is atrocious. Getting out of West Seattle is a pain but particularly when I need to transfer downtown or ride all the way to Ballard and then transfer again to go across. I wish there were more express buses you could take to go from long distances to other longer distances.	11/6/2014 3:34 PM
1822	It is extremely easy for me to use the transit system.	11/6/2014 3:32 PM
1823	Going to West Seattle is difficult because service tends to end early and I wouldn't be able to return home or it may take a long time with a long walk	11/6/2014 3:26 PM
1824	Low frequency creates larger transfer penalties and makes it so transit doesn't fit my schedule as well. Service drops off considerably after 7pm, making trips take longer or require more transfers. Reliability of transit is a serious problem at all hours, but most notably around commute times.	11/6/2014 3:09 PM
1825	#1 issue for me: crowding on the 71 through 74 in the peaks. Dwell times are getting really bad in the morning en route to downtown. #2 issue: weekend service when 30, 68 (Sundays), and 372 aren't running.	11/6/2014 10:49 AM

Q7 Are there particular corridors or places that need service in the evenings, on weekends, very early in the morning, or late at night?

Answered: 1,801 Skipped: 2,286

#	Responses	Date
1	Early and late to/from airport to downtown, as well as frequent routes to general neighborhoods from downtown (so able to connect after coming from airport or going to downtown early to get to airport).	12/4/2014 10:00 PM
2	Broadway to downtown. Downtown to Broadway. Downtown to the airport. Earliest flights are at 6 am but the earliest light rail will not get you there until 6:30.	12/4/2014 7:06 PM
3	Evening service between downtown and northern ends of Seattle is very challenging - they can be full or slow	12/4/2014 3:38 PM
4	light rail to the airport could start at 4 instead of 5 for the early, early flights	12/4/2014 3:25 PM
5	Northgate to U District.	12/4/2014 12:54 PM
6	Any buses that go around the UW should run at the higher frequency (rush hour) rate until later than they do now.	12/4/2014 12:47 PM
7	32, 31, 75	12/4/2014 11:44 AM
8	Not that I use frequently	12/4/2014 10:51 AM
9	from places with bars, theaters, dinner, etc venue to neighborhoods especially northeast and north seattle; a faster way to go east-west route	12/4/2014 10:44 AM
10	yes on rainier ave.	12/4/2014 9:13 AM
11	Downtown to Seattle Childrens Hospital	12/3/2014 9:21 PM
12	Not sure. I drive when it's night most days unless I am coming from work in the dark.	12/3/2014 4:57 PM
13	It would be great if the King County Water Taxi could offer service on a weekend, even if only once per month.	12/3/2014 2:52 PM
14	Don't know	12/3/2014 2:05 PM
15	n/a	12/3/2014 1:46 PM
16	522	12/3/2014 1:45 PM
17	East/West connections between neighborhoods north of Seattle (e.g., Fremont, Green Lake, Ballard, Maple Leaf, Greenwood, Northgate)	12/3/2014 11:44 AM
18	Aurora Ave N	12/3/2014 10:37 AM
19	More frequent service through Mt. Baker (the 14 bus) would be nice.	12/3/2014 10:32 AM
20	To the airport	12/3/2014 10:24 AM
21	Please return the free downtown corridor - it's great for tourists, commuters, and less fortunate.	12/3/2014 9:12 AM
22	Northgate transit center directly to the U district as there are many students, workers, shoppers and theater goers who would benefit. From both of those transit hubs, there are other options branching out so connecting them a little better would be beneficial to other routes.	12/3/2014 8:51 AM
23	not sure	12/3/2014 8:31 AM
24	Eastlake!	12/3/2014 3:55 AM
25	a direct route to u village from downtown would be nice and I would walk the rest of the way	12/2/2014 7:27 PM
26	Early morning from Snoqualmie Ridge (to Issaquah P&R, Issquah Highlands or Eastgate P&R)	12/2/2014 6:50 PM
27	Getting from Downtown to Lake City or from University District to Lake City after 9 pm can be a very long trip.	12/2/2014 5:17 PM

28	I'd like more frequent evening service to and from Wedgwood in the evening.	12/2/2014 4:14 PM
29	If I rode the train to UW, then UW to Green Lake and Northgate would be nice, at least at rush hours.	12/2/2014 3:37 PM
30	holiday service from Seattle Childrens to pinehurst difficult	12/2/2014 2:46 PM
31	a lot of staff gets off work at children's hospital on sand point way at 1130pm, it would be great to have more bus options/more frequent times	12/2/2014 2:12 PM
32	Ballard to Fremont to University District population centers.	12/2/2014 2:10 PM
33	Madison Street!!!!	12/2/2014 1:19 PM
34	unknown	12/2/2014 12:59 PM
35	Not for me	12/2/2014 11:39 AM
36	To/From Children's Hospital and 60th St NE & Sandpoint way to the following locations: -Downtown -Wallingford -Fremont -Greenwood -Swedish Hospital -15th & Broadway -Northgate -U district -Meadowbrook -Victory Heights -Queen Anne -Pinehurst -Mapleleaf -Phinney Ridge -Crown Hill	12/2/2014 11:33 AM
37	I'm sure there are. I need more choices for how to get to work on time.	12/2/2014 11:11 AM
38	Roosevelt Way NE from Northgate Way to 45th, all evenings and Sundays. Would also like to see East-Westbound busses (on 45th, on Ravenna to 12th) from University Village to I-5 more frequently during UW football games.	12/2/2014 11:00 AM
39	More 41s late at night. And on the weekend. I end up driving to the transit center at northgate on the weekends. Which is ok.	12/2/2014 10:46 AM
40	Madison (east and west)	12/2/2014 10:40 AM
41	Seattle to Edmonds (Sound Transit train) - Evening later run back to Edmonds (or if the new light rail will service the Mt Lake Terrace or Northgate Park and Rides).	12/2/2014 10:26 AM
42	Madison Valley and Madison Park - there are definitely a lot of car traffic early morning, so why not enough buses?	12/2/2014 10:19 AM
43	21st and E James should have service earlier in the mornings, then I could bus to work instead of drive.	12/2/2014 10:07 AM
44	I5 and NE 45 St. would become a much more functional stop if it had more frequent northbound transit earlier during business hours. It would be nice to know why the 512 only starts service north at 1921 there	12/2/2014 9:51 AM
45	All of the corridors need evening/weekend service. In addition, for holidays such as Veteran's day or MLK day, a higher level of buses are needed as many of us still have to work, as can be seen by a very crowded I-5.	12/2/2014 9:50 AM
46	No aware.	12/2/2014 9:34 AM
47	Capitol Hill to North Seattle. East/west cross town.	12/2/2014 9:25 AM
48	YES	12/2/2014 8:56 AM
49	Bellevue to Seattle - earlier morning.	12/2/2014 8:52 AM
50	Eastlake!	12/2/2014 8:52 AM
51	40th Street North Downtown to Fremont, Green Lake, Wallingford U-district to the airport	12/2/2014 8:45 AM
52	Commuter service to Norther Snohomish County	12/2/2014 8:12 AM
53	North of NE 145th between 15th and Bothell Way. Shorecrest Highschool and Kellogg Middle School area	12/2/2014 7:56 AM
54	none	12/2/2014 7:43 AM
55	I-5 northbound and southbound.	12/2/2014 7:32 AM
56	What about better access to regular shopping, like a stop either right outside the doors of, or within the shopping complexes of, Fred Meyer, Safeway, Walmart or Lowe's, for example? Again, I specify 16th between 99 and Kent-Des Moines Rd...	12/2/2014 7:31 AM

57	I am sort of surprised that later in the night, there are less buses that head out of downtown and go up Lake City Way. I believe that the 522 is the only bus and this happens only every 30 minutes. All the good transit buses that head up Lake City Way go away. This is a bit of a safety concern for me if I am downtown and heading home after a dinner out.	12/2/2014 7:24 AM
58	Theaters on Capital Hill, downtown, Queen Ann, Greenwood, etc...Egyptian, Harvard, ACT, Paramount, Beneroya, Taproot, On the Boards, Uptown, Meany Hall--UW,	12/2/2014 7:16 AM
59	Metro route 268 needs more runs. Bus 268 is much quicker than ST 545, which takes 20 minutes to get onto the freeway from Bear Creek P&R. In November 2014, I took Metro 268 to downtown Seattle at 7 AM; the 268 was standing room only beginning at Bear Creek P&R. Ironically, a ST 545 bus going downtown came a few minutes before the 268 and only one person got on it; everyone else waited for the much quicker 268.	12/2/2014 6:59 AM
60	Queen Anne evenings	12/2/2014 6:52 AM
61	N/A	12/2/2014 6:07 AM
62	UW, Capitol Hill, Downtown need extended late night services on weekends	12/2/2014 12:12 AM
63	School very early in the morning work at night mall on the weekend and stores sometime.	12/1/2014 10:41 PM
64	hospitals!	12/1/2014 10:36 PM
65	Yes	12/1/2014 10:11 PM
66	Overall, need more runs between 2-3am so we can get home as quickly as possible after a night out. Otherwise, cabs are more reliable and faster. Direct bus service from the upcoming Husky Stadium light rail station to 70th and Sand Point Way (the Admin building for Seattle Children's Hospital) would go a long way to persuading me to take public transit again, assuming I can get on the light rail towards Husky Stadium somewhere near my house. I have no idea how the light rail system connects up since it currently doesn't go anywhere I want to go except the airport.	12/1/2014 10:08 PM
67	NO!!!!!! not after midnight in my neighbourhood!!!!!!	12/1/2014 9:57 PM
68	Lots of buses driving along Eastlake, but most of them don't stop.	12/1/2014 9:52 PM
69	To and from the airport for the light rail would be AWESOME earlier in the morning. When I fly, I usually have to be on a plane by 5am and I've called a taxi. I'd rather use Uber because a regular taxi is twice as much. But Uber does not pick up from the airport. The light rail does not run late enough at night, so I also have to take a cab from the airport. I do really like the light rail option for the airport though. It's smooth and convenient. The schedules are very reliable. Weekends... come on... everyone works weekends now. Keep the buses on a 15 minute schedule. The hospital NEVER SHUTS DOWN. People forget that.	12/1/2014 9:20 PM
70	Bus #49 - keep it going.	12/1/2014 8:20 PM
71	Eastlake Rainier	12/1/2014 8:19 PM
72	10th and Miller needs more night time.	12/1/2014 7:56 PM
73	I don't feel that many of the surface stops downtown are safe and security in the tunnels is a joke. Also when the weather is bad the smokers often light up in the covered area chasing the non smokers out into the rain or forcing us to to put up with their second had smoke.	12/1/2014 7:53 PM
74	Getting to parks (like Golden Gardens!) on evenings and weekends!	12/1/2014 7:23 PM
75	more lines from the tunnel to northgate transit center would be a HUGE help	12/1/2014 6:28 PM
76	I work as early as 0500 and stay as late as midnight. It would be helpful to have buses that would get me to work (on-time) this early in the morning and frequent enough that I don't have to wait 30 minutes in the pitch dark for the bus. It would be safer if more bus stops were in well-lit areas and covered from the rain.	12/1/2014 6:07 PM
77	does not apply	12/1/2014 5:41 PM
78	Capital Hill, Downtown	12/1/2014 5:34 PM
79	Anywhere around hospitals needs additional service during off hours since they run 24 hours a day and parking around them is usually hard to come by and expensive. Big restaurant areas really need additional evening and weekend service.	12/1/2014 5:23 PM
80	Sand Point and NE 55th (former 30 route)	12/1/2014 5:09 PM

81	Yeah, please go from Greenwood Ave to the U District and from the U District to Laurelhurst (Seattle Children's Hospital)	12/1/2014 4:58 PM
82	Make sure to have late and early running busses through downtown, u district, capitol hill and ballard. Any major, highly populated areas, esp. ones with young people who typically stay up late or get up early.	12/1/2014 4:52 PM
83	I think the main corridors (all starting from Downtown) are to Capitol Hill and the University District. There currently is service, but there is also a lot of traffic in those roads at late hours especially on the weekend. With the amount of drivers under the influence and the large number of pedestrians, this becomes a recipe for disaster.	12/1/2014 4:33 PM
84	To Seattle children's - 75 is pretty good.	12/1/2014 4:31 PM
85	Convention center to Eastlake Ave on week nights	12/1/2014 4:24 PM
86	From the UW to South King County needs later evening service.	12/1/2014 4:22 PM
87	Fremont	12/1/2014 4:13 PM
88	It's difficult to get from downtown to northeast Seattle late at night. Busses only come once an hour after 11pm. Not to mention I have to transfer in the U district, where I don't feel safe waiting for the bus at night.	12/1/2014 4:04 PM
89	It would be helpful to have increased service for the 75 and 65 around the time shifts change at SCH (7 pm, for example)	12/1/2014 4:04 PM
90	SeaTac airport. UW and NE Seattle to downtown.	12/1/2014 4:02 PM
91	No	12/1/2014 4:00 PM
92	Not sure	12/1/2014 3:56 PM
93	We need more busses in the evenings heading out of Downtown Seattle.	12/1/2014 3:53 PM
94	Direct from Seattle to South Bellevue other than during the 9-5 hours	12/1/2014 3:49 PM
95	Children's Hospital	12/1/2014 3:44 PM
96	Around downtown and Capitol Hill, mostly East/West. From Capitol Hill to Fremont/Ballard.	12/1/2014 3:43 PM
97	downtown to and from U District downtown to and from Capitol Hill ... and more	12/1/2014 3:40 PM
98	going from south lake union to the northeast part of seattle	12/1/2014 3:40 PM
99	Seattle Children's Hospital	12/1/2014 3:38 PM
100	Route 183	12/1/2014 3:36 PM
101	Seattle Children's hospital needs more routes. The 31 and 32 are unreliable and to infrequent.	12/1/2014 3:35 PM
102	Yes - weekend evening public transit to and from locations that have active nightlife (Capitol Hill, Ballard, Fremont) could definitely be improved.	12/1/2014 3:33 PM
103	Airport to West Seattle	12/1/2014 3:33 PM
104	Kenmore - around 61st. The service is very limited late at night and on the weekend, and this can be problematic	12/1/2014 3:33 PM
105	n/a	12/1/2014 3:33 PM
106	I would like to see bus service to the year-round farmers markets on the weekend. Also, providing late-night bus service from downtown Seattle to Northern neighborhoods to encourage people to use transit when going to dinner, events, or shows downtown.	12/1/2014 3:29 PM
107	WOULD LIKE THE WATER TAXI ON WEEKENDS	12/1/2014 3:29 PM
108	The Montlake/Pacific St Corridor is frequently too full for passengers, let alone bike commuters (especially the 48 and 43 southbound). More buses during the evening or more reliable schedules during this time would be helpful.	12/1/2014 3:28 PM
109	Seattle Children's hospital: early in the morning and late at night (express preferably).	12/1/2014 3:27 PM
110	Yes, it's called SEATTLE. The city needs to provide reliable transportation across the metro area.	12/1/2014 3:27 PM
111	Not that I can think of	12/1/2014 3:27 PM

112	The 65 route frequency decreases too early in the evening.	12/1/2014 3:27 PM
113	Light rail and connecting service to light rail would be great.	12/1/2014 3:25 PM
114	Direct service between Northeast Seattle via Sand Point Way NE to downtown Seattle.	12/1/2014 3:23 PM
115	no	12/1/2014 3:22 PM
116	Lake City Way mostly in the evening	12/1/2014 3:21 PM
117	Belltown and Capitol Hill	12/1/2014 3:19 PM
118	Connecting service to the new light rail stations should provide options for all nearby neighborhoods at all hours light rail is in service--though the schedule should be reflect use and need.	12/1/2014 3:14 PM
119	U district	12/1/2014 3:14 PM
120	Service from the University of Washington could be better. Especially from the University of Washington to the north connections in NE Seattle	12/1/2014 3:12 PM
121	No	12/1/2014 3:12 PM
122	No opinion.	12/1/2014 3:11 PM
123	I would love to see the 542 run on the weekends to Green Lake area from Redmond. I wish the 221 going up Education Hill in Redmond, could run earlier and later each day.	12/1/2014 3:10 PM
124	Keep the 41 and 70's going at a higher frequency later into the night, this would help people going downtown for the evening.	12/1/2014 3:10 PM
125	Seattle Children's Hospital University of Washington Medical Center	12/1/2014 3:10 PM
126	tacoma to u district more times during the day	12/1/2014 3:09 PM
127	seattle center and mercer Island	12/1/2014 3:09 PM
128	NE 75th Street from Sand Point Way to Roosevelt Way NE	12/1/2014 3:08 PM
129	62nd and 12th in the Roosevelt neighborhood (on the 67/68 line)	12/1/2014 3:05 PM
130	#12 mornings, evenings	12/1/2014 3:03 PM
131	Service between North Beach and downtown is very needed -- we can't all limit our work hours to weekdays so we need ways to get to work on the weekends or during the weekday.	12/1/2014 3:03 PM
132	More Seattle to Airport and return buses or trains at earlier or later hours.	12/1/2014 3:03 PM
133	NOt that I am aware of	12/1/2014 3:01 PM
134	seattle children's hospital to magnolia and vice versa late at night/early morning	12/1/2014 3:00 PM
135	stated above	12/1/2014 3:00 PM
136	na	12/1/2014 2:57 PM
137	South of Pine on Broadway needs more service on weekends. I think the 2 could use more late night and weekend service. Your questions regarding transfers did not really address one of the main issues that they be seamless. Ensure that the rider exits the bus and can enter the next one at the same spot in most cases so that there is no watching a connecting bus leave without the rider while attempting to cross streets ect to access the connecting route. Also it is not necessarily more efficient to unload an entire bus where most passengers will transfer onto another bus. This makes it so that two buses have to take the time to load and unload all those workers, wheelchairs, slightly disabled, strollers and shoppers, when only once would have saved time to the entire system. Also shorter routes tend to be less productive with a greater share of time used for turning around. Make sure all routes will be productive when planning changes.	12/1/2014 12:28 AM
138	Nope. I don't ride the buses that late	11/30/2014 10:23 PM
139	You are cutting service to Capitol Hill at Madison east of 16th. That is not the safest area to stroll around in the dark heading to a bus stop.	11/30/2014 1:37 PM
140	If the bus was available and safe, i would take the bus from first hill where I work to northeast seattle where i live.	11/30/2014 10:37 AM
141	no	11/30/2014 10:28 AM

142	service to hospitals, seattle childrens hospital	11/29/2014 5:31 PM
143	Sand point Way to UW campus early/late & weekends	11/29/2014 2:59 AM
144	NE Campus Pkwy at UW Seattle to Ravenna/Sand Point neighborhoods	11/28/2014 6:48 PM
145	I'm lucky to live near the Rapid D, which was a factor in where I decided to live.	11/28/2014 12:53 PM
146	Lake City Way NE	11/28/2014 11:48 AM
147	Sand Point Way/Lake City Way to Seattle Children's!	11/28/2014 10:38 AM
148	The bus route (65 and 64) along 30th ave in Lake City is very dangerous. The street could really use sidewalks and better lighting. The bus drivers have almost driven past me multiple times when it is dark out.	11/28/2014 6:07 AM
149	In the U district, especially on weekends.	11/28/2014 12:03 AM
150	University district/wallingford to the airport.	11/27/2014 10:51 AM
151	Montlake Blvd and Montlake freeway stops	11/27/2014 9:43 AM
152	24 hour routes servicing the University District area with Downtown, and continuing all-night service on Routes 7 and 36. Also, if possible, 24 hour service for the light rail...	11/27/2014 12:15 AM
153	UW to Belltown	11/26/2014 11:14 PM
154	Nightlife spots to residential neighborhoods	11/26/2014 9:20 PM
155	The 520 corridor before 5am.(Redmond arrival at 5:30)	11/26/2014 6:56 PM
156	In the U district to North Seattle	11/26/2014 5:15 PM
157	UW and the suburbs. Buses for bar areas and nightlife also	11/26/2014 4:26 PM
158	125th & Lake city way to 105th & Aurora. 105th & Aurora to 45th & university way	11/26/2014 3:37 PM
159	It is hard to get from downtown to Capitol Hill very late at night, but there probably should be a route that is late at least on the weekends.	11/26/2014 3:10 PM
160	Capitol Hill to University District early in the morning (before 6:00am).	11/26/2014 2:22 PM
161	Wedgwood	11/26/2014 2:06 PM
162	No clue.	11/26/2014 1:21 PM
163	UW, downtown, Belltown, Queen Anne	11/26/2014 12:54 PM
164	I do think that the Northgate Transfer Center and the Lake City neighborhood see enough traffic to merit increased service in the evening.	11/26/2014 12:53 PM
165	Pretty much everywhere...	11/26/2014 12:47 PM
166	There could be an earlier 586 bus such as at 5:15 or 5:20 AM weekdays.	11/26/2014 11:14 AM
167	The 355 route is often crowded and could stand to have a few more busses added! If the 355 route is changed to Aurora, that will mean 3 buses using Aurora and no university District service withough several transfers for anyone who lives north of 85th and Greenwood. If the 5 ran later, I would be more likely to use transit late at night (after 10pm). Currently the E line is not a very safe option as far as walking to a destination after getting off anywhere along Aurora.	11/26/2014 10:37 AM
168	The 70-buses coming south through U district could start earlier in am	11/26/2014 10:26 AM
169	I think that the kent suonder needs to run later then 6pm. I get off at 6 and there for I can't take it home.	11/26/2014 9:30 AM
170	Although I don't use the bus really late or very early, access out of downtown is important so that someone would not be stuck there. Evening access for cultural and sporting events is important.	11/26/2014 8:38 AM
171	The only trouble I've had with serivce not being early or late enough has been to the airport. I can recall a few mornings when I've had to be dropped off because it's been too early to get a bus or the light rail there, which is most certainly my preferred way.	11/26/2014 8:27 AM
172	There should be service between the University District (including the Ave) and Capitol Hill in the evenings and late at night.	11/26/2014 8:09 AM

173	Earlier 550 transit on weekends.	11/26/2014 7:44 AM
174	Cap Hill to Seattle Children's could use some additional routes early in the am (0530-0630 timeframe). Would like to see Link stop at Husky stadium have a bus route out to Seattle Children's.	11/26/2014 7:31 AM
175	Ranier Valley, Downtown and U District could all use service earlier in the morning. I used to catch the 72X at Westlake Center at 6AM and it was the first one of the day and had standing room only.	11/26/2014 7:21 AM
176	Routes to the Transit Center and more frequent buses in the evening going from UW Seattle campus	11/26/2014 6:15 AM
177	31 bus to magnolia	11/26/2014 3:17 AM
178	Yes hwy 509 to downtown needs longer express routes. OR, needs a better connection to the light rail station	11/26/2014 1:54 AM
179	CORRIDORS: Either : from the university way (the ave) to 40th in Fremont _ access to he park and the troll Another one may be from 45 th or 50th street to 40h in Fremont. Pedestrian bridge on 47th !!! the 70s get packed whenever there is any games! Add more buses.	11/26/2014 12:14 AM
180	No, at least for me	11/25/2014 11:35 PM
181	Ballard to Cap Hill, or at least downtown. It is a huuuuuge pain to get to, especially on weekends. It takes me less time to get to Shoreline, and that's with three buses/two transfers!	11/25/2014 10:50 PM
182	I hope there is a bus goes from NE 41 st to Roosevelt	11/25/2014 6:35 PM
183	Service to the airport is needed early in the morning and late at night. It would be great if the central link light rail would run earlier and later.	11/25/2014 6:06 PM
184	Extended light rail service early morning from Westlake and later rides on Sundays from airport back downtown	11/25/2014 5:21 PM
185	Anything going to or from the U District needs frequent bus service at all of these times.	11/25/2014 4:42 PM
186	University District to Capitol Hill Ballard to Capitol Hill Downtown to Capitol Hill University District to Central District Central District to Downtown	11/25/2014 4:25 PM
187	Lynnwood to Bellevue doesn't have enough service at night.	11/25/2014 3:53 PM
188	Service to Queen Anne on the weekends is very limited.	11/25/2014 3:53 PM
189	Don't know	11/25/2014 3:07 PM
190	sea cntr late night	11/25/2014 2:51 PM
191	Seattle to Kirkland needs to have later routes.	11/25/2014 2:37 PM
192	MLK fromm skyway to rainier beach	11/25/2014 2:16 PM
193	Capitol Hill to downtown and SODO and up to Magnuson.	11/25/2014 2:00 PM
194	The Northgate to Downtown corridor is very busy and needs more service.	11/25/2014 1:14 PM
195	I think the city needs way more service from Capital Hill and Ballard late at night on the weekends espically.	11/25/2014 12:55 PM
196	I don't go often to Eastlake Ave E & Thomas St (REI) because the service ends/lessens abruptly in evenings/weekends and I don't always feel secure that I'll get a bus home... and it's a long walk up Eastlake for more regular bus service.	11/25/2014 12:54 PM
197	UW/Laurelhurst/Seattle Children's might benefit from additional weekend and evening service.	11/25/2014 12:32 PM
198	From Shoreline to downtown, there is only the 522, which is usually late. If the 308, 312, etc. still ran, there would be more options.	11/25/2014 12:26 PM
199	Hospitals	11/25/2014 12:17 PM
200	I wish the 56 ran later in the evening.	11/25/2014 11:38 AM
201	North Seattle College, late at night.	11/25/2014 11:34 AM
202	Hospitals - University of Washington, Seattle Children's, First Hill, etc. These are 24/7 workplaces and businesses.	11/25/2014 11:24 AM
203	West Seattle to/from downtown (route 125) more frequent route times in evening	11/25/2014 11:13 AM

204	I've noticed the above issues in the early evening on the 66, 49 and 43	11/25/2014 11:08 AM
205	We need West to East transit, from Ballard/Phinney Ridge to Seattle Children's!	11/25/2014 11:00 AM
206	As a woman typically on my own, late at night is when I'm more likely to take a taxi instead of wait at the bus stop. I have been harrassed on multiple occasions (multiple locations), so that's when I tend to shy away from it if possible. However, the I-5 corridor and network of Park & Rides are always a good thing to have service full time.	11/25/2014 10:49 AM
207	Seattle Children's Hospital	11/25/2014 10:38 AM
208	No	11/25/2014 10:34 AM
209	49 route to downtown on weekends is very unreliable, bus away app tends to be wrong the majority of the time. Getting to Ballard from Capitol Hill is a very long commute on the bus, I would rather do a Car2go	11/25/2014 10:34 AM
210	The Ballard area.	11/25/2014 10:32 AM
211	Ballard, downtown, UW, capitol hill, greenwood	11/25/2014 10:31 AM
212	Kent/Des Moines Park & Ride	11/25/2014 10:28 AM
213	I see light rail to the airport as an opportunity for more people to have a good experience with mass transit. But from the north end, we still need feeders for the new stations coming on line. That might take the form of a different local neighborhood service than metro--go to cars, uber, etc.	11/25/2014 10:26 AM
214	More weekend service from North Seattle to downtown Seattle. Also from Edmonds to downtown Seattle on the weekend.	11/25/2014 10:25 AM
215	Seattle Children's Hospital	11/25/2014 10:21 AM
216	Medina! But it is too small, I understand that the ROI is negative.	11/25/2014 10:21 AM
217	Sports stadiums need adequate weekend and evening service.	11/25/2014 10:17 AM
218	Service on some routes isn't available on weekends (Route 9). This limits going to capitol hill because the 8 takes nearly three times as long to get to the same destination. (Broadway and John).	11/25/2014 10:16 AM
219	I get off at 9pm, the shuttles here at Seattle Childrens stop running a 8pm. So it takes longer to get downtown to get a light rail or the bus to go home. There is also no bus to connect the hospital(Seattle Childrens) to the university station	11/25/2014 10:14 AM
220	Children's hospital (sandpoint way) I think more people would take the bus if the bus went later on sandpoint Ballard/Fremont on the weekends	11/25/2014 10:08 AM
221	I think they should start @ 4:30 am downtown per trying to get to airport & such.	11/25/2014 10:08 AM
222	West Seattle, Alki Beach	11/25/2014 10:08 AM
223	Routes between SCH and Norhgate Transit Center, I typically drive if I am working late or on weekends.	11/25/2014 10:06 AM
224	All of the train stops along Rainier Beach area.	11/25/2014 10:05 AM
225	North of Seattle to Seattle Children's Hospital	11/25/2014 10:04 AM
226	Greenlake to wedgewood	11/25/2014 9:59 AM
227	15th/Roosevelt Way. Lake City Way.	11/25/2014 9:58 AM
228	Route 68 should run later in the evening, especially during work days. the last bus through uvillage runs around 6. That's not nearly late enough for commuters and there's a lot of commuters on that bus that aren't students, but that need to use that route.	11/25/2014 9:54 AM
229	Need to have places in downtown seattle that offer inexpensive parking so that folks can use light rail to UW. Taking bus to downtown and walking to stations, becomes a bit frightening in the dark early morning or late evening hours. If there was a big park and ride in downtown, I think folks would use it and then take public transportation to other destinations Or develop a more effective, faster moving and safer location for folks to come into downtown and then get on light rail.	11/25/2014 9:51 AM
230	Getting from Ballard and Fremont to I5 needs help! It takes ages to get through there.	11/25/2014 9:51 AM
231	Express service between Issaquah/Bellevue and UW/Downtown. Busses are always standing room only in the mornings.	11/25/2014 9:50 AM

232	East/west route from the U District.	11/25/2014 9:49 AM
233	n/a.	11/25/2014 9:48 AM
234	44 has day, evenings, and holiday service. Awesome.	11/25/2014 9:47 AM
235	???	11/25/2014 9:18 AM
236	N/A	11/24/2014 10:04 PM
237	Yes - Beacon Hill, the Central District, Columbia City, Georgetown	11/24/2014 6:47 PM
238	no	11/24/2014 3:15 PM
239	North Seattle Center to central Capitol Hill, up Mercer St	11/24/2014 3:03 PM
240	I don't usually take the bus late at night, in large part because bus service doesn't come often enough to make it worth using over driving or a taxi for a night out. So, I don't really know the corridors or areas that need service during these hours.	11/24/2014 2:31 PM
241	540 bus runs only every half hour, not much after 6 pm and the 255 from downtown is to crowded.	11/24/2014 2:27 PM
242	I don't generally ride at these times.	11/24/2014 2:21 PM
243	See other responses.	11/24/2014 2:18 PM
244	Would like to see more service in the evenings and weekends between popular destinations for entertainment. UW to/from Fremont, UW to/from Ballard, Ballard to/from Fremont, etc.	11/24/2014 10:44 AM
245	The route 50 needs to run more frequently on Sundays. Late night service needs to be restored to the admiral district.	11/24/2014 10:29 AM
246	FROM TACOMA TO THE UW MEDICAL CENTER, NEED SERVICE BEFORE 5AM. LOT OF WORKERS HAVE TO START WORK BEFORE 6AM. FROM UW MEDICAL CENTER TO TACOMA SHOULD BE MORE THAN 2 SERVICES AFTER 5PM.	11/24/2014 9:40 AM
247	Sounder trains from Tacoma to Seattle and back (plus transit buses on 3rd and 4th Avenue or in the bus tunnel to connect them to and from downtown). If the trains ran longer and on weekends, we could eliminate a lot more sports-related traffic around the Intl District and we could increase the number of people shopping in downtown Seattle	11/24/2014 9:20 AM
248	25th avenue NE. In particular the 68 route.	11/24/2014 8:34 AM
249	Yes - capitol hill, university district, Seattle Children's hospital (and all other hospital locations) Metro should prioritize historically underserved communities who rely on public transit to get around.	11/24/2014 8:09 AM
250	183 evenings monday through saturday an sunday service, 166 Later saturday service and more frequent and later service on sundays, 182 later service on 7 days a weeking and 903 needs later weekday service	11/23/2014 9:33 PM
251	I'm sure there are but cannot think of any at this moment	11/23/2014 3:51 PM
252	Keep running the 44 regularly on Saturday nights.	11/23/2014 2:06 PM
253	Downtown Seattle to U District early in the morning. 4th ave especially. Better yet....earlier more direct bus service from Tacoma to the U District.	11/23/2014 11:22 AM
254	#74 Sandpoint Way- Downtown need to be extended day and night all week. Recommend a route to bypass U. District. Bring back the #30	11/22/2014 6:59 PM
255	I'm sure there are but at the moment I can't think of a specific location	11/22/2014 1:01 PM
256	Leschi	11/22/2014 8:33 AM
257	More service to University village from campus parkway on weekend mornings	11/22/2014 8:10 AM
258	Would have loved to be able to take the Sounder outside of rush hour when I was commuting up north. Would still use more often if available other times of day. It does not need to be often but maybe at least hourly	11/22/2014 2:20 AM
259	The route 74/30 needs direct service to downtown Seattle at all hours of the day/week. Currently only standard commuting hours offer direct service via route 74.	11/22/2014 1:41 AM
260	Don't know. I drive my car when it's dark.	11/21/2014 8:50 PM

261	Early mornings from Wallingford to downtown. Express buses do not stop at 45th Street before 9h30am.	11/21/2014 6:45 PM
262	yes! SR900 Issaquah/Renton	11/21/2014 5:10 PM
263	U district after work	11/21/2014 2:41 PM
264	West Seattle, Sand Point, across the bridges.	11/21/2014 1:56 PM
265	yes, renton or kent area ,we need to get more services frequently, especially on weekends.	11/21/2014 1:28 PM
266	No	11/21/2014 11:55 AM
267	I wouldn't know.	11/21/2014 11:33 AM
268	It would be nice to have the 592 Olympia - Seattle running more often in general throughout the day and later into the night.	11/21/2014 10:13 AM
269	No	11/21/2014 9:47 AM
270	more routes to cap hill from u district but obviously that'll be fixed.. u district neighborhoods could use a little boost, like people who hang out downtown/cap hill/ the ave generally, in my opinion, have the option to walk the rest of the way (as most buses stop near campus on Broadway), or they can take an uber, which is not an option for me.	11/21/2014 9:17 AM
271	#12 more late night service between 12AM-2AM.	11/21/2014 8:34 AM
272	Yes, North Bend. See question #5.	11/21/2014 3:19 AM
273	From Shoreline to downtown more frequently or to the u-dist. More 73 on the weekends. Run the 77 later on the weekdays.	11/21/2014 12:02 AM
274	Sunday service from Community Transit to and from Lynnwood to Seattle Later night service on the 10 & 43	11/20/2014 10:11 PM
275	No, more weekday daytime service is needed.	11/20/2014 10:08 PM
276	#25 is critical during all of these times. I am a healthcare worker with 24 hour obligations. Not having bus service when I work nights/weekends is very problematic. This is also true for the students living in our neighborhood.	11/20/2014 10:05 PM
277	All areas of night life need improved service at night -- Capitol Hill, Ballard, U-District, etc.	11/20/2014 9:56 PM
278	Not for my schedule.	11/20/2014 9:54 PM
279	Buses that serve popular recreation areas such as Seattle Center on special holidays should use the largest buses available. They should run late at night. Metro staff should be on top of where there is such need.	11/20/2014 9:52 PM
280	I've always asked Metro about extending their routes down to the stadiums and via 5th Avenue North so that folks attending events at the Seattle Center could partake in public transit, but they've refused to move their routes off of SR-99 on weekends, which was my suggestion to them. If Metro can have the 234 and 235 on the same schedule, which involves variations that are difficult for the educated to follow, then they - or any other transit provider for that matter - should be comfortable with making adjustments on weekends, when different clientele are riding the buses.	11/20/2014 9:29 PM
281	no for me	11/20/2014 7:40 PM
282	Buses (66, 70) are often too crowded to board. The 71x,72x and 73x do not make even limited stops in Eastlake where I reside. Right now they make use of the neighborhood without serving it! The 66x at least makes a few stops thereby connecting the neighborhood to the rest of the city. See above regarding holes in the service timetables between Express and Local buses on these routes. The 49 should run more frequently and later at night -- for instance between midnight and 3am when bars and clubs on Capitol Hill empty out and people are in need of sober transit. The greatest improvement to the end of connecting bus and rail service for me would be to extend the South Lake Union Street Car to the U-District where it could tie in with the future Light Rail station near 45th. This would make a direct connection by trolley from Downtown to the U-District eliminating the need for many present buses and creating efficient synergies amongst the 3 transit systems for many riders.	11/20/2014 5:21 PM
283	For sure, but I don't live/work on one.	11/20/2014 5:01 PM
284	Always popular commuting routes.	11/20/2014 4:37 PM
285	Probably, but none of the buses I use regularly.	11/20/2014 4:27 PM
286	All of them. I have stopped taking buses later in the evening because of the infrequency and unreliability.	11/20/2014 3:55 PM

287	Not that I can think of.	11/20/2014 3:37 PM
288	Light rail should be available 24 hrs at least after 2:00AM to cut down on drunk driving/taxi expense	11/20/2014 3:30 PM
289	Need more mid-day service to Everett.	11/20/2014 3:22 PM
290	Route 101 to Renton until 1 am 7 days a week Route 101 to Seattle until 11 pm 7days a week. Route 101 on Sundays to Seattle Starting at 7am like the 106	11/20/2014 2:40 PM
291	Route 73 would be nice to have at least a couple of runs between 1am and 5am.	11/20/2014 2:18 PM
292	Rainier Valley-UW.	11/20/2014 1:55 PM
293	It would be great if there was a later Sounders train leaving Seattle that goes south.	11/20/2014 12:30 PM
294	Direct route to the city center via Sandpoint Way, Montlake Blvd. NE , 520 or 23rd Ave E. Rerouting the 43 up the east side of UW campus via Montlake and Sandpoint could be an option. Rapid ride along Sandpoint Way from Lake City to Downtown Seattle.	11/20/2014 11:34 AM
295	NE Seattle to Bellevue...two major service areas woefully under funded and under serviced by Metro.	11/20/2014 11:18 AM
296	Weekends - U-District to downtown in the early mornings	11/20/2014 11:18 AM
297	not for me	11/20/2014 11:11 AM
298	It would be nice if there was 1 additional train that came from Seattle to Tacoma later in the evening. I think the last one leaves at 6:15. And maybe 1 that leaves earlier than the first one at 3:15.	11/20/2014 10:35 AM
299	more night owl routes for shift workers downtown, hospitals, etc.	11/20/2014 10:25 AM
300	Light Rail: early morning & night	11/20/2014 10:13 AM
301	I would really appreciate one very early morning trip for the light rail from downtown to Seatac because, if I have an early flight, I have to spend a lot of money on a cab. In exchange for saving that \$40, I would gladly get to the airport a little early.	11/20/2014 9:56 AM
302	None that I'm currently thinking of, other than a direct express U-District to Downtown route that probably will be moot in a year - 18 months after Link reaches Husky Stadium, provided adequate connector bus service is available as well.	11/20/2014 9:48 AM
303	More service to Issaquah on the weekends.	11/20/2014 9:18 AM
304	East West corridors	11/20/2014 8:40 AM
305	Yes. The Bellevue-Summit-Belmont area of Capital Hill is totally without service on the weekends and evenings and late at night.	11/20/2014 8:00 AM
306	more public options to get commuters from 405 to I-5 now that the toll bridge has reduced options to get from Kirkland/ Bellevue across Lake Washington. Obviously, people are going around rather than paying the ridiculous toll.	11/20/2014 6:35 AM
307	None that I can think of.	11/20/2014 12:16 AM
308	The whole system needs to run much later at night. At the very least, the last run that could get someone home from a bar to their house should not leave before the bar closes. That's inviting DUI-caused carnage.	11/19/2014 11:42 PM
309	No.	11/19/2014 11:21 PM
310	From South King County to the airport and Seattle. I work with many people in Kent that can't get to their jobs early in the morning or late at night (I am a social worker).	11/19/2014 10:22 PM
311	Please don't reduce service on 23rd Ave.	11/19/2014 9:00 PM
312	Keep 372 service on weekends.	11/19/2014 8:53 PM
313	at this moment i cant reallyly think of any.	11/19/2014 7:47 PM
314	All over the city of Seatac	11/19/2014 5:35 PM
315	I think if you improved the frequency and the time it takes and then publicized it there would be more usage. Improve safety concerns by having police frequent transit centers regularly.	11/19/2014 5:31 PM
316	No	11/19/2014 5:26 PM

317	25th Ave NE more frequent service weekday evenings, and more service on Sundays. Maybe have the 372 run local when the 68 isn't running on evenings.	11/19/2014 5:13 PM
318	All of the malls and college campuses and the night life areas so people don't have to drive drunk.	11/19/2014 4:32 PM
319	swedish hospitals ballard, first hill and cherry hill; seatac airport, train station	11/19/2014 4:26 PM
320	To the airport. And to and from North Seattle to Downtown.	11/19/2014 3:58 PM
321	30 lines stop way too early	11/19/2014 3:52 PM
322	Routes that go to bus tunnel and link to light rail/train. North/south routes to UW Seattle- students, staff and faculty use campus on weekends, not just for football/basketball games, LOL	11/19/2014 3:50 PM
323	Northgate to Capitol Hill on weekend nights.	11/19/2014 3:48 PM
324	Crossing 520, early morning and late night.	11/19/2014 3:43 PM
325	Entertainment districts (Downtown, U District, Capitol Hill, Fremont, Ballard). I try really hard to keep my friends from driving drunk or wasting money on cabs on evenings and weekends, but a 20 minute wait for a bus is usually a deal-breaker for them.	11/19/2014 3:34 PM
326	The 70s are ALWAYS crowded, I had hoped ORCA would provide data to prove this, but service hasn't expanded	11/19/2014 3:31 PM
327	Major nightlife areas. Capitol Hill, Pioneer Square, Belltown. Would be great if the new Capitol Hill Streetcar ran until late on Fridays and Saturdays.	11/19/2014 2:52 PM
328	Sumner or south locations to Seattle, to run late Friday's, several runs on Saturday's & Sundays.	11/19/2014 2:47 PM
329	The C Line in West Seattle needs more runs...it can be a miserable sardine can of a ride. And, could the driver at least blow fresh air in the bus cos it is so stuffy. You would think that the cloudy windows would be the first clue.	11/19/2014 2:36 PM
330	The 48 needs to run until 2 am ON WEEKDAYS. Seriously cuts out a lot of possible destinations for people in Greenwood/Greenlake area. Friday night service should be the same as Saturday night, because those are both nights people stay out late.	11/19/2014 2:29 PM
331	NA	11/19/2014 1:13 PM
332	On the days when a new quarter starts/ends at the UW, extra transit service is needed between UW and SeaTac Airport/King St. Amtrak station, because there would be a huge number of students arriving/leaving campus.	11/19/2014 12:54 PM
333	None that would be cost effective.	11/19/2014 12:53 PM
334	More u-district express busses (evening non-express service along eastlake takes so long)	11/19/2014 12:52 PM
335	I need earlier schedules for 107	11/19/2014 12:50 PM
336	there should be frequent all day service (including nights and weekends) between Capitol Hill, Ballard, Belltown, and UW. we should have to go downtown and transfer.	11/19/2014 12:47 PM
337	Routes traversing Capitol Hill, Fremont, Ballard	11/19/2014 12:44 PM
338	Would like to see the 181 to start 30 minutes earlier heading westbound to Twin Lakes on the weekends.	11/19/2014 12:23 PM
339	Not that I can think of. I usually don't go out late in the evenings, because it does not feel safe.	11/19/2014 11:52 AM
340	I think one seven or six o'clock sounder run during the week days would help me out. Also maybe one or two on saturday like 10am and 4pm.	11/19/2014 11:46 AM
341	23RD AVE S AND S JACKSON ST UWMC UW U DISTRICT DOWNTOWN SEATTLE	11/19/2014 11:19 AM
342	It is very difficult to get back from late night events in the city to Snohomish County/Eastside	11/19/2014 11:13 AM
343	The westbound 44 remains very crowded on weeknights even after the supposed end of the "peak" period. Even at 7 or 8 p.m., this route is often standing room only. Sometimes the bus is so full that there's not even any standing room for additional passengers. Ballard could really use a subway or grade-separated light rail route to connect to the University District. The 71, 72, and 73 Local going northbound to the University District tend to be very full and very slow, even late at night (around 10 p.m.) on weeknights. I tend to avoid these routes because they just feel interminable.	11/19/2014 11:03 AM
344	The bus routes on UW campus need to run later than 6pm to the Redmond Library/Districts Court (161st Ave)	11/19/2014 11:00 AM

345	Nothing at this time	11/19/2014 10:59 AM
346	Increased evening service after sporting events would be very nice.	11/19/2014 10:46 AM
347	See above.	11/19/2014 10:33 AM
348	no	11/19/2014 10:28 AM
349	need more frequent service (15 minutes or better) throughout the entire service day including weekends and late nights, on route 8	11/19/2014 10:25 AM
350	Woodenville to UW, early Tacoma to UW, more frequent, earlier start and on the weekend also.	11/19/2014 9:31 AM
351	Better service into and out of West Seattle (other than Rapid Ride) would increase the frequency with which I commute by bus both for work and non-work related occasions.	11/19/2014 9:09 AM
352	Sounder train service on weekends	11/19/2014 8:59 AM
353	see my previous notes	11/19/2014 8:39 AM
354	Some earlier light rail to the airport would be great.	11/19/2014 8:38 AM
355	Why do all the buses that pass through the Eastlake area from North Seattle sail through on "express" routes at exactly the times that people who work in that area (SCCA, FHCRC, etc) need to be getting to work????	11/19/2014 8:24 AM
356	Capitol Hill needs late night transit on Friday and Saturday night. Roads are clogged with cars from 10pm til 2am, this time period may even be the weekly peak in vehicles per hour.	11/19/2014 8:10 AM
357	Sandpoint to University of Washington area and Sandpoint to Downtown lack adequate bus service in the late evenings, weekends, and early in the morning.	11/18/2014 11:40 PM
358	Please keep the Montlake Flyer freeway stations. Lifeline for off-hour service. Link light rail needs to run earlier and later than presently	11/18/2014 9:57 PM
359	The east side of University District near University Village with service from the Ave or Capital Hill.	11/18/2014 9:23 PM
360	Either the Ave or 15th Ave NE. NE 45th St or 50th (put in a dedicated bus lane on 50th!) all the way to Ballard. U District to Cap Hill and Downtown.	11/18/2014 9:11 PM
361	not for my trips	11/18/2014 9:00 PM
362	Would suggest looking at adding services to 12th ave (from jackson ave up to madison ave.)	11/18/2014 8:52 PM
363	First Hill hospital area	11/18/2014 8:23 PM
364	Route 44 & 16	11/18/2014 8:10 PM
365	I have relied on the 72 to get home to Lake City in the evenings sometimes when I am out late and especially when traffic is bad and catching a bus in the tunnel means the bus will actually be able to move. The 72 takes me closer to home than the 522 or 41, which are also options to my neighborhood. I'm concerned about the 72 going away when light rail opens to the U-District. What will the options be beyond the U-District? If I will need to transfer from light rail, will it be safe?	11/18/2014 8:00 PM
366	Water Taxi to Vashon	11/18/2014 7:53 PM
367	The rainier ave & MLK corridors. The totem lake to Kirkland to Bellevue to downtown Seattle corridors.	11/18/2014 7:49 PM
368	YES - almost all of North Seattle outside the U District. Going to Green Lake, Greenwood or Ballard in the evenings and late at night can be quite frustrating with 30-60 minute headways.	11/18/2014 7:34 PM
369	I wish the 48 ran later/more frequently!	11/18/2014 6:46 PM
370	All of Wedgwood could certainly use more service to Downtown, at all times but on weekdays in peak direction. The current route 71 is very slow even when it is express (and unbearably slow when it isn't) because of a long winding detour into east View Ridge. All week we could use more direct Downtown service.	11/18/2014 6:31 PM
371	Don't know. In general, I think service gaps of more than 10-15 minutes are a big negative.	11/18/2014 6:24 PM
372	Service works well for me at the moment.	11/18/2014 6:17 PM
373	Service to and from the university district late at night and on the weekends is useful, as well as service along the I-5 corridor and to/from downtown to the neighborhoods.	11/18/2014 6:15 PM

374	I think the Pioneer Square area needs more security in dark hours so those waiting at stops feel safe.	11/18/2014 5:50 PM
375	Not to my recollection	11/18/2014 5:49 PM
376	East side! Epress buses from kingsgate would be great.	11/18/2014 5:32 PM
377	The transfer from SR-520 WB at Montlake to SB Montlake is amazingly awful. If that stop is going to continue to be used for any more time that should be addressed.	11/18/2014 5:21 PM
378	n/a	11/18/2014 4:40 PM
379	I ride early in the morning, not late at night due to safety.	11/18/2014 4:37 PM
380	See above.	11/18/2014 4:18 PM
381	Bellevue Avenue but you took that route out.	11/18/2014 4:14 PM
382	UW to Issaquah	11/18/2014 4:12 PM
383	East-west corridor of Seattle (travelled by the 8) is DRAMATICALLY underserved. There needs to be dedicated bus lanes for all of the tech workers who live in the hill but work in the SLU area, and fixing that will free up traffic in the Denny/Mercer area. Also, east-west corridor of south Seattle drops off after 10 PM (the 50) which has hurt my commute plans.	11/18/2014 4:09 PM
384	372 a bit later. Till midnight. 522 till midnight.	11/18/2014 3:33 PM
385	We sometimes go to Green Lake by bus on weekends using the 347/348 and 16 bus, which works ok but would be better with more frequent service on weekends. I love those little circulator routes like the 347/348 that run frequently. Connecting people to Green Lake and the bike trails (Burke Gilman) on weekends would be a great service, especially in summer. I look forward to the LINK extension northward, and I just hope that there will be an easy way to get to it early in the morning and late at night for airport runs.	11/18/2014 3:30 PM
386	Tacoma to Seattle	11/18/2014 3:18 PM
387	universities, community colleges, community centers, grocery stores. Entertainment hubs (cap. hill, u district)	11/18/2014 2:20 PM
388	near the university village. I work there until ~11, it changes.	11/18/2014 1:57 PM
389	It would be nice to have 24 hours service on the link light rail to/from Seatac. I find with early departing flights (5-6am) the Link service isn't yet operating for the day. Airlines want us there 2 hours before flight time, so often times that means being at the airport 3-4am when Link service isn't available.	11/18/2014 1:40 PM
390	None that affect me	11/18/2014 1:35 PM
391	I would take the bus to see an opera or ballet, but service stops before the events end. When I visit a city like Berlin or Paris, I can rely on public transportation to get me there and back.	11/18/2014 1:07 PM
392	Not sure. Probably the airport, First hill/hospitals	11/18/2014 12:58 PM
393	Seattle to south (Kent, SeaTac). Train service should be 24/7	11/18/2014 12:41 PM
394	The Northgate area (75, 16) late at night (11pm-12:00am) on the weekends is very infrequent. Getting stranded is very possible for people who work in this area.	11/18/2014 12:19 PM
395	Not aware of any.	11/18/2014 12:04 PM
396	Buses from Capitol Hill to Beacon Hill!	11/18/2014 11:57 AM
397	Downtown to Mountlake Terrace.	11/18/2014 11:57 AM
398	It's important to keep buses running down 15th Avenue NE weekends and evenings. Buses to Northgate are another option but they seem less reliable and less frequent.	11/18/2014 11:56 AM
399	N/A	11/18/2014 11:33 AM
400	Queen Anne	11/18/2014 11:14 AM
401	Columbia City, Rainier Valley, Central District to/from Downtown.	11/18/2014 11:07 AM
402	route 68 and 372 often dont stop at 25th and u village because they are full in the mornings around 8:10.	11/18/2014 11:03 AM
403	Bus ride to Broadway from South Seattle on the weekends. #9 bus only operates on weekdays but sometimes I need to get there on the weekends but its not available currently.	11/18/2014 10:59 AM

404	Not at this time.	11/18/2014 10:58 AM
405	Hospitals/medical centers are busy at all hours of the day and night. There should be more frequent service to various hospitals and medical centers at early and late hours.	11/18/2014 10:44 AM
406	North Seattle and Lake City	11/18/2014 10:25 AM
407	Capitol Hill to downtown, Capitol Hill to University District	11/18/2014 9:58 AM
408	Ballard/Fremont/Wallingford to Capitol Hill	11/18/2014 9:57 AM
409	No comment.	11/18/2014 9:56 AM
410	West Seattle!	11/18/2014 9:53 AM
411	n/a	11/18/2014 9:48 AM
412	Corridors serving Madrona (around MLK and Union).	11/18/2014 9:46 AM
413	I think there should at least be 1 or 2 busses that travel around 1-2am between the north end and downtown/seattle center to help with the number of drunk drivers that try and risk it because they feel like they don't have another option. Most responsible people will take a cab or a ride-share like Lyft or Uber, but not all. And that endangers EVERYONE.	11/18/2014 9:38 AM
414	McCullum Park & Ride OR Mariner P & R to the University District (TO UW-Seattle campus would be awesome! but at least the 45th Street Freeway Station. I need availability M-Th evenings for classes that run until 9:20. The Community Transit Route 860 is good, but doesn't run that late.	11/18/2014 9:34 AM
415	Not sure	11/18/2014 9:32 AM
416	Weekends/evenings - Belltown/Queen Anne/Ballard/Fremont to Eastlake/Capitol Hill	11/18/2014 9:14 AM
417	Route 167 to/from Renton and U-District needs to run LONGER and on WEEKENDS for those students commuting.	11/18/2014 9:13 AM
418	Sea-Tac Airport	11/18/2014 9:13 AM
419	I can't use transit to get to work at my current job in northern Belltown without it taking ~80 minutes each way for what is only a ~5 mile trip. It takes multiple transfers and two 20-minute walks, which isn't practical for a commuter. Transit works well for anyone who lives and works in a strict north-south area from downtown to the university or from Ballard to downtown or West Seattle to downtown, but for anyone needing to make an east-west trip followed by a north-south trip, the links between transit lines are uncoordinated and really impractical. Seattle residents don't all live in the same two north-south east-west corridors, yet transit lines act as if they do. Transit options also don't work for me if a bus is so full that I can't ride it. Transit options also serve people who work a perfect 9-5 schedule, but for anyone who works the longer hours typical of many companies in Seattle, it can be difficult to get to work and home on a 7-7 schedule (for example), as many routes already taper off or end service by those times.	11/18/2014 9:02 AM
420	unsure	11/18/2014 8:55 AM
421	UW Campus -> Eastside	11/18/2014 8:50 AM
422	Bring back the 30. We lost great weekend workers because of this change. The ripple effect was bigger than people think.	11/18/2014 8:46 AM
423	Arbor Heights!	11/18/2014 8:43 AM
424	evenings from UW district to ballard and greenwood neighborhoods	11/18/2014 8:30 AM
425	NA	11/18/2014 8:27 AM
426	My use is all during morning and evening commute hours.	11/18/2014 8:21 AM
427	for the most part i dont really travel late at night or super early in the morning	11/18/2014 8:21 AM
428	Yes.	11/18/2014 7:56 AM
429	alki beach	11/18/2014 7:56 AM
430	Auburn-Black Diamond Road	11/18/2014 7:52 AM
431	Rainier Ave S from Beacon Hill down to Rainier Beach	11/18/2014 7:32 AM

432	ferry terminal to UWMC	11/18/2014 7:15 AM
433	When I take the Sound Transit 586, it would be nice to have an earlier bus at 5:30 or 5:15. Many people complain that they are consistently late for work when they take the earliest bus, the 5:44.	11/18/2014 7:15 AM
434	Hospitals Connections to the airport (so many 6 am flights, have to get to the airport at 5:00)	11/18/2014 6:24 AM
435	#27 also needs a schedule posted at the eastbound stop at 23rd and Yesler #8 would rather not take an expensive cab to the airport or Mt. Baker station! BTW - thank you for asking all of this! 70 people row at Mt. Baker Rowing at 5:30 each morning. Each of them (except me) is driving a car. I'm hitchhiking.	11/18/2014 5:55 AM
436	EARLY MORN & LATE NIGHT: From the airport to downtown and vice/versa!!! Getting off at Rainier Beach or Mt Baker at that sketchy transfer station is about the least safe experience I've seen with Seattle Metro &/or Sound Transit. I can understand limiting service at these times, but WHY wouldn't limited service include Downtown?? EVENINGS & WEEKENDS: U-district to downtown	11/18/2014 2:48 AM
437	Capitol Hill needs better weekend/late-night service, as a popular nightlife destination. Service in Eastlake needs to be maintained and improved, and not eliminated or reduced just because of the opening of light rail between Downtown Seattle in the U-District. Eastlake often does not get the advertised amount of service because U-District/Downtown buses are too full to stop. Service between all the major downtown areas in the Seattle area (Seattle, Bellevue, Redmond, Kirkland, Tacoma) needs to operate until at least midnight-1:00 am. It's almost impossible to go to any evening event in cities other than Seattle and be able to get back to Seattle afterwards. Light rail needs to operate later, preferably 24 hrs/day given the airport connections, but at least until 2 am every night.	11/18/2014 2:15 AM
438	IMA. Basically where students go. Also up and down 45th past greek row too.	11/17/2014 11:39 PM
439	no.	11/17/2014 11:38 PM
440	Not corridors, just the route 197	11/17/2014 11:29 PM
441	hospitals	11/17/2014 11:18 PM
442	More frequent morning schedules on weekends for the 271. Many Eastsiders use this bus to get to University district during the week but will drive on the weekend because there isn't as frequent service. Also another bus coming later than 10:20pm (all the week) to accommodate for busy student schedules and people coming off a night shift at work.	11/17/2014 11:09 PM
443	I used to have to be at work downtown at 5am most days and there weren't any buses that could get me there so I'd have to drive or ride my bike. It's hard though because I don't think the demand for buses that early would be too high so it wouldn't warrant the additional cost. Some of the express times could definitely start earlier or go later. Especially for the commuter buses and 71, 72, 73 express buses.	11/17/2014 11:05 PM
444	Capitol hill to U District	11/17/2014 10:53 PM
445	Late night Weekend Afternoons and night.	11/17/2014 10:40 PM
446	route 372 to Woodinville with stops in downtown Bothell	11/17/2014 10:37 PM
447	I am often in downtown/Belltown on weekend nights, but the 8 bus back to Capitol Hill seems to stop fairly early. Keeping the bus running until 2AM would be nice.	11/17/2014 10:34 PM
448	downtown to Ravenna on the weekends	11/17/2014 10:04 PM
449	Yes, # 277 needs to become a full time 7days a week, 0500hrs--2200hrs (I work in the hospital and illness and patients don't stop because it is weekend!!)	11/17/2014 10:03 PM
450	Ballard - up 32nd Ave NW. Also, public transportation has no kept up with population growth in Ballard. You may, at some point, need a park and ride garage in the area.	11/17/2014 10:03 PM
451	Late at night is usually a good time for all buses to run, since I'd prefer to be safely on a bus than walking around alone at night.	11/17/2014 10:03 PM
452	Going to UW, especially from Cap Hill or Downtown.	11/17/2014 10:02 PM
453	372 route from Kenmore area to UW should be offered on weekends.	11/17/2014 10:01 PM
454	nah	11/17/2014 9:46 PM
455	University of Washington	11/17/2014 9:45 PM

456	Not any areas I use regularly at the moment.	11/17/2014 9:38 PM
457	connections between the UW and downtown	11/17/2014 9:33 PM
458	The Renton transit station could use more frequent late night/early morning trips, as could the Capitol Hill area.	11/17/2014 9:29 PM
459	No	11/17/2014 9:23 PM
460	25th Ave NE/ 35th Ave NE/ Sand Point Way connecting to Link Light Rail Station	11/17/2014 9:14 PM
461	No	11/17/2014 9:13 PM
462	From downtown- I use buses to 520/ montlake station or buses to and from the u-district. I have to drive on the weekends when the bridge is closed or on sundays cuz I can't get to work on time or I can't catch my ferry.	11/17/2014 9:12 PM
463	Yes, expand the hours and days of the 18.	11/17/2014 8:50 PM
464	Capitol Hill to U-District (49) needs greater service frequency and longer service at night, especially Friday and Saturday. For U-District to downtown, there is a gap between the 83 and 71/72/73 that is sometimes inconvenient, such as for catching early flights at the airport.	11/17/2014 8:46 PM
465	Evening services in the Udistrict need to be improved to account for capacity.	11/17/2014 8:46 PM
466	The 44 is always crowded no matter what time of day. And slow. I can get a similar distance on teh 66/67 much faster.	11/17/2014 8:42 PM
467	Late night service (1am-4am) from downtown Seattle/UW/Capitol Hill to the Eastside would be fantastic. It would allow people to work and unwind in Seattle and go home without worrying how they're going to get home.	11/17/2014 8:26 PM
468	yes, to and from the Pioneer Square area and out of Queen Anne	11/17/2014 8:21 PM
469	UW campus.	11/17/2014 8:16 PM
470	It would be nice to have 542 on the weekends.	11/17/2014 8:06 PM
471	University District	11/17/2014 7:55 PM
472	No.	11/17/2014 7:53 PM
473	N/a - daytime rider	11/17/2014 7:51 PM
474	Not that I can think of	11/17/2014 7:44 PM
475	between hospitals and major commute centers	11/17/2014 7:43 PM
476	If UW could have service at very late hours that would be great.	11/17/2014 7:40 PM
477	It would be nice to have service from Redmond transit center to Woodinville from 7pm to 9pm on Weekdays, but that probably isn't realistic since not many other people would use that service.	11/17/2014 7:24 PM
478	Federal Way Sandpoint Way	11/17/2014 7:19 PM
479	the buses that go from the u-district to downtown seattle or the lightrail that goes to the airport.	11/17/2014 7:17 PM
480	University District	11/17/2014 7:12 PM
481	Anywhere in the University District has had bus cuts of reduced hours. This is inconvenient for students who don't have cars and are too poor for taxis to get out and do anything on weekends or at night.	11/17/2014 7:10 PM
482	Near the university the #44 around rush hour is extremely packed so extra buses may be helpful, or at least having the longer buses available.	11/17/2014 7:08 PM
483	Late at night on Capitol Hill/U district and early morning in both spots as well.	11/17/2014 6:48 PM
484	Around the University area would be quite convenient, as many students, myself included, move around late at night, especially on the weekends.	11/17/2014 6:48 PM
485	Pretty much anywhere around the University District and Capitol Hill	11/17/2014 6:41 PM
486	No.	11/17/2014 6:38 PM
487	The 48. If it ran later (after midnight) I would ride the bus every day.	11/17/2014 6:34 PM
488	Work	11/17/2014 6:24 PM

489	More of the U District to everywhere. Capitol Hill, Fremont, and Wallingford to Northgate.	11/17/2014 6:19 PM
490	There should be more 48 buses at peak times.	11/17/2014 6:07 PM
491	To west broadview, all times	11/17/2014 5:57 PM
492	From UW to the ferry terminal is important in the evenings for after concerts at UW.	11/17/2014 5:53 PM
493	Being able to get from UW to Des Moines on the weekends. I tried it once, it took 2 transfers and those were so infrequent I ended up having to find a ride (my next bus pulled away as the one I was on was arriving, there was an hour gap between routes).	11/17/2014 5:48 PM
494	Getting to UW.	11/17/2014 5:46 PM
495	between the U District and Capitol Hill could use more service later into the night the 10 towards downtown could start earlier in the morning, for people trying to get to the light rail to get to the airport for an early morning flight	11/17/2014 5:41 PM
496	The Central District could use later service for the 48.	11/17/2014 5:29 PM
497	Busses that service the UW Seattle campus need to operate later in the evening, as MANY classes don't end until 7pm, 9:20pm, or even 10pm, and current service makes it next to impossible for students and teachers in these classes to take the bus home.	11/17/2014 5:27 PM
498	Yes, the 197.	11/17/2014 5:26 PM
499	I am sometimes frustrated at the lack of buses going from the UW to the Eastside late at night.	11/17/2014 5:21 PM
500	Well, the corridors that need service in the evenings, nights, weekends, very early in the morning, and late at night, are the same ones that need service during the day in Southeast Seattle. Many people have work and school schedules that require them to commute outside of peak hours, and they deserve to have safe transportation options.	11/17/2014 5:20 PM
501	15th Ave NE	11/17/2014 5:16 PM
502	The idea of "Metro Peak Service" should be revised for UW campus. As UW campus needs more evening service. Checking the statics the buses are more crowed in afternoon and evening than in morning peak. IN fact late morning is also full. The buses are not packed in the morning because students aren't up yet at 7am.	11/17/2014 5:10 PM
503	Capitol hill can always use more late night busses. I often worry for my friends who take other bus routes that don't run as late or won't take them directly to their neighborhood (for example from capitol hill to shoreline).	11/17/2014 5:03 PM
504	downtown to Sunset Hill late at night.	11/17/2014 5:02 PM
505	Eastgate P-R to Sea-Tac Airport	11/17/2014 5:01 PM
506	I do not use the bus late at night because there are none from downtown.	11/17/2014 4:58 PM
507	118 on Saturday morning on Vashon Island would be helpful. There used to be a bus leaving Burton at 9 a.m. and now the earliest is 10 a.m. or later, if I recall correctly. Buses to meet more of the evening ferries would be nice. Wait times at ferry terminal can be as long as 55 minutes.	11/17/2014 4:58 PM
508	N/A	11/17/2014 4:50 PM
509	the 25 bus route	11/17/2014 4:45 PM
510	The fact that there is no bus directly from capitol hill to northgate makes dancing there in the late evening difficult if I am unable to find a ride there since the buses do not make it to that area often enough.	11/17/2014 4:44 PM
511	I am lucky to have late night and early morning bus service where I live.	11/17/2014 4:40 PM
512	The UW campus IMA center would be extremely nice to have transportation to and from on the weekends and any day actually late at night. I want to go to the gym on campus, but I have to ride 20 mins to campus and then walk 10 mins down to the gym and then walk all the way back up and wait for the bus again. If there was a shuttle or general bus you could catch to the IMA to and from campus that would be really nice.	11/17/2014 4:39 PM
513	Better service on the 40 on Sundays.	11/17/2014 4:36 PM
514	Yes extend evening service!	11/17/2014 4:35 PM
515	not sure	11/17/2014 4:24 PM

516	Late at night in the U-District, Capitol Hill. Even on weekends-- just because it's the U-District, doesn't mean that the area should be neglected on weekend mornings.	11/17/2014 4:24 PM
517	I am not looking forward to having to walk longer distances at night when the light rail opens at Roosevelt. I will be in my 70s when that happens and attending plays downtown will be more difficult at night if the cross town service - route 71 in particular runs only every 30-60 minutes. This stop will be about a mile from my home. Rather than wait, I will walk - especially if I've just missed a connection. I can't image that even Roosevelt will be that pleasant a place to wait in the dark -" keep moving" is my motto and walk with purpose so no one will bother me. So hopefully I will have an active old age.	11/17/2014 4:21 PM
518	The 68 and 372 routes are rather infrequent the later it gets in the evening. This is very inconvenient for me. I often have to walk home from the library at night to my apartment near U Village, which is a bit of a walk (especially in the dark).	11/17/2014 4:15 PM
519	Capitol Hill to Ballard through Wallingford	11/17/2014 4:11 PM
520	don't know	11/17/2014 4:11 PM
521	Any route to/from the University of Washington Seattle campus.	11/17/2014 4:11 PM
522	Downtown tunnel to U district should run throughout the night. Bellevue should run very early morning. Routes to seatac should run at all times (redeye flights).	11/17/2014 4:08 PM
523	More of the University express buses from Westlake, those are always packed.	11/17/2014 4:03 PM
524	Not to my knowledge	11/17/2014 4:02 PM
525	I know that my son wasted MANY many hours waiting for buses, trying to use them to commute home in the evenings after his high-school sports team practices ended. So more service around 6-7pm	11/17/2014 3:59 PM
526	Capital Hill, Downtown, Ballard	11/17/2014 3:54 PM
527	Parking at light rail stations.	11/17/2014 3:53 PM
528	All areas need service - the whole point of a public transit system is it is there when you need it - you can stay downtown for an event and not worry about not being able to get home because you missed the 10 pm bus. Also - many people work non-traditional shifts and need to get around at odd times even if the bus isn't full at those times.	11/17/2014 3:53 PM
529	Northwest Ballard needs a weekend service and a route that services all day, and not just during commuting hours.	11/17/2014 3:51 PM
530	Alki beach, Admiral district	11/17/2014 3:50 PM
531	Bring 47 back into service, please	11/17/2014 3:50 PM
532	I don't take the bus if I have to get from UW to my home after 6PM. It doesn't run often enough.	11/17/2014 3:39 PM
533	556! Issaquah! Not via the dusty, unfun 271!	11/17/2014 3:36 PM
534	n/a	11/17/2014 3:35 PM
535	When I lived in Wedgewood, I always wanted there to be more late-night routes from Capital Hill on the weekends.	11/17/2014 3:33 PM
536	I would like to see more travel to Bellevue as well as more travel to neighborhoods late at night, including Wedgwood, Maple Leaf, Pinehurst, Queen Anne, etc	11/17/2014 3:32 PM
537	Route 32 late night.	11/17/2014 3:31 PM
538	From the U-District to Westlake Center, and on the Link Light Rail to the airport.	11/17/2014 3:31 PM
539	MLK	11/17/2014 3:27 PM
540	no	11/17/2014 3:24 PM
541	n/a	11/17/2014 3:23 PM
542	Sammaish City Center - later at night than currently provided	11/17/2014 3:18 PM
543	Not that I can think of.	11/17/2014 3:17 PM

544	University of Washington to Tacoma, need a direct route that is available until 9 pm to capture students that get out of classes later.	11/17/2014 3:14 PM
545	West Seattle (south of the junction, between 35th and California)	11/17/2014 3:13 PM
546	I-405 Exit-7 : It is so essential to have a bus service to this area. Many people live in that area, but there is no bus service at all. They really in need of public transportation.	11/17/2014 3:11 PM
547	University District to Northgate, late night.	11/17/2014 3:11 PM
548	I'm sure there are plenty of routes that need to happen at irregular times for folks who don't work a 9-5 M-F. I can't think of any right now though.	11/17/2014 3:11 PM
549	Safeco	11/17/2014 3:11 PM
550	The 372 departing from the Lake Forest Park area does not have a very early morning route to UWMC.	11/17/2014 3:09 PM
551	U District to Bellevue late in the evenings.	11/17/2014 3:09 PM
552	East-West service between University District that travels to 65th NW Street would help immensely. The only alternates right now are 46th NW or 85th NW from the University District causing me to walk a mile in either direction if no North-South bus is available.	11/17/2014 3:08 PM
553	I wish the 48 ran later at night: if I stay in the U-district after midnight I have no way to get home.	11/17/2014 3:07 PM
554	I personally use the 43/44 after work ends at 9pm, and because service is so infrequent I often walk 20-30 extra minutes rather than wait.	11/17/2014 3:06 PM
555	There should be an additional Sounder train that leaves King Street station after 6:30PM or 7:00PM to accommodate late working employees.	11/17/2014 3:04 PM
556	NA	11/17/2014 3:02 PM
557	Unsure.	11/17/2014 3:02 PM
558	More train hours	11/17/2014 2:59 PM
559	I would not need these services.	11/17/2014 2:54 PM
560	Yes - From the Garfield /Benton/ UWMC stops going north on campus - the 70 at 7:15 pm is always at max capacity, maybe another service is needed this time of evening, perhaps another service at 7:30 pm?	11/17/2014 2:50 PM
561	Not sure, but please add bus speed improvements and more frequent connections from UDistrict to husky stadium station.	11/17/2014 2:48 PM
562	Yes. The 30 and the 68 were very useful weekend buses that no longer run as often. Also I would love it if there was a bus from U-district to Redmond late at night.	11/17/2014 2:45 PM
563	early morning trips to connect up to light rail so you can get to the airport would be nice.	11/17/2014 2:42 PM
564	From UW to the north of the city	11/17/2014 2:42 PM
565	Maple Valley is underserved and people would ride the bus if there were more options. Also the drivers need to do the speed limit on Hwy 169. They often go 40 mph in a 50 mph zone (even on dry clear days) and so can't make their stops on time, and impede traffic behind them!	11/17/2014 2:41 PM
566	west seattle/delridge/southpark	11/17/2014 2:40 PM
567	running the E line later on weekend nights would be nice	11/17/2014 2:40 PM
568	25th Ave NE & 47th St NE	11/17/2014 2:39 PM
569	I would love increased service between 15th Ave NE north of 80th and the U District, especially late at night.	11/17/2014 2:39 PM
570	From U-Districts to Downtown, Sea-Tac Airport	11/17/2014 2:38 PM
571	none	11/17/2014 2:37 PM
572	The trip from downtown to the U District is extremely busy and well traveled. Most of the buses are overcrowded. This corridor needs additional buses and more frequent service. Given that there are so many people commuting to the UW from the islands, perhaps some sort of shuttle from the waterfront to UW might be helpful.	11/17/2014 2:35 PM

573	South Lake Union needs a lot more service, especially since there are a lot more people traveling to that area now.	11/17/2014 2:31 PM
574	The U district needs more evening buses going to Capitol hill, Ballard and sand point.	11/17/2014 2:30 PM
575	Need more and faster service to Sea-Tac from park-and-rides around the region.	11/17/2014 2:28 PM
576	No	11/17/2014 2:24 PM
577	Yes, more bus stops in the SeaTac neighborhood.	11/17/2014 2:23 PM
578	YES--northeast Seattle (as noted earlier), from the downtown and U District at night, and also a bit earlier on weekday mornings.	11/17/2014 2:22 PM
579	45th Street (route 44)	11/17/2014 2:21 PM
580	Yes--Between Capitol Hill and the U-District during rush hour, and between Capitol Hill and downtown later at night.	11/17/2014 2:20 PM
581	No, that's when I can actually get to work	11/17/2014 2:19 PM
582	1st hill for people who work 12 hour shifts and all of the hospitals	11/17/2014 2:19 PM
583	Any and all of the outlying areas (Ballard, U. District, West Seattle, Magnolia). The East-West transit is really abysmal.	11/17/2014 2:18 PM
584	43 and 48 that are routes used by a great number of people can run later than their current running hour at night.	11/17/2014 2:18 PM
585	UW always needs service	11/17/2014 2:18 PM
586	University of Washington area needs more/better/late night bus options.	11/17/2014 2:17 PM
587	The 11 Eastbound doesn't come frequently enough in the evening. There have been many occasions on which I have walked the entire way from Capitol Hill to Madison Park because the bus hasn't been scheduled to arrive for another 45+ minutes.	11/17/2014 2:16 PM
588	Early morning between the downtown sounder station and the UW Campus by light rail. This would open up Sounder travel to Tacoma and Olympia.	11/17/2014 2:16 PM
589	More buses late at night from downtown to people's neighborhoods would be nice. Sunday service could generally be improved.	11/17/2014 2:16 PM
590	UW	11/17/2014 2:16 PM
591	The hospitals - Harborview, Swedish, UWMC, Childrens	11/17/2014 2:15 PM
592	I sometimes have late meetings and would love a safe transit alternative that would accommodate later evenings and the weekends.	11/17/2014 2:12 PM
593	East- West corridors need bus service don't cut.	11/17/2014 2:12 PM
594	n/a	11/17/2014 2:12 PM
595	Buses or light rail to and from sporting events in the evening. There are one or two buses that leave in the morning and return in the evening from Mercer Island. They are for very narrow business hours and the afternoon buses rarely match my irregular workday, with the last being around 4:30.	11/17/2014 2:10 PM
596	CT 119	11/17/2014 2:10 PM
597	It would be cool if the train had an extra run or two. It could add more time and enable longer days or schedules in seattle	11/17/2014 2:09 PM
598	I would love to see more late night and early morning transit on UW campus.	11/17/2014 2:09 PM
599	N 130th between Aurora Ave N and 5th Ave NE has no service. This is a major thorough fare that could connect riders to other major bus routes heading north and south.	11/17/2014 2:08 PM
600	To and from the airport, and areas of downtown and Capitol Hill where there are lots of bars and nightclubs.	11/17/2014 2:08 PM
601	It would be a good idea to have extra service when there are sporting events at the Stadiums - extra 41, 71, 72, 73 buses would be extremely helpful to ease crowding and reduce vehicle use.	11/17/2014 2:07 PM
602	I'm not usually riding the bus at times other than standard commute/work hours	11/17/2014 2:07 PM

603	Connecting to the Link Light Rail in order to get to SeaTac airport for very early morning flights. It is very difficult to get to downtown Seattle and on the Light Rail in time for a 5-6 A.M. flight.	11/17/2014 2:06 PM
604	Yes - more frequent evening service between North Ravenna and University District	11/17/2014 2:06 PM
605	It's great that Seattle cares to service so comprehensively those neighborhoods with, shall we say, higher economic brackets. They ride less and drive more, but never mind that small detail for the time being. What kind of city dumps so much money into providing expensive bus service for areas having people who simply do not want to ride the bus? Me neither. Yes, there are "particular corridors...that need service..." Those corridors are those with the old and broken buses; those corridors are those with the lonely posts on muddy grass that pass for legitimate stops. Those corridors are those where a lone woman dare not stand and wait at any time of the day. Focus on those and Seattle may one day have a transit service that isn't a massive joke.	11/17/2014 2:04 PM
606	My area has comprehensive local/focal point bus coverage. I don't use the buses late at night so I can't speak to it. If/when I use it on the weekends to get around I do use the bus timetable and for the most part the buses are not crowded unless it is early evening. Then the people fleeing downtown before it gets really dark crowd the buses.	11/17/2014 2:04 PM
607	I do not require these services specifically.	11/17/2014 2:04 PM
608	Capitol Hill, University District	11/17/2014 2:04 PM
609	capitol hill, ballard and queen anne need late night service/early morning,	11/17/2014 2:02 PM
610	Mostly just out of downtown, my late night option in just 1 bus that runs every hour.	11/17/2014 2:02 PM
611	There need to be buses that run from Capitol Hill very late at night. Lots of people go drinking there late at night, and they need a safe way to get home!	11/17/2014 1:59 PM
612	Beacon Hill, Capital Hill, Downtown, University District, Belltown,	11/17/2014 1:57 PM
613	UW campus needs more weekend service. I needed to get to campus on a Sunday but the 67 wasn't running, for example. Also, the 49 should run more frequently late since the only options late at night are 12:15, 1:15, and 2:15 to get back to the U district	11/17/2014 1:56 PM
614	Very few busses leave the UW after 10:00 pm. That curtails my visits to Meany Hall for music and dance programs. I also have a late meeting on Wednesdays once a month. I always have to leave the meeting early to catch the last bus.	11/17/2014 1:56 PM
615	Belltown needs multiple buses after 2 am!!! Get those drunks out of there, please!	11/17/2014 1:55 PM
616	These routes serving UW (the ones I'm familiar with are 373, 372, 73, 72), they pack up. It would also be helpful to keep some of the ones going through campus running more often/late (373 and 372) for the people who have classes that end at 10. I think I barely miss both of those routes when I get out of class at 10, then I forget if they don't show up or if they run on the hour or so after that.	11/17/2014 1:54 PM
617	The Eastside-- Kirkland, Bothell, Redmond, Bellevue-- including formerly "unincorporated King County" areas.	11/17/2014 1:54 PM
618	Yes, all of the on-campus stops at UW need to have more frequent service at night!	11/17/2014 1:54 PM
619	U- district (From Pend Oreille to NE Campus Parkway) - needed more frequency close to late evening / night	11/17/2014 1:54 PM
620	Hard to get to Northeast Seattle late at night.	11/17/2014 1:53 PM
621	I would like it if the 72 ran more often than every hour on weekends, because there is nothing else I can use to get where I need to be downtown or in the greater U District due to the lack of a 372 on weekends and a rather inefficient and untimely schedule of 65 buses at those times.	11/17/2014 1:52 PM
622	Stops at and near the university	11/17/2014 1:52 PM
623	The places that I can think of already have such service.	11/17/2014 1:52 PM
624	Mercer Island from the Park and Ride to Island Crest Way & NE 40th and also closer to Shorewood Heights Apartment complex.	11/17/2014 1:52 PM
625	373, a 7.30 or 7.45 pm departure from UW. Better transfer times between the 73 and the 347/8.	11/17/2014 1:51 PM
626	It would be nice if the tunnel and the link light rail stayed open all night.	11/17/2014 1:49 PM
627	None that I can think of.	11/17/2014 1:47 PM
628	Yes, see answer to the first question... Also, better safety monitoring at the Northgate transit center.	11/17/2014 1:47 PM

629	I don't know.	11/17/2014 1:47 PM
630	Not Sure	11/17/2014 1:46 PM
631	I've had mixed experiences with the 8. Sometimes it does not arrive or it is very late. This has been frustrating on weekends when it only runs every half hour.	11/17/2014 1:45 PM
632	Hospitals need more service from 2300-0000 for people who are leaving evening shift jobs. I work at UW Medical Center and buses after my shift ends at 11:30 are often significantly delayed, which leaves me out in the cold!	11/17/2014 1:45 PM
633	When I have to travel between Campus Parkway and Seattle-Tacoma International Airport in the late night and early morning periods, the light rail system is often not running. The alternative busses are basically infeasible. The King County Metro trip planner recommends an itinerary that is almost four hours long and requires four transfers. For those trips, I have been forced to use taxi services. Any relatively direct service between the airport and the Downtown Transit Tunnel would make this feasible. I would rather transfer between busses in the middle of the night in the Downtown Transit Tunnel than on the surface.	11/17/2014 1:44 PM
634	Yes- South Lake Union.	11/17/2014 1:44 PM
635	I think keeping buses running until 2:30am in areas with popular night time spots is a good idea to keep drunk drivers off the road. Also, making sure stops in these areas are safe and well-lit is important.	11/17/2014 1:43 PM
636	Lake City and 125th to/from Capitol Hill (23rd and Aloha)	11/17/2014 1:43 PM
637	None	11/17/2014 1:43 PM
638	15th Abe, and north gate!!!	11/17/2014 1:43 PM
639	Airport needs service 24/7 25th Ave NE near U. Village needs service on weekends and later at night	11/17/2014 1:42 PM
640	Most parts of Seattle outside of downtown are under serviced. In order to take advantage of transit, I am forced to live downtown, in spite of the fact that I am rapidly being priced out of this housing market.	11/17/2014 1:41 PM
641	yes	11/17/2014 1:40 PM
642	McCaw hall (Seattle Center) to the Central District on weekend evenings	11/17/2014 1:40 PM
643	Leaving SeaTac airport after late flights	11/17/2014 1:40 PM
644	Capitol Hill late at night! leaving that area and going to Beacon Hill.	11/17/2014 1:40 PM
645	I usually only drive to work when I want to the UW's IMA at 3924 Montlake Blvd NE and there is NO bus service that doesn't involve 10+ min walk in Seattle's rainy weather.	11/17/2014 1:38 PM
646	25th ave NE could use more evening weekend bus service.	11/17/2014 1:36 PM
647	To west campus of UW To the Coleman ferry terminal	11/17/2014 1:36 PM
648	n/a	11/17/2014 1:35 PM
649	I live in Everett, on Evergreen way & 79th St SE, and work for the UW at the Seattle Campus. I need a bus from Everett Station Directly to the UW (Seattle) there are no direct routes only buses that will go downtown first and U-District buses currently leave McCullum Park and Ride South Everett & Mariner Park & Ride in South Everett, but nothing at all in Central down town Everett.	11/17/2014 1:34 PM
650	N/a	11/17/2014 1:34 PM
651	Downtown to U District (especially when movies are over)	11/17/2014 1:33 PM
652	I don't know.	11/17/2014 1:33 PM
653	south lake union	11/17/2014 1:32 PM
654	My husband and I rode the 12 from downtown (2nd and Marion) at about 10 pm. Some crazy guy seemed to be stalking us so we got off a bit early and went into a public place. As I pointed out in the answer to question 6, the 12 downtown does not come as frequently as the schedule indicates so we had to spend quite a bit of time waiting with the crazy man to begin with.	11/17/2014 1:31 PM
655	West Seattle to anywhere else without having to hang around downtown in the dark to transfer.	11/17/2014 1:31 PM
656	Downtown Seattle To Magnuson Community	11/17/2014 1:31 PM
657	the Aurora/99 corridor needs more service and more frequent service.	11/17/2014 1:29 PM

658	Newport Hills park and ride	11/17/2014 1:29 PM
659	None that I know of.	11/17/2014 1:29 PM
660	It can be hard to get to the airport early in the morning, but I do this very seldom.	11/17/2014 1:29 PM
661	I believe the 65 only runs until around midnight, then stops for a few hours. It would be convenient for me to have it run from midnight until it normally begins in the morning. I'm always worried about getting stuck on campus.	11/17/2014 1:28 PM
662	weekends- through U district	11/17/2014 1:27 PM
663	Down-town to Sea-tac, University of Washington.	11/17/2014 1:26 PM
664	The UW corridor becomes incredibly slow during rush hour on weekdays. It's faster to walk to the hospital than wait for a bus.	11/17/2014 1:25 PM
665	Connecting Ballard and Capitol Hill. There are generally good East-West routes and good North-South routes. But it would be nice to have a couple of "diagonal" routes to supplement. The time it takes to transfer, especially late at night prevents be from using transit at those times.	11/17/2014 1:25 PM
666	Very late at night	11/17/2014 1:25 PM
667	If the bus system ran later that would be a great help. I often can't go places at night because I know I won't get a bus back	11/17/2014 1:25 PM
668	The 48 to Loyal Heights should run later, like the 44.	11/17/2014 1:24 PM
669	Bothell Way	11/17/2014 1:24 PM
670	None that I use that I haven't already mentioned.	11/17/2014 1:23 PM
671	Magnolia could use service to and from the U district later at night and on Sundays (route 31).	11/17/2014 1:23 PM
672	A 6pm or 7pm UW Campus to Renton Transit Center please	11/17/2014 1:23 PM
673	Anything going to and from West Seattle	11/17/2014 1:23 PM
674	I would like to see a direct route connection between Tacoma and Bellevue, even if only during the morning commute and evening commute hours. Additionally, I would like to see the 586 express route from the U-District to Tacoma, WA extended to run later than the 6:30 pm departure. This would facilitate greater time available to be on campus to utilize the resources available that I am otherwise not able to use during the morning/day due to working while going to school and not available at home. If the last bus was to leave the U-District as late as 8 pm would be great.	11/17/2014 1:22 PM
675	Mercer Island currently has no bus service on weekends, and that's a big need.	11/17/2014 1:22 PM
676	More frequent late night buses through capitol hill and downtown Seattle on Fridays and Saturdays.	11/17/2014 1:20 PM
677	The 25th ave and 15th ave corridors heading in to UW in the mornings, and away in late afternoon are exceptionally crowded, and often leave would-be commuters standing on the curb because their is no room for them on the bus. Extending service during evenings/weekends would be nice, but works as it is, provided it isn't cut/reduced.	11/17/2014 1:20 PM
678	n/a	11/17/2014 1:19 PM
679	Seattle Center	11/17/2014 1:19 PM
680	Capitol Hill - Central District and vice versa.	11/17/2014 1:19 PM
681	Once, I was doing late night grocery shopping before a vacation and I had just missed a bus in the lower queen anne area heading downtown. I would have had to wait another 40 something minutes for a bus so I just ended up walking 15 blocks or so downtown with heavy groceries, but I would have preferred to catch another bus 15 min later. This example sums up the lack of late night bus transportation. Or coming home from a show on Capitol Hill or Ballard and having the same sort of wait time in between routes. It is just a long time to stand outside waiting for a bus, especially if you have experienced sexual harassment/assault at bus stops before. Thanks for looking into all these things.	11/17/2014 1:18 PM
682	YES! Service between UW Seattle and UW Bothell evenings and weekends!!!	11/17/2014 1:18 PM
683	Hospitals	11/17/2014 1:18 PM

684	Issaquah highlands park and ride to university on weekends and late night through express buses that take only an hour	11/17/2014 1:18 PM
685	It would be great to have the 77 run on weekends and evenings. Would love take the bus downtown at those times and not have to take the extra time to ride through the U-District.	11/17/2014 1:17 PM
686	n	11/17/2014 1:16 PM
687	Say least one train on the weekend would be nice, in case someone had to get to there destination	11/17/2014 1:15 PM
688	Eastlake needs more service (aside from the 66 and 70 - the 66 should come more frequently).	11/17/2014 1:14 PM
689	University Village should connect to Downtown	11/17/2014 1:14 PM
690	Late at night: U-district and surrounding area, Capitol Hill, Downtown.	11/17/2014 1:13 PM
691	I rarely use the bus evenings or weekends, but probably would for some things if available. On weekdays, I usually take the 855 at 5:50 am to the UW. I would LOVE to see an earlier one. The 855 can be VERY crowded on the 5:50 am bus, especially when school is in session. Frequently, people are standing in the aisles for lack of seats, so I would imagine another bus not too long after that one would be very welcome. Also, I understand that the P&R parking lots fill up very early and people have to find streets to park in. I haven't encountered that, but I do hope that is being looked at. The Mountlake Terrace P&R with it's multiple floors and the walkway across the freeway makes a lot of sense. I understand that at some point in the future, there will be light rail southbound and to the UW. That will, I'm sure, solve a lot of current issues.	11/17/2014 1:12 PM
692	It would be nice to have more Univ of WA to MLT park-n-ride or Edmonds park-n-ride trips (like we had prior to 2009?) in the evening so late work schedules could be accommodated.	11/17/2014 1:12 PM
693	Redmond to downtown.	11/17/2014 1:11 PM
694	I used to use the 68 to Northgate very frequently and it was annoying that it didn't run in the evening. Other than that, I haven't had a problem with the times of service, only the frequency.	11/17/2014 1:11 PM
695	park and rides need more service late at night. for instance, from eastgate park and ride in belleuve, that last 271 that leaves to the university district leaves at 10 PM. this limits the amount of time i get to spend with my family.	11/17/2014 1:11 PM
696	Sr 520 & 51st	11/17/2014 1:10 PM
697	Northgate Mall - it gets very crowded on the weekends and is open until 10. Late at night, it can be hard to catch a bus from the UWMC at Pacific St. to neighborhoods like Maple Leaf (and impossible on the weekends to do so). This requires me to use my personal vehicle, limiting where my fiance then can go because we share the car.	11/17/2014 1:09 PM
698	Transit associated with sporting events.	11/17/2014 1:09 PM
699	McCullum P&R to U district/downtown Seattle and back again at off hours-for leisure activities not just work	11/17/2014 1:08 PM
700	I tend not to use transit before 8am, after 7pm or on the weekends.	11/17/2014 1:08 PM
701	N/A	11/17/2014 1:08 PM
702	It can take awhile to get C/D line buses downtown at night.	11/17/2014 1:07 PM
703	Aurora. U district. Downtown.	11/17/2014 1:07 PM
704	Weekend service to Wallingford is ridiculous.	11/17/2014 1:06 PM
705	Having a bus route late at night from uw to federal way would be nice as the last one leaves around 4pm and there are classes that let out at 4:30 and 5:30.	11/17/2014 1:06 PM
706	Getting to the ferry on time or in a way that makes me feel safe and comfortable late at night or on the weekends means I am unlikely to take the bus. I don't feel like they are reliable and that the bus drivers have a hard time managing a lot of the people in the downtown areas.	11/17/2014 1:06 PM
707	Capital Hill late night on weekends and expand routes to and from U Village on Sundays (That is my only free day to go grocery shopping and routes cut off in the early afternoon.	11/17/2014 1:06 PM
708	more buses to West Seattle at night via SR-99	11/17/2014 1:06 PM
709	Unknown	11/17/2014 1:06 PM
710	A stop right in front of the IMA would be great on evenings.	11/17/2014 1:06 PM

711	NE Seattle, at Lake City Way and 145th, does not get any southbound Metro service on the weekends. The only option is the 522. My husband regularly travels to Capitol Hill early on Saturday and Sunday mornings for work, and in order to get to Pike and 10th by 8 a.m., he must catch the 522 to downtown just after 7 a.m., and then either walk up the hill or pay another fare to get up the hill. The ideal solution would be a Metro bus that runs on Saturdays, and early enough for him to take it to work.	11/17/2014 1:05 PM
712	68/372 on weekends would be amazing. Also this route is crowded in mornings	11/17/2014 1:05 PM
713	no	11/17/2014 1:05 PM
714	u district, late at night and on weekends!	11/17/2014 1:04 PM
715	Not that I can think of.	11/17/2014 1:03 PM
716	Downtown is easy when 522 is running, unfortunately not early enough to get me to airport early enough most times. I can get to the Edmonds ferry on Friday or Saturday but I can't get back on Sunday.	11/17/2014 1:02 PM
717	Yes, Central district, late at night.	11/17/2014 1:02 PM
718	Nightclub districts, like Capitol Hill. I wish we had a system that made it easier to be car free without costing \$40 round trip in a cab/uber/Lyft	11/17/2014 1:02 PM
719	66/67 is infrequent in the evenings, sometimes can be problematic. The 48 is not very reliable anymore, not sure if it's the lack of 48E's but they've been overcrowded everytime I've ridden lately	11/17/2014 1:02 PM
720	The 31 needs more routes. There also needs to be better coordinating routes from Magnolia to First Hill to Swedish Hospital (Boren and Madison). The only bus that runs up Madison that connects to Downtown is the 12.	11/17/2014 1:01 PM
721	Getting from DT to Northgate at nights and weekends (or too early in the weekend morning) is close to impossible	11/17/2014 1:01 PM
722	Routes going to and from the University of Washington need more service in the evenings -- it would be very helpful if the 373 continued running until 8pm on weeknights.	11/17/2014 1:01 PM
723	Ballard-Capitol Hill	11/17/2014 1:01 PM
724	Routes from downtown to other neighborhoods could run later. It can be difficult to get home from downtown by bus at the end of the night.	11/17/2014 1:00 PM
725	More frequent service between Northgate and UW.	11/17/2014 1:00 PM
726	There should be all-night service between the neighborhoods which have business which are open late - Capitol Hill, U-District, Fremont, Belltown. Extended hours between those neighborhoods and the hospitals would also be helpful (hospital employees need to get around at all hours).	11/17/2014 12:59 PM
727	More frequent service to and from the U-district late at night would be good.	11/17/2014 12:59 PM
728	It would be great if the U District to Green Lake area had more frequent buses on weekends.	11/17/2014 12:59 PM
729	No.	11/17/2014 12:58 PM
730	Greenlake to U district late night and early morning	11/17/2014 12:58 PM
731	It's very hard to get to and from the UDistrict on the weekends. The 271 comes only every hour.	11/17/2014 12:57 PM
732	UDistrict to Tacoma or Federal way without having to do downtown on the weekends	11/17/2014 12:56 PM
733	There should be more frequent 70 buses from downtown going Northbound toward UW late at night. I waited after a Mariners game last summer for almost an hour (between 930 and 11 some time)	11/17/2014 12:56 PM
734	N/a	11/17/2014 12:56 PM
735	not sure.	11/17/2014 12:56 PM
736	Capitol Hill -> Green Lake	11/17/2014 12:56 PM
737	Late late buses to the U District	11/17/2014 12:56 PM
738	I don't know.	11/17/2014 12:55 PM
739	downtown, u district	11/17/2014 12:55 PM
740	Capitol Hill to downtown	11/17/2014 12:55 PM

741	The 542 needs to run later in the evening and throughout the day.	11/17/2014 12:55 PM
742	The #8 could use later and earlier hours.	11/17/2014 12:54 PM
743	Undoubtedly there are, but I do not do much traveling at those times so don't feel qualified to respond.	11/17/2014 12:54 PM
744	Between Monroe and Seattle, but not on weekends or late at night. Just need more runs for the CT 424 added back in.	11/17/2014 12:54 PM
745	Express transit from Renton to UW that does not use 167	11/17/2014 12:53 PM
746	I generally avoid taking the bus at those times.	11/17/2014 12:53 PM
747	If the Light Rail ran earlier/later, it would be helpful. Sometimes flights are early or late, but the LR doesn't run at the right time for those flights.	11/17/2014 12:53 PM
748	Route 25	11/17/2014 12:53 PM
749	Make the 74 run north to Sand Point, not just south. Many more federal employees at NOAA/PMEL would use bus to commute if they didn't have to make a transfer at the UW. The 68 and 372 need more buses to campus during peak hours in the morning. The 44, 48, and 70 need more buses away from campus in the afternoon peak hours.	11/17/2014 12:52 PM
750	Renton to Maple Valley on SR 169 (route 143)	11/17/2014 12:52 PM
751	I usually do not count on late night buses or weekend buses because they are unreliable and rare. I would say focus on Capitol Hill, Green Lake, and Queen Anne in the north. Please do not cut back service so much in the summer to UW. Lots of people still work.	11/17/2014 12:52 PM
752	It would be great if the E Line would run 1 more time after 1:56am as I work events and sometimes they don't get over until 2a or 3a and buses aren't available then. Same goes for restaurant and night club workers. There are no options (or limited options) for after they close to take the bus.	11/17/2014 12:52 PM
753	It would be great to have link light rail service that ran all day to accommodate people who have flights that leave or arrive in the early hours of the morning.	11/17/2014 12:51 PM
754	nope	11/17/2014 12:51 PM
755	(see above). need more buses/additional pick up times on usual routes, before 6am and after 5pm (i.e. between 5-8pm)	11/17/2014 12:49 PM
756	The sounder train could have 1 or 2 more scheduled times past 6pm.	11/17/2014 12:49 PM
757	Queen Anne to Downtown, Downtown to University District and Downtown to Redmond/Bellevue (especially 148th St).	11/17/2014 12:48 PM
758	I5	11/17/2014 12:48 PM
759	Near the University Village	11/17/2014 12:48 PM
760	Downtown Seattle	11/17/2014 12:48 PM
761	Not on routes 7 & 48.	11/17/2014 12:47 PM
762	Service to and from downtown and capitol hill and central district to University of Washington area is needed in the early morning for University and Hospital and construction employees.	11/17/2014 12:47 PM
763	It would be nice to have an express bus (540) to Kirkland once or twice on the weekends.	11/17/2014 12:47 PM
764	The 67 does not run on weekends.	11/17/2014 12:47 PM
765	University District	11/17/2014 12:47 PM
766	University district and downtown.	11/17/2014 12:46 PM
767	More buses on Sunday would be nice. It's one of my only days off and I like to explore. 24 hour bus services would provide more comfort flying to/from home and going to the airport.	11/17/2014 12:46 PM
768	I need to go up I5 from UW Seattle, but my (Community Transit) bus doesn't always go there as often as I'd like	11/17/2014 12:46 PM

769	frequency on weekends would be my only concern. As a female I choose not to ride public transit late night or very early due to own personal safety unless I'm with at least another person. By increasing route frequencies or extending hours it likely won't change my habits to choose public transit during those times. Light rail stations with a large amount of people could change my opinion during late nights.	11/17/2014 12:45 PM
770	NA	11/17/2014 12:45 PM
771	In the early mornings, and late at nights.	11/17/2014 12:45 PM
772	I'd love to see one more express bus 586 running later in the evening. I'd also love it if the Link were extending down to Tacoma. I love the Central Link (I used to use it almost exclusively to get to the airport from Seattle) and would love to use it more regularly, but now that I'm located in Tacoma it's much less convenient for me.	11/17/2014 12:44 PM
773	68 and 30 on weekends	11/17/2014 12:44 PM
774	Bell town, cap hill, green lake, fremont - basically the places where there is "night life"	11/17/2014 12:43 PM
775	The route between northgate and downtown is often underserved on weekends and holidays early. That is the link to SEA, and many very early flights originate there. If you can get to the rail, you can't use it, and SEA parking is expensive.	11/17/2014 12:43 PM
776	Shoreline needs more connections to the UW. Shoreline needs more bus service on the weekends to many destinations.	11/17/2014 12:43 PM
777	Why do the buses that go to UW barely run on the weekend, if they run at all?? Students have to be able to get in every day!	11/17/2014 12:43 PM
778	see above	11/17/2014 12:43 PM
779	None that I am aware of.	11/17/2014 12:42 PM
780	To and from University District	11/17/2014 12:42 PM
781	On weekends, More options from kent to downtown seattle/or airport would be good.	11/17/2014 12:42 PM
782	More E-Lines! Some additional 48's in the mornings and evenings would be beneficial as well.	11/17/2014 12:42 PM
783	For me personally living in NE Seattle, there needs to be more direct and more frequent service to Seattle Center, Capital Hill, Downtown and Ballard.	11/17/2014 12:41 PM
784	Yes	11/17/2014 12:41 PM
785	Friday and Saturday nights would be nice from downtown. We never go because we don't want to drive but the busses stop too early.	11/17/2014 12:41 PM
786	25 Ave NE	11/17/2014 12:41 PM
787	security seems to be non existent. If we do see anyone they are usually too busy shooting the breeze with Tacoma Police officers on unofficial business. The lights are out on the platform on the 585 /574 waiting areas.	11/17/2014 12:40 PM
788	Not that I know of	11/17/2014 12:40 PM
789	Not for my needs.	11/17/2014 12:39 PM
790	372 and 68 need service on the weekend. There is little to no way for me to take the bus on weekends/evenings (I live on 65th and 25th) from Capitol Hill, the U district, or Fremont because it is too dangerous for me as a female to walk 20 minutes by myself late at night.	11/17/2014 12:39 PM
791	Downtown, West Seattle.	11/17/2014 12:39 PM
792	I think the 8 needs expanded service in the afternoon and more frequently on weekends.	11/17/2014 12:38 PM
793	I think the 306/312 service on Lake City Way to downtown needs to be extended later into the morning. Many of us need to commute to SLU but are forced to take routes that are twice as long beyond 8:44a.	11/17/2014 12:37 PM
794	Express buses need to run all the time between University District and downtown.	11/17/2014 12:37 PM
795	No	11/17/2014 12:37 PM
796	University District to Sandpoint/View Ridge lines stop too early and are unreliable.	11/17/2014 12:36 PM
797	The U District, The International District, *DOWNTOWN*	11/17/2014 12:35 PM

798	Lakecity way	11/17/2014 12:35 PM
799	West Seattle bus service to the Admiral District is not frequent enough and requires a transfer downtown to catch a bus to the University District. The added time to change buses down town is not acceptable.	11/17/2014 12:34 PM
800	Sure, everywhere Community Transit runs during the week should also be serviced on Sundays. I have a new car, but I prefer to ride the bus, and would do so if I could get around on the weekends better.	11/17/2014 12:34 PM
801	Bothell Way/Lake City Way	11/17/2014 12:34 PM
802	UW to Wedgewood/Lake City	11/17/2014 12:33 PM
803	I-90 corridor	11/17/2014 12:33 PM
804	Upper Rainier Beach - and faster/express connections to Northern Seattle/UW.	11/17/2014 12:32 PM
805	South Lake Union needs more since the neighborhood has radically changed.	11/17/2014 12:32 PM
806	SeaTac Airport - Downtown and connecting buses along major corridors	11/17/2014 12:32 PM
807	no	11/17/2014 12:32 PM
808	No	11/17/2014 12:32 PM
809	The University District needs buses later, there are a lot of students who study late in the evenings and it gets dangerous at night waiting for buses that come maybe once every hour.	11/17/2014 12:31 PM
810	The current service during these hours accommodates my needs.	11/17/2014 12:31 PM
811	UW to downtown (and vice versa).	11/17/2014 12:31 PM
812	SLU to NE Seattle at least to 7PM	11/17/2014 12:31 PM
813	The bus route I live closest to (#25) does not run on weekends or later in the evening, so it makes it difficult to get to destinations or get home safely. As stated above, there need to be buses that run along Montlake Blvd because it is unsafe to walk in that area when it is dark.	11/17/2014 12:30 PM
814	I405 from Kirkland to Downtown Seattle or University of Washington	11/17/2014 12:30 PM
815	UW to Issaquah, Issaquah to SeaTac Airport	11/17/2014 12:30 PM
816	It is difficult to get to West Seattle from anywhere in the city other than downtown.	11/17/2014 12:29 PM
817	Yes! Specially route #s 71,72,73. These buses pass by Roosevelt Way N.E. all the time but they don't make any stop. I have to stop at University Way and walk back to Roosevelt which is really inconvenient. Hopefully you will have those buses stop at roosevelt also.	11/17/2014 12:28 PM
818	From hospitals to the outlying community at 11:30 PM or to be at the hospital by 3PM	11/17/2014 12:28 PM
819	Between places of late night entertainment - Capitol Hill, Downtown, Belltown, Seattle Center (Opera, Laser Dome, Theatre, etc) and home (neighborhoods in North Seattle (Ravenna, Green Lake, Ballard, Greenwood, and north)	11/17/2014 12:27 PM
820	Light Rail does not run late enough for safe transportation home from late evenings out, nor does it run early enough to get to the airport for many morning flights (6:00 departures, etc.).	11/17/2014 12:27 PM
821	No.	11/17/2014 12:27 PM
822	Would be nice if the sounder train would run on the weekends and past 0800 during the week.	11/17/2014 12:27 PM
823	My work sometimes requires me to come in before 6:00am or leave after midnight, so having service from Harborview Medical Center, University of Washington Medical Center, and Northwest Hospital would be great.	11/17/2014 12:26 PM
824	I don't; know	11/17/2014 12:26 PM
825	Not for me.	11/17/2014 12:25 PM
826	Maybe just running commuting buses past 6pm until maybe 7pm would be helpful.	11/17/2014 12:24 PM
827	None that I can think.	11/17/2014 12:24 PM
828	yes, the University of Washington	11/17/2014 12:24 PM

829	I think it would be helpful to have late night buses available in places with busy nightlife scenes (i.e. cap hill, u-district) - this would help prevent drunk driving.	11/17/2014 12:23 PM
830	Snohomish county needs all of this	11/17/2014 12:23 PM
831	I wish the area around GreenLake to the University - primarily served by the 48, ran earlier in the morning - RELIABLY - so that I could utilize early mornings for classes before work.	11/17/2014 12:22 PM
832	Now that the road is fixed, I really would LOVE if your put that #16 back on 5th & Mercer (near the #3/4 route) at Seattle Center, so I can go to Northgate without going downtown. It is so isolated (and too far to walk) where it is now. Also the reroute of the #32--from the U.Dist to Seattle Center winds around and around---it's too long to get there. Thanks	11/17/2014 12:22 PM
833	Des Moines Kent Park n' Ride to the U District could use one more bus around 6:20 am would help.	11/17/2014 12:22 PM
834	my partner, who is a chef, often needs to be at work in Bellevue early and the bus does not run that early and therefore he is forced to find alternate forms of transportation. something that runs all night or earlier in the morning would be more helpful.	11/17/2014 12:22 PM
835	don't know	11/17/2014 12:22 PM
836	Safeco Century link SAM	11/17/2014 12:21 PM
837	Husky Stadium-Wallingford-Fremont-downtown	11/17/2014 12:21 PM
838	Ballard, Sunset Hill. NW 65thSt. Any other major East-West corridor: As has always been the case, virtually no east-west service that doesn't require going out of the way or transfers.	11/17/2014 12:20 PM
839	U District out to almost locations in the evenings. Lots of events at the UW. Same goes for Seattle Center and downtown venues.	11/17/2014 12:20 PM
840	More morning and afternoon routes from Tacoma Dome bus station to/from UW	11/17/2014 12:20 PM
841	No	11/17/2014 12:20 PM
842	Snohomish County to UW could use more commute options. Direct community transit buses from the 112th Street Park and Ride to UW as well as more parking and early/late options that don't take FOREVER to get home from campus.	11/17/2014 12:19 PM
843	UW, SEA airport, downtown, and Sand Point Way (hwy 513).	11/17/2014 12:18 PM
844	None	11/17/2014 12:18 PM
845	Service between Northgate and the U district is infrequent in the evenings and on weekends. The 67 that runs on weekdays is great, but for shopping needs on the weekend or later in the evening it is much less convenient to get to Northgate from campus.	11/17/2014 12:18 PM
846	Yes, service in the evening and mornings along the 31/32 route, more service for the 28/40 on weekends and late at night.	11/17/2014 12:18 PM
847	It would be nice to have buses to green lake for the early morning because a lot of runners meet around 5:30 AM to run and there are not buses that get to green lake until 6 AM	11/17/2014 12:18 PM
848	I'd like more late night weekend service from downtown Seattle to Northgate transit center. I'd often like to have the option of taking the bus home after an evening out. Taxi costs are too high so I usually drive, and often spend 20 minutes looking for parking on capitol hill.	11/17/2014 12:18 PM
849	none	11/17/2014 12:18 PM
850	None.	11/17/2014 12:18 PM
851	Heading to the UWMC and leaving UWMC	11/17/2014 12:17 PM
852	With many sporting and cultural events that take place downtown, it would be nice to see more service on the weekends to encourage people to use the bus/link services instead of crowding downtown with cars.	11/17/2014 12:17 PM
853	Lake Forest Park	11/17/2014 12:17 PM
854	I'm not sure. But I wish bus 167 can take us to work by the UW Campus at 8:30 rather than 8:45.. There are a lot of people that start @ 8:30. Rather than leaving at 7:53AM at Renton Transit Center, it should leave at 7:30AM so we have the time to arrive @ 8:30 AM to work.	11/17/2014 12:16 PM

855	No	11/17/2014 12:16 PM
856	All of them.	11/17/2014 12:16 PM
857	The lightrail could run overnight! That would be great.	11/17/2014 12:16 PM
858	Kenmore Park and Ride on weekends to UW	11/17/2014 12:15 PM
859	More express buses between the U district and downtown and between Lake City Way/NE 85th area and downtown in the evenings and on weekends.	11/17/2014 12:15 PM
860	I'm sure there are, but none that I can think of.	11/17/2014 12:14 PM
861	Lake City to downtown and the light rail to the airport need earlier hours.	11/17/2014 12:14 PM
862	South Kirkland park and ride from Seattle -- the 540. UW Medicine is a short walk away. We start early there and we are growing!	11/17/2014 12:14 PM
863	The # 8 needs more buses and reliable service during the commute.	11/17/2014 12:14 PM
864	YES!!! NE 195th St and 35th Ave NE in Lake Forest Park needs to re-establish the evening service.	11/17/2014 12:13 PM
865	Anywhere dense to another dense location. Capitol Hill, downtown, First Hill, Belltown, Pioneer Square...these all need reliable transit throughout the day, including early and late hours.	11/17/2014 12:13 PM
866	Ballard to U District via 65th to 50th.	11/17/2014 12:13 PM
867	no	11/17/2014 12:13 PM
868	UW <--> Everett	11/17/2014 12:13 PM
869	Rainier Avenue, and anywhere the 7 route services now.	11/17/2014 12:13 PM
870	route 65 in late afternoon going north and east	11/17/2014 12:13 PM
871	I went to a concert at The Key Arena and it ended at 10:30 p.m. There was no #24 bus to get me home. Very, very frustrating that buses don't run WHERE and WHEN I need them. Yet, I'm paying for everyone else to use them.	11/17/2014 12:12 PM
872	I'm really only familiar with my neighborhood (U District, Wedgwood, Sand Point) and it's fairly well served.	11/17/2014 12:12 PM
873	UW, downtown	11/17/2014 12:12 PM
874	I don't know.	11/17/2014 12:12 PM
875	More buses during peak commuting hours - Udist to/from downtown.	11/17/2014 12:12 PM
876	--	11/17/2014 12:11 PM
877	the train could run on weekends	11/17/2014 12:11 PM
878	unknown	11/17/2014 12:10 PM
879	better service between Burien to UW appreciated ,that doesn't go through downtown	11/17/2014 12:10 PM
880	I need early morning services, start my job at 5:45 am.	11/17/2014 12:09 PM
881	weekend service to and from capitol hill should go later, at least until the bars close	11/17/2014 12:08 PM
882	E-W is limited, can't be cut or reduced	11/17/2014 12:08 PM
883	Downtown	11/17/2014 12:02 PM
884	Pioneer Square to Capitol Hill, Admiral district, Alki	11/17/2014 11:32 AM
885	Service between Issaquah and the campus is very limited during the evenings and weekends, and even between downtown Seattle after 8 (which is not very late).	11/17/2014 11:26 AM
886	45th-Market East/West route is atrocious...the 44 and the 16. I ride it all the time and its brutal....needs more!	11/17/2014 11:03 AM
887	The airport! Transit to and from should be 24-7.	11/17/2014 10:19 AM
888	I don't have this issue	11/17/2014 8:33 AM

889	Yes, Summit and Olive Way to downtown from 5:30 am on.	11/16/2014 9:16 PM
890	U VILLAGE, ROOSEVELT, DOWNTOWN TO MAPLELEAF , NORTHGATE AREA	11/16/2014 7:06 PM
891	YES!!! But start by making the RapidRide lines and other core routes decently frequent overnight using the hours wasted on the 80-series meandering homeless shelters.	11/16/2014 2:52 PM
892	I don't know about these but I do know that there needs to be more service during rush hours and that the RapidRide D is a joke. There is nothing express about it. All it is is the 15 local. You took away bus routes that skipped going up over Queen Anne and made limited stops all the way to Ballard. And the elimination of the 18 shows how out of touch you are with your ridership. You should go take a look at all the new construction in the heart of Ballard, which when its dark and raining, its quite a ways from 15th NW.	11/16/2014 11:12 AM
893	The link needs extended hours.	11/16/2014 10:34 AM
894	Yes, Seattle Center for cultural events	11/15/2014 11:02 PM
895	east/west Seattle center to 23rd	11/15/2014 5:37 PM
896	More frequent evening service would be nice from downtown to Capital Hill (i.e. Route 12). Late night service (after midnight) would be nice from downtown/belltown to Capital Hill. Or when Link Light rail is up a running, late night feeder buses from Belltown/downtown to Tunnel stations would be nice, since Link Light Rail will go to Capital Hill and University Stadium Station. Late night service (after midnight) from Fremont/Ballard to Capital Hill would be nice too.	11/15/2014 11:46 AM
897	Later and more frequent service on the 77 (at least until 7 pm). For example, I think the D and E lines work really well. I'd love to have an option like that along the NE side of the city ... I suppose the LightRail will offer that, but it will still stop far south enough from my house that I'd need to transfer to another bus.	11/15/2014 11:08 AM
898	65 and 71	11/15/2014 10:24 AM
899	U District needs more, and faster, service evenings and weekends. The slow Eastlake route is horrible. Early evenings as well as weekends the buses seem to be at-capacity and even just loading all the riders takes forever. Ballard needs much better cross-town access - for me on evenings/weekends - the 44 is slow and not desirable to ride.	11/15/2014 8:48 AM
900	.	11/15/2014 8:33 AM
901	U-Village	11/14/2014 11:46 PM
902	A bus up and down Roosevelt and twelfth in the evenings from 45th to whole foods 65th would be excellent. And extended service to Tacoma evenings and weekends would be great	11/14/2014 6:39 PM
903	Capitol Hill -> Ballard/Fremont	11/14/2014 3:50 PM
904	Eastgate to UW	11/14/2014 2:24 PM
905	Direct route to Capitol Hill from the south end on weekends/evenings	11/14/2014 11:46 AM
906	My husband can't commute by bus because the bus to downtown from here and then to Totem Lake don't start early enough for him to reach work on schedule. I can't visit my family on Vashon Island on Sundays (the only day they're all free) because there's no service any more.	11/14/2014 11:15 AM
907	I need transportation mainly for work- so none that I know of.	11/14/2014 11:02 AM
908	UW to Ravenna and Sand Point. Often, I am caught between either the 75 or the 71, either of which would make me walk at least 10 blocks.	11/14/2014 10:55 AM
909	Better commuter service in mid-morning.	11/14/2014 10:49 AM
910	Ballard	11/14/2014 10:49 AM
911	Would like more frequent late night service from stadium area/Pioneer Square and in Ballard	11/14/2014 10:48 AM
912	Pike/Pine-downtown corridor is underserved.	11/14/2014 10:44 AM
913	Near Lake Washington (27 and 14)	11/14/2014 9:43 AM
914	The Broadview neighborhood--late night, evening and weekends.	11/14/2014 9:37 AM
915	I need to be able to get to Lake City Way, near 105/Northgate	11/14/2014 9:29 AM

916	Bellevue	11/14/2014 9:10 AM
917	Getting from Northeast Seattle to the airport	11/14/2014 9:08 AM
918	60 should run later on weekends	11/14/2014 7:36 AM
919	Summit Ave E	11/14/2014 2:36 AM
920	The 48 would help if it ran later.	11/14/2014 12:32 AM
921	I'm sure many do, but I don't tend to take the bus at those times.	11/13/2014 11:50 PM
922	Anywhere with low-income housing	11/13/2014 11:03 PM
923	need to have one last bus that runs from LINK stations after the latest scheduled plane lands at the airport so people can arrive by plane, collect luggage, take a train from the airport to a good transfer point, transfer to a bus and then complete their journey.	11/13/2014 10:57 PM
924	Late morning service is spaced far apart to those who wish to travel and do errands right after rush hour.	11/13/2014 7:28 PM
925	It's not metro, but community transit should run buses to the edmonds park and ride later than 5:45pm!	11/13/2014 5:58 PM
926	Shuttles to/from the new UW light rail station and the future Roosevelt and Northgate light rail stations.	11/13/2014 5:58 PM
927	The link needs to have increased frequency earlier in the morning and later into the evening.	11/13/2014 5:54 PM
928	connections between downtown core, UW campus, and Capitol Hill.	11/13/2014 5:41 PM
929	People who fly to and from the east coast - and I do so frequently - would LOVE better late night frequency re: busses connecting. I often land around at SeaTac around 9 pm or later	11/13/2014 3:58 PM
930	Not aware of, but would definitely use a shuttle bus from U-village to UW Light Rail station once its finished in order to get to downtown and /or airport on weekends and or early in the morning or late at night.	11/13/2014 3:36 PM
931	Downtown corridors and tunnel	11/13/2014 3:25 PM
932	Link will be great, but how do I get to UW station from Children's Hospital?	11/13/2014 3:24 PM
933	North end to East side needs more services on evenings. More services on weekends from Seattle to east side. More services from north (Lynnwood) to Northgate Mall.	11/13/2014 3:07 PM
934	Downtown to SEATAC Downtown to Fremont / Wallingford Downtown to Capitol Hill	11/13/2014 2:55 PM
935	Seattle to Laurelhurst, UW to Laurelhurst. UW runs buses in the evening but they get sparse late and then eventually just stop. Our college student struggles to get home when at the library studying at night or when working an evening job.	11/13/2014 2:29 PM
936	How are we going to get from the Husky Stadium Link Light Rail Station to the U District and points north, east and west?	11/13/2014 2:24 PM
937	Ask night shift workers.	11/13/2014 2:13 PM
938	Nope	11/13/2014 2:09 PM
939	Route 8 between Capitol Hill and the Seattle Center would GREATLY benefit from expanded service at all hours! The bus is incredibly crowded during the day with all the people who work in South Lake Union (it's nearly impossible to get a seat on many trips during the standard rush hour commute), and anyone wanting to attend Seattle Center weekend or evening events would be really grateful to have more bus options available (especially late at night to return home--more frequent service from 9pm-midnight would be amazing!).	11/13/2014 1:52 PM
940	No opinion	11/13/2014 1:41 PM
941	Airport (link light rail) needs to run continuously. Cap hill light rail to get to/from bars late at night would be awesome (from pike/pine corridor to the north end of Broadway around Mercer)	11/13/2014 1:26 PM
942	Seatac!!!! The fact that many flights get in at 11:30pm-12:30am and the light rail stops running before that is very annoying. The central link should run till 1am at least.	11/13/2014 1:18 PM
943	I have often found the airport difficult. Need to leave early? Coming in on a late flight? Better get a shuttle. I tend to arrange my schedule around the bus schedule. If I need to do anything outside of normal bus operating hours, I find alternate transport I have missed out on events because I couldn't get transportation.	11/13/2014 1:08 PM

944	The 25 needs to run a lot more frequently than it does. Just because I don't go to work at 8am doesn't mean I have any less need to get to work.	11/13/2014 12:56 PM
945	Yes, but this is not as big of a concern for me.	11/13/2014 12:39 PM
946	From Swedish hospital to eastside park and ridwe east gate or issaquah highlands after 7:30 pm when all the nurses get off work	11/13/2014 12:33 PM
947	More frequency on the 16, 49, 65, 71, 72, 75 and 372 in the evning between 8 and 11PM	11/13/2014 11:16 AM
948	James street from 3 rd to 18th could use more service in the early morning.	11/13/2014 10:55 AM
949	Maple Valley to Seattle - could be a little earlier and a little later - depending on traffic it can really delay connecting to my Ballard bus #40 - which is my only option now that the #62 has quit.	11/13/2014 10:42 AM
950	Ballard	11/13/2014 10:24 AM
951	Late at night: express buses between downtown, capitol hil, and the outlying neighborhoods like ravenna / greenlake don't exist which means we choose other forms of transportation.	11/13/2014 9:35 AM
952	Roosevelt north of 75th really needs more than just the 68.	11/13/2014 9:18 AM
953	Yes! Please continue providing late night service to the University District, connecting it to downtown and the I.D.	11/13/2014 9:02 AM
954	Madison Park.	11/13/2014 8:34 AM
955	Now that the route is being built out, Link should be 24 hours.	11/13/2014 8:31 AM
956	no	11/13/2014 8:25 AM
957	Yes. Downtown to U District. Queen Anne/Seattle Center to U District.	11/13/2014 7:41 AM
958	Yes. Why aren't there frequent services connecting Lake City to U-Village to the Rainier Valley -- at all hours?	11/13/2014 2:07 AM
959	Yes. There needs to be more service late nights from downtown Seattle to Lynnwood.	11/13/2014 12:23 AM
960	Neighborhoods that need night transit in evenings: Capitol Hill, U Dist, Ballard (!!!)	11/12/2014 10:28 PM
961	The last train from SeaTac Airport to the downtown transit tunnel on Sunday evenings is inconvenient for late flight arrivals. If I miss the last train to the tunnel, it can take upwards of 2 1/2 hours to get to northeast Seattle.	11/12/2014 10:17 PM
962	Capitol Hill -> University District. It's popular for University students to stay in Capitol Hill late at night (good nightlife), but can be hard to find a safe ride home. Best to minimize drunk driving by providing safe + reliable transit!	11/12/2014 10:11 PM
963	Having extra trips through the U district would be helpful.	11/12/2014 9:47 PM
964	The 71/72/74/76 are way too crowded heading north out of the tunnel in the evenings and reduce in frequency too early(6PM)	11/12/2014 9:33 PM
965	This is a big city, there should be service well past 2am and before 6am. People who work during those times are also likely to ride the bus.	11/12/2014 9:15 PM
966	Service from Mariners games at Safeco Field; service from Benaroya or Seattle Center for concerts;	11/12/2014 8:52 PM
967	No	11/12/2014 8:43 PM
968	later express service from downtown to north seattle	11/12/2014 5:53 PM
969	Light Rail transport to/from airport should be available early morning and late at night.	11/12/2014 5:46 PM
970	Well, I was just saying. There used to be a passenger ferry that left Bremerton for Seattle at 1:40 am. I combined that with a bicycle ride home.	11/12/2014 5:29 PM
971	The 7, 8, 9, and 49 should be 24/7 routes.	11/12/2014 5:16 PM
972	Better access to northern neighborhoods through the U-District. When everything goes up/down University Ave, the people who live in Northern neighborhoods and aren't students pay for it by not having enough seats, sharing with noisy, sometimes scary people who use the u-district as a destination.	11/12/2014 4:38 PM
973	None more than any other.	11/12/2014 4:35 PM
974	Not sure.	11/12/2014 4:35 PM

975	Capitol Hill pike/pine area, and downtown Ballard.	11/12/2014 4:23 PM
976	UW Seattle campus/ U District (50th to 41st) to Sand Point/Lake City needs more frequent and reliable transportation on weekends and at night.	11/12/2014 4:09 PM
977	no	11/12/2014 3:46 PM
978	improve Route 48 Sunday frequency	11/12/2014 3:37 PM
979	I wish the Metro ran about 1-2 hours later into the evening in general. Ideally many neighborhoods would be covered just past 2AM, which would probably eliminate a good amount of the city's drunk driving.	11/12/2014 3:18 PM
980	Just continue late night service from downtown up through the hill and Eastlake into UW	11/12/2014 3:10 PM
981	No	11/12/2014 3:07 PM
982	Northeast Seattle could use better bus service at all times -- Sand Point Way NE.	11/12/2014 2:56 PM
983	15th Avenue East/Pine St. and Madison St. would be welcome places for early morning and late night services.	11/12/2014 2:55 PM
984	East leg of the number 28!	11/12/2014 2:52 PM
985	I use the bus during the week	11/12/2014 2:48 PM
986	First Hill/Broadway/Rainier Valley--currently served by Route #9, which has no evening or weekend service. Although the First Hill streetcar will be starting service early in 2015, it may not be good enough, since it will require a transfer to and from service serving the Rainier Valley, similar to what is already required. This corridor has a very large passenger base (healthcare workers, students at Seattle Univ. and Seattle Central College) and shoppers (going to the Broadway Business District from the Rainier Valley--and those people have been requesting good evening and weekend service for several years. it is time they get that service--and the #9 route is the best way to provide it--as a supplement to the Streetcar.	11/12/2014 2:09 PM
987	522 (Lake City Way & 125th), Fremont Ave N & NE 34th St	11/12/2014 1:19 PM
988	The Kenmore neighborhood loop - you've stranded many low-income (i.e., no cars), physically impaired and elderly riders in an area with no other transit options and mostly with no possibility of walking to a bus due to lack of sidewalks and extremely dangerous conditions for pedestrians.	11/12/2014 1:07 PM
989	Yes, particularly from the airport and down town	11/12/2014 12:40 PM
990	The airport!	11/12/2014 12:39 PM
991	N/A	11/12/2014 12:39 PM
992	not that I can think of	11/12/2014 12:28 PM
993	Crown Hill	11/12/2014 12:26 PM
994	East to West transit in Seattle is terrible. At all times.	11/12/2014 12:24 PM
995	The areas I've mentioned.	11/12/2014 11:57 AM
996	Weekend service between Capitol Hill and West Seattle.	11/12/2014 11:53 AM
997	none	11/12/2014 11:49 AM
998	Nurses often have 6am shifts and get off late shifts at 11pm.	11/12/2014 11:45 AM
999	likely, but none specific to my transit behavior	11/12/2014 11:22 AM
1000	the 3 and 4 need more buses later in the evening.	11/12/2014 11:17 AM
1001	As I said above, having a very early morning bus from the north end to Sea Tac Airport would be extremely helpful.	11/12/2014 11:13 AM
1002	Route 301	11/12/2014 11:13 AM
1003	Not sure.	11/12/2014 10:52 AM
1004	15th Ave W & W Garfield has a community center that is open late, but one stop is 2 blocks away to the north, the other to the south. The lights at Armoury and Garfield are both very long cycle for pedestrians. The stop at Galer is around a blind corner which has had multiple incidents.	11/12/2014 10:24 AM

1005	No	11/12/2014 10:16 AM
1006	A late-night service on weekends around the Capitol Hill area would be wonderful in terms of safety - those who can't afford Ubers in peak hours often have to walk home.	11/12/2014 9:47 AM
1007	Yes	11/12/2014 9:46 AM
1008	71x to the light rail stop at Westlake or future locations would be good very early in the AM or late at night for airport travel.	11/12/2014 9:27 AM
1009	All areas with nightlife needs to be safely accessible via metro at night and on weekends. Alki Beach and Discovery Park both need access. Beacon Hill is virtually inaccessible at night and this has left me in danger several times.	11/12/2014 8:51 AM
1010	west seattle, beacon hill	11/12/2014 8:48 AM
1011	76 needs more busses during peak, they are always packed	11/12/2014 8:47 AM
1012	Probably should ask the folks that work late or early in the day.	11/12/2014 8:41 AM
1013	None that I use	11/12/2014 8:32 AM
1014	n/a	11/12/2014 7:55 AM
1015	Maybe increased frequency of light rail trains on weekends or late evenings.	11/12/2014 7:31 AM
1016	I-90 needs light rail	11/12/2014 7:01 AM
1017	I have been stranded at the airport at least twice because my flight arrived after the last link.	11/12/2014 2:08 AM
1018	Capitol Hill to Ballard should be available using one bus.	11/12/2014 2:01 AM
1019	not	11/12/2014 1:18 AM
1020	bars, such as those on Broadway. But also queen Ann.	11/12/2014 1:11 AM
1021	From ferry terminal to Seattle Central, UW, and Seattle Center	11/12/2014 12:12 AM
1022	Weekend service for the southcenter/kent sound transit bus please!	11/12/2014 12:09 AM
1023	route 24 to Magnolia should run until 11 PM or midnight. And buses stop going Downtown from 12th and Jackson (but rather to the station) after 8 PM. It should always go straight to Downtown	11/11/2014 11:59 PM
1024	Yes	11/11/2014 11:54 PM
1025	Beacon hill	11/11/2014 11:44 PM
1026	Closer to 43rd	11/11/2014 11:25 PM
1027	South Lake Union during rush hour.	11/11/2014 10:18 PM
1028	North City 15th Ave NE, Link light rail later and earlier	11/11/2014 9:38 PM
1029	everywhere in central seattle	11/11/2014 9:30 PM
1030	Evenings: Sand Point Way from Downtown or Meany Hall/University Ave. Anytime: access to Seatac	11/11/2014 9:08 PM
1031	35th Ave NE to downtown, more directly like on the 64. Not enough frequency during peak. Also will need direct service to Husky Stadium Link.	11/11/2014 8:45 PM
1032	Earlier 48 and Link to get to those early-morning flights at SeaTac.	11/11/2014 8:03 PM
1033	Bryant neighborhood	11/11/2014 7:51 PM
1034	Not that I need or can think of.	11/11/2014 7:23 PM
1035	Capitol Hill and Georgetown, late at night and on weekends	11/11/2014 6:45 PM
1036	Seattle needs more east-west service on buses, and light rail. downtown to West Seattle; u-district to Fremont and Ballard; downtown to Rainier Beach and Renton	11/11/2014 6:45 PM
1037	I am a senior citizen and not usually out at those times	11/11/2014 5:35 PM

1038	From downtown to the outer areas of Seattle - and from the outer areas of Seattle into downtown. Outer areas being north Seattle, south Seattle, west Seattle, etc. And between these outer areas and the U-district.	11/11/2014 5:24 PM
1039	Capitol Hill	11/11/2014 4:35 PM
1040	Connections from Campus to NE area are very poor - particularly to Bryant and Laurelhurst - once past about 6:45 PM.	11/11/2014 4:00 PM
1041	Capitol Hill to downtown. Downtown to Northgate.	11/11/2014 3:55 PM
1042	Swedish Cherry Hill	11/11/2014 3:27 PM
1043	Up/down 35th	11/11/2014 3:24 PM
1044	It would be nice if the number 9 would run later, so I could get from work at Seattle Central to home in the Rainier Valley. I drive because I don't want to take the 7 downtown at night.	11/11/2014 3:22 PM
1045	Getting to airport early morning or late night via light rail currently not feasible	11/11/2014 3:15 PM
1046	Express buses from downtown Seattle to I405 transit stations north of SR520 after 8PM.	11/11/2014 3:14 PM
1047	North Rainier Ave	11/11/2014 3:09 PM
1048	The 40, and also cross-town routes such as the 8 and 44. The 8 might not be necessary if we can go to Capitol Hill via the UW light rail station.	11/11/2014 2:36 PM
1049	n/a	11/11/2014 2:00 PM
1050	More evening service out of downtown, on buses and trains. Not everyone finishes work by 6pm. People have to drive to work because they may end up working late that day, or they may want to go do something after work.	11/11/2014 1:37 PM
1051	Issaquah-Pine Lake, please.	11/11/2014 1:34 PM
1052	NE Seattle East of Lake City and N of 85th has inadequate bus service in the evening after 6 p.m. unless connecting in the U District.	11/11/2014 1:28 PM
1053	more buses to issaquah!	11/11/2014 1:05 PM
1054	Increased service during peak hours between downtown and the u-district.	11/11/2014 12:33 PM
1055	Downtown, University District, Queen Anne, Lower Queen Anne	11/11/2014 12:33 PM
1056	Just the evening service needs to be more frequent and more reliable especially downtown and the surrounding areas.	11/11/2014 12:30 PM
1057	Discovery Park, east gate by Government Way.	11/11/2014 12:15 PM
1058	There should be earlier service on Link or a one-seat bus between downtown Seattle and Sea-Tac Airport.	11/11/2014 12:01 PM
1059	15th, Broadway, University Way, Ballard to Downtown to Capitol Hill.	11/11/2014 11:58 AM
1060	More express buses that go from neighborhood to neighborhood	11/11/2014 11:55 AM
1061	No	11/11/2014 11:53 AM
1062	I live in Central District / Madrona, served by 2 and 8. Earliest 8 bus is at 5:39, then after 6. 2 is similar. Would like something earlier in the morning and/or more frequent.	11/11/2014 11:39 AM
1063	Yes. From beneroya to neighborhoods like mardrona	11/11/2014 11:30 AM
1064	Community needs more night and weekend service.	11/11/2014 11:22 AM
1065	?	11/11/2014 11:21 AM
1066	The 522 needs to run until at least 2am. Also the 234 needs to run more frequent service in general.	11/11/2014 11:17 AM
1067	NO	11/11/2014 11:13 AM
1068	No comment.	11/11/2014 10:55 AM
1069	East west along the 44 route, 30 route midday, late night and weekend.	11/11/2014 10:38 AM
1070	Not necessarily on my route.	11/11/2014 10:29 AM

1071	Green lake capital hill (late at night)	11/11/2014 10:21 AM
1072	No	11/11/2014 10:21 AM
1073	Not for me	11/11/2014 10:11 AM
1074	From Broadway to Central District/Beacon Hill in the evenings	11/11/2014 10:08 AM
1075	All.	11/11/2014 10:07 AM
1076	no	11/11/2014 9:57 AM
1077	Compared to North Seattle/Greenwood, Ravenna receives very scanty service outside commuting hours. Late at night, I can catch a bus to near where I want to go (D, E, 5, 40, 28 are all choices) within about 10 minutes of arriving at an appropriate stop. I can catch a bus to Ravenna once every 30-45 minutes. The 71, 74 and 76 are my choices for Ravenna, and they run very infrequently late at night (I'm usually riding between 10 pm and midnight).	11/11/2014 9:49 AM
1078	I think you have them covered.	11/11/2014 9:15 AM
1079	I would love to be able to get around the city at night or on weekends but the bus service just isn't there. I love going downtown and/or to the waterfront. It's unfortunate because Capitol Hill has a lot of bus service, but that still doesn't help.	11/11/2014 9:06 AM
1080	In general, having more buses after 6PM would be helpful. It would then allow me to go out with friends after work and still have a way to get home.	11/11/2014 8:48 AM
1081	late at night on weekends: the places that need service are the places with bars: capitol hill, ballard, fremont, u-district	11/11/2014 8:43 AM
1082	would be nice of the train ran all day and on weekends.	11/11/2014 8:29 AM
1083	Denny Way (route 8) on the weekend.	11/11/2014 8:24 AM
1084	n/a	11/11/2014 8:22 AM
1085	More service to SLU, and from one hill to the other (ie Queen Anne to Capitol Hill). Hello to whoever is tasked with coding all of these long form responses. I feel your pain. You can do it!	11/11/2014 8:10 AM
1086	Yes, more buses to Sand Point, more frequent and uncrowded service to the U District, and more connections between both Sand Point and U District to the Montlake area.	11/11/2014 7:28 AM
1087	denny from capitol hill to south lake union - especially morning. many full buses pass bus stops with lots of waiting people. I think Amazon should be paying into mitigation fund for more metro bus services since the bus riders and those getting passed up are their employees. Microsoft has done their part to have a shuttle for their commuters - I recognize that some still use ST/Metro buses, but the Connectors are dramatically reducing the impact. Amazon should also be paying their fare share to reduce the impact their employees are having to the traffic and transit ridership.	11/10/2014 10:30 PM
1088	Not in my life at this time.	11/10/2014 9:16 PM
1089	Capitol Hill to and from VA Hospital	11/10/2014 9:10 PM
1090	A direct connection between Ballard and Capitol Hill - the two big nightlife spots in Seattle - would be nice, especially in evenings and on weekends.	11/10/2014 8:24 PM
1091	Not that I can think of within my regular routes	11/10/2014 8:18 PM
1092	To/from Lynnwood Transit Center	11/10/2014 8:17 PM
1093	85th and 95th on Lake City Way. Later service from Downtown on the 64 to 35th NE.	11/10/2014 7:20 PM
1094	no	11/10/2014 7:17 PM
1095	The 16's rush hour service ends too soon. The frequency stops too early when buses are still packed.	11/10/2014 6:55 PM
1096	There are so many places lacking right now that I don't even know where to begin..	11/10/2014 6:08 PM
1097	Need something on Boren! Need a way to Central Capitol Hill (Broadway/Pine) in evening and on weekends!	11/10/2014 6:01 PM
1098	Heart of Ballard to downtown. Ballard/Interbay to Capitol Hill.	11/10/2014 5:46 PM
1099	Market Street in Ballard.	11/10/2014 5:44 PM

1100	everywhere needs more night service. all routes should have at least one run around 2am	11/10/2014 5:24 PM
1101	Rainier Ave and Andover early am, later evenings. Cleaning, disinfecting, lighting	11/10/2014 5:11 PM
1102	Link light rail should run after midnight	11/10/2014 5:05 PM
1103	Seattle to Ballard. Something ideally more direct.	11/10/2014 4:55 PM
1104	NA	11/10/2014 4:53 PM
1105	Denny, Madison	11/10/2014 4:46 PM
1106	It would be great to be able to get to he airport at any time from our neighborhood (maple leaf) but it's not possible if you have an early flight, and not reliable if you have to commute during rush hour.	11/10/2014 4:38 PM
1107	Service from Capitol Hill down 3rd Avenue would be FANTASTIC. Seems odd to me that I had door-to-door bus rides on Route 7 from Columbia City, but from Capitol Hill to my workplace on 3rd I spend more time than I'd think on my commute.	11/10/2014 4:36 PM
1108	To and from the airport. Also there are many times that two #2 or #43 buses will be one right on the tail of another - both going to the same place (not going to base). Why does that happen?	11/10/2014 4:31 PM
1109	I ride during commuter hours.	11/10/2014 4:30 PM
1110	Weekends should go to Green Lake, Alki, and other city parks.	11/10/2014 4:12 PM
1111	Late at night service is important going into and out of Ballard and Capitol Hill	11/10/2014 4:06 PM
1112	I know that a lot of young people who are carless live in the Capitol Hill area. Reliable evening service connecting that neighborhood would ease traffic congestion and frankly ensure the safety of the residents if reliable and easily accessible public transportation is available.	11/10/2014 4:04 PM
1113	None that I take	11/10/2014 3:55 PM
1114	It'd be nice to have earlier light rail options.	11/10/2014 3:53 PM
1115	East West Service to Seattle Center and beyond from Capitol Hill.	11/10/2014 3:50 PM
1116	Every place. I work in sodo and I have to live in CH because if I lived anywhere else in the city I would not be able to get to work on time at 6am on sat&sun, I would be late two days a week and employers don't care they need you there.	11/10/2014 3:47 PM
1117	Capitol Hill and Downtown/Lower Queen Anne buses should run until bars/clubs close or an hour afterwards.	11/10/2014 3:25 PM
1118	Route 68 needs service extended in the evening, late at night, and on weekends.	11/10/2014 3:18 PM
1119	Cross-neighborhood routes to ease ability to get from neighborhood to neighborhood while on transit.	11/10/2014 3:00 PM
1120	My family members need transportation early in the morning and sometimes late at night to the VA Hospital and to Harborviw.	11/10/2014 2:57 PM
1121	No	11/10/2014 2:57 PM
1122	Alki beach to downtown Seattle and back!	11/10/2014 2:54 PM
1123	it's hard to get from downtown to anywhere after 7pm because buses run so infrequently.	11/10/2014 2:49 PM
1124	There should be a week-end bus service from Renton Highlands to Seattle.	11/10/2014 2:47 PM
1125	Swedish Hospital Issaquah	11/10/2014 2:47 PM
1126	I wish the 60 ran later so I could stay out on Capitol Hill and take the bus home.	11/10/2014 2:21 PM
1127	All the buses from downtown go hourly after 7PM. This is unacceptable. Who wants to stand on a deserted street corner for an hour	11/10/2014 2:21 PM
1128	When people work on the weekends they should get the same route options as people who work M-F	11/10/2014 2:14 PM
1129	The convention center is one of the most crowded bus stops between 5-6:30 pm. The 10 comes all the time, but as for the other buses, if you miss it you basically spend your evening waiting on the next on to come or have to use a different bus that is a longer route.	11/10/2014 2:13 PM

1130	I've had a difficult time getting to Capitol Hill from downtown on SATURDAY evening after I get out of the theater! I've had to wait for over 30 minutes for a bus to get me to CAP HILL from DOWNTOWN on a SATURDAY night!!!	11/10/2014 2:07 PM
1131	Downtown at 4th and Pike is always overcrowded at the end of the work day, between 5-6 pm.	11/10/2014 2:07 PM
1132	Link light rail	11/10/2014 2:05 PM
1133	the 60 needs to run later on Sundays ... same for First Hill Streetcar. Cannot understand why Metro doesn't think First Hill residents might want to eat/shop on Sunday nights on Capitol Hill	11/10/2014 2:04 PM
1134	I wish that the #41 from the Downtown Tunnel to Northgate transit center were more frequent (more than one per hour) after 11pm.	11/10/2014 2:03 PM
1135	It would be great if there was a train from Tacoma to Seattle on the weekends.	11/10/2014 2:03 PM
1136	Don't know haven't really thought about it.	11/10/2014 2:02 PM
1137	Route 49 to Downtown for transfer to Light Rail to reach SeaTac for early morning flights	11/10/2014 2:02 PM
1138	It is difficult to get to Ballard and certain parts of Capitol Hill on the weekends (Sunday especially).	11/10/2014 2:01 PM
1139	Lake City way to downtown always needs service	11/10/2014 2:00 PM
1140	ALL bus stops should have shelter/shades and should be well lighted	11/10/2014 2:00 PM
1141	Yeah Redmond.	11/10/2014 1:55 PM
1142	Stone Way into Greenlake Dr.	11/10/2014 1:51 PM
1143	Route 9 with more service would be helpful. Extending Route 4 to Mt. Baker Transit Center.	11/10/2014 1:46 PM
1144	Pike/Pine weekend evenings High schools early mornings (especially in the dark months, when you don't want kids having to wait around or make transfers downtown)	11/10/2014 1:42 PM
1145	545 does a really good job of covering most of the Redmond metro area and the connection to the B Line is good	11/10/2014 1:41 PM
1146	To/from SoDo	11/10/2014 1:40 PM
1147	More stops on 2nd Avenue for 590.	11/10/2014 1:39 PM
1148	Service to UW, UWMC, and Children's can be difficult at these times, although many people are working in those areas that could use them.	11/10/2014 1:39 PM
1149	Pike/Pine corridor!	11/10/2014 1:31 PM
1150	Anything that goes directly to/from the light link needs early and late night service because that's when the most inexpensive flights are! I often choose flights based on affordability but usually the early/late times are not compatible with the light link and bus lines.	11/10/2014 1:31 PM
1151	I heard South Korea used cell phone (data) to determine where the public transportation is much needed.	11/10/2014 1:27 PM
1152	No	11/10/2014 1:24 PM
1153	Yes, Magnuson Park has minimal service on off hours.	11/10/2014 1:21 PM
1154	Northeast Seattle from Wedgwood.	11/10/2014 1:19 PM
1155	Colleges.	11/10/2014 1:15 PM
1156	I often take Link Light Rail to the airport since I fly a lot for work. However, the early morning buses from Capitol Hill to Downtown are infrequent or nonexistent. They should run on the same schedule as the light rail, but they don't. Ditto with the evening buses - after 7 or so there is a long wait in a sketchy part of downtown (4th/Pike) to get a bus to take me back to Capitol Hill. South Lake Union is another issue. There are nice restaurants there but it is impractical to take the streetcar there for dinner, because it stops running in the early evening, so then I would have to find another way to get back. The South Lake Union Streetcar needs to have its hours extended. It is not just for 8 AM - 5 PM commuters, there are other destinations there.	11/10/2014 1:06 PM
1157	Yes. Insure there is service 20 AFTER the last night/evening classes get out at GRCC in Auburn.	11/10/2014 1:06 PM
1158	Pike & Pine need 24 hour service. I feel like a hostage on weekends because my streets fill with drunk drivers who refuse to yield to pedestrians and I don't feel safe leaving the house. Perhaps charge the bars a damage mitigation transit tax.	11/10/2014 1:02 PM

1159	Early a.m. service to airport Late night transit connections to neighborhood corridors with weekend nightlife destinations- for patrons AND especially employees of these establishments (connect all neighborhoods to Capitol Hill & U District)	11/10/2014 12:59 PM
1160	Capitol Hill to Pioneer Square more frequently between 5am - 6am would be amazing.	11/10/2014 12:55 PM
1161	Not for me, no.	11/10/2014 12:52 PM
1162	Belltown, Cap Hill, Pioneer Square - basically wherever there's a nightlife/club scene	11/10/2014 12:49 PM
1163	See answer to 5.	11/10/2014 12:38 PM
1164	Seattle Streetcar	11/10/2014 12:37 PM
1165	More routes to other transit centers. A few times after work, I have been "stranded" in Downtown Seattle early in the morning, waiting for the buses to start running to Burien. Later Link service would be nice as well.	11/10/2014 12:29 PM
1166	The #12 could use greater frequency in the evenings. Same with stops coming up on pike and 4th.	11/10/2014 12:27 PM
1167	Aurora, (now served by Rapid E Line) Maple Leaf to Greenwood, Maple Leaf to Northgate, Maple Leaf to University District, University District to Wallingford	11/10/2014 12:26 PM
1168	Getting from Lake City to the U District on weekends (or back) is too difficult.	11/10/2014 12:24 PM
1169	Light rail will be needed late at night for sure after the bars close. If service doesn't operate past 2am on weekends, the bus network will be highly strained.	11/10/2014 12:19 PM
1170	None that I can think of at the moment.	11/10/2014 12:19 PM
1171	Obviously more frequent service throughout the day and evening.	11/10/2014 12:16 PM
1172	Not applicable to my situation. I typically do not use transit early in the morning or late at night.	11/10/2014 12:14 PM
1173	n/a	11/10/2014 12:12 PM
1174	There seems to be a service gap in Belltown since buses no longer run on 1st avenue and route 99 (if it still runs) is very limited. Living on Western Avenue, for the most part the nearest stops are up on 3rd.	11/10/2014 12:07 PM
1175	Pike/Pine and anywhere that has a lot of bars needs good, reliable bus service until at least an hour after the bars close. (The employees need to get home too!) The train station needs service whenever trains are due to leave or arrive - currently the First Hill streetcar is scheduled to stop running long before the 10:00 train gets in on Sunday nights.	11/10/2014 12:03 PM
1176	To/from U District service needs to be more frequent later in the evenings.	11/10/2014 12:00 PM
1177	Yes.	11/10/2014 12:00 PM
1178	It might be nice to have more frequent service after events/shows at the Seattle Center (between 10pm - 1am).	11/10/2014 11:56 AM
1179	Yes. See above. We cannot get to entertainment/shopping/work on the evenings, weekends, very early in the morning, or late at night. We have a number of warehouses in Auburn along Auburn Way and West Valley Highway that lack workers because those who can do the work (the poor) cannot get to the night shifts because of lack of transportation. In addition, I have known low-income students who have had to drop out of school because they had to work day shifts, because they didn't have transportation to swing and evening shifts. Connect the Federal Way and Auburn areas via fast transit, and this will increase income opportunities for this area, and over time, increase revenue for the county.	11/10/2014 11:53 AM
1180	Swamp Creek Park and Ride needs later evening buses	11/10/2014 11:51 AM
1181	I would like to see more frequent late night buses from entertainment hubs - downtown, Seattle Center (a once an hour bus or possibility of missing the last bus means people deciding to drive if they can afford downtown parking, or deciding not to go to an event if they can't) I also know that, although I have not had to work swing shift, the bus service is spotty for that shift of people working downtown, especially commuters to Tacoma and Federal Way.	11/10/2014 11:48 AM
1182	? I get around fine.	11/10/2014 11:48 AM
1183	I think there needs to be more bus options to/from Capitol Hill and downtown Seattle, as there are always crowds and that would discourage drunk driving and fighting over cabs.	11/10/2014 11:47 AM
1184	downtown to neighborhoods need more frequency at night - PM peak and a bit further. if you have to work late (say until 6:30 or 7 PM), you have to wait so long for a bus to take you home.	11/10/2014 11:44 AM

1185	As long as the announced bus cuts for 2015 do not happen, service is acceptable in the areas I travel.	11/10/2014 11:38 AM
1186	41 to northgate has been stuffed to the gills in the evenings. I've taken to getting a ride down to work to avoid the crowds in the mornings.	11/10/2014 11:38 AM
1187	Later running busses to parts of Capitol Hill, Georgetown, Ballard, U District, Belltown, etc.	11/10/2014 11:36 AM
1188	capitol hill and downtown	11/10/2014 11:35 AM
1189	Capitol Hill needs late night service for the bars and clubs.	11/10/2014 11:31 AM
1190	N/A.	11/10/2014 11:28 AM
1191	although the 65 runs earlier than the 30/74 between NE seattle and the UW campus, I would never ride the 65 in the dark because of safety issues. So earlier options going down University Way or 15th ave NE (well-lighted streets and sidewalks) would be a plus.	11/10/2014 11:26 AM
1192	Harborview Medical Center for those whose shifts start / end late at night or on weekends	11/10/2014 11:25 AM
1193	No comment	11/10/2014 11:24 AM
1194	not by me.	11/10/2014 11:23 AM
1195	Pike/Pine, Broadway, Bellevue/Summit	11/10/2014 11:22 AM
1196	None that I use.	11/10/2014 11:12 AM
1197	yes! Capitol Hill and Ballard need later busses	11/10/2014 11:11 AM
1198	South Seattle to Capitol Hill on the weekend and much later into the night. Both for the people who work on First Hill and the people that want to go out on Capitol Hill at night.	11/10/2014 11:08 AM
1199	The Northgate/downtown route.	11/10/2014 11:06 AM
1200	YES, ROUTE 47 along Bellevue Avenue north of Denny. It needs 7 days am and pm routes. There are many elderly along there as well as the low income Denny Terrace that has handicapped people too.	11/10/2014 11:05 AM
1201	Late night buses should at the least run wherever there's a concentration of bars or show venues. Early morning options to the airport would be helpful.	11/10/2014 11:04 AM
1202	Capitol Hill/Belltown need service late at night (midnight to 2AM)	11/10/2014 11:03 AM
1203	I think most bus lines need to run later at night. Some people work nights and it is difficult to use public transportation when there are no options near you.	11/10/2014 11:03 AM
1204	Madison corridor used to have a bus (84, I think?) that featured night owl service. I know it probably went under because of the cuts, but we could use an extra bus or two late at night down there.	11/10/2014 11:01 AM
1205	I noticed that the 70 gets overcrowded during the evening rush hour. So do the other 70s (71,72,73).	11/10/2014 10:56 AM
1206	Sandpoint Way should have more frequent service. Hoping when the Husky stadium light rail station is in place there will be more direct and frequent routes down Sandpoint Way and Husky Stadium.	11/10/2014 10:55 AM
1207	downtown	11/10/2014 10:54 AM
1208	From Chateau Ste. Michelle to downtown.	11/10/2014 10:52 AM
1209	Seattle - Eastside No 2am buses for nightlife	11/10/2014 10:48 AM
1210	Eastlake to Belltown/downtown from about 8am-10am needs to be increased. It's way too crowded on that route in the mornings.	11/10/2014 10:47 AM
1211	No	11/10/2014 10:44 AM
1212	I do wish buses ran later on weekends. Particularly from Queen Anne and Downtown to Capitol Hill. I also find the Light Rail doesn't run late enough. Many times my flight arrives home just after the Light Rail has stopped running.	11/10/2014 10:42 AM
1213	Possibly better service to and from events such as football and/or baseball.	11/10/2014 10:39 AM
1214	Bellevue Court in capital Hill, Greenlake lower woodland park, UWs IMA building, more frequent 66	11/10/2014 10:37 AM

1215	I don't tend to go out much in evenings, on weekends, or at odd times of day. However, more routes to more grocery stores would be helpful for weekend shopping trips. That is often the only time of week I use my car.	11/10/2014 10:35 AM
1216	The lake connection, Convention Center to Bellevue/Redmond, should never have an hour wait in-between buses. On weekends and evenings, half an hour should be the max wait (although I don't have access to your data, this is only as observed). I don't cross the bridge on weekends because of the combination of long wait times and unreliable scheduling. I have (several times, almost regularly) had to wait 1.5-2 hours for a bus on weekends.	11/10/2014 10:35 AM
1217	University of Washington to Snohomish County (Lynnwood) at night. I have classes until after 9pm at UW and cannot find a reliable bus route without transfers back home at that time of night.	11/10/2014 10:35 AM
1218	15th Ave NE early in the morning	11/10/2014 10:33 AM
1219	I've tried to get to a friend's house in the Magnolia area (from the UW area) and I've usually had difficulties in the evenings or weekends.	11/10/2014 10:31 AM
1220	#8 all along Denny.	11/10/2014 10:31 AM
1221	The #60 from Captiol Hill to Beacon Hill ends too early in the night. It means I need to go downtown to take the longer-running #36 to get to my destination. It's often more convenient to walk.	11/10/2014 10:29 AM
1222	I frequently use the 11 and 43, but find that they are scarce and unreliable late at night. If I get off the LINK train coming back from the airport or want to do something late at night downtown, it's rare that I can actually get a bus in a reasonable time frame.	11/10/2014 10:27 AM
1223	I feel fortunate that I work a typical schedule and live by multiple bus routes, so this is not an issue for me.	11/10/2014 10:27 AM
1224	All of them, in an ideal world. The 5 is my lifeline, so that.	11/10/2014 10:26 AM
1225	Seattle Center to Capitol Hill/Madison Valley from 9 to midnight U District to Capitol Hill/Madison Valley from 9 to midnight	11/10/2014 10:25 AM
1226	U-district University of Washington (further down 45th) First Hill hospital district	11/10/2014 10:25 AM
1227	Busses from Edmonds on the weekends would be nice. Busses in Kitsap County after 8pm would be nice. Schedules coordinated or beyone the 7/8am to 4/5pm commute would be nice. You know, especially to the other side of the sound.	11/10/2014 10:20 AM
1228	I feel that transit between the Eastside and Seattle is stressful. Additional busses in the 545, 550 and 554 routes at commute hours would help increase riders and decrease congestion on the two main routes back and forth. Just be sure to advertise it.	11/10/2014 10:17 AM
1229	Not UW/Cap. Hill related but Beacon Ave & S. Lander St where the Beacon Hill Light Rail Station is.	11/10/2014 10:12 AM
1230	Ravenna to Downtown and Airport	11/10/2014 10:11 AM
1231	I can't speak to these as are not times when I need transportation.	11/10/2014 10:09 AM
1232	I would love to see the 30 reinstated and later runs for the buses that go to Northgate (68)	11/10/2014 10:09 AM
1233	The NE 75th St corridor is neglected and under utilized. It's a East-West route with easy access to/from I-5 via Lake City Way. To alleviate crowding on the slow 71x and shorten the trip to downtown, I wonder if an express route through Wedgwood/NE 75th St is viable.	11/10/2014 10:07 AM
1234	Not that I frequent.	11/10/2014 10:07 AM
1235	I would say that Capitol Hill to Ballard and back on weekend evenings is important, there's a cultural link between these two neighborhoods and lots of younger people trying to get back and forth.	11/10/2014 10:07 AM
1236	Not to my knowledge	11/10/2014 10:06 AM
1237	Near clubs or bars -- places that are known to have activity into the evening.	11/10/2014 10:03 AM
1238	I catch whichever is the first bus, if you made a bus earlier I would catch it, but I don't think that should be the focus.	11/10/2014 10:01 AM
1239	It seems like service nose dives after 6pm on busy routes like the 12/10. It adds insult to injury if i need to work late.	11/10/2014 10:01 AM
1240	On 15th Ave NE - there are quite number of people who works at UWMC and has late/early shifts	11/10/2014 10:01 AM

1241	Lower Queen Anne, 12th Ave Corridor in First Hill	11/10/2014 9:55 AM
1242	I can't think of any reason why the light rail stops going south of mount baker after midnight. Why not just decrease the frequency? Guess WHY Halloween is the biggest night for taxi and uber drivers. It's because there's no way to get anywhere in the city after midnight unless you fork over an entire paycheck for an uber or wait for 2 hours for a taxi. What a missed opportunity for revenue. Just think of how much private transportation providers make on that night! It's like their black Friday. I bet metro and the link would have done very nicely to service the city an extra hour or two later. But then again, customers' needs have never "driven" metro's service goals.	11/10/2014 9:53 AM
1243	In general it'd be much nicer if more buses were scheduled around the 9am - 5pm worker commute as the buses are jam packed on a daily basis at those times and there doesn't seem to be an frequency increase of buses running during those times when the ridership is maxed out.	11/10/2014 9:53 AM
1244	Montlake/25th Ave NE - Need way of getting buses through/around the constant southbound back-ups on Montlake so can get to/from University Village, UW hospital, Husky Stadium and buses at 520 freeway stop. Why not send them through the UW parking lots and around the stadium? No traffic there.	11/10/2014 9:50 AM
1245	Peak hour service to green lake to down should be longer in the morning till about 9:30 and extend of 7 pm.	11/10/2014 9:43 AM
1246	?	11/10/2014 9:41 AM
1247	I think that while buses downtown do run late at night, their infrequency at times makes for long waits and interesting stops. It would be nice to see maybe a bulk up on trips from 11:00pm-1:00am and maybe a few less trips between the 9:00pm-11:00pm hours.	11/10/2014 9:40 AM
1248	airport	11/10/2014 9:34 AM
1249	Weekend route from east Capitol Hill (23rd/24th Ave E/Montlake) to U-District and Magnusson.	11/10/2014 9:32 AM
1250	rainier beach to 700 cherry everynight....it takes an hour to get home after midnight....and thats if im lucky with the transfer.	11/10/2014 9:24 AM
1251	Not that I am aware of.	11/10/2014 9:19 AM
1252	I am sure there are many but not for me.	11/10/2014 9:14 AM
1253	I will only take transit on the weekends when I am not trying to be someplace in a specific amount of time because FAST public transit options from East to West in this city are deplorable.	11/10/2014 9:08 AM
1254	Central city routes serving popular night-life destinations, such as capitol hill, lower queen anne, ballard, and fremont, could do with increased (read: peak-level) frequency on busy weeknights and weekend nights, with hours that facility moving around the city, neighborhood-to-neighborhood, without forced late-night transfers in the dead-zone that is the central business district.	11/10/2014 9:04 AM
1255	Routes from Sumner to Tacoma need to be earlier. Example I need to take the 586. There is nothing leaving Sumner early enough for me to get to Tacoma to take the 586 to get to UWMC early. The 578 needs to run all day, northbound and southbound. When the train is delayed or cancelled there is no alternate route for commuters to get out of Sumner.	11/10/2014 8:57 AM
1256	Leschi to downtown and back more in the evenings and weekends.	11/10/2014 8:48 AM
1257	N/A	11/10/2014 8:42 AM
1258	Routes that service hospitals, ferry docks, UW, community colleges, Sports stadia, manufacturing sites	11/10/2014 8:40 AM
1259	Greenlake / U-District / Wallingford / to First Hill, especially on weekends for 0700 shift start.	11/10/2014 8:32 AM
1260	The 4:50AM Route 106 to Seattle from Renton is too early and the 5:20AM is too late.	11/10/2014 8:24 AM
1261	More bus service around the hospitals would be nice. Currently there is only the 9 that runs past that campus and doesnt run late at night, not on the weekends. Crappy situation if you work those time shifts.	11/10/2014 8:21 AM
1262	From McClellan to Jackson on Rainier Ave S to that people can connect to the First Hill Street Car that will open soon up on Jackson. But, like I said, transfers suck. This street car route was so poorly designed.	11/10/2014 8:18 AM
1263	Later service would be helpful so people could flex their schedule getting back to the eastside. when I take the bus I have to go early and leave early and am in the busy commute times. I'd like the flexibility to come in later and stay later but service back to Sammamish doesn't go very late.	11/10/2014 8:09 AM
1264	the eastside need the 265 back as a direct connection to the hospitals!	11/10/2014 8:03 AM

1265	NE Seattle to Seattle Center - direct route w/o transfers.	11/10/2014 7:59 AM
1266	Lots of buses out of capitol hill and bell town later at night would be great.	11/10/2014 7:56 AM
1267	NA	11/10/2014 7:43 AM
1268	Um, yeah. Heading north after 9 pm on the weekend offers you one bus an hour. Inadequate at best.	11/10/2014 7:24 AM
1269	Anywhere that is not downtown Seattle. Specially hospitals or other 24 hour emergency locations that need to be staffed.	11/10/2014 6:53 AM
1270	15th AVE NE and 65th ST NE	11/10/2014 5:31 AM
1271	Between U District and Downtown. Also between Ballard the U District.	11/10/2014 2:29 AM
1272	Weekends staying out late. Buses stop running or run too infrequently for a really late night out with friends.	11/10/2014 1:09 AM
1273	60, 8	11/10/2014 1:04 AM
1274	71x/72x/73x should be offered later in the day and on Sundays	11/10/2014 1:03 AM
1275	replace the 9 with a streetcar	11/10/2014 12:44 AM
1276	Center for Urban Horticulture/south end of University Village to Children's to Northgate. Not only is the route crazy-circuitous, but it's standing room only for quite awhile and then after everyone gets off, it goes all the way up in Lake City before coming back to Northgate Way. Stupid route, crowded, stuffy, and full of disease vectors. The route from lower Queen Anne in front of Ten Mercer (restaurant) to Northgate after the opera runs only once an hour. I'm freezing. I'm tired. I'm getting rained on. It's late. Fortunately for me, I'm too smart to wear heels, or my feet would be killing me from standing at the bus stop. As for where on evenings, weekends, early/late, you can't get to Capitol Hill from Northgate Way without going downtown first. Lots of routes are like that--you have to go all the way downtown from the north end and THEN take an east-west route to get there. I went from 15th and 115th to Group Health Capitol Hill for a 20-minute appointment. The bus took 2 hours.	11/10/2014 12:42 AM
1277	Network. Network. Network. All work or none work. Schedule variation should be minimal to maintain simplicity. Like a clock, many gears but only 3 hands to tell time.	11/10/2014 12:37 AM
1278	Again, reverse routing in the 29.	11/9/2014 11:17 PM
1279	See previous question	11/9/2014 10:38 PM
1280	- Saturday and Sunday service to make connections at King Street Station (Amtrak), 5th & Jackson (BOLT bus), and SeaTac Airport - Weekend service to parks, trailheads, and natural areas would be so transformative in helping people have healthier lives and enjoy their city and surrounding landscapes.	11/9/2014 10:30 PM
1281	25th Ave. near the U-village has no service evenings and Sundays. 71/72/73 switch from express to local to early in the evening, often leading to severe overcrowding on the local route.	11/9/2014 9:16 PM
1282	Streetcar service later at night would be appreciated. I don't understand why the First Hill Streetcar will supposedly end at 7pm on Sundays.	11/9/2014 8:33 PM
1283	North Seattle (Wallingford, Fremont, Ballard) to Capital Hill without transfers!	11/9/2014 7:36 PM
1284	520 - bellevue to seattle/U district. Other than the 271, there aren't any options	11/9/2014 7:21 PM
1285	You guys are largely doing a great job. Thanks!	11/9/2014 6:46 PM
1286	SeaTac airport-Earlier morning service on Link to get to earlier flights from SeaTac Seattle Center- post performance	11/9/2014 6:46 PM
1287	I'd love to have better service in Southeast King County, but I figure that's too much to ask. Another couple of commute runs would be nice. Obviously based on current traffic, it would get some cars of the road, huh?	11/9/2014 6:22 PM
1288	Airport	11/9/2014 5:49 PM
1289	don't know	11/9/2014 5:43 PM
1290	Not that I use	11/9/2014 5:22 PM

1291	I'm sure there are some destinations such as airport, hospitals, major employment centers, entertainment districts that generate more ridership at these hours. However, I think that too much focus on particular "corridors" may exclude many or most riders. Transit is an attractive option only if riders can complete an entire trip. For example, unless I live downtown, early-morning service between downtown and the airport is not too compelling. Unless I can also get service from my neighborhood (north Capitol Hill) to downtown, I'm not able to take advantage of the "corridor" service.	11/9/2014 4:28 PM
1292	More late night service in Capitol Hill and Downtown.	11/9/2014 4:11 PM
1293	I am sure this is true but not for my purposes.	11/9/2014 3:47 PM
1294	Bus service needs to continue until 1-2 am on most corridors.	11/9/2014 3:36 PM
1295	Evenings/weekends: Seattle Center, Georgetown, Pike/Pine	11/9/2014 3:07 PM
1296	West Seattle	11/9/2014 1:51 PM
1297	Please run the 74X route throughout the day -- not just during rush hour	11/9/2014 11:17 AM
1298	Improved frequency on Saturdays and Sundays, everywhere.	11/9/2014 10:34 AM
1299	Capitol Hill, Downtown, University District	11/9/2014 10:25 AM
1300	N/A	11/9/2014 10:10 AM
1301	Routes 10, 11, 43, 49, and all buses to and from the University need optimal service, especially to about 11 p.m. Otherwise there's no way to get home from crosstown cultural events that isn't very costly in either time or money. Expanding Route 31 service to midevening would also be a major benefit because of its connections to the University and Route 40 in Ballard.	11/9/2014 10:03 AM
1302	The 209. It no longer exists, being replaced by the sub par 208. It used to have Sunday service. The 208 doesn't even have that. The 208 runs every 120-150 minutes. That's simply ludicrous. Routes like the 209 should be Metro's bread and butter, standard route. Routes like the 3 and 4 shouldn't even exist until routes like the 209 have Sunday service. It feels like Metro literally has their priorities backwards.	11/9/2014 9:57 AM
1303	Everywhere in evening-active commercial areas in the core of Seattle. Why would it be otherwise in a modern city?	11/9/2014 9:32 AM
1304	pike/pine 24 hours	11/9/2014 8:06 AM
1305	Sand Point Way NE up to 35th Ave.	11/9/2014 4:12 AM
1306	Route 41 could use 15 minute service later, and on Sundays instead of 30 - 60 minutes. The 70 series buses should run express all the time, every day.	11/9/2014 1:48 AM
1307	43 should run more frequently on weekends.	11/9/2014 1:21 AM
1308	Madison past 23rd (23rd to Madison beach) stops very early at night. Out would be nice to have more frequent buses from downtown at 7-9pm	11/9/2014 12:46 AM
1309	The 255 should run later at night.	11/9/2014 12:08 AM
1310	Downtown Bellevue to Downtown Seattle, Downtown Bellevue to UW, Northgate to UW, Lake City to Aurora,	11/8/2014 10:46 PM
1311	Night owl after bars close. 24 hour Link service.	11/8/2014 10:46 PM
1312	Not sure	11/8/2014 10:45 PM
1313	The 9x should be expanded	11/8/2014 10:17 PM
1314	Seatac Airport needs to have 24/7 access from downtown Seattle. People work there 24/7 and flights are scheduled nearly 24/7. Travelers and locals should be able to make any flight using public transit and take public transit home from any arriving flight. People work at the NOAA campus 24/7, so there should be transit service along Sand Point way at the very least from 4:30 am to 11:30 pm, 7 days a week. 24/7 would be even better. People also work at Children's hospital 24/7. Redmond Ridge, Duvall, and the Snoqualmie Valley should have weekend service.	11/8/2014 10:01 PM
1315	More service at the Int'l Dist before and after events at the stadiums.	11/8/2014 9:34 PM
1316	Earlier light rail	11/8/2014 9:04 PM
1317	I'm not sure.	11/8/2014 8:08 PM

1318	No	11/8/2014 7:47 PM
1319	Denny Way, Broadway from Capitol Hill up to UDistrict, Madison St from Captiol Hill to Downtown	11/8/2014 7:32 PM
1320	It would be nice if the LLRail went an hour or two later at night.	11/8/2014 7:12 PM
1321	There really should be a way to get to the airport for early flights. Light rail starts at 5:00 am, but hardly any bus routes are running that early so it's almost impossible to get to a light rail station.	11/8/2014 6:45 PM
1322	3rd Ave DT. The 3rd/Union Intersection on the East side, needs work. There aren't enough bus shelters for everyone to stand at. When it's raining or very hot, a lot of people are forced to stand in the open, either getting wet or working on their sunburns.	11/8/2014 6:12 PM
1323	North of Canal - service options are poor on weekends	11/8/2014 6:07 PM
1324	I'm actually pretty lucky - I have so many options so I don't really know.	11/8/2014 5:27 PM
1325	Capitol Hill to Redmond	11/8/2014 5:18 PM
1326	Out to Sand Point and through Ravenna	11/8/2014 4:51 PM
1327	Northgate to downtown on the 41 after 7p. Service should be 15 minutes until 9, every 20 minutes to 11, then every 30 afterwards. Likewise, service should be every 20 minutes on Sunday.	11/8/2014 4:38 PM
1328	Fremont's bus service ends too early. I am sometimes asked to work late but there is no bus service.	11/8/2014 4:36 PM
1329	Belltown, Capitol Hill, Fremont, and Ballard are vital late-night destinations. There should be buses in all of these neighborhoods at least an hour after the bars close. Otherwise, we're practically asking people to drive drunk.	11/8/2014 3:34 PM
1330	North Seattle to Capitol Hill	11/8/2014 3:15 PM
1331	Downtown and Capitol Hill need more frequent service at rush hour-evening-late night	11/8/2014 3:01 PM
1332	The entire city should be within a reasonable walk of a 24 hour transit line, this is a city, it should act like one!!	11/8/2014 2:50 PM
1333	SeaTac !!	11/8/2014 2:14 PM
1334	Capitol Hill Downtown University District Wallingford Fremont	11/8/2014 2:06 PM
1335	Night--better service to events in UW stadium area.	11/8/2014 1:51 PM
1336	I would like to be able to get downtown on the bus earlier on weekends in order to catch the light rail to a morning flight out of SeaTac. I sometimes have had to take a cab because the buses didn't run early enough on weekends.	11/8/2014 1:30 PM
1337	I'd selfishly say the 271 but I doubt the ridership would justify it.	11/8/2014 1:21 PM
1338	not the major issue in seattle, peak travel improvements needed most	11/8/2014 1:17 PM
1339	Maintain frequency on trunk routes on nights and weekends such as the 40 and rapid ride lines. Get rid of the existing night owl routes and replace them with late night service on routes that run during the day like the rapid ride lines, 40, 49, 70's, 16 etc.	11/8/2014 1:15 PM
1340	Ballard to Downtown very early to connect with first Link to Airport	11/8/2014 1:15 PM
1341	The rainier ave corridor needs more evening service and more frequent weekend service , the link needs more early morning & late at night trips(going to downtown Seattle), and the 255 needs more early morning, late at night , and weekend trips(at totem lake and downtown Kirkland).	11/8/2014 1:11 PM
1342	10th Ave North, north of Aloha towards Boston.	11/8/2014 12:33 PM
1343	To and from airport.	11/8/2014 12:29 PM
1344	All of them. It's not really an option if it's not available when people need it.	11/8/2014 12:22 PM
1345	Capitol Hill to downtown is very limited in early morning. Last time I checked, Alki had only 2 times available on weekends so you had to cab (too expensive) or drive, I end up driving to Colman Pool all summer because it takes too long to get back to Capitol Hill in the evenings	11/8/2014 11:56 AM
1346	Lake City Way/I5 corridor along Meadowbrook/Wedgwood/Maple Leaf to downtown	11/8/2014 10:42 AM
1347	Um...how about the most ignored and yet highly growing area in Seattle aka 12th Avenue?	11/8/2014 10:23 AM

1348	43 should run until 3am heading to UW / Ballard	11/8/2014 10:21 AM
1349	U-District - Capitol Hill needs a service at night	11/8/2014 10:17 AM
1350	The UW to Capitol Hill corridor could use more nightly service. I often find I have to be very strategic about when I catch a bus from the UW, as the buses I need come about every 20-30 minutes.	11/8/2014 9:58 AM
1351	71, 72, 73 to downtown 48 from 65th to Mt Baker station	11/8/2014 9:27 AM
1352	Along Broadway, Along John / Olive. Along Denny Way between Capitol Hill and Queen Anne.	11/8/2014 9:11 AM
1353	6th & Seneca to the University District	11/8/2014 9:08 AM
1354	Eastbound Denny way gets so backed up after 5pm. I don't get with the eastbound 8 now stops after fairview instead of before it. I bet that this single change adds 3-10 minutes per trip during busiest times, because the driver has to wait to get across fairview and to the stop before they can enter the left lane to get to the next stop.	11/8/2014 9:02 AM
1355	There should be a bus that is timed to meet most ferries to get the thousands of foot passengers a day up the hills and out of the weather without having to walk on the rather isolated overpass.	11/8/2014 8:59 AM
1356	From Central District to Capitol Hill	11/8/2014 8:50 AM
1357	Everything could use more reliable and frequent weekend service for my needs.	11/8/2014 8:47 AM
1358	Airport runs by train early in the morning and late at night - even every half hour. There's no way to take the train to a 6:30-7:00 am flight. Workers at the airport could use the train too if service ran early and late!	11/8/2014 8:41 AM
1359	See above	11/8/2014 7:53 AM
1360	na	11/8/2014 7:51 AM
1361	More service early weekdays and weekends to SeaTac airport. Match some schedules to peak flight times at Seatac on weekends.	11/8/2014 7:42 AM
1362	Seattle Center to Cap Hill	11/8/2014 7:38 AM
1363	Again long walk home at night from stops on the 43 or 49 can be problematic.	11/8/2014 4:17 AM
1364	South Seattle	11/8/2014 1:40 AM
1365	#8 needs more frequent evening and sunsay service	11/8/2014 12:23 AM
1366	From my personal perspective, none on such a frequent basis as to actually warrant such service increase. Only here and there have I wanted buses to start running earlier in the morning (as I mentioned already, to catch a bus down to the light rail to get to the airport). Syncing buses with closing time at bars might do well for neighborhoods with active night life, if that's not already being done.	11/8/2014 12:21 AM
1367	MLKing Way S to Renton needs service that matches Link Light Rail service hours and that transfers at Rainier Beach Station.	11/7/2014 11:58 PM
1368	not sure, just don't take the bus often anymore	11/7/2014 11:54 PM
1369	I would like to be able to bus to Ravenna from Downtown Seattle, Fremont, Ballard, and SODO as late as 2am. I'd like it if the 68 would run later and on the weekends from Northgate to Ravenna - or something closer than on Roosevelt.	11/7/2014 11:22 PM
1370	Routes 512, 532, 545, 550, 554, 560, 574 and 594 should be operated 24 hours a day.	11/7/2014 11:13 PM
1371	Souder train should run limited service on the weekends.	11/7/2014 11:13 PM
1372	Roosevelt Ave. University Ave.	11/7/2014 9:57 PM
1373	South Lake Union	11/7/2014 9:53 PM
1374	Service between Seattle and Redmond ends very early on the weekends (especially towards Seattle), and could also use more frequent service.	11/7/2014 9:52 PM
1375	Airport later at night to allow catching it when flights are late.	11/7/2014 9:15 PM
1376	Residential and entertainment / neighborhood shopping areas (capital hill, Ballard, U district)	11/7/2014 9:10 PM
1377	SeaTac airport - restore bus service.	11/7/2014 9:08 PM

1378	Not sure, probably areas with hospitals	11/7/2014 8:51 PM
1379	Service from UW after 6 pm that heads efficiently to Renton.	11/7/2014 8:34 PM
1380	I would love to seen Montlake Blvd. served thru 25th Ave NE, instead of E. Stevens NE transfer point.	11/7/2014 8:28 PM
1381	More service on Lake City to SR 522.	11/7/2014 8:07 PM
1382	I would really appreciate earlier morning and more frequent service from the Kenmore/Bothell area to the UW light rail station when it opens (and to the Northgate station in the future). Right now the 372 starts late in the day compared to other commuter buses and slowly winds through the UW campus.	11/7/2014 7:31 PM
1383	RAINIER VALLEY.	11/7/2014 6:52 PM
1384	North-South Mercer Island 204. M-F 6-6 is ridiculous for a town of 25,000!	11/7/2014 6:02 PM
1385	The now defunct 47 route in North Capitol Hill. (Streets: Summit and Bellevue) More routes on 1st Ave downtown south of Pike/Pine.	11/7/2014 5:54 PM
1386	Capitol Hill to pioneer square later in the evening.	11/7/2014 5:51 PM
1387	The 156 NEEDS to come more often and LATER at night. The route comes every 30 min (which is just ridiculous to begin with), and then every HOUR after 8 and then completely stops running at 10 PM! And during the weekdays when I need to stay on campus late for help with classes at UW I often am stranded at the SeaTac Light Rail Station after 10 because there is no bus to take me home. I have to beg people to pick me up or else walk 45 min - 1 hour at night to get home. And then on the weekends it only comes every hour throughout the day!	11/7/2014 5:39 PM
1388	Yes, Belltown -> Cap Hill (i.e. the 8) should run frequently into the night.	11/7/2014 5:36 PM
1389	Please bring back the 30, or add evening and weekend service on the 68.	11/7/2014 5:22 PM
1390	Probably, but not that I'm personally aware of	11/7/2014 5:19 PM
1391	How about at normal times of the day? I'd like to leave Seattle around 7am on the Sounder to get to Tacoma, and then leave Tacoma around 5pm.	11/7/2014 5:17 PM
1392	As soon as service frequency is 30 min or longer, I use some other form of transportation.	11/7/2014 5:13 PM
1393	Route 47	11/7/2014 5:08 PM
1394	Service on major corridors should run every 15 minutes or more frequently long all day long. These would include the Rapid Ride lines (which should run every 10 minutes during from 6:00 a.m. to 10:00 p.m. on weekdays), Rainier Avenue, Greenwood Ave, 15th Ave NE and between the urban centers such as between Bellevue and Seattle. Route 7 should connect with Link at Rainier Beach.	11/7/2014 5:05 PM
1395	Retail centers so employees (mostly low income) can get to and from work for their scheduled shifts	11/7/2014 5:04 PM
1396	Everywhere.	11/7/2014 4:54 PM
1397	Major bar areas should have late night bus options between them (i.e. between Capitol Hill, Fremont, Ballard, Belltown on the main bar strips)	11/7/2014 4:51 PM
1398	From the Admiral District in West Seattle to Downtown.	11/7/2014 4:49 PM
1399	See my answer for #5 Unrelated to Capitol Hill or the U-District, there should be service to Shilshole Marina and Golden Gardens, especially on summer evenings and weekends.	11/7/2014 4:41 PM
1400	Not on my route.	11/7/2014 4:34 PM
1401	First Hill is 24/7/365 because of the hospitals. The hospitals end up having almost exclusively single occupancy vehicle drivers for their evening and night shifts, and for weekends because of the lack of commuter options at those times. Please reach out to them to see where their staff want to get to, to see if you can offer some First Hill after-hours express services from the regional park and rides. Many of our off-shift workers live elsewhere in King County. Having options that get them from Park & Ride to First Hill might make a BIG difference!	11/7/2014 4:19 PM
1402	Yes, Madison Park needs more service in the evening and on the weekend.	11/7/2014 4:18 PM
1403	Capitol Hill need more extensive evening and weekend service frequency improvements.	11/7/2014 4:15 PM
1404	Renton Highlands to and from Seattle, Bel-Red Road, Seattle waterfront	11/7/2014 4:15 PM

1405	Not that i know of.	11/7/2014 4:12 PM
1406	40 needs more service at all times.	11/7/2014 4:11 PM
1407	Early services and better coordination with the Sounder Train is definitely needed. Sounder riders pack buses and leave no room for those who must ride that specific bus to a destination and most only need to ride to downtown. Infrequent/every half hour service on weekends is a hindrance for using the service and as mentioned above some scheduled buses never come. I've had this experience enough times to only take the bus when I have no time constraints around getting to my destination.	11/7/2014 4:10 PM
1408	Capital hill, Ballard, downtown, U district, SoDo for concerts and games late.	11/7/2014 3:56 PM
1409	Route 8 much improved, but seems not certain of continuation.	11/7/2014 3:53 PM
1410	NE 55th St. 40th Ave	11/7/2014 3:46 PM
1411	NE Seattle to downtown is pretty sparse, with the 73 and 72 the only real options for Maple Leaf and Lake City. It would be nice to have something like a rapid-ride on Lake City Way, maybe with some feeder routes going east-west.	11/7/2014 3:45 PM
1412	The Airport via light rail More weekend service to popular destinations such as Seattle Center and Alki Beach	11/7/2014 3:45 PM
1413	Ballard needs more evening and weekend service.	11/7/2014 3:42 PM
1414	Not well served: Vashon Island	11/7/2014 3:38 PM
1415	ST556 on weekends would be awesome	11/7/2014 3:36 PM
1416	Pike/Pine & 12th Avenue should have late-night/weekend service that allows for transit use after being in bars/clubs/restaurants.	11/7/2014 3:36 PM
1417	Route 72, on weekends (Sunday) I do not know of other problems.	11/7/2014 3:35 PM
1418	More regular service after 6pm from downtown to Capitol Hill. More routes up the hill than just on Denny and Pike.	11/7/2014 3:33 PM
1419	Service on the north end of capitol hill could be increased in the early morning.	11/7/2014 3:33 PM
1420	I would like the light rail to run until after the bars close. This will become especially important when University Link/North Link opens, and people will be wanting to get home from the bars in Capitol Hill and the U-District. I also know a lot of people who are prevented from taking light rail to the airport due to early/late flights.	11/7/2014 3:25 PM
1421	From Broadway/Pike/Pine to surrounding neighborhoods (Central, North Capitol Hill, Madrona, Leschi, Madison Valley, First Hill) on evenings and weekends until 3am. Also, SoDo and South Lake Union have growing night spot options if it were easier to get home (Capitol Hill, Central) afterward.	11/7/2014 3:21 PM
1422	I work evenings and weekends downtown. With more frequent reliable service at those times, I would take the bus. Currently I drive.	11/7/2014 3:05 PM
1423	To the airport very early to be able to catch a 6am flight.	11/7/2014 3:02 PM
1424	To/from Capitol Hill. East/West between Rainier Valley and West Seattle. Link Light Rail already needs increased capacity or frequency to manage the current ridership, which is exceeding Sound Transit's own projections, even before the opening of the U-Link extension.	11/7/2014 2:55 PM
1425	All center city neighborhoods as well as Ballard, Fremont, and UW require service in the evenings and on weekends. People living in these neighborhoods are much less likely to own cars than in the rest of the county and thus the bus becomes their primary means of transportation for ALL trips, including retail and recreation, not just their commute trip. Making living car-free a viable lifestyle choice requires transit to be available at all hours. I would also like to put in a plug for late-night service connecting center city neighborhoods to various nightlife (bars/clubs) hubs as having transit available at bar-time would provide an alternative to driving while intoxicated. Of course cabs are an option, but these can get expensive and are often hard to flag down, so some people may be tempted to talk themselves into believing they are not as intoxicated as they really are in order to avoid the expense. This is obviously quite dangerous. In Vancouver, BC, buses run until well after the bars close, and they are always full. Pike-Pine, Fremont, Belltown and UW seem obviously targets for late-night bar service.	11/7/2014 2:54 PM
1426	The airport. I often arrive late on Sunday and cannot take light rail because it stops service at 10pm.	11/7/2014 2:39 PM
1427	Pill hill	11/7/2014 2:35 PM

1428	23rd Ave/Central District late night/early morning. There is no service after 1:45pm or before 5:30 am. When I teach a 6am class, I have to walk almost a mile to a bus stop, which is very difficult as I am partially disabled. When I live in the U District, on 15th Ave, I have close to 24 hour bus service.	11/7/2014 2:34 PM
1429	no	11/7/2014 2:30 PM
1430	I think buses run to the right places, we just need more frequency. Magnuson Park to Capitol Hill is an example. When you add a 30min wait to a transfer, travelling by bus on the weekends is hard.	11/7/2014 2:11 PM
1431	I would go out on evenings and weekends on transit if only there was reliable transit home, but many routes run less frequently or stop altogether in the evenings.	11/7/2014 2:11 PM
1432	At night I use transit a lot to connect to DT Seattle and Seattle Center for theater, movies, etc. The number 8 should run at least twice as frequently including more often until at least 11 pm.	11/7/2014 2:03 PM
1433	I think the commuter peak express services need to be extended to later in the morning. Many tech workers and others with flexible schedules often work 9:30 - 6pm or thereabouts.	11/7/2014 1:56 PM
1434	Downtown, stadiums	11/7/2014 1:35 PM
1435	Bellevue. The 271 specifically needs later service. However, the 550 also stops too early, as the last trip is at midnight. On the westside busses tend to run until 2 am, I would expect the 550 (as it is one of the most-ridden routes in the system) to also run that late.	11/7/2014 1:34 PM
1436	Late at night on a Friday and Saturday night from Capitol Hill or DT Seattle to Renton TC would be nice so that I can get home safely w/out a cab fare.	11/7/2014 1:29 PM
1437	I'll use my car these times.	11/7/2014 1:25 PM
1438	E. Madison/Downtown (#2, 12, 3, and 4)! Overcrowded during peak transit times (5pm).	11/7/2014 1:25 PM
1439	The corridor between downtown Seattle and the University District needs much better service at all hours on all days.	11/7/2014 1:24 PM
1440	The ones I'm aware of are covered -- more or less. E.g. the E line on Aurora has later and MUCH more frequent service for my purposes than the 5, which stops closer to my home -- but I can't walk uphill from Aurora, so I have to transfer to a 48, and the trip ends up taking WAY too long.	11/7/2014 1:22 PM
1441	I-5 southbound after noon. Too risky to take bus downtown to switch over to light rail to go to airport. My neighbor missed his flight because the bus was stuck on I-5 in traffic. There need to be bus only lanes on all freeways.	11/7/2014 1:16 PM
1442	Belltown, Capital Hill, Downtown Seattle, Downtown Bellevue, Kirkland (not Totemlake which is worthless),	11/7/2014 1:14 PM
1443	Magnolia doesn't have enough service at night.	11/7/2014 1:08 PM
1444	Capitol Hill to U-District	11/7/2014 12:58 PM
1445	The bus doesn't always feel safe coming up to Capitol Hill.	11/7/2014 12:55 PM
1446	Getting to/from dinner and clubs is helpful late when clubs close	11/7/2014 12:46 PM
1447	downtown Seattle to just about anywhere after 7pm	11/7/2014 12:43 PM
1448	Denny Way, the old 47 route	11/7/2014 12:40 PM
1449	Route 8 and buses to West Seattle	11/7/2014 12:36 PM
1450	Northgate - Downtown: often runs only 30 min after 7 or 8, then 60 after 10 or 11. It should run every 15 min until 10 and gradually decrease afterwards, U-District - Downtown: Service should be maintained at 15 min until 11, then 30 afterwards. There are some late night trips that run SOUTH around 1 or 2am. These trips should be cut and moved elsewhere to improve efficiency. There is already late night service, but it is 1.) infrequent and 2.) operates on nights that are not necessary, like Sunday night or Wednesday night. Such late night trips could be cancelled and used more effectively elsewhere like on Fri/Sat nights or used to improve earlier frequency.	11/7/2014 12:27 PM
1451	No, my problem is peak afternoons. Transfer to the 76 and it never comes when it is supposed to. Other buses from the tunnel, but not the 76. There need to be more 76 buses.	11/7/2014 12:25 PM
1452	Pretty much all of suburban South King County and all of Pierce County.	11/7/2014 12:19 PM
1453	Capitol Hill - late night and very early morning	11/7/2014 12:14 PM

1454	More early morning options from Redmond to Issaquah; the 221 to the 554 would be nice, but there's not enough time to walk up the bridge to the 554 stop. Restore more Prentice service during peak hour on the 7- there are hour and 90-minute long gaps during rush hour. Inbound 2's and 12's from First Hill don't align with outbound 41s. More night service on the 41, including a 2:15 trip. Outbound 41's on sundays no longer line up with the 522 to Bothell. Add night service on the 60 til midnight every night. The 7/49 service is great, but this shakeup the schedules became weird and all the trips are late.	11/7/2014 12:11 PM
1455	More areas around nightlife destinations near capitol hill, ballard, etc.	11/7/2014 12:10 PM
1456	A corridor similar to the 43/44 except using Broadway instead of 23rd Ave would be a top priority for me. An east-west route across north Seattle using N 40th St, through Fremont, and then out Leary Way to Ballard (like connecting the 31/32 and the 40 north of the Fremont Bridge) would also be useful.	11/7/2014 12:05 PM
1457	We need fast and frequent service to a light rail station until the Roosevelt station opens. We also need better service along NE 65th Street, preferably with connections at Greenlake and Magnuson park and the many shops and services in between.	11/7/2014 12:00 PM
1458	South West King County U-District	11/7/2014 11:59 AM
1459	Earlier morning service on the 74 would be nice. Also, they currently run every 30 minutes - more departures also would be helpful.	11/7/2014 11:58 AM
1460	none come to mind	11/7/2014 11:57 AM
1461	Georgetown could use a little more late night service with a connecting bus in the transit tunnel to the University District. In the summer months, when I'm actively bike riding, I find bike racks on the bus fill up quickly and leave me and others stranded.	11/7/2014 11:54 AM
1462	Heading to the airport	11/7/2014 11:54 AM
1463	All night trains to and from Seatac.	11/7/2014 11:45 AM
1464	who can say	11/7/2014 11:44 AM
1465	Additional late night service: >Wallingford to Capitol Hill >Wallingford to Downtown	11/7/2014 11:40 AM
1466	http://www.seattlesubway.org/	11/7/2014 11:30 AM
1467	Pike/Pine, The Ave	11/7/2014 11:25 AM
1468	cap hill Lower Queen anne/Downtown	11/7/2014 11:20 AM
1469	Yes, Seward Park Ave S., Wilson Ave. S heading towards Link light rail's Othello Station need to be earlier to connect to the first train or earlier than 6:30 being the first available connection.	11/7/2014 11:18 AM
1470	The main thing is that buses need to run more than twice an hour when you get into the evenings, weekends and early AM/late night situations. Have you ever had to stand around for a half an hour in a strange neighborhood after 10 at night, waiting (hoping) your bus shows up? It's a horrible feeling.	11/7/2014 11:17 AM
1471	To connect to Husky Link in the later evening, we will need local bus service as well.	11/7/2014 11:15 AM
1472	to Westlake, for Link service...as I stated above, because Link service starts earlier than regular metro routes, it can be hard to get to very early weekend flights at Sea-Tac using public transit.	11/7/2014 11:14 AM
1473	no.	11/7/2014 11:05 AM
1474	Eastside to Downtown and vice versa	11/7/2014 11:03 AM
1475	Capitol Hill, Georgetown, Columbia City, northgate.	11/7/2014 11:02 AM
1476	I would use a route like the 30 running _very often_ on weekends	11/7/2014 11:01 AM
1477	Denny corridor. buses are late, bunched, overcrowded, unreliable. It would be great if there was an olive way bus from downtown to capitol hill in the evenings.	11/7/2014 10:57 AM
1478	Better nighttime service on the 2 - even fairly early in the evening, there can be 45 minutes or more between buses, and/or "ghost" buses that are scheduled but don't arrive, leaving travelers stranded at the bus stop waiting for the next bus	11/7/2014 10:54 AM
1479	How about the #12 from the ferry dock, would be nice if that, and the #8 from Seattle Center and #43 from downtown had later and more frequent services, especially after big concerts and whatnot.	11/7/2014 10:48 AM

1480	Routes to and from Capitol Hill: the 8, 49, 43-44, 60 and the rapid rides could be more frequent	11/7/2014 10:47 AM
1481	Lake city way in evening and late night..	11/7/2014 10:44 AM
1482	Downtown to Capitol Hill and the Central District	11/7/2014 10:38 AM
1483	n/a	11/7/2014 10:34 AM
1484	32nd ave. Sunset Hill	11/7/2014 10:30 AM
1485	Light Rail from Downtown to Ballard, Fremont, West Seattle.	11/7/2014 10:24 AM
1486	Columbia City/Hillman City/Rainier Beach need transit love! desperately! Light rail is great, but if you don't live close to a station it's not always realistic (or safe) to walk to the station. Increased express route transit on Rainier is a must.	11/7/2014 10:24 AM
1487	Ballard	11/7/2014 9:59 AM
1488	Not on weekend. Evening, early morning and late at night transit is not safe so I will not use.	11/7/2014 9:54 AM
1489	Everywhere in the downtown core and in the populated neighborhoods (Capitol Hill, UW) should have 24/7 service. Any expansion of service to job centers throughout the metropolitan area would also be of help.	11/7/2014 9:53 AM
1490	Bring back Night Owl Routes	11/7/2014 9:46 AM
1491	41 and the 8	11/7/2014 9:42 AM
1492	More bus service at the train station at all times. There is no convenient bus stop anywhere near the King Street Station.	11/7/2014 9:40 AM
1493	My needs are generally met	11/7/2014 9:39 AM
1494	more frequent service generally. for buses from downtown to east Capitol Hill, they seem to all leave downtown around the same time, so that if I miss one, I miss them all. A staggered schedule, with one of the buses (10, 11, 12, 43, etc.) leaving every 5 mins would be more helpful	11/7/2014 9:37 AM
1495	All major north south require this and most major east west corridors do too.	11/7/2014 9:37 AM
1496	BEACON HILL needs more service!! Especially at later at night.	11/7/2014 9:33 AM
1497	I cannot say as there are transits that travels along the corridor, but specific to a location, yes. Having more than just one bus to South Kirkland P&R from Downtown after dinnertime or having more times added as this bus is full everytime I've taken it (to the point of standing). Having options from the UW to the Eastside (not just 271 since it doesn't travel to Kirkland or Redmond). More options from Sammamish on the weekends (I live 8 minutes from a bus stop).	11/7/2014 9:28 AM
1498	Late night buses for Pike/Pine nightlife would be good	11/7/2014 9:26 AM
1499	The late night service needs to be revised. Metro's night owl service is out of date, it doesn't reach enough of the city which limits its usefulness for people needing to travel late at night.	11/7/2014 9:25 AM
1500	PIKE PINE! Nightlife! Drunk people! Traffic congestion! Need more ways to get there and get home.	11/7/2014 9:24 AM
1501	Please see previous comments re: route 99	11/7/2014 9:22 AM
1502	Not at this time.	11/7/2014 9:20 AM
1503	Having transit police/security available evenings at the Transit Centers is really helpful.	11/7/2014 9:19 AM
1504	Nightlife destinations such as Wallingford, Fremont, U District, and Capitol Hill should have abundant evening and weekend service. I would love to be able to use public transit for an evening out.	11/7/2014 9:18 AM
1505	Sunset Hill, in Ballard. There are still many people there who need bus service - without walking a long way - during "off-peak" times and on weekends. I am still relatively young and able-bodied, but many people in my neighborhood are elderly and used to rely on the availability of the #17.	11/7/2014 9:16 AM
1506	Madison St.	11/7/2014 9:16 AM
1507	The interbay/eastern side of Magnolia is not supremely rich like the rest of Magnolia and needs better service. I end up biking for 90% of my trips because the bus is too unreliable, slow and has limited options. Unfortunately, these factors have given Magnolia a low transit usage but it's not because people don't want to use it--it is just not useful at the moment. There needs to be a way to get to the D line that doesn't involve walking 1-3 miles.	11/7/2014 9:15 AM

1508	It's difficult/long to go to other parts of the City on weekends/evening. This usually involves having to go downtown and transfer, which can take awhile because the frequency on weekends/evenings is less. Frequent connections at the UDistrict link stations would be a good alternative when it's up and running.	11/7/2014 9:12 AM
1509	The one major flaw in Seattle's bus routes is that it is focused on Downtown. This is great for commuting but I would use the system more if there were better connections crosstown to circumvent the back and forth routing. For example, why does the D stop in N Seattle and not continue to Northgate as another important transfer point? Why not have a better connection between Ballard and the U District or U Village? One route could better connect Wallingford and the other thru Fremont. These connections should be more like the Rapid Ride than a local route like the 43.	11/7/2014 9:10 AM
1510	Downtown Retail through Madison park SLU through Madison Park The bars close between 2-3 and the buses do not run. I respect that the drivers need to be safe, but cities like Boston have extended train hours past bar hours and I believe that the drunk driving rates have decreased.	11/7/2014 9:08 AM
1511	I think any of the bus lines that will deliver passengers to the U Link station. I think that the light rail will be in very high demand, and it will be helpful to get people to the station easily.	11/7/2014 9:07 AM
1512	Madison Valley area.	11/7/2014 9:01 AM
1513	Run buses more often along 25th and then on to 23rd, Madison and beyond without a transfer....stop at new Huskie light rail station for downtown trips.	11/7/2014 8:59 AM
1514	Every mode of transit is overcrowded during rush hour, right? At least the ones I use. Metro and Link	11/7/2014 8:54 AM
1515	First Hill to Rainier Valley	11/7/2014 8:46 AM
1516	More 65's from Campus Parkway in the late evenings would be great. I think they only run one time per hour after 9pm.	11/7/2014 8:44 AM
1517	I don't travel anymore late at night, so I can't respond.	11/7/2014 8:40 AM
1518	The 77 is always packed in the morning going downtown. Also away from downtown in the evenings is always hectic. There's just not enough buses for the amount of people. Buses are consistently turning away people	11/7/2014 8:39 AM
1519	East Madison Street needs more rush hour (particularly evenings) and weekend service east of 15th avenue.	11/7/2014 8:38 AM
1520	later sounder trains! I want to visit my Olympia/Lacey friends at times other than rush hour.	11/7/2014 8:36 AM
1521	Univerisity district could have very early/late service in addition to increased owl service.	11/7/2014 8:35 AM
1522	N/A	11/7/2014 8:34 AM
1523	West Seattle-admiral end. Even the park and ride under lower Spokane Street. There are approximately 2000 UW employees commuting from WS. Not all are day workers (e.g. 6-9a and 1530-1800, but I am sure a significant percentage. Even if there was a morning and evening service that was direct (no transfers) would be a great help. It is incredibly aggravating that co-workers have direct transportaion from Pierce, Skagit, and Snohomish counties and WS doesn't.	11/7/2014 8:33 AM
1524	extending into the eveing a little more would be helpful	11/7/2014 8:32 AM
1525	downtown to Ravenna	11/7/2014 8:31 AM
1526	n/a dont use the bus at night. not safe.	11/7/2014 8:30 AM
1527	I think it would be great to have good connections from Shoreline to the UW in evenings, weekends, and early morning. On weekdays I take the very first bus offered in my route, but it would be nice to have a choice of an earlier bus as well.	11/7/2014 8:29 AM
1528	Pike/Pine on Capitol Hill	11/7/2014 8:29 AM
1529	An express bus from downtown to canyon park p and r would be ideal for me but I don't know if there's enough demand.	11/7/2014 8:29 AM
1530	There should be more options for getting between SE Seattle (Columbia City) and places like First Hill, Capitol Hill, North Seattle.	11/7/2014 8:26 AM
1531	Not that I use	11/7/2014 8:22 AM

1532	West Seattle could use more late night buses on the weekend. And the train needs to run past midnight for flights coming in after midnight. I've been stuck having to get a taxi into town from the airport because my flight arrived after 11pm. Not cheap!	11/7/2014 8:21 AM
1533	UW to all places east and west and to downtown	11/7/2014 8:20 AM
1534	Don't know.	11/7/2014 8:18 AM
1535	Capitol Hill, Belltown and Pioneer Square should all have late night service (until 2:30 a.m.) Friday and Saturday night. Service to the Airport on Link Light Rail should leave downtown every morning for an Airport arrival by 5:00 a.m. I've had several visitors coming to see me and I have to drive them to their 6 a.m. Sunday flight because Link Light Rail is not yet operating on a Sunday.	11/7/2014 8:17 AM
1536	Seatac International Airport	11/7/2014 8:16 AM
1537	The airport especially needs earlier service. Parallel to that is the need for later service in the evening returning from the airport.	11/7/2014 8:15 AM
1538	The "Night Owl" service represents a very old philosophy and needs to be re-imagined. Please see this: http://seattletransitblog.com/2014/07/08/metros-night-owl-alignments-are-insane/	11/7/2014 8:14 AM
1539	Areas with bars should have transit running until 2 30am. Keeps people from drunk driving.	11/7/2014 8:09 AM
1540	Just main roads. I feel a lot of the night service meets my needs	11/7/2014 8:07 AM
1541	Service down Madison	11/7/2014 8:07 AM
1542	Yes - Airport to downtown could use improvement. Link Light Rail basically ends at 11:30 or so during the week and doesn't start till 5:30 or so. Weekends are worse. That schedule should absolutely start at 4AM (to catch those 5:30 and 6am flights) AND definitely run until 01:00AM since there are quite a few midnight flights that arrive. You ignored asking about 522 service in the check-box section earlier. That is the ONLY WAY around the North end. Service there should be MINIMALLY every 20 minutes and better every 15 minutes. I believe it is a DEFINITE candidate for 'Rapid Ride' type of service.	11/7/2014 8:04 AM
1543	If I work overtime, I am concerned what buses are running in evening to my home.	11/7/2014 8:03 AM
1544	No, and I don't think this is one of the major issues Metro should try to address either. I'd focus on how to get more people to take the bus during the day at non-peak times.	11/7/2014 8:02 AM
1545	to/from downtown to/from UW	11/7/2014 7:58 AM
1546	Frequency is actually pretty good now, it's just reliability and travel time that are terrible. ULink will provide service until 1am, so I'm not too worried about late night travel either.	11/7/2014 7:55 AM
1547	3rd & Pine downtown is a nightmare. People are afraid to wait for buses there.	11/7/2014 7:45 AM
1548	Pike/ Pine should operate much later on the weekends to discourage driving under the influence.	11/7/2014 7:40 AM
1549	Places like Ballard, SLU, Fremont, Capitol Hill, etc. need to be better connected if you want people to use transit to get around better in the evening. As for particular corridors, i can only really speak to my own neighborhood. 23rd needs that sort of service, as does Madison.	11/7/2014 7:39 AM
1550	Rainier Ave at night and weekends	11/7/2014 7:39 AM
1551	When I lived in south seattle, the light rail was not opened early enough.	11/7/2014 7:38 AM
1552	Yes. Capitol Hill through Downtown.	11/7/2014 7:29 AM
1553	earlier 586 bus from tacoma to U of W but you woul need earlier Bus in Tacoma too that get to the Tacoma Dome to catch a bus. 586 bus is too crowded now thats why I take the train. But that is getting crowded too. need more trains leaving Seattle to Tacoma. Why do you have empty trains leaving to Seattle in the evening?? We just need more Bus and Train services/ Tacoma has terrible bus service. The connections are not there for a person to get to work when you have to be there at 6:30am. and there is only one bus The #1 that leaves from TCC early enough to get downtown and the dome but I have to walk 20 blocks to get to it. and I am disabled.	11/7/2014 7:27 AM
1554	Capitol Hill <-> Seattle Center	11/7/2014 7:27 AM
1555	Having expanded hours to the 64 would be great. We need easy access to downtown outside of commute hours.	11/7/2014 7:07 AM
1556	Fortunately, light rail to airport runs early. Buses to get to light rail do not. In my experience, buses that do have early morning routes have not been reliable.	11/7/2014 6:59 AM

1557	Yes - Link to the airport FROM DOWNTOWN not stadium area early in the morning and late at night.	11/7/2014 6:58 AM
1558	Not sure.	11/7/2014 6:52 AM
1559	Factoria	11/7/2014 6:51 AM
1560	Yes, Broadway, Pike, and Pine corridors on Captiol Hill and the University Village in the U-District.	11/7/2014 6:36 AM
1561	I assume there are. However, the bus I use most (Metro #66) meets my needs for commuting and I use my car for other travel, so I don't know what other areas are lacking -	11/7/2014 6:26 AM
1562	Northeast Seattle- no bus service on weekends-68 or 372	11/7/2014 6:25 AM
1563	Buses from downtown to Capitol Hill need to be staggered at night. Right now the 10, 11, and 49 all arrive around the same time, then it's another half hour before they all pickup again.	11/7/2014 6:23 AM
1564	The rte 27!	11/7/2014 6:18 AM
1565	Bigger / more buses for uw commuters seasonally	11/7/2014 6:06 AM
1566	The main north-south and east-west routes	11/7/2014 5:51 AM
1567	Bothell, Bellevue.	11/7/2014 1:11 AM
1568	None that matter to me at the moment.	11/7/2014 12:21 AM
1569	no	11/7/2014 12:04 AM
1570	CD to/from Capitol Hill.	11/6/2014 11:54 PM
1571	The Snoqualmie Valley. As I mentioned earlier, it's becoming more of a destination lately. However, bus service only happens about once an hour, lasts only until early evening, and doesn't run at all on Sundays. I'd suggest rectifying all this with a daily, direct route to and from Snoquamie that runs frequently.	11/6/2014 11:53 PM
1572	Between 5 pm and 7 pm going north on Fairview from Fred Hutchinson. Buses are incredibly late, potentially not stopping at all, and very crowded.	11/6/2014 11:38 PM
1573	Late night: downtown to Capitol Hill!	11/6/2014 11:26 PM
1574	SoDo near concert venues and over by Aurora for the same reasons. It's much cheaper to take a bus than to get a cab.	11/6/2014 11:23 PM
1575	Cap Hill <-> Wallingford / Ballard / Fremont late night would be great.	11/6/2014 11:22 PM
1576	in and out of u district	11/6/2014 11:15 PM
1577	Cherry hill and First hill. The 3 and 4 run so ridiculously off schedule that I had to stop taking them if I wanted to keep my job. Now I take the 48 to 23rd and Jefferson and walk to Swedish Cherry Hill.	11/6/2014 11:07 PM
1578	Night owl service should instead be the actual routes to neighborhoods that need service at 2:15am...Routes A, C, D, E, 5, 7, 11, 13, 16, 41, 43/44, 73, 106, 150, 180, 550, 554.	11/6/2014 11:01 PM
1579	The cuts in the 30 make it hard to get a bus in our neighborhood on weekends or late in the evening. I also really have to be careful to make sure to leave work by about 6:30 PM to make sure that I can get a bus home.	11/6/2014 10:58 PM
1580	To and from nightlife / entertainment centers. Capitol Hill/ U-district/ Fremont/ Ballard.	11/6/2014 10:37 PM
1581	Also need a bus directly from Issaquah or far eastside to SeaTac airport.	11/6/2014 10:37 PM
1582	25 av NE	11/6/2014 10:32 PM
1583	i ride mostly in daylight, usually no later than 10 PM	11/6/2014 10:21 PM
1584	Fremont, Queen Anne, Ballard and Downtown	11/6/2014 10:05 PM
1585	See above.	11/6/2014 10:01 PM
1586	First Hill Earlier morning buses from Bellevue to Seattle (550 and 545) in order to transfer within Seattle in a timely manner	11/6/2014 9:55 PM
1587	See #6. The Rapid Ride on 15th NW is frequent enough, but there could be more options on the 28, and the #12 too could be more frequent.	11/6/2014 9:55 PM

1588	South Lake Union needs more service during rush hour	11/6/2014 9:53 PM
1589	Yes, NE Seattle (Magnuson Park area). There's currently no direct bus service from downtown Seattle on the weekends and late evenings. Transferring to a bus which service the area is very limited or nonexistent if the UW is not in session.	11/6/2014 9:49 PM
1590	When classes are in session at the University of Washington, or any university, service should be given to those areas on weekends.	11/6/2014 9:35 PM
1591	no	11/6/2014 9:30 PM
1592	yes have the #43, 10, 11 bus or similar head towards downtown at least a half hour earlier than it currently does say 5:00 to 5:30 am	11/6/2014 9:28 PM
1593	East Lower Queen Anne	11/6/2014 9:27 PM
1594	Just from downtown to the airport late nights. It would even be better if there was a last call train. It would be unnecessary to run it as consistently as normal day schedule but if I'm out after a sporting event it is a pain that I have to leave early to get home and can't go out with friends for drinks as the cost of taxis/uber is prohibitive.	11/6/2014 9:24 PM
1595	Of course, but the focus should be on frequent, on-time service during those times when most people have to get somewhere regularly at a particular time. More like the Rapid Ride format, a few expresses should run in the "reverse commute" direction on the routes that include worksites such as supermarkets, retirement centers, and schools.	11/6/2014 9:10 PM
1596	Better access for shift work for healthcare workers: 0700-1530 1500-2330 2330-0730 Weekends and Holidays too	11/6/2014 9:07 PM
1597	The Rainier Beach Area Needs More Service To The Rainier Valley And Rainier Beach Area	11/6/2014 9:02 PM
1598	32nd ave nw. Leary ave nw	11/6/2014 8:58 PM
1599	probably	11/6/2014 8:57 PM
1600	Weekends, from lower king county, to downtown.	11/6/2014 8:52 PM
1601	has Metro ever considered minivans or shuttles like many companies use on the low ridership routes? It seems such a waste of resources to see near empty full or even double buses on some routes then get passed by your bus because they couldn't cram any more bodies on !	11/6/2014 8:50 PM
1602	Bus 60 stops running after 7 pm on Weekends.	11/6/2014 8:30 PM
1603	Eastside -- nothing to get over at night. Frequent downtown/ballard or uw/ballard service that is fast is needed too (not slogging on the 44 or the D)	11/6/2014 8:24 PM
1604	None	11/6/2014 8:17 PM
1605	I don't know	11/6/2014 8:13 PM
1606	Probably, but I'm not sure.	11/6/2014 8:13 PM
1607	North from UW campus	11/6/2014 8:09 PM
1608	Houghton Park & Ride to South Lake Union in the morning South Lake Union to Houghton Park & Ride in the evening	11/6/2014 8:06 PM
1609	Lake City Way and 110th - 125th need more early morning buses please.	11/6/2014 7:46 PM
1610	Personally, service to and from Ballard from the U District in the evenings and on weekends would be nice (the 44 is glacial). More frequent service to downtown on Sundays and evenings would also be good.	11/6/2014 7:40 PM
1611	# 27 # 25	11/6/2014 7:31 PM
1612	More direct/express buses to downtown Ballard from Downtown Seattle at all times. (Express buses during peak are not enough!)	11/6/2014 7:28 PM
1613	I would like more express choices from the northeast neighborhood in the early morning - and would give a lot to NOT be relegated to the Fairview route in the evening. Express busses after 7:00 pm would be appreciated.	11/6/2014 7:23 PM
1614	Luckily, I have a car and don't have to rely on the bus during these times.	11/6/2014 7:19 PM
1615	The airport; Northgate to/from the CBD.	11/6/2014 7:18 PM

1616	I think the 44 needs to start earlier in the morning, even just once an hour. Also maybe a short trip 44 from the UW to Wallingford would be fantastic as that is where the bus is most crowded.	11/6/2014 7:08 PM
1617	busses and more police presence along 3rd downtown when it's dark, in front of library, Benaroya; and also at the University on 15th near Meany Hall when dark	11/6/2014 7:08 PM
1618	Northeast to Queen Anne or Capitol Hill for nightlife.	11/6/2014 7:02 PM
1619	more frequent night service between capitol hill and downtown	11/6/2014 7:00 PM
1620	*Really happy with the D Line.	11/6/2014 6:53 PM
1621	I wish there were buses or Link trains departing early enough from downtown to catch the first morning flights out of the airport (between 5 and 6 AM). Maybe that means a first train departing Westlake between 3-4 AM.	11/6/2014 6:50 PM
1622	Core of the city North/South. Also, the airport after light rail shuts down. The 41 dropping in frequency on weekends and evenings is particularly problematic for getting home quickly.	11/6/2014 6:46 PM
1623	My needs are met. I was VERY happy when the 255 route began 1/2 hour service early enough for my transit to church. Nothing can really be done about this, but it is a GREAT inconvenience to me every time the 520 closes for the weekend, as I have to go all the way downtown to catch the 255, and the 71/72/73 schedules do NOT coordinate very well with that transfer.	11/6/2014 6:45 PM
1624	Probably, but I can't think of any now	11/6/2014 6:41 PM
1625	U District, including UWMC, to Northeast Seattle	11/6/2014 6:39 PM
1626	I miss the 27!	11/6/2014 6:37 PM
1627	Denny UW-520-capitol hill 520	11/6/2014 6:36 PM
1628	Airport before 5am and after 2am.	11/6/2014 6:31 PM
1629	SeaTac. Northgate. The colleges.	11/6/2014 6:29 PM
1630	I'm urban, so I don't need to travel too many corridors.	11/6/2014 6:19 PM
1631	No	11/6/2014 6:11 PM
1632	See above	11/6/2014 6:06 PM
1633	Airport service early in the morning is very difficult. To catch an early morning flight, I have to either go to SEATAC the night before and try to sleep at the airport, or take the 80-something bus, which winds around all over, and is difficult to transfer from in downtown Seattle.	11/6/2014 6:06 PM
1634	Our major nightlife corridors - Capitol Hill, downtown/Belltown, Fremont, downtown Ballard - should keep or start running late-night routes.	11/6/2014 6:00 PM
1635	Shilshole Bay Marina	11/6/2014 5:59 PM
1636	The 255 through Kirkland is very slow, especially at rush hour. I wish there was express service to Juanita.	11/6/2014 5:59 PM
1637	Badly needed is service east-west on NE 95th St, from Sand Point Way to Lake City Way. There's a very long, steep hill there. Tough esp. at night.	11/6/2014 5:55 PM
1638	Why do the 43 and the 49 get to Broadway and John within minutes of each other, even when the buses are running on holiday or Sunday schedule? Please take a look at spacing them differently.	11/6/2014 5:55 PM
1639	To make the 7:30 a.m. Amtrak train the best bus is the #41, a 15-20 min walk from my house west of I-5	11/6/2014 5:54 PM
1640	None that I use.	11/6/2014 5:52 PM
1641	Service from SE Capitol Hill to Seattle Center as well as Cap Hill to Belltown, Fremont, Wallingford, and Greenlake. Also, better srvice from SE Cap Hill to NW Cap Hill would be nice.	11/6/2014 5:50 PM
1642	not that i know of.	11/6/2014 5:49 PM
1643	Late night from Downtown to Redmond. Weekend 542	11/6/2014 5:48 PM
1644	Issaquah late at night. One 554 every hour isn't all that awesome. And it fills up.	11/6/2014 5:47 PM

1645	I have noticed that by the time the 32 (Northbound) gets to Wallingford Avenue and 40th street in the mornings it is pretty packed, and usually late. This is around 8:00am, and I cannot speak to other times. The 31 and 32 Southbound are very crowded in the University District around campus and parkway at around 4:30pm. The 71 Southbound in the mornings is also very crowded, though the 76X helps. This is from about 8-10am. Both the 71 and 76 are also packed Northbound between 3 and 8pm.	11/6/2014 5:46 PM
1646	no	11/6/2014 5:41 PM
1647	some AM reverse peak service needs added for workers going out of/through downtown to local neighborhood business districts. Its hard or impossible to make some early shifts, or some store closing late shifts ending after 8pm.	11/6/2014 5:40 PM
1648	Broadway needs continual service, as does downtown late into the night for people going to and from clubs, bars, restaurants, etc.	11/6/2014 5:40 PM
1649	I already mentioned that from North Seattle to the Eastside could use some service on weekends. I'm not as apt to use transit very early in the morning or late in the evening	11/6/2014 5:34 PM
1650	There is no current way that people with walking disabilities will be able to take the trolley from the busiest part of First Hill. 3 to 4 block walk (often in the dark and bad weather) up or down hill from 9th ave to b'way. No safe or dry way to get to Seattle U on Madison, the center part of SCC (the bus stops were eliminated) no way to go shopping because the trolley will stop 3 blocks from the major stores on Broadway. Same problem at the ID end of the run....not even close the the businesses or other facilities I think it was designed by California Yuppies who cannot find Seattle in the Atlas!	11/6/2014 5:34 PM
1651	There need so to be extra transit when events at Seattle Center get out in the evening. I really hope that when the Husky station opens, there will be a lot of feeder buses from NE to the light rail stop. Capitol Hill is the place I go by car most often because I have to transfer buses.	11/6/2014 5:34 PM
1652	On the 48: I'd like to see service more frequent weekend service, and also more service late at night. Mornings headed north into the U District and evenings headed south toward Mt. Baker also get overcrowded when UW is in session. On the 11: Span of service is good, but more frequent service is needed in the evenings and on weekends. Reliability on the weekends can also be a problem; it's not uncommon to see both of the buses running the route bunched up together. On the 545: Buses are sometimes packed before they get to my stop at Montlake EB in the mornings. More trips are needed during the peak. Weekend service could use improvement too.	11/6/2014 5:33 PM
1653	Getting downtown on the weekends.	11/6/2014 5:32 PM
1654	Madison valley, Downtown Bellevue, Kirkland	11/6/2014 5:30 PM
1655	Day shift at UWMC starts at 7:00 am. On Sundays, there is no 48 that will get me there before 7:10 am. Some of my co-workers on evening shift get off at 11:30 pm and cannot get a bus home at that hour (or have to wait 30 minutes or more).	11/6/2014 5:29 PM
1656	Yes, there should be more buses running late at night to and from capitol hill and Fremont/wallingford/u district/Ballard since nightlife is very prominent on capitol hill and will reduce drunk driving and car traffic in the area	11/6/2014 5:26 PM
1657	The airport needs service at all hours.	11/6/2014 5:25 PM
1658	More stops at 92nd and 95th along Lake City Way A better connection from Northgate Transit Center to 92nd off Lake City Way More service on 72 Better connection from Seattle Center to University District	11/6/2014 5:15 PM
1659	No	11/6/2014 5:14 PM
1660	NE Seattle to downtown early in morning.	11/6/2014 5:10 PM
1661	I don't know of any. The only places I bus at night are directly on the Route 5 route, and most of the time it is the perfect bus for timing and locations, lucky me!! I must comment on the question on the next page, about "How far would you walk." This question ignores people who are in wheelchairs and need to take the bus.	11/6/2014 5:08 PM
1662	Capitol Hill station should run late at night as well as main U-district station. Early and on weekends would make sense for U-district to Cap Hill as well.	11/6/2014 5:04 PM
1663	Seattle Center, weekends and late nights, post-performances, both for event-attendees and event workers. Husky Stadium will need weekend and late connections once Link starts there. Montlake Blvd NE/25th Av NE needs its own transit lane for more direct service from Husky Stadium Link to NE Seattle and south to Montlake/Portage Bay (for those not needing Link all the way to the top of Cap Hill).	11/6/2014 5:02 PM

1664	Later night airport service. Earlier morning airport service. Flights leave starting at 6am and come in till midnight.	11/6/2014 5:02 PM
1665	Please consider having the 30 run at a time when the 74 isn't.	11/6/2014 5:02 PM
1666	UW	11/6/2014 4:59 PM
1667	3rd and Pike.	11/6/2014 4:58 PM
1668	Weekend service on Lake City Way and Ravenna	11/6/2014 4:58 PM
1669	Regular runs from downtown to Lake city way would be helpful. The ST 522 doesn't stop from downtown to passed 125th St. If it stopped at say 95th St, it would solve this problem.	11/6/2014 4:56 PM
1670	Capitol Hill, SLU, Queen Anne, West Seattle, Georgetown	11/6/2014 4:55 PM
1671	More frequent service later at night. Capitol hill late at night.	11/6/2014 4:55 PM
1672	I visit with friends on some weekends in Bellevue. I create a schedule and I try to go with it while I can.	11/6/2014 4:55 PM
1673	We try to avoid using busses at night for the reasons stated above.	11/6/2014 4:54 PM
1674	Pike Pine from downtown to Capitol Hill	11/6/2014 4:54 PM
1675	Capitol Hill, U-District. No matter where I come from, I need to get home late at night too, and currently I live in Lake City.	11/6/2014 4:53 PM
1676	Lake City Way - all the time, including weekends. The ST 522 doesn't make the same stops as the 312 and people are left behind. Maple Leaf is not well served or connected to Lake City/Downtown.	11/6/2014 4:52 PM
1677	Current schedules seem to be sufficient.	11/6/2014 4:52 PM
1678	167	11/6/2014 4:51 PM
1679	The 8 is a disaster. Denny is a parking lot and needs to be addressed. Not sure if more frequent service would assist, but it might. As said above, even Capitol Hill has fairly limited service on weekends with busses spaced at 30+ minutes. Once the light rail opens, the HOURS NEED TO BE EXTENDED so that people can still go out in the evenings in Capitol Hill and the U-District and plan on riding the light rail home AFTER CLOSING TIME. It would be great if the light rail ran on a very limited schedule throughout the night to assist with airport runs early in the morning. If you have a 6am flight, you can't take Link to the airport.	11/6/2014 4:49 PM
1680	UW Medical Center from the north from the university or 25th Ave NE From 65th to PCC on 40th, to banks and Rite Aid on 35th, to QFC and SAFEWAY along 35th. I'd like better access to the Wedgwood businesses, maybe the U Village too. I don't have stores close by. Right now there is only service via bus #65 which does not have a stop near my house.	11/6/2014 4:48 PM
1681	Express from downtown to U District should run to 8 p.m.	11/6/2014 4:45 PM
1682	Sand Point Way NE	11/6/2014 4:44 PM
1683	Need better weekend evening service between Beacon Hill and Capitol Hill. It's so hard to park in Capitol Hill now. I'd love to be able to take transit up there if I want to go out on the weekend nights. But there's no way to easily get home from Capitol Hill without going downtown first. Even a Pronto bike station on top of Beacon Hill would improve things. Then, one could bike back to Beacon in a pinch, leave the bike at the station and walk the rest of the way, rather than paying \$20 for a cab.	11/6/2014 4:42 PM
1684	All urban villages should have service until at least 2 am, preferably all night on weekends. Capitol Hill, Ballard, and the light rail route especially needs better late night service.	11/6/2014 4:42 PM
1685	12th Avenue needs service at all times of the day.	11/6/2014 4:41 PM
1686	cross-town, e.g. Wedgwood to Greenlake, etc.	11/6/2014 4:40 PM
1687	23rd ave need a crosstown trolley bus	11/6/2014 4:39 PM
1688	I would like to see the 85th and 20th bus stop have the 522 stop later in the evening and weekend.	11/6/2014 4:38 PM
1689	Connections to nearby grocery stores often half an hour apart in early evening again due to budget cutbacks.	11/6/2014 4:38 PM
1690	Parking available at transit center outside of 5-6 am.	11/6/2014 4:36 PM
1691	Lake City Way really needs a full set of stops throughout its length throughout the day, not just during the commute.	11/6/2014 4:35 PM

1692	The 48 needs to be much more frequent after 9-10 p.m. and on Sundays. I think Metro is aware of this already but it's worth repeating. Better frequency on the 16 would be nice. I would probably ride it more often if it came every 15 minutes during daytime, including Saturdays and Sundays. I would like wider stop spacing and more frequency on the 26, but I recognize that the bus is a low-enough performer that it's not a high priority. The proposed all-day 26X that would've happened if the cuts had been implemented would've been somewhat of an improvement except for the lack of service after 7 PM or on weekends. it would be great if the 26X were beefed up and 26 local service maintained as-is.	11/6/2014 4:34 PM
1693	need a family deal for weekends. \$8.25 each way for the family is ridiculous.	11/6/2014 4:34 PM
1694	Certainly major north/south and east/west connections	11/6/2014 4:34 PM
1695	For my travel , it is evenings and weekends that are the problems. I also know that is very hard to cover. So I drive ... but not very much.	11/6/2014 4:32 PM
1696	None for my needs.	11/6/2014 4:29 PM
1697	I don't know	11/6/2014 4:27 PM
1698	University hospital needs more night and weekend service	11/6/2014 4:25 PM
1699	Sand Point Way to the Montlake Bridge.	11/6/2014 4:25 PM
1700	There is still a lot of night life on Capitol Hill that would be great to have some late night service via light rail once that's opened. For now, we need to drive and spend time finding parking on neighborhood streets and walk 10 blocks or more.	11/6/2014 4:23 PM
1701	More late night service between 12AM and 2AM on both #12 and #43	11/6/2014 4:23 PM
1702	I commute during the day and don't have needs for bus service otherwise except sometimes on weekends to get from Bryant area to the Seattle Center. I take the bus there because the traffic is bad near Seattle Center and parking is scarce and expensive.	11/6/2014 4:22 PM
1703	Not a priority, but I prefer taking public transit to the airport, but cannot do so for a 7 am flight. I do not take the train from the airport the evening as I do not feel that is safe. Round Trip on Shuttle Express is \$70 with tip; on the bus/train \$10.50 or \$3.00 with senior reduced fare. I miss the old direct bus to SeaTac from downtown. I do feel comfortable transferring buses at Campus Park Way late at night when school is in session.	11/6/2014 4:21 PM
1704	The 68 NEEDS to run for at least an hour later in the evenings, especially during term time with so many students crowding on the buses to go home. 6pm is way too early to stop service, especially considering the number of medical personnel who use it every day to get home. Not everyone on the UW campus work a traditional 9-5.	11/6/2014 4:20 PM
1705	Mercer Street could use more (and later) service in the evenings. I usually get a ride back home from events at the ballet, opera, or theatre, but otherwise, I might have to wait for 20 minutes for a bus, and if I'm at something that ends particularly late, I may have to do something counter-intuitive, like take a bus downtown in order to grab a bus back to my house.	11/6/2014 4:19 PM
1706	Lynnwood to UW. Shoreline to UW	11/6/2014 4:19 PM
1707	The reduction of the No. 30 bus has left my neighborhood with less than adequate service to Seattle Center, University District and NOAA (Magnuson Park area) during the week at non-rush hour times and on weekends.	11/6/2014 4:18 PM
1708	Buses every ten minutes during rush hours; every fifteen in nonrush hours	11/6/2014 4:18 PM
1709	It would be great to get routes from downtown to SeaTac airport early in the morning.	11/6/2014 4:18 PM
1710	Everywhere the light rail goes. It should run more often in the early mornings, and begin earlier--same for running later in the evenings and more often.	11/6/2014 4:17 PM
1711	University District to Loyal height late at night	11/6/2014 4:15 PM
1712	From NE 92nd and Ravenna Avenue or NE 95th and Lake City Way to the new Link Light Rail station at Husky Stadium.	11/6/2014 4:14 PM
1713	Capitol Hill	11/6/2014 4:14 PM
1714	Just ONE more bus that goes to Duvall a little later would be super.	11/6/2014 4:13 PM
1715	VA Tacoma to VA Seattle would help me. Mall to mall, college to college might also be good.	11/6/2014 4:13 PM

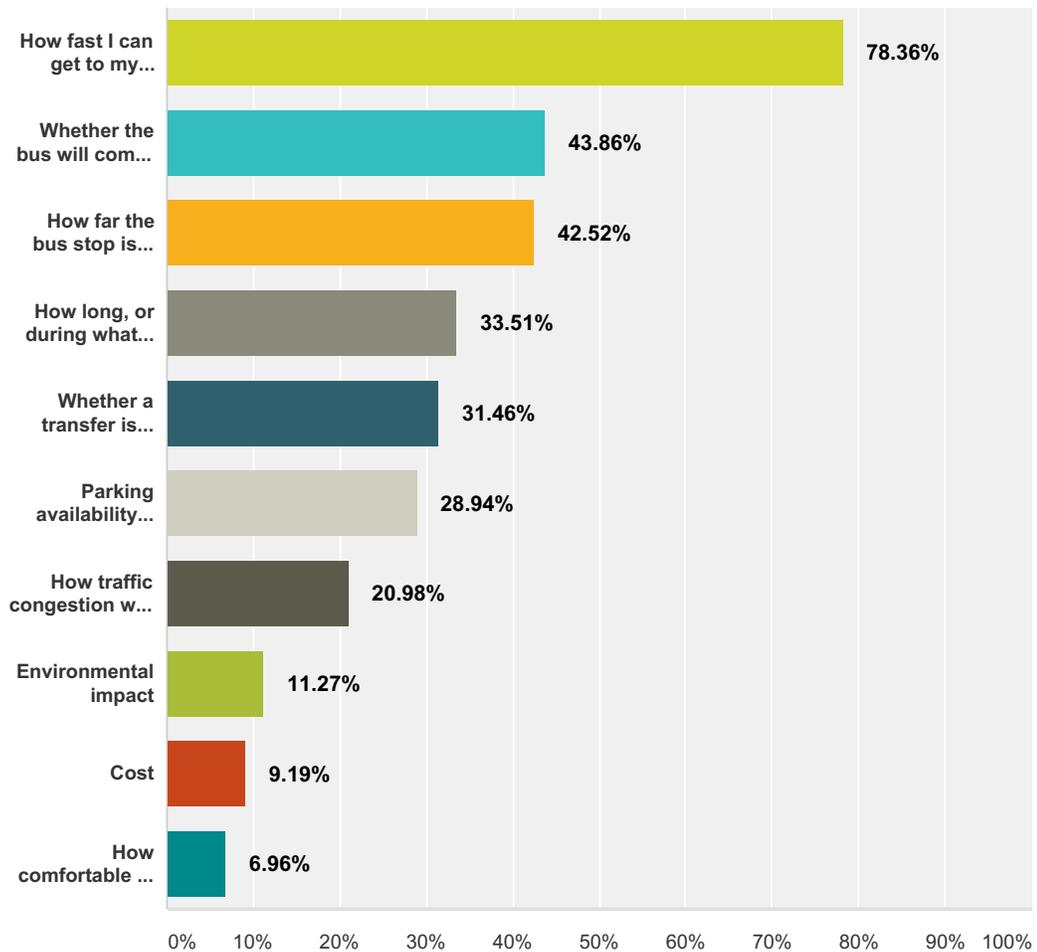

1716	Please bring back night service to Magnolia	11/6/2014 4:13 PM
1717	more buses after sporting events. Love taking transit there but coming home is such a drag. I know that alone keeps people from taking transit to games.	11/6/2014 4:13 PM
1718	MUCH MUCH improved service from popular nightspots (Capitol Hill, Belltown,etc) with enhance security both ON the busses and at the stops! Additional busses after sporting events -SEAHAWK homes games are NOTORIOUS for multiple busses (personally observed 7!!) Sound Transit 512 busses at capacity bypassing ALL stops after inital stadium stop. EITHER start a special route at Westlake north to Everett or limit boarding at Stadium stops to allow a few riders to board at later stops. park and Ride lots are at capacity by 6 am (s.Everett Freeway Park and Ride in particular) on weekdays. There are no options other than driving 6+ miles in either direction to another P&R to park which defeats the whole purpose of taking public transit.	11/6/2014 4:11 PM
1719	From the north to University Village would be nice. I can't really get there via the bus now	11/6/2014 4:11 PM
1720	All of the restaurant and bar districts to prevent drunk driving. Eg Cap Hill, Wallingford, Fremont, Ballard.	11/6/2014 4:11 PM
1721	Few options available to the U District from the eastside.	11/6/2014 4:11 PM
1722	Harborview Medical Center SeaTac Airport - not early enough to make early morning flights Downtown - not frequent enough/early enough	11/6/2014 4:10 PM
1723	Not sure	11/6/2014 4:09 PM
1724	Sure - to the airport for one.	11/6/2014 4:08 PM
1725	Express bus services to NE Seattle from Seattle should run much later into the evening or at least until 7:30 pm.	11/6/2014 4:07 PM
1726	Ballard evenings; Northgate evenings	11/6/2014 4:07 PM
1727	All major corridors (Aurora, Greenwood, Northgate, Lake City, Bothell, to name a few) need service north of 85th St at all hours. The same can be said of areas in the south and southwest areas of the city and county, although some service has begun to address that issue in the last five years or so.	11/6/2014 4:06 PM
1728	I don't travel as much at those times.	11/6/2014 4:05 PM
1729	Weekends and late night: Capitol Hill, Fremont, U-District.	11/6/2014 4:04 PM
1730	I would focus on areas where safety can be improved by offering later/earlier service. For ex. places where people might be intoxicated and shouldn't be driving. But more importantly, places where people wouldn't feel safe walking or waiting long for a bus.	11/6/2014 4:04 PM
1731	Lower Queen Anne to Capitol Hill is poorly served late on weekends.	11/6/2014 4:01 PM
1732	I don't know.	11/6/2014 4:00 PM
1733	Even though I don't use them, I would like Night Owl service to be useful should I happen to need it.	11/6/2014 3:59 PM
1734	Issaquah to and from Downtown Seattle on the 214 express route	11/6/2014 3:58 PM
1735	Would love better/more direct transportation from Burien to University of Washington.	11/6/2014 3:57 PM
1736	The #27 seems to be the only route that services the Leschi neighborhood and since it only runs during prime commuting hours now it makes it difficult to go downtown, etc. on a weekend or outside of normal commuting hours.	11/6/2014 3:57 PM
1737	The Eastlake corridor needs more service during rush hour, especially in the evening.	11/6/2014 3:55 PM
1738	49	11/6/2014 3:55 PM
1739	I405 Renton through Bellevue	11/6/2014 3:55 PM
1740	UDistrict - Chinatown	11/6/2014 3:55 PM
1741	Covington or upper Kent to the u district. Mostly though once the light rail to the u district is complete that will cut my commute in half.	11/6/2014 3:54 PM
1742	Train should run from the airport later - super stressful to not know if you will catch the last train with flights coming in so late. More buses to far-flung regions of the Eastside.	11/6/2014 3:54 PM
1743	Bellevue Ave/Summit Ave	11/6/2014 3:54 PM
1744	South Capitol Hill to Northgate	11/6/2014 3:54 PM

1745	Northgate transit center to Metro bus 271 with a good transfer location would be excellent.	11/6/2014 3:53 PM
1746	need a connection from North Seattle to the airport that runs all hours	11/6/2014 3:52 PM
1747	Seattle to Redmond! The routes end around 11 which is not at all late enough, especially on the weekends when people might like to go out bar hopping or clubbing in Seattle.	11/6/2014 3:52 PM
1748	For the routes I use, there is service but it is very reduced on weekends	11/6/2014 3:51 PM
1749	Wedgewood; Eastlake; Northgate-especially going through Maple Leaf.	11/6/2014 3:51 PM
1750	I don't know as am lucky enough to live in Capitol Hill.	11/6/2014 3:51 PM
1751	1. Better weekend service is needed along Sand Point Way NE 2. There should be a new line running east/west along NE 65th St all the way to Sand Point Way. I've seen many, many empty buses driving that route in "Terminal" status. Why can't they be turned into passenger-service providing buses?	11/6/2014 3:50 PM
1752	More frequent buses on the weekends to and from downtown.	11/6/2014 3:50 PM
1753	There is lousy direct service to south seattle from anywhere north of downtown, anytime of day.	11/6/2014 3:49 PM
1754	none	11/6/2014 3:48 PM
1755	Yes! How can we all get to Magnuson Park on the weekends!!!!	11/6/2014 3:48 PM
1756	LINK should run until 3am on Friday and Saturday nights. Dexter Ave - more/reliable service	11/6/2014 3:48 PM
1757	Everywhere especially popular neighborhoods like south lake union, Fremont, ballard, and Capitol Hill.	11/6/2014 3:48 PM
1758	Queen Anne to UW	11/6/2014 3:45 PM
1759	Denny Way - the 8	11/6/2014 3:45 PM
1760	not sure	11/6/2014 3:45 PM
1761	Airort to DT tunnel late at night	11/6/2014 3:45 PM
1762	Yes. Need more east - west service on the weekends in north seattle. A bus from magnuson park to greenlake and then on to ballard. Would be great!	11/6/2014 3:44 PM
1763	I think the NE 45th/N 45th/Market Corridor in North Seattle should have 24 hour service, as should the 49 and the 71/72/73 between the U District and Capitol Hill and Downtown.	11/6/2014 3:44 PM
1764	bus 16 needs more service and to use double long buses.	11/6/2014 3:44 PM
1765	One of the main reasons I avoid evening and nighttime activities is because I have to rely on the bus service and it's not convenient and makes me feel unsafe. Standing on a dark street corner, often in the rain, waiting for a bus that may or may not come can be nerve wracking. This seems to be true for all routes and corridors.	11/6/2014 3:43 PM
1766	It is difficult to get to the east side from Seattle on the weekends	11/6/2014 3:43 PM
1767	RAINIER VALLEY TO CAPITOL HILL	11/6/2014 3:43 PM
1768	As long as buses don't get cut so far I think the timing is good.	11/6/2014 3:42 PM
1769	Return commuter hour service to the former #47 service to Capitol Hill.	11/6/2014 3:42 PM
1770	Anything going Southbound into Seattle needs better public transit options. I-5 is a disaster on weekends and during commute times as the express lanes do not go that way. Link would change that drastically.	11/6/2014 3:42 PM
1771	Not for my needs.	11/6/2014 3:42 PM
1772	The near total lack of service after 10pm is unacceptable for a city that has businesses open after 8pm.	11/6/2014 3:41 PM
1773	FIRST HILL IS A GHOST TOWN FOR BUSES AFTER 8 AND ON WEEKENDS!! HEALTHCARE WORKERS AND PATIENTS NEED SAFE, RELIABLE, PLENTIFUL TRANSIT OPTIONS!!	11/6/2014 3:41 PM
1774	The airport. If I have a 6am flight, I have absolutely no choice but to take an Uber.	11/6/2014 3:41 PM
1775	Connections out of UW/Campus Parkway--mostly to the north.	11/6/2014 3:40 PM
1776	no, the schedule is fine. It just takes too long to get anywhere.	11/6/2014 3:40 PM

1777	More and better service cross town in Capital hill and First hill.	11/6/2014 3:40 PM
1778	Downtown	11/6/2014 3:40 PM
1779	Capitol Hill needs the 8 to continue to run past 12:30AM, as there is a lot of nightlife and many of the people that are participating in the night life live in Queen Anne.	11/6/2014 3:40 PM
1780	Not that would affect me.	11/6/2014 3:39 PM
1781	Farmers markets and parks need service on the weekends. It is hard to get from NE to West Seattle.	11/6/2014 3:39 PM
1782	Don't know	11/6/2014 3:39 PM
1783	I would like late-at-night options for busses to/from Redmond and Bellevue on Friday/Saturday nights to allow me to get home from parties.	11/6/2014 3:39 PM
1784	Route 36	11/6/2014 3:38 PM
1785	Probably all of them.	11/6/2014 3:37 PM
1786	Add an additional 72 and 73 on Sundays so they are not once an hour.	11/6/2014 3:37 PM
1787	Again, Seattle Center to UW/NE Seattle was great before the cut-backs.	11/6/2014 3:37 PM
1788	route 44 rush hours routes 71 72 73 rush hours (though will be interested to see how light rail changes that)	11/6/2014 3:37 PM
1789	First Hill/Capitol Hill to Columbia City/Rainier Beach	11/6/2014 3:36 PM
1790	It would be fantastic if there was a late service in the Belltown area - trips at say 1, 2, 3 AM - to let people take the bus instead of driving drunk or paying \$50 for a taxi ride.	11/6/2014 3:36 PM
1791	Look at where local WIC offices are Don't mess up the discounted pass for disabled and low income by letting some rich ass say it costs too much.	11/6/2014 3:35 PM
1792	From down town to outlying neighborhoods after 12am.	11/6/2014 3:35 PM
1793	Northgate could use a route past 8pm on a weekday that gets users to the Aurora Transit Center. Past about 7:45pm the routes drop to once an hour and may not always take you the entire distance.	11/6/2014 3:34 PM
1794	?	11/6/2014 3:34 PM
1795	Seattle Pacific University area	11/6/2014 3:34 PM
1796	I wish there was a bus that went from Ballard to Capital Hill via Fremont.	11/6/2014 3:34 PM
1797	University of Washington	11/6/2014 3:32 PM
1798	From north Capitol hill to Harborview medical center	11/6/2014 3:32 PM
1799	West Seattle needs better service late night. I would also like to see late night service between Downtown and Ballard/Fremont Frequently and capitol hill/U-District.	11/6/2014 3:26 PM
1800	Between U-District and downtown. Between Capitol Hill and downtown. Connecting the Central District, First Hill, and Capitol Hill with cross-lake transit without having to go downtown. Connecting from anywhere to Link early in the morning and late at night; Link is running but nothing else really is.	11/6/2014 3:09 PM
1801	Yes. Along 25th NE and NE 55th. Service on 35th NE is good but not easy to get to. I realize Metro has to make tradeoffs. maybe this is an opportunity to address a lot of deficiencies and not just what I see.	11/6/2014 10:49 AM

Q8 What is most important to you when deciding whether to take the bus? (choose up to 3)

Answered: 3,808 Skipped: 279

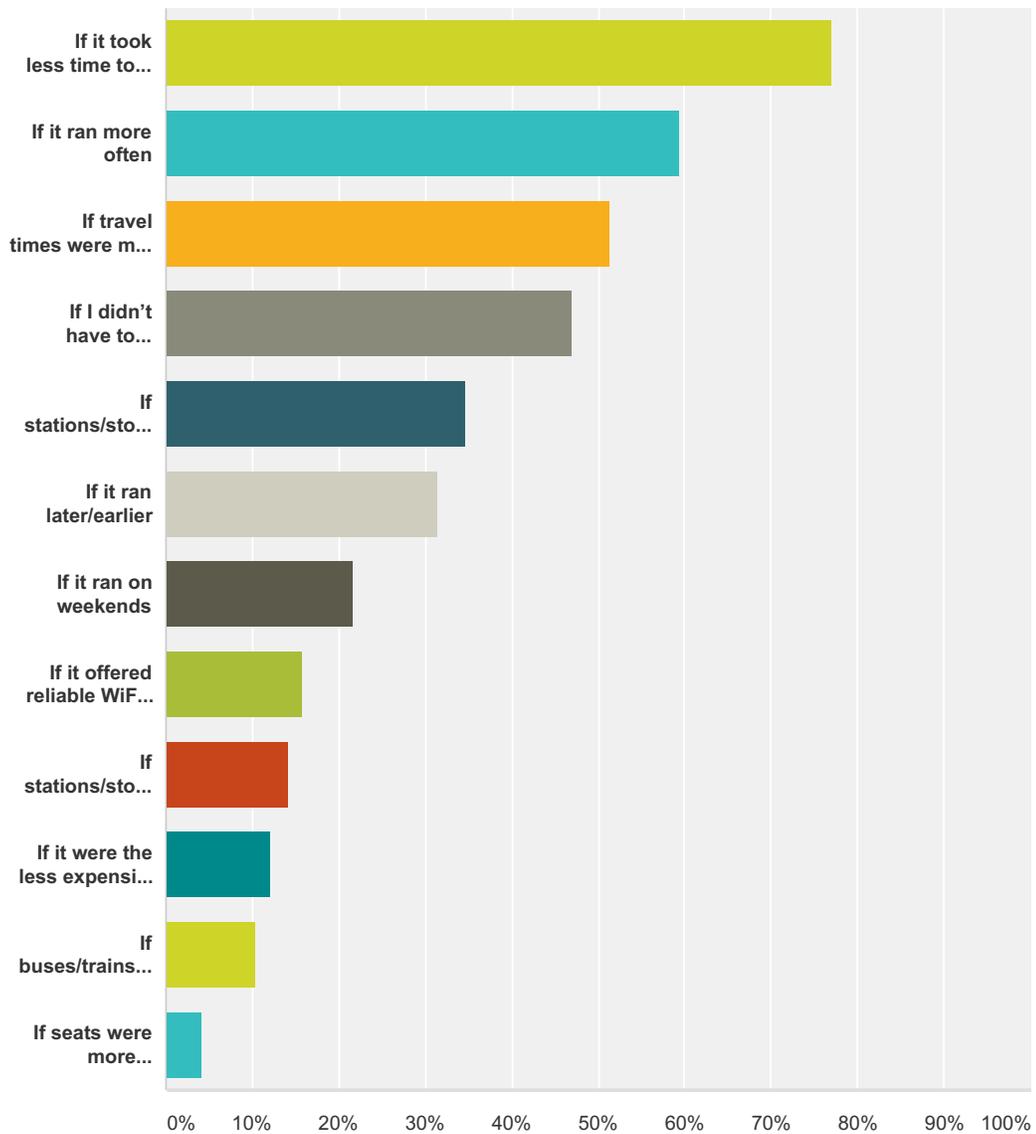

Answer Choices	Responses
How fast I can get to my destination	78.36% 2,984
Whether the bus will come on time	43.86% 1,670
How far the bus stop is from my home/destination	42.52% 1,619
How long, or during what parts of the day, service is offered	33.51% 1,276
Whether a transfer is required	31.46% 1,198
Parking availability/cost if I drive	28.94% 1,102
How traffic congestion will affect travel time	20.98% 799
Environmental impact	11.27% 429
Cost	9.19% 350

How comfortable the trip is	6.96%	265
Total Respondents: 3,808		

Q9 What would cause you to ride transit more? (choose your top 5)

Answered: 3,739 Skipped: 348

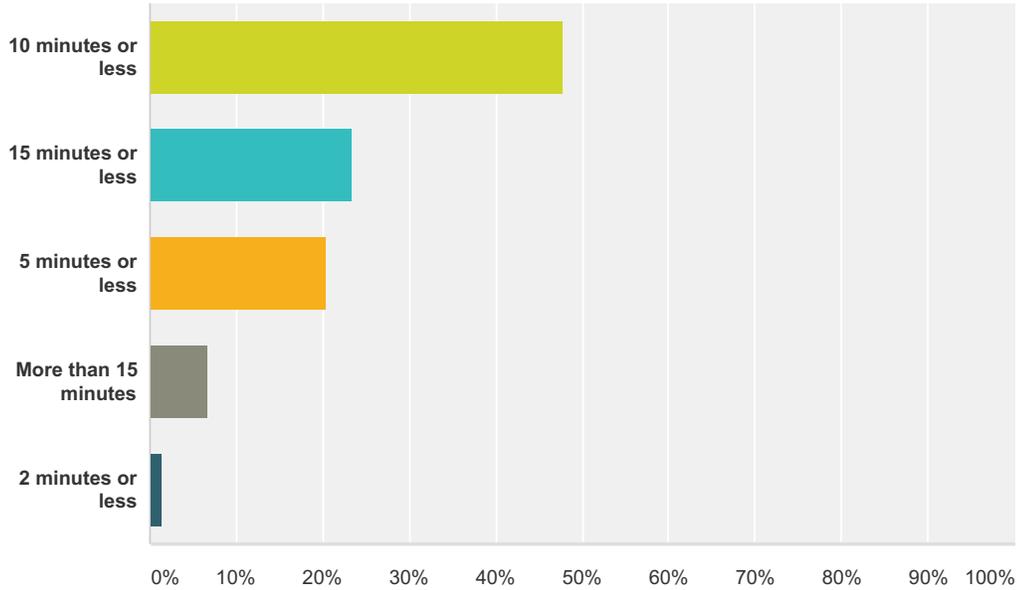

Answer Choices	Responses
If it took less time to get to my destination	77.05% 2,881
If it ran more often	59.43% 2,222
If travel times were more reliable	51.46% 1,924
If I didn't have to transfer	47.02% 1,758
If stations/stops were closer to my home/work/school	34.66% 1,296
If it ran later/earlier	31.59% 1,181

If it ran on weekends	21.66%	810
If it offered reliable WiFi access	15.78%	590
If stations/stops were safer	14.23%	532
If it were the less expensive transportation option	12.01%	449
If buses/trains were cleaner/nicer	10.38%	388
If seats were more comfortable	4.17%	156
Total Respondents: 3,739		

Q10 How many minutes would you be willing to spend getting to transit (walking, biking, or some other mode) that offered very frequent transit service (i.e., service that comes every 10 minutes or less)?

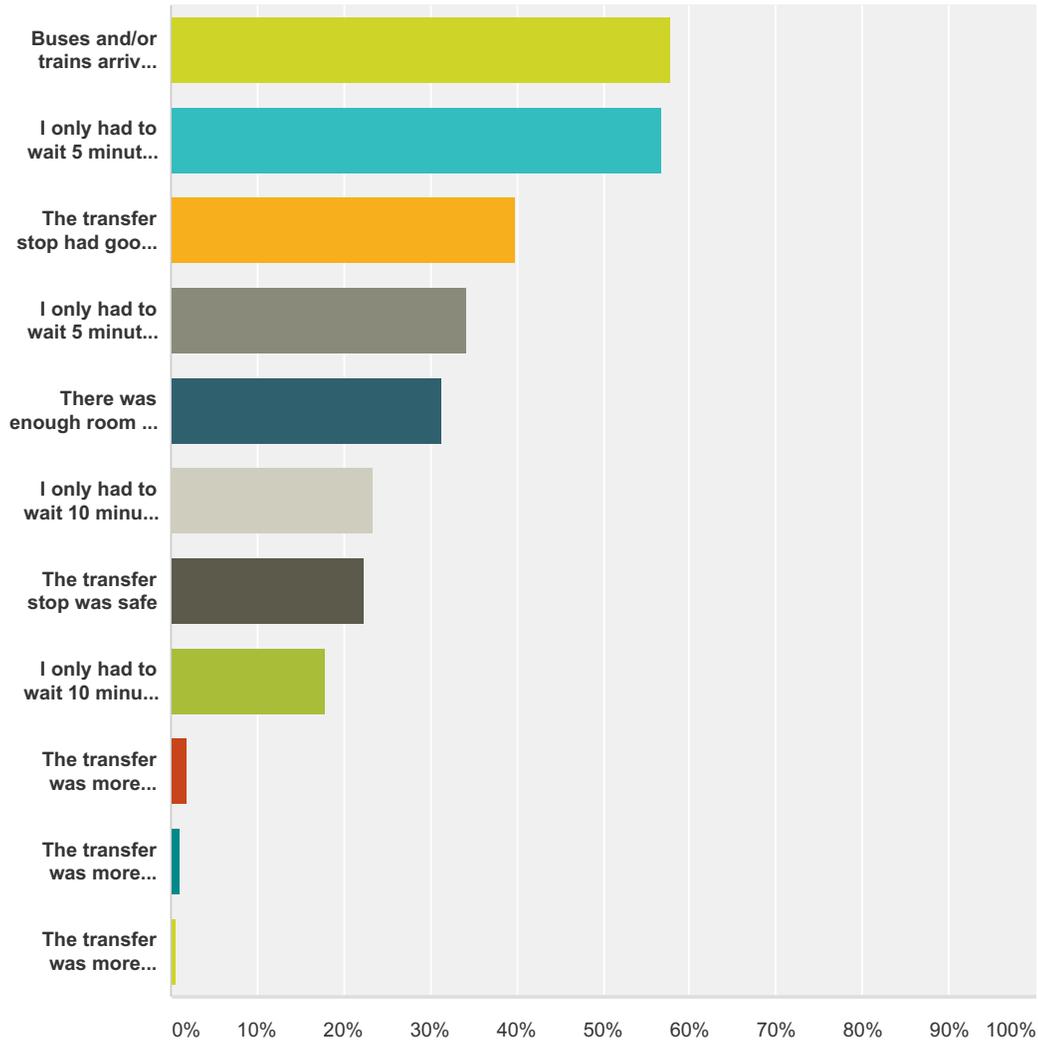

Answered: 3,783 Skipped: 304

Answer Choices	Responses	Count
10 minutes or less	47.90%	1,812
15 minutes or less	23.37%	884
5 minutes or less	20.46%	774
More than 15 minutes	6.77%	256
2 minutes or less	1.51%	57
Total		3,783

Q11 A more-efficient network of service that connects more people to more places may require more transfers. What would make transfers more acceptable to you? I would be willing to transfer if (choose up to 3):

Answered: 3,736 Skipped: 351

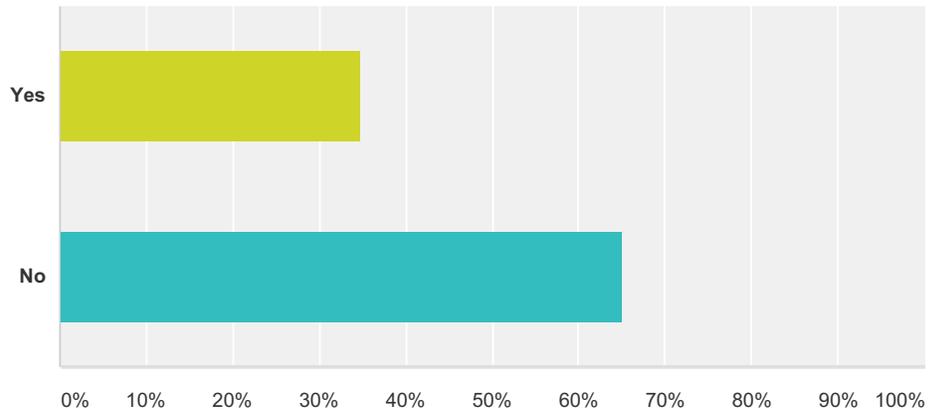

Answer Choices	Responses
Buses and/or trains arrived on time	57.90% 2,163
I only had to wait 5 minutes or less for my next bus or train	56.72% 2,119
The transfer stop had good shelter from the weather	39.78% 1,486
I only had to wait 5 minutes or less for my first bus or train	34.34% 1,283
There was enough room on buses/trains	31.32% 1,170
I only had to wait 10 minutes or less for my next bus or train	23.42% 875

The transfer stop was safe	22.38%	836
I only had to wait 10 minutes or less for my first bus or train	17.91%	669
The transfer was more accessible for people with limited mobility	1.87%	70
The transfer was more accessible for people who are visually or hearing impaired	1.02%	38
The transfer was more accessible for wheelchair users	0.72%	27
Total Respondents: 3,736		

Q12 I would like to receive updates by email.

Answered: 3,639 Skipped: 448

Answer Choices	Responses	
Yes	34.90%	1,270
No	65.10%	2,369
Total		3,639

Q17 The notice, advertisement, and/or invitation to learn more and share your thoughts about Metro's Link Connections project was clear and welcoming.

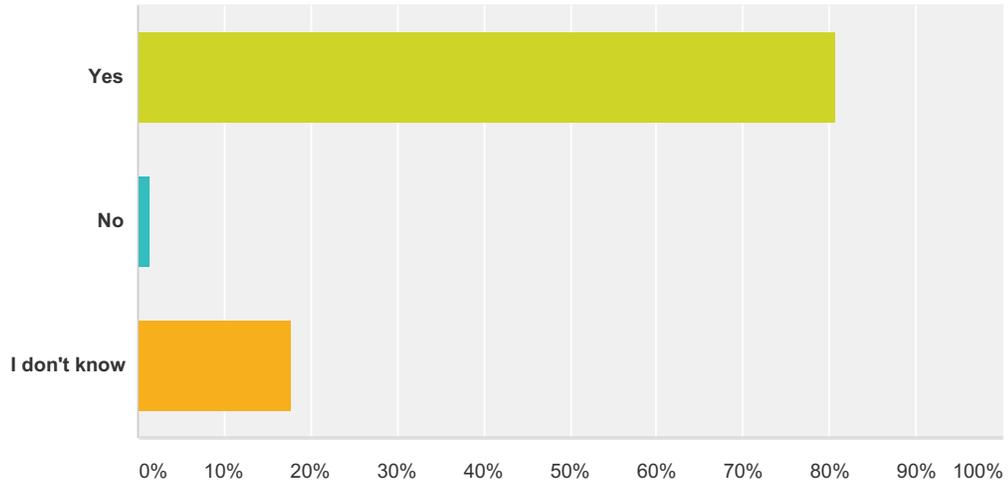

Answered: 3,628 Skipped: 459

Answer Choices	Responses	Count
Strongly agree	54.02%	1,960
Somewhat agree	34.23%	1,242
Somewhat disagree	1.98%	72
Strongly disagree	0.55%	20
No opinion	9.21%	334
Total		3,628

Q18 From the time you were notified, were you given enough time to provide meaningful feedback in this phase of Metro's Link Connections planning process?

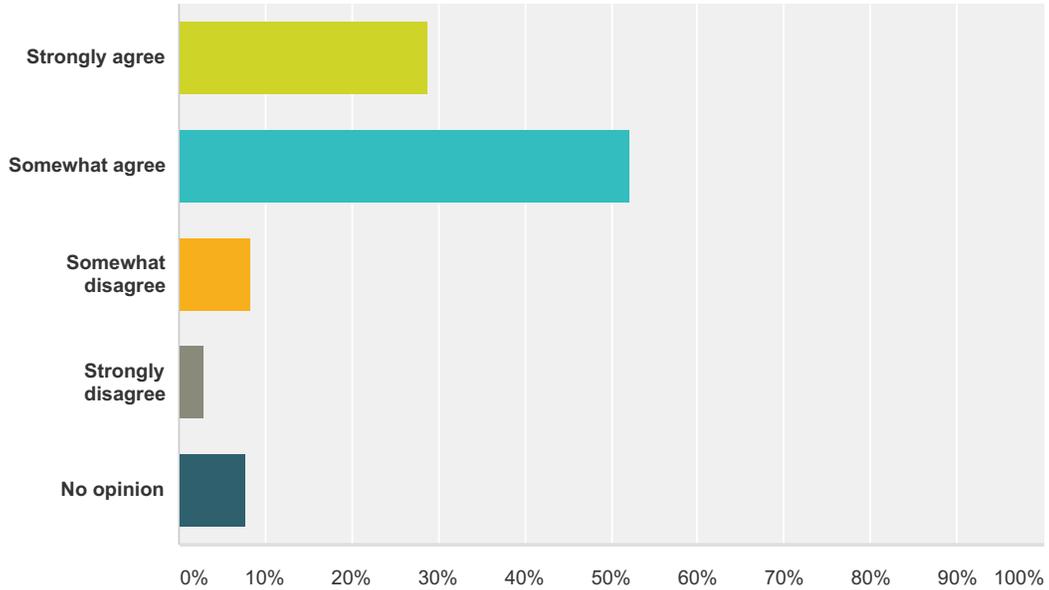

Answered: 3,609 Skipped: 478

Answer Choices	Responses
Yes	80.77% 2,915
No	1.47% 53
I don't know	17.76% 641
Total	3,609

Q19 I believe that taking the time to share my views will result in better decisions being made about service changes once Link service is extended to the UW.

Answered: 3,641 Skipped: 446

Answer Choices	Responses	Count
Strongly agree	28.81%	1,049
Somewhat agree	52.13%	1,898

#	Responses	Date
1	After Link will be open i would like to have my shuttle going to link stop from hospital.	12/4/2014 2:30 PM
2	Please make real changes.	12/4/2014 2:18 PM
3	Thanks! Emphasize non-motorized improvements to transit. If I can bike to a high-frequency stop/station, I'd come from farther away/the catchment area would be larger.	12/3/2014 10:36 AM
4	Transfers are a tough sell. Shelter and seating would help, but stuck means commute is much slower than car.	12/3/2014 9:58 AM
5	Thank you!	12/3/2014 9:14 AM
6	I might be interested in volunteering on a community input panel. I have been moving and saw a notice about how you wanted volunteers, but the deadline was Nov. 30, and the date slipped by me. If you extend that time, I'd be interested.	12/2/2014 8:42 PM
7	It wasn't till I got the easy to click on link from VictoryHeights.com that I filled out survey, despite seeing the posters at bus stops.	12/2/2014 5:29 PM
8	Thank you for reaching out and getting feedback. I think you provide a very important service in our city!	12/2/2014 3:04 PM
9	n/a	12/2/2014 11:16 AM
10	I am excited that Seattle is finally having more Lighrail service. There is more to come to make it more green and more friendly to public transit commuters, but we will get there eventually. I hope the city has a way to dedicate bus lanes during rush hours to ensure more on time services.	12/2/2014 10:51 AM
11	Thanks for asking for feedback before making decisions.	12/2/2014 10:00 AM
12	I am quite concerned about the connectivity to the light rail. So far there appears to be a massive disconnect on the ability of people to get to light rail unless they happen to be half a mile away from a stop. I have friends who live in beacon hill say that the light rail is great, but too hard to get to. Currently, I don't see the new Husky Stadium or Capital Hill stops as useful to me. The Husky stadium stop is too far away from the rest of the U district to be very useful. I live about 3 miles north of the University. I am quite concerned that the changes to buses will make the buses that currently work (E.g. 66, 67, 73, 77) too inconvenient that they become practically useless. I am also concerned about crime while waiting in the evenings.	12/2/2014 10:00 AM
13	Unless King County EMPLOYEES are held accountable - I see this as a waste of time.	12/2/2014 9:50 AM
14	Regular, freindly solicitation of comment with an air of actual, imminent attention about it, is a good idea...that should be continued...	12/2/2014 7:32 AM
15	Thanks for the opportunity to give my thoughts!	12/2/2014 7:27 AM
16	Thank you and best wishes!	12/2/2014 6:56 AM
17	When is the Seattle Streetcar going to be extended to connect the Eastlake neighborhood with Westlake. Currently it north terminus is in the middle of nowhere.	12/2/2014 6:46 AM
18	N/A	12/2/2014 6:10 AM
19	I hope the bus number 9 run more often because every morning, I have to stand up the whole time while I on the bus.Thanks	12/1/2014 10:49 PM

20	Having lived in the Eastlake Corridor for many years, it often feels like we're 2nd class citizens to our larger neighbors Capital Hill and the University District. It is so disheartening to be standing at a bus stop and see an "express" bus go by with seats that does not make a single stop in the neighborhood. I am very concerned that service to the neighborhood will be further eroded when Link serves Capital Hill and the University District, but does not come close to Eastlake. Access in the neighborhood is further challenged by the steepness of some of the streets. While I can walk uphill now, downhill is still quite difficult. That means in order to take the bus home I need to get off about a half mile earlier so I can avoid steep streets. If stops are removed, I hope that stops that allow flatter (or less steep) access to communities like those on Fairview Ave E are not eliminated.	12/1/2014 8:26 PM
21	It will be important to accommodate bicyclists by allowing bicycles on the light rail and providing safe and protected parking at the new light rail stations.	12/1/2014 5:49 PM
22	The US has traditionally lagged behind most of the rest of the first world in public transit. If the light rail system expands and creates a reliable fast method of getting from north to south and vice versa, and the buses run reliably to various stops on the light rail system, we will have made a drastic improvement to the current state. After that, the next step needs to be connecting the east side and West Seattle into the equation with frequent service into the downtown, and northern and southern Seattle. Once this is established, we will have moved into a position of having comparable public transit systems as much of the rest of the developed non-US world. We are not there yet, but this is a start, and a good one.	12/1/2014 5:35 PM
23	In the last year I've been to New York and London and it is so obvious that we need to have a more expansive train system. Going north to south is difficult (either on the I-5 side or the 99 side) and going east to west is nearly impossible. Seattle is not a good city for driving, the weather does not facilitate biking, and our limited public transit options are scattered and under several different administrations/authorities. Seattle and it's outlying areas are continuing to grow in population. Let's build it and pay for it later. Debt is bad, but infrastructure is an investment that's worth it. The USSR's economy collapsed, but they still have a killer train system in Moscow.	12/1/2014 5:11 PM
24	My closest bus stop is Eastlake and Lynn. Except for Sunday, the 71,72,73,74 express buses go right by this stop. NONE OF THEM STOP AT EASTLAKE AND LYNN!!!!!!!!!!!!!!	12/1/2014 4:48 PM
25	The general consensus in most community meetings is that Metro always asks for input and then directly throws it out the window. I do not believe this to be the case, but there really needs to be better communication that indicates Metro's understanding of the concerns of users and why those concerns could not be satisfied. The recent example in memory is the cancelling routes or reducing frequencies. People obviously objected to that, and the response everyone echoed from Metro was "tough luck, we don't have money to do this." I believe that message should be framed much more clearly to ensure people understand that Metro cares and wants to achieve what taxpayers want, it is just not feasible at the time. Then record those requests and the next budget year mention to users that "we have these requests from the past we couldn't fulfill - are they still relevant and what can we do to address them."	12/1/2014 4:40 PM
26	Please keep seeking community feedback!	12/1/2014 3:58 PM
27	Thank you for soliciting feedback. I look forward to riding the new light rail extensions, and to continuing to use Seattle's transit system generally.	12/1/2014 3:47 PM
28	OUR SHIFTS SHOULD BE CUT TO 6HRS/DAY. GETTING THE SAME BIWEEKLY CHECK AMOUNT. THIS OPENS UP THE IDEA OF HIRING MORE PEOPLE, SPENDING MORE TIME WITH OUR KIDS AT HOME, LESS STRESS, HAPPIER WORKERS, HAPPIER CLIENTALE. WE HUMANS WERENT MEANT TO DO THIS MANUFACTURED 9-5 THING. THE MAJORITY OF US ARE STUCK DOING SOMETHING WE DONT WANNA DO, JUST SO WE DONT STARVE. WE'VE COME ACCUSTOMED TO WEALTH, WITH THAT, WE'VE COME ACCUSTOMED TO MISERY...	12/1/2014 3:41 PM
29	Thank you for having an online participation. With my position in Rt. 183's route, and with the length of my daily commute, getting to / from physical meetings is impossible.	12/1/2014 3:39 PM
30	As we get a lot of liquid sunshine in Seattle, can more shelters have some kind of a roof?	12/1/2014 3:32 PM
31	I didn't understand how the first questions on the survey were at all relevant or useful. Have I ever walked? Really? The latter questions seemed more useful. I hope this survey provides meaningful feedback.	12/1/2014 3:31 PM
32	It's nice to have lightrail in Capitol Hill but having the end point be at the Husky Stadium isn't terribly useful to me if I have to connect to an infrequent bus to Laurelhurst... or a crowded bus to the AVE and I don't see my shuttle / bus commute changing for the better.	12/1/2014 3:28 PM
33	I hope this helps.	12/1/2014 3:28 PM
34	Thank you for your inclusive campaign. I hope there is parking at the U District station.	12/1/2014 3:25 PM

35	i am hesitant to ride the bus due to the fact that they are dirty and the commute times are inefficient. On my commute I continuously see metro buses ignoring the traffic lights, which results in the bus blocking the entire intersection for all lanes and compounding the traffic issue. Don't believe me? Send a rep to do an audit at the intersection of 45th and 15th around 4-6pm by the Burke Meuseum in the U-District. The bus drivers could care less about extending out into the intersection and dangling the bus and its occupants into the way of potential oncoming traffic. Just so they dont have to wait through one more cycle of the lights.	12/1/2014 3:23 PM
36	Thanks for your hard work! Efficient, reliable public transportation is so important to facilitate Seattle's growth and to keep people out of their cars. Looking forward to the positive changes.	12/1/2014 3:17 PM
37	I have lived in cities that I took public transportation and in places that I did not. Seattle has an opportunity because of it's geography but it has to use it wisely.	12/1/2014 3:13 PM
38	This survey is directly related to my situation, since there will be light rail at Husky Stadium, and I use the 75 to get to the University and U District. However, the 75 currently does not stop at the location of the new Husky Stadium light rail station. It would be nice if the 75 stopped closer to the new station instead of making people walk from campus down to Husky stadium, especially when going to the airport (will be carrying luggage). thanks	12/1/2014 3:13 PM
39	Your questions regarding transfers did not really address one of the main issues that they be seamless. Ensure that the rider exits the bus and can enter the next one at the same spot in most cases so that there is no watching a connecting bus leave without the rider while attempting to cross streets ect to access the connecting route. Also it is not necessarily more efficient to unload an entire bus where most passengers will transfer onto another bus. This makes it so that two buses have to take the time to load and unload all those workers, wheelchairs, slightly disabled, strollers and shoppers, when only once would have saved time to the entire system. Also shorter routes tend to be less productive with a greater share of time used for turning around. Make sure all routes will be productive when planning changes. Your questions did not always allow for the expression of all needs and were limiting.	12/1/2014 12:30 AM
40	Way too many open ended question to analyze this survey with any kind of predicatbility... Good luck!	11/28/2014 1:20 PM
41	I think, if one could reach the public in such a way to tell them how efficient their commute could be if we had a good mass transit system, then people would be more likely to support measures for mass transit. If there were a online tool where people could measure cost savings and time IF we had, for instance, light rail from Lynnwood, what that would look like. I think, because I have spent some time in Europe, I have good understanding of just how great a good mass transit system is, however for those with no experience with a working system, they dont know how it can impact your ife in such a positive way.	11/28/2014 12:25 PM
42	Something has to be done about the trouble makers on public transit and lingering around bus stops and train stations. There should be an easy way to call for immediate help. These people should be barred from using public transit.	11/26/2014 11:21 PM
43	Do drivers really urinate in their seats on a regular basis?	11/26/2014 1:30 PM
44	I thought that the strategy of putting up notices on bus stops was effective, however, I found it difficult to read the notice since it was positioned pretty high on the bus stop stand. Furthermore, I had been unable to take down any information when I saw the notice and, when I tried to find more information online later, I could not find anything on the Metro website or on Google using common search terms. It was only by searching the Seattle Transit Blog that I was able to find a link to this survey. I think it would be beneficial to have the link to the issue placed more clearly on the Metro website or to update the search terms so that broader terms might be recognized.	11/26/2014 1:01 PM
45	Best of luck with the project - can't wait to get the Northgate and Roosevelt station up and running.	11/26/2014 12:56 PM
46	I tried to get help regarding a bus stop problem, but was never responded to. mattzilla118@gmail.com	11/26/2014 12:51 PM
47	I am deeply concerned that the Sound Transit 586 route will be discontinued or altered once there is train service to the UW. The 586 is not just for students. Most of the riders I see are workers going to the UW, UW Medical Center, Children's Hospital and NOAA. Currently the bus runs fairly frequently and the first bus in the AM has standing room only. It drops riders off along 45th and 15th allowing workers to get to various job locations or connect to other buses. The train will serve only one location. I think the 586 should be continued as is once train service starts to see if ridership significantly drops or not. Do not assume everyone riding the 586 from Tacoma, providing direct express service to the UW, wants to pay more to take the train with several stops on the way to Seattle, than transfer to the light rail and end up at Husky Stadium and have to walk to work at various UW locations or transfer again to a Metro bus to get to work. You do not serve multiple needs just because you build a train route.	11/26/2014 11:21 AM

48	If you want people to use the Light Rail stop in the University District, better bus service to that area is a must. Otherwise it will be useless. Right now I would need to take 2-3 buses to get to Husky Stadium, it would never be worth the time or effort to use it. Please add a North Stop so I don't have to take so many busses!	11/26/2014 10:42 AM
49	I'm not sure why the gate for the walkway around the construction site at the 43rd location is locked during certain hours, but it is a big reason I have stopped taking the bus in the morning. If I get off the bus on the Ave, I cannot get to roosevelt without walking around. It would also be pretty great if any of the express busses from the Westlake Station to UW could stop on Roosevelt.	11/26/2014 7:26 AM
50	I like the fact that Metro's Link Connections is taking their time and really wanting to hear back from the riders how they can improve things.	11/26/2014 6:20 AM
51	Hire someone from the sustainable transportation masters program	11/26/2014 12:22 AM
52	Please don't cut down the bus service frequency.	11/25/2014 6:42 PM
53	I'm excited to use the new Link extension but likely won't use it until it reaches the second UW stop as Husky Stadium is a long walk from where I live. I'd rather continue to use the bus until that happens so I hope service isn't too drastically reduced.	11/25/2014 4:48 PM
54	Please continue the Link service to Bellevue.	11/25/2014 3:59 PM
55	Anything that would help us at the South end would be great. If the light rail hooked up somewhere near the train line that went to the Auburn station I would be happier than I could tell you. I really don't like spending so many precious hours in the traffic. If the van pools weren't available I would probably have left my place of employment already in search of something closer to home.	11/25/2014 3:15 PM
56	I have become convinced that everything done in the name of local transit only makes my life worse. EVERY SINGLE THING. My greatest wish would be that the local transit agency just ceased to exist, or failing that, just left me alone. Please go inflict your "help" on some other part of this increasingly miserable city that you have destroyed.	11/25/2014 1:36 PM
57	This survey is a great idea! Thanks for asking for input!	11/25/2014 12:36 PM
58	I'm really excited that you are making this a priority. If you are hoping that people will be willing to transfer more often, you must make sure that either all of the buses run VERY frequently (~at least every 15 minutes) or that they are extremely accurate about their schedules, never more than a few minutes late, and NEVER leaving early. Currently, transfers are really a gamble; I'm not sure I've ever been successful making a transfer planned out by trip planner, unless the wait in between buses was already irritatingly long.	11/25/2014 11:37 AM
59	Thank you for all your good work! I take the bus every day to work and am so glad I have that option. It is an easy trip for me -- my bus changes into the bus I used to have to transfer to -- and it is fairly reliable. Thank you again -- I really appreciate the bus service!	11/25/2014 10:45 AM
60	Please DO NOT remove or change the 48 other than increasing service. There is no access to Montlake without the 48 except from the U-district and the 43. The 48 connects three high schools, a hospital, u-district, Aurora, and greenlake. This route is important and should not be eliminated because of the station stop at the UW. There is no need to get off the train to transfer to a bus when you could have stayed on the bus. The 48 takes 30+ minutes from Mt. Baker to the u-district via 23rd. The train takes 25+ minutes to get downtown. Adding two additional stops at the current speed could double the time to get to the same destination. The station at UW is not close to 45th. You have to walk 20 minutes and over a mile to get to 45th & university. If the 9 ran on weekends and longer hours, I would take the 9 over light rail. It is always faster to go in a straight line than it is to go west to downtown and back east to capitol hill.	11/25/2014 10:30 AM
61	I do NOT understand the lack of park and ride spaces throughout the Metro, CT and ST network. To me, this is the #1 reason people do NOT ride busses. I have the luxury of a short walk. PLEASE, more than anything, get ample parking at every major route and additional services and routes would be much less needed. People who have to ride the bus already ride--what are you doing to get the other 80% out of their cars????????????	11/25/2014 10:24 AM
62	Find it odd that on #75 you have 2-3 stops all on 1 block as it wastes time & money it seems to have these postings so close to one another. I really like our transit system & have met many from out of state/country who like it as well. Am very excited about the rail expanding as have been to europe many times & have found it so easy to get around as well as enjoyable. Thanks for all you do as it is much appreciated.	11/25/2014 10:16 AM
63	I am happy to see that Metro is asking for information from its users. The routes that are busy may only be busy because they're the few available. Knowing what users want vs. what users need can really help with Metro development!	11/25/2014 9:53 AM

64	I think Metro will do what it wants do it (ultimately, for financial reasons) and the act of gathering feedback is one of those "nice-ities" that's often found here in the Pacific North West - but hey, why not.	11/25/2014 9:50 AM
65	I would like to see Link services extended to Fremont and Ballard.	11/25/2014 9:23 AM
66	The bus should not stop as frequently on the Ave. In general all the bus stops are too close together, making the busses slower.	11/24/2014 10:31 PM
67	Yay public transit!!!!!!	11/24/2014 9:34 PM
68	You are doing a good job. The young woman at the bus stop handing out flyers was very helpful.	11/24/2014 8:38 PM
69	We need parking lots near Link Train Transit centers. It would result in more use. The train is a ways from my home but I would use it if I had reliable parking nearby.	11/24/2014 3:19 PM
70	please continue to do all you can to promote fast, frequent and efficient service so this city operates like the major city that it is and we do not continue towards more and more gridlock !	11/24/2014 3:08 PM
71	Thanks for trying	11/24/2014 3:07 PM
72	I strongly urge to take into thorough consideration on #60 :the routing and frequency to the First Hill, to which many passengers including senior and physically challenged citizens commute .	11/24/2014 12:53 PM
73	THANK YOU.	11/24/2014 9:50 AM
74	Thanks for the opportunity	11/23/2014 3:53 PM
75	Serving the MOST is not always serving the public needs.	11/22/2014 8:37 AM
76	The email notice regarding the survey indicated that new/revised bus routes may be scheduled to facilitate transfers to/from the new Link stations. I was hoping to give input about that, but no questions were asked regarding that specific topic.	11/22/2014 1:50 AM
77	It's not just the bus service. Seattle City are abominable as are the many sidewalks. It all needs to be fixed. Also there are so many homeless and desperate people on the bus. It's sad and unpleasant. It all needs to be addressed. This is a rich city. Surely we can address these if there was political will and better coordination among city and county agencies.	11/21/2014 8:59 PM
78	I use transit more frequently than driving as far as my regular commute goes, but it doesn't always feel convenient as the abundance of regular traffic still makes most trips feel fairly slow. Hopefully increased transit options will encourage more people to use the service so the gridlock will be freed up.	11/21/2014 2:43 PM
79	The outreach should include a comment box about transportation questions. For example, I would like to note that it would be helpful to have express lightrail trains/runs, so that it doesn't take forever to get from SeaTac airport to downtown and (eventually) the U-District.	11/21/2014 2:22 PM
80	I understand the difficulty moving people from SOV to Public Transportation. I know it works because I've used it in Boston, Toronto, New York and Europe. If you make it harder to be a SOV and EASIER to use public transportation the gradual shift will happen !	11/21/2014 2:02 PM
81	We need more service from uw to renton area to 7:30 to 11:30.	11/21/2014 1:37 PM
82	Overall I am content with the public transit system. I only hope to see the buses run on-time, more specifically the downtown stops in the tunnel. I'm sure I'm not the only one that values punctuality. Other than that, good work thus far, and I very much look forward to being able to use the Link Light Rail to travel to the University of Washington campus in the future.	11/21/2014 11:41 AM
83	Please connect the 75 bus to the Link rail station at husky stadium! Thank you! Home <--> 75 <--> Link <--> Work :-)	11/21/2014 9:57 AM
84	thanks for reading all these responses, don't let others get you down!!	11/21/2014 9:20 AM
85	Thank you for conducting outreach to riders through this medium. I hope that this will continue.	11/20/2014 10:11 PM
86	Thank you for taking our suggestions/requests into consideration. Please also reach out to persons with disabilities/elderly who are especially dependent upon bus service.	11/20/2014 10:10 PM
87	I hope there will be service from the UW station to North Seattle-- the U Village/Sandpoint/LakeCity Wedgwood neighborhoods--that does not slog through the Ave/Campus areas first.	11/20/2014 10:03 PM

88	I had saved the link (no pun intended), but I didn't pay attention to whose survey this was. One of the later questions made it clear whose survey it was, so I went back to review the one area where I discussed Sound Transit vs. Metro. I happened to focus more on Metro overall.	11/20/2014 9:31 PM
89	It **seems** like Metro already has answers it favors, and surveys and outreach meetings are "Seattle process" where lots of time and effort are spent eliciting input from people but the decisions have already been made. I'm happy to be wrong, but this goes on a lot in this town. :->	11/20/2014 5:08 PM
90	I think that smaller, more frequent buses linking major transit centers would be helpful.	11/20/2014 4:01 PM
91	I am excited about the expansion of LINK, but I don't want it to mean bus cuts. For example, when the last round of bus cuts passed through Prop 1, I was in danger of losing my route to work (the 60 from Cap Hill to Harborview). The recommendation was to take the Streetcar, which still has not opened. I want us to keep adding transit options, rather than opening new ones and dropping others. More is always better!	11/20/2014 2:00 PM
92	Reroute 25 along Montlake Blvd. NE	11/20/2014 11:35 AM
93	Thanks for allowing the feedback. Busses are a critical part of my life	11/20/2014 11:30 AM
94	im impressed with the upgrades done at the bus stops with signage displaying arrival times. i support the bus system and appreciate the improvements being made. my only criticism is I do not like the old buses because I slide off the seats. I much prefer the new hybrid buses.	11/20/2014 11:28 AM
95	You have all the data you need to make decisions about service without polling. I'm not convinced that this information you're soliciting will be used at all. I think the money would be better spent putting buses on the street.	11/20/2014 9:24 AM
96	Don't make Seattle the laughing stock of the country by eliminating buses. Seattle is a progressive area and should be more innovative in getting people from point A to point B.	11/20/2014 8:03 AM
97	I'm glad you're taking the time to survey the public and find out exactly what they want. Other places I've lived never made an effort to engage the public in any new routes or transportation changes like Seattle transportation is. Good for you guys!	11/20/2014 12:21 AM
98	Safety at bus stops and on the bus are a serious concern for my friends and I.	11/20/2014 12:07 AM
99	You didn't ask specifically about link at UW. I think that Link should be made the easiest way to get downtown. Buses, like the 25 & 545, should terminate at UW husky stadium, and without 10+ traffic-ridden minutes to get from the highway to the station. The trains should come as frequently as possible, so every trip to downtown during rush-hour is at least as fast as the current trip, even with the transfer. This should not be hard, given how slowly buses make their way down & off I-5.	11/19/2014 11:49 PM
100	Good effort. The survey was not very mobile accessible - I tried on my iPhone and eventually gave up and did it on my desktop (too slow and too much typing).	11/19/2014 9:06 PM
101	i feel that the decesion has already been made as far as the train abut i do feel that we still need to contioue the buses for those who do not have vechiles.	11/19/2014 7:53 PM
102	KING COUNTY METRO TRANSIT ROCKS!!	11/19/2014 5:40 PM
103	Maybe have flyers posted on buses asking for feedback.	11/19/2014 5:15 PM
104	Thanks for working to get all voices heard on this important issue!	11/19/2014 4:12 PM
105	NA	11/19/2014 1:16 PM
106	It would be nice that the bus system is properly coordinating with light rail once it comes online for north seattle. It light rail runs at proper levels then I believe there could be lots of cost savings.	11/19/2014 12:31 PM
107	How can we talk about adding all this extra service when we just had to approve a measure to not cut funding?! I have next-to-no confidence that this survey will actually impact decisions to improve metro service.	11/19/2014 11:42 AM

108	When the changes to the routes in mid-Beacon Hill were being discussed, we recieved similar requests for rider input. The changes happened anyway. So even though I'm expressing my opinion when asked for, I don't see that it matters much. From my own personal perspective, I feel that Metro expects everyone on Beacon Hill to ride the light rail. But it's only accessible to the people within walking distance, and the time it takes to get to the station and transfer is triple what I used to be able to do with a single bus that went straight from 15th Ave. to the downtown corridor (the 39). Light rail is not the answer to everything. I'm in a pocket of the neighborhood where light rail is too far to walk to but too close to justify the time it takes to wait for a bus then transfer. I can drive straight to my desination downtown in 10-12 minutes (and that is in the middle of rush hour traffic). Why would I want to spend 20 minutes waiting for a bus (the 60) to take me to the station (or wait for the 50 and transfer at Spokane Street), then wait for a train (or another bus), and the whole trip takes 45 minutes? the 39 route used to take 15-20 minutes. That, for both a money reason and environmental reasons, I was more than willing to do (even though they cancelled the stop at Nevada Street and forced the riders to walk to Dakota, which is a good 12 minute walk for me now). Again, there's just not a lot of incentives to ride the bus in my neighborhood.	11/19/2014 10:19 AM
109	Good luck! buses are the best option	11/19/2014 10:04 AM
110	Thank you for taking on a project where no matter what you do, some one will bitch and complain.	11/19/2014 9:33 AM
111	I avoid Rapid Ride at all costs because of a few unfavorable experiences with Metro police who have on a couple of occasions been quite rude. It's not clear to me why we are paying for transit police to provide fare enforcement for only a portion of the bus services provided to the city. If this mechanism is somehow intended to increase the timeliness and efficiency with which rapid ride is trying to distinguish itself from metro buses I would strongly disagree with this rationale. I don't see any difference in the practical aspects of using rapid ride versus metro buses. It seems like it would be more cost efficient to have the same payment of method for both metro buses and rapid ride and eliminate fare enforcement. If there is going to be any kind of enforcement for which tax payer dollars should support it would be better spent on providing better safety for riders (both on the bus and at bus stops)!	11/19/2014 9:17 AM
112	I understand there are a ton of bus routes that have to be taken into consideration, but there are some major issues with the 197 that I know I am not alone in complaining about regularly over the years. I just wish our voice as regular riders would be heard since the service that we rely is constantly at least 10 minutes late and effects us getting to work on time so often. If I choose other routes they are considerably longer and I have to transfer 2 more times! Please take my concerns into consideration. Thanks, Samantha Sun	11/19/2014 8:46 AM
113	I don't want taxes to be raised for this project. Figure out how to do it with the money you already have. Public transit is not worth it if it's being subsidized at rates equal to or higher than it is now. Find a way to lower the cost and don't penalize drivers and make them pay for everything.	11/19/2014 7:42 AM
114	The transfer facilities at the UW station are horrific Why isn't there an underground walkway to exit in the Triangle?	11/18/2014 10:00 PM
115	Maybe not so much about the outreach process, but about the network. I use the stop at University Way NE and NE 45th St almost every day. But it shouldn't exist. There is a stop one block north and a stop one block south. Are stops on every block really necessary?	11/18/2014 9:17 PM
116	When are you going to ask our thoughts on how Link should feed into transit at the new Link stations?	11/18/2014 9:17 PM
117	Currently bussed such as the 72 are full from downtown to the U District and then continue out to the neighborhoods. They are nearly empty for the final part of their route. As light rail get's built to the north end I would like to see smaller busses connecting to the train stations.	11/18/2014 9:05 PM
118	To get more people to complete survey, would recommend to include an incentive such as a gift card from starbucks/amazon.	11/18/2014 8:58 PM
119	I can't wait till the link is up and running to the UW, I will definitely use it to get to Capitol Hill and SeaTac. I think Metro does a good job with the resources it has. Thank you! Cydney	11/18/2014 8:18 PM
120	Thank you for engaging in robust outreach process!	11/18/2014 8:05 PM
121	GET THIS SERVICE CHANGE RIGHT ON THE 1ST TRY!!!!	11/18/2014 7:52 PM
122	The "OneBusAway" app is great! But now that I ride the Link a lot the app doesn't include train times and I'd love for that to change. Thanks for your consideration!	11/18/2014 5:53 PM
123	Thanks!	11/18/2014 5:51 PM
124	Thanks for collecting information. Good luck with the process. I'm hoping for a great outcome and better transportation options.	11/18/2014 5:31 PM

125	This wasn't addressed otherwise and might not be the venue to do so- but as a biker I strongly discourage transit that requires in-street tracks that run parallel to the rode. I know a lot of people love the street car but it is incredibly dangerous even to very skilled bike riders. If any are added, they should coincide with protected bike lanes, like on Broadway. Thanks.	11/18/2014 4:46 PM
126	Thanks for caring!	11/18/2014 4:42 PM
127	thank you	11/18/2014 4:40 PM
128	I would hope that public opinion and use studies would influence the decision making process rather than politics but we shall see.	11/18/2014 4:23 PM
129	Can we get a 372 express only bus from uw to lake city to kenmore and then every stop to woodinville during the peak hours. The bus is to crowded and slow. during the 430 to 530 hours the 372 alternated every 15 minutes to go all stops then express like above. I believe student overcrowding and having to stop so much get the people out of the uw and up to their destinations quicker and more efficiently.	11/18/2014 3:44 PM
130	Thanks for doing it.	11/18/2014 3:34 PM
131	Do not cancel the ST 586 bus unless their are faster ways to get to campus. I like this bus because, despite the horrible traffic on I-5, there are later/earlier bus times offered than the ST Train from Tacoma/Seattle, faster commute, and less transfers.	11/18/2014 3:25 PM
132	The survey seemed to assume that I don't use public transportation frequently. I was surprised by this assumption, since the fact that I use public transportation nearly every day is what makes me want to send feedback to Metro.	11/18/2014 1:46 PM
133	Seattle would come closer to being a world class city if it had decent public transportation. In my opinion, they have a long way to go to reach this goal.	11/18/2014 1:12 PM
134	I appreciate you reaching out to folks for comment and I hope you consider all responses even if they go beyond what you are asking for in your feedback. Please consider making Link Light Rail more accessible to people interested in driving to a station and then taking the train. Thanks.	11/18/2014 1:01 PM
135	Just mnake it work. DO SOMETHING. Quit the "seattle process" and get actual stuff done.	11/18/2014 12:44 PM
136	None	11/18/2014 12:08 PM
137	Thanks for giving me the opportunity to voice my feedback. Because of my long and sometimes very unpleasant commute, I am considering moving out of state because I can't take the crowded commute much longer. It is a MAJOR factor in my life. The Seattle traffic, plus the crowded bus, are a huge challenge and frustration on most days. On the rare days I get to sit down on the bus, and traffic isn't too bad, it is a true pleasure to commute to and from work!	11/18/2014 11:47 AM
138	It would be helpful if you also advertised for this outreach process inside of the buses/rails. Not everyone can stand close enough to the poster at the bus stop to see the information and the text is somewhat small.	11/18/2014 11:43 AM
139	Good job, thanks for valuing community input.	11/18/2014 11:30 AM
140	I would love bus service to the link rail. I would not want to carry lugage on the burke gilman trail or across UW campus to get to the airport.	11/18/2014 11:07 AM
141	I would also like to see some of the bus stops restored that went away during the recession. It's not too bad for an able-bodied person like me, but it's crazy to me that a bus like the #10 doesn't stop anywhere between 4th and 8th in downtown Seattle. Friends of mine and I were amazed when the 6th Ave stop was eliminated.	11/18/2014 10:08 AM
142	Thank you!	11/18/2014 9:52 AM
143	Thank you for reaching out! I think mass transit is definitely a topic our city needs to spend time thinking about considering the huge influx of people recently. It will make for a happier place to live, safer and better for the environment!	11/18/2014 9:43 AM
144	small train/trams will not move enough people per hour. A waste of billions of dollars for sparse service.	11/18/2014 8:59 AM
145	I would pay more for the UPASS if it meant better service. I think that we need to find a way to get a better budget for our metro. Limiting routes, and canceling them disrupts so much and pushes people away from using your services.	11/18/2014 8:51 AM
146	I hope there will be an easy transfer from West Seattle AND enough room to take the Link from SODO to the UW Medical Center when it is finished!	11/18/2014 8:46 AM

147	I really don't know if my feedback will matter. Maybe times have changed. I went in person to a Metro outreach program so give opinions on service changes. That was a waste of time, the meeting was about selling me on already decided options and not about gathering information. I mostly wonder if the survey is designed to be crafted into specific requests for funding - i.e. 50% more people will ride the bus if we offer Wi-Fi. While I don't currently ride a bike to commute, it would look more promising not to have the bus stops on the same side of the road as the bike lanes. I cringe watching buses and bikes deal with this bad design. Also, a big thank you to the Metro drivers, dealing with dumb drivers, bikes with no lights / limited sense and people who look really great in their dark clothes - EXCEPT when they are standing at poorly lit stops or walking in the street. Not to mention some really strange passengers...	11/18/2014 7:40 AM
148	Outreach process is great - can I share my dream about transit? The ideas of Hiro Takahashi, formerly of SDOT, I believe offer the real chance to move this city past the automobile. How many fewer accidents would we have with the majority of drivers on the road being trained professionals? What would we save in road maintenance, police responses, and new road construction due to gridlock? He proposed the long haul routes like the 7 and 48 stop only once a mile at destination stops. Passengers would pay before boarding, cutting boarding times. This would increase frequency without adding a dime to costs. He would surround these nodes with circulators riders could hail and take to the boarding node. On leaving the bus, the passenger could board this circulator and request a stop within the circle it serves, thus arriving near home or an errand destination. This pattern would be convenient enough to lure car drivers onto the transit system. The added fares, combined with the reduced costs for traffic policing, would make these (admittedly expensive) circulators a good investment. Thanks so much for asking and considering these ideas!	11/18/2014 6:14 AM
149	Buses need to run frequently People should not have to stand for long trips so need more buses to accommodate riders Easy connections	11/18/2014 6:04 AM
150	You didn't really ask anything about how service might change when the light rail is extended. The survey should have included questions like: Would you be willing to transfer between buses and light rail, or would you prefer that your trips remain entirely on the same transit mode. How much extra distance would you be willing to walk to or from a light rail station to include light rail in your travel plans, if including light rail would get you to your destination quicker? What are the destinations that you travel to that are currently served by buses that travel near the planned light rail stations, but would be inconvenient to reach by the planned light rail line?	11/18/2014 2:16 AM
151	WiFi access?	11/17/2014 11:42 PM
152	Given the constraints Metro has, it's doing a good job!	11/17/2014 10:37 PM
153	It will bring me closer to the gym, a good idea for many students, staff and others who use UW schools and medical center. It would be great to see some alleviation of traffic during husky games, particularly football and basketball games	11/17/2014 10:35 PM
154	Please put WIFI on the buses and light rail, that would be INCREDIBLE and so so helpful!! Also, more shelters for bus stops- it not only protects from the cold but is safer too. In addition, more frequent buses would be really really useful!	11/17/2014 10:31 PM
155	Am looking forward to the "Seattle Subway" project to connect East lake Washington to West lake Washington! It would be awesome to have a :sea-bus across lake Washington!!	11/17/2014 10:14 PM
156	One thing that also makes a difference is to recognize how rainy it is in the Puget Sound area. If you're dressed in good business attire, standing at a stop in pouring rain can ruin your clothes and appearance. More shelters with some kind of protection from the rain would be great.	11/17/2014 10:07 PM
157	I like that Metro reached out. Going to a meeting is difficult because they can be difficult to physically get to, and difficult to fit into my schedule. I like that Metro is reading out with a survey.	11/17/2014 10:06 PM
158	Accessibility for people with mobility or visual impairs should already be a high priority for Metro and shouldn't be presented as a preference analogous to a 5 vs 10 minute transfer time! Maybe first ask if the respondent uses or would use disability accommodations (thus identifying them as someone qualified to evaluate existing services) and then ask them for input. Thanks Metro!	11/17/2014 9:52 PM
159	The in-person handout on Campus Parkway was a refreshing way to receive information and be invited to the process. Thanks for the opportunity!	11/17/2014 8:49 PM
160	It would be more engaging to receive a numbered/named survey. Later, when/if the quantitative results of the surveys are posted publicly (according to number/name), it will make it easier to remember which surveys I have taken while allowing me to compare my answers to my neighbors' (being other Seattle-ites).	11/17/2014 8:07 PM
161	I can't imagine this is easy, but I hope you get it pretty good enough.	11/17/2014 7:58 PM

162	Sometimes bus drivers won't open the back door on buses and old ladies can't get out or yell "back door!" So they miss their stop. That's not cool so that should really be fixed.	11/17/2014 7:48 PM
163	Please take better steps to connect bus and Link Transit centers. At Mount Baker, for example, transferring from bus to the Sounder is unnecessarily difficult -- a long walk without much signposting, a crossing at a busy intersection, and lots of exposure to the weather. There is no excuse for this.	11/17/2014 6:10 PM
164	I do sometimes feel that our local public transportation services (particularly Metro's bus service and the Sound Transit light rail service) don't spend enough time listening to what people really want and end up spending money on things that don't really improve service. Do try to listen more closely to what the customers want, even if it isn't something that you've planned.	11/17/2014 5:25 PM
165	The idea of "Metro Peak Service" should be revised for UW campus. As UW campus needs more evening service. Checking the statics the buses are more crowed in afternoon and evening than in morning peak. IN fact late morning is also full. The buses are not packed in the morning because students awake and commuting at 7am.	11/17/2014 5:13 PM
166	I like taking the light rail to the airport. It can be crowded and difficult to manage with luggage, but I understand the rail cars are from the Czech Republic and were not specifically designed for Puget Sound transportation needs.	11/17/2014 5:03 PM
167	THANKS!	11/17/2014 4:53 PM
168	This is not about the outreach process, but about Metro service. I strongly feel that regular bus service should resume on University Way on Saturdays after Farmer's Market ends. It ends at 2pm and it takes a couple of hours for the street to empty and open up again, but it does not make sense for the 71, 72, 73 to be re-routed to 15th Ave NE all night. Resuming the regular route by 6pm makes sense.	11/17/2014 4:46 PM
169	Updates on progress being made on the light rail link between Downtown and UW, including photos of stations, route, planned schedules / time it will take to get from destinations, ect...	11/17/2014 4:44 PM
170	I worry that all these changes will make it more difficult to get to a bus/light rail as I age and as a result, I will not be as independent.	11/17/2014 4:26 PM
171	Park and rides, especially in Snohomish county are too full, this also prevents me from taking the bus into Seattle areas.	11/17/2014 4:24 PM
172	I just have to say that I'm truly pleased with how the bus service works to connect me from home and school. I know this from other students who commute and from my own experience that having Wifi on the busses would be a big help to ensure that we don't lose time while commuting.	11/17/2014 3:57 PM
173	This survey didn't mention Link service to UW until the end. There isn't any place to suggest new routes other than adding it in the questions. More light rail or separate right-of-way bus service is desired.	11/17/2014 3:57 PM
174	A/C on the 49 would be appreciated in the summer.	11/17/2014 3:55 PM
175	Obviously a covered bus stop is important to me because I kept referencing it as a deterrent to taking the bus. But it never came up in your lists of considerations. You talked about safe bus drops but not covered bus stops. Give some more thought to how important this covered aspect is to customers in a city where it rains so much half the year. If it's not dry waiting for the bus, it's not very attractive.	11/17/2014 3:45 PM
176	Your question that asks us to select which routes we use / have used in the past is missing route #5. Not sure if this was intentional. Route #5 is SUPER useful to me, and I was surprised not to see it listed. (Perhaps that's because there are no proposed changes to that route? I'm just pointing it out in case it was an oversight.)	11/17/2014 3:43 PM
177	Take over the world! Eliminate that pesky automobile! This transit aficionado approves of your work.	11/17/2014 3:42 PM
178	I thought I was going to be asked about bus service connecting to light rail stations. That seemed to be the stated purpose of this survey. But no questions were asked specifically about this.	11/17/2014 3:32 PM
179	I sincerely hope you will act positively to my request that I made about making transportation available to people who live around Exit 7 of I-405. The area is the north border of Renton and south border of Newcastle. This area is so isolated. Please make a positive impact on the people's lives by providing public transportation to those people. Thank you for listening.	11/17/2014 3:23 PM
180	I doubt any opinion will make a difference in the planning process for metro.	11/17/2014 3:21 PM
181	It is very nice that you are doing this.	11/17/2014 3:20 PM

182	I live 5 mins from the Northgate Transit Center. Lots of access to bus routes... But no Rapid Ride stops so I am un familiar with them.	11/17/2014 3:15 PM
183	I wish there was more parking for cars along the routes. I currently take the 271 and have to park on a side street in a residential area. I fear that ultimately this parking will get removed. There are very few lots where you can park your car and ride that bus.	11/17/2014 3:14 PM
184	Is this survey available in other languages?	11/17/2014 3:13 PM
185	Way to go to reach out to those of us who ride! I hope you hear us.	11/17/2014 3:08 PM
186	Great; thanks.	11/17/2014 3:01 PM
187	We really need to find the moeny to support reliable public transit. I'm an east coaster and this it's just ridiculous that it takes me over an hour routinely to go 6miles from work to home	11/17/2014 2:52 PM
188	don't cancel mt bus! 67/68	11/17/2014 2:47 PM
189	I would just say, keep fighting to get this city in to the transit position it needs to be in. Seattle can't be sustainable for lower income folks, or anyone without comprehensive transit.	11/17/2014 2:43 PM
190	none	11/17/2014 2:41 PM
191	Placing outreach workers at the chinatown/international district tunnel stop was very smart. They were able to talk to many UW staffers or students traveling to the U District. Well done...	11/17/2014 2:29 PM
192	I appreciate being asked to contribute to this process.	11/17/2014 2:27 PM
193	Thanks for asking! :)	11/17/2014 2:26 PM
194	It would be nice for the UW to subsidize bus passes for family members. I have a 9 year old daughter and I drive her to a safer school that is closer to my work where if something goes wrong I can be there in 10 minutes without having to fight through downtown traffic. But I have no way to pay for a bus pass. I can't afford \$1.75 each trip for my daughter to ride the bus. Plus the amount of time ridden on the bus from West Seattle to Sandpoint/U-district is not an option because it takes a long time, and the bus options that are available stop everywhere and there are no quick ride options (express buses).	11/17/2014 2:18 PM
195	I don't want to lose current, efficient bus trips just because the UW link station opens. Right now I have a direct express bus from Tacoma to the UW campus. I don't want to have the route be cut and me be forced to take the Sounder train into Seattle then transfer to the link because that will add significant time to my commute. Currently my entire bus trip is 44 - 60 minutes in the morning. If I had to take the Sounder train it would take 60 minutes just to get from Tacoma to downtown Seattle. Then I'd still have to transfer and get up to the UW campus. Significantly increasing my commute would cause me to consider driving, simply for the efficiency.	11/17/2014 2:13 PM
196	Overall I love the metro services offered and have been using them since I moved up here almost three years ago. I would just use them more if they were a little faster and more on time. Thank you!	11/17/2014 2:13 PM
197	Outreach is irrelevant. People who receive and subsequently participate in these outreach attempts can see it for what it is, an attempt to mitigate failures of architecture and of executive action. Additionally transparent is the embarrassing amount of resources poured into providing services, not for the people who use transit, but to those who *might* use transit -- who somehow are to be, I suppose, bribed into just getting onto a bus or train once in a while. This disproportionate allocation of resources is the primary failure of all the regional transit systems, most especially, Seattle.	11/17/2014 2:12 PM
198	Use bus ad space to encourage riders to participate; have a contest; provide incentives or tell the participants that their participation will somehow help someone in need - make it personal yet sell the value of your input impacts your community. Obviously there is an inherent benefit.	11/17/2014 2:09 PM
199	I think having a light rail station at UW is such a great idea. I hope that the light rail service continues to grow and connects Seattle with Bellevue, Redmond, and Everett soon.	11/17/2014 2:04 PM
200	I doubt riders participation in this survey will mean anything to Metro or Sound Transit. I'm sure all the decisions have already been made from people at the top who don't use Public Transportation. Public transportation is broken and simply doesn't work well in Seattle, King County or the Puget Sound Region. Better technology to work with Smart Phones is needed so users can see where/when their bus, train, trolley or lightrail will arrive.	11/17/2014 2:03 PM
201	With the amount of traffic issues, if there was a transit(bus) way to connect to the link light rail I would take it in a heart beat. The schedule would have to work for the hours that I work.	11/17/2014 2:03 PM

202	I am very much for expanding the Light Rail as quickly as possible, I think that once it opens that it will give me a much greater ability to experience the downtown on a regular, enjoyable basis.	11/17/2014 1:55 PM
203	Please don't make Wi-Fi available on buses. People are already drawing farther from each other during rides and in the world thanks to their phones already. By providing Wi-Fi, I believe you are helping people such as myself (Internet Addicts) to strip themselves from reality more than already and with hardly a chance to change if their self control (such as mine) is weak.	11/17/2014 1:52 PM
204	Please do not cut any more routes or services! EXPAND the service, like most other progressive, smart, developed cities around the world.	11/17/2014 1:52 PM
205	The Tacoma-Seattle transit needs to consider rider preferences. Commuting here takes a big chunk out of our day, and lengthening that time is not a good option.	11/17/2014 1:51 PM
206	Seattle seems to have one of the more extensive and convenient transit systems in the United States, and this is one reason I feel fortunate to live here. But there is still room for improvement. American cities in general continue to trail far behind their European and East Asian counterparts in terms of the availability of public transit. I look forward to Seattle continuing to be a leader among American cities in the field of public transit.	11/17/2014 1:50 PM
207	It'd be good to have more input fields like this one rather than radio buttons, especially on questions that say "pick one" and none of those quite reflect my thoughts or, lack space to explain a choice I've made. Metro can be expensive, take much longer to get to work [an hour versus 20 minutes by car]. Some routes have thugs riding along sitting in the only areas with available seating. Winter time you wait outside in the wind and rain to get on a stuffy bus with fogged over windows...not a great choice for a daily commute. I spend more driving when adding in upkeep, insurance, parking and so on but the convenience of being at my destination in 15 minutes, rather than an hour or more, is worth it to me. Finally, it gets really frustrating to see metro buses continue to run red lights or block intersections with impunity. Complaints about those events get lip service like "well pass this on to the supervisor" and the behavior continues on.	11/17/2014 1:50 PM
208	Please make food/drink rules visible on the buses! For those of us with food allergies, riding public transit can be terrifying.	11/17/2014 1:47 PM
209	I highly value my bus service on routes 73 and 373 and I take the bus to work most days. I do NOT want to have to catch a bus to Northgate and then a train to UW in the future. I will likely drive if I have to go through that nonsense. Route 373 is discontinued when UW is out of session. UW has more employees than students. At least the rush hour service should be available year round as most of the employees work year round. When the 373 is not running, all of the 73s should go to the end of the route instead of 50% of them ending at 65th.	11/17/2014 1:47 PM
210	Please keep planning and building to accommodate growth and density and higher costs of energy.	11/17/2014 1:44 PM
211	Train is the way to go. Waiting for train route from Federal Way to UW.	11/17/2014 1:44 PM
212	I would love to have a easy, reliable connection between U District and Sea/Tac Airport. Many students use the airport and no easy, fairly quick options exist.	11/17/2014 1:44 PM
213	This survey was longer than I expected, which was not necessarily a bad thing.	11/17/2014 1:42 PM
214	Could the 65 bus stop closer to the Link station?	11/17/2014 1:42 PM
215	Getting the tax revenue to pay for service improvements is probably the biggest problem at the moment. Good luck.	11/17/2014 1:38 PM
216	Please stop cutting routes, decreasing service, and increasing fare rates. Please.	11/17/2014 1:35 PM
217	Please get central district connected to light rail station in capitol hill. Swedish cherry hill is on its on.	11/17/2014 1:35 PM
218	Having to make transfers would also be improved if transfers used the same bus stop (many do, but then many do not and require walking some distance to another stop up to several blocks away), or provide a "You are here" map at common transfer stops (especially in downtown Seattle) so people can orient themselves on where the stop they are headed to next is located (also on what side of the road one would need to be on to go the direction they want to go).	11/17/2014 1:33 PM
219	Thanks for your work!	11/17/2014 1:33 PM
220	Overall, I am pleased with Metro. More routes and frequency would help get more people to ride.	11/17/2014 1:33 PM
221	I live in a place with good bus service, where the commute to my job is easy. I continue to live where I do partly because the bus & transit service is good. I like this feature of our city quite a lot. :-) Thanks, Beth	11/17/2014 1:32 PM

222	I love taking the bus, drivers are friendly, I don't have to worry about traffic, and I can do other things while commuting. Thanks to Seattle Metro for all you do! So excited about the link rail!!!!	11/17/2014 1:24 PM
223	Not on the process. But I do have one comment that didn't seem to fit anywhere else in the survey: the need for reliable real-time bus service updates. The OneBusAway smartphone app is a very useful program, but the data is sometimes inaccurate.	11/17/2014 1:21 PM
224	Thanks for asking! You raise my hopes for improved transit- don't disappoint!	11/17/2014 1:20 PM
225	Metro should not allow non-paying customers on the bus.	11/17/2014 1:19 PM
226	Thank you!!!	11/17/2014 1:13 PM
227	It doesn't seem to address the concerns about the "70-routes" changing once the light rail reaches the stadium. I am assuming these will become obsolete (or run only as far as the stadium) and it would be excellent to propose options on what to do with them.	11/17/2014 1:12 PM
228	Please do your best to keep the transit system going!	11/17/2014 1:04 PM
229	Even if good decisions are made, Dow Constantine will veto them and do what his masters command.	11/17/2014 1:00 PM
230	Drivers should at least stop if the bus is to full!!!! Instead of just driving by and have passengers not knowing what is going on!!!!	11/17/2014 1:00 PM
231	More transpiracy about how money from intitatives and taxes is spent concerning salaries especially from highest levels of management. When friends and co-workers talk about why they are voting against transit funding many believe that Metro is wasting money since it became a King County entity. It would be very helpful as a pro-transit voter to be able to counter those agruments with hard facts. And if those facts were more public it might help sway more people to support transit. People do seem be very excited by the extension of the light rail. As traffic has gotten worse some of my coworkers have lamented that the state/county/etc had not begun extending transit years ago and that there were no plans to stretch the light rail to Everett and beyond.	11/17/2014 12:58 PM
232	If you're concerned about people's responses to question 19, you should publish aggregated data about the feedback you got and, point-by-point, show what you've done or are planning to do to address people's concerns.	11/17/2014 12:57 PM
233	Metro bus service is a necessity for students, staff, and faculty. The availability and cost of parking, as well as the challenges of traffic, are effectively prohibitive. Because there is not a decent alternative, it often feels like there is little incentive for the Metro bus services to improve. Bus congestion is a SERIOUS problem on buses that travel through UW campus. Riders often stand for 15-30 minutes of travel time, and some busses are so congested that people cannot stand in safe positions on the bus. The congestion is related to extreme delays - during commute times (morning and early evening), a bus that runs every 30 minutes may arrive 28 minutes late. In an era of remarkably accurate and inexpensive location/communication electronics (e.g. GPS, cellular data communication), it is frustrating how poor the information on metro bus service is. The phone application OneBusAway does a barely adequate job, but is frequently mistaken, especially on weekends, holidays, or days that campus is not officially in service. Seattle Metro should be able to provide modern software options for checking bus times and making travel arrangements (or if that is happening, advertise it better).	11/17/2014 12:54 PM
234	Thank you for your consideration.	11/17/2014 12:54 PM
235	I am interested in taking the light rail to the UW where I work, but because I am on N. Capitol Hill, the access for me doesn't make sense, yet the buses are pretty inconsistent in keeping on schedule.	11/17/2014 12:53 PM
236	I sometimes wonder whether improvements, like Link, would be built faster if agencies weren't so focused on community buy-in. It's not that I don't think the community should be consulted, but at some point, well-informed planners should just figure it out and do it faster. In Beijing they built 5 new subway lines in 4 years. Can you imagine?	11/17/2014 12:51 PM
237	Another option that could help ridership would be to develop a program that estimates time and money saved when a potential passenger inputs their travel plans to the program. The results would show how long the travel would take in a variety of options, including driving, and how much that would cost with parking, etc, vs the other options. I hope this makes sense. For instance, if I were to drive from the U district to downtown and it would cost \$10 more due to parking yet I'd only arrive 2 minutes earlier, I might choose the bus.	11/17/2014 12:49 PM
238	I appreciate this opportunity to provide feedback. I would love to use more public transportation beyond just commuting to work. Traffic and parking are such a mess in Seattle. I have seen first hand how good public transportation works and I wish we had it here. Good luck!	11/17/2014 12:48 PM

239	You'll need to make the busses run on time. Anything that you can do to connect participation to "help us get the busses run on time" will get a response. If a bus doesn't run on time (or my favorite, runs early, leaving you standing for half an hour) the system becomes instantly unusable, and it will be abandoned. Metro's slogan needs to be "we run busses on time" and then deliver it.	11/17/2014 12:48 PM
240	Thank you very much for this opportunity. I would like to emphasize the need for University of Washington workers to have inexpensive and efficient means of transportation to and from work. Many who are employed at the UW live far away. Sometimes I feel like Shoreline is left out of the loop for transportation options.	11/17/2014 12:48 PM
241	There is no available parking (park and rides) in the South Seattle area so until this happens I will not be riding link light rail. It's not convenient. I live in Skyway.	11/17/2014 12:47 PM
242	I would be thrilled if the Link were extending all the way down to Tacoma. I work in the UW Tower and the Brooklyn station is going to be a great hub and connection. Unfortunately, I will likely still need to rely on the ST 586 express bus because the Link won't extend all the way home.	11/17/2014 12:44 PM
243	Just make it work, OK? It would be helpful if all the King County elected and appointed officials actually ride Metro once in a while.	11/17/2014 12:42 PM
244	Thanks!	11/17/2014 12:40 PM
245	South Seattle communities should still be involved in discussions about light rail connections to UW/Cap Hill.	11/17/2014 12:36 PM
246	Thank you for this opportunity to weigh-in. I am hopeful that completing this survey will result in better decisions being made.	11/17/2014 12:35 PM
247	I took the survey, but I don't think my opinion matters. I'm skeptical of those who are making these decisions, because they don't take the bus.	11/17/2014 12:35 PM
248	Buses should connect the University of WA to West Seattle/South West Seattle directly. If a bus went from UW to Westwood Village, I'd be willing to transfer to Delridge Way SW (route 120) more easily than transferring from downtown (I think it would be much less crowded). I think there are a lot of staff/faculty, etc. that work at UW but live in West Seattle and it is very inconvenient to get there.	11/17/2014 12:34 PM
249	Metro has made poor choices in the past. I see no reason to assume that will change.	11/17/2014 12:34 PM
250	This isn't about outreach, but since there wasn't an appropriate place to share this concern earlier, I'd like to do so here: I'm worried that when the light-rail extension opens, Metro will cut or reduce frequency on the 43 & 49 routes. Either of these would have a significant impact on anyone north or east of the Capitol Hill Link station, and if Metro chooses to do this, a significant portion of those who currently take transit will be forced to, or will opt out of public transit.	11/17/2014 12:33 PM
251	Good job.	11/17/2014 12:29 PM
252	Thank you for asking for feedback. I am so excited for the light rail to open up to UW--it will reduce my commute time from 1.5 hours to 20-25 minutes! I can't wait!	11/17/2014 12:28 PM
253	I've already given tons of input and all of it has been ignored. For emails, I never received and response. I have little confidence that voicing my opinion makes any difference with the public transit in the Seattle region.	11/17/2014 12:27 PM
254	I wish Metro had kept the bus stop in the corner of NE Pacific and 15th Ave NE. I have to walk farther now since the bus stop was removed. (a good walk though during the summer time, but it takes away so much of my time to arrive to work on time. I'm always racing back to my bus stop in the afternoon. I'm not the only one complaining though...	11/17/2014 12:26 PM
255	I'd make the address on the sign bigger... Otherwise, very nice sign.	11/17/2014 12:26 PM
256	I would like to know why so much money was spent on the new rapid ride buses and bus stations while the regular metro buses are so dirty. Why are routes/hours being cut while Millions are being spent on the rapid ride?	11/17/2014 12:24 PM
257	I hope that rider feedback will be included in meaningful ways and not just get overruled by more wealthy/influential stakeholders.	11/17/2014 12:24 PM
258	I hope that you will listen to my views and the views of others and that it will result in better decisions being made with Seattle transit. I have to say that I have been very disappointed at cutbacks in transit service in recent years. It seems like a false economy to me on the part of Seattle government. I hope this changes.	11/17/2014 12:23 PM
259	While I'd seen a poster at a bus stop, the poster had been damaged either by wild vandals or weather or both. I was intrigued, but a lot of important information was difficult to access. Not much you can do about that, just FYI.	11/17/2014 12:23 PM

260	I am extremely frustrated by transit in the city. I hate the late buses, the urine on the floors, the overcrowding, etc. It's an embarrassment that we have so much corporate money floating around, but regular people are reduced to cattle for the simple task of getting to and from work. I don't think the government cares about anything other than corporate name recognition, and will bend over backwards to make life easier for Amazon and Microsoft-like companies, while the rest of us suffer. Transit is just one of the many places where this is reflected in the haves vs have-nots.	11/17/2014 12:23 PM
261	I'm not sure if my views and interests will be impacted since I don't live in King County, but I think it's a helpful platform to get word out for changes that need to be made in Snohomish County that are related to this planning process.	11/17/2014 12:23 PM
262	The City of Seattle needs to be committed to METRO transit. It does not make sense to keep canceling routes and limiting routes when there are more and more people taking METRO buses. The City should be committed to helping people get to work and home safely, and limiting traffic and pollution from cars.	11/17/2014 12:22 PM
263	Keep it up! Car people think they get to decide everything--bussers need to organize.	11/17/2014 12:21 PM
264	Many students are unaware of what these changes could mean, they just use the services. It's important for those of us that live here year round that we have safe and reliable means of transportation separate from the demands of a temporary student population.	11/17/2014 12:21 PM
265	Drivers that are trained for passenger safety and comfort - some drive too slow, other very fast and deliver a 'jerky' ride. They think they 'own' the road, when in fact we all need to share the road, cars, buses, trucks, pedestrians and bicyclists. Turn the heat on on the bus.	11/17/2014 12:18 PM
266	Increasing number of people are coming from Redmond/EastSide in general - I'm concerned that 520 bridge did not consider link rail lanes. I hope you make up for it through better Rapid Ride access to Redmodn park n ride from surroundings.	11/17/2014 12:17 PM
267	I love Metro!	11/17/2014 12:16 PM
268	Thank you for asking!	11/17/2014 12:15 PM
269	Nice, but will it do any good?	11/17/2014 12:14 PM
270	Since I have heard the head of DOT speak and one of our council members and seen maps of where you're going into I feel that you have totally ignored many neighborhoods of the city. And since this is such a HUGE problem I don't think it will ever be fixed. Especially because more money seems to go into bike lanes as opposed to mass transit.	11/17/2014 12:03 PM
271	I think the survey missed people using their bikes on transit. For instance, in the future, I may ride my bike to the UW light rail station in the morning when weather is cooperating. If it's raining cats and dogs on the way home, I may want to put my bike on a bus rather than get soaked in my work clothes. **I would also have liked to provide some input on low-impact motorized vehicle access to the future light rail station at UW: it makes sense to not have a park & ride lot for cars / but limited scooter and motorcycle parking might provide access to a market for people who can't ride their bike because of hills and (as with my case) because there are no shower/changing facilities at their office destination	11/17/2014 11:39 AM
272	Seattle cannot go backwards. Sustainable cities support mass transit. We need to be thoughtfully supporting choices that reduce the need for cars and make mass transit convenient and useful.	11/17/2014 10:24 AM
273	Thank you for doing this.	11/16/2014 9:05 PM
274	I WOULD LOVE TO BE ABLE TO TAKE THE TRAIN TO DOWNTOWN/ CAPITOL HILL FROM THE U-DISTRICT IF BUS SERVICE BACK TO MY HOME IN MAPLE LEAF WAS RELIABLE , WITH FREQUENT SERVICE .	11/16/2014 7:12 PM
275	I am concerned that good plans will get watered down through successive stages of community feedback, where those who scream the loudest (metaphorically) will outweigh the needs of the largest number of current and future riders. I trust the judgement of Metro's planners much more than I trust the judgement of neighborhood activists. What I hope comes out of this process is faster paths for the vast majority of affected riders for their most-frequent trips, and good 2-way all-day (as many hours as possible) connectivity among as much of Seattle as possible. I encourage Metro, and its planners, to keep up with Seattle Transit Blog postings regarding this topic, and chime in when you feel it is useful. Thanks for doing this! --Brent White STB blogger	11/16/2014 3:05 PM
276	Our transit system has a long way to go. We need large parking garages at all Sounder stations and at the Link stations south of Sodo. The Link needs to go to UW, Bellevue, & Tacoma. The Sounder needs to go to Olympia. Look at any major city and copy what they are doing.	11/16/2014 10:44 AM

277	Please add more bus routes where they are needed in poorer areas. But also increase bus routes and bus frequency for bus routes in the North East Seattle	11/15/2014 11:16 PM
278	Glad you're trying!	11/15/2014 3:13 PM
279	I think it's great as long as you take into consideration people's views.	11/15/2014 7:46 AM
280	I found it kinda randomly. I also am dubious about how effective it is as data gathering tool.	11/14/2014 4:35 PM
281	I have to walk about 13 blocks coming home from the airport carrying a suitcase and that seems to far at midnight when I am tired.	11/14/2014 10:55 AM
282	With opening of Link station at Husky Stadium, there needs to be additional service North to South along 25th	11/14/2014 7:10 AM
283	bring back the 47!	11/14/2014 2:38 AM
284	Buses are cool, but in the end I think a city-wide lightrail is the way to go. It is the only way I can see having fast, affordable, reliable transportation.	11/13/2014 4:27 PM
285	At the moment most bus transfers happen at Campus Drive. That's far away from Link. How can I connect from 25 to Link? UW Link Station looks great, but how can I xfer to local busses?	11/13/2014 3:33 PM
286	Thanks for seeking community input.	11/13/2014 3:18 PM
287	A dedicated bike street or trail(walkers, runners, etc) should exist from Shoreline to UW to South Seattle. The trail encourages good behaviors our city will thrive on. This trail should be interconnected to bus stops, rail so that humans can know they can commute around the city, moving on and off different transportation types.	11/13/2014 2:36 PM
288	I plan to use Link Light Rail from Husky Stadium as often as possible to get to and from northeast Seattle to Capitol Hill and downtown. As it is now, my 71 route from to and from home to downtown will not come near enough to the Husky Stadium station to make using light rail feasible.	11/13/2014 2:28 PM
289	Almost everything you asked about, including safety and capacity and cleanliness of the buses and stations, is important. But generally it is frequency, scheduling on nights and weekends, and ability to get a quick transfer to a second bus or light rail that determine when I use Metro and Link.	11/13/2014 11:28 AM
290	people planning the changes need to go out and take the bus for 2 weeks - in that time you should run into every eventuality. From traffic problems, crazy people, bus cleanliness, comfort and crowding.	11/13/2014 10:50 AM
291	Keep up the great work!	11/13/2014 9:52 AM
292	Why isn't this poll plastered on buses?	11/13/2014 9:49 AM
293	Thanks for including the QR code on the handout!	11/13/2014 9:07 AM
294	How will we know that you are looking at this survey or incorporating it's results into your decisions? Out of all the suggestions and complaints I have submitted on Metro's website I have never received a response even though I include my email every time and ask for a response. I have seen no evidence to suggest you have the organizational capacity to actually review and integrate comments from the public into your planning process.	11/13/2014 7:46 AM
295	Keep all stakeholders thoroughly updated	11/13/2014 2:13 AM
296	Thanks for providing the survey!	11/12/2014 10:15 PM
297	GOOD LUCK, keep pursuing the rider's future!	11/12/2014 10:02 PM
298	I think that small shuttle buses might work for links to light rails EXCEPT when there are major events like Husky football games, Mariners games, Seahawks games, etc. Then larger buses or more small shuttle buses would be necessary. The system will have to take these events into account in planning schedules. I live about a mile north of Husky Stadium and the last thing I (an almost senior petite female) want to do is to walk home at night or in inclement weather, so transit links that are frequent are imperative.	11/12/2014 9:01 PM
299	In regards to restructuring the bus routes, etc. on Capitol Hill when Link opens, please ensure there are ample opportunities for public input, feedback and participation.	11/12/2014 5:52 PM
300	I would like to say strongly agree for question 19. But that one's up to you guys.	11/12/2014 5:50 PM
301	I am an outlier and I understand that I probably won't be accommodated. Getting a late passenger boat that goes from Bremerton to Seattle and takes 30 minutes is probably not going to happen again soon.	11/12/2014 5:33 PM

302	The primary issue with Transit in Seattle is that the buses are unreliable with arrival times. For example, I have to walk half a mile down a hill to get to my bus stop for the 9 and it is never on time. Whether early morning or late at night, the 9 will not arrive on time. If routes were dependable on arriving on time Seattle's Metro customers would breath a giant sigh of relief. Thank you for your time.	11/12/2014 5:31 PM
303	If you are only considering the University as a destination instead of a hub for northern neighborhoods, you are missing the point. As a homeowner, I am looking for something that will increase the value of my home. If the bus system that goes near my house doesn't have a direct access to the Link service, it is useless. I don't want to fight the student traffic to use Link. Buses that go to northern neighborhoods, instead of going up/down University Ave, need to route to Link -- right now I'd have to walk across campus to get there from any of the "70" buses that I could take. Not knowing how that is going to work at this late date makes me believe that the UW link was designed with the University as a destination, not a hub for access to other neighborhoods. Is there a bus from Link to get to U-Village? Children's Hospital? Magnusson Park? And if so will we have to wait for half an hour +++ like now? There has been no discussion that I have seen about this. BTW: I DRIVE AN ELECTRIC VEHICLE. ASSUMING THAT ALL CARS ARE COMBUSTION ENGINES AND THEREFORE POLLUTING IS SHORT SIGHTED.	11/12/2014 4:47 PM
304	Wasn't clear how survey questions related to the topic of making better connections between Metro bus service and expanded Link Light Rail. Just want a good connection between Routes 65 and 75 at Husky Stadium.	11/12/2014 4:43 PM
305	Fix Route 8	11/12/2014 3:42 PM
306	King County bus drivers are wonderful! I ride twice daily and had excellent experiences.	11/12/2014 2:57 PM
307	N/A	11/12/2014 2:55 PM
308	Later run times would be great!	11/12/2014 1:29 PM
309	Please continue to invest in Light Rail. Seattle is among the worst cities in the country when it comes to reliable public transportation. Buses are not the whole answer because they are subject to street traffic. A single North-South line is not sufficient for residents who do not live close to I-5. Please consider Queen Anne, Ballard, Fremont (especially with the boom in tech jobs here), Crown Hill, and the 522 corridor.	11/12/2014 1:26 PM
310	Regretably, the link will not replace the current excellent service between downtown and the U-district. Just as the link from downtown to SeaTac (and I refer now to the old route 194 bus) is a very poor substitute for the earlier bus service (link is slower, less convenient - especially at the airport stop - and vastly more dangerous), eliminating the 70-series (and other) buses (that I KNOW you will do to drive passenger traffic to the link) will represent a major degradation of service - a Husky Stadium stop might as well be on Mars - it's a poor comparison to on-campus, Campus Parkway and Ave/15th stops. Likewise for buses on Capitol Hill - they're already fine and obviously far more flexible than the single stop the link will make. And the new street car - cut me a break?! No one will pay to ride that just as no one pays to ride the SLUT - they just get on for free and go. Don't believe it - check it out?! Wait until the big one hits - all your toy trains will be useless.	11/12/2014 1:20 PM
311	The lightrail connection to UW should be completed on time. It should be made a transfer point for connections to many places.	11/12/2014 12:46 PM
312	I'm not sure if stations have wi-fi but it would be nice if they did... I'm glad that you are consulting the public	11/12/2014 12:43 PM
313	N/A	11/12/2014 12:43 PM
314	Don't remove bus shelters. If someone doesn't like homeless people sleeping there when no buses are running, they are crazy.	11/12/2014 12:40 PM
315	Thank you for considering our feedback. Please continue to expand the light rail as congestion increases.	11/12/2014 12:14 PM
316	Keep the busses and trains rolling abundantly! I am from LA where no one walks and cars rule. But I have been a walker and transit girl all my life. Let's be a city of the future! Thank you.	11/12/2014 12:03 PM
317	was expecting more questions on the Link light rail stations, in addition to the general use questions. Am also curious about how the stations will help be a hub for alternate transportation options (bike share, car2gos, pickup/dropoff areas, etc)	11/12/2014 11:27 AM
318	The cleanliness of stops is also a big concern. I usually avoid the stops at 3rd Ave & Pike/Pine downtown because they are filthy and are always surrounded by a miasma of cigarette smoke.	11/12/2014 10:27 AM
319	Thank you so much for seeking feedback from the public to inform your decision-making. We really appreciate it!	11/12/2014 7:35 AM

320	Light rail should have occurred decades ago, buses get stuck in the same traffic as cars and add to the congestion. Rail needs to follow I-90 and 405 and 18, then extend into communities. Not waste money going from the airport to downtown. Look at Portland and follow their example.	11/12/2014 7:07 AM
321	Build more rail!!! We need as much rail based public transit as we can get!	11/12/2014 1:18 AM
322	I know this is more of a funding issue, but the free ride zones were a great community service and helped a lot of people get around to services more easily. Would love to see them come back someday. Thanks for doing what you do!	11/12/2014 12:21 AM
323	If surveys do impact your decisions, it would be great if you'd publish results and explain what steps are being taken and why. thanks!	11/11/2014 11:06 PM
324	I really want buses removed from the transit tunnel ASAP to make Link more reliable and 71,72,73 buses to start/end in U District link to feed light rail	11/11/2014 9:46 PM
325	Available response options for questions like 17 and 19 can be misleading. You leave out the spectrum between 'somewhat' and 'strongly' agree or disagree. I probably has to do with reasonably limiting the choices, but I think you should drop the 'strongly' part of the responses and simply use 'agree' and 'disagree'. Thanks for asking and reading.	11/11/2014 9:21 PM
326	Thanks for the survey! Can't wait for rail service to continue expanding!	11/11/2014 6:48 PM
327	For the UW station, it will be very important to have comfortable, frequent, long span service from the Northeast neighborhoods.	11/11/2014 4:03 PM
328	Please keep public transportation affordable, especially for families. A trip anywhere for my family of five is now over \$20 round trip. We want to 'hook our kids on public transportation' and teach them the right thing but find ourselves driving as that is more affordable.	11/11/2014 3:34 PM
329	One of my concerns is that some areas of my neighborhoods are not safe to walk through (parks near freeways) at night, so even if the bus stop is less than 10 min away, I don't want to walk there.	11/11/2014 3:14 PM
330	I TOOK THIS SURVEY. BUT IT SOUNDS LIKE IT WAS AIMING FOR PEOPLE THAT DO NOT ALREADY RIDE THE BUS. I AM VERY HAPPY USING COMMUNITY TRANSIT, THEN TRANSFERING TO METRO.	11/11/2014 1:35 PM
331	I primarily ride my bike to work because I make it from the north end of Capitol Hill to the south end of Downtown in 8-10 minutes, whereas with the bus I find myself waiting for 10 to 15 minutes for a 20-30 minute bus ride to walk for another 5 to 8 minutes. If transit time by bus were cut down by half (from 45 minutes to 20 minutes overall) I would be extremely satisfied. Typically the bus as it currently stands is disappointingly slow and causes me to have to waste hours in transit each day that I use public transit.	11/11/2014 1:06 PM
332	Bus driver's shouldn't be allowed to NOT let you on the bus because it's crowded. Especially if people got off and there was room in the back. They need to tell the people to move down instead of making people miss their bus which makes them LATE! That is not acceptable.	11/11/2014 12:37 PM
333	Thanks for the survey and keep Transit Moving!	11/11/2014 11:59 AM
334	Will there be parking facilities or garages at the UW link station? I understand it is near impossible to have parking downtown, but I project that this area will be a major commuter station servicing the north seattle and 520 demographic.	11/11/2014 11:50 AM
335	I hope some day that the the 522 is replaced by a light rail line.	11/11/2014 11:24 AM
336	Tjthanks for the opportunity to give input!	11/11/2014 11:20 AM
337	I have no reason to go to the University Station. I will use the Capitol Hill Station to get to work downtown and to the airport. There is no other reason for me to use Light Rail at this time. Once it is extended to shopping areas North and East then I will have a reason to use it more frequently I think it was EXTREMELY short sighted to have avoided shopping areas such as Southcenter on the initial build.	11/11/2014 10:28 AM
338	Good work	11/11/2014 10:14 AM
339	You've got to improve the safety of the busses before I will ride again. Morning rides are fine, but afternoon and evenings are unsafe.	11/11/2014 9:52 AM
340	Give all buses stop light pre-emption. Don't allow buses to use wraparound ads that cover passenger windows. Ads are fine; covering windows discourages me from riding. Prohibit drivers from turning off entire light banks that dim the bus. There are other solutions to help drivers avoid glare. Riding some of these darkened buses makes it feel like there's a criminal behind every seat. Why pay for lights at all if the drivers shut them off?	11/11/2014 9:21 AM

341	It feels like the city is just doing what they want, willy nilly, without any consideration of how useful the transportation options are for the people.	11/11/2014 9:08 AM
342	I would like the Seattle Transit Blog to serve on the sounding board.	11/11/2014 8:29 AM
343	Regarding transfers: The problem with transfers is that, on paper, it may look like your trip will take only, say, 30 minutes. But you are doubling your chance of some messed up route when you have to transfer. More opportunities for broken busses, full busses, poor weather slow-downs, etc. If they were separated trains instead of busses, then a transfer system would make sense. But building a complicated transfer system into busses sounds awful. My husband <u>could</u> take a bus to the U-District and then transfer there to go to SLU, but instead he chooses to take a bus to DT and walk to SLU, sometimes taking the streetcar. A transfer in the U-District is not his idea of a good time. At the very least, all of our neighborhoods should be connected to each other. I feel especially bad for Queen Anne.	11/11/2014 8:18 AM
344	Thank you!	11/10/2014 9:20 PM
345	I am glad you are welcoming input from the community.	11/10/2014 8:28 PM
346	Keep up the good work, and please work more closely with OneBusAway to improve bus data.	11/10/2014 8:17 PM
347	An open ended question near the end of the core survey would have been nice. So I'll comment here. I care more about a good connection than wait time for the first leg, since, for many routes, I can use onebusaway or something like it to not have to wait very long. I'd be happy to transfer at the UW stadium stop if the trip to there were a little faster than the 72/73 are now through the U district.	11/10/2014 7:33 PM
348	Please don't spend more money on bus stops. The electronics just get vandalized.	11/10/2014 6:36 PM
349	thank you. Let's get transportation options moving!	11/10/2014 5:17 PM
350	I would love to see more bicycling infrastructure being built in and around downtown Seattle (like the new cycle track that was put in on 2nd Ave). I would also like to see the light rail network expanded to Lynnwood, West Seattle, Bellevue, and beyond.	11/10/2014 5:13 PM
351	Please provide buses to link my neighborhood (Ravenna/Roosevelt) to Link services at UW stadium station. Please provide bus connections to link my employer (Seattle Children's) to Link services at UW Stadium	11/10/2014 5:12 PM
352	Thanks for asking for the public opinion!	11/10/2014 4:43 PM
353	I know it is expensive and you can't do it everywhere, but the reader boards that say when each bus will arrive are very helpful. I would really appreciate a readerboard at Benaroya Hall where so many buses stop. I would also really like a shelter at Town Hall. Lots of people go to events there and the tiny bench is exposed.	11/10/2014 4:38 PM
354	thanks for asking!	11/10/2014 4:32 PM
355	We need to have systems that are near homes but that don't stop every other block. People are just going have to walk further. In most major cities you have about a ten minute walk and you get to a rail line or a limited stopping route for efficiently. I don't mind walking down a bit if I can get a good connection but most of the time it is not the fastest connection.	11/10/2014 3:58 PM
356	Do not feel heard, not the first time we have asked for more frequent service to hospital area on first hill	11/10/2014 3:01 PM
357	Your outreach was good. I hate transferring buses. It makes my ride so much more stressful.	11/10/2014 2:53 PM
358	If you want to play with the big boys, you have to be a big boy.	11/10/2014 2:24 PM
359	Don't drop the 66/67 bus. It's the fastest bus running north to south to NE Seattle. At least keep it until the Light Rail Stop on 65th & Roosevelt will open in 2021.	11/10/2014 1:55 PM
360	Appreciate the effort to reach out and know what riders are thinking or looking for	11/10/2014 1:45 PM
361	Thank you for asking for public feedback - I know its a massive undertaking, but it shows a real commitment to everyone by asking for their input.	11/10/2014 1:31 PM
362	As always, the shorter the survey the better your participation and results will be! :)	11/10/2014 1:27 PM
363	Thank you for taking the time to solicit feedback from the community, I am concerned about how we will best be able to take advantage of new transit options and hope that this process goes well. good luck!	11/10/2014 1:25 PM
364	I'm excited for the Metro Link's extension. Now West Seattle!	11/10/2014 1:23 PM
365	Thanks!	11/10/2014 1:16 PM

366	I am a dedicated transit rider. Public transportation has been my primary mode of transport for the past 25 years. I sold the last car I owned in 1994. Having grown up in Los Angeles and having had to depend on their system I have always loved King County Metro though Los Angeles is now much improved with light rail & Rapids.	11/10/2014 1:15 PM
367	I stumbled across this, and I'm not sure how many other people have had the opportunity to be in the right place at the right time. You guys should have these on buses with a return box.	11/10/2014 1:09 PM
368	I thought there would be more space to comment on how busses might be routed to the link light rail. There are not enough busses that go to Husky Stadium. If there is going to be light rail there, is there also going to be a park and ride? Where would they put a park and ride?	11/10/2014 1:04 PM
369	UX was long. Three clicks from email to survey? Just put the survey link into the email directly next time, and you'll get more results.	11/10/2014 12:59 PM
370	I hope my feedback is helpful in some way, I understand most of what I filled out is fairly obvious to you, but that's what surveys are, a window into the possibilities of the obvious.	11/10/2014 12:55 PM
371	make better service	11/10/2014 12:42 PM
372	Thanks!	11/10/2014 12:30 PM
373	Question 15 could use a little bold formatting. I couldn't tell what the difference between some of the answers at first. It was the answer about having to wait no more than 10 minutes for the first bus or the connecting bus.	11/10/2014 12:26 PM
374	I hope that Route 2 will not change other than more frequent service. Those who ride the 2 already fought to maintain service during a previous transit reduction. Now that more funds will be available as a result of the recent initiative, it seems unwarranted to change the 2.	11/10/2014 12:23 PM
375	Since moving to Seattle, I have worked for two employers (City of Seattle and NOAA) that offer subsidized transit. However, I have never heard of Metro reaching out to employees of those organizations through fairs or other means to help them understand how to use Metro and/or to show them what routes they could take. It would seem that these potential riders would be a high priority.	11/10/2014 12:18 PM
376	My impression is that transit improvements are centered in Seattle, and very little attention is paid to the needs of South King County. This, despite the fact that there is a higher level of unemployment and low-income A report from the City of SeaTac, for instance, shows that there is a greater number of people living in poverty among the suburbs than there is in Seattle (80,000 in Seattle, versus close to 150,000 in King County without Seattle). Yet, it is Seattle that gets the majority of transit improvements. Studies back up my assertion: http://www.federalwaymirror.com/news/213201141.html# http://www.brookings.edu/research/books/2013/confrontingsuburbanpovertyinamerica http://confrontingsuburbanpoverty.org/wp-content/uploads/metro-profiles/Seattle-WA.pdf The middle class outside of Seattle itself have long been the bread and butter of tax revenue; with the economy and increased poverty we see around us, we are becoming less convinced that services that flow from King County government are geared to our needs and the needs of our impoverished neighbors--if they bother to flow at all. This concentration on yet another Seattle transit improvement project seems to be just one more straw on our camel's economic back.	11/10/2014 12:13 PM
377	I like that you're giving folks several different ways to participate. I'm taking this survey, but also plan to attend a community meeting and may apply to serve on a sounding board. Thanks for making the effort!	11/10/2014 12:07 PM
378	I appreciate the opportunity to learn more about the Link extension. I only heard about this survey through a neighborhood group. Signs at bus stops would be a good way for visibility & participation of regular commuters. Please pass on these concerns: We do not want to lose our bus service as the link comes into use, the way the express buses to the airport were replaced by the Central link! Also, please try to make the transfers between the link & bus easier. It is not clear to new users about how to use the Orca card. If you don't have an Orca card and want to transfer from the bus to train downtown, you have to go up to the mezzanine (why no ticket machines on the platform level???)	11/10/2014 12:00 PM
379	I think your outreach is great, but I've given the same feedback SEVERAL times and there seems to be nothing done to address the situation, which is frustrating.	11/10/2014 11:48 AM
380	the routes are established. Now you just need to coordinate parking and bus transfers...	11/10/2014 11:41 AM
381	Please improve service and make it make sense for ALL RIDERS!	11/10/2014 11:39 AM
382	I feel public transportation is very important for environmental reasons as well as serving the community and those who can't afford to own a car or drive. I feel cutting bus services is not the answer. Thank you.	11/10/2014 11:26 AM

383	It might make sense to have a tiered transit system for people willing to pay extra for extra service. This could help supplement costs of people who can't afford even a cheaper option. I'd gladly pay more for a less crowded, more reliable service to get me to work and back.	11/10/2014 11:25 AM
384	Excellent questionnaire. It always surprises me how much I like Metro and benefit from it until I answer questions like these. One comment: you never asked if I was on a senior pass. That makes a huge difference.	11/10/2014 11:15 AM
385	more light rail!!	11/10/2014 11:13 AM
386	Thank you for taking the time to listen to the people that use the transit system the most.	11/10/2014 11:11 AM
387	In order to get more people involved in the process (surveys, outreach, etc), can you offer any immediate incentive? Maybe there are partnering or sponsoring options? "Receive a 30% off coupon at ____ company" for filling out this survey. Based on my marketing experience, the sad reality is that people often need these kind of short term incentives to participate in activities with long-term benefits.	11/10/2014 11:09 AM
388	I generally choose to ride the bus when I am walking and it starts raining.	11/10/2014 10:55 AM
389	Overall it has been good and has inspired me to be involved in something I wouldn't have normally. The web address in the text alert was incorrect / got cut off so I had to search a bit.	11/10/2014 10:39 AM
390	Keep up the good work! Good job with improvements so far.	11/10/2014 10:37 AM
391	Enough with the community outreach. Just build a functional system.	11/10/2014 10:24 AM
392	Can't wait for it to open! Glad it's 2016 because I read somewhere 2020.	11/10/2014 10:13 AM
393	There isn't a good way to get from Ravenna and say 86th to Sandpoint way and 45th. It would be nice if a bus went all the way down 25th Ave.	11/10/2014 10:13 AM
394	Please, please, please focus on reducing the need to transfer. This is the top factor for myself and all of my friends in our decision to use transit. If we have to transfer, we won't use it, even though we want to. There are places I just won't go in the city because I have to transfer.	11/10/2014 10:11 AM
395	The E Line is a bit of a hot mess! It's very fast, which is a nice improvement. However, there are a whole host of drug addicts and folks off their meds that ride this bus. I do appreciate the fare enforcement folks appearing. We had to unload all the people at 90th & Aurora one time (going Southbound) so that the police could remove one woman that was screaming and being abusive. I do not feel very safe on that bus going Southbound, and this is at 11:00 a.m. Northbound at 8:00 a.m. is OK.	11/10/2014 10:10 AM
396	Please expand transit to think of those that travel from say Issaquah to Redmond. If you put an express bus in that direction. Less local service, more express service on the East Side.	11/10/2014 10:05 AM
397	Thank you for creating a survey for public feedback! I am very very excited about the prospect of LINK service from Capitol Hill area to other areas of Seattle.	11/10/2014 10:03 AM
398	more buses from lake city to seattle or stagger who can ride which bus as they get packed. link services from lynnwood and bothell and further north would be great.	11/10/2014 9:58 AM
399	Would love to see something about plans to link West Seattle to U-Link soon. I understand that the tunnel project strongly impacts the traffic flow to and from West Seattle to downtown but commuting to work downtown from WS has been pretty miserable. Additionally, Bertha being down is ridiculous for an already costly project. Understand that it's not Metro Transit's fault, but would like to see better mass transit options for West Seattle residents in motion soon. Life is too short to grumble to get to work. Plus, if we have something quicker than buses on the road, would reduce traffic. I'm from the Bay Area and am amazed that the Bay Area has had BART for so many years. It's efficient and doesn't put more traffic on the roads. You have many ride options throughout the city, including the downtown ball park. That's good planning. Seattle, for being so ahead of the curb in terms of environmental and technological innovations is really behind and embarrassing when it comes to mass transit. It's slowly improving, however, there's a lot of room for improvement.	11/10/2014 9:49 AM
400	If I can't trust it, I won't take it. On time, frequent, safe.	11/10/2014 9:41 AM

401	I found out about your survey via the capitol hill blog and was concerned as it only meantioned your outreach for capitol hill riders. I was relieved when I actually went to the survey that you were also taking UW station feedback. I would encourage you to get more information out about the survey in the UW area and surrounding neighborhoods as we are not as organized as capitol hill but our bus service is not as good (if you live outside of the 71, 72, 73 service area). There is a lot of potential to restructure your service to get NE Seattle riders on to the Sound Transit Light Rail and I hope that, even though you are different agecies, you will work together to do what is in the best interest of the riders. Transferring to light rail will not be a deterrant the way it is now as light rail will run so frequently and get us to downtown so fast that no one in the future will care as much about transfers as we do now. Also, waiting in a light rail station will be much more pleasant than waiting in the wind and rain at a Metro bus stop. I hope that you will mention the ease of taking light rail in your promotion/communications about the changes in your Metro bus service and how transferring to light rail will be nothing like transferring to a bus.	11/10/2014 9:39 AM
402	some of the questions were confusing as to what we have done in the past, present or future.	11/10/2014 9:17 AM
403	I think transit supervisors and administrators have never spend hours trying to get around on transit. One day, last train was cancelled and a supervisor was at 2nd and JAckson, sounding like it was his idea to send a bus to take us south, when in fact it was the normal scheduled bus which is always crowded anyway. Standing room only. no thank you. The amount of transfers are incredible for commuters to get from point A to point B. Trains run on time, however the buses commuters are trying to catch never never never run on time. The buses do not even start their runs on time. For example I take the train to King Street station, train arrives on time, however, in the tunnel the first stop for the 71,72 or 73 is International District and the 71,72,73 do not start their runs on time. 73 should load at 0707am, however it is sitting and parked waiting to start its run, because the driver is taking a break between runs. A break he/or she is allowed by law, however the run DOES NOT start on time for commuters transferring. Transfers are a big problem, when you are transferring to a late bus, which in turn makes you late for the next bus you are transferring to. Transfer transfer transer is a big problem.	11/10/2014 9:15 AM
404	Seattle needs a transit system that is not susceptible to traffic or inclement weather.. a.k.a. a subway. Not more buses.	11/10/2014 9:13 AM
405	Please reinstate the #47 route. The neighborhood north of Mercer and west of Broadway has physically challenged people and it is a hardship to walk East to Broadway or south to Pine. Thank you.	11/10/2014 9:03 AM
406	I'm a new transit rider, and I look forward to supporting the program, educating myself to the process, and exploring my options.	11/10/2014 8:50 AM
407	Very excited and happy that Link train will be extended to Capital Hill and UW.	11/10/2014 8:35 AM
408	Why bother.	11/10/2014 8:29 AM
409	What are you doing to consider how many students travel through Capitol Hill to get to UW but don't live on the Hill? Example: Rainier Valley, Beacon Hill, Central District? I only read about this on Capitol Hill News. I was never a recipient of outreach and I am a UW student.	11/10/2014 8:23 AM
410	I see NO concern for riders on busy routes when cuts hit all routes are cut. This is stupid if low use routes were eliminated Metro revenue would be enhanced and fewer cuts would be needed. The 12; 3/4 and 7 are standing room only while other busses appear to be nearly empty. I dont understand why the 3/4 or 12 are not using articulated busses. MORE RIDERS = MORE MONEY.	11/10/2014 8:16 AM
411	I hope we're looking at other cities that use community transit well (NYC, London, etc). We don't need to recreate the wheel but we need to be looking 20-30 yrs ahead not responding/reacting to our current problems. People use their cars in the NW b/c transit is slow and not convenient. People in NYC use it b/c it's reliable and gets people where they need to be 24 hrs/day.	11/10/2014 8:15 AM
412	The Bus service in Seattle is a very sad example of failed public transit. Seriously, got of N.Y. and get an idea how it is done!	11/10/2014 8:06 AM
413	Reach out to community associations when plans for community input affect their neighborhoods.	11/10/2014 7:44 AM
414	This is nice to request feedback. I got you truly user it to move forward and make decisions. It would be nice to see the results on your website.	11/10/2014 6:59 AM
415	Seattle has a reputation for being a place where future couples meet on the bus. The new buses have unflattering 'daylight'/6000+ kelvin lighting. Future couplings & generations depend on Metro switching back to 2700k or lower lighting — this isn't snark. I'm serious. The new lighting makes everyone look terrible. There is a reason restaurants use 2300k lighting — people look much better. =) I think Metro/Soundtransit would make better decisions if Metro/ST employee's relied on the service — sometimes I feel like I'm stuck in a system which is engineered according to an academic ideal vs a feet on the ground reality. I'd much rather have planners who used the system make decisions vs focus groups made up of people with time & axes to grind.	11/10/2014 1:13 AM

416	Transit can not meet the needs of every special interest. Catering to some leaves others dissatisfied. Building a great transportation system should aim to fulfill a general interest in quality mobility choices that offer flexibility and certainty. This will be beneficial in the way we design it to be and someday in ways we can't yet imagine.	11/10/2014 12:51 AM
417	this survey is about link? i had no idea. who wrote these questions? please hurry up with the roosevelt station.	11/10/2014 12:50 AM
418	The bike racks are TOO HARD TO USE. They are in terrible condition. When I was still able to bicycle and was healthy, I *still* didn't have the strength to open some of those rusted, sticky, busted bike racks. And it's not exactly comfortable standing in the middle of a busy street in front of a running bus not being able to get the rack down or the compression tire holder open. In fact, it's downright intimidating. A couple of times, a bus driver has been kind enough to help or I wouldn't have been able to use the bus. Once, the tire holder stuck--and stuck and stuck--and then BAM! It let go, and my bicycle flew off the bus into the street. Have a little respect for my gear, please.	11/10/2014 12:48 AM
419	Generally good, can't wait to finally use link when I go to the U District!	11/9/2014 11:22 PM
420	People who make these decisions need to ride the bus on a regular basis and survey people who are on the bus.	11/9/2014 9:17 PM
421	Keep up the good work! Thanks for asking for feedback.	11/9/2014 7:37 PM
422	Thank you for helping improve our City!	11/9/2014 6:57 PM
423	King County and King County Metro have routinely screwed Southeast King County, so I have no confidence that anything will change.	11/9/2014 6:33 PM
424	This is a personal plea: Please bring back our bus stop on Broadway Northbound across the street from Seattle Central College, street address 1750 North Broadway. Eliminating this stop and the adjacent one has been a huge inconvenience for all SCC commuters, and sad to say but only about 1 bike per hour is using that bike lane, if that.	11/9/2014 5:34 PM
425	I had my email on your mailing list, but soon removed it as I was receiving too much mail weekly. A mailing list for those wishing to complete surveys would be a great way to get feedback without emailing notifications daily about every decision.	11/9/2014 3:46 PM
426	Thanks for asking.	11/9/2014 1:54 PM
427	I think y'all are doing a very good job under very difficult circumstances. All things considered and compared to other cities where I've lived, transit options here are generally quite good. I'll go to the eastside more when the train goes there. Right now I hardly ever go because it's a hassle.	11/9/2014 1:02 PM
428	Metro is our main form of transport. The Regional Reduced Fare makes it possible for us to use Metro often. The general high quality of Metro service makes it both convenient and pleasant; you have a lot of good people working for Metro!	11/9/2014 12:07 PM
429	Feeding busses to and through the UW and Capitol Hill stations will allow for good alternatives to get to and from downtown during the most congested hours but doesn't necessarily help with corridor travel time if a bus has to detour. Priority to busses needs to be given with consideration for how they are able to utilize the service provided by LINK Light Rail that can enhance existing service (not replace existing service). Trains are great for accessing highly congested areas like Downtown and the stadium district, but we still need great bus service because of the coverage they offer.	11/9/2014 10:20 AM
430	Now it is time for Metro to tell us what it plans - and what it can and cannot do. It's difficult to respond when I don't know what is already settled, and what the parameters are that you are looking at as to how much change is feasible. For example, Seattle still needs stronger, more frequent crosstown Metro service - but that's not the focus of this questionnaire. I'm really glad to at least have the opportunity to participate here and look forward to hearing a lot more, in detail, from Metro about forthcoming changes, especially to the way you will be handling the streetcars on Broadway. Thank you.	11/9/2014 10:15 AM
431	I lived in Seatac when Link was added in. I watched the slow death of transit in that region, starting with the 194, then the 174, the 140, etc. Seatac was screwed over when Link went in. For Pete's sake, do not make the same mistake with Cap Hill and the UW. Do not revise the busses. Do not remove other Seattle/Cap Hill routes. That redundancy is good. It is desired. It is needed. Please do not make the same mistake twice. Especially since in the future you'll have to make these choices on the even more fragile Seattle-Bellevue corridor in the future.	11/9/2014 10:03 AM
432	This survey is long and ungainly, plus not very mobile friendly. It's not going to be very useful to you. The self selection of the ppl taking it will be problematic. I'm sure you use other methods, but it makes me worry, because this survey could be much much better on its own, too.	11/9/2014 9:41 AM

433	I hope that the process makes the city, county and state realize that transit requires greater prioritization over polluting and dangerous vehicles which cause congestion. We cannot grow into a world class city without investment in world class infrastructure.	11/9/2014 9:33 AM
434	Make public transportation more affordable and more people will use it!	11/9/2014 8:46 AM
435	Waiting for a bus at Union and 23rd can be very scary. You need to do something about this. It really discourages transit users/	11/9/2014 6:37 AM
436	UW Huskey Stadium, Montlake flyer stop inegration is a huge clusterfuck! Thanks to all of you for 'not getting it'	11/9/2014 3:11 AM
437	1.) Pkease eliminate redundant routes as much as possible. 2.) Please don't force eastsiders to transfer at HUSky Stadium when the U-Link opens (I heard that's an idea that Metro is entertaining) 3.) The 49 should be terminated somewhere in Capitol Hill when U-Link opens. The 10 & 11 would offer service along E Pine St and Broadway is already walkable as it is from E Pine St. The 43 should be left alone beacuse there is a demand for ridership alond E Olive Wy and the west side of Capitol Hill.	11/9/2014 1:55 AM
438	This is a laudable effort. One thing that Metro needs to do is a strategic planning where it starts from a clean slate, planning routes and stops as if no sytem were already in place. Lots of routes may have made sense in the past but are not optimal today. Also advocate for a change in State transportation rules in that the vehicle with the least environmental impact has priority over the one with the most. This will, amongs others, result in systems were buses get green lights, have the right to pull out of a stop without waiting and have priority lanes where possible.	11/9/2014 1:31 AM
439	STC should rent some parking spaces at UW lot so NE seattle residents can access Stadium Station. Then run shuttle behind stadium to train station avoiding Montlake car/truck traffic congestion. ST touts ACCESS and RIDERSHIP as important so help us NE seattle people get to station. Please.	11/8/2014 10:51 PM
440	please get dedicated lanes for buses. solves many problems.	11/8/2014 9:49 PM
441	YAY!!!!!!!!!!!!!!!	11/8/2014 3:37 PM
442	I think the reason so many people complain, and aim their complaints at irrelevant things (anti-management comments,complaints about salaries), are because we don't really know what ridership/route data, decisionmaking processes, and financial decisions are truly involved. If it's a publicly funded system (which I support) I think we would benefit from more transparency. I would love to be able to use the system I contribute to, regularly.	11/8/2014 1:25 PM
443	Please set up a community meeting through Group Health. Group Health serves a lot of the older "lifetime" members of the Capitol Hill community that are not represented by the young commuters passing through from Broadway to UW.	11/8/2014 12:36 PM
444	Restructuring of service is definitely needed. Certain corridors are over served by transit which I believe causes others to be underserved. Routes 8, 43 & 48 are all very frequent routes overlay each other. Route 43 could be eliminated and its service area easily served by routes 8, 48 & 49 especially with the Link rail coming. The 43 could be turned into a rush-hour route.	11/8/2014 12:27 PM
445	I have done these types of surveys before and saw no change, so I am skeptical about its effect.	11/8/2014 12:02 PM
446	I love public transit! Thanks for keeping it alive, affordable & useful!	11/8/2014 10:52 AM
447	Enforce driver rules, e.g., a SB 36 stopped third in line on 3rd Ave then departed passing outside other two stopped buses. This caused me to miss this bus (I am mobility impaired but can walk slowly) I was boarding a NB 36 at VA and a garbage can prevented a wheelchair from aligning directly onto the ramp. Other patrons were needed to assist the chair in getting onto the ramp. This was the fault of (1) the driver by stopping opposite the garbage can and (2) of Metro by improperly positioning the garbage can in the ramp deployment area. the can could have been placed on the south end of the shelter. On same trip, the driver made an unscheduled but expected stopped just west of Union Station to get a drug delivery. Have you lost control of your workforce or are the unions just too powerful for you to enforce ny rules? . These events occurred during "disability awareness month/week". What good is all your planning if there is no management attention or employee supervision.? Most Metro drivers are very good but you have lost control of the bad ones.	11/8/2014 10:50 AM
448	I care so much about Metro, and want it to be awesome for everyone. Thanks for listening!	11/8/2014 10:04 AM
449	I'm concerned that there will no longer be enough room for bicycles on the light rail once it goes to Husky Stadium. I plan to bicycle there to catch the light rail to IDS but fear there will be far more bicycles than you expect. After all, the Husky Stadium station is right off the Burke-Gilman Bicycle Path.	11/8/2014 9:33 AM
450	Even more busses are needed for the 36 route on Beacon Hill!	11/8/2014 8:52 AM

451	Email could be a little more simple. It was clear enough to me, but I think it could be streamlined.	11/8/2014 7:06 AM
452	Specific suggestion -- re-route the end of the 60 from Broadway to John to Bellevue to a terminal spot where the 47 used to stop. Route then to Summit, John to Broadway. Would provide coverage for the transit wasteland the loss of the 57 left, would not affect other riders nor greatly extend the 60 route. Advantage would be a direct ride to Streetcar/Light Rail for riders along Bellevue and Summit (or ability to transfer to 8/43 on John/Olive).	11/8/2014 4:26 AM
453	Please don't weight so heavily the loud opinions of certain community groups who don't want any service pattern changes. Make the difficult decisions and make the service more frequent, reliable and gridded!	11/8/2014 12:29 AM
454	Thanks for your work to do this! I appreciate you asking for--and listening to--rider input. Your fan, Erika Kinno	11/7/2014 10:00 PM
455	I am strongly against reducing direct bus service to downtown in favor of connecting to Light Rail in the Roosevelt neighborhood.	11/7/2014 9:14 PM
456	I can see how having connecting buses or transportation options could be efficient. However, I find that switching buses at the Bellevue Transit Center is not ideal - often caught in rain (many areas uncovered), have to wait for bus caught in traffic, and in the later evening (after 8 pm) it feels deserted. I do feel more safe there than I feel at the Renton Transit Center.	11/7/2014 8:42 PM
457	listen less to the transit maniacs & more to the regular office commuters you should serve & pay your taxes.	11/7/2014 8:25 PM
458	Without making it faster (i.e. more appealing) to take transit, people will keep driving. Plain and simple. We need bus priority lanes, reliable service and busses with capacity to make it seems better than driving.	11/7/2014 8:10 PM
459	Thank you for asking our opinion and showing that you are working to improve service.	11/7/2014 8:06 PM
460	Listen to what people want - don't just decide on your own what to do.	11/7/2014 7:17 PM
461	Please listen to the people!	11/7/2014 6:00 PM
462	This survey didn't have any detailed information / ask me about my opinion on the layout of routes / transfers around the Link station. This makes me uneasy (there's someone at metro who thinks that the 271 e shelby street to montlake freeway station transfer is acceptable; it's not, due to sheer distance, time penalty (that ramp! randomly clogged!), and declivity) about the fate of my travels.	11/7/2014 5:40 PM
463	The one thing I'd hate to see is a cut to service on the Hill after the train goes in. Specifically I'm thinking of the north end of the hill, in between the two link stations. That's got a lot to do with where I live of course, but still, I'd really hate to see the 49 or 25 in particular get less frequent or otherwise be compromised.	11/7/2014 5:23 PM
464	Thank you for asking for our feedback. Please take it into account!	11/7/2014 4:52 PM
465	I don't think decision making process for bus cutback and now increased bus service since funding initiative passed has been transparent.	11/7/2014 4:32 PM
466	The tributary area affected by the transit service changes are significantly greater than Capital Hill, and touch surrounding neighborhoods. Please extend your outreach to First Hill, especially the major institutions, employers and residential facilities on First Hill that are so transit dependent.	11/7/2014 4:24 PM
467	I hope that I won't have to take the bus all the way downtown to use Link from the UW.	11/7/2014 4:22 PM
468	It's essential to have buses coming more often and on time to get people out of their cars. Right now, it is pretty unpleasant riding the bus (Rte. 25 and 49) because the buses are very noisy, seats uncomfortable, hard rides with lots of pot holes in the streets, and no air conditioning during the summer months. These buses are also overheated in the winter months. Most riders are bundled up and it's way too hot on the buses!!!!	11/7/2014 4:06 PM
469	Suggestion: could metro consider smaller, more frequent buses/vans for routes with low ridership. For example, I rode the 25 from downtown to home one weekday afternoon and there were only 3 passengers. I understand that is not cost effective. would a smaller vehicle work for lower ridership times/routes.	11/7/2014 4:01 PM
470	I would like to be kept informed about how connecting service will be planned for the new Link stations	11/7/2014 3:50 PM
471	Not about outreach. However, I do not mind making transfers when making a trip via public transit. However, I believe that if transfers were more reliable (not arriving at transfer point to late that you can't make the transfer), people would be more willing. I much prefer reliable service with transfers to waiting for up to 1/2 at a bus stop to catch my first bus because it is so late to arrive. Shorter routes seem like a possible solution to that problem since they will be less likely to be so late and that would make transfers easier.	11/7/2014 3:42 PM
472	Damn, this survey is long. Hopefully the feedback helps though.	11/7/2014 3:23 PM

473	How many minutes would you be willing to spend getting to transit (walking, biking, or some other mode) that offered very frequent transit service (i.e., service that comes every 10 minutes or less)?	11/7/2014 3:12 PM
474	A way to provide greater confidence in buses would be to have up to the minute reader boards on bus locations and ETAs. The "one bus away" app sometimes works and sometimes doesn't. Relying on it to choose when to get to the bus stop is iffy at best.	11/7/2014 3:11 PM
475	I HOPE SO!	11/7/2014 3:04 PM
476	none	11/7/2014 2:32 PM
477	GO METRO! GO SOUND TRANSIT! GREAT JOB!	11/7/2014 2:07 PM
478	We feel that, over the past few years, we have been totally ignored when expressing our concerns about the hopelessly-overcrowded 71, 72 and 73. Try riding them some time. Also, I realize that Sound Transit, King County Metro, Snohomish Community Transit, Pierce Transit, and Everett Transit are all separate entities. Perhaps it would be better to combine them into one system and minimize the bureaucracy. Finally, we keep hearing about lack of money for adequate transit. Why is it then that we have so far spent more than \$4 million on the public defense and prosecution of accused cop killer Christopher Monfort, yet, when it comes to providing adequate transit that would help a lot of people, there is allegedly no money? Why?	11/7/2014 1:49 PM
479	If you don't duplicate the light rail service and just focus on having your routes go through neighborhoods and stop at the nearest light rail stop then go back, I would believe taking time to share my views would result in better decisions but as it is you currently duplicate service and waste resources so why would you change now?	11/7/2014 1:37 PM
480	RUN ST3 in 2016 all Light rail!	11/7/2014 1:16 PM
481	Please continue to make the system efficient by: 1.) cutting unproductive trips - especially those late on Sunday nights (i.e. the last 71/72 running South, also the 255 running West on Sunday night) 2.) Cutting unproductive or redundant routes 3.) Investing in customizing & planning service for each route rather than implementing broad, cookie-cutter planning policies.	11/7/2014 12:40 PM
482	Although I fell these surveys are more for PR and the perception of public involvement I still appreciate being able to voice an opinion. Maybe occasionally this sort of survey will drive policy. Thanks.	11/7/2014 12:38 PM
483	I know that my responses do not directly impact service planning in Seattle. I am, however, a voter and taxpayer. I believe that staff at King County & Sound Transit should know how poor the service provided is in some locations. I live in a master planned community of over 4,000 units that consists of a mixture of apartments, townhomes, and single family homes, with the majority of homes having a lot size of less than 5,000 square feet (less than 2,000 square feet if you include the condos & apartments). A single road snakes through the community with all homes being located walking distance to this road. There is certainly a critical mass, with our population probably exceeding 12,000 people, and a feasibility with the road network and walkability, to provide all-day bus service to our community. There is a need, as well. With all of our city and community services located in downtown Auburn and no neighborhood-anchored services, we have kids, teenagers, and senior citizens who need to get places and do not have access to a car. I have a family member who was rejected by PT Shuttle/KC Access because he wasn't disabled enough. He's had multiple car accidents in the past year and his driving ability continues to decline. They told him to use the public buses. Again, these are non-existent. He would have to leave to run errands in the early morning, spend 8 hours in downtown Auburn, and wait until the evening rush hour to return home. The senior center is in downtown Auburn. The public libraries are located in downtown Auburn & Pacific. The teen theater operates at "The Ave Theater" in downtown Auburn. The post offices are in downtown Auburn & Pacific. Our community has a single church, with most religious organizations operating in the surrounding communities or in downtown Auburn. Our neighborhood has no doctor's offices and most reputable specialists aren't even available anywhere in Auburn. How are the people who most need to get to these services supposed to utilize them when the neighborhoods they live in are not served by a public bus and services like Access & Shuttle reject their applications? Why exactly should I continue to support and subsidize public transit when it doesn't serve me and doesn't serve the most vulnerable populations even when they climb through the mountains of paperwork required just to apply?	11/7/2014 12:36 PM
484	The route 25 was on the original list of routes that would be cut due to budget constraints. It seemed odd to me that this route would be discontinued just when Light Rail would be opening in the next two years. It may need to be configured differently but the 25 seems strategic to feeding customers to/from light rail.	11/7/2014 12:32 PM
485	Make a place to sit at every bus stop. Have the 66 northbound stop at union. The only place it stops on third is at Pike with very few places to sit and quite a very good crowd to wait with. It is scary at times.	11/7/2014 12:29 PM

486	Because U-Link will be serving Husky Stadium area and not the U-District proper, I think it's important that the U-District (Ave. 45th, 50th streets etc) still has direct service to downtown, at least until the 45th st station opens. Also, where possible, please don't delete bus routes that mirror train routes (42 vs Light Rail, etc), because those are two different types of transportation needs. I hope in the future, it'll be possible to create "shadow routes" for the RapidRide, so the rapidride won't have to stop as much, and there will be local service supporting the corridor, like in LA and many other cities with BRT. And this is less important, but I would absolutely love to see a route from Capitol Hill to Northgate, even if it didn't come very often.	11/7/2014 12:17 PM
487	I hope with the arrival of University Link that the routes 43, 48, and 49 won't be completely wiped out. Obviously University Link will replace those routes for trips between Capitol Hill and the University District, but it's nice to have a connection to North Capitol Hill (10th Ave E & E Roanoke) as well as Montlake and the Central District, which could be lost if these routes are deleted.	11/7/2014 11:59 AM
488	You might want to consider having someone with survey authoring expertise draft your next survey. These questions were, in many cases, too ambiguous, or offered too many options, or asked more than one thing in a question, to give you clear, actionable results. You should have used ratings and rankings in places, and used two separate questions for the "where do you go on transit/where do you want to go on transit" question. You also probably should have asked about why people take transit: to get to work, school, social events, if people use transit with children, and a number of other questions that would have given you some important information about what motivates people to use transit vs another form of transportation. For the the question about modes of transportation, and bus routes, you probably should have clarified a time period like "in the last 30 days, last 90 days" and also asked how often people use particular modes of transit. if i drive my car once a week alone, and take the bus 2x a day, that's very different than if i take the bus once a week and drive alone 2x every day, but you wouldn't know from what you asked.	11/7/2014 11:04 AM
489	Thank you!	11/7/2014 10:56 AM
490	The paper sheets that were attached to bus stops got soggy very quickly. Those work better when they are mounted on the wall of a shelter. I am thinking specifically of the one in front of 4545 NE 15th Ave, where there is a shelter but a flimsy paper notice was hung on the pole.	11/7/2014 10:54 AM
491	Take the parking lot at husky stadium and turn it into a transit center. Make a transit only lane on montlake.	11/7/2014 10:48 AM
492	BUILD MORE GRADE SEPERATED RAIL!	11/7/2014 10:34 AM
493	Everyone who works on this should take public transportation most of the time and ideally not own a car. Then you would understand what it is like to try to get to appointments, friends' houses (I basically can't be friends with people from Ballard, Wallingford, Fremont, etc. because I can't get to their houses and back to Capitol Hill to do dinner or whatever using the bus), entertainment, etc. using the bus system. People should be able to live without a car here, but if the folks planning public transport don't live that way, then no number of surveys is going to allow you to really get the issue.	11/7/2014 10:10 AM
494	I'm surprised there weren't more questions that directly asked about how Metro should provide connecting service to the U Link stations. For example:"Would you use Link light rail more if existing Metro service were to be modified to provide more frequent connecting service to future light rail stations? (A: Yes)", "Which bus routes should offer more frequent service to connect you to light rail? (A: 8, 10, 43)", etc	11/7/2014 10:02 AM
495	I only heard about this because I was bored and reading blogs at work... you gotta get this out to more people!	11/7/2014 9:58 AM
496	Thanks for welcoming such detailed information! I am very, very excited about the new station. We bought our home specifically to be near the new stop - being car-free is a huge priority for us. We can't wait!	11/7/2014 9:50 AM
497	Work with other agencies to make the 3rd and Pike bus stops more patron friendly. There is never a place to sit down or to get out of the rain while waiting for a bus.	11/7/2014 9:49 AM
498	Build more transfer stations, hang more electric wire and buy more electric buses, buy more hybrid buses, completely reform routes and scheduling.	11/7/2014 9:41 AM
499	I think it is a shame that it takes 1 hour and 15 minutes one way to commute to my job at the University of Washington. I live on Beacon Hill only 7 miles from UW. It's sad that it would take me 2.5 hours round trip to commute from home. I drive and park near a bus stop instead.	11/7/2014 9:35 AM
500	Some of these questions were hard to answer - like did you really want to know every bus route I have ever ridden in the past? Wasn't sure why that was relevant. Also I think it's important to consider multimodal trips. Bike to transit could be a real viable option for more people, if we planned for it.	11/7/2014 9:33 AM
501	Please take to heart my comments re: crime and vagrancy around major transit centers and put adequate funding behind the problem to successfully address the issue. Thanks for the opportunity to complete this survey.	11/7/2014 9:26 AM

502	My answer to #19: I hope so!	11/7/2014 9:24 AM
503	Why weren't all buses listed in the initial questions? I ride the 41 98% M-F, but have also taken the E bus and have the 66 available when 41 is stuck by the tunnel.	11/7/2014 9:22 AM
504	Sometimes I get the sense that you are asking for opinions "just for show", but I sincerely hope that's not the case.	11/7/2014 9:07 AM
505	this is just a generic survey - not specific to the hill. it is thoroughly torn up and disheveled - from one of the most efficient bus lines to a big question mark. safety is sure the key!	11/7/2014 9:07 AM
506	thank you.	11/7/2014 8:53 AM
507	The action of Metro will indicate whether you pay attention to feedback from riders. You should include the ATU in your efforts to outreach riders. They deliver direct service. And they need time for bathroom breaks and rest breaks. They are the first line of safety.	11/7/2014 8:52 AM
508	Hi - I dread being forced to take the LightRail from Roosevelt station to downtown. currently the 64/76 provide a relatively straight shot to work (although door-to-door driving is faster) To take a bus ride to the light rail - then back track to UW and then be dropped farther from my current stop would be a step back in service. How about having managers at bus stops to talk to people. Often surveys only pick up what you want to hear and they can easily miss nuances from real lives.	11/7/2014 8:49 AM
509	Even though it does not benefit me personally, I hope you will prioritize service to lower income and historically POC neighborhoods, whose residents are less likely to be able to fill out smartphone surveys on the morning commute and which would make a larger community impact than improving my already-good North Seattle options.	11/7/2014 8:45 AM
510	It's fine - keep up the good work. As far as outreach - you seem to be missing the chance to brand kids because you charge them for using the bus. Make it free to kids under 18 so that they get comfortable using the transportation system. The school district is making the same mistake with school sporting events - kids should be allowed to attend home games for free so that they become ardent alumni who stay in Seattle and continue to support their community. Easy math! Consider what community building is about.	11/7/2014 8:42 AM
511	Thank you for all you do.	11/7/2014 8:42 AM
512	Another brief comment/survey period once initial network concepts are released, please. Keep up the good work	11/7/2014 8:41 AM
513	Thank you very much for this survey. I have an additional concern: cost. Right now I barely make ends meet & I am wondering if bus fare will increase again soon to accommodate recent upgrades. I also worry about the tax rate in Shoreline, it is already very high. I wonder how much the new rail will cost to ride, and if it will leave out segments of our community due to its cost. I wish that there was a better subsidy for all the UW workers who use Metro, right now the bus pass takes a big chunk out of my pay check, and I am not alone. Thank you again for the opportunity to share my concerns.	11/7/2014 8:39 AM
514	For the most part, Metro and Sound drivers are friendly and courteous, and drive really well in heavy traffic and bad weather. I really hate the new Metro buses that have the smaller, narrower seats. I'm actually a fairly slender person (I'm 5'9" and 155 lbs), and even I feel cramped in them, so no, I'm not exaggerating. Please stop ordering smaller seats and go back to the old size, which is small enough.	11/7/2014 8:30 AM
515	Questions 8 and 9 assume the option to choose the bus. I am one of many who don't have the option; I live in the city, don't own a car and can't afford to use taxis. I dislike the assumption that public transit is one of a variety of options for everybody. I'd much rather see planning on the assumption that public transit is the only option in the city.	11/7/2014 8:29 AM
516	Thank you! Lite Rail is urgent to UW. Need trains every 5 minutes between 4pm and 6 pm to go downtown. Keep the stations "far apart" to maintain express feature! Current lite rail is great!! I use it daily. I look forward to lite rail from Rainier Beach, all the way to UW daily!	11/7/2014 8:25 AM
517	keep up the good work; about time we become more proactive	11/7/2014 8:23 AM

518	It is unclear to me exactly how Metro has historically made transit decisions but I have NO EVIDENCE it has been based on community input such as this survey. I believe these surveys are to serve a 'regulatory' purpose (to be able to say there was public notification) and that Metro will do what it's staff & administrators want to do. Evidence? Look at the last funding election where Metro administration was crying 'we'll cut significantly', then fund funding to maintain many routes/schedules, did not improve frequency on certain routes as was promised, etc. Metro administration has very little public credibility. Contrast this to Sound Transit (bus, NOT rail) - deliver good service at what seems to be an appropriate cost. Rail service outrageously expensive for what has been provided thus far - service on BN tracks. It would have been cheaper to PAY those folks to drive - very low use relative to the cost.	11/7/2014 8:14 AM
519	I don't have any real confidence that the feedback will be considered in any meaningful way. What might help with that is if some changes that came from community feedback were explicitly and loudly advertised as being the result of community feedback? The change I'd really like to see in Seattle Metro is surge pricing. If it was free or near free to ride the bus outside of peak times, I'd ride it more and I bet other people with flexible work schedules would shift their work and meeting hours outside of rush hour times. Since Metro's costs almost certainly are entirely driven by trying to provide needed capacity for peak times like rush hour, it might cost very little to shift to a surge pricing model. Please do consider this and pass the suggestion on to others, thank you.	11/7/2014 8:08 AM
520	Light rail - whether it helps me will depend on where it goes in the city. I would like an easy way to the airport from my home in white center.	11/7/2014 8:07 AM
521	I live on Capitol Hill. Did I miss the question about where I live? I don't think I saw it.	11/7/2014 7:58 AM
522	Providing real time arrival times at bus stops would also make me use the bus more.	11/7/2014 7:23 AM
523	Sorry, you can't change my history of having my opinions/thoughts/suggestions ignored. Thus I am doubtful this survey will make much difference.	11/7/2014 7:19 AM
524	It's good that you provide the survey. What would be great is if the feedback is actually considered.	11/7/2014 7:08 AM
525	So it's all going to be about getting the busses to Husky stadium but mont lake Blvd is always backed up from :-)village. Keep the busses out of the traffic gridlock	11/7/2014 6:40 AM
526	It would be great to have at least one Sand Point bus (31,32, 75) stop at the new Husky Stadium station.	11/7/2014 2:18 AM
527	I'm excited that it will be very easy to get to/from Capitol Hill and the airport on Link Light Rail.	11/7/2014 12:23 AM
528	We really need a subway or dedicated bus lane service between Ballard and UW district.	11/6/2014 10:23 PM
529	Northbound 3rd and Pike/Pine needs to be built like a transit center. There is the whole inside of the building where there is a food court (sort of behind the old Borders) that could shelter people from the rain. People would be contained with seating and security personnel could patrol easily 24/7. No one except police from time to time patrols the sidewalk area as it is now and it is a mess. A person just walking that block on that side would have trouble getting through. I consider cleaning this mess up part of the outreach to make riding the bus safe and approachable.	11/6/2014 10:08 PM
530	Thank you for allowing us commuters to voice our concerns and opinions - truly appreciate the opportunity!	11/6/2014 9:58 PM
531	I don't feel that Metro/Sound Transit cares about my feedback.	11/6/2014 9:35 PM
532	It isn't clear whether you intend to reach out to those who'll probably never use the two new Link stations.	11/6/2014 9:24 PM
533	UW Medical Center is staffed 24/7. The UW is one of the biggest employers in the state. It is located in an area where there is gridlock, long commute time due to traffic, poor access and expensive parking. More bus service, connections to accommodate shift work all day, weekends and holidays need to be expanded PLEASE.	11/6/2014 9:14 PM
534	Create an additional tally of the responses you receive on the survey so that you can still have a pretty wide range of answers that you may narrow down in time.	11/6/2014 9:02 PM
535	Thank you for providing a useful service, and for asking what would help the most.	11/6/2014 8:19 PM
536	My answers to question 8 and 9 related to the issue of my bus routes being too crowded. I didn't select the items related to handicap accessible, as I'm not handicapped, but think that issue needs to remain high as an accessibility issue.	11/6/2014 7:52 PM
537	N/a	11/6/2014 7:38 PM
538	Metro is awesome and really makes this city a nice place to live....	11/6/2014 7:37 PM
539	I would love to see a report of the results and how this survey affected decision-making!	11/6/2014 7:32 PM

540	Thank you for asking riders! Thanks for all of the work you're doing! I can't wait for rail or light rail between the North end and West Seattle. Pleasepleasepleasepleasepleasepleaseplease? Please?	11/6/2014 7:01 PM
541	thank you. Please give all of us better connections to the UW station until link reaches Northgate. :)	11/6/2014 6:50 PM
542	Thank you for all Metro drivers! Always courteous.	11/6/2014 6:35 PM
543	Why are cars competing with buses in the downtown core area of Seattle? Why don't we have dedicated transit streets like Portland and other cities. The idea gets a lot of push back, but if you look at cities where this was not option, it's worked out well over time and businesses thrive along the transit routes.	11/6/2014 6:23 PM
544	Again, I'm a public transit enthusiast, sometimes using my senior pass as many as 10 times a day, though of course not every day. I'm therefore not as particular as most people. Furthermore, I hate to drive, and I don't want to contribute to pollution or traffic jams. Public transportation is much more relaxing.	11/6/2014 6:13 PM
545	Offer individuals the opportunity to buy annual transit passes at a discounted rate like you extend to corporations.	11/6/2014 6:09 PM
546	There are a lot of people in NE Seattle who are getting a bit older. I'll bet there would be a lot of people who would consider public transportation if it were more frequent and reliable, and if it went directly to destinations we need. For example, I can't get to the shopping areas on 35th NE from where I live on 46th NE, without taking a bus north along Sand Point Way to Lake City, then southbound on 35th. Crazy!	11/6/2014 6:07 PM
547	light rail seems to be very good for commuter service and longer-distance transportation, but the high infrastructure cost uses up a lot of money, and there seems to be no funding left for the regular local - and vital - bus service. I am very concerned that the implementation of light rail will reduce or eliminate local bus service, so I am interested in this outreach effort. I hope it's not just lip service.	11/6/2014 5:57 PM
548	I'm so excited for new extension of light rail and I love the light rail we do have!	11/6/2014 5:55 PM
549	Thank you!	11/6/2014 5:52 PM
550	I want to know about improved bus service on 25th Ave NE after University of Washington station opens. I thought the survey was going to about responding to new routes due to opening of the new stations.	11/6/2014 5:47 PM
551	I am curious as to whether the 71/72/73 busses will ultimately be routed to the Link stop at Husky Stadium and not go downtown anymore. While I appreciate the through route to Downtown I also know those buses are overcrowded and also present safety risks when weaving across I-5 traffic.	11/6/2014 5:47 PM
552	Metro seems to talk only to itself or Kemper Freeman. There has never been direct contact that I have heard about between Metro and the residents of the Harborview/Yesler Terrace area. The previous plan to eliminate bus service between Beacon Hill and Broadway was outrageous! That stopped transport between Denny MS, Sealth, South Park, Georgetown, Cleveland HS, VA Hospital, HVMC, Swedish, Seattle U, SCC, Indian Health Board and PacMed. Did you think nobody would notice?	11/6/2014 5:44 PM
553	Thank you for reaching out and listening, and hopefully putting together a great plan for our transportation future!	11/6/2014 5:41 PM
554	Community round table discussions where people can prioritize needs together would be helpful.	11/6/2014 5:36 PM
555	Metro planners should ride the bus to get to their meetings and informational events. That would give them the feedback about how the system works for users.	11/6/2014 5:13 PM
556	Thanks.	11/6/2014 5:10 PM
557	I would like to see outreach to people living in Seattle Housing Authority Units as well as targeting other low income social services agencies. Essentially the poor people who can't drive, either because they can't afford a car or are unable to drive do to health reason. Thank you for the opportunity to share my concerns. I will be passing this link along to others.	11/6/2014 5:09 PM
558	Your transfer policy on the ORCA card is gross. My transfers never work, and I want serious refunds. If I catch the 592 in Olympia, THERE IS NO TRANSFER AVAILABLE because the bus trip is longer than 2 hours. From Lakewood, I'm lucky to get anything at all. I want refunds. I want someone to put money back on my ORCA card. Seriously. How long a transfer is valid should depend on the last scheduled stop of a bus's run. For example, if the 592 arrives in Downtown Seattle at 9:00, I should be GUARANTEED at least 30 minutes AFTER THAT to make my connecting bus. Ideally an hour, in case the bus I want doesn't run every 30 minutes. Either that, or Sound Transit needs to start issuing paper transfers again. I understand the claim that people may have been abusing the transfers. I get it. But right now, you're affecting too many legitimately-paying riders, and it's somewhat offensive.	11/6/2014 5:08 PM

559	I'd like to see Metro refrain from filming the windows with ads, which impair the comfort of riders and considerably detract from the appearance of the busses. They look junky when done up like movable billboards and make the city look cheap.	11/6/2014 5:07 PM
560	Some of the terminology is unfamiliar to most people, for example "speed & reliability."	11/6/2014 5:04 PM
561	THANK YOU for asking.	11/6/2014 5:04 PM
562	More transit options are needed going up to capitol hill, such as park and rides from different parts of the city. I live on capitol hill and it is very hard for me to park where i live. I cannot leave during certain times of day or evenings and expect to be able to park when i return. On the weekends I can expect to drive around for an hour or park a mile away from my apartment in order to find a parking space. If you have groceries or equipment to unload, forget it! It does not seem the city has coordinated the various departments concerned with residential development, parking and transit. For example, I already have an EXTREMELY difficult time parking where I live on capitol hill (about 3 blocks from the link station that is being constructed), yet within a two block radius from where I live, three buildings are going to be constructed that contain a combined total of 140 apartments and ZERO PARKING SPACES on those lots. HOW ON EARTH is this sustainable?! I know this does not concern transit, but it should concern every city department. New residential development on capitol hill should be REQUIRED to include parking or a car share program ON-SITE. There is simply not enough room for all residents to be able to park and that is going to cause major problems for the city if a parking garage or other alternatives are not implemented.	11/6/2014 5:03 PM
563	Ads on buses are a good way to reach people about the survey.	11/6/2014 5:02 PM
564	I did not have an opportunity to discuss bicycle commuting in this survey. The reason I don't want to transfer is because I want to travel by bike as much as possible (but only on the trail, not on streets, hills, etc.), and it is difficult and annoying taking my bike on and off the bus; PLUS, there is not always room for another bike on the bus. It is unreliable, and, unlike when I don't have my bike, I can't work on other things during the bus commute because I have to be ready to get my bike on and off the bus and be attentive to making sure it doesn't get stolen, etc.	11/6/2014 4:59 PM
565	Please put seatbelts on busses. It's a no brainer expense.	11/6/2014 4:59 PM
566	Please consider employees at the UW, not just students. Thanks for asking!	11/6/2014 4:53 PM
567	Can't wait for the new Link stations to open. I hope you folks will be clear and transparent about when we can expect them to be operational.	11/6/2014 4:45 PM
568	I now take classes at the UW and sometimes leave from there to get to Capitol Hill. I am interested to see if the transportation choices in future will give me some new options that take less time and get me where I need to go.	11/6/2014 4:42 PM
569	I especially would love transfers if the transfer was in an interesting place with things to do. For example, I think the Roosevelt link station will be the most used one because it has a grocery store, shops, restaurants, places to get coffee. Way too many stops put you on a platform with nothing interesting or no ability to run errands.	11/6/2014 4:41 PM
570	More Trolleybuses please	11/6/2014 4:41 PM
571	Parking and safety at transit centers is the biggest failure of transit in the puget sound	11/6/2014 4:40 PM
572	Thanks for listening!	11/6/2014 4:39 PM
573	I would love to have transit alternatives for traveling to various parts of Seattle and subs. And also to departure points (ferry docks, airports, etc.).	11/6/2014 4:37 PM
574	I know how to solve your funding problem. CHARGE ME MORE MONEY!!!! I take the 545 into downtown everyday because I don't want to spend ~\$500 a month to drive in. That is the combined cost of parking/tolls/gas. My bus pass costs ~\$90/month and my employer pays half that. So at the end of the day I pay ~\$40/month for my pass. That's only ~\$20/paycheck and that's even PRE-tax. I make good money so the bus is practically FREE for me. So please charge me more money, even better, make my employer pay more, I don't care. I spend ~\$40/month (bus) to avoid ~\$500/month (drive/park/gas). Maybe that could be more like I spend \$100/month (bus) to avoid \$500/month (drive). Invent a 545XXX bus that skips 40th/50th/Yarrow/Evergreen and just hauls ass to Seattle from Redmond. I'd pay double for that!!! How can ANY business that has customer lining up down the street have finical problems. Charge us more money please. Make it dependent on income, I don't care. Make a special charge for my employer because I work in the financial district of Seattle. I don't care. More bus lanes, more bus lights. Buses should be able to haul ass everywhere with no impediments.	11/6/2014 4:30 PM

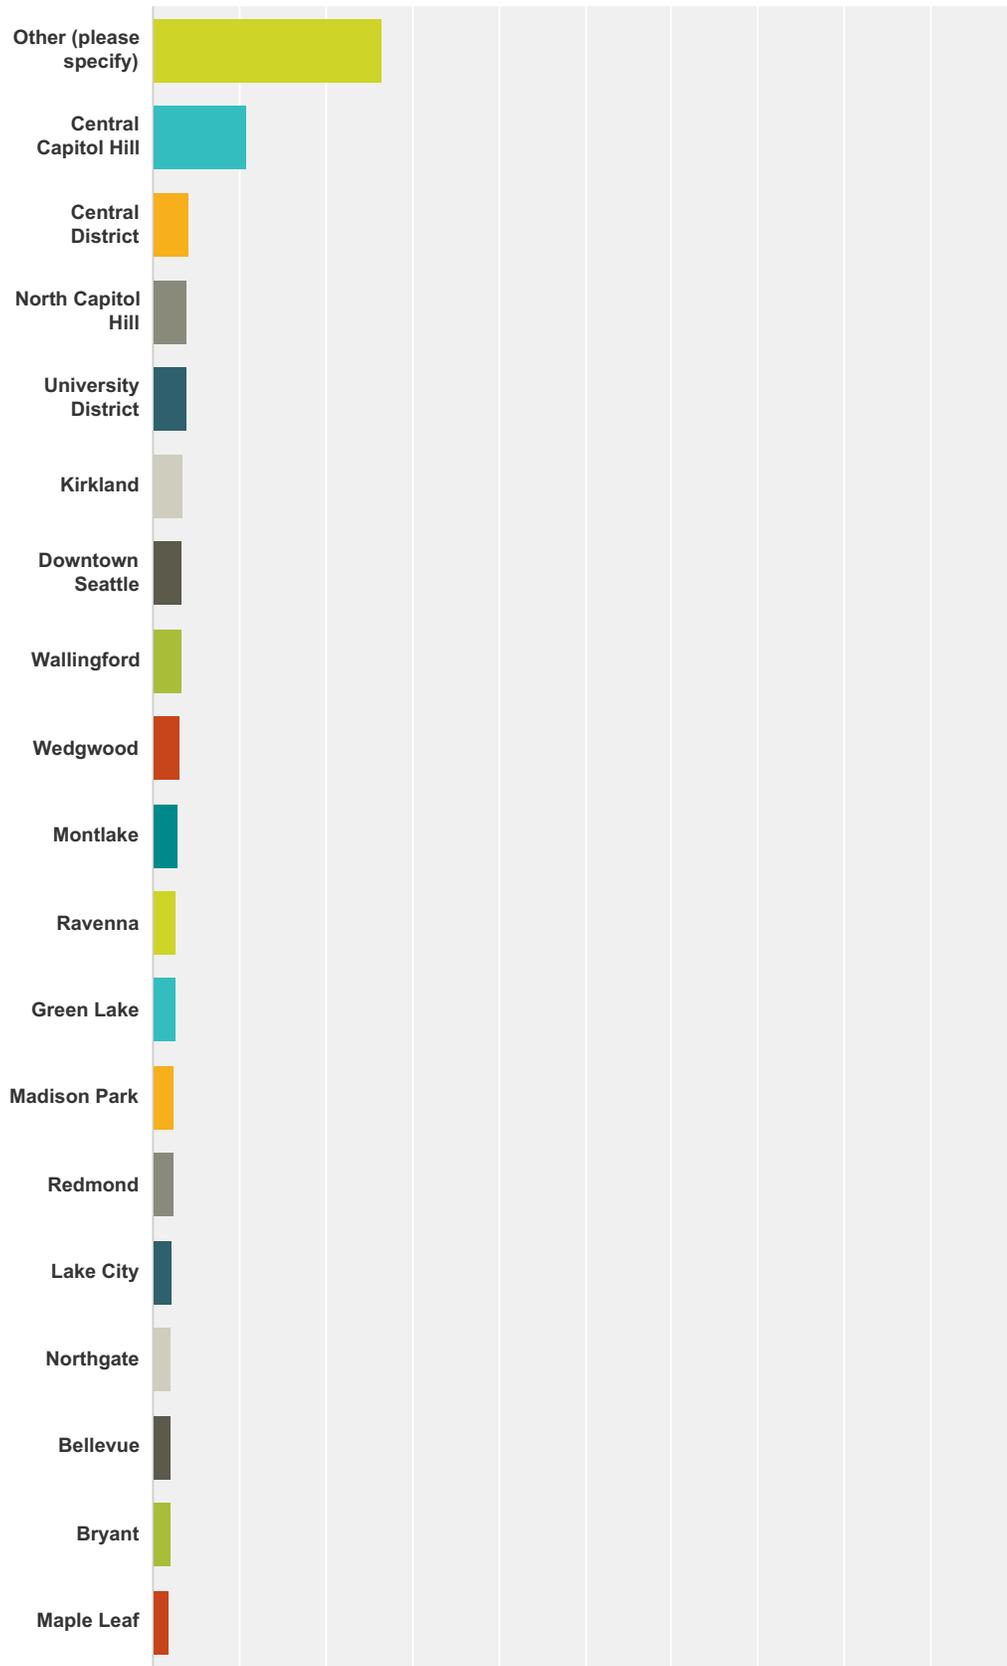

575	The way the survey was written, I question the value of some of the information provided. For example, it asked about any experience any time with any bus. It seems like it should have asked us to prioritize our experiences in some way. I commute most days to work, but I have also very occasionally taken buses other places, and I have also lived in different places in Seattle many years ago. By far the biggest priority for me is my work commute, but the answers I provided were watered down by other experiences distant in time or few in number.	11/6/2014 4:28 PM
576	Only wish we had the funds to build it faster.	11/6/2014 4:27 PM
577	Thanks!	11/6/2014 4:23 PM
578	Being able to get a seat on the bus I want to take is an important factor in whether I choose the bus. I thought from the email I received that I would have the opportunity to give input on connections between existing bus routes and the UDistrict Link station: buses passing through UW campus and terminating on NE Campus Pkwy should reroute after exiting campus to terminate near the stadium station. If another station near NE 45th St is still planned, once it opens they could pass near it and terminate at NE Campus Pkwy once again. Buses that go down NE Campus Pkwy to access I-5 southbound should reroute to stop near the stadium, then access I-5 southbound via 520. If another station near NE 45th St is still planned, once it opens they could pass near it and access I-5 southbound via NE Campus Pkwy once again.	11/6/2014 4:21 PM
579	Anytime you involve the public when planning major changes to the bus service. is good.	11/6/2014 4:19 PM
580	can you list route by route on the changes on the website	11/6/2014 4:18 PM
581	I think the community is remarkably supportive of our public transit system and would like to see it expanded but am encouraged to see this outreach to the public and think it bodes well for the future. Keep up the good work!	11/6/2014 4:16 PM
582	One Bus Away changed my life.	11/6/2014 4:16 PM
583	I saw you taking out a building for the station in the U District - smashing the beautiful granite (marble?) slabs on the exterior of the building instead of letting them be reclaimed/recycled. Shame on you. You couldn't figure out a way to reach out to let that resource be put to good use rather than the landfill? And I'm supposed to believe you will take my thoughts in to account when deciding where and how to run busses? And why exactly does the Link Light Rail run the route it runs now? Who decided that made sense?	11/6/2014 4:15 PM
584	It should be more focused on routes near future U Link stations, and specifics about potential re-routes.	11/6/2014 4:12 PM
585	I will be most impacted when the Roosevelt station opens. But until that time would like more specific information about how the UW station will be linked to existing or new bus networks in the north end.	11/6/2014 4:11 PM
586	Yay transit!	11/6/2014 4:10 PM
587	Keep the buses and trains rolling! I love Metro!	11/6/2014 4:03 PM
588	Riders can give feedback until the cows come home, but only what's politically expedient will be implemented. Riders don't matter.	11/6/2014 4:01 PM
589	Thanks for soliciting input!	11/6/2014 4:01 PM
590	This is a test	11/6/2014 4:01 PM
591	Get buses out of the tunnel as soon as possible. The sooner the light rail is running the better.	11/6/2014 4:00 PM
592	I don't think you really listen to us, the riders, but I'm hopeful. Next you need to reach out to the drivers... They are the heroes.	11/6/2014 3:58 PM
593	It would be great if there were quick buses from the Coleman Dock ferry terminal to either the University St. or Pioneer Sq. tunnel stations scheduled to somewhat match the ferry schedule. I see many people doing my same commute. It works fine since I am in pretty good shape, but if I ever have a leg injury or similar, a direct connection between these two major transportation modes/hubs could be useful.	11/6/2014 3:58 PM
594	Not at all clear what kinds of options are on the table to be influenced by survey and other outreach input	11/6/2014 3:55 PM
595	Very good questions. I appreciate the opportunity.	11/6/2014 3:51 PM
596	I don't think the managers and politicians will pay much attention to what the riders voice. They will end up doing what they "think best"!	11/6/2014 3:50 PM
597	Some sort of wrap up of most common feedback, and your responses/approach to said feedback in a newsletter or something would be cool.	11/6/2014 3:45 PM

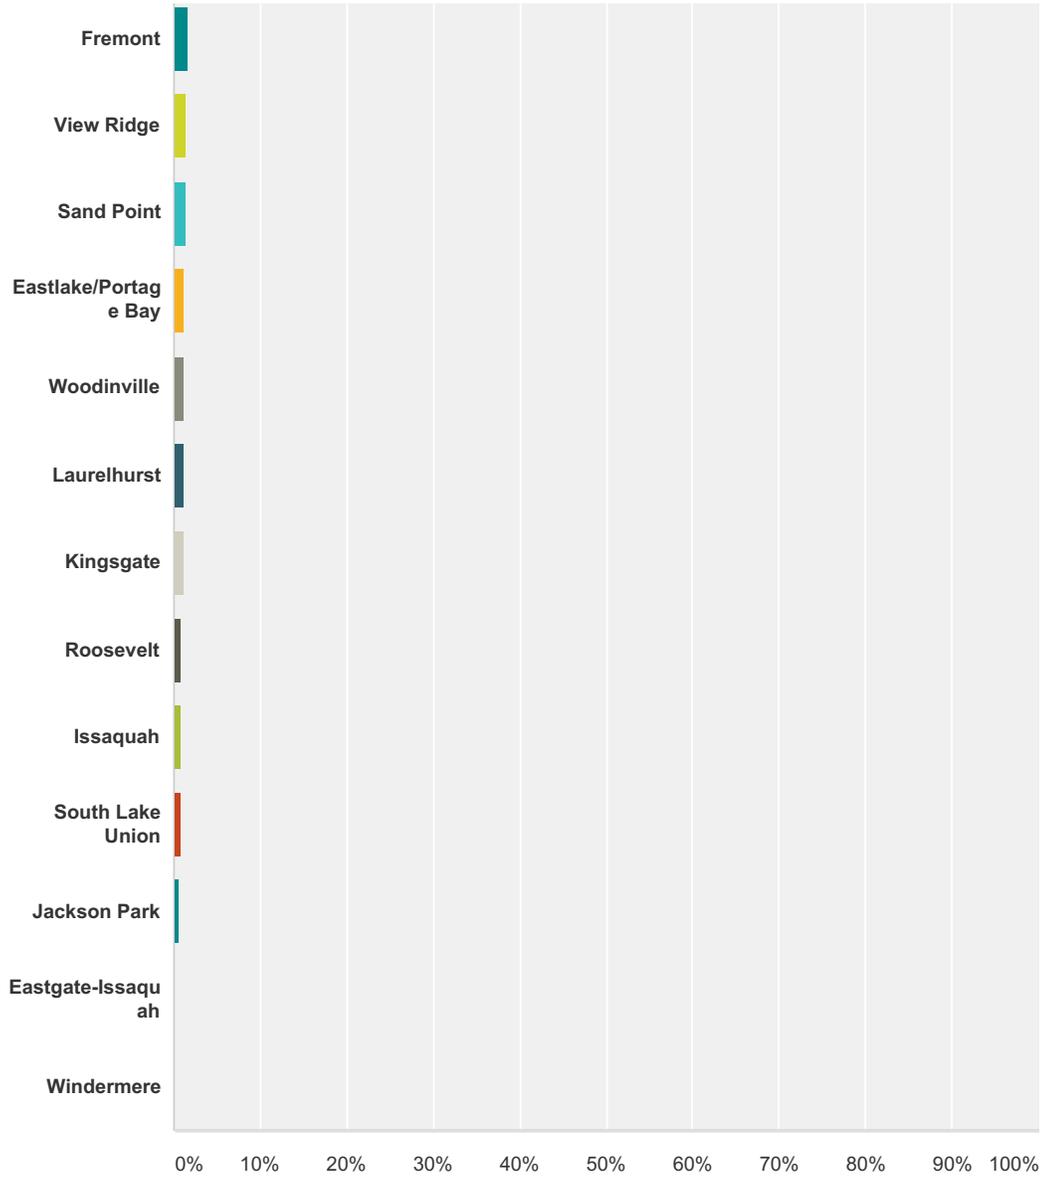

598	Buses don't go past the UW gym. Weather is a major factor in my transportation decision-making: if the weather is nice, I'll ride my bike.	11/6/2014 3:45 PM
599	There needs to be more consideration into the impact of the buses in the tunnel after sporting events. A couple times this summer when I wasn't aware there was a Sounders or Mariners game I was waiting at the convention street station around 9pm. Multiple buses blew by the station jam packed. They were unable to pick up new riders. This is the time of day when the bus only comes once every 20-25 minutes and riders at convention center stop had to wait a long time for a bus. One time this included a disabled person in a wheelchair who was not given a space on the first 3 buses heading to his stop. He waited for over an hour.	11/6/2014 3:44 PM
600	There might have been some technical problems with the text message...I got some jumbled header information with the body.	11/6/2014 3:44 PM
601	Why wasn't route 36 mentioned in the survey since it is a connecting bus at two light rail stations. It really does seem that Beacon Hill gets ignored on transportation issues.	11/6/2014 3:44 PM
602	I'm very glad that transit is considered a priority for Seattle's growth.	11/6/2014 3:43 PM
603	Thank you. I <3 METRO TRANSIT!	11/6/2014 3:41 PM
604	did not read much into your questions in the way of how Link service to Husky stadium is going to change services	11/6/2014 3:41 PM
605	Cap hill should be opened first if it is ready. Forget about opening at the same time if it is going to delay for a year or whatever.	11/6/2014 3:39 PM
606	This survey seemed very general considering it was being proposed to ask about specific Capitol Hill to UW links.	11/6/2014 3:38 PM
607	You folks at Metro have been making the best of a really bad hand for the past few years. We appreciate you and look forward to better days. Thank you.	11/6/2014 10:56 AM

Appendix I: Survey Responses (Phase 2)

Q1 What city or neighborhood do you live in? (check one)

Answered: 6,495 Skipped: 64

Answer Choices	Responses

57	Where I want to go, grocery stores and tennis courts, involves carrying cumbersome items and so I do not use transit at all.	3/31/2015 9:25 AM
58	Frankly, I never use transit. I'm a senior who plays a lot of tennis and carries a tennis bag around that would be too cumbersome on a bus or whatever, Plus, it wouldn't get me to a tennis court. Same for grocery shopping. The car is the thing for carrying groceries. I do walk a lot to nearby library and parks and neighbors.	3/31/2015 9:21 AM

521	Bothell	3/18/2015 8:18 PM
522	Ballard and SeatacAirport	3/18/2015 7:35 PM
523	Would really love to have a cross-town bus that goes up the hill on NE 95th starting at Sand Point Way at least to Lake City Way. It would be perfect to have a bus going east-west on NE 95th from Sand Point Way via 40th NE, then perhaps staying on 40th down to 65th or 55th. Or maybe it could turn west onto 85th and then south onto 35th, to at least 55th.	3/18/2015 7:22 PM

579	I use the 197 commuter bus back and forth from Kent every day. My commute takes 3 hours every day. I often have to stand up in one direction or the other for 25 miles. All the buses are full. We need parking in south county at future Link Light Rail stops so that we can drive to the LLR and THEN spend the 1.5 hours each way getting to the U District. Not building parking at stations, and expecting us to add another bus link onto our LLR commute is abusive.	3/18/2015 1:02 PM
580	Mill Creek	3/18/2015 1:02 PM

588	Actually, I live at 30th Ave E and E Howell, which is sort of at the border of Madison Valley, Madrona and the Central District. From there I go by bus to the the U district daily, and often to downtown, Capitol Hill or Seattle Center. Changing the 8 route would not be helpful for me. Eliminating the 43 would not be helpful for coming home from the U.	3/18/2015 12:44 PM

670	Ballard	3/18/2015 8:32 AM
671	I live in Arlington and rely on Community Transit, Sound Transit, and Metro Transit everyday to get to work. On top of the checked locations, I frequent Arlington and Marysville CT routes, Everett Station and Ash Way Park and Ride. I would also like to specify that, as far as Metro Transit goes, Early AM service to Willows Rd in Redmond is very important to me.	3/18/2015 7:51 AM

707	I am 71 years old and live close to Sand Point Way NE & NE 70th Street. I prefer not to have to transfer between busses or other modes of transportation if possible. I travel downtown frequently, going both to and coming back from the downtown bus tunnel so that I am able use the various underground stations to access downtown destinations and activities. This is my top priority (over frequency of service) -- to be able (especially in the evening) to get on one bus in the downtown tunnel which would bring me close to my neighborhood (I can leave a car on a residential side street, as I currently do when taking the Current Route 71 tunnel bus home at nights)	3/16/2015 4:42 PM

1096	Stadiums	3/7/2015 12:05 PM
1097	Ballard	3/7/2015 11:47 AM
1098	I work in totem lake (north Kirkland) and drive. I used to take the 66 downtown (ACT theater, Paramount theater, Moore theatre) and to seattle center (REP theater and Cornish), but started driving when the 66 evening service was reduced. I can't wait an hour for a bus after seeing a play. I won't take the 70 buses at night because it's too dangerous for Me to walk home. There are frequent attacks where those buses would let me off.	3/7/2015 11:41 AM
1099	UW link station to Sea-Tac airport	3/7/2015 11:36 AM
1100	Sea-Tac Airport	3/7/2015 11:20 AM

Q5 How often do you ride transit?

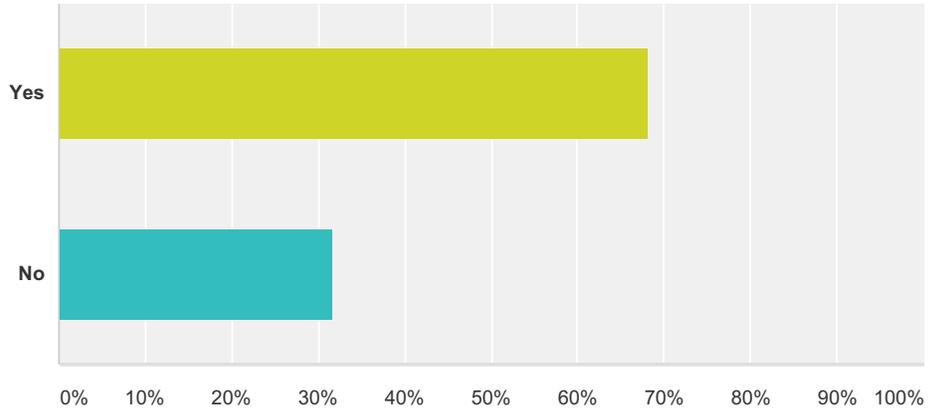

Answered: 5,810 Skipped: 749

Answer Choices	Responses
5 or more times per week	56.82% 3,301
3-4 times per week	19.59% 1,138
1-2 times per week	13.82% 803
Less than once per week	9.78% 568
Total	5,810

Q6 Would you like to give us feedback on changes being considered for north Seattle (including neighborhoods in northeast and northwest Seattle)?

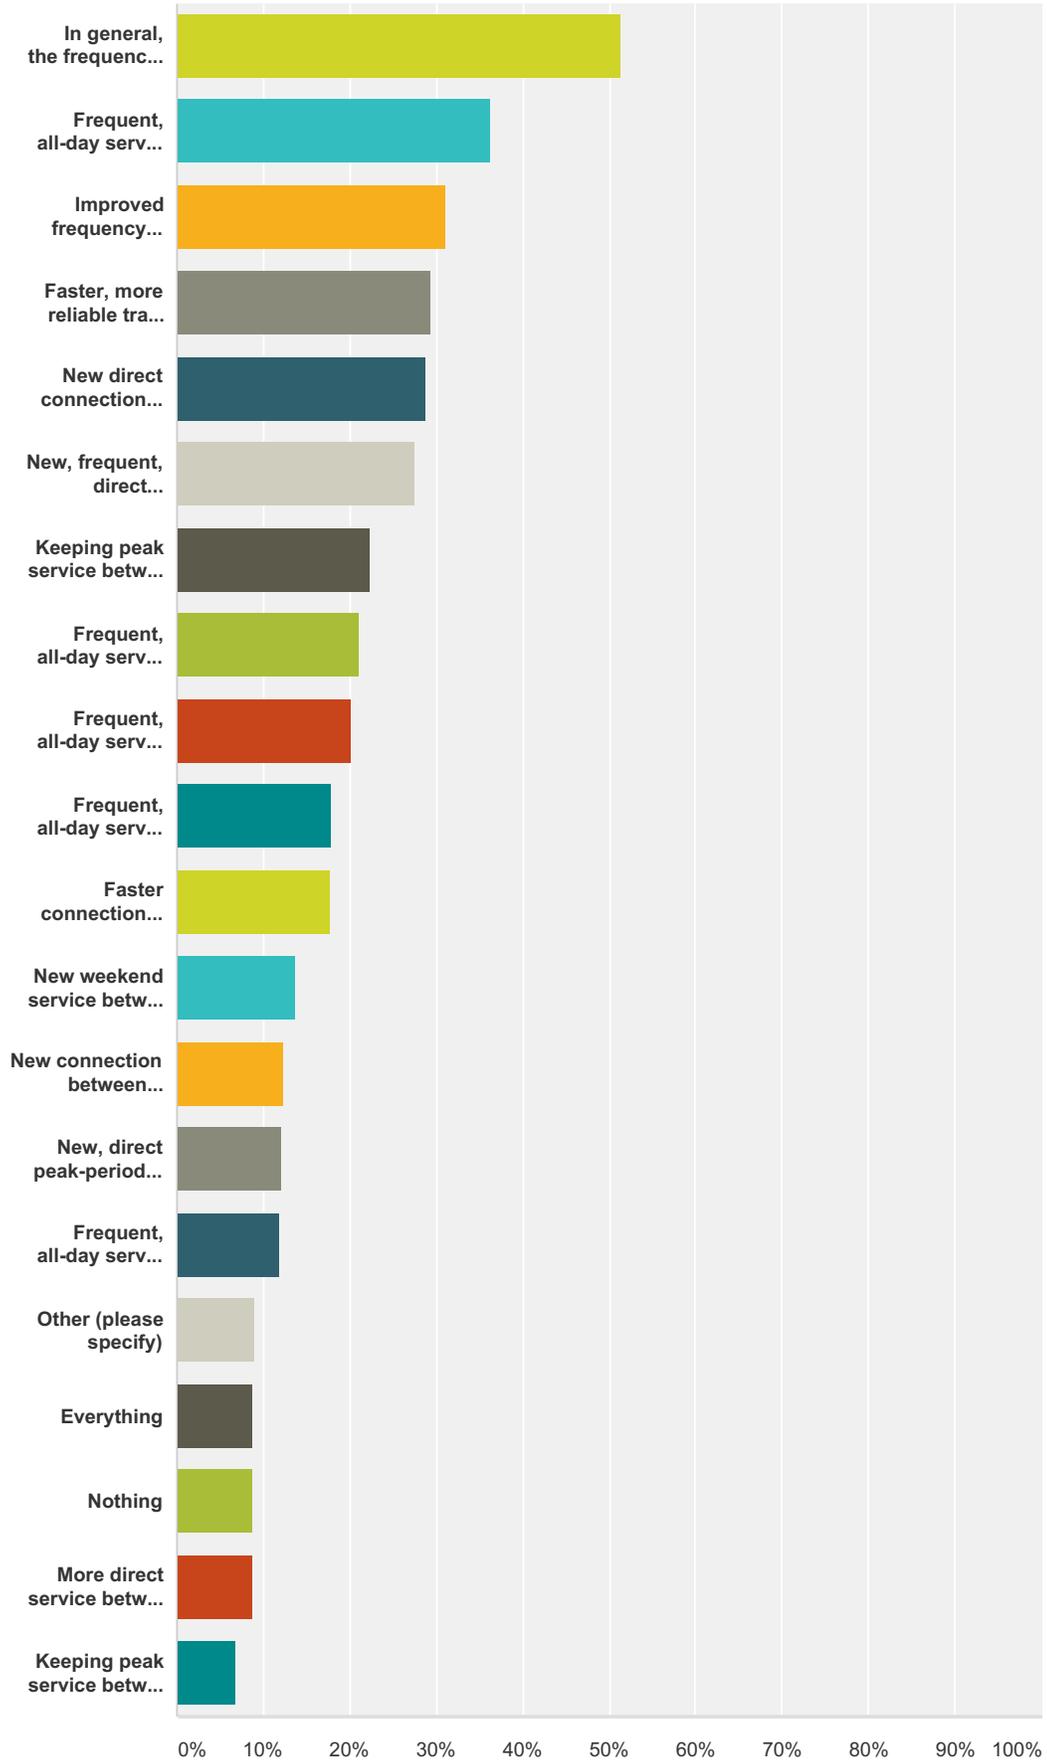

Answered: 5,645 Skipped: 914

Answer Choices	Responses	Count
Yes	68.17%	3,848
No	31.83%	1,797
Total		5,645

**Q7 What do you like most about the
Alternative 1 concept in north Seattle?
(choose up to 10)**

Answered: 2,926 Skipped: 3,633

Answer Choices	Responses
In general, the frequency of service in this network concept	51.30% 1,501
Frequent, all-day service between the new University of Washington Link station, University Village, and Seattle Children's Hospital (concept for Routes 65, 75, and 255)	36.33% 1,063
Improved frequency between the University District and northeast Seattle neighborhoods, including Wedgwood, Ravenna, Maple Leaf, Lake City, and Sand Point (concepts for route 65, 67, 75, and 372X)	31.17% 912
Faster, more reliable travel times between Capitol Hill and NE Seattle	29.46% 862
New direct connection between Ballard, Greenwood, Green Lake, the new University of Washington Station, and the Eastside (concept for through-routing routes 45 and 271)	28.88% 845
New, frequent, direct connection between Sand Point, Wedgwood, Ravenna, Roosevelt, Green Lake, and Wallingford (concept for Route 16)	27.61% 808
Keeping peak service between northeast Seattle neighborhoods and downtown Seattle (concept for routes 73, 74, 76, 77, and 312)	22.42% 656
Frequent, all-day service between Northgate, Maple Leaf, Roosevelt, the University District, and the new University of Washington Link station (concept for Route 67)	21.12% 618
Frequent, all-day service between the new University of Washington Station and University Way/The Ave (concept for routes 45, 48, 67, and 271)	20.27% 593
Frequent, all-day service between the Eastside and Seattle Children's Hospital (concept for Route 255)	17.91% 524
Faster connection between east Green Lake, Wallingford, and downtown Seattle (concept for Route 26X)	17.74% 519
New weekend service between Lake City, Ravenna, and the University District (concept for Route 372X)	13.81% 404
New connection between Wallingford and Fremont (concept for Route 16)	12.30% 360
New, direct peak-period connection between South Lake Union and northeast Seattle neighborhoods (concept for routes 64X and 66X)	12.06% 353
Frequent, all-day service between the University District, Overlake, downtown Redmond, and Bear Creek Park and Ride (concept for Route 542)	11.83% 346
Other (please specify)	8.99% 263
Everything	8.85% 259
Nothing	8.85% 259
More direct service between Green Lake and Northgate (concept for Route 16)	8.82% 258
Keeping peak service between Maple Leaf (on 5th Avenue NE and 15th Avenue NE) and downtown Seattle (concepts for routes 66, 77, and 373)	6.87% 201

Total Respondents: 2,926		
#	Other (please specify)	Date
1	Focusing new routes on major arterials - Route 25 is virtually useless for efficient transit, rather have better options a little further away.	4/1/2015 11:50 AM
2	I like having more frequent, efficient, and productive service. Part of me likes the idea of providing either excellent service or none at all. It seems like Alternative 1 would do more good for more people. The experiences people have riding Metro would be better. It doesn't coddle people but expects them to use U Link and transfer when needed. Bottom line--I live in Rainier Valley. Link will give me excellent connections to Cap Hill and Husky Stadium/UWMC. But I think Alternative 1 will give me more and better transfer options (frequency and span) to get from the new stations to neighborhoods I can't reliably or quickly I get to now. The more places I can get quickly on transit, the more potential clients I can serve.	4/1/2015 12:57 AM
3	frankly, your explanation of alternative 1 and alternative 2 are too general to give a meaningful opinion	3/31/2015 11:37 PM
4	Don't like the removal of direct service from Pinehurst (which is north of Maple Leaf and Northgate) to the University District with the potential elimination of 73 in this proposal. Especially the all day service changes. Its almost as if this area doesn't exist in the planning.	3/31/2015 10:05 PM
5	You know evaluating the differences is really difficult for us. We are nervous about the lost of the 43 because we ride it to group health hospital frequently and to our favorite restaurants on 15th. We live right next to the Husky stadium lite rail station and that will be lovely. But it is a good walk from Broadway and John to Group Health.	3/31/2015 6:21 PM
6	Please keep #12 and #43 buses running to service North Capitol Hill	3/31/2015 4:50 PM
7	You are forgetting about the neighborhoods such as montake where the people would not be able to get to the transit center especially if you take away the 43 route. Not everyone can ride a bike or walk long distances. Keep the 43 route and others that are not broken and add in the light rail to make the system better. You have been given a lot of taxpayers money already so make it work for the people who are paying the taxes and you.	3/31/2015 4:33 PM
8	I would really really really like to see a route between Capitol Hill, Fremont and Ballard.	3/31/2015 3:26 PM
9	Weekend and mid-weekday service from North Beach to Downtown, and faster service from North Beach to UW.	3/31/2015 2:48 PM
10	not quite sure impact for my commute. Want to get from Sant point way to downtown- sounder train	3/31/2015 11:39 AM
11	would be nice to have bus service available the hours i work	3/31/2015 11:27 AM
12	frequent routes from NSCC to Greenwood	3/31/2015 10:50 AM
13	The 255 up to Magnuson park	3/31/2015 10:27 AM
14	More frequent and extended hours for connections from Greenwood to University of Washington	3/31/2015 10:20 AM
15	The ATTEMPT at Improved frequency between the University District and northeast Seattle neighborhoods but I think it also makes the frequency and trip times much worse for much of Pinehurst, Victory Heights, Jackson Park, and Olympic Hills. We will have LESS off-peak access to Link after these changes.	3/31/2015 10:12 AM
16	This alternative simply does not work for me. I live across the street from a #43 bus stop. How am I supposed to get from my house to the UW or Capitol Hill to take the train? I'm a senior citizen. Am I supposed to walk over a mile or two to take the train. In fact, how is anyone going to get to the train stations? Will there be commuter parking? Get real.	3/31/2015 9:19 AM
17	Maintain 43 schedule. Establish Capitol Hill to Kirkland route	3/31/2015 6:42 AM
18	The only improvement I see is the improved frequency between University of Washington and Magnuson Park.	3/30/2015 10:54 PM
19	Better service from Bear Creek Park and Ride to Seattle Childrens or UW Link Station--there are no options for people from sammamish to get to Seattle very easily and Bear Creek is closest park and ride in redmond	3/30/2015 8:45 PM
20	Route 43, which is the bus that is our neighborhood's best connection to downtown, will be deleted. Not a good plan.	3/30/2015 6:34 PM
21	Frequency is not as important as access. I cannot walk a long distance to get to a bus stop--now I only have to walk two blocks. Alt. 1 would eliminate my use of transit. Since I depend only on basic Social Security, I don't have the money for cabs. The Access service is a nightmare of waiting, waiting, and waiting.	3/30/2015 6:23 PM

22	I like focusing on a few frequent corridors with "turn-up-and-go" bus service rather than having to check ahead and coordinate schedules. I like enabling Eastside travelers to change to Link rather than be caught in traffic on I-5 and Stewart St, as well as letting them go straight to Capitol Hill without having to go out-of-direction to downtown.	3/30/2015 5:21 PM
23	Generally, I have concern for any changes from Metro current service, UNLESS THERE IS AN INCREASE/IMPROVEMENT OF SERVICE (additional routes, frequency & buses). ANY PLAN THAT DELETES ROUTE 43 IS UNACCEPTABLE. ANY PLAN THAT REDUCES SERVICE TO ALL NEIGHBORHOODS, INCREASES WALK & WAIT TIME TO/FOR BUSES IS UNACCEPTABLE. Living in the west edge (7th to 8th Ave NE, NE 45th St to NE 47th St) of the U-District, using Light Rail is not really an option I will consider except for novelty from time to time or if going to SeaTac, which I never do. Both Alternatives appear to reduce service to my area of the U-District.	3/30/2015 2:12 PM
24	Direct routes from Capitol Hill/N Capitol Hill to Seattle Children's that do not require going through the University Campus	3/30/2015 10:54 AM
25	This is all north Seattle Centric without any acknowledgement of people who travel from south King County	3/30/2015 9:54 AM
26	without 43 we could not get to downtown or university station easily. We are seniors and planned on using bus/light rail more and more. Fear we will have to move from our home is public transport becomes difficult.	3/30/2015 9:49 AM
27	Expanding service between south lake union / Ballard	3/30/2015 9:32 AM
28	I current carpool from MV, WA to UWMC or SCH daily. I would use combination of Sound Transit and bus if routes were available: from dpwntown and/or east side. I am excited by the new changes being proposed to get rid of car and be able to train/bus to work would be ideal! Thanks.	3/30/2015 8:22 AM
29	Full time Route 70	3/30/2015 7:09 AM
30	I would like to see more routes from Eastlake to downtown.	3/30/2015 3:12 AM
31	Increasing frequency of buses on route 65 from Seattle Children's to Wedgewood from 6:30 to 8:30.	3/29/2015 12:08 PM
32	I have no interest in busing to north Seattle on a regular basis so none of this applies to me	3/29/2015 11:25 AM
33	Presently, no bus in Ravenna area leaves early enough in the morning to catch an early morning flight even though Sounder train runs from downtown at that time.	3/28/2015 7:30 PM
34	I would love to be able to take the bus from the Brickyard park and ride to my job at Seattle's Children's Hospital right now I can't take the bus to work as I have to transfer twice and wouldn't get home until about 10:00 PM , after getting off work at 7:30 PM. I dont want to spend that much time riding the bus, taking my my car is faster it only takes me 30 minutes to get home.	3/28/2015 6:18 PM
35	More direct service between Bothell and Bellevue	3/28/2015 2:51 PM
36	I have filled this out previously and thought of another comment: Many years ago I attended sessions to discuss bus route changes and Metro wanted to make all the 70 series buses end at Campus Parkway and make all those commuters transfer to new buses to go downtown. I voiced my objection because I thought it was not good for elderly riders to have to transfer halfway to their destination. I decided after filing my original comment on this survey that this is exactly what Metro and Sound Transit are trying to do again. Have north and south routes, in my case route 372 to the tunnel (Husky stadium) - not east -west routes to the tunnel (route71) Roosevelt. Once again I am voicing my objection and this time I feel even stronger. I am approaching elderly - the media actually tells me that I am elderly. On buses, the front part of the bus is supposed to be for elderly and disabled riders. This does not keep young people from filling these seats and sitting there with there eyes glued to electronic media. Often, I am the only person in that section paying attention and watching for truly elderly and disabled riders and often I am the person giving up my seat - the latest to a young man carrying a toddler. My objection to the long ago change was that elderly people would have to give up their seat to transfer and then not be able to get another seat as they would be pushed (figuratively) aside by younger riders. This is exactly what I fear the most if the transfer point is ging to be Husky stadium. Long walks to transfer and crowded facilities with clueless young people wandering around talking on photos and being otherwise absorbed. I do understand that the trains will run more frequently and take less time but that doesn't make a difference if one is forced to stand or confront a younger or less considerate rider (backpack on adjacent seat) for a seat.	3/28/2015 12:58 PM
37	Keeping frequent commuter buses (like the 76) while consolidating the other buses into high frequency busses that serve a greater number of areas.	3/28/2015 12:09 PM

38	The plans for the 71 will increase my total number of buses on weekdays from 5 to 7 wwhich will increase my travel time which is currently 3 1/2 houts & on weekends 2 buses to 4 buses & and travel time is currently 40 minutes. It does not consider handicapped or elderly who use the bus to do their errands. To expect either to walk from 50/55the to 35;65 or sandpoint to catch a bus is Rude; Arrogant and Cruel. Also the money voted on by the city of Seattle was intended by the people who voted fr it to save the buses you once again are cutting. If you continue with this plan I believe the city council should take back them money because I, in my opin8on, consider it missappropriation of funds	3/28/2015 12:02 PM
39	Keeping frequent all day service between University District and Bellevue (route 271)	3/28/2015 9:23 AM
40	What happened to the South of downtown (besides 14 and 36) hard to get from Beacon to Lk Washington Boulevard . How about from the Airport to Downtown and back? The current link is about the most inconvenient way to commute to the airport, having to crawl through a windy overpass and a stinky garage dragging your luggage. The best way to get to the airport is to take the 550 to Bellevue and from Bellevue the 560 to the airport. Bring back the 194.	3/28/2015 8:03 AM
41	for my bus 372, the alternatives are the same	3/28/2015 7:49 AM
42	This alternative generally works for me	3/28/2015 7:19 AM
43	Propose a frequent, 18-24 hour per day service running from Lake City down 25th Ave NE past U Village to Montake	3/28/2015 4:35 AM
44	I think we should be like Paris, lots of buses running constantly. Inexpensive. People will change their habits, especially if parking spaces are eliminated.	3/27/2015 1:51 PM
45	By walking to Children's Hospital and taking a bus, I can get to the University Light Rail station	3/27/2015 1:20 PM
46	More frequent and more reliable rides to the University of Washington and to Light Link into downtown Seattle and Seatac.	3/27/2015 12:37 PM
47	Please continue the 255 up to Magnuson Park	3/27/2015 12:21 PM
48	It would be good to increase the frequency of 545 connecting Redmond to Seattle, especially evening service to Redmond. Also if the earlier route 265 could be re-established, connecting seattle, kirkland and overlake, it would help the Bellevue/kirkland daily commuters to Seattle.	3/27/2015 11:16 AM
49	Express busses from Northgate to Roosevelt or U-Dist. (66/67 too slow for work days)	3/27/2015 10:43 AM
50	I live in Montlake and take the 43 downtown and to stops in capital hill. This would be bad for me and for my 79 year old husband who takes the bus home every day between the University and Boyer. Changing buses would be extremely inconvenient as would a longer wait. Connecting to rapid transit in the u district would involve a long walk or a long wait to get there. WE have lived in Montlake for over 40 years and depend on the 43.	3/27/2015 10:05 AM
51	Moving to more centralized stops rather than stopping at every intersection. It's not unreasonable to ask riders to walk a few blocks to get to the stop.	3/27/2015 8:18 AM
52	None of this encompasses NE, ie, Woodinville.	3/27/2015 8:07 AM
53	Why arent you connection NE neighborhoods with the University station? Should be a route that goes down 25th and then to stadium station	3/27/2015 6:41 AM
54	I am not sure how to answer these questions. Metro needs to improve the bus frequency and connections between light rail and buses. In my case I want to get to Children's and with the soon to open light rail stations in UW and U District I could take light rail downtown or to Rainer Ave and get a bus home. But if these buses don't run frequently 7 days a week I end up having to drive to work	3/26/2015 11:41 PM
55	Not too much for me personally	3/26/2015 7:38 PM
56	Would be fabtastic if there were direct buses from Seattle Children's Hospiatal to Downtown Seattle.	3/26/2015 4:28 PM
57	Peak times have expanded to nearly 7PM and I predict that the 255 during peak times will be very under-utilized while the 256s will be packed to the roof. Nearly all the east-bound busses between 3:30 and 6:30 are full- including the aisles. Very few riders get on at Montlake and I can't imagine that many will ride Link from dwnntn up to the U district to catch the 255s	3/26/2015 2:51 PM
58	I commute in from Kent and need to get to Sand Point Way. With this concept...my commute would be train to light rail to bus? Is there a way to not take three modes of transit/transfer to make that commute? This is why I currently drive.	3/26/2015 8:04 AM

59	I took the survey yesterday before I had looked at the proposed route 71. With additional funds we voted in for improved service and the new Link Rail I had planned to rely on public transit for most of my travel needs. I was shocked to find that Alt 1 eliminates the only bus that serves my neighborhood. We bought our house here 19 years ago because it was on a bus route and we could get rid of a car. The nearest proposed route 65 is a ten-minute walk uphill. I know walking is good for me, but I am going to the IMA for my exercise program and do not need this on a cold dark winter morning to discourage me. Maybe we will need that second car now.	3/26/2015 8:01 AM
60	additional 76 routes, assuming those extra tips are during useful times	3/25/2015 7:58 PM
61	One bus from the Eastside directly to Seattle Childrens instead of a two bus ride	3/25/2015 6:30 PM
62	Continue the 255 up to Magnuson Park	3/25/2015 4:38 PM
63	There are some routes listed above that I would find useful depending on how many stops they have. I did not select any of these routes	3/25/2015 4:05 PM
64	Continue the 255 up to Magnuson Park	3/25/2015 3:40 PM
65	Continue 225 up to magnusun park	3/25/2015 3:39 PM
66	Shorter wait times for connections at park and rides / transit centers between different transportation agencies. For example switching from a KCM bus to a ST bus.	3/25/2015 2:50 PM
67	We need more options to get to Seattle Childrens. It takes over 2 hours to get o work from Bothell and its a 20 minute car ride.	3/25/2015 2:44 PM
68	Creating all day service from the station north and south on Montlake. This should be coupled with transit lanes heading south to speed up travel from NE Seattle neighborhoods to UW station and beyond. I am excited about connecting to Light Rail via the 45 from NW Seattle to make a faster trip to Capitol Hill.	3/25/2015 2:38 PM
69	Continue the 255 up to Magnuson Park	3/25/2015 1:45 PM
70	Please continue the 255 up to Magnuson Park	3/25/2015 1:35 PM
71	More busses from Kenmore P & Ride to downtown. They are soo crowded.	3/25/2015 1:34 PM
72	Continue the 255 up to Magnuson Park	3/25/2015 1:30 PM
73	Continue the 255 up to Magnuson Park"	3/25/2015 1:28 PM
74	Continue the 255 up to Magnuson Park	3/25/2015 1:25 PM
75	Keep the 277 route to UW from Eastside!	3/25/2015 1:03 PM
76	Continue the 255 up to Magnuson Park.	3/25/2015 12:34 PM
77	Your maps are crowded and difficult to read. Also, you don't seem to acknowledge that your buses serve areas outside of Seattle. I cannot tell if you're planning on changing the 373's route north of 145th, but, well, please don't.	3/25/2015 9:15 AM
78	Seems like all the benefits are for "Seattle" residents and not consideration to those in the "burbs". Can't imagine having to transfer 2 times to get downtown Seattle from Kingsgate.	3/25/2015 8:47 AM
79	I don't want to have to xfr to light rail. it will add to my already long commute time.	3/25/2015 7:52 AM
80	Just get me from downtown Redmond to Kirkland....	3/24/2015 7:37 PM
81	Service should be maintained on 15th Avenue NE.	3/24/2015 6:28 PM
82	Not sure how it impacts the east side. still need 255 to go to seattle, not childrens	3/24/2015 5:05 PM
83	I don't want to lose the trolleys. They do not pollute the environment. They are iconic to Seattle and I would miss their last century quality.	3/24/2015 3:18 PM
84	I am impressed with how closely this alternative matches, for my neighborhood of east Wedgwood, the proposed service reductions which we tried to avoid by voting for more taxes last year. You completely eliminate our all-day bus service (direct to downtown and U District) and present us with longer walks to access the remaining bus line, inconvenient long-walk transfers to get anywhere, resulting in significantly longer total travel times. Please tell us about the plans for a sheltered walkway between Stevens Way and the Stadium Station!	3/24/2015 10:49 AM
85	Route 255 possible Mountlake stop to the Eastside rather than traveling downtown; Route 65 increasing frequency very much needed!	3/24/2015 9:47 AM

86	Route 48 needs more buses between UW and north Seattle--they do not come as frequently as listed on the bus schedules. It would be nice to have the 48x back, but include it more than 1 or 2x per day--it was too infrequent for it to be well utilized.	3/24/2015 8:09 AM
87	cutting service from kirkland to downtown seattle on the 255 is a horrible idea. The buses are really crowded. Metro should be enhancing service through kirkland to Seattle not cutting it. The buses are pack and no one gets off at the UW. Everyone is going to downtown. Making everyone going to downtown go deep into the U district to then have to transfer is a horrible idea	3/23/2015 9:03 PM
88	More buses on Mercer Island, making for an easier commute.	3/23/2015 1:05 PM
89	If the 48 north of the montlake cut is going to be replaced by the 45, I like the idea of not having to change buses to get all the way to the UW Campus since the bus will continue as the 67.	3/23/2015 10:53 AM
90	Connectivity to Magnuson Park!	3/23/2015 10:47 AM
91	Looking for faster peak service between downtown and UW. If this can be done, while also removing some common routes (70-73), sounds great.	3/23/2015 10:11 AM
92	There may be others of these that I might find are worth marking, but I don't yet realize that these are places I would want to go because they're currently hard to get to (in which case the improvements are kind of the point)	3/23/2015 8:23 AM
93	This alternative only reflects better frequency for Seattle location riders - there seems to be NO consideration for the employee / commuters from the North end of Kirkland and surrounding communities. The ridership from these communities is not insignificant. I guess one could question if this solution is met to punish North East side riders and Seattle businesses which rely on those employees. I guess the departure of Boeing management from Seattle areas because of transportation (lack there-of) is not part of the anyone's memory?	3/23/2015 7:52 AM
94	I think that making trips more frequent on the weekends as well as more frequent during non-peak hours will make transit more accessible for those who use bus for both commuting to work and as their primary form of transportation. - As in my case. By getting more people to use transit and able to use transit more frequently and as a primary form of transportation, I believe the transit will be better for everyone as well as the environment.	3/22/2015 6:58 PM
95	Just a comment in general either option is fine from the perspective of my schedule (which is commuting into Westlake daily....so whatever provides the community with better service is fine.	3/22/2015 6:05 PM
96	Puts the focus on safety and well-appointed large stations, makes light rail the centerpiece of Seattle transit.	3/22/2015 11:21 AM
97	Service from the airport to Lake City would be nice to have a couple of times during the night from 12:30am thru 5am, currently none.	3/21/2015 4:00 PM
98	Through-routing the 255 from Kirkland to Fremont/Ballard/SPU (via existing routes 31/32, for example) rather than Childrens Hospital, providing connections to major North/South routes on Aurora/SR-99, Dexter/Fremont Ave, and 15th Ave NE, as well as serving major employment areas (and connecting Google's two campuses; you could probably even ask Google to pitch-in to help fund this route).	3/21/2015 12:17 AM
99	More direct and frequent service between Downtown and Sandpoint like the 74. It is to crowded and popular route. An express service between Downtown and Sandpoint bypassing Campus Park Way/ the Ave 74x!!	3/20/2015 8:02 PM
100	Come on, really.....you think this actually saves time. For whom? Those that live in Seattle. The heck with anyone on the Eastside who works in Seattle and currently is commuting. Walk in our shoes before you make a decision.	3/20/2015 1:25 PM
101	16 access to Dexter from Greenlake/Wallingford.	3/20/2015 8:48 AM
102	The routing of the 8 to Madison Park	3/20/2015 7:26 AM
103	I need direct service between Lake City and U-district for work -- especially bus 72 and also 73, 41, etc. I need this at non-peak times! I would rather it be every 30 minutes than have this disappear, and I am left with no way to get home/to work! I'm not as concerned with increased frequency but am worried about consolidation/disappearance of routes. Geographic coverage and non-peak time coverage (I work until 9pm at night) is much, much more important to me!	3/19/2015 7:50 PM
104	A quick turn around commute option for patients going from the (UW Med Center and Roosevelt Medical Center) going to NW Hospital. There used to be a shuttle between the two, but now patients/staff have to take a very slow commute to get there and back.	3/19/2015 3:32 PM
105	I and many other people ride 15th ave between maple leaf ride the 73 and 72 since they are provided for most times through-out the day. It will be very inconvenient and cumbersome to	3/19/2015 1:48 PM

106	Increased frequency of 545 route to eastside.	3/19/2015 11:14 AM
107	Improved frequency and service to Sand Point for myself, students, low-income housing residents, and surrounding multi unit condominiums and apartments.	3/19/2015 11:13 AM
108	Please DO NOT ELIMINATE the 66/67 routes on 5th Ave NE!!!! If you move the routes to Roosevelt it's too far away, and makes it too hard to get to the Northgate Transit Center. Not everyone can walk a half mile to a mile to get to either the bus stop on Roosevelt or to the Northgate Transit Center.	3/19/2015 10:01 AM
109	I just want to say that you should pay attention to the actual experience of someone transferring between the bus and the light rail. In my neighborhood (South Seattle) I have been frustrated by the lack of convenient connection between the 7/9 (my main buses) and the light rail. Either I have to walk for 10 minutes (Columbia City) or I have to wait around for a light to change so I can cross Rainier Ave and then make my way through the light rail station and up the escalators (Mount Baker). In either case I am likely to see my train/bus go by while I am trying to make my connection. Please design the light rail station/bus connections so that people can hop off one and hop on the next.	3/19/2015 9:55 AM
110	I would love for Bus route 41 to stay the same going to and from downtown and into lake city. I also want bus 545 to stay the same going through downtown and picking me up to go to work on Westlake bus stop. It's easier for me to get to work that way. If this stops, i cannot get to work. Please keep those the same.	3/18/2015 10:23 PM
111	I do not know the Alternative 1 concept in north Seattle	3/18/2015 10:14 PM
112	I primarily use the 65 to get to UW to get transferred to other locations. I really like that the 65 will be routed off of the UW campus and will instead be routed right by the light rail station. I feel that this is critical in leveraging the light rail service.	3/18/2015 10:01 PM
113	This is a terrible idea. For anyone living in North Capitol Hill more than five minutes walk from the Broadway and John light rail station, this will mean longer commute times to the University District. I make this commute every single day. These buses are full every day, and most travelers from the UW to Capitol Hill get off the 43 more than 5 minutes walk before Broadway and John. Moreover, the walk from the UW light rail station will add an additional five minutes to my journey. I estimate that my daily commute from my house (16th and Republican) on the light rail will be 20 minutes LONGER than it currently is using the #43. This is not public transportation progress. It is a light rail boondoggle. Sincerely Robert Wood Professor, University of Washington PS. The same thing happened with bus route 194 which reliably took passengers from downtown Seattle to the airport in 30 minutes until it was cancelled because of the light rail. The trip now takes 40-45 minutes on light rail. Is this progress? The idea is that new transit systems augment the public transportation system, not replace existing components.	3/18/2015 8:54 PM
114	5 running every 15 minutes on sunday.	3/18/2015 7:40 PM
115	No changes to 43, 44	3/18/2015 1:35 PM
116	Services have gone so useless, After over 25 years of using buses, I'll be driving from next month and canceling my bus card.	3/18/2015 1:32 PM
117	More direct lines to Magnolia and less of them that go through Fremont due to heavy volumes at peak hours with UW students (who don't live in Magnolia)	3/18/2015 12:55 PM
118	Better economic use of Metro's resources	3/18/2015 12:17 PM
119	not sure	3/18/2015 12:17 PM
120	Increased weekend service along routes I would use on the weekend (372, 16, 45)	3/18/2015 12:14 PM
121	Big problem: no single bus from Ravenna area N. of 65th Near Third Place Books and UW Link station. 372x is closest but it is a long walk from Campus Parkway esp. with luggage. Using the 65 would require transferring from the 372x. These alternatives don't really do much to connect anyone with the UW Link station!	3/18/2015 12:10 PM
122	I see nothing that improves the East/West travel in and out of Ballard.	3/18/2015 12:07 PM
123	If these more frequent routes connect or link-up to Rapid Line routes this would be a boon to mass transit here in Seattle	3/18/2015 12:06 PM
124	Great solution for traffic on SB Montlake Blvd to run buses thru campus SB, but NB on Montlake.	3/18/2015 12:05 PM
125	I'm assuming, even though it is not listed, that frequency from Maple Leaf to the UW campus on the 373X will be more frequent, instead of ONLY being during peak commute times and one-way depending on time of day (i.e. mornings only going southbound, afternoons only going northbound). The only time the 373X is mentioned specifically is on a change to Maple Leaf routes going downtown, which the 373 is not a downtown bus.	3/18/2015 11:56 AM

126	How about some more direct routes from NW Seattle areas Crown Hill, Broadview, Greenwood and Ballard to connect with the light rail at Northgate. Service currently is not direct, fast or current.	3/18/2015 11:54 AM
127	The 49 will still exist. I currently work in UW Tower, and in a few months will be working 2 blocks west on Roosevelt. I live on Capitol Hill and would hate to have to transfer (at the Link station) for such a short distance.	3/18/2015 11:49 AM
128	Splitting out the 45 and the 48 into 2 routes. Later service on the new 45 route to NW Seattle, midnite was always to early on the 48 going out of the U District.	3/18/2015 11:45 AM
129	Doesn't impact my Metro usage - however, like the general idea of more frequent service on the more used routes.	3/18/2015 11:36 AM
130	Splitting out the 45 and the 48. Later nite service on the 45, midnite was always to early for that route as the primary connector out to Northwest seattle.	3/18/2015 11:32 AM
131	Why is everything about NE Seattle? What about us poor bastards that live in NW Seattle? Like Greenwood, Bitter Lake, Broadview?? It really shows where your priorities are when only one of these areas are mentioned. (7th box down, Greenwood)	3/18/2015 11:29 AM
132	Frequent, direct express to major link areas such as park and ride or transit centers.	3/18/2015 11:24 AM
133	More reliable times during peak time for the 48 or bring back 48X	3/18/2015 11:24 AM
134	alternative concepts are not very clear	3/18/2015 11:21 AM
135	Faster times to airport	3/18/2015 11:20 AM
136	Efficiency and environmental friendliness of Seattle's transit system.	3/18/2015 11:19 AM
137	Sunday service every 15 minutes between 65th and Ravenna and the Husky Stadium Light Rail Station.	3/18/2015 8:34 AM
138	if you discontinue bus service #11 to Madison Park, i will no longer take the bus and be forced to drive everywhere.	3/17/2015 2:28 PM
139	Faster connection between south Wallingford and UW	3/17/2015 1:34 PM
140	Pinehurst. Seattle Transit Blog readers from Pinehurst have made a compelling case that Alternative 1 hurts them.	3/17/2015 11:38 AM
141	Frequent peak service between downtown Seattle and Redmond transit center, 545 is very crowded. Fair trade-off in same trip for off peak via light rail to 542	3/17/2015 9:33 AM
142	I don't like the elimination of route 72 and the fact that route 372 which will replace it will not connect with Light Rail at the UW Station but instead you expect passengers to walk at least 5 minutes to make that connection and 5 minutes is Metro's estimate. Well not everybody can make that walk especially the elderly or those who have mobility problems. If you are forcing people to transfer to Light Rail then the 372 must go down Montlake Boulevard and stop at the UW station. Right now on route 72 I have a direct route to downtown but under this proposal that is eliminated and replaced by a walk through the UW Campus in all kinds of weather and that is not acceptable.	3/16/2015 9:54 PM
143	" Improve service frequency in peak periods by adding several trips in each direction." sounds GREAT. However the impact of this statement is completely unclear since the bus inter arrival time is still "6-15" minutes. If there are more 545 buses to compensate for only running during peak then maybe this is great.	3/16/2015 4:17 PM
144	A direct link between downtown and Magnuson Park on Route 16, 2-way frequent service between downtown & the Aurora fremont exit	3/16/2015 3:32 PM
145	Frequency is key. You'll get more riders to rely on the service (and even get rid of their cars or dependency on Lyft/Uber) if the service is frequent. Then you can extend the network out as people come to rely on the service.	3/16/2015 1:43 PM
146	Instead of sometimes using a combination of 48/545 when the 542 is not running, I would always use the 542. Simpler and no transfers!	3/16/2015 1:21 PM
147	putting at least one route (here, the 311) running along the new Mercer. SLU and the Lower Queen Anne should be better connected.	3/16/2015 12:53 PM
148	Being able to catch the 542 to work at Microsoft after volunteering at McDonald Elementary is a big life change (no bus leaves for Microsoft from Greenlake after 10:09 today, including the Microsoft Connectors).	3/16/2015 12:50 PM
149	Hate that you are making my commute from Maple Leaf to Redmond take longer	3/16/2015 12:35 PM

150	Increased frequency on Rt 8.	3/16/2015 12:30 PM
151	I am so sorry but the proposed changes are very confusing and I am not sure how this will impact me so I don't have enough understanding to provide feedback	3/16/2015 12:29 PM
152	If I read the map correctly, it appears that Peak times for the new 542 will have more Pickup options from the Green Lake P&R. If this is true then this is great for us folks that ride to Redmond everyday! Again of this is true, thank you.	3/16/2015 11:52 AM
153	I like the idea of buses coming every 15 minutes, and a less complicated network overall.	3/16/2015 11:46 AM
154	It's absurd that there the ability to have a freeway station at Montlake has been taken away with the 520 design. This was never addressed as to why in the draft EIS. There are nice new freeway stations on the eastside, but you have limited your ability to have connected transit from the eastside to downtown, with a short stop at Montlake, creating this tortured set of alternative plans that require people to transfer. I don't believe that this is a time savings.	3/16/2015 11:45 AM
155	255 is the only bus that frequently connects Kingsgate and Downtown Seattle. Why change the 255 Route to Children's Hospital? Create a new service from the Eastside to the University. Changing buses during the travel to Downtown Seattle adds more time. We need frequent all-day service between the Eastside and Downtown Seattle! You proposal will create slower connection from the Eastside to Downtown Seattle	3/16/2015 7:16 AM
156	I need direct transport from Pioneer square where I live directly to Redmond. Currently, the 545 route goes through ALL downtown Seattle and then to CAPITOL HILL, which adds 15min to my commute every day. Plus there is no Wi-Fi on the bus, which is terrible for my productivity.	3/15/2015 12:35 PM
157	Frequency improvements to Madison Park and Madison Valley areas by #8 will mean that I may take public transportation more often as it will now be useful for short distances too. (e.g. Arboretum & Madison Street location to Capitol Hill). Otherwise it's difficult to wait up to 30 minutes for something that will be a few minutes drive. But if it's only a 10 minute wait it may be worth it for short trips.	3/14/2015 10:29 PM
158	The route 48 link between UW Link Station and Mt. Baker Station (along 23rd) serves a vital link between North Capitol Hill and access to the Light Rail. Currently, I take the 48 to Mt. Baker Transit Center to access the Light Rail (northbound or southbound). Once the Link Light Rail is complete, from Downtown, I envision taking the service all the way to UW then transferring southbound on the 43 or 48 and getting off on North Capitol Hill (Aloha). Alternatively, when I return from the Airport, I plan to get off at the Mt Baker Station, then catch the 48 northbound, as this will take less time, then all the way to UW and then south bound.	3/14/2015 3:52 PM
159	If routes are changed significantly, it can negate benefits from increased frequency of service. From Lake City I go primarily to the University District Retail Core (The Ave not University Village), the University campus to use the libraries, the Roosevelt Area, Northgate, Downtown and Green Lake. It looks like my access to the University District Retail Core and Roosevelt would be decreased (I'd have to transfer more) in Aternative 1, and transferring slows everything down. I would like to see the Route #72 retained since it is my most direct connection to the University District Retail Core and to connect with Route 48 on 65th NE. I also often travel to the University District through Wedgewood, stop, and then get back on the bus to go either to the University or Downtown or connect with the #48. I also go to church on 35th Ave NE and often ride the bus back and forth from church activiites. Decreasing frequency on the routes 65 during the evenings and weekends present problems for me taking transit. It looks to me like Alternative 1 would be more disruptive plan than Alternative 2.	3/14/2015 2:57 PM
160	Proposal is difficult to understand from the materials available.	3/14/2015 10:38 AM
161	What are you doing with the Rt.277. That is the only bus that goes from Houghton P&R to The UW and the only bus that lets riders transfer to the downtown Seattle at 92nd or EG BR. You are going to make it so we have to leave earlier in the mornings and hope and pray that we don't miss the transfers making that change to light rail.	3/13/2015 6:09 PM
162	frequent service from Bryant to link light rail	3/13/2015 3:59 PM
163	service is needed into Madison Park. It is used heavily by seniors, high school kid who need to get downtown. Making this change will only encourage people to drive to the bus stop or all the way downtown. Madison Park cannot be cut off from bus transportation	3/13/2015 2:41 PM
164	Please keep frequent service on route 43, especially during peak times. 43 is our preferred route to downtown Seattle from Montlake, both for commute and for weekend/evening travel.	3/13/2015 12:56 PM
165	I use the bus to get to work and get home from the University of Washington. Nothing you have done so far has improved this service. During rush hour If I'm not tired I can walk home faster then the buses that are so crowd I can't sit down. So packed people can't get on. An nothing done with light rail has improved my service in Wallingford. I will pay taxes and die before it is of any use to me.	3/13/2015 12:07 PM

166	access to the Montlake bridge/520 along from Sand Point via Montlake Blvd instead of having to go up the viaduct and down 15th and back around to Montlake. With the lack of parking at the Montlake Link stations, this is a MUST.	3/13/2015 11:10 AM
167	In Capitol Hill, I would prefer the 38 use Pine St to go downtown instead of turning on Broadway and route 10 to use John St to access 15th ave instead of Pine to keep the same level of service to the Summit neighborhood. The Seattle Transit Blog did a nice writeup on that. Thank you for not cutting the 49 to the U district. I live in the western part of the U District, near 42nd & Roosevelt and it would be difficult for me to access the U of Washington Link station. I both work and go to school on Capitol Hill so routes going to Capitol Hill matter a lot to me.	3/12/2015 11:07 PM
168	The plan destroys community and negatively impacts the elderly who have less capacity to get to the bus routes.	3/12/2015 10:14 PM
169	Better service from NE Kenmore	3/12/2015 3:46 PM
170	I was unable to understand any of the information points being made on the bullet points above by looking at the map...and it kicked me out of this survey. Why is the route 44 expected to depreciate?	3/12/2015 2:51 PM
171	I love the idea of all-day 15-minute waits (even if on fewer routes). That makes it feasible to use transit--because right now, with transfers transit is impossibly long even to go relatively short distances.	3/12/2015 2:35 PM
172	Too bad there is a 10 Limit.	3/12/2015 10:58 AM
173	Concerned about already clogged arterial streets and whether adding more frequent service to existing routes would net faster travel times considering existing major road construction projects in many of these areas.	3/12/2015 8:28 AM
174	Breaking up the 8 is a great idea; they always get slowed down in the south somewhere and just doing the east-west portion to get across town takes forever. Especially since this is a great way to get to the light rail from Seattle Center or lower Queen Anne.	3/11/2015 7:32 PM
175	The decrease in transfer time, coordinating services (bus and rail)	3/11/2015 4:35 PM
176	Reducing wait times will make transit a habit, not an ordeal. Right now, changing buses is a trip-killer, so hopefully transfer from bus to LINK will be smoother/faster	3/11/2015 11:19 AM
177	Consolidating service on Roosevelt, where I also own property.	3/11/2015 11:01 AM
178	Prefer accessing #67 from University Way rather than Roosevelt	3/11/2015 10:31 AM
179	There will be times this will shorten bus trips.	3/11/2015 7:23 AM
180	Can get from central Wallingford to the Ballard Bridge (16 connecting to 28)	3/10/2015 6:10 PM
181	Bryant to Seattle Center (route 16) Bryant to downtown (route 65 + train)	3/10/2015 4:41 PM
182	The potential of the 16. This would allow me and my children to get to the Northeast library on the bus much more reliably, and allow us to use the bus to grocery shop in View Ridge. (The current 30 minute frequency makes those trips much less reliable and predictable. If one just misses a bus when traveling with small children, it really is challenging.)	3/10/2015 4:35 PM
183	Looks like it'd cost less, which means better service in the future.	3/10/2015 4:31 PM
184	More frequent buss arrivals, consolidated stops	3/10/2015 3:52 PM
185	more direct transfer to light rail station for access to seattle children's hospital and to the airport	3/10/2015 3:35 PM
186	I use the number 11 and 12 routes quite a bit and without them I would have to change buses twice to get where I work. On the map there isn't much distance from 15th to 24th streets, but there is a large elevation change. Not everyone can climb those hills. THINK ABOUT IT.	3/10/2015 12:47 PM
187	Consolidated frequent service along a few corridors (rather than infrequent scattered service) makes transit use to these neighborhoods far easier. Would expect to use transit much more when going into NE Seattle under this alternative.	3/10/2015 12:32 PM
188	Direct connection between bryant / wedgwood and Link (route 65). I will use this every day.	3/10/2015 11:09 AM
189	The Grid! The Grid! The Grid!	3/10/2015 9:57 AM
190	More frequent and reliable service from NE Seattle to the new Montlake LINK station	3/9/2015 10:03 PM
191	The concept deletes the 11 which i use to go to downtown seattle without having to transfer. Taking the 8 + light rail just to get downtown from 23rd & Madison st. is not a good alternative for me.	3/9/2015 5:22 PM

192	If you eliminate the #25 Route bus, transit riders from Lakeview Blvd, Portage Bay/Roanoke Park, Laurelhurst and Montlake will not have a way to get to a light rail station on transit. Right now the #25 would take riders from all of the neighborhoods along the #25 route to the UW Stadium station, but if this route is eliminated, then we will all have to walk 1/2 mile+ to a bus! The #25 route only runs once per hour! I would strongly urge you to not eliminate the #25 route.	3/9/2015 4:24 PM
193	So this option means you will cut the #11 bus, replacing it with the 8. The 8 won't go downtown from Madison Park. I live far enough away from the proposed light rail stations to make this option unappealing and probably cumbersome for me. I don't want to have to go to a light rail station to get the UW, Wallingford. It looks like I can keep using the #44 & #48 to get to the UW. The 2 and the 11 are the buses that get closest to home.	3/9/2015 3:14 PM
194	Better connections in NE Seattle, and all day access. I would use transit more often, and drive less, if connections were better.	3/9/2015 3:07 PM
195	We need to keep both bus lines running at their current schedules, or how is anyone in Montlake/Portage Bay, the closest actual communities to the light rail station, going to get any benefit from it without increased access to the station? A quick Google Earth distance measurement shows that the nearest home in Montlake is already a quarter mile away from the stop. The "Hop In" (aka Montlake Blvd Market) is a half-mile away. Bus service needs to minimally stay the same to make the light rail stop gain it's full potential, otherwise it will be a squandered opportunity for our community to want to take light rail anywhere.	3/9/2015 3:01 PM
196	I like the overall idea of maintaining frequent bus runs and of being creative with routing. There are just a couple specific route changes that really don't work for our family. See next Q. Also, I like the change to #8 that has it run all the way down Madison, breaking off MLK to a separate route (#38)	3/9/2015 2:19 PM
197	The 255 linking through Montlake and up to Children's Hospital!!!	3/9/2015 1:40 PM
198	Eliminating the 11 service to Madison Valley and Madison Park would be detrimental to families, children, and elderly citizens in the entire 98112 zip code. The route 11 is a conduit of transportation for a variety of people representing every cross-section of this city. There's a very large elderly population in Madison Park that needs this service, and it's also a conduit that brings people from other parts of the city in to Madison Park's businesses and public beach/swimming facilities. During the summer months, huge numbers of people ride the bus in to Madison Park for access to the park and community facilities. Eliminating bus service will have an impact on the businesses, employees that rely on the route for transportation, and the community at large.	3/9/2015 12:20 PM
199	Please keep routes 10 & 11 going from Cap Hill to Downtown during commuting hours. I use those to connect to Route 77. The new light rail station on Cap Hill is too far from my workplace at 17th & Olive. Thanks!	3/9/2015 11:52 AM
200	Faster 28 which is the bus I prefer.	3/9/2015 11:50 AM
201	Improved later evening options on 372X; I work until 9p or 10:45p at Metropolitan Park buildings (Howell and Olive St).	3/9/2015 10:36 AM
202	Maintain route 308 and 303	3/9/2015 10:26 AM
203	You have eliminated my ability to use the bus. I live on NE 80th. Distances are too far for me to walk to catch a bus. Congratulations -- I'll be forced to go to work in my car and pay over an hour's worth of wages to pay for parking.	3/9/2015 10:08 AM
204	a direct bus to the new UW link station with NO transfer, so efficient to get to Capitol Hill and Downtown and the AIR PORT!! For me the most important change needed. Thanks	3/9/2015 10:02 AM
205	For South Seattle leave ti as is or have more busses going from park-N-ride stops to light rail. we would like fewer transfers.	3/9/2015 9:06 AM
206	I am not sure what to select but basically I want a bus that will take me from 65th and 35th (#64/#76) to Stewart & Denny. Currently the #64 shoots pass this intersection (it used to be a stop) and those of us who work at Denny or north of Denny have to walk 5+ blocks back we just came. The #76 required the same amount of walking. but if I understand the plan correctly the convention center will no longer be a stop when the light rail Northgate route is open. I don't want to transfer between buses/ rail	3/9/2015 8:35 AM
207	more frequent service between east and west north seattle	3/8/2015 8:52 PM
208	I really like that the 65 route, which I use frequently, would be redirected right to the link station. I much prefer that route rather than the current 65 route which goes through UW's campus.	3/8/2015 8:29 PM
209	I travel to the airport 1-2 x per month and I need a fast, reliable way to do this from Sandpoint. I now use route 75 but if would not drop me off at the link. Issue with a suitcase with me.	3/8/2015 7:33 PM

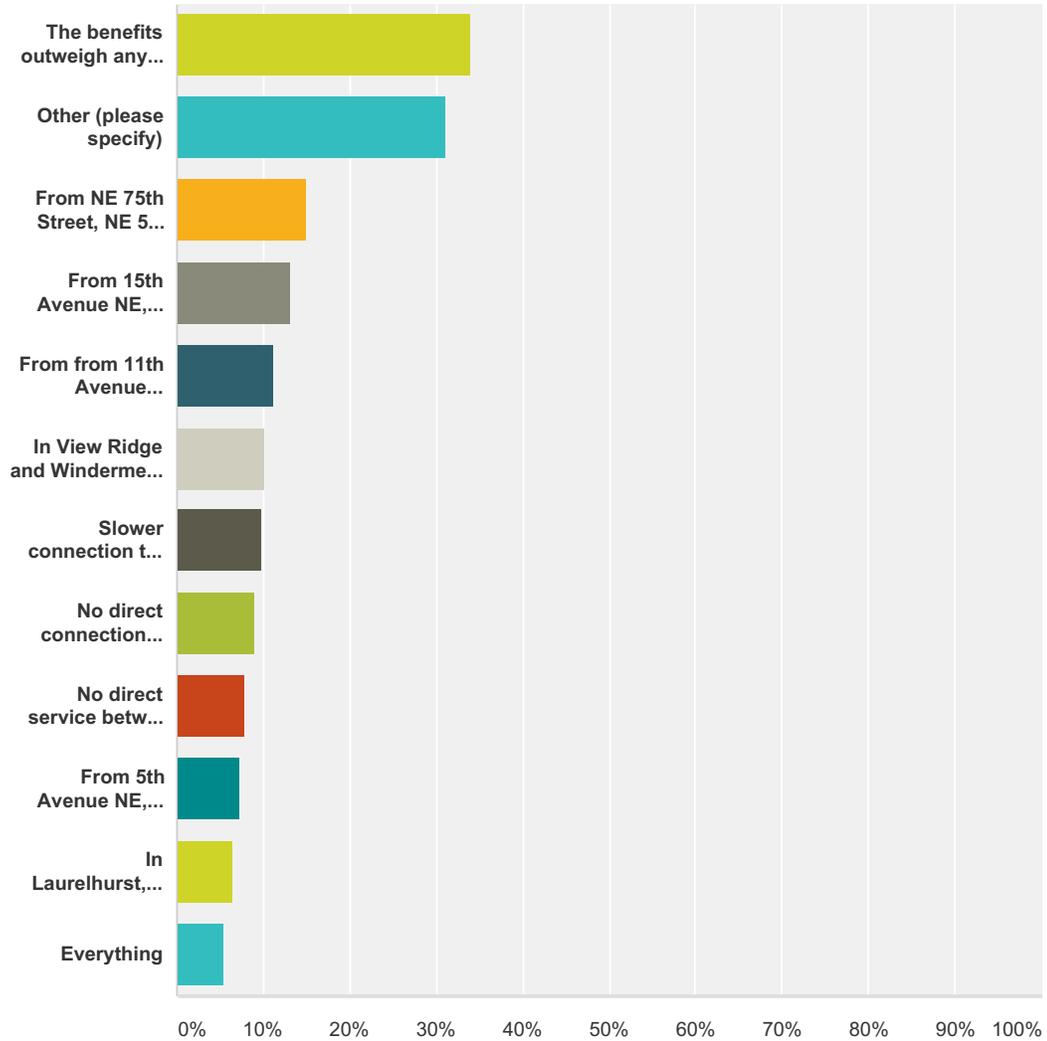

210	I am very concerned that the changes proposed are so great and sweeping that I cannot realistically grasp how they might impact my community. The changes will not significantly affect my commute but I am very worried about my neighbors, especially my older neighbors who cannot travel a half a mile to get to the bus from their house. A quarter-mile travel distance is a more realistic planning target. Even this will be too great a distance for some.	3/8/2015 6:25 PM
211	Frequent all day service between downtown seattle and kirkland. Transit to/from Kirkland/Seattle has always been insufficient and keeps being cut back.	3/8/2015 3:45 PM
212	by getting rid of the 66 ur denying direct access to low-income and medically needing vulnerable population. Shame on you Metro! Leave the 66 alone!	3/8/2015 3:00 PM
213	Seems to eliminate more overlapping service. No changes to Route 44.	3/8/2015 12:35 PM
214	that I would not be in inclement weather longer and more shelters perhaps.	3/8/2015 9:08 AM
215	I am thankful that Metro is 1.) increasing frequency in most neighborhoods 2.) opening its eyes to changing dynamics in the city such as growth in Capitol Hill and South Lake Union and 3.) beginning to think outside the box when it comes to planning.	3/8/2015 3:24 AM
216	I ride the bus less now than in the past because of cuts to service. These concepts would help me get back to using transit regularly.	3/7/2015 8:03 PM
217	One seat ride from NE Seattle (Bryant) to downtown at more than peak weekday hours and on weekend. Although might consider transfer to light rail at UW.	3/7/2015 7:54 PM
218	Love added service to South Lake Union and Mercer Street. Would be great to see 2-way service on Boren for folks who commute from first hill	3/7/2015 7:40 PM
219	In general, I think trading increased walking time for increased frequency is a great move. I'm happy to hike a bit to the nearest bus stop. But I don't want to stand around in the cold for half an hour waiting for a bus when I get there. It's much easier to plan total trip time when you don't have to gamble on a large uncertain wait time at the bus stop.	3/7/2015 1:44 PM
220	It is nice having more frequent buses on certain routes, but making the bus routes farther apart from one another makes getting to a bus harder. Also less alternative routes may make more delays when accidents, construction, and heavy traffic slow the buses.	3/7/2015 1:34 PM
221	More frequency and faster times getting downtown from university village or children's hospital	3/7/2015 1:22 PM
222	need for more east west runs	3/7/2015 1:15 PM
223	Continuation of the South Lake Union Transit surface rail service along Eastlake and the U. Bridge to the U District Station at NE 43rd Street and Brooklyn Avenue NE	3/7/2015 12:44 PM
224	Provide frequent service for riders in the White Center/Highland Park areas who take Route 60. Buses are way too crowded during peak hours and there are many elderly and disabled riders who struggle to get a seat on the bus.	3/7/2015 12:10 PM
225	It keeps Route 66. I cannot use public transit, which I used to use for evening activities until evening service was reduced, if I have to walk from NE University Way or 15th NE to Roosevelt. It is simply too unsafe. Please note the number of armed attacks. Additionally, I work at Evergreen hospital and some sort of direct transit from Roosevelt (and NE 55th) would be helpful to me, although not a priority because of my unpredictable work hours.	3/7/2015 12:09 PM
226	Neither of the routes, 66,77 or 373 travel on 15th ave NE. Not sure what some of your questions team.	3/7/2015 11:24 AM
227	I live on the east side of Cap Hill and can currently take the 48 straight to Loyal Heights. If you get rid of the 48 and get rid of buses that go through non-central Cap Hill (43, for example) to the U District, you're not leaving reasonable alternatives that don't require a lot of hilly walking. I currently live near the 8, 11, 12, 43 and 48 (and use all of them) but am a mile away from Broadway - all these potential deletions of routes are going to leave a lot of people stranded.	3/7/2015 9:56 AM
228	Perhaps improve traffic on surface streets in the U District as some buses decrease and ridership switches to Link Light Rail	3/7/2015 9:53 AM

229	Because the light rail stations are so spread apart in north Seattle, it is absolutely vital that Metro provide frequent (the same bus comes every 5-7min. during rush hour), accessible routes from each neighborhood to the Link light rail. The UW stadium station is very far from dense, residential areas so many people will want to travel to that station to commute to downtown Seattle. It should be Metro's mission to make rapid, reliable transit service to the UW stadium station available to all north Seattle residents, at least for the next five years until the remainder of the north stations are built.	3/7/2015 8:53 AM
230	There are errors in your service responses (see green lake to northgate route, it says 16 instead of 26x)	3/7/2015 8:44 AM
231	Increasing weekend servuce	3/7/2015 7:01 AM
232	no wedgwood/ sand point peak time routes go to south lake union without transferring at UW. Not sure either choice addresses this, but also not sure about what changes may occur to route 71 or 75.	3/7/2015 6:40 AM
233	The Madison routing for the 49.	3/7/2015 12:44 AM
234	Only in the way it might help people going to the U.	3/6/2015 10:28 PM
235	I want to be connected into the Link Rail system as quickly as possible. I would like to see any light rail station used as a hub. So from my Greenlake address I would quickly be sent to the nearest Light rail station so I then can continue my trip to downtown. Have a number of east west routes that do nothing be ferry riders from the link station to the neighborhood	3/6/2015 10:11 PM
236	faster direct travel between central district and northgate mall, except the route number change. DO NOT CHANGE ROUTE NUMBERS IN THE MIDDLE OF A ROUTE. keep one route number for the whole trip: i.e. route 48 from mt baker station to northgate mall(not 48-67) or route 14 from mt baker station to upper queen anne(not 1/14), etc...	3/6/2015 9:03 PM
237	Improved frequency on Route 49 in Alternative1. Use of University rather than 15th for new route 45.	3/6/2015 8:32 PM
238	Where is better service for laurelhurst? 1orhi'vhimo	3/6/2015 8:15 PM
239	Why do you ask? You won't listen.You'll just do it the way Big Money wants it done.	3/6/2015 7:57 PM
240	I'm concerned that with Alt 1 riders in NE Seattle will be forced to use existing circuitous routes to reach the Link Station at Husky Stadium. All routes currently travel through or around the University District...But none of those routes travel down 25th Avenue NE. Instead, for riders in NE Seattle to efficiently reach the Husky Stadium Link Station, there needs to be new or modified routes or shuttles with direct access to Husky Stadium via 25th Avenue NE and via Sand Point Way. The only route that went straight down 25th Ave NE from NE Seattle was #243 but Metro recently terminated that service. Please consider adding routes with direct access to Husky Stadium from NE Seattle via 25th Avenue NE and Sand Point Way.	3/6/2015 7:42 PM
241	I have chosen my home at 65th and Roosevelt because of close proximity to Routes 48 and 66. I am disabled and need very close bus stops with a place to sit down. The changes in Alternative 1 would make bus traveled very very difficult for me. It's like discriminating against disabled people.	3/6/2015 7:40 PM
242	Do *NOT* delete the 71 or 76 to downtown. Do *NOT* do it...you will suffer in hell if you do!!!!!!!!!!!!	3/6/2015 5:37 PM
243	More frequent 49 service!	3/6/2015 5:14 PM
244	I think you should reinstate the 30/74 weekend and all day service!	3/6/2015 5:01 PM
245	Retaining service to a wider area. This seems necessary for disabled and elderly riders who have no other way to get around.	3/6/2015 4:58 PM
246	reliable, frequent, direct service from new UW link station to sand point	3/6/2015 4:55 PM
247	Continue with frequent service to North Capital Hill with the 49 route.	3/6/2015 4:53 PM
248	Through-routing the revised 48 with the 67 to provide a frequent, consistent north-south route from the Central District to Northgate	3/6/2015 4:49 PM
249	Modular nature. Instead of 3 long-haul buses trailing from North Seattle to South Seattle and back, understanding that a web lets people get to more distributed places more flexibly.	3/6/2015 4:00 PM
250	More frequent service between Queen Anne, Belltown, and Capitol Hill on Rte 8.	3/6/2015 3:58 PM
251	Weekend service on 372 is a high priority for me.	3/6/2015 3:34 PM
252	The increased frequency of peak commuter routes (like route 76) is a huge win for riders. The buses are at capacity every day between NE Seattle and Downtown.	3/6/2015 3:32 PM

253	In general, I do not prefer this alternative.	3/6/2015 3:21 PM
254	Bring the rail up to Edmonds and further north-like from Everett to Sea-Tac, but more inland, so not have frequent landslides from rain like currently happens in Edmonds area!	3/6/2015 3:11 PM
255	I don't like not being able to ride on one bus north of 92 around to the transit center, This is especially difficult for seniors and others who are mobility impaired. This route as is provides service to several medical facilities, banks, pedestrian entrances to Northgate Mall. Taking that away is inconsiderate and unnecessary.	3/6/2015 3:09 PM
256	This ambitious alternative is wonderful. A principal asset of this plan is that NE Seattle finally receives a grid of frequent all day service. I love that the 26X becomes an all day route, as I would use it every day instead of the 512.	3/6/2015 3:07 PM
257	Direct service via Sand Point Way, NE 45th, Montlake to UW Link Station	3/6/2015 2:55 PM
258	getting to airport	3/6/2015 2:46 PM
259	Direct transportation from Mountlake Terrace Transit Center to SOUTH LAKE UNION	3/6/2015 2:45 PM
260	I don't understand the maps. I don't understand the descriptions. I don't understand what the heck you are DOING. WHAT IS THE DIFFERENCE? IN ONE BRIEF SENTENCE! IF YOU CAN'T EXPLAIN IT, DON'T DO IT!!!	3/6/2015 2:41 PM
261	awesome.. frequency is freedom Do the big bold change. While some current riders will complain, this bold plan will serve way more new riders with it much improved design, ease and high frequency. We must do want maximizes future ridership and efficiency and not pander to the old guard and wants no change.	3/6/2015 10:12 AM
262	I like how Alternative 1 anticipates the changes that will be coming in 2021 with Northgate Link opening. I >REALLY< like how it adds a grid of frequent service.	3/6/2015 9:33 AM
263	Improvements to the route 8	3/5/2015 6:52 PM

Q8 What concerns you the most about the alternative 1 concept in north Seattle? (choose up to five)

Answered: 2,331 Skipped: 4,228

#	Other (please specify)	Date
1	1 traveling further to get to the bus stops I use commonly or use as an alternative 2 less coverage of routes so that i have to transfer 3 transferring-i like direct routes, transferring costs a lot of time and can be a safety issue waiting around for the next bus 4 i would love the option of a few direct buses and a few multi-stop buses so i can be home quicker or have the option to make a stop at a location i actually need to go 5 i'm less likely to take the bus if i have to transfer or walk to the location i actually need to go to	4/2/2015 7:19 AM
2	loss of local bus routes like the 43.	4/1/2015 2:37 PM
3	Transferring at UW to Link to downtown when current 311 service takes us directly to downtown and provides numerous stops in proximity to destinations makes no sense. As an early AM rider traffic is virtually never an issue so Link doesn't even provide an advantage here. Returning to Woodinville in the evenings with Alternative 1 doesn't merit consideration. I'll return to driving my own single occupancy vehicle after riding Metro the last four years.	4/1/2015 1:19 PM
4	my 3 daughters are coming of the age to ride the bus to high school on capital hill and go shopping downtown/northgate/uvillage. eliminating all service to Laurelhurst makes this nearly impossible and requires them to walk over a mile to get to a bus stop.	4/1/2015 11:56 AM
5	my children are of the age where they will start using the bus to get to shopping, high school and downtown. Eliminating service to the entire neighborhood of Laurelhurst requires us to use our car to take them places. with street parking and other initiative floating around regarding getting rid of parking/cars downtown the business person who uses their car today may consider using the light rail system. you are completely eliminating this as a possibility in Laurelhurst since there is no street parking available at children's hospital to catch the bus to then catch the light rail and the parking costs at husky stadium are excessive when you then factor in the cost of the light rail to make this a viable alternative. this is a lose/lose for our neighborhood.	4/1/2015 11:50 AM
6	It sounds like this concept will involve more transfers and will rely on already-overcongested major streets.	4/1/2015 8:52 AM

7	<p>I'm not sure how through-routing the 48 and 67 facilitates electrification of the 48S. This worries me. I also don't see how reliability on the 48 is improved by through-routing it with the 67 instead of the proposed 45. I think I see the appeal of moving buses like the 255 and 545 from downtown to the U District, but isn't Montlake Blvd unreliable enough to make the schedule unpredictable? If you already have frequent service from UW station to the same place (65/75), would it make more sense to end these routes at the station? Splitting the 8 into two routes makes sense but will raise hackles in SE Seattle from people who think they're again getting screwed as they'll have to transfer, and the 38 won't get the increased frequency the 8 would. But I think that part makes sense. I don't have much of an opinion on changing the northern 9 terminus, but I'm wondering what the reasoning would be for shifting it east to 15th & John. Is there more ridership there? Is it to provide more east-west connections or replace part of the 43? 45, 62, and 256 aren't really new route numbers. They're all recycled from routes that have been canceled. How would the 255 and 540 not be redundant? I'm wondering how Madison St. BRT fits into the proposed network. Is there more use to be made of two-way Mercer St to shift people and traffic off Denny? I used to work by Northgate and ride the 16 regularly. The segment above 92nd St is indirect, slow, and circuitous. I think that portion of the route alone took 10+ minutes to get through at rush hour. Whether it's the 16, 26X, or another route serving that area, it seems absolutely critical to cross at 92nd St and get rid of the indirect loop on Northgate Way. There has to be real savings there in service hours. I really like truncating the 71-74 and increasing service on the 70. How many buses or which routes will have to use surface streets instead of the tunnel when U Link opens? Have you considered routing the 47 from Summit/Bellevue to the CapHill station instead of downtown? Or would that not be worth it? All the wires are there; would just need to add in the turns at Olive Way. The First Hill Streetcar isn't shown on these maps. Any savings to be had from truncating routes like 9 or 60 where they meet the FHSC? Is ridership on the 60 close to justifying 15 minute headways?</p>	4/1/2015 1:26 AM
8	<p>Elimination of service stops along 15th to the U District - and the how the plan seems ignores the entire residential population of the Pinehurst area in its planning. The change to route 73 actually increases commuter time from this area to the UW, even if one were to take Metro to connect to the Light Rail for the remainder of the trip... still would be a longer commute (not to mention having to have to cross a busy street in the existing design for the Light Rail station.) Not very sensible planning... almost as if the people writing up the changes didn't really pay attention to ridership levels or population densities or really know Seattle neighborhoods in the North and NE area....</p>	3/31/2015 10:14 PM
9	<p>I'm concerned about what looks like gaps in service between NE 65th Street and NE 50th Street. Right now I walk only 3-4 blocks to get to my nearest bus stop and it looks like I'll be walking 8-10 blocks to get to either link or my most used routes. I'm also disappointed that there is a lack of service from Ravenna along Eastlake. And in all these changes I'm really surprised that there isn't a new route that goes from the U-District directly to the Seattle Center. I'm at 58th & 17th and frequently go down to the Seattle Center for theatre, film, events, etc... I would love to take transit, but inevitably have to go all the way downtown and then back track on the 1 or the 3. Why not make the 70 go along Mercer up to Queen Anne Avenue North or even just to 5th. It would be very nice to have a single route to the Seattle Center.</p>	3/31/2015 10:07 PM
10	<p>Loss of the 43 route to group health and our community connections to North Capital Hill. We would also take the bus more often if we could get to University Village from Montlake on the bus. Without having to go into the U district to change buses.</p>	3/31/2015 6:24 PM
11	<p>Does not address extreme underservice to Northgate P&R in general, between Northgate P&R and Seattle Center, between Pinehurst/Victory Heights and UW, between east side of UW/University Village and points north, between Northgate P&R and downtown at night and on weekends, ridiculous overcrowding of routes from east side of UW past University Village and Children's Hospital to Lake City and Northgate AND MORE</p>	3/31/2015 5:29 PM
12	<p>more difficult travel between Stone Way and UW (moving 32/31 from Stone to Wallingford)</p>	3/31/2015 4:52 PM
13	<p>Please keep #12 and #43 buses running to service North Capitol Hill</p>	3/31/2015 4:50 PM
14	<p>Eliminating the 43 route.</p>	3/31/2015 4:34 PM
15	<p>The 25 being taken out of service</p>	3/31/2015 4:07 PM
16	<p>Losing the 68! I live at 75th and Roosevelt and it looks as though I will suddenly live in a bus desert unless I want to go south on Roosevelt. Currently the 68 to UW then the 65/75 is the fastest way to get to Children's. I'm going to have to start walking a lot farther or spending a lot more time sitting on the bus on construction ridden Roosevelt to get there now. Why does it continue to be so difficult to go East/West in seattle on the bus. This is exactly why people give up at start driving.</p>	3/31/2015 3:43 PM
17	<p>Fewer options serving Wedgwood north of NE 85th Street. My only commute options would be Rt. 76 (which is 5 blocks farther away than Rt. 64, which I currently use) and Rt. 65 + Link, which could end up being fine but might also end up being slower due to traffic congestion near the U.W.</p>	3/31/2015 3:24 PM

18	The horrible connections between Stevens Way and the UW station are unacceptable and must be addressed beyond moving the stops a tiny bit closer. This is not merely a matter of walking distance. Asking riders to make so many disorienting turns and elevation changes and to walk through an unfamiliar campus that will be largely deserted at night and many times a year is totally, 100%, unacceptable. It is confusing, unintuitive, time-consuming, and frankly it will suppress feeder ridership. Can you imagine for a moment the conversations bus drivers will be having when passengers ask them where to transfer to the train? "Well, get off here, cross the street, back track 60 feet, walk down the middle of Rainier Vista - oh that's the wooded path over there....., cross the pedestrian bridge over Pacific Place, take a hard left turn, cross a SECOND bridge over Montlake Blvd, take an escalator to the surface, take another 3 escalators and there you go!" This is a recipe for a lot of lost angry people. This alleged "connection" is so bad that it really threatens to undo much of the great work you have done in creating this fantastic alternative 1 network. Alternative 1 really only works half as well as it could have if there had been HOV lanes on Montlake Blvd that would allow busses to approach the station from the north. Given that we have known that the station would be at this location for about 10 years, it mystifies me that Metro has not been loudly and actively banging the drum to get these lanes installed. This really strikes me as a failure in leadership.	3/31/2015 3:22 PM
19	Having fewer routes means more transfers, which can introduce more delays since it relies on more buslines being punctual.	3/31/2015 2:50 PM
20	I'm more concerned about the potential deletion of route 43.	3/31/2015 1:28 PM
21	The 16 is a fantastic connection to downtown from Wallingford, and there is nothing proposed to replace it. I think the elimination of this route would negatively affect a lot of residents who rely on this quick and easy transportation to downtown via Aurora Ave. People who need to get downtown quickly will rely on cars instead and increase the number of cars on the road and cause further delays.	3/31/2015 12:46 PM
22	cutting/reducing Route 43	3/31/2015 12:38 PM
23	Not having enough service to accommodate healthcare workers who work 12 hr shifts.	3/31/2015 11:50 AM
24	not sure yet	3/31/2015 11:39 AM
25	Slower travel between Fremont and the University District (route 44).	3/31/2015 11:36 AM
26	won't have service when i need it for my work schedule	3/31/2015 11:27 AM
27	Taking away the Montlake Freeway stop will be a huge inconvenience for many people commuting from the eastside to UW/Montlake and to commuters from Montlake to downtown Seattle. It will also burden an already heavily traffic-burdened neighborhood with unnecessary, additional bus traffic.	3/31/2015 11:24 AM
28	don't delete 242 w/o a similarly convenient replacement!	3/31/2015 11:23 AM
29	Deletion of 242 which I ride daily. Going through the U-district is time consuming and inefficient for me.	3/31/2015 11:16 AM
30	I am concerned that much of the neighborhoods to the NE of the Link station opening near Husky Stadium are not well-connected to that new station. There need to be more routes that run small buses, more frequently down the major arterial streets directly to the Link station. Otherwise, people will just drive everywhere rather than riding public transit. Also, where the Link routes do not help commuters. The buses need to be reconfigured to feed into the growing South Lake Union area. Right now all of the commuter buses by-pass this area of town. The fastest option I currently have on public transportation is 55 minutes from View Ridge to South Lake Union. At that rate I can drive it much faster, and so, eventually I will give up on public transportation, unless the county and city and reconfigure the options to make public transportation much more competitive.	3/31/2015 10:51 AM
31	Limited geography (compared to alternative 2)	3/31/2015 10:47 AM
32	Losing coverage for needy riders.	3/31/2015 10:35 AM
33	I think "having to travel further" doesn't quite show the problem. A lot of the neighborhoods of Pinehurst, Victory Heights, Jackson Park, and Olympic View will need to take a short transfer (complete with all that overhead) just to get to the bus that will get them to light rail that will get them to their destination. I think this is too much to ask for most people. I'm very much in favor of restructuring to get more people to Light Rail but in the process we need to actually get more people to light rail.	3/31/2015 10:17 AM
34	Minimal benefit to improving transportation to the Magnolia community.	3/31/2015 9:51 AM
35	No accessible service from 24th Ave. E. in and E. Galer/E. Lee to and from downtown or U. District.	3/31/2015 9:22 AM

36	Removal of route 43. That is the route that serves all of my transit needs. Walking from my house to the UW light rail station takes 30 minutes each way, longer than my current trip to downtown on the 43. In bad weather, that's a terrible option.	3/31/2015 9:10 AM
37	This plan assumes users are fully mobile and can easily walk a half mile to the train station. The current bus system serves stops that are more dense. Instead of walking 200 yards to the bus stop, I have to hike to Husky Stadium (perhaps wait for a draw bridge) which is at least a half mile.	3/31/2015 7:59 AM
38	Cross town service is still non-existent.	3/31/2015 1:48 AM
39	The so-called benefits are insignificant. Trading off breadth of service for more frequent service is a great promise, but it has proven to be practically impossible to implement. It does not work, and it is not something that I value. The other RapidRides around the county have been a net reduction in quality of transit service. Lack of easy access to the UW Link station. Too often you will have to walk a great deal or take an extra bus to get to the Link or from the link to transfer to a bus to get to your ultimate destination.	3/30/2015 11:16 PM
40	545 is a convenient route from montlake to downtown...replacing this with 542 to the university link would be much less efficient. Doing so before the university link offers sufficient stops downtown (it appears much of this development is yet unfunded) would be a mistake. Increased frequency of route 49 would be useful, but the specific benefits would be greatly outweighed by the costs of the other proposed changes.	3/30/2015 9:55 PM
41	You state 15 minutes between buses, but for how long in the day does that last? I'm tired of waiting ever longer at night (especially late night) when I'm trying to come home from an event or even work (I work many evenings)! Plus, I work on the weekends, I need my buses to be there, at the same times, whether weekday or weekend, including evenings and nights.	3/30/2015 9:48 PM
42	Increased walking distance to access Transit: unless you live at Husky stadium, the walk distance is CONSIDERABLY longer	3/30/2015 9:13 PM
43	nearby light rail stations are too far to walk to and there is no parking, so we would really miss the bus stop which is two blocks away. As a senior citizen, we would probably need to take a cab--really unreliable and expensive	3/30/2015 8:18 PM
44	Elimination of non rush hours 545 and 242, the two buses I use most for my commute with alternatives meaning a longer commute and over 1 mile longer walk.	3/30/2015 8:17 PM
45	I think the physical spacing between routes is too far for many riders already, especially when the travel is up and down hills. I would personally benefit from more frequent service on 10th Ave E, but it's not worth it to cut service on 15th and 19th (where I also want to go, or get home from).	3/30/2015 6:59 PM
46	I don't want the #43 to go away or diminish service.	3/30/2015 6:49 PM
47	Deletes bus route 43, our neighborhood's best connection to downtown.	3/30/2015 6:35 PM
48	No bus stops near my house	3/30/2015 6:24 PM
49	No bus on boyer or fuhrman	3/30/2015 6:04 PM
50	I am 75 years old, and partially disabled. I rely on the 11, 25 (gone), and 43 because I only have to walk two blocks to catch a bus. (NOTE to Mayor: I am not going to be riding a bicycle.)	3/30/2015 6:04 PM
51	Having a slower connection between the UW and Northgate Mall, which has to go out-of-direction via the often-congested Northgate Way. Having all off-peak service from Pinehurst be funneled through Northgate TC; one of these budget-neutral proposals would vastly improve things: http://seattletransitblog.com/2015/03/15/pinehurst-bus-suggestions-for-alternative-one/	3/30/2015 5:24 PM
52	Inability, lack of frequency, to get from light rail to route 74 --it's more than a mile between light rail stations and route 74 stops!!!	3/30/2015 5:08 PM
53	Elimination of Route 242, which I use daily. Discontinuing 545 service other than rush hours (I use 522 --> 545 to get from Lake city to Redmond), Any alternative through the UW will end up with a longer commute as buses from Lake city to UW are much slower than 522 to downtown. Loss of night owl service with loss of 72. I personally do not use it much, but many do and there is no alternative.	3/30/2015 4:50 PM
54	Continue the 255 up to Magnuson Park Connect Roosevelt & 45th and Convention Place Station area	3/30/2015 4:15 PM
55	Route 25 Service is eliminated. This creates difficulty accessing the new light rail station at Husky Stadium for residents along Portage Bay in Montlake and Roanoke/Portage Bay. To reach the 49 involves a steep hill that makes it inaccessible for many people.	3/30/2015 2:40 PM

56	Generally, I have concern for any changes from Metro current service, UNLESS THERE IS AN INCREASE/IMPROVEMENT OF SERVICE (additional routes, frequency & buses). ANY PLAN THAT DELETES ROUTE 43 IS UNACCEPTABLE. ANY PLAN THAT REDUCES SERVICE TO ALL NEIGHBORHOODS, INCREASES WALK & WAIT TIME TO/FOR BUSES IS UNACCEPTABLE. Living in the west edge (7th to 8th Ave NE, NE 45th St to NE 47th St) of the U-District, using Light Rail is not really an option I will consider except for novelty from time to time or if going to SeaTac, which I never do. Both Alternatives appear to reduce service to my area of the U-District..	3/30/2015 2:18 PM
57	Continue the 255 up to magnuson park	3/30/2015 12:19 PM
58	No direct service from eastside to downtown during off-peak hours	3/30/2015 9:33 AM
59	Having to travel farther to bus stops in order to get transit anywhere.	3/30/2015 8:42 AM
60	I would lose the bus stop on my street on dexter. It would make it a lot more inconvenient to take the bus and I would probably drive a lot more	3/30/2015 8:36 AM
61	• "Continue the 255 up to Magnuson Park" • "Connect Roosevelt & 45th and Convention Place Station area"	3/30/2015 8:18 AM
62	Severe congestion on Montlake Boulevard NE and Route 255	3/30/2015 7:11 AM
63	Worried that having 64X and 66X using Fairview is going to be really messy at peak evening hours, where I currently frequently see 70s getting stuck and bunched up. I ride from downtown to Eastlake once a week and take the 66X now because I know I'll be waiting for a 70 (but three of them will come at once). Concerned about the deletion of N/S service on 19th, it seems to leave a big space in the grid in a populated hilly area. This may be out of the scope of this, but there's a lot of duplicated service on Jackson between 12th and Jackson and Downtown that will become increasingly redundant with streetcar service coming there. Could one of those routes be modified to head north at 12th and Jackson, use the existing trolley wires to go up Boren to Broadway, then cut up Madison and up to 19th. It seems like it could be a route to nowhere, but it provides opportunity for connections given the increased frequency of other routes.	3/30/2015 4:52 AM
64	Cancellation of the 43 route completely The walk from the new University station to the campus or Medical Center in inclement weather	3/29/2015 9:17 PM
65	(1) From Pinehurst (110th-145th Street), no direct route to UW Station. (2) The 67 gets caught in Northgate Way traffic rather than using N 100th Street like it does now. (3) From E Pine Street, Capitol Hill intra-hill service is less convenient (routes 10 and 11). (4) The major transfer points (23rd & John, Roosevelt & Northgate Way) must have good transfer stations: location/safety/amenities.	3/29/2015 8:38 PM
66	No direct connection between Children's Hospital and the University Ave at NE 45th	3/29/2015 5:41 PM
67	Lack of non-stop service from Madison park to capital hill for kids going to and from school--lack of non stop creates a safety issue for children travelling to and from school. Particularly the school's located of Madison st on capital hill.	3/29/2015 5:01 PM
68	it is difficult to take away routes that already exist. people with needs have built their lives around these routes. we should probably just raise taxes and do both (maybe not a popular idea)	3/29/2015 4:46 PM
69	Would need to transfer to get from Madison Park to downtown Seattle/Westlake Center. Currently, I can just take the 11, but with this alternative I would have to take the 8 or 38 and then transfer.	3/29/2015 4:38 PM
70	I am concerned about a greater distance between bus stops.	3/29/2015 4:12 PM
71	Now I only take the 48 to work. My concern is I won't have a one connection to work any more.	3/29/2015 3:35 PM
72	I live in the Woodland Park/Phinney neighborhood and don't really see the benefit for my neighborhood. I work at Seattle Children's and catch route 44 to U-District and have to catch a shuttle from there to work. How will this benefit my travel time? Hopefully it will improve the times on 44. Less delays and give more room on the now packed bus during peak hours. I'm trying to use public transportation versus driving to work but it's hard when traffic causes delays and adds more stress to my travel.	3/29/2015 2:53 PM
73	Service ending at 11pm (instead of midnight). Still not a terribly direct connection for us to the light rail (56th and Latona is where we are).	3/29/2015 12:54 PM
74	The Kirkland stop moves from the South Kirkland Park and Ride to the Houghton Park and Ride. I would prefer that it stay at the South Kirkland Park and Ride because there is more parking available.	3/29/2015 11:51 AM
75	Elimination or reduction in service of the route 25 and 43 lines	3/29/2015 11:35 AM
76	Lack of service to the west side of Green Lake/Stone Way.	3/29/2015 9:54 AM

77	Particularly concerned about the loss of service between Meridian and Green Lake. I use this a bit and would be happier if the 26 were extended as far north as Northgate Way. Also, many friends have concerns about the loss of service from Pinehurst direct to the UDistrict with the rerouting of the 70 series, could Seattle buy more hours on the 373x to compensate for this loss?	3/28/2015 9:19 PM
78	Direct connections from Montlake to Downtown Seattle would be eliminated (routes 25 and 43). Route to university district would have less frequent service (48 only). Using light rail from Husky Stadium would require an extra bus to get there (48 bus with infrequent service and no stop close to light rail station)	3/28/2015 9:10 PM
79	System is set up for commuters only-grocery shopping, libraries, visiting friends would no longer be feasible by bus.	3/28/2015 7:30 PM
80	continue the 255 up to Magnusen Park	3/28/2015 6:08 PM
81	Replacing the 73 with 67 service will NOT start early enough to get me to work (at the UW Medical Center) on time. I currently take the 73 from Pinehurst because it starts early enough (and I can catch it right across the street from my home).	3/28/2015 2:11 PM
82	N/A	3/28/2015 11:54 AM
83	Squeezing out, rather than improving, geographical coverage. Failure to address on-time problems.	3/28/2015 9:43 AM
84	I travel from downtown to Northgate on the 41 and take whatever is available to go N,	3/28/2015 8:03 AM
85	see last	3/28/2015 7:49 AM
86	Having to be aware of bus times, rather than just going to a location where there is great service	3/28/2015 7:28 AM
87	2 quibbles and 1 larger, philosophical concern: 1) I think the new 45 won't be any more reliable than the old 48 because it's still a long route that will get stuck in traffic. Breaking up the 48 was a good idea but I don't think combining it with an east-side route will help it's ability to stay on schedule. 2) I would rather see the 16 continue to go north of the Northgate transit center. A Metro employee at the meeting I attended suggested that the intersection of Northgate Way & I-5 is too congested, but it seems to me that that is a reason to have buses in the area, not to avoid it. 3) I like the increased frequency of buses, but I'm not sure that having fewer routes and stops is good overall. People who have mobility problems are going to have problems with it. I don't agree that efficiency of routes is the best goal. Metro should certainly strive to operate efficiently, but serving people who need transit the most is not necessarily the same as serving the most people. Some consideration should be given to how people will get to the fewer routes and stops.	3/28/2015 7:26 AM
88	I need frequent service between Fremont and Ballard (extending to Shilshole Marina), Fremont and Northgate, Fremont and University District, and Fremont and Downtown Seattle. Also frequent service between University District and Downtown Bellevue.	3/28/2015 2:31 AM
89	poorer service overall to wedgewood -no direct route to downtown (except peak) -no direct route to Univ District	3/28/2015 1:32 AM
90	hard to get from montlake to the light rail station at husky stadium	3/27/2015 9:08 PM
91	No direct service along 25th Ave NE and Montlake Blvd. to connect NE Seattle all the way to UW Link	3/27/2015 9:04 PM
92	By listing the pros for the first and cons for the alternatives to choose from it sure looks like you are trying to manipulate the survey results. Why bother to ask us then?	3/27/2015 6:33 PM
93	Continue the 225 up to Magnuson Park. Connect Roosevelt & 45th and Convention Place Station area	3/27/2015 5:51 PM
94	Nothing	3/27/2015 5:28 PM
95	I can't believe you are taking away the 73. That is my one-bus ride from Olympic Hills to the UW and downtown. You are replacing it with a two-bus+plus+train ride that is awful in every way. Please wait for the train to reach Northgate before you make me do all these transfers. Though I am an infrequent rider of the 71, the same complaints apply. If the 372 is super frequent and goes on weekends, it could almost replace the 72 for me. But what about all those people in the other neighborhoods besides Lake City?	3/27/2015 5:04 PM
96	UW Connections to downtown might add a lot of time	3/27/2015 4:50 PM
97	No schedule for 545 in non-peak hours	3/27/2015 4:43 PM
98	No improvement in East-West coverage	3/27/2015 3:35 PM
99	Elimination of Route 43	3/27/2015 3:33 PM
100	N/A	3/27/2015 2:58 PM

101	Long distance between bus stops on Stevens Way and the new light rail station at Husky Stadium	3/27/2015 2:19 PM
102	**NO REAL COVERAGE IN BALLARD!!! I live in Ballard and work at 12th and Marion in First Hill/Capitol Hill. It is *really* difficult to get to and from work and some days takes as long as 2hrs one way!! Seriously! We need to fix this !	3/27/2015 2:04 PM
103	Riders having to travel farther to get to a bus stop. Instead, stops should stay, or become, closer together. Buses should provide ever-increasing access for disabled & elderly riders, as the baby boom ages and people should wisely give up driving!	3/27/2015 1:55 PM
104	I think we should be like Paris, lots of buses running constantly. Inexpensive. People will change their habits, especially if parking spaces are eliminated.	3/27/2015 1:51 PM
105	Nothing. Us Laurelhurst residents (#25) are spoiled; it won't kill us to walk to Children's.	3/27/2015 1:24 PM
106	continue the 255 up to Magnuson Park	3/27/2015 12:59 PM
107	This plan may work great for able-bodied people who work from 8 to 5. Those with disabilities whose only option for transportation is Metro, are not at all well-served. They can not travel farther distances to stops and do not travel on the "usual" work day schedule. Eliminating daytime service on the 74 and the 30.	3/27/2015 12:17 PM
108	Some of the routes I use may be going away.	3/27/2015 11:58 AM
109	I am concerned about losing Route 25 in general. In the winter, having to travel as far as I would to access transit would be unsafe due to darkness and also miserable in bad weather.	3/27/2015 11:55 AM
110	No increase in service of 545 or reinstatement of route 265. Since the route 265 was quashed last year, there is a dire need for more frequent service to Bellevue/Redmond/Kirkland. There were occasions when we waited at the Olive Way stop (Seattle to Bellevue commute) and three 545 buses passed us by and couldn't take us since the buses were full. I work for Seattle Children's Research Institute and commute from Bellevue.	3/27/2015 11:23 AM
111	no direct service from Fremont to the eastside	3/27/2015 11:13 AM
112	Continue the 255 up to Magnuson Park	3/27/2015 11:03 AM
113	Consolidation of services and options won't save time for people who live in a now-unserved area.	3/27/2015 10:54 AM
114	The transfer mechanism between buses and the U-Link Station. If the buses drop off at the station a few feet from the stairs to the Link, this solution will be extremely convenient. If the buses drop off 2 blocks from the station and require street crossings this solution would not be a large improvement to me aside from the 16 reroute.	3/27/2015 10:47 AM
115	Does not seem very helpful if there are less routes or ones that are slower or longer. Option 1 has a lot more benefits with more frequent rides and having a quicker commuter to the University District and SCH especially from Downtown Seattle	3/27/2015 10:43 AM
116	None	3/27/2015 10:37 AM
117	redmond to uw district route	3/27/2015 10:24 AM
118	I live in Montlake and take the 43 downtown and to stops in capital hill. This would be bad for me and for my 79 year old husband who takes the bus home every day between the University and Boyer. Changing buses would be extremely inconvenient as would a longer wait. Connecting to rapid transit in the u district would involve a long walk or a long wait to get there. WE have lived in Montlake for over 40 years and depend on the 43.	3/27/2015 10:06 AM
119	While access times may be increased, access points are decreased. This is very problematic for those with mobility issues.	3/27/2015 9:57 AM
120	Anything that reduces travel during 'off peak' hours, or makes the distance to public transport longer. A lot of people who ride buses are not physically capable of walking long distances, and many of those who are will decide it's easier to drive.	3/27/2015 9:16 AM
121	unsure	3/27/2015 9:08 AM
122	There could be significantly more walking for many trips, one-seat trips could be reduced.	3/27/2015 9:04 AM
123	buses are slower than driving a single occupancy vehicle because they not only use the same traffic lanes, but they have frequent stops to pick up passengers.	3/27/2015 8:40 AM
124	again, Woodinville and Bothell are left out of this discussion. If you think that only Seattle folks work in Seattle you are very mistaken.	3/27/2015 8:09 AM

125	has no EW connections (25 removed) from Eastlake, Montlake to link lite rail or eastside less service from N Capitol Hill and Portage Bay to downtown	3/27/2015 8:07 AM
126	Parking	3/27/2015 7:32 AM
127	No connectivity between Ravenna and Bryant to new University station	3/27/2015 6:42 AM
128	This is the main reason that I don't bus more often. I work on Roosevelt Way, and early in the morning, I think that it's dangerous for me to be walking further in the U District, which historically has not been a very safe neighborhood. If the 72 stopped on Roosevelt, I'd probably take the bus to work every day instead of driving to work every day.	3/27/2015 6:30 AM
129	The cost of funding such an initiative	3/27/2015 5:49 AM
130	Continue the 255 up to Magnuson Park Connect Roosevelt & 45th and Convention Place Station area	3/26/2015 11:05 PM
131	breaking up route 48 into 45 / transfer / 48! That is not more convenient for me - with my bike and tool gear, I prefer a one seat ride to my departure point for the day, not a bulky laborious transfer in various weather conditions. The 48 is already frequent on the main- and already suffered truncation fairly recently: we (at our household 2 of us have the same issue) have still not recovered from the loss of #48 service into Columbia City, or the alternative link of #28 into #39 to get to Seward Park. Travel planning and times are now so lugubrious it is easier to drive. I also rely on the breadth of geographical coverage and stops frequency to create my own connections (riding the bike) depending on my appointments each day. Concentrated transfer points do not translate into more flexibility for me.	3/26/2015 10:25 PM
132	Continue the 255 up to Magnuson Park Connect Roosevelt & 45th and Convention Place Station area	3/26/2015 9:10 PM
133	No service on lower Roosevelt Way, loss of continuous route on Roosevelt & Eastlake (66)	3/26/2015 8:53 PM
134	It's true that route #71 has pretty low ridership during a lot of the day, north of the University District. But it's the only way to get Downtown now, and a meandering route 16 is certainly a ridiculous replacement. And, a transfer from route 65 to U-Link is OK, but I do think there will be some fall off because of that.	3/26/2015 8:37 PM
135	This alternative results in more transfers for me and further distances to walk for the transfers	3/26/2015 7:39 PM
136	The 311 no longer going anywhere near my office (8th and Virginia), requiring a transfer instead of being a direct route downtown	3/26/2015 5:18 PM
137	Continue the 255 up to Magnuson Park; Connect Roosevelt & 45th and Convention Place Station area	3/26/2015 5:04 PM
138	Smaller geographic coverage in general	3/26/2015 4:49 PM
139	Connect Roosevelt & 45th and Convention Place Station area Continue the 255 up to Magnuson Park Make transportation a major priority. Seattle needs a far better public transit system.	3/26/2015 4:25 PM
140	Reduced capacity from Kirkland to downtown without the added time to change to or from Link	3/26/2015 2:52 PM
141	Removing service from certain corridors will increase the demand for many people with disabilities for Access.	3/26/2015 1:21 PM
142	How the removal of the 71 and 72 in addition to the changes of route 73 may affect University of Washington students who want to transit downtown.	3/26/2015 12:06 PM
143	Time from Aurora Village to South Lake Union	3/26/2015 11:42 AM
144	Continue the 255 up to Magnuson Park	3/26/2015 10:09 AM
145	I have NO transfers now with my 252 and do not wish to make my commute so much longer. It would require at least 2 transfers and too long of a commute. As it is now my work day with bus commute is from 6:09 am to 4:45 pm (depending on traffic). Any transfers would increase that time I would consider driving in or commuting with other riders that do not wish to change.	3/26/2015 9:48 AM
146	Continue the 255 up to Magnuson Park	3/26/2015 9:35 AM
147	Removal of direct route 242 Northgate/Redmond. This is a key transport for Microsoft workers in north Seattle.	3/26/2015 9:26 AM
148	Continue the 255 up to Magnuson Park.	3/26/2015 8:30 AM
149	(1) No direct service between Maple Leaf and Ida Culver / Ravenna, where my 92-yr-old father in law lives. (2) Routing all 5th/15th/Roosevelt service down Roosevelt, which is already severely impacted by Seattle's policy of obstructing traffic and reducing capacity on arterials. (3) Don't see need for radical changes to bus services far from the new Link stations, and only marginally connected to them.	3/26/2015 8:28 AM

150	It appears that the 71 will terminate at the Roosevelt Link Rail station. It is not clear that this station will actually be open at that time. If so I will be unable to use the bus to get to any of the several locations that I currently go to, all of which are near a Link Rail station.	3/26/2015 8:03 AM
151	Travel time from Eastside to downtown Seattle increases by 20 minutes or more. Unable to easily access downtown Seattle without transfers and significant walking most times of day. Peak and all-day routes are on opposite sides of the city forcing a commitment to one or the other. Unclear how the centralized hub model would adapt to increased density and new commuting patterns when additional office space is added in Seattle. Next wave of growth could be far from the main lines being developed.	3/26/2015 2:29 AM
152	I live near route 71 and I would take it to a Link Rail station, but if I have to walk to 35thAve, catch a bus to the Link Rail and transfer to get to Capitol Hill or downtown, I might as well drive.	3/25/2015 9:05 PM
153	While a lot of the negative side effects don't seem to effect myself, I don't think people will enjoy traveling farther. I think people are more interested in having a direct route to get to a destination than walking farther. The point of public transit is to create accessibility and connect various places. More frequency and consolidation is not beneficial if we are trying to reduce car traffic. Making transit easily accessible might encourage getting cars off the road.	3/25/2015 8:46 PM
154	routing through SLU will slow down the 64 for little benefit.	3/25/2015 7:58 PM
155	STILL nothing direct between Bryant and Greenwood/Ballard. STILL HAVE TO DRIVE. :(3/25/2015 7:53 PM
156	Alternative 1 for route 255 totally doesn't work for me and my colleagues. I need to park my car in South Kirkland Park and Ride, get on bus 255, and get off at Yale station. With Alternative 1, I cannot take 255 and any other route any more.	3/25/2015 4:41 PM
157	No direct routes connecting View Ridge to the Ave/University Way (would require a transfer from 65 or 16 to another bus). Also concerned about losing fast off-peak service to downtown on the 71. The current route for the 16 looks like it would be perfect for connecting to the light rail once the Roosevelt station is open 6 years from now. I have many things that I like about the concept route 16, and I would be very happy with this route and would be okay with transferring if service is timely. Current buses which are scheduled to come every 15 minutes frequently require a 20+ minute wait.	3/25/2015 4:14 PM
158	Lack of access to new routes decimating rider populations as buses become inaccessible.	3/25/2015 4:12 PM
159	Continue the 255 up to Magnuson Park	3/25/2015 3:40 PM
160	Elimination of all on-campus stops at UW	3/25/2015 3:14 PM
161	Continue the 255 up to Magnuson Park.	3/25/2015 3:02 PM
162	continue the 255 to Magnusson Park	3/25/2015 2:58 PM
163	I am concerned about breaking up the East Lake/Roosevelt corridor, especially since Link won't serve the Convention Place Station. I work at 45th and Roosevelt but often go to meetings near Convention Place. Taking a bus to UW Station, transferring and then having to back track from Westlake sounds less than ideal (as does walking a half mile to and from Campus Parkway for the 70).	3/25/2015 2:50 PM
164	continue the 255 up to magnuson park	3/25/2015 2:45 PM
165	No direct connection between Maple Leaf & Wedgwood-ish area (current 68), but if service is frequent and connections reliable, that may be mitigated.	3/25/2015 2:28 PM
166	"Continue the 255 up to Magnuson Park"	3/25/2015 1:33 PM
167	Capacity on LINK to absorb the routes now funneling into it, plus its new ridership. Changes of current connection of Roosevelt and Eastlake to downtown.	3/25/2015 1:32 PM
168	Still not keeping up with population growth by the time of its implementation/use	3/25/2015 1:28 PM
169	Continue the 255 up to Magnuson Park	3/25/2015 1:28 PM
170	Losing the 545	3/25/2015 12:59 PM
171	There isn't an consideration that there are people on the Eastside that don't live in Bellevue/Kirkland. Pls consider those of us who live in Issaquah/Sammamish. We would love a more direct way to Seattle Children's that is less than 90 + minutes in commuting time.	3/25/2015 12:52 PM
172	It would be nice to continue the 255 to Magnuson Park	3/25/2015 12:37 PM

173	Doesn't improve 373 much	3/25/2015 10:52 AM
174	Removal of great service between the U-District (Ave, Campus Parkway, and Roosevelt south of 45th) and downtown Seattle before the U-District station is opened. It looks like the 71, 72, 73, and 74 service would be cancelled, which is completely crazy. I use these routes all the time to get downtown quickly. Once the U-District station opens this will not be a problem, but those routes should not be removed until then.	3/25/2015 10:40 AM
175	What concerns me the most is that I cannot find information north of 145th regarding the 373's route. Can I assume it won't be changed?	3/25/2015 9:15 AM
176	The 545 no longer comes downtown. I've ridden this bus every day for the past 12 years. This would significantly ruin my daily commute and require me to transfer to get from downtown Seattle to work in Redmond. This would be a mess for public transit for Microsoft employees who want to live in Seattle instead of on the east side. Please don't ruin our 545 route.	3/25/2015 9:06 AM
177	Fewer routes, riders concentrated in fewer places, less convenient too catch transit, riders would have to travel further to catch transit	3/25/2015 8:56 AM
178	Once again you lump the NE as part of the program but none of the above questions refer to the Kingsgate area	3/25/2015 8:47 AM
179	I don't want to have to xfr to light rail. it will add to my already long commute time.	3/25/2015 7:52 AM
180	deviating away from my final destination (downtown Seattle) and then being required to transfer in order to complete my trip would increase my commute time. simply avoiding Metro and switching to Soundtransit (522) would be a more "efficient" alternative.	3/25/2015 7:22 AM
181	Deletes downtown connection during off-peak hours, which is when I generally use it.	3/25/2015 6:39 AM
182	No direct connections between downtown and the eastside, particularly Kirkland/Kingsgate area	3/24/2015 8:38 PM
183	There are already few options for people to commute between Redmond downtown and Northgate. The removal of route 242 will further push people like me towards driving alone and adding traffic to the already congested 520.	3/24/2015 7:39 PM
184	I do not like the changes to 255 and elimination of 252 and 257.	3/24/2015 5:46 PM
185	Almost all off-peak access to transit near my house would be gone. Commuting by transit to my workplace is already hard if I work off-peak hours, and would become harder. Disabled people in my neighborhood and many others would have reduced access to transit. My husband has difficulty walking longer distances, and would be much less able to rely on transit for his commute. We would need to rely more heavily on driving and might need to buy a second car.	3/24/2015 4:27 PM
186	Changing the Rt. 11 to go to the Link station on Capital Hill is the DUMBEST idea in a host of dumb Metro ideas. What staff member ever thought that one up? You want me to pay twice (!), once to Metro and once to Sound Transit? For a longer and indirect route to downtown?? You've gotta be kidding!	3/24/2015 3:43 PM
187	The loss of trolley service during the day along Madison and 19th Ave. Also Spring St and other Downtown Seattle trolleys. The 12 route services three hospitals, the Country Doctor Clinic on 19th Ave and the Deaf and Hearing Center. It also services Seattle University, Town Hall, Seattle Art Museum, Central Library, Federal Court and so on and on..... It's vital that we retain the daytime non-peak service we have at this time. BTW, I forgot to mention all the school children the route services. It's a very busy area during the day. The trolley is always full. Many disabled folks like myself would be put in an impossible situation if you remove the 12, 43 and other trolley lines. Your Link service could never hope to replace what we have now.	3/24/2015 3:18 PM
188	Loss of service on 15th Ave. NE (except for Peak only trips on the 73), and huge gaps in service area. I simply can't walk 1/2 mile or 1 mile to get to a bus stop, especially up and down big hills. Most people with no mobility issues won't do that either.	3/24/2015 1:16 PM
189	You create a large doughnut hole of zero off-peak service in the Wedgwood-View Ridge neighborhoods, very similar to the budget-reduction scenario last year. The remaining service (65) doesn't serve major destinations for people in our area (U District, downtown) and would force us to ride through heavily congested delay-producing areas: Montlake Blvd traffic backups and pedestrian-crazy campus roadways. For NE Seattle, you are jumping the gun by focusing on Stadium Station, and should wait until U Dist and/or Roosevelt stations are ready.	3/24/2015 10:49 AM
190	In general having to travel farther for access.	3/24/2015 10:43 AM
191	How would transfers work between 255 and the light rail? Currently there is only one bus fare required between Kirkland and downtown, and I'd be most concerned that this would increase with the light rail component.	3/24/2015 10:01 AM
192	I'm not sure	3/24/2015 8:09 AM

193	Eastside access to UW further away and commute will take longer. Already service is too limited since all-day service was cut.	3/24/2015 6:55 AM
194	Off peak from View Ridge (50th street area) to Univ of Washington or downtown Seattle cannot be done without at least one transfer. Service would not be improved. I'd rather have a one trip ride than more frequent service where I need to transfer, which to me raise the risk of arriving in a timely manner. Walking up or down the hill to Sand Point Way or 35th Ave to access a bus is not something I would routinely or probably do.	3/23/2015 8:19 PM
195	In general, having to travel farther to reach bus stops and loss of geographic coverage. Proximity of bus stops is more important than wait time or bus journey time, to me.	3/23/2015 7:59 PM
196	No direct all-day service from Kirkland to SLU.	3/23/2015 5:45 PM
197	I don't like that I would have to travel further to catch a bus heading downtown from points west of 11th in the University District. Since the Roosevelt – Eastlake corridor is broken up, trips from Roosevelt and 45th to SLU or Convention Place area would take longer than they do today and involve a transfer or a long walk.	3/23/2015 4:05 PM
198	No direct connection between Redmond and downtown Seattle outside of peak weekday commute times (concept for route 545)	3/23/2015 1:36 PM
199	capitol hill is just central capitol hill and that's it. You ignore all the other major streets and I don't think older people or children will walk up or down hills.	3/23/2015 12:53 PM
200	I'm hoping that the street traffic will be lighter so it doesn't take a whole hour to get home in the evening	3/23/2015 10:53 AM
201	No direct connection between N 45th St and the new University Link Station	3/23/2015 10:40 AM
202	Reducing the 70-73 routes.	3/23/2015 10:11 AM
203	Deletion of 71 and 72 to downtown Seattle! Absolutely ridiculous proposal to delete these two routes!	3/23/2015 9:41 AM
204	Much worse options from Kingsgate Park & Ride.	3/23/2015 8:36 AM
205	In the case of 5th and 15th, there is also the issue that the proposed path is longer and slower than using 5th between NTC and 80th (because the turns at Northgate Way at 5th and Roosevelt), and that 15th-above-Northgate Way is funneled into NTC, which is a wonderful idea once North Link is a reality, but the 41 is hopeless SB in PM.	3/23/2015 8:23 AM
206	No consideration to the North East side riders - this is a better solution? You offer up frequency like it is some kind of new solution! Ever been in New York? If not you should look at the model they have developed. Frequency is a given - not a new benefit!	3/23/2015 7:52 AM
207	More transfers between downtown Seattle and Redmond d during off-peak hours	3/23/2015 7:49 AM
208	Breaking the route 48 into 2 parts for travel between Greenlake and E capitol hill, requiring a transfer.	3/22/2015 10:48 PM
209	Concerned about common routes I take being changed to either not allow me access to where I need to go, or not coming up to Northgate at all.	3/22/2015 10:06 PM
210	While I myself, am a single, able bodied adult who is excited about more frequent transit greatly improving my ability to get from place to place, I am seriously worried, with the increase dependency on the light rail and cut of many routes that might be closer to people's house, for people who do not have the ability to travel a greater distance to get to transportation. How will disabled needs be addressed?	3/22/2015 6:58 PM
211	nothing	3/22/2015 6:05 PM
212	Not a fast connection between Wallingford and the university light rail station	3/22/2015 5:29 PM
213	With eliminating 73 service north of Northgate Way and moving it to Roosevelt, it's a much longer distance to get to my stop. You say that you should instead use 373 to get to a 73, but under alternative 1, 373's wouldn't run in non-peak times. I also don't want to have to transfer to get to the U-District when now I have an easy one bus ride.	3/22/2015 4:51 PM
214	No single-bus service from Wallingford to Downtown Seattle (current route 26).	3/22/2015 4:50 PM
215	NO service via 26 from Wallingford to Westlake/Lower Queen Anne/South Lake Union/Seattle Center. Eliminating the routing of 26 via Dexter cuts off Wallingford from these neighborhoods! The only service via Wallingford Ave would be 31/32 which only goes to upper Queen Anne. This is not where people want to go, they want to go to Seattle Center, downtown, South Lake Union, SODO/stadium district. The existing routing for 26 serves this need well.	3/22/2015 4:18 PM

216	Possibly inefficient bus-station connection at UW, loss of Route 12	3/22/2015 3:14 PM
217	Whether implementation will match concept - today, the 65 is the most unreliable bus I've experienced in a dozen cities.	3/22/2015 2:18 PM
218	Fewer routes and less frequent service between Capitol Hill (home) and the University District (work). More congestion on peak-hour buses between Capitol Hill and the University District, which are already frequently packed full. Fewer routes and less frequent service between Capitol Hill and downtown. Elimination of direct routes from Capitol Hill to Wallingford and Ballard, with much longer travel times.	3/22/2015 12:00 PM
219	Bus I currently take to the UW no longer goes to the UW. It gets sort of near, but having to walk a couple blocks and then across campus over ten-twenty minutes cancels out the benefit from frequency that allows me to not have to leave for class forty minutes early to take a ten minute bus ride.	3/22/2015 11:32 AM
220	Nighttime safety walking to and from bus stops. I would have to walk 5-6 blocks through poorly-lit neighborhoods (up 19th from Madison, for example) to reach the nearest stations.	3/22/2015 11:21 AM
221	The 43, which is the bus I take most often, would be cut. The 48, which is the bus I take most often after the 43, would have reduced service. So I would be left with 1 bus which comes less frequently. Nothing about this plan benefits me. This is particularly inconvenient because I live in a part of the Hill that's not particularly close to the light rail station, and the UW light rail stop is on the opposite side of campus from where I work. So this plan would significantly increase my commute time and mean much more walking compared to my current commute.	3/22/2015 9:40 AM
222	Losing Bus 71 would make it very difficult to do shopping, banking, have access to drug stores in the two neighborhood centers near my residence: Wedgwood as well as the U District. It would also require transfers to get downtown. I have given up my driver's license to use Metro exclusively for my personal transportation. Bus 16 will be viable to get downtown once the Roosevelt Link Station opens - but that will be years from now. Having to travel through Fremont to get downtown is absurd. I see no easy way to get to Wedgwood or the U District.	3/21/2015 6:17 PM
223	More a fear than a concern, but I wonder if funding continues to worsen might affect Alt. 1 more harshly than Alt. 2. That said, I'm incredibly pleased to see the Alternative 1 proposal.	3/21/2015 11:34 AM
224	No direct service from Kirkland to the west side of Seattle (Fremont/Ballard).	3/21/2015 12:17 AM
225	Going from 65th/Roosevelt Way to Eastlake now requires either taking I-5 to downtown and backtracking, or taking a transfer to a 70 from the U-district. Please keep a current 66 style non-freeway route through Eastlake!	3/21/2015 12:15 AM
226	The fact that it's billed as having worse geographic coverage, after getting screwed when the 47 was temporarily cut in a game of political chicken	3/20/2015 5:28 PM
227	I work at NE 41st and 15th Ave NE, and frequently travel downtown mid-day. I worry that busing to transfer at Husky Stadium in order to get downtown will take longer than the current express buses to downtown from the U-district (current 71, 72, 73). IF bus service from the U-district to Husky Stadium is frequent and regular, and IF the ST trains run frequently enough, the transfer should work just fine, but the walk from the bus to the train + the wait for the train may cost me a few minutes vs. my current straight shot on the 71, 2, 3 during mid-day off-peak runs.	3/20/2015 4:25 PM
228	No all day frequent express service from Issaquah to Greenwood No all day frequent service from Greenwood to Northgate	3/20/2015 4:09 PM
229	No 255 bus service to Downtown Seattle	3/20/2015 2:28 PM
230	I want good connections heading West from the U-District light rail station through Wallingford/Fremont.	3/20/2015 2:02 PM
231	I didn't see the 242 on the list above	3/20/2015 1:57 PM
232	There is very little I like about Alternative 1. Busses should never be reduced when a Link station is added.	3/20/2015 1:29 PM
233	It seems like the Eastlake neighborhood is being left out of all these options. I do not want to have to transfer buses just to get downtown.	3/20/2015 1:26 PM
234	Consolidation does not create efficiency for the riders just for those paying the drivers wages.	3/20/2015 1:25 PM
235	Link is not covered on my bus pass, so I would still use the old system that is free to me on my monthly pass. If you included Link in our passes, then I would use it a lot.	3/20/2015 12:25 PM
236	No direct one bus service between Green Lake and Redmond	3/20/2015 11:04 AM
237	Making people walk to got to the buses or the link.	3/20/2015 9:30 AM

238	It concerns me in general having that changes will cause many throughout the day to travel farther to access services. That does not make using the transportation service more user friendly, its make using transit LESS user friendly.	3/20/2015 8:42 AM
239	Traveling farther to reach transit and fewer route options greatly concerns me.	3/20/2015 8:26 AM
240	Getting ride of route 43, a well used line which serves parts of Capitol Hill that will not be directly served by the Light Rail.	3/20/2015 8:19 AM
241	Design of the bus/Link stops and pedestrian connections at Husky Stadium Link station (too far to walk, multiple crosswalks, etc).	3/20/2015 8:10 AM
242	Changing the 49 to go down Madison while removing the 43 at the same time makes it difficult to get to north Broadway (John to Roy) from downtown, especially from places farther from Westlake Station (such as the Convention Center or Boren)	3/20/2015 7:26 AM
243	Loss of the route 11 bus. I use this every day to get to work in downtown Seattle.	3/19/2015 9:49 PM
244	University Ave. through the U-District is really slow due to traffic and lights. The current services on Roosevelt and 15th have less traffic or more lanes and are significantly more reliable because of it. I think it would be great and a substantial improvement for these routes to be coalesced into one, however I worry that reliability won't be improved if there aren't other transit improvements along University Ave.	3/19/2015 9:26 PM
245	Generally concerned about cutting geographical breadth of the system, as I live in Ballard and do not have a car, so I use a lot of different connections to get to and from meetings and so on.	3/19/2015 8:22 PM
246	Loss of direct service (#30) from Sand Point to the Upper Ave -- University Way NE above 41st. The Ave is a major shopping center for residents in the Sand Point area. Neither plan maintains a direct connection to it. Please retain the #30 route all day long.	3/19/2015 8:04 PM
247	The 45 and 271 are connected. I like to get to Bellevue but since I would take the 45 to work I may end up being late with delays on the 520 bridge	3/19/2015 7:55 PM
248	I am worried about not having access to Lake City routes at non-peak times (especially I rely 72 at night!) I also use 75, 41, 73, 66, 67 at non-peak times -- night, weekends, etc. as I work non-peak hours.	3/19/2015 7:50 PM
249	Ballard seems to be a left out in your design, it wasn't even an option in the survey (though I did see one direct line offered above)	3/19/2015 7:48 PM
250	Giant square of no service between 125th and 145th and between 15th Ave NE and 30th Ave NE. I have to walk five blocks to get to 15th Ave. NE now, but at least I have the option of a shorter walk, to 20th to catch a 73 all day every day. With no service on 20th, this large gap leaves everyone in the center having to walk 7.5 blocks at least to find a bus. As I get older, all that walking distance will make bus riding pretty tough, just when one needs it most, i.e. not driving as much..	3/19/2015 5:47 PM
251	You are destroying transit for anyone who lives in North Capitol Hill and works downtown. You eliminate the 12. You eliminate the 43. You make the 49 go down Madison. You expect everyone to walk really far and then cram on a much smaller number of buses (the 10, the 8) and then transfer at light rail, which isn't even live yet. And if you throng it with that many people I'm sure light rail station will be a disaster, with broken escalators and crowded platforms.	3/19/2015 3:52 PM
252	concerned about overall access for the sake of frequency. I lived in an area that the 7 serviced. In theory the 7 is frequent, but in reality it got clogged and I would get 3 7 busses every 30 minutes instead of one every 10. I would rather have to plan ahead a little to have more routes and better/closer access. The other concern about having to walk further to catch a bus is safety. I'm not sure why this isn't brought up more. The main streets tend to be the more dangerous, whereas a neighborhood bus route gets you closer to home. I couldn't ride the 7 at night, I had to ride the 14.	3/19/2015 3:16 PM
253	Difference in time traveling from Juanita to downtown Seattle, either having to transfer at downtown Kirkland or at the new light rail station in the University district	3/19/2015 3:13 PM
254	not sure	3/19/2015 3:12 PM
255	Looks like more walking and/or time and/or crowding involved if wanting to get between downtown and U-district.	3/19/2015 3:08 PM
256	Elimination of route 12	3/19/2015 2:29 PM
257	The 540 bus would be re-routed in a way that makes it too inconvenient for me to use.	3/19/2015 2:25 PM

258	I think what would concern me most are the transfers at the new University of Washington Station. They appear to be spaced a little far from the new station, and I think they could be made better	3/19/2015 2:11 PM
259	More transfers required when trying to get somewhere	3/19/2015 1:55 PM
260	the deletion of 72 route	3/19/2015 1:48 PM
261	It's hard for me to know exactly because you don't address the NE Lake City corridor very specifically (eg 309/312/522 bus routes). If you maintained key bus stops along this corridor and we had to walk a bit farther to catch more frequent buses, that would be good; if you eliminated these, that would be bad!	3/19/2015 1:05 PM
262	In general, making people walk further.	3/19/2015 11:14 AM
263	I don't like the idea of concentrating service in heavily used areas; those of us that live in the outskirts already have a hard enough time getting around (esp. E/W) in the evenings and later at night.	3/19/2015 10:29 AM
264	Appears to ignore the greater need for improvement in service to/from Ballard. U District area already has better service than we do and now it's getting improvement before we do and we are just as populous/important and about the same distance. Why are you continuing to ignore Ballard, where I live? Why not just have the Sounder stop near the intersection of NW 57th St and 37th Pl NW? There's a ton of empty space all around the rail line to build a bus turnaround, bus stops, and even a parking lot. A frequent Ballard bus loop could easily be made to go right past there, Golden Gardens, downtown Ballard/hospitals, Ballard Senior Center, Ballard Locks, and anyplace nearby with a large park and ride, etc.	3/19/2015 10:18 AM
265	Lacks changes to South and Central Seattle area. Right now there is not direct route from South Seattle to Capitol Hill, except the 9x, which only runs selective hours and weekdays. To make that trip, one has to go downtown before connecting to a bus to either destination, when a direct route could easily lower travel times and congestion.	3/19/2015 10:03 AM
266	Please DO NOT ELIMINATE bus service (routes 66/67) on 5th Ave NE. It's too hard to get to the Northgate Transit Center or to Roosevelt, and if you do get to a bus stop on Roosevelt it will take forever to get to the Northgate Transit Center. I've had four hip replacements and I can't walk as far as I'd need to in order to get to a bus stop on Roosevelt or the Northgate Transit Center. It's a really dumb idea to eliminate bus service on 5th Ave NE.	3/19/2015 10:01 AM
267	loss of route 68 - the current 68s and 372s coming down 25th ave are frequently late and often so overcrowded they leave people behind. Cutting the 68, even with more 372s, will probably just make this even more packed.	3/19/2015 9:57 AM
268	Does not sufficiently address needs of NE corridor: Lake Forest Park, Kenmore, BOthell, Woodinville, and Juanita and Kirkland.	3/19/2015 8:46 AM
269	South Lake Union is the fastest growing employment neighborhood in Seattle. It has minimal affordable parking and using transit is expected for employees. Many workers there live in north seattle neighborhoods but there is not direct transit except the 70 that doesn't require going downtown first which adds a good 1/2 hour to the commute. I live 5 1/2 miles from work and this plan will make me transfer once and walk at least a mile of that distance to make connection. It's ridiculous.	3/19/2015 8:38 AM
270	Extremely poor service between anywhere in north seattle residential neighborhoods and South Lake Union which is the fastest growing employment area in Seattle and provides virtually no affordable parking for 80% of the employees. Traveling all the way downtown and then coming back adds a good 30 minutes to the commute. I work 5 1/2 miles from the office and would have to transfer at least once and walk almost 1 mile of that distance. Ridiculous!	3/19/2015 8:09 AM
271	Loss of the 43, and the increase in 48 service does not seem significant enough to make up for this. Also, the loss of the 43 connecting into the 44 (which gives easy access from Capitol Hill to Fremont).	3/19/2015 1:06 AM
272	Too many riders transferring from 542 to the light rail to get downtown.	3/19/2015 12:20 AM
273	Loss of some cross-town service in north Seattle	3/18/2015 10:46 PM
274	I need more info on this one.	3/18/2015 10:23 PM
275	Route 372 is the main north/south route between 15th ave NE and 35th ave NE to UW. It would be nice to have a stop at NE 82nd St where Ravenna Ave NE and 25th Ave NE merge, b/c those of us who live in the neighborhood not only have to walk down the hills but also have to walk down 25th to the nearest stop. The walk is almost the same amount of time as the bus ride. The walk time would be cut in 1/2 with this stop added. I have missed the bus many times b/c of this walk as it passes me b/f I arrive at the stop.	3/18/2015 10:20 PM
276	I do not know the Alternative 1 concept in north Seattle	3/18/2015 10:14 PM

277	I love alternative 1 except for one item. My primary concern is the traffic associated with Southbound Montlake Blvd. from 45th street to the UW light rail station. In the evening traffic is terrible and would heavily impact the travel time to get to the UW station. I typically use route 65 to get to UW, and would continue to use the 65 to get to the light rail. However, if traffic is terrible, it might be easier (and maybe quicker) for me to drive, which would completely defeat the purpose of the light rail. I strongly urge you to assess ways to improve the route time for bus traffic along mountlake blvd, from 45th, to the access point of the UW light rail station. The benefit of public transportation shouldn't merely be that it can get you places without a car. It should also get you to that place in the same or less time.	3/18/2015 10:01 PM
278	This is a terrible idea. For anyone living in North Capitol Hill more than five minutes walk from the Broadway and John light rail station, this will mean longer commute times to the University District. I make this commute every single day. These buses are full every day, and most travelers from the UW to Capitol Hill get off the 43 more than 5 minutes walk before Broadway and John. Moreover, the walk from the UW light rail station will add an additional five minutes to my journey. I estimate that my daily commute from my house (16th and Republican) on the light rail will be 20 minutes LONGER than it currently is using the #43. This is not public transportation progress. It is a light rail boondoggle. Sincerely Robert Wood Professor, University of Washington PS. The same thing happened with bus route 194 which reliably took passengers from downtown Seattle to the airport in 30 minutes until it was cancelled because of the light rail. The trip now takes 40-45 minutes on light rail. Is this progress? The idea is that new transit systems augment the public transportation system, not replace existing components.	3/18/2015 8:54 PM
279	I think we should spend less on transit and more on preventing homeless people from defecating in the street	3/18/2015 8:09 PM
280	fewer routes meaning more travel time for some neighborhoods	3/18/2015 8:09 PM
281	I really don't like that it cuts service areas. I think it will negatively impact low income, disabled, and other riders that live along those routes that rely on transit to get around.	3/18/2015 6:49 PM
282	Decreased accessibility of transit for most vulnerable populations (disabled, elderly)	3/18/2015 6:42 PM
283	I am concerned with peak time bus speed from/to the UW Link station through the Ave in the U District. During peak periods, there should perhaps be a bus route from UW Link to Roosevelt without local stops in the U District. Ideally there would be 45s that skip most U district stops and perhaps take 15th during rush hour. The shuffle of riders in the U District can be interminable if you are attempting to ride through. I think that northbound, a transfer from Link to the 45 is going to be attractive to some 76/316 riders. It should work well for people going farther than the U District.	3/18/2015 5:20 PM
284	None of these changes affect me once the light rail is extended to Northgate.	3/18/2015 5:08 PM
285	Loss of direct connection from east Ballard to downtown Fremont with rerouting of the 28. The 40's an ok substitute, but not perfect.	3/18/2015 4:12 PM
286	Farther distances to stations.	3/18/2015 3:31 PM
287	There is NO bus that captures the SOUTHBOUND people to downtown along 23rd until perhaps E John (#43). You cannot expect me to go north to UW train station to reverse and go back south to downtown on the train. Or transfer to three different bus/ train. I can WALK faster then that would take me (40 minutes).	3/18/2015 3:30 PM
288	General farther travel (e.g., for mobility impaired)	3/18/2015 3:23 PM
289	Through connectivity between routes on Roosevelt and UW Campus.	3/18/2015 2:53 PM
290	I already walk a mile to a mile and a half from my home to the bus stop.	3/18/2015 2:44 PM
291	Getting to the eastside on non-peak hours (which is common) would require going through the u-district rail stop which adds a great deal of time in both directions and is a more congested area in general.	3/18/2015 2:43 PM
292	Losing the 73 on 15th Avenue NE!!! Lack of service during non-peak times to Downtown Seattle from 15th Avenue NE.	3/18/2015 2:37 PM
293	Need more express routes between end of line stops. Current light rail takes too long did to too many stops.	3/18/2015 2:20 PM
294	More frequent service on a few major routes doesn't make up for loss of service on many minor routes.	3/18/2015 2:17 PM

295	The changes to 71 means that the light rail and 65 become the primary connection to downtown for wedgwood, but the 65 still only runs until Midnight. This means leaving downtown after 11 is not supported. Deleting route 242 makes no sense especially since the peak trips for the 542 are remaining the same. The 542 busses are already packed. This will make them much worse. Also, a lot of the 242 ridership comes from 148th in redmond which there will be no bus support for. The evening 242 that I take is packed to standing room only every day. Not having more 542s will make the evening ride very, very crowded as the 542s are also packed both ways.	3/18/2015 2:02 PM
296	Less service between Kingsgate and South Lake Union (specifically 252 removed). No increase in service from the South Kirkland P&R to South Lake Union.	3/18/2015 2:00 PM
297	The routing of 67,45,48 bus services down University Ave, a single-lane road in each direction with pedestrian crossings mid-block.	3/18/2015 1:59 PM
298	Lack of accessibility	3/18/2015 1:58 PM
299	Losing 73 near Jackson Park on 15th NE without the advantage of more frequent 373 service.	3/18/2015 1:51 PM
300	Having to transfer to get downtown from NE 65th and 35th ave NE instead of taking one express bus (71) during off peak and weekend hours	3/18/2015 1:39 PM
301	less buses and routes, FULL buses (most of the time we can't even get on and buses even drive by sometimes because they are TOO full, all these and more are making it impossible to use bus anymore. I been commuting by bus from east side to everywhere in metro Seattle area for past 25 years and I have to stop now.	3/18/2015 1:32 PM
302	You are focusing resource to an area that I don't live in. Nothing wrong with NE Seattle, but I don't live there so I'm only there a few times per month. Also, I feel like you are trying to divert "transfer traffic" out of downtown and into the Udistrict. I live downtown and I don't want to have to go to the UDistrict to cross Lake Washington	3/18/2015 1:16 PM
303	Fewer buses and more potential transfers	3/18/2015 1:16 PM
304	I don't think I personally will be affected, but I worry about people having to travel farther to get to their bus stop	3/18/2015 1:09 PM
305	Having to take the 75 instead of the 68 directly onto campus - it always takes longer. Where the 67 drops off and picks up.	3/18/2015 1:01 PM
306	I want to ensure that Sound Transit still plans to keep the 586 bus because at this point using the Link would not be an effective alternative for my commute.	3/18/2015 1:00 PM
307	that u might consolidate my bus route from beacon hill #60. its already been reduced and in peak rush time there is standing room only.	3/18/2015 12:46 PM
308	I'm confused as to how this really affects Shoreline commuters, since Shoreline isn't included in the list of areas at the start of the survey.	3/18/2015 12:40 PM
309	Increased frequency of service is good but if I have to walk 20 minutes to get to my bus stop I will buy a motorcycle instead.	3/18/2015 12:25 PM
310	Deletion of route 43	3/18/2015 12:22 PM
311	Less day-time options to and from downtown (Harborview)	3/18/2015 12:18 PM
312	This alternative seems to increase isolation in lower density residential areas. This potentially makes access to transportation more difficult for less mobile members of the community.	3/18/2015 12:17 PM
313	not sure	3/18/2015 12:17 PM
314	Removal of route 30 leave no route with fast service to the UDistrict/Ave area	3/18/2015 12:14 PM
315	Impact on 373X	3/18/2015 12:13 PM
316	Poor connections to UW Link See my question 7 comments above.	3/18/2015 12:10 PM
317	I see nothing that improves the East/West travel in and out of Ballard.	3/18/2015 12:07 PM
318	I already have a long walk to the closest bus stop. Having to walk even longer eliminates the benefit of public transit. I would probably choose to drive instead.	3/18/2015 12:07 PM
319	no direct connection between lake city way and university way & 45th.	3/18/2015 12:04 PM

320	1) Route 70 being moved to end at the stadium doesn't make sense. It seems like you're assuming that I'd want to travel north from Eastlake to the stadium station, then south to downtown. Why wouldn't I just hop on the 70SB? 2) Stopping route 70 at campus parkway means I'll have to walk to my office (at 45th and 15th), thus adding time to my commute and a sweaty start of the day.	3/18/2015 12:02 PM
321	- Getting rid of the 43 - have to transfer to get to Ballard from N Cap Hill - No direct route from 23rd in N Cap Hill to downtown? Now have to go to Link station at Husky stadium or Cap Hill and transfer, this seems like a big negative. Sometimes transferring is a big hassle (e.g. accessibility issues, if you're carrying things) and a shorter trip does not compensate for this - Still only the 8 from Cap Hill to Seattle Center - the 8 is a slow, congested route, this needs alternatives - The 12 is a convenient route, getting rid of it sucks	3/18/2015 12:01 PM
322	As above, I'm just concerned that the 373X route is going to drop off the map, because it is a peak-only one way route, but it is the only route of its kind, servicing Jackson Park to the UW campus along 15th (and actually going onto campus, instead of merely passing through The Ave, like the 73). This route may not seem popular on paper, but the increasingly crowded buses on this route every day points to the fact that it is very popular.	3/18/2015 11:56 AM
323	I am concerned that there still aren't enough options to get from where I live on Crown Hill (far west neighborhood near Blue Ridge) to eastern neighborhoods without transferring. Even with changes, I will still have to transfer in order to get to the U district. I did notice that neither Crown Hill or Blue Ridge were on your list of neighborhoods. Perhaps we are being overlooked.	3/18/2015 11:56 AM
324	As I currently live at NE 75th Street and 35th Ave NE, there will literally be no other buses except 65. Which means I have quite limited options to travel around (I will have to walk much further to get access to 372). In general, I would not mind waiting longer and walking less, especially given how the landscape of the city looks like (ways too much hills), how crazily some people drive in the Northeast area, and how the weather can be (too much rain and sometimes windy for walking)	3/18/2015 11:55 AM
325	I am commuting up from South King County (Burien) so transit in the Northeast end is only of moderate concern. As of now there are absolutely zero buses that have a trip from the Burien/West Seattle area directly, or close, to the UW. This is far more inconvenient and these revisions are unlikely to impact my daily commute (roughly 1.5 hours each way) as those in the Capitol Hill and surrounding UW neighborhoods will simply crowd the buses and the Light Rail and congestion will most likely not change. Further, the wait times between buses out of the U District into downtown are very short, yet the express buses are still frequently late or early and tremendously overcrowded.	3/18/2015 11:50 AM
326	I'm just concerned that the 49 will be eliminated and you will make everyone who needs to get to West of the Ave transfer at the Stadium station. Of course, once the station at 45th is done, then it will no longer be an issue, but when is that??	3/18/2015 11:49 AM
327	Poorer access to NW Hospital from Wallingford/Tangletown, without easy transfers, since 16 would no longer go to Northgate.	3/18/2015 11:48 AM
328	Decreasing public transportation access to those who don't fall into the "heavily used" stops or for those stops that didn't come up in the feedback process. I worry that it would make access more difficult for people with lower income/access already and would focus on the people who already enjoy more access.	3/18/2015 11:47 AM
329	It keeps 373X service from Shoreline to UW campus.	3/18/2015 11:44 AM
330	The many people with mobility issues, who will need to travel farther to reach a stop. My area has many elderly homeowners & renters.	3/18/2015 11:41 AM
331	My travel time to my bus stops for the trip to and from work will be greatly increased. I generally travel in the early morning; the walk to the Capitol Hill station goes through a neighborhood that is not always safe (the end of Broadway near SCCC). Further, I work in UW Tower; the station near Husky Stadium is over a mile away. I can walk a mile, but I don't always have time going to or from work; I will need to either walk from the stop to my workplace in the dark in a neighborhood with bad traffic, no lights, and crime, or wait in that same unsafe location for the 44. PLEASE KEEP ROUTE 43 AT LEAST UNTIL THE BROOKLYN STREET STATION OPENS!!!	3/18/2015 11:40 AM
332	Less coverage of Portage Bay	3/18/2015 11:39 AM
333	Lack of all-day direct service between downtown and university way (currently served by routes 71, 72, 73)	3/18/2015 11:35 AM
334	Frequency and ease of service from Shoreline to University District.	3/18/2015 11:34 AM
335	No service on Route 16 to Northgate. This is a popular route and I ride it at least once a week.	3/18/2015 11:34 AM
336	Only having the 73 run during peak times. That route is so heavily traveled by both students and workers, that eliminating it during non-peak times and reducing the # of buses will make current buses more over crowded than they already are.	3/18/2015 11:32 AM

337	Elimination of 43 and 49, which I use heavily to travel between Capitol Hill and U-District, and Capitol Hill and downtown. Adding long walks to/from light rail stops and the few remaining bus stops makes me want to revert back to driving, especially given our frequent rainy weather. Being able to sit through a single bus ride is much preferable to long walks to/from my start and end points and increased transfers.	3/18/2015 11:31 AM
338	that it eliminates the 12 and the 43 and turns the 48 into the 45. The 45 may be efficient in north Seattle but it still forces those in south and central Capitol Hill to go all the way to John and Broadway for light rail. Right now I live .5 blocks from the 12 and 14 blocks from the new light rail station.	3/18/2015 11:31 AM
339	I rely on the 372x route to take me from University District to Woodinville Park and Ride frequently and the fact that the UW Bothell to Woodinville Park and Ride is going to be discontinued is a huge inconvenience and a mistake. It adds to the commute time in the morning, having to wait to catch a bus from the Park and Ride to UW Bothell, then having to wait again for another bus to go to UW Seattle. Not only does it increase the commute time, but it forces us to try and find alternative routes, ones that will cost us the least amount of money, and save us the most amount of time.	3/18/2015 11:31 AM
340	Please see my above comments.	3/18/2015 11:29 AM
341	Safety issue is a concern when traveling farther distance at night in the university district.	3/18/2015 11:29 AM
342	More "amenities" at stops. What amenities does a bus stop need? I don't need shelter, a seat, or a trash bin. I will throw my trash away properly, and will probably still get rained on with a shelter because rain goes all directions in this city. I prefer faster buses to "amenities".	3/18/2015 11:28 AM
343	Do not like the elimination of route 12. Without route 12, there is not a convenient route to get me into capitol Hill or to the Capitol Hill new light rail station.	3/18/2015 11:26 AM
344	I live in Capitol Hill on 15th Ave E & Mercer and work at UW on 45th. With this plan and the elimination of the route 43, I'll either have to walk almost 10 blocks to catch the route 48 on 23rd Ave E, or walk or bus in the wrong direction (take the 10 or walk down to Broadway) to go to the Capitol Hill Link Station. The Link Station will not better convenience me on my commute to work and I hope to continue to ride the 43.	3/18/2015 11:25 AM
345	Poor connection between the Nathan Hale HS area and the UDistrict. Bus routes that go through the UW campus are very slow.	3/18/2015 11:25 AM
346	Less geographical coverage. I don't understand the current approach. I liken the bus to UPS or other delivery system. There should be broad geographic coverage to central points of quick transit then redistribution. I totally agree with the express concept but you need to have better feeders.	3/18/2015 11:24 AM
347	It is very concerning to me that the 71 will no longer go through the U District. If anything, the M-F morning buses are standing room only and need more access.	3/18/2015 11:24 AM
348	alternatives are not very clear	3/18/2015 11:21 AM
349	The connection from current bus stops and the University Station have the potential to make this a very difficult transition if there isn't more done to streamline getting from the bus to the train.	3/18/2015 11:17 AM
350	No longer runs the 43 between downtown and U District - for those living between the Broadway and Stadium Stations, makes commute much more difficult.	3/18/2015 11:16 AM
351	Service for Shoreline to the UW (route 373)	3/18/2015 11:14 AM
352	I'd like a better connection that runs E/W through the central district and hooks up to the new link service so that as a central district resident, i can actually utilize the new link	3/18/2015 11:13 AM
353	my buses no longer run to my neighborhood. Not safe to walk from Northgate transit center at night.	3/18/2015 11:12 AM
354	Severely degraded service between Shoreline/Maple Leaf/Green Lake, and the Redmond campus of Microsoft. The 542 stops only at 520 and 40th, and 520 and 51st. This significantly reduces the convenience and utility of taking the bus. Why do you keep trying to kill the 242. It was designed specifically to get Microsofties on the West side over to the campus, and it's a huge success--packed buses every day. Just leave it alone!	3/18/2015 10:53 AM
355	Frequency of schedules for weekends, off peak, and return evening commute.	3/18/2015 10:47 AM
356	No midday service on 15NE	3/18/2015 10:27 AM
357	Overcrowding on the 71 - 73 during the AM commute. Opening the Husky Stadium station will relieve overcrowding from campus to downtown, but will do nothing to alleviate overcrowding from north neighborhoods to the campus. Many students use the bus to get to campus instead of walking.	3/18/2015 10:07 AM

358	I'm concerned that the north ends of the 10 & 12 would be cut, because the footroute to the 43/48 is pretty treacherous. Getting to and from 23rd (from 19th/Galer and 15th/Galer) is a major hassle, especially on rainy days when the very steep hills become very slippery. This situation is not at all helped by poor maintenance of sidewalks leaving moss and mold aplenty, both of which are extremely slippery when wet. If the 10/12 north ends are cut, I would highly recommend a project to replace the sidewalks on Galer from 23rd to 21st with stairs or to add texture to them to improve traction. Improving the light signal at 23rd & Galer/Crescent would also help.	3/18/2015 9:59 AM
359	The importance of Route 8 as a trunk line for connecting elsewhere, since travel times on Denny (between Seattle Center and the interstate) are extremely high during peak times, which means the bus is always really late.	3/18/2015 8:47 AM
360	Loss of Redmond-Downtown off-peak service	3/18/2015 8:20 AM
361	Deletion of route 43	3/18/2015 8:00 AM
362	The service between Downtown Seattle and UW during peak hours (routes 73, 74, 76, 77, 312)	3/18/2015 1:05 AM
363	Substantial loss of bus service in the Pike/Pine corridor. Although many of the areas slated to lose bus service in the proposal are within 1/2 mile of the new Capitol Hill LLR station (or Convention Place/Westlake Station), these areas are on a HILL. Many riders, myself included, may have difficulty walking up and down hills to reach buses. Also, confining this busy corridor to only one route (#10) is sure to lead to massive overcrowding, frequent delays, and an increase in the number of transfers.	3/18/2015 12:16 AM
364	Loss of one-seat ride to central district	3/17/2015 9:33 PM
365	The deleted portion of route 49, it causes a greater distance for me to walk to my office and it is the closest route to my home.	3/17/2015 7:57 PM
366	Extremely concerned about congestion and traffic on Montlake Blvd/NE 45th St/Sand Point Way that will prevent busses from being able to run on time to the University Station. Extra connection/extra walking to reach University District/Ave from University station.	3/17/2015 7:54 PM
367	The 70 serving UW Station instead of it's current University Avene routing Removal of 73 mid-day trips and tail Loss of 66 mid-day service to SLU	3/17/2015 7:47 PM
368	Please don't break up the 48! I depend on that route for so many things. That's how I get from my home in Crown Hill to various jobs south of the ship canal. If I had to change buses in the U District, I would probably have to find another way of getting around.	3/17/2015 7:15 PM
369	No all-day service on NE 65th St going east-west.	3/17/2015 7:10 PM
370	I ride the 72 from the U District to Lake City and back 5 days a week for work. I see no replacement for my route. It seems the Lake City neighborhood will see a drastic reduction in service in the first alternative.	3/17/2015 3:35 PM
371	also take in consideration hills and frequency between stops for the increasing senior population.	3/17/2015 3:23 PM
372	There is still no change in route 74, which serves the Bryant neighborhood. Increases during peak times is good, but there is no way to get anywhere during the day on that convenient route, which used to offer service during the day so that older people and others not on a regular commuter schedule could travel by bus to and from downtown and other places. So the alternatives are probably fine for commuters but don't help neighborhoods...	3/17/2015 3:10 PM
373	stated above	3/17/2015 2:28 PM
374	No off-peak direct service between Capitol Hill and Overlake Transit Center. I take the 545 in to work (Microsoft) most days and 9am is too early for peak hours to stop. Typical time for people coming into work varies from 9a to 11a.	3/17/2015 2:15 PM
375	Routing of route 26 away from southern Wallingford ave (going west on 40th St. instead of 35th St.)	3/17/2015 1:34 PM
376	It provides service that is unnecessarily frequent at a cost that requires the destruction of good existing bus commuter service elsewhere.	3/17/2015 1:01 PM
377	Pinehurst. Seattle Transit Blog readers from Pinehurst have made a compelling case that Alternative 1 hurts them.	3/17/2015 11:38 AM
378	My route (43) would be discontinued. I live on 16th Ave E and Republican, which means my walk time would increase significantly to catch the light rail or 48. This makes sense down the road when the light rail has more stops, but removing a frequent line that services many folks as two new light rail stops are added seems to be a bit much. In my case, I work at the UW Tower, which is around a 25-minute walk from Husky stadium. This compares to my current stop of NE Brooklyn and 45th, which is only two blocks away.	3/17/2015 8:28 AM

379	Generally concerned about folks having to walk further to access transit. Also concerned that with such heavy focus on the north end of the city, my routes (such as the 8) will be changed without much concern about how the change impacts the south-end portion of the route.	3/17/2015 7:49 AM
380	The design of the connections with Link is what's most concerning. Hopefully the UW will play ball and allow you to make that really smooth, otherwise that's likely to be a little bit of a mess.	3/17/2015 1:21 AM
381	Losing bus service on E Madison Street between Broadway and 16th Ave E; losing bus connection between Downtown Seattle and HSDC at 19th Ave E (route 11 or 12)	3/17/2015 12:24 AM
382	It completely screws up getting to redmond from capitol hill. This is going to cause major disruption in people getting to work. This is a terrible idea.	3/17/2015 12:07 AM
383	Bus line 12 being done away	3/16/2015 11:40 PM
384	i'm concerned about the 242 being eliminated. it is the bus I take to work	3/16/2015 10:57 PM
385	The discontinuation of 545 at non-peak hours. I almost exclusively ride the 545 during non-peak hours (8-9 times per week), so option 1 would drastically increase my commute time.	3/16/2015 10:55 PM
386	No direct route from Ravenna to downtown and being forced to transfer to Light Rail but having to walk at least 5 minutes on the UW campus from the route 372. That is not improving service but instead making it worse. I will repeat what I wrote earlier and that is that route 372 must go down Montlake Boulevard to stop at the UW Station.	3/16/2015 9:54 PM
387	Might remove the few options I have for Eastlake neighborhood.	3/16/2015 8:48 PM
388	inability to easily get from UW to North Seattle College	3/16/2015 6:10 PM
389	I live in Montlake and work in Redmond so removing transport from Montlake to Redmond makes me impossible to use transit and forces me to drive.	3/16/2015 5:46 PM
390	I do not see the ability to take a bus home at night from the downtown bus tunnel like I do now. I live near Sand Point Way NE & NE 70th Street and often leave a car on a residential street near NE 65th Street & 46th Ave NE when I need to go downtown for an evening event. I currently catch a Route 71 to go downtown into the tunnel and then bring it back home later in the evening to where my car is parked. This allows me to not have to transfer busses at all and to be safe and out of the elements when traveling home in the late evening.	3/16/2015 5:12 PM
391	No direct off-peak service from Redmond to Capitol Hill (concept for Route 545)	3/16/2015 4:59 PM
392	The stark realization that transit is so underfunded that we have to choose between frequent service and comprehensive service.	3/16/2015 4:44 PM
393	The 43 is the most useful and reliable route in Metro for the last three residences I've held in Seattle. Not having it is really concerning. I guess the replacement is UW->CapHill via Link, but that's unproven where as the 43 is a rock star, and would involve 10 more minutes of foot travel for my commute.	3/16/2015 4:35 PM
394	It's hard to make sense of all the data, but I'm concerned about having trouble catching busses at Montlake Fwy Station going to OTC from 9-11:30 AM, which are my typical workday times to catch it. I also sometimes catch busses at Roosevelt 65th Park and Ride to OTC from 9-11:00 AM, and I think those (542) might be eliminated.	3/16/2015 4:23 PM
395	The reduction in 545 hours will mean more people trying to fit in peak times (rather than missing the last bus). Given the standing room only on many of these buses now, it's hard to imagine it getting worse. The 542+Light Rail alternative is supposed to eliminate some of this, but I cannot imagine enough people taking it. My commute is currently ~23minutes in the morning. For people to migrate from the 545 route to the 542, this would require (1) an additional transfer with 15min inter arrival (mean 7.5mins), and (2) a 5 minute walk between 542 and light rail. So for myself and people in a similar situation, alternative #1 will increase my commute time by ~50% [12.5mins], or 20% -85% [5-20mins] depending on Rail/542 timing. (Route 545 @ Bellevue & Pine -> OTC) *Perhaps the Light Rail is so much faster that it compensates for some of this. I would like to see a preliminary schedule of 542+LightRail routes to better understand how my commute would change. Or perhaps some understanding of how many more 545 buses will run to compensate for peak usage.	3/16/2015 4:17 PM
396	No more 242. No direct connection between Northgate Transit Center and 148th Ave NE. Less service routes between North Seattle and Redmond.	3/16/2015 4:13 PM
397	reduction of ST545 bus runs.	3/16/2015 4:06 PM
398	Removing the 242 would result in a far longer commute between NE 5th and 148th in Redmond, likely mean long walks and three transfers. Today there is a direct rout, that is friendly to those of us who do not and cannot drive cars.	3/16/2015 4:04 PM

399	Elimination of route 11	3/16/2015 3:41 PM
400	The 542 use to arrive every 15 minutes. Now it is very difficult to connect with. In the morning I watch the 542 drive away while sitting on the 48 or just miss the connection if I take the 373, 71, 72, or 73 and then I need to wait another 15 minutes. In the evening I watch the 48 drive away while sitting on the 542 right behind it. That is a 20-30 minute wait. Changing the frequency back to 15 minutes is great but not for connections if you are cutting all the connections to the 542. The Greenlake P&R is nearly as far a walk as getting to the Ave at 50th NE.	3/16/2015 3:22 PM
401	Decrease in service for the 545. Also the end of service from UW Campus to Greenlake P&R during off-peak hours for the 542. That turns my one-seat commute from Redmond to Greenlake to at least a two-seat trip. I understand that you're trying to get more frequent service for the 542, but the service already meets my needs.	3/16/2015 3:14 PM
402	More transfers, less geographic coverage.	3/16/2015 3:08 PM
403	The removal of the 242 line will have a significant impact on my ability to get to and from my home and work. While the 542 line does run more often, it does not serve several key areas and times and will result in significantly more walking.	3/16/2015 3:01 PM
404	My home-work commute is a one way bus trip via 545. I picked my home based on this optimal route. I often work past peak-hour times, so I really dislike the idea of a commute that requires a transfer and makes my overall commute time longer.	3/16/2015 2:44 PM
405	Fewer spaces on ST 542 bike racks after elimination of KCM 242. Over-crowding on ST 542 from UW to Redmond in the mornings without increasing the frequency during peak hours.	3/16/2015 2:23 PM
406	Cutting routes from further away places hurts the people who need in the most. Even if it means the a bunch of people having to wait an extra 10 minutes for their bus to come to a popular stop, its worth it to let the people in more remote places keep their routes.	3/16/2015 2:21 PM
407	The reduced timing of the 545.	3/16/2015 2:18 PM
408	It looks like there are fewer options to and from Green Lake where I live. That's concerning.	3/16/2015 2:14 PM
409	Requires a connection from Capitol Hill to Redmond	3/16/2015 2:11 PM
410	Impact on 545 service, especially requiring a walking change at the Stadium	3/16/2015 2:00 PM
411	Currently, if I want to travel to Downtown on the weekends to run errands, I can hop on the 66 and take the bus all the way. With the removal of weekend and evening service for route 66, I would have to first travel to the UW and then connect with the light rail to head Downtown. This would be an inconvenience depending on how long the revised route 67 would take to get to the UW.	3/16/2015 1:57 PM
412	People in more remote areas having to travel further for transit (myself not included)	3/16/2015 1:54 PM
413	It's already incredibly crowded on the 545 route with standing room only being the norm on all routes during the morning and evening commutes.	3/16/2015 1:53 PM
414	Will have to take 2 buses during off peak hours when travelling from cap hill to redmond	3/16/2015 1:40 PM
415	542, I LIKE making it all day, but DISLIKE that the route to Greenlake Park and Ride is only during peak times. How are we supposed to get from Redmond to Greenwood? .	3/16/2015 1:34 PM
416	This is feedback for both alternatives, deleting the 242 route reduces coverage for users who are connecting at Montlake and who go to 148th and 32nd st. There is NO workaround. Going to green lake park and ride is NOT feasible.	3/16/2015 1:22 PM
417	Reducing the 545 to peak only	3/16/2015 1:18 PM
418	Loss of direct route from OTC to downtown Seattle during off-peak hours	3/16/2015 1:07 PM
419	Loss of the 242	3/16/2015 1:03 PM
420	Reduced service for the 545. Doesn't look like there's a good off-peak connection between downtown Seattle and Overlake Transit Center	3/16/2015 1:03 PM
421	unknown how far i'd have to walk to get a bus	3/16/2015 12:59 PM
422	With the removal of route 242, there is no transit service from North King County to the east side. This will easily add 20-30 minutes, and pretty much removes transit as an option to travel to Redmond.	3/16/2015 12:53 PM
423	Mid day Route 545 being taken away	3/16/2015 12:51 PM

424	I am generally apposed to the increasing frequency by decreasing reach (although I live within walking distance of the major transit hubs).	3/16/2015 12:49 PM
425	ST 545 service hours reduced from all-day to peak hours only (frequency of service would remain the same during peak hours) The alternative route would take much longer for me on the nights I decide to work late.	3/16/2015 12:47 PM
426	Almost none of the routes I take are even mentioned in the proposed changes. Are they gone? Unchanged?	3/16/2015 12:45 PM
427	Deletion of the 43. Since the 43 avoids Broadway, it tends to be a faster route to downtown (esp. until the 47 is reinstated). The 8 isn't a good alternative as it doesn't get to downtown proper (e.g. transit tunnel/Convention Place). Why the 48 is listed as an alternative for the 43 is beyond me.	3/16/2015 12:44 PM
428	South Wallingford has really poor bus options. Getting in to downtown will take longer due to walking and less frequent bus options to south Wallingford and Fremont (today there is 26, 26X, 40, 16, 28). In general, Alternative 1 will take away buses without adding enough frequency to compensate and making us walk further.	3/16/2015 12:39 PM
429	Hate that you are making my commute from Maple Leaf to Redmond take longer	3/16/2015 12:35 PM
430	Having sufficient capacity on Link to handle all the transfers to it. I hope 4-car trains can be deployed as needed.	3/16/2015 12:30 PM
431	542 not leaving from Green Lake Park & Ride, it seems it would leave from main campus?	3/16/2015 12:29 PM
432	I am so sorry but the proposed changes are very confusing and I am not sure how this will impact me so I don't have enough understanding to provide feedback	3/16/2015 12:29 PM
433	I worry about the added transfer travelling from Capitol Hill to Overlake Transit Center. If the expected total trip time is reduced (without too much added variability) then I'm all for it.	3/16/2015 12:27 PM
434	Doesn't help those of us in Ballard	3/16/2015 12:27 PM
435	What happened to route 542?	3/16/2015 12:20 PM
436	Transfer between U. Link and ST 542. Traffic congestion on Montlake Ave particularly during peak times may be overly slow for ST 542 going on/off SR520.	3/16/2015 12:16 PM
437	More transfers and a farther distance to a bus for many people	3/16/2015 12:15 PM
438	Slower bus service from Maple Leaf towards downtown with all of the buses being directed to University Ave instead of the 66 taking much faster Roosevelt. The elimination of the 242 will destroy my commute to work: I would need to transfer to the 542 which then drops me off 15 minutes away from my building, instead of having a direct 242 from the house to the office door.	3/16/2015 12:14 PM
439	1. reduced 545 service: My primary commute is between Fremont and Redmond: 9am departure from Fremont, 9pm departure from Redmond. To do this I take the 5 or 16 between Fremont and Downtown and the 545 between Downtown and Redmond. Under the new proposal I would have to take 3 connections instead of 2 which will likely dramatically increase my (already long) commute time. 2. Longer walk time to get to the 16 with the Fremont revision. 3. The 5 and 16 would now be separated for a few stops in Fremont, so I will have fewer options at each bus stop. Busses aren't always on time, so it is good to have similar routes stopping at the same stop: Under the current routes, I can take the 5 or 16 downtown from the same stop (whichever comes first) Under the new routes I would have to commit to one or the other and might make the wrong choice. 4. Current size of 542 busses: Currently the 545 busses are twice as large as the 542 busses. if the plan is to take the 542 over the 545 will the sizes be flipped?	3/16/2015 12:14 PM
440	Limitation of the 545 to peak-only.	3/16/2015 12:14 PM
441	Please do not divert the 542 over to Overlake Transit. Those people can cross the overpass. I do every day at 51st and I'm not complaining. It adds 10 full minutes to an already long commute to divert the buses over there. My commute is long enough, thanks.	3/16/2015 12:13 PM
442	I currently get on 542 at 15th ave NE and 40th Street, walking there from Wallingford. I do not want to have to take a bus all the way to the light rail link to get on 542	3/16/2015 12:08 PM
443	The 545 to Redmond which I ride to work every day actually has only downsides with this plan as the times of the 542 are the same as the current 545 with an added transfer which could add time. I often ride later as I work late hours meaning that the trip to the ferry terminal in Seattle may just be longer.	3/16/2015 12:00 PM
444	Decentralization is fine, but this alternative has a huge impact on workers, especially those who need it most (not office workers, but blue collar), by adding an extra 30 minutes to their commute routing them to University, instead of dropping them in downtown and allowing them to choose their connection bus/link from there.	3/16/2015 11:59 AM

445	Consistent difficulty in travelling east and west, i.e. from the University District to NW Seattle	3/16/2015 11:55 AM
446	Less frequent service between downtown and Redmond (the 545 changes)	3/16/2015 11:54 AM
447	Limited service hours for 545, which directly connects downtown Seattle and Capitol Hill to Overlake Transit Center without the need for a transfer.	3/16/2015 11:53 AM
448	If I read the map correctly then the benefits outweigh the concerns I might have.	3/16/2015 11:52 AM
449	Removes all-day 545 service.	3/16/2015 11:52 AM
450	Loss of 545 service outside of peak hours	3/16/2015 11:52 AM
451	Can't get home after midnight because 71 is stopped and 65 stops at midnight. Also transfer required to downtown.	3/16/2015 11:51 AM
452	deletion of route 242	3/16/2015 11:51 AM
453	still requires 2+ bus rides from Madrona to Bellevue (my daily work commute)	3/16/2015 11:51 AM
454	1. Removal of Route 242 - further distance to nearest stops in Greenlake and Redmond. 2. Route 542 doesn't reach 65th & Ravenna during off-peak hours. 3. Route 542 Westbound trips deviate into Overlake Transit Center afternoons and evenings.	3/16/2015 11:50 AM
455	Longer travel time for commuting to work...I now ride the 545 from Cap Hill	3/16/2015 11:47 AM
456	Reducing the 545 to peak hours only means I will likely be stranded at Microsoft campus if I have to work late.	3/16/2015 11:46 AM
457	Removing route 242 would greatly increase my commute, i use this bus 10 times a week. The use of 542 would require me to commute to the greenlake park and ride and you do not have an alternative beyond a mile walk. Additionally this bus is considerably slower when commuting to the east side because it might make its way through the university traffic	3/16/2015 11:46 AM
458	Harder to get to Redmond from Wallingford with less 545 service.	3/16/2015 11:46 AM
459	The removal of a stop that is used heavily (Montlake freeway station). This freeway station needs to be built into 520's redesign -- oh, that's right -- the redesign doesn't exist other than the railroaded version being implemented. Also, since I get off at 51st street in Redmond, it looks like there is less access to that using the alternatives.	3/16/2015 11:45 AM
460	Losing direct service on the 545 from CapHill to Redmond (OTC) - this is how I commute every day to work, along with hundreds of others (at least). I do not want to take a bus to the light rail and then take the light rail and then catch the 542. This will greatly increase my commute time and make it much more difficult.	3/16/2015 11:38 AM
461	downtown to Redmond would be affected	3/16/2015 11:35 AM
462	Slower connections off-peak from Redmond to downtown at Montlake	3/16/2015 11:34 AM
463	No direct service between Redmond and Green Lake Park and Ride	3/16/2015 11:33 AM
464	The fact that bus 256 is only planned to be a rush hour bus and that there's a need to detour to UW to be able to get downtown (and home) using the new tram line: "To downtown Seattle, use Route 256 during peak periods or transfer to Link light rail at University of Washington Station." This will put a cramp in my commuting and possibly put another car on the 520 bridge instead.	3/16/2015 11:02 AM
465	It's difficult to make educated answers without seeing how the new service improvements (voted in in Nov 2014) are affected here.	3/16/2015 10:51 AM
466	NE Seattle North of 65th having fewer options for transit routes	3/16/2015 10:46 AM
467	It appears my frequent one bus, direct journeys from Downtown to Montlake (Boyer Ave E and 24th Ave E) and from Downtown to North Capitol Hill (16th Ave E and E John St) will require transfers and/or a six or seven block walk from the Link Light Rail stations of Husky Stadium and the Capitol Hill.	3/16/2015 9:13 AM
468	255 is the only bus that frequently connects Kingsgate and Downtown Seattle. Why change the 255 Route to Children's Hospital? Create a new service from the Eastside to the University. Changing buses during the travel to Downtown Seattle adds more time. We need frequent all-day service between the Eastside and Downtown Seattle! You proposal will create slower connection from the Eastside to Downtown Seattle	3/16/2015 7:16 AM
469	The problems as stated in this document (http://seattletransitblog.com/2015/03/15/pinehurst-bus-suggestions-for-alternative-one/) starting with the third paragraph until the first suggestion.	3/15/2015 8:57 PM
470	Lack of a direct connection between Pinehurst and the UW,	3/15/2015 8:37 PM

471	The main concern is that there is large population that lives in north Kirkland/Kingsgate neighborhood that will loose bus service and will have to drive to the Kingsgate P&R which is full by 7:30am. Route 311 is not an viable option. This alternate would be acceptable if routes 257 and 252 would remain unchanged and not deleted.	3/15/2015 6:31 PM
472	No way to reach top of Capitol Hill --15th avenue E. from Montlake, unless I walk.	3/15/2015 12:39 PM
473	I need direct transport from Pioneer square where I live directly to Redmond. Currently, the 545 route goes through ALL downtown Seattle and then to CAPITOL HILL, which adds 15min to my commute every day. Plus there is no Wi-Fi on the bus, which is terrible for my productivity.	3/15/2015 12:35 PM
474	The biggest negative for me would be losing the #71. When I have to work later hours (or if I miss a #74), my usual practice is to take the #71 or the #76 to the intersection of NE 65th St. and 35th Ave NE and walk the rest of the way (about 15 minutes). I prefer this over taking one of the other 70-something buses to the U. District and then having to transfer--and not being sure how long I'll have to wait for a #65/75/30-something.	3/15/2015 12:01 PM
475	No direct access to downtown from Wallingford ave.	3/15/2015 8:53 AM
476	The concerns in the northern neighborhoods of having to walk further to/from the bus routes are for safety reasons. As a single, young female, both while attending the University of Washington and after graduating, I've not only needed to take the bus at the very beginning of designated peak times (6 AM) as well as later at night - when it's generally very quiet in the neighborhoods with not a lot of people around. Having to walk further for the bus would compromise safety and may result in more people choosing to drive alone.	3/15/2015 8:30 AM
477	I'm wondering if the #8 will pick up all stops that will be lost with deleting the #11. I can't find anything that says if the stops will be the same or further apart to help increase frequency.	3/14/2015 10:29 PM
478	Not sure this is going to save time getting downtown because of the inconvenience of having to walk from Stevens Way to the Link Station. It's very important to get the bus stop moved to Rainer Vista.	3/14/2015 10:27 PM
479	Both alternatives either eliminate or heavily modify route 71. For people that live in Wedgwood, View Ridge, Bryant, or Ravenna, this means there is no longer a non-peak way to get to downtown Seattle or the northern part of the University District (45th Street to 55th Street) without transferring, or in the case of alternative #1, a long ride on the #16 bus through many neighborhoods to get to downtown Seattle. The primary way to get to downtown from these neighborhoods in alternative 1 would be to transfer from the 372 or 65 to light rail, but the walk from Stevens Way to the station by Husky Stadium will be pretty far. Although I generally like the increased frequency of alternative 1, the loss of the #71 will be significant hit to these neighborhoods.	3/14/2015 10:08 PM
480	Elimination of Route 11. Shortening of Route 48 forcing transfer.	3/14/2015 7:56 PM
481	As an aging person, I wonder how I will get around and how many transfers I will have to make to be able to use transit	3/14/2015 4:48 PM
482	The route 48 link between UW Link Station and Mt. Baker Station (along 23rd) serves a vital link between North Capitol Hill and access to the Light Rail. Currently, I take the 48 to Mt. Baker Transit Center to access the Light Rail (northbound or southbound). Once the Link Light Rail is complete, from Downtown, I envision taking the service all the way to UW then transferring southbound on the 43 or 48 and getting off on North Capitol Hill (Aloha). Alternatively, when I return from the Airport, I plan to get off at the Mt Baker Station, then catch the 48 northbound, as this will take less time, then all the way to UW and then south bound.	3/14/2015 3:52 PM
483	If routes are changed significantly, it can negate benefits from increased frequency of service. From Lake City I go primarily to the University District Retail Core (The Ave not University Village), the University campus to use the libraries, the Roosevelt Area, Northgate, Downtown and Green Lake. It looks like my access to the University District Retail Core and Roosevelt would be decreased (I'd have to transfer more) in Aternative 1, and transferring slows everything down. I would like to see the Route #72 retained since it is my most direct connection to the University District Retail Core and to connect with Route 48 on 65th NE. I also often travel to the University District through Wedgewood, stop, and then get back on the bus to go either to the University or Downtown or connect with the #48. I also go to church on 35th Ave NE and often ride the bus back and forth from church activiites. Decreasing frequency on the routes 65 during the evenings and weekends present problems for me taking transit. It looks to me like Alternative 1 would be more disruptive plan than Alternative 2.	3/14/2015 2:57 PM
484	Possible increased bus traffic on 24th Ave E though Montlake.	3/14/2015 11:30 AM
485	Less routes on Stone Way	3/14/2015 11:24 AM
486	It appears that off-peak access to/from downtown Seattle for me will now require a transfer at Husky Stadium. I had anticipated transfer to Link when light rail reached Brooklyn or Roosevelt, and that made sense to me. Connections at Husky Stadium will not work as well and I believe will increase my travel time significantly compared with options for 71/72/73 today.	3/14/2015 10:38 AM

487	I'm strongly opposed to diverting Route 28 away from workplaces in central Fremont. I purchased a home near Route 28 specifically so that I could share a single car with my wife and have an easy bus commute. I do not appreciate the suggestion that I should have to walk a half mile uphill to get from my office to the nearest Route 28 stop at 39th Street. This would essentially double the length of my commute. Many other Fremont workers also use Route 28 every day and would be inconvenienced by this change.	3/13/2015 5:14 PM
488	no all day service on 30 or 74 routes	3/13/2015 3:59 PM
489	No all day service on Roosevelt from Northgate to Downtown.	3/13/2015 3:43 PM
490	In general, both of these alternatives reduce service to my neighborhood (15th Ave NE & NE 73rd). I use routes 72 and 73 a lot, and these are going away and/or rerouted so that I will have to walk much further. In addition to items checked above, during off-peak hours, this alternative requires more transfers and more walking to get from link rail station at Husky stadium to my neighborhood at 15th Ave NE & NE 73rd (concept for route 48/45)	3/13/2015 3:31 PM
491	service is needed into Madison Park. It is used heavily by seniors, high school kid who need to get downtown. Making this change will only encourage people to drive to the bus stop or all the way downtown. Madison Park cannot be cut off from bus transportation	3/13/2015 2:41 PM
492	Woodinville Park and Ride has space to park if you delete route from Bothell UW and Woodinville PR, there are no space to part on Bothell UW.	3/13/2015 1:26 PM
493	Any reduction in routes 43 or 48.	3/13/2015 12:56 PM
494	Not familiar with these specific issues.	3/13/2015 12:36 PM
495	64 doesn't go through downtown on 4th or 5th	3/13/2015 8:48 AM
496	Neighborhood coverage reduction is terrible. Metro needs to be INCREASING neighborhood access to the light rail, including the UW station. Alternative 1 would cause me to almost entirely stop transit use.	3/13/2015 6:54 AM
497	372 needs to go further on weekends! Particularly if deleting the 72.	3/12/2015 10:36 PM
498	My concern is that the bus connection to the Husky Stadium station will be worthless. It appears as though I will have to walk a good ways to get to the 372 or the 65 and then again to get from the nearest stop to the Husky Stadium station. I am unlikely to ride the Light Rail because the bus connections look so terrible. And to get such terrible connection, I'll lose the 71 for midday rides straight to downtown. Something needs to be done... desperately... about the terrible bus to light rail transfer at Husky Stadium.	3/12/2015 8:49 PM
499	General loss of less-served routes which I use irregularly.	3/12/2015 5:29 PM
500	I ride the 545 and I'm not sure what this means: Keep existing alignment and convert span to two-way extended peak-period-only service. My route (250) was already cut last summer and now I drive to a park and ride. My concern is no longer having a direct route into the city by having to make a connection on the Seattle side of 520. It's becoming more and more convenient to take my car all the way into downtown if this were to happen.	3/12/2015 5:16 PM
501	This alternative would seem quite fine after the 65th Street/Roosevelt station opens. Right now building everything around the the Husky Stadium station isn't particularly convenient for anyone except UW Hospital and Athletic Center riders. They are the only ones who won't have to transfer at least once in their trip.	3/12/2015 4:33 PM
502	Elimination of route 11.	3/12/2015 4:08 PM
503	Loss of 43 route, a one-seat ride to downtown.	3/12/2015 3:52 PM
504	If you consider the GRADE in the Maple Leaf and nearby neighborhoods, you see that people living east of 15th Ave NE have essentially no realistic off-peak options to get around because you're asking people to hike up a 33% grade in at least one direction, and Maple Leaf doesn't have sidewalks or rational connections down to Lake City Way. For the people in Maple Leaf who live on the steep hillside (ca. 40,000 people), you're basically saying "transit won't something you'll usually be able to consider."	3/12/2015 2:35 PM
505	As it currently stands, it takes me an hour to get from Kingsgate to my work in SODO. Deviating my route north (to UW) would add time and money. It would also make it more difficult to plan trips home when i have to stay late and work. I strongly feel that eliminating routes which go from Kirkland to SODO would create much added stress and it would make taking the bus more of a burden. Since I have to commit to a year bus pass at a time, it would also be incredibly inconvenient for me and take away more of the little time i have with my family.	3/12/2015 1:34 PM

506	I regularly commute between Wedgwood and Fremont. I *love* that some of the 65 trips throughroute as the 32. I notice that in Alternative 1, the 65 terminates at UW, and I'd have to transfer to the 31/32. I guess I can live with that, as I use that option today sometimes. But the single vehicle from Wedgwood to Fremont is great when I can plan ahead to take it. The increased frequency of service is nice, but the buses I care about already come every 10 minutes during peak hours. So it's not that compelling of an improvement.	3/12/2015 1:10 PM
507	Cutting portions of routes that currently extend into Pioneer Square (to S Jackson St area); Reduction of 66 service along Eastlake (while shortening Route 70 service into Pioneer Square)	3/12/2015 12:43 PM
508	Improved transfers at University Link station, especially for 520 buses.	3/12/2015 11:37 AM
509	No direct service to Pinehurst area	3/12/2015 10:58 AM
510	71 and 76 are regularly packed and refusing riders. Any plan that does not increase routes through the area is suspect. rail will help, but the 76 is full before it gets to where the train will be.	3/12/2015 10:58 AM
511	I do not generally use these routes.	3/11/2015 7:54 PM
512	I work off-hours, so losing weekend and off-peak service on the 545 is going to make my commute from Belltown to Redmond longer and more of a hassle. I'm also concerned about getting up and down Dexter Avenue, though it looks like the 26/28 and 16 have just been switched? (which I am totally cool with!)	3/11/2015 7:32 PM
513	Still no reliable service between northern U District / Roosevelt / Wallingford / Green Lake and U Village / Children's Hospital.	3/11/2015 4:51 PM
514	No connection between Shoreline/Jackson Park and the Eastside.	3/11/2015 4:08 PM
515	I do NOT want routes 31/32 to be removed from Stone Way.	3/11/2015 2:54 PM
516	The potential further travel to the bus stop. It's not a problem for me personally, but many of my neighbors are elderly and this could prevent them from being able to use the bus easily.	3/11/2015 1:28 PM
517	My biggest concern is that there are not good bus connections to the UW light rail station. It would be great if some fast busses went straight to the light rail station, perhaps down 25th or 35th avenues.	3/11/2015 1:21 PM
518	On the one hand I support merging the 26 and 26X, as I prefer the faster Wallingford-downtown service on the 26X. On the other hand, the proposal to reroute the 16 to follow a portion of the 26 route (once the 26 has gone away) will make the travel time between Wallingford and downtown on the 16 infeasible. For my purposes, that will effectively eliminate the 16 as a viable commute option leaving me only with the 26X (which is a longer distance from my residence).	3/11/2015 12:46 PM
519	The through-routing of the 48 and 67 is ABSURD! This solves zero problems associated with the 48-45 split and merely places these montlake issues upon the 48 and 67. Separate these two routes like you did with the 48-45 and previously with the 43-44, 49-7, etc. etc. The on-time performance will FINALLY increase for the 48 and the 67 has a fighting chance of remaining 10 minute new headways instead of 3 buses bunched up going north on the ave and roosevelt.	3/11/2015 11:37 AM
520	Can't travel directly to South Seattle with changes to the 48.	3/11/2015 10:44 AM
521	Please keep in mind that metro is used by middle schoolers daily. Increasing a walk of over a mile to get to a bus that still requires two connections, and an arrival time at 7:50 am is a burden for families. Even the time to get home from these changes will make it practically useless for my middle schooler, and will significantly affect our choice for high school request because it appears that the 73 will no longer serve our neighborhood. Also, does the train accept dogs on board? The train may not be a real replacement for bus service for some users. Will these changes take place before the 145th St station opens? Even the 145th station is hard to access by middle schoolers.	3/11/2015 10:19 AM
522	Not much here benefiting middle income Madison Valley dwellers. The already limited services are not being enhanced and appear to be shrinking. You must think that EVERYONE at the east end of Madison is independently wealthy, lives off of investments and drives their fancy cars everywhere...	3/11/2015 9:44 AM
523	Losing Routes 26 and 28 from Dexter. Pedestrian access to stops on Aurora is an ever-changing nightmare. Losing Routes 26 and 28 from Dexter would be really depressing. These buses are always full anyway! Changing Route 28 between Fremont and Ballard is also very problematic. It cuts off access to many blocks of this growing and popular area.	3/11/2015 8:48 AM

524	Increased overflow traffic in other areas without corresponding increases in service. I work on the Hill. I need a way to get home in 35 minutes. I will do anything. Right now driving is the only <35 minute option. I'd love to bike but I simply cannot afford the increased child care costs I would incur if I were to use transport--because I can't pay by the minute or the hour, I have to buy the whole package, this kind of public project could cost me between \$400 and \$1000 / month depending on how it affects my commute. It would be easy to sacrifice 10 minutes per day for the city but it is not easy to come up with that money.	3/11/2015 8:40 AM
525	Sounds like a lot of buses making that long narrow winding trek through the UW at peak time, with a lot of riders. A lot of people (like me) will probably end up taking the 75 or other buses to Stevens Way & Okanogan and transfer to Link there. I worry that bunched buses will bring traffic to a standstill and make each other late, and that the walkway between that stop and Link won't be able to handle all the people coming through.	3/11/2015 8:05 AM
526	Regardless of the alternative, the key to making the new UW link station effective is having buses that travel during peak hours from that station to NE Seattle (Wedgwood in my case). Having to wait long periods after departing the UW station would significantly diminish the advantages of having a quick trip from downtown to the UW. We need to be able to get off link and get right on a bus heading northeast into these neighborhoods. For Metro to increase ridership, these practical issues must be addressed.	3/10/2015 9:28 PM
527	Loss of Route 43 service to get to light rail stations.	3/10/2015 9:17 PM
528	Reliability needs to improve, and service needs to be better in synch with One Bus Away app. Everyday, there are buses in Wallingford and Fremont that One Bus Away says is coming, but they do not actually come.	3/10/2015 9:13 PM
529	Elimination of local service that cause dangerous situations (particularly at night) where riders must walk though bad weather, high crime areas (23rd and Madison) and are areas of high density and fast traffic and hills. This is particularly dangerous for women, the elderly and children.	3/10/2015 7:32 PM
530	Also, slower connection from central Wallingford to downtown Seattle on route 16 (I think).	3/10/2015 6:10 PM
531	Travel distance from 75 stop on Stevens Way to University Link station	3/10/2015 5:40 PM
532	I live in Ravenna, almost exactly halfway between 25th Ave NE & Roosevelt (although slightly closer to 25th). While, in general, I like the consolidation, virtually all of my options for getting downtown during off peak hours will requires significantly more walking. Here are my options: 1. Walk to 25th (about 1/4 mile). Catch a 372X. Get off on Stevens Way. Walk about 1/4 mile to the UW light rail station. That's about 1/2 mile of walking to cover a distance that is about 2 miles. (In theory, I could wait to catch a 16 to save the first 1/4 mile walk, but in practice, if I were alone, I would probably just walk rather than wait.) 2. Walk to Roosevelt. Catch a 45, 48 or 67 to get me closer to the UW light rail station. This walk is a bit longer, and maybe I would walk up to 65th to catch a 16, but again, walking (if alone) would probably be quicker for me. The 48 has been a great bus for my family on 15th. Moving it to Roosevelt makes is much less likely that we would use it. The big issue for me is not when traveling alone, when I might not mind walking more (although it stinks in the winter when it is dark and rainy). I have small children. This additional walking is really tough with toddlers. I will end up carrying them, or walking slowly with them. Having to transfer and wait multiple times with toddlers is equally a drag.	3/10/2015 4:35 PM
533	The 545 gets reduced a bunch, but transferring from the Link to 542 during off-peak is an acceptable alternative for me.	3/10/2015 4:31 PM
534	Longer walks to bus routes	3/10/2015 3:56 PM
535	potentially longer commutes from Madison Park	3/10/2015 3:35 PM
536	Shifting service to University Way NE instead of 15th Ave NE and removing direct service to E John St/E Olive Way from the University District via the 43.	3/10/2015 2:31 PM
537	Less coverage geographically.	3/10/2015 2:03 PM
538	The elimination of Route 12 and 43. When denser and denser housing goes into our "Urban Villages" and new buildings don't supply adequate parking, we shouldn't be cutting the transit that services these areas.	3/10/2015 1:06 PM
539	The number of people who will no longer really have access to metro. It is simply not reasonable for people living in Seattle to have a 3/4+ mile walk to the nearest bus. Most of these people are going to choose to drive more frequently. Do none of the decision makers at Metro use Metro on a daily basis?	3/10/2015 12:25 PM
540	My families main use of route 16 iare: 1- weekday rush hour to commute to downtown for work 2- weekends- visit downtown with family 3- Sporting events- mostly at Centruy Link field Shoter travels times are the biggest draw for my family.	3/10/2015 11:46 AM
541	No direct easy way to get from Wallingford to light rail station at husky stadium	3/10/2015 11:38 AM

542	Reduced route 12	3/10/2015 11:25 AM
543	Keeps Route 25, which is our nearest bus line.	3/10/2015 11:17 AM
544	There should be some bus service that actually goes to the light rail station from the Wallingford/Ballard area.	3/10/2015 11:11 AM
545	Metro listening to vocal minority groups and not implementing Alternative 1 fully.	3/10/2015 9:57 AM
546	No Route 11 in Madison Park.	3/10/2015 9:48 AM
547	Will the 49 be put out of service? This is the main bus I take to the UW. Having to walk over 6 blocks to the link rail would be physically difficult for me.	3/10/2015 9:30 AM
548	I now take the #11 bus directly to downtown Seattle. With Alt 1 it appears I would have to walk and transfer to get downtown from Madison Park or Madison Valley.	3/10/2015 8:54 AM
549	I am not transferring from no bus to light rail. In fact, why don't you give me light rail on the eastside. Oh no wait, I have to wait until 2023. Keep my route the same until you get to 2023. We should have had either subway, train, or light rail all over King County by now. A day late and a dollar short.	3/10/2015 8:13 AM
550	Forcing connections at UW station when major events are at Husky Stadium	3/10/2015 5:46 AM
551	50% decreased service to the Dexter corridor (eliminating the 26/28 and adding the 16) when this neighborhood is currently growing exponentially with new apartments and office buildings. The length of the 16 no doubt means it will be too crowded to allow for any passengers to catch it along Dexter.	3/9/2015 10:19 PM
552	No direct service between Madison Park and downtown. If you force Madison Park and Madison Valley residents to transfer to Light Rail on Capitol Hill you are essentially telling us to get back in our cars and drive downtown again.	3/9/2015 9:56 PM
553	The elimination of route 43. While I don't ride the 12, I don't see why it needs to be deleted.	3/9/2015 8:40 PM
554	Routes 8 and 11 only overlap between MLK and E. John on Madison. Route 8 does not serve Madison Park at all. The overlap is probably 5-10% of the total route.	3/9/2015 8:16 PM
555	Concerned about loss of bus service along the busy Madison street corridor. It's not at all clear what happens to this with the information given.	3/9/2015 8:15 PM
556	Really quite upset that I will have NO REASON or direct route to the LINK LIGHT RAIL. I don't understand why the U-District "Hub" is remaining where it is. It seems obvious and self-explanatory that the NEW HUB for the U-district would be the darn LINK LIGHT RAIL STATION. At LEAST one bus route that serves Sand Point Way -- ideally the 75 -- would travel down Montlake TO THE NEW LINK LIGHT RAIL STATION. There are already 1,000 routes that go through UW Campus, and get stuck in hours of foot traffic as kids cross the street. The 75 should offer connection from the LINK LIGHT RAIL STATION to Northgate via Montlake/Sand Point Way. PLEASEEEEE	3/9/2015 8:11 PM
557	Deleting Route 25 service and combining the 43 and 48 to a less frequent schedule (every 10 minutes rather than the 7 minutes we get down 24th ave today	3/9/2015 7:38 PM
558	reduced service on 28/28X - the proposal does not result in 15 min headways on the revised 28X, as indicated in the benefits statement. The 28X fills at Market so there is no benefit to running it further south in peak periods and the proposed frequency is not sufficient. there is NO reason to include this route in the package.	3/9/2015 7:09 PM
559	The bus routes I use most often now would be eliminated. That means I would have to walk further to catch a bus that runs less frequently to then transfer to another bus or light rail to get to where I want to go.	3/9/2015 6:24 PM
560	I am a shift worker at the UW and need direct routes from maple leaf/northgate area earlier in the morning and late at night. Worried less about peak service and more about extending service around the clock.	3/9/2015 5:42 PM
561	any of the travel further thing - I use the bus in part b/c mild disabilities make it hard for me to drive, and I don't want to have to walk MORE	3/9/2015 5:34 PM
562	Consolidating routes will just delay and overload the existing bus routes.	3/9/2015 5:22 PM
563	Loss of Route 11 - or basically transit that goes up and down Madison. I think we should bring back the old route that just did that!	3/9/2015 4:27 PM
564	I guess you haven't even thought of all the people along the #25 route on Lakeview Blvd, Portage Bay/Roanoke Park (Fuhrman Ave E and Boyer Ave E) who will have to walk 1/2 a mile minimum to get to a bus, which might or might not even take us to a Light Rail Stop. I would think that the #25 bus route would be the perfect bus route that would help people get to the UW Stadium station! You don't even have us listed on the above choices! Do not eliminate the #25 bus!	3/9/2015 4:24 PM

565	Losing all-day service to U district from 15th Ave NE north of Northgate Way.	3/9/2015 4:22 PM
566	losing route 25	3/9/2015 4:08 PM
567	losing #11 bus	3/9/2015 3:47 PM
568	Elimination of my primary bus route the 43, which connects me to Group Health at 15th, the light rail station, Seattle Central, and Broadway on Capitol Hill, my mother's assisted living facility on First Hill, and Downtown. I even use the route extensively to commute to South Lake Union when my work requires it.	3/9/2015 3:38 PM
569	Travelling/transferring in the U-District at night needs to feel like a safe option.	3/9/2015 3:34 PM
570	The frequency of the #8, 2, and 3 buses particularly at night, after 5pm. Waiting more than a half hour for transit, in the dark, is a serious concern for me and not okay. I can't risk safety and don't feel the buses are reliable enough to wait in the dark by myself.	3/9/2015 3:14 PM
571	We need to keep both bus lines running at their current schedules, or how is anyone in Montlake/Portage Bay, the closest actual communities to the light rail station, going to get any benefit from it without increased access to the station? A quick Google Earth distance measurement shows that the nearest home in Montlake is already a quarter mile away from the stop. The "Hop In" (aka Montlake Blvd Market) is a half-mile away. Bus service needs to minimally stay the same to make the light rail stop gain it's full potential, otherwise it will be a squandered opportunity for our community to want to take light rail anywhere.	3/9/2015 3:01 PM
572	It totally eliminates the bus I most frequently use. I can walk on a flat surface, but the alternative route requires going up a hill. And the alternative route is not reliable at all. It's frequently late. One time I waited over an hour for a bus that should come every 20 minutes.	3/9/2015 2:59 PM
573	The only bus line that goes north/south on 25th starts in WOODINVILLE! and is an express. All of the other routes go through the U-District or require a transfer.	3/9/2015 2:52 PM
574	Discontinuing the 25 route.	3/9/2015 2:48 PM
575	1. No direct route from most of Montlake to central Capitol Hill and downtown. My 80 year-old mother is not going to be able to walk the 1/2 mile over Montlake Bridge to the UW Station, and even if she did it would not get her to Group Health Hospital on 15th E. It's even worse for folks further south in Montlake and in NE Capitol Hill. 2. Similarly, having the 48 stop at NE 45th Street is a drag as I frequently ride from Greenlake or Roosevelt back to Montlake.	3/9/2015 2:19 PM
576	There are large, empty areas where they will be basically no transit service, except some areas would have some service only during peak hours. Those are some really long walks between routes, and on some pretty long or steep hills. This is difficult enough if you are able-bodied. Imagine trying to travel 1/2 mile or more up steep hills in non-walkable areas with pain, limited energy, in a wheelchair, with a cane....? This proposal also makes getting across North Seattle (East/West) even more difficult from certain areas. If I want to get from NE Seattle to Ballard, from say NE 80th St. and 15th Ave. NE, it would take a very long time to get to a route, travel south for 40 blocks (2 miles), and catch the 44. At that point, why not just drive?	3/9/2015 2:17 PM
577	I moved to Madison Valley because of the convenience of the 11 and 8 bus routes! Even if it takes longer, I would most certainly want to keep these routes. I also visit family in Madison Park and take the 11 there and downtown very frequently!	3/9/2015 2:07 PM
578	I commute to Redmond on the 545. The 545 should terminate at the Husky Stadium Link station.	3/9/2015 1:35 PM
579	Eliminating the route 25	3/9/2015 1:20 PM
580	Route 25 disappearing AND cuts to frequency of buses down 24th ave E. Why can't you be transparent that this is a loss of service of overall down 24th (it is cast as "more frequent") but you are dropping a bus which gave average 7.5 minute wait times become 10 minute wait times. Also, you are limiting service accessed by a large number of lower income communities in the Central District that need to have less burdens on groups that are already facing timing-limiting circumstances (working too jobs, children traveling to daycares, etc). Wasn't Prop 1 supposed to increase bus service? Why are you masking all these changes as though these aren't cuts? You need to be more transparent and not spin the reverse.	3/9/2015 1:01 PM
581	Limited access to NOAA Sand Point from UW.	3/9/2015 12:04 PM
582	I'm worried routes on Cap Hill (specifically routes 10 & 11) will be reduced under the assumption that people will be willing to walk to the new light rail station. I need connection from East Cap Hill to Downtown, or from East Cap Hill to Maple Leaf. Thanks!	3/9/2015 11:52 AM

583	Having to get off of the bus at UW Station and wait for light rail Having to get to light rail and wait for bus to get back to the East Side	3/9/2015 11:47 AM
584	Don't want to transfer from route 64 or 65 to get downtown. We used to be able to go direct downtown, but then you changed it so we had to wait outside at Campus Parkway to get downtown. And I stopped using the bus because of that.	3/9/2015 11:05 AM
585	with the 43 bus eliminated, am concerned about the connection from Capitol Hill Link Rail station to 15th Ave. E. at night, in middle of winter. Would it just be the #8 then? Will that run more frequently?	3/9/2015 10:53 AM
586	One of the major things that I am told that keep people from taking the bus is that they have to travel too far to reach the bus. I'm afraid if we add to this problem there will be less people using mass transit.	3/9/2015 9:58 AM
587	I expect to need more access to bus service as I age and become more disabled, and the added distances to walk to bus service are problematic.	3/9/2015 9:50 AM
588	My main concern is that Metro be very careful not to reduce or eliminate service in any neighborhoods will higher levels of transit-dependency. I don't think it's a problem for people in wealthy, car-owning areas to have to walk a few blocks further in order to catch a faster bus. But we absolutely need to provide top-quality, nearby service to those who have no other way to access employment, goods and services.	3/9/2015 9:22 AM
589	What I don not like about these concepts that my sreas are not even a concern. I hate to tell you not everyone lives or goes to these areas.	3/9/2015 9:06 AM
590	I have a car - if the bus is not there I will drive.	3/9/2015 8:35 AM
591	Not enough connectivity from NE Seattle to University Link Station along 25th/Montlake. Look at the area of NE Seattle - and this is served by only 2 routes (one of which is express - how much of the southern portion of the indicated route is it skipping over?) Also, options from downtown to University / Ravenna area are more limited	3/9/2015 8:31 AM
592	even less connections to seattle, no direct connectin from eastside to first hill	3/9/2015 5:44 AM
593	No 43	3/8/2015 10:03 PM
594	The new route 16 will be a fine idea when Link is extended to Roosevelt, but UNTIL THAT TIME: folks in View Ridge and Wedgewood who presently can get downtown without changing buses and to the airport with a single modality change are going to be left with either making two changes (16 to 65 to Link) to get downtown OR a single change with a significant walk (75 to Link). In addition, both 75 and 65 buses can be affected by traffic jams on Montlake. I understand that you have a formidable problem trying to service the University Stadium station from Northeast Seattle, but I frankly doubt that you can make the 65 service work at all during much of typical workdays, given its dependence on Montlake. Perhaps this is an absurd suggestion, but have you considered the possibility of a light vehicle (e.g. big golf cart) shuttle between the ring road on campus and the Link station?	3/8/2015 9:23 PM
595	No improvements to Route 44. This is the route I use the most to get to U-District/UW. The route is very frequent. But - it is not fast or reliable. I often find myself taking a car rather than riding the bus because of this.	3/8/2015 9:23 PM
596	Needing to travel further to get to bus stops, I am disabled in a wheelchair	3/8/2015 8:52 PM
597	I can't tell from the information how the transit on First hill would be impacted by these changes.	3/8/2015 6:25 PM
598	These changes do not affect me currently.	3/8/2015 3:46 PM
599	Parking. As it is for kirkland/seattle service, driving part of the commute is a must as neighborhood service is virtually non-existent especially during off-peak. This has impacted the park and ride parking as routes are cut more people have to drive to p&r for service. Make sure you include sufficient parking as part of the plan.	3/8/2015 3:45 PM
600	Changes to the 8 and 66 that make traveling more difficult for people living in the Cascade district .	3/8/2015 3:00 PM

601	I currently live in the Central District, but I would like to move to the North Seattle area to make commuting to my job in Everett easier. But I'm having difficulty making this work due to the current arrangement of buses routes. My biggest problem with bus travel in North Seattle is there is no easy way north of downtown to access the Sound Transit buses that travel along I-5. I'm stuck with the I-5 freeway stops at 45th street or 145th. I don't mind the freeway stops themselves but there are challenges. 145th Street & I-5: There's almost connecting buses to 145th street. I'd have to walk or drive there and I'd prefer not to get a car (the park and rides are over crowded anyway). There's almost no bus connection that services 145th street frequently and it's in the middle of nowhere: there's little light, no foot traffic and no businesses. As a woman I just don't feel safe there after dark having to wait up to 30 minutes for a bus (such as the 348 or any bus), to take me into Northgate or Lake City etc ... Why don't the Sound Transit buses connect at Northgate where there is a Metro hub and lots of business and foot traffic etc ...? 45th Street & I-5 This has the benefit of having lots of connecting routes but it's one of the worst traffic messes in rush hour. I'd have to live within walking distance of the 45th street stop to make this work. I know Northgate is a mess at rush hour but the U-District is worse. But I would appreciate all the wonderful connecting buses from the U District when it wasn't rush hour. I'd love to live in the Northgate area and have access to the all the Metro buses at Northgate and still be able to connect to Sound Transit at I-5 there. At the moment my only option is to live within walking distance of the 45th Street stop or to continue to catch the 512 from downtown.	3/8/2015 2:08 PM
602	I have no indication as a taxpayer of how this would affect either taxes owed or bus fares, and there is a limit to how much more I would be willing to pay in exchange for these new services. I would prefer to have spending information surrounding both alternative 1 and alternative 2.	3/8/2015 1:12 PM
603	removal of the 64 serving dt is yet again chipping away at commuters. you ask us to walk further and connect, yet you remove routes that we could also use.	3/8/2015 11:56 AM
604	Elimination of mid-day route 12 service, which I use routinely.	3/8/2015 11:16 AM
605	the possibility of needing to walk further to get decent service. The # 48 is already crowded enough, has at least one difficult narrow street to transverse when traffic is high and needs all the support it can get. Plus it's a great route from N to to S East. (UW hosp for ex)	3/8/2015 9:08 AM
606	Utter confusion by riders when system changes. This should be gradual--not utter chaos.	3/8/2015 7:17 AM
607	1.) I sincerely thought that Metro would have kept service along University Way ("the Ave") to downtown. There is a massive demand for such service just in that area alone. Forcing riders to transfer at UW Station is not just a major inconvenience, but also a failure recognize that the Ave in of itself has its own demand for ridership to downtown. 2.) It seems as if Madison Street service wasn't planned well. If SDOT is going to implement BRT on Madison, then why shift the 49 to Madison and have it run every 10 minutes? This seems like a major duplication of service that will need to be addressed. 3.) The 541 & 542: this also seems like a duplication in service. Why can't they just be combined?	3/8/2015 3:24 AM
608	I currently do not use bus in these areas, but Alternative 2 seems that it would suit me better by geographical expansion. Wherever I happen to work, I need convenient and reliable transportation.	3/7/2015 11:25 PM
609	49 no longer traveling on pike/pine (I sometimes take it to businesses along those routes). However, this is a minor sacrifice.	3/7/2015 9:51 PM
610	Concerned that fewer routes will mean busses are full. It seems that busses traveling on focused routes (eg, E Line) can't keep up with the number of riders at peak times (E Line leaving the zoo often full at 7:30 am, same leaving downtown between 5 & 6. Basically, I stand the whole way every day. I am not sure fewer routes with more people is working well.	3/7/2015 8:06 PM
611	Concern about weekend frequency of travel; people without cars still need to get around during the weekend as well	3/7/2015 7:43 PM
612	Slower travel in general via light rail than bus service. My only experience with light rail has been between the downtown tunnel and SeaTac. It seems considerably slower than its predecessor bus service, likely because the train makes every stop regardless of demand. A probably secondary reason is the much longer walk from the rail station to the airport.	3/7/2015 6:20 PM
613	I don't notice route 41 highlighted as a way to get downtown. Is it assumed that everyone in the NE will commute through the UW?	3/7/2015 5:09 PM
614	Deleting Portion of Route 16 to Northgate Way & Roovesevelt is concerning. Many people who work at Northgate Mall or North of there use the bus and will not or cannot walk from the Northgate TC. Its a mile so some people using the 16 would negatively be affected by not having the route extend all the way north.	3/7/2015 4:59 PM

615	Keeping Rte 41 on I-5. While there may be some reduction in congestion on the freeway with the advent of LLR, using I-5 for transit has outlived its usefulness. There needs to be some alternative to sitting at a standstill. There are still many years to go before LLR comes to Northgate.	3/7/2015 3:30 PM
616	I strongly object to the way the alternatives are presented here. This is very biased towards alternative one, even to the point where I would say it is ridiculously and obviously biased.	3/7/2015 3:16 PM
617	Not enough direct connections to the university light rail station (Not even the 372???)	3/7/2015 2:56 PM
618	Park and ride concerns as the routes are consolidated. SAFETY of the park & rides or walking to the route.	3/7/2015 2:16 PM
619	Please return #16 from Seattle Center to Green Lake to Northgate. What about the people who live north of 75th St.????????????? Please keep #73 to 145th St.!!!	3/7/2015 2:06 PM
620	I think Alternative 1 will be hard on the elderly and handicapped riders since we will have to travel farther to catch a bus.	3/7/2015 1:34 PM
621	The route 12 seems not to exist in this plan. #12 is our lifeline for the people toward the 19th and Galer area. Not far up to the #10 or down to the #23 but the hills are WAY too steep for older people, strollers for kids etc. The #43 is not safe to walk to or from at night.	3/7/2015 11:46 AM
622	This survey is hard to decipher.	3/7/2015 11:24 AM
623	Nothing - I will always walk farther for a bus that is faster and more frequent, happily.	3/7/2015 11:17 AM
624	Less geographic coverage in general.	3/7/2015 11:13 AM
625	Why cut bus routes? It will make it harder to get around. Not everyone can get to the light rail station easily. We need those routes!	3/7/2015 10:08 AM
626	Would want to make sure service on route 167 was not decreased.	3/7/2015 9:53 AM
627	Having to travel further in general	3/7/2015 9:50 AM
628	Will shift from 5th to Roosevelt slow down connection to Northgate? Will wiggling from Roosevelt to Roosevelt/12th to University Wy slow down routes? My closest downtown stop is Convention Place. So I have to walk further to Roosevelt (instead of 15th), transfer to light rail (adding wait time), and walk further in downtown (Westlake instead of Convention Pl). While light rail will be faster while I'm on it, I don't think it'll be enough faster to make up for all of these small shifts.	3/7/2015 8:54 AM
629	I forget what the details of the concept were - you should have restated it on this page of the survey if you want good responses.	3/7/2015 8:53 AM
630	No service on 12th avenue	3/7/2015 7:46 AM
631	Ignoring neighborhoods and concentrating on main thrufares.	3/7/2015 7:01 AM
632	It's hard to imagine the exact changes to routes 71 and 75 without seeing maps. I just wish peak service went to south lake union, selfishly, but south lake union does currently require transfers and >40 minutes travel time. Isn't Magnuson being developed further with income-restricted housing, and wouldn't Sand Point at 70th/75th be an important area to keep frequent on and off-peak bus service to?	3/7/2015 6:40 AM
633	don't go up that way	3/7/2015 3:48 AM
634	No direct service from 65th and 23rd (Ravenna neighborhood) to the UDistrict (45th and University Way)	3/7/2015 1:06 AM
635	North Cap Hill seems pretty distant since it's a far walk from the light rail, and doesn't have great options to easily get to the downtown core, the stadiums, or really anywhere on this network...	3/7/2015 12:44 AM
636	Having to walk farther to catch a bus	3/6/2015 11:40 PM
637	Reducing route coverage, and therefore being more inefficient for riders.	3/6/2015 11:29 PM
638	I work off of 21st Avenue and need to get Downtown. Now I can ride the 43 or the 12 into Downtown Seattle and the Bus Tunnel. These concept eliminate the 12 and it appears any route straight to Downtown on Madison. I ride up and down Madison alot to go to the Medical Buildings. If the 43 also goes away how does someone in the area East of 15th get to downtown? Have you seen how steep the Hill is up Aloha to 15th? In order to go Downtown from anywhere between Madison 15th and 23rd it appears one would need to go down to 23rd and catch the 48 and go NORTH away from downtown to catch the Link Rail, backtracking quite a bit. To eliminate BOTH the 43 and the 12 is a disservice to people working and going to school in that quadrant!	3/6/2015 10:28 PM

639	I want to be connected into the Link Rail system as quickly as possible. I would like to see any light rail station used as a hub. So from my Greenlake address I would quickly be sent to the nearest Light rail station so I then can continue my trip to downtown. Have a number of east west routes that do nothing be ferry riders from the link station to the neighborhood	3/6/2015 10:11 PM
640	Closer connection to UW station than Stevens way for transfers to link , especially in pm when northbound traffic is light on montlake. Also, run 74x to UW station everyone on the bus is headed downtown.	3/6/2015 9:40 PM
641	Cutting routes through the heart of Capitol Hill (esp. Olive Way)	3/6/2015 9:33 PM
642	It still will take a prohibitively long time and too many transfers to reach Capitol Hill from Phinney Ridge.	3/6/2015 9:17 PM
643	I am disappointed to not see improvements to route 44. Although it has nice frequency, I would like to see 44 become faster and more reliable. Can there be some speed and reliability improvements made to that route to help with connections between the University District and points west? I like new route 45. But, I am concerned that extending it as Route 271 across Lake Washington will create reliability problems.	3/6/2015 8:32 PM
644	That the concept should be getting the bulk of people to the light rail so that can use that	3/6/2015 8:12 PM
645	It already takes me 1 hour 20 minutes from my house in Windemere to 5th & Jefferson UNLESS I drive to west UW and catch the 355. I only live 6.5 miles from where I'm traveling! None of the alternatives improve my commute. I was looking forward to riding the Light Rail. Why can't the 75 go to the Light Rail station instead of driving around UW? We need something to go to the Light Rail from our area!	3/6/2015 8:10 PM
646	I'd prefer keeping more buses going over the Fremont Bridge rather than the Aurora Bridge -- it fits my commute better.	3/6/2015 8:04 PM
647	I rely heavily on route 72 to get from the U District to 123rd and Lake City. Eliminating the 72 and replacing it with more frequent service on the 372 will add approximately 20 minutes each way to my travel time and exposure to the elements. This is a deal-breaker for me in both alternatives.	3/6/2015 8:03 PM
648	If metro waters down these changes, some parts of the cities could loose a lot of service.	3/6/2015 8:01 PM
649	Further loss of the 27.	3/6/2015 7:55 PM
650	Lack of direct service from Greenwood to Fremont. We lose the 28, without gaining something in return (e.g. the 5). My first preference would be to reroute the 5 to Fremont; my second preference would be to keep the 28 in Fremont (and move it to Westlake to share a corridor with the 40).	3/6/2015 7:50 PM
651	There's no direct access from NE Seattle to the Link Station at Husky Stadium via 25th Avenue NE or via Sand Point Way.	3/6/2015 7:42 PM
652	Changes to the 43 - need service to Montlake along 24th, not to the U District	3/6/2015 7:41 PM
653	Route 66 will no longer go from my home at 65th and Roosevelt to downtown Seattle. Route 48 will no longer go from my home to 15 and 45th near my church. Even walking one or two more blocks means I can't get there. You need to remember the people with disabilities and elderly people and take them into account.	3/6/2015 7:40 PM
654	Where is Ballard (8th NW or 15th NW in this new world order?	3/6/2015 6:55 PM
655	Lack of a downtown/Madison route which is one of Sdot's priority corridors, plus I don't see the 47 on the lap which is also suppose to be funded by SDOT. Still not totally sold on elimination of the 43 trolley. Will more routes like the 8 be electrified to help keep the neighborhoods quiet and air clean	3/6/2015 6:48 PM
656	Every time Sound Transit adds or improves transit in an area served by Metro, Metro cuts and or eliminates existing service sending the hours of service to other parts of the county or to the City of Seattle. The two systems are supposed to be independent with Sound Transit concerned with Tri County Service. Quit ripping off the Public. Metro is over priced with less non peak service than it had in the eighties. I should know, I worked for Metro as a transit operator (1762) back then, I know your institutional history better than the people that are still there. Shame on you.	3/6/2015 6:22 PM
657	Elimination of my most used route 71. I would have to drive and park to use other routes I am 80 years old, cannot walk several blocks to catch a bus.	3/6/2015 6:19 PM
658	Loosing geographically wide spread service for more concentrated service. We need both plans	3/6/2015 6:04 PM
659	The 75 and 65 do not easily access the Montlake Link station.	3/6/2015 5:53 PM

660	I like the increased frequency of bus service and better service in some areas. However, for me and for some of our elderly residents, walking from Madison Park to MLK and Madison is a bit more than a mile, a huge inconvenience compared to the service we now have; the trip to downtown would also include a transfer, making the whole trip quite inconvenient.	3/6/2015 5:45 PM
661	Would like 28X to be more frequent.	3/6/2015 5:38 PM
662	You conveniently left out 71 and 76 service to Ravenna. Of course you would. You will burn in Hell!	3/6/2015 5:37 PM
663	many problems, most notably the deletion of the 66 between Downtown & the area near the REI on Eastlake!	3/6/2015 5:29 PM
664	Personally, my commute will be worse after this change. I live in Ravenna a block east of Roosevelt High School and work in Redmond. Today I have the following options: * Walk to the Greenlake P&R and take the 542 (10 minute walk, single seat ride) * Walk to the Greenlake P&R and take the 242 (10 minute walk, single seat ride) * Take the 48 on 15th Ave and connect to a 545 in Montlake (3 minute walk, 2-seat ride). After the change, the 242 will be gone and the 542 will only go to 45th so both my single-seat options will be gone. The 48 moves to Roosevelt which makes it an 8 minute walk for a 2-seat ride.	3/6/2015 5:28 PM
665	Elimination of 43 and use of Madison for 49.	3/6/2015 5:20 PM
666	Route 11 through Madison Park eliminated so it's only served by route 8???	3/6/2015 5:19 PM
667	Duplication with lightrail service -- failing to sufficiently "push" or encourage riders to recognize the benefits of transferring at UW Station to get downtown faster, especially when coming from the eastside	3/6/2015 5:14 PM
668	Reduced coverage to underserved areas -- this is a step in the wrong direction!	3/6/2015 5:12 PM
669	No improvement to the 330	3/6/2015 5:10 PM
670	Poor connections from north of Northgate Way to UW off-peak	3/6/2015 5:09 PM
671	The frequency map seems to show that the only neighborhoods that will have faster service are Laurelhurst and the Seattle Center. I expect wider benefits for such a big investment.	3/6/2015 4:58 PM
672	Consolidating service to main roads - disabled, elderly and people with children would have to walk farther to service. On the 14 bus route a number of stops have been eliminated and the individuals listed above have farther to go from their homes to a stop.	3/6/2015 4:33 PM
673	That the bus doesn't travel all the way down 35th to 45th and back up. The route was changed a number of years ago and has really impacted my use of the bus.	3/6/2015 4:30 PM
674	Cutting of line 242 adds 30 minutes of walking to my work commute every day (SR-520 station to 148th Ave NE in Redmond) and makes it much less likely I can use the bus to commute, which means I will drive more. :(Also, cutting of line 25 prevents me from easily reaching the Montlake Community Center by bus, which means I will drive more to go there.	3/6/2015 4:26 PM
675	Major concerns are if current routes are cut & time schedules are cut. This is my main concern for all of these ideas.	3/6/2015 4:10 PM
676	Change of Route 64x onto Fairview (serving South Lake Union instead of downtown). I typically use Route 64x every work day. Traffic via Fairview is terrible now at peak times and will only get worse with all the new construction. Even though it would be a shorter walk for me to stops on Fairview vs. Stewart or Olive, I believe my overall travel times would be much worse.	3/6/2015 4:07 PM
677	This is a substantial reduction in access and service to northern Ravenna	3/6/2015 4:04 PM
678	I cannot understand why service is being cut on the 11 route, because that is my primary means from getting to and from Madison Park to Pioneer Square where I work. I already have to transfer, usually from Link Light Rail, to get home, but your revisions would mean two transfers at least. It does not save me any time, nor anyone in my neighborhood either. This only encourages people to drive who should not have to.	3/6/2015 4:03 PM
679	In general, *having to travel farther* when people depending on the bus are more likely to have movement disabilities or have no other way to carry groceries. I am concerned that this will just increase the disparity of incomes between places with excellent bus service and places with no bus service, and when we get extra resources for more buses, it will be less likely to manifest as re-growing lost routes. Generally, I am all for making the routes more elegant and reliable, and maybe having to take a couple of transfers to keep each short leg running smoothly. But making a significant percentage of people travel farther on foot (believe me, we're already getting our walking in) seems like bad public policy.	3/6/2015 4:00 PM

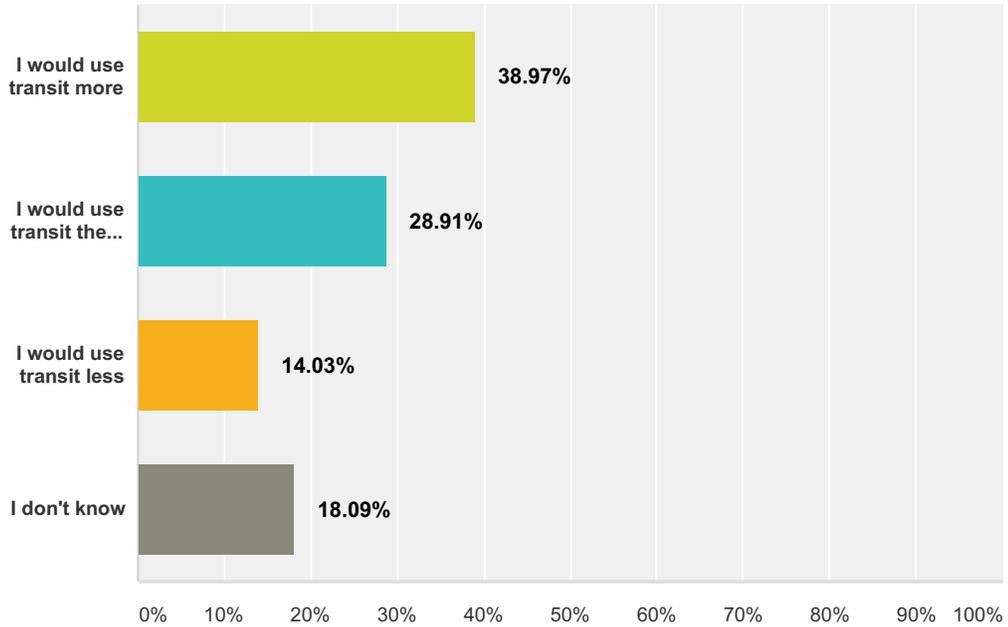

680	Deletes Route 12 which provides service to the southern end of downtown from Capitol Hill. Other routes require a transfer in downtown from surface bus to tunnel and surface bus is very slow (#10). The 43, which is also deleted, would have the same issue in that it doesn't replace the 12.	3/6/2015 3:56 PM
681	1. The need for transfers obliterates any benefits to the point of making alternative one useless. 2. I often need to get from Seattle Children's Hospital to Mapleleaf. Alternative 1 is a failure in this respect. 3. Getting to the Husky stadium on surface streets (including buses) is not a practical solution. Walking is faster. This is without adding any buses. Most of the bottleneck is created by cars going to the eastside, so the light rail will not improve this. The creators of alternative 1 need to be forced to drive Through the montlake area everyday for a month during both the morning and evening rush hour. Aside from after a Husky game, the location of the stadium is an awful place to try to get people to. The additional length of time that it will take to get to the light rail station makes it not a practical alternative to the 66, 71, 72, 73 for getting downtown.	3/6/2015 3:51 PM
682	Moving the 31 & 32 from Stone Way to Wallingford Ave. They are so many large apartment complexes (and more are currently under construction) near Stone Way and 40th. Moving the route to Wallingford Ave is going to affect so many people.	3/6/2015 3:49 PM
683	Getting to the stops, and increased transit time due to increased walking.	3/6/2015 3:41 PM
684	From NE 65th Street, the elimination of Route 71 eliminates the most "direct" route downtown without transferring.	3/6/2015 3:32 PM
685	harder to get form NOAA Sand point to U-district and downtown.	3/6/2015 3:32 PM
686	Having to travel farther to get from Ravenna (25th Ave NE) to Northgate Mall (walk to Roosevelt Way - 67, or walk to University Village - 75, or take 372 all the way to Lake City/125th, then backtrack - 372-->41/75)	3/6/2015 3:31 PM
687	Slower travel, due to transfers and deletion of routes, between Redmond/Overlake/Bellevue and North Seattle e.g., cutting 242 seems like a good idea, but only if 542 is extended to Northgate.	3/6/2015 3:29 PM
688	Reduced service/coverage from CBD to Capitol Hill Slower commute from CBD to UW (west campus area) - would be a two-segment trip (with a wait) UW Station is in the boondocks (except for UWMC)	3/6/2015 3:21 PM
689	Most changes seem to be irrelevant to my life and take away options from me.	3/6/2015 3:18 PM
690	You took away our #79 and you continue trying to take away our #72. Walking to Lake City doesn't work because the buses are full by the time they get to our stop.	3/6/2015 3:16 PM
691	I'm concerned about reducing geographic access, although I realize it's a tough issue. I understand focusing resources with the highest ridership (the 44 especially needs more capacity!), but I worry about people with no options, whether lower income, elderly, disabled, etc.	3/6/2015 3:10 PM
692	I repeat, I don't like not being able to ride on one bus north of 92 around to the transit center, This is especially difficult for seniors and others who are mobility impaired. This route as is provides service to several medical facilities, banks, pedestrian entrances to Northgate Mall. Taking that away is inconsiderate and unnecessary.	3/6/2015 3:09 PM
693	Not my area, but I don't like how Madison service lacks a single continuous route. It hurts legibility of routes. I think Metro should consider making it a single route, to prepare for BRT service in the next few years.	3/6/2015 3:07 PM
694	I worry about increasing the frequency and then having to cut back since there have been cut backs recently	3/6/2015 3:04 PM
695	If the 16 becomes slower (not sure if that is an issue with this plan or not).	3/6/2015 3:02 PM
696	None	3/6/2015 2:59 PM
697	I use the stop at Ravenna Blvd and the Ave, primarily during peak times. 71,72,73 all come by frequently. I also can take 74 (I live near 18th & Ravenna Blvd). Alt 1 and 2 both reduce my options via either less frequency or routes. However, I've basically been spoiled by having such convenient options so I understand if I might actually have to look at a schedule to figure out when to expect a bus (regardless of Alt 1 or 2).	3/6/2015 2:57 PM
698	No direct service to NOAA.	3/6/2015 2:56 PM
699	No direct access to Eastlake/Fred Hutchinson/SCCA from Northgate	3/6/2015 2:53 PM

700	The service concept is a total disaster for riding between the SR-520 freeway stations, S. Kirkland P&R, Kirkland, Overlake and downtown Seattle. Today routes 255 & 545 provide 8 buses/hour (weekday daytimes) and 4 buses/hour (most evening times and weekends) between the SR-520 stations and downtown Seattle, and half that many along the "branches". With the traffic nightmare that Montlake Blvd and the Montlake Bridge represent, including bridge openings, and perpetual congestion, forcing all SR-520 riders to make an unnecessary and unwieldy transfer across the Montlake Bridge is a non-starter. Maintaining peak hour direct service is pretty stupid, as that is precisely when I-5 southbound is a parking lot. Off peak, the SR-520 buses are downtown faster than a rider will be able to reach Husky Stadium. And how can any rider off-peak be punctual going anywhere when you never know if the Montlake Bridge might open. If the SR-520 buses are truncated I will actively campaign against every tax measure for Metro or Sound Transit as this is a totally "fuck you" to Eastside riders who need to go downtown.	3/6/2015 2:49 PM
701	The buses I use would be rerouted or cut! Namely the 43 and the 8 and general service to Sand Point	3/6/2015 2:47 PM
702	Eliminating the route I use (12) about 10 times per week (and have been for 28+ years)	3/6/2015 2:46 PM
703	Combining the 11 and 43 into the 8 line means that there is no getting around peak traffic by taking lines that bypass the queue for the I-5 exit alongside SLU.	3/6/2015 2:44 PM
704	the assumption that people will be willing to walk farther to light rail, removing existing service	3/6/2015 2:43 PM
705	Adjustment to 28X is something I do not want. I supported Prop 1 because it wouldn't neuter 28X to this, and that's exactly what is happening. I'm passionate about this, leave 28X alone. If anything increase 28X service over Market St to Aurora, don't get rid of it.	3/6/2015 2:41 PM
706	Lack of coverage along 35th Ave NE down to Nathan Hale HS. (route 65 & 64x)	3/6/2015 2:38 PM
707	The elimination of route 43.	3/6/2015 2:36 PM
708	The bus is always late now is it going to make my bus trip longer? If it is I will drive.	3/6/2015 2:36 PM
709	i wish 75 would loop around for a stop at the Husky Stadium ST so I don't have to walk from UW HUB. Is very burdensome for older folk.	3/6/2015 2:36 PM
710	NO DIRECT SERVICE TO DOWNTOWN BETWEEN 15TH AVE NE AND 40TH AVE NE FROM NE 125TH DOWN TO NE 65TH ST (64X NOT GOING DOWNTOWN...) WITH OUT IMPROVING PEAK TRIPS TO THE NEW LINK LIGHT RAIL STATION ON 35TH AVE NE.	3/6/2015 2:12 PM
711	My son and his girlfriend live at Lake City Way and 20th Ave NE. Under alternative 1, they would have to walk farther for a bus downtown, since 72 and 73 are going away. Further, because they don't work peak hours, their service may actually be degraded. If the ST 522 stopped along Lake City Way near where they live, this wouldn't be a problem, but it doesn't stop anywhere near where they live. So, they'll have to walk all the way up to Roosevelt or over to Ravenna Ave NE, both of which are hikes, especially at 10pm when they get off of work.	3/6/2015 1:13 PM
712	Elimination of route 72	3/6/2015 1:08 PM
713	the removal of 43 impacts folk living on the back side of cap hill around 23rd and Thomas and complicates transit to Ballard etc.	3/6/2015 11:17 AM
714	The 16 concept costs me access to Green Lake and Wallingford (I live near Meridian and Northgate Way)	3/6/2015 10:32 AM
715	Impacts of traffic congestion on Roosevelt, especially at 80th, affecting bus speed and reliability.	3/6/2015 10:14 AM
716	No direct or easy route between Wedgwood and Northgate.	3/6/2015 10:14 AM
717	There doesn't look like a good connection anymore after 9 from my current bus stop at Ravenna and 65th to downtown until the Roosevelt Station opens. I'd like there to be an easier way to get to the Husky Station in the interim years from 65th.	3/6/2015 9:35 AM
718	The move of the 73/373 from 15th Ave to Roosevelt. Please keep it on 15th!	3/6/2015 9:17 AM
719	Your plan to reduce the 73 to peak-time only. That doesn't make any sense given that the Link station in NG won't be open until 2021. I live in Pinehurst. How am I supposed to go to the U-District during off-peak hours?	3/6/2015 9:15 AM

720	Please add to this list: slower connection and further walking distance to 31/32 from Stone Way. Metro needs to realize that the segment of Stone Way (from 35th to 40th St. in Wallingford) that LOSES 31/32 service here is among the fastest growing, developing sections of north Seattle. There are multiple dense apartment buildings going up, and many just opened, and the bus stop that I use most frequently -- Stone Way and 40th -- is busy all day and all night, with people going to/from the university and connecting. If you combine the 26 with the 31/32, as suggested in Alternative 1, you are running service through a lightly-populated corridor (Wallingford Ave) with a transfer station and NO development potential INSTAD of a densely populated corridor (Stone Way) with excellent development already in the works. Please reconsider Alternative 1 to keep the 31/32 on Stone Way.	3/6/2015 9:09 AM
721	The loss if the 73 to Pinehurst is devastating. I actively supported Prop 1 to preserve this service. I rely on it for both of my kids to get home from school. Others in my neighborhood rely on it as their main transportation. Please do not cut this important service.	3/6/2015 9:07 AM
722	Getting rid of the 43 would be mean I would have to walk farther to take the 48 or wait until 2020 when the 45th Station/University station is open to keep my same commute. I live on 19th in Cap Hill and the walk to Broadway to catch the light rail is pretty far. Also, I am confused how 19th Ave in Cap Hill will be served with the elimination of the 12.	3/6/2015 9:02 AM
723	I don't like keeping the 372 cutting through campus. It really should serve the station. Stevens Way is too far away to be considered a transfer.	3/5/2015 11:44 PM
724	I use # 72 from Ravenna to go to downtown but that will be cancelled and replaced by # 372 but from all indications the # 372 will not go to the Link Light Rail at Husky Stadium meaning I have no direct route to go to downtown and don't tell me to transfer to another bus in the U District because that would be bull shit. You are raising my taxes to support Metro and on the ballot issue it was stated that the current service would be improved but if you cancel my direct route to downtown that is the opposite. In other words Metro lied to the voters. I don't have a problem transferring to the Light Rail at Husky Stadium but I will repeat it would be bull shit to have to transfer to another bus in the U District so that I can get to downtown.	3/5/2015 10:24 PM
725	Long walk from my home to any route going west to Wallingford, Fremont, Ballard, or Queen Anne and Seattle Center. I'm still 40 minutes from either light rail station whether I walk all the way or walk then wait for connecting bus.	3/5/2015 8:36 PM

Q9 How would your use of transit be affected if Alternative 1 were implemented in north Seattle?

Answered: 2,802 Skipped: 3,757

Answer Choices	Responses
I would use transit more	38.97% 1,092
I would use transit the same	28.91% 810
I would use transit less	14.03% 393
I don't know	18.09% 507
Total	2,802

#	Why?	Date
1	you may be combining 3 routes into 1 now to reduce redundancy; while you are offering more times the bus comes you have 3 buses of people now competing for the same route; i'm worried while more buses are available they may be more crowded-my route is already crowded enough in the morning and afternoon-i don't see how this is supposed to help because of this i'd have to see how my route changes-if it is packed everyday i'm more inclined to drive due to comfort levels; if buses are more packed, drivers skip stops sometimes b/c there is no more room, just because another bus might be there in 10min, now there is that many more people to get on the next bus b/c the 1st was skipped if 1 of my bus options doesn't go near where i need to go, i'm less likely to take the bus b/c my car will get me to the direct location better; if i wanna go home i can take a direct route, if i need to run errands on the way home i can take 'the redundant' routes that make more frequent stops to the businesses i need; you will be taking away many stops that people rely on-if they have to drive to catch their bus you will need more park and rides or increase the size of the P&Rs as they are super crowded-have you seen how packed they are during peak time? so now you are condensing routes and taking away frequent bus stops so people have to travel further maybe with the new 405 tolls i'll be inclined to drive more if more cars take the carpool lane i can get where i need to go faster	4/2/2015 7:29 AM
2	I have no choice. I may not like the changes but ultimately it would lower my satisfaction with metro but not alter my usage.	4/2/2015 2:11 AM

3	I honestly dislike how limited transportation is from where I live. The 68 stops running past 5pm and I have to do a lot of walking to get to a transfer point. Although I do enjoy the exercise, it is unfortunate during cold and incimate weather. I would also appreciate being able to travel to other neighborhoods without feeling stranded or the need to take an uber home on weekends.	4/1/2015 9:54 PM
4	I plan to use light rail between University and Capital Hill for my work.	4/1/2015 8:51 PM
5	Frequency of service is paramount.	4/1/2015 7:40 PM
6	Having access to the light rail station at Husky Stadium will reduce my commute times downtown and to the airport. But, I would need a direct link/bus from Laurelhurst to the light rail station. Also, my son would be able to use light rail to get to Garfield HS using the Capitol Hill station with bus links.	4/1/2015 6:04 PM
7	I still need to get from point A to point B most days of the week, without burdening myself (and the city) with everything that owning and operating a single-occupant vehicle would entail.	4/1/2015 3:23 PM
8	Too many transfers an waits compared to existing service via 311 with existing routes. I'll return to driving after riding for four years.	4/1/2015 1:20 PM
9	The transit commute from Bellevue to North Seattle would be greatly improved, which would make transit more appealing than carpooling. Currently that route is very time consuming.	4/1/2015 1:15 PM
10	I board the bus near NE 65th St. and 15th Ave. NE. Currently there is frequent service. Alternative #1 removes most of this service.	4/1/2015 12:01 PM
11	I would know I could catch a short connection to the light rail at a relatively close stop (45th and Mary Gates)	4/1/2015 11:52 AM
12	Because it would be more frequent and I wouldn't have to consult bus schedules so much.	4/1/2015 10:38 AM
13	Whilst it would be convenient for me to be able to access areas of North Seattle more easily and frequently, I don't actually travel there much at the moment, so it would use it on an as needed basis.	4/1/2015 10:34 AM
14	Greater reliability and predictability	4/1/2015 10:30 AM
15	Small impact to my current usage.	4/1/2015 8:48 AM
16	I could get to more places quickly and reliably.	4/1/2015 1:28 AM
17	The proposal makes it less convenient to use public transit and increase the commute time to use public transit to commute to work at the UW from Pinehurst (right now, I step out my apartment, walk less than 20 feet, catch a bus, and am at the UW, on average, within 20 minutes.)	3/31/2015 10:33 PM
18	more frequent service mid-day so would use more frequently for trips other than going to/from work.	3/31/2015 9:53 PM
19	new 255 would get me to Uvillage and our dentist and Children's from Montlake.	3/31/2015 9:28 PM
20	I would drive my car to places that aren't as geographically covered as they are now.	3/31/2015 9:20 PM
21	No direct route to downtown	3/31/2015 7:05 PM
22	Getting from Haller Lake to any major hub is slow so it isn't likely to affect my commute unless that changes	3/31/2015 6:56 PM
23	Maybe less because of the loss of the convenience of the 43 to N capital hill. We love the light rail to downtown.	3/31/2015 6:25 PM
24	Service is already slower and in many cases more expensive than driving. I don't like to be stranded on a dark street at night (single woman), frequencies are way too long (have to wait at station by the Convention Center for 1-1.5 hrs for a 73X), AND MORE	3/31/2015 5:32 PM
25	I take the 31/32 M - F to get to UW South campus. I live near 99. If moved, I'd probably look for other ways to get to work. Walking to 40th & Wallingford would take too long, and taking the 44 is too slow.	3/31/2015 4:54 PM
26	I would not be able to get to the transit center	3/31/2015 4:35 PM
27	I use the 25 every day	3/31/2015 4:07 PM
28	I use the bus for my transportation but am limited in how many bus rides/day I take. Hence having the options and more frequent rides is potentially good for me, but I'm not sure exactly how it will affect my usage. Especially if the bus is still stuck in traffic downtown or on I-5.	3/31/2015 4:02 PM
29	You are cutting the fastest/easiest routes for me to get to work.	3/31/2015 3:53 PM

30	The Montlake neighborhood is close enough to the UW that improving access from the UW Link Station area to neighborhoods and destinations in north Seattle would improve access from Montlake.	3/31/2015 3:38 PM
31	Because I would be able to travel between UW light rail and Seattle Children's Hospital easily. I like the idea of having better options for N Seattle.	3/31/2015 3:29 PM
32	I'd just have to see how everything plays out.	3/31/2015 3:28 PM
33	I'm transit-dependent w/disability/mobility challenges, cut prefer a farther trek for better service, as well as an emphasis on rail.	3/31/2015 2:16 PM
34	My bus stop is in Capitol Hill - 23rd and Republican. I love living in this spot because I have frequent access to downtown and to the U District (where I work). I'm concerned that alternative 1 deletes route 43. Route 48 is heavily used and sometimes the bus is standing room only by the time it reaches my bus stop (going North). I imagine this bus will be more packed because those near 23rd will have to take the 48 in order to go North. It would not make sense for most of us to travel to Broadway to take the light rail. Both the 43 and 48 carry a lot of UW students and those working on the East side. Without the 43, I (and many others on or near 23rd) will have less access to downtown. For those near Broadway, it makes sense to walk to the light rail. Have you walked up the hill from 24th to Broadway? It takes a while and is not feasible. I imagine I would switch to Uber more often to go home from Downtown in the evening. It wouldn't be worth it to me to take the light rail and then get on the #8. The #8 is another issue. Have you ridden the #8? It gets packed, especially at the Whole Foods bus stop. I sometimes do my grocery shopping there and the bus ride is horrible during rush hour. The bus is standing room only and we're stuck in Denny Way traffic. It should be a short commute to downtown from here, but with traffic it takes forever. I talked to one guy on the bus recently and he said his commute on the #8 was an hour from Lower Queen Anne to Capitol Hill (this was a Friday around 5pm). Under alternative 1 I'd have to take the light rail to Broadway and then transfer to the 8, which is a longer walk than I usually take. I don't know what other people along 23rd will do. I'm also not comfortable walking from the retail center of downtown (where there are restaurants, theaters, movies, etc) to the #8 later in the evening. There aren't as many pedestrians around and it doesn't feel as safe. I like being right in the heart of downtown where I know there are police officers, pedestrians, etc. Also, taking away the #11 doesn't make any sense. A lot of people live along Madison/near Madison and the bus gets pretty busy. It doesn't make sense to remove 2 bus routes, with high ridership, that go straight to the heart of downtown. I'm also not interested in relying on the light rail and having to transfer. I like the bus.	3/31/2015 1:42 PM
35	The amount of times I take the bus would not change because I still have to get to work, but I would get there faster!	3/31/2015 1:37 PM
36	no choice.. coming from Monroe	3/31/2015 1:26 PM
37	less service, too difficult to get to transit	3/31/2015 1:02 PM
38	It would be less convenient because I would have to travel farther from my house to reach the 73.	3/31/2015 12:58 PM
39	I commute between Ballard and South Lake Union. There's not much affecting this commute.	3/31/2015 12:57 PM
40	The 31 and 32 would run on a street that is four blocks uphill from where I live, instead of right down the street.	3/31/2015 12:48 PM
41	Wouldn't have access to frequent 43 that I use o go to work every day in the U-District and downtown a coupe times a week.	3/31/2015 12:39 PM
42	I mostly take express buses during peak times.	3/31/2015 12:24 PM
43	More direct routes to where I'd like to travel	3/31/2015 12:23 PM
44	If there were more frequent service, I wouldn't feel inclined to take my car because I wouldn't be so concerned about the wait.	3/31/2015 12:22 PM
45	It appears that I will lose access to transit unless I drive.	3/31/2015 12:05 PM
46	If there was a timely, efficient method of commuting between Ballard and Seattle Children's I would commute more frequently. As it is, the nearest bus is 8 blocks away and the commute time is over an hour with a minimum of 2 transfers.	3/31/2015 11:58 AM
47	The light rail is close to my house, so I will be making use of it in addition to buses. If I have to make fewer transfers and my commute is simpler, I'll be more likely to us ethe buses.	3/31/2015 11:54 AM
48	I need as much local resource as possible and am worried that Alternative one would reduce my options	3/31/2015 11:50 AM
49	not sure I understand it's impact on my commute yet	3/31/2015 11:39 AM

50	Be more accessible for daily errands vs. now when use mostly for work	3/31/2015 11:34 AM
51	I like reliable transit times. Better service traveling East-West is a big factor for me. It takes almost 1 hour and sometimes 1.5 hrs to get from Seattle Childrens to Ballard during rush hour. That is way longer than by car!!	3/31/2015 11:28 AM
52	i wouldn't use it/time does not work into my schedule	3/31/2015 11:28 AM
53	I will have to travel farther from my house to use lightrail to commute to work if the Montlake freeway stop is eliminated and will have to travel farther from the lightrail stop downtown to my office. Driving will be much faster and much more convenient.	3/31/2015 11:26 AM
54	No 242 means slower trips. So I would drive my truck.	3/31/2015 11:23 AM
55	Increase in travel time by transit from Redmond to Ridgecrest. So I would drive my truck more often.	3/31/2015 11:17 AM
56	I would transit the same because I HAVE to. But hopefully more frequent buses will mean that I won't be squished on the bus for my entire ride.	3/31/2015 11:02 AM
57	If public transportation can get me to work almost as fast as driving, then I will gladly choose public transportation over driving any day.	3/31/2015 10:55 AM
58	Frequency & short transfer times are important to me. I never ride the bus at night because I don't like waiting in the tunnel (or anywhere else for that matter) for 30 minutes or more. I want to use the bus to get to and from downtown for theater & symphony events.	3/31/2015 10:55 AM
59	Connections to Children's and U district	3/31/2015 10:52 AM
60	I, as a senior, would have to walk far and through questionable areas to get to stops.	3/31/2015 10:49 AM
61	More and more frequent options would eliminate the need for me to drive in to work on some days	3/31/2015 10:47 AM
62	I don't own a car so I am going to be using the bus no matter how good or bad the service. :)	3/31/2015 10:39 AM
63	I rely on transit to go to and from work. Additionally, I use it to go downtown.	3/31/2015 10:35 AM
64	It's just less convenient for many of the places I want to go and requires two buses just to get to Link.	3/31/2015 10:32 AM
65	I use the bus (currently 48) in both directions everyday between Greenwood and UW. I would continue to do so, hopefully with slightly shorter commutes and decreased time between buses.	3/31/2015 10:22 AM
66	Would need to understand my ability to commute to a transit location, park, then commute to work.	3/31/2015 9:52 AM
67	I would probably drive more.	3/31/2015 9:30 AM
68	I would drive my car rather than walk 30 minutes each way to the light rail station if the 43 bus route is removed.	3/31/2015 9:12 AM
69	This cancels route 43, which I use by far the most.	3/31/2015 8:47 AM
70	Would contribute to shorter commute times and be more efficient. Would encourage others to ride with me because of shorter commute times.	3/31/2015 8:19 AM
71	It's no longer convenient to walk the half mile + to get to the station.	3/31/2015 8:00 AM
72	I have to get to work, so I would continue to take transit, but would spend more time waiting and transferring	3/30/2015 11:21 PM
73	sometimes I stay home because even if I can get to a place the busses don't allow for an easy return trip	3/30/2015 11:01 PM
74	Truthfully, until I experience it, I don't know if it will be more helpful. I've been using transit less recently because it doesn't run when I need it to run, and the transfers are so bad that I have been very late to scheduled appointments even when I left with a huge margin of time. Plus, I can sometimes take more than one bus, but because they run at different stops, I have to make a choice which one to wait for--and get very angry when I see one go by that I could have been on, but decided against based on when the bus should have arrived.	3/30/2015 10:01 PM
75	It takes me about 20 minutes to bike from Wedgwood to the University of Washington. Currently, if I miss one bus, I can bike to campus before the next bus even arrives at the stop. Increased frequency would lead to me busing more.	3/30/2015 9:21 PM
76	I cannot walk that far.	3/30/2015 9:16 PM
77	Faster access to Seattle Children's from Eastside. Currently no easy options from Sammamish or even Bear Creek Park and Ride without multiple transfers and stops.	3/30/2015 8:47 PM

78	My regular commute is from Lake City to Overlake business park. I usually take 522-->545 (non rush hours) + 12 minute walk and back on 242-->64X. With the elimination of non-rush hours 545, and 242, my remaining option is a significantly longer commute, changing at the UW + additional walk on the return, or driving (at least to Ravenna P&R)	3/30/2015 8:45 PM
79	Too far to access service is an injustice to seniors, and physically impaired. Right now riders can find more frequent routes if that is what they desire, without cutting closer routes.	3/30/2015 8:36 PM
80	I rarely go to north Seattle because it just takes too long from Eastlake where I live. If service was more frequent and efficient, I would love to travel that direction more often.	3/30/2015 8:24 PM
81	It would be easier to access and run more frequently.	3/30/2015 8:21 PM
82	Route 71, the most convenient route for going downtown without transfer, will no longer be available. Also coming home from the airport using link light rail and route 75 will involve walking uphill with luggage.	3/30/2015 8:20 PM
83	see previous response	3/30/2015 8:19 PM
84	I'd probably use it more during nice weather, when I don't mind the longer walk, and the service times are more frequent, and less during rainy weather when I'd just drive rather than walking.	3/30/2015 7:44 PM
85	too far to walk to catch #43	3/30/2015 7:08 PM
86	I am 77 and to get to the U link is too far walking time . I use the 43 both s and n of 520 and it less than a block way. KEEP IT	3/30/2015 6:51 PM
87	Transit I use now, meets all my needs. Take me close to all my destinations. New light rail will not provide that and also would invoke more time and transfers.	3/30/2015 6:47 PM
88	This plan would eliminate access for me because I cannot walk more than two blocks and I sure as hell am not able to ride a bike.	3/30/2015 6:25 PM
89	I don't know how I'd get to shopping and medical appointments if Metro takes away the routes that I have relied on for 40 years. I cannot afford cabs, cannot walk far, and would be devastated without at least the 43.	3/30/2015 6:08 PM
90	I would use it more because the frequent connections would allow me to get to events (dinner, theatre, etc) on time.	3/30/2015 5:46 PM
91	I like the idea of having a reliable way to get to Capitol Hill from Greenwood. As it stands I would never take transit to this area on weekends due to the length of time it would take. I do have reservations about the proposed 45 route ending at midnight, however, as most establishments in the Capitol Hill area are open until 2am.	3/30/2015 5:29 PM
92	Connections from the Eastside to north Seattle would be much easier.	3/30/2015 5:26 PM
93	With fewer stops, I wouldn't be able to use the bus. I would have to drive.	3/30/2015 5:23 PM
94	Because there wouldn't be enough stations to get me where I need to go. I would have to fill in what you take away with a car.	3/30/2015 5:14 PM
95	I really want to use light rail, but my house is more than a mile from either light rail station, and I'm going to be a senior citizen by the time all this gets implemented. I still haven't seen good alternatives for feeder routes from light rail to where I live.	3/30/2015 5:10 PM
96	I will lose my most frequently used commute options (522-->545 & 242--> 64) With the elimination of 545 mid-day and 242, I do not see an obvious alternative yet.	3/30/2015 5:07 PM
97	I would benefit from improved access to Seattle Children's Hospital from downtown.	3/30/2015 4:09 PM
98	my transit use is mostly from central Capitol Hill to other destinations. The link is very much further away from me than other routes.	3/30/2015 3:55 PM
99	I'd be impacted by changes to 75 and 65	3/30/2015 3:43 PM
100	Because high frequency service is so much better. I would much rather walk a couple blocks to a line with frequent service than to have infrequent service on so many parallel streets. I should note that I am saying this as someone who lives on 19th Ave, so I would be losing the bus that's right in front of my building, but I would rather just walk to 15th and take the 10 if I knew it came by every 8 minutes.	3/30/2015 3:22 PM
101	get to work on time	3/30/2015 3:14 PM

102	I am healthy enough to walk the extra distance.	3/30/2015 2:41 PM
103	increased service to Children's will make it possible that I can taking the bus willbe as efficient and cheaper than driving	3/30/2015 2:25 PM
104	With any service reduction to my neighborhood, I will consider purchasing a vehicle and driving.	3/30/2015 2:18 PM
105	I exclusively use transit.	3/30/2015 2:18 PM
106	I don't have enough information about the details of "alternative 1," just that some routes will be gone and the remaining ones are more frequent. Not enough to answer these survey questions well.	3/30/2015 12:40 PM
107	It would depend on my work location, family schedule and the number of vehicles we had once service changes went into effect.	3/30/2015 11:45 AM
108	There is currently not a direct route from Kirkland to seattle childrens and currently the travel time with transfers isnt worth the effort. Please consider this direct route!	3/30/2015 11:40 AM
109	I live in Haller Lake and work in south Capitol Hill (First Hill). I usually take the 316 downtown and then walk up the hill. I drive the majority of the time, but do like taking the bus at least once a week.	3/30/2015 11:36 AM
110	It would depend on changes being made to Route 48. The 48 is much faster to the U-District or Roosevelt than taking a bus/light rail downtown and transferring. weekends. Overall, I think the concept could improve travel options in the area.	3/30/2015 10:48 AM
111	More reliable, fast connections between places I most frequently travel. I'd use it for work and for non-work purposes.	3/30/2015 10:44 AM
112	I would ride the bus everyday if I could take a direct route from the eastside to Seattle Children's. Currently I would have to transfer 2-3 times and I can not do that and get to work on time	3/30/2015 10:20 AM
113	I'm more interested in getting from Capitol Hill to Northwest Seattle (Ballard and Greenwood in particular). Most of Alternative 1 discusses NE Seattle. I am interested in Capitol Hill to Seattle Children's. Would use transmit more if this service was improved. But I'm unclear if this is an initiative from what I've read about Alternative 1.	3/30/2015 10:06 AM
114	I always use transit when I can avoid using a car. I would just adapt to any new situation.	3/30/2015 9:58 AM
115	I don't own a car and rely on Metro buses and walking for transportation. I don't know if these changes would increase, or decrease, my use of transit, but it'd make transfers and getting around town a lot easier and quicker for me--and therefore, I'd be a happier citizen.	3/30/2015 9:56 AM
116	No south county connections are being offered	3/30/2015 9:55 AM
117	It will be much more inconvenient without 43	3/30/2015 9:51 AM
118	access	3/30/2015 8:19 AM
119	shorter waits, more direct service	3/30/2015 7:13 AM
120	Poorer local service	3/30/2015 6:53 AM
121	I already use transit nearly wherever possible despite having a car. I think I'd be happier with the improved frequency for alternative 1.	3/30/2015 4:53 AM
122	Easier and more cost-effective means of travel to work	3/30/2015 1:55 AM
123	I am a dedicated transit user and would use it regardless of how well or poorly it was implementd.	3/30/2015 12:22 AM
124	I would still use transit as often, just probably use the connection through to Bellevue now available instead of biking father.	3/29/2015 10:14 PM
125	If the 372 came more frequently throughout the day, I would use it for more than just commuting and use it for errands and social engagements as well.	3/29/2015 10:09 PM
126	Late night service would need to improve for my ridership to be much increased.	3/29/2015 10:05 PM
127	Until the new light rail service is running it seems premature to consider changes to bus routes - even if they supposedly will be improvements. Both systems should be run in tandem until there is clear evidence of the benefit of the new light rail.	3/29/2015 9:20 PM
128	More frequent evening/Sunday service. Easier to get to Link. Better Crosstown service.	3/29/2015 8:55 PM

129	New service route 255 would take me directly from Mary Gates/University Village to the Husky train station and downtown without having to waste time going through the University of Washington. Also route 255 will operate weekdays and weekends.	3/29/2015 5:47 PM
130	I walk or bike almost everywhere. I wouldn't use transit more often, but my route and experience would be different.	3/29/2015 5:35 PM
131	I mostly go east or west rather than north/west which Link would serve.	3/29/2015 5:25 PM
132	I primarily walk and bike to my destinations, so I use transit only when walking and biking aren't feasible. I therefore don't expect to use transit more often to get to N Seattle from the Central Area and Capitol Hill (where I live) - but I do think the transit experience would be better for me when I do use it.	3/29/2015 5:12 PM
133	I might use transit more due to the UW Link Station, but it's unclear since some bus routes would be eliminated	3/29/2015 5:08 PM
134	Not clear the question. I won't send by kids on the bus if it is not non-stop.	3/29/2015 5:03 PM
135	I have to use transit as part of my daily commute and that wouldn't change, even if it was harder for me to get to downtown/Westlake Center.	3/29/2015 4:41 PM
136	I live in Montlake and I would not travel on the bus beyond Northgate.	3/29/2015 4:32 PM
137	Its is better to have more frequent service on fewer corridors even it means more walking. I know that once I make the effort to walk to the bus line IT WILL COME.	3/29/2015 4:31 PM
138	My feet aren't good, and I'd have problems with incr. distance between stops. It is already far between them in many cases.	3/29/2015 4:15 PM
139	I mostly use transit to get to work from Central District to Seattle Children's, with the occasional personal use.	3/29/2015 3:14 PM
140	Again, I live in the Woodland Park/Phinney Ridge neighborhood and can't see how it will help me. I work at Seattle Children's in Laurelhurst and not sure the benefits right now.	3/29/2015 2:55 PM
141	No direct service to University Village from Montlake. No direct service to Group Health from Montlake.	3/29/2015 12:58 PM
142	Having the 16 come every 15 minutes all day long would be really nice; also having a more direct link to 65th east of I-5 would be useful. Right now that area is kind of off-limits by bus, but this would open it up a lot.	3/29/2015 12:57 PM
143	I would have fewer transit options	3/29/2015 11:36 AM
144	There is still no direct connection between Eastlake and Capitol Hill.	3/29/2015 11:31 AM
145	I already walk or use transit in the daytime. With Alternative 1 I would use transit for night-time events downtown, Seattle Center, and University District because of the increased frequency.	3/29/2015 10:55 AM
146	I use transit whenever I can, but the long wait times make some routes non-viable, and create difficulty in planning. Knowing that I could rely on more frequent arrivals even if I miss my initial connection opens many more doors.	3/29/2015 9:58 AM
147	because the bus would arrive more frequently, the every 30 min is so discouraging. if you miss the bus 30 min penalty is bad new	3/28/2015 11:39 PM
148	No direct route to down town. Unable to walk from home to Husky Stadium (elderly). Too many transfers (bus-rail -bus)	3/28/2015 9:15 PM
149	Sounds like you're removing my current route to/from work without offering a better alternative.	3/28/2015 8:17 PM
150	I don't know how route 5 (which is the bus I take) will be affected	3/28/2015 8:13 PM
151	Ease of getting downtown from work; can use transit to get to work	3/28/2015 3:10 PM
152	Bus service would not start early enough for me to get to work on time at UW Medical Center.	3/28/2015 2:35 PM
153	More options to access northerly routes	3/28/2015 1:04 PM
154	The connection between Bryant and Greenlake would allow my family to use transit on the weekends for recreation.	3/28/2015 12:12 PM
155	With this alternative I would beg or borrow money to get my car fixed so I would no longer have to take the Bus. My costs would stay the same but I would have over 600 hours a year in travel time	3/28/2015 12:09 PM
156	Alternative 1 doesn't relate to me.	3/28/2015 11:55 AM

157	I would need to make more transfers than I currently do making it much less convenient	3/28/2015 10:43 AM
158	more convenient!	3/28/2015 9:50 AM
159	Crowding, inconvenience, and tardiness may or may not be improved by juggling route traffic.	3/28/2015 9:47 AM
160	would have to see how far i would need to walk to the new bus stops	3/28/2015 8:42 AM
161	Convenience to/from work to/from my connection to the Univ. district to catch my CT connection	3/28/2015 8:09 AM
162	Transit will take me places better and faster	3/28/2015 7:56 AM
163	Improved access to downtown improves my likelihood to use public transportation to work in slu as well as for access to downtown and stadiums with my family.	3/28/2015 7:31 AM
164	frequency of service, easy access to downtown	3/28/2015 7:01 AM
165	I really don't understand, yet, how future routes/services/schedules, including light rail, will be sufficiently frequent, accessible and convenient to pull me out of my car. My wife and I live at the south end of Ravenna Park, near the corner of Ravenna Avenue NE and NE 54th/55th Sts. I want to be able to use light rail to connect with much of the pubic transit grid, but will need frequent service to a nearby light rail station or the multiple bus routes that serve the U District to make public transit really convenient and workable for me.	3/28/2015 4:46 AM
166	more frequency and less planning to get somewhere would be beneficial.	3/28/2015 1:38 AM
167	Easier to connect to my job at Seattle Children's hospital	3/27/2015 10:49 PM
168	Right now I'm very close to the 43 line, I won't have that any more	3/27/2015 9:09 PM
169	I always take #75 from NE 40th during late night hours, and I will miss the bus if the stop is moved from NE 40th (I barely make it now; it leaves Campus Parkway at 15 min after the hour, and I need to run to NE 40th from NE 45th (**which has NO bus service at the UW nor U Village**)	3/27/2015 6:46 PM
170	I have no choice.	3/27/2015 6:35 PM
171	TRANSIT IS MY PRIMARY MEANS OF TRANSPORTATION, SINCE I DO NOT DRIVE OR HAVE A VEHICLE.	3/27/2015 6:30 PM
172	Sometimes I end up walking between Roosevelt and UW because buses just don't come often enough. If I knew one was always on the way, I would be able to ride more.	3/27/2015 6:29 PM
173	More access to Fremont and Redmond for weekends	3/27/2015 5:27 PM
174	A two-bus-plus-train ride is ridiculous.	3/27/2015 5:07 PM
175	I live in the south end	3/27/2015 4:54 PM
176	I mostly use the 545 in non-peak hours. Alternative 1 cuts this entire route.	3/27/2015 4:44 PM
177	Easier usage	3/27/2015 4:41 PM
178	I live in Magnolia; The problem is limited service from Magnolia, especially on Sundays	3/27/2015 3:36 PM
179	No service from my neighborhood (Montlake) to Capitol Hill, e.g., to Group Health, unless I walk more than a mile to get to the Link Light Rail	3/27/2015 3:35 PM
180	weekend use.	3/27/2015 2:44 PM
181	It will be easier to trade more driving for more "good" transit	3/27/2015 2:43 PM
182	Frequency of service and efficient routes make it more reliable for me to use.	3/27/2015 2:36 PM
183	My primary route (28 or 40) would not affect me as long as service ran as frequently as it does now.	3/27/2015 2:18 PM
184	I do not drive, so I would have to walk a lot more just to get to any bus stop, and then I will have to transfer more than I do now to get most places.	3/27/2015 2:09 PM
185	I don't have a car and need to use transit to get to and from work and to all get to all the places I need to go to.	3/27/2015 2:05 PM
186	It is not clear how the proposed changes will affect the stops nearest me, so I am not sure, but it seems that I might use transit less if some of these changes are implemented.	3/27/2015 2:00 PM
187	I'm already in a location with very little service. Having to walk even further would mean many miles of walking, so I might as well walk the whole way.	3/27/2015 1:53 PM

188	Knowing I wouldn't have to rely as much on a schedule or fear that I would be waiting for a connection for an hour or more.	3/27/2015 1:52 PM
189	Because transit is my only method of transportation available.	3/27/2015 1:49 PM
190	I choose not to have a car.	3/27/2015 1:49 PM
191	i have no choice. I don't own a car	3/27/2015 1:43 PM
192	More frequent service	3/27/2015 1:39 PM
193	I could get to work in Bellevue with a direct connection	3/27/2015 1:32 PM
194	This is SO CONFUSING. I tried to take in the project website and it's just.... where do I start? I couldn't wrap my head around what any of this would actually look like in reality. There's too much to consider. I'm highly skeptical of any plan that results in me having to transfer buses more often, regardless of how often they are supposed to arrive. Have you seen our traffic? One snarl and all those transfers will go right out the window and you'll be left stranded, waiting for who knows how long in some strange part of town that's in between wherever you want to be. At least with being on one bus, I always know where I'm headed and approximately how long it will take me to get there. Not to mention all the buses that simply DON'T STOP at bus stops when they're running late or because they're too full.	3/27/2015 1:31 PM
195	Because it would shorten my commute downtown.	3/27/2015 1:27 PM
196	I work in downtown Seattle, so I don't have other choices.	3/27/2015 1:25 PM
197	372 service on weekends and more frequently during the day	3/27/2015 1:21 PM
198	Right now it's unclear which routes go to the link station versus the vague "U district" as phrased in many places so I would likely be stuck riding around in the UW campus trying to get from my house to the Link station now that I lost my direct routes downtown.	3/27/2015 1:18 PM
199	It would be easier for me to use the 65 271 and 48/49.	3/27/2015 1:16 PM
200	More frequent and reliable service between the areas I travel. Enhanced use of Light Link.	3/27/2015 12:41 PM
201	I don't drive, so I exclusively use transit or walk.	3/27/2015 12:38 PM
202	More frequency	3/27/2015 12:26 PM
203	It would be useful to me to get to work locations	3/27/2015 12:22 PM
204	Because you can not make it harder to take Metro with your "improvements".	3/27/2015 12:18 PM
205	Easier to see friends in North Seattle and to get to bars, clubs, etc. in University District.	3/27/2015 12:17 PM
206	Easier access and convenience	3/27/2015 12:13 PM
207	I would lose my main most used route, which is #25, but I don't know if that means I would use transit more or less.	3/27/2015 12:01 PM
208	Frequent service to UW, UW village, Seattle Children's Hospital, downtown, and Wallingford.	3/27/2015 11:50 AM
209	Reduced transfer times mean shorter trips, making me more likely to see transit is a reliable and fast option.	3/27/2015 11:36 AM
210	Hoping for decreased total commute time once the Link runs from SeaTac to the U-district. It will save what would have had to be a two-leg journey through downtown.	3/27/2015 11:24 AM
211	Right now I'm in Ballard (moving to Tacoma late 2015) but have friends in Wallingford, etc. I'd like to rely on transit over driving but I'm not sure, yet, if this will add considerable time to visiting friends or what it means in the late evening when we are heading home (re availability of night buses and connections to buses to Tacoma).	3/27/2015 11:21 AM
212	enable access to seattle childrens to south seattle after 7:30pm	3/27/2015 11:12 AM
213	It would connect the Eastside directly to Seattle Children's Hospital through Route 255!	3/27/2015 11:07 AM
214	Would use transit all the way to Seattle Children's rather than the employer shuttle	3/27/2015 11:06 AM
215	If where I am going is close, I bike. If it is farther, driving is currently much faster than waiting for and riding on a bus. Increased frequency will reduce wait times. I assume the ride time will increase a bit.	3/27/2015 10:59 AM
216	The 16 in both directions from Green Lake would be significantly more convenient for me. Also the 44 to the U-Link and 542 will be very convenient.	3/27/2015 10:48 AM

217	Main travel routes would be more accessible	3/27/2015 10:33 AM
218	I take transit for every day that I work. I would hope with alternative 1 better service would be provided. I usually catch the bus in the evening rush hour at Montlake and have to wait a significant amount of time and driver refuses to let people board because they are too full. Most waits can be 1/2 hour or more.	3/27/2015 10:24 AM
219	No drop off in downtown commute benefit, but big improvement in descressionary trips.	3/27/2015 10:13 AM
220	I live in Wallingford and Work at 70th and Sandpoint. There is no direct connection currently so usually I have to drive because I do not have and hour to commute everyday using a combination of busses and Seattle Children's shuttles. If the 16 took me to work I would take it regularly.	3/27/2015 10:10 AM
221	I am very dependent on the 43 to go from the U district back to Montlake every night and to get downtown or to n capital hill I am very worried about the change	3/27/2015 10:08 AM
222	My daily commute does not seem to be affected, but other random trips I take during the week and weekend would be -	3/27/2015 10:06 AM
223	It would be easier to bus than to drive.	3/27/2015 9:53 AM
224	I would drive or bike if the bus was going to take longer.	3/27/2015 9:41 AM
225	Easier, faster	3/27/2015 9:30 AM
226	Because I don't commute to downtown, most of my trips are made off peak, and I will never use the link between the U district and downtown.	3/27/2015 9:17 AM
227	In my case I think the transit time would be the same or slightly less if connections to Capitol Hill Light Rail are good.	3/27/2015 9:06 AM
228	better connection times, faster travel in general	3/27/2015 9:01 AM
229	Less wait time	3/27/2015 8:55 AM
230	I vary on how I get around per bus & amount of time I have.	3/27/2015 8:47 AM
231	I would use transit more on the weekends	3/27/2015 8:42 AM
232	use transit almost every day, round trip to and from work at Seattle Childrens. So frequency wouldn't improve, but satisfaction would!	3/27/2015 8:22 AM
233	I use transit for work and appointments. Increase in services would make this more convenient, so could foreseeably not have to drive to make specific appointment times.	3/27/2015 8:18 AM
234	On the days that I don't work in downtown Seattle, I would use transit to get to Seattle Children's and 70th & Sandpoint where my other office is located. The number of transfers and length of time it takes me to get there forces me to make a 50+ mile round trip to drive there today.	3/27/2015 8:15 AM
235	I already use it every day. It would just work better for me.	3/27/2015 8:11 AM
236	Faster and more frequent service to Seattle Childrne's Hospital	3/27/2015 8:08 AM
237	Getting around is difficult without a car. if it were faster/fewer transfers that would be good. Also, the rail would run on electric, better for our air.	3/27/2015 7:57 AM
238	I could get from downtown to seattle childrens hospital.	3/27/2015 7:41 AM
239	It would be easier for me to get to work (Children's) and other north seattle destinations.	3/27/2015 7:41 AM
240	more frequent service makes it more convinient than taking my car.	3/27/2015 7:34 AM
241	Right now my trips to/from the hospital are disjointed and connections are tough. A 2.5-mile trip from Wallingford to Seattle Children's can take me almost an hour via metro. It's faster to walk, and sometimes I just drive because its not as much of a hassle.	3/27/2015 7:17 AM
242	There is no bus service to the hospital before 5:00.	3/27/2015 7:10 AM
243	Better and timely connection to downtown Seattle	3/27/2015 6:57 AM
244	Convenience for work.	3/27/2015 6:53 AM

245	Reliably able to go to and from work at Seattle Children's despite a non-standard end time to my shift.	3/27/2015 6:47 AM
246	Benefits/costs to me specifically aren't clear	3/27/2015 6:43 AM
247	I would have easier access to the places I go. Metro would be going where I go which now is a little piece meal - this will streamline things. Great improvement	3/27/2015 6:43 AM
248	Better access due to connections to light rail.	3/27/2015 6:39 AM
249	Consolidating stops in the University District means that I would continue to feel unsafe bussing to work. I would prefer to bus to work, but walking from The Ave to Roosevelt in the dark winter mornings is unsafe.	3/27/2015 6:32 AM
250	Better access from Greenlake to Seattle Children's Hospital	3/27/2015 3:52 AM
251	Direct bus from Eastside to Seattle Children's Hospital. The current route requires two busses which takes 3 times as long as it should.	3/27/2015 12:14 AM
252	I am not sure how to answer these questions. Metro needs to improve the bus frequency and connections between light rail and buses. In my case I want to get to Children's and with the soon to open light rail stations in UW and U District I could take light rail downtown or to Rainer Ave and get a bus home. But if these buses don't run frequently 7 days a week I end up having to drive to work	3/26/2015 11:41 PM
253	I need to get to work but it would be much faster and safer to get home late at night	3/26/2015 10:55 PM
254	Due the increase of # of transfers required, which is bulky and difficult with bike and tools in my gear.	3/26/2015 10:29 PM
255	More frequent service. More use of aurora instead of dexter or Westlake. More use of express routes to improve travel time and efficiency.	3/26/2015 10:16 PM
256	better connection to the U district	3/26/2015 9:42 PM
257	Having a direct line from the University Station to Seattle Children's would allow me to take transit everyday of the week & after hours more. I work night shift & live in West Seattle. Currently it takes me 3 buses & over 90 mins to use transit to get to work on the weekends. I have to rely on the Seattle Children's Shuttle to use transit during the week.	3/26/2015 9:25 PM
258	Easier to get to work!	3/26/2015 9:11 PM
259	Better frequency and span of service would make it so much easier to get around North Seattle.	3/26/2015 9:00 PM
260	I have a car and could use that if I want. I like to support the use of public transportation, though.	3/26/2015 8:57 PM
261	Peak hours are fine. Would be interesting to see what I would do during the day if I wanted to go downtown, which is typically where I travel on the bus. Hey maybe I'd bike to the U-Link!	3/26/2015 8:38 PM
262	Commute time period (time effective and frequency through the day) would promote me with using transit way more!	3/26/2015 8:32 PM
263	Because it would serve me less than the current Metro service does. If I were to take the proposed Route 75 to downtown, I would have to get off on Stevens Way on the U or W campus, walk 1200 feet to the Link Light Station and then maneuver through the station to get a train to downtown. This is a reduction in the current service I have to get downtown on the 75, which is to transfer at Campus Parkway to several tunnel busses and without a 10 minute walk. *Alternative 1 is not good service for the Route 75.	3/26/2015 7:46 PM
264	I don't go to north seattle	3/26/2015 7:37 PM
265	Right now I work nights/weekends, so my transit ability is garbage. Also, I'm planning on a geographical and career change, so it's hard to say. However, having consistent service makes planning much easier no matter where I end up.	3/26/2015 6:44 PM
266	I might be able to use transit more to travel within the city, but I would likely use it less to commute to and from work, which is a much longer distance, if my daily commute required a transfer	3/26/2015 5:18 PM
267	Increased frequencies would, hopefully, decrease delays in evening commutes	3/26/2015 5:09 PM
268	More attractive than carpooling when it's all day service	3/26/2015 5:05 PM
269	I would commute to seattle children's hospital by link and bus since I wouldn't have to wait so long for a transfer.	3/26/2015 5:05 PM

270	Right now I am using transit for commuting to work that is located downtown. I would transit more if I could as easily reach other areas.	3/26/2015 5:01 PM
271	because I can't get anywhere now without it being a 2 hour trip	3/26/2015 4:51 PM
272	I currently use transit to go almost everywhere and I don't see that Alternative 1 would change that.	3/26/2015 4:47 PM
273	more frequent connection to light rail. In general I am hopeful the light rail will be so convenient that I will be able to use it more. Right now my average one way commute when I use the bus is 2-2 1/2 hours for something that when I drive is averaging 20-30 minutes. This is not sustainable for me.	3/26/2015 4:44 PM
274	Light Rail would add even more convenience.	3/26/2015 4:43 PM
275	Easier access to NE areas and other Seattle neighborhoods (and to SLU). Could help expand housing options for people who work in SLU allowing them to live further north without an extensive commute time	3/26/2015 4:41 PM
276	Believe it would be easier access	3/26/2015 4:38 PM
277	better connections between work and home	3/26/2015 4:35 PM
278	It's not yet clear how it would change my commute options (using the 71, 74 or 76).	3/26/2015 4:35 PM
279	I would be more tempted to use transit on the weekends instead of driving, and during the weekdays when I need to get from downtown to Green Lake and back to Redmond.	3/26/2015 4:26 PM
280	if there were more options and better connections to downtown from Children's Hospital I would use transit more	3/26/2015 4:26 PM
281	Concept would improve time that it takes for my transit from King Street Sounder station to Seattle Children's Hospital.	3/26/2015 4:25 PM
282	I work in the U district and travel through UW and to Children's, would be great to have more options in this area	3/26/2015 3:38 PM
283	more frequent buses may influence me to take the bus rather than drive in the evenings and weekends	3/26/2015 3:34 PM
284	Most of the changes do not appear to affect the routes I currently ride most frequently. My current commute is normally to take either the 26, 28, or 40 from Fremont to 3rd and Pike, and then switch to either the 10, 11, or 49 up to Capitol Hill. As best I can tell, I would basically keep doing that. I am hoping once the subway comes online that I can ride one stop from Capitol Hill to the UW station, and then take some bus from there over to Fremont, and thereby bypass downtown at rush hours. But I am not real familiar with current Fremont -> UW bus routes so it's hard to tell if this will change them a lot for me.	3/26/2015 3:29 PM
285	More direct connections, less transfers. Currently takes me three transfers to get from home to work.	3/26/2015 3:29 PM
286	With frequent service between Ravenna and Capitol Hill, I'd use transit more to get there. Frequent trips to the new UW Husky Stadium light rail station will bring downtown closer, as well as SeaTac airport.	3/26/2015 3:18 PM
287	I take the 5:47AM bus in and that would force me to do the Link transfer in the AM. While I don't know for sure, but I would guess it would add 10 minutes to the commute- which is usually only 20 minutes in total if I drive	3/26/2015 2:58 PM
288	Most of my trips are for special needs transportation coalition meetings from my workplace in Bothell to Puget Sound Regional Council, etc. ST 522 suffices.	3/26/2015 1:24 PM
289	It would eliminate my current route and make it significantly harder for me to get where I need to go.	3/26/2015 1:05 PM
290	More frequent and direct service to get where I want to go. The current 64 and 64X are so slow that I drive to catch different buses, and the 70 buses have crazy detours through the U District. Nothing express about any of the existing options and I have mostly given up on them.	3/26/2015 12:47 PM
291	The public transport system is my primary source of transportation as a student without a car and as such I would still rely on it to get around.	3/26/2015 12:15 PM
292	More options at different times	3/26/2015 12:12 PM
293	Most of the routes I use will not change.	3/26/2015 11:43 AM
294	The convenience	3/26/2015 11:36 AM
295	I would not have to make transfers.	3/26/2015 11:20 AM
296	Better East/West access from Ravenna to Wallingford. Bus access to University Light rail.	3/26/2015 11:20 AM

297	As I previously stated my work day with commute now (and no transfers) is about 11 hours long. I do not wish to increase that time or added stress.	3/26/2015 9:51 AM
298	I would still use it mainly to get to and from work.	3/26/2015 9:26 AM
299	It would be less convenient to travel farther to stops to catch a bus. Walking is time consuming and makes public transit less appealing.	3/26/2015 9:09 AM
300	Just walk to a stop and know another bus is coming along soon.	3/26/2015 8:43 AM
301	I would still have to get to the places I have to get to. It would just be more of a hassle, and probably take longer.	3/26/2015 8:31 AM
302	I could cancel my current carpool from the Mount Lake freeway station to my final destination.	3/26/2015 8:31 AM
303	See previous comment about commuting in from Kent.	3/26/2015 8:06 AM
304	I take the 71 but it will be eliminated. The alternative route 65 is a 10-minute walk uphill and would require a transfer in addition. Taking the car would be much easier.	3/26/2015 8:05 AM
305	Less connections from Shoreline to Sand Point Way, easier to go to all locations from the Sand Point Way down to hubs.	3/26/2015 7:59 AM
306	easier more direct route to work	3/26/2015 7:38 AM
307	More direct access - shorter commute time	3/25/2015 9:55 PM
308	I live so close to the hospital where I go to school that any changes in routes and frequencies won't be that much of an incentive to use transit. I walk and ride my bike as well. However, whenever I have to go to Swedish or Harborview from the U-District, frequent service connecting to the light rail would be really helpful.	3/25/2015 9:10 PM
309	I don't know how route 71 would be modified. Also, what is the plan for connecting to the Roosevelt station? It would require a relatively small modification for the 71 to go there.	3/25/2015 9:07 PM
310	I bike everywhere mostly but on certain days where I need to take public transit to either downtown or to school it might be a pain.	3/25/2015 8:49 PM
311	longer walk to/from the downtown stops, plus all the traffic on Fairview - sorry Amazon, there are still a lot of workers who need to get to the real downtown!	3/25/2015 7:58 PM
312	Not sure how it would affect how many transfers I would need to make to get where I need to go.	3/25/2015 7:16 PM
313	The current set up requires me to change buses adding to my commute time greatly. As a full time working mother I need my commute to be as fast and efficient as possible without a lot of headache of worrying how I can time connection times between two different routes.	3/25/2015 6:31 PM
314	My only way of transport	3/25/2015 5:54 PM
315	Loss of local bus routes on &5th and 80th streets.	3/25/2015 5:26 PM
316	I travel to the U-District frequently, and the frequent bus service from the UW light rail station to The Ave would be great	3/25/2015 4:47 PM
317	Well it would be a lot more convenient. Looking forward to light rail!	3/25/2015 4:46 PM
318	I cannot use 255 any more if Alternative 1 is implemented. Most of other passengers will also not be able to. We usually get off at Yale station.	3/25/2015 4:42 PM
319	more options, convenience and time savings	3/25/2015 4:39 PM
320	Much more convenient to get to other Seattle Children's locations	3/25/2015 4:24 PM
321	I rely entirely on buses/trains to get around	3/25/2015 4:18 PM
322	Projections don't show a major transformation in the way I currently use transit. However, I take transit to work, and any lessening of frequency will affect me adversely.	3/25/2015 4:14 PM
323	The more convenient it is, the more likely I am to use it. Spending an hour waiting for and riding on the bus for a 5 mile commute isn't reasonable.	3/25/2015 4:12 PM
324	I would be able to get to work directly without horribly timed connecting busses/shuttles	3/25/2015 3:47 PM
325	much more feasible to use bus instead of personal auto or vanpool	3/25/2015 3:41 PM

326	I don't have a personal vehicle so buses are still my primary means of transit.	3/25/2015 3:34 PM
327	More access to Seattle Children's Hospital	3/25/2015 3:20 PM
328	more convenient for me	3/25/2015 3:16 PM
329	A commute is a commute!	3/25/2015 3:10 PM
330	Frequency will shorten my trip - current commute time by transit is 75-90 minutes.	3/25/2015 3:05 PM
331	Won't take over an hour to travel what I can drive in 20 minutes	3/25/2015 2:59 PM
332	Already use it a bunch, would be faster and easier however	3/25/2015 2:55 PM
333	I think I would use transit more for weekend trips than I currently do. I can imagine going to Capitol Hill via transit when I usually drive. The 16 could be useful for certain trips that currently I don't consider transit for. Trips to the Eastside would become more palatable as well.	3/25/2015 2:54 PM
334	Currently using a vanpool to get to work but may be changing work situation soon.	3/25/2015 2:52 PM
335	Can read on public transit.	3/25/2015 2:51 PM
336	Better connections for my personal desired routes	3/25/2015 2:51 PM
337	Convinient	3/25/2015 2:50 PM
338	It is more time efficient to get to and from work from kingsgate...with my current bus routes I waste an average of 3.5 hours a day commuting.	3/25/2015 2:48 PM
339	ability to get to meetings over at Seattle Childrens from Bellevue	3/25/2015 2:46 PM
340	I usually bike commute, but when I need to use transit, the 68 is the easiest way for me to get to work from Maple Leaf to Wedgwood. Depending on the reliability of transferring, this may or may not impact whether I use transit or drive if I cannot bike.	3/25/2015 2:31 PM
341	One less car.	3/25/2015 2:27 PM
342	More direct routes.	3/25/2015 2:24 PM
343	Not clear how it would in pact coming from Woodinville	3/25/2015 2:21 PM
344	Would use transit o visit North Seattle	3/25/2015 2:16 PM
345	I could get from home to work in much less time than currently.	3/25/2015 2:13 PM
346	The ability to get directly to Children's hospital	3/25/2015 1:58 PM
347	Better connections around my worksites (Seattle Children's & Downtown). Would like to see better connections between Shoreline and the UW station along the future lightrail corridor. Better to begin building ridership along the north-south route before 2023.	3/25/2015 1:54 PM
348	convenience	3/25/2015 1:51 PM
349	I work in Sand Point and currently the transit, specifically to get to work, can take too long and is too unreliable for me to get there on time. So I don't really count on the transit service to get me to work unless absolutely necessary.	3/25/2015 1:47 PM
350	ability to take light rail to UW, then bus to sand point way	3/25/2015 1:47 PM
351	Improving the frequency of the routes vastly improves the convenience of mass transit. Currently, I have to factor in an onerous amount of extra time or arrange to be taken to a transfer station in order to use mass transit on a regular basis. I used mass transit frequently while living in in NYC and Boston because I knew I could get where I needed to go in a reasonable amount of time. Being able to provide that confidence here is the key to improving ridership.	3/25/2015 1:42 PM
352	I live in downtown Seattle and work at Childrens Hospital.	3/25/2015 1:42 PM
353	If the 255 route was able to take me to Seattle Children's, or even better, up to Sand Point (70th), I would take that more.	3/25/2015 1:30 PM
354	It already is my primary transit means - however I would rely on for hire vehicles less	3/25/2015 1:30 PM
355	More consistent and efficient manner than commuting alone.	3/25/2015 1:29 PM

356	I would be able to get to work from downtown/Cap Hill to Magnuson without the horrible slow and multiple bus scenario there is now. I don't ride this route at all currently.	3/25/2015 1:28 PM
357	It currently takes me 45 min-1 hour on the bus or drive 10 minutes to work. I usually choose drive to save almost 2 hours of my day.	3/25/2015 1:25 PM
358	Ease of commute	3/25/2015 1:23 PM
359	I would not need to change buses to get to Seattle Childrens Hospital for work. The bus change as a mom is very challenging and can be so time consuling making riding the bus stressful at times.	3/25/2015 1:17 PM
360	The buses don't cover a larger geographic area	3/25/2015 1:00 PM
361	It would give me more direct access to the places I want to go	3/25/2015 12:57 PM
362	I currently drive from Wedgwood to Bellevue for work because Transit takes too long. I would love for it to be faster	3/25/2015 12:54 PM
363	because currently I am using car and the toll and have to pay parking; including 3 expenses in addition to gas	3/25/2015 12:54 PM
364	Direct transit from the eastside to Seattle Children's Hospital would be amazing. It usually takes over an hour later in the day to get to an eastside park and ride from Seattle Children's	3/25/2015 12:44 PM
365	It would provide me with a viable alternative to driving alone.	3/25/2015 12:43 PM
366	Right now it would take 3 busses to get from where I live on the Eastside to Seattle Children's Hospital. It is not presently worth the time lost, when it only takes 20 minutes by car.	3/25/2015 12:42 PM
367	If I could take one bus from the eastside to Seattle Children's Hospital, I would always take the bus	3/25/2015 12:38 PM
368	Be easier for me to get between the two Seattle Children's Hostipal locations.	3/25/2015 12:37 PM
369	Currently, takes too much time with very delayed routes for me to get from Issaquah to Seattle Children's HOpsital so I don't take bus. Would LOVE to take the bus if I had a more direct and quicker option.	3/25/2015 12:37 PM
370	Time savings	3/25/2015 12:29 PM
371	Direct route from Kirkland to Seattle Children's Hospital.	3/25/2015 12:29 PM
372	Currently there are too many transfers to get too work and the commute time is as long if not longer than the driving time even in traffic	3/25/2015 12:27 PM
373	Less transfers and time to get to Seattle Children's Hospital - right now there are too many transfers and no direct route.	3/25/2015 12:26 PM
374	Need to walk further to destinations; concern for parking availability.	3/25/2015 11:23 AM
375	More frequent travel opportunities equals faster travel times.	3/25/2015 10:56 AM
376	I don't see myself driving downtown much, given the hassle and cost of parking, so the amount of use on those routes might not change. However, the trip would become much more time consuming and frustrating given those changes. I would almost certainly visit north Seattle (Lake City/Meadowbrook) more often via transit. My father lives there but currently I drive most of the time.	3/25/2015 10:45 AM
377	Higher frequency, more legible routes. Transfers are easier.	3/25/2015 10:43 AM
378	I use the 373 for my daily commute, 10 times a week. I'll probably not be able to use it at all if you change it too drastically.	3/25/2015 9:15 AM
379	The only way that makes it reasonable for me to ride transit and not have to drive a car is having a direct route from downtown Seattle to Redmond/Microsoft. If you take that away and I have to deal with transfers on my commute I may end up having to drive instead. Please don't ruin the public transit I've been relying on for the past 12 years!	3/25/2015 9:06 AM
380	I think I would drive more. It takes me 40 minutes on the bus (252) now. How long will it take to catch a bus at my current stop get off at Evergreen Hospital transit walk to Freeway stop transfer again to link and then walk to work from rail station.	3/25/2015 8:47 AM
381	as explained in 8 above, i would likely avoid the 311 altogether in order to commute to work.	3/25/2015 7:22 AM
382	Would have to use a less convenient bus connection and drive farther to a P&R--South Bellevue instead of South Kirkland.	3/25/2015 6:39 AM

383	Beacuse being able to take one bus to seattle, then take a train (off roads) down to downtown is AMAZING!!!!!!!	3/25/2015 12:26 AM
384	more convenient!	3/24/2015 8:45 PM
385	fewer busses and forced transfer to light rail seem like they will slow me down. Currently my commute is 30m, any transfer at all will slow me down significantly or dramatically increase my likelihood of missing a transfer either due to traffic or a full light-rail-train.	3/24/2015 8:38 PM
386	I use route 542. As a student at the University of Washington, I would be able to use Sound Transit during the mid-day hours and later in the evening. Most of the time, I need to wait for the first 542 bus at around 2:30 pm from the U District, when my classes end at 12:30 pm. Also, occasionally, I need to stay after 6:00 pm and the last 542 is at 6:00 pm from the U District. I really like the idea of having this route available between 11 am - 3 pm hours and later into the evening until at least 9:00 pm. Thank you!	3/24/2015 8:02 PM
387	Transit is how I get around; I need to work with what you provide me.	3/24/2015 7:37 PM
388	My brother lives in Capitol Hill. We could get to U-District quickly.	3/24/2015 7:19 PM
389	Increased frequency of service and more direct routes means that I will ride more and drive less.	3/24/2015 6:00 PM
390	I would have to drive farther, maybe just stop using transit.	3/24/2015 5:46 PM
391	Don't take bus to north seattle, too difficult from the east side	3/24/2015 5:05 PM
392	255 would add weekand & all day service from Kirkland into north Seattle. Now 540 is limited times and 271 no longer possible transfer at Evergreen Pt	3/24/2015 4:46 PM
393	Easy access between UW and Capitol Hill. More frequent bus routes.	3/24/2015 4:31 PM
394	See above. If the choice is to take a long walk to access transit, it would take longer (thus nullifying the benefit of more frequent service) and some cases be impossible due to physical limitations. It would be less safe to take transit at night if it involves a long walk through areas that will be less populated because there are no bus stops.	3/24/2015 4:27 PM
395	faster connection to downtown Seattle	3/24/2015 3:59 PM
396	cheaper	3/24/2015 3:48 PM
397	I'd drive to downtown.	3/24/2015 3:43 PM
398	I am disabled and can not negotiate the hills in Downtown Seattle. I have doctors appointments every week and I use the trolleys. They get me near to my appointments without my having to walk down hills. I would have to drive to the appointments and park in expensive garages. It would add to the pollution by forcing me to drive.	3/24/2015 3:18 PM
399	I'm reliant on transit and can really only take what's offered at this point.	3/24/2015 3:14 PM
400	If Alternative 1 is implemented as the current plan reflects, I won't be able to use transit much at all from where I live (Ravenna area). If a few changes were made I would probably use it the same or even more. Most of the problem NE Seattle's transit network currently has is the infrequent service, especially on weekends (Sundays) and nights.	3/24/2015 1:16 PM
401	Commute to Redmond, downtown on weekends	3/24/2015 1:00 PM
402	The places I go by bus will ALL become less convenient to access due to your proposed service reductions, posing as "efficiencies". Trips will take longer (yes, they will). I'll have to use my car more. My long-standing support for Metro is eroding fast.	3/24/2015 10:49 AM
403	Depending on cost, I may use transit less.	3/24/2015 10:01 AM
404	More frequent and more convenient	3/24/2015 4:39 AM
405	You're eliminating direct service from near my house to Overlake	3/23/2015 10:29 PM
406	I already use transit regularly, I would have to walk less and depend less on schedule.	3/23/2015 9:18 PM
407	My commute would be longer and less convenient using transit.	3/23/2015 5:45 PM
408	I already use it quite a bit, but I do think it would be an improvement.	3/23/2015 3:40 PM
409	Since this option doesn't seem to impact my neighborhood, I don't know how it might impact my use of transit. I currently only can access the network (mostly) by driving to Northgate because the options to my home are limited both in days and times of days.	3/23/2015 2:44 PM

410	Visiting downtown Seattle on weekends would be more difficult and therefore less appealing.	3/23/2015 1:36 PM
411	There would be NO non-transfer service between Wedgwood and downtown due to loss of 71. Route 64 will no longer service downtown, taking away my best and fastest rush-hour option--this is very bad for me. For people like me with physical handicaps having to transfer can be very difficult. Option 1 makes it harder to get to the bus and makes transferring necessary always except for one route at rush hour, which I stopped using because it was perennially quite late.	3/23/2015 1:12 PM
412	I like the idea of busses running more frequently; It makes for a more reliable commute. I am also happy to see more bus routes on Mercer Island, which would make my commute shorter.	3/23/2015 1:05 PM
413	Connections to Husky stadium station	3/23/2015 11:48 AM
414	For extended travel, I have no choice.	3/23/2015 11:25 AM
415	I may use transit less if it is more crowded or less predictable.	3/23/2015 11:01 AM
416	I already use transit regularly as my main commute unless I have to drive in for special occasions.	3/23/2015 10:53 AM
417	Daily use of Magnuson Park (Seattle Waldorf High School)	3/23/2015 10:47 AM
418	Peopole in Wallingford have to change buses to get from Wallingford to the new University Link Station - this is not efficient or time saving in any way! Continue route 44 to the University Link station	3/23/2015 10:40 AM
419	I still need to get to work. But I might be using a faster light rail as opposed to the very time consuming buses.	3/23/2015 10:11 AM
420	Right now I can take a 71, 72, or 73 from 15th Ave NE/NE 65th to downtown Seattle. Routes 71 and 72 are proposed to be deleted. 73 is proposed to be re-routed to Roosevelt Way. Major inconvenience for residents who live east of 15th Ave NE!	3/23/2015 9:41 AM
421	The increased transit time and less convenient options would mean driving is the only feasible option for me the majority of the time.	3/23/2015 8:36 AM
422	I already don't drive (personal decision) and my travel habits likely won't change (going to the same places each week)	3/23/2015 8:23 AM
423	It would make my commute 15 to 20 minutes longer in the morning and 20 to 30 minutes longer in the evenings. My current morning commute is 20 to 25 minutes and the evening is 40 to 60 minutes.	3/23/2015 7:52 AM
424	I prefer fewer transfers and would elect to drive more than have to transfer more when going from Ballard to Redmond.	3/23/2015 7:49 AM
425	Less wait time, more predictable service	3/23/2015 6:36 AM
426	Given that the montlake freeway stop will go away, there would be no practical way for me to continue using transit to the eastside from Bryant. With alternate 1 plan to route 255 to childrens, I can continue to use transit to the eastside, and it will be even better than before, since the downtown link will also be available!	3/22/2015 10:38 PM
427	It's hard to tell from these maps.	3/22/2015 10:06 PM
428	I can't get from downtown to my house in the off hours, so I can't stay downtown after work for shows.	3/22/2015 8:28 PM
429	I already use transit as my primary form of transportation. I think Alternative 1 would greatly increase my ability to get around.	3/22/2015 6:58 PM
430	15 min service on 75 on weekends is great!	3/22/2015 5:31 PM
431	Because I have no alternatives	3/22/2015 5:29 PM
432	I have mobility issues.	3/22/2015 5:08 PM
433	I mostly use 373, and that would not change, but I would not like the options for the 73.	3/22/2015 4:51 PM
434	I would drive more if I could not take a single bus from my home to downtown seattle	3/22/2015 4:50 PM
435	The bus stop has been moved 0.7 miles. I'm not sure if I want to wake up that much earlier to catch the bus or not.	3/22/2015 2:52 PM
436	I don't have a choice.	3/22/2015 2:31 PM

437	If the 65 became (a) reliable and (b) more frequent, I could make meaningful travel plans based on transit - if I have a meeting at UW (where I am a graduate student) I could rely on the potential error margins in a way to simplify planning.	3/22/2015 2:18 PM
438	It is going to eliminate my current bus route straight to UW campus (73). Or else I have to walk a long way to pick up the bus on Roosevelt.	3/22/2015 1:31 PM
439	Will drive	3/22/2015 1:23 PM
440	In most cases, I don't have an alternative to using transit--the routes I use most would likely be eliminated or more crowded, but I would still use them. In some cases, though, I might choose to walk instead.	3/22/2015 12:00 PM
441	My needs for the transit won't change much in terms of going to school, but where otherwise I had to walk to University Way, I might be able to ride a bus there when available.	3/22/2015 11:32 AM
442	No car.	3/22/2015 11:21 AM
443	Because I'd rather drive if the bus services are going to be practically nonexistent.	3/22/2015 3:32 AM
444	I can get downtown or the U District quickly now during off peak times by getting a bus 71 out my front door. I can also get a bus 71 out my front door to Wedgwood by traveling in the opposite direction. I won't be able to do either. I am about to retire and was depending on having the 71!	3/21/2015 10:08 PM
445	Either way, I'd still have to use it frequently to get to school.	3/21/2015 6:31 PM
446	I would be forced to reinstate my license to do food shopping and banking - using a vehicle with a single occupant to do this. I strongly dislike this option for our city on environmental grounds because I will end up driving and have avoided this for years.	3/21/2015 6:17 PM
447	I use transit to commute downtown daily. This would remain the same.	3/21/2015 3:08 PM
448	more or the same	3/21/2015 10:54 AM
449	I wouldn't have to wait as long for a bus and would choose to wait 5-10 minutes instead of using a car2go if the bus is 20 minutes or farther away in order to get to my destination on time.	3/21/2015 6:45 AM
450	Because there's no direct route from Kirkland across to Fremont/Ballard/SPU.	3/21/2015 12:17 AM
451	Depending on how long an Alternative 1 commute from Roosevelt to Eastlake would take, I might end up discontinuing my work in that area.	3/21/2015 12:15 AM
452	I don't have a car and I take Metro buses everywhere. I'm going to have to use them all of the time regardless.	3/20/2015 11:32 PM
453	I use transit to get to work downtown from the u district. Transit would have to become wildly inconvenient for me to not use it, so I am sure I will continue to use it every day.	3/20/2015 9:21 PM
454	I'm carefree, using transit more or less isn't really an option to me.	3/20/2015 8:10 PM
455	I visit my mother in Ravenna, and whether Alt 1 happens or not, transit will not be time competitive with driving from Capitol Hill until North LINK opens. Right now it takes 40 - 50 minutes to get there via walking and bus (via too many mind-numbing possibilities, all equally slow), not including wait times, vs 12 minutes of driving without traffic. With ULink, it will take maybe 30 minutes (CH Link to UW Link then transfer to concept for 25 or 372X to 65th Ave NE + walking to 19th ave NE), which is a HUGE improvement, but still not worth not driving.	3/20/2015 7:55 PM
456	I would be able to have more reliable transit to get to stuff in the U District.	3/20/2015 7:15 PM
457	I live outside the city so I usually inside of Seattle unless I'm downtown	3/20/2015 5:52 PM
458	I can't currently get to north Seattle very often because effective transit times are awful	3/20/2015 5:28 PM
459	I would more likely use transit even over the weekend for the 48/271 line service. It will definitely use more if 48/271 interline service extended to Issaquah TC.	3/20/2015 4:09 PM
460	I typically use transit for my commute, and my commute would be unchanged. However it would be easier to go shopping or go to a doctor's appointment.	3/20/2015 3:21 PM
461	I still need to use transit as i choose to not own a car, however, Alt 1 for routes 31/32 not going the short distance up Stone Way is highly inconvenient. The design notes to use 16 or 26x, however, those do not go to the U District. I believe these buses are still needed to go through Stone and up 40th. Thank you.	3/20/2015 3:12 PM
462	It would be faster for me to get to the light rail.	3/20/2015 3:08 PM

463	I'd bike more; none of the routes I regularly use would be as close to my apartment as they are now. Transfers are a pain, especially when guests are in town and they can't use their bus transfer for the light rail which will now be the main way to get downtown.	3/20/2015 2:49 PM
464	Because I would have to assess how drastically it affects my transit needs. I may end up having to change my schedule completely, or seeking out other modes of transport.	3/20/2015 2:42 PM
465	Traveling further on foot is a significant burden.	3/20/2015 2:35 PM
466	Service would not be as convenient.	3/20/2015 2:28 PM
467	being able to access downtown much quicker would mean I'd be more likely to go downtown in the evening.	3/20/2015 2:13 PM
468	It would have lower latency travel to places that I care about going. I would love it.	3/20/2015 2:02 PM
469	It would show that the planners at Metro and Sound Transit do not care about my transit needs and the transit needs of the community. I am reluctant to give an organization that is diminishing the community money. It seems like rewarding bad behavior.	3/20/2015 1:29 PM
470	I live car-free so my transit use is relatively static.	3/20/2015 1:28 PM
471	Still have to take the bus downtown for work.	3/20/2015 1:26 PM
472	I would come to work earlier and drive my car in.	3/20/2015 1:25 PM
473	Higher frequency, reduced wait times, more predictable, it seems like the bus network would make sense overall and become more of a grid than a wheel and spoke.	3/20/2015 1:21 PM
474	Better connections to more places; more frequency	3/20/2015 11:47 AM
475	Stronger east-west connections, more frequent service, better connections to more distant parts of town.	3/20/2015 11:40 AM
476	Transit would be designed more for people who have cars, and could drive them to the park and ride or bus stop instead of for people who don't have cars. Walks would be far longer, and for much of the year would be in the dark and rain.	3/20/2015 11:04 AM
477	Have to see if the frequency and reliability really happen	3/20/2015 10:48 AM
478	All day connection between the 542 and the 44 would let me ride the bus to work with more confidence. I would use the 16 more from Tangletown to Roosevelt, Fremont, and Dexter.	3/20/2015 8:48 AM
479	Transit would be less expensive than a car but still go to where I need to travel in good amount of time for travel.	3/20/2015 8:42 AM
480	There would no longer be a direct route from my home (Wallingford) to work (North Seattle). I would need to transfer and would most likely choose to drive.	3/20/2015 8:26 AM
481	No Route 43 and no easy alternatives.	3/20/2015 8:19 AM
482	necessity - UW student	3/20/2015 8:10 AM
483	it would be easier to just drive to where I need to go	3/20/2015 7:28 AM
484	My most frequent routes are the 8, 43, and 49. With downtown (Pike/Pine) connections via the 43 and 49 being eliminated (and not easily covered by Link in all cases), I would use transit less often.	3/20/2015 7:26 AM
485	I live in Eastside, and the only real places I can go directly are Redmond, downtown Seattle, and U District. Everything else is too infrequent or out of the way to use	3/19/2015 10:55 PM
486	I would not have a viable alternative to use with Metro. I would most likely be forced to walk a lot more.	3/19/2015 9:49 PM
487	I'm reliant on the bus, so it would not change significantly (though I would perhaps take it more often on weekends with the routes consolidated). But I would be a far happier commuter/bus rider (especially with the 372 improvements towards Woodinville!).	3/19/2015 9:26 PM
488	The routes I use most frequently (17, 18, 44) do not seem to be impacted, but buses I use less frequently might be.	3/19/2015 8:22 PM
489	I would be forced to consider how to get to destinations now served by #30 during the day and may have to resort to the use of a car. Having to transfer buses for so short a ride is maddening.	3/19/2015 8:04 PM
490	I have no idea what I would do. My whole way of getting to work and home would disappear, and I don't have a car or other alternatives.	3/19/2015 7:50 PM

491	If I end up working on the east side it might be useful, otherwise will keep using the same route (40)	3/19/2015 7:48 PM
492	A direct connection between Green Lake and Ballard would make it feasible for me to use transit in situations where I currently need to drive at least once a week.	3/19/2015 7:03 PM
493	Because people would have to walk further to access bus service. This is a hardship on the elderly and disabled.	3/19/2015 6:46 PM
494	The reason I sometimes don't take the bus now is because other methods are faster.	3/19/2015 6:03 PM
495	Frequency of service!!!! The biggest reason we don't use transit more at this time is the infrequent service.	3/19/2015 6:02 PM
496	With the loss of some close service right in my neighborhood, I would use transit less in off peak times and on weekends	3/19/2015 5:47 PM
497	I use transit no matter what, but it would make things much easier for me. Travel times would be significantly decreased	3/19/2015 5:01 PM
498	There will be easier, more reliable access to the areas I want to go, with fewer transfers and less time waiting between them. Presently, only traveling to UW/U district, Seattle Center, and Northgate is easy (via 75/32).	3/19/2015 4:55 PM
499	No good way for me to travel via bus without more service from Crown Hill to Sand Point	3/19/2015 4:42 PM
500	The infrequency of service is a big deterrent for me in taking transit. If I have to wait up to half hour to catch the bus, I might as well ride my bike and I will arrive sooner to my destination	3/19/2015 4:38 PM
501	I will quit using a bus when you eliminate all the buses that I take and force me to make 1 or more transfers. It turns a pleasant 20-30 minute commute with walking into a 45-minute multi-modal transfer in the rain & walk-a-lot tour. This is a terrible awful idea, and should be immediately re-thought.	3/19/2015 3:52 PM
502	I mostly commute from North Everett to the U District. I personally do not bus much to places between those points.	3/19/2015 3:32 PM
503	I don't have a car, cannot afford one, because of disability, and I don't have a job right now.	3/19/2015 3:16 PM
504	Safety.	3/19/2015 3:16 PM
505	I don't want to drive and have to find regular parking in Seattle for my daily commute.	3/19/2015 3:13 PM
506	most likely it would be the same but I might use it more	3/19/2015 3:12 PM
507	Regardless of what changes, I am completely dependent on transit to get around so I can't change how often I use it depending on how "convenient". I have no alternatives.	3/19/2015 3:08 PM
508	Access to reliability and frequency of light rail	3/19/2015 2:56 PM
509	Increased frequency of buses makes using transit a more appealing alternative	3/19/2015 2:37 PM
510	Frequent, easily accessible service to downtown from Magnuson Park	3/19/2015 2:27 PM
511	I ride buses because they're convenient. Consolidation will reduce convenience, and it is the convenience that people need to take buses.	3/19/2015 2:25 PM
512	The improved frequency would lower the opportunity cost of taking a transit trip. Now, for many parts of the day I have to worry about wasting almost an hour waiting for buses round trip, and this would be cut down considerably with near double frequency.	3/19/2015 2:20 PM
513	I don't own a car, so I don't have any other choices if I want to go longer distances.	3/19/2015 2:11 PM
514	because one of the main routes/buses would be deleted.	3/19/2015 1:48 PM
515	I take the bus every day, dislike driving as a single commuter, so I can't really see that changing. I'd just try to figure out a new route that works for me.	3/19/2015 1:05 PM
516	Living in Greenwood, a direct connection to the eastside via a 45/271 through route would make trips to the eastside more reliable.	3/19/2015 12:29 PM
517	It would be easier to get from South Seattle to places in North Seattle with this alternative, because I would be able to take light rail up to the university and then have a shorter, more frequent connection for the last leg. There are many events and activities that I have chosen not to go to in the U-district, Ravenna, and Fremont because of the inconvenient transit trip.	3/19/2015 12:06 PM

518	I would be able to conduct research and academic meetings on the UW campus during the weekends. Currently I do not because the 542 does not run on the weekends.	3/19/2015 11:52 AM
519	I'm moving to south Seattle, but will need to travel through North Seattle to get to Eastside. Any further increase in 545 options will help. Also, I frequently stay in Madison Valley, but it looks like there's not much impact to travel times from there.	3/19/2015 11:14 AM
520	In particular the proposed 16 would provide much needed access east-west from Sand Point to Wedgwood, Roosevelt, Green Lake, Wallingford and Fremont	3/19/2015 11:13 AM
521	It seems more convenient for the area I live in (south Wallingford) and the service around the U District sounds like it would be much improved (where I work).	3/19/2015 11:01 AM
522	Until it is certain that # 16 will still serve Meridian at Northgate Way I am not sure what my use would be. I have two reasons to get to that intersection, and prefer doing it without a transfer.	3/19/2015 10:59 AM
523	Infrequency of service is a huge deterrent to public transit, especially when transfers are involved. Increasing frequency would provide confidence that I could arrive to my destinations on time.	3/19/2015 10:47 AM
524	It would be great to go direct from Capital Hill Light Rail to New Holly.Rainier Valley via SeaTac Light Rail going South	3/19/2015 10:37 AM
525	I work at UWMC. The improvements on that route is great. If I use the bus to get to work, I often want to get somewhere else and be able to get home. Having improved travel to Capitol Hill, downtown, and South Lake Union is very important.	3/19/2015 10:27 AM
526	I only go to north seattle to visit friends, but it would be easier, safer, and more convenient to go with these changes.	3/19/2015 10:22 AM
527	Because you're continuing to ignore Ballard, where I live. Why not just have the Sounder stop near the intersection of NW 57th St and 37th PI NW? There's a ton of empty space all around the rail line to build a bus turnaround, bus stops, and even a parking lot. A frequent Ballard bus loop could easily be made to go right past there, Golden Gardens, downtown Ballard/hospitals, Ballard Senior Center, Ballard Locks, and anyplace nearby with a large park and ride, etc.	3/19/2015 10:18 AM
528	Seattle is growing at such a fast rate and yet our public transportation falls behind most other major cities in the country. Buses and the light rail need to complement each other in order for people to use them. I think having the light rail and bus service at the same time would actually make public transportation in this city an actual option for people to get around. By cutting bus service to not duplicate routes, seems counterintuitive since the light rail stations, at least for the next few years will be somewhat few and far between. Public transportation needs to give people a solid option to go to and from work but also to be able to travel and access the rest of the city with ease. I am not sure that Alternative 1 brings us very close to that plan. Though faster commute times, which is great, it does seem to keep the status quo going.	3/19/2015 10:17 AM
529	There would be more locations that I could get to without long waits.	3/19/2015 10:06 AM
530	I hardly travel to North Seattle, mostly bc there isn't easy transit.	3/19/2015 10:03 AM
531	It's too far to walk to Roosevelt or the Northgate Transit Center. I often use the 66/67 to get to the U-District or the Northgate Transit Center. I live west of 5th Ave NE and have had four hip replacements, so I need to have bus service close to me. Not everyone can walk half a mile to a mile to get to a bus stop.	3/19/2015 10:01 AM
532	I use it very frequently already. This would definitely improve my travel time, though, so I'll be happier to do so.	3/19/2015 9:39 AM
533	I primarily will be using it to commute to and from work.	3/19/2015 9:23 AM
534	I am not as affected by service changes to North Seattle based on my home location.	3/19/2015 8:55 AM
535	Maybe a little more, but does not address the travel I am most likely to do.	3/19/2015 8:46 AM
536	Why bother? Its not there for me. I could walk the whole way as fast and that's going to be ugly at 6 am in the winter.	3/19/2015 8:38 AM
537	I still need it to get to work. Some places would be easier to access, which is nice, but other places closer to me would take multiple transfers, which is concerning on the weekends with the possibility of longer wait times.	3/19/2015 7:46 AM
538	There's nothing I can do about it, if Alt. 1 was implemented. I still need to get to school. It's just going to take longer and be more difficult if this happens.	3/19/2015 2:08 AM
539	Still need to use transit to get to work in U district	3/18/2015 10:46 PM

540	I still need more info on both alternative sides.	3/18/2015 10:23 PM
541	I do not know the Alternative 1 concept in north Seattle	3/18/2015 10:14 PM
542	Right now I don't visit friends in NE Seattle at all unless I can get a ride one direction. It just takes so long now to get there from capitol hill.	3/18/2015 9:56 PM
543	This is a terrible idea. For anyone living in North Capitol Hill more than five minutes walk from the Broadway and John light rail station, this will mean longer commute times to the University District. I make this commute every single day. These buses are full every day, and most travelers from the UW to Capitol Hill get off the 43 more than 5 minutes walk before Broadway and John. Moreover, the walk from the UW light rail station will add an additional five minutes to my journey. I estimate that my daily commute from my house (16th and Republican) on the light rail will be 20 minutes LONGER than it currently is using the #43. This is not public transportation progress. It is a light rail boondoggle. Sincerely Robert Wood Professor, University of Washington PS. The same thing happened with bus route 194 which reliably took passengers from downtown Seattle to the airport in 30 minutes until it was cancelled because of the light rail. The trip now takes 40-45 minutes on light rail. Is this progress? The idea is that new transit systems augment the public transportation system, not replace existing components.	3/18/2015 8:54 PM
544	There are many concerns for citizens of the suburbs that are not addressed here. I live in Kenmore, where we already are running out of park and ride spaces, driving some of my neighbors to abandon riding the bus and return to driving a car.	3/18/2015 8:44 PM
545	N/A	3/18/2015 8:09 PM
546	depending on cost, I may use it slightly more and feel more confident that I could get farther afield and home again without getting stranded in a long wait or a confusing transfer.	3/18/2015 8:09 PM
547	I avoid using the bus at times due to too low frequency of service. After 8pm, I cannot wait one hour for the bus	3/18/2015 8:07 PM
548	Because I have chosen not to have a car and travel only with transit	3/18/2015 7:40 PM
549	I don't own a car, so I don't have an alternative.	3/18/2015 7:17 PM
550	Unclear where new stops will be relative to my home and work. Not clear how much longer wait times will be. If weekend service waits are 1 hour or more, I would use transit less.	3/18/2015 7:09 PM
551	Doesn't seem like it will make it any easier to access North Seattle neighborhoods from Southside	3/18/2015 6:42 PM
552	I'm a commuter	3/18/2015 5:20 PM
553	The truly awful service by the 48 during evening rush hour has pushed me onto a bike. I don't know whether I'll go back to being a full-time bus rider if that route improves. Now, it can take 1.5 hours door-to-door from UWMC to NW15th & 85th. I can bike it in less than half that time. The bus would have to do at least as well.	3/18/2015 5:08 PM
554	Higher frequency connections between regions.	3/18/2015 4:52 PM
555	With more frequent bus service to Bryant and a fast light rail from UW to downtown, I would have multiple fast options for commuting to work. I need to get between Bryant, UW, and Belltown. The more options I have for faster and more frequent service between these three locations, the more I will be able to use public service.	3/18/2015 4:37 PM
556	I don't live in North Seattle. However, I might in the future.	3/18/2015 4:17 PM
557	100% of my travel is on transit. Can't get any higher than that!	3/18/2015 4:12 PM
558	i can buy less gasoline, don't have to worry about paying for parking or be stuck in traffic, bus/link more reliable and more service gives me options and not worry if the bus will stop service at a certain time.	3/18/2015 3:45 PM
559	I could get both downtown and to Fremont faster, as well as to the International District. This really appeals to me	3/18/2015 3:39 PM
560	The service would suit me better	3/18/2015 3:37 PM
561	I will have to wait and see.	3/18/2015 3:31 PM
562	as stated above I would be able to walk faster.	3/18/2015 3:30 PM
563	mobility restrictions limit access with fewer access points	3/18/2015 3:29 PM
564	I already use transit for most all of my travel	3/18/2015 3:17 PM
565	I love riding the bus.	3/18/2015 3:13 PM

566	I wouldn't try avoiding those areas because of access. Currently it's easier but more costly to rent a car2go to reach areas in the north east, especially Seattle Children's Hospital.	3/18/2015 3:03 PM
567	I don't have a choice, we can't afford parking. And I do have ethical feelings of reducing our impact on the land and on traffic, so I'd prefer the bus. That said, if the current routes between Lake City Way and SLU become more frequent and more direct, Alternative 1 may end up being better.	3/18/2015 2:44 PM
568	The added commute stops and transfers would make me drive. This plan would only be feasible if the link actually had an east link up and running in place of the direct bus.	3/18/2015 2:43 PM
569	It would be more difficult to get between downtown & my home in Maple Leaf during non-peak times.	3/18/2015 2:37 PM
570	I dislike transferring the most, especially if the 2nd bus I need comes less frequently such that being late on the first bus means I have to wait 30 or more minutes for the next 2nd bus.	3/18/2015 2:24 PM
571	It would encourage me to travel north more often	3/18/2015 2:23 PM
572	Assuming the P&R at Greenlake would still be there, this gives me safe & predictable travel to & from my job @ UWMC. I like having my bus pass and can use it for travel other than going to work.	3/18/2015 2:18 PM
573	The routes I usually use won't be affected much.	3/18/2015 2:17 PM
574	I ride the bus to work. this is not likely to change. It worries me that this ride will get more painful with your proposed changes.	3/18/2015 2:02 PM
575	Reduction in service between home and work.	3/18/2015 2:00 PM
576	Currently, there is no direct route from where I live in Meadowbrook/Lake City way to South Lake Union.	3/18/2015 1:52 PM
577	If I missed a 373, I might drive to work in the University District rather than wait another 30+ minutes since the 373 is often late.	3/18/2015 1:51 PM
578	I ride the 372 most of the time and there does not seem to be any difference between the two alternatives with regards to the schedule of 372	3/18/2015 1:49 PM
579	I have to take the bus to work, regardless of whether the service is good.	3/18/2015 1:42 PM
580	I might end up driving my car to a park and ride and then taking the bus, not sure. Depends where I want to go.	3/18/2015 1:39 PM
581	Right now transit is too inconsistent, it's confusing figuring out what time and location to catch a bus, and when you do finally catch one, it's too full to get on. I think consolidating routes to run more frequently from centralized locations would help all of those things, and make me more apt to take the bus instead of drive.	3/18/2015 1:37 PM
582	I wouldn't need to ride my bike as much on the weekends and late at night.	3/18/2015 1:35 PM
583	the bus services are either gone or so low that is no longer possible to use.	3/18/2015 1:32 PM
584	Eliminating the 73 would increase my commute by having to add a transfer. I would be immediately cut off from access. The other buses that run by my house are already limited. 77 is only peak and the 347/348 stop at Northgate. Using the bus to get downtown or anywhere south of Northgate would no longer be convenient outside of commute hours and the 77 would get over filled now that there is only 1 bus going downtown during those time.	3/18/2015 1:24 PM
585	Most of my travel is to and from school or work. Regardless of changes, since I have no other means of transit, I would have to continue using transit. If traveling to Fremont/Ballard and Downtown was faster on the weekend, I might use transit to travel more.	3/18/2015 1:23 PM
586	I use 271 & 556 routes to go between UWMC and Issaquah, NOT north Seattle. I use 271 most because of frequency of buses. 556 route is faster but not available during complete commuting hours. Park & rides are full in Bellevue and Eastgate, making my commute very logistically challenging. I'm happy to walk, bike to make connections to light rail or bus. I just need better parking, more frequent direct routes similar to 556.	3/18/2015 1:21 PM
587	I currently live downtown and commute via the 71X, 72x, OR 73x. But I am moving to Ballard and I am concerned about the East-West routes (e.g. 44) which tend to get very crowded and frequently run late. I am hopeful that improved connections between Ballard and the U-district will make riding the bus feasible. If I misunderstood and this is not part of the plan, please consider making it part of the plan. This is a major need for a lot of people.	3/18/2015 1:20 PM
588	more frequent trips to transit centers and downtown seattle	3/18/2015 1:19 PM
589	Some weekend services up to at least Lake City would be helpful because then I could hop on 522 from there.	3/18/2015 1:18 PM

590	I don't live in North Seattle. Maybe some weekend, weekday night trips would be easier, but it's hard to say without you telling me EXACTLY what changes you are making to which lines	3/18/2015 1:16 PM
591	My staff and I would all benefit from being able to get to Childrens from UWMC for meetings, and to the Eastside to commute to UWMC, and between Roosevelt Clinic and Northgate and UWMC.	3/18/2015 1:12 PM
592	my 49 route is not affected	3/18/2015 1:09 PM
593	One thing that stops me is the frequency of service. If I did not have to worry about that I would use it more.	3/18/2015 1:00 PM
594	I ride the bus regardless. The Link isn't going to improve my commute home until a station opens in Northgate. It seems that Alternative 1 may improve my transit time on the current 48/5 connections, and reduce my 1-hour commute for 5 miles to, hopefully, 35-40 minutes.	3/18/2015 12:48 PM
595	i already use transit at least 2x per day. i would use it the same amount UNLESS my commute time is increased.	3/18/2015 12:46 PM
596	I still have to get to where I need to be, even if you don't change anything or change it all because I do not have a car	3/18/2015 12:46 PM
597	I live in South Seattle.	3/18/2015 12:42 PM
598	I use the bus for certain weekly activities, which will not change.	3/18/2015 12:39 PM
599	I use public transit for my travel within Seattle almost exclusively. I would expect greater frequency and consolidation to improve service.	3/18/2015 12:26 PM
600	I would probably use transit more frequently between the U-District and Fremont instead of walking. I would have loved to have more direct service between Northgate and Greenlake back when I lived in Greenlake (I just moved to Issaquah).	3/18/2015 12:24 PM
601	I want to use transit to get to the airport efficiently from NE Seattle and from the U. district.	3/18/2015 12:20 PM
602	More frequent buses to areas I visit regularly (currently via car). I prefer to use the bus when drinking or shopping in some of these locations vs. parking and dealing with my vehicle.	3/18/2015 12:19 PM
603	It's unclear what impact it would have on my region (Lake Forest Park)	3/18/2015 12:17 PM
604	The more frequent rides to and from Lake City would be amazing! It would make running home between classes or finding the right time to catch a bus much easier.	3/18/2015 12:16 PM
605	I currently end up walking most of the way from Ravenna to Greenlake and back because the routes are infrequent and don't line up well. The new 16 and 45 routes seem like they'll be more convenient.	3/18/2015 12:14 PM
606	Even going downtown on the 16 would be bad. 16 is slow. Connecting to Link Rail downtown would take longer than the pretty good 71 service I have now. Poor connections to UW Link See my question 7 comments above.	3/18/2015 12:10 PM
607	I see nothing that improves the East/West travel in and out of Ballard. I want to use transit, but I can't justify the additional time away from my child.	3/18/2015 12:07 PM
608	Car travel would be more efficient to counteract walking time.	3/18/2015 12:07 PM
609	I don't know how this plan would affect my personal commuter bus route, so I can't tell you if it's better or worse.	3/18/2015 12:07 PM
610	The E-line concept has revolutionized mass transit for me. A Chicago native who LOVES elevated trains every 10-15 minutes..all I need to do is get to the platform. Same is true for E-Line here. Not as good as a train but always there. I don't have to worry or wait. If other buses have similar frequent schedules in set routes instituted it would be excellent.	3/18/2015 12:06 PM
611	Wait time would go down. I would be able to get places quicker and easier than driving.	3/18/2015 12:06 PM
612	A great connection from Link/UW Station to the 65 will make Link very usable for me. Connections to Green Lake and Magnuson Park along 65th on the proposed 16 is something we have wanted for a long time.	3/18/2015 12:05 PM
613	Transit is my only alternative. Your plans both make my commute worse.	3/18/2015 12:02 PM
614	Because of route 372 going to the UW on weekends.	3/18/2015 12:01 PM
615	I don't have a car, so I need to use transit regardless.	3/18/2015 12:00 PM
616	I currently visit friends on Capitol Hill, and this would make the travel easier.	3/18/2015 11:59 AM
617	Depends on how it affects my particular route.	3/18/2015 11:56 AM

618	Well I still have to go work and all... but probably thinking about biking/carpool now more if I have to walk too much.	3/18/2015 11:55 AM
619	I do not know how often my usage of transit would adapt. Since I do not own a car, I would adapt if I need to go somewhere in NE Seattle.	3/18/2015 11:55 AM
620	It would be more dependable.	3/18/2015 11:53 AM
621	that is my only mode of transportation	3/18/2015 11:53 AM
622	I am a medical professional and need to be able to routinely and predictably get to work at any time of the day. By implementing these changes you will have cut off my access to the majority of the routes that I currently use to get to work.	3/18/2015 11:52 AM
623	So long as routes are not deleted, this would not impact the number of times per week I use the bus.	3/18/2015 11:50 AM
624	49 is unchanged from between U-district and Capitol Hill.	3/18/2015 11:49 AM
625	I would probably use transit the same, but it would be less convenient and most likely increase transit time since I would have to wait for multiple buses instead of taking just one.	3/18/2015 11:48 AM
626	It would be easier to get from Ballard to Cap Hill.	3/18/2015 11:47 AM
627	I will continue to use transit to travel from my home in Bellevue to school at the University of Washington because it is easier, faster, and cheaper than driving.	3/18/2015 11:47 AM
628	right now it is convenient to take route 73 from 135th ave ne and 15th ave ne to the U district oehr wise I have ti take two busses	3/18/2015 11:46 AM
629	better and faster connections to where i want to go. later service back to Crown Hill from U District allows me to Link from other areas in city to U District, as well as evenings in the U District, and single seat home from there in the evening.	3/18/2015 11:45 AM
630	With more bus frequency, the bus wouldn't be as crowded and I wouldn't need to adjust my work schedule to guarantee I get a seat on the bus.	3/18/2015 11:45 AM
631	I don't have much of a choice since I don't drive, but I might have to start driving if I have a choice between that and going through high-crime areas in the dark!	3/18/2015 11:40 AM
632	I bus-commute every weekday, and into the UDistrict at least on weekends - my aversion to attempting to find parking won't change, just the timing and route.	3/18/2015 11:39 AM
633	Less coverage of Portage Bay	3/18/2015 11:39 AM
634	66/67 are less convenient	3/18/2015 11:38 AM
635	Current routes are not impacted by any of the changes, back-up / inability of route 316 to show up on time after about 5:30 pm.	3/18/2015 11:36 AM
636	I take the Water Taxi from Vashon Island to downtown and board the bus at Pioneer Square. Since the water taxi is only once per hour, I don't know if it would still be possible to get to work at 45th Ave NE and Brooklyn efficiently with the proposed cuts to direct bus service.	3/18/2015 11:35 AM
637	I prefer to commute to work via public transportation and there are few alternatives.	3/18/2015 11:34 AM
638	As long as the revised route 26x was implemented, I would simply switch routes to get to Northgate.	3/18/2015 11:34 AM
639	Because I would not have a reliable option to make the Sounder Southline train on time in order to pick up my child from care. That would put me in an impossible situation and would probably force me to drive rather than take transit.	3/18/2015 11:32 AM
640	Elimination of the 43 and 49 removes all bussing options for me and would significantly increase my commute time. The only other option for me is light rail, which is almost a 15 minute walk from my home and would still require a transfer to a bus. Being able to sit through a single longer bus ride (the 43) is much preferable to long walks and increased transfers.	3/18/2015 11:31 AM
641	Currently live in Magnolia. Will take Route 24 to downtown, and Link Light Rail to UW. Travel time may be same, but no hassle of waiting 30 mins for the next bus like I currently do for Route 31.	3/18/2015 11:31 AM
642	because it would be harder to get to the stops I need because they are father away	3/18/2015 11:31 AM
643	As long as there is stop somewhere within 3 blocks of Jackson Park I will continue using transit the same.	3/18/2015 11:30 AM

644	Because the 28 has been cut to run only 2hours during rush hour each way. For those of us with alternative schedules, (I get off work at 2pm) to get home from the U, it takes 1 hour 20 minutes. What a ridiculous waste of my time.	3/18/2015 11:29 AM
645	I don't see the routes being any faster.	3/18/2015 11:28 AM
646	Less time between transfers and more direct routes.	3/18/2015 11:28 AM
647	I mostly walk to work at UW	3/18/2015 11:27 AM
648	Still services my main commute route (Greenwood to UW)	3/18/2015 11:25 AM
649	I don't own a car so I'd have no choice but to use transit the same amount, but with Alternative 1 I'd be forced to make connections or take several routes (the 48 connecting to the 8, or the 10 to connect to LINK) rather than just take one bus 43 to and from work.	3/18/2015 11:25 AM
650	My travel time would be increased and I would have far fewer options.	3/18/2015 11:25 AM
651	I live in North Greenwood and work at the UW on the south part of campus. My two main commute paths are driving to 92nd and 5th Ave (since there is limited parking at Northgate, I seek street parking) and taking the 67 or 66X; or I take the 355 to the UW and either take the 67 home and walk or go downtown and take the 5 or the 41 home. I am not certain if the additional frequency of the 67 will overcome having to drive further to get to the bus line.	3/18/2015 11:24 AM
652	I have efficient transit now. However, for my irregular trips to Redmond or Seatac airport it would be better.	3/18/2015 11:24 AM
653	Possibility for more direct routes to places I need to go.	3/18/2015 11:24 AM
654	Please see comment above	3/18/2015 11:24 AM
655	Likely more direct connections with Greenlake. Would be great to have more frequent/all day service between greenlake and Northwest Medical Center (115th).	3/18/2015 11:23 AM
656	I would make the same number of trips, but my travel times would be reduced.	3/18/2015 11:22 AM
657	Faster connection to downtown from Wallingford	3/18/2015 11:22 AM
658	lack of clarity; too many details without sufficient explanation	3/18/2015 11:21 AM
659	I currently use for my daily commute and this alternative would allow me to easily continue that.	3/18/2015 11:20 AM
660	It depends on whether the bus stop closest to NE 75th St would move, and if route 75 would go directly to the link light rail station at Husky stadium. Right now I drive, because to get from NE 75th and sand point to SLU would take bus 75, then a transfer at UW to a SLU shuttle - for a total of 1 1/2 hrs, while driving takes 20 minutes. If my commute time on bus/light rail would reduce significantly, I would consider not driving.	3/18/2015 11:19 AM
661	Alternative 1 gives better transit options to U-district during weekends.	3/18/2015 11:19 AM
662	Transit is my main choice for commuting from south King County. I really hope that implementing this new option will greatly reduce the huge variability of getting from the U District to the Transit Tunnel.	3/18/2015 11:17 AM
663	Wouldn't have to rely on Car2go for infrequent bus times currently in place now.	3/18/2015 11:16 AM
664	I do not plan on living in North Seattle	3/18/2015 11:15 AM
665	Because it doesn't seem to affect me that much since I don't use transit.	3/18/2015 11:13 AM
666	unsafe to walk at night	3/18/2015 11:12 AM
667	Easier commute. Prefer to bus vs drive.	3/18/2015 11:10 AM
668	I don't own a car, and for the most part am reliant on public transit to get around town.	3/18/2015 11:03 AM
669	Because right now it's convenient, and with your change, it becomes a huge pain in the ass.	3/18/2015 10:53 AM
670	I might use transit more if the frequency of service works out for the routes that I take. More frequent buses and reduced waiting time/uncertainty about when the bus will come is attractive to me and I'm willing to walk further for that. We also live near the intersection of 65th and 35th, which I assume will give us options. However, I don't know enough about how the schedules and routes will play out.	3/18/2015 10:47 AM

671	I rely on the 71-73 service to get from the north U District to work every day. Husky Stadium service won't help me as it's too far to walk and I'm concerned adding an additional transfer will just further elongate and complicate my commute.	3/18/2015 10:07 AM
672	I like transit, and it sounds like this will improve connections. My least favorite thing about transit is missing connections, and I don't mind having to walk a little farther to get to transit if it means transfers will be more seamless. I'm also strongly in favor of consistent, reliable service, which is especially a problem with the 43/48 coming down 23rd. There have been times when I've seen 5 or 6 in a pack going while waiting for the light to change so I could cross to the stop. And then--- no bus for 20-30 minutes.	3/18/2015 9:59 AM
673	Part of why I don't use transit often is because the bus I currently take gets stuck in a lot of traffic (the 8) so it's faster to walk. but I'm considering moving to ballard, and am not sure how I would be affected. Hopefully you are doing something to try and re-route buses that get caught in constant traffic jams.	3/18/2015 9:56 AM
674	I would take transit to the Husky Stadium Light Rail Station.	3/18/2015 8:34 AM
675	much better grid and frequency	3/18/2015 1:19 AM
676	I do not use a car to travel around Seattle, but would enjoy faster service and going to businesses in U District more often	3/18/2015 1:05 AM
677	I would rather take a taxi than have to walk 1/2 mile uphill to reach the Capitol Hill station from where I live. Slashing bus service along the Pike/Pine corridor IS NOT THE ANSWER!	3/18/2015 12:16 AM
678	Frequency of service is the most important thing for me. I don't mind making a transfer (as I would need to do to get from my home in Bryant to work in the U District) if there is not much of a wait time. The benefits of a good, frequent grid system by far outweighs any disadvantages of changes made under Alternative 1.	3/17/2015 10:37 PM
679	Increased frequency of routes that I take. Wallingford to Ballard, cap hill, Fremont.	3/17/2015 9:30 PM
680	Loss of direct access downtown and to SLU mid-day is problematic	3/17/2015 7:47 PM
681	See number 8 above!	3/17/2015 7:15 PM
682	You eliminate Route 71 (what a dumb idea!) and I will drive more places that I don't drive to now because I can take the bus. You destroyed Route 30 when you first 1) stopped it from going to Fremont and Seattle Center (I used it all the time then) and second 2) made it a commuter route. I have to drive to the places that I took the bus to when you did both those things. It's sad to say, but bus service was better 30 years ago in my neighborhood.	3/17/2015 7:10 PM
683	Currently difficult to get to other N seattle neighborhoods from U District.	3/17/2015 6:09 PM
684	I don't travel much to those neighborhoods, so the impact on me personally is uncertain.	3/17/2015 6:00 PM
685	The routes I travel most commonly (I live at the north end of Broadway on Capitol Hill and work downtown) will not be changed much, if at all, but areas I travel less frequently to (Green Lake, Phinney, Ballard) would be more convenient to get to.	3/17/2015 5:43 PM
686	reduced service from U District to Bryant & View Ridge; would need to figure out new navigation between U Village and ~S. Roosevelt (currently use 68->67)	3/17/2015 5:37 PM
687	I only travel on transit in that area infrequently, so I would expect to work around any inconveniences since making things easier for me is not the target.	3/17/2015 4:43 PM
688	Better NW to NE connection. And more frequent bus servcie on Sand Point Way	3/17/2015 3:58 PM
689	I still have to get to and from work and can't afford a car. I'll just be forced to walk 30 minutes out of my way to the closest 372 stop and 30 minutes up hill getting home from work. I'll be annoyed, but not much I can do about it without more money. Such a change would make me consider if it might be worth finally getting a car.	3/17/2015 3:35 PM
690	Currently I travel from Northgate Way along Roosevelt, and the delay I have to experience to get all the way down Roosevelt is inconvenient. I often have to take the 68 (which comes infrequently) to 80th, and then wait for a 66 or 67 to go the rest of the way along Roosevelt. Alternatively, I could walk up to 15th and take the 73, but the walk is longer to get there from where I live on Northgate Way & Roosevelt.	3/17/2015 2:28 PM
691	I could make more connections to get where I need to go.	3/17/2015 2:23 PM
692	My primary route from home to work would not be available during the hours I typically ride the bus (btw 9a and 11a). A transfer makes the trip too long and cumbersome.	3/17/2015 2:15 PM
693	The relatively direct connection to UW (and the light rail station) is balanced for me by the extra transfer required (31 or 32 to 16) to take the bus from Wallingford to downtown (as can be done today with the 26).	3/17/2015 1:34 PM

694	The 65 buses are too far apart to be convenient now. I would start to use it (and get quick access to the light rail) if the busses came more frequently	3/17/2015 1:19 PM
695	I would stop using transit because I would need to walk several blocks and transfer to three different routes to replace the existing service that would be lost.	3/17/2015 1:01 PM
696	I depend on transit for almost all of my transportation needs, and I would continue to do so.	3/17/2015 11:53 AM
697	It currently takes an hour to get from my home to downtown via transit. Alt 1 would make transit time-competitive with driving--and frequently faster.	3/17/2015 11:38 AM
698	I rarely have reason to travel to this area of the city--so my general pattern would remain the same. However, I would be more likely to considering traveling to something in this region or using transit if I have to travel to this area with the greater frequency of service.	3/17/2015 10:47 AM
699	I already use the transit every day. I would continue to do so.	3/17/2015 10:20 AM
700	The more I can use the light rail the more I can depend on transit. Light rail has the right-of-way buses don't so they aren't affected by traffic. Once lightrail starts from Northgate I plan on dropping buses all together and going only light rail	3/17/2015 9:33 AM
701	I am committed to using transit. Although alternative 1 would make my commute more inconvenient, I'll continue taking transit to/from work.	3/17/2015 8:28 AM
702	More frequent and more direct routes from where I live to where I want to go.	3/17/2015 8:05 AM
703	Less wait with transfers, more availability, the more incentive there is to use public transit.	3/17/2015 7:07 AM
704	My primary mode of getting around is walking - to work, to the store, to the gym, etc - so I only take transit when I want to go to other neighborhoods. Alternative 1 puts so many more neighborhoods within easy reach and makes it so much faster/more convenient (overall) to get to them.	3/17/2015 1:21 AM
705	I need to get to work. Right now I can take the 545 and it takes me directly there. Sometimes I need to stay late at work. Sometimes I need to leave late. This would completely screw things up if off-peak hour transit is taken away.	3/17/2015 12:07 AM
706	my bus would be eliminated. I would need to walk 1 mile to the closest bus, or drive and leave my car. i'd probably end up driving to work instead	3/16/2015 10:57 PM
707	I'm not going to be able to use transit if it adds so much extra time to my commute.	3/16/2015 10:55 PM
708	Because I have no desire to walk at least 5 minutes on the UW Campus because I am losing my direct service to downtown with the elimination of route 72.	3/16/2015 9:54 PM
709	It would be easier for me to get to Capital Hill and UW from Ballard.	3/16/2015 9:31 PM
710	Depends on what remains for Eastlake.	3/16/2015 8:48 PM
711	Need to take the bus to get to work, and often other places, often. Hopefully, this would make it faster.	3/16/2015 8:12 PM
712	committed to supporting transit	3/16/2015 6:10 PM
713	I'd have to do some "trial runs" to see how it worked for how I currently use Metro. I currently use Metro to travel downtown to the bus tunnel to do various things such as go to doctors appointments at Virginia Mason Clinic, attend evening symphonies at Benaroya Hall and do occasional downtown shopping.	3/16/2015 5:12 PM
714	Easier connection to Link from the eastside makes it easier to transfer to capitol hill and south lake union, where I live and work.	3/16/2015 5:10 PM
715	I need transit to get from Seattle to Redmond. I would alter my route to rely on 542 and U-Link during off-peak hours.	3/16/2015 4:59 PM
716	We chose the location of our house partly because it's "close enough" to the Montlake on-ramp bus stop that I can get to work by bike + bus. With alternative 1, I might take the 255 somewhere and then transfer to the 545/542 to get to OTC instead of biking to Montlake, but I'll be riding just as often.	3/16/2015 4:44 PM
717	I see me needing to take a cab/uber in order to get from Capitol Hill to Montlake in the evenings. Currently I use the 43 line for that.	3/16/2015 4:35 PM
718	It's my only method of commuting.	3/16/2015 4:17 PM
719	I will have to travel farther just to reach transit.	3/16/2015 4:13 PM

720	Changes would likely mean I'd have to sell my home and move, or quit my job in Redmond.	3/16/2015 4:04 PM
721	Better connections -- a true frequent gridded network	3/16/2015 3:32 PM
722	Connections are going to be very difficult to get to the 542. The routes feeding to it from the North from 15th Ave NE seem to be cut. Need a stops along 15th Ave NE - NE 65th St, NE 70th St or NE 75th St.	3/16/2015 3:22 PM
723	Will depend on actual travel time (will it be faster). Bus 48 is really slow and overcapacity with the U district, if bus get slower and too crowded I may look at alternatives.	3/16/2015 3:15 PM
724	I would use transit the same because I need it to go to work. But it would make the commute more difficult for me.	3/16/2015 3:14 PM
725	The longer it takes me to walk, the more likely I am to use my car.	3/16/2015 3:01 PM
726	It would be a pain commute to work from downtown Seattle to Overlake during off-peak hours. (which is when I work.)	3/16/2015 2:43 PM
727	When I go up that way I usually know where I am headed, and I connect from downtown so I am not as concerned about cross neighborhood connectivity in that area. Maybe the people who live there would be, but I am going to be coming from Capitol Hill or downtown anyway.	3/16/2015 2:28 PM
728	I intend to use transit the same, but if bike racks are full on ST 542, I will have to find an alternative.	3/16/2015 2:23 PM
729	I use transit when I need to. Wouldn't change my need so wouldn't change my use.	3/16/2015 2:21 PM
730	no choice for my daily commute	3/16/2015 2:18 PM
731	I would be able to access some areas which currently require driving or an excessive amount of travel time.	3/16/2015 2:18 PM
732	As noted above, I could end up using transit less on the weekends as there would no direct route from where I live in Maple Leaf to Downtown Seattle. I would have to connect via the UW light rail station.	3/16/2015 1:57 PM
733	At times there are no available seats on the 545 bus in the evening and if this persists I'll look to driving myself.	3/16/2015 1:53 PM
734	I would use 542 on weekends and in the evenings.	3/16/2015 1:49 PM
735	I rely on transit completely - my usage won't change, just my satisfaction.	3/16/2015 1:38 PM
736	I would have no choice but to still use it. It will add about another 30 mins to my travel per day by having to walk from the 545/542 stop to to 148th AVE NE and NE 31th st There is no easy way to connect from the 542/545 to connect to 148th AVE NE without walking.	3/16/2015 1:22 PM
737	Short wait times without having to plan the route out in advance are a big deal.	3/16/2015 1:22 PM
738	Sometimes I choose to drive now during non-peak hours because of the vagaries of connecting between 48 and 545. All-day service for the 542 would eliminate this.	3/16/2015 1:21 PM
739	Driving to Redmond during peak times is not an option... I may bike with the improved bike path on the 520 bridge.	3/16/2015 1:18 PM
740	I live close to major routes. More frequency would mean more trips.	3/16/2015 1:14 PM
741	I'm always balancing time and the ability to get from point A to B as quickly as possible. With alternative 1 it sounds like it's more likely that I will be able to get on a bus when I need to, but less likely to take me as close to the place I need to go.	3/16/2015 1:13 PM
742	I'm not sure how I'll get to work if the 242 goes away. The 542 no longer runs early enough in the morning. If I was going in and out of downtown Seattle it would probably make things better.	3/16/2015 1:03 PM
743	I rely on off-peak connections between Overlake TC and downtown Seattle, and it looks like that would involve more transfers under Alternative 1.	3/16/2015 1:03 PM
744	Easier to visit Ballard, Wallingford through public transport	3/16/2015 1:01 PM
745	Because there's no option offered without transferring or driving to Northgate.	3/16/2015 12:53 PM
746	I think that if it were easier to use transit to get other neighborhoods such as Green Lake, Ballard and Wallingford I would us transit more.	3/16/2015 12:52 PM
747	I take the 545 around 10AM and that will no longer exist	3/16/2015 12:51 PM
748	I don't own a car and already rely predominantly on transit to get around the city and region.	3/16/2015 12:49 PM

749	I must use transit, my commute would be longer when working late.	3/16/2015 12:47 PM
750	How does it affect my routes?	3/16/2015 12:45 PM
751	Rather than going up the hill to Broadway, I may just walk to downtown.	3/16/2015 12:44 PM
752	depends on associated links to Redmond	3/16/2015 12:42 PM
753	Less frequent options and fewer routes into Fremont and south Wallingford from downtown, means travel times will be longer and less predictable	3/16/2015 12:39 PM
754	Hate that you are making my commute from Maple Leaf to Redmond take longer	3/16/2015 12:35 PM
755	Because cars are terrible and I am stoked (STOKED!!!11eleven) for light rail to open on Capitol Hill.	3/16/2015 12:32 PM
756	My commute would require a transfer and hence would take more time.... Much less convenient with this alternative	3/16/2015 12:31 PM
757	Because of all-day-reliability and dependability. Getting in and out of downtown is the highest risk segment of the routes.	3/16/2015 12:30 PM
758	542 is still the best way to get from the U-District to Microsoft Campus, although I will have to walk more to get to the bus.	3/16/2015 12:29 PM
759	I use transit all the time, changes to scheduling would change where I go, not how much I use it.	3/16/2015 12:27 PM
760	More reliability. More frequency means that transfers would be less painful.	3/16/2015 12:27 PM
761	I'm south of this set of changes but I like the idea of routing people to light rail instead of bringing more buses downtown.	3/16/2015 12:18 PM
762	I would have to transfer to get almost anywhere: Maple Leaf to Downtown would require a transfer to the light rail (it might be a bit faster, but transferring is a pain). Transferring to the light rail also provides far less flexibility: what if I want to get to South Lake Union, or Eastlake? These will all require transferring instead of the direct 66 connection today.	3/16/2015 12:14 PM
763	I would likely have to buy a car since my commute time to work would be significantly longer.	3/16/2015 12:14 PM
764	I use the transit no matter what. Cheaper and better for the environment.	3/16/2015 12:13 PM
765	I already use it quite a lot	3/16/2015 12:08 PM
766	direct fast connection Ballard Redmond	3/16/2015 12:02 PM
767	I have taken the 242 for 8 years, I stopped driving to Microsoft 4 years ago and strictly use Metro since it is quick. No transfers and stops in front of my building.	3/16/2015 12:00 PM
768	Because now I would have extra commuting time between Redmond and Downtown unless I travel in peak times, which isn't frequent	3/16/2015 11:59 AM
769	Because I could successfully travel between my job in Redmond (Microsoft) and the University Park (aka University District) where I live.	3/16/2015 11:58 AM
770	The 271 concept is better for me than the 550 for getting back from Bellevue late at night (but even later connections between eastside and Seattle would always be appreciated, even if infrequent)	3/16/2015 11:56 AM
771	For commuting purposes my use of transit wouldn't change, ditto for most non-work transit use. The revised 16 route would give a one seat bus option to Sand Point for soccer games in Magnuson Park.	3/16/2015 11:55 AM
772	I already use transit almost exclusively, particularly to go between the University District and Green Lake.	3/16/2015 11:55 AM
773	Easier to get from Ballard to Redmond.	3/16/2015 11:54 AM
774	As the peak hours are during my work hours.	3/16/2015 11:52 AM
775	I would likely stop riding transit altogether. I take the 545 to and from work every day as it gets me from Capitol Hill to OTC. I leave at slightly unorthodox times to avoid traffic - (10:30 am, 7 pm). This change would force me to take the light rail to the 542. This addition and a transfer would make my commute substantially longer. A ton of people get on the 545 at the Capitol Hill stops and this would be a huge inconvenience.	3/16/2015 11:52 AM
776	Lack of 545 out of peak service.	3/16/2015 11:52 AM

777	Because I moved here for it and even if you make it suck, I'm stuck here now.	3/16/2015 11:51 AM
778	routes to downtown would require a connection that inevitably leads to missed buses and much longer overall travel times (since youre eliminating the 71)	3/16/2015 11:51 AM
779	still requires 2+ bus rides from Madrona to Bellevue (my daily work commute)	3/16/2015 11:51 AM
780	Adding a transfer at the Montlake Freeway Station would significantly increase my travel time from Capitol Hill to Redmond during off-peak hours.	3/16/2015 11:50 AM
781	I'm mostly using it from the 65th park and ride by Greenlake anyways.	3/16/2015 11:49 AM
782	More frequent peak rides between Seattle and Overlake TC	3/16/2015 11:49 AM
783	It depends on how time efficient and reliable these routes turn out to be.	3/16/2015 11:47 AM
784	More convenient 542-based route between Overlake and Fremont / Wallingford,	3/16/2015 11:47 AM
785	My work schedule is dynamic and I can't always commute at the same time every day. I would probably need to find some other way to get to work if the 545 only ran during peak hours.	3/16/2015 11:46 AM
786	This change will make my commute via the metro take considerably longer and inconvenient	3/16/2015 11:46 AM
787	Would be less convenient to get the proposed UW station	3/16/2015 11:46 AM
788	Farther walk for those in Montlake	3/16/2015 11:45 AM
789	Because it would be easier for me (Ballard) to get to work (Redmond) and family (Sandpoint) using transit than before	3/16/2015 11:40 AM
790	I might actually need to buy a car (which I had been able to avoid doing up to this point) because the new commute would take much longer and be much more aggravating.	3/16/2015 11:38 AM
791	I would be forced to connect at Montlake to travel between Redmond and Green Lake. The addition of Lightrail service between the U District and downtown is irrelevant to my commute.	3/16/2015 11:33 AM
792	Transit time would increase greatly, leading me to use personal transportation more often.	3/16/2015 11:31 AM
793	I only go to the north when I need to. I would be happier taking the bus when I do with alternative 1 though	3/16/2015 11:30 AM
794	The fact that bus 256 is only planned to be a rush hour bus and that there's a need to detour to UW to be able to get downtown (and home) using the new tram line: "To downtown Seattle, use Route 256 during peak periods or transfer to Link light rail at University of Washington Station." This will put a cramp in my commuting and possibly put another car on the 520 bridge instead.	3/16/2015 11:02 AM
795	My bus, the 73, is proposed for elimination, with much poorer service substituted.	3/16/2015 10:57 AM
796	More frequent and reliable service, like seemingly every other major city.	3/16/2015 10:53 AM
797	At the moment I'm in a situation where I'm less reliant on transit. A couple of years ago, I rode it every day however. During that time, I avoided the 8 at all costs and preferred using the 43 or the 49, or I just walked. When I went to NE Seattle on transit, I didn't want to have to walk too far, since I was often carrying a lot of things. If service is made more centralized, I worry about the impact on the elderly, the injured, those with little kids, or those carrying a lot of stuff.	3/16/2015 10:51 AM
798	The biggest thinning out - north of 65th - doesn't affect me that much.	3/16/2015 10:46 AM
799	I do not own a car so transit is my only means of transportation.	3/16/2015 9:13 AM
800	I mostly bike commute which makes my concern about the 16 minor. However, having better travel to Ballard reduces the need to go by car since the 44 should be less crowded. Similarly, the need to bring a car to concerts will be reduced due to the improved overnight service.	3/16/2015 8:44 AM
801	Due to the current poor frequency times I often need to use Car2Go; with these route changes I could use transit more often.	3/16/2015 7:23 AM
802	The connections would prove to be too frustrating and too time consuming. I would just drive.	3/15/2015 8:57 PM
803	The lack of a connection makes trips to the UW, and trips to areas that connect to the UW (like Fremont) more of a pain.	3/15/2015 8:37 PM

804	Transit would be significantly better in Seattle	3/15/2015 8:21 PM
805	Both bus routes I currently use will be deleted.	3/15/2015 6:31 PM
806	There would be more reliable and frequent service connected with light rail to the neighborhoods I visit most often.	3/15/2015 5:03 PM
807	For one thing, I have a free transit pass from work, so it's by far the most economical way for me to travel. Plus I don't like driving--mostly for environmental reasons. Also, my commute usually involves taking the #74, and there isn't a lot of difference between alternatives 1 and 2 as far as that route goes.	3/15/2015 12:01 PM
808	Frequency of service is important to me. I work from home and want to get out for entertainment/shopping at non-peak times. Also, having to make transfers is not appealing.	3/15/2015 11:08 AM
809	More frequent service makes it more feasible to ride it more often.	3/15/2015 9:14 AM
810	Route 26 would run farther from my house and would not continue as the 131/132 to reach georgetown, my most common destination	3/15/2015 8:53 AM
811	Increased frequency of route 75--I often want to use this route off-peak but don't like waiting for a bus. Having extra route 74 trips is also a benefit. I would also occasionally use route 16 to get from Fremont/Wallingford to Sand Pt.	3/14/2015 10:27 PM
812	I like the increased frequency of some routes in Alternative 1, and the new connection between Ravenna and Wallingford and Fremont with the #16 will probably cause me to ride transit more. However, the #71 bus is the bus I use most frequently to get to the northern University District or downtown Seattle - it stops just 1 block from me. Getting to these places during non-peak hours will now require a 5-minute longer walk to get to the 372 or 65 on 25th Avenue or 35th Avenue, plus lengthy transfer by the UW Medical Center, so I would probably use transit less.	3/14/2015 10:08 PM
813	Traveling from Montlake to Greenwood by 48 would now involve a transfer. No bus straight to Madison Park from down town.	3/14/2015 7:56 PM
814	How can I predict how much and how far I will be able to walk. Sometimes it is best to get on a bus in the hinterlands and be able to get a seat than to have to transfer and hope that the young people who are addicted to their electronic gadgets notice that they should offer their seat to an older person. Just a few days ago I offered my seat on the 372 to a young man with a toddler in arms. There were at least a half dozen younger people who should have done that. I am 63 years old and I can stand for 15 blocks. Will I always be able to do that????	3/14/2015 4:48 PM
815	See My answer below	3/14/2015 2:57 PM
816	more convenient access	3/14/2015 11:48 AM
817	Frequency of 16 and 65 would make me more likely to take transit for my non-commuting trips	3/14/2015 11:39 AM
818	No need to change unless transit routes get me to other areas I easily and quickly instead of driving.	3/14/2015 11:30 AM
819	Because I can't understand the alternatives as presented.	3/14/2015 10:38 AM
820	Easier access to Magnuson/Sand Point from Downtown/LQA	3/13/2015 6:38 PM
821	I for one dislike having to transfer to 1 bus let a lone 2 or 3 buses. I leave my home at 5:30 A.M. and I get home 5:30 P.M. Monday - Friday as it is. How close together are the buses going run? I really don't like missing my bus by 10 seconds when I have to transfer and then have to wait for another bus for 15 minutes or even longer. I did not vote for light rail.	3/13/2015 6:09 PM
822	The bus commute to my workplace in Fremont would be quite a bit less pleasant on the revised route 28X.	3/13/2015 5:14 PM
823	Cause although the wait time would be cut in half the routes I normally ride would of been deleted which I don't want.	3/13/2015 4:52 PM
824	when light rail comes there would be more room on transit to downtown. the 70's buses are usually standing room only.	3/13/2015 3:59 PM
825	Link Light Rail would make traveling from Broadway to University District much easier for me.	3/13/2015 3:52 PM
826	I don't drive, so I still have to use transit, but I will have to walk more, and I will have to allow more time to get anywhere because of the walking time, and because of having to transfer more times.	3/13/2015 3:31 PM
827	I need to get to work & driving to downtown is not a viable alternative. I-5 is getting worse & worse & parking is outrageously expensive.	3/13/2015 1:51 PM

828	No real mention of 520 bridge transit.	3/13/2015 1:01 PM
829	Getting across town is currently very difficult. Bust service was cut along Westlake, taking out my favorite route to SLU/Seattle Center.	3/13/2015 12:39 PM
830	I don't know	3/13/2015 12:36 PM
831	Because I would be able to access the places I go midday more easily and faster.	3/13/2015 11:10 AM
832	Would use car less; prefer transit, but schedules not frequent enough to get to desired destination, particularly if transfers are required.	3/13/2015 10:50 AM
833	I am older and have trouble walking more than 1 block and standing a long time.	3/13/2015 10:29 AM
834	Right now, it takes an eternity to get anywhere on the bus from Kenmore, and unless I build in unreasonable amounts of time to buffer a possible missed connection, it is unrealistic to take the bus to work on First Hill. I love the idea of more frequent service for commuting as well as family activities. Who wants to wait on a corner with an impatient child for up to half an hour for the next bus? My hope is that the commuter-friendly scheduling of buses will make transfers and commuting by bus/transit a reasonable option.	3/13/2015 10:15 AM
835	frequent service, improved travel to downtown	3/13/2015 10:03 AM
836	Increased frequency of service and greater access to the main downtown transit hub (how I get to all of these neighborhoods from my home in West Seattle / my job in the CBD)	3/13/2015 9:46 AM
837	Less wait times, better connection to Capitol Hill	3/13/2015 7:58 AM
838	Loss of 25 has no adequate substitution between Montlake and U Village/Sandpt. I would drive instead.	3/13/2015 7:27 AM
839	I primarily use transit for commuting to work.	3/13/2015 7:07 AM
840	25 is my primary route and distance to alternative connections are too far.	3/13/2015 6:54 AM
841	I use transit everyday to go to work and shopping but i would use it even more if i had easier access.	3/13/2015 4:15 AM
842	I'll use the 76 for peak rides between downtown and View Ridge. For weekends to Sounder games, I am less likely to walk to 35th Ave or Sand Point for the 2-seat ride to Husky Stadium for the Link. My alternative is to use 41 from Northgate TC which I'd probably still use. I look forward to this grid in 6 years when Link extends to Northgate and my route downtown is 16 to Roosevelt and Link to downtown.	3/12/2015 11:11 PM
843	I use the bus to get everywhere.	3/12/2015 11:07 PM
844	It would make it faster to get to downtown. Right now route 65 is not reliable at all. Bus is late all the time and sometimes leaves early or doesn't show up at all. something needs to be done.	3/12/2015 9:24 PM
845	I will use the new 16 bus to get to Magnuson Park and to Fremont, but I will no longer have a direct bus to downtown. Not having a direct bus would be OK if the new 372/65 routes were convenient to the light rail station, which they appear not to be.	3/12/2015 8:49 PM
846	Weekend service on 372X	3/12/2015 8:24 PM
847	I rely on transit to get me to work, so I'd still have to take it regardless.	3/12/2015 8:05 PM
848	I don't understand the language given for my route, 545. Keep existing alignment and convert span to two-way extended peak-period-only service.	3/12/2015 5:16 PM
849	It looks like University Ave, already a highly congested commercial area, will be a choke point, so it will take a while for me to figure out if there are any alternative routes. Why not at least send more of the Ave buses down 15th, a wider and less congested parallel street?	3/12/2015 4:33 PM
850	I would not have easy access to the bus that takes me downtown.	3/12/2015 4:08 PM
851	I currently drive for my appointments away from greenlake, but I'd like to be able to get where I need to go quickly via transit.	3/12/2015 3:37 PM
852	Transit is my only source of transportation	3/12/2015 3:27 PM
853	I wouldn't have to wait for a bus as long as I do now since buses come more often.	3/12/2015 3:06 PM

854	Because I could get to local NE Seattle destinations without having to change buses at all, or only once. Right now, if I wanted to travel from central Maple Leaf to pretty much anywhere but downtown, I need to transfer at least twice (with tons of waiting). If I can realistically plan a trip to Greenlake by bus and home again in one afternoon without spending hours waiting for buses, then it's a trip I can and will take!	3/12/2015 2:35 PM
855	For 73 only - there will be no nearby bus stop. Also the bus will be peak hour only, which will inconvenient with my work schedule that I most likely have to drive and not taking bus at all.	3/12/2015 1:56 PM
856	More convenient service to destinations that I need to travel to.	3/12/2015 1:50 PM
857	I must commit to a 1 year bus pass so i would not have much of an option. I would have to weigh if my time is worth it to drive and pay for a spot or spend more than 2 hours a day on a bus, all to travel 20 miles.	3/12/2015 1:34 PM
858	I use transit for my regular commute between home and work. As long as transit continues to serve those areas, I will take transit, even if I always have to transfer.	3/12/2015 1:10 PM
859	I would still use transit the same amount - to travel between my workplaces and to travel to/from home and work. But my walk distance looks like it would be longer in the downtown area.	3/12/2015 12:43 PM
860	easier connections to neighborhoods outside my normal commute	3/12/2015 12:21 PM
861	More connections. Would use the 16 to go to Magnuson Park and Sand Point area, to avoid having to meander through the U-District	3/12/2015 10:58 AM
862	I work weekends and need to get to work downtown by 6:45AM and I get off work 7:30PM - bus currently doesn't run	3/12/2015 10:06 AM
863	More frequent options for weekends and off-peak. Better bus connections from the UW link station to Wedgwood/Sand Point.	3/12/2015 9:19 AM
864	Better travel downtown, less time to the airport, better connection to workplace (uw)	3/12/2015 9:14 AM
865	The new routes don't offer any advantages to central Wallingford.	3/12/2015 9:04 AM
866	Most of all because of the every 15 min frequency time of the 75 makes transfers to it better, I sometimes have to wait 25 minutes for the next 75 when transferring in the udistrict from downtown, ballard, capital hill, wallingford, etc trying to get home. Additionally, with the new connections the 16 offers from Sand Point to green lake and wallingford it seems like a great improvement and is nice to have a bus go down 65th all the way.	3/11/2015 10:23 PM
867	The routes down sandpoint to the link station would make travelling to both downtown and the airport much more convenient.	3/11/2015 10:14 PM
868	connection to U Link and more frequent service	3/11/2015 9:31 PM
869	Most of my travel will not be affected.	3/11/2015 7:54 PM
870	I don't own a car, so I'll probably be using just as much, but I might look into vanpool or other options to see if that would be easier than getting up to the 542.	3/11/2015 7:32 PM
871	Frequency is freedom	3/11/2015 4:51 PM
872	It would be faster and more direct	3/11/2015 4:35 PM
873	I would end up driving from Shoreline to Redmond basically everyday, the only transit option I see would require stringing 3 buses together, which would take over 2 hours and not be at all practical.	3/11/2015 4:08 PM
874	Better chance of arriving to destination in a timely manner.	3/11/2015 4:02 PM
875	I have a small child. If transit is not fast and frequent we just drive. Alternative 1 would bring much more of the city into our transit-shed.	3/11/2015 3:29 PM
876	I could just take a bus, taxi, bike or car to the light rail station, then take the light rail to capitol hill where I work.	3/11/2015 1:53 PM
877	frequency of service will be a huge advantage - will contribute to taking Seattle into the 21st century of public transportation...	3/11/2015 1:51 PM
878	I use it every work day already. I'm not likely to increase it.	3/11/2015 1:21 PM
879	I commute via bus, so I will have to find a way to get to work regardless of which alternative is implemented.	3/11/2015 12:46 PM
880	The 16 is my closest route along Meridan, I would lose use of the 16 altogether on with this change. Though the 26 is nice, the routes along the 26 between Ravenna and 45th can be sketchy with low visibility.	3/11/2015 12:27 PM

881	My kids would be able to take the bus to school when they're older	3/11/2015 12:01 PM
882	Because my service levels aren't directly affected on my work-commute. Overall, random or supplemental rides don't account for a sustainable nor forecastable amount of transit use on my part.	3/11/2015 11:37 AM
883	Frequency	3/11/2015 11:19 AM
884	one is a plus for me, another change is a negative	3/11/2015 11:14 AM
885	I would be able to use it to get to medical appointments near Children's hospital that I currently drive to.	3/11/2015 11:01 AM
886	Regardless of service, I am committed to riding the bus. It appears that it will not be so much of change where using an alternate form of transportation will be more desirable.	3/11/2015 10:49 AM
887	more frequent trips makes taking the bus less of a hassle, additional access to places I often go	3/11/2015 10:47 AM
888	Easier to bus. Not a lot of connections from NE 25th & Blakeley.	3/11/2015 10:45 AM
889	The 48 right now is one of the few routes that connects north Seattle to south Seattle, and the thought of having to endure even more transfers (since the 48 now doesn't go all the way to Columbia City) is a HUGE headache.	3/11/2015 10:44 AM
890	I am a senior citizen. Less frequent buses and longer walks make public transport a less viable option. Also, as buses get more crowded and young riders aren't trained to offer seats to seniors, it is less and less comfortable to ride.	3/11/2015 10:23 AM
891	Connection between UW Link station and U Village	3/11/2015 10:12 AM
892	I would need to use my bike and car more (if not exclusively). And I am getting too old to bike in cold weather.	3/11/2015 9:44 AM
893	Could get to work in Bellevue with 1 ride rather than 2 or 3.	3/11/2015 9:24 AM
894	Possibility of more convenience, quicker travel times	3/11/2015 9:12 AM
895	I don't know the timing of the transit. I have two options: pay for all-day care, or get there when school gets out. I am not flexible because child-neglect laws are not flexible. I would pay \$1,000 cash for flexibility and take the bus TODAY if that were an option. But it is not. I need you to provide something faster or equally fast as a car to get out of my car. I do not think my time is more valuable than others but I have responsibilities that I can't neglect. I know based on using the carpool match that I'm not the only person looking to get back to the Eastside by 3:30 and be late by 5 minutes, but we all live and work too far apart for carpool to work.	3/11/2015 8:40 AM
896	I would use transit to go to the U District (son is at UW) and other places instead of taking transit home from work and then driving. Also would take transit for weekend activities instead of driving	3/11/2015 8:10 AM
897	A direct bus route from Sandpoint to Ravenna! Now I can eat German food and Crepes every night and die happy.	3/11/2015 8:05 AM
898	I don't understand how North Seattle transit changes should impact Woodinville.	3/10/2015 9:50 PM
899	It depends on whether link or Metro buses get me downtown in a quick and efficient manner.	3/10/2015 9:28 PM
900	Loss of Route 43 (and alternative walk time to nearest light rail stop) means time to get to Capitol Hill or downtown increase to the point where it make more sense to drive.	3/10/2015 9:17 PM
901	Frequency helps me get more done during the day.	3/10/2015 9:13 PM
902	I would use transit to get to Sand Point, which is currently difficult and slow. I work for The Mountaineers, although not at the Sand Point office, I frequently organize events there or need to go for meetings. I often worry about holding events there, because it is currently difficult to access. Route 16 would be a major boon for my own needs and for our events.	3/10/2015 8:27 PM
903	Because I wouldn't have to wait for the bus as long or worry about what time to try to catch it.	3/10/2015 8:08 PM
904	I would be forced to transport my wife to work as a single car family, increasing more cars on the streets and less ridership.	3/10/2015 7:32 PM
905	Most trips I would take would be quicker.	3/10/2015 6:59 PM
906	Most of my destinations are currently within walking distance.	3/10/2015 6:00 PM
907	the 16 is my main option for commuting to and from downtown.	3/10/2015 6:00 PM
908	1. More frequent service on route 75 2. It becomes much more feasible to get from my home to the airport.	3/10/2015 5:40 PM

909	More frequent bus service reduces the stress of timing of bus arrival and allows a more comparable travel time to getting in my car. I have to be at First hill by 7 am and I dislike having to catch a bus @ 6:08 because it only comes every 30 minutes.	3/10/2015 5:26 PM
910	Bryant to Seattle Center now is really slow (route 32). We often drive instead.	3/10/2015 4:41 PM
911	I am dependent on Metro transit wherever I go. So I'd have to use Metro Transit to go everywhere just as I do now, and nothing would change for me.	3/10/2015 4:39 PM
912	Some trips would improve: getting to/from the local library or grocery store & getting to/from Fremont. Downtown would be tougher, especially with children...and I do off peak trips downtown with children for things like the aquarium, museums, and stadium.	3/10/2015 4:35 PM
913	I use transit every day for my commute; doesn't seem like I'd be changing that anytime in the future.	3/10/2015 4:31 PM
914	Reasonable time, can get where I want to go	3/10/2015 3:56 PM
915	I would feel safer with less wait time at stops and with more people at consolidated stops.	3/10/2015 3:52 PM
916	Lack of connection between Northgate and Greenwood has been a major factor preventing us from using transit as often as we'd like. Getting from east to west should not be so hard!	3/10/2015 3:48 PM
917	more direct connection to my employer (SCH)	3/10/2015 3:35 PM
918	better chance of bus being on time and frequency	3/10/2015 2:53 PM
919	Faster travel downtown using 26 bus	3/10/2015 2:46 PM
920	As I don't have a car, I would still rely on transit the same as I do now.	3/10/2015 2:31 PM
921	Higher frequency on all routes and better access to Lake City Way/North Seattle will reduce the amount of Car2Go trips I take due to inconvenience.	3/10/2015 1:25 PM
922	Not as convenient.	3/10/2015 1:06 PM
923	without the 11 and 12 I might as well drive and use my handicap placard	3/10/2015 12:47 PM
924	It is difficult to assess changes like these before they are implemented.	3/10/2015 12:25 PM
925	May use transit less because of longer travel times.	3/10/2015 11:46 AM
926	Aurora/99 is significantly more efficient than Fremont/Fremont Bridge due to major traffic around the bridge.	3/10/2015 11:18 AM
927	It would take 15 minutes to walk to 43 or 48, more to walk up the hill to the 49, even more to walk to the light rail station.	3/10/2015 11:17 AM
928	I don't see any bus service that gets even close to the light rail station.	3/10/2015 11:11 AM
929	Better link to where I want to go. More frequent transit is important.	3/10/2015 10:40 AM
930	Because I live in Madison Park and Alternative 1 would eliminate Route 11 service to Madison Park.	3/10/2015 9:48 AM
931	It would depend on the timing of the 76 route. I am concerned about changes that would force me to take a bus to light rail and then light rail downtown. That would take too long and I don't want to make transfers to go the 7 miles from Wedgwood to Downtown Seattle.	3/10/2015 9:46 AM
932	May have to walk to Link from Home.	3/10/2015 9:30 AM
933	The more frequent service would induce me to take a bus because I wouldn't have to wait for one very long.	3/10/2015 8:18 AM
934	I will drive the 10-12 minutes to the Redmond Transit Center and catch the 545. Freakin' awesome. I have to still get in my car to get to a bus that will take me into downtown Seattle. It is official, common sense has left the USA.	3/10/2015 8:13 AM
935	My use is occasional in this area, not for commuting	3/10/2015 5:46 AM
936	Increased frequency and connectivity to the light rail station.	3/10/2015 1:09 AM
937	My wife is not comfortable taking my 1-year-old daughter on a bus without a carseat, and metro buses lack accommodations for such.	3/9/2015 10:57 PM

938	Because I'm afraid the 16 will be so over crowded by the time it reaches Dexter that no one along Dexter will be able to get on the bus and I will be forced to walk. The peak 26 and 28 is already overcrowded by the time it reaches the southern points along Dexter. There are numerous apartment buildings currently under construction or planned for construction along Dexter. None of those people will have viable transportation options.	3/9/2015 10:19 PM
939	I hate waiting around for the bus to come. If it comes more frequently, I'll ride more often.	3/9/2015 10:03 PM
940	See above. I do not want to have to transfer on Capitol Hill just to finish the last part of my commute downtown.	3/9/2015 9:56 PM
941	The transit network would be radically improved for me, my wife, and friends.	3/9/2015 8:44 PM
942	While it doesn't really matter to me which Alternative is implemented, I'd like to see more people use transit.	3/9/2015 8:40 PM
943	there is not very frequent service to first Hill from Greenwood that matches my work shifts 1100-2330	3/9/2015 8:30 PM
944	can't access 71 without a car.	3/9/2015 8:28 PM
945	With greater frequency and a more intuitive gridded system of routes, Metro buses would operate more like train lines, and would reduce the time penalty compared to driving.	3/9/2015 8:27 PM
946	There wouldn't be any bus service in Madison Park.	3/9/2015 8:16 PM
947	It's obvious. You don't provide any specific information about what happens to current bus service to be able to give an informed answer.	3/9/2015 8:15 PM
948	There is absolutely no improvement to my 8-mile, FORTYFIVE MINUTE commute from Sand Point to Downtown.	3/9/2015 8:11 PM
949	I would be able to much more easily get to my job in Bellevue from where I live in Greenwood	3/9/2015 7:03 PM
950	I would have to walk further and spend more time transferring. Overall, that would make my transit time longer.	3/9/2015 6:24 PM
951	Would have to depend less on ride shre	3/9/2015 5:56 PM
952	if wait times at night were more frequent I would be more likely to ride bus home from work	3/9/2015 5:48 PM
953	It depends if I can get to the UW medical center from maple leaf/northgate by 6:30 AM or 6:30 PM with the same time return trips on weekdays and weekends and holidays.	3/9/2015 5:42 PM
954	I would just suck it up and walk, thought I would be annoyed	3/9/2015 5:34 PM
955	I would end up driving to get to downtown Seattle, the alternative is just too slow.	3/9/2015 5:22 PM
956	Better coordinated approach - a system's view of transportation.	3/9/2015 4:41 PM
957	I need to get around somehow	3/9/2015 4:36 PM
958	Because I would have to climb very steep hills for a few blocks to get to the bus stop.	3/9/2015 4:27 PM
959	It would be less convenient for me to get to downtown when that is my destination (I would have to walk to Eastlake Ave E which is 1/2 mile away for me but worse for those living in Montlake) and I would use transit much less if my destination is the airport. Do you really think people will drag luggage 1/2 mile to a bus, then transfer? Who do you think is going to use the Light Rail stations? Is all of this just for students and people who live close to the stations? Where is the concept of using existing buses to get transit users to the stations? Do we all have to get in cars and park next to the stations?	3/9/2015 4:24 PM
960	I'm committed to using transit.	3/9/2015 4:22 PM
961	Getting Downtown would be much more difficult.	3/9/2015 3:38 PM
962	I would use the concept 67 daily. Roosevelt Way NE is much more convenient for me than 5th or 15th, and adding Sunday bus service along this route would make riding the bus an easy choice.	3/9/2015 3:34 PM
963	The current bus is not frequent and reliable enough for my schedule.	3/9/2015 3:24 PM
964	Because it's difficult to read and assess your maps and understand the implications of it which are unknown. The #11 eliminated bus stops within the past 2 years have negatively impacted my commute - the stop near my work was axed and walking to the next stop is time consuming. Some of us just want to catch bus as quickly as possible and go home or wherever I need to be. Walking a quarter mile or more is not just convenient, it costs me money. I have to add on an additional time to use the bus system. If the public transit becomes too time consuming for me, I will opt to drive alone. I'm tired.	3/9/2015 3:14 PM

965	I drive more often than I want too, b/c of reluctance to make multiple transfers, or fear of being stuck without transport at certain times.	3/9/2015 3:07 PM
966	I would probably have to find a new place to live that was on a bus line. :(3/9/2015 3:01 PM
967	the alternatives are not clear enough for me to accurately compare them. A narrative is inadequate.	3/9/2015 2:52 PM
968	Having to go further to access transit is not acceptable. Having to transfer more is not acceptable.	3/9/2015 2:42 PM
969	Too many transfers	3/9/2015 2:39 PM
970	We all ride the bus a lot. I doubt that would change. Except for the issue mentioned above (getting from Montlake to Capitol Hill) I personally would rather walk farther than wait longer.	3/9/2015 2:19 PM
971	Alternative 1 pretty much takes away all transit service within a 1/2 mile of where I live. I have a car. I don't like driving, but where I live isn't very safe to walk in (lack of crosswalks, busy streets/highway, bad sidewalks), and the hills are pretty steep, so driving would be a lot faster and easier in comparison.	3/9/2015 2:17 PM
972	I like the direct connection to Fremont from central Wallingford via the rerouted 16, but I'm really leery of taking the route off Aurora. It already tends to be late and can be infuriatingly unpredictable, and subjecting it to the horrific traffic on Mercer won't make that any better. Getting to North Seattle College also gets significantly more difficult, especially if the 16 remains unpredictable. Do I take the 16 from 54th and Meridian up to where it runs into the 26X on 65th? In theory I'd wait at most 10 minutes, but I'm skeptical. The other option is to walk an extra 10 minutes over to Latona, with lots of wasted effort thanks to the weird deviation from the street grid between the two. There's no transit west of Meridian, so changes to the 16 have a big impact to people living near Green Lake Park.	3/9/2015 1:53 PM
973	Remains to be seen...	3/9/2015 1:52 PM
974	Frequency of service often keeps me from riding the bus. Especially to get downtown. But if there are good bus connections from Bryant to the UW Link Light Rail, I'd go downtown more often!	3/9/2015 1:40 PM
975	My primary use of the 16 is to and from downtown and to and from North Seattle College. It will make more sense to bike rather than bus if alternative 1 is implemented.	3/9/2015 1:21 PM
976	Timing! Less buses means I have to plan more and therefore can't get to where I need.	3/9/2015 1:15 PM
977	I would have less bus access (both the 25 and 43/48 service down 24th would be eliminated or go away)	3/9/2015 1:01 PM
978	Frequent service will make my overall trip shorter since much of my commute time involves waiting for a bus.	3/9/2015 12:46 PM
979	Less convenient to get to NOAA Sand Point from southeast end of Wallingford than current structure.	3/9/2015 12:04 PM
980	The new light rail station doesn't help me get to downtown faster (with the extra walking added in), and doesn't help me get between East Cap Hill & Maple Leaf at all.	3/9/2015 11:52 AM
981	To get to the airport I'd go to UW rather than Westlake	3/9/2015 11:50 AM
982	Currently the service takes me directly from the park and ride to the work without having to make any transfers - nearly door to door service. Having to transfer at UW and wait for light rail to finish the commute is adding additional time to an already very long commute.	3/9/2015 11:47 AM
983	If there wasn't a transfer and needing to wait outside I would use it.	3/9/2015 11:05 AM
984	Easier to get to places I'd go by car.	3/9/2015 11:00 AM
985	It would depend ultimately on overall travel time including time for connections and time to get to a bus stop.	3/9/2015 10:45 AM
986	I still work 5-6 days per week and use Metro each time.	3/9/2015 10:36 AM
987	I have to get to work everyday, and I will not be getting in my car to do that, so however Metro is configured, I will ride it.	3/9/2015 10:18 AM
988	Transit is my main mode of transportation in Seattle.	3/9/2015 10:13 AM
989	You have eliminated my ability to use the bus. I live on NE 80th. Distances are too far for me to walk to catch a bus. Congratulations -- I'll be forced to go to work in my car and pay over an hour's worth of wages to pay for parking.	3/9/2015 10:08 AM
990	More access to more places. With all the cars a bus is the way to relax to get somewhere. No longer to park in many places has limited my desire to go to some neighborhoods that I have visited for years and years.	3/9/2015 10:02 AM

991	Better and more timely service	3/9/2015 10:02 AM
992	On days when I cannot get in early, I end up having to drive since the buses I rely on to get to the Eastside (242 and 542) do not run in the middle of the day.	3/9/2015 10:01 AM
993	I rarely travel to North Seattle, I used to daily when I worked at North Seattle College	3/9/2015 9:58 AM
994	Presumably I'd have a better transit option to get downtown on the weekends or late-nights after work.	3/9/2015 9:55 AM
995	Wait times decreased. Encourages walking.	3/9/2015 9:52 AM
996	Too difficult to get to the bus stops.	3/9/2015 9:50 AM
997	I already ride the bus most of the time. For my home location, there isn't a lot of change here. But I definitely might use Link from the University to Capitol Hill, Beacon Hill, and the airport.	3/9/2015 9:22 AM
998	Most of my trips are between NW Seattle and downtown (including points in between); my occasional transit trips to NW Seattle, UW, and Capitol Hill would probably not be affected.	3/9/2015 9:17 AM
999	I don't think it affects the South end.	3/9/2015 9:06 AM
1000	the above descriptions are confusing. A simple map by route change would help. Current vs. proposed.	3/9/2015 8:35 AM
1001	Options to University / Ravenna area are more limited. Currently I use Route 74 primarily, but take 71, 72, 73 and 76 as alternates (particularly from downtown headed north). All of these routes already are overcrowded (I frequently am left standing on the platform at Westlake Center), so eliminating them will just put more pressure on the remaining services.	3/9/2015 8:31 AM
1002	The new 45 routed to Bellevue would give me better, more frequent access to U-Link, 520, Bellevue, and Kirkland (transfer).	3/9/2015 8:02 AM
1003	I don't understand how it will affect me. I use the bus stop at 20 and Lake city way.	3/9/2015 7:49 AM
1004	More frequency on core routes in the CD, more connections to north Seattle (I *LOVE* the 48->67 through route to Northgate!), expanded span of service.	3/9/2015 6:34 AM
1005	makes it even more complicated to come here and more travelling time. i rather drive then	3/9/2015 5:44 AM
1006	Easy transfers from link to new, direct and simple bus lines	3/9/2015 5:18 AM
1007	More frequent service in northeast Seattle. Better service to NOAA.	3/9/2015 2:41 AM
1008	I rely on the 43 in my area - rail is .6 miles away	3/8/2015 10:03 PM
1009	I use transit to commute for work.	3/8/2015 9:45 PM
1010	It will take me longer to get downtown and to the U District (not campus) and the service will be considerably less reliable than what I use now.	3/8/2015 9:23 PM
1011	Not as much change/improvement for someone living in Ballard.	3/8/2015 9:23 PM
1012	My use of transit is not dependent on its frequency of service; I employ it when other modes of transportation are infeasible. Nonetheless, I am in favor of frequent, reliable service, as it will reduce the burden of utilizing transit.	3/8/2015 9:19 PM
1013	E Line and the #301 are the only bus routes I have access to use	3/8/2015 8:52 PM
1014	Right now bussing to airport is not reliable and fast enough and convenient enough.	3/8/2015 7:33 PM
1015	Oftentimes there are destinations that are difficult to reach via bus. With the additional lines and frequency and the ease of getting to Capital Hill, it will change this dramatically. Being able to go to Greenlake, a park that is safer to walk by myself compared to Magnuson, I won't have to drive there anymore.	3/8/2015 6:26 PM
1016	Most days, I ride my bike to and from work. When I do take the bus, I have many options, as my neighborhood has a lot of route choices to get to downtown. I am worried that most of these peak-commute buses are full/standing room only most days, so I know they are well-traveled. The information does not give me a sense of whether there will be improved net capacity with either option, at the times I travel.	3/8/2015 6:25 PM
1017	More frequent ride times.	3/8/2015 3:46 PM

1018	Hopefully more than adequate parking would be available. As it is now, if I don't make to park and ride before 8:00am I am out of luck. I wouldn't be have to re-work my commute when I need to get between kirkland/seattle during off-peak hours in a reasonable time and to my destination. Maybe I wouldn't have to stand for the entire trip.	3/8/2015 3:45 PM
1019	Right now, it is difficult to travel from Ballard to Sand Point. A direct bus route from NW to NE Seattle would make my commute easier by bus! Also, more frequent buses will make it easier to take the bus whenever I need to instead of having to pre-plan trips in more detail.	3/8/2015 3:40 PM
1020	I would have to rent more cars to get to my destinations because having to transfer multiple times would take longer and be more difficult. The timeline might work on paper but not in reality.	3/8/2015 3:00 PM
1021	it becomes harder and harder to commute by bus. i now drive when i have to be in dt Bellevue as you deleted the 243, and i see similar things happening again. now, we aren't hipsters in ne Seattle only using buses, but we are the people who try to use it to commute to work. hard to walk in the rain, or the sun to make a connection dressed in a suit.	3/8/2015 11:56 AM
1022	Unless you are traveling at peak times, transit is very unreliable and takes a long time (having to wait 1/2 an hour between buses). I'll be more inclined to take the bus if it comes more often and is more reliable.	3/8/2015 11:36 AM
1023	It is hard to tell what ridership will be. It seems like you have not reduced peak time to make the busses unbearable, but if this did happen I'd start driving to work. Busses are already overcrowded.	3/8/2015 10:54 AM
1024	I already bus commute daily from Fremont to Bellevue. The Frequency and service on the lines I use are the same or improved on my daily commute, and the same is true for lines I use on the weekends. Also, I don't own a car. There's no reason for me to use transit any less than I already do.	3/8/2015 10:22 AM
1025	use transit to access downtown Seattle	3/8/2015 9:19 AM
1026	I don't use it as often as I'd like because of hills. if I had to walk further to get public transport, I'd not use it at all. what I like about where I get 1 bus now, is the street where I catch the bus, has less traffic than the street with rapid ride and likely to be the bus & street I'd have to take with Alt #1. I'm a senior and prefer closeness to a bus on a quieter but not dead, street.	3/8/2015 9:08 AM
1027	My routes would not serve me as well. I would have to drive.	3/8/2015 7:17 AM
1028	see above "Other" response	3/7/2015 11:25 PM
1029	I already rely on it for regular travel; the added benefit of more regular times would be greatly appreciated but wouldn't change my ridership.	3/7/2015 9:51 PM
1030	Frequent transit would make it easier to get around without owning a car	3/7/2015 7:40 PM
1031	I commute to work only and drive everywhere else now, but the new light rail in the U district will make going downtown and to capitol hill a lot easier without having to drive.	3/7/2015 6:56 PM
1032	I haven't traveled much north of the U District because I don't like to transfer and don't know what the options are.	3/7/2015 6:40 PM
1033	See above	3/7/2015 6:20 PM
1034	It would be much easier to get groceries with route 16.	3/7/2015 5:14 PM
1035	Buses in my neighborhood would run every 15 minutes instead of every 30 minutes. This is especially important since there is no bus going downtown - a transfer is necessary.	3/7/2015 5:09 PM
1036	Not sure if revisions of Routes 70, 71, 72 or 73 would be good for commuting between International District, Downtown & U-Dist. South Lake Union already only has a few good connections to UW/Ravenna/Northgate, so any elimination of portions of the 70s buses or the 66X would make things trickier for many people who won't live close to the Capitol Hill Station for Rail. I'm worried people can't or won't travel uphill or transfer to get to the Link. In my opinion we need more non-express buses to all the 70s areas, I can't take the 71-73 already when they are express because I live in SLU and when they bypass Fairview, they aren't useful to me.	3/7/2015 4:59 PM
1037	Because what is going to happen if Alt 1 is done will be less options and less real service but the proposal doesn't tell us that. I was part of the so called planning for the C line. What was promised was not what we got. In this case the same old and tired tricks are being used and the same assumption that we all are too stupid to figure it out.	3/7/2015 3:16 PM
1038	Has the least impact to me. I live north and want to get around. If I travel north to downtown I can get to capitol hill and home...	3/7/2015 2:16 PM

1039	- Love new route 38 and 16. - Lots of routes connecting to the new Link Lightrail to UW	3/7/2015 2:11 PM
1040	Working Parttime - most likely to want to use transit to get to UW light rail, Downtown Seattle (offpeak), and UW light rail to get to the airport. There is no convenient service to Shoreline where I work PT; this alternative would not affect that fact.	3/7/2015 2:00 PM
1041	My frequent use of transit for my daily commute would be unaffected. But more frequent service on the weekend would allow me to do family outings by bus rather than car. Currently it's too hard to hit an infrequent bus departure with kids in tow.	3/7/2015 1:44 PM
1042	I would stay home more since getting to a bus would be harder. Seattle is getting harder to live in for older people and the handicapped.	3/7/2015 1:34 PM
1043	These changes don't affect the principal routes I use - 303. It does affect slightly the 66/67/73/373 which I sometimes take. I think the proposed alternatives, primarily 1 would work best for me in those times when I need that service.	3/7/2015 1:07 PM
1044	I would be able to get to Lake City and other places more frequently and directly from Sound Transit station transfer points	3/7/2015 12:44 PM
1045	I see no easy connection to the paths I currently take. Walking uphill with a load is not my best plan seeing as I'll lose easy connections to the library and markets. Target shoppers will lose their connection to Meridian Ave N	3/7/2015 12:19 PM
1046	Better ability to get to and from downtown and Seattle Center from 55th and Roosevelt for evening theater. Currently driving is my only option.	3/7/2015 12:09 PM
1047	Need one major, frequett "feeder: to/from NE45th St in Laurelhursy to UW lightrail	3/7/2015 12:09 PM
1048	Less need to drive home when it's late	3/7/2015 11:53 AM
1049	Working at Sandpoint/Seattle Children's and frequenting the Greenwood/Roosevelt/Wallingford/Fremont area, would love to have better connections like the proposed change to Route 16.	3/7/2015 11:52 AM
1050	Routes to UW link station is less convenient	3/7/2015 11:42 AM
1051	It is hard to understand the statements and to make a determination on what you are trying to get at.	3/7/2015 11:24 AM
1052	I hate waiting for the bus, but not walking to it.	3/7/2015 11:17 AM
1053	It goes to places I already visit by car but it does so in a way that values my time enough for me to consider leaving the car behind.	3/7/2015 10:53 AM
1054	Where my wife and I currently live on 40th in Wallingford is well served by the 31/32/26, and a short walk will get us to the 44. The option of taking a bus to a light rail train to get to Mariners Games, or to the Airport greatly excites both my wife and I and would replace many trips we would choose to take our car on.	3/7/2015 10:43 AM
1055	Easier to commute from my neighborhood to other neighborhood hubs, especially on Capitol Hill and the Central District.	3/7/2015 10:22 AM
1056	Because it would be too difficult to get around without the handy buses.	3/7/2015 10:08 AM
1057	The new connections and the increased frequencies would make more areas practically accessible to me.	3/7/2015 10:05 AM
1058	I'd just drive from Cap Hill to Loyal Heights, rather than take multiple buses.	3/7/2015 9:56 AM
1059	I work at 45th and the Ave but commute via downtown. Light rail at Husky Stadium will still involve a lot of walking from there up to the office. The through-campus routes would be extremely useful.	3/7/2015 9:50 AM
1060	Taking transit means I don't need to worry about parking or gas	3/7/2015 9:34 AM
1061	Faster service to Capitol Hill, more frequent connections Greenlake from Ravenna (route 16) would make it easier to connect to route 542 for commuting. Faster connection to downtown via light link rail + 372x.	3/7/2015 9:31 AM
1062	If I'm headed to work after the last 77X/64X (I'm about halfway between them just east of 15th), any transit option I have is slower than my options today (see answer to question 8). Today, it's about equally fast in the morning to use a close 72/73 stop as it is to walk further to 64/66/77, so I have lots of options.	3/7/2015 8:54 AM

1063	If you increase frequency and reliability of transit to the UW stadium station when it opens, then I will use transit more. I live in Roosevelt and really want to use that station to commute to my job in Queen Anne (I already have to go through downtown and transfer at Westlake, so why not make it much faster by using the train). However, this will only be possible for me if Metro improves service between Roosevelt/northern U District and the stadium area. The stadium is not near much residential density so it will be vital that Metro provides frequent (the same bus comes every 5-7 minutes at rush hour), reliable service from different neighborhoods in north Seattle to the stadium station when it opens.	3/7/2015 8:53 AM
1064	Currently, transit is so bad in my neighborhood that it is prohibitive. There is no weekend transit and no mid day or evening transit out of this neighborhood that doesn't involve a prohibitively long walk.	3/7/2015 8:46 AM
1065	More destinations would be come much easier to get to. Montlake, Magnusson park (from other neighborhoods), and moving between the U, Wallingford/Fremont/Ballard	3/7/2015 8:44 AM
1066	I'm actually looking forward to possibly using the capital line if possible. I'm hoping to ride the Sound Transit sounder from Puyallup where I live to downtown then catch the capital line then a bus to Sand Point. I'm hoping my travel times will go down somewhat.	3/7/2015 8:28 AM
1067	I do not need transit to North Seattle except for the U District.	3/7/2015 7:54 AM
1068	Higher frequency and integration with U link will make bus more time competitive with biking	3/7/2015 7:46 AM
1069	More accessible places, especially on weekends	3/7/2015 7:01 AM
1070	I don't mind traveling a few blocks to my stop if 1) service involved fewer transfers and 2) service was fairly frequent or at least on time (though the latter is too hard to accomplish here, i understand)	3/7/2015 6:40 AM
1071	Increased bus frequency means lower variation in travel time. Consolidated routes mean easier to get new places. Consolidated bus stops means increased safety while traveling.	3/7/2015 6:28 AM
1072	No direct service; transfer takes additional time	3/7/2015 1:06 AM
1073	I come from Ballard And more service serving Sunset hill	3/7/2015 12:51 AM
1074	Since I could just walk to a stop and know a bus is going to come. Less planning is better. Right now I would use the 49 more if I knew it would come when I needed it to.	3/7/2015 12:44 AM
1075	I believe I would have greater access to more locations in the disposable tie I have.	3/7/2015 12:14 AM
1076	I would use transit the same amount, but I would be able to use it more efficiently without having to worry about short or awkward transfer times.	3/7/2015 12:09 AM
1077	Proximity of routes to origin and destination points is important in ease of usage, and therefore usage.	3/6/2015 11:29 PM
1078	The biggest reason I choose not to take transit (when I make that choice) is because routes don't have frequent/fast enough service. This would go a long way toward fixing that problem.	3/6/2015 11:12 PM
1079	Frequent service to the light rail station would allow me to skip the long slow service between downtown and NE Seattle during rush hour.	3/6/2015 10:55 PM
1080	It would be a crazy waste of time going home. Getting from downtown where my bus from I-90 goes is fine, the Link Rail would overshoot my destination, but get me to the U and then I'd have to backtrack on the 48 which probably would be crammed. Going home would reverse this and be much more time wasting than getting the fairly frequent 43 or the less frequent 12 from that area.	3/6/2015 10:28 PM
1081	more frequency, more direct connection possibilities	3/6/2015 10:13 PM
1082	It take me the same amount of time to ride transit as it does to drive my car, because it the same roads. Use transit to get me to the nearest light rail station as quickly as possible.	3/6/2015 10:11 PM
1083	It's difficult to imagine all of the potential benefits and consequences of this plan. I'm afraid that travel time to reach the bus would be a big problem. However, I think there is a huge benefit to knowing a bus will come within 15 minutes, and this outweighs many costs.	3/6/2015 9:17 PM
1084	It seems as if this is all about =NE= Seattle, which doesn't affect/help/harm me one way or another. (I live and mostly travel in -NW- Seattle, so...)	3/6/2015 9:12 PM
1085	because if you split routes into 2 numbers, there is a possibility that half of that route may be deleted in the future. plus it's very confusing to have 2 route numbers for the same ride, it confuses trip planner apps.	3/6/2015 9:03 PM

1086	eliminating 71 causes me to have to make two transfers at minimum to catch the 271 to Bellevue (271 would be my third bus to get to work). This makes me want to purchase a car and drive to work, I don't want this hassle and would be less inclined to ride transit again.	3/6/2015 8:42 PM
1087	It would be far less convenient to catch the bus going out of the neighborhood. It also would be difficult to begin using light rail to the airport, which is a major hope for opening of the new UW station. My larger concern is for neighbors who are mobility-impaired and would be unable to walk to the Alt. 1 bus stops.	3/6/2015 8:35 PM
1088	Because there are not speed and reliability improvements to the 44 implemented, I would likely use it about the same amount and would probably drive as often as I do to the U-District. The 45 would probably result in me using that slightly more than I do currently.	3/6/2015 8:32 PM
1089	I rarely use transit except for work because of the poor frequency during non-rush hours so I would be more likely to use it with greater frequency and access to the train.	3/6/2015 8:19 PM
1090	If transit were more reliable and frequent I'd be more likely to take spur-of-the-moment trips.	3/6/2015 8:19 PM
1091	If service was more reliable and more frequent I would be more likely to use transit on spur-of-the-moment trips.	3/6/2015 8:17 PM
1092	I mostly walk to take the 41; I would like more 41 buses downtown	3/6/2015 8:12 PM
1093	I will DRIVE to west UW and continue to catch the 355.	3/6/2015 8:10 PM
1094	The downtown to Fremont Bridge routes are the most essential for my commute in the northern region, and	3/6/2015 8:04 PM
1095	read the alternatives differences....pretty much lists the drawbacks to alternative 1	3/6/2015 8:03 PM
1096	Bus is my primary mode of transportation, so I will figure out how to use the new routes. However, in the case of the described in item 8 above, I may need to switch to Car2go or taxi.	3/6/2015 8:03 PM
1097	I would be able to get to more places more easily.	3/6/2015 8:01 PM
1098	Why?	3/6/2015 7:57 PM
1099	Shorter wait times at origin and points of transfer.	3/6/2015 7:57 PM
1100	I'm about to finish school and expect my route needs to change.	3/6/2015 7:55 PM
1101	Much better frequency to many destinations I care about, especially Wallingford and Fremont	3/6/2015 7:50 PM
1102	because more frequent buses from light rail stations would decrease travel times.	3/6/2015 7:47 PM
1103	I can always walk or bike	3/6/2015 7:42 PM
1104	It would no longer be easy for me - need service to Montlake, not to U District	3/6/2015 7:41 PM
1105	I would not be able to get to the bus stop	3/6/2015 7:40 PM
1106	Not exactly sure but I'm concerned that I would have a harder time getting to and from downtown. I sometimes come home around 11 pm when I've ushered at one of the theaters(Paramount or The Moore.) Now I'm comfortable walking alone the two blocks from the bus stop at NE 80th St and 40th Ave NE	3/6/2015 7:21 PM
1107	Maybe easier to get to downtown Seattle from the Eastside.	3/6/2015 7:20 PM
1108	Because there's nothing here about NW Seattle	3/6/2015 6:55 PM
1109	Frequent connections, more coverage to more places	3/6/2015 6:53 PM
1110	I would use transit less, as there would be less service to my neighbourhood at NE 75th Street and 35th Ave NE during non-peak hours. I'm actually looking at MOVING to another neighbourhood closer to downtown in order to get better metro service to downtown.	3/6/2015 6:30 PM
1111	Weekend service to Northeast Seattle + suburbs are major for me. More service to Capitol Hill and Downtown mean I won't drive as much	3/6/2015 6:30 PM
1112	It would take dipping into my pocket twice to go to the same area that I now can do on Metro.	3/6/2015 6:22 PM
1113	because I wouldn't be able to walk to the bus stop.	3/6/2015 6:19 PM
1114	Currently, no frequent (every 15- minutes) buses run anywhere near my house. After the change, the 65 will come every 15 minutes! This is awesome! I also like how you removed all day half hour service looping through View Ridge -- almost no one used the bus in this area, and it made the 71 half an hour slower. The frequent 65 is much more important to me than the meandering 71.	3/6/2015 6:17 PM

1115	It really doesn't change access to downtown. It does make it faster but only because Link is faster than the 71/72/73X.	3/6/2015 5:53 PM
1116	I would take the 542+Link combination suggested to Redmond. Wouldn't mind it as an alternative to the 545.	3/6/2015 5:51 PM
1117	More pickups means less waiting time so more chances to ride.	3/6/2015 5:50 PM
1118	See above. There would be no bus out of Madison Park, so I'd drive!	3/6/2015 5:45 PM
1119	Faster to get from Ballard to University.	3/6/2015 5:40 PM
1120	Quicker and easier to get to the U-District.	3/6/2015 5:38 PM
1121	More direct route to get to U-Village from Capitol Hill. Shorter wait times.	3/6/2015 5:38 PM
1122	I would have to transfer from 71 (or lack there of) to either light rail or some other bus. I can take a 71 without transferring now...why would I want to transfer if I don't have to now????? I *knew* this would happen. You will rot.	3/6/2015 5:37 PM
1123	deletion of one of my most frequently used routes!	3/6/2015 5:29 PM
1124	Loss/degradation of multiple options	3/6/2015 5:28 PM
1125	I don't travel very often to UDistrict or neighborhoods in N Seattle	3/6/2015 5:19 PM
1126	The 16 would become out of reach for me. It would eliminate easy access to University Avenue, or, best case scenario, increase travel time by an entire twenty minutes. Diverting the 71 to Sand Point Way does not make sense, since they already have service	3/6/2015 5:17 PM
1127	it's already too difficult to get to the east side and underserved areas, especially evenings and weekends. I work til 7pm, the bus is useless to/from east side for me after work.	3/6/2015 5:12 PM
1128	It depends where the bus stops will be. My daily commute by bus is several miles. If I need to walk too far to get to the bus stop, it may be easier for me to simply walk.	3/6/2015 5:11 PM
1129	I rely on 373x to commute from Victory Heights to UW everyday for work. If this route is being removed from the plan, my commute time will greatly increase.	3/6/2015 5:10 PM
1130	It's more frequent.	3/6/2015 5:09 PM
1131	I will be much more likely to use the light rail than the long bus ride downtown. Also, will use light rail to get to Capitol Hill. Just need to see if there is a convenient way to get to the light rail stations. I could see walking down, weather reasonably willing, but would be nice to have a quick and efficient way to get back up 35th at the end of the day.	3/6/2015 5:08 PM
1132	Shorter wait times are the most important to me.	3/6/2015 5:06 PM
1133	I could use transit to reach the new Light Rail station at Montlake fairly easily	3/6/2015 5:01 PM
1134	I mainly use the bus for going downtown from N. Capital Hill and will use the 10, 12, 25	3/6/2015 4:53 PM
1135	Alternative 1 provides more frequent, direct service between places I want to visit. Places that aren't directly served have frequent connections.	3/6/2015 4:49 PM
1136	I have no choice -- I don't own a car.	3/6/2015 4:48 PM
1137	More frequent service means I need to plan less. I just walk to the stop and get on the bus, and love that the bus takes me to the new light rail.	3/6/2015 4:47 PM
1138	Transit is my primary mode of transportation to work M-F, and I am unlikely to change that.	3/6/2015 4:45 PM
1139	increased 48 service.	3/6/2015 4:43 PM

1140	I work on the NOAA campus at Sand Point and commute from Fremont. With the changes to the route 30, my door-to-door commute went from 35 minutes to roughly 50 minutes because I now have a 15 minute walk from the 75 on Sand Point Way NE onto the campus. As a result, I more often carpool with a coworker to avoid two nearly mile-long walks to the bus stop each day in dark or inclement weather. With the changes to the 16, both my coworker and I myself could more easily and frequently commute to work via bus.	3/6/2015 4:34 PM
1141	the alternative do not address my concern	3/6/2015 4:30 PM
1142	I already use transit as my primary source of transportation	3/6/2015 4:28 PM
1143	I could more easily get to the infrequent places I visit such as ballard, fremont, wallingford by using the new link light rail station to get to university district and catch a bus to those other neighborhoods. But, overall on a daily basis I will not be able to get to the places I actually need to go by bus, including Montlake Community Center and 148th Ave NE in Redmond. Two main routes that I use to get to key places on the Eastside and in Montlake (242 and 25) will be much more difficult to access by public transportation if no buses go there.	3/6/2015 4:26 PM
1144	More frequent and more reliable.	3/6/2015 4:18 PM
1145	Because I think it will be easier for me (disabled rider).	3/6/2015 4:16 PM
1146	I could go more places more often.	3/6/2015 4:14 PM
1147	I use transit all the time anyway but I would be happier about it with alternative 1	3/6/2015 4:12 PM
1148	My major transportation is Metro and Sound Transit.	3/6/2015 4:10 PM
1149	None of these changes appear to include Woodinville where I live.	3/6/2015 4:10 PM
1150	It is designed for commuters. I am an elderly without a car. I use Metro for errands, meetings, visiting friends and family and to reach other neighborhoods.	3/6/2015 4:08 PM
1151	The most viable route for me to and from work is the 64x. It already takes approximately twice as long as commuting by car each direction. As expensive as parking is, time has value, too, and I strongly believe the proposed route change to South Lake Union would make this bus trip longer, especially in the evening.	3/6/2015 4:07 PM
1152	Easier access would encourage me to go out later in the day.	3/6/2015 4:07 PM
1153	Longer walks to more crowded buses does not good transit make.	3/6/2015 4:04 PM
1154	I would cut out the middle-man bus lines 10, 11, & 49.	3/6/2015 4:03 PM
1155	Better connections to place I might like to go where I currently don't go or only go in a car,	3/6/2015 4:02 PM
1156	Easier to get to nighttime and weekend destinations. I already use Metro for commuting.	3/6/2015 4:01 PM
1157	Because I rely on transit for everything I do, and I go all over the city.	3/6/2015 4:00 PM
1158	My route would be gone and takes too long to walk the extra distance to ride a much slower route and still have to transfer downtown.	3/6/2015 3:56 PM
1159	If the 73 becomes less accessible to me, I'll have to start using the Hyde Shuttle for doctor appointments in the U District.	3/6/2015 3:52 PM
1160	I would drive. I would either drive so that I didn't need to transfer buses, or I would just drive all of the way.	3/6/2015 3:51 PM
1161	I would have to walk 10 minutes to the bus stop. I can ride my bike to UW in that same time.	3/6/2015 3:49 PM
1162	I want a quick ride between downtown and Capitol Hill or Capitol Hill and the Seattle Center. The current routes meet this need as is. I objected to the elimination of ROute # 47 which was the most convenient for me. It is still my preference since it avoided the congestion on Broadway. I don't see how the #49 is going to be able to maintain its schedule with this additon	3/6/2015 3:44 PM
1163	The 372 is not as frequent as I would like. This would give me the option to go downtown in less time and take the 312 or ST522 from Downtown easier.	3/6/2015 3:43 PM
1164	More transit per hour	3/6/2015 3:43 PM
1165	Might be moving before implementation, although new home and work would be determined partially by how the buses are configured	3/6/2015 3:43 PM
1166	simpler	3/6/2015 3:42 PM

1167	My needs won't have changed.	3/6/2015 3:41 PM
1168	Other than walking, transit is my preferred mode of getting from Point A to Point B. If Alt.1 proves to be more convenient, I might use transit more often.	3/6/2015 3:37 PM
1169	Right now, if I have to get to north Seattle (aside from UW, which I always take transit to), I drive from my home in Rainier Beach. If there were options from the new Light Rail station, I would most likely choose to take the bus/transit.	3/6/2015 3:34 PM
1170	I need a direct connect to light rail at UW to get to Rainier Beach.	3/6/2015 3:32 PM
1171	My main use of transit is to get to work. It might affect how often I use transit to get downtown and Northgate mall.	3/6/2015 3:31 PM
1172	I would bike more, since transfer wait times usually negate any time saved by taking transit, when compared to bicycling.	3/6/2015 3:29 PM
1173	More frequent buses mean that if I miss one, I'm less likely to say "fuck it" and hop in my car rather than wait a half an hour for the next one.	3/6/2015 3:28 PM
1174	No Car.	3/6/2015 3:27 PM
1175	I have no other option. But as it seems right now, this might increase my total travel time, simply because I'll have to walk farther to get to light rail or wait for the 73.	3/6/2015 3:27 PM
1176	i use it daily now and often on the weekend so hard to increase use	3/6/2015 3:24 PM
1177	access to SeaTac by Link rail	3/6/2015 3:23 PM
1178	Slower, less convenient, fewer available stops/transfer points	3/6/2015 3:21 PM
1179	I have to use transit to get anywhere so I don't really have any options.	3/6/2015 3:20 PM
1180	A more direct and faster route to get from Capitol Hill to U-Village via the UW Link station and the 65.	3/6/2015 3:18 PM
1181	Without specific numbers on routes and times, it's difficult to tell how exactly it would affect me (the change to one key route for me might make the difference in how I ride either on a specific day or all the time)	3/6/2015 3:18 PM
1182	You would have less transit in my area.	3/6/2015 3:16 PM
1183	The higher frequency means more reliable schedules and shorter transfer times.	3/6/2015 3:14 PM
1184	44/5/E & D are my most used routes now and in the imediate future.	3/6/2015 3:10 PM
1185	My main criteria in choosing to ride transit or not are convenience and speed vs. travel by bike or car. I am not sure how alternatives 1 or 2 would affect these criteria, though it sounds like it would most likely increase both convenience and speed (so most likely guess, if I had to guess, is that I would use transit a little more -- only a little more because I use it quite a bit already).	3/6/2015 3:10 PM
1186	I go from either Northgate or UW to Downtown Bellevue the most, so doesn't seem it would impact that.	3/6/2015 3:10 PM
1187	I don't like not being able to ride on one bus north of 92 around to the transit center, This is especially difficult for seniors and others who are mobility impaired. This route as is provides service to several medical facilities, banks, pedestrian entrances to Northgate Mall. Taking that away is inconsiderate and unnecessary.	3/6/2015 3:09 PM
1188	Better service downtown from the line nearest me would make using transit more convenient for me.	3/6/2015 3:07 PM
1189	I would have more options to go where I would like to go.	3/6/2015 3:06 PM
1190	I go with whatever gets to my location at the time I need to be there.	3/6/2015 3:04 PM
1191	I live in Wallingford, but don't travel to other places in north Seattle super frequently anyway, so my use of transit wouldn't be very affected by changes in north-Seattle-to-north-Seattle buses. The exception would be traveling from Capitol Hill to/from Wallingford, which is currently annoying on transit at night. Depending on how quick/reliable the buses are at night, I could see my transit use increasing for that route.	3/6/2015 3:02 PM
1192	It would amke a few connections easier that I am currently working around by driving to Northgate for example to begin my journey.	3/6/2015 2:59 PM
1193	More frequent service, seemingly wider service area. I have to walk 10 min on both sides of my commute (20 min total) currently	3/6/2015 2:59 PM
1194	am going north maybe 4-5 times a month	3/6/2015 2:59 PM

1195	We are getting older and prefer not to drive so much. More frequent service means not having to stand at bus stops for so long. We want to be able to stay in our own home and still get around the city easily.	3/6/2015 2:58 PM
1196	Either Alternative means going from super convenient options to merely 'pretty good' options.	3/6/2015 2:57 PM
1197	It's a 15-minute walk from the 77th Street NE/Sand Point Way stop into NOAA. If the 30 is discontinued and no direct service is available directly to NOAA, I would have to consider driving or changing jobs.	3/6/2015 2:56 PM
1198	I would shift from a university way through route to one connecting to the light rail.	3/6/2015 2:56 PM
1199	It would allow faster service and more transit options more frequency.	3/6/2015 2:56 PM
1200	Farther walking distance to certain routes would likely encourage me to drive for non-commuting purposes.	3/6/2015 2:56 PM
1201	Transit time would be greatly increased - no access from Northgate = no access from the north end at all. All other routes go down Westlake or I5. I would have to transfer either to the 70 (although that is difficult because there are no good routes from NE Seattle to U-district.	3/6/2015 2:53 PM
1202	I don't have a car and depend on transit completely, so I don't really have a choice to use it less.	3/6/2015 2:53 PM
1203	No car	3/6/2015 2:53 PM
1204	More frequent & faster service to downtown	3/6/2015 2:51 PM
1205	The SR-520 proposals are a disaster for Eastside riders who need to go downtown.	3/6/2015 2:49 PM
1206	I always have to use transit anyway.	3/6/2015 2:48 PM
1207	I use it every weekday now, so I really can't use it much more. That said I'd think taking a bus to the stadium station and then light rail to downtown might be faster than my current trip on the 76, especially when I-5 is backed up.	3/6/2015 2:47 PM
1208	Eliminating my route (12).	3/6/2015 2:46 PM
1209	Because I commute from Mountlake Terrace to South Lake Union, I don't think the Alternative 1 changes will impact me directly	3/6/2015 2:45 PM
1210	I don't drive. My first choice for transportation is Metro.	3/6/2015 2:45 PM
1211	I already use transit frequently, but this would improve my trips.	3/6/2015 2:44 PM
1212	Much easier and more trustworthy transfer, faster overall trip time thanks to light rail and transfer effectiveness.	3/6/2015 2:44 PM
1213	It takes 45-60m to get to 23rd alongside Denny if I have to ride the 8 at peak. I'd much rather pay a company like Uber to take a less congested route.	3/6/2015 2:44 PM
1214	Knowing I don't have to wait as long for a bus is nice, especially when I have to take two buses and factor in the connection times - more buses more often means less waiting in-between bus connections.	3/6/2015 2:42 PM
1215	It would depend on how much route 16's time between Queen Anne and Northgate mall changed.	3/6/2015 2:42 PM
1216	More frequent service, service on weekends for 372, it just looks good to me. I do wonder about Park and Ride if 372 only starts in Lake City for weekend service to the U.	3/6/2015 2:41 PM
1217	I don't want my route to go through Fremont. I'll drive instead.	3/6/2015 2:41 PM
1218	Primary use is currently a van pool - transit is my back-up, but is used often enough that I need it to work well	3/6/2015 2:40 PM
1219	I use transit for most of my travel to and from work. I am not able to use it any more than I currently am. I think I will enjoy travel more with these changes, however.	3/6/2015 2:40 PM
1220	I go from Wallingford to North Seattle College	3/6/2015 2:40 PM
1221	I would consider moving to one of those neighborhoods if ease of transit to my workplace in Bellevue was updated.	3/6/2015 2:40 PM
1222	I don't yet know how close network locations would be from my home.	3/6/2015 2:38 PM
1223	More routes to North Seattle? Yes please! Especially if they're more frequent and take less travel time. Traveling to Northgate from Capitol Hill takes forever. Heck, traveling to U-District takes a while.	3/6/2015 2:36 PM

1224	It is already difficult to get around Seattle, with shortened routes and more transfers. (For example, my daily commute between Capitol Hill and Downtown requires a transfer for a simple, two-mile commute.) If routes are eliminated to reduce "duplication" this will get even worse.	3/6/2015 2:36 PM
1225	I don't know what life holds for me in two or more years as to where I will be living.	3/6/2015 2:34 PM
1226	I would be connected to NE neighborhoods with one bus rather than a 2 or 3-bus transfer.	3/6/2015 2:33 PM
1227	I live on the 75, and having increased frequency will make it more convenient to take the bus.	3/6/2015 1:13 PM
1228	Link provides a good off-peak speed boost for travel to and from downtown.	3/6/2015 1:11 PM
1229	I currently use the 73 from Jackson Park/Pinehurst to the U District. It looks as if this route will be changed.	3/6/2015 1:04 PM
1230	Because the buses would come more often, I would be more inclined to leave my car behind and use transit.	3/6/2015 12:01 PM
1231	I would probably use it the same since it's my primary mode of travel, but it would be more convenient.	3/6/2015 11:48 AM
1232	I would have a more legible and frequent service network to get around the places I most frequently travel between in the city. Given the option between slow one-seat rides to limited destinations, and fast multi-seat riders to a larger set of destinations within the same travel timeframe, I choose and fully endorse the latter!	3/6/2015 11:47 AM
1233	too many changes to get where i need to go.	3/6/2015 11:17 AM
1234	No midday, late night or weekend service along 15th Ave NE. I don't necessarily mind having to travel farther in order to access a bus to commute to UW; however, I could see myself driving more frequently depending on my health or inclement weather.	3/6/2015 10:49 AM
1235	I would probably need rides home from capitol hill less (I could take the new super frequent UW Station to Northgate Transfer center). I would probably give up going to Greenlake or Wallingford by bus though. I would take a bicycle instead. :(3/6/2015 10:32 AM
1236	It would provide more frequent service throughout more of the day and night which makes transit more usable. It would also connect with Link, enabling faster trips across the Ship Canal.	3/6/2015 10:14 AM
1237	Increased frequency! I hate having to deal with timetables - frequent service means I won't need to.	3/6/2015 10:14 AM
1238	I would try taking Link from downtown to uw station then route 67 or 45 to Roosevelt where I work. Currently I drive.	3/6/2015 10:12 AM
1239	transfer times are currently prohibitive. With more frequent service, I can catch a bus without having to plan out my trip in advance, which gives me enough flexibility to get home easily without having to bring my car.	3/6/2015 10:05 AM
1240	Service at 25th and 65th is currently sporadic. Making the 372 run every 15m and connect to the light rail will drastically improve service to the area. Adding the 16 restores access to Fremont + Seattle Center that use to be available on the 30.	3/6/2015 9:29 AM
1241	Changing the route 73 to peak only would eliminate my ability to take transit for any purpose other than going to work, and I would have to drive at non peak times. Please keep the 73 as all-day service.	3/6/2015 9:17 AM
1242	Because the current direct access would be changed to at least one transfer, maybe more. Very inconvenient.	3/6/2015 9:15 AM
1243	Because in moving the 31/32 from Stone Way to Wallingford Ave, you make the bus stop too far away for me. I would more likely use Car2go or Uber to get to work at the university.	3/6/2015 9:09 AM
1244	I have no way to get my kids home other than them walking 4 miles.	3/6/2015 9:07 AM
1245	Parking is not much of an option at the UW.	3/6/2015 9:02 AM
1246	I currently don't go to North Seattle often as I live in Lower Queen Anne/Uptown and the time it takes to get there coupled with traffic and frequency of service make trips undesirable. I previously took a Spanish class at a private language school at NE 45th St and Union Bay PI NE. At the time, I lived in Belltown. It would take me ONE HOUR to get home on transit as classes let out at 8:30 p.m.-9:00 p.m. and I took this class during UW's summer session. I no longer support this local business as I cannot get there in a timely manner. Were a restructure to occur and increase frequency and access, I would like take this course again.	3/6/2015 8:47 AM
1247	Northeast Seattle would be much less of a day trip.	3/5/2015 11:44 PM
1248	Routes in northeast Seattle would generally be made more frequent, and getting to the Eastside from the U-District would be easier without having to make a transfer at Montlake.	3/5/2015 10:39 PM

1249	Because I don't like the fact that my direct route # 72 would be cancelled and there is no indication on the proposals that its replacement would connect to Light Rail at Husky Stadium.	3/5/2015 10:24 PM
1250	What used to be 1 to 1-1/2 hr. trips have become 2 to 3 hour trips without the 30. Alternative 1 does not give me a good enough connection to light rail to shorten that back down.	3/5/2015 8:36 PM
1251	Because of the more frequent service	3/5/2015 6:52 PM

Q10 How would you improve Alternative 1 in north Seattle – keeping in mind that the goal of this network concept is to have a consolidated, frequent network of service?

#	Responses	Date
1	start earlier so that if you have to combine 3 buses into 1 there isn't a large flux for the peak times even if they are more frequent-the earlier and more frequent offers more options and people to potentially space out which bus they catch e.g. if you offer a 5, 510, 520, 530 and the 530 is always packed i may try to take the 520 -at least it's not super earlier (like 30min) so i'm more inclined to still get up early just to catch a bus only 10min earlier; offer more buses, maybe not consolidate 3 routes into 1 maybe only 2 into 1 OR none -offer larger or more park and rides b/c now you are condensing or taking away routes that service outlying areas that make more stops in 'random' places-if you have to increase the travel time for people now or distance to their bus stop, now they have to drive somewhere, like a park and ride-park and rides are already super crowded by peak time, so account for that many more cars coming to them	4/2/2015 7:29 AM
2	I can offer no alternative with your goal in mind. I can, however, offer that as a rider, I do not share your goal.	4/2/2015 2:11 AM
3	I'm fairly new to Seattle, so I am not sure I can speak to provide a more consolidated, frequent network of service. I would suggest extending the hours of transportation in high commuter areas on nights and weekends. Students work in all hours of the day and it is frustrating feeling that one has to take a taxi home past a certain hour.	4/1/2015 9:54 PM
4	I like the concept. Go forward with Alternative I	4/1/2015 7:40 PM
5	Add shorter frequent bus routes within the areas where service is farther away to make access to the new more frequent services easier.	4/1/2015 6:12 PM
6	Losing route 25 means I would have to walk to Sand Point Way, a 15 - 20 minute walk.	4/1/2015 5:05 PM
7	I'm a little torn about the 65 not going onto the UW campus, from the perspective of connecting to the stadium light rail station. The good part is it'd be a shorter walk to the light rail station. The downside is that it would get stuck in that awful traffic on 25th/montlake. It might be better to have the longer walk, especially with the pedestrian bridge being built.	4/1/2015 4:05 PM
8	I would like to see more use of restrictions on single-occupant automobile use in heavily congested areas. The *very* large number of cars currently filling certain streets during rush hour slows everybody down--public transit included. To better achieve the goal of more frequent service, if it's to be timely and reliable (and not just "more buses stuck in the same ol' traffic jams"), give buses the clear priority: their own lanes, or even better: devote one or more roads, or significant stretches of road, between downtown and the U-District exclusively to public transit. Consolidating service along those dedicated paths would reduce fuel/energy being wasted while idling in heavy traffic, as well as save riders time and frustration. This means that our fares could be leveraged more effectively (less of it having to pay for fuel/energy), in addition to dramatically reducing the now-daily irritation that gives rise to feelings of, "Why am I paying so much every day for ...this??"	4/1/2015 3:23 PM
9	I believe Alternative #1 is a great concept after light rail opens stops at Roosevelt. Please delay until 2021.	4/1/2015 12:01 PM
10	I think being able to utilize Light Rail where possible is excellent as it reduces road traffic congestion and in commuter hours is far more convenient for everyone - traffic is reduced on the roads as there are less buses, whilst commuters using LR get to avoid sitting in traffic!	4/1/2015 10:34 AM
11	?	4/1/2015 8:48 AM
12	I might take the general thrust of it even further. Reduce overlap and make people transfer more in exchange for more frequency. Added amenities at fewer/busier stops would be a real selling point.	4/1/2015 1:28 AM
13	Keep the 73 on the existing route to UW, but instead of having it continue to down town, loop back north on either Brooklyn Ave or 12th Ave to connect with the UW light rail station and then reroute back to 15th on either 43rd or 45th.	3/31/2015 10:33 PM

14	I would just like some of the existing routes to go a bit further north or south so the area between 50th and 65th and between Roosevelt & 15th has what less of what looks like a gap in service. Also more reliable service along Eastlake, into South Lake Union and carrying on to the Seattle Center.	3/31/2015 10:09 PM
15	Extend service from eastside 255 to Magnuson Park	3/31/2015 9:53 PM
16	continue 255 service north to Magnuson	3/31/2015 9:29 PM
17	Pressure UW to allow proposed shortest-distance connections between bus stops and UW station.	3/31/2015 9:28 PM
18	Keep route 71 as is	3/31/2015 7:05 PM
19	Improve connections from smaller areas to the major hubs so that the service is optimized. It doesn't help as much to have increased service in a major network if the connection from my home is still slow.	3/31/2015 6:56 PM
20	Do something about a bus that goes to the University village and say 65th to Montlake and North Capital hill.	3/31/2015 6:25 PM
21	_Increase_ routes and frequencies from Northgate P&R and from 15th Ave. NE/NE Northgate area to -University -Seattle Center -Downtown We're talking at minimum rtes 73, 72, 41, 25, 48, 16	3/31/2015 5:32 PM
22	Keep 31/32 on Stone Way	3/31/2015 4:54 PM
23	Keep the 43 running.	3/31/2015 4:35 PM
24	I am excited about the alternative 1 plans specifically for the 48 (or soon to be 45) as I am a UW employee who has suffered with the September 2014 cuts to the 48 that have not been reinstated. I am concerned that the new plans for the 45/48 do not include increased buses during peak time, as the current frequency of routes during peak time IS NOT ENOUGH. In the morning, the bus is very crowded with high school students going to Roosevelt high school, and then becomes almost a shuttle for UW students along 15th ave, picking up 7-10 UW students at each stop, looking for a quick ride to campus. The buses are hugely OVERCROWDED. They also have had the frequency reduced, so the wait time in the morning is usually 10-15 minutes (depending on delays.) The afternoon service is even worse- with such bad delays in the afternoon that buses will often be 10-20 minutes delayed, and I have missed a bus that was too full with passengers and had to wait another 10-20 minutes later. I have had to leave my house earlier, and get home much later, all because of these bus cuts. My work day has had about 45-60 minutes added to it because of these cuts. You guys also cut the 48X, a HUGELY popular morning route for UW students and staff (and Roosevelt HS students) that before the cuts actually could have used a few more express buses. The afternoon route would have been more popular I'm sure, but it was ill timed at 5:30, not quite the peak time. We need the 48 Express back! The new City of Seattle services plan to only add ONE morning bus to the 48 route, which is not enough to bring service back to where it was before the cuts (which was still already crowded and delayed conditions.) I would really like to see Metro replace the routes that they cut in September. Thank you!	3/31/2015 4:06 PM
25	We do need busses in the Ravenna neighborhood again. There are buses for rush hour but none during the day or on weekends. This is very hard on the elderly and infirm, both of whom are in that area.	3/31/2015 4:02 PM
26	Continue the 255 up to Magnuson Park Connect Roosevelt & 45th and Convention Place Station area	3/31/2015 3:56 PM
27	Realize that some people need to go east and west in this city and eliminating those routes really makes using transit difficult. Alt 1 has NO buses that go east/west from 65th to Northgate/125 which is crazy. 65th is already crowded enough as is Roosevelt. By cutting the 68 specifically makes all those people that come from the north end sit in the traffic we've avoided.	3/31/2015 3:53 PM
28	A priority should be given to improving the efficiency of transferring between the bus and light rail station at the Husky Stadium. The bus stop that is currently in front of the UW Medical Center should be moved closer to Montlake Blvd.	3/31/2015 3:38 PM
29	Alternative 1 or any variation would benefit from an improved transfer experience at the University of Washington Link light rail station; in the near-term, the eastbound/southbound bus stop in front of UW Medical Center should move as close as possible to Montlake Blvd. to minimize the walk distance for those transferring to/from the light rail station; in the longer term a solution such as that described here, "Improving Bus-Rail Integration at UW Station", should be studied, funded and implemented: http://seattletransitblog.com/2015/01/30/improving-bus-rail-integration-at-uw-station/	3/31/2015 3:38 PM

30	The network is great, but I offer the follow suggestions for fixing the Stevens Way quagmire: 1) Metro's alternative 1 concept for route 65 proposes running the route through the campus in a counter-clockwise live-loop. This is a good step towards mitigating this bus-rail interface disaster and I urge metro to consider the same routing for route 372 so that transferring passengers headed towards Lake City can use the 65 and 372 interchangeably without trekking onto campus. 2) I realize that live-looping the 372 might not be practical - if that is the case, I offer this: provide a peak hour/peak direction only version of rt 372 along its current route and a local service on 25th ave between Lake City and the UW Only. Replace 372's local midday service along SR-522 provided by an extension of another route (234 or 331 come to mind) . 3) For routes 31/32/75, I urge metro to consider routing these service onto Pacific/Montlake Blvd during nights and weekends (periods when the majority of riders are not headed to campus destinations) I realize that having a separate night routing is bad for route legibility, however forcing passengers to navigate a transfer that requires 2 pages of written instructions to find is also pretty bad for legibility. 4) I urge metro staff, the executive, the sounding board, the council, and all other involved parties to immediately start pushing hard to get HOV lanes in place on Montlake Blvd ASAP. Metro was seriously negligent to not use this last 10 years to lobby hard for this key improvement once it knew the station would be located where it is. While I support Alternative 1, it is really clear to me that it only functions half as well as it could thanks to the lack of access to the station from the north via Montlake Blvd. The fact of the matter is, even after LINK opens to Northgate, UW station will still be the most logical place to intercept riders on north-south buses on 25th ave, 35th ave, and Sand Point Way. It's time to get moving on making Montlake Blvd work for Metro.	3/31/2015 3:29 PM
31	I think it would be really helpful to connect Capitol Hill, Fremont and Ballard or Ballard, Fremont and UW.	3/31/2015 3:29 PM
32	Extend Rt. 76 northward up 35th Avenue NE, at least to 95th Avenue NE.	3/31/2015 3:28 PM
33	Better service to NW Seattle.	3/31/2015 2:50 PM
34	Look for places where the stated concerns of "experts" in specific problem areas can be mitigated; hybridize where it makes sense to do so to keep the service human.	3/31/2015 2:16 PM
35	Keep the 43 and the 11. If you do away with the #43 and 11, you'll have to increase the number of buses for the 48 and 8 (and decrease traffic along Denny Way). Metro will also have to figure out how to provide service to those on and around 23rd, particularly those who are nowhere near 23rd and John.	3/31/2015 1:42 PM
36	Any bus route coming from Captiol Hill down Montlake is the only change I would advise	3/31/2015 1:37 PM
37	try to get something similar to route 72	3/31/2015 1:34 PM
38	the only route to connect Ravenna and Lake City currently is 72 and it is a major through way for many commuters from Bothell, Lake City and North Seattle locations like mine in Monroe. Community transit is increasingly limited and having options is why I appreciate Metro transit so much. My hope is to find a way to preserve this line. Perhaps a reroute in Ravenna along less neighborhood roads?	3/31/2015 1:26 PM
39	I'm not sure - you can't have consolidation without reducing the number of places people can catch the bus, which by definition makes it less convenient for people who don't happen to live/work near a remaining station.	3/31/2015 12:58 PM
40	1. Extend new route 255 to Magnuson Park 2. Connect Convention Place area to Roosevelt & 45th	3/31/2015 12:49 PM
41	Maintain route 43 service level	3/31/2015 12:39 PM
42	Connect the UW Light Rail Station to more NE Seattle neighborhoods (up 35th?).	3/31/2015 12:24 PM
43	Neighborhoods need to be served better. A transit system based on requiring riders to drive someplace in order to connect to a bus or light rail puts more cars on the road, makes parking challenging in neighborhoods close to transit, and marginalizes disabled and elderly people.	3/31/2015 12:05 PM
44	I am concerned that elimination of routes will cause many riders to suffer major inconvenience getting to their bus service, which would outweigh any benefit of increases in frequency of service.	3/31/2015 12:00 PM
45	An East-West Rapid Ride route connecting Ballard to Seattle Children's Hospital and running to accommodate healthcare workers who work 12 hr shifts.	3/31/2015 11:58 AM
46	One of the downsides of rapidride that I've seen is that it appears to consolidate buses, but result in slower service overall. If the travel time improvement estimates provided in the proposal are accurate, I don't have much of a concern, but if it's anything like how the Route B or D functions, my experience has been that while service is more frequent and consolidated, it's also much slower on the whole than the individual buses used to be.	3/31/2015 11:54 AM
47	I struggle to have a vision of this	3/31/2015 11:50 AM

48	Less frequent stops for some routes during mid-day when slower and increasing frequency of stops then in the evenings/mornings to cut cost to allow for more ease and increasing routes or network of bus routes overall.	3/31/2015 11:34 AM
49	• "Continue the 255 up to Magnuson Park" • "Connect Roosevelt & 45th and Convention Place Station area"	3/31/2015 11:29 AM
50	Please consider some E-W routes that do not go through the UW campus hub. it slows travel times way down.	3/31/2015 11:28 AM
51	start bus service by 3:30am to arrive at Children's by 4am shift	3/31/2015 11:28 AM
52	Do not eliminate the Montlake freeway stop.	3/31/2015 11:26 AM
53	I wouldn't remove service without a similarly convenient replacement	3/31/2015 11:23 AM
54	I would not delete services that are regularly full and are not being replaced, such as the 242.	3/31/2015 11:17 AM
55	Continue the 255 up to Magnuson Park. Connect Roosevelt & 45th and Convention Place Station area.	3/31/2015 11:05 AM
56	(1) Make sure the you run lots of feeder bus lines into the Link transit station. (2) Run the Link trains frequently during peak times, and (3) For those buses that commuters rely on for transportation to work make sure they do not take routes that wind all around through the University District.	3/31/2015 10:55 AM
57	Connect Roosevelt & 45th and Convention Place Station area. Continue the 255 up to Magnuson Park.	3/31/2015 10:52 AM
58	Cost efficient shuttle services to get people from their homes or areas most effected by the consolidated to major transit stations.	3/31/2015 10:47 AM
59	We just need one of the connections to Link extending further north. With our apartments, parts of Pinehurst and Jackson park are as dense as much of Northgate. And many of those people depend on transit. I like some of the ideas suggested in this article and tend to agree on option 2: http://seattletransitblog.com/2015/03/15/pinehurst-bus-suggestions-for-alternative-one/ But I'm very open to other ideas. I just feel like our neighborhoods were ignored in the first draft. I'm all for promoting the network of frequent service but there's a balance, especially when it makes it harder to get to investments like our Light Rail.	3/31/2015 10:32 AM
60	Continue the 255 up to Magnuson Park Connect Roosevelt & 45th and Convention Place Station area	3/31/2015 10:04 AM
61	Continue the 255 up to Magnuson Park. Connect Roosevelt & 45th and Convention Place Station area.	3/31/2015 9:52 AM
62	I don't know enough about the plan to make a suggestion. This plan has not been well-publicized. One suggestion would be to continue bus service between Montlake and downtown.	3/31/2015 9:30 AM
63	Keep the 43 bus. It currently picks up a lot of people for whom the light rail line is not a viable option.	3/31/2015 9:12 AM
64	Don't cancel 43.	3/31/2015 8:47 AM
65	Continue the 255 up to Magnuson Park	3/31/2015 8:40 AM
66	More frequent lines to Seattle Childrens from the eastside.	3/31/2015 8:19 AM
67	If the goal is to consolidate service, why not reduce all of the bus stops altogether?	3/31/2015 8:00 AM
68	Continue the 255 up to Magnuson Park Connect Roosevelt & 45th and Convention Place Station area	3/31/2015 7:19 AM
69	Ensure that the rainier vista stops in UW are moved as close to the station as possible	3/31/2015 6:49 AM
70	I'd like more East-West spines, especially north of northgate. Perhaps a two-way loop on 145th to 30th, to 125th to 130th to Greenwood to 145th? Nevertheless 145th and 125/130th are strong enough spines that they should connect the north south spines. East/West routes would strengthen the network and make the north south spines more useful.	3/31/2015 1:51 AM
71	Add a trolley bus route or two that travels within a ~1 mile radius of the UW Link station to more easily connect them with U Village, west UW campus, Montlake/Highway 520. This is a big missing link (excuse the pun). People will have to walk great distances or trunk an extra transfer to get to the Link otherwise.	3/30/2015 11:21 PM
72	Connect Roosevelt & 45th and Convention Place Station area	3/30/2015 11:01 PM
73	Make sure the frequency of buses is kept up throughout the whole day (not just normal work/commuting hours) and all days (not just weekdays). Get buses directly to places in the University District without going through UW campus--I rarely need to go to campus. I just need to get to a transfer point, and I find the long, looping route through campus to be frustrating (and very crowded).	3/30/2015 10:01 PM
74	Why do you HAVE to consolidate? My area has very poor service now, bus stops too far away as it is. We need a bus down 12th Ave. have never had this, the 2, 3 & 4 are not easy to use and so I drive!	3/30/2015 9:32 PM

75	perhaps you could consider that a multi billion dollar transportation project (SR 520) will not be serviced by bus.	3/30/2015 9:16 PM
76	Need service from Bear Creek in Redmond for Sammamish folks to get to Seattle without multiple stops/transfers.	3/30/2015 8:47 PM
77	Have some of the runs from Lake City to UW (372?) run express with only 1 or 2 stops between LC and light rail, as to have changing at UW comparable to changing in downtown (using 522). It currently takes 10 minutes from LC to downtown on 522 (or 312), but close to 30 minutes from LC to UW. Provide alternative to 72 riders who use the 'night owl' by adding after midnight runs to 41 and 372	3/30/2015 8:45 PM
78	Whose invented the goal of consolidated service? Traffic can actually dictate frequency more than other factors, so why have passengers walk farther to access transit in bad weather and dark months? A bad experience.	3/30/2015 8:36 PM
79	Continue 255 up to Magnuson Park	3/30/2015 8:21 PM
80	Personally I would like a reliable way to get from Laurelhurst to the new Husky Stadium light rail station.	3/30/2015 8:07 PM
81	Keep #43 because it serves a large population of riders as is.	3/30/2015 7:08 PM
82	more trolleybuses	3/30/2015 7:06 PM
83	????	3/30/2015 6:51 PM
84	Keep bus lines #25 and #43	3/30/2015 6:47 PM
85	Don't implement it--frequency to places I don't need to go is not as important as access to a bus in the first place.	3/30/2015 6:25 PM
86	Access is more important to me than frequency. Don't eliminate the routes that allow me to function without help.	3/30/2015 6:08 PM
87	More geographic coverage (middle ground between 1 and 2)	3/30/2015 5:46 PM
88	I would try to add a couple more hours to buses that help people leave Capitol Hill late at night. I also feel that the only change in Alt 1 that helps the NW portion of the city is the newly created 45, which doesn't appear to be very different from the existing 48 route. Perhaps if it makes fewer stops and takes less time to get to light rail it would be an improvement, otherwise it does seem to be redundant with routes we already have and would not lead to a significant increase in ridership (assuming this is the goal of this project).	3/30/2015 5:29 PM
89	I would adopt Suggestion 1 from this proposal: http://seattletransitblog.com/2015/03/15/pinehurst-bus-suggestions-for-alternative-one/ . It keeps the existing Route 67 heading straight to Northgate TC on twelve-minute headways, while having a 30-minute bus to Pinehurst avoiding the Northgate traffic mess. I would also ensure the transfer experience at the Link station is as good as possible. The farther people have to walk, the worse they'll consider it. Also, buses must wait for trains; if people miss buses, their experience will be vastly worsened.	3/30/2015 5:26 PM
90	More frequent, small shuttles between light rail and route 74 stops	3/30/2015 5:10 PM
91	Keep 545 non-rush-hours schedule Extend route of 545 (?) to cover loss of 242 Create Rapid ride similar to line E but one that serves destination east of I-5 and along SR522 Extend the hours of 41 and 372 (to Lake City only) to replace night owl runs of 72	3/30/2015 5:07 PM
92	Continue the 255 up to Magnuson Park" • "Connect Roosevelt & 45th and Convention Place Station area	3/30/2015 4:22 PM
93	Continue the 255 up to Magnuson Park Connect Roosevelt & 45th and Convention Place Station area	3/30/2015 4:15 PM
94	Continue the 255 up to Magnuson Park	3/30/2015 3:14 PM
95	Have more frequent service between the north end of the Ave (University Way), where lots of folks live, and the new link station. It would also be great to have this increased-frequency shuttling to the new Husky Stadium Link Station continue into off peak times and weekends, as the transfer between bus and Link will add travel time.	3/30/2015 2:54 PM
96	Do not implement Alternative 1, except any increased routes and frequency. King County population is increasing 1.5 - 2 % a year.	3/30/2015 2:18 PM
97	For a grid, it's missing a decent amount of unbroken east-west routes - east side 65th, west side 85th and 45th. Some of this is geography but it reduces the ability to transfer. Having service both through UW and via Montlake/UW Station is unnecessarily duplicative (although I guess it can't be helped).	3/30/2015 2:18 PM
98	Continue the 255 up to Magnuson Park. Connect Roosevelt & 45th and Convention Place Station area	3/30/2015 1:53 PM
99	Continue the 255 up to Magnuson Park Connect Roosevelt & 45th and Convention Place Station area	3/30/2015 12:30 PM
100	Continue the 255 up to magnuson park	3/30/2015 12:20 PM

101	Continue the 255 up to Magnuson Park Connect Roosevelt & 45th and Convention Place Station area Connect Seattle Children's Hospital with downtown Seattle (Pike or Pine St), via one route	3/30/2015 11:37 AM
102	Continue the 255 up to Magnuson Park	3/30/2015 11:23 AM
103	connect Roosevelt and convention place continue 255 to magnuson park	3/30/2015 11:14 AM
104	I live in Madison Valley and work in Mukilteo. This might be outside the scope of this survey, but I would like more service between Capitol Hill or UW and Mukilteo. I would prefer to not have to drive to work every day.	3/30/2015 10:54 AM
105	Continue the 255 up to Magnuson Park Connect Roosevelt & 45th and Convention Place Station area	3/30/2015 10:48 AM
106	I would continue the 255 up to Magnuson Park. Also I would connect Roosevelt & 45th and Convention Place Station area.	3/30/2015 10:48 AM
107	Continue the 255 up to Magnuson Park	3/30/2015 10:48 AM
108	Continue the 255 up to Magnuson Park Connect Roosevelt & 45th and Convention Place Station area	3/30/2015 10:41 AM
109	Frequent service with direct route from Eastside to Seattle Children's Hospital	3/30/2015 10:20 AM
110	Increased transit options from Capitol Hill to Northwest Seattle (Ballard and Greenwood in particular).	3/30/2015 10:06 AM
111	I'm fine with it as planned.	3/30/2015 9:58 AM
112	Connect Roosevelt & 45th to the Convention Place Station area.	3/30/2015 9:56 AM
113	Continue the 255 up to Magnuson Park	3/30/2015 9:56 AM
114	Include south king county connections - will the alternative and connections link south?	3/30/2015 9:55 AM
115	Don't implement it!	3/30/2015 9:51 AM
116	Go with Alternative 2	3/30/2015 9:45 AM
117	Need to add direct service to SLU without having to go downtown first.	3/30/2015 9:41 AM
118	Get rid of the short #40 buses used during rush hours (pretty much from 4-7PM). These buses are totally inadequate for the number of passengers travelling from Ballard / Fremont to S. Lake Union / downtown	3/30/2015 9:34 AM
119	Continue the 255 up to Magnuson Park Connect Roosevelt & 45th and Convention Place Station area	3/30/2015 9:21 AM
120	Keep service on the same streets. People are not going to like having to walk farther to get to the bus.	3/30/2015 8:36 AM
121	Continue the 255 up to Magnuson Park.	3/30/2015 8:25 AM
122	continue the 255 to magnuson park	3/30/2015 8:25 AM
123	Continue the 255 up to Magnuson Park. Connect Roosevelt & 45th and Convention Place Station area.	3/30/2015 8:22 AM
124	Continue the 255 up to Magnuson Park	3/30/2015 8:21 AM
125	continue the 255 up to magnuson park	3/30/2015 8:20 AM
126	extend Route 255 to another place that does not use Montlake Boulevard NE due to traffic congestion	3/30/2015 7:13 AM
127	the consolidated service would degrade transit service in general and reduce the number of people who would ride.	3/30/2015 6:53 AM
128	continue the 255 up to Magnuson Park	3/30/2015 6:31 AM
129	Given my needs, I'm not sure I would change too much about your concept. I think it is decent.	3/29/2015 10:09 PM
130	"Continue the 255 up to Magnuson Park" · "Connect Roosevelt & 45th and Convention Place Station area"	3/29/2015 10:05 PM
131	I would pursue Alternative 2	3/29/2015 9:20 PM

132	(1) Split the 67 at 100th, with one route going to Northgate TC and the other route going to Pinehurst (145th). This would give the growing Pinehurst apartment district better access to the U-District and Link. Keep the Northgate route on 100th (as it is now) to make it faster and more reliable -- avoiding the Northgate Way traffic. RossB has sketched out proposals: http://seattletransitblog.com/2015/03/15/pinehurst-bus-suggestions-for-alternative-one/ . His suggestion 2 would make both routes 20 minutes. I don't care as much whether one is more frequent than the other, but 20 is almost as good as 15 and much better than 30. Also, the Pinehurst route could perhaps be daytime-only, since the Northgate Way traffic is gone in the evenings. (2) Send the 16 to Ballard rather than downtown. That would make an east-west route even better, and give a direct transfer to Aurora (RapidRide E). The travel time from NE 65th to downtown is really slow: do you expect people to ride it all the way? This suggestion may not be feasible at present because of the need for Wallingford-Fremont-downtown service, but a full crosstown route from NE 65th to NW Market (or NW 65th) should be a goal for the future.	3/29/2015 8:55 PM
133	Continue the 255 up to Magnuson Park	3/29/2015 7:41 PM
134	As long as there was a more direct and frequent service to Seattle Childrens hospital I have no other suggestions	3/29/2015 7:40 PM
135	1. Continue the 255 up to Magnuson Park 2. Connect Roosevelt & 45th and Convention Place Station area	3/29/2015 6:37 PM
136	I would like direct service between Children's Hospital and University Ave at NE 45th via the viaduct without having to go through the University of Washington.	3/29/2015 5:47 PM
137	I don't know	3/29/2015 4:47 PM
138	Divide the current 8 route into 2 different routes (somewhat similar to this plan), but don't eliminate the 11.	3/29/2015 4:41 PM
139	All the suggestions sound good to me. In a perfect world, I'd ask for a route that goes from Central straight to Children's instead of making me transfer at UW, but I don't imagine too many people are asking for that route and transit has been very helpful with my transportation needs so far.	3/29/2015 3:14 PM
140	Nothing at this point for someone that needs good transportation going East-West. I hope it will mean my metro bus routes will have less delays and will be less packed?	3/29/2015 2:55 PM
141	Continue the 255 up to Magnuson Park	3/29/2015 2:48 PM
142	It would be nice if there was a bus that took us more directly to the light rail. With the new system, we'd walk 12 minutes to grab the 44 and then ride that to the light rail. Assuming the 44 comes every 15 minutes or more, that's not bad, but it's a bit more than I would like. That being said, I would rather have to walk a little further and have busses that are more frequent than have a bus that goes exactly where I want to go only once an hour.	3/29/2015 12:57 PM
143	Maintain service levels for routes 25 and 43	3/29/2015 11:36 AM
144	i do not use the bus in north seattle	3/29/2015 11:25 AM
145	Continue the 255 up to Magnuson Park	3/29/2015 11:18 AM
146	Run a line from NE 65th St all the way to Ballard, down around the south end of Green Lake.	3/29/2015 9:55 AM
147	Continue the 255 up to Magnuson Park Connect Roosevelt & 45th and Convention Place Station area	3/29/2015 9:54 AM
148	Bus routes should never be cut. It is more important to wait an extra 5-10minutes than to have to walk further to catch an existing route.	3/29/2015 12:49 AM
149	Continue bus route 43 as is and put bus stop of 43, 48 and 25 busses (if still running) closer to the light rail station. Or at least provide a large Park and Ride area, so one can park car close to station	3/28/2015 9:15 PM
150	Don't make me have to use multiple routes to get to downtown.	3/28/2015 8:17 PM
151	Continue the 255 up to Magnuson Park Connect Roosevelt & 45th and Convention Place Station area	3/28/2015 7:57 PM
152	For me I am always trying to figure out how to travel between Maple leaf and Children's Hospital as this is where I work. Anything to improve this commute is a bonus for me.	3/28/2015 7:49 PM
153	Bus along 65th to go south on 25th to Husky light rail stadium station. (if and when that station actually opens to the public). Be aware that all people are not commuters going downtown or to the U. District. The 71, for example, now goes to library, community centers, PCC and QFC grocery stores as well as walking distance to Wedgwood banks, coffee shops, post office etc.	3/28/2015 7:33 PM
154	Connect Roosevelt and 45th and Convention Place Station Continue 255 to Magnuson	3/28/2015 4:42 PM
155	1. Continue the 255 up to Magnuson Park 2. Connect Roosevelt and 45th and Convention Place Station area	3/28/2015 3:10 PM

156	continue the 255 up to Magnuson Park	3/28/2015 2:52 PM
157	I would start the 67 earlier in the morning to meet the needs of 73's current early riders. The first southbound service should depart from Roosevelt & Northgate Ways around 4:50am. I would also start running the 347 and 348 even earlier in order to have make successful transfers @ that location.	3/28/2015 2:35 PM
158	More options for accessing Seattle Children's Hospital from major transit connection locations	3/28/2015 1:43 PM
159	• "Continue the 255 up to Magnuson Park" • "Connect Roosevelt & 45th and Convention Place Station area"	3/28/2015 1:07 PM
160	It looks well considered and meets our family's needs well.	3/28/2015 12:12 PM
161	Just because the link is coming to the north end of time you can not forget that it cannot get everywhere and there are people who cannot drive fir various reasons and they need to use the bus to go to the grocery store ppharmacy scool the doctors etc when you take away neighborhood buses you make lives more difficult. You are also neglecting those people who work weekends bus sidnificant,y cutting weekend buses	3/28/2015 12:09 PM
162	bus service along the 25th Ave NE/Montlake corridor w/o the UW detour	3/28/2015 10:49 AM
163	don't know	3/28/2015 10:43 AM
164	continue the 255 up to Magnuson Park and connect Roosevelt & 45th and Convention Place Station area	3/28/2015 9:50 AM
165	Split up long routes and begin them at the Link station in hopes of running at regular intervals.	3/28/2015 9:47 AM
166	Continue the 255 up to Magnuson Park Connect Roosevelt & 45th and Convention Place Station area	3/28/2015 8:42 AM
167	Continue the 255 up to Magnuson Park" Connect Roosevelt & 45th and Convention Place Station area"	3/28/2015 8:09 AM
168	More 24 hour bus service.	3/28/2015 7:56 AM
169	See comments above.	3/28/2015 7:27 AM
170	Continue the 255 up to Magnuson Park	3/28/2015 6:01 AM
171	Some sort of neighborhood circulator jitney bus service running clockwise and/or counter-clockwise FREQUENTLY, serving U-District and Stadium light rail stations, U-Village, Children's Hospital, and the south end of Ravenna Park along NE 55th.	3/28/2015 4:46 AM
172	I need frequent service between Fremont and Ballard (extending to Shilshole Marina), Fremont and Northgate, Fremont and University District, and Fremont and Downtown Seattle. Also frequent service between University District and Downtown Bellevue.	3/28/2015 2:31 AM
173	run north south east west routes along major arterials. make university way into bus/pedestrian only or use buses on 15th or roosevelt only not university way	3/28/2015 1:38 AM
174	direct service from wedgewood to u district, downtown	3/28/2015 1:32 AM
175	More connections to freeway bus routes (i.e. 45th street freeway station for community/sound transit connections).	3/27/2015 10:49 PM
176	Continue the 255 up to Magnuson Park.	3/27/2015 10:18 PM
177	Re-route #372 to follow Montlake Blvd. to UW Link station, then West along Pacific Ave to U. District (instead of going on to UW campus - Stevens Way).	3/27/2015 9:05 PM
178	continue the 255 up to magnuson park	3/27/2015 8:52 PM
179	Continue the 255 up to Magnuson Par and connect Roosevelt & 45th and Convention Place Station area	3/27/2015 8:09 PM
180	Keep local, neighborhood, and weekend service.	3/27/2015 6:35 PM
181	NOT SURE--I THINK A "HYBRID" APPROACH BETWEEN ALTERNATIVES 1 AND 2 IS NEEDED, BUT I WANT TO SEE HOW THAT PENCILS OUT BEFORE I COMMIT TO AN ALTERNATIVE.	3/27/2015 6:30 PM
182	Have cross town busses at major intersections to meet North/South routes for transfers.	3/27/2015 5:30 PM
183	More 44 buses during peak times	3/27/2015 5:27 PM
184	I could almost accept a transfer to a train at Husky Stadium if there was a one-bus ride there from Olympic Hills. perhaps keeping the 73 but terminating at Husky Stadium would work. Same for the 71 and perhaps 72. But is the train going to be able to handle all these people? You are basically making all of NE Seattle who uses transit converge on Husky Stadium and take the train. Kind of a drag when classes are in session or there is a game.	3/27/2015 5:07 PM

185	continue the 255 to magnuson park connect roosevelt and 45th and convention place station area	3/27/2015 4:54 PM
186	Make no changes to the 545 schedule.	3/27/2015 4:44 PM
187	Continue he 255 up to Magnuson Park	3/27/2015 4:00 PM
188	Continue the 255 up to Magnuson Park	3/27/2015 3:41 PM
189	Maintain service between Montlake and Capitol Hill	3/27/2015 3:35 PM
190	more dedicated row.	3/27/2015 2:43 PM
191	More bike spots on the buses :)	3/27/2015 2:36 PM
192	1. Have more bus routes from NE Seattle with bus stops closer to the new light rail station. (More routes on NE Pacific Place rather than Stevens Way. Or at the very least, bus stops on Stevens Way at Rainier Vista.) 2. Move bus routes off of University Way and onto 15th Ave NE. (Turn the Ave into pedestrian only)	3/27/2015 2:25 PM
193	As long as HUB locations where within a reasonable distance to most neighborhood centers and I-5 exits (for out of city transportation), I think its a great idea.	3/27/2015 2:21 PM
194	I'm all for more frequent service, but the consolidation is going to be a very bad for me - this plan creates a transit desert in my neighborhood (Ravenna/Bryant), The best improvement to this plan (for me) would be to retain local transit service #72 and #73 on 15th NE.	3/27/2015 2:09 PM
195	**ADD MORE SERVICES FROM BALLARD TO THE UNIVERSITY OF WASHINGTON, DOWNTOWN, AND DIAGNOALLY TO CAPITAL HILL. ADDITIONALLY, MORE SERVICE FROM BALLARD TO MAPLE LEAF.	3/27/2015 2:05 PM
196	Change nothing.	3/27/2015 2:00 PM
197	Would prefer more later night routs between lake city and downtown seattle. As long as I can get home around 2am from either ballard or downtown back to lake city then I would be very pleased and use transit more.	3/27/2015 2:00 PM
198	Can't improve it, must choose other alternative. Consolidation is not a good idea.	3/27/2015 1:55 PM
199	I think we should be like Paris, lots of buses running constantly. Inexpensive. People will change their habits, especially if parking spaces are eliminated.	3/27/2015 1:52 PM
200	I don't enjoy the idea of cutting down on some routes and stops because of the link stations, since many people in Wedgwood would have a very far walk or may even have to rely on other methods of transport to even get to a place where the improvements on frequency and efficiency are being made, due to the latest route cuts and revisions. It is also still a concern that routes may be reduced because it takes an hour to get across I-5 from anywhere east of Lake City Way already. It would be best to have a very specific survey of frequent riders in these areas affected on how they rely on Metro to get where they need to go, and the current efficiency of that method, before going forward and cutting down on routes or stops.	3/27/2015 1:49 PM
201	I don't know. I would just like to be able to travel around the area, where ever that may be (Everett to Tacoma). I don't want to spend 2+ hours on a bus getting from 15th and Lakecity way to Phinny ridge on weekends or evenings. I would like to be able to visit west seattle and then go home to 15th and Lakecity way!	3/27/2015 1:43 PM
202	Continue the 255 up to Magnuson Park Connect Roosevelt & 45th and Convention Place Station area	3/27/2015 1:32 PM
203	Provide residential parking permits so the residents near Children's Hospital don't loose on street parking to commuters.	3/27/2015 1:27 PM
204	Continue the 255 up to Magnuson Park	3/27/2015 1:23 PM
205	Connect Roosevelt/45th with Convention Place Station area	3/27/2015 1:20 PM
206	Ensure it's easy to get from the neighborhoods to and from the link station, at the moment the statements are too vague about where buses end in relation to the link station.	3/27/2015 1:18 PM
207	I would want to ensure the 65 and 271 to service the link station and possibly through u village.	3/27/2015 1:16 PM
208	Return the 47 bus	3/27/2015 1:16 PM
209	More frequent west to east connections to Northgate Link Station.	3/27/2015 1:14 PM

210	More frequent express service between NE Seattle and downtown	3/27/2015 1:09 PM
211	Increase the frequency all day of route 44, the major east-west route that connects Ballard, Phinney, Wallingford, U District, and light rail. If the 44 were more frequent, transferring to other routes would be less painful and slow, and it might actually be faster to take the 44 and transfer to light rail in order to go to Capitol Hill or downtown than it is using the current bus routes.	3/27/2015 12:38 PM
212	Connections from UW Station to Capitol Hill, maybe also west of UW. Definitely Kirkland-U Village.	3/27/2015 12:28 PM
213	Make buses come every ten min	3/27/2015 12:26 PM
214	If we use smaller buses on a regular basis-- that is, research peak times for ridership on each bus route and use larger buses then but otherwise minimizing waste -- we could essentially help keep services expansive and inclusive for all.	3/27/2015 12:13 PM
215	I would scrap the concept all together, and redesign the light rail as a "spine" of the system, and use the buses as the "ribs" or branches off of the spine. I would set up larger transfer stations at each stop to facilitate transferring from one route to another. Think of the transit system of Mexico City, where the trains are the mass transit, and buses get people from the train to the farther outlying areas. It is highly efficient and very convenient.	3/27/2015 12:01 PM
216	I definitely want to have bus alternatives running in peak hours from the U-district out to Sand Point Way (NOAA in particular).	3/27/2015 11:24 AM
217	Add more service for ST route 545. Re-establish metro route 265.	3/27/2015 11:24 AM
218	add more parking to south sound link stations to make it more accessible for people going to UW area	3/27/2015 11:12 AM
219	Continue the 255 up to Magnuson Park	3/27/2015 11:12 AM
220	Looks like the plan would work well for me.	3/27/2015 11:06 AM
221	1.) Make sure that there are safe routes for bicyclists traveling to/from the same location as the increased bus service. Greenways are good. Bike lanes are not enough--buses have to cross the bike lane twice every time they stop. Dedicated bike lanes with a physical barrier (like on Broadway) is MUCH safer for bicyclists. 2.) Connect Roosevelt and 45th and Convention Place Station area	3/27/2015 10:59 AM
222	Continue the 255 up to Magnuson Park Connect Roosevelt & 45th and Convention Place Station area	3/27/2015 10:47 AM
223	More east-west travel in North Seattle	3/27/2015 10:46 AM
224	Continue the 255 up to Magnuson Park. Connect Roosevelt & 45th and Convention Place Station area.	3/27/2015 10:13 AM
225	I do think the 15th N of N-gate needs some 1 seat access to somewhere other than N-gate transit station.	3/27/2015 10:13 AM
226	I do not have any suggestions for improvement. Anything that increases public transit to my out of the way place of work pleases me greatly and will also improve the lives of the families that live in Magnuson who depend on public transit as their primary mode of transportation.	3/27/2015 10:10 AM
227	Keep[the 43 between montalke (Boyer) and downtown and Boyer and the U district	3/27/2015 10:08 AM
228	Where transit is currently lacking, and I don't see much improvement is in East-West travel. To travel what is equivalent to a 10 minute drive, say Wedgwood to North Seattle Community College takes 100+ minutes and 3 buses. The idea of a consolidated network is good, but you need lines running East-West.	3/27/2015 10:03 AM
229	Continue the 255 up to Magnuson Park and connect Roosevelt & 45th and Convention Place Station area	3/27/2015 9:57 AM
230	Continue 255 up to Magnuson Park. Connect Roosevelt & 45th and Convention Place Station area	3/27/2015 9:53 AM
231	Continue the 255 up to Magnuson Park Connect Roosevelt & 45th and Convention Place Station area	3/27/2015 9:51 AM
232	• Continue the 255 up to Magnuson Park • Connect Roosevelt & 45th and Convention Place Station area	3/27/2015 9:45 AM

254	Continue the 255 up to Magnuson Park and Connect Roosevelt & 45th and Convention Place Station area	3/27/2015 8:02 AM
255	Kenmore buses are currently grossly overcrowded to and from downtown at rush times. There needs to be more buses. They are standing room only before they even leave Kenmore, which is dangerous and greatly reduces advantage of transit over driving.	3/27/2015 7:58 AM
256	make sure that people with disability/mobility issues still have good access to van services to get them where they need to go.	3/27/2015 7:57 AM
257	Continue the 255 up to Magnuson Park	3/27/2015 7:56 AM
258	keep number of stops the same	3/27/2015 7:49 AM
259	• "Continue the 255 up to Magnuson Park" • "Connect Roosevelt & 45th and Convention Place Station area"	3/27/2015 7:43 AM
260	- Continue the 255 up to Magnuson Park - Connect Roosevelt and 45th and Convention Place Station area	3/27/2015 7:37 AM
261	Continue the 255 up to Magnuson Park Connect Roosevelt and 45th and Convention Place Station Area	3/27/2015 7:34 AM
262	North/South service always seems manageable, but for some reason, going east/west on Metro is always tough. Getting in and out of Ballard, from Wallingford to Seattle Children's... those are all tough trips to figure out. I hope that the consolidated routes don't make those trips tougher.	3/27/2015 7:17 AM
263	Continue the 255 up to Magnuson Connect Roosevelt & 45th and Convention Place Station area	3/27/2015 7:14 AM
264	Connect Roosevelt & 45th and Convention Place Station area	3/27/2015 6:57 AM
265	Focus on Seattle Children's as it is a large employer with a lot of traffic generated.	3/27/2015 6:53 AM
266	Continue the 255 up to Magnuson Park Connect Roosevelt & 45th and Convention Place Station area Keep current service for the 26 and 31/32 around Wallingford	3/27/2015 6:47 AM
267	Definitely address access to Seattle Children's. We need more transit options as there are not parking options -- get us out of our cars, you can only do that if transit works.	3/27/2015 6:43 AM
268	Continue the 255 to Magnuson Park.	3/27/2015 6:32 AM
269	Continue the 255 up to Magnuson Park, Connect Roosevelt & 45th and Convention Place Station area	3/27/2015 6:29 AM

270	24 hour service from Northgate or Lake City to SCH/ UVillage/UW-would improve ability to use public transportation for very early or very late shift times	3/27/2015 5:51 AM
271	Continue the 255 up to Magnuson Park	3/27/2015 12:14 AM
272	Continue the 255 up to Magnuson Park Connect Roosevelt & 45th and Convention Place Station area	3/26/2015 11:43 PM
273	Continue the 255 up to Magnuson Park Connect Roosevelt & 45th and Convention Place Station area	3/26/2015 10:55 PM
274	Keep route #48 intact to Mt. Baker for a few more years (yes I sometimes ride it all the way from our Loyal Hts. start to that end to start my work day!). After light rail comes as far north as the Roosevelt stop, it would be easier for us to cope with another curtailing of #48 coverage. A RapidRide line could still be developed for NE Seattle but on a longer timeline. Don't try to make all of these shifts all at once.	3/26/2015 10:29 PM
275	Remove several stops on Aurora between ship canal and downtown on most routes. More bus only lanes. Remove off peak parking on aurora north. More service in Fremont to address significant growth.	3/26/2015 10:16 PM
276	Continue the 255 up to Magnuson Park Connect Roosevelt & 45th and Convention Place Station area	3/26/2015 9:11 PM
277	I would keep some service on lower Roosevelt Way NE - this is quite a dense area already and lots of residential construction is going on. I would also look for better ways to get buses past the congestion on the streets around UW Station (I know this is mostly not within Metro's power, but it is absolutely essential to creating functional bus connections to Link)	3/26/2015 9:00 PM
278	• Continue the 255 up to Magnuson Park • Connect Roosevelt & 45th and Convention Place Station area	3/26/2015 8:32 PM
279	I would at least combine Alternative 1 Route 16 with the ability to transfer to Alternative 2 Route 73 at Roosevelt to offer a 1 transfer minimum walk access to downtown & back.	3/26/2015 7:46 PM
280	keep wait times down for folks coming from downtown trying to get to Redmond	3/26/2015 7:37 PM
281	Continue the 255 up to Magnuson Park, Connect Roosevelt & 45th and Convention Place Station area	3/26/2015 7:31 PM
282	Continue from Seattle Childrens up through Sand Point/Magnusen and through Lake City.	3/26/2015 6:44 PM
283	Continue the 255 up to Magnuson Park Connect Roosevelt & 45th and Convention Place Station area	3/26/2015 6:25 PM
284	Continue route 255 to Magnuson Park	3/26/2015 5:24 PM
285	Continue to offer direct express commute service between downtown and the eastside park and rides	3/26/2015 5:18 PM
286	Continue 255 up to Magnuson Park and connect Roosevelt & 45th and Convention Place Station area	3/26/2015 5:15 PM
287	The more services in Ballard the better. It is very inconveient to take a bus from Ballard both to Seattle Children's where I work now and to downtown where I worked for years. If the commute could be more comparable to driving (30-40 min) vs. closer to an hour, I would be MUCH more likely to do it.	3/26/2015 5:06 PM
288	Continue the 255 up to Magnuson Park	3/26/2015 4:58 PM
289	•Continue the 255 up to Magnuson Park •Connect Roosevelt & 45th and Convention Place Station area	3/26/2015 4:52 PM
290	Continue the 255 to Magnuson park; connect Roosevelt & 45th with Convention Place Station area	3/26/2015 4:50 PM
291	Adding as many connections and frequency as allowable and feasible.	3/26/2015 4:43 PM
292	Easier access from Roosevelt/East Green Lake to Wallingford/Ballard.	3/26/2015 4:42 PM
293	Ensure that good connections remain between Eastlake, SLU and the U District.	3/26/2015 4:42 PM
294	1. Continue the 255 up to Magnuson Park 2. Connect Roosevelt & 45th and Convention Place Station area	3/26/2015 4:42 PM
295	Anything to help prevent bottle necks and passenger overloads at bus stops!	3/26/2015 4:41 PM
296	Continue the 255 up to Magnuson Park Connect Roosevelt & 45th and Convention Place Station area	3/26/2015 4:37 PM
297	It would eliminate the need to drive in to work and I can use my bicycle as a straight shot to the Hill and to work	3/26/2015 4:37 PM
298	Continue 255 up to Magnuson Park and connect Roosevelt and 45th and Convention Place Station. Add more direct connection between Seattle Children's and First Hill.	3/26/2015 4:36 PM
299	Continue the 255 up to Magnuson Park Connect Roosevelt and 45th and the Convention Place Station	3/26/2015 4:35 PM

313	Continue the 255 up to Magnuson Park.	3/26/2015 3:29 PM
314	Continue the 255 up to Magnuson Park	3/26/2015 3:27 PM
315	The only way to improve it is to not reduce the frequency of the combined 255/256 service. The trend in ridership definitely supports the current service.	3/26/2015 2:58 PM
316	A balance between Alt 1 and Alt 2, with emphasis on service coverage in corridors used by persons with disabilities, with low incomes, etc.	3/26/2015 1:24 PM
317	Not sure. Haven't studied it in detail.	3/26/2015 12:47 PM
318	East side service all the way to Seattle Childrens and more frequent.	3/26/2015 12:30 PM
319	None at this moment.	3/26/2015 12:15 PM
320	Continue the 255 up to Magnuson Park.	3/26/2015 12:00 PM
321	Extend services to include a route that begins at Aurora Village and goes to South Lake Union.	3/26/2015 11:43 AM
322	Continue the 255 up to Magnuson Park	3/26/2015 11:29 AM
323	Continue the 255 up to Magnuson Park	3/26/2015 11:20 AM
324	Continue the 255 up to Magnuson Park	3/26/2015 10:50 AM
325	Continue the 255 up to Magnuson Park	3/26/2015 10:10 AM
326	the best thought is that more frequency is good	3/26/2015 10:00 AM
327	Bus 252 should NOT be taken off route. It could go directly to the Light Rail in University District if absolutely necessary. Still not my choice.	3/26/2015 9:51 AM
328	Better transit spots to improve waiting experience if more passengers will be condensed in fewer spots. There is not enough rain coverage at stops and they are often in the splash zone of a wet road way. Better lighting and more arrival time signs.	3/26/2015 9:26 AM
329	Continue the 255 up to Magnuson Park	3/26/2015 9:18 AM
330	I would re-think the idea of service consolidation, given the recent re-engineering of traffic on N-S arterials in the north end.	3/26/2015 8:31 AM
331	Continue the 255 up to Magnuson park.	3/26/2015 8:31 AM
332	Continue the 255 to Magnuson Park	3/26/2015 8:22 AM
333	If I do need to make three transfers, continue the 255 up to Magnuson Park.	3/26/2015 8:06 AM

334	Keep the 71 on its current route at 30min intervals until the Roosevelt Link Rail station opens, then use the Alt 2 option. It is our only bus.	3/26/2015 8:05 AM
335	Frequent around the clock service- there are two major hospitals (University of Washington and Seattle Children's Hospital) that need around the clock transportation for employees and patients	3/26/2015 7:57 AM
336	Continue the 255 up to Magnuson Park	3/26/2015 7:50 AM
337	Continue the 255 up to Magnuson Park	3/26/2015 7:41 AM
338	Continue the 255 up to Magnuson Park	3/26/2015 7:34 AM
339	More frequent service to Seattle Children's Hospital, and Sand Point area; and with more routes or at least more connections to hubs like the upcoming light rail or the U District.	3/26/2015 7:07 AM
340	Continue the 255 up to Magnuson Park	3/25/2015 9:55 PM
341	Making sure that the central lines and routes that are the backbone of the service have dedicated transit lanes. I am thinking Montlake at peak times is a nightmare to get through and having a consolidated service using that road would just slow everything down. What I am saying is that other routes that normally go in other directions might be consolidated onto montlake or 15th and previous commute times would increase in duration.	3/25/2015 9:10 PM
342	I think the ultimate goal is to increase service frequency and have a wider network.	3/25/2015 8:49 PM
343	Continue 255 to Childrens Hospital and Magnuson Park.	3/25/2015 8:20 PM
344	Continue the 255 up to Magnuson Park	3/25/2015 8:14 PM
345	route through downtown, not SLU.	3/25/2015 7:58 PM
346	At LEAST bus even OCCASIONALLY between Bryant and Greenwood. REINSTATE the small bus that used to run between NE across 65th to Ballard.	3/25/2015 7:55 PM
347	Continue the 255 up to Magnuson Park	3/25/2015 7:43 PM
348	Have a dedicated lightrail. The buses are still restricted based on traffic.	3/25/2015 5:54 PM
349	Keep service on 75th and 80th streets for local riders to access.	3/25/2015 5:26 PM
350	Continue the 255 up to Magnuson Park.	3/25/2015 4:46 PM
351	Don't use Alternative 1 at all.	3/25/2015 4:42 PM
352	Continue the 255 up to Magnuson Park	3/25/2015 4:24 PM
353	I really really like the increased frequency in service and the reduced number of routes. I am concerned about frequent transfers, though, as even buses that are currently high frequency are often very very late (I have had 45 minutes waits for buses that are scheduled to arrive every 15 minutes)	3/25/2015 4:18 PM
354	Increase routes along Lake City Way Increase 372 and/or 72 at peak hours	3/25/2015 4:14 PM
355	Continue the 255 up to Magnuson Park	3/25/2015 4:12 PM
356	Continue the 255 up to Magnuson Park	3/25/2015 4:09 PM
357	Continue the 255 up to Magnuson Park	3/25/2015 3:47 PM
358	Continue the 255 up to Magnuson Park	3/25/2015 3:41 PM
359	continue 225 to Magnuson Park	3/25/2015 3:40 PM
360	Continue the 255 up to Magnuson Park	3/25/2015 3:29 PM
361	Continue the 255 up to Magnuson Park	3/25/2015 3:20 PM
362	Don't eliminate on-campus stops at UW	3/25/2015 3:15 PM
363	Continue the 255 up to Magnuson Park	3/25/2015 3:09 PM
364	Continue the 255 up to Magnuson Park	3/25/2015 2:55 PM

365	Retain some Eastlake/Roosevelt service (Whether this is actually on Roosevelt is less of a concern than keeping something on this North South trajectory rather than forcing a transfer). Extend the 255 to Magnuson as that is one of the fastest growing neighborhoods in NE Seattle (outside the U District and Roosevelt)	3/25/2015 2:54 PM
366	Continue route 255 all the way to Magnuson Park	3/25/2015 2:52 PM
367	Continue the 255 up to Magnuson Park	3/25/2015 2:51 PM
368	Continue the 255 up to Magnuson Park	3/25/2015 2:51 PM
369	Continue the 255 up to Magnuson Park & more frequent services in other routes	3/25/2015 2:50 PM
370	continue the 255 up to magnuson park	3/25/2015 2:46 PM
371	Continue 255 to magnuson park.	3/25/2015 2:32 PM
372	In both alternatives, the current 68 route goes away, so I prefer Alternative 1 since it proposes more frequent service to the neighborhoods I need to get to, and better route options.	3/25/2015 2:31 PM
373	nothing.	3/25/2015 2:27 PM
374	Continue the 255 up to Magnuson Park.	3/25/2015 2:24 PM
375	Continue the 255 up to Magnuson Park	3/25/2015 2:23 PM
376	Continue to 255 up to Magnuson Park	3/25/2015 2:22 PM
377	Continue 255 up to at least Magnuson Park.	3/25/2015 2:13 PM
378	Continue the 255 up to Magnuson Park	3/25/2015 1:58 PM
379	Continue the 255 up to Magnuson Park	3/25/2015 1:51 PM
380	Continue route 255 to Magnuson Park	3/25/2015 1:47 PM
381	If the 255 went all the way to Magnuson Park (or even a little further than that on Sand Point Way).	3/25/2015 1:47 PM
382	frequency of service is key	3/25/2015 1:47 PM
383	Continue 255 up to Magnuson Park.	3/25/2015 1:46 PM
384	Continue the 255 up to Magnuson Park	3/25/2015 1:44 PM
385	Continue the 255 up to Magnuson Park.	3/25/2015 1:44 PM
386	It should only take 30 minutes to get from Seattle children's/bryant area to childrens' bellevue. Any thing that makes this proposed route which is only 11 miles, take more than that lenght of time would decrease the likelihood of my using it. (the current system takes more than 90 minutes and involves transfers which is prohibitive).	3/25/2015 1:43 PM
387	I'm not sure.	3/25/2015 1:42 PM
388	Continue the 255 up to Magnuson Park	3/25/2015 1:42 PM
389	Continue the 255 up to Magnuson Park	3/25/2015 1:39 PM
390	Continue the 255 up to Magnuson Park	3/25/2015 1:36 PM
391	Continue the 255 up to Magnuson Park	3/25/2015 1:35 PM
392	Continue the 255 up to Magnuson Park.	3/25/2015 1:33 PM
393	Continue the 255 up to Magnuson Park	3/25/2015 1:33 PM
394	na	3/25/2015 1:31 PM
395	Continue the 255 up to Sand Point/Magnuson Park	3/25/2015 1:30 PM
396	Much more money needed, much more to keep up with population growth. too long of a time between planning and implementation that prevents already needed changes Newer residents need to take a greater burden of the cost associated with these changes.	3/25/2015 1:30 PM
397	Continue the 255 up to Magnuson Park.	3/25/2015 1:30 PM

398	Continue the 255 up to Magnuson Park	3/25/2015 1:29 PM
399	Continue the 255 up to Magnuson Park	3/25/2015 1:29 PM
400	The concept is good, the current situation stinks.	3/25/2015 1:28 PM
401	Continue the 255 up to Magnuson Park	3/25/2015 1:26 PM
402	Continue the 255 up to Magnuson Park.	3/25/2015 1:25 PM
403	Continue the 255 up to Magnuson Park	3/25/2015 1:25 PM
404	Continue the 255 up to Magnuson Park	3/25/2015 1:23 PM
405	Continue the 255 up to Magnison Park	3/25/2015 1:23 PM
406	Continue the 255 up to Magnuson Park	3/25/2015 1:23 PM
407	continue the 255 up to magnuson park	3/25/2015 1:18 PM
408	Have the 255 continue up to Magnusen Park to allow for a stop at Seattle Children's Hospital!!!! One bus to work to be amazing and make me use the Metro ALL THE TIME!	3/25/2015 1:17 PM
409	Continue the 545 and 12 buses	3/25/2015 1:00 PM
410	Continue the 255 up to Magnuson Park	3/25/2015 12:57 PM
411	Continue the 255 up to Magnuson Park	3/25/2015 12:54 PM
412	Continue the 255 up to Magnuson Park	3/25/2015 12:51 PM
413	Continue the 255 up to Magnuson Park	3/25/2015 12:43 PM
414	It would be great if the 255 route would continue up to Magnuson Park.	3/25/2015 12:43 PM
415	Continue the 255 up to Magnuson Park	3/25/2015 12:39 PM
416	Continue the 255 up to Magneson Park.	3/25/2015 12:39 PM
417	It would be nice to continue the 255 to Magnuson Park	3/25/2015 12:38 PM
418	Continue the 255 up to Magnuson Park. Higher frequency trips until 8:00PM.	3/25/2015 12:37 PM
419	Continue the 255 up to Magnuson Park	3/25/2015 12:37 PM
420	Continue the 255 up to Magnuson Park	3/25/2015 12:36 PM
421	Continue the 255 up to Magnuson Park	3/25/2015 12:29 PM
422	Continue the 255 up to Magnuson Park	3/25/2015 12:28 PM
423	: "Continue the 255 up to Magnuson Park"	3/25/2015 12:27 PM
424	Continue the 255 up to Magnuson Park	3/25/2015 12:27 PM
425	Continue the 255 up to Magnuson Park	3/25/2015 12:27 PM
426	Direct route from eastside (Kirkland) to Seattle Children's Hospital would be wonderful!	3/25/2015 12:26 PM
427	Continue the 255 up to Magnuson Park	3/25/2015 12:22 PM
428	More frequent travel opportunities from Kenmore and Bothell on 522 to U District, Downtown Seattle, Capitol Hill, etc.. 522 has been getting more and more congested so having frequent travel opportunities would get less cars off the road and more convenience to us public transportation.	3/25/2015 10:56 AM
429	Increase route times for 373	3/25/2015 10:53 AM
430	Maintain excellent, direct access to downtown from the U-District until U-District light rail station opens around 2021. Route 70 is not direct, so it does not count. Walking to the UW station from the U-District is not a realistic option.	3/25/2015 10:45 AM
431	Uh, don't change the 373's actual route. Change it's frequency, if you must, but don't change it's route.	3/25/2015 9:15 AM
432	I don't know	3/25/2015 8:56 AM

433	Create a Lake City to University link station route.	3/25/2015 8:39 AM
434	running more buses to places I don't intend to go is of no help. who does the "efficiency" really help? the user/rider or Metro? what's good for Metro may not be good for the rider.	3/25/2015 7:22 AM
435	Have another route to go from downtown Seattle to S Kirkland P&R.	3/25/2015 6:39 AM
436	Express busses from the east side should still run downtown, detouring into the U district, and reducing the number of express busses overall makes no sense.	3/24/2015 8:38 PM
437	I recommend King County has more statistical analysis done using the ridership data readily available (tapping of ORCA cards) to predict the peak time/other time demand and arrange the bus schedules accordingly. According to my observation, there are too many empty buses starting and ending at UW. If frequencies can be reduced and covered areas can be extended, ridership might improve. Again, data analysis can tell the right story!	3/24/2015 7:39 PM
438	Can't think of a way to improve it. Sounds great!	3/24/2015 6:00 PM
439	do not change routes 255, 252, or 257. Or if the light link rail went to all the way to Kirkland, I would happily ride that.	3/24/2015 5:46 PM
440	Key is frequent LINK service. If there's as much as 13 minute interval for LINK (actual runs, not simply as scheduled), then it's bad.	3/24/2015 4:46 PM
441	Can you look at whether remaining service is routed in the most convenient way for disabled riders in outlying areas to reach it (try to keep walking to 1/4 mile or no more than 1/2 mile, look at location of sidewalks, look at how much grade people will need to walk/wheel up to get to transit)? I would prefer to have less consolidated service even if it is sometimes less frequent. Convince Sound Transit to add a 522 stop right before/after the express lanes at Lake City Way and 20th NE/85th.	3/24/2015 4:27 PM
442	no opinion	3/24/2015 3:48 PM
443	I don't care if it's "consolidated" or not. Retain the present #11 and let the City of Seattle buy more frequent service on it.	3/24/2015 3:43 PM
444	Maintain some of the lines that reach further out geographically, but at less frequency to make up for the increased frequency of the lines on main streets. People who live further away will not want to walk 20-40 minutes just to catch a bus, however, they may be willing to wait that long to catch a ride if a bus will be coming within a 5 minute walk of their home.	3/24/2015 3:41 PM
445	I don't like your use of the word "consolidate". It sounds terrible. It sounds expensive. It will not provide the easy access we already have. I think you are wasting our taxpayers' money .	3/24/2015 3:18 PM
446	I'm missing route 68 - a direct connect from UW to Northgate/North Seattle College	3/24/2015 3:14 PM
447	I am excited about the idea of a consolidated and frequent network of service, but not if that network leaves 1/2 to 1 mile gaps between routes/bus stops. It seems that a few more routes being included (like one or two more north/south routes (15th Ave. NE, for example), and a couple more East/West routes would make a great improvement to the current plan. *I have no problem with making transfers/connections if I don't have to walk more than 1/4 mile to do so, wouldn't have to wait more than about 10 minutes at the transfer point, and there were covers and seats at those stops. Transfers are a good thing in a well-planned transit system.	3/24/2015 1:16 PM
448	Montlake gets very busy due to traffic. Route between U-village and the new station should be able to leverage a bus lane.	3/24/2015 1:00 PM
449	Address the biggest service hole on your map - the area where I live which now has decent all-day service. Run travel time comparisons for, say, NE 75th and 50th NE, or for NE 80th and 45th NE. Eliminate the service overlap and duplication between Rts 16 and 75 in Sand Point by running Rt 16 up along the current Rt 71 routing in View Ridge and Wedgwood (the E/W connection to Magnuson Park is about as important as the E/W connection to Golden Gardens!). Pay attention to topography in considering where you are asking people to walk farther. Keep in mind that the U District is a major destination for people who decided to live in NE Seattle, and it isn't the same as Stevens Way or Campus Parkway, which are on the far edges of the district. And take off your blinders regarding traffic congestion in the Montlake and Pacific area, which will seriously inhibit OTP for your supposedly slightly improved Rt 65; that just won't cut it! - WAIT until Link gets extended a bit farther north, so you can propose a better network.	3/24/2015 10:49 AM
450	Do the best to keep fares the same for changing routes.	3/24/2015 10:01 AM
451	choice of either bus or rail	3/24/2015 9:36 AM
452	Direct access for Laurelhurst commuters to the UW stadium lightrail stop.	3/24/2015 9:13 AM

453	Route 48 needs more buses between UW and north Seattle--they do not come as frequently as listed on the bus schedules. It would be nice to have the 48x back, but include it more than 1 or 2x per day--it was too infrequent for it to be well utilized. We'll need more Park and Rides within Seattle.	3/24/2015 8:09 AM
454	more frequent connection between Eastside and UW	3/24/2015 6:55 AM
455	Why do you hate route 242? It's hardly underused. It doesn't go through the U district, so it's not affected by the new Link station. And the alternates you suggest (taking the 41 to the 542) don't actually work.	3/23/2015 10:29 PM
456	There is a group of about 15 Whidbey Island students that travel every week day from Whidbey Island to and from the Seattle Waldorf High School at Magnuson Park. Currently no reasonable public transportation options exist, so the Waldorf School bought and operates a bus to/from the Lynnwood transit center to transport the kids. Your Alternative 1 appears to provide better service between the UW and Magnuson Park, potentially providing a link.	3/23/2015 9:57 PM
457	Agreement to monitor the busses servicing the UW Stadium station and ability to get on busses leaving the U district headed downtown. Concern with reliable bus service to an area already congested (Stadium).	3/23/2015 9:18 PM
458	Keep the 71 running from downtown thru the U Dist. or provide another route that has a one seat ride from View Ridge to the U District.	3/23/2015 8:19 PM
459	Keep all-day service between south Kirkland and SLU	3/23/2015 5:45 PM
460	The 255 should continue past Seattle Children's hospital up to Magnuson Park. I would prefer that the 75 would pass directly by the LINK light rail station instead of up on Stevens Way. The walk is too far for passengers heading into north Seattle.	3/23/2015 4:05 PM
461	Keep 545 service on evenings and weekends	3/23/2015 1:36 PM
462	Scrap it! It is supposedly designed for more frequent service, thus making bus riding more attracting. But it decimates my bus service in Wedgwood, makes it more difficult to get to a bus, and requires transferring for most rides which because of standing and waiting is very difficult for me. Do NOT take the 64 out of downtown! Do not eliminate or change the 71, the only direct non-rush-hour bus that goes between Wedgwood and downtown without transferring. Transferring involves standing and walking, which are very difficult for me.	3/23/2015 1:12 PM
463	I want to see more East-West routes. It's hard to get to Ballard from NE Seattle.	3/23/2015 1:05 PM
464	I don't see light rail as an alternative to what currently exists. The proposed station in the U-district is far enough out of the way as not to be a consideration, especially in the early mornings & in the evenings. Consequently, I don't think that attempting to modify current service significantly because of the light rail is worthwhile.	3/23/2015 11:25 AM
465	I think it is important to continue having bus routes to all areas, not just the most frequently used bus stops.	3/23/2015 11:01 AM
466	Continue route 44 to the University Link station. One bus ride to the link station	3/23/2015 10:40 AM
467	Don't know.	3/23/2015 10:11 AM
468	Retain the 71 and 72!	3/23/2015 9:41 AM
469	Keep the 252 and 257 routes. Eliminating these routes will increase the congestion on the 311 route (even with the added frequency) and create a bottleneck at the Montlake Link station where all the express buses from the Kirkland area would transfer a majority of their passengers.	3/23/2015 8:36 AM
470	Shift the 67 to the more direct line of 5th Ave NE and put some lesser route on upper Roosevelt Way which bypasses NTC (like the 73 did while the Thornton Creek Bridge was being rebuilt) but with a new terminal (like the future 130th or 145th St station areas?). This doesn't need to be a major route (unless upper Roosevelt has higher demand than I realize, possible since still nothing on 15th through Maple Leaf). It IS possible to take consolidation too far, and the consolidated major routes should be as direct as can be managed. The above move would also eventually allow 67 to take over 41's tail to Lake City after North Link opens (or would this make the 48/67 pair too long?)	3/23/2015 8:23 AM
471	Extend light rail to the Kingsgate and Brickyard P&R's. This current solution will increase freeway traffic - not reduce it. Traffic congestion on the East side will be greater with this plan. You have identified riders will need to travel farther to find a transit location! This is planning? I do not see any hard decisions made here. Only bad ones for those who have the smallest voice!	3/23/2015 7:52 AM
472	Have a stop for ST route 522 between Lake City and downtown, maybe I-5 at NE 45 St or Lake City Way & NE 80 St. Or for a Metro equivalent route. Concept is to provide night service between Bothell/Kenmore/Woodinville & NE Seattle. Better night service to Lake City would also solve this.	3/22/2015 10:48 PM

473	Put a few bus/carpool only lanes in a few key congested spots, as well as some bus-priority traffic signals. Some of this will be done already around the montlake bridge, but montlake blvd could use a few too.	3/22/2015 10:38 PM
474	Don't leave northern Seattle out of many of the routes. We also need regular access to the university and farther south.	3/22/2015 10:06 PM
475	I concrete plan to address and acknowledge what points will be missing transportation when it is consolidated and how poor, working class people and disabled needs might be challenged by consolidating bus stops. I believe that metro should have some conversation how changing routes impacts different demographics of transit riders in different ways. It would be important to address this in plans. I.E. it will improve for working class folks who need transportation to run more frequently during early and late morning and Sunday. But might effect disabled folks ability to get to more consolidated areas.	3/22/2015 6:58 PM
476	Ensure that the frequency of the combined route 26 and 26x are not a net decrease in the current number of trips. Also make sure that there's access to the light rail in the university district from Wallingford	3/22/2015 5:29 PM
477	Keep 26 local route	3/22/2015 4:50 PM
478	I would start the 373 earlier in the morning to meet the needs of 73's early riders. The first southbound service should reach NE 145th Street around 4:45am. I would also start running the 347 and 348 sooner for the same reasons.	3/22/2015 2:52 PM
479	Need sidewalks, benches...access for the disabled and elders.	3/22/2015 2:31 PM
480	Given that I make little use of bus service today - in so many ways, it does not work for me - I have no suggestions beyond ensuring that implementation meets vision.	3/22/2015 2:18 PM
481	I appreciate the concept of a consolidated route, but I don't know if you realize just how many people ride the 73 to UW campus or to downtown. Eliminating or moving this route will adversely affect so many people, especially students. Please keep the 73 route as it is.	3/22/2015 1:31 PM
482	Just have both? Why eliminate downtown routes?	3/22/2015 1:23 PM
483	It would force me to drive or bike. Likely drive.	3/22/2015 1:02 PM
484	In general, I do not support Alternative 1--I think it is better to have more routes closer to where people are, rather than a more consolidated network. With that said, there are two things that most concern me personally. The first is the elimination of route 43 with no increase in the frequency of the 48. I ride these two buses to and from work every weekday. They are already often standing-room only and occasionally so crowded that the drivers don't even stop to let more passengers on. Along the stretch of 23rd where the 43 and 48 are the only north-south routes, the two new light rail stations will be a 20-30 minute walk in either direction and not really feasible for commuters. North-south passengers in this area really won't have any option except to wait for a more crowded, less frequent bus. My second concern is the elimination of some of the direct routes between Capitol Hill and other parts of the city (the 43/44 to Wallingford and Ballard, the 12 to downtown and the ferry terminal, the 43 to downtown and Pike Place, the 8 toward Rainier Valley). It is much more convenient to have a single bus going to other neighborhoods than to have to make connections.	3/22/2015 12:00 PM
485	I have no idea. I'm not an expert on bus scheduling. I'd look to cities that have a working bus system and ask whoever designed their system if they have ideas for ours.	3/22/2015 11:32 AM
486	Better streetlights and other safety measures in neighborhoods with service cuts.	3/22/2015 11:21 AM
487	If you're going to revise the 43 or 48, you should focus on maintaining service to the parts of the Hill that aren't going to be well served by the light rail. Folks who live in the northeastern part of the Hill (i.e., along 19th, 23rd) should continue to have frequent bus service to UW.	3/22/2015 9:40 AM
488	Lake City very much needs the Light Rail Station at 130th to live up to its name as an urban hub village. Lake City is one of the fastest-growing areas in the city, and the percentage of people of color has doubled i 10 years. We have many low-income, large ethnic families who need good transit access. This concept includes frequent service along 125th-130th to Bitter lake and Linden. This street is by far the best E-W connector, with better travel times than Northgate Way or 145th.	3/22/2015 8:10 AM
489	Keep Bus 71 on it's current route Wedgwood through the U district and ending at the UW Link station.	3/21/2015 6:17 PM
490	Keep schedules the same all day, every day. Peak/weekend changes are extremely confusing for riders.	3/21/2015 12:34 PM
491	Anything to speed up the 44, including the proposed Ballard->UW subway (especially if it could be routed to downtown).	3/21/2015 11:34 AM
492	it's already looking good. not much else is coming to mind	3/21/2015 10:54 AM

493	The only concern I do have is making sure that frequent, consolidated transit reaches all the way out into far Ballard. I work on 24th Ave NE and commute there from my apartment in Montlake. Currently, the most direct route I can take is the 25/48/43 to the 44 near UW. Since the 44 is the closest only direct bus to that far away in Ballard, my commute takes upwards of 1.5 hours one way for what is a ~20 minute drive. At peak hours, with just the one 44, it can pass me by because it's too full. Thanks!	3/21/2015 9:22 AM
494	We need routes in more areas, not just down the same streets over and over. A lot of us don't have cars and would have to walk very far to get to the streets with bus service. Frequent service won't matter unless you are one of the people who live very close to the few streets with service.	3/21/2015 1:00 AM
495	Have a more direct route from North Seattle College and Northgate Mall to Green Lake/Wallingford/the U District	3/21/2015 12:58 AM
496	Extend the 255 from Kirkland to Fremont/Ballard/SPU (via existing routes 31/32, for example) rather than Children's Hospital, providing connections to major North/South routes on Aurora/SR-99, Dexter/Fremont Ave, and 15th Ave NE, as well as serving major employment areas (and connecting Google's two campuses; you could probably even ask Google to pitch-in to help fund this route).	3/21/2015 12:17 AM
497	Please keep at least one non-freeway route similar to the current 66.	3/21/2015 12:15 AM
498	I think I like the majority of the proposed changes. I don't think I saw anything for closer access to Seattle Center from northern neighborhoods (the 16 and I think the 5 used to go on 5th Ave right on the east side of Seattle Center. It looks like it will still be tricky for me to get to Queen Anne from where I am in Greenwood (as well as many of the northern neighborhoods). I may have misread, but it looked like the new 45 line would end on 15th in the u-district and if you need to go farther south, you'll have to get off there to switch to the 48. I ride the 48 a lot and really like that it can take me all the way to the med center and the east side of Cap Hill if I need to get there. I like to avoid transferring when possible.	3/20/2015 11:32 PM
499	I would run more all-day service on 15th Ave NE if possible. It's a fast corridor with a long history of frequent (10 minute) all-day headway.	3/20/2015 7:55 PM
500	Ensure bus-train transfers at Husky Stadium require MINIMUM walking distances, and that ST trains run frequently and consistently. (Both non-starters for Metro, I know, but the point is that when we transfer we are at the mercy of ST's train headways and their engineers who don't understand walk times / distances.)	3/20/2015 4:25 PM
501	Extend 48/271 to Issaquah TC	3/20/2015 4:09 PM
502	Try to make sure that every neighborhood is connected with the network, even if that connection bus is less frequent.	3/20/2015 3:21 PM
503	It's hard to answer for every line as I only am familiar with the ones I take most often. See above answer as it relates to work transportation and therefore is taken twice a day, Monday-Friday; and sometimes on the weekend. Thank you.	3/20/2015 3:12 PM
504	Not making people travel further to bus stops.	3/20/2015 2:35 PM
505	Retain 255 to downtown Seattle from South Kirkland Park and Ride until Eastside Light Rail is available.	3/20/2015 2:28 PM
506	Leave the north-end hook on route 71 in place. Everything else is great.	3/20/2015 2:13 PM
507	The key will be keeping the buses in sync with the light rail trains. Since more trips will involve a transfer from either the Cap Hill or U-District light rail station to a bus, there should be coordination such that buses all make it to those stations around the time trains leave, and leave those stations when trains arrive. Forming more of a transit backbone could really modernize northern Seattle, and make it more convenient for reaching more parts of Seattle. Seattle has an excellent tech partnership with UW and the One Bus Away infrastructure. However, the data from Metro buses is frequently not present, or inaccurate, or varies wildly. One improvement I would really like to see is better cooperation of King County Metro with One Bus Away to generate better bus data, with less variance while waiting, and more accurate estimates.	3/20/2015 2:02 PM
508	More of a focus on service between central Fremont to 45th in Wallingford. East west service in general is lacking throughout the city.	3/20/2015 1:48 PM
509	I wouldn't. Consolidation of current services is far too destructive to permit. This is a non-starter as long as consolidation is a goal. One way to make service more frequent would be to put pressure on route coordinators to do their jobs, specifically in finding alternate routes as traffic incidents arise over the course of a day. Any bus more than 10 minutes late due to traffic should result in a firing of the associated route coordinator.	3/20/2015 1:29 PM
510	Make sure there are multiple spots along Eastlake Ave	3/20/2015 1:26 PM
511	It's not just about Seattle! You have a million or more Eastside bus riders.	3/20/2015 1:25 PM

512	The basic idea is wonderful, but the increase in transfers is a gamble. These transfer points must be convenient for riders. If not executed well, there will be huge problems (especially at Husky stadium station). If the transfers go smoothly, this will be a very significant and much-needed change for Seattle.	3/20/2015 1:21 PM
513	No extra cost per use, have it covered on the Metro pass system	3/20/2015 12:25 PM
514	North Seattle transit is infrequent for me, so I don't feel qualified to comment on it.	3/20/2015 11:40 AM
515	There are some good ideas here, but you need to think about people who walk. Also, I would keep a route between NorthGate, Green Lake and Redmond as there are a lot of Microsoft employees and contractors who use this service.	3/20/2015 11:04 AM
516	Extend Bus Route 246 to Clyde Hill/ Yarrow Freeway Station.	3/20/2015 8:44 AM
517	I do not like the goal of alternative 1. I think a broader network with more options is important.	3/20/2015 8:26 AM
518	Use the lightrail as an additional asset for public transportation, not a substitute for bus routes. "Consolidated, frequent network of services" should mean "easy, constant access to transportation throughout the day for all citizens," not "Sorry Grandma Smith, we just cut your bus line and now you have to walk 5 blocks up a steep hill to get to your bus, but trust us, once you're on there (given that you didn't suffer a heart attack rushing for the bus) you'll be totally faster, because you can switch to the light rail and... weeh, look how fast we're going!" It is understood that both your alternatives are born out of necessity, because we completely underfund public transportation. And yes, it is a shame that people in King County have decided that they have money to buy organic pineapples all year but not to fund mobility for all citizens. Nevertheless, as it stands both Alternative 1 and Alternative 2 sound utterly suboptimal, inadequate and, pardon the French, like steaming piles of horseshit. Thank you for taking my feedback into consideration.	3/20/2015 8:15 AM
519	improve the design of the bus dropoff zones at Husky Stadium Link station	3/20/2015 8:10 AM
520	I understand the need to remove duplication between Link, the 11, 43, and 49 - however, removing downtown connections from all three bus lines makes it a little too difficult to get to the Hill from the downtown core (especially the northern end).	3/20/2015 7:26 AM
521	coordinate arrival times for transfers on Lake City Way and Northgate	3/19/2015 11:36 PM
522	I don't use Metro in North Seattle.	3/19/2015 9:49 PM
523	I think this is a great proposal. I'm concerned about the routing along University Ave. which is the slowest of the current routes through the U-district. Either routing the buses directly towards 11/Roosevelt or adding other transit improvements along University (bus priority at lights, say) would be necessary to reap the full benefits of the plan.	3/19/2015 9:26 PM
524	Retain #30 from the Sand Point area to and along University Way NE during the day.	3/19/2015 8:04 PM
525	Do not use through routes. Get rid of many as possible.	3/19/2015 7:55 PM
526	I don't want a consolidated, frequent service! I want safe and easy access to bus to get from work at home at night as a woman by myself (with health issues to boot) who wholly relies on the bus!	3/19/2015 7:50 PM
527	I have no particular suggestions for improvement.	3/19/2015 7:03 PM
528	No improvements possible without changing the 'consolidated' concept.	3/19/2015 6:46 PM
529	I really like the proposed plan and would happily accept it as is. I will sing its praises to others as well.	3/19/2015 6:02 PM
530	Why don't we use the concept of shuttles - short neighborhood routes that connect the neighborhoods to the bigger better transit hubs that have lots of service and capacity! And our east to west service (which could play into a shuttle and hub concept) has never been well developed. As an example 145th St. NE. (and 145th Ave. N and 145th Ave. NW) is a major arterial east to west, but service between Lake City Way and Aurora Ave. N. on 145th. is pretty non-existent. I'm sure that will change when light rail starts coming further north, but even from Lake City Way to the I-5 freeway now, that major corridor seems under-utilized	3/19/2015 5:47 PM
531	I think the ideas that are already in place are great.	3/19/2015 5:01 PM
532	I would like to see a route between Ballard and UW/U district that uses Leary, but if transferring between 31/32 and 40 is simple enough that's probably adequate.	3/19/2015 4:55 PM
533	I don't care about north Seattle - whatever you're doing there may or may not be fine. But you're messing up Capitol Hill in terrible, non-reversible ways. STOP IT.	3/19/2015 3:52 PM
534	Parter with other commuting services (like the UW's Health Sciences Express, perhaps)?	3/19/2015 3:32 PM

535	I know that Metro will want to have their bus line start at the end of the Link, but a large % of people will not want to use for some reason or other. I live just beyond the University station, but I will NOT want to use it unless I can transfer easily from the link to a bus route to get to my destination.	3/19/2015 3:16 PM
536	Bring the routes along Sand Point Way that link directly to Husky Stadium station north to Magnuson Park	3/19/2015 2:56 PM
537	The goal is problematic. We have to have a system that's convenient to use, otherwise we won't use it. Please don't implement this alternative!	3/19/2015 2:25 PM
538	I would extend the improved hours to weekends. I would focus on making transfer facilities better for shielding from the wind and rain. The all-glass shelters on NE Campus Pkwy, for instance, are nice, but offer comparatively little protection from the elements. If you want people to accept more transfer, the transfers should be more attractive.	3/19/2015 2:20 PM
539	Better transfers at the University of Washington Station. Seattle Transit Blog has several good ideas about this in the comments to their posts about Alternative 1.	3/19/2015 2:11 PM
540	Don't delete route 72 or move route 73.	3/19/2015 1:48 PM
541	Well, it would probably be along the lines of very carefully identifying the new "hubs" of frequent buses, to ensure that people in all neighborhoods are not forced to walk too far to get to the new high-frequency routes.	3/19/2015 1:05 PM
542	I would like to know how Alternative 1 would impact service from the UW all the way south to the transit station in Mount Baker.	3/19/2015 12:04 PM
543	More frequent service headed north from Northgate - especially up to Mountlake Terrace / Ballinger Way. (347), and to Aurora transit center.	3/19/2015 11:42 AM
544	Look for opportunities to improve/provide east-west routes across north seattle	3/19/2015 11:13 AM
545	As long as there are no stop/service cutbacks on Bus Lines 8, 11, 10, 49, 48, 7, Rapid Ride D/C, 43 -- I am o.k. with changes, Please remember short distance riders who have no car and are totally dependent on Metro Bus Transit like ME!	3/19/2015 10:37 AM
546	The Sounder should stop near the intersection of NW 57th St and 37th PI NW. There's a ton of empty space all around the rail line to build a bus turnaround, bus stops, and even a parking lot. A frequent Ballard bus loop could easily be made to go right past there, Golden Gardens, downtown Ballard/hospitals, Ballard Senior Center, Ballard Locks, and anyplace nearby with a large park and ride, etc. This would provide vastly improved transit service to thousands of near downtown neighborhood taxpayers and commuters at a much lower cost than building new rail across bridges and through existing areas. If a good park and ride were included it would also provide a much closer/faster stop-off point for buses used when landslides temporary interrupt the Sounder service farther north. The trains could just run back and forth from the Ballard stop and the buses could go from north back and forth to the Ballard stop.	3/19/2015 10:18 AM
547	I guess I don't agree with a consolidated network. I think everyone should have access to public transportation and not have to walk a mile or more to get to a light rail station.	3/19/2015 10:17 AM
548	Add University Village shopping area (very near the light rail station) as a destination.	3/19/2015 10:06 AM
549	See above...Light rail service being expanded to neighbourhoods. Creating an underground would seriously decrease traffic, CO2 levels, and travel times.	3/19/2015 10:03 AM
550	Keep buses running on 5th Ave NE in Maple Leaf, and make it easy to get a bus to the Northgate Transit Center from 5th Ave NE.	3/19/2015 10:01 AM
551	Either don't cut the 68 or add more additional 372s to prevent the already-frequent leaving people behind at stops.	3/19/2015 9:57 AM
552	I have no suggestions. All proposed changes seem to be in line with what I was hoping for when I replied to the first survey.	3/19/2015 9:39 AM
553	More attention to NE corridor: Lake Forest Park, Kenmore, BOthell, Woodinville, and Juanita and Kirkland. More capacity at park and ride lots in Kenmore and Bothell and others that fill up early. This could be parking structures or additional sites. Easier access to park and rides by bike and better bike facilities. Although I lean more in the direction of Alt. 1 than Alt. 2, I think the best answer to your question of which is preferable is "Both." It should not be an either-or choice. We need more transit of the kind envisioned in both alternatives.	3/19/2015 8:46 AM
554	Make one local all day peak route from further north in Seattle that goes directly to South Lake union without having to go clear downtown and back.	3/19/2015 8:38 AM

555	Have one route from further north than the University District that went local to South Lake Union.	3/19/2015 8:09 AM
556	I have a concern about moving route 31 and 32 service away from Stone Way & 40th Street. The 40th Street corridor attracts heavy ridership to and from the University of Washington campus. The 44 is not a usable alternative, both because of the steep and long walk up the hill to 45th Street and also due to significant reliability and crowding issues during rush hours. I recommend keeping the 26 along 40th Street/Wallingford Avenue/35th Street and keeping the 31 and 32 along 40th Street/Stone Way (as is the current service pattern). I also recommend keeping the 16 as the Aurora Avenue route between Fremont and downtown Seattle.	3/19/2015 7:59 AM
557	I don't really know.	3/19/2015 2:08 AM
558	Have another bus that connects Capitol Hill and Fremont (similar to the 43 frequently turning into the 44).	3/19/2015 1:06 AM
559	lots of north-south routes along major avenues. riders can easily walk or bike east-west	3/18/2015 11:06 PM
560	Transit strongly biased towards N-S routes. Need an increase in E-W transit.	3/18/2015 10:46 PM
561	Route 372 is the main north/south route between 15th ave NE and 35th ave NE to UW. It would be nice to have a stop at NE 82nd St where Ravenna Ave NE and 25th Ave NE merge, b/c those of us who live in the neighborhood not only have to walk down the hills but also have to walk down 25th to the nearest stop. The walk is almost the same amount of time as the bus ride. The walk time would be cut in 1/2 with this stop added. I have missed the bus many times b/c of this walk as it passes me b/f I arrive at the stop.	3/18/2015 10:20 PM
562	reduce fair by .50 cents	3/18/2015 10:14 PM
563	I love alternative 1 except for one item. My primary concern is the traffic associated with Southbound Montlake Blvd. from 45th street to the UW light rail station. In the evening traffic is terrible and would heavily impact the travel time to get to the UW station. I typically use route 65 to get to UW, and would continue to use the 65 to get to the light rail. However, if traffic is terrible, it might be easier (and maybe quicker) for me to drive, which would completely defeat the purpose of the light rail. I strongly urge you to assess ways to improve the route time for bus traffic along mountlake blvd, from 45th, to the access point of the UW light rail station. The benefit of public transportation shouldn't merely be that it can get you places without a car. It should also get you to that place in the same or less time.	3/18/2015 10:01 PM
564	Maintain route 43. Please. This serves many more people than live in the Broadway and John intersection. Please do not delete this service.	3/18/2015 8:54 PM
565	I'd link it to the minimally-served areas West of the freeway: Phinney Ridge/N Ballard/Sunset/Greenwood. A single bus from N 65th and Greenwood to the University district would be great. Service from Ballard/Phinney Ridge to Bellevue would be amazing. Extend it to connect Phinney Ridge/Wallingford with Northgate (currently a 3-bus trip)	3/18/2015 8:39 PM
566	N/A	3/18/2015 8:09 PM
567	Better bus stop, clearly marked with shelter (even a small one) and a light above the unsheltered stop.	3/18/2015 7:40 PM
568	...	3/18/2015 7:37 PM
569	Infrequent stops/locations should still have access even if it is only once and hour during weekdays and minimal day-time hours on weekends. I cannot endorse a transit-only lifestyle if I can't reach distant locations easily.	3/18/2015 7:09 PM
570	Don't consolidate it.	3/18/2015 6:49 PM
571	As long at the link runs as it should I will be using it as my main mode of transportation. Now if for whatever reason I feel like not taking the link, I mean its a 20min walk from the my place and a 17min walk from the ave, I would like to have a backup option in order to get to Downtown, kinda like a contingency. I guess thats what the 74 is for.	3/18/2015 5:37 PM
572	Peak period 45 that runs on 15th Ave in the U District with minimal stops, allowing access to a UW Link transfer without too many stops in the U District.	3/18/2015 5:20 PM
573	I would be wary of dropping service to View Ridge. The 71 is the only late bus that goes that direction, and it doesn't even come by that often. Dropping that route without replacing it with an equivalent or more frequent route would not be a good move. In addition (and this may be part of the plan), I would make a direct bus from downtown to NE seattle that doesn't stop in the University District. I would separate commuters who are just trying to get to campus/the Ave (who hopefully would be re-routed to the light rail) from commuters who are trying to get back home in Ravenna, Bryant, View Ridge, Wedgwood, etc and don't want to make all the U District stops.	3/18/2015 4:37 PM
574	Keep route 43. Keep more 71-3 buses	3/18/2015 4:28 PM

575	The more frequent service you can put on the 44 the better. It is almost always crowded and, especially in the mid-afternoon, serves several Seattle schools which creates ridership bulges when school lets out. A couple of extra trips during these mini-peaks would be most welcome. Fifteen minute service for most of the day is not enough.	3/18/2015 4:12 PM
576	Improve/keep the location of the stops that are convenient and in frequent use of the riders (Don't have farther distances in between stations).	3/18/2015 3:31 PM
577	maintain easy access, even at expense of slower ride to desitnation	3/18/2015 3:29 PM
578	I have nothing to add	3/18/2015 3:13 PM
579	Stronger Park and Ride options might be helpful. Also, better sidewalks with better lighting to get to and from the bus routes.	3/18/2015 2:44 PM
580	Not route everything via link. The U district is traffic ridden as is. Until the rail network is reliable throughout north seattle it doesn't make sense to deprecate bus routes to force usage of rail.	3/18/2015 2:43 PM
581	I could not tell from the maps if there is a direct connection to the light rail if I took route 75 to the U district.	3/18/2015 2:42 PM
582	Keep the 73 on its current route and adjust the times to work in concert with the 373 & 77. Or change the 77 to also run at non-peak times.	3/18/2015 2:37 PM
583	Don't change anything. There IS NO LIGHT RAIL yet.	3/18/2015 2:34 PM
584	The only service cut I see that would cause a major headache for commuters is the loss of service in Laurelhurst. There is no close service proposed in alternative 1.	3/18/2015 2:27 PM
585	More express routes between long distant locations - less residential stops.	3/18/2015 2:20 PM
586	Either keep the 242 (my preference) to serve those on 148th in Redmond or at least increase the frequency of 542 trips during peak hours. Have the 65 run until at least 1 AM.	3/18/2015 2:02 PM
587	Increase access to South Lake Union. Keep 252 for Kingsgate P&R to SLU/Seattle access (On weekday evenings, 252, 255, and 311 often have no capacity--people stand everywhere possible and still can't squeeze behind the yellow line. I'm not sure how anyone could suggest reducing of any of these routes).	3/18/2015 2:00 PM
588	route 45/67/48 further down Ravenna to 15th instead of University Ave. this would bring students (who already use the current 45 a lot) closer to the University 15th is much less congested and as it has two lanes would offer opportunity for cars to pass stopped busses. Adding traffic to the already congested Ave would not be good and might make it more pedestrian friendly.	3/18/2015 1:59 PM
589	Once there is light rail to Northgate, I will feel differently. Then will be happy to take a bus to Northgate and use light rail to UW or downtown.	3/18/2015 1:51 PM
590	How long will it take to get from NE 65th St and 35th Ave NE to the UW link light rail/stadium? Looks like I'll have to loop all around the U District before I get there. Will the route 65 change on football game days? That's a huge problem right now. I just need to get to the game and I can't get there from my neighborhood without having to walk alot and I have a disability so it defeats the whole purpose if you change the route. I'd like to take the light rail to the airport. That's the goal. Do I leave my car at northgate? How many buses is that?	3/18/2015 1:39 PM
591	I can't tell from the description if this will improve transit between the UW and SLU, but that would be a priority for me. UW currently has a shuttle that makes this trip every 20 minutes, but they are considering implementing a fee service which would lead me to driving instead since no sufficient transit system is available.	3/18/2015 1:37 PM
592	Decrease the number of stops on the routes. The stops are too close together, it makes the whole trip too slow. I love the distance between the Rapid Ride stops.	3/18/2015 1:35 PM
593	bringing expert from Europe, Japan, East-coast anywhere that has a good public transportation.	3/18/2015 1:32 PM
594	Don't cut the 73. Cut 77 if you must leave us with only one bus that goes south of Northgate.	3/18/2015 1:24 PM
595	I'm not sure how much this is addressed by Alternative 1, per se, but in general traveling east-west by transit is more difficult than traveling north-south. I appreciate that the new light link will make it much easier to travel north-south, so it would be nice if that allowed metro to refocus resources into east-west travel. As a student who lives in Sandpoint, I almost never travel south of the water, but I frequently travel west to reach school, my work, and socialize with other students.	3/18/2015 1:23 PM

596	I use 271 & 556 routes to go between UWMC and Issaquah, NOT north Seattle. I use 271 most because of frequency of buses. 556 route is faster but not available during complete commuting hours. Park & rides are full in Bellevue and Eastgate, making my commute very logistically challenging. I'm happy to walk, bike to make connections to light rail or bus. I just need better parking, more frequent direct routes similar to 556.	3/18/2015 1:21 PM
597	My main concerns right now (purely selfishly) are improved frequency of service for Ballard/U-district and Ballard/Downtown/Seattle Center. The hope with improved frequency is that buses will not be as crowded and missing a bus will not be as stressful when trying to get to work on time.	3/18/2015 1:20 PM
598	Make sure that you keep route 197, commuter bus from south Puget Sound to UWMC. Many employees of the hospital and UW campus use the 197 to commute every day, and the buses are all full. We wish we did not have to stand up as frequently for the 25 to 35 mile long commute!	3/18/2015 1:12 PM
599	it seems that the new 45 route helps solve a lot of the problems of the current 48. Namely, it's a long, cumbersome route through some very condensed, high-traffic neighborhoods. Taking the 48 local in summer through Greenlake is murder. Anything that helps improve east/west commuting through Seattle would be great!	3/18/2015 12:48 PM
600	im not opinionated on this. i am concerned with beacon hill to cap hill to uwmc/u district. i like that alternative 1 reduces transfer times. transfers are so annoying, especially when you have to wait more than 15 minutes.	3/18/2015 12:46 PM
601	Increase Tax Revenue-Income Tax-So we can get it ALL!!!	3/18/2015 12:42 PM
602	I think the consolidation is too much. Mass Transit needs to be more like a circulatory system with trunk routes and branch routes to provide service to areas commensurate with their demand.	3/18/2015 12:25 PM
603	No suggestions.	3/18/2015 12:19 PM
604	Go further North.	3/18/2015 12:19 PM
605	Just make sure the buses run when they say they will.	3/18/2015 12:18 PM
606	Smaller buses that run more frequently. It seems to take a long time to load the double buses, and if I miss one, I have to wait a half hour when I can easily drive to my destination in 10 minutes, resulting in my driving rather than busing.	3/18/2015 12:16 PM
607	I feel like Alternative 1 is very good given it's goals. Given my commute and use case, I very much like these changes.	3/18/2015 12:16 PM
608	Poor connections to UW Link See my question 7 comments above. The light rail service was I thought supposed to be the point of these changes and it is all but ignored. Railed transit service beats any bus service. Feed the light rail!!	3/18/2015 12:10 PM
609	Each option comes with benefits and drawbacks. You can't make everything happen, so it may be a matter of selecting the option and watching to see how riders do with some of the limitations that come with the new system and whether the benefits outweigh these limitations.	3/18/2015 12:08 PM
610	CONSIDER East/West routes!!!!	3/18/2015 12:07 PM
611	Consolidate routes on major arterials especially up north up to shoreline. 15th ave, greenwood ave, maybe even 3rd ave NW!! Frequency of buses is key. The more frequent the better. This equates almost instantly to reliability.	3/18/2015 12:06 PM
612	I would have to see exactly how the changes would affect me to give good improvement tips.	3/18/2015 12:06 PM
613	I would eliminate route 76 and keep route 71 to maintain frequent service to downtown Seattle	3/18/2015 12:06 PM
614	Move stops on Stevens Way to Rainier Vista.	3/18/2015 12:05 PM
615	the 372X is the bus i use the most. During rush hours it is ALWAYS overloaded far beyond capacity, with many UW riders getting off at U village. i think the 372 should not stop close to UW, or it should increase in frequency to alleviate crowding issues.	3/18/2015 12:04 PM
616	Keep route 72. or make 372 stop at University Way and 45th or very close to there.	3/18/2015 12:04 PM
617	Keep route 70's northern end as it is.	3/18/2015 12:02 PM
618	See comments above	3/18/2015 12:01 PM
619	I would return route 65 to its former route straight down 35th to 45th instead of the jog it now takes to Sandpoint/Children's Hospital (which is already served by route 75), thus improving frequency and efficiency of transit time for nearly all users of that route from northend to UW.	3/18/2015 12:01 PM

620	I just honestly do not like this alternative. This basically get rid of many options for people in Wedgwood area. If there is a frequent line going along NE 75th and go down to U-district area then I may change my mind. I use 71/76 a lot so deleting part of 71 going near Wedgwood and deleting 76 completely don't really appeal to me.	3/18/2015 11:55 AM
621	I think the north south connections are sufficient - what is needed are more E-W connections. Especially important would be a connection between Greenwood and Ballard! I'm not sure about NE Seattle (Wedgwood, Laurelhurst, etc...), as this area seems quite domestic and I am not sure what the main thoroughfares are here.	3/18/2015 11:55 AM
622	Dedicate part-time parking lanes on non-major streets to bus-only lanes.	3/18/2015 11:53 AM
623	Fix the transit isolation issue created by the lack of direct service between College Way N/Meridian Ave N and Wallingford and Green Lake (concept for routes 16 and 26X)	3/18/2015 11:52 AM
624	Again, as I do not live in North Seattle, there is not much comment I can make in improving this service.	3/18/2015 11:50 AM
625	Have the transfers from Light Rail to bus be in sync; for example, a bus will wait for the Light Rail to arrive at the station and disembark before leaving. Maybe give priority to commuters who are transferring from Rail to bus; make it impossible for someone to walk to the station and catch a bus there (they would have to walk to a stop before or after the station)..	3/18/2015 11:49 AM
626	I like this idea, but I would love to have a better idea for connecting Wallingford to Northgate/Northwest Hospital/North Seattle Community College. Seems like that piece is missing. I really love the way the 16 runs right now. Seems like the 44 could just continue from 45th over to sandpoint if that's the missing piece...	3/18/2015 11:48 AM
627	Do not decrease or get rid of certain lines.	3/18/2015 11:47 AM
628	Make sure already infrequent or inconvenient areas (like Sand Point and Laurelhurst) continue to get at least the level of service they already get. I used to live near Sand Point Way and it was awful trying to get anywhere with the 75 running once every 30 minutes.	3/18/2015 11:47 AM
629	It is IMPERTIVE to maintain diverse and regular buses between Northgate and the outerlying areas (Greenlake, Fremont/Wallingford, downtown, UW Medicial Center). This is true now, and will become even more important once the Northgate light rail opens, since people will need to get to and from it efficiently, else they will not use it. Also, since light rail does not service Ballard, Fremont, Greenlake etc., access will still be necessary via bus. Curtailing the 16 would be a major disadvantage in Alternative 1 as it misses every light rail stop other than Westlake Center, downtown.	3/18/2015 11:45 AM
630	nothing	3/18/2015 11:45 AM
631	Don't change route 373X.	3/18/2015 11:44 AM
632	You have an impossible job trying to balance costs, resources, and keep a majority of riders reasonably happy! I'd go with Alternative 2 though.	3/18/2015 11:41 AM
633	If you want to consolidate, awesome--but please bear in mind that much of Capitol Hill is an UNSAFE location during dark morning/night hours, even if it's fine during the day. Same with the UW Campus--to avoid walking through the UW Campus in the dark in the mornings, I would need to walk down Pacific Place to 15th with extremely hazardous traffic--or I could choose the Burke-Gilman trail, which is dark with a lot of bushes for creeps to hide in. PLEASE RETAIN ROUTE 43 AT LEAST UNTIL THE BROOKLYN STREET STATION OPENS. That won't help my Capitol Hill morning trip, but at least it will help me get from the bus to work safely. A high number of people work in the UW Tower; I can't be the only one. Can you not create a gap-filling route on the Hill that would get people safely to the Capitol Hill station, at least during early/late hours? The 43 is always full, no matter the time of day I take it. Many people ride only 1-2 stops before deboarding, rather than going from Capitol Hill to another neighborhood.	3/18/2015 11:40 AM
634	Add a route to go straight across 45th street between 15th and 25th Ave NE instead of sending most busses through campus (much traffic).	3/18/2015 11:38 AM
635	Create a stop so route 316 can drop riders off at 45th Ave NE and the Freeway on its southbound service. Route 316 has a 45th Ave NE and the freeway stop (#5419) on its northbound service. A bus lane on the northbound freeway exit for Ravenna Blvd (#170?) would help move along the #316 to get it back in service quicker.	3/18/2015 11:36 AM
636	I would like to see the travel time from Pioneer Square to 45th and Brooklyn be as fast or faster than currently. This might be possible by taking link light rail to husky stadium and then getting on a "very frequent" bus to University Way, but it is unclear if this would work in the proposed model. In my experience with public transit, increasing the number of transfers usually increases travel time.	3/18/2015 11:35 AM
637	This plan would be ideal if there is also adequate infrastructure in place - including buses with comfortable and ample seating, and stops with plenty of cover from outdoor elements.	3/18/2015 11:34 AM

638	Keep the 73 all day long.	3/18/2015 11:32 AM
639	I would eliminate fewer routes and opt for 15 minutes between busses. 10 minutes is not helpful when there is significant added walking time to/and from stops that are fewer and farther between where I need to go.	3/18/2015 11:31 AM
640	Keep route 12 or have some sort of bus service in lower capitol hill and central district to connect with light rail station on Broadway and John	3/18/2015 11:31 AM
641	Have the 44 run about as frequent as it is now. Re-establish the 28 during off peak time.	3/18/2015 11:29 AM
642	Implement more express options. It takes a long time to get around Seattle and it is compounded with stopping every couple of streets. If the bus comes more frequently, then maybe passengers won't mind skipping an express option when the next bus is around the corner. I don't mind a little more walking, if my on-bus travel time is reduced.	3/18/2015 11:28 AM
643	Something needs to replace the old 48E that was retired. I frequently take the 48 to find that it's totally packed with little traffic getting on or off near Greenlake. I suggest the new route 45 include an express component that serves the North Seattle to UW commuting crowd with additional southbound service in the morning and northbound service in the afternoon. This express service should limit stops between the U-district and 85th/Aurora.	3/18/2015 11:25 AM
644	Keep route 43 for the people that live outside the 0.5 mile radius of the Capitol Hill Link Station.	3/18/2015 11:25 AM
645	Why go through campus at all? Run all buses down 15th or 25th. Campus is such a bottle neck, and if you need to go to the north end of the Ave you encounter a great delay from the Wedgwood area unless you can get the 71.	3/18/2015 11:25 AM
646	Not sure that I like the rerouting idea for the 67 - I think it will be more inconvenient to get to and be a longer bus ride. Light rail will not impact my commute until 2021.	3/18/2015 11:24 AM
647	As above. Love the express idea, but you need an excellent feeder system.	3/18/2015 11:24 AM
648	Please keep the 71 the same and add extra capacity.	3/18/2015 11:24 AM
649	Fewer stops and shorter rides	3/18/2015 11:20 AM
650	General feedback. I ride a bicycle and supplement that with bus service. I would like to see more "Express" type services and am willing (and able) to travel further to a bus/rail stop in order to reduce overall commute time.	3/18/2015 11:20 AM
651	I think it's great already!	3/18/2015 11:20 AM
652	Infrequent special pickups for elderly (may already be in place)	3/18/2015 11:19 AM
653	The current major drawback to using transit is the infrequency of buses. Every 1/2 hour is a non-starter. A fleet of smaller buses that run every 10 min would make metro the obvious travel option.	3/18/2015 11:14 AM
654	More buses, more frequently...not less!	3/18/2015 11:13 AM
655	North Seattle to city of Seattle in most popular areas.	3/18/2015 11:10 AM
656	build a street car route from international district to central district via Jackson St. to Capitol Hill. The route 14 is terrible.	3/18/2015 11:03 AM
657	We don't need more frequent service on the 242, the cadence is just right. Six buses between 6am and 9am running to Overlake. Six buses between 3:30pm and 6pm running to Ridgecrest. The concept of a "consolidated, frequent network of service" sounds great, but if it means killing a popular, targeted, highly efficient route, then your concept is making things worse, not better.	3/18/2015 10:53 AM
658	More service on 15NE	3/18/2015 10:27 AM
659	If bus service has to be consolidated, force students that live within walking distance of campus to walk, leaving the limited bus service to commuters who need it to reach downtown. Or wait to consolidate bus service till the Roosevelt and North U stations are completed.	3/18/2015 10:07 AM

660	As I discussed in the previous question, missing buses is my biggest concern with transit. I like where this plan is going, and I think the only changes I would make would be to improve the responsiveness of stoplights to pedestrian traffic. I have on several occasions missed buses as a result of lights not changing for several minutes, which can be quite frustrating when you're on the way to a meeting. Related to that, I also would like to see improvements in how full buses are handled. The driver should still stop at the stop, open the doors, and let waiting people know that the bus is full. Customer service has been unhelpful on occasions when I have called in after a bus has blown by a stop without pause, and they never have a concrete answer on whether the next bus will also blow by the stop. I hope improvements to the system will include better tracking of these skipped stops and additional buses or longer buses added accordingly. --BEFORE the next schedule revision if at all possible. Maybe consider these like special event extra buses.	3/18/2015 9:59 AM
661	Dedicated bus lane on Denny!	3/18/2015 8:47 AM
662	Keep route 43, even if infrequent	3/18/2015 8:00 AM
663	I would reduce the number of buses between DT Seattle and UW - the Transit Tunnel is already too overcrowded with buses during these times, and the Link should take over the passengers traveling between those locations with the help of higher capacity and more frequent trains. It would be nice to see every Link station turned into a hub of its own	3/18/2015 1:05 AM
664	Planners need to keep in mind that 1/2 mile walk to/from the Capitol Hill Station is not easily navigable for many people, especially the disabled. People live all along Pike/Pine and the intersecting avenues, all of which are situated on a hill. Telling someone who has trouble navigating steep streets to walk 1/2 mile uphill is NOT OK. Density in this area demands more frequent service than the #10 can ever possibly provide, and maintaining at least one of the two University District routes (43, 49) maintains easy, one-seat connections within Capitol Hill. Having to change buses to travel within a neighborhood as small as Capitol Hill is not reasonable. I am also concerned that Route 16 is being stretched and played with to the point of being unrecognizable. This should be a new route. You cannot add new service to three new neighborhoods and call it the same route. it is fundamentally different. This route has changed so much over the years, from constantly changing stop locations at the Ferry Terminal to moving the route around all over the place in Northgate. Just leave it alone. If more service is required in other neighborhoods add new routes or increase frequency elsewhere. I am tired of not knowing where this route goes or how long it will take to get there.	3/18/2015 12:16 AM
665	Keep 45/48 through route.	3/17/2015 9:33 PM
666	Increasing frequency of east, west routes at all times of the day, night to ease travel to these neighborhoods. E line is awesome for north, south frequency.	3/17/2015 9:30 PM
667	Create dedicated bus lanes on Montlake Blvd? During peak times, it can often take 25 minutes+ to get from University Village to Husky Stadium.	3/17/2015 7:54 PM
668	I would have the route 70 keep or extend it's current U-district routing with any extension going up to NE 65th st to fill in service lost on the 66 I would also not delete route 12, instead I would run it at it's current peak frequency with 30 minute off-peak frequency. I believe this route will gain riders with the deletion of the 43.	3/17/2015 7:47 PM
669	Keep Route 71 and at least run it as a shuttle from View Ridge/Sand Point to the Greenlake Park and ride every 15 minutes (See alternative 2). That allows it to serve its present population and connect to many bus routes that go down 35 NE, 25th NE, 15 NE, and Roosevelt. It also makes sense as in that format it will become an important route when the Roosevelt light rail station is functional.	3/17/2015 7:10 PM
670	Presumably there's not a lot of ridership from NE Seattle (east of Wedgwood) to the UW, given the hills and the lack of routes, but ridership definitely won't increase unless routes are available.	3/17/2015 5:37 PM
671	Reduce the number of stops. Seattle public transport could be great but between the high number of stops and the high number of crossings and traffic lights it runs really slow.	3/17/2015 5:32 PM
672	More East-West channels of transport are always looked for, which is understandably difficult with Seattle's geography, but is currently under-served. I think getting as close to a grid with short service lines as is possible would increase the efficiency and frequency of service, rather than having longer routes.	3/17/2015 3:59 PM
673	It probably would benefit me, I just worry about taking service away from already undeserved areas that typically have populations with lower income and older riders; both demographics that need transit. It would also hopefully encourage more people to live outside of central Seattle.	3/17/2015 3:51 PM
674	I would retain the 72 or alter bus routes so some other bus comes through the U District area (by the Ave. or 15th) on it's way to Lake City.	3/17/2015 3:35 PM
675	Shelters at stops, not just benches. real time next bus arrival time signs	3/17/2015 3:23 PM

676	Maintain 545 service so there is a direct route from Capitol Hill to Overlake Transit Center at all hours.	3/17/2015 2:15 PM
677	The south end of Wallingford avenue is growing fast, with the construction of new offices and apartment buildings. If a faster connection to downtown is not considered for 2016, it should be reviewed in the next revision.	3/17/2015 1:34 PM
678	I would add Link light rail to Husky Stadium, and leave existing transit service the way it is, except for routes that cross the Montlake Bridge.	3/17/2015 1:01 PM
679	I would a single route that connects east Green Lake with Phinney Ridge. I would add a single route that connects Phinney Ridge with Wallingford. I would also add a single route that connects Greenwood/Phinney Ridge with Eastlake/SLU, especially during peak hours. Add more frequent east-west routes.	3/17/2015 11:53 AM
680	Faster transit between Ballard and the University District (and if it extended down to Capitol Hill, that's always great, too). There needs to be an express bus that goes East-West in North Seattle. Really, if there was a loop bus that had just one stop in each neighborhood (Capitol Hill, University District, Wallingford, Fremont, Ballard, Magnolia, Downtown, and Back up to Capitol Hill--or something along those lines), I would use it regularly.	3/17/2015 10:20 AM
681	Keep it streamlined and stick to the main roads.	3/17/2015 9:33 AM
682	Use alternative 2	3/17/2015 9:25 AM
683	I would be more cautious about eliminating bus routes. Some could still run, just not as frequently, which would overall help to consolidate travel.	3/17/2015 8:28 AM
684	Combine both alternative 1 & 2 options for more choices.	3/17/2015 7:07 AM
685	There's a laudable amount of improved east-west transit - the new 16 alignment, the hopefully increased reliability of the 48N/45, increased service on the 31/32 - but I think a lot of people are going to wish you went a little farther. I understand that there's probably little more you can do about it for now, but I was purposefully hoping the 44 would run a little more often to help make that Ballard connection smoother.	3/17/2015 1:21 AM
686	I recommend to revise or delete bus route 49 10 due to many riders in University District will be using streetcar and/or light rail more often in next 5-6 years	3/17/2015 12:24 AM
687	Have the 545 run off peak hours as normal. You can keep the other stuff if you want.	3/17/2015 12:07 AM
688	Change route 75 to go the UW husky stadium light rail station. Change route 16 so that the night & weekend segment (on NE 70th is used at all times).	3/17/2015 12:04 AM
689	keep 242. it is often full	3/16/2015 10:57 PM
690	Keep weekday service unchanged for the 545 or if not possible, and instead reduce off-peak service (but don't remove it). I don't know the details of where those resources would be going instead, but that is an important line which many people use on a daily basis. I get the vision is consolidated frequent service, but I don't think that is going to be efficient in the case of the 545.	3/16/2015 10:55 PM
691	Seattle voters voted in favor to raise their taxes to help Metro and we the voters were told that service would be maintained if we voted in favor of raising out taxes. This came directly from Metro and local politicians but proposed Alternative 1 is the opposite and is eliminating the service we have today. In other words Metro and all of the politicians lied to the voters. That is BS. Maintain the service that is now and add to it because that is what Seattle voters were promised. Of course we should have known that you can't trust politicians and the bureaucrats at Metro and Alternative 1 is prime example of the lies the voters were told.	3/16/2015 9:54 PM
692	Utilize the University of Washington's backroads - Children's hospital transit vans do it effectively, and it would be an amazing time-saving link between NE Seattle neighborhoods and the ULink station.	3/16/2015 7:13 PM
693	Cross-town milk runs like the new 45 will still get bogged down in places like Green Lake Way and (is it 12th now instead of 15th)? Don't burn up all the time saved by the backbone rail by wasting it wandering around instead of taking the direct route. I never understood why the 48X was cut -- it was a good route for those wanting to get past all those 5 block student rides in the U district and avoid meandering around Greenlake where nearly no one enters/exits. Take a direct route with the 45, like the 44 does.	3/16/2015 6:10 PM
694	I would keep Route 71 as is.	3/16/2015 5:12 PM
695	High frequency is the best, particularly getting traffic onto the light rail	3/16/2015 5:10 PM
696	Keep the weekday service off-peak for 545 (I'm willing to accept that weekend service may be cut)	3/16/2015 4:59 PM

697	I wish the 255 went to OTC instead of to Kirkland because then it'd be door-to-door service for me, but I assume you've looked at who uses which routes.	3/16/2015 4:44 PM
698	Work with Microsoft to change their Connector pickup locations. My current closest stop is Bellevue & Pine. Many employees choose public transit because both the 545 and Connector have the same pickup. If more employees preferred the Connector then perhaps 545 usage would drop. (Although personally I think it would be best for the city to have good public transit for all rather than relying on a separate private service).	3/16/2015 4:17 PM
699	More routes connecting Northgate and Overlake Transit Center.	3/16/2015 4:13 PM
700	don't reduce number of buses. There's always people standing.	3/16/2015 4:06 PM
701	Realize that frequency may not save commuters time, especially for people who rely on public transportation, and can't drive to a light rail station.	3/16/2015 4:04 PM
702	Keep route 11	3/16/2015 3:41 PM
703	The bus stops too frequently. Too many riders use cash. Can you offer 5% off as an incentive for ORCA card users to drive the migration to the ORCA card?	3/16/2015 3:37 PM
704	Keep 372 as express as possible! I know there will have to be some stops added to compensate for the 68/72 going away but please no closer than the metro guidelines state. I would suggest running some 16 as express or limited south of 45th during peak times. This would alleviate the concerns of existing Wallingford 16 riders about a slower trip on dexter. I know riders on 15th will be upset about losing 73 service. I wonder if it would be possible to split some 67 hours into partial 73s -- run from UW up to 110th then over Northgate. This would connect the same origin/destination pair as the original service with a larger walkshed.	3/16/2015 3:32 PM
705	Connections are going to be very difficult to get to the 542. The routes feeding to it from the North from 15th Ave NE seem to be cut. Need a stops along 15th Ave NE - NE 65th St, NE 70th St or NE 75th St.	3/16/2015 3:22 PM
706	Look at flow of riders to avoid bottle necks with overcapacity bus creating slowdown in the network (and all bus behind late). Look at flow of riders to coordinates transfers (this is the age of data, please use it)	3/16/2015 3:15 PM
707	If I understand it correctly the hardest part for me right now is going from Capitol Hill to Fremont this sounds like I would have to make 3 transfers instead of 2 but if buses ran much faster and less waiting this might not be so bad but I will dislike 3 transfers if buses freq doesn't change.	3/16/2015 3:09 PM
708	I would not remove route 242. While I support a change to 542/242 service, I do not want the 242 line removed.	3/16/2015 3:01 PM
709	I like frequency better than a wider spread of service. I can walk a bit so getting to near the place I am headed is OK by me and not waiting too long for a bus is great.	3/16/2015 2:28 PM
710	More frequent ST 542 during peak hours.	3/16/2015 2:23 PM
711	make sure there are easy and frequent stops in Green Lake park and ride	3/16/2015 2:14 PM
712	Have the 542 pick up at the Stadium (so no walking) and ensure that the load is balanced (no crowds building up waiting for bus/rail)	3/16/2015 2:00 PM
713	I am open to having to connect via the light rail if bus service providing connections to the light rail station is made more frequent and direct. I think it's important to stress that the routes be made as direct as they can while also balancing the retention of local stops. If it is going to take people longer to transfer and then take the light rail, it will not create much of an incentive.	3/16/2015 1:57 PM
714	Make 542 all day clear to Greenlake P&R (i.e., don't change the route based on time of day)	3/16/2015 1:34 PM
715	n/a	3/16/2015 1:22 PM
716	More bicycle space on buses to offset lower coverage area.	3/16/2015 1:14 PM
717	Keep the 242. It's a commuter/peak hours only service. More connection to the existing 65th park and ride lot	3/16/2015 1:03 PM
718	Do not reduce 545 service, even in off-peak hours	3/16/2015 1:03 PM
719	I'm assuming you're removing this north route because the ridership is sparse until Northgate. If so, move the 242 route to the east (to 15th NE). By having it run within 1-2 blocks from the highway, you're losing potential riders to automobile transit. Move it to 15th, where there are far more eastside commuters.	3/16/2015 12:53 PM
720	I would try to identify not just where riders are going using the transit system currently. But where are drivers going at off peak times where routes could be improved or frequencies could be increased to increase ridership and potentially increase the amount of money brought in from riders.	3/16/2015 12:52 PM

721	Maybe combine 16 and 26 to provide even more frequent service on that route to CenturyLink field from Greenlake, especially around Sounders games.	3/16/2015 12:50 PM
722	I would be happy as long as ST 545 kept late night hours.	3/16/2015 12:47 PM
723	Keep the 43, or get the 47 reinstated quickly. The 49 is very slow going up and down Capitol Hill. Though maybe increasing the frequency would help.	3/16/2015 12:44 PM
724	The planned loss of Montlake freeway stop in either alternative is a serious, major commuting impact. Perhaps another alternative would fill that gap? For example, what about a freeway stop on west side 520 near where 520 crosses under the new 10th ave lid? Most of the buses which use the Montlake stop could just as effectively use this (with the exception of 43/48 connections to 520 routes from 23rd/24th ave), and you could make very minor revisions to further connect the 49, 10, and 12 routes to this stop for a net improvement to connectivity.	3/16/2015 12:43 PM
725	general improvement of on-time service. Schedule, schedule, schedule.	3/16/2015 12:39 PM
726	Ensure there is a bus from downtown into Fremont and Wallingford every 10 minutes from 6:30 am until 1am	3/16/2015 12:39 PM
727	Keep 242 or provide some option that doesn't make my commute from Maple Leaf to Redmond significantly longer	3/16/2015 12:35 PM
728	Use alternative 2.	3/16/2015 12:31 PM
729	1) I would ensure that transfers to and from Link are made as painless as possible - off-board payment for all routes when transferring from Link to a bus. 2) Bus lanes for any route that suffers more than 20% schedule delay during peak times covering every segment of the route where congestion is experienced.	3/16/2015 12:30 PM
730	I personally thing the 542 should leave from a Park & Ride and not an are with no parking.	3/16/2015 12:29 PM
731	The transfers from eastside onto Link at UW would be greatly facilitated by transit only lanes and/or new Montlake transit only bridge. Also, perhaps taking more space from Husky stadium parking lot for bus transfer facility or layover could help make a transfer from eastside express bus to Link for downtown Seattle and Capitol Hill destinations more time effective, and enable more SR520 routes to be truncated at Husky Stadium, which in turn also reduces downtown Seattle bus traffic.	3/16/2015 12:16 PM
732	I don't think this can be fixed: you have to transfer at least once to get almost anywhere! Direct routes are far more convenient and nicer to ride, and this remove almost all direct options. The connections to the light rail are great, but often I want to bus places that aren't right next to the rail stations downtown.	3/16/2015 12:14 PM
733	1. Better options to get between the North West neighborhoods and the U-District: There is currently no direct way for me to get from Fremont to the U District without either going downtown or to Northgate. Therefore I do not benefit from the increased 542 service at the expense of the 545 reductions. If a route is added that goes between these neighborhoods, existing Metro riders will be able to keep similar commute times/ number of transfers under new routes. EG: I would now take this new route between Fremont and the U District, then catch the 542 to Redmond. 2. Revert the Fremont revision to the 16 to keep alignment with the 5.	3/16/2015 12:14 PM
734	Keep the 545 an all-day, all-night route.	3/16/2015 12:14 PM
735	I think it may benefit some, but for those people that rely on the 242 to get from Northgate to Microsoft, I think it does not make it easier for them to commute.	3/16/2015 12:00 PM
736	Improve the frequency of the 542 to make up for the transfer. This may be impossible, but with no net change to the bus schedule, the walk to the light rail system and the wait on the train (depending on traffic to get there) would likely just end up in a longer trip.	3/16/2015 12:00 PM
737	I would switch the route reductions. I would increase 545, and reduce 542. If needed, add a new route between downtown and the link stop in Broadway/E John to allow commuters a connection to the University district.	3/16/2015 11:59 AM
738	If route 242 is deleted, is it feasible to extend route 542 to at least Northgate Transit Center via I-5 or 5th Avenue (if the latter, making limited stops along the way)? That way, Northgate to Overlake wouldn't require a transfer.	3/16/2015 11:55 AM
739	Better east-west connectivity. Even during peak bus service, the buses running these routes are packed and will continue to be until there are more numerous and more frequent routes.	3/16/2015 11:55 AM
740	Keep the 545 service in non-peak hours to allow travel between Overlake Transit Center and downtown	3/16/2015 11:54 AM
741	545 needs to run more frequently from 730 to 9AM. I find myself having to stand far too often on this bus in the morning. Keeping the route from capitol hill to Redmond allows me to live without a car.	3/16/2015 11:54 AM
742	Reduce transfer times, both during peak and off-hours.	3/16/2015 11:53 AM

743	Maybe have 1 run each way at lunch time. If I am working half a day then getting home via bus is long and challenging and really forces me to drive today.	3/16/2015 11:52 AM
744	Keep the 545 as it is or make it more frequent - it is already packed.	3/16/2015 11:52 AM
745	Need late option, an extra 65 @ 1:20 AM would be nice.	3/16/2015 11:51 AM
746	stop all of the NE seattle routes from the slow and painful trip into UW, which is not an easy walk from the light rail station and is even farther from connections at the montlake bus station. right now everything in that area is biased to uw, and this makes things even worse	3/16/2015 11:51 AM
747	1. Route 542 Westbound shouldn't deviate into Overlake Transit Center during peak hours. 2. Route 542 during non-peak hours, it would be ideal to see the route extend up to 65th and Ravenna Park and Ride.	3/16/2015 11:50 AM
748	no change	3/16/2015 11:49 AM
749	I would expand the hours for the 545 to something more like 7am-11pm during the week.	3/16/2015 11:46 AM
750	keep the 242	3/16/2015 11:46 AM
751	Do Alternative 2	3/16/2015 11:46 AM
752	Keep 545. Currently I take 545 to 44 to get home to Stone Way and vice version.	3/16/2015 11:46 AM
753	Don't get rid of the Montlake freeway station so you don't have to come up with these tortured transfer scenarios in alternative 1 or 2. You should instead be touting how you will have direct bus service to downtown with an easy stop at Montlake, and when 520 has light rail in the future, that will be done via light rail.	3/16/2015 11:45 AM
754	I would make all routes to Northeast of Seattle start at the University District and increase the frequency to beyond only every 6 minutes for the light rail.	3/16/2015 11:43 AM
755	don't cut 545 off peak	3/16/2015 11:41 AM
756	A better way to connect caphill to the 542 without the 545 going to CapHill	3/16/2015 11:38 AM
757	More frequent light rail, less frequent buses.	3/16/2015 11:36 AM
758	I'm hoping for more options to go from Fremont/Wallingford to Capitol Hill / First Hill. Right now there are few routes which make this viable.	3/16/2015 11:35 AM
759	Don't eliminate 242.	3/16/2015 11:33 AM
760	Several alternatives: Don't detour 255 or make 256 a non-rush hour route. Have 545 stop by South Kirkland Park and Ride.	3/16/2015 11:02 AM
761	I am an Olympic Hills (north of Pinehurst) resident, and the 73 is my bus. It goes from my house to UW and downtown in a single ride. There is no way I could support elimination of the 73. As far as I can tell, the proposed replacement is a two-bus ride to UW, or a two-bus-plus-train ride to downtown. Are you kidding me? The bus transfer occurs in the middle of nowhere, and there is a long walk between the bus and the train. If I had a one-bus ride to UW station, I could almost handle this change. I don't want the 73 going away, peak or non-peak. It is heavily used all day. Simply maintaining the peak-hour 77 is not an adequate replacement. The 347/348 is often full before it reaches my neighborhood and would be a poor substitute for the 73. It seems to me that current riders of the 71 will be in the same predicament.	3/16/2015 10:57 AM
762	Use 15th instead of the Ave in the University District. The Ave is slow and should be pedestrian-focused, not bus-focused. Every time I get on a bus it takes forever to go down the Ave. The 48 is fast going down 15th, all buses should do that. The plan seems to take buses off 15th, which is, in my opinion, the best street for N/S transit between UD and northern areas. Roosevelt/12th are okay as well.	3/16/2015 10:53 AM
763	North of 65th has very few routes available to it. This could be marginally expanded while still working on consolidating routes to major thoroughfares	3/16/2015 10:46 AM
764	Simpler is better, encourages those unfamiliar with transit to understand the routes.	3/16/2015 10:12 AM
765	Keep Route 43 from Link Light Rail's Capitol Hill station to a stop at UW Medical Center or Husky Stadium.	3/16/2015 9:13 AM

766	I believe a grid system of public transportation, along with faster trains, is a key to bringing Seattle in step with the 21st century and creating a foundation upon which the city can grow. "If you build it, they will come". Your current antiquated spoke-and-wheel system that channels everything through downtown is fine for a city that is focused in the downtown core and just has a few small suburbs on its outskirts. However, Seattle is not that city any more. It's a metropolitan city with people going crosstown and every which way at all hours of the day. Metro needs to not just keep up but lead the way. Build a highly efficient grid system - add a gas tax or increase the vehicle tab fee if you have to, to pay for it - but create a modern, efficient, and especially, a FAST public transportation system, and you'll start seeing people leave their cars at home and take public transit instead. There's less than no need to channel every route through downtown. It unnecessarily concentrates traffic in one location and slows people down. Create routes that cut through the areas outside downtown instead, and you'll see neighborhoods and businesses grow up around your new routes. I'm from Canada. Toronto, Ontario (where I grew up) has one of the best transit systems in all North America. New York City, of course, probably boasts the very best transit system. We need to study these cities and base our transit plan on these models.	3/16/2015 8:46 AM
767	keep geographic coverage in south Wallingford by keeping busses to downtown on Wallingford Ave N and N 40th Street	3/15/2015 10:23 PM
768	Any one of the suggestions here: http://seattletransitblog.com/2015/03/15/pinehurst-bus-suggestions-for-alternative-one/ , but I would prefer suggestion 2.	3/15/2015 8:57 PM
769	Expand light rail, expand rideshare programs	3/15/2015 8:21 PM
770	Link the bus lines with the light rail service coming to UW, Roosevelt, and Northgate. Overlap both bus and light rail schedules during peak hours (6am-9am; 3pm-6pm) to give commuters more options on weekdays and weekends. Make sure there are special schedules for both buses and light rail during the holidays so everyone can enjoy them. Also, have a night owl service on light rail and buses for third shift workers.	3/15/2015 5:03 PM
771	I need direct transport from Pioneer square where I live directly to Redmond. Currently, the 545 route goes through ALL downtown Seattle and then to CAPITOL HILL, which adds 15min to my commute every day. Plus there is no Wi-Fi on the bus, which is terrible for my productivity.	3/15/2015 12:35 PM
772	Greater frequency would be nice, in general, for getting people to use transit.	3/15/2015 12:01 PM
773	Look at different ways of routing or scheduling in the neighborhoods that are losing service on streets (Maple Leaf, etc.)	3/15/2015 8:30 AM
774	Frequency improvements to Madison Park and Madison Valley areas by #8 will mean that I may take public transportation more often as it will now be useful for short distances too. (e.g. Arboretum & Madison Street location to Capitol Hill). Otherwise it's difficult to wait up to 30 minutes for something that will be a few minutes drive. But if it's only a 10 minute wait it may be worth it for short trips. If overall travel time is less in Alternative 1 I won't mind a transfer to get from downtown to Madison Park area. Frequency improvements will make encourage me to take the bus to get light rail to the airport.	3/14/2015 10:29 PM
775	Keep the #71 bus from Wedgwood/Bryant Ravenna to downtown Seattle until the light rail station opens in Roosevelt. The impact is just too much. The Husky Stadium light rail station is just too far and inconvenient to expect people to transfer there to get to downtown Seattle. Keep in mind that not only will there be a transfer, but to get to the light rail station will require getting to the 65 or 372, which for many people is a much longer walk as well.	3/14/2015 10:08 PM
776	The route 48 link between UW Link Station and Mt. Baker Station (along 23rd) serves a vital link between North Capitol Hill and access to the Light Rail. Currently, I take the 48 to Mt. Baker Transit Center to access the Light Rail (northbound or southbound). Once the Link Light Rail is complete, from Downtown, I envision taking the service all the way to UW then transferring southbound on the 43 or 48 and getting off on North Capitol Hill (Aloha). Alternatively, when I return from the Airport, I plan to get off at the Mt Baker Station, then catch the 48 northbound, as this will take less time, then all the way to UW and then south bound.	3/14/2015 3:52 PM
777	Thanks for outlining for us what seem to be the disadvantages of Alternative 1. If routes are changed significantly, it can negate benefits from increased frequency of service. From Lake City I go primarily to the University District Retail Core (The Ave not University Village), the University campus to use the libraries, the Roosevelt Area, Northgate, Downtown and Green Lake. It looks like my access to the University District Retail Core and Roosevelt would be decreased (I'd have to transfer more) in Alternative 1, and transferring slows everything down. I would like to see the Route #72 retained since it is my most direct connection to the University District Retail Core and to connect with Route 48 on 65th NE. I also often travel to the University District through Wedgwood, stop, and then get back on the bus to go either to the University or Downtown or connect with the #48. I also go to church on 35th Ave NE and often ride the bus back and forth from church activities. Decreasing frequency on the routes 65 during the evenings and weekends present problems for me taking transit. It looks to me like Alternative 1 would be more disruptive plan than Alternative 2.	3/14/2015 2:57 PM

778	re-instate all day route 30 service, weekends too. Have routes that travel directly to link station at Husky Stadium (until the station at the Ave is finished)	3/14/2015 11:48 AM
779	The frequent 16 route through View Ridge will be great, but the fact that the westbound routing shifts from 65th to 70th on nights and weekends will be confusing. I understand that the reason is to provide a turn around and layover spot when the NOAA campus is closed. But why not consistently route westbound on 70th at all times? It would not be difficult for westbound riders near that portion of 65th to walk to 70th, and it would be easier for riders north of 70th who are losing the 71. Plus, consistency!	3/14/2015 11:39 AM
780	Don't know.	3/14/2015 11:30 AM
781	Even more frequent service so increased transfer won't be a pain for people in the deleted service area and longer walk to bus stop is going to worth it.	3/14/2015 11:24 AM
782	I wouldn't know about north Seattle I live in Kirkland, WA. and I go the 520 BR. on the RT.277 most of the time from my home .	3/13/2015 6:09 PM
783	Most of the changes are great! More frequent service in Northeast Seattle would allow for much easier travel throughout the north half of the city. I would leave Routes 26/28 serving Fremont and the Dexter corridor, and have Route 16 retain its Aurora routing, rather than moving the 16 to Fremont and Dexter and putting the 26/28 on Aurora. I might also like to see the 45 continue on 65th Street all the way to Sand Point, creating a true crosstown route that will enable more gridded connections and fewer transfers for people traveling between Northwest Seattle and Northeast Seattle. I feel less strongly about this change, and it might work better after the Roosevelt Link station opens so that a quick connection to the U-District would be maintained.	3/13/2015 5:14 PM
784	Needs to branch out a bit.	3/13/2015 4:52 PM
785	install a light rail station in between 65th & Roosevelt and Northgate, say at 85th and Roosevelt or 85th and 5th Ave NE.	3/13/2015 4:40 PM
786	have 15 minute service from Bryant to link light rail	3/13/2015 3:59 PM
787	N/A	3/13/2015 3:52 PM
788	I would take busses off of the Ave. They should either go on Roosevelt, 11th, Brooklyn, or 15th. The 16 and 26 shouldn't go downtown, instead they should be east/west connectors for North Seattle. Service to downtown from NorthGate should remain on Roosevelt/Eastlake with 10 min headways all day.	3/13/2015 3:43 PM
789	I can't think of any way to improve it for my use without consolidating LESS. Consolidation must make things more efficient for Metro, but it makes sure makes it harder for passengers to use.	3/13/2015 3:31 PM
790	Keep some service on 15th NE, otherwise more frequent service and better connections.	3/13/2015 1:51 PM
791	Woodinville Park and Ride has space to park if you delete route from Bothell UW and Woodinville PR, there are no space to part on Bothell UW.	3/13/2015 1:26 PM
792	N/a	3/13/2015 1:01 PM
793	Routes across town is most important.	3/13/2015 12:39 PM
794	Wi-Fi on buses	3/13/2015 12:36 PM
795	Your plans in no way have helped or will help.	3/13/2015 12:07 PM
796	Add a shuttle bus service every 7 minutes from 65th and Sand Point Way to Montlake Blvd and 520 via Sand Point and Montlake Blvd. This would increase rideship because of the availability of parking along this route. Both 520 and the Link station at Montlake have no parking.	3/13/2015 11:22 AM
797	Add shuttle buses to run from 65th and Sand Point Way to Montlake bridge via Montlake Blvd running every 7 to 10 minutes. This would increase ridership because this route offers more parking for a Link station and bus transfer station with no parking.	3/13/2015 11:17 AM
798	I would have two or three shuttle type buses travel from 65th and Sand Point Way along Montlake Blvd to the Link at Montlake so that riders could catch a bus along that route every 10 minutes. This would allow easy access to the Link as well as bus traveling along 520 to any number of places, buses at Pacific Ave, buses at the 45th St viaduct and 25th Ave, at Princeton as well as 75th St. NE. I think it would greatly increase ridership because stops along this route have more parking available.	3/13/2015 11:10 AM

799	Collaboration with Sound Transit to optimize service to and from the consolidated Metro service will be very helpful to those of us coming in from further away. I'd love to not deal with traffic & parking if the travel times are reasonable.	3/13/2015 10:15 AM
800	Looks great overall!	3/13/2015 8:48 AM
801	Preserve 25 and increase frequency. This will become an even more vital neighborhood link once the UW light rail station is active.	3/13/2015 7:27 AM
802	Make route 44 more frequent and direct (fewer stops) to connect more efficiently to the UW Link station.	3/13/2015 7:12 AM
803	Increase all day neighborhood connections to the Light Rail. Alt 1 is a system that would only work in a place with large park and rides at the in-city light rail stations, which Seattle does not have.	3/13/2015 6:54 AM
804	Not sure, I'm a fan.	3/12/2015 11:07 PM
805	372 needs to go further on weekends! Particularly if deleting the 72.	3/12/2015 10:36 PM
806	Keep the core routes that allow people throughout the community to access service.	3/12/2015 10:14 PM
807	Go from Wedgwood direct to husky stadium	3/12/2015 9:24 PM
808	I would remove the wasteful jog the 65 bus does over to 40th and then back to 35th. The 65 bus should go straight up 35th from Sand Point Way, as it used to. I would move the 372 and 65 closer to the light rail station. It is insane to have buses that are designed to work well with light rail then make people walk unnecessarily far to make the connection. This is a public government disaster. I want to know who is responsible for this stupidity.	3/12/2015 8:49 PM
809	No ideas at this time.	3/12/2015 5:35 PM
810	Wait until the 65th Street Station opens...then it could work.	3/12/2015 4:33 PM
811	Keep route 11 servicing Madison Valley and Madison Park.	3/12/2015 4:08 PM
812	Retain the 11 and 43 routes	3/12/2015 3:52 PM
813	Better service in Kenmore. The buses are frequently full and so is the park and ride. Too many transfers to get to where I need to go. Even with regular, heavy commute traffic, it takes me 30-45 minutes. By bus, with 2 transfers it takes 1.5 hours each way. There's no incentive to take the bus when comparing a 45 minute commute each way to a 1.5 hour commute each way.	3/12/2015 3:46 PM
814	Frequent, short-run feeder bus runs to dedicated transit paths like light rail. Then pile on the number of cars on the light rail line.	3/12/2015 3:37 PM
815	The people who live on the steep grades in the east part of Maple Leaf (ca. 40,000 people) don't have good access to off-peak service under Alternative 1 because of the GRADE. They don't even have sidewalks, and hiking up a 33% grade for more than one block is pretty strenuous (let alone two or three blocks or more...). Lake City Way is also not rationally connected to Maple Leaf (and frankly it's icky as well), so it's hard to imagine how those people are going to access transit readily. In the end, most of them will have to keep using cars. Pity.	3/12/2015 2:35 PM
816	Use alternative 2 instead	3/12/2015 2:21 PM
817	I would leave the current schedule and route till the link station at Northgate is open. This way, people can just travel to Northgate station to catch light rail, rather than transfer a couple of time just to get anywhere between North terminal of route 73 to Roosevelt area.	3/12/2015 1:56 PM
818	Add back service to some areas using Seattle Prop 1 funds.	3/12/2015 1:50 PM
819	Having a connection point to the link South of UW. It would be acceptable if the bus just stopped at convention place and i could catch the link from there to my place of work. My biggest issue is having to go west across the bridge, then north to connect to a southbound transit option.	3/12/2015 1:34 PM
820	I tend to plan my trips on transit carefully to take advantage of the schedules. The extended routes can be great for odd trips. From example, on the occasions that I've had to travel from Madison Valley to Greenlake, existing routes like the 48 make that trip possible. My concern with Alternative 1 is that throughroute coverage decreases significantly. You may have to take a local bus to the rail, take the rail to the next station, then take another local bus to your destination. Whenever I have to transfer *twice*, I start thinking about driving instead.	3/12/2015 1:10 PM

821	Keep routes extended to the S Jackson St area. It's hard to tell, but it looks like more of the bus service ends in mid-downtown area. I really like how there's a transit hub associated with the King Street Station (Sounder & Amtrak) / International District Light Rail Station / Pioneer Square area. Please make sure bus service continues to extend to this hub. Make sure there's enough service connecting Eastlake (Lake Union area) to downtown Seattle (including all the way to Pioneer Square) and Eastlake (Lake Union area) to U-district. The 70 may accomplish this (if it extends to Pioneer Square / International District), but it's hard to tell if this will help the capacity. It seems like both the 70 and 66 are in high demand during peak times, and not just for people traveling through the Eastlake area - lots of people get off at the major stations (Lynn St, Harvard, etc.) along Eastlake (Lake Union area).	3/12/2015 12:43 PM
822	make the 8 on Denny more reliable!	3/12/2015 12:21 PM
823	The biggest sticking point is the transfer situation/layovers at the University Link station. It would be worth sacrificing a few parking spots to enable faster transfers in order to help keep the network on time and out of congestion.	3/12/2015 11:37 AM
824	Have the 73 or other route give Pinehurst folks direct service to UW.	3/12/2015 10:58 AM
825	more buses for routes that are already overly packed, especially if they are packed before getting to areas where the new trains would reduce load. The 71 and 76 (especially the 76) are always packed well before they get to the Roosevelt area.	3/12/2015 10:58 AM
826	Easier connection between Northgate and northwest Seattle, in view of future Northgate link station too.	3/12/2015 9:14 AM
827	I'd like to suggest that you don't switch the 16 and 26 north from Wallingford to Northgate. I frequently change buses at Ravenna. I don't see anyone changing from the 16 to the 26 to access east Wallingford. Most of the folks on the 16 north of Ravenna are heading to downtown. If you want to break the 26 off from the 131, it would make sense to send it east on 65th so it is two local serving routes. I don't think anyone will travel west on 65th into Wallingford. If they are going downtown they will change to a bus headed south in Roosevelt (this will eventually be useful when the Link station opens in Roosevelt). It is only a few minutes different between the 16 on Aurora and the 26 on Dexter now so which one makes that route is not important (routing on Aurora will change when the tunnel opens anyway - hopefully back to Seattle Center east). The time loss is in going through Fremont but that serves a different purpose. The 31/32 riders in south Wallingford will have to change in Fremont to go downtown. If you have more than a 10 minute wait at a change point, that is a bad design and will discourage use of that routing. Getting to Seattle Center using the 32 is a pain in the neck and takes too long. I notice we are driving to the Seattle Center more now without the 16 access.	3/12/2015 9:04 AM
828	Exploring alternative routes.	3/12/2015 8:28 AM
829	Sidewalks to get to the transit! There are too many roads without sidewalks which make it unsafe for pedestrians. All of 95th for example and the spur of 25th Ave NE that leads from Wedgwood to the main drag of Ravenna/25th Ave. From the west side of Wedgwood, we have to walk to the bus on narrow streets without sidewalks and its so uncivilized and dangerous. Pedestrian connections along Sand Point Way near Magnuson Park are also horrible and many people live in the park, or across the street from the park.	3/11/2015 9:58 PM
830	Would be awesome to have a route going down 15th from Maple Leaf, through Ravenna to the UW campus (serving transfer to U Link). Folks living at 19th and NE 80th have a long walk east to 25th or west to Roosevelt way	3/11/2015 9:31 PM
831	I'm not qualified to answer, as I don't know the issues in those neighborhoods.	3/11/2015 7:54 PM
832	I understand the point of cutting the 545 hours, but it'd be nice if morning peak could at least reach to 10AM. The bus is always packed in the mornings (granted, lots of those folks get on at Cap Hill and could easily take the light rail instead...)	3/11/2015 7:32 PM
833	still need better East-West service throughout the entire region. the new 16 line is an improvement, but it's still ridiculously difficult to get "across" North Seattle.	3/11/2015 4:51 PM
834	Maintain a connection from North Seattle/Jackson Park/Shoreline to the Eastside. One connection is doable, two connections is unrealistic. I don't understand why route 242 is being considered for deletion, it services Shoreline to Redmond and the new light rail will have no effect on that route.	3/11/2015 4:08 PM
835	keep route 41 and other express busses zipping up and down the freeway, for those who live farther up north	3/11/2015 1:53 PM
836	keep routes that link to the light rail and downtown frequent and fast (i.e., least amount of stops as possible)	3/11/2015 1:51 PM

837	Consider that there may be many residents in northeast Seattle who would not be inclined to ride the bus to get to the UW Link station. They may prefer driving to the station and parking there in order to ride the rail. If there isn't adequate parking for them, they may decide to drive all the way to their destination, rather than taking the bus. So plan for adequate parking there to reduce possible congestion down the road.	3/11/2015 1:38 PM
838	My biggest concern is that there are not good bus connections to the UW light rail station. It would be great if some fast busses went straight to the light rail station, perhaps down 25th or 35th avenues.	3/11/2015 1:21 PM
839	I live in Wallingford and work between Pioneer Square and the Stadium district. Alternative 1 appears to truncate the 26X route at Yesler, as opposed to continuing on another few blocks to its existing terminus at S Main. I'd prefer to see the terminus continue to be S Main St. to avoid a longer walk from the bus to the office.	3/11/2015 12:46 PM
840	I would keep the alternative 1 in place with keeping Meridan as the the route for the 16, though all other options look good.	3/11/2015 12:27 PM
841	Nothing	3/11/2015 12:01 PM
842	Overall, I like the griding, re-thinking and frequent service. My only beef is the new unreliability the plan builds into the new 67 and new 48. Split them, layover in the montlake triangle, call it good. If they're not trolleys, there is still layover space on the south end of the ave.	3/11/2015 11:37 AM
843	Please don't take away the route 16 access to North Wallingford, specifically Meridian Ave. We use this to go downtown and my brother who lives downtown uses it regularly to get to our house. If you change this, we would have to walk 10 blocks to a bus stop and my brother would lose his access to our house.	3/11/2015 11:31 AM
844	Consider East/West connections more.	3/11/2015 11:19 AM
845	Very much like airline service, people would rather have a direct route rather than connecting. Less stops is also like how far away a garbage can is located to deposit your trash - people give up if it's not conveniently located enough.	3/11/2015 10:49 AM
846	Trust traffic/transit experts to make it work based on community input	3/11/2015 10:47 AM
847	KEEP THE 48 AS IS. Metro doesn't seem to realize that a lot of people have to transfer a lot to go from South Seattle anywhere.	3/11/2015 10:44 AM
848	Retain the 73 up to 145th St or at least 125th.	3/11/2015 10:19 AM
849	It seems like Madison Valley to the UWMC and pill hill are being forgotten in your plan. A LOT of medical folks live here and need access for work. In addition, we like to shop downtown and at U Villiage. We have already been very limited with bus service-this plan reduces services even more for us. I actually bike to work more than I take the bus-I can get places faster-but I am not getting any younger.	3/11/2015 9:44 AM
850	Push the easternmost stop in Laurelhurst to the top of the Children's campus rather than the bottom of the hill, bringing it closer to people in Laurelhurst and eliminating ~250 of elevation gain for people walking to the top of the hill. That will make the service far more usable for the elderly & less-able folks in the neighborhood, in addition to making it easier to other users & driving up ridership.	3/11/2015 9:24 AM
851	Make a solid transfer between Sand Point Way and the rail station.	3/11/2015 9:24 AM
852	no recommendations at this time	3/11/2015 8:47 AM
853	Have buses running on 25th st. Go straight to connection point to 271 for easier transfer to east side.	3/11/2015 8:39 AM
854	Have the 65 & 75 go straight to the station at husky stadium. People going to campus can take a ski lift up Rainier Vista from there (imagine how romantic the views!), and the buses can continue up Pacific to get back to their usual routes. If the ski lift idea doesn't work (imagine the revenue from tourists on weekends!) you could have shuttles at U Village and at the Link stations to get into campus.	3/11/2015 8:05 AM
855	Well, stealth surveys aren't they way. If you want to make over transit then get out the brass band and loudly announce the plans. A year is not very much time especially when it doesn't look like you are having meetings in the impacted areas. No Bellevue isn't impacted, but that is where the meetings are.	3/10/2015 9:50 PM
856	We need to keep enough transit access to ensure that light rail is used.	3/10/2015 9:17 PM
857	Reliability needs to improve, and service needs to be better in synch with One Bus Away app. Everyday, there are buses in Wallingford and Fremont that One Bus Away says is coming, but they do not actually come.	3/10/2015 9:13 PM
858	Leave it as proposed.	3/10/2015 8:48 PM

859	I would add a 16x route during peak times that uses Aurora to go downtown from Wallingford. I really like the concept of the 16, but I understand the loss of very fast downtown service will be difficult for Wallingford. I hope that City of Seattle money could add this route somehow, or that there is room elsewhere in the restructure for it. The alternative doesn't improve the 44, although I realize there is very little that can be done without seperated ROW. This route would be our feeder service to Link, which would be very helpful for airport trips, and even capitol hill trips. Right now though, it's so slow that it probably makes more sense to go downtown.	3/10/2015 8:27 PM
860	A better routing plan that includes localized services in neighborhoods that takes into account the SAFETY of women, children and the elderly!!!!	3/10/2015 7:32 PM
861	No ideas	3/10/2015 6:59 PM
862	Institute shortest possible walk from route 75 stop on Stevens Way (or elsewhere) to University Stadium Link station.	3/10/2015 5:40 PM
863	No further ideas	3/10/2015 5:26 PM
864	I can't think of anything	3/10/2015 4:39 PM
865	Have a regular route on 15th or 25th that has a stop that is much closer to the UW light rail station than Stevens Way.	3/10/2015 4:35 PM
866	Throw out the entire existing map and start over with fresh routes that feed light rail, or run north-south in areas away from light rail. Current routes lack logic.	3/10/2015 3:56 PM
867	do not have feedback about this--i'm willing to walk farther for more frequency	3/10/2015 2:59 PM
868	Increase frequency of 26 bus at ALL points along route. 30 minutes is too long considering need and density	3/10/2015 2:46 PM
869	Shift some routes to 15th Ave NE (or even Roosevelt Way NE) instead of University Way NE between the Ship Canal and NE 50th St to avoid congestion.	3/10/2015 2:31 PM
870	keep the 11 and 12	3/10/2015 12:47 PM
871	Servi8ng more people is more important than cosolidation.	3/10/2015 12:25 PM
872	Faster access to downtown. Spedivially 16 from Wallingford to Downtown Seattle.	3/10/2015 11:46 AM
873	stay on Aurora 99 between Fremont and Downtown.	3/10/2015 11:18 AM
874	The concept ignores all those who live on the 25 route between Montlake Blvd and Eastlake. So we would have to drive. More people used to ride it when it came more often--though I notice more people riding it now that we have 'One Bus Away' so are spending less time at the bus stop in order to not miss it.	3/10/2015 11:17 AM
875	Bus service that goes directly or very close to the light rail station from Wallingford and Ballard area.	3/10/2015 11:11 AM
876	Add more park and ride places.	3/10/2015 11:09 AM
877	Bus service to Magnolia needs to be more frequent. It is reliable to get to work in the morning, but during commuting times in the afternoon it is unreliable, with buses not coming for over 30 minutes, and then three buses arriving at the same time.	3/10/2015 9:54 AM
878	Change your goals. You say Alternative 1 would improve productivity and efficiency. These are not important goals for a public service. More important is that I take public transport rather than drive my car. Your narrow minded changes may improve the productivity and efficiency of some segment of the Metro bus system, but at the expense of reduced productivity and efficiency of society as a whole as more cars from Madison Park contribute to congestion on the roads towards downtown Seattle.	3/10/2015 9:48 AM
879	keep buses going (or put in the Seattle Lake Union Transit link up through the end of Broadway).	3/10/2015 9:30 AM
880	It seems pretty good for my needs, but I am concerned for those in areas that are losing nearby service.	3/10/2015 8:18 AM
881	Give me a SUBWAY, TRAIN, OR LIGHT RAIL for the Eastside. That's what you can do.	3/10/2015 8:13 AM
882	Improve connections at UW Station by routing buses near Husky Stadium http://seattletransitblog.com/2015/01/30/improving-bus-rail-integration-at-uw-station/	3/10/2015 1:09 AM

883	The Dexter corridor is a high-growth area with new apartment complexes currently under construction and planned for construction. This is an area that needs more service, not less service. It will soon face the kind of transportation gridlock that is currently experienced in South Lake Union because Metro didn't have the foresight to provide adequate bus service in South Lake Union. Any route that is extremely long and meandering, such as the proposed route 16, does not serve the passengers who are at the end of the route, such as the Dexter corridor.	3/9/2015 10:19 PM
884	Some attention to walking distance from homes to the bus routes is necessary. If it is too far and takes too much time, it makes using transit difficult. Also, for the elderly and infirm, distance to the bus stop is a very important issue.	3/9/2015 10:16 PM
885	You don't include the 522 in the list of routes but I think you should consider it. From Wedgwood, it's faster to take the 65 to 125th and Lake City Way and then take the 522 downtown. I bet even with LINK, the 522 is still a faster option than taking the 65 to Montlake and then LINK to downtown. You should include the 522 in your maps and planning.	3/9/2015 10:03 PM
886	Restore bus 11.	3/9/2015 9:56 PM
887	The 44 will remain just as mired in traffic as it is now. I know Metro's and SDOT's options for improving it are limited, but there is no excuse not to connect properly two of the neighborhoods most needing good transit. The 44 seems to get bogged down between 45th & 15th and 45th & Stone. Metro and SDOT should try to convince Wallingford (again) that providing dedicate bus or at the very least BAT lanes along 45th is in their best interest. Metro, SDOT, and SPD should also work to find a solution to the left turn from 15th onto 45th for Ballard-bound 44's - I have been on a 44 stuck at that left turn for 20 minutes because of westbound traffic (none of them buses) blocking the intersection. If nothing else, Metro police should be able to direct traffic there during peak times to ensure the smooth flow of buses.	3/9/2015 8:44 PM
888	Keep some form of 71-2-3-4 but have them start at the University of Washington Station instead of in the Downtown Seattle Transit Tunnel. Reduce the frequency of the 43 but maintain service (it's a trolley route, it's cheaper than a diesel route). I'd generally keep majority of the rest of the service the same.	3/9/2015 8:40 PM
889	I would look at reconfiguring seats in the buses so there is more standing room at the front. Remove the seats from one side, so there are just seats for those in need, and more standing room at the front for everyone else. This would make it easier for people to get on, off, and get by other passengers.	3/9/2015 8:27 PM
890	Maintain route 11.	3/9/2015 8:16 PM
891	Make sure that bus service serving my neighborhood is not abandoned, made more infrequent, or serving only more distant bus stops. We bought our house with the intention of riding public transit to downtown.	3/9/2015 8:15 PM
892	I would relocate the U-district area "Bus Hub" from Campus Pkwy/15th to the Link Light Rail station, or AT LEAST have some of the buses coming from the north connect to that station. It would reduce commute times from the View Ridge / Magnuson park areas by at least 15 minutes if we were able to have one route to get to the new rail station, AND we'd have access to Cap Hill and all the other great places the Light Rail goes. Why are you not connecting to the light rail? I don't get it. It makes zero sense.	3/9/2015 8:11 PM
893	More frequent 45-271 routes	3/9/2015 7:03 PM
894	Not sure	3/9/2015 5:56 PM
895	Around the clock service for shift workers at the UW medical center, weekends, holidays. Not having to walk far to the bus stop early in the morning or late at night.	3/9/2015 5:42 PM
896	I think it priveleges more able bodied people ie people going to football games and that's annoying	3/9/2015 5:34 PM
897	Just use Alternative 2, and buy some new buses the current ones are falling apart.	3/9/2015 5:22 PM
898	Consider terrain (slope/steepness) and alternative routing options when deciding what stops to keep or get rid of.	3/9/2015 4:27 PM
899	Do not eliminate the #25 route.	3/9/2015 4:24 PM
900	I like the idea of a frequent network of service. Because it focuses on NE Seattle, this proposal doesn't cover all of my trips. I currently take 3 buses from west of Green Lake to Pinehurst. This proposal does not address east-west travel in the north end between Lake City and Aurora either on Northgate or 125th/130th.	3/9/2015 4:22 PM
901	Retain the 43 bus route.	3/9/2015 3:38 PM
902	Consider U-District transfer points very closely on a block-by-block basis. Need safe transfer points at night.	3/9/2015 3:34 PM

903	In a perfect world I would add a Central District light rail station at Union & 23rd or MLK & Union going directly to the other light rail stations. I prefer underground transportation over light rail - BART is a good example and much better than surface light rail.	3/9/2015 3:14 PM
904	Keep both bus lines running at their current schedules, or how is anyone in Montlake/Portage Bay, the closest actual communities to the light rail station, going to get any benefit from it without increased access to the station? Bus service needs to minimally stay the same to make the light rail stop gain it's full potential, otherwise it will be a squandered opportunity for our community to want to take light rail anywhere.	3/9/2015 3:01 PM
905	put more buses on 25th	3/9/2015 2:52 PM
906	I would like for stakeholders to know if people come from the Madrona area there is no easy way to get North to South those who use the current bus already have issues taking away the 48 service is not reasonable since it is the only way for those who live in Madison, Madrona, and surrounding areas to go north without going all the way downtown.	3/9/2015 2:48 PM
907	bus transit should serve as the neighborhood point to the mass transit like link rail. The frequent the better so that people can take bus to the link rail or drive to park that can be a short walk to the link rail.	3/9/2015 2:41 PM
908	It seems to me that Alternative 1 leaves out some significant areas (Madison Valley in particular), it would be unfortunate to have to walk more than a couple blocks to catch a bus.	3/9/2015 2:23 PM
909	Have you considered modifying the route #25 to act as a U.District-to-Capitol Hill shuttle? Start on or near the Ave, go South across University Bridge, then turn east to Furhman/Boyer, up Lynn & West Montlake Blvd E. to Roanoke (by the Montlake Hop-In), take a right onto 24th Ave. southbound, and up over Capitol Hill to Broadway following the current #43 route. This would connect several neighborhoods whose service would be badly curtailed under Alternative 1 (the Boyer corridor, central and south Montlake, and the 24th Ave. hillclimb) and would link those neighborhoods to two key areas: U.District and Capitol Hill, while still eliminating one route. It would basically merge the #25 and #43. Just an idea. One way or another Montlake is getting short shrift in this plan. Walking from Montlake (let alone Boyer/Furhman) to Husky Stadium is not an easy option for some folks, especially given how congested the 520 area is going to be during ongoing construction!	3/9/2015 2:19 PM
910	Consider some of the routes that are going to be deleted. For example, route 72 is to be replaced with 372, but the 372 doesn't stop much in certain areas. Getting rid of the redundancy of routes that go downtown is good, in theory (since the light rail will do that faster and more effectively once people can get to the new stations), but these routes go to more places than just downtown. The 72 is the only bus route that covers a certain area, and it is already infrequent (every 30 or 60 minutes). The 312 is a great option for downtown and back, only if you are going the right way at the right time. Leaving large areas with no service will not make it easier for the bulk of people to get to the light rail stations.	3/9/2015 2:17 PM
911	Frequency is not as important to me as having a route stop near my home! I would not feel safe if the stop or route involved walking any distance at night! PLEASE KEEP ROUTE 11 and 8 the way they are!	3/9/2015 2:07 PM
912	Real, established transit hubs on a more permanent basis so the city can develop around these hubs is a real first step to future growth...	3/9/2015 1:52 PM
913	Not much to improve. Bus service to the Link stations at Capitol Hill & Husky Stadium should be efficient and easy, with a huge number of buses serving those stations.	3/9/2015 1:35 PM
914	Keep a route going all the way North-South from downtown through East Greenlake up to 92nd Street.	3/9/2015 1:21 PM
915	Keep 25, 43, 48 routes running at same interval. Don't cut the 25!	3/9/2015 1:15 PM
916	Don't cut any bus service! I don't see how the 25 route is "duplicative" from Montlake to downtown or elsewhere. Do you want low income elderly populations (my neighbor for one that is also handicapped) to have to travel 2 miles on foot because the route 25 went away because of a supposed "duplicative" bus route to light rail?	3/9/2015 1:01 PM
917	It would be nice to have peak time buses run slightly later in the morning and evening.	3/9/2015 12:46 PM
918	My goal is to get to work (NOAA Sand Point) and back home (adjacent to N Northlake Way in SE corner of Wallingford), so unfortunately our goals do not intersect well.	3/9/2015 12:04 PM
919	Can buses from all parts of Cap Hill use the light rail tunnel to get to downtown faster, but still maintain their Cap Hill stops?	3/9/2015 11:52 AM
920	I like it very much.	3/9/2015 11:50 AM
921	Building a new (Transit Only) ramps on and off of Rte. 520 to get to the new UW Station. Traffic currently backs up at the current ramp onto Rte. 520.	3/9/2015 11:47 AM

922	Go direct from NE 95th down 35th NE to transfer station.	3/9/2015 11:05 AM
923	Finish Northgate link sooner than later.	3/9/2015 10:49 AM
924	Have the 522 bus, or its replacement, stop at the existing stop on Lake City Way NE & NE 82nd Street for all trips!	3/9/2015 10:36 AM
925	Increase service along 145th Street and 15th Avenue NE; need reliable pick up time for downtown route 308 northbound to be able to use it with frequency. Would increase my usage if it can go through the bus tunnel along with route 77.	3/9/2015 10:26 AM
926	A direct bus from NE Seattle on 35th directly to the UW link station is the most important. A more efficient bus schedule and direct access from NE Seattle to South Lake Union and Lower Queen Anne.	3/9/2015 10:02 AM
927	Funnel as many bus routes as possible to the UW light rail station to make LINK the quickest way to get downtown. This would remove some buses from the street that duplicate the light rail option.	3/9/2015 10:02 AM
928	Provide more shuttle routes connecting the western side of the U District and Wallingford/Green Lake directly with the new University Link Station.	3/9/2015 9:58 AM
929	Determine who to shrink the distance needed to travel to reach bus lines.	3/9/2015 9:58 AM
930	Either have the 312 not run just at peak hours, or have the 522 stop at several key points on Lake City Way that are currently only served by the 312 when the 312 is not in service.	3/9/2015 9:55 AM
931	The concept itself is a problem.	3/9/2015 9:50 AM
932	I do not think it has any thing to do with the south ens.	3/9/2015 9:06 AM
933	More connectivity to University Link Station - take advantage of Link's consolidated, frequent service.	3/9/2015 8:31 AM
934	Have the 522 stop along lake city until it gets on I-5.	3/9/2015 7:49 AM
935	I like it as it is, to be honest. I want it tomorrow.	3/9/2015 6:34 AM
936	establish direct bus connections from eastside to major hospitals in downtown seattle	3/9/2015 5:44 AM
937	Provide direct bus access from core Greenwood (85th & Greenwood Ave) and Greenwood Senior Center to NSCC and neighborhoods in Northeast Seattle like Northgate, Lake City, Sand Point, and Seattle Children's Hospital by extending Route 75 from Northgate TC to 85th and Greenwood. Greenwood is not well connected to areas to the northeast.	3/9/2015 2:41 AM
938	Better service connecting Ravenna, Bryant, and Northgate/North Seattle College	3/8/2015 9:58 PM
939	Maintain some alternative that goes through the U District to downtown; provide better alternatives East of 35th Ave NE.	3/8/2015 9:23 PM
940	Consolidate bus stops and provide other transit priority investments on route 44 to speed it up and make it more reliable.	3/8/2015 9:23 PM
941	My goal is the same. I have no specific improvements to suggest in this region.	3/8/2015 9:19 PM
942	easier access of the bus stops	3/8/2015 8:52 PM
943	Link route 75 to Link station at UWMC/husky stadium.	3/8/2015 7:33 PM
944	In contrast to the current service, the #74 will not stop north of NE 74th, and we have to walk on Sandpoint Way on a narrow path, with cars frequently driving 40mph (high pedestrian fatality rates at this speed), very scary, especially at night with poor roadway lighting. So, make sure the #75 continues to stop north of NE 74th.	3/8/2015 6:26 PM

945	My neighborhood overwhelmingly just voted to tax ourselves for more transit. Not higher-volume consolidated onto fewer routes; we asked for more of what we already are using. I am very worried that the alternative 1 proposal seems to be heading in the opposite direction, reducing, eliminating, consolidating. Is the goal of the transit system to serve only those who can travel to a few high-volume routes, like the train, or is the goal of transit to provide maximum higher-density coverage to the region, so people can do more activities without getting in a car? I support, and just voted for the second of these two concepts. Our needs for travel are complex, and extend well beyond peak commute times. We need a system that has the capacity, coverage and frequency required to provide for our complex needs. Alternative 1 seems to take away too much of the local coverage to consolidate service into a few highly concentrated routes. These routes do not have enough infrastructure in terms of park and ride capacity, and local service to help people get from their houses to the bus, and back again with groceries and kids. What I would like to see on the north end is better cross-town service on the east-west arterials, and enough peak-trip service to where I don't have to stand in the bus for 45 minutes at the end of a long day, when I am tired.	3/8/2015 6:25 PM
946	Make sure transit is accessible, especially to people with disabilities and the elderly.	3/8/2015 3:46 PM
947	Reduce the need for multiple transfers because routes were cut. Leave the 66 as is!	3/8/2015 3:00 PM
948	I cannot say, considering I have no budget information available to me.	3/8/2015 1:12 PM
949	perhaps many people in ne seattle don't *need* what you are proposing,	3/8/2015 11:56 AM
950	no clue. walking further to get a bus to the areas mentioned is not a goal I have.	3/8/2015 9:08 AM
951	Reinstate express service (10 min intervals) from downtown to University Way until about NE 55th. Then live-loop it back to downtown to layover. The current 71/2/3 is faster than what is currently being proposed (with the exception of southbound PM peak service).	3/8/2015 3:24 AM
952	Sorry I don't know enough about the layout to comment	3/7/2015 8:06 PM
953	More service from Overlake to UW & north	3/7/2015 8:03 PM
954	More service to the fast-growing SLU, and reverse-peak service on Boren to connect SLU to First Hill	3/7/2015 7:40 PM
955	Honestly it is close to perfect for me.	3/7/2015 5:14 PM
956	Perhaps consider a crosstown shuttle (maybe at NE 95th Street or 110th) so that residents could access buses along Sand Point Way, 35th Ave NE or Lake City Way if they want to get downtown without having to change to light rail in the U District. Students going to Nathan Hale, Jane Adams and other nearby schools could ride the shuttle instead of school buses and perhaps grow up with a public transportation mentality.	3/7/2015 5:09 PM
957	See above. But I do like the concept of consolidating Route 8 & 11 together. The drawback for current Route 8 is that it doesn't go all the way up Madison West-East. Hopefully the new Link will get people where they need to be without having the 8 travel the entire way. I don't use the 11 because it doesn't come down the hill north enough. I think the 8 is a much better Route in general, more useful. Aside from planning/putting in a new Route that runs W-E on Mercer instead of Denny, the 8 absorbing the 11 is a good option. Adding a new Mercer route in the future that connects with Eastlake via (Mercer/Republican) or that may be something else like Mercer/Montlake on 90, might also be worth investigating as an add on to 8/11. I would use the new 8 more often because it goes further East than before, making it much easier for me to access Central Co-Op for instance from down in SLU.	3/7/2015 4:59 PM
958	Can't wait for light rail to reach Northgate & NE 145th.	3/7/2015 3:43 PM
959	More service like 555/556 with direct service to the U District; linking two concentrated ridership centers, Northgate and the U District with high frequency and speed. Direct, faster service to downtown from Northgate, faster than the current 41, until LLR is ready to take the load.	3/7/2015 3:30 PM
960	It really needs someone to listen and act on what all the riders want, not just the transit admins and a bunch of folks who never ride buses.	3/7/2015 3:16 PM
961	Have more routes in NE Seattle head towards the LR station.	3/7/2015 2:56 PM
962	Expanded hours of service between University Station and NE Seattle neighborhoods, especially at night.	3/7/2015 2:45 PM
963	Park and ride. this needs to improve. especially for red line buses. no where to park - that is safe. that's why i don't use it. it would be so much faster, but there is no place to park. so when you consider how fantastic this would be, you have to consider how are people going to get to the bus stops and where are they going to park. because a lot of people will be driving to the bus stop. there is no way to avoid that in this city. widen your focus, it's not just about the bus/light rail. it is also about how people get to it. especially for people who take a route home at night, have to park somewhere or walk somewhere. it is not safe i will be driving my car.	3/7/2015 2:16 PM

964	See above.	3/7/2015 2:06 PM
965	Have buses from the neighborhood to get us to the light rail!	3/7/2015 1:22 PM
966	Maintaining a strong connection to downtown is helpful, perhaps more frequent 41 service could help too, especially during sports events at the Stadiums when more service is needed.	3/7/2015 1:07 PM
967	Living on Capitol Hill and within a mile of the new station, my concern is being able to obtain frequent and direct service to iconic North Seattle destinations from the new University Stadium Station. For example, right now it takes one hour via 43/44 between Central Capitol Hill and Ballard--especially at night this timeframe is of concern. But direct service to businesses in UDist, University Village, Lake City Way and Northgate would make Metro Transit to those places more convenient to utilize.	3/7/2015 12:44 PM
968	Simple way to connect from the UW light rail station to other NE Seattle destinations.	3/7/2015 12:24 PM
969	Ensure evening service from Huske Stadium stop does not force those with destination to Roosevelt and 11th to walk from the Ave or 15th because it's too unsafe. I typically only use transit evenings and weekends to play in other neighborhoods but have ceased using transit when evening service on the 66 was reduced.	3/7/2015 12:09 PM
970	Frequent 15 min service to 92nd St in Seattle (either Ravenna, 25th, 35th, or Lake City Way and 95th)	3/7/2015 11:53 AM
971	Please realize that some of the people who use the routes you want to cut 1) don't drive and use Metro and 2) are older and find it hard to walk great distances and need to be close to bus routes. You, the Mayor, want people to use transit and at the same time YOU keep wanting to cut or reduce the routes that we take. THIS IS NUTS.	3/7/2015 11:24 AM
972	It's great! Build a subway from northeast Seattle to Fremont and Ballard, but that's not a metro bus thing :)	3/7/2015 11:17 AM
973	I'm a little concerned by the stair stepping that the 16 does between east-west corridors duplicating other frequent service on lines 44 and 45.	3/7/2015 10:53 AM
974	Direct stops at the light rail station if possible. Either that or make a stop on the UW campus very close to the station. Expanded hours of service for both buses and trains. Would use this option coming back from SEATAC more often if buses were operating in evening.	3/7/2015 10:25 AM
975	You shouldn't be "consolidating"; you should be adding! More buses, more routes. Don't worry so much about the duplication. Serving the customer should be the priority.	3/7/2015 10:08 AM
976	I would add another east-west connection between NE 65th St. and Northgate Way, such as on NE 80th St. from 5th Ave. NE or Roosevelt Way to 25th Ave. NE/Ravenna Ave.	3/7/2015 10:05 AM
977	More direct service to the University of Washington Link Light Rail from 25th Ave NE (currently a route 68 & route 372) bus rider.	3/7/2015 10:00 AM
978	The main concern I have is the quality of the connection between the 372x and light rail. It seems like there will be a relatively long walk to make this connection. I'm not sure if there are any solutions here given the traffic on Montlake Blvd.	3/7/2015 9:31 AM
979	Aggressively speed up routes 45 & 67 between 65th & the UW station. Consolidate stops north of 50th. Have dedicated bus lanes on Roosevelt/11th/12th. Force all non-transit traffic to turn right every block on University Way south of 50th. Transit Signal Priority as they cross Ravenna Way and 65th, especially for the 3 lights the routes pass through in rapid succession for the left turn southbound.	3/7/2015 8:54 AM
980	Plan frequent, rapid bus routes that run from neighborhood centers in Northeast Seattle to the stadium station. At rush hour (7am-10am, 4pm-7pm) the same bus should come at least every 5-7 minutes. I should not have to rely on a bus schedule to get from Roosevelt to the stadium, and it shouldn't take me more than 15 minutes to get from the Roosevelt neighborhood center to the stadium by bus no matter when I leave (i.e., not having to plan around a schedule). This level of reliability and frequency in public transit is standard in many major cities, even in developing countries.	3/7/2015 8:53 AM
981	If there were routes that were shorter and did regular loops, it would be more reliable and ease of getting the train, less wait and ultimately getting to my destination on time. (like they do in Singapore, it is quite easy to navigate there since there are frequent buses that are always coming and going)	3/7/2015 8:51 AM
982	Give Metro more money to further increase frequency.	3/7/2015 8:44 AM
983	I have no opinion on North Seattle.	3/7/2015 8:28 AM
984	I don't have any ideas for improvement at this time.	3/7/2015 7:54 AM

985	Add bus service from Capitol Hill down 12th Ave to the ID and Beacon Hill	3/7/2015 7:46 AM
986	Have "feeder" buses from local neighborhoods get people from neighborhoods to E-Buses, Light rail. That way fewer people will drive to the main bus lines. Reality check; most people won't walk more than a few blocks to get to a bus.	3/7/2015 7:01 AM
987	increase the number of small hubs, don't rely on so many massive hubs like UW (except for rail stations) or downtown. South lake union is currently a more important area than downtown for a hub. Downtown is busy but hasn't been a destination for play, and less and less for work, in recent years. many people work in south lake union.	3/7/2015 6:40 AM
988	Consolidate the existing bus stops along the routes. Although it's less walk to have a bus stop every other block, it slows down the travel time.	3/7/2015 3:23 AM
989	If implementing continue route 76 but have it stop at NE 45th St. (UDistrict) and I-5 while going southbound in the morning. Currently it bypasses UDistrict on way to downtown Seattle, but stops there going Northbound.	3/7/2015 1:06 AM
990	I would use the 71X-73X during Peak hour only use alternate routes during the day	3/7/2015 12:51 AM
991	Include extending the first hill streetcar to Aloha, or putting back some version of the 47.	3/7/2015 12:44 AM
992	I feel it's worth a try as presently conceived.	3/7/2015 12:14 AM
993	I would have stronger east-west connections north of Northgate.	3/7/2015 12:09 AM
994	Moving bus stops to be as close as possible (1) to each other at transfer intersections, and (2) to actual destinations (such as significant retail centers, schools, and workplaces). Adding reverse commute runs on peak routes. Getting north- and west-bound routes to run remotely close to their schedules.	3/6/2015 11:29 PM
995	I don't know if this is taken into consideration, but service later at night on routes 65 and 75. It's hard to go out at night and get home on transit because the bus routes (especially 65) end so early in the night. There needs to be service until 2 or 2:30 in the morning, at least on weekends.	3/6/2015 11:12 PM
996	Very frequent, fast service to light rail. e.g. small busses every 10 minutes that just zip you to light rail. It's already going to add time transferring from bus to train, it would be frustrating if the busses weren't that frequent. The train might get me from UW to Capitol Hill in 4 minutes. That's not the variable factor. Infrequent, slow, late, stuck-in-traffic busses could make the difference between a 20 minute commute to Cap Hill and a 45-60 minute commute to Cap Hill.	3/6/2015 10:55 PM
997	Keep either the 12 or the 43. The 43 would feed into the Station on Broadway at least. The 12 would give access to the Medical Buildings on Madison. Otherwise how does someone get to those from that quadrant? That is REALLY unkind! To get from the Station on Broadway to pill hill for an elderly person would work how?	3/6/2015 10:28 PM
998	More direct access between laurelhurst and UW light rail station	3/6/2015 10:18 PM
999	lots of through-routes, frequent service Northgate-Green Lake, make connections to ST 512 easier (more frequent 44?), leave some peak 372 trips as express for faster Lake City service	3/6/2015 10:13 PM
1000	Use transit to get me to the nearest light rail station as quickly as possible.	3/6/2015 10:11 PM
1001	Closer connection to UW station from connecting buses.	3/6/2015 9:40 PM
1002	More parking around transit hubs	3/6/2015 9:19 PM
1003	Make it easier for people to get to and from Capitol Hill without having to transfer at 3rd & Pine. That intersection is too close to Belltown to feel safe for a woman travelling alone.	3/6/2015 9:17 PM
1004	At least keep 71 intact during peak hours so that people can get from east of 35th/65th to connections to Bellevue without multiple transfers without having to hike so far, alt 1 gives me at least a half mile of walking uphill, not fun when it rains, and not enough alternatives in case I should miss the 65.	3/6/2015 8:42 PM
1005	Improve speed and reliability of Route 44 by consolidating some of the very close bus stops, and working with City of Seattle to implement some transit priorities on this route. Make 45th a transit-friendly street with transit priorities implemented. Ensure reliability of the route 45 if delays on eastside/SR 520 creates delays with the 271 interline.	3/6/2015 8:32 PM
1006	I would use it to get to the train and then likely to Capitol Hill, Downtown or the airport.	3/6/2015 8:19 PM
1007	see above - focus getting people to light rail stops or park and rides easily so they can take those modes	3/6/2015 8:12 PM
1008	Have a route from Sandpoint area go to the Light Rail station.	3/6/2015 8:10 PM

1009	I have insufficient data to make informed decisions on this matter.	3/6/2015 8:04 PM
1010	increase routes that transfer to Rapid E line.	3/6/2015 8:03 PM
1011	Overall Alternative 1 looks pretty good. For me, adding back the 72 route would be a huge improvement.	3/6/2015 8:03 PM
1012	See you just want to possibly improve your idea. This will not improve anything because people have to walk to a Bus Stop often in the rain. Why we only have one huge link station on Capitol Hill. Instead of more smaller stations. Does anybody who designs these things ever ride them??	3/6/2015 7:57 PM
1013	Is it possible to implement a hub system that facilitates transferring for high-transfer rate exchanges between routes? For example if traveling to downtown on the proposed #8 from Madison Park, I'd need to be sure to catch a 38 somewhere or I end up by Seattle Center. Particularly when connections are being made when it's late and the frequency of service is lower, it would be good if the drivers for #38 waited until the #8 arrived (at certain set stop) before proceeding on its route, and vice versa. Only after they've allowed for an exchange of passengers transferring would they be free to go on with their routes.	3/6/2015 7:57 PM
1014	Build more light rail access, along with a more clearly defined hub-and-spoke network.	3/6/2015 7:55 PM
1015	- Every bus that connects with Link should have a frequency that's a multiple of Link's, and ideally with the same span of service. If Link's all-day frequency will be 10 minutes, then core routes should come every 10 minutes, while route with lower ridership should come every 20 minutes. Why is 20 minutes better than 15? Because of beat frequency. Imagine that a 20-minute bus departs UW Station after every other Link train arrives. A rider coming from Link will either have to wait 0 minutes (if there is a bus waiting), or 10 minute (if there isn't), for an average wait time of 5 minutes. With 15-minute frequency and no timed connection, a rider will have to wait an average of 7.5 minutes -- 2.5 minutes longer. Why pay extra for worse service? - Reroute the 5 through Fremont, and modify the 5X/355 to provide a peak-period connection between Phinney/Greenwood and downtown. This would simplify the network (the 5 would have a straighter route), and it would provide a direct connection between the neighborhood centers of Greenwood, Phinney Ridge, and Fremont. Currently, this connection is almost provided by the 28, but Alternative 1 proposes to take that away. - Delete the 32, a route that largely duplicates the 31 and RapidRide D. Instead, upgrade the 31 to frequent service. Alternatively, truncate the 32 so that it only runs between Fremont and the U-District (basically a turnback version of the 31), and use the savings to upgrade the 31 and 32 to 20-minute service each (combined frequency of 10 minutes). - Modify the 75 to stay on NE 125th St, following the 41's route to Northgate TC. Extend the 40 along Northgate Way/LCW to the 41's current terminus. Terminate the 41 at Northgate TC full-time. This would simplify the network, since every Route 41 would have the same service pattern. It would also bring back a connection between Ballard and Lake City.	3/6/2015 7:50 PM
1016	Not sure yet	3/6/2015 7:47 PM
1017	Please consider adding routes with direct access to Husky Stadium from NE Seattle via 25th Avenue NE and Sand Point Way.	3/6/2015 7:42 PM
1018	More all electric trolley bus lines	3/6/2015 7:42 PM
1019	I would keep Route 66 and 48 the same.	3/6/2015 7:40 PM
1020	As Horace Greeley once wrote, "Go West, young man."	3/6/2015 6:55 PM
1021	I like it as it is	3/6/2015 6:53 PM
1022	Readd the 43, eliminate the southern leg of the 48 and combine parts of that with the 38 (southern end of the 8)	3/6/2015 6:48 PM
1023	Design it like the hub-and-spoke system the airlines have. Use smaller equipment (mini-vans) to provide "feeder" service (such as East/West and North/West shuttle service via mini-vans) along the less frequently used routes to provide access to the hubs.	3/6/2015 6:30 PM
1024	Allow your fair on Metro to carry over to Sound Transit and visa versa.	3/6/2015 6:22 PM
1025	Retain route 71 and other routes through neighborhoods that enable riders to leave the car at home.	3/6/2015 6:19 PM
1026	Reroute the 65 back to its original routing from around 8 years ago. Making it detour all the way to the Children's hospital really slows down the ride from our house to the U district (in fact, biking is faster than the bus!). More frequent service will be great, but the 65 needs to become faster.	3/6/2015 6:17 PM
1027	I would put a transit-only lane down Montlake, from the U-Village to the Link station. (Southbound. Northbound is never congested) Run busses directly to the station. Or at least have an option to go from NE Seattle directly to the station without looping through UW or walking from Stevens Way down to the station.	3/6/2015 5:53 PM

1028	a route between UWMC to North Capitol Hill or Eastlake, traveling up the back side of North Capitol Hill (Delmar Ave Hill) connecting UWMC to Boyer, Delmar, and Seattle Prep High School, Roanoake Park, and Eastlake, or the underserved 12th Ave to 19th Aves of North Capitol Hill	3/6/2015 5:52 PM
1029	Nothing I can see.	3/6/2015 5:50 PM
1030	Keep all the old routes and add the new routes! The survey we filled a few months ago did not indicate that we wanted to exchange one service for another; we asked for more frequent service and for east-west routes. If I have to choose, I would add more routes with the less frequent service.	3/6/2015 5:45 PM
1031	Make 28X more frequent.	3/6/2015 5:38 PM
1032	Keep the friggin 71 and 76 as they are.	3/6/2015 5:37 PM
1033	I think the ST 542 should still make it to the Greenlake P&R - or the new 541 bus could make it to the P&R. The P&R is a practical stop for many people to catch a ride to the Eastside. Once Northgate link is open, taking link between Roosevelt and Husky stadium then transferring to a 545 becomes a palatable option, but as of now the loss of service from the P&R is simply detrimental.	3/6/2015 5:28 PM
1034	I would delay implementation of Alternative 1 until changes in passenger trips can be measured after the Light Rail expands.	3/6/2015 5:20 PM
1035	not sure	3/6/2015 5:19 PM
1036	Maintain 71 between U District and Wedgwood and terminate route at Campus PKWY NE. All other alternates involve dramatically more walking and travel time. Alternate 1 makes travel to University Ave prohibitive from Wedgwood. There's literally nothing there for us.	3/6/2015 5:17 PM
1037	Increasing regular high frequency service on key routes even further	3/6/2015 5:14 PM
1038	i don't favor this alternative.	3/6/2015 5:12 PM
1039	Extend the hours of certain routes to later at night, and make later routes more frequent than they currently are.	3/6/2015 5:11 PM
1040	Alternative 1 means I loose all transit access due removing the only route that I have access to (26). The 26X does NOT cover the Wallingford area.	3/6/2015 5:11 PM
1041	Add direct bus routes to bring commuters from the north end (northgate and north seattle area) directly to the Link Station.	3/6/2015 5:10 PM
1042	increase hours on the 330	3/6/2015 5:10 PM
1043	Two things: 1) Change the 67 temporarily (until North Link) to continue north to Jackson Park from Roosevelt, rather than west/south to Northgate Transit Center 2) Keep most of the new 16, but have it use Aurora (and keep the 26/28 using Fremont/Dexter)	3/6/2015 5:09 PM
1044	any chance of circulator mini buses that run along the spine of 35th Avenue NE - maybe south of 75th or 90th, and take residents to the Light Rail station by the Stadium? Or maybe the bus will now do that. Circulator might cut of the detour to Children's.	3/6/2015 5:08 PM
1045	From NE Seattle there doesn't appear to be a priority to get people to the new stadium link station. For example the 65 prioritizes the UW over Stadium Link station. This makes the 65 a less viable option for getting to stadium link because of the time it takes to service UW campus. Regarding 65, I'd also prefer it continued south on 35th at 55th st. 35th between 55th st and and 5 corners no longer has any service. Seems to me there should be an option directly down 35th ave and connecting with new stadium link station. Thanks!	3/6/2015 5:04 PM
1046	Reinstate the 30/74 all day and weekend service	3/6/2015 5:01 PM
1047	Feed the light-rail for downtown riders, and have fewer buses go downtown.	3/6/2015 4:58 PM
1048	I'd love to see a route along 65th from Ballard to Sand Point to make a more complete gridded network. There is currently a large area in ballard without east-west transit service (a 30 block gap between Market and 85th).	3/6/2015 4:53 PM
1049	Have rapid line along 15th ave ne with faster connection with buses that goes to Eastside from UW.	3/6/2015 4:51 PM
1050	Even more frequency on many of the routes. 10 minutes or less!	3/6/2015 4:47 PM
1051	No ideas for improvement.	3/6/2015 4:45 PM
1052	Better linking of North/NW Seattle to light rail. Add Ballard to U-District light rail.	3/6/2015 4:43 PM

1053	68 is a frequent bus easy to catch because it has more stops along 25th. If this route is deleted, people must catch 372 which doesn't stop as often. I understand that their routes overlap, but both these routes do their own "thing". I catch 68 going to UW (stop closer to my house than 372 stop), and 372 going to work to Kenmore (very fast, reliable transportation, btw). But if 372 is going to be extended to the weekends, I'm alright with it (alternative 2). Weekends it's much harder to get around N/S.	3/6/2015 4:34 PM
1054	Have the 65 bus travel all the way down and turn up at 45th to 35th.	3/6/2015 4:30 PM
1055	I would keep the access to the following roads: 148th Ave NE & NE 31st St in Redmond so people can access 148th Ave NE (and Microsoft Redmond West campus and Nintendo campus), and Boyer Ave in Montlake so people can access the Montlake Community Center. Maybe by modifying 48 or 49 and adding a connection through Montlake to the new University light rail station. And I would keep the stop on route 242 on 148th Ave NE by adding the 541 stop/route to the alternative 1 too, not just alternative 2.	3/6/2015 4:26 PM
1056	Merge the 2 onto Madison as well to create a consolidated, frequent corridor running down Madison (2 + 49)	3/6/2015 4:18 PM
1057	See Above comments	3/6/2015 4:10 PM
1058	Include the eastside more in these ideas. I think I only saw Redmond mentioned. North end is a little underserved. After 6pm we have no express bus services.	3/6/2015 4:10 PM
1059	I would give more weight to the needs of the elderly, the young and the physically handicapped who are not daily commuters.	3/6/2015 4:08 PM
1060	Leave the 64x route alone.	3/6/2015 4:07 PM
1061	I can conduct more business in North Seattle.	3/6/2015 4:07 PM
1062	Restore commuter express service to 15th Ave NE. This cuts off the northern end of well used routes 72 and 73. Instead of abandoning NE Seattle, bring back commuter express buses (like the 79) to take the pressure of the workhorse that the 73 will become, and the 73 - even at the frequencies proposed - will overflow on Roosevelt with 66/67 users also jumping on the "faster" bus.	3/6/2015 4:04 PM
1063	Have multiple bus lines linking passengers more frequently and in sync with the LLR schedules.	3/6/2015 4:03 PM
1064	Improve service between Pioneer Square and Madison Park, if nothing else restore a route that runs back and forth on Madison only.	3/6/2015 4:03 PM
1065	Magnolia seems to be served more than necessary.	3/6/2015 4:03 PM
1066	It is unclear to me where metro stops are in relation to the University Stadium station. The closer that connection will be the more use it will get.	3/6/2015 4:01 PM
1067	Recognize that "consolidation" means people having to walk farther, which is not always painless or possible. Either commit to adding new branches (not just thickening the trunks) when you get more resources, or find another way to address this basic issue. You did a lot of great maps. There's one more I'd like to see: a heat map of "walk times to get to at least two relatively distinct bus lines." If you can make that map look reasonable for plan 1 when compared with current state, I'm sold.	3/6/2015 4:00 PM
1068	Keep the 12.	3/6/2015 3:56 PM
1069	Ditch it.	3/6/2015 3:52 PM
1070	Really, this plan needs to be obliterated. The way to improve alternative 1 is to massively reduce the need for transfers, or have buses that run every 5 minutes. However, I do like the idea of consolidated frequent service. I would walk a little further to get to a route that ran more frequently. For transfers, waiting more than 5 minutes for the connecting bus make the transfer very undesirable.	3/6/2015 3:51 PM
1071	Making sure that your not losing service to certain areas.	3/6/2015 3:49 PM
1072	Why not run Route 72 and Route 73 like a shuttle to and from the U.Dist. Light Rail Stop? Theoretically, a shorter route could have 2x as frequent service.	3/6/2015 3:37 PM
1073	Having good connections between north seattle and capitol hill would be great - it's hard to get to capitol hill from Ravenna by transit. I usually just drive.	3/6/2015 3:37 PM
1074	As mobility impaired, and on a tight budget, I have limited use for link rail. I avoid it at all costs.	3/6/2015 3:36 PM
1075	I am unsure that providing long routes through several neighborhoods to get to downtown (i.e. proposed route 16) is the best way to maintain ridership.	3/6/2015 3:32 PM

1076	Not sure -- can't see how slow the new 16 route will be. But would rather have more direct route from Sand point to UW Link station for transfer to both downtown and 44 for heading toward Ballard	3/6/2015 3:32 PM
1077	If routes 68 and 72 are being cancelled, then the 372 should be a local bus from 25th Ave NE and NE 55th through Lake City Way NE and NE 125th St, that way people along Lake City Way and 25th Ave don't have to walk a considerable distance to reach the 372. As it is, there are gaps of 10-12 blocks, some of which would involve walking uphill to reach a bus stop.	3/6/2015 3:31 PM
1078	Keep a few more local routes but improve efficiency by having those locals terminate at LINK, P&Rs or TCs, or at least feed those points more directly. Or expand express routes. e.g. extend 542 to Northgate until north LINK is completed.	3/6/2015 3:29 PM
1079	Can't.	3/6/2015 3:27 PM
1080	Make sure the geographic coverage is comparable to what currently exists. Looks like there will be a lot of walking in this alternative.	3/6/2015 3:27 PM
1081	More direct service to Downtown Kirkland	3/6/2015 3:27 PM
1082	would like a bus that runs along Montlake and sandpoint to the light rail station instead of getting clogged in the U district	3/6/2015 3:24 PM
1083	Route 65 stopping right near the Link station (entering UW stadium area) vs north of Pacific Place on Montlake. Or I suppose it may stop on Pacific Place corner near overcrossing?	3/6/2015 3:23 PM
1084	Too late for that.	3/6/2015 3:21 PM
1085	Have more buses that are exclusive to high-traffic areas, i.e. some that are only U District to Downtown without going into other neighborhoods. Making sure the buses coming frequently are ACTUALLY being filled--I ride downtown and in the tunnel you will literally see 4 empty 41's stacked up one after the other, while every single bus to the U District (71, 72, 73, 74) is filled way past capacity to a dangerous extent.	3/6/2015 3:20 PM
1086	Consolidation seems to favor people who live just along the corridors or have access to vehicles to drive to the corridors. Those corridors also seem to be favoring affluent places like Children's Hospital, the UW, and South Lake Union, Wedgewood, Laurelhurst, Wallingford, and Green Lake, at the expense of places like Lake City (pretty much anything north of Wedgewood).	3/6/2015 3:18 PM
1087	don't know	3/6/2015 3:10 PM
1088	I don't like not being able to ride on one bus north of 92 around to the transit center, This is especially difficult for seniors and others who are mobility impaired. This route as is provides service to several medical facilities, banks, pedestrian entrances to Northgate Mall. Taking that away is inconsiderate and unnecessary. Are you paying attention? This is important.	3/6/2015 3:09 PM
1089	A frustrating facet of the existing network and A1 is that getting from Wallingford to the U-Village retail area by transit is awkward. I would frequent that area and therefore spend more on sales tax if there was some sort of direct service down 45th.	3/6/2015 3:07 PM
1090	I don't have any specific suggestions!	3/6/2015 3:02 PM
1091	Not sure.	3/6/2015 2:59 PM
1092	Have direct service to NOAA either with the 30 or having the 74 run both ways. I am somewhat perplexed that the 30 is often identified as having low ridership, but the bus I ride in the morning is usually about 50 - 75% full until 77th and still has 10 - 12 going into NOAA, and the same in the afternoon. Rather than cut this service to NOAA, it would seem that some type of outreach should be implemented since most employees at NOAA are eligible for transit subsidies.	3/6/2015 2:56 PM
1093	Seems like a lot of changes are focused on NE Seattle. I would like to see service from Ballard and Phinney/greenwood to green lake. Green lake is a very popular area to meet up with people, but it's hard when you have to take 2 or 3 buses to get there	3/6/2015 2:55 PM
1094	Direct service along Sand Point Way, NE 45th, Montlake to UW Line Station	3/6/2015 2:55 PM
1095	Add east/west bus service on 65th Street, west of Green Lake	3/6/2015 2:54 PM
1096	Get rid of the 70 and keep the 66 on Eastlake (or move 66 to Fairview) so that north end still has access to Eastlake area.	3/6/2015 2:53 PM

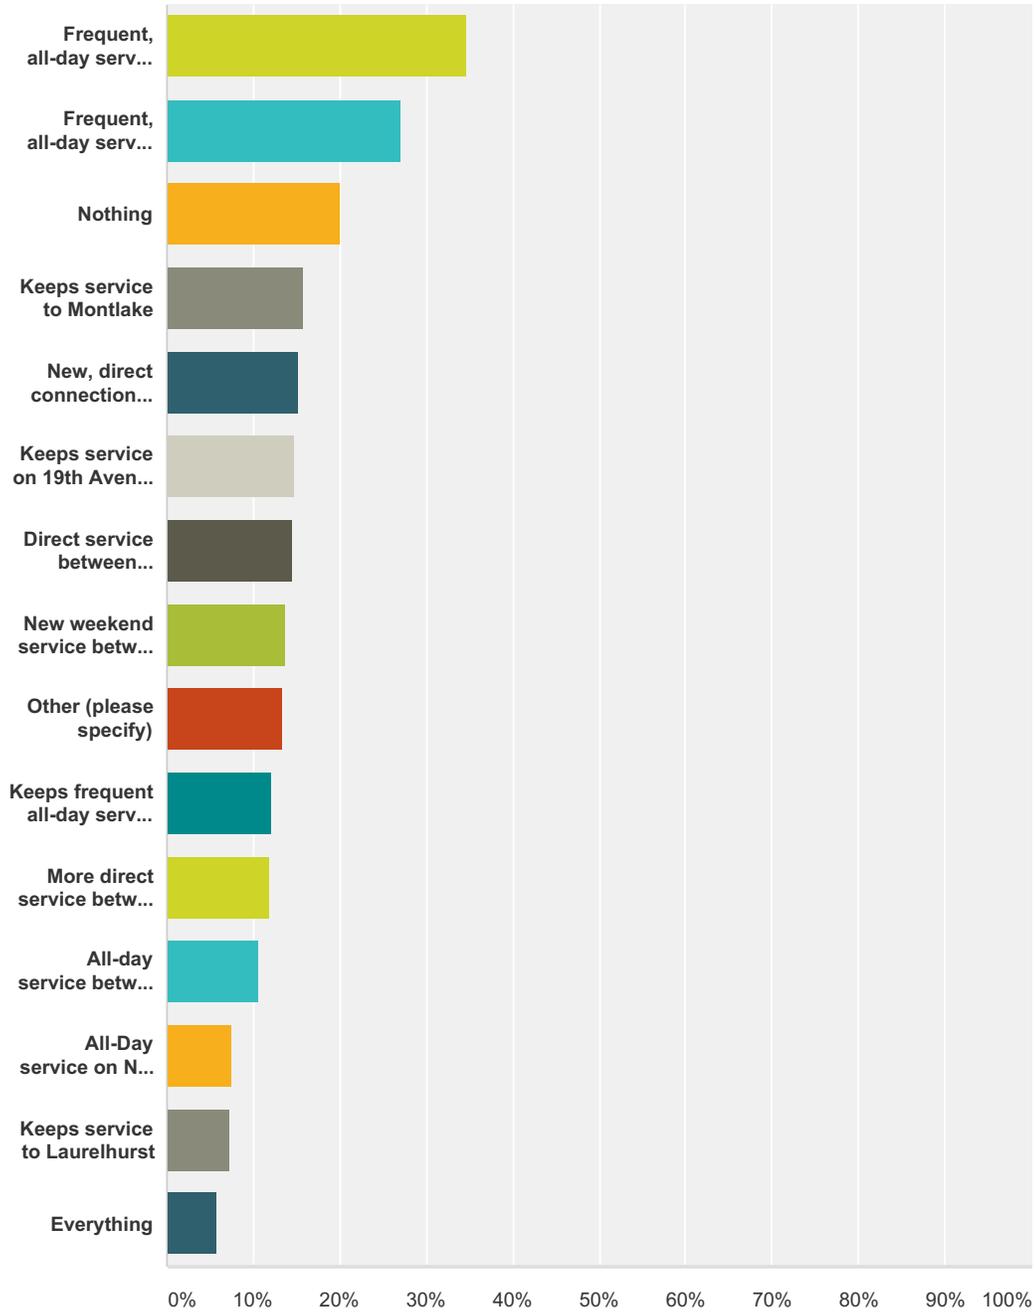

1097	More options for the Eastlake neighborhood. Residents rely on the bus system, and buses are overcrowded often.	3/6/2015 2:53 PM
1098	Keep Metro 255 & Sound Transit 545 just as they are now. And force WS-DOT to retain the Montlake Freeway station. I can walk from Montlake Freeway station to the UW Husky station faster than the bus can deal with congestion there.	3/6/2015 2:49 PM
1099	More East/West focus, particularly to/from Ballard which has become a major urban hub.	3/6/2015 2:48 PM
1100	Routes 8 and 43 being preserved as is!	3/6/2015 2:47 PM
1101	focus on reliability (buses on schedule) and safety (well-lit bus stops on well-traveled streets)	3/6/2015 2:46 PM
1102	Keep route 12.	3/6/2015 2:46 PM
1103	Options that improve East-West service on the corridor north of downtown (Ballard/Fremont) to the East Side (Bellevue/Redmond).	3/6/2015 2:45 PM
1104	I like the concept of service every 15 minutes. If Metro could actually achieve it, it would be great!	3/6/2015 2:45 PM
1105	I'd add an express service from SLU to Capitol hill that doesn't require going alongside Denny or dedicated bus lanes on Denny. Alternatively, if the service could be moved to a side street with less traffic alongside SLU, it would make it faster. If there was service that went from the Capitol Hill link station that wasn't fed through denny, that would work as well.	3/6/2015 2:44 PM
1106	bus #47 was removed...so I walk up to Summit/Olive way to catch the 43. I have heard that in option 1, bus 43 would be eliminated, It currently takes me 30-45 minutes to go from Capitol Hill to SODO, with a transfer. I can drive in about 10. I prefer to take the bus because we are a 1 car family and I like the greener nature of it, however if I have to walk even farther to catch transit, I could have driven to my location much faster and it becomes pointless	3/6/2015 2:43 PM
1107	A direct bus/line from Ballard to Capitol Hill!!!!	3/6/2015 2:42 PM
1108	I'm not sure if this is where this should go, but my only greatest wish is direct transit service between Capitol Hill and Fremont.	3/6/2015 2:42 PM
1109	Do not take the 16 off of Aurora! It's one of the few buses that doesn't require those living on or off of Stone Way to hoof it all the way to 34th & Fremont!	3/6/2015 2:41 PM
1110	I don't know. I want Light Rail in Kenmore!!!! Or a mosquito fleet! I feel left out. I might need to move.	3/6/2015 2:41 PM
1111	Leave 28X/28 alone. Leave it be. Increase 28 service. While I appreciate Metro, this really impacts a significant majority of those in NorthWEST Seattle yet it feels like this is being shoved under the rug. Leave the 28 alone. Stop it. Increase the service, don't reroute it through traffic saturated Fremont.	3/6/2015 2:41 PM
1112	I think the plan is fine	3/6/2015 2:40 PM
1113	No ideas at the moment. Just excited that a consolidated transit system is being considered.	3/6/2015 2:40 PM
1114	Make the streets where buses travel bus-only. Eliminate as many lights and as possible to increase travel time and reduce congestion.	3/6/2015 2:38 PM
1115	Keep major access along 35th NE, NE 75, NE 65	3/6/2015 2:37 PM
1116	Not sure. Sorry!	3/6/2015 2:36 PM
1117	Once again you are missing the point 5 years ago when I started riding the bus it took 30-40 minutes from my door to work, It now averages over an hour. The buses are always late and we do not make the connection downtown that run up the hill.	3/6/2015 2:36 PM
1118	I would loop 75 around to make a stop in front of new ST station in front of Stadium.	3/6/2015 2:36 PM
1119	I would implement a rapid, direct route from North Seattle to South Lake Union.	3/6/2015 2:31 PM
1120	PROVIDE DIRECT ACCESS FROM NE SEATTLE TO THE LINK LIGHT RAIL STATION (NOT JUST UW LOOP 4/10 OF A MILE WALK FROM NEAREST BUST STOP TO LIGHT RAIL STATION) ALL DAY AND ADDITIONAL SERVICE DURING PEAK PERIODS.	3/6/2015 2:12 PM
1121	Not eliminating the 72	3/6/2015 1:08 PM
1122	Keep the #73 on 15th Ave NE throughout the day.	3/6/2015 1:04 PM

1123	<p>Regarding the #68, I see that yet again you are determined to delete this important route between Northgate and the UW Medical Center, despite getting more of our tax and car tab monies in the recent vote which allegedly 'saved' these routes. Now you have the money, I guess 'saved' was just another lie. Funneling most routes from Northgate down Roosevelt completely misses the eastern side of the UW, and access to the hospital becomes more problematic, with only 1 route, the 75 which takes twice as long, left to service that destination. The 75 is also standing room only in the evening throughout the U District and it is sometimes impossible to board it just THREE stops from where it starts the U District to Northgate journey. This would be alleviated somewhat if you used the higher capacity buses at these times. I often cannot get on at Stevens Way at 8:20pm! You have the data to verify this, but still the shorter buses are used - why? Why can you not understand that people who need to attend the hospital do not WANT, and often cannot afford the time for tedious transfers between multiple buses. As it stands with your proposed plans, there is no suitable transfer from Roosevelt to the UW Medical center - a MAJOR regional employer. This proposal also completely ignores the people who take the bus to work at the hospital and UW campus, often until late in the evening. I myself do not finish work until 8pm. I already have to then wait 20 minutes for a #75 to arrive, so I don't get home in Northgate until 9pm. That is one HOUR to travel just 4 miles on the bus. That is already pathetic. To have to do that on the way to work as well is just additional time wasted and frankly makes me want to just drive in instead. As with most low/moderate income and single earners, in order to find affordable housing, we have to continually move further and further away from the downtown core. The U District is extremely expensive, as is Capitol Hill, Downtown, Ballard, Queen Anne & First Hill. Hence people are pushed further north or south. Now your propositions, particularly to the north where light rail has yet to reach, are being screwed out of efficient, regular bus service - the only way of getting to and from the workplace. Stopping and starting most services at the Northgate Transit Center (just like you did with the 66 & 67 a few years back, and are still determined to do with the 16), removes local bus service options for anyone living on, or north of, NE Northgate Way. Do you REALLY consider it appropriate for senior citizens to have to walk (a distance that takes me 15 minutes, and I'm fit!), just to reach the Northgate Transit Center to catch a bus to see their doctor? This would not be quite so bad, ONCE light rail arrives in Northgate in 2021, but no cuts to services should be considered for this area until then at least.</p>	3/6/2015 12:27 PM
1124	<p>Maintaing service on the 12 up Madison and 19th would go a long way to improving the coverage network on East Capitol Hill, though I'm not sure where I would make the tradeoff to do so.</p>	3/6/2015 11:47 AM
1125	<p>Keep 43.</p>	3/6/2015 11:17 AM
1126	<p>The only difference I would recommend is having direct connection from the 45th Street to University Village. I used to live on NE 46th Street and 22nd Avenue NE, and that spot is a transit desert.</p>	3/6/2015 10:59 AM
1127	<p>I'd want to ensure corridors that see a frequency reduction (ie: 15th Ave NE in Maple Leaf) have reliable peak-only service. My experience with the 373X is that it is often 10-15 minutes late and SRO by the time I board at NE 89th St & 15th Ave NE.</p>	3/6/2015 10:49 AM
1128	<p>My personal concerns are small, but adding service back to between Pinehurst and UW Station (73) as a number of people seem to be losing service. Stopping the route at UW Campus instead of downtown makes sense though. Also, I doubt service greater than 30 minutes would be necessary for this link.</p>	3/6/2015 10:32 AM
1129	<p>Areas along NE 65th St would have an awkward connection to Link; the 16 is great, but N-S connections could be tricky. Loss of service on Roosevelt below Ravenna could be problematic. Understand consolidation but the jog is not very direct. Routes on Stevens Way do not get close enough to UW Station for a "transfer" - that's a pretty big walk.</p>	3/6/2015 10:14 AM
1130	<p>The new route 16 is a great addition, but I'd love to see further improvements to east-west service.</p>	3/6/2015 10:14 AM
1131	<p>I like the Alt 1 plan. Once implemented, Prop 1 money can be used to adjust routes or relieve over crowding</p>	3/6/2015 10:12 AM
1132	<p>Make the 373 an all day and weekend route Provide service on Roosevelt Way between Ravenna and 42nd Make the 66x an all-day and weekend route</p>	3/6/2015 10:10 AM
1133	<p>Add a shuttle route from 65th, directly down 25th to Husky Stadium until Link makes it to Roosevelt.</p>	3/6/2015 9:35 AM
1134	<p>Run service later.</p>	3/6/2015 9:29 AM
1135	<p>I use the 31 or 32 at least 10 times a week to get to work at UW and I am really happy that you're not proposing to reduce or eliminate service. However, taking the 31 and 32 off Stone Way and onto Wallingford Ave. doesn't make good sense to me. Wallingford Ave. is operating more or less at population and building capacity, while Stone Way is full of new and in-development apartment buildings that are going to bring more and more people to this street who want/need transit. In short, this proposal shifts the route from a street whose transit needs are only going to grow to a street whose transit needs aren't. The stop where I wait at 40th and Stone is crowded every morning while it's far less so at 40th and Wallingford Ave. I think this change, though seemingly minor, will leave a lot of people along Stone Way without this great bus connection to UW.</p>	3/6/2015 9:27 AM

1136	I would keep the 73 all day long until the Link station opens in NG.	3/6/2015 9:15 AM
1137	Metro needs to realize that the segment of Stone Way (from 35th to 40th St. in Wallingford) that LOSES 31/32 service here is among the fastest growing, developing sections of north Seattle. There are multiple dense apartment buildings going up, and many just opened, and the bus stop that I use most frequently -- Stone Way and 40th -- is busy all day and all night, with people going to/from the university and connecting. If you combine the 26 with the 31/32, as suggested in Alternative 1, you are running service through a lightly-populated corridor (Wallingford Ave) with a transfer station and NO development potential INSTAD of a densely populated corridor (Stone Way) with excellent development already in the works. Please reconsider Alternative 1 to keep the 31/32 on Stone Way.	3/6/2015 9:09 AM
1138	Keep the 73 to Plnehurst.	3/6/2015 9:07 AM
1139	Better service on 19th. And please cut the 48 even shorter/add even more buses to keep times more reliable if the 43 is going away.	3/6/2015 9:02 AM
1140	One thing that Seattle does not have compared to previous cities I've lived in is true crosstown service. Can't we make the 16 or the 44 go from shore to shore?	3/6/2015 8:47 AM
1141	I would get rid of the off-peak 522, and roll its service hours into a 10-minute headway all-day 372. Plus, I would have more routes, especially the 372, stop as close as possible to UW Station.	3/5/2015 11:44 PM
1142	-Perhaps maintaining some base level of service to Wedgwood and Laurelhurst to avoid forcing people to walk very long distances to access a bus stop would be helpful. While a frequent network is important, efforts should be made that moving towards this goal does not involve completely cutting off some people from transit who may not have other options to get around. -The 65's proposed loop in UW is confusing and does not seem to offer mobility benefits. Consider just routing it down either Montlake or Stevens Way (not both). -Through-routes in the U-District may be confusing. It may be worth it to present the entire combination as one route, just for legibility reasons.	3/5/2015 10:39 PM
1143	The job of Metro is to provide bus service to all of Seattle and under Alternative # 1 you are taking service away and that is contrary to what was promised to the voters when the ballot issue was voted on. In other words Metro will have lied to the voters but what else would I expect from a government agency.	3/5/2015 10:24 PM

Q11 What do you like most about Alternative 2 in north Seattle? (choose up to seven)

Answered: 2,286 Skipped: 4,273

Answer Choices	Responses
Frequent, all-day service between the University District and the new University of Washington Link station (concept for routes 43, 44, 48, 70, and 271)	34.60% 791

Frequent, all-day service between Northgate, Maple Leaf, Roosevelt, the University District, and downtown Seattle (concept for Route 73)	27.21% 622
Nothing	19.95% 456
Keeps service to Montlake	15.84% 362
New, direct connection between Sand Point, Wedgwood, Ravenna, and Roosevelt (concept for Route 71)	15.27% 349
Keeps service on 19th Avenue E (Capitol Hill)	14.79% 338
Direct service between Laurelhurst, University Village, and the new University of Washington Link station (concept for Route 62)	14.52% 332
New weekend service between Lake City, Ravenna, and the University District (concept for Route 372X)	13.87% 317
Other (please specify)	13.34% 305
Keeps frequent all-day service on 11th Avenue NE/Roosevelt Avenue NE in the University District (concept for Route 48)	12.16% 278
More direct service between Green Lake and Northgate (concept for Route 16)	11.90% 272
All-day service between Shoreline, Jackson Park, and the University District (concept for Route 373X)	10.72% 245
All-Day service on NE 75th Street, 40th Avenue NE, and NE 55th Street (Concept for Route 68)	7.48% 171
Keeps service to Laurelhurst	7.22% 165
Everything	5.77% 132

1	keeps the direct routes, keeps the alternative routes-while direct routes are nice and i don't like to transfer, other routes that take the 'back way' off the highway and stop in towns offer alternatives not only for people that live in downtown kirkland and are not near the p&r for example, but if people want to go out after work or have errands to run, the 255 and 277 offer multiple stops for that purpose. while they take longer and i don't ride them often, they are a nice alternative and get me to the places i need to go that direct routes don't; also if there is ever an accident on 405 and traffic isn't moving, these routes are nice because they use the 'back way' and service a lot more neighborhoods	4/2/2015 7:35 AM
2	creation of route 541 that services the overlake park & ride	4/1/2015 1:40 PM
3	Keeps non-stop service between Downtown and Woodinville during commute hours.	4/1/2015 1:22 PM
4	less change --> less public resistance to it	4/1/2015 1:35 AM
5	New route 541	3/31/2015 10:34 PM
6	Just keep the service to and from montlake	3/31/2015 4:37 PM
7	Keeping the 25 in service	3/31/2015 4:10 PM
8	I like that routes #25 and #43 are maintained in Alternative 2. Both of these routes are important.	3/31/2015 3:45 PM

9	It is important to maintain a direct (single-seat) routing option from Montlake to Capitol Hill (19th Ave., 15th Ave., Broadway / Capitol Hill light rail station) that is currently provided by route 43. If route 43 is eliminated, my transit use would drop considerably as I would have to transfer at 23rd/John for a significant fraction of my trips. Requiring two transfers (bus-to-bus, then bus-to-rail) to access the Capitol Hill light rail station does not make sense. Route 25 provides access to areas (including apartment complexes and businesses) on the south/west sides of Portage Bay that are not otherwise served at all, and route 25 provides access from Montlake to South Lake Union as well as downtown.	3/31/2015 3:45 PM
10	Keeps three of the four routes I currently use in their current configurations (64X, 65, 76)	3/31/2015 3:34 PM
11	If this option preserves the Montlake freestop, it is greatly preferred to option 1.	3/31/2015 11:27 AM
12	Keeps more service to Pinehurst, Victory Heights, Jackson Park, and Olympic Hills along 15th Ave NE	3/31/2015 10:36 AM
13	Easy, accessible service to downtown.	3/31/2015 9:31 AM
14	Faster service between Redmond and Seattle Children's Hospital via a transfer to frequent bus service at Husky Stadium (concepts for routes 65, 255, 542, and 545) □ Direct connection between downtown Kirkland, the University of Washington, Link light rail at the new University of Washington Station, University Village, and Seattle Children's Hospital (concept for Route 255)	3/31/2015 8:21 AM
15	Service on 19th is important to keep!	3/30/2015 9:34 PM
16	Access to buses within walking distance.	3/30/2015 6:10 PM
17	The Route 25 serves customers who cannot climb the hills to the route 49 in Montlake and Portage Bay. With the addition of the Link station at Husky Stadium the route 25 provides neighborhood access to this new amenity.	3/30/2015 2:43 PM
18	Generally, I have concern for any changes from Metro current service, UNLESS THERE IS AN INCREASE/IMPROVEMENT OF SERVICE (additional routes, frequency & buses). ANY PLAN THAT DELETES ROUTE 43 IS UNACCEPTABLE. ANY PLAN THAT REDUCES SERVICE TO ALL NEIGHBORHOODS, INCREASES WALK & WAIT TIME TO/FOR BUSES IS UNACCEPTABLE. Living in the west edge (7th to 8th Ave NE, NE 45th St to NE 47th St) of the U-District, using Light Rail is not really an option I will consider except for novelty from time to time or if going to SeaTac, which I never do. Both Alternatives appear to reduce service to my area of the U-District.	3/30/2015 2:19 PM
19	I like the frequency of buses in Alternative 1 so I prefer Alternative 1.	3/30/2015 11:38 AM
20	Please keep 43! Please don't cut back on time, if possible	3/30/2015 9:54 AM
21	Two-way route 74.	3/29/2015 8:58 PM
22	Not sure why service on 19th Ave E is listed as a N Seattle issue.	3/29/2015 5:36 PM
23	Um.. keeps service on 19th Ave E isn't really about the changes in N Seattle, is it? I think that option was misplaced here.	3/29/2015 5:13 PM
24	Keeps direct from Madison park to capital hill and downtown.	3/29/2015 5:05 PM
25	Keeps route 11 which provides direct service between Madison Park and downtown Seattle.	3/29/2015 4:43 PM
26	Continuation of loop in Olympic Hills neighborhood on route 73	3/29/2015 3:47 PM
27	Direct service to Group Health from Montlake. Direct service between Montlake and University Village.	3/29/2015 1:03 PM
28	For my use of the bus, there weren't any significant differences between what we currently have and alternative 2. So, it would pretty much be status quo.	3/29/2015 12:59 PM
29	north seattle	3/29/2015 11:26 AM
30	Are you aware that Roosevelt which is currently an arterial is about to be turned into a mostly bikes street? Will 15th Ave NE cease to be a major North / south street for buses. That will seriously impact people in the Ravenna area.	3/28/2015 7:36 PM
31	Not gutting local routes.	3/28/2015 9:49 AM
32	I haven't looked closely enough at Alternative 2 to comment specifically.	3/28/2015 7:28 AM
33	Same concerns as Alternative 1 apply where applicable	3/27/2015 5:16 PM
34	Keeps 545 service during non-peak hours.	3/27/2015 4:45 PM

35	N/A	3/27/2015 2:58 PM
36	Bus stops closer together. Important for our aging population, especially near medical centers such as Group Health.	3/27/2015 1:58 PM
37	I think we should be like Paris, lots of buses running constantly. Inexpensive. People will change their habits, especially if parking spaces are eliminated.	3/27/2015 1:52 PM
38	You need a link to allow people to go back and review what was said on the different Alternatives	3/27/2015 1:45 PM
39	I like this alternative better than 1 because it makes fewer painful changes but the changes to the 71 eliminate a lot of service to North View Ridge during the day.	3/27/2015 12:21 PM
40	unsure	3/27/2015 9:09 AM
41	Seems like it may maintain broader coverage, even if frequency is reduced (or is not improved).	3/27/2015 9:08 AM
42	buses use the same traffic lane as other vehicles and they take longer than single occupancy vehicles because the routes	3/27/2015 8:42 AM
43	doesn't include Bothell or Woodinville	3/27/2015 8:11 AM
44	not any issues with this plan, would just prefer alternative 1	3/27/2015 6:48 AM
45	Does not do enough, looks like a lot of missed opportunities.	3/27/2015 6:45 AM
46	Maintains the #48 entire route, which grants me connectivity to a number of neighborhoods I service.	3/26/2015 10:34 PM
47	Not much -- again, Alternative 2 requires more transfers and longer walks to get from my area downtown than the current Metro Transit service provides.	3/26/2015 7:53 PM
48	This plan does nothing for my neighborhood (Greenwood), or, if it does, it's not called out here. It is lame to me.	3/26/2015 6:46 PM
49	not sure	3/26/2015 4:45 PM
50	Maintains more geographical coverage.	3/26/2015 1:25 PM
51	I do not see Route 252 listed as it has nothing to do with North Seattle.	3/26/2015 9:53 AM
52	If the light rail service is so frequent, you can plan accordingly and take the one that will get you to a bus stop near the time the bus will arrive. It doesn't seem like waiting for a bus will be the problem.	3/26/2015 9:12 AM
53	Connection to the Roosevelt Link Rail, assuming that it is open.	3/26/2015 8:07 AM
54	not sure	3/26/2015 2:46 AM
55	I can live with the 30-minute intervals (I use One Bus Away, very helpful) if the connections with the Link Rail are good.	3/25/2015 9:10 PM
56	prefer Alt 1	3/25/2015 3:42 PM
57	again, not sure how it would improve coming from Woodinville	3/25/2015 2:22 PM
58	unsure	3/25/2015 1:40 PM
59	Maintains routes 71, 72, 73, 74	3/25/2015 10:46 AM
60	I guess having all-day service for the 373 would be nice, but I've been getting by fine for years with it's current level of service, so it seems unnecessary.	3/25/2015 9:15 AM
61	Keeps the 545 the way it is with a direct route from downtown Seattle.	3/25/2015 9:06 AM
62	Maintains more geographic coverage	3/25/2015 8:56 AM
63	I don't want to have to xfr to light rail. it will add to my already long commute time.	3/25/2015 7:52 AM
64	keeps direct and efficient service from the Eastside to downtown Seattle. this is a very popular route this is often overloaded.	3/25/2015 7:22 AM
65	Keeps off-peak service to downtown Seattle.	3/25/2015 6:39 AM
66	It doesn't mess with the already very effective express services to the eastside Kirkland/Kingsgate area.	3/24/2015 8:38 PM
67	I like no changes to 255, 252, and 257.	3/24/2015 5:46 PM

68	again, not sure how this impacts the east side	3/24/2015 5:05 PM
69	There would be more frequent off-peak access closer to my house. It might be easier than it is now for me to commute by transit to my workplace if I work off-peak hours. Disabled people in my neighborhood and many others would be more able to access transit, including my husband.	3/24/2015 4:27 PM
70	I like the present bus routes in the region encompassing Capitol Hill--Laurelhurst--Lake City-- Northgate--Green Lake--Fremont, but I want more of it, especially on the Route 25.	3/24/2015 3:43 PM
71	Keeping more routes so walking distance from various points in NE Seattle to a bus stop are not so far as with Alternative 1.	3/24/2015 1:16 PM
72	Sorry, but for my needs Alt 2 is slightly worse than the already-horrible alt 1 (in which I could have a one-seat ride from Wedgwood to downtown, via Fremont!). At least you would keep Rt 43, but otherwise I find little to recommend it over either Alt 1 or the very similar 2014 proposed service reductions for NE Seattle. You guys stole a lot from last year's plans, didn't you? You are jumping the gun by focusing on Stadium Station instead of waiting for the better restructure opportunities that will come later. Are these comments getting truncated???	3/24/2015 10:49 AM
73	Single fare on 255 from Kirkland to Downtown.	3/24/2015 10:01 AM
74	less frequent and what about parking areas for those that want to take rail. I lived in Denver area when the started their light rail and every stop had parking so people would actually be able to get to the station and find parking.	3/24/2015 9:36 AM
75	Route 48 needs more buses between UW and north Seattle--they do not come as frequently as listed on the bus schedules. It would be nice to have the 48x back, but include it more than 1 or 2x per day--it was too infrequent for it to be well utilized.	3/24/2015 8:09 AM
76	Keeps the Rt 71	3/23/2015 8:19 PM
77	Keeps all-day service from Kirkland to SLU.	3/23/2015 5:45 PM
78	Keeps zero-transfer service between Redmond and Downtown Seattle outside peak times	3/23/2015 1:36 PM
79	It keeps the current 64 and 65 routes intact.	3/23/2015 1:12 PM
80	Retention of the 252 and 257 routes.	3/23/2015 8:36 AM
81	Again, where is the conversation regarding the North East riders???????	3/23/2015 7:52 AM
82	Keeps regular service on ST 545	3/23/2015 7:49 AM
83	Keeps #26	3/23/2015 6:22 AM
84	My current routes are not affected	3/22/2015 5:29 PM
85	Keeps local 26 route	3/22/2015 4:50 PM
86	Doesn't cut off Wallingford from the rest of the city!!!	3/22/2015 4:18 PM
87	Reducing the frequency of the 43 would be better than Alternative 1 (eliminating it entirely), but would probably still lead to more crowded buses compared to now.	3/22/2015 12:00 PM
88	I like that in general, the bus lines are long, so you might not need to transfer very often.	3/22/2015 11:32 AM
89	Safer for me. I will not have to walk quite as far through dark streets at night, but this will still be a problem when the 11 and 12 stop going up Madison.	3/22/2015 11:21 AM
90	Keeps 43.	3/22/2015 9:40 AM
91	Increase Bus 76 to 30 minute full day service instead of increasing it at peak hours. Keep bus 71 on it's current route from Wedgewood through the U District and ending at the UW Link station.	3/21/2015 6:17 PM

92	Look, I don't really understand a lot of this stuff as presented, because you're surveying us about random data presented in descriptive form, instead of trying to show it visually, or giving information about travel times between various zones, or anything like that. It's not in a form humans can make sense of reliably. What I like is being able to get between arbitrary parts of the city reliably, and in a short enough time that it's realistically feasible to take the trip, and not having to choose between walking 20 minutes to catch the bus or up 15 stories of hill, and then having to get there 15 minutes early and still end up having to wait an hour. That's just...not usable, except to the extent that you're forced to make do with it for commutes, and then the variability and last-mile costs and having to show up early and so forth...it adds up to far longer trips than you're selling us on paper. So, I'm not really sure how to connect the survey talking about various points with what makes the most progress towards fixing that. But right now, if you use transit, the parts of the city that you can realistically just up and go to, from various points...it's not that good. What improves that, without just squirreling it away in last-mile trip time & effort for poorer neighborhoods?	3/20/2015 5:28 PM
93	Retains 255 bus from South Kirkland to Downtown Seattle.	3/20/2015 2:28 PM
94	Give us more express buses from Woodinville to Downtown Seattle that run more often during the day. Quit using the short buses at night which are so packed they can't even stop for additional riders on 520.	3/20/2015 1:25 PM
95	Please keep the 43 route - while the tunnel is nice, for those who live in the transit 'dead zone' where the 47 once served the 43 makes a better option for downtown transportation options.	3/20/2015 10:16 AM
96	It preserves a greater number of routes, more options, and less travel distance to reach transit.	3/20/2015 8:26 AM
97	If 72 is eliminated I am left without options.	3/19/2015 7:50 PM
98	Changes to 74 would be nice.	3/19/2015 4:55 PM
99	Keeping my current commute static and easy without a transfer required	3/19/2015 3:13 PM
100	While it isn't perfect, it retains the convenience, allowing passengers to get to a bus stop relatively quickly and easily. It would be hard to have to walk in the rain a great distance just to catch a bus.	3/19/2015 2:25 PM
101	Less transfers needed	3/19/2015 1:55 PM
102	Otherwise I don't like how route 72 was deleted or that 73 was moved.	3/19/2015 1:48 PM
103	Increased frequency of 545 rides.	3/19/2015 11:14 AM
104	Please DO NOT ELIMINATE bus service (routes 66/67) on 5th Ave NE. It's too hard to get to the Northgate Transit Center or to Roosevelt, and if you do get to a bus stop on Roosevelt it will take forever to get to the Northgate Transit Center. I've had four hip replacements and I can't walk as far as I'd need to in order to get to a bus stop on Roosevelt or the Northgate Transit Center. It's a really dumb idea to eliminate bus service on 5th Ave NE.	3/19/2015 10:01 AM
105	greater diversity of service of this alternative should be preserved, along with the greater frequency of Alt. 1.	3/19/2015 8:46 AM
106	I do not know the Alternative 2 concept in north Seattle	3/18/2015 10:14 PM
107	43 service reduced.	3/18/2015 8:54 PM
108	Lesser of two evils	3/18/2015 7:55 PM
109	Keeps services that are already useful for riders.	3/18/2015 3:31 PM
110	Maintains integrity of the service to the east side.	3/18/2015 2:43 PM
111	Less change	3/18/2015 2:34 PM
112	Maintaining the 304 route. Large ridership on this most direct way from Shoreline to downtown Seattle.	3/18/2015 2:22 PM
113	Maintains access between South Lake Union and Kingsgate (specifically route 252).	3/18/2015 2:00 PM
114	I don't know. I live in NW Seattle and Alternative 2 seems to apply more to NE Seattle, so needless to say, I find Alternative 1 much more attractive.	3/18/2015 1:42 PM
115	same as Alternative 1	3/18/2015 1:32 PM
116	I use 271 & 556 routes to go between UWMC and Issaquah, NOT north Seattle. I use 271 most because of frequency of buses. 556 route is faster but not available during complete commuting hours. Park & rides are full in Bellevue and Eastgate, making my commute very logistically challenging. I'm happy to walk, bike to make connections to light rail or bus. I just need better parking, more frequent direct routes similar to 556.	3/18/2015 1:21 PM

117	I assume this would help with traffic and encourage people to use light rail	3/18/2015 1:09 PM
118	This is more of a comment on one of the choices I picked: My dentist and doctor are still up in Shoreline, while I work in the U-District. Since the 373 doesn't run during the day, it usually takes me over an hour each way to get there with a transfer at Northgate. I would love to see the 373 run more often, although perhaps it's time to find a different dentist.	3/18/2015 12:24 PM
119	Keeps route 43	3/18/2015 12:22 PM
120	Seems to retain more "cross-town" routes without requiring bus changes.	3/18/2015 12:17 PM
121	Hopefully the 71 will continue to go downtown from Ravenna (along 65th St)	3/18/2015 12:10 PM
122	I see nothing that improves the East/West travel in and out of Ballard.	3/18/2015 12:07 PM
123	Walking time to bus stop stays the same.	3/18/2015 12:07 PM
124	Keeps route 71	3/18/2015 12:06 PM
125	This alternative makes more sense and offers more travel options.	3/18/2015 11:50 AM
126	The 49 doesn't change.	3/18/2015 11:49 AM
127	Shares the goods over a wider geographic area. This system has my vote.	3/18/2015 11:41 AM
128	More wait time for transit is a negative. It becomes unreliable for people's schedules.	3/18/2015 11:40 AM
129	Montlake/Portage Bay connection maintained.	3/18/2015 11:39 AM
130	Keeps routes 49 and 43 which are the only bus options for my area.	3/18/2015 11:31 AM
131	Maintains the 12, 43 and 48.	3/18/2015 11:31 AM
132	See comments in Alternative 1	3/18/2015 11:29 AM
133	It looks to be more like the service I have today which is working for me from Nathan Hale to UW Tower (catch a 64 to 65th Ave NE and then catch the 71). I walk up to the 64 at 15th and 65th in the afternoon and that works fine.	3/18/2015 11:25 AM
134	Geographic coverage for feeders.	3/18/2015 11:24 AM
135	alternative concepts are not clear	3/18/2015 11:21 AM
136	Keeps access to UWMC from the backside of Captiol Hill, makes it not necessary to back track (head west) to Transit Station to get to Medical Center from 19th or 23rd.	3/18/2015 11:16 AM
137	retention of the 73 to northgate	3/18/2015 11:12 AM
138	I'm familiar with this system, so I would be cool with it.	3/18/2015 11:03 AM
139	Specifically, keeps route 43 and service to 19th and E Thomas	3/18/2015 8:00 AM
140	I like that this route preserves service in the Pike/Pine corridor.	3/18/2015 12:16 AM
141	I could take the bus to Magnuson OLA instead of driving each day.	3/17/2015 7:10 PM
142	65 drop off from Wedgwood to University Link Station	3/17/2015 3:16 PM
143	isn't as radical of a change as Alternative 1	3/17/2015 2:23 PM
144	Keeps service on 545 during all hours.	3/17/2015 2:15 PM
145	The unchanged Route 26 is beneficial, though I prefer the overall increased frequency of Alternative 1.	3/17/2015 1:34 PM
146	The more choices available, the better.	3/17/2015 7:07 AM
147	Convenient to get from Capitol hill to redmond at all times, even during off peak hours.	3/17/2015 12:07 AM
148	Keeps 545 service	3/16/2015 10:55 PM
149	The same comments I wrote about Alternative 1 apply to Alternative 2	3/16/2015 9:54 PM

150	I think I prefer this alternative, EXCEPT that it doesn't appear that Route 71 will provide service as is currently does from 65th Ave NE all the way into the downtown and the bus tunnel (and back again). This is an extremely important current route option for me.	3/16/2015 5:12 PM
151	Keeps direct all-day and weekend service between Redmond and Capitol Hill (Route 545)	3/16/2015 4:59 PM
152	My choice to live where I do so I can commute to work by bike + bus is still a good choice. In other words, the changes in alternative 2 are trivial insofar as they affect me at all.	3/16/2015 4:44 PM
153	Keeps 545 route from Montlake to OTC and back, which I frequently take East from 9:30-11:30 AM, and West from 3:00-6:00 PM.	3/16/2015 4:23 PM
154	Route 545 is not restricted in times which would either increase congestion or force commuters onto a slower 542+Rail route.	3/16/2015 4:17 PM
155	Keeps route 11	3/16/2015 3:41 PM
156	No change in the 542 service. I like that it won't affect my favorite route!	3/16/2015 3:14 PM
157	It does not disturb my existing one bus direct-route commute trip to/from home and work.	3/16/2015 2:44 PM
158	No impact on 545	3/16/2015 2:00 PM
159	Not sure this would affect my route.	3/16/2015 1:53 PM
160	The changes are less extreme and jarring to passengers	3/16/2015 1:03 PM
161	I agree with maintaining the reach of our current system (even though I live within walking distance of the major transit hubs).	3/16/2015 12:49 PM
162	ST 545 Peak hour trips would start and end at the Overlake Transit Center to increase service frequency	3/16/2015 12:47 PM
163	A lighter touch sounds like it would leave fewer of the routes I take in jeopardy and require fewer transfers when going to new places.	3/16/2015 12:45 PM
164	Keeps service between downtown & Fremont / Wallingford	3/16/2015 12:39 PM
165	Hate that you are making my commute from Maple Leaf to Redmond take longer	3/16/2015 12:35 PM
166	I like the 545 stop on capitol hill, but if total transit time to OTC is reduced, then it can go away.	3/16/2015 12:27 PM
167	frequency of ST545	3/16/2015 12:16 PM
168	1. 545 is mostly unchanged. 2. 16 does not deviate from the 5 in Fremont.	3/16/2015 12:14 PM
169	New 545 routes terminating at Overlake Transit Center to allow for more frequent service downtown	3/16/2015 11:54 AM
170	No impact to the service hours for ST-545, which directly connects downtown Seattle and Capitol Hill to Overlake Transit Center with no transfers required.	3/16/2015 11:53 AM
171	Keeps 545 service to OTC.	3/16/2015 11:52 AM
172	545 service	3/16/2015 11:52 AM
173	1. Route 542 Westbound does not deviate into Overlake Transit Center.	3/16/2015 11:50 AM
174	More frequent service from Capitol Hill to Redmond on the 545 during peak hours.	3/16/2015 11:50 AM
175	I like that this plan maintains the status quo for the 545.	3/16/2015 11:46 AM
176	Why	3/16/2015 11:45 AM
177	slower pace of change - so we can learn as we go	3/16/2015 11:43 AM
178	More Reliable #48. More reliable #2.	3/16/2015 11:39 AM
179	Keep the ability of getting from Kirkland to Seattle without having to detour via UW.	3/16/2015 11:02 AM
180	I think you should run north/ south busses on 23rd, 19th and 15th as well as MLK Way, Lake Washington Blvd, Broadway, 5th, 1st and 2nd.	3/16/2015 8:46 AM
181	N/A	3/16/2015 7:16 AM
182	Keeps geographic coverage in south Wallingford by keeping the 26 running on Wallingford Ave.	3/15/2015 10:23 PM

183	I need direct transport from Pioneer square where I live directly to Redmond. Currently, the 545 route goes through ALL downtown Seattle and then to CAPITOL HILL, which adds 15min to my commute every day. Plus there is no Wi-Fi on the bus, which is terrible for my productivity.	3/15/2015 12:35 PM
184	I would much rather have a no-transfer ride to a greater number of destinations and have to wait for a bus than having to walk further to catch a bus and having to transfer to reach my destination.	3/15/2015 8:53 AM
185	The route 48 link between UW Link Station and Mt. Baker Station (along 23rd) serves a vital link between North Capitol Hill and access to the Light Rail. Currently, I take the 48 to Mt. Baker Transit Center to access the Light Rail (northbound or southbound). Once the Link Light Rail is complete, from Downtown, I envision taking the service all the way to UW then transferring southbound on the 43 or 48 and getting off on North Capitol Hill (Aloha). Alternatively, when I return from the Airport, I plan to get off at the Mt Baker Station, then catch the 48 northbound, as this will take less time, then all the way to UW and then south bound.	3/14/2015 3:52 PM
186	Same comments as alternative 1	3/14/2015 10:38 AM
187	Doesn't help me at all.	3/13/2015 6:09 PM
188	Keeps service from Whittier Heights to Fremont (Route 28)	3/13/2015 5:14 PM
189	To keep the older routes alive as possible.	3/13/2015 4:52 PM
190	N/A	3/13/2015 3:52 PM
191	both of these alternatives reduce service to my neighborhood (15th Ave NE & NE 73rd). this alternative seems slightly better for my neighborhood in that I can go between link rail station at husky stadium and closest possible bus stop on just one bus	3/13/2015 3:31 PM
192	Woodinville Park and Ride has space to park if you delete route from Bothell UW and Woodinville PR, there are no space to part on Bothell UW.	3/13/2015 1:26 PM
193	Please keep frequent service on route 43, especially during peak times. 43 is our preferred route to downtown Seattle from Montlake, both for commute and for weekend/evening travel.	3/13/2015 12:56 PM
194	I prefer Alternative #1	3/13/2015 7:58 AM
195	Keeps 25 service- provides essential neighborhood access to UW link station from both ends.	3/13/2015 7:27 AM
196	Preserves bus 25. Alternative 2 is the only logical plan to get transit users from neighborhoods to the light rail and express routes.	3/13/2015 6:54 AM
197	I know what I'm getting - no changes to my route.	3/12/2015 5:16 PM
198	I really think this makes more sense until the 65th Street/Roosevelt Station opens.	3/12/2015 4:33 PM
199	That it keeps route 11.	3/12/2015 4:08 PM
200	Retains 43 route	3/12/2015 3:52 PM
201	Right now, there is no connection between Montlake/Capitol Hill to University Village - AND THERE SHOULD BE.	3/12/2015 3:27 PM
202	Without the 15-minute all-day service, Alternative 2 is dead on arrival.	3/12/2015 2:35 PM
203	Keep the 48 route and 44route	3/12/2015 2:14 PM
204	No changes to the eastside - seattle transit options (routes 255, 252, 257, 311)	3/12/2015 1:34 PM
205	Keeps throughroute service on buses passing through the UW.	3/12/2015 1:10 PM
206	indifferent	3/12/2015 8:28 AM
207	no great feelings on this plan, though it does keep the routes I take intact.	3/11/2015 7:32 PM
208	Keeps routes 31/32 on Stone Way and leaves 26/26X as is.	3/11/2015 2:54 PM
209	Maintains route 16 as a viable option for commuting from Wallingford to downtown. If the 16 reroutes to follow the route 26 path south of N 45th St., it will take far too long to get from Wallingford to downtown on the 16.	3/11/2015 12:46 PM
210	slightly better cross town connections- transit is not all about going downtown!	3/11/2015 11:19 AM
211	Maintains the 48.	3/11/2015 10:44 AM

212	no clue what is going to happen to specific routes?	3/10/2015 9:50 PM
213	More frequent service on Route 74	3/10/2015 9:27 PM
214	Keeps a relatively fast and convenient route to get downtown from central Wallingford via Route 16.	3/10/2015 6:10 PM
215	Keeps 545 service from the ID all day	3/10/2015 4:31 PM
216	keeps service to Madison park	3/10/2015 3:35 PM
217	maintains direct service on Wallingford Ave N which we use most frequently, despite the 30 min schedule.	3/10/2015 2:31 PM
218	Covers more areas for transit riders	3/10/2015 2:03 PM
219	direct service from wallingford to south lake union? direct service from wallingford to fremont	3/10/2015 1:44 PM
220	it keeps the 11 and 12 busses.	3/10/2015 12:47 PM
221	Faster service from Wallingford to Downtown Seattle (16)	3/10/2015 11:46 AM
222	I guess it's an improvement, but doesn't do nearly enough.	3/10/2015 9:57 AM
223	It keeps existing Route 11 service to Madison Park.	3/10/2015 9:48 AM
224	It doesn't say above, but my assumption is that route 76 would stay the same.	3/10/2015 9:46 AM
225	I would prefer to have both the 26 and 28 continue to serve the Dexter corridor. Timeliness and overcrowding is currently an issue. Peak buses are always running late and are overcrowded, but between the two routes, the Dexter corridor has better coverage under Alternative 2 than Alternative 1.	3/9/2015 10:19 PM
226	It retains one-bus service to Madison Park.	3/9/2015 9:56 PM
227	Can access 71 from View Ridge.	3/9/2015 8:28 PM
228	Madison's #11 is again not mentioned, although you specifically mention the neighborhood as an affected area.	3/9/2015 8:15 PM
229	Not deleting the 11!	3/9/2015 5:22 PM
230	I like that the #25 bus would not be eliminated.	3/9/2015 4:24 PM
231	This choice keeps the #11 which makes me like it better than option 2.	3/9/2015 3:14 PM
232	Keep both bus lines running at their current schedules, or how is anyone in Montlake/Portage Bay, the closest actual communities to the light rail station, going to get any benefit from it without increased access to the station? Bus service needs to minimally stay the same to make the light rail stop gain it's full potential, otherwise it will be a squandered opportunity for our community to want to take light rail anywhere.	3/9/2015 3:01 PM
233	no buses on 25th	3/9/2015 2:52 PM
234	Fewer gaps in service area, meaning more people will have the option to use transit.	3/9/2015 2:17 PM
235	My main concern is keeping Route 11 the way it is!	3/9/2015 2:07 PM
236	I hate transferring and Alternative 2 means fewer buses at my local stops, but more likely to ride the same one all the way from home to work and vice versa.	3/9/2015 12:52 PM
237	Two-way peak service on 74 to NOAA campus at Sand Point.	3/9/2015 12:04 PM
238	Please keep routes 10 & 11 going from Cap Hill to Downtown during commuting hours. I use those to connect to Route 77. The new light rail station on Cap Hill is too far from my workplace at 17th & Olive. Thanks!	3/9/2015 11:52 AM
239	Expanded hours until midnight for 372X (I leave work at 9p or 10:45p, from Metropolitan Park office complexes @ Howell and Olive St.)	3/9/2015 10:36 AM
240	You have eliminated my ability to use the bus. I live on NE 80th. Distances are too far for me to walk to catch a bus. Congratulations -- I'll be forced to go to work in my car and pay over an hour's worth of wages to pay for parking.	3/9/2015 10:08 AM
241	I believe it is important to keep service as close to people as possible, less travel to bus stops should increase ridership.	3/9/2015 9:58 AM
242	I dont think it effects the south end. I guess we are the Red Head Step-child of Seattle.	3/9/2015 9:06 AM

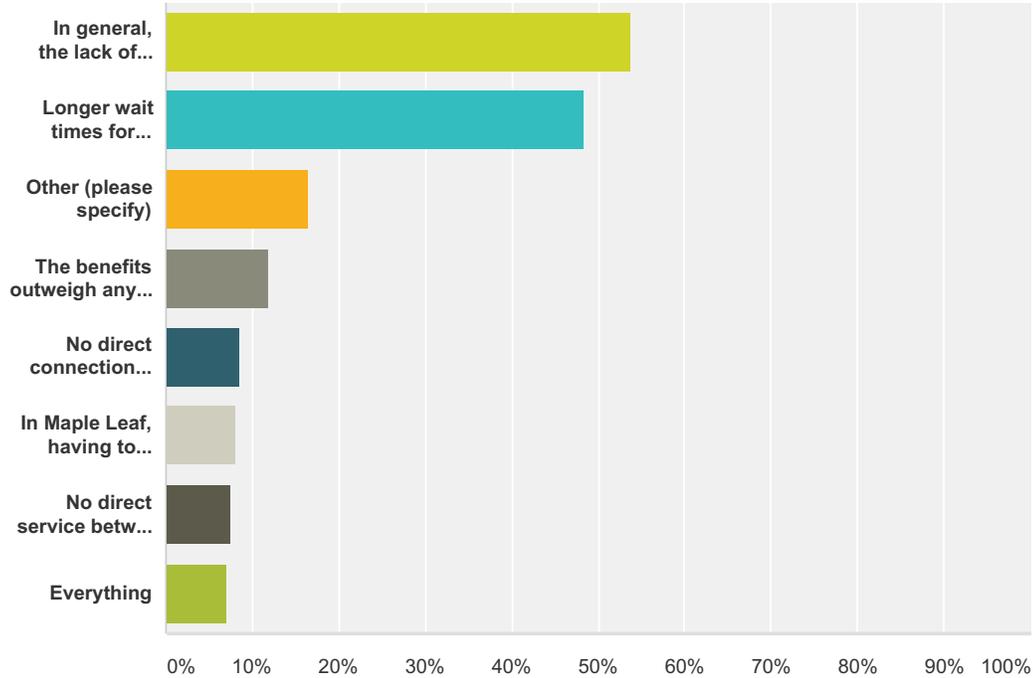

243	I am not sure what to select but basically I want a bus that will take me from 65th and 35th (#64/#76) to Stewart & Denny. Currently the #64 shoots pass this intersection (it used to be a stop) and those of us who work at Denny or north of Denny have to walk 5+ blocks back we just came. The #76 required the same amount of walking. but if I understand the plan correctly the convention center will no longer be a stop when the light rail Northgate route is open. I don't want to transfer between buses/ rail. Also I would love to get to Bellevus/overlake - a direct bus would be helpful	3/9/2015 8:35 AM
244	2-directional peak service on Route 74X to serve those who commute to NOAA	3/9/2015 2:41 AM
245	Please see my comments regarding airport access in Alternative 1, as they apply here.	3/8/2015 9:23 PM
246	Better than not changing the route network at all. But I like Alternative 1 better.	3/8/2015 9:23 PM
247	I like that it gives people more time to adjust to what the new train station will mean to their commute. It seems that a sweeping overhaul of the north end system is being proposed in disguise - the new train station is not justification enough to make such sweeping changes, especially when some of these changes seem to mirror the immensely unpopular changes/service reductions we just voted against. Alternative #1 is just too much. The ways people will adapt to these changes are not, in my mind, predictable. A more incremental, tactical approach seems wiser.	3/8/2015 6:25 PM
248	Less disruption to current routes involving SLU area- except 66	3/8/2015 3:00 PM
249	Alternative 2 would technically not affect my daily travels in any way. Because I have no information regarding budgeting, I cannot know this for sure, but just given the decreased amount of changes being made, this seems to be a cheaper option financially. That's why I would want to see budgeting information before making any choices or suggestions (as I stated previously in question 8).	3/8/2015 1:12 PM
250	most everything.	3/8/2015 9:08 AM
251	Keep the #16 from Wallingford to Northgate!!! Keep the #73 from U. Dist to 145th St. People live north of 75th st!	3/7/2015 2:06 PM
252	I think the main benefit for me for Alternative 2 is that there is less distance between bus routes. Also it serves more areas of the city.	3/7/2015 1:34 PM
253	Service to the light rail at montlake !	3/7/2015 1:22 PM
254	Provide frequent service for riders in the White Center/Highland Park areas who take Route 60. Buses are way too crowded during peak hours and there are many elderly and disabled riders who struggle to get a seat on the bus.	3/7/2015 12:10 PM
255	HUGE reason is that it "keeps service on 19th Ave E"	3/7/2015 11:46 AM
256	Ok, some things are nice, but it looks like the status quo, which is a jumble of often not that useful routes, and a relict of when Seattle was a different, smaller city. It'd be crazy to do so little to improve the network when link opens up, and changes the shape of the transit network in the city.	3/7/2015 11:17 AM
257	I like that it doesn't cut major bus routes.	3/7/2015 10:08 AM
258	What was alternative two? You really should have put the details on this page. I don't know how you expect people to remember them. Metro needs to provide frequent, reliable service from all northeast Seattle neighborhood centers to the UW stadium station. At rush hour I should be able to walk 10 to 15 minutes to a rapid bus transit center in Roosevelt, and catch a bus within the next 5-7 minutes maximum that delivers me to the stadium station within the next 10 to 15 minutes maximum. Maybe for the next 5 years metro should just have rapid transit hubs at each of the neighborhoods where there light rail stations are going to be built. You can have buses come every 5-7 minutes going between light rail stations. This is what other cities do when their train stations are closed for repairs - they bus people between them.	3/7/2015 8:53 AM
259	I question the item of "keeps service to Montlake". There is currently only very limited direct transit to Montlake during the week with the 243 from my neighborhood. That is not meaningful for use of the light rail at Husky Stadium.	3/7/2015 8:46 AM
260	again hard to imagine exactly what this means without maps of route changes	3/7/2015 6:40 AM
261	again, I don;t travel to those neighborhoods	3/7/2015 3:48 AM
262	Keeps 71 running from wedgewood with stop at 15th	3/7/2015 1:06 AM
263	Maintains the 66x and 25 routes from N Cap Hill to Pioneer Square -- my work commute.	3/7/2015 12:44 AM
264	Maintaining routes that provide service within a few blocks of rider origins and destinations.	3/6/2015 11:29 PM

265	Use transit to get me to the nearest light rail station as quickly as possible.	3/6/2015 10:11 PM
266	keeps 48 as one direct route between Ravenna/Green Lake/ and Mt Baker/Central/Capitol hill	3/6/2015 9:03 PM
267	This option is improvement over current conditions, but it does not provide enough frequency improvements for routes feeding Link stations.	3/6/2015 8:32 PM
268	I don't use these that much.	3/6/2015 8:12 PM
269	Exact same comments as Alt 1.	3/6/2015 8:10 PM
270	It maintains high service to southern Fremont.	3/6/2015 8:04 PM
271	I think I can still get a bus from downtown up Madison to B'way. But much of this plan, like alternative 1, ignores Ballard and Capitol Hill.	3/6/2015 6:55 PM
272	Keeps route 71 as is.	3/6/2015 6:19 PM
273	Well, I need route #11, so I like keeping this route active. We sure have a lot of elderly folks here, as well as high school and college students, and young working people.	3/6/2015 5:45 PM
274	Again, you omitted 71 and 76 from the list...see Alt. 1.	3/6/2015 5:37 PM
275	better than alt. 1, but still lousy (see below)	3/6/2015 5:29 PM
276	Keeps the 542 in its current form	3/6/2015 5:28 PM
277	Maintaining access to transit is a high priority for people who are unwilling or unable to easily get to a major transit hub. Route 11 stays?	3/6/2015 5:19 PM
278	the health of the bus system depends on the size of the region covered and the breadth of hours, for me. Not the frequency of buses during mon-fri daytime work commuter hours. Once every 30-45 minutes is fine if the buses are on time.	3/6/2015 5:12 PM
279	It adds more travel options rather than removing them.	3/6/2015 5:11 PM
280	The 372X route also is a great way for UW Bothell students to be able to get to/from UW Seattle. It is also a great connection with Community Transit service to the north.	3/6/2015 5:09 PM
281	think I likely like Alternative 1 better, but I live near the arterials.	3/6/2015 5:08 PM
282	I may not understand, but hoping that route 75 links w/university of w. light rail station	3/6/2015 4:12 PM
283	See above comments	3/6/2015 4:10 PM
284	Keeps the existing 64X route to and from downtown.	3/6/2015 4:07 PM
285	Retains the route 11	3/6/2015 4:03 PM
286	Better distributed network (not "starving" areas previously fed by bus lines).	3/6/2015 4:00 PM
287	Service on 19th to Capitol Hill is particular helpful given the Miller Community Center and 3 schools. Also, the city has allowed new developments on the corridor with a severe deficit of new parking, which is based on the assumption that people can ride the bus.	3/6/2015 3:56 PM
288	I am intrigued by the proposed 68 route, but I really don't know if I will love it or hate it, until I try it.	3/6/2015 3:51 PM
289	Northgate to Kirkland Direct Service like Bellevue Transit Center	3/6/2015 3:27 PM
290	In general, I prefer this alternative.	3/6/2015 3:21 PM
291	If you are going to take away #72, you need to add more service to #372, including weekends.	3/6/2015 3:16 PM
292	I don't like not being able to ride on one bus north of 92 around to the transit center, This is especially difficult for seniors and others who are mobility impaired. This route as is provides service to several medical facilities, banks, pedestrian entrances to Northgate Mall. Taking that away is inconsiderate and unnecessary. This applies to both alternatives. "More direct service" does not mean better service!	3/6/2015 3:09 PM
293	The Super 73 idea is decent.	3/6/2015 3:07 PM

294	Has direct service to NOAA. Being able to take a bus from NOAA to the University Link Light Rail Station and then the Light Rail to downtown is very appealing to me. Also, coworkers have told me they would use the transit system if it didn't take so long to get to and from downtown with the main bottleneck being the University Way/Campus Parkway section.	3/6/2015 2:56 PM
295	Keeps 520 service as is.	3/6/2015 2:49 PM
296	it's EXTREMELY important to me that there are still the current linkages between south seattle with the 8, as well as service on 19th ave e (which serves Community Doctor, which should be a priority for Metro). The 43 is a LIFELINE to the UD, Ballard, Fremont, and massively improves bus crowding commuting from Downtown to Capitol Hill.	3/6/2015 2:47 PM
297	26/26X/28/28X consolidation	3/6/2015 2:44 PM
298	keeps current services with modifications. Changes can be addressed over time as service on light rail is analyzed for effectiveness and traffic	3/6/2015 2:43 PM
299	At LEAST this maintains SOME semblance of acceptable service between Northgate and UW Medical Center. But again, there are THOUSANDS of people (MANY elderly and infirm)who live on or north of NE Northgate Way, so taking their local service away and terminating it at the Northgate TC is NOT acceptable.	3/6/2015 12:27 PM
300	It's hard to find things to like in this proposal, relative to Alternative 1. While doing the close-to-nothing as proposed is inherently unpleasant relative to the status quo, it's hard to endorse that as a sound decision.	3/6/2015 11:47 AM
301	I'm ambivalent	3/6/2015 10:59 AM
302	I keep my 16 link to Greenlake and Wallingford	3/6/2015 10:32 AM
303	I love, love, love the concept of expanding the 373 to all-day service! Please do this! And keep it on 15th Ave.	3/6/2015 9:17 AM
304	Keeps 31/32 service on Stone Way.	3/6/2015 9:09 AM
305	There is nothing to indicate that route # 372 will connect to Light Rail at Husky Stadium meaning that with the cancellation of # 72 I will not have a direct bus to downtown and that is bull shit.	3/5/2015 10:24 PM

Q12 What concerns you the most about Alternative 2 in north Seattle? (choose up to five)

Answered: 2,139 Skipped: 4,420

Answer Choices	Responses
In general, the lack of frequent service in this network concept	53.81% 1,151
Longer wait times for people connecting between very frequent light rail service and bus service that runs every 30 minutes (concepts for routes 25, 65, 68, and 75)	48.34% 1,034
Other (please specify)	16.50% 353
The benefits outweigh any concerns I might have	11.97% 256
No direct connection between Lake City and Ravenna (concept for Route 72)	8.46% 181
In Maple Leaf, having to travel farther to access all-day service on Roosevelt Way NE (concept for routes 66X, 67, and 73)	8.18% 175
No direct service between College Way N/Meridian Avenue N and Green Lake and Wallingford (concept for Route 16).	7.43% 159
Everything	7.06% 151
Total Respondents: 2,139	

#	Other (please specify)	Date
---	------------------------	------

1	while i like keeping the routes as they are, i agree more buses and more frequent pick ups/drop offs would be nice; every 30min is too long and if the driver doesn't stop then you either have to wait and hr or take an alternative route; while those alternative routes run more frequently, then they may more stops along the way- either way, now it will take you an hr to get home b/c the driver didn't stop or you have to take a more frequent, slower stop; the direct routes should have more frequent runnings and maybe the slower routes that stop more often should be more infrequent. the 234 and 244 make those kinds of stops but are only every 30. the 311 is popular and direct and should be more frequent	4/2/2015 7:35 AM
2	Removes frequent bus service from NE15th St. at NE 65th St.	4/1/2015 2:54 PM
3	Parking downtown becomes more difficult and expensive and traffic gets worse and worse. With the light rail system going in at Husky Stadium transit becomes a very viable option of getting to work everyday. By eliminating the bus route through Laurelhurst you require people in our neighborhood to either drive to Husky Stadium and pay to park in the large lot there (cost of daily parking plus light rail becomes excessive) or try to find street parking near Children's Hospital to catch the bus there to get to Husky Stadium. Walking uphill a mile (from Webster Point or other) to the bus stop at Children's Hospital is physically and time wise prohibitive for many.	4/1/2015 12:05 PM
4	not ambitious enough; panders too much. I want a frequent all day grid more than I want infrequent service to more places. If it's not frequent, after a half hour trip to UW, I'm almost never going to use it. I'm poor, and Lift is a great improvement, but I keep close tabs on my 2 hour transfer window (ahem, your apps and websites should do this) so I can minimize the number of times I pay two fares. Also, I'd think the restructure for U Link should set the stage for the 2021 restructure for Northgate Link. This alternative seems to set the bar for that too low. Metro needs to wring every savings and advantage possible out of being able to reallocate existing service hours.	4/1/2015 1:35 AM
5	As with Alt 1 - there is a reduction of service to the Pinehurst area... again, it's like the neighborhood doesn't exist int he planning process. The routes I most use are the 73 and 373 to commute to work at the UW. In both plans, I see my commute times increasing and being less efficient overall, leading me to drive, rather than to take the bus or light rail (and if I have to drive to get to the light rail station at Northgate, heck, I might as well drive all the way to UW because the traffic in the Northgate area is worse near the highway and mall than shooting straight down 15th!) Why are there only these two (poorly designed) alternatives offered as an either/or? Neither is really good...	3/31/2015 10:37 PM
6	There are poor transfer options to/from the UW Link station to nearby routes, such as ones connecting at Montlake, west UW campus, and UW hospital. Having to take an extra bus or having to walk 10 minutes from your bus stop to the UW Link station are not good options.	3/31/2015 10:34 PM
7	No direct route to downtown	3/31/2015 7:08 PM
8	no improved connections to Seattle Children's Hospital and out of Haller Lake.	3/31/2015 6:57 PM
9	I still don't see a route that goes from North Capital hill to University Village through montlake	3/31/2015 6:28 PM
10	Continued rotten service between Pinehurst/Victory Heights and the University of Washington (73, 72, 41, 373)	3/31/2015 5:40 PM
11	The lack of increased efficiency in the 48 route. Leaving it alone as is right now should not be an option, because it is not working well for the majority of riders, who are UW students, + employees, and high school students.	3/31/2015 4:11 PM
12	Loss of current Rt. 71 would represent 50% of the all-day routes serving my neighborhood. With no increased frequency on Rt. 65, that would be a significant loss for Wedgwood even though Rt. 71 does not go farther north than NE 85th Street.	3/31/2015 3:34 PM
13	I would be really sad to have this great - very frequent access to UW via light rail only to wait 30 minutes for the 65 or 75 to get to Seattle Children's - being able to take light rail and then hopping a quick bus ride to SCH vastly improves my commute and compels me to take transit exclusively. I think people living in the south will fee that way as well - to be able to get on light rail on the south side to UW will vastly improve commute time - but there needs to be a bus that takes you to SCH!!!	3/31/2015 3:31 PM
14	Route 68 in this proposal is a huge mess. It is the opposite of just about every transit planning best practice ever created.	3/31/2015 3:29 PM
15	Less frequency for route 43	3/31/2015 12:43 PM
16	Having to travel further to access bus service. Having to navigate steep hills to access bus service. Entire large neighborhoods have no transit service at all. The increased time it will take to get anywhere. It appears that my commute will increase by 70 minutes each day.	3/31/2015 12:08 PM
17	It doesn't help me.	3/31/2015 11:59 AM
18	No more 242	3/31/2015 11:23 AM

19	The rail doesn't benefit those living in NW Seattle until more is added. So why alter bus on the W side of I5, or that aren't destined for downtown Seattle?	3/31/2015 11:18 AM
20	Take away route 43 on 24th Ave. E. south of the light rail station at Husky Stadium. We use the 43 to go to Capitol Hill and Downtown Seattle on a regular basis. For us to have to travel a mile north and navigate across the future 520 exchange, to get to the light rail to then take it south, instead of being able to jump on the 43 right in front of our house is ridiculous.	3/31/2015 11:13 AM
21	This will be a system that will not encourage as many daily commuters to leave their vehicles behind and ride public transportation.	3/31/2015 10:57 AM
22	Not focusing on connections to the Light Rail	3/31/2015 10:36 AM
23	I simply think that Alternative 1 is a better option.	3/31/2015 10:23 AM
24	I do not know enough about the overall plan to identify concerns beyond how they impact my neighborhood. I do not live in the north end. I live on 24th Ave. E. between E. Lee and E. Galer. Eliminating #43 will eliminate accessible service to Downtown Seattle and the U District.	3/31/2015 9:31 AM
25	Need routes that run through evenings and night as well as weekends (and weekend evenings and nights).	3/30/2015 10:08 PM
26	Not sure as I don't live in the North End	3/30/2015 9:34 PM
27	Same as in option 1: My regular commute is from Lake City to Overlake business park. I usually take 522-->545 (non rush hours) + 12 minute walk and back on 242-->64X. With the elimination of non-rush hours 545, and 242, my remaining option is a significantly longer commute, changing at the UW + additional walk on the return, or driving (at least to Ravenna P&R)	3/30/2015 8:47 PM
28	I think we need to focus our transit services on efficiently moving the most people in a timely manner instead of trying to serve all people.	3/30/2015 8:08 PM
29	Nothing. It allows me access to bus stops that would be eliminated in Alt. 1.	3/30/2015 6:28 PM
30	Everything that concerns me about Alternative A: loss of 545 mid-day service, elimination of 242 and night owl service of 72.	3/30/2015 5:11 PM
31	It rains in Seattle. It;s cold in the winter. It gets dark early in the winter. Everyone knows that. Frequency of service is paramount, or who will use this?	3/30/2015 5:11 PM
32	The configuration in the U-Dist remains very complicated by keeping service along so many different streets.	3/30/2015 3:26 PM
33	Generally, I have concern for any changes from Metro current service, UNLESS THERE IS AN INCREASE/IMPROVEMENT OF SERVICE (additional routes, frequency & buses). ANY PLAN THAT DELETES ROUTE 43 IS UNACCEPTABLE. ANY PLAN THAT REDUCES SERVICE TO ALL NEIGHBORHOODS, INCREASES WALK & WAIT TIME TO/FOR BUSES IS UNACCEPTABLE. Living in the west edge (7th to 8th Ave NE, NE 45th St to NE 47th St) of the U-District, using Light Rail is not really an option I will consider except for novelty from time to time or if going to SeaTac, which I never do. Both Alternatives appear to reduce service to my area of the U-District.	3/30/2015 2:19 PM
34	My needs are not met, would not use the metro system.	3/30/2015 11:41 AM
35	I like splitting the 48 route in alternative 1. I think the 45 will be a more reliable bus.	3/30/2015 10:00 AM
36	no south county connections - bus to Renton, Kent areas would be ideal for those with longer commutes	3/30/2015 9:57 AM
37	I'd rather see buses used more frequently to meet Link light rail, then keep routes we currently have that duplicate it (although, I can understand use of duplicate routes during peak hours, if needed).	3/30/2015 9:56 AM
38	Need to add direct bus service from north seattle and eastside to SLU without having to go downtown first.	3/30/2015 9:42 AM
39	does not use Link enough; I-5 is very congested	3/30/2015 7:15 AM
40	I would like to see direct service from Eastlake to Capitol Hill and more service to downtown from eastlake	3/30/2015 3:14 AM
41	Any impact to Montlake / North Capitol Hill service.	3/30/2015 12:23 AM
42	Nothing concerns me, as I don't live in any of the areas cited.	3/29/2015 9:22 PM
43	Lack of direct and frequent service to Seattle Children's Hospital	3/29/2015 7:43 PM
44	No weekend service for route 62; therefore no convenient way to get to and from downtown from Children's Hospital on weekends. No direct service between Mary Gates/University Village and the AVE at NE 45th.	3/29/2015 5:51 PM

45	Again, I'm in the Phinney Ridge/Woodland Park neighborhood and can't see how this will benefit or not for us. I'm happy for my friends and family members who will be able to use the lightrail from DT to U-district but otherwise, not sure. All in all, I'm happy there is progress in improving rapid transit in the city. Its time that we join the other metropolitan areas that have made this work!	3/29/2015 2:59 PM
46	Frequency is key, especially if there are connections.	3/29/2015 11:34 AM
47	north seattle	3/29/2015 11:26 AM
48	I'm concerned that the 373 week day and 73 weekend services won't start early enough for me to get to work on time. Furthermore, the nearest bus stop (depending on the route) will be moved 0.7 miles away.	3/28/2015 2:35 PM
49	Doesn't address the most pressing issues of access, timeliness, AND crowding at the same time.	3/28/2015 9:49 AM
50	I need frequent service between Fremont and Ballard (extending to Shilshole Marina), Fremont and Northgate, Fremont and University District, and Fremont and Downtown Seattle. Also frequent service between University District and Downtown Bellevue.	3/28/2015 2:31 AM
51	same as other concept: poorer service to wedgewood -no direct link to u district except 65 which is slow -no direct link to downtown	3/28/2015 1:35 AM
52	Lack of direct route to UW Link Station from NE Seattle. Only proposed route 62 from Laurelhurst goes directly past UW Link. That's a limited # of people (mostly wealthy) who get direct service to the station.	3/27/2015 9:08 PM
53	No improvement in service to or from Magnolia, especially on Sundays	3/27/2015 3:38 PM
54	N/A	3/27/2015 2:58 PM
55	frequency	3/27/2015 2:45 PM
56	It looks as if this plan is carrying out the cuts that were proposed last year because of lack of funding - specifically changes to routes 71, 72, 73. Proposition 1 was supposed to provide funding to avoid those cuts. I don't see any reason why they should be cut again just because of the stadium light rail station - I can't see that they have anything to do with the stadium station.	3/27/2015 2:16 PM
57	I think we should be like Paris, lots of buses running constantly. Inexpensive. People will change their habits, especially if parking spaces are eliminated.	3/27/2015 1:52 PM
58	Omg you're planning on getting rid of the connection on 19th Ave E on Capitol Hill? How will I get anywhere? What the what.	3/27/2015 1:33 PM
59	The Laurelhurst community, which I am a member of, tends to only think of what is better for them and fails to acknowledge what is better for the city as a whole.	3/27/2015 1:30 PM
60	Less bus service to Light Link at the University of Washington than Alternative 1. Too many buses still going on I-5 to Downtown Seattle.	3/27/2015 12:46 PM
61	The 71 re-route and lack of daytime service to View Ridge. No daytime service for the 74 OR 30.	3/27/2015 12:21 PM
62	I would scrap the concept all together, and redesign the light rail as a "spine" of the system, and use the buses as the "ribs" or branches off of the spine. I would set up larger transfer stations at each stop to facilitate transferring from one route to another. Think of the transit system of Mexico City, where the trains are the mass transit, and buses get people from the train to the farther outlying areas. It is highly efficient and very convenient.	3/27/2015 12:02 PM
63	Ballard isn't even mentioned. Public transportation from ballard sucks right now. Something has to change.	3/27/2015 11:17 AM
64	If the wait is 20-30minutes to get a bus from light rail at UW to Seattle Children's, most staff will not choose to use transit.	3/27/2015 11:09 AM
65	I live in Montlake and take the 43 downtown and to stops in capital hill. This would be bad for me and for my 79 year old husband who takes the bus home every day between the University and Boyer. Changing buses would be extremely inconvenient as would a longer wait. Connecting to rapid transit in the u district would involve a long walk or a long wait to get there. WE have lived in Montlake for over 40 years and depend on the 43.	3/27/2015 10:09 AM
66	I hope you will create a means for boarding - perhaps "lanes" ala Disneyland rather than everyone crowd to get on the bus and the older and feeble get pushed out of the way by the rude, uncouth who don't know how/refuse to line up and take a turn.	3/27/2015 10:08 AM
67	unsure	3/27/2015 9:09 AM
68	Parking	3/27/2015 7:34 AM

69	decreased/no direct access to Seattle Children's Hospital	3/27/2015 7:27 AM
70	I'd prefer alternative one	3/27/2015 6:48 AM
71	Lack of connection between Ravenna/Bryant and new University station	3/27/2015 6:46 AM
72	Missed opportunities to make real improvements	3/27/2015 6:45 AM
73	Still a need to increase the frequency of "the early 70's" during business hours (#71, 72, 73)	3/26/2015 10:34 PM
74	Less efficiency. No improvement in Aurora/Fremont service to downtown.	3/26/2015 10:18 PM
75	No direct access near Seattle Children's.	3/26/2015 9:26 PM
76	Alternative 2 retains the 71 but requires 2 transfers to get downtown to the bus tunnel via the 73	3/26/2015 7:53 PM
77	No improvement for my commute--West Seattle to Seattle Children's Hospital	3/26/2015 4:48 PM
78	Longer wait times will definitely decrease ridership. We need to figure out ways to keep frequent service to regions even if it means some level of local access may require some walking or other transportation. Better yet, enhance funding to keep frequent service everywhere!	3/26/2015 4:38 PM
79	I am a pretty mobile person and a bad planner, so in general I prefer to walk farther and wait less time for the bus. So if Alternative 1 leads to more frequent service, I think that's the one I'd like.	3/26/2015 3:30 PM
80	Removal of 242, this is a needed direct route between north Seattle and Microsoft. And substituting it with the 542 doesn't work because it only goes as far as Greenlake P&R, and transferring from the 555 is not feasible because it comes so infrequently and is already often at capacity.	3/26/2015 9:50 AM
81	See comments for Alternative 1.	3/26/2015 8:32 AM
82	The shortening of the 71 route, which I use to go to UW campus and downtown, with no mention whether the Roosevelt Link Rail station will be open.	3/26/2015 8:07 AM
83	Does not provide a direct route from the Eastside to Seattle Children's Hospital	3/25/2015 6:33 PM
84	Loss of service on 80th street.	3/25/2015 5:28 PM
85	I use the 71 every single day to get to downtown or the U district. Current levels of service are far too infrequent and changing the route to only run along 65th would make this bus almost completely useless.	3/25/2015 4:22 PM
86	Why are you eliminating all on-campus stops at UW?	3/25/2015 3:16 PM
87	Again, the elimination of a direct route from Maple Leaf to Wedgwood.	3/25/2015 2:33 PM
88	doesn't address getting to Bellevue from Bryant/Seattle Children's	3/25/2015 1:44 PM
89	unsure	3/25/2015 1:40 PM
90	No direct transportation from NE 40th and 520 to Seattle Children's!	3/25/2015 1:24 PM
91	no direct line from UW hospital station to SCH	3/25/2015 12:31 PM
92	I don't see anything on the "concerns" list that mentions the 373... I guess that's good?	3/25/2015 9:15 AM
93	I don't want to have to xfr to light rail. it will add to my already long commute time.	3/25/2015 7:52 AM
94	Not applicable to my travel.	3/25/2015 6:39 AM
95	Failing to leverage the Light Rail as a primary people mover to downtown	3/25/2015 12:26 AM
96	Is 62 long enough route to be productive and sustainable?	3/24/2015 6:28 PM
97	not sure how this impacts the east side	3/24/2015 5:05 PM
98	You probably can't correlate individual responses between Alts 1 and 2, but my concerns about 2 are similar to those for alt 1 - You create a new large doughnut hole of no all-day service (the largest hole on your map, in an area currently WITH all-day service) in the Wedgwood-View Ridge neighborhoods.	3/24/2015 10:49 AM
99	see previous comments on the 242	3/23/2015 10:29 PM
100	Service on 11th Ave NE/Roosevelt Ave NE should connect to South Lake Union and East Downtown (Convention Place area) via Eastlake. Not frequent enough service in heavily-used corridors.	3/23/2015 4:05 PM

101	The new 71 route is a joke. It doesn't run in Wedgwood, it would require one or more transfers to get to it, then to get where I might need to go. The current 71 is the only bus I can take between Wedgwood and downtown Seattle without transferring at other than rush hour. This would be a huge loss for me. Transferring is hard because it usually involves standing and walking, which are extremely difficult for me.	3/23/2015 1:12 PM
102	As mentioned above, light rail isn't a serious alternative. So I would be concerned about reduction of service on the assumption that light rail really is a serious alternative.	3/23/2015 11:25 AM
103	Same concern about 15th-beyond-Northgate getting funneled into the 41, which is a nightmare SB in PM, and Northgate- U District service being on the indirect line of Roosevelt Way (adds what looks to be an extra mile to the route vs using 5th... and it's a slow mile besides)	3/23/2015 8:23 AM
104	see previous statements	3/23/2015 7:52 AM
105	I use the 68 and 75 with incredible regularity. These changes would affect me negatively too much.	3/22/2015 10:06 PM
106	I think in the end, it will benefit more people long term to have more frequent bus service throughout the city, however I think Alternative 2 does address issues of not relying on the light rail as our sole form/ dominate form of transportation in the north end. Which people would have to do a lot more transferring or walking to get to their destinations with Alternative 1. However in the end, for my purpose and benefit, I believe Alternative 1 would benefit me more. Even with my concerns. However, I worry with the light rail as the dominate form of transportation in the north end as the light rail, housing on the light rail line will be more expensive and might push people out who have been living there before.	3/22/2015 6:58 PM
107	Eliminating the number 67.	3/22/2015 4:51 PM
108	Sidewalks....as I pointed out earlier.	3/22/2015 2:31 PM
109	N/A	3/22/2015 1:31 PM
110	Doesn't put emphasis on light rail. Light rail should be the centerpiece of Seattle transit, not just another option.	3/22/2015 11:21 AM
111	Longer wait times for 43.	3/22/2015 9:40 AM
112	I can't figure out how i would get easily downtown during off-peak times! I will have to transfer to get anywhere, now i can't get many places (downtown, U District, Wedgwood) without transferring. I can get to the airport by transferring once. The new alternatives look like a nightmare for getting to the airport.	3/21/2015 10:08 PM
113	These sweeping changes are viable only when the Link station at Roosevelt is open. Service from Hawthorne Hills / View Ridge to Wedgwood becomes impossible.	3/21/2015 6:17 PM
114	As with Alternative 1, going from 65th/Roosevelt Way to Eastlake now requires either taking I-5 to downtown and backtracking, or taking a transfer to a 70 from the U-district. Please keep a current 66 style non-freeway route through Eastlake!	3/21/2015 12:15 AM
115	It's not really an alternative to alternative 1. It is a do-nearly-nothing proposal.	3/20/2015 7:55 PM
116	It is a complete waste of effort.	3/20/2015 2:13 PM
117	People tend to use transit when it's convenient, but in general don't plan their lives around it. If it exists but is super inconvenient, not many people will use it. If it's incredibly more convenient to drive, people will drive.	3/20/2015 2:02 PM
118	I don't see the 242 or 542 listed	3/20/2015 1:57 PM
119	15 minutes =/= very frequent service. That is never acceptable for a peak time frequency if you want this widely adopted while forcing transfers.	3/20/2015 1:44 PM
120	The service reductions that still occur, even in this alternative.	3/20/2015 1:29 PM
121	Eastlake still is not being mentioned in any of these plans.	3/20/2015 1:26 PM
122	This alternative isn't much of an overhaul of existing routes and doesn't reinforce west-east routes.	3/20/2015 11:40 AM
123	No single bus service between NorthGate, Green Lake and Redmond	3/20/2015 11:04 AM
124	I don't use Metro in North Seattle.	3/19/2015 9:49 PM
125	Loss of direct service (#30) from Sand Point to the Upper Ave -- University Way NE above 41st. The Ave is a major shopping center for residents in the Sand Point area. Neither plan maintains a direct connection to it. Please retain the #30 route all day long.	3/19/2015 8:04 PM

126	I don't need more frequent, consolidated service. I need to be able easily access 72, 73, 66/7, etc. at off-peak times at night and on weekends to be able to get home and to work safely between the U-district/Ave and Lake City as a woman traveling by myself at night and easily without long walks as a person with multiple health issues and without a car.	3/19/2015 7:50 PM
127	Giant square of no service between 125th and 145th and between 15th Ave NE and 30th Ave NE. I have to walk five blocks to get to 15th Ave. NE now, but at least I have the option of a shorter walk, to 20th to catch a 73 all day every day. With no service on 20th, this large gap leaves everyone in the center having to walk 7.5 blocks at least to find a bus. As I get older, all that walking distance will make bus riding pretty tough, just when one needs it most, i.e. not driving as much..	3/19/2015 5:47 PM
128	Some redundancy in the routes. 73 seems redundant with Central Link, service between link and U district and U village is redundant with 75. The University link connections seem unnecessary when a number of routes pass through UW just a short walk away. While the new 71 would be nice, it's not nearly as appealing as Alt 1's new 16, which I would use quite a bit.	3/19/2015 4:55 PM
129	Changes to 12, 49, etc - especially when the 8 will still be terribly slow on Denny. YOU CANNOT MAKE PEOPLE TRANSFER TO EVEN MORE CROWDED BUSES OR ONTO UNPROVEN LIGHT RAIL AND EXPECT THEM TO KEEP USING BUSES AND BE HAPPY.	3/19/2015 3:52 PM
130	This does not complement our rail investment and spends too much money replicating service already available.	3/19/2015 12:53 PM
131	What would be the impact of Alternative 2 on service to the South End?	3/19/2015 12:04 PM
132	This is basically a no-change alternative, and that's unhelpful to creating a better network.	3/19/2015 11:42 AM
133	Not making the big changes we might need to be making, to make Seattle a world-class transit used city. Also, Alt1 has better options for the 545 route.	3/19/2015 11:14 AM
134	not much better than the current situation	3/19/2015 11:13 AM
135	If implementing Alternative 2 would cause service/stops on bus lines 7, 8, 43, 48, 49, 10, 11, 12, Rapid Ride D/C - - I am against Alternative 2. Don't forget about people who go short distances or places not covered by Alternative 2 -- who are totally dependent on Metro Bus Transit -- like ME!	3/19/2015 10:37 AM
136	Offers nothing to everyone in my area (Ballard), although we are more needy of service improvements than the UW area.	3/19/2015 10:18 AM
137	Eliminating bus service on 5th Ave NE in Maple Leaf is a really dumb idea. Please DO NOT ELIMINATE bus service (routes 66/67) on 5th Ave NE. It's too hard to get to the Northgate Transit Center or to Roosevelt, and if you do get to a bus stop on Roosevelt it will take forever to get to the Northgate Transit Center. I've had four hip replacements and I can't walk as far as I'd need to in order to get to a bus stop on Roosevelt or the Northgate Transit Center. It's a really dumb idea to eliminate bus service on 5th Ave NE.	3/19/2015 10:01 AM
138	Lack of attention to NE corridor: Lake Forest Park, Kenmore, BOthell, Woodinville, and Juanita and Kirkland.	3/19/2015 8:46 AM
139	South Lake Union is the fastest growing employment neighborhood in Seattle. It has minimal affordable parking and using transit is expected for employees. Many workers there live in north seattle neighborhoods but there is not direct transit except the 70 that doesn't require going downtown first which adds a good 1/2 hour to the commute. I live 5 1/2 miles from work and this plan will make me transfer once and walk at least a mile of that distance to make connection. It's ridiculous.	3/19/2015 8:38 AM
140	Extremely poor service between anywhere in north seattle residential neighborhoods and South Lake Union which is the fastest growing employment area in Seattle and provides virtually no affordable parking for 80% of the employees. Traveling all the way downtown and then coming back adds a good 30 minutes to the commute. I work 5 1/2 miles from the office and would have to transfer at least once and walk almost 1 mile of that distance. Ridiculous!	3/19/2015 8:09 AM
141	I need to know more about this one. I am confused on this one as i don't know the downtown area too well.	3/18/2015 10:23 PM
142	I do not know the Alternative 2 concept in north Seattle	3/18/2015 10:14 PM
143	43 service reduced.	3/18/2015 8:54 PM
144	As for Alternative 1, I am concerned that this alternative doesn't address any of the issues we have in Kenmore, especially the Park and Ride lot that fills up quite early in the morning. Lake City Way is now very congested quite frequently due to the traffic drive-around of people who are avoiding the tolls on the 520 bridge. There are times when we just can't get to Seattle. Park and Ride lots are key pieces to successful public transportation systems in the suburbs.	3/18/2015 8:44 PM

145	Waste of resources, people should migrate to using link more. Link is off the road, a direct route, people are ignorant to think of using alternative 2 and not utilizing a mass transit system that is on a dedicated separated route.	3/18/2015 5:37 PM
146	Route 48 evening rush hour buses are hopelessly off schedule and over-filled in the University district. Alternative #2 does NOTHING to improve this situation.	3/18/2015 5:08 PM
147	Longer wait times/frequency of runs, every 30 minutes instead of every 15.	3/18/2015 3:31 PM
148	"Keeps frequent all-day service on 11th Avenue NE/Roosevelt Avenue NE in the University District (concept for Route 48)" Route 48 does not currently run on 11th Ave NE/Roosevelt Ave NE--it crosses both. Is a change in the route planned?	3/18/2015 3:15 PM
149	The timing of rush hours bus routes from my home in Shoreline to my work at SLU.	3/18/2015 2:44 PM
150	Moving the 73 from 15th Avenue NE to Roosevelt Way NE. Lack of service during non-peak times to Downtown Seattle from 15th Avenue NE.	3/18/2015 2:37 PM
151	any change	3/18/2015 2:34 PM
152	Both concepts reduce the number of option currently available to me either coming or going to work. Killing Rt 16 north of 92nd st is a non-starter for me !	3/18/2015 2:10 PM
153	Removal of 242 route	3/18/2015 2:08 PM
154	The changes to 71 means that the light rail and 65 become the primary connection to downtown for wedgwood, but the 65 still only runs until Midnight. This means leaving downtown after 11 is not supported. Deleting route 242 makes no sense especially since the peak trips for the 542 are remaining the same. The 542 busses are already packed. This will make them much worse. Also, a lot of the 242 ridership comes from 148th in redmond which there will be no bus support for. The evening 242 that I take is packed to standing room only every day. Not having more 542s will make the evening ride very, very crowded as the 542s are also packed both ways.	3/18/2015 2:02 PM
155	Not sure 43 and 44 would keep close access to UWMC with new connection to UW Link Light rail (I assume it would, but not clear it stop would actually change from where it is now and be more difficult for disabled passengers to access)	3/18/2015 1:35 PM
156	same as Alternative 1	3/18/2015 1:32 PM
157	I'm not sure if I'll be able to comment on the Eastside 556, 271 aspect of routes via these surveys. North Seattle isn't part of my commute. Please help me provide more relevant feedback on the routes I use. angelaljacobson@gmail.com	3/18/2015 1:21 PM
158	I like that it isn't investing resources into an area that I don't live in	3/18/2015 1:16 PM
159	More traffic	3/18/2015 1:09 PM
160	I don't think I'll be affected.	3/18/2015 1:00 PM
161	a longer route for the 41	3/18/2015 12:44 PM
162	Removal of route 30 leave no route with fast service to the UDistrict/Ave area	3/18/2015 12:14 PM
163	I see nothing that improves the East/West travel in and out of Ballard.	3/18/2015 12:07 PM
164	I have a car but often take the bus because it is easier and more convenient in many cases. Longer wait times would make me use my car more often and ride the bus less.	3/18/2015 12:06 PM
165	No direct service between Lake City Way and University Way and 45th.	3/18/2015 12:04 PM
166	don't know	3/18/2015 12:03 PM
167	See comments for Alternative 1. Deleting route 70's northern route segment doesn't work for me.	3/18/2015 12:02 PM
168	This does not effect me	3/18/2015 11:56 AM
169	I think this alternative is better as then my arm is not being twisted to take the Light Rail. It affords more options.	3/18/2015 11:50 AM
170	That the 49 will be eliminated (although that would not be in alignment with the concept of this alternative).	3/18/2015 11:49 AM
171	For me, that the 16 won't go further north is a huge issue, unless other routs truly do come MUCH more frequently and will have enough space to take on new passengers (which could is a huge concern, they bypass folks waiting often already, so having to transfer always makes me uneasy for that reason).	3/18/2015 11:48 AM

172	With Alternative 2, you effectively cut Northgate off from the UW Medical Center - a MAJOR regional employer, and MANY employees live in the Northgate area. The only remaining route would be the meandering 75, which is hopelessly inefficient in it's routing through Lake City, Sand Point, Laurelhurst etc., and easily takes 45 minutes just to travel the few miles between Northgate and UW Medical Center.	3/18/2015 11:45 AM
173	It seems "small sighted" and a short term, incremental approach to needed transit changes that Alternative 1 does a better job of addressing. Alternative 1 reduces wait times and decreases route congestion on busy surface streets.	3/18/2015 11:45 AM
174	It deletes route 373X. Why would you delete a route in an area like north Seattle/Shoreline when there is no light rail service north of the University of Washington?	3/18/2015 11:44 AM
175	No bus access to Sand Point/Magnusen Park. UW has an office out there and I am required to travel during the day for meetings sometimes from the UW Tower and Magnusen Park.	3/18/2015 11:38 AM
176	Not sure if service between the University District and downtown will be as frequent as currently provided by 71,72,73 combined. Not sure if these buses will continue to be express - adding stops between campus parkway and downtown would increase travel time considerably.	3/18/2015 11:35 AM
177	It seems to me to be an incremental, band aid to the better and more comprehensive fix that is entailed in Alternative 1.	3/18/2015 11:32 AM
178	30 minutes is far too long between busses for heavily used routes like the 43. This bus is extremely useful to me and decreasing service on this route would give me little choice but to drive more often.	3/18/2015 11:31 AM
179	Again, see comments in Alternative #1.	3/18/2015 11:29 AM
180	Reduced service to UDist that doesn't require at least ten additional minutes to go through campus or a dangerous walk in the pre-dawn morning hours.	3/18/2015 11:25 AM
181	Looses efficiency.	3/18/2015 11:24 AM
182	alternative concepts are not clear	3/18/2015 11:21 AM
183	For me, Alternative 1 gives a better frequency of service.	3/18/2015 11:19 AM
184	No easy way to get to UW.	3/18/2015 11:15 AM
185	Severely degraded service between Shoreline/Maple Leaf/Green Lake, and the Redmond campus of Microsoft. The 542 stops only at 520 and 40th, and 520 and 51st. This significantly reduces the convenience and utility of taking the bus. Why do you keep trying to kill the 242. It was designed specifically to get Microsofties on the West side over to the campus, and it's a huge success--packed buses every day. Just leave it alone!	3/18/2015 10:53 AM
186	As long as I have a way to get from the Ferry Terminal in Downtown Seattle to my job in Redmond the easiest way possible I am okay with whatever.	3/18/2015 9:40 AM
187	loss of service between Redmond-Downtown	3/18/2015 8:20 AM
188	I am concerned about changes to Route 16. This route has changed so much over the years, from constantly changing stop locations at the Ferry Terminal to moving the route around all over the place in Northgate. Just leave it alone. If more service is required in other neighborhoods add new routes or increase frequency elsewhere. I am tired of not knowing where this route goes or how long it will take to get there.	3/18/2015 12:16 AM
189	Same problem as Alternative 1: Congestion on Montlake Blvd needs to be addressed before adding busses to the mix.	3/17/2015 7:54 PM
190	The retention of route 43 seems to be a waste here. It's hard to see what value it retains with the 12 still in place. The route 70 going to UW station instead of the University District and north. Retaining route 25 given it's poor performance.	3/17/2015 7:47 PM
191	The lack of early morning bus service to portions of Bryant and Ravenna. It means that I will end up driving when I have to get to work by 6:30 .	3/17/2015 7:10 PM
192	I have the same issues as before. I'm unhappy that both plans cut service for Lake City and offer me no alternative route to and from work.	3/17/2015 3:35 PM

193	I think that running a bus down 40th Ave NE is a terrible idea. This is a street that at peak commute times is filled with cars and trucks - and the on street parking makes passage through here very tight. 40th Ne also seems to be a major travel street for emergency vehicles - fire trucks and aid cars. Buses will just add too much traffic on an already congested street. This bus also runs along 25th NE as do several of the other lines during peak commute times - have you noticed what travel on that street is like from 8:00 - 10:00 AM and 3:00 PM - 7:00 PM during the weekday commute? It is often a Parking Lot.	3/17/2015 2:47 PM
194	Hard for me to access new light rail station without a transfer	3/17/2015 2:13 PM
195	Continued crowding on route 545 during peak hours	3/17/2015 9:33 AM
196	same as alternative 1, I lose the 242 and would probably drive to work from now on	3/16/2015 10:57 PM
197	The same comments about Alternative 1 apply to Alternative 2.	3/16/2015 9:54 PM
198	See above concerns regarding changes proposed to current Route 71 -- it appears making it necessary to transfer twice if you take it and wish to go downtown.	3/16/2015 5:12 PM
199	No more 242. No direct connection between Northgate Transit Center and 148th Ave NE. Less service routes between North Seattle and Redmond.	3/16/2015 4:13 PM
200	not being able to catch 1 bus from downtown. It's a pain to transfer (no matter how fast light rail is) with all your commuter stuff. And every transfer point increases the chance of missed buses, as buses don't wait and longer wait times.	3/16/2015 4:06 PM
201	This concept still removes a key rout between Green Lake and Redmond 242.	3/16/2015 4:04 PM
202	The loss of the 66x and 67 concerns me. I'm not convinced that the replacement by the 73 would meet my needs better.	3/16/2015 3:14 PM
203	Fewer spaces on ST 542 bike racks after elimination of KCM 242. No good way for people to get from UW light rail to a bus that will take them to Redmond during off-peak hours.	3/16/2015 2:23 PM
204	I depend on route 66, and this alternative would remove this route.	3/16/2015 1:57 PM
205	This would work I think	3/16/2015 1:40 PM
206	This is feedback for both alternatives, deleting the 242 route reduces coverage for users who are connecting at Montlake and who go to 148th and 32nd st. There is NO workaround. Going to green lake park and ride is NOT feasible.	3/16/2015 1:22 PM
207	The 48 (or whatever it turns into) would remain part of my life.	3/16/2015 1:21 PM
208	With the removal of route 242, there is no transit service from North King County to the east side. This will easily add 20-30 minutes, and pretty much removes transit as an option to travel to Redmond.	3/16/2015 12:53 PM
209	Hate that you are making my commute from Maple Leaf to Redmond take longer	3/16/2015 12:35 PM
210	unnecessary duplication of routes	3/16/2015 12:30 PM
211	No direct service from the U-District to Microsoft Campus	3/16/2015 12:29 PM
212	Slower bus service from Maple Leaf towards downtown with all of the buses being directed to University Ave instead of the 66 taking much faster Roosevelt. The 48 will use Roosevelt, but it doesn't pick up from Maple Leaf. The elimination of the 242 will destroy my commute to work: I would need to transfer to the 542 which then drops me off 15 minutes away from my building, instead of having a direct 242 from the house to the office door.	3/16/2015 12:14 PM
213	Still no direct route between the North West neighborhoods and the U District, so we do not benefit from the Light Rail.	3/16/2015 12:14 PM
214	Not using the new network to its full potential	3/16/2015 11:59 AM
215	The loss of route 242	3/16/2015 11:55 AM
216	As challenging as at present to get to NW Seattle from the U District	3/16/2015 11:55 AM
217	Reduces 545 service past OTC.	3/16/2015 11:52 AM
218	71 stops at 11PM instead of 1AM. No direct downtown (only transfer)	3/16/2015 11:51 AM
219	deletion of route 242	3/16/2015 11:51 AM

220	still requires 2+ bus rides from Madrona to Bellevue (my daily work commute)	3/16/2015 11:51 AM
221	1. Removal of Route 242 - further distance to nearest stops in Greenlake and Redmond.	3/16/2015 11:50 AM
222	Removing route 242 would greatly increase my commute, i use this bus 10 times a week. The use of 542 would require me to commute to the greenlake park and ride and you do not have an alternative beyond a mile walk. Additionally this bus is considerably slower when commuting to the east side because it might make its way though the university traffic	3/16/2015 11:46 AM
223	Harder to get to Redmond from Wallingford with less 545 service.	3/16/2015 11:46 AM
224	downtown to Redmond would be harder	3/16/2015 11:35 AM
225	No direct service between Redmond and Green Lake Park and Ride	3/16/2015 11:33 AM
226	Unreliable service, in general.	3/16/2015 10:53 AM
227	I need direct transport from Pioneer square where I live directly to Redmond. Currently, the 545 route goes through ALL downtown Seattle and then to CAPITOL HILL, which adds 15min to my commute every day. Plus there is no Wi-Fi on the bus, which is terrible for my productivity.	3/15/2015 12:35 PM
228	The loss of Route 71 to the U-District without an adequate replacement.	3/14/2015 10:27 PM
229	The 71 bus in alternative 2 is so truncated, it's practically useless.	3/14/2015 10:08 PM
230	The route 48 link between UW Link Station and Mt. Baker Station (along 23rd) serves a vital link between North Capitol Hill and access to the Light Rail. Currently, I take the 48 to Mt. Baker Transit Center to access the Light Rail (northbound or southbound). Once the Link Light Rail is complete, from Downtown, I envision taking the service all the way to UW then transferring southbound on the 43 or 48 and getting off on North Capitol Hill (Aloha). Alternatively, when I return from the Airport, I plan to get off at the Mt Baker Station, then catch the 48 northbound, as this will take less time, then all the way to UW and then south bound.	3/14/2015 3:52 PM
231	Same comments as alternative 1	3/14/2015 10:38 AM
232	N/A	3/13/2015 3:52 PM
233	In general, lack of service to corridor along 15th Ave NE. both of these alternatives reduce service to my neighborhood (15th Ave NE & NE 73rd). I use routes 72 and 73 a lot, and these are going away and/or rerouted so that I will have to walk much further.	3/13/2015 3:31 PM
234	Woodinville Park and Ride has space to park if you delete route from Bothell UW and Woodinville PR, there are no space to part on Bothell UW.	3/13/2015 1:26 PM
235	Any reduction in routes 43 or 48.	3/13/2015 12:56 PM
236	Bus routes take FOREVER when they stop at every other intersection.	3/13/2015 10:15 AM
237	Frequency of key routes to the UW link station such as 25 should be INCREASED.	3/13/2015 7:27 AM
238	Alt 2 is the much superior of two bad plans. Seattle needs to be increasing the number and frequency of neighborhood routes and fully utilizing the light rail that taxpayers have spent a fortune building.	3/13/2015 6:54 AM
239	The Ave is very congested because cars cannot pass stopped buses in several places, Please think about putting more buses on 15th. It would be a block further for me to walk but my trip would be much faster.	3/12/2015 4:33 PM
240	Kenmore, Kenmore, Kenmore. Service to NE Kenmore is not good, requires 2 transfers which effectively doubles my commute time each way.	3/12/2015 3:46 PM
241	Doesn't take advantage of Link connection for downtown commuters	3/12/2015 12:21 PM
242	It's time to improve the network and fully take advantage of rail. Alternative 2 sacrifices frequent service and will move fewer people.	3/12/2015 11:37 AM
243	Reduction in service for routes that are already full before they get to the Roosevelt neighborhood where the trains will take some of the load will be a mess. If anything, the train will increase ridership on routes to get to train stations. We need to increase lines like the 76, which are packed before you get to where the train stations are.	3/12/2015 10:58 AM
244	indifferent	3/12/2015 8:28 AM
245	Still no reliable service between northern U District / Roosevelt / Wallingford / Green Lake and U Village / Children's Hospital.	3/11/2015 4:51 PM

246	No connection between Shoreline/Jackson Park and the Eastside.	3/11/2015 4:08 PM
247	By having routes spread out across more streets, it seems to me that there will be more places of possible congestion; buses slow traffic. I like the idea of having people walk a little further to a limited number of streets that will be impacted by bus service. This should make traffic flow more smoothly on the non-bus streets. But I may be wrong. I'm not the traffic expert. What do the experts in transportation say? What is the experience of cities around the world that get it right?	3/11/2015 1:38 PM
248	Changes don't go far enough	3/11/2015 10:47 AM
249	Putting buses on 12th Ave NE, which is designated as a Greenway.	3/11/2015 10:38 AM
250	As above	3/11/2015 10:23 AM
251	Nothing of benefit really here for Madison valley dwellers.	3/11/2015 9:44 AM
252	You are impacting a large area but it is pretty light on specific routes.	3/10/2015 9:50 PM
253	Reduction of Route 43 (and alternative walk time to nearest light rail stop) means time to get to Capitol Hill or downtown increase to the point where it make more sense to drive.	3/10/2015 9:17 PM
254	Not moving towards the grid structure to connect neighborhoods.	3/10/2015 8:27 PM
255	No fast route between Bryant and Seattle Center	3/10/2015 4:41 PM
256	Looks like there are far more routes, and I'd rather the money be used for other expansion of service in the future	3/10/2015 4:31 PM
257	Although network is more dense, the relatively-low frequency of service n many corridors makes transit a less-viable option for many of my trips to this part of town.	3/10/2015 12:32 PM
258	Need close connection of light rail and a bus going to bryant / wedgwood / viewridge !	3/10/2015 11:09 AM
259	No service between Central Wallingford and Central Fremont.	3/10/2015 9:57 AM
260	Nothing.	3/10/2015 9:48 AM
261	Improving the service directly to South Lake Union for the Northeastern and Northwestern neighborhoods needs to be a priority. Metro has to recognize the employment center that South Lake Union has become and the resulting traffic that creates due to inadequate availability of buses.	3/9/2015 10:19 PM
262	I am not concerned about North Seattle since I don't live there and never go there.	3/9/2015 8:15 PM
263	Again, the 75, 375, and 65 should ALL be connecting to the Light Rail station, NOT going through the UW campus and up the hill. Or at least consider new "downtown worker" routes that operate between 5a-8a and 3p-8p or something, routes that connect NE Seatte directly to the Light Rail station.	3/9/2015 8:11 PM
264	Not happy with the cuts to the 43	3/9/2015 7:38 PM
265	Not working as much around rapid transit light rail and not making routes as efficient r	3/9/2015 7:03 PM
266	the 'lack' of frequency isn't that big a deal - most of us like our existiing bus service and know where the stops are etc. Also please don't mess w the 43 or 49.	3/9/2015 5:34 PM
267	No late-night service along the Roosevelt Way NE corridor through Maple Leaf.	3/9/2015 3:34 PM
268	I don't know what cutting the #11 and replacing it with the #8 would mean for me on a daily basis. Since the bus cuts and stop eliminations, I am spending more time riding the bus because 1. few buses means more people with bus lift and assistance needs are on each bus, making each ride longer. Anywhere from 5 minutes to half an hour. If 3-4 people with wheel chairs, or need the lift get on a single bus much time is taken embarking and disembarking from the bus. My 35 minute ride became a 50 minute ride.	3/9/2015 3:14 PM
269	Keep both bus lines running at their current schedules, or how is anyone in Montlake/Portage Bay, the closest actual communities to the light rail station, going to get any benefit from it without increased access to the station? Bus service needs to minimally stay the same to make the light rail stop gain it's full potential, otherwise it will be a squandered opportunity for our community to want to take light rail anywhere.	3/9/2015 3:01 PM
270	If you want to get people out of SOVs then don't make them go to University Ave. The density of NE seattle warrants more direct routes to the light rail that don't go through the ugly, dirty, dangerous, university district, i.e., University Avenue. Run buses up and down 25th instead of the Ave.	3/9/2015 2:52 PM
271	if this alternative make the service less reliable to commute then it would not serve the rider well	3/9/2015 2:41 PM

272	Any plan that would affect Routes 11 and 8 would be of major concern to me!	3/9/2015 2:07 PM
273	You are cutting the 43 which is a longer wait time for low income households that travel from the Central District that are already time-limited working 2 jobs or taking children to daycares without cars, etc (which we should be promoting with more access options, not cuts).	3/9/2015 1:01 PM
274	I'm worried routes on Cap Hill (specifically routes 10 & 11) will be reduced under the assumption that people will be willing to walk to the new light rail station. I need connection from East Cap Hill to Downtown, or from East Cap Hill to Maple Leaf. Thanks!	3/9/2015 11:52 AM
275	It's just a little boring. I like the boldness of A1. This feels like settling and we shouldn't do that w/ the new link station opening up.	3/9/2015 11:50 AM
276	No direct service from Wedgewood to the UW link station. Too many transfers when it seems so close. Want to get to the airport as a single traveler.	3/9/2015 10:02 AM
277	It seems too much like the status quo.	3/9/2015 10:01 AM
278	I support alternative 2 over alternative 1	3/9/2015 9:58 AM
279	How does it effect the South End.	3/9/2015 9:06 AM
280	Lack of connectivity to Link from NE Seattle. And why is a route serving only Laurelhurst singled out as one of only 2 routes for this particular connectivity? Route 68 is good concept - lots of neighborhoods connected to Link via 25th/Montlake - although infrequent service is a limitation.	3/9/2015 8:31 AM
281	The route for 71 will be a fine idea for me when Link is extended to Roosevelt, but UNTIL THAT TIME: folks in View Ridge and Wedgewood who presently can get downtown without changing buses and to the airport with a single modality change are going to be left with either making two changes (16 to 65 to Link) to get downtown OR a single change with a significant walk (75 to Link). In addition, both 75 and 65 buses can be affected by traffic jams on Montlake. I understand that you have a formidable problem trying to service the University Stadium station from Northeast Seattle, but I frankly doubt that you can make the 65 service work at all during much of typical workdays, given its dependence on Montlake. Perhaps this is an absurd suggestion, but have you considered the possibility of a light vehicle (e.g. big golf cart) shuttle between the ring road on campus and the Link station?	3/8/2015 9:23 PM
282	Same concerns as Alternative 1. See answer to that question above.	3/8/2015 9:23 PM
283	Less reliance on light rail. Seattle traffic will only get worse in years to come.	3/8/2015 8:29 PM
284	Magnuson Park is a regional, frequently used park, with a lot of events (more events than any other park) with highly inadequate parking available for its usage. We need to get more people accustomed to using transit to get to our regional parks. Alternative two would not provide adequate levels of service to encourage people to ride. Also, with the additional workforce housing at Magnuson, in addition to the solid ground housing, many don't have cars and need bus service.	3/8/2015 6:26 PM
285	East-west connectivity.	3/8/2015 6:25 PM
286	This would just be one more improvement for other areas other than Kirkland.	3/8/2015 3:45 PM
287	I am concerned that this alternative does not include a connection between NW and NE areas of Seattle.	3/8/2015 3:40 PM
288	Same as my concerns for Alternative 1.	3/8/2015 2:08 PM
289	It does not affect me in any way.	3/8/2015 1:12 PM
290	Lacks efficiency. Maintains too much overlap in routes, like 43 and 48.	3/8/2015 12:35 PM
291	removal of the 71, removal of the 64 through dt	3/8/2015 11:56 AM
292	Provides less-frequent service than Alternative 1, with longer wait times for transfers.	3/8/2015 9:08 AM
293	Doesn't seem to be a very forward thinking plan	3/7/2015 6:15 PM

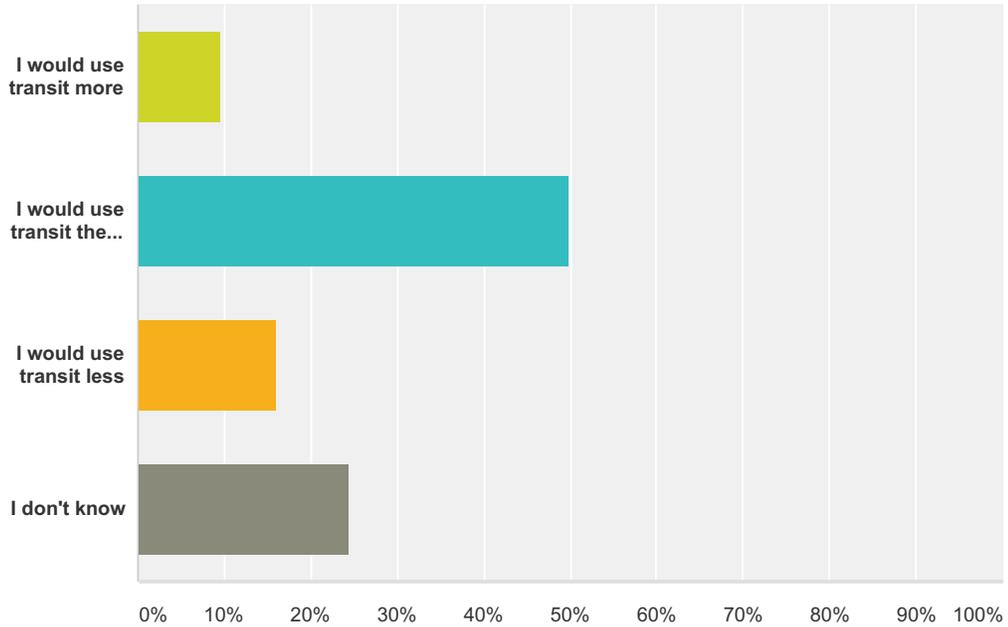

294	I'm not sure 16, 70, 71, 72, 73 and 66X should really be altered at all, except to add frequency There might be a better way or other routes to delete that are short or not very frequent, rather than alter these core routes. Most of those buses seem full during afternoons. I like parts of Alt 2, but I don't like heavy deletion. I think its important to remember people may not want to take the Link from Downtown and have to transfer to a bus rather than get on one bus downtown and make it all the way to Maple Leaf or Northgate. For these people going all the way north, one trip is convenient. They probably won't want to ride the train first, then the bus. Long haul is more important. The new Link is really not far North enough yet to delete service to Northgate. Once that portion is ready and people can take one train from Downtown to Northgate, the 16 should not be changed. Otherwise its less convenient.	3/7/2015 4:59 PM
295	is this really less frequent? depends on which specific bus route is affected.	3/7/2015 2:16 PM
296	Very little change from what we have now leading to too much service with the addition of UW Light Rail. - The problems that plague the network today, e.g. extensive duplication of service in Capital Hill, Northeast Seattle and Central District, will remain in place.	3/7/2015 2:11 PM
297	Cutting Route 66x would strand Roosevelt riders. Car trafficy is only going to get worse. The current spending to improve Roosevelt for bus use would be an insulting waste of taxpayer money if the 66x were to be cancelled. Canceling the 66x is an unacceptable transit loss to the Roosevle neighborhood. Waking from the Ave and 15th NE is unsafe.	3/7/2015 12:09 PM
298	Less connectivity with Sandpoint/Seattle Children's.	3/7/2015 11:52 AM
299	east-west connection between Sand Point and Roosevelt	3/7/2015 11:42 AM
300	This alternative doesn't do enough to take advantage of the new Link service.	3/7/2015 10:05 AM
301	What was alternative two? We need reliable, frequent service from north Seattle neighborhood centers to the UW stadium station (same bus comes every 5-7 minutes), especially at rush hour and commute times.	3/7/2015 8:53 AM
302	See comments above.	3/7/2015 8:46 AM
303	Same as alternative 1	3/7/2015 1:06 AM
304	It just about the same and we need better	3/7/2015 12:51 AM
305	Alternative 2 doesn't fix any of the problems I currently have with how transit operates in north Seattle. Alternative 1 fixes nearly all of them.	3/6/2015 11:12 PM
306	Having to travel further for transit. If you are elderly, or ill or disabled this is not a good plan. Or if the weather is very bad.	3/6/2015 10:17 PM
307	The lack of evening and weekend service to Laurelhurst would limit the usefulness of the UW station.	3/6/2015 8:35 PM
308	See answer to #11	3/6/2015 8:32 PM
309	Exact same comments as Alt 1.	3/6/2015 8:10 PM
310	The apparent disappearance of the 27, 14, and 7.	3/6/2015 8:04 PM
311	Same comment about route 72 as in Alternative 1.	3/6/2015 8:03 PM
312	Builds in old habits, comforting for people who are uncomfortable with changes. However this is a time for re-valuation of all values, for rewriting the routing concepts, for giving the whole system a sense of newness and freshness, so don't coddle the opponents of change who just don't want to be bothered to learn a new and probably better way to get from their points A to their points B and beyond.	3/6/2015 7:57 PM
313	There's not enough direct access from NE Seattle to the Link Station at Husky Stadium via 25th Avenue NE or via Sand Point Way.	3/6/2015 7:42 PM
314	Again, where's Ballard?	3/6/2015 6:55 PM
315	Less consolidated high frequency service in the more used corridors. We need both plans.	3/6/2015 6:04 PM
316	It would not affect me.	3/6/2015 5:40 PM
317	Again, you omitted 71 and 76 from the list...see Alt. 1.	3/6/2015 5:37 PM
318	The loss of the 66 between Downtown and the area around the REI on Eastlake!! The existing 66 (the south end of it anyway) as is MUST BE PRESERVED!!	3/6/2015 5:29 PM

319	The 71 would become out of reach for me. It would eliminate easy access to University Avenue, or, best case scenario, increase travel time by an entire twenty minutes. Diverting the 71 to Sand Point Way does not make sense, since they already have service	3/6/2015 5:17 PM
320	Based on past experience (79, cuts to other routes) Metro is to cut routes that serve my neighborhood no matter what a survey like this captures.	3/6/2015 5:13 PM
321	Later (after 8pm) routes that I use already do not run, or run only infrequently (every hour or so). I am concerned that they would become less frequently.	3/6/2015 5:11 PM
322	Waste of money sending buses into Laurelhurst and west Montlake	3/6/2015 5:09 PM
323	Nothing much to recommend it. Not a forward looking option and doesn't add much connectivity to the new stadium link station.	3/6/2015 5:04 PM
324	Reduced geographic area of service, reducing utility to elderly and disabled riders. The frequency map seems to show slower service to northeast Seattle.	3/6/2015 4:58 PM
325	Shifting the route for 71.	3/6/2015 4:34 PM
326	That the 64 doesn't travel all the way south on 35th to 45th that it turns east at 55th. I wish it turned North to 35th off of 45th.	3/6/2015 4:30 PM
327	Just hope that Route 75 links w/Univ. of Wa. light rail station	3/6/2015 4:12 PM
328	My neighborhood is not represented in the discussion	3/6/2015 4:10 PM
329	It's pretty clear that Metro wants to work with Sound Transit to boost ridership when the UW Link station opens. It's also becoming clear that working with Sound Transit is getting more focus than maintaining quality service north of the U-district.	3/6/2015 4:04 PM
330	It's timid, and maybe it needs to be with half hour wait times. I like the more flexible web-like nature of Plan 1. If you can work in more of that flexibility but hang on to shorter walk times, you've got a winner.	3/6/2015 4:00 PM
331	I don't want to have to transfer bus routes in order to get to my destination. As it is, with the schedule for the #43 and #49, it is sometimes preferable to walk rather than to have to ride a crowded bus.	3/6/2015 3:44 PM
332	The elimination of route 71 extending to downtown	3/6/2015 3:32 PM
333	Inefficiency in having local bus routes that don't do a great job feeding LINK and express buses.	3/6/2015 3:29 PM
334	long trek from 65 on Stevens Way to the Link station	3/6/2015 3:23 PM
335	This seems like a way to mollify those who don't want to spend on public transit.	3/6/2015 3:20 PM
336	Very little benefit for people north of Wedgwood.	3/6/2015 3:18 PM
337	I don't like not being able to ride on one bus north of 92 around to the transit center, This is especially difficult for seniors and others who are mobility impaired. This route as is provides service to several medical facilities, banks, pedestrian entrances to Northgate Mall. Taking that away is inconsiderate and unnecessary.	3/6/2015 3:09 PM
338	Pursuing the status-quo A2 would be the biggest missed opportunity in Metro's recent history. The consolidation of routes and the augmentation of a high frequency grid for Seattle's less dense neighborhoods needs to be priority number one.	3/6/2015 3:07 PM
339	(my same answer as for Alt 1, FYI) I use the stop at Ravenna Blvd and the Ave, primarily during peak times. 71,72,73 all come by frequently. I also can take 74 (I live near 18th & Ravenna Blvd). Alt 1 and 2 both reduce my options via either less frequency or routes. However, I've basically been spoiled by having such convenient options so I understand if I might actually have to look at a schedule to figure out when to expect a bus (regardless of Alt 1 or 2).	3/6/2015 2:57 PM
340	No route 66 = no access from North End to Eastlake business: Fred Hutchinson, SCCA, etc.	3/6/2015 2:53 PM
341	Most routes I looked at won't change at all.	3/6/2015 2:41 PM
342	Plans to expand coverage down 35th Ave NE aren't mentioned, though this is a major run and services ESJ populations around both the university district and nathan hale HS.	3/6/2015 2:38 PM
343	It doesn't change the structure with new opportunities afforded by light rail. Much is duplicative and still infrequent. Doesn't really improve much.	3/6/2015 2:33 PM

344	Montlake Blvd is VERY packed and extreme delays are caused by a few slow-moving cars. Not all service can be delegated to Montlake.	3/6/2015 2:31 PM
345	the lack of integration with University Link. Losing the 66/67 with no real replacement means I'll be walking 1.1M to Northgate to catch the 41 or riding my bike.	3/6/2015 1:11 PM
346	Taking the 73 bus away from the Jackson Park/Pinehurst neighborhood! It is well used north of the Northgate neighborhood by many people, including high school students. I board on NE 120th & 15th Ave NE and there are always already many passengers on board for the southbound trips. It is our best route to the U District.	3/6/2015 1:04 PM
347	Losing the 43. I understand the rationale, though. I just don't like the idea of removing electric trolley bus routes.	3/6/2015 11:48 AM
348	It's hard to find things to like in this proposal, relative to Alternative 1. While doing the close-to-nothing as proposed is inherently unpleasant relative to the status quo, it's hard to endorse that as a sound decision.	3/6/2015 11:47 AM
349	This alternative does not seem very good - it is too similar to the current network and does not take advantage of Link.	3/6/2015 10:14 AM
350	This alternative is weak and timid. We must plan for future riders and maximize Link. High frequency is more important than one seat rides and maintaining the status quo.	3/6/2015 10:12 AM
351	I worry that Alternative 2 is ... the status quo. LINK's opening is a >MAJOR< change, and I feel that Alternative 2 does not address that aspect.	3/6/2015 9:33 AM
352	The loss if the 73 to Pinehurst is devastating. I actively supported Prop 1 to preserve this service. I rely on it for both of my kids to get home from school. Others in my neighborhood rely on it as their main transportation. Please do not cut this important service.	3/6/2015 9:07 AM
353	Longer wait times.	3/6/2015 9:02 AM

Q13 How would your use of transit be affected if Alternative 2 were implemented in north Seattle?

Answered: 2,487 Skipped: 4,072

Answer Choices	Responses
I would use transit more	9.61% 239
I would use transit the same	49.82% 1,239
I would use transit less	16.16% 402
I don't know	24.41% 607
Total	2,487

#	Why?	Date
1	if my direct routes and my alternative routes stay the same, i'll continue to ride because i know they work and get me where i need to go	4/2/2015 7:38 AM
2	See previous answer re:no other option.	4/2/2015 2:21 AM
3	If the wait time remains at 30 minutes, I feel as if my communte would be more or less the same.	4/1/2015 9:56 PM
4	Still plan to use light rail between UW and Capital Hill or downtown	4/1/2015 8:53 PM
5	Without frequent connections to the light rail station, I'm not sure if I would use bus service to the station or rely on someone to drive me there.	4/1/2015 6:05 PM
6	From Laurelhurst, easier connection to Husky Stadium light rail station.	4/1/2015 5:09 PM
7	As above, I chose long ago to use transit daily, and would have to do so even if Alternatives 1 and 2 were scrapped and a hypothetically much worse "Alternative X" were implemented instead.	4/1/2015 3:40 PM
8	Less frequent service at NE 65th St. and 15th Ave. NE	4/1/2015 2:55 PM

9	I would walk to work because my bus route might be discontinued	4/1/2015 1:35 PM
10	Current 311 service works extremely well. Four years of economical, efficient transportation from Woodinville non-stop to Downtown. I can work while commuting and have easy options once downtown for getting to my destinations.	4/1/2015 1:25 PM
11	with the light rail system going in at Husky Stadium and parking downtown (along with traffic!) becoming more of an issue I see my family utilizing Metro bus from Laurelhurst to get to light rail at Husky Stadium. Also my daughter will be attending high school on Capital Hill and we were anticipating her riding the bus down 23rd to a transfer point at Montlake/Uvillage to get her back to Laurelhurst and home at the end of the day.	4/1/2015 12:05 PM
12	Because it seems like it would be pretty similar to now.	4/1/2015 10:40 AM
13	I see little impact to my current usage.	4/1/2015 9:03 AM
14	little addition of frequent all day service	4/1/2015 1:36 AM
15	I would use transit about the same, but spend less time in transit and waiting than I do now and less time than with Alternative 1	3/31/2015 10:53 PM
16	Again, as before, the Pinehurst area is adversely affected by the changes and my commute times seem to be increased and less convenient. I'd just drive instead of taking transit.	3/31/2015 10:44 PM
17	continue to/from work but not as frequent use outside of work hours.	3/31/2015 9:55 PM
18	I already limit my metro use based on long wait times in certain areas; this would not change.	3/31/2015 9:31 PM
19	More geographic coverage means I don't have to take my car.	3/31/2015 9:21 PM
20	I need: -fast service -nearby -affordably If it's going to take me 45 minutes to go 6 miles, I will drive.	3/31/2015 5:43 PM
21	doesn't affect my daily commute	3/31/2015 4:55 PM
22	No service to montlake	3/31/2015 4:38 PM
23	I would still get to use the 25	3/31/2015 4:10 PM
24	I only use transit, can't really increase or decrease, but does affect my mobility and waiting time.	3/31/2015 4:06 PM
25	My most used bus route is stil there. Weekend access is improved as is night access for me. Easier to get to capitol hill as well.	3/31/2015 3:56 PM
26	I'd have to see how it plays out.	3/31/2015 3:35 PM
27	I am transit-dependent.	3/31/2015 2:17 PM
28	With Alternative 2 I like that service levels remain the same or almost the same for the 43, 8, 11, and 48. My biggest issue is that route 43 will be less frequent. There are a lot of people on and around 23rd who take the 43 to downtown. For most of us in the middle (between John and the Montlake Cut), it doesn't make sense to travel to light rail and then catch the bus. We'll see a decrease in service to downtown and it doesn't seem fair. I'm lucky to be within a 7 minute walk to the 11 and 8, but most people aren't. I'm also concerend that there isn't an increse in the number of buses running along the 8 and 11. Both of these buses get really busy.	3/31/2015 1:49 PM
29	I live in Monroe	3/31/2015 1:26 PM
30	It would remain as convenient as it is now (or increase convenience a little since the 373 would run all day instead of only at peak as it currently does).	3/31/2015 12:59 PM
31	Less frequency with 43 means less use for me	3/31/2015 12:43 PM
32	Frequency of service is important to me.	3/31/2015 12:26 PM
33	Again, the wait times due to less frequent (or having to travel further to get service) is a deciding factor in whether I use transit or drive my car.	3/31/2015 12:24 PM
34	I will be forced to drive instead of using transit.	3/31/2015 12:08 PM
35	If this option preserves the Montlake freeway stop it will not change my daily commute by bus to downtown Seattle.	3/31/2015 11:29 AM
36	No 242 means longer trips Ridgecrest to Redmond. So I would drive my truck more.	3/31/2015 11:24 AM
37	Increased travel time from Ridgecrest to Redmond. So I'd take my truck more often.	3/31/2015 11:20 AM

38	Bus service every 30mins would make it too hard to get to work on time	3/31/2015 10:50 AM
39	I don't own a car.	3/31/2015 10:41 AM
40	It doesn't make things better but also doesn't make it worse.	3/31/2015 10:37 AM
41	I would probably drive more.	3/31/2015 9:33 AM
42	This would decrease frequency of route 43 which I use by far the most.	3/31/2015 8:48 AM
43	Preserves the existing routes	3/31/2015 8:00 AM
44	It would make my commute more of a hassle	3/31/2015 6:44 AM
45	Longer wait times	3/30/2015 11:03 PM
46	Experience will give me final judgement--I often have to use transit, whatever it's problems, but I'm often so frustrated that I give up and don't go anywhere unless I absolutely have to.	3/30/2015 10:14 PM
47	Nothing changes for where I live in Wedgwood.	3/30/2015 9:22 PM
48	My regular commute is from Lake City to Overlake business park. I usually take 522-->545 (non rush hours) + 12 minute walk and back on 242-->64X. With the elimination of non-rush hours 545, and 242, my remaining option is a significantly longer commute, changing at the UW + additional walk on the return, or driving (at least to Ravenna P&R)	3/30/2015 8:48 PM
49	Much faster access to Light Rail Station with #2	3/30/2015 8:40 PM
50	Bus would come less frequent	3/30/2015 8:23 PM
51	difficult to predict. We currently use route 43 to go to downtown and the University of W, and the 48 to transfer to light rail to get back and forth from the airport	3/30/2015 8:21 PM
52	Longer walk, without a gain in frequency.	3/30/2015 7:49 PM
53	As it is, the bus routes I need are in place.	3/30/2015 6:13 PM
54	I use transit to get to work	3/30/2015 5:47 PM
55	Not much significant would have changed, from my point of view. The Link station would not be as easy to access.	3/30/2015 5:34 PM
56	Nothing in this proposed alternative would help anyone on the NW corner of the city. All buses remaining the same would mean I ride the bus just as much as before.	3/30/2015 5:32 PM
57	Because you are assuming the Husky Stadium stop as proxy for the entire U district, I would have to drive more. Husky is in the middle of nowhere. You built that stop only for people going to the games--not for anyone else trying to commute to the U District.	3/30/2015 5:27 PM
58	Since you are using the Husky Stadium stop as the U district lightrail (which it is NOT), I would be forced to drive more since Husky Stadium is never where I want to go. I want to go to the U district which doesn't have a stop.	3/30/2015 5:20 PM
59	Same as in alternative 1: I am losing my most frequently used commute options under both options (522-->545 from LC to Redmond, and 242-->64 from Redmond to LC).	3/30/2015 5:14 PM
60	Alternative 2 is more acceptable because it does not delete route 43, but reducing route 43's frequency is unacceptable. I will consider buying a car and driving.	3/30/2015 2:40 PM
61	My primary commute would change to a peak-only route, but I'm a transit-only user.	3/30/2015 2:19 PM
62	Frequency is very important for routes I use for my work commute, as evidenced by how often the 48 is packed like a can of sardines when I try to catch it.	3/30/2015 2:19 PM
63	Same as previous question like this, not enough info	3/30/2015 12:42 PM
64	Alternative 1 is more appealing based on the current routes I ride.	3/30/2015 11:40 AM
65	longeer wait times	3/30/2015 11:16 AM
66	Depends on changes to Route 48.	3/30/2015 10:49 AM

67	I would just adapt to whatever service pattern is provided.	3/30/2015 10:01 AM
68	need direct connections to south king county - this will help keep less cars on the road	3/30/2015 9:58 AM
69	I don't own a car and rely on Metro buses and walking for transportation. I don't know if these changes would increase, or decrease, my use of transit, but it means wait times and transfers will be the same or longer, which will make me less happy.	3/30/2015 9:57 AM
70	We're not north Seattle so don't know how to answer this	3/30/2015 9:56 AM
71	it is not improved much over current	3/30/2015 7:16 AM
72	I am a dedicated transit user and will use it regardless of how well or poorly implemented.	3/30/2015 12:24 AM
73	I mostly only use transit in areas with good connections (either well timed or frequent service) and high frequency arrivals.	3/29/2015 10:35 PM
74	longer wait times would make it harder to get to work on time	3/29/2015 10:14 PM
75	I would still use the 372 to commute, but probably wouldn't use it too much outside of those times - it comes too infrequently in the evening.	3/29/2015 10:11 PM
76	The routes are close to the same, so I would use them the same.	3/29/2015 8:58 PM
77	I wouldn't have a better way of getting to and from downtown from Children's Hospital on weekends. I still wouldn't have a better way of getting to work more directly (I live in Bryant and work on NE 45th and 11th)	3/29/2015 5:56 PM
78	If I could bike quicker than waiting for a transfer I would choose that option.	3/29/2015 5:50 PM
79	Walk and bike almost everywhere. When I take transit is dictated more by my circumstances and destination than the bus routes - that is, I make it work one way or another.	3/29/2015 5:37 PM
80	As I said in this question about Alt 1, I mainly walk and bike. I wouldn't use transit more. And I suspect that my transit experience from the CD/Hill area to North Seattle wouldn't be all that changed with Alt 2.	3/29/2015 5:14 PM
81	Maintains important routes of current bus system while connecting them with Link Light Rail station	3/29/2015 5:10 PM
82	Again, I mostly use transit to get to and from work.	3/29/2015 3:16 PM
83	See answers for the others.	3/29/2015 2:59 PM
84	No big differences between what we have and what this is.	3/29/2015 12:59 PM
85	Would still have access to the 25 and 43 routes	3/29/2015 11:37 AM
86	None of these affects my main usage. I'm not likely to use transit more.	3/29/2015 11:35 AM
87	I would stick to my core commuter routes with some use of transit for other purposes.	3/29/2015 10:00 AM
88	In spite of less frequent service and longer waiting times it still would be better for me than Alt.1 with elimination of routes 25 and 43	3/28/2015 9:23 PM
89	I don't know how early the service would start. Also, I don't want to walk 0.7 miles in the rain.	3/28/2015 2:38 PM
90	Greater coverage across larger areas	3/28/2015 1:05 PM
91	I would continue only using transit for my work commute. I would not be able to take advantage of it for recreation or errands.	3/28/2015 12:14 PM
92	Too many other factors are involved than simply preserving local routes and leaving horrendously crowded and tardy trunk routes to continue failing.	3/28/2015 9:51 AM
93	does not give me enough information about the eastside	3/28/2015 8:52 AM
94	Both alternatives are improvements over existing service.	3/28/2015 7:58 AM
95	See above response to Alt. 1.	3/28/2015 4:48 AM
96	poorer service to the places i travel to most	3/28/2015 1:35 AM
97	Bus service from 25th AVE NE & NE Blakeley to either downtown or Capitol Hill is absolutely atrocious currently, and will continue to be just as bad without consolidating these routes and having them run at a higher frequency.	3/28/2015 1:08 AM

98	Because I take transit all the time anyway!	3/27/2015 10:13 PM
99	No choice, dependent on the bud	3/27/2015 6:37 PM
100	I HAVE ALREADY ANSWERED THIS QUESTION	3/27/2015 6:30 PM
101	Less trips to freemont and Redmond	3/27/2015 5:30 PM
102	Not that big an impact	3/27/2015 4:42 PM
103	its the status quo, basically	3/27/2015 2:36 PM
104	I don't drive, so this plan means that I will be walking a lot more, both to get to the nearest bus stop, and because there will be no bus service at all between my house and my destination (e.g. grocery store). It appears that I will also have to transfer more times on some routes the get where I am going.	3/27/2015 2:21 PM
105	This doesn't seem to impact me as much as Alternative 1.	3/27/2015 2:03 PM
106	I tend to avoid northeast Seattle now because of the difficulty of depending on transit in that area. If this plan is chosen, I can't see that fact changing.	3/27/2015 1:54 PM
107	Again, it is my only method of transport.	3/27/2015 1:52 PM
108	I choose not to have a car.	3/27/2015 1:51 PM
109	I have no choice since I don't own a car I suppose you would be taking away my ability to leave my home and to visit/shop/explore	3/27/2015 1:46 PM
110	I would have to figure out how to efficiently get to the Light Rail, University Station.	3/27/2015 1:37 PM
111	The whole plan is too complicated to understand. I want to know what impact is has on regular trips I take, and I can't divine that from the maps provided. Would I take different routes altogether? Would I have to transfer? What about on the weekend? I couldn't figure any of this out.	3/27/2015 1:34 PM
112	I work in downtown Seattle, so I don't have other choices.	3/27/2015 1:27 PM
113	372 service on weekends and more frequently during the day	3/27/2015 1:21 PM
114	Infrequent and unreliable bus service to Light Link at the University of Washington.	3/27/2015 12:47 PM
115	No daytime service on NE 75th in View Ridge during the day. No daytime service for the 30 OR the 74.	3/27/2015 12:21 PM
116	It causes gaps in wait time which makes it longer to get anywhere.	3/27/2015 12:14 PM
117	I would still have my main maost used route, and I can't predict what would change.	3/27/2015 12:02 PM
118	same as alternative 1	3/27/2015 11:26 AM
119	I would probably see if faster connections would be offered by the hospital. If not, I would explore other options. I would wait for about 20 minutes at most.	3/27/2015 11:11 AM
120	My routes will for the most part be unaffected.	3/27/2015 10:50 AM
121	I have no choice but to use transit the same as my commute method for work; but it would be more inconvenient and cause a longer commute time.	3/27/2015 10:45 AM
122	I depend on taking transit to get to and from work reliably and on-time. If there are longer wait times or less predictable bus service, I will be forced to find another alternative.	3/27/2015 10:12 AM
123	I live in Montlake and take the 43 downtown and to stops in capital hill. This would be bad for me and for my 79 year old husband who takes the bus home every day between the University and Boyer. Changing buses would be extremely inconvenient as would a longer wait. Connecting to rapid transit in the u district would involve a long walk or a long wait to get there. WE have lived in Montlake for over 40 years and depend on the 43.	3/27/2015 10:10 AM
124	Most of the changes would likely not impact my commute, especially once the Madison BRT is complete.	3/27/2015 9:09 AM
125	Easier access to the Eastside and UW/Roosevelt	3/27/2015 8:44 AM
126	I still have to bus every day, but it would potentially make my commute longer.	3/27/2015 8:14 AM
127	it would not take me to my place of work	3/27/2015 7:51 AM

128	I might use transit the same or less...if there are less frequent buses at my stop, it will be more convinient to take my car to work rather than taking the bus.	3/27/2015 7:36 AM
129	I WANT to use Transit, but it would really depend on the actual schedules. If I have to wait 30 minutes between connections, then I would most likely use it less.	3/27/2015 7:27 AM
130	No improvement noticeable for me	3/27/2015 6:48 AM
131	Not sure if additional route options will be outweighed by longer wait times.	3/27/2015 6:42 AM
132	Better acces from Greenlake to Seattle Children's Hospital	3/27/2015 3:53 AM
133	I am not sure how to answer these questions. Metro needs to improve the bus frequency and connections between light rail and buses. In my case I want to get to Children's and with the soon to open light rail stations in UW and U District I could take light rail downtown or to Rainer Ave and get a bus home. But if these buses don't run frequently 7 days a week I end up having to drive to work	3/26/2015 11:41 PM
134	I could still rely on the #48. I'm unlikely to increase transit use under any plan because I already integrate it with cycling mode, and weather is the other main variable.	3/26/2015 10:36 PM
135	Less frequent service	3/26/2015 9:44 PM
136	This alternative doesn't make any substantive changes in north Seattle. It would still be really inconvenient to get around anywhere outside the U District in the evenings or on Sundays.	3/26/2015 9:07 PM
137	I have access to a car and could use that if I need to.	3/26/2015 8:58 PM
138	time effectiveness esp as a working mom	3/26/2015 8:34 PM
139	Same comment as under Alternative 1	3/26/2015 7:56 PM
140	It doesn't look like it changes anything for me and my neighborhood, but it could have just not been explained. In general, I really don't like the plan. It feels like a lottery- you better hope that you need the bus exactly when the buses come and to those locations. It seems overly complicated.	3/26/2015 6:50 PM
141	It would reduce my overall commute time if I could stay on light rail from Beacon Hill to UW and I especially like extending the bus routes between UW stadium to Seattle Childrens Hospital.	3/26/2015 6:36 PM
142	long wait times to transfer	3/26/2015 5:07 PM
143	Same as before, I use transit for almost all travel into Seattle and that likely wouldn't change.	3/26/2015 4:50 PM
144	I have to commute to work	3/26/2015 4:46 PM
145	Same as above.	3/26/2015 4:43 PM
146	Less frequent service would make public transportation an untenable option	3/26/2015 4:39 PM
147	It sounds like connections would get worse.	3/26/2015 4:36 PM
148	Frequent service is more useful than keeping the current routes -- ridership is up and it is often hard to get a spot on the bus. With longer wait times, this will not improve, and other modes of transportation are more desirable.	3/26/2015 3:21 PM
149	I use ST 522 (see earlier answer).	3/26/2015 1:27 PM
150	Would give me more options and make it easier to get around.	3/26/2015 1:06 PM
151	I don't see improvements in the routes I could use now but don't because they are infrequent and slow.	3/26/2015 12:50 PM
152	Same reason as Alternative 1, however Alternative 1 seems more appealing.	3/26/2015 12:16 PM
153	because I could take it to work	3/26/2015 10:11 AM
154	As stated previously, my commute is long enough and do not wish to spend more of my time commuting.	3/26/2015 9:54 AM
155	I need to use the bus to get to work, so I am stuck using it the same amount.	3/26/2015 9:52 AM
156	I will still have access to all the stops I currently use but with the added benefit of the Light Rail Service.	3/26/2015 9:13 AM
157	I would still have to get places. It would just be more of a hassle, and probably take longer.	3/26/2015 8:41 AM
158	If frequency decreases on my route (75) I might choose to use transit less.	3/26/2015 8:29 AM

159	No clear benefit	3/26/2015 8:09 AM
160	more options to get to work in timely manner	3/26/2015 7:39 AM
161	I live so close to school that any changes won't effect my normal commutes.	3/25/2015 9:11 PM
162	I would use transit more if it mean I could get to another neighborhood without a transfer.	3/25/2015 8:50 PM
163	My bus route is already very long and cumbersome and it sounds like it would increase wait times for my transfer making it not worth riding the bus.	3/25/2015 6:34 PM
164	loss of local service and frequency.	3/25/2015 5:29 PM
165	I would be forced to find another mode of transportation. I would be unable to use the new network to commute or to get anywhere else I would like to go on a regular basis.	3/25/2015 4:25 PM
166	If transit frequency were adversely affected I would not be able to commute to work as effectively.	3/25/2015 4:15 PM
167	less convenience for commute	3/25/2015 3:43 PM
168	nothing to make it easier to get to downtown from jackson park	3/25/2015 3:17 PM
169	Convinient	3/25/2015 2:50 PM
170	A lot depends on the actual schedules and whether I can make it work with my commute.	3/25/2015 2:34 PM
171	No changes in transit use, would probably not visit North Seattle often.	3/25/2015 2:17 PM
172	This concept wouldn't benefit my commute.	3/25/2015 2:14 PM
173	Every time you eliminate routes, it makes it harder to get a bus. Many shelters have been eliminated or are impossible to use so when it rains or when it's cold and rainy, there are few places to stand. Many people smoke at the bus stops (tobacco and weed) making it unhealthy and unpleasant to stand there. Also, you add routes or change routes initially but later the services that replaced the routes that were cut are also cut so you don't have the service you had initially and the new service is gone. For example: You cut routes because they were replaced by the SLU streetcar because of duplicate service. This weekend, the streetcar will be down all weekend for maintenance and no alternative that I can see for the service this replaced.	3/25/2015 2:05 PM
174	It does not make mass transit any more convenient or accessible for me.	3/25/2015 1:45 PM
175	I'm not sure it would directly affect me	3/25/2015 1:31 PM
176	I could make other connections for things I may want to do that are out of my reach currently.	3/25/2015 1:29 PM
177	A direct route from Kirkland to Seattle Children's would eliminate all the transfers and save so much time which would make it worth it to use the bus for my transportation.	3/25/2015 12:31 PM
178	I'm concerned with travel times. Alternative 2 would have me using the bus system in the same way that I do now.	3/25/2015 11:00 AM
179	In case of emergency, or a shorter work day, I could get home easier instead of having to plan ahead and drive to and from work.	3/25/2015 10:54 AM
180	The changes don't seem major.	3/25/2015 10:47 AM
181	Have to travel farther to reach a bus stop near my house.	3/25/2015 10:21 AM
182	Well, I already use the 373 twice a day, so I doubt I'll ride any more than that, even with changed levels of service. If I ride any less, it's because the 373 no longer serves my neighborhood, and I'll be forced to drive.	3/25/2015 9:15 AM
183	I don't want to have to xfr to light rail. it will add to my already long commute time.	3/25/2015 7:52 AM
184	I primarily use transit to commute to my downtown location of work.	3/24/2015 8:38 PM
185	I don't see much difference coming from the Eastside.	3/24/2015 6:02 PM
186	Since this doesn't bring more frequent service, it won't encourage me to use transit more.	3/24/2015 6:00 PM
187	I'm not completely sure, but for some trips, using transit at off-peak times might be more viable. I might even use transit more, but where there will be reduced frequency or farther walking, I might use transit less.	3/24/2015 4:27 PM
188	cheaper	3/24/2015 3:48 PM

189	I would drive mostly, from the university throughout northeast Seattle.	3/24/2015 3:43 PM
190	Again, I'm reliant on transit and would have to take what's offered.	3/24/2015 3:14 PM
191	You cut off my 71 all-day service and don't replace it with anything remotely as helpful; proposed rt 65 would get only marginal improved freq., and would force me to go through heavily congested areas of delay and long walks to access service all along the way. Again, where are the plans for sheltered walkway between Stevens and Stadium Station? Bus-only lanes on Montlake and Pacific? Cow-catchers on the fronts of buses on Stevens, to gently push away all the oblivious student pedestrians on their cell phones? (we've already tried Rt 65 through there!)	3/24/2015 10:49 AM
192	If I had to transfer to the link it would take my commute from double what it takes in a car to triple or more. I don't have that kind of time to waste.	3/23/2015 9:50 PM
193	The system would not drastically change for how I currently use it.	3/23/2015 9:18 PM
194	It wouldn't effect me as much where I'm currently at, but it could effect me if I have to move from where I'm currently at.	3/23/2015 3:40 PM
195	Since this option directly impacts/reaches the area where I live in shoreline, I would definitely use transit more, and I would be able to eliminate the driving portion of my commute.	3/23/2015 2:44 PM
196	Few changes to buses I use regularly	3/23/2015 1:36 PM
197	Transit would not be a realistic option for me outside of rush hour.	3/23/2015 1:12 PM
198	It doesn't appear to negatively affect my work commute, which is my main concern.	3/23/2015 1:05 PM
199	Your overall footprint is close to the same (current) one.	3/23/2015 12:53 PM
200	As above, no choice about how to travel for anywhere that's some distance away.	3/23/2015 11:25 AM
201	It's still the most practical commute for me.	3/23/2015 10:53 AM
202	Appears that there's direct service between route 44 and the new University link station	3/23/2015 10:40 AM
203	It sounds like it might take just as long as now.	3/23/2015 10:11 AM
204	I would continue to ride the 252, 257 routes.	3/23/2015 8:36 AM
205	Again, I go to the same places.	3/23/2015 8:23 AM
206	see previous statements	3/23/2015 7:52 AM
207	Alternative 2 retains Route 26	3/23/2015 6:22 AM
208	If the 255 were to continuing downtown and no place to catch it from NE seattle after the elimination of the montlake freeway station, this would require an extra transfer for me to get to work in kirkland. The 540 does not run frequently enough or stop in enough places. This would be a transit game changer for me and I would likely use transit much less. Since other eastside all-day routes to Bellevue/Redmond (271/542) have routes that get off at Montlake, it sounds reasonable that a Kirkland route (255) to Childrens as per alternative 1 will fill the gap.	3/22/2015 10:38 PM
209	I'm limited in what my choices are, except to say that many routes I use will be affected.	3/22/2015 10:06 PM
210	I already use transit as my primary form of transportation. I however believe with Alternative 2 it makes the wait time greater.	3/22/2015 6:58 PM
211	I have no alternatives	3/22/2015 5:29 PM
212	My ability to get from the UW campus to home via the 373 would be increased with having all day service.	3/22/2015 4:51 PM
213	No options.	3/22/2015 2:31 PM
214	If it's the same old poor, unreliable, infrequent service, I'd use it 'the same', i.e. pretty much not at all.	3/22/2015 2:18 PM
215	It keeps my bus route the way it is.	3/22/2015 1:31 PM
216	My needs for going to school on transit would not change. I would be able to use it to University Way more often though, which isn't actually all that often.	3/22/2015 11:32 AM
217	No car.	3/22/2015 11:21 AM
218	43 would come less often.	3/22/2015 9:40 AM

219	Still need to get to school no matter what.	3/21/2015 6:31 PM
220	I would drive to food shopping, banking and drug store in Wedgewood. Having a car would probably increase my use of other shopping areas.	3/21/2015 6:17 PM
221	I use transit to commute downtown daily. This would remain the same.	3/21/2015 3:08 PM
222	It would be very frustrating to have such disparate arrival times between the bus and Link services. If I needed to use the Link plus another service, I'd probably choose car2go or uber.	3/21/2015 6:45 AM
223	Depending on how long an Alternative 2 commute from Roosevelt to Eastlake would take, I might end up discontinuing my work in that area.	3/21/2015 12:15 AM
224	Again, because I don't have a car and use it all the time.	3/20/2015 11:32 PM
225	Gotta get to work every day regardless. If ride or wait times got longer, I would ride my bike more often though.	3/20/2015 9:21 PM
226	Alt 2 would not improve on a terrible tangle of slow and infrequent routes in north Seattle.	3/20/2015 7:55 PM
227	Frequency not high enough to overcome the advantages of driving.	3/20/2015 7:15 PM
228	I don't live in north Seattle and can't currently get there very often because transit times & reliabilities suck.	3/20/2015 5:28 PM
229	There isn't a lot that I can benefit from the east side.	3/20/2015 4:09 PM
230	These changes don't affect my usage.	3/20/2015 3:08 PM
231	I'd bike more. It's less convenient for me than the current bus routes.	3/20/2015 2:49 PM
232	because it wouldn't improve anything at all.	3/20/2015 2:13 PM
233	I use the bus to get to Redmond and if it would cut my routes (242 and 542) I would probably just drive in.	3/20/2015 1:57 PM
234	This alternative gives me roughly the same amount of benefit as it does service reduction. As a result, the pros and cons balance each other out.	3/20/2015 1:29 PM
235	I live car-free so my transit use is relatively static.	3/20/2015 1:28 PM
236	Still have to take the bus downtown for work.	3/20/2015 1:26 PM
237	Again, I'll drive my own car in and adjust to an earlier start time for work.	3/20/2015 1:25 PM
238	I expect Alternative 2 would resemble the status quo. Without more frequent service, it won't make it big difference.	3/20/2015 1:21 PM
239	Still need to get places when I don't want to/cannot drive	3/20/2015 11:47 AM
240	Not much changes for me.	3/20/2015 11:40 AM
241	As mentioned for option one this change also makes bus service less usable for people who don't have cars.	3/20/2015 11:04 AM
242	Transit is my only option. I am physically unable to drive a car. I need service to my area of the neighborhood and my best option is retaining the #43 bus route to get downtown.	3/20/2015 10:16 AM
243	There are no specific changes that I notice that effect me.	3/20/2015 8:48 AM
244	Same as above	3/20/2015 8:42 AM
245	My direct route from home to work would be preserved.	3/20/2015 8:26 AM
246	More alternative offers.	3/20/2015 8:19 AM
247	I would use bus service the same as before, but would use Link more often since the new Capitol Hill station is close to where I live.	3/20/2015 7:26 AM
248	It works great.	3/19/2015 9:49 PM
249	I'm reliant on the bus, so it would not change significantly (though I would perhaps take it more often on weekends with the routes consolidated). But I would be a far happier commuter/bus rider (especially with the 372 improvements towards Woodinville!).	3/19/2015 9:26 PM
250	I would be forced to consider how to get to destinations now served by #30 during the day and may have to resort to the use of a car. Having to transfer buses for so short a ride is maddening.	3/19/2015 8:04 PM

251	I have no idea what I would do. I would be up a creek.	3/19/2015 7:50 PM
252	Alternative 2 doesn't introduce any new or improved service that materially impacts my regular commutes.	3/19/2015 7:03 PM
253	With the loss of some close service right in my neighborhood, I would use transit less in off peak times and on weekends	3/19/2015 5:47 PM
254	This plan is very similar to the status quo, and what changes it has would not (except for 71) be relevant to my needs.	3/19/2015 4:55 PM
255	It would not be as convenient as far as timing goes. I would use Car2go more often to get out of my neighborhood. Missing a bus and waiting 15 minutes is much better than missing a bus and waiting 30.	3/19/2015 4:14 PM
256	You mess with the 49, and the 12 and eliminate the 43.	3/19/2015 3:52 PM
257	I mostly commute from North Everett to the U District. I personally do not bus much to places between those points.	3/19/2015 3:32 PM
258	Very likely longer wait times making other transport more appealing.	3/19/2015 3:17 PM
259	see above in question 10.	3/19/2015 3:16 PM
260	I don't want to drive and have to find regular parking in Seattle for my daily commute.	3/19/2015 3:13 PM
261	most likely I would use transit the same	3/19/2015 3:12 PM
262	Regardless of what changes, I am completely dependent on transit to get around so I can't change how often I use it depending on how "convenient". I have no alternatives.	3/19/2015 3:08 PM
263	I would still use transit more because of the frequency & reliability of light rail	3/19/2015 2:56 PM
264	Plan is very similar to existing structure, wouldn't significantly affect my plans	3/19/2015 2:37 PM
265	Alternative two does not represent much of a change.	3/19/2015 2:20 PM
266	I don't own a car, so I don't have any other choices if I want to go longer distances.	3/19/2015 2:11 PM
267	one of the routes was deleted (72) and another was moved farther away (73).	3/19/2015 1:48 PM
268	With the 48 still going to Greenwood, trips to the eastside would remain difficult and I would probably drive if I had to go there.	3/19/2015 12:29 PM
269	It wouldn't improve travel times enough for me to make trips up to that part of the city.	3/19/2015 12:06 PM
