270	What would be the impact of Alternative 2 on service to the South End?	3/19/2015 12:04 PM
271	Nothing changes for my routes.	3/19/2015 11:52 AM
272	If the 545 is still that slow, it's not going to help me. Plus, I need to ride it all the way to Bear Creek P-R, so having the bus turn around at Overlake is not good.	3/19/2015 11:14 AM
273	It sounds like the less frequent service would be an issue. The buses I currently ride that come every 10 minutes are much more convenient than the ones that come every 30 minutes. I think decreasing frequency could be a problem.	3/19/2015 11:01 AM
274	I don't use those routes much, now, so can't predict the future. I am without a car so have no alternative but bus service.	3/19/2015 10:59 AM
275	maybe less. It does not improve the problems with route 48 and the elimination f 48X.	3/19/2015 10:27 AM
276	to reiterate my above remarks, I don't think that we should be cutting services. We don't have a very strong route of public transportation and I think the light rail will help build up our transportation goals but I don't see how cutting the buses will help.	3/19/2015 10:17 AM
277	I don't use these routes now because these buses take too long, and generally I can park at the destinations, unlike downtown Seattle.	3/19/2015 10:06 AM
278	Doesn't seem to apply to me.	3/19/2015 10:03 AM

279	Please DO NOT ELIMINATE bus service (routes 66/67) on 5th Ave NE. It's too hard to get to the Northgate Transit Center or to Roosevelt, and if you do get to a bus stop on Roosevelt it will take forever to get to the Northgate Transit Center. I've had four hip replacements and I can't walk as far as I'd need to in order to get to a bus stop on Roosevelt or the Northgate Transit Center. It's a really dumb idea to eliminate bus service on 5th Ave NE.	3/19/2015 10:01 AM
280	It is my primary mode of transportation between home and work. This plan would likely not be any better/faster for me than my current choices, which would be a real bummer after looking so forward to improved commute times.	3/19/2015 9:39 AM
281	I primarily will be using it to commute to and from work.	3/19/2015 9:23 AM
282	Does not really change my transit services very much.	3/19/2015 8:46 AM
283	I'm nearly retirement age. I have arthritis in both hips and one knee and it would HURT LESS to bike or walk most of the time. And that's going to REALLY HURT	3/19/2015 8:38 AM
284	Need it for work. It might mean longer wait times though - it would depend where I'm going.	3/19/2015 7:46 AM
285	I think having frequent service is better just because I know that during peak hours, traffic is insane and there's already a lot of people waiting for metro. Even if light rail is more efficient and faster, it doesn't matter if people can't get there on time to ride it.	3/19/2015 2:08 AM
286	Still need to get to work in U district	3/18/2015 10:46 PM
287	I do not know the Alternative 2 concept in north Seattle	3/18/2015 10:14 PM
288	I don't want to walk 10 minutes (in the wrong direction) to Broadway and John to wait 10 minutes to take a 5 minute light rail trip to the UW stadium so that I can then walk 10 minutes to work (total of 35 mins) when I currently have a 25 minute commute on the route 43. That is regressive.	3/18/2015 8:54 PM
289	It wouldn't help me out at all. I'd still have to drive the same places I do now, because of non-existent bus service or bus routes requiring multiple transfers and all day to reach my destination.	3/18/2015 8:39 PM
290	N/A	3/18/2015 8:09 PM
291	Just as with the first alternative, more frequent service, especially late in the evening/night would increase my use of transit	3/18/2015 8:07 PM
292	I would have to see how it ends up being implemented and how it affects things like Doctor's Appointments and other necessities which is why I use public transit	3/18/2015 7:13 PM
293	The 75 is my main bus route which I need both on weekdays and weekends at non-peak times. Longer waits means I will not be able to make the connections I need regularly.	3/18/2015 7:09 PM
294	see above	3/18/2015 6:42 PM
295	Because I would be forced to.	3/18/2015 5:37 PM
296	Apps such as Nokia Here and One Bus Away, help to plan trips in advance.	3/18/2015 4:52 PM
297	ease	3/18/2015 4:25 PM
298	with lack of frequent service, i will have to drive to places instead of catching the bus/light rail	3/18/2015 3:45 PM
299	I will have to wait and see.	3/18/2015 3:31 PM
300	If it's much more trouble to plan and use transit, it will impact me. Pulling out stops (and making the distance greater between stops thereby) is VERY bothersome.	3/18/2015 3:15 PM
301	I love riding the bus	3/18/2015 3:13 PM
302	No real benefits especially for the future considering the light rail availability when you consider Alternative 1.	3/18/2015 3:03 PM
303	I don't have time to wait. I need to get to my destination quickly and reliably.	3/18/2015 2:46 PM
304	Same as reasons for Alt 1.	3/18/2015 2:44 PM
305	My commute would not be affected while still providing access to NE seattle.	3/18/2015 2:43 PM
306	It would be more difficult to get between downtown & my home in Maple Leaf during non-peak times.	3/18/2015 2:37 PM
307	Concerned that transfers may be difficult or lengthy	3/18/2015 2:20 PM

308	It would be harder for me to get to work in a timely manner.	3/18/2015 2:18 PM
309	I ride the bus to work	3/18/2015 2:02 PM
310	It is difficult to have to travel further to get to transit.	3/18/2015 1:52 PM
311	Stated above.	3/18/2015 1:49 PM
312	I'd be transferring more. It's hard for me to stand and wait with my disability.	3/18/2015 1:39 PM
313	I don't see any benefit to Alternative 2, so I'm not sure how it would change my current use of the transit system.	3/18/2015 1:37 PM
314	Possibly might go from using transit to using UW shuttle for meetings, if the 43 or 44 stop at UWMC was changed to be farther away from medical center than it is now.	3/18/2015 1:35 PM
315	Its still better than the current situation.	3/18/2015 1:35 PM
316	same as Alternative 1	3/18/2015 1:32 PM
317	As noted in my previous response, I have no other transportation options. I do not own a car and most of my transit use is to reach my work and UW campus. I would therefore continue to use transit, despite my dislike of this plan.	3/18/2015 1:23 PM
318	I use 271 & 556 routes to go between UWMC and Issaquah, NOT north Seattle. I use 271 most because of frequency of buses. 556 route is faster but not available during complete commuting hours. Park & rides are full in Bellevue and Eastgate, making my commute very logistically challenging. I'm happy to walk, bike to make connections to light rail or bus. I just need better parking, more frequent direct routes similar to 556.	3/18/2015 1:21 PM
319	or possibly less; transit needs to accomodate growth and changes in modal trips; please anticipate mode shifts to transit as density and population increase and roadways and parking undergo capacity management	3/18/2015 1:19 PM
320	Some weekend services up to at least Lake City would be helpful because then I could hop on 522 from there.	3/18/2015 1:18 PM
321	I'd like to be able to have good access between Ballard or the UW and the airport. I live in Ballard, so having connection between the 44 bus route and the light rail somewhere along the way would be helpful.	3/18/2015 1:14 PM
322	Right now I only use transit for my home-to-work commute. With this model I would not extend my use of transit and I would still be limited, as now, to not having great routes directly to Childrens or Roosevelt.	3/18/2015 1:12 PM
323	See Above	3/18/2015 12:46 PM
324	if it goes to more places and is more frequent I would use it on my days off because parking is a disaster in downtown Seattle and the eastside.	3/18/2015 12:44 PM
325	I use the bus for certain weekly activities, which will not change.	3/18/2015 12:39 PM
326	I use public transit for my travel within Seattle almost exclusively.	3/18/2015 12:26 PM
327	I would use transit the same amount, but I'd be a happier camper with a shorter bus commute to Shoreline.	3/18/2015 12:24 PM
328	I don't like 30-min wait times. I would use my vehicle or Uber instead for fear of delayed buses or missing a bus. 15 min is tolerable, 30 min alters your whole day in the case of a missed (or delayed) bus.	3/18/2015 12:19 PM
329	It's unclear what impact it would have on my region (Lake Forest Park)	3/18/2015 12:17 PM
330	The less frequent rides don't really help me at all. This alternative is essentially just losing the 72 for me with no benefit.	3/18/2015 12:16 PM
331	I see nothing that improves the East/West travel in and out of Ballard. I want to use transit, but I can't justify the additional time away from my child.	3/18/2015 12:07 PM
332	Longer wait times. It would be easier to drive myself.	3/18/2015 12:06 PM
333	Transit is my only alternative. Your plans both make my commute worse.	3/18/2015 12:02 PM
334	If transit times were increased, getting a car would be more beneficial.	3/18/2015 12:00 PM
335	I almost always use Metro to get to work at the UW from Jackson Park.	3/18/2015 11:59 AM
336	I have been doing fine with the current waiting time. So with more services on NE 75th to U district, downtown, etc, I will be using it more often	3/18/2015 11:55 AM

337	Same answer as above.	3/18/2015 11:55 AM
338	that is my only mode of transportation	3/18/2015 11:53 AM
339	I am a medical professional and need to be able to routinely and predictably get to work at any time of the day. By implementing these changes you will have cut off my access to the majority of the routes that I currently use to get to work.	3/18/2015 11:52 AM
340	I might drive from Lake City to the University instead of taking the bus on some days.	3/18/2015 11:51 AM
341	So long as I work at the UW, my daily commute will largely be the same and conducted the same number of times per week. The Light Rail will likely be far too crowded to justify its use; I'd rather take the bus than get crammed into the Light Rail.	3/18/2015 11:50 AM
342	The 49 between Capitol Hill and U-District won't change.	3/18/2015 11:49 AM
343	Same concerns as with alternative 1- Not a fan of changing the 16 that much. I would love to see services retained North of 92nd, up to 105th. The 345 and 40 do not come often enough for me to feel comfortable that an alternate is possible.	3/18/2015 11:48 AM
344	I will continue to use transit to travel from my home in Bellevue to school at the University of Washington because it is easier, faster, and cheaper than driving.	3/18/2015 11:47 AM
345	limited routes for taking only one bus to destination	3/18/2015 11:46 AM
346	no added benefits to me in this scenario.	3/18/2015 11:45 AM
347	same as I experience now with Metro.	3/18/2015 11:45 AM
348	Alternative 2 is not good for me. My commute on 373x already takes 50 minutes from the Shoreline park and ride to UW campus. Add on the time it takes to drive from home to the park and ride, and I spend 2 hours daily commuting via transit. This already takes too long. I would have to find some other way to get UW campus that would require a bus change and take longer.	3/18/2015 11:44 AM
349	Like I said, I might have to start driving if I can't get to and from work safely.	3/18/2015 11:40 AM
350	Same deal as Alt 1 - I'd still commute by bus, etc.	3/18/2015 11:39 AM
351	No impact on transit routes.	3/18/2015 11:36 AM
352	I take the Water Taxi from Vashon Island to downtown and board the bus at Pioneer Square. Since the water taxi is only once per hour, I don't know if it would still be possible to get to work at 45th Ave NE and Brooklyn efficiently with the proposed cuts to direct bus service.	3/18/2015 11:35 AM
353	I currently use the 71, 72, or 73 to access my job in the U-District every day. I would continue to be able to use transit since the 73 would run during off-peak hours. Without all-day service, I would have to look in to driving to work.	3/18/2015 11:32 AM
354	The 43 is the only bussing option for my area that does not require significant walking time at the start or end of my trip. Less frequency in service on this route would likely increase the number of times I would opt to drive during the week for the sake of convenience.	3/18/2015 11:31 AM
355	I have meetings in Cap Hill/First Hill sometimes, and will drive to work when I have these meetings, like I currently do.	3/18/2015 11:31 AM
356	Because I would have the option of riding the 12 downtown, or taking light rail. To UW, I could either take light rail or 43/48. It expands my transit options rather than restricts.	3/18/2015 11:31 AM
357	My bus route would be the same and that means a bus stop will be near by.	3/18/2015 11:30 AM
358	Ditto	3/18/2015 11:29 AM
359	I'm not sure of the "less frequent" model, when above you just highlighted a bunch of route with "Frequent, all day service".	3/18/2015 11:28 AM
360	Transit that runs often allows me to just assume that transfers will work with limited waiting. If bus service runs every 30 min, I might have an hour extra wait-time for a trip that takes 2 transfers. No good. This limits my ability to hop on buses on an ad-hoc basis without significant advance planning.	3/18/2015 11:25 AM
361	Would have to evaluate my travel options when the plan is finalized to see how I can get back and forth to work from Meadowbrook to the UW Tower.	3/18/2015 11:25 AM

362	Same concerns about option 1 - in addition to fearing that the 73 route will be impacted from coming from downtown and causing further northbound service delays in getting home from work.	3/18/2015 11:24 AM
363	I currently have a reasonable system. However, I need off peak hours when I come back from downtown. It is a pain when all the buses north are cut off.	3/18/2015 11:24 AM
364	Please see same comments as for Alt #1.	3/18/2015 11:24 AM
365	Doesn't seem to affect my routes.	3/18/2015 11:22 AM
366	It would be less convenient for me to use this alternative for my daily commute forcing me to re-think my options.	3/18/2015 11:20 AM
367	Too long to wait. I can walk or drive and park faster than waiting for the bus.	3/18/2015 11:19 AM
368	It depends on whether the bus stop closest to NE 75th St would move, and if route 75 would go directly to the link light rail station at Husky stadium. Right now I drive, because to get from NE 75th and sand point to SLU would take bus 75, then a transfer at UW to a SLU shuttle - for a total of 1 1/2 hrs, while driving takes 20 minutes. If my commute time on bus/light rail would reduce significantly, I would consider not driving.	3/18/2015 11:19 AM
369	Same reason as above.	3/18/2015 11:13 AM
370	my bus would be retained	3/18/2015 11:12 AM
371	Like bussing vs driving	3/18/2015 11:10 AM
372	Because right now it's convenient, and with your change, it becomes a huge pain in the ass.	3/18/2015 10:53 AM
373	Waiting 30 minutes for a bus would be a barrier for me.	3/18/2015 10:47 AM
374	I still have to use transit to commute every day regardless of what happens, but this is a less good option.	3/18/2015 10:07 AM
375	I'm not entirely sure how this would affect my ridership.	3/18/2015 9:59 AM
376	see above. traffic is the biggest problem. It seems unwise to put bus routes on streets near on-ramps.	3/18/2015 9:56 AM
377	Less convenient.	3/18/2015 8:20 AM
378	wait times...love the frequency in alt 1	3/18/2015 1:19 AM
379	I do not use a car to travel around Seattle, but would enjoy faster service and going to businesses in U District more often	3/18/2015 1:05 AM
380	Preserving service in Pike/Pine allows me to get where I need to go with a one-seat trip. I am more likely to use this service to connect to the First Hill Streetcar and other destinations within Capitol Hill than I would be if this route were eliminated.	3/18/2015 12:16 AM
381	I would still be able to use Route 71 as my primary route and now would be able to use Route 68 as my secondary route during the day all week (except I wish it would end an hour later).	3/17/2015 7:10 PM
382	Alternative 2 sounds more like a less drastic approach to Alternative 1.	3/17/2015 6:00 PM
383	My most commonly used routes would not be changed much, if at all	3/17/2015 5:43 PM
384	seems like it would preserve most routes I currently use (though I recognize this isn't all about me).	3/17/2015 5:37 PM
385	Less waiting	3/17/2015 4:59 PM
386	Same answer as I provided for Alternative 1.	3/17/2015 4:43 PM
387	Again, I have few other options and will be forced out of my way to the far less convenient 372 bus.	3/17/2015 3:35 PM
388	Existing transit service provides a one-seat ride from my neighborhood to my office, and the convenience encourages me to make continuing additions to my use of transit.	3/17/2015 1:01 PM
389	I depend on transit for almost all of my transportation needs, and I would continue to do so.	3/17/2015 11:53 AM
390	I don't have a car, so I either use the transit or I walk/bike. I might walk/bike more with this plan.	3/17/2015 10:20 AM
391	More frequent routes	3/17/2015 9:25 AM
392	Less incentive to use transit.	3/17/2015 7:07 AM

393	I don't *need* to use the UW station for anything right now. I might well want to for some trips, but Alternative 2 doesn't provide nearly the incentive to attempt it as Alternative 1 does. Then again, it might still be easier to get to Capital Hill. With Alternative 1 it's easier to see how it might change my behavior.	3/17/2015 1:21 AM
394	Because it would make it more convenient to get to the Microsoft campus on the weekends even during off-peak times.	3/17/2015 12:07 AM
395	The main line I use will be unchanged, so my habits will likely not change much, but with the light rail to U district/downtown, I might use transit to go there more often.	3/16/2015 10:55 PM
396	See my comment about Alternative 1 as it applies to Alternative 2	3/16/2015 9:54 PM
397	Would continue to use transit from Eastlake	3/16/2015 8:48 PM
398	Need bus service to get to work and other places. Like the idea of options this plan provides, although it sounds slower than option 1.	3/16/2015 8:12 PM
399	committed to supporting transit	3/16/2015 6:10 PM
400	Alternative 2 will allow me to keep using transit	3/16/2015 5:46 PM
401	Limited routes and schedules	3/16/2015 5:25 PM
402	See above comments/concerns	3/16/2015 5:12 PM
403	Less frequency means longer connection times and less predictability, reducing my ability to plan workdays and increasing my commute time	3/16/2015 5:10 PM
404	I would use the 545 as I do today.	3/16/2015 4:59 PM
405	I currently use routes 545 and 542 most; they don't really change under alternative 2 so I think I'd continue commuting to work the same as I do today.	3/16/2015 4:44 PM
406	Alternative 2 looks the same for my neighborhood as far as I can tell.	3/16/2015 4:35 PM
407	On days when I had an appointment on pill hill, I'd drive instead of taking the bus.	3/16/2015 4:06 PM
408	Lack of safe options without long walks in the dark and rain.	3/16/2015 4:04 PM
409	I would use transit the same because that's how I get to work. But the changes might make my commute more difficult.	3/16/2015 3:14 PM
410	I intend to use transit the same, but if bike racks are full on ST 542, I will have to find an alternative.	3/16/2015 2:23 PM
411	I use transit when I need to. Wouldn't change my need so wouldn't change my use.	3/16/2015 2:21 PM
412	I am on 25th NE and 55th. I think it would give me more convenient transport to downtown areas on weekends, hence I would drive less to go downtown on weekends.	3/16/2015 2:11 PM
413	I would have no choice but to still use it. It will add about another 30 mins to my travel per day by having to walk from the 545/542 stop to to 148th AVE NE and NE 31th st There is no easy way to connect from the 542/545 to connect to 148th AVE NE without walking.	3/16/2015 1:22 PM
414	If I have to wait for 30~ mins for a bus to come I'd rather just drive.	3/16/2015 1:22 PM
415	If transfer times become longer, I might drive more.	3/16/2015 1:21 PM
416	I'm all for Trains, but the Trains don't go where I need to go and when they do it will be a 90 minute loop instead of a 30 min bus ride.... If I was going in and out of downtown Seattle it would be pretty good.	3/16/2015 1:03 PM
417	The 545 Exists Middy	3/16/2015 12:51 PM
418	None of my routes get better, so there's no change for me in this option.	3/16/2015 12:50 PM
419	I don't own a car and already rely predominantly on transit to get around the city and region.	3/16/2015 12:49 PM
420	I must use transit, I would like the change to ST 545 though.	3/16/2015 12:47 PM
421	because it would take longer. it already takes long enough and efficiency needs to be prioritized.	3/16/2015 12:39 PM
422	Hate that you are making my commute from Maple Leaf to Redmond take longer	3/16/2015 12:35 PM

423	I already use transit everyday during the work week, and since this would not increase my transfers (or travel time) I would continue to use it every day.	3/16/2015 12:31 PM
424	Making a connection adds time to the trip, and can be uncomfortable when waiting outside in the dark at night. 15 min is not enough frequency to make a connection smooth, at least 5 minutes are required for that.	3/16/2015 12:29 PM
425	Currently using the Microsoft Connector and a Metro Van Pool, so unless the trip time is comparable or an improvement, I wouldn't change my commute.	3/16/2015 12:27 PM
426	Wait time.	3/16/2015 12:27 PM
427	This gives the choice from Maple Leaf to Downtown: transfer to light rail and maybe get downtown faster, but you can also stay on the bus the entire route if you'd prefer not to transfer. However I would miss the better connection to South Lake Union and Eastlake with the new 73 taking I-5.	3/16/2015 12:14 PM
428	My existing transit routes would be largely unaffected.	3/16/2015 12:14 PM
429	Because it will add time onto my commute, it will be easier and less time to drive to work.	3/16/2015 12:00 PM
430	I still need to commute from Bainbridge Island to my job in Redmond. I can't move from Bainbridge due to my wife's job and taking a car across the ferry is prohibitively expensive per month and does nothing to help the traffic situation. No matter what alternative is chosen, I will still commute at minimum 10 trips per week.	3/16/2015 12:00 PM
431	For commuting purposes my use of transit wouldn't change, ditto for most non-work transit use. The revised 71 route would give a one seat bus option to Sand Point for soccer games in Magnuson Park.	3/16/2015 11:55 AM
432	Because I moved here for it and even if you make it suck, I'm stuck here now.	3/16/2015 11:51 AM
433	still requires 2+ bus rides from Madrona to Bellevue (my daily work commute)	3/16/2015 11:51 AM
434	I primarily use public transit to get to/from work in Redmond.	3/16/2015 11:50 AM
435	Unsure on impact right now.	3/16/2015 11:49 AM
436	I predominantly take the 545	3/16/2015 11:49 AM
437	Loss of the Montlake station makes it very difficult to get from Overlake to Fremont / Wallingford.	3/16/2015 11:47 AM
438	This change will make my commute via the metro take considerably longer and inconvenient	3/16/2015 11:46 AM
439	Harder to get to Redmond from Wallingford with less 545 service.	3/16/2015 11:46 AM
440	Longer walk times to the Husky Stadium station	3/16/2015 11:45 AM
441	I would still be more connected but it would take a lot more planning.	3/16/2015 11:40 AM
442	I would be forced to connect at Montlake to travel between Redmond and Green Lake. The addition of Lightrail service between the U District and downtown is irrelevant to my commute.	3/16/2015 11:33 AM
443	I would get angry with the service and use taxis instead.	3/16/2015 11:30 AM
444	Less reliable, less consolidated. The problem with our bus system is that you have a choice between two bus stops, both 10 minutes away, and a gamble about which bus is going to come, how late, if ever. With Alternative 1, both of those buses would come to the same stop and service would be more frequent. More frequent=more reliable=more people being able to stand our crappy bus system=more \$=more buses=even better service...right?	3/16/2015 10:53 AM
445	Some routes getting cut is a concern, but the light rail opening should mitigate that some.	3/16/2015 10:46 AM
446	As I don't have a car, I'll need to continue using transit.	3/16/2015 9:13 AM
447	As mentioned above, I bike commute. However, it's nice having the option to take the 16 directly without having to go through downtown.	3/16/2015 8:44 AM
448	Lower frequencies mean transit is less convenience and I would be forced to seek more expensive options to get where I need to go.	3/16/2015 7:23 AM
449	n/a	3/16/2015 7:16 AM
450	I use transit as my main way of getting places in Seattle	3/15/2015 8:21 PM
451	I work in North Seattle it's easier to use mass transit, especially since my employer subsidizes its cost. If there is no transit connection (either by bus or by light rail), then I will carpool with my neighbors.	3/15/2015 5:03 PM

452	Route 75 is already unbearably packed. I can never find a seat, and sometimes get passed by, when UW is in session.	3/15/2015 2:34 PM
453	Route 75 is already unbearably packed and often must leave riders behind. It would be a major problem for many if this continued or worsened.	3/15/2015 1:55 PM
454	As stated above, this doesn't change my primary travel much (I use the 74 for my commute). But I like that it retains the #71.	3/15/2015 12:01 PM
455	Less frequent service makes it less usable.	3/15/2015 9:14 AM
456	This alternative maintains the routes closest to my house that get me to downtown and many other destinations without walking or a transfer.	3/15/2015 8:53 AM
457	Bus transit is my only way of getting to my workplace at the University of Washington Medical Center.	3/15/2015 8:25 AM
458	It doesn't really affect the routes that I use the most	3/14/2015 10:27 PM
459	I would be far less likely to use the bus to get to downtown Seattle with the modification of the 71 to end in Roosevelt. All other services remain just as infrequent as they are currently.	3/14/2015 10:08 PM
460	I worry about walking to the Roosevelt station from my home. The station opens in 2021, I will be 70. I worry that my options of entertainment will be more limited in the evenings due to infrequent service across town.	3/14/2015 4:48 PM
461	I am happy with my present links between Uptown and the U. District, but I would take light rail if it significantly shortened my travel time. I am also concerned with how far I have to walk between bus stops.	3/14/2015 3:11 PM
462	More routes would remain the same on Alternative 2. I wouldn't have to learn new stops or do more transferring. The cut in bus service from Lake City to the University District Retail Core (the Ave) and the Roosevelt District because of the loss of the Route #72 is definite negative on both plans.	3/14/2015 2:57 PM
463	I would still use the 76 for my View Ridge to downtown commute, but the loss 71 without the frequent 16+65 grid would make me less likely to use transit on weekends or evenings.	3/14/2015 11:39 AM
464	Unsure.	3/14/2015 11:30 AM
465	Same comments as alternative 1	3/14/2015 10:38 AM
466	Currently I don't use transit in that area due to infrequent and indirect routes requiring several transfers.	3/13/2015 6:38 PM
467	I'm not sure what you are wanting to do other then take away our buses.	3/13/2015 6:09 PM
468	Not much would be changing on routes I use often, so I would ride just as often as I do now.	3/13/2015 5:14 PM
469	Since most of the routes I ride wouldn't change mostly. Getting from downtown to university district would take longer though.	3/13/2015 4:52 PM
470	N/A	3/13/2015 3:52 PM
471	I don't drive, so I still have to use transit, but I will have to walk more, and I will have to allow more time to get anywhere because of the walking time, and because of having to transfer more times.	3/13/2015 3:31 PM
472	No choice, I gotta get to work, right.	3/13/2015 1:51 PM
473	I need it	3/13/2015 1:01 PM
474	I don't know	3/13/2015 12:36 PM
475	This alternative doesn't sound like it would offer me much of anything in the way of enhancements over how I ride today.	3/13/2015 9:46 AM
476	Long wait times, less effective in reaching Cap Hill	3/13/2015 7:58 AM
477	Reduction in frequency with no alternative means I would have to drive.	3/13/2015 7:27 AM
478	I primarily use transit for commuting to work.	3/13/2015 7:07 AM
479	Reduction of frequency of neighborhood routes would make it necessary to use my car.	3/13/2015 6:54 AM
480	76 for peak rides only.	3/12/2015 11:11 PM

481	I go everyone on the bus currently.	3/12/2015 11:07 PM
482	I can access service with alternative 2, while alternative 1 results in my isolation from accessible service.	3/12/2015 10:14 PM
483	not sure how this would be different than what we have now	3/12/2015 9:24 PM
484	I certainly wouldn't use the light rail station, with terrible bus connections and long waits. I guess I'd do what I'm doing now.	3/12/2015 8:49 PM
485	It would be more convenient.	3/12/2015 5:35 PM
486	I use transit a lot now and hope to continue to be able to do so.	3/12/2015 4:33 PM
487	Depends on the frequency of route #11	3/12/2015 4:08 PM
488	I already use transit very little, given that I work from home.	3/12/2015 3:37 PM
489	It's even worse access than what Maple Leaf has currently.	3/12/2015 2:35 PM
490	Because of less 373 run - I do not want to wait at bus stop for a long time. AS for 73, cutting the bus route short at north end will be problem since number of neighborhood do not have adequate side walk + light to walk after sun set. With crime rate going up in that area, i would not want to walk in dark, on street. I rather would drive.	3/12/2015 1:56 PM
491	Alternative 2 doesn't help me get to my destinations more conveniently.	3/12/2015 1:50 PM
492	I already use transit 5x a week for commute to and from work It would keep my schedule easy without and transfers.	3/12/2015 1:34 PM
493	I would still use transit the same amount - to travel between my workplaces and to travel to/from home and work.	3/12/2015 12:43 PM
494	I hate waiting for a bus that only comes 30 minutes.	3/12/2015 11:46 AM
495	I don't know if I would use transit less, since I already ride somewhat regularly, but it certainly wouldn't allow me to take advantage of living near Capitol Hill Station as much as Alternative 1 would. It's time we make major improvements to improve bus reliability and get places more efficiently. Alternative 2 just doesn't accomplish that.	3/12/2015 11:37 AM
496	While not ideal, I find a way of getting where I want to go even if it takes longer.	3/12/2015 10:58 AM
497	Possibly more direct route to work	3/12/2015 10:06 AM
498	It wouldn't affect my travel time and options by much	3/12/2015 9:14 AM
499	No change in the routes I use.	3/12/2015 9:04 AM
500	Service is less = use transit less	3/12/2015 8:01 AM
501	I currently commute to Fremont by bus and would likely continue to do so. If connecting to the link station were inconvenient (due to long transfer times), I would be much less likely to use it.	3/11/2015 10:14 PM
502	Because I live downtown and don't travel to outlying areas that often (save for Redmond), there really aren't any major changes for me with this plan.	3/11/2015 7:32 PM
503	This alternative seems like it would result in slower travel times overall. If I can ride my bike to my destination faster, then why take a bus?	3/11/2015 4:35 PM
504	I would end up driving from Shoreline to Redmond basically everyday, the only transit option I see would require stringing 3 buses together, which would take over 2 hours and not be at all practical.	3/11/2015 4:08 PM
505	I don't want to wait too long for the bus	3/11/2015 1:53 PM
506	I would be less inclined to ride a bus if I knew that I might have to wait at a bus stop for a long time. It would be more tempting for me to just hop in my car. Or walk.	3/11/2015 1:38 PM
507	I need to get to work and will use whatever bus/light rail service is fastest.	3/11/2015 1:21 PM
508	I commute via bus.	3/11/2015 12:46 PM
509	Again, the changes to the 16, it is the route I use most being close to Meridan and it's direct link to downtown.	3/11/2015 12:27 PM
510	Because my service levels aren't directly affected on my work-commute. Overall, random or supplemental rides don't account for a sustainable nor forecastable amount of transit use on my part.	3/11/2015 11:37 AM
511	These changes don't effect me as much	3/11/2015 11:31 AM

512	this alternative doesn't really apply to me	3/11/2015 11:14 AM
513	As above	3/11/2015 10:23 AM
514	Because it would be impossible to get anywhere on time, and impossible for my kid to use Metro to get to school and back.	3/11/2015 10:19 AM
515	Living on Beacon Hill, my primary transit mode is Link. Without frequent connections to local bus service at ALL stations, my use of transit is limited to destinations within 1/4-1/2 mile of the stations. Frequent transfers opens up a much larger part of the city. I won't rely on infrequent connections (3/hour or less), and will choose other, non-transit modes to get there.	3/11/2015 10:12 AM
516	Direct connection to light rail would get me to take the bus / rail combo more often than I might otherwise. But only if the service were sufficiently frequent that I wouldn't end up sitting & waiting for Laurelhurst bus forever.	3/11/2015 9:24 AM
517	Depends on connections between 271 and 68 or 372	3/11/2015 8:39 AM
518	71 across 65th street will be great, but every 30 minutes is not quite enough for it to be really convenient. I'd use it occasionally.	3/11/2015 8:05 AM
519	No clue on how this is going to impact the 311, and no mention about the 522 is it going away?	3/10/2015 9:50 PM
520	See above answer for alternative one.	3/10/2015 9:28 PM
521	Loss of Route 43 (and alternative walk time to nearest light rail stop) means time to get to Capitol Hill or downtown increase to the point where it make more sense to drive.	3/10/2015 9:17 PM
522	372X is same in both alternatives.	3/10/2015 8:48 PM
523	No major changes to my destinations.	3/10/2015 8:27 PM
524	Better options and reliable service.	3/10/2015 7:32 PM
525	No improvement over status quo	3/10/2015 6:59 PM
526	I believe when the light rail is active (particularly when the University District station is completed), I'll be using the 44 to connect to the light rail to get downtown, or to the airport, more frequently than I would have.	3/10/2015 6:10 PM
527	see above	3/10/2015 6:00 PM
528	Despite no change in frequency of route 74 & 75, connection with Link light rail at University station will make transit work better for trips to points south of downtown.	3/10/2015 5:40 PM
529	I have more options to walk or bike to UW light rail station and travel times will be faster between there and Swedish hospital where I work 12 hr shifts, like most nurses at that work place.	3/10/2015 5:26 PM
530	The routes I use transit for now are still supported.	3/10/2015 4:41 PM
531	I am dependent on Metro Transit for all my travel throughout King County, so I'd have to go on using for everything.	3/10/2015 4:39 PM
532	I will use the light rail more than I use the bus due to speed of getting downtown, and that will be true regardless of whether Alternative 1 or Alternative 2 is put in place for me to get from home (77th NE and NE 37th Ave) to the University Link station. However, Alternative 2 will make it much less convenient to get to the Link station and therefore I will not be able to use light rail as much as with Alternative 1.	3/10/2015 4:20 PM
533	Long waits and transfers	3/10/2015 3:56 PM
534	Less frequent bus arrivals makes it more convenient to drive rather than bus.	3/10/2015 3:52 PM
535	It appears that the 16 and 26 bus do not continue service along third or fourth Avenue far into downtown thus requiring more connections.	3/10/2015 2:46 PM
536	As I don't have a car, I would still rely on transit the same as I do now.	3/10/2015 2:31 PM
537	Alternative 2 is vastly inferior as a functional transit network to Alternative 1. I hope Alternative 1 is the selected alternative.	3/10/2015 1:25 PM
538	Tough to judge something I've never done.	3/10/2015 12:25 PM
539	I depend on the 16, despite the inefficiencies of the on-time factor.	3/10/2015 11:18 AM
540	It is mainly the current system.	3/10/2015 10:40 AM

541	Because it keeps Route 11 service to Madison Park.	3/10/2015 9:48 AM
542	I can get the 311 from where I live and get into downtown Seattle without all the drama and foolishness of Alt 1. Whatever happen to simple, simplicity. I will not be forced to take Alt 1 just to pay for and justify the Link system that don't make no sense.	3/10/2015 8:13 AM
543	My use is occasional in this area, not for commuting	3/10/2015 5:46 AM
544	Longer wait times	3/9/2015 10:03 PM
545	What we have now sucks. Metro can do better, and Alt 1 shows how.	3/9/2015 8:44 PM
546	While it doesn't really matter to me which Alternative is implemented, I'd like to see more people use transit, and cutting and spreading service to cover larger areas with less routes doesn't seem encouraging to promote ridership.	3/9/2015 8:40 PM
547	It seems like it would not be a big change from the status quo.	3/9/2015 8:27 PM
548	You don't provide enough information.	3/9/2015 8:15 PM
549	Would keep my commute just as difficult	3/9/2015 7:03 PM
550	Currently out of regular travel bounds	3/9/2015 5:56 PM
551	again it would depend on ease of access and around the clock bus routes from maple leaf/northgate to the UW medical center for SHIFT WORKERS	3/9/2015 5:42 PM
552	I am really looking forward to light rail and the street car ADDING to my existing ability to use transit!	3/9/2015 5:34 PM
553	Because i commute by bus & utilize the 8 & 11 routes heavily.	3/9/2015 5:22 PM
554	Have to get around the sound somehow	3/9/2015 4:36 PM
555	The #25 would connect me with the Light Rail Station and with downtown! Perfect.	3/9/2015 4:24 PM
556	I'm committed to using transit.	3/9/2015 4:22 PM
557	More time consuming.	3/9/2015 3:26 PM
558	I can't predict the future so I can't see what these changes will mean for me. I didn't think eliminating my #11 bus stop on 1st Ave would significantly to my commute and it does - negatively. More time consuming for me. I have to sketchy people. It's a super crowded bus stop which sucks, my previous bus in front of the hammer man was pleasant and beautiful - no more of that. I am ready to commute as a single person in my car.	3/9/2015 3:14 PM
559	I would use transit the same because of lack of alternative, but I dislike waiting lengthy times for transit.	3/9/2015 3:12 PM
560	I would probably have to find a new place to live that was on a bus line. :-(3/9/2015 3:01 PM
561	Service not necessarily reliable to access.	3/9/2015 2:48 PM
562	Long wait times might be the straw that pushes me into the car more.	3/9/2015 2:19 PM
563	I would use transit about the same amount, I imagine, though I might use the routes a bit differently. It would be nice if NE Seattle could have routes with frequency better than 30 minutes or worse. It is almost pointless to try to bus on Sundays.	3/9/2015 2:17 PM
564	I already use transit to get to work in Fremont. This concept would not improve my commute. It would stay about the same...	3/9/2015 1:40 PM
565	Without increasing efficiency, I'm more likely to use transit the same or less.	3/9/2015 1:35 PM
566	I would have access to UW light rail station	3/9/2015 1:20 PM
567	The 43 would run less frequently, so with less options to the U-district or Cap Hill, I'm driving	3/9/2015 1:01 PM
568	I'd still use transit because it's cheaper than parking near my work.	3/9/2015 12:46 PM
569	Essentially, the 74 becoming a two-way service would effectively replace the 30, which I currently rely on during peak hours to get me to work and back, and the addition of the 71 would provide added options.	3/9/2015 12:04 PM

570	The new light rail station doesn't help me get to downtown faster (with the extra walking added in), and doesn't help me get between East Cap Hill & Maple Leaf at all.	3/9/2015 11:52 AM
571	I'd still use the UW Link station to go to the airport.	3/9/2015 11:50 AM
572	I would depend on overall travel time.	3/9/2015 10:45 AM
573	I still have to get to work 5-6 days per week, and use Metro each time.	3/9/2015 10:36 AM
574	longer transfer times	3/9/2015 10:26 AM
575	Have to get to work everyday no matter what.	3/9/2015 10:18 AM
576	You have eliminated my ability to use the bus. I live on NE 80th. Distances are too far for me to walk to catch a bus. Congratulations -- I'll be forced to go to work in my car and pay over an hour's worth of wages to pay for parking.	3/9/2015 10:08 AM
577	I prefer the transit method but it could be annoying if I can't access the link unless I continue to go Downtown first. Alternative 2 doesn't take into account most people's refrain from taking public transportation, it takes too long, so the more buses to direct places, more often is the only thing that will get more people on the buses.	3/9/2015 10:02 AM
578	I would use transit less than if Alternative 1 were implemented.	3/9/2015 10:01 AM
579	Because I live on the most eastern portion of Maple Leaf, during weekends or non-peak bus times I have to take the 72 or 73 to get to/from downtown. If that service moves to Roosevelt I'd have quite a long hike up hill to reach all day bus service.	3/9/2015 9:55 AM
580	Not much change except for UW link connection. Wait times are problematic.	3/9/2015 9:52 AM
581	From where I live the bus service would be more compatible with my needs.	3/9/2015 9:50 AM
582	This alternative would not really affect me at all.	3/9/2015 9:22 AM
583	Most of my trips are between NW Seattle and downtown (including points in between); my occasional transit trips to NW Seattle, UW, and Capitol Hill would probably not be affected by this alternative.	3/9/2015 9:17 AM
584	How does it effect travel form & to Seattle from the South end	3/9/2015 9:06 AM
585	Again - if there is no bus I drive -for example tryingto get to Belluvue from Bryant neighborhood.	3/9/2015 8:35 AM
586	My primary routes (74, with 71, 72, 73 and 76 as alternates) are unchanged, and no service additions help me.	3/9/2015 8:31 AM
587	It changes very little as far as connectivity, and doesn't integrate the new light rail station particularly effectively.	3/9/2015 8:16 AM
588	I typically take the 48 from Greenwood to other areas of the region (Central District, transfer to Kirkland), so I would just keep doing that.	3/9/2015 8:02 AM
589	It doesn't make any of the benefits in Alternative 1 and leaves out the frequency enhancements along most routes, plus there are no new connections from the Central District.	3/9/2015 6:34 AM
590	There aren't a huge amount of changes. It doesn't really take advantage of the new light rail connection very well.	3/9/2015 2:41 AM
591	I use transit to commute to work.	3/8/2015 9:45 PM
592	It will take me longer to get downtown and to the U District (not campus) and the service will be considerably less reliable than what I use now.	3/8/2015 9:23 PM
593	Not enough improvement for Ballard to UW/U-District.	3/8/2015 9:23 PM
594	See above.	3/8/2015 9:19 PM
595	More access to a disabled person	3/8/2015 8:52 PM
596	My commute from Ballard to Sand Point would not be affected so I would use transit in the same way I do now.	3/8/2015 3:40 PM
597	None of my bus routes are listed as changing.	3/8/2015 1:12 PM
598	fewer routes mean I'm less likely to use the bus or light rail	3/8/2015 11:36 AM
599	Alternative 2 doesn't appear to impact the routes and stops I use regularly.	3/8/2015 10:22 AM
600	It's hard to follow exactly what the changes are and how it will affect my travel. I avoid trips now where I have to transfer downtown, or in Int dist or where I'd need to transfer more than once.	3/8/2015 9:08 AM

601	Better service between my area and downtown	3/8/2015 7:17 AM
602	Alt 1 just seems like Metro randomly picked bad ideas and created a package out of it. I do, however, like the idea of revising the 73)	3/8/2015 3:24 AM
603	Because I may have access to bus service (convenient distance to bus stops and not having to take 5 different buses to get 10 miles) that didn't previously exist.	3/7/2015 11:25 PM
604	Infrequent buses get slower everyday as more traffic comes from new residents and jobs. Need to consolidate with frequent network plan.	3/7/2015 7:40 PM
605	Alt. 2 provides more frequent service on more routes.	3/7/2015 6:20 PM
606	I'd use it the same because I've still got to get to work.	3/7/2015 5:14 PM
607	Service to my neighborhood does not improve.	3/7/2015 5:09 PM
608	It hasn't happened yet so I do not know how it will affect me. What really happens is not what is proposed in most cases.	3/7/2015 3:16 PM
609	availability. I would only use it though if i could get to/from it to my car to drive home....if it is not safe, i will be driving.	3/7/2015 2:16 PM
610	There's very little change to transit.	3/7/2015 2:11 PM
611	Once again, it doesn't affect my primary transit routes.	3/7/2015 1:07 PM
612	The frequency of bus service from/to UTransit station	3/7/2015 12:44 PM
613	same thoughts as for concept 1	3/7/2015 12:19 PM
614	Because I could not safely get to my home near NE 56th St and Roosevelt Way NE from these public transit options. Also, long wait times for connections defeats the purpose of a single north south rapid transit route. If people have to wait unreasonable lengths of time, they'll drive.	3/7/2015 12:09 PM
615	better connection to UW link station using route 68	3/7/2015 11:42 AM
616	There wouldn't be a bus that I could use. I can't walk the distances and would have to use a car thus spending more of the retirement income for other than my food and medicine.	3/7/2015 11:24 AM
617	It doesn't change anything, but transit has the potential to be much more useful to me under alternative 1.	3/7/2015 10:53 AM
618	Nothing would really change.	3/7/2015 10:43 AM
619	The service frequencies wouldn't improve enough to make new choice trips practical for me. My commute would still be well served, though.	3/7/2015 10:05 AM
620	Transit still avoids the need for parking and gas	3/7/2015 9:34 AM
621	I wouldn't have easy access to the light link rail station so I would not see much benefit. Also the less frequent route 71 along 65th street would make it painful to get downtown during off peak hours.	3/7/2015 9:31 AM
622	I'm hoping route 73 will be more consistent than the combined 72/73 today; the 72 is often late while the 73 is usually on time, so the intended spacing often doesn't work out in practice.	3/7/2015 8:54 AM
623	What was alternative two? We need reliable, frequent service from north Seattle neighborhood centers to the UW stadium station (same bus comes every 5-7 minutes), especially at rush hour and commute times.	3/7/2015 8:53 AM
624	Nothing functionally changes in the network beyond the light rail extension for those who live in other neighborhoods. The alternative 1 changes spread out much broader through the city network to greater effect.	3/7/2015 8:44 AM
625	I don't use transit now and this alternative would not encourage me to use it.	3/7/2015 7:54 AM
626	The frequency of the buses I use wouldn't change from today, so I would bike instead to get where I need to go on time.	3/7/2015 7:46 AM
627	If more buses available, especially on the weekend, will go out more.	3/7/2015 7:01 AM
628	This is roughly the same as the current situation.	3/7/2015 6:28 AM
629	No direct service	3/7/2015 1:06 AM
630	I generally use the route 40 sometime the route 44	3/7/2015 12:51 AM

631	It's basically the same service for me.	3/7/2015 12:44 AM
632	i would not use transit more. Time constraints from Alternative 2 could cause me to use transit less often.	3/7/2015 12:14 AM
633	I use the printed schedules when taking less frequent routes, although that's often hapless for those busses coming from downtown.	3/6/2015 11:29 PM
634	If alternative 1 was implemented, my general level of disappointment at the lack of progress in Seattle transit would increase.	3/6/2015 11:12 PM
635	I don't have a car and need to use transit.	3/6/2015 10:17 PM
636	nothing improves	3/6/2015 10:13 PM
637	Use transit to get me to the nearest light rail station as quickly as possible.	3/6/2015 10:11 PM
638	If it takes too long to get somewhere, I will use another method of transportation even if it costs more.	3/6/2015 9:17 PM
639	It would make it quick and easy to take transit to downtown, easier yet if there were evening service.	3/6/2015 8:35 PM
640	Again - I'd use transit a similar amount because my most useful route -- the 44 -- is not improved. But - this alternative is less useful than Alt. 1.	3/6/2015 8:32 PM
641	Alt 2 just maintains the inefficient status quo.	3/6/2015 8:19 PM
642	This is pretty much the same inefficient network we currently have.	3/6/2015 8:17 PM
643	I don't use these buses to begin with	3/6/2015 8:12 PM
644	It doesn't aid in reducing the time during my commute.	3/6/2015 8:10 PM
645	The apparent disappearance of the 27, 14, and 7.	3/6/2015 8:04 PM
646	alternative 2 changes seem more modest....so we would create less chaos after implementation ...if reality doesn't actually improve.	3/6/2015 8:03 PM
647	Same comment as in Alternative 1.	3/6/2015 8:03 PM
648	I tend not to use it now, since I just moved to the Madison Park area and don't have a clue as to the trip timing to go back and forth between home and my frequent destinations. If I knew I would not have to wait more than 15 minutes during peak times and won't get stranded downtown at some ungodly early hour (like 12) when I want to come home, then I'd use transit more, without feeling I needed to carry cab fare in my wallet just in case.	3/6/2015 7:57 PM
649	Again, I expect my routes to change once I'm out of school.	3/6/2015 7:55 PM
650	It's basically no different from the current network.	3/6/2015 7:50 PM
651	I would drive more because the buses are less frequent, making travel times too long/inconvenient	3/6/2015 7:47 PM
652	My use of transit would increase if there were direct access connections to Husky Stadium from NE Seattle via 25th Avenue NE and Sand Point Way.	3/6/2015 7:42 PM
653	I can always bike or walk	3/6/2015 7:42 PM
654	I would now be able to ride the bus to my sister's home.	3/6/2015 7:40 PM
655	Well it sounds like more runs during off peak hours would remain if I understand the plan correctly.	3/6/2015 7:21 PM
656	Harder to get places. Longer waits for buses	3/6/2015 6:53 PM
657	I would still be able to walk to my bus stop and get all the way downtown without transferring, important for an elderly person. Getting home at night would remain safe and convenient.	3/6/2015 6:19 PM
658	Though the bus network wouldn't improve much, I would use it more simply because of the light rail extension.	3/6/2015 6:17 PM
659	Less reliable and frequent service makes it much more likely for me to get a car.	3/6/2015 5:51 PM
660	Less pickup times means I have to either not go anywhere or walk.	3/6/2015 5:50 PM
661	Plan 2 keeps my bus route.	3/6/2015 5:45 PM
662	Less frequent service / longer wait times are a dis-incentive to you transit.	3/6/2015 5:38 PM
663	Duh...see above	3/6/2015 5:37 PM

664	deletion of one of my most frequently used routes!	3/6/2015 5:29 PM
665	I would have access to more geographic locations with fewer transfers.	3/6/2015 5:19 PM
666	Transit time to University Ave would increase by 20 minutes. That's double commute time from Wedgwood.	3/6/2015 5:17 PM
667	more coverage to outlying areas, more convenient locations to get to/from bus.	3/6/2015 5:12 PM
668	It depends how frequently the later (after 8pm) routes would run.	3/6/2015 5:11 PM
669	Route 372X would be great.	3/6/2015 5:09 PM
670	Doesn't offer much improvement over current state.	3/6/2015 5:04 PM
671	It presently takes (usually) about half an hour (dependent on traffic) to reach the airport by car during offpeak hours. Presently, taking at least 2 buses to get Downtown from my house then taking Light Rail to the airport would take a LOT longer, so I never do it. If Alternative 2 really increases wait times on bus routes to get to the University Light Rail station, taking it to the airport would remain unfeasible.	3/6/2015 5:01 PM
672	There isn't anything particularly compelling about Alternative 2. In fact, it *reduces* my service compared to today.	3/6/2015 4:49 PM
673	I have no choice -- I don't own a car.	3/6/2015 4:48 PM
674	Transit is my primary mode of transportation to work M-F, and I am unlikely to change that.	3/6/2015 4:45 PM
675	no significant changes to 48	3/6/2015 4:43 PM
676	I already use transit as my primary source of transportation	3/6/2015 4:28 PM
677	The main route that I use to get to key places on the Eastside (242) will be much more difficult to access by public transportation if no buses go there.	3/6/2015 4:26 PM
678	Insufficient reliability as traffic worsens in Seattle over time, especially compared to Alternative 1.	3/6/2015 4:18 PM
679	I would like to wait and see the progress made from the public discussions before I would decided on this matter.	3/6/2015 4:10 PM
680	Neighborhood not part of the alternative	3/6/2015 4:10 PM
681	Because it would not offer convenient travel to stores, medical appointments, the library, my exercise facility, my family and my friends.	3/6/2015 4:08 PM
682	I would continue to drive to destinations in NE Seattle	3/6/2015 4:07 PM
683	It's worse, but less so than Alt 1.	3/6/2015 4:04 PM
684	If I had to travel that far, it would be worthwhile to ensure that transit is offered frequently at peak and non-peak times for customer satisfaction.	3/6/2015 4:03 PM
685	Doesn't really affect my current travel patterns	3/6/2015 4:02 PM
686	Because I rely on transit for everything I do, and I go all over the city.	3/6/2015 4:00 PM
687	I would try to use transit less because trips would take longer and be less convenient with longer wait times	3/6/2015 3:58 PM
688	I would still have the route I use regularly as well as access to the extended light rail.	3/6/2015 3:56 PM
689	I would have more availability on the weekends to use it.	3/6/2015 3:43 PM
690	My needs won't have changed.	3/6/2015 3:41 PM
691	As I mentioned, transit is my preferred way of getting around. Access to downtown is key.	3/6/2015 3:37 PM
692	See above	3/6/2015 3:32 PM
693	Again, my main use of transit is between home and work.	3/6/2015 3:31 PM
694	It likely won't change things too much in my neighborhood, although if I miss the bus, I'd rather drive than wait half an hour for the next one since most places I'm trying to go are about half an hour away and it doesn't make sense to sit there when I could be getting there when the next bus gets there.	3/6/2015 3:28 PM
695	No car	3/6/2015 3:27 PM
696	I have not other option.	3/6/2015 3:27 PM

697	Slower, less convenient, fewer available stops/transfer points	3/6/2015 3:21 PM
698	I don't have a choice, but I would be significantly less happy with travelling if I had longer wait times.	3/6/2015 3:20 PM
699	longer wait times are a dis-incentive	3/6/2015 3:18 PM
700	Depends on the specific routes and times changed.	3/6/2015 3:18 PM
701	It really depends on the frequency of what you offer.	3/6/2015 3:16 PM
702	Longer waits and more complicated transfers.	3/6/2015 3:14 PM
703	44/5/E & D are my most used routes now and in the imediate future.	3/6/2015 3:10 PM
704	see above	3/6/2015 3:10 PM
705	because I primarily go from UW or Northgate to Bellevue	3/6/2015 3:10 PM
706	I don't like not being able to ride on one bus north of 92 around to the transit center, This is especially difficult for seniors and others who are mobility impaired. This route as is provides service to several medical facilities, banks, pedestrian entrances to Northgate Mall. Taking that away is inconsiderate and unnecessary.	3/6/2015 3:09 PM
707	I go with what ever get me there	3/6/2015 3:04 PM
708	Same reason as for Alternative 1: I don't travel from north Seattle locations to other north Seattle locations very often.	3/6/2015 3:02 PM
709	I wouldn't change any of my commute.	3/6/2015 2:59 PM
710	I would use the 12 going to 19th...wish it still looped around to Pike!	3/6/2015 2:59 PM
711	For people over 70, less convenience means less likely to use it.	3/6/2015 2:58 PM
712	I would have to figure out how to get to Eastlake from Broadview without the option of taking the 66 from Northgate.	3/6/2015 2:53 PM
713	I don't have a car and depend on transit completely, so I don't really have a choice to use it less.	3/6/2015 2:53 PM
714	No car	3/6/2015 2:53 PM
715	Less frequent service	3/6/2015 2:51 PM
716	I have to use transit anyway (I work in Redmond generally)	3/6/2015 2:48 PM
717	You would keep the route I use.	3/6/2015 2:46 PM
718	I wouldn't decrease my use, but I wouldn't journey to new neighborhoods using transit that I use a car to access now.	3/6/2015 2:45 PM
719	I don't drive. My first choice for transportation is Metro.	3/6/2015 2:45 PM
720	I don't think this would really encourage me to go out anymore	3/6/2015 2:44 PM
721	I need to take the bus to the U.W. regardless if the bus rides were more or less frequent.	3/6/2015 2:43 PM
722	The improved frequency without drastic route changes.	3/6/2015 2:41 PM
723	Looks like nothing much will change from my point of view	3/6/2015 2:41 PM
724	You're leaving 28X alone.	3/6/2015 2:41 PM
725	Again--my primary transit is a van pool. Alternative 2 would keep using transit the same irritation it is now--never quite sure if/when a bus will arrive and whether there will be a seat, etc.	3/6/2015 2:40 PM
726	it doesn't look like this plan will impact me much, but I don't like the idea of cutting service and not coordinating between transit companies.	3/6/2015 2:40 PM
727	I'd continue to drive to the park and ride due to the lengthy ride time for more door-to-door bus options.	3/6/2015 2:38 PM
728	use transit for medical appointments mainly.	3/6/2015 2:38 PM
729	As bus routes are eliminated and shortened, I prefer to drive than to transfer.	3/6/2015 2:36 PM

730	when it takes more time to ride the bus oand light rail then it does now, I will drive. What use to be a 90 minute round trip for the bus is nowwell over 2 hours. My time is worth more then the savings of taking the bus or light rail.	3/6/2015 2:36 PM
731	It wouldn't really change anything for me.	3/6/2015 2:33 PM
732	BETTER CONNECTION TO LINK LIGHT RAIL STATION FROM NE SEATTLE.	3/6/2015 2:12 PM
733	less frequent = less reliable	3/6/2015 2:04 PM
734	Nothing will change for the primary route I use, the 75	3/6/2015 1:13 PM
735	Especially since there is so much traffic in NE Seattle partly due to I-5 I would use the buses a lot less because I think the buses would be a lot more unreliable and less frequent.	3/6/2015 12:01 PM
736	Less frequent service, less legible system	3/6/2015 11:51 AM
737	The minor connectivity changes to Link would provide a small, but not insignificant, improvement in corridors that I utilize the most, though relative to Alternative 1, the improvements would be a drop in the bucket.	3/6/2015 11:47 AM
738	No late night or weekend service on 15th Ave NE.	3/6/2015 10:49 AM
739	There are basically no improvements.	3/6/2015 10:14 AM
740	This alternative has all the problems of the current system. Why would I use it more?	3/6/2015 10:14 AM
741	I rely on transit, so I'd find a way to make it work (the same way I make the system work for me now).	3/6/2015 9:33 AM
742	The increases in 372X service make life easier, but it seems to make transfers to Ballard more difficult. It also stops service earlier than the 71.	3/6/2015 9:29 AM
743	Expanding the 373, along 15th Ave, would allow me to take this route more often.	3/6/2015 9:17 AM
744	I have no way to get my kids home from school except for them to walk 4 miles.	3/6/2015 9:07 AM
745	Again, parking is an issue at the UW	3/6/2015 9:02 AM
746	It's basically no change in service.	3/6/2015 8:47 AM
747	I don't travel to northeast Seattle or Capitol Hill as much as I would like. Alt 2 wouldn't change that.	3/5/2015 11:44 PM
748	Getting to Northgate (especially the north part) would be slightly easier.	3/5/2015 10:39 PM
749	See previous comments	3/5/2015 10:24 PM
750	The lack of frequent service in this network concept and Longer wait times for people connecting between very frequent light rail service and bus service that runs every 30 minutes (concepts for routes 25, 65, 68, and 75)	3/5/2015 6:52 PM

Q14 How would you improve Alternative 2 in north Seattle – keeping in mind that the goal of this network concept is to keep more coverage while still taking advantage of connections with new light rail service?

#	Responses	Date
1	i would add more frequent direct buses and maybe the buses that run more frequently now but make more stops or are considered redundant-maybe make those only every 30min-i notice they are less crowded anyway, but people utilize the extra stops...people are using them so they should be kept but if they aren't as crowded run them less frequently. if you force those people on to another route because their current route is cut, the new services that are direct and/or more frequent will become overcrowded or business may be lost b/c now these people lost their close bus stop and may not want to walk or drive to the nearest bus stop. maybe driving to the nearest bus stop isn't an option for them whether parking availability or access to a car	4/2/2015 7:38 AM
2	There is a proposed excess of express service while cutting local service, I would suggest the opposite approach. Local access is especially necessary if you expect people to take advantage of the light rail. Frequency and reliability mean little if the desired areas are ultimately not serviced.	4/2/2015 2:21 AM
3	Not sure.	4/1/2015 9:56 PM
4	Go with Alternative 1	4/1/2015 7:41 PM
5	It's obviously not prudent to run mostly-empty full-sized buses four times each hour, during off-peak periods, but if smaller shuttle buses were used for more frequent service, it would mean less passenger wait-time between rides, less fuel/energy consumption per trip, and for whatever it's worth: less wear-and-tear on the roads.	4/1/2015 3:40 PM
6	Keep frequent bus service on 15th Ave. NE	4/1/2015 2:55 PM
7	?	4/1/2015 9:03 AM
8	Better bus connectivity to the UW Link station is a necessity. There are so few lines that go to the UW Link station. It would be very helpful to have a free trolley that fills the gaps between the UW Link station and the Montlake corridor, U-Village, and west UW campus where the majority of student residences are.	3/31/2015 10:53 PM
9	See the idea presented for Alternative 1. Of course, a very frequent (every 10 minutes) direct bus to the light rail station in Northgate could change things, but ONLY if it entailed not having to cross streets (i.e., not having wait for crossing signals and traffic to stop) with the bus dropping off at point of entrance to the station. It would also have to stop at existing stops where service to the UW and downtown was being reduced or removed for bus service... and the combined trip of this feeder bus plus the light rail ride to the UW with any wait time should be equal to or less than the existing total commute time for a one-seat ride from the existing pick-up stop to destination stop... otherwise, people will opt for driving part (to the light rail station to park) or all of the way...	3/31/2015 10:44 PM
10	not sure.	3/31/2015 9:31 PM
11	I keep harping on trying to provide easy bus service to the University Village from North Capital Hill, or the Lite rail station to the University Village.	3/31/2015 6:29 PM
12	Look: I have a master's degree and was on high honor roll in the sciences at an Ivy League School. I DON'T KNOW. This survey is too complicated, and I don't have an hour to spend going back and forth between numerous conflicting options. Now, if I took one of your buses to the University District 6 miles away, I *would* have an hour with nothing to do but go back and forth between the poorly worded options, but then, there is no WiFi.	3/31/2015 5:43 PM
13	Keep the 43	3/31/2015 4:38 PM
14	No specific thoughts.	3/31/2015 4:06 PM
15	I would somewhat hybridize alternatives 1 and 2 by retaining existing routes 12, 25 (at least the south part) and 43 (at least from UW station to the south), while generally restructuring routes along the lines of alternative 1.	3/31/2015 3:48 PM

16	I honestly prefer Alternative 1 to Alternative 2. I would prefer we go with Alternative 1, but keep routes #43 and #25 as they are in Alternative 2.	3/31/2015 3:47 PM
17	Try to avoid gutting the service we currently have with Rt. 71. :-D	3/31/2015 3:35 PM
18	Look for places where the stated concerns of "experts" in specific problem areas can be mitigated; hybridize where it makes sense to do so to keep the service human.	3/31/2015 2:17 PM
19	No change to Route 43 - keep level of service as is.	3/31/2015 1:49 PM
20	needs some route similar to 72	3/31/2015 1:35 PM
21	maintain 43 frequency	3/31/2015 12:43 PM
22	If this alternative preserves the Montlake freeway stop, I would not want to change anything.	3/31/2015 11:29 AM
23	Don't delete routes without a similarly convenient replacement! Especially full routes!	3/31/2015 11:24 AM
24	The light rail won't benefit those living in NW seattle until it's extended further north and west. This is especially true for those destined for the East side of lake Washington. So don't delete routes like the 242, which is regularly full and not being replaced!	3/31/2015 11:20 AM
25	Keep route 43 on Metro as is.	3/31/2015 11:14 AM
26	Light rail doesn't help the north end, maybe changes should be more to the buses/areas where Light rail will help	3/31/2015 10:50 AM
27	Honestly, I'd prefer something closer to Alternative 1 as long as it can address the lack of service north of Northgate way for Pinehurst, Victory Heights, Jackson Park, and Olympic Hills	3/31/2015 10:37 AM
28	Continue bus service between Montlake and Downtown and the U District. How else are people supposed to get to the train?	3/31/2015 9:33 AM
29	Increase the frequency of 43.	3/31/2015 8:48 AM
30	Continue the 255 up to Magnuson Park	3/31/2015 8:22 AM
31	Need service at night and on weekends (including weekend nights).	3/30/2015 10:14 PM
32	What light rail?	3/30/2015 9:35 PM
33	Alternate bus arrival times between the 71 and 65 bus routes.	3/30/2015 9:22 PM
34	Same way as suggested for Alternative 1.	3/30/2015 8:48 PM
35	Run a 15 minute shuttle service from the Link Station to University Village, Laurelhurst/Seattle Children's Hospital, and through to Magnuson Park. Also run this later at night, as going to downtown for the concerts, sports, etc., ends closer to 11:00pm, not 6:00pm, and needs service on weekends, too.	3/30/2015 8:40 PM
36	Reliable connectivity with both systems is key. Quality = quantity = satisfaction = guaranteed.	3/30/2015 6:38 PM
37	I don't need light rail. The only improvement I can think of is to have Metro merge with light rail and Seattle Transit into one administration and stop spending a fortune on three different agencies? If you want to make improvements, this would be the most cost-effective way to go.	3/30/2015 6:29 PM
38	I don't need Light rail service but I do need access to buses within walking distance from my home (which is now two blocks from a bus stop). Why doesn't Metro merge with light rail and Seattle Transit into one administration and stop spending a fortune on three different agencies? If you want to make improvements, this would be the most cost-effective way to go.	3/30/2015 6:13 PM
39	I would enable the 271 to share some stop with the downtown-bound SR 520 routes.	3/30/2015 5:34 PM
40	The only way for someone on the west side of the city to get to light rail would be through very slow, very unreliable west-east connections that make far too many stops. I think this proposed alternative completely leaves all of NW Seattle out of the range of light rail.	3/30/2015 5:32 PM
41	I know it is years away, but start linking to the actual U district lightrail stop. Run more buses from Husky stadium- since it is in the middle of nowhere, there is no way to get anywhere from it. Make this temporary until the actual U district lightrail opens.	3/30/2015 5:27 PM
42	How about linking to the U district lightrail? I know it is several years away, but I would put those connections in now. Also, people who want to go to the U district are NOT necessarily going to Husky Stadium! There is no service from Husky stadium, so once you end the lightrail there, you are stuck there.	3/30/2015 5:20 PM

43	Same as I indicated for Alternative 1.	3/30/2015 5:14 PM
44	Increase frequency of service	3/30/2015 5:11 PM
45	Find more ways to connect the north end of the "Ave" (University Way) and 15th with the new Husky Stadium Link Station and/or with Downtown Seattle with more frequency, including during off peak times (evenings and weekends).	3/30/2015 3:00 PM
46	The Route 25 currently provides service to downtown. With the addition of light rail this is duplicated and it makes sense to reprioritize its use. However I would recommend refashioning it to become a feeder service to the new Husky stadium station. I would recommend a loop that connects Delmar, Harvard Ave E, Boyer to the new stadium. I would also create a more direct linkage to University Village using Montlake Blvd. The new stadium station provides new opportunity for people to use Transit who haven't used it before. To remove the route 25 at this time seems premature because the new station will create new service demand.	3/30/2015 2:49 PM
47	Generally, I have concern for any changes from Metro current service, UNLESS THERE IS AN INCREASE/IMPROVEMENT OF SERVICE (additional routes, frequency & buses). ANY PLAN THAT DELETES ROUTE 43 IS UNACCEPTABLE. ANY PLAN THAT REDUCES SERVICE TO ALL NEIGHBORHOODS, INCREASES WALK & WAIT TIME TO/FOR BUSES IS UNACCEPTABLE. Living in the west edge (7th to 8th Ave NE, NE 45th St to NE 47th St) of the U-District, using Light Rail is not really an option I will consider except for novelty from time to time or if going to SeaTac, which I never do. Both Alternatives appear to reduce service to my area of the U-District. I strongly suggest you should consider: Alternative 3 - Make no changes until it can be determined how the Light Rail University Extension affects transit and riders. No one actually knows how the Light Rail extension will affect NE Seattle. It appears to me Metro & Sound Transit are attempting to decrease service and force people to us Light Rail. With a 30-40K increase in population in King County each year, with say 10-15K increase in autos each year, why would you decrease any bus service? Light Rail will not outgain the population growth of the Seattle metropolitan area. Light Rail is just another option. Metro service will need to increase service to keep up. Or, the increasing "parking lot" we have on our roads will continue.	3/30/2015 2:40 PM
48	Having service both through UW and via Montlake/UW Station is unnecessarily duplicative (although I guess it can't be helped). Not a big fan of Alternative 2.	3/30/2015 2:19 PM
49	?	3/30/2015 10:49 AM
50	coverage could be expanded is you make more south county connections	3/30/2015 9:58 AM
51	I will connect to light rail when going north to Northgate	3/30/2015 9:56 AM
52	Don't know	3/30/2015 9:35 AM
53	make it more like alternative one	3/30/2015 7:16 AM
54	I think that the scheduling of buses could be adjusted. for example, the 10 and 12 buses come at roughly the same time and so staggering them would allow greater choices for riders.	3/30/2015 6:56 AM
55	I would like service direct from Eastlake to Capitol Hill. And more service to downtown.	3/30/2015 3:15 AM
56	I have no idea.	3/29/2015 9:23 PM
57	Provide regular, frequent service from Eastside to Seattle Children's or at least Montlake to Seattle Childrens	3/29/2015 7:44 PM
58	Have new route 62 operate on weekends. Introduce a service that directly links Children's Hospital to the "Ave" via NE 45th without going through the University of Washington.	3/29/2015 5:56 PM
59	Unknown .	3/29/2015 4:19 PM
60	Casual hull service should have a stop every 2 blocks, like the buses used to.	3/29/2015 12:51 AM
61	more frequent service times, buses coming every 15-20 min is important	3/28/2015 11:41 PM
62	1. continue current service 2. move bus stops for routes 25, 43 and 48 busses close to UW rail station (Husky station)	3/28/2015 9:23 PM
63	Looks great if your only goal is to go where the rail service goes. Unfortunately, most of us don't live that way. Improvement suggestions already listed apply to this one as well.	3/28/2015 7:37 PM
64	I would start the 373 earlier in the morning to meet the needs of 73's current early riders. The first southbound service should reach NE 145th Street around 4:45am. I would also start running the 347 and 348 sooner for the same reasons. The weekend 73 would have to start as early as the current 73. Also, the 347/348 would have to start even earlier than that so that passengers can make the connection to the University District.	3/28/2015 2:38 PM

65	Use route 16 from Alternative 1.	3/28/2015 12:14 PM
66	don't know	3/28/2015 10:44 AM
67	Break up long routes and begin each segment at the Link station in hopes of having busses at regular intervals.	3/28/2015 9:51 AM
68	Servie between seattle childrens bellevue and sandpoint	3/28/2015 8:52 AM
69	More 24 hour bus service.	3/28/2015 7:58 AM
70	I need frequent service between Fremont and Ballard (extending to Shilshole Marina), Fremont and Northgate, Fremont and University District, and Fremont and Downtown Seattle. Also frequent service between University District and Downtown Bellevue.	3/28/2015 2:31 AM
71	direct service to u district and downtown	3/28/2015 1:35 AM
72	Re-route #372 along Montlake Blvd., past the UW Link Station, instead to going onto UW campus (Stevens Way). This would give lots more people in N. Seattle direct access to UW Link station (not just the people who live along the proposed route 62.)	3/27/2015 9:11 PM
73	COMBINE SOME ASPECTS OF THIS WITH SOME IN ALTERNATIVE 1	3/27/2015 6:30 PM
74	Run buses more often	3/27/2015 5:31 PM
75	Still keep number of 271 buses running in the evenings from alternative 1	3/27/2015 5:30 PM
76	Difficult to say as everytime I try to look at Alternatives 1 or 2, this survey crashes!	3/27/2015 3:39 PM
77	implement alternative 1	3/27/2015 2:46 PM
78	I certainly want to keep more coverage, but this plan does not provide it for my neighborhood. The improvement for me would be to retain current routes/service for 71, 72 and 73.	3/27/2015 2:21 PM
79	not sure	3/27/2015 2:03 PM
80	Of course, if possible, increasing frequency would be good. But many, convenient bus stops are more important to more people than speed, to my way of thinking.	3/27/2015 2:00 PM
81	I would use Alternative 2 as a gradual phasing in of Alternative 1, which would give a clearer example of the routes that need to be kept in order to make travel more efficient with new Link stations.	3/27/2015 1:52 PM
82	again, you need a link to allow people to review what was said to be able to answer this question	3/27/2015 1:46 PM
83	Increase services (Access Program?) for those Laurelhurst residents with disabilities or are over the age of 65 between Laurelhurst and the University Light Rail.	3/27/2015 1:37 PM
84	To have the 65 and 271 service the link station.	3/27/2015 1:19 PM
85	More frequent stops, shorter wait times	3/27/2015 1:18 PM
86	n/a	3/27/2015 1:15 PM
87	Use Alternative 1.	3/27/2015 12:47 PM
88	See my answer to Alternative 1-- increase the all-day frequency of route 44, the major east-west route connecting many dense neighborhoods to light rail.	3/27/2015 12:42 PM
89	Keep the 71 route as is to give View Ridge daytime service. Keep at least one of the 30 or 74 in the daytime.	3/27/2015 12:21 PM
90	If we use smaller buses on a regular basis-- that is, research peak times for ridership on each bus route and use larger buses then but otherwise minimizing waste -- we could essentially help keep services expansive and inclusive for all.	3/27/2015 12:14 PM
91	I would scrap the concept all together, and redesign the light rail as a "spine" of the system, and use the buses as the "ribs" or branches off of the spine. I would set up larger transfer stations at each stop to facilitate transferring from one route to another. Think of the transit system of Mexico City, where the trains are the mass transit, and buses get people from the train to the farther outlying areas. It is highly efficient and very convenient.	3/27/2015 12:02 PM
92	connections from the U-dist light rail up to Sand Point/Lake City	3/27/2015 11:26 AM
93	Faster connection to Seattle Children's from Light rail.	3/27/2015 11:11 AM

94	1.) Make sure that there are safe routes for bicyclists traveling to/from the same location as the increased bus service. Greenways are good. Bike lanes are not enough--buses have to cross the bike lane twice every time they stop. Dedicated bike lanes with a physical barrier (like on Broadway) is MUCH safer for bicyclists. 2.) Have major bus hubs be close to light rail stations.	3/27/2015 11:01 AM
95	More frequent service	3/27/2015 10:48 AM
96	As most of the things in this current model do not affect me - I am not attached to the coverage it offers. I think more frequent direct service utilizing out new light rail is the best way to go, even it means some neighborhoods loose a few bus stops immediately outside their doors.	3/27/2015 10:13 AM
97	I live in Montlake and take the 43 downtown and to stops in capital hill. This would be bad for me and for my 79 year old husband who takes the bus home every day between the University and Boyer. Changing buses would be extremely inconvenient as would a longer wait. Connecting to rapid transit in the u district would involve a long walk or a long wait to get there. WE have lived in Montlake for over 40 years and depend on the 43.	3/27/2015 10:10 AM
98	Make Route 17 all day.	3/27/2015 9:29 AM
99	don't know	3/27/2015 9:01 AM
100	Connect Roosevelt & 45th and Convention Place Station area	3/27/2015 8:17 AM
101	not sure	3/27/2015 8:09 AM
102	For those of us headed to Children's Hosptial from North end (Kenmore, Woodinville), having fewer 65s and 75s is a problem	3/27/2015 7:59 AM
103	have frequent stops at Seattle Children's Hospital throughout the day	3/27/2015 7:51 AM
104	Connect Ravenna/ Bryant to new light rail station, run a route all the way down 25th to the station	3/27/2015 6:48 AM
105	not much you are offering here	3/27/2015 6:45 AM
106	Increase frequency on #71.	3/26/2015 10:36 PM
107	Instead of Route 74 becoming a two-way service turing peak periods, I would suggest the Route 74 become a two-way service which would run all day. This Route serves the Sand Point, View Ridge, Ravenna & U District extremely well and then goes towntown to the bus tunnel -- an excellent service which would service these areas without causing an increase in transfers and walking distance between transfers.	3/26/2015 7:56 PM
108	don't know	3/26/2015 7:38 PM
109	I wouldn't implement this plan. I would overhaul the transit system in general so that all public transportation is under the same agency. It's dumb how many options we have that are controlled differently. Coordination between those options is frustrating. Examples: King County Metro Rapid Ride South Lake Union Transit The Sounder The Lightrail The Monorail Pierce County Transit	3/26/2015 6:50 PM
110	I live right next to the Link Rail station in Roosevelt and would like to use Transit to go anywhere in North Seattle/Downtown directly, including Wallingford/Ballard.	3/26/2015 4:48 PM
111	I need a connection from UW Link station to Seattle Children's	3/26/2015 4:48 PM
112	Sometimes, especially late at night, I'd rather have more frequent/reliable coverage of certain bus lines than a wide coverage area with routes only coming once per hour or so	3/26/2015 4:45 PM
113	Can't you keep the large coverage while increasing frequency of service on the major routes.	3/26/2015 4:39 PM
114	more frequent bus service	3/26/2015 4:27 PM
115	Analyze which routes are used greatest by persons with special transportation needs -- reduce coverage only as necessary to improve frequency.	3/26/2015 1:27 PM
116	More 65 service to the UW station, dealing with the snail paced 64 buses and there very long 70 buses in order to get to north Wedgwood.	3/26/2015 12:50 PM
117	Continue the 255 up to Magnuson Park	3/26/2015 10:50 AM
118	Continue the 255 up to Magnuson Park	3/26/2015 10:11 AM
119	I would be taking light rail as the option becomes available	3/26/2015 10:02 AM

120	Don't get ride of Eastside connections such as 242 unless you're prepared to connect the Northgate TC to the light rail or Eastside (Overlake) another way.	3/26/2015 9:52 AM
121	Not sure if the whole concept is worthwhile for northeast, until the new stations open in 2021. Why should I think that busing all the way out to Husky Stadium and waiting for a Link train will get me downtown faster than a direct rubber-tire service? Why should I imagine that taking 73 down to 65th street and waiting 15 minutes (of longer) for a 71 will get me from Maple Leaf to Ida Culver / Ravenna nearly as fast as the current single-seat 68? Which alternative is more robust in the face of the city's campaign to reduce traffic capacity on its arterials? Metro connections aren't reliable now, and are bound to get worse.	3/26/2015 8:41 AM
122	No change to the 71 until the Roosevelt Link Rail station opens	3/26/2015 8:08 AM
123	could take light rail to avoid traffic	3/26/2015 7:39 AM
124	n/a	3/26/2015 7:35 AM
125	Increase frequency and create stops at the link on every possible route.	3/25/2015 8:50 PM
126	BUS FROM BRYANT TO BALLARD.	3/25/2015 7:58 PM
127	More frequent and local routes.	3/25/2015 5:29 PM
128	I would just go with alternative 1. Alternative 2 is a step down from current levels of service.	3/25/2015 4:25 PM
129	Change route endpoints to converge on or near new light rail stations, then provide shuttles to and from these nexus points as needed.	3/25/2015 4:15 PM
130	I'd choose Alternative 1.	3/25/2015 4:12 PM
131	dd	3/25/2015 3:43 PM
132	Don't eliminate on-campus stops at UW	3/25/2015 3:17 PM
133	I am sure the 73 service would be popular but it doesn't satisfy my perceived need for continuous service between downtown, SLU, Eastlake, Roosevelt, etc. That should be included somehow.	3/25/2015 2:58 PM
134	frequent service	3/25/2015 2:50 PM
135	Keep a Maple Leaf/Northgate to Wedgwood/U Village route.	3/25/2015 2:34 PM
136	Move a few stops but don't wholesale eliminate routes	3/25/2015 2:05 PM
137	Reinforce and establish ridership along the north-south light rail corridor between UW and Shoreline.	3/25/2015 1:57 PM
138	need route to Bellevue from Bryant that takes 30 min	3/25/2015 1:45 PM
139	More frequent service between UW Station and Seattle Children's and farther north.	3/25/2015 1:35 PM
140	na	3/25/2015 1:32 PM
141	Not applicable	3/25/2015 1:31 PM
142	I want alternative #1 please	3/25/2015 12:31 PM
143	More frequent travel opportunities. The Bothell and Kenmore (and West Kirkland) have high volumes of traffic. Making public transportation easier for folks (this includes more park and rides or alternative places to park in general) will encourage more use and less individual car usage.	3/25/2015 11:00 AM
144	More frequent service on major routes.	3/25/2015 10:47 AM
145	Ensure Maple Leaf remains connected to the areas around it.	3/25/2015 10:21 AM
146	Couldn't tell you.	3/25/2015 9:15 AM
147	I don't know	3/25/2015 8:56 AM
148	No comment.	3/25/2015 6:39 AM
149	Use Option 1. Leverage the light rail stops as a hub	3/25/2015 12:26 AM
150	I don't care	3/24/2015 8:38 PM
151	Go with Alternative 1	3/24/2015 8:02 PM

152	It's sort of hard to tell the difference between the two alternatives. The maps are awfully busy and confusing. It would be more helpful to list each Route and then show the difference between Alternative 1 and Alternative 2.	3/24/2015 7:19 PM
153	Not interested in improving Alternative 2. I like Alternative 1.	3/24/2015 6:00 PM
154	Extend light link rail to Kirkland.	3/24/2015 5:46 PM
155	Keep some off-peak service on 15th NE --it looks like everything will be on Roosevelt or 25th NE. Convince Sound Transit to add a 522 stop right before/after the express lanes at Lake City Way and 20th NE/85th.	3/24/2015 4:27 PM
156	Light rail is not intended for short runs like buses make. It's intended to make long runs between downtown Seattle and distant neighborhoods faster than buses. It should not be used in planning bus service except in scheduling efficient meetings. Your "network concept" needs to be re-conceptualized.	3/24/2015 3:43 PM
157	Increased frequency	3/24/2015 3:14 PM
158	Frequency of the bus routes in NE Seattle are mostly every 30 minutes at best, and sometimes 1 hour all day long (Sundays). Increasing the frequency to at least every 20 minutes, and extending that to every 30 minutes on nights/weekends would make the system more useful.	3/24/2015 1:16 PM
159	Transfers increase difficulties enormously, please make routes long and so very few (if any) transfers are needed.	3/24/2015 1:10 PM
160	You are jumping the gun regarding Link connections, as Stadium Station is a poor transfer environment; wait until Link gets a bit farther. Meanwhile, your proposal fails to provide, or even retain, service coverage in the NE Seattle doughnut hole you seem to be intent on creating, with or without the recent vote to "retain" service in Seattle. The Route 71 (current routing) has a good service design that has, until now, withstood the tests of time and served the NE area well (including the much deeper Seattle Transit cuts in the late 60s). Cut it off from downtown, if you must, but drop the needless extension to Magnuson Park, and retain the 71 service through View Ridge and Wedgwood.	3/24/2015 10:49 AM
161	parking garages or expanded lots for cars at stations is important. If people can't get there and find parking, then they may as well just take the bus	3/24/2015 9:36 AM
162	Route 48 needs more buses between UW and north Seattle--they do not come as frequently as listed on the bus schedules. It would be nice to have the 48x back, but include it more than 1 or 2x per day--it was too infrequent for it to be well utilized. We'll need more Park and Rides within Seattle.	3/24/2015 8:09 AM
163	More frequent Eastside-UW connections, not just peak hours. Light rail does not benefit Eastside commuters.	3/24/2015 6:55 AM
164	Keep the 71 bus running through Wedgwood and View Ridge as it currently does. This allows non-transfer bus service all day between Wedgwood and downtown, while looping through the U District. It's very difficult for physically disabled to stand and wait and transfer.	3/23/2015 1:12 PM
165	You actually need both. Unless you have more streetcars, dedicated bike lanes for scared people like me to bike, and more light rail stops, I'll be driving 2 miles to work daily or walk 20 min to a stop, wait for a the light rail, take a one stop to downtown, walk up to work on the hill. Basically a bus ride and walk to work that would have been no more than 20 min now is close to 45 min - I might as well walk since walking via google maps is 54 min and I don't have to wait for a train/rail/streetcar!	3/23/2015 12:53 PM
166	Drop the notion that light rail is a serious alternative for a significant number of people now using the bus. Keep in mind that while it may be so many minutes between the U-district & either Capitol Hill or Downtown, how many minutes must be added to get to the U-district station from any given person's starting point?	3/23/2015 11:25 AM
167	Maybe split the 48 into two shorter routes? Would decrease the number of late buses that tend to stack up in rush hour.	3/23/2015 10:53 AM
168	Continue route 44 to the University Link station. One bus ride to the link station	3/23/2015 10:40 AM
169	Don't know.	3/23/2015 10:11 AM
170	Northgate-U District route (this time 73) moves to 5th again, for the same reason I mentioned it in Alt 1 If this includes an all-day 373, shift that to Roosevelt (15th between Northgate Way and about 80th doesn't feel like it needs full-time service)	3/23/2015 8:23 AM
171	see previous statements	3/23/2015 7:52 AM
172	Have a stop for ST route 522 between Lake City and downtown, maybe I-5 at NE 45 St or Lake City Way & NE 80 St. Or for a Metro equivalent route. Concept is to provide night service between Bothell/Kenmore/Woodinville & NE Seattle. Better night service to Lake City would also solve this.	3/22/2015 10:48 PM

173	Incorporate the 255 plan from alternative 1, as that both increases coverage and frequency to both downtown and the eastside, for neighborhoods where good downtown and eastside service is hard to use.	3/22/2015 10:38 PM
174	Please don't neglect Northgate and its ability to reach to larger areas of Seattle. I don't want to feel isolated.	3/22/2015 10:06 PM
175	Increase frequency of the 26x and ensure an easy connection tips to the university district from Wallingford	3/22/2015 5:29 PM
176	Neither alternative provides good connections from lower Wallingford to Link. If you want people in Wallingford to ride Link then extend one of the 30 routes that goes via 40th to swing by the Link station via Pacific instead of routing through the UW campus a quarter mile away, on the other side of a massive, pedestrian-unfriendly three-way intersection. This seems like a no brainer - what do you have against Wallingford residents?	3/22/2015 4:18 PM
177	I have no suggestions for this. Without the increase in frequency of Alternative 1, I see Alternative 2 as "same [stuff], different day". If the connections to new light rail services have the same unreliability and high latency of today's service, the new services are mostly irrelevant to me.	3/22/2015 2:18 PM
178	More buses on route 73. It is always crowded when leaving downtown or the U-District to head to North Seattle neighborhoods.	3/22/2015 1:31 PM
179	Bus stops go through light rail stations, but until you have more stops or streetcars, you need the buses	3/22/2015 1:23 PM
180	Why not have both? Try it out. You cannot have too much mass public transit.	3/22/2015 1:02 PM
181	I think it is important to keep more coverage and to keep in mind that even with the two new light rail stations, there will be a lot of distance between stations where buses are still the only feasible transit option. As I mentioned above, the 43 and 48 on 23rd are already often overcrowded during peak hours, and reducing the frequency of the 43 without increasing the frequency of the 48 in those hours would probably make this worse for passengers on this stretch.	3/22/2015 12:00 PM
182	Again, I would look for outside influence from cities that have working (And excellent) bus systems.	3/22/2015 11:32 AM
183	If you're going to reduce the 43 service, you need to do a better job of staggering the 43 and 48 times so that the 2 different buses don't arrive at the same time leaving a gap of 30 minutes without any bus.	3/22/2015 9:40 AM
184	Connect Wedgwood (that means 35th Ave between 75th and 85th) to View Ridge / Hawthorne Hills and the U District.	3/21/2015 6:17 PM
185	Keep schedules the same all day, every day. Peak/weekend changes are extremely confusing for riders.	3/21/2015 12:34 PM
186	i think we should be adding more and being less modest w/ the changes if possible so im a stronger advocate for option 1	3/21/2015 10:54 AM
187	Not sure if this plan included removing some service from Montlake (?) but please don't do that! There are more college students sharing houses here than you might think.	3/21/2015 9:22 AM
188	The best option would be increasing frequency of busses while maintaining the current geographical coverage. I'd rather increase service given the choice of only one.	3/21/2015 6:45 AM
189	Please keep the 16 on North College Way/Meridian Ave.	3/21/2015 1:00 AM
190	More frequent service	3/21/2015 12:58 AM
191	Please keep at least one non-freeway route similar to the current 66.	3/21/2015 12:15 AM
192	I'm really not sure. All of the neighborhoods that I wrote about needing access to for Alternative 1 would still apply here.	3/20/2015 11:32 PM
193	I wouldn't improve Alt 2. I would scrap it.	3/20/2015 7:55 PM
194	Not bother with it.	3/20/2015 2:13 PM
195	Just go for Alternative 1. It's better.	3/20/2015 2:02 PM
196	Have a direct route to Microsoft's Redmond campus	3/20/2015 1:57 PM
197	Looks like the County is pushing the person taking the survey towards alternative 1. Surely a more expensive option. How about the County does alternative 1 at the same cost as alternative 2 while reducing overhead in other areas?	3/20/2015 1:48 PM
198	Stop the small amount of consolidation and revision that remains in this alternative. This is almost beneficial to the region's transportation, and moving more in this direction could actually result in improvements.	3/20/2015 1:29 PM

199	Make sure there are still multiple stops along Eastlake Ave.	3/20/2015 1:26 PM
200	You cannot make one neat little package work for everyone. You're catering to Seattle and screwing the Eastsiders. We do not all live in the same demographic areas. My taxes have been paying for lightrail for years in King County I have never used. I take a bus to and from work in downtown Seattle (Westlake) to Brickyard PNR five days a week. That's 10 times a week. Now, you're asking me to be flexible and create an even longer commute than what I'm enduring already. I want to get on a bus and go home and get there without it taking over an hour. I only live 15 miles from downtown Seattle, seriously! Quit catering to Google and Amazon.	3/20/2015 1:25 PM
201	I understand the hesitation to make big changes, but Alternative 2 is leaving too much of a bad system in place. We need the kind of changes in Alternative 1. I would suggest making Alternative 2 at least a bit more like Alternative 1. The biggest issue is frequency. Long waits mean many people choosing to drive, and a worse experience for those like me who put up with it. Also, ideas like making the 26 express and rerouting the 16 are important. Long local routes are too unreliable. We need more expresses.	3/20/2015 1:21 PM
202	Pay for it with the same pass system that covers Metro busses.	3/20/2015 12:25 PM
203	As much of a grid as you can make out of it, still keeping decent frequencies	3/20/2015 11:47 AM
204	I would keep the direct rout from Green Lake to Redmond as the light rail service doesn't solve that in any way, and there are no other good options in this plan.	3/20/2015 11:04 AM
205	Extend Bus Route 246 to Clyde Hill/ Yarrow Freeway Station.	3/20/2015 8:44 AM
206	Nothing comes to mind.	3/20/2015 8:26 AM
207	Increase the frequency of Route 71, all day and weekend service.	3/20/2015 8:06 AM
208	I have already figured out all the ways that I will get to use the new light rail service. Using existing buses, walking and using the new streetcars. I am excited about the present new alternatives that will be available (with Alternative 2). Alternative 1 takes away my flexibility and does not offer any benefits.	3/19/2015 9:49 PM
209	I think this achieves the goals of the concept very well. I'm concerned about the routing of 73 along University Ave. which is the slowest of the current routes through the U-district. I think adding other transit improvements along University (bus priority at lights, say) would be necessary to reap the full benefits of the plan.	3/19/2015 9:26 PM
210	Retain #30 from the Sand Point area to and along University Way NE during the day.	3/19/2015 8:04 PM
211	I suppose this is less disastrous than alternative one because of geographic coverage/less route cuts or consolidation, but please please keep direct service 72 between u-district and lake city!! Including nights and weekends even if it is every 30 minutes or every hour.	3/19/2015 7:50 PM
212	Please add more explanation about Ballard	3/19/2015 7:48 PM
213	I have no particular suggestions for improvement.	3/19/2015 7:03 PM
214	Make it more like alternative 1. :)	3/19/2015 6:02 PM
215	Why don't we use the concept of shuttles - short neighborhood routes that connect the neighborhoods to the bigger better transit hubs that have lots of service and capacity! And our east to west service (which could play into a shuttle and hub concept) has never been well developed. As an example 145th St. NE. (and 145th Ave. N and 145th Ave. NW) is a major arterial east to west, but service between Lake City Way and Aurora Ave. N. on 145th. is pretty non-existent. I'm sure that will change when light rail starts coming further north, but even from Lake City Way to the I-5 freeway now, that major corridor seems under-utilized.	3/19/2015 5:47 PM
216	I would prefer Alternative 1. I think an interconnected service is the best idea.	3/19/2015 5:01 PM
217	There seems to be a lot of redundancy in the UW area, and It seems like some of that could be combined to free up resources to provide better service between NE and NW seattle. I would eliminate the southern part of 73, and connect it with U Link station. I would eliminate 43 entirely, as it's completely redundant with 48 and 8.	3/19/2015 4:55 PM
218	Same things I said before - get your head out of your ass and stop thinking that connections to light rail are the fucking answer. They work for some, but if people live in Capitol Hill or Montlake you can't cram everyone into the light rail station - it'll make it miserable for everyone. And you can't expect people to walk 7-10 blocks just to take a bus that then forces them to take a transfer. I don't know what idiot came up with this plan but he or she needs to have their head examined. It's a terrible idea that radically restructures a section of the system working reasonably well based on conjecture and hype.	3/19/2015 3:52 PM
219	Parter with other commuting services (like the UW's Health Sciences Express, perhaps)?	3/19/2015 3:32 PM

220	alter the bus lines that operate near the UW station and the University station, but do NOT cancel them.	3/19/2015 3:16 PM
221	Reduce network to 1/2 mile "increments" & intersections along arterials in order to increase frequency along major routes	3/19/2015 2:56 PM
222	Try and increase frequency as much as possible	3/19/2015 2:37 PM
223	More frequency	3/19/2015 2:27 PM
224	reduce time between buses during congestion.	3/19/2015 2:25 PM
225	Make it more like Alternative 1.	3/19/2015 2:11 PM
226	Sand Point to downtown needs more service direct.	3/19/2015 1:57 PM
227	The light rail service is too far for me to access so I'm not pleased with the deletion and reroutes of my normal buses when I have to rely on them daily.	3/19/2015 1:48 PM
228	Breaking the 48N from 48S and through routing the 48N to the 271 is a good concept and should be considered for alternative 2	3/19/2015 12:29 PM
229	Do Alt 1 for 545 route.	3/19/2015 11:14 AM
230	Not sure	3/19/2015 11:01 AM
231	No Comment	3/19/2015 10:37 AM
232	Bring back the 48X or cut into two service lines.	3/19/2015 10:27 AM
233	Please DO NOT ELIMINATE bus service (routes 66/67) on 5th Ave NE. It's too hard to get to the Northgate Transit Center or to Roosevelt, and if you do get to a bus stop on Roosevelt it will take forever to get to the Northgate Transit Center. I've had four hip replacements and I can't walk as far as I'd need to in order to get to a bus stop on Roosevelt or the Northgate Transit Center. It's a really dumb idea to eliminate bus service on 5th Ave NE.	3/19/2015 10:01 AM
234	I would offer at least one more route between the UW Link station and University Ave/15th/Roosevelt Way. Only having one bus route servicing that connection is likely to cause an incredible amount of crowding, more so than already exists on the 71/72/73.	3/19/2015 9:39 AM
235	More attention to NE corridor: Lake Forest Park, Kenmore, Bothell, Woodinville, and Juanita and Kirkland. More capacity at park and ride lots in Kenmore and Bothell and others that fill up early. This could be parking structures or additional sites. Easier access to park and rides by bike and better bike facilities. Although I lean more in the direction of Alt. 1 than Alt. 2, I think the best answer to your question of which is preferable is "Both." It should not be an either-or choice. We need more transit of the kind envisioned in both alternatives.	3/19/2015 8:46 AM
236	South Lake Union is the fastest growing employment neighborhood in Seattle. It has minimal affordable parking and using transit is expected for employees. Many workers there live in north seattle neighborhoods but there is not direct transit except the 70 that doesn't require going downtown first which adds a good 1/2 hour to the commute. I live 5 1/2 miles from work and this plan will make me transfer once and walk at least a mile of that distance to make connection. It's ridiculous.	3/19/2015 8:38 AM
237	Have one route from further north than the University District that went local to South Lake Union.	3/19/2015 8:09 AM
238	I think there needs to be more frequent service as well as everything that Alternative 2 has. For me, Alternative 2 affects me more than Alternative 1, especially since most of the bus routes affected by any change in Alternative 1 do not concern me.	3/19/2015 2:08 AM
239	Increase frequency of service along main arterials	3/18/2015 10:46 PM
240	reduce fares by .50 cents	3/18/2015 10:14 PM
241	Connections with light rail just add more time to commutes for people who previously used a single bus route. Bad idea.	3/18/2015 8:54 PM
242	Why do we have to chose between the benefits of Alternative 1 (Frequent service) and the benefits of Alternative 2 (geographical coverage)? Our metropolitan area needs both. I would welcome an increase in my taxes to pay for this improved service.	3/18/2015 8:44 PM
243	N/A	3/18/2015 8:09 PM
244	hybrid between the two that kept a few more routes intact.	3/18/2015 8:09 PM

245	3/18/2015 7:37 PM
246	I don't like alternative to as reasons stated.	3/18/2015 5:37 PM
247	Break apart the 48 route at the UWMC, as in Alternative 1 for example.	3/18/2015 5:08 PM
248	I don't think this is as good of an option as Alternative 1.	3/18/2015 4:37 PM
249	na	3/18/2015 4:25 PM
250	Improve the run of frequency (shorter wait times) every 15 minutes is perfect.	3/18/2015 3:31 PM
251	Tweak runs to connect better with each other!!!! Transferring between buses that "just miss" connecting is one of the most frustrating things about transit. My commute went from not quite a half-hour to nearly an hour the last time the schedule was "improved".	3/18/2015 3:15 PM
252	I have nothing to add	3/18/2015 3:13 PM
253	Utilize routes to access light rail better and more frequently thus giving you ability to have more coverage in areas that don't have frequent / available bus service currently.	3/18/2015 3:03 PM
254	Not sure.	3/18/2015 2:44 PM
255	Lake city to ravenna connection	3/18/2015 2:43 PM
256	All day/night service for current route 30/new route 16 to Sandpoint.	3/18/2015 2:42 PM
257	Keep the consolidated service on 15th Avenue NE. 15th Avenue NE is generally less congested and faster than Roosevelt (this is especially true now with the construction of the Roosevelt station at 65th). 15th Avenue NE is a main thoroughfare and losing service on it seems very short-sighted.	3/18/2015 2:37 PM
258	Light Rail is not here. Float these ideas once it is a reality	3/18/2015 2:34 PM
259	more frequent service	3/18/2015 2:24 PM
260	More express service for end of line or long haul locations. Current light rail stops too often between airport and westlake	3/18/2015 2:20 PM
261	Keep Rt 16 as it is.	3/18/2015 2:10 PM
262	Alter 542 or 545 to take some of the 242 stops on 148th.	3/18/2015 2:08 PM
263	Keep route 242 or at least increase the frequency of 542 during peak hours. Increase the frequency of 65, 75 and have it run until at least 1AM	3/18/2015 2:02 PM
264	Provide better access to South Lake Union from the Eastside via SR520.	3/18/2015 2:00 PM
265	More frequent service.	3/18/2015 1:37 PM
266	Decrease the number of stops to make the route faster.	3/18/2015 1:35 PM
267	same as Alternative 1	3/18/2015 1:32 PM
268	My main concerns right now (purely selfishly) are improved frequency of service for Ballard/U-district and Ballard/Downtown/Seattle Center. Whatever plan we go with I hope there is improved trip frequency in these areas so that buses will not be as crowded and missing a bus will not be as stressful when trying to get to work on time.	3/18/2015 1:20 PM
269	I could see it as an interim plan pending the completion of transit hubs and light rail, or perhaps as a fall back plan if trends change, but I think we need to lead the way to changing residents perception of transit as it fits into the overall plan of where to live and work and how to get from one to the other.	3/18/2015 1:19 PM
270	bring back the 48 express, and an express route to/from Ballard and U-District.	3/18/2015 12:48 PM
271	going to more central hubs and also better park and ride like in northgate need to be made better.	3/18/2015 12:44 PM
272	I live in Capitol Hill for me accessing the 49 is very easy, but i've lived in the Laurelhurst community for many years, and cutting of buses there really hurts. Yes they're less frequently used, but for an old person or anybody really to walk 6 blocks for a bus (especially in pouring rain) is absurd. Do not cut services to less frequented areas (even if it's only every hour on weekends, its needed), have more transit times in more frequented areas, try to find a balance.	3/18/2015 12:42 PM
273	Reduce wait times. Even 20 minutes would be an improvement.	3/18/2015 12:19 PM

274	Go further North.	3/18/2015 12:19 PM
275	My concern is this, I have a bus stop near my house, one a block away to the west and one two blocks away to the east. I do not want to walk 6 blocks to the light rail station that is west of me to go to the UW medical center. I wish that the 43 stays the same	3/18/2015 12:17 PM
276	Please see my response regarding Alternative 1	3/18/2015 12:08 PM
277	CONSIDER East/West routes!!!!	3/18/2015 12:07 PM
278	If possible, keep waiting times down around 65, 75, 32, etc routes where congestion is likely to increase due to the light rail.	3/18/2015 12:06 PM
279	Need frequent service from all neighborhoods to light rail station to make light rail usable. Link on 10 minute headways and buses on 30 minute headways is not a reasonable system.	3/18/2015 12:05 PM
280	I live in Greenwood and work at Husky Stadium so any way of having a direct route would be beneficial, otherwise it might make it worse for me if I had to transfer from bus to light rail.	3/18/2015 12:03 PM
281	Keep route 70's northern end as it is.	3/18/2015 12:02 PM
282	I know you cannot reduce the waiting time too much like option 1, but can 20-25min wait be feasible?	3/18/2015 11:55 AM
283	I understand the trade-off between wider coverage and more frequent service. As somebody who is without a car, I am mindful of the obstacles that can be in place without nearby busses. I am not sure how representative I am - willing to wait longer and/or walk depending on service, willing to adapt to the current configuration. Of course, the best long term plan would be to develop transit options that are not merely slave to traffic, like light rail!	3/18/2015 11:55 AM
284	Fix the transit isolation issue created by the lack of direct service between College Way N/Meridian Ave N and Wallingford and Green Lake (concept for routes 16 and 26X)	3/18/2015 11:52 AM
285	Keep route 75 and 65 running frequently	3/18/2015 11:51 AM
286	Again, nothing to say about North Seattle.	3/18/2015 11:50 AM
287	Nothing to suggest.	3/18/2015 11:49 AM
288	Not a fan of changing the 16 that much. I would love to see services retained North of 92nd, up to 105th. The 345 and 40 do not come often enough for me to feel comfortable that an alternate is possible.	3/18/2015 11:48 AM
289	I'm worried that this alternative would isolate Sand Point and Laurelhurst more than they are already.	3/18/2015 11:47 AM
290	Until light rail comes to Northgate, I see NO reason why ANY services to/from Northgate should be cut or diverted. The 16, 67, 68 would STILL be needed to get from Northgate to UW Medical Center, U Village, Fremont, Greenlake, Wallingford etc. The rejigged 73 is not a suitable substitute for the 68 - people needed to attend the hospital REALLY don't want to be changing buses multiple times, especially the elderly and disabled who are a large population north of NE Northgate Way.	3/18/2015 11:45 AM
291	nothing	3/18/2015 11:45 AM
292	Retain route 373X "express" 50 minute service from Shoreline to Univ of Washington campus.	3/18/2015 11:44 AM
293	You've already doing a great job of planning. Thank you for the chance to take this survey, and good luck with the changes! Mary	3/18/2015 11:41 AM
294	I'd like to reiterate my idea for a bus service that would fill in the gap left by the 43.	3/18/2015 11:40 AM
295	Add more service. The 71/72/73/74 are already very crowded going to downtown from the U-District as it is.	3/18/2015 11:38 AM
296	Keep efficient service between university district and downtown to serve those whose destinations are not within walking distance of Husky Stadium station.	3/18/2015 11:35 AM
297	Keep frequent bus service like the 71, 72, or 73 along the Ave to Downtown until the new light rail station opens up at the UW Tower. The route/corridor is so heavily used, I think it would be a mistake to not keep frequent service along that line.	3/18/2015 11:32 AM
298	Don't know. Alternative 2 decreases frequency for the 43 which is my primary bus for both work and leisure activities downtown.	3/18/2015 11:31 AM
299	NA	3/18/2015 11:31 AM

300	From my perspective I'd improve Alternative 2 by turning it into Alternative 1.	3/18/2015 11:25 AM
301	Alternative 2 looks like a better option.	3/18/2015 11:25 AM
302	It doesn't make sense to go through campus at peak travel times.	3/18/2015 11:25 AM
303	Remember that for Northeast and Northwest Seattle, there is not an positive impact from light rail for people commuting to the main UW campus until the other stations open in 2021.	3/18/2015 11:24 AM
304	Improve the express connection between major linkages and improve feeder/collection systems.	3/18/2015 11:24 AM
305	Frequent, all day service from Greenlake to Northwest Hospital medical center (and UWMC to NWH)	3/18/2015 11:23 AM
306	Maintain multiple alternatives between Northgate and campus - not just near campus.	3/18/2015 11:20 AM
307	Maintain frequency of main routes.	3/18/2015 11:19 AM
308	Same suggestion as above.	3/18/2015 11:13 AM
309	If it were closer to/from home.	3/18/2015 11:10 AM
310	We don't need more frequent service on the 242, the cadence is just right. Six buses between 6am and 9am running to Overlake. Six buses between 3:30pm and 6pm running to Ridgecrest. The concept of a "consolidated, frequent network of service" sounds great, but if it means killing a popular, targeted, highly efficient route, then your concept is making things worse, not better.	3/18/2015 10:53 AM
311	This option seems to limit service way more than option 1.	3/18/2015 10:07 AM
312	I'm not sure; I prefer alternative 1.	3/18/2015 9:59 AM
313	More frequent service.	3/18/2015 8:34 AM
314	Build the Light Rail out to Redmond OTC. Direct connection outweighs transfers every time.	3/18/2015 8:20 AM
315	needs to be much closer to alt 1	3/18/2015 1:19 AM
316	With more frequent trains between DT Seattle and U District, passengers would be able to adjust their travel times to catch the bus with less waiting time (using Internet planners or applications or information screens at the bus stops). But the frequent service on Link should be guaranteed and waiting time for the train reduced to 10 minutes	3/18/2015 1:05 AM
317	Don't f*** with Route 16. Add a new route if more service is required in Green Lake.	3/18/2015 12:16 AM
318	I would consider replacing the 25 Laurelhurst loop with a shuttle (mini bus) instead of a full sized bus.	3/17/2015 7:47 PM
319	Keep the 372 connection to the Woodinville P&R. That would allow me to take the bus to Bothell/Woodinville for work since most of the jobs are in the area where you are cutting service.	3/17/2015 7:10 PM
320	Again, retain the 72 or reroute some other bus to go through the U District on its way to Lake City. Why is the Lake City neighborhood getting shorted in both of these plans?	3/17/2015 3:35 PM
321	I would keep portions of the current 71 which sweeps through neighborhoods north of NE 75th and also serves the View Ridge area. I don't see that the proposed 68 on 40th NE does this very well.	3/17/2015 2:47 PM
322	I am not as interested in more coverage than I am frequency	3/17/2015 2:13 PM
323	more frequent bus 65	3/17/2015 1:19 PM
324	I would a single route that connects east Green Lake with Phinney Ridge. I would add a single route that connects Phinney Ridge with Wallingford. I would also add a single route that connects Greenwood/Phinney Ridge with Eastlake/SLU, especially during peak hours. Add more frequent east-west routes.	3/17/2015 11:53 AM
325	I think the concept behind Alt 2 isn't tenable. We need to aggressively build around University Link and leverage its reliability and speed gains, not maintain the status quo.	3/17/2015 11:38 AM
326	Increase frequency on route 545 during peak hours	3/17/2015 9:33 AM
327	NA	3/17/2015 9:25 AM
328	Combining concepts together based upon the needs of the community and making the entire transit user friendly across the network.	3/17/2015 7:07 AM

329	I honestly haven't really digested alternative 2 that much - in my mind alternative 1 is just clearly superior. That said, if you do end up going with the less enthralling alternative 2, I think that the focus needs to be upped on those east-west connections.	3/17/2015 1:21 AM
330	Do whatever you want with the link light rail, I don't care -- I might use it to go to the mall on weekends occasionally. Just don't mess up the 545's off peak time. Having the 545 run off peak makes it so people don't have to sit in completely clogged traffic on the 520. It's insane to remove the off peak hours.	3/17/2015 12:07 AM
331	Keep route 72 and route it to the UW station or have route 372 go down Montlake Boulevard to the UW station.	3/16/2015 9:54 PM
332	Is there any way to improve frequency of service? 30 minutes is a long time to wait for a connection.	3/16/2015 9:31 PM
333	taking advantage of light rail should mean better cross town routes and letting light rail take the burden of going north/south. My crosstown route will still inefficiently meander through slow streets burning up the time savings rail would have garnered.	3/16/2015 6:10 PM
334	I think Metro needs to provide options for people who want to go downtown using a 1 bus trip and for whom rapidity of service is not a top priority.	3/16/2015 5:12 PM
335	I would not support option 2 - the key is high frequency.	3/16/2015 5:10 PM
336	I'd ask Mitch McConnell to order the US military to storm Olympia and not let anyone leave until taxes were raised sufficiently to pay for a transit system that is both frequent *and* comprehensive.	3/16/2015 4:44 PM
337	extend some trips to downtown.	3/16/2015 4:06 PM
338	Wait and make changes when light rail goes to the east side before making people have to walk extra miles and transfer multiple times to get between key locations like Redmond and Green Lake.	3/16/2015 4:04 PM
339	Maybe keep the 48/271 interline with the originally planned split.	3/16/2015 3:32 PM
340	As I say, Frequency is better than Coverage to me but I think 6 blocks is the max for walking, transferring OK. No coverage within six blocks is not so good.	3/16/2015 2:28 PM
341	More frequent ST 542	3/16/2015 2:23 PM
342	I would not select this Alternative as I think it would spread Metro too thin. The two most common complaints I hear from people that do not use bus service is that the bus does not come frequently enough and that it takes too long to get from place A to B. I do not think this alternative would address either problem.	3/16/2015 1:57 PM
343	There is no planned light rail connection between the north and east sides. I'm assuming you're removing this north route because the ridership is sparse until Northgate. If so, move the 242 route to the east (to 15th NE). By having it run within 1-2 blocks from the highway, you're losing potential riders to automobile transit. Certainly no one is crossing I-5 to catch it. Move it to 15th NE, where there are far more eastside commuters.	3/16/2015 12:53 PM
344	If light rail is faster to get to CenturyLink even when taking a connecting bus from Greenlake, then consider providing a direct bus to the UW lightrail station. Maybe it already does, I didn't actually check because that seems unlikely to be faster than the 26 or 16.	3/16/2015 12:50 PM
345	No changes.	3/16/2015 12:47 PM
346	Make it easy to get from lower Capitol Hill to Bellevue, Ballard, The University District, or Queen Anne.	3/16/2015 12:45 PM
347	Just add more frequent buses on already existing routes.	3/16/2015 12:39 PM
348	Keep 242 or provide some option that doesn't make my commute from Maple Leaf to Redmond significantly longer	3/16/2015 12:35 PM
349	keep 542 to connect the U-District with MS Campus	3/16/2015 12:29 PM
350	Maybe keep the 73 local, and transfer to the light rail if you are looking to go quickly downtown? The 66 currently makes it a short walk to South Lake Union, drops you next to REI, and provides great service to Eastlake. In this new model you could take the 73 quickly downtown but wouldn't be able to access any of those areas without transferring.	3/16/2015 12:14 PM
351	Add a route between the Northwest neighborhoods and the U-District.	3/16/2015 12:14 PM
352	n/a	3/16/2015 12:14 PM
353	The light rail service does not extend to Northgate, so this proposal only extends my commute time by eliminating the 242 route.	3/16/2015 12:00 PM

354	If route 242 is deleted, is it feasible to extend route 542 to at least Northgate Transit Center via I-5 or 5th Avenue (if the latter, making limited stops along the way)? That way, Northgate to Overlake wouldn't require a transfer.	3/16/2015 11:55 AM
355	545 needs to run more frequently from 730 to 9AM. I find myself having to stand far too often on this bus in the morning. Keeping the route from capitol hill to Redmond allows me to live without a car.	3/16/2015 11:54 AM
356	Keep the 545 as it is or make it more frequent - it is already packed..	3/16/2015 11:52 AM
357	Need late option, an extra 65 @ 1:20 AM would be nice.	3/16/2015 11:51 AM
358	Need a bus that goes from Overlake to connect with the 44 that runs all day.	3/16/2015 11:47 AM
359	keep the 242	3/16/2015 11:46 AM
360	Keep 545. Currently I take 545 to 44 to get home to Stone Way and vice version.	3/16/2015 11:46 AM
361	Don't eliminate 242.	3/16/2015 11:33 AM
362	I wouldn't consider Alternative 2.	3/16/2015 10:53 AM
363	Expand rideshare programs, promote light rail	3/15/2015 8:21 PM
364	Cut the bus lines with low ridership, and consolidate the ones with infrequent weekday service (afternoons/evenings only), connect the ones with high ridership to the light rail. Make more direct, non-stop connection between light rail and buses to major destination points (shopping centers, hospitals, schools, libraries, entertainment sites, employers).	3/15/2015 5:03 PM
365	For routes that leave UW campus and go further north in Seattle (75, 372, 65, etc.), I would suggest having only one or two stops on campus and no stops or fewer stops until the bus passes UVillage (and maybe all the way). Many of the over-crowding issues are due to UW students who stay on the bus for 1 or 2 stops because they don't want to walk, making it difficult for commuters who have to go further than UVillage to get on the appropriate line.	3/15/2015 2:34 PM
366	Improve routes from UW that go further (Sand Point, Northgate, Wedgewood, Maple Leaf, or further north) by having them leave from one or two stops on UW campus and not have any stops until after UVillage. Have fewer stops, even. The idea here is to diminish the (large) number of UW students who get on for one or two stops because they don't want to walk in the rain, thus preventing commuters who need to go all the way up Sand Point to Northgate (75) or to Woodinville (372) from getting on a bus that's packed with people who don't really need that route (they could use alternative routes that have the same first few stops).	3/15/2015 1:55 PM
367	I need direct transport from Pioneer square where I live directly to Redmond. Currently, the 545 route goes through ALL downtown Seattle and then to CAPITOL HILL, which adds 15min to my commute every day. Plus there is no Wi-Fi on the bus, which is terrible for my productivity.	3/15/2015 12:35 PM
368	Keeping Route 71 as is.	3/15/2015 8:25 AM
369	Don't change Route 71 until 2021 when the Roosevelt Station opens.	3/14/2015 10:27 PM
370	Keep the #71 bus from Wedgewood/Bryant Ravenna to downtown Seattle until the light rail station opens in Roosevelt. The impact of truncating it to stop in Roosevelt is just too much. The Husky Stadium light rail station is just too far and inconvenient to expect people to transfer there to get to downtown Seattle, given that many people will have to walk longer just to get the bus that will take them to the light rail station.	3/14/2015 10:08 PM
371	The route 48 link between UW Link Station and Mt. Baker Station (along 23rd) serves a vital link between North Capitol Hill and access to the Light Rail. Currently, I take the 48 to Mt. Baker Transit Center to access the Light Rail (northbound or southbound). Once the Link Light Rail is complete, from Downtown, I envision taking the service all the way to UW then transferring southbound on the 43 or 48 and getting off on North Capitol Hill (Aloha). Alternatively, when I return from the Airport, I plan to get off at the Mt Baker Station, then catch the 48 northbound, as this will take less time, then all the way to UW and then south bound.	3/14/2015 3:52 PM
372	Retain service via route #72, at least during the week, or create another route that goes from the bus stop by Fred Meyer to the University District Retail Core (the Ave) and stops on 65th ave NE as it goes south. Are we going to lose a bus stop on 130th outside Fred Meyer? This concerns me because Lake City Way is so hard to cross. This needs to be addressed if all buses are to be boarded on Lake City Way	3/14/2015 2:57 PM
373	Do not know.	3/14/2015 11:30 AM
374	More frequency and more coverage	3/14/2015 11:24 AM
375	I'm not sure about that at all.	3/13/2015 6:09 PM

376	Keep rts 71x/72x/73x the same	3/13/2015 4:52 PM
377	N/A	3/13/2015 3:52 PM
378	Consolidate service from 5th Ave NE and 15th to Roosevelt for 10 min all day headways. Frequent east/west connections between neighborhoods.	3/13/2015 3:43 PM
379	retain route 72, and retain the current configuration for route 73. these routes in their current configuration provide significant local service and do not conflict with the new light rail service in any way that I can see.	3/13/2015 3:31 PM
380	The biggest issue with any revisions will be how the City and transit entities deal with the vehicle traffic. I will only know what route and transit combinations work best once I have some experience riding from home to work and seeing how long it takes. For example, the old bus routes I used to take from West Seattle to Seattle downtown and Capitol Hill (the 21X and the 54X) were very efficient and useful to me-- minimum to maximum ride times were 25 to 60 minutes (60 min on a very, very bad traffic day, which was not often). Now my ride takes 60 minutes minimum, and I can no longer catch the bus near my house. Without considering timed or coordinated light systems and dealing with the freeway car feed (mostly cars getting on) the bus system will just sit in traffic like everyone else. This is a grounded, concrete concern.	3/13/2015 2:29 PM
381	Woodinville Park and Ride has space to park if you delete route from Bothell UW and Woodinville PR, there are no space to part on Bothell UW.	3/13/2015 1:26 PM
382	N/a	3/13/2015 1:01 PM
383	I would focus on improving public transit so that it is more attractive for people to use it.	3/13/2015 12:56 PM
384	Wi-Fi on buses	3/13/2015 12:36 PM
385	Once again ligh rail won't help me and hasn't helped me. I can't even catch a plane to the airport when I have to be there before 5AM.	3/13/2015 12:07 PM
386	Same as Alternative 1. I would add the frequent shuttle from 65th and SAnd Point, along SAnd point way to Montlake bridge and 520 every 5 to 7 minutes. Just have these buses go back and forth along this route.	3/13/2015 11:22 AM
387	More frequent service and longer hours of operation for major hubs.	3/13/2015 9:46 AM
388	Increase frequency of 25 and 43 and other vital neighborhood links to the UW light rail station.	3/13/2015 7:27 AM
389	Increase frequency of neighborhood bus coverage to link rail. This is critical in close in neighborhoods where there are no park and ride stations.	3/13/2015 6:54 AM
390	Create more frequent service corridors and access to link stations.	3/12/2015 11:07 PM
391	372 needs to go further on weekends! Particularly if deleting the 72.	3/12/2015 10:36 PM
392	Increase service between schools and the new rail service. Alternative 1 eliminates services from Stevens, St. Joe's, Holy Names, and more. Alternative 2 keeps it, but it could be higher.	3/12/2015 10:14 PM
393	I would move the bus stops closer to the light rail station at Husky Stadium.	3/12/2015 8:49 PM
394	No ideas at this time.	3/12/2015 5:35 PM
395	Use 15th street instead of the Ave for more buses.	3/12/2015 4:33 PM
396	Glve up on Alternative 2.	3/12/2015 3:37 PM
397	I wouldn't improve Alternative 2: I don't see it as viable at all. It's not a real proposal; it's just the status quo but with less service. But it's still a pig in lipstick.	3/12/2015 2:35 PM
398	n/a	3/12/2015 2:21 PM
399	Again I'll keep current route and schedule till Northgate statio opening. This way, you can centralized bus service from Northgate to different area and may change bus route that is taking similar route as light rail. We have just voted to pay to keep current service in the last election. By doing what your propose actually CUT service to North Seattle residents. I do not understand why you can not wait till light rail connects to Northgate.	3/12/2015 1:56 PM
400	Nothing to say, I like alternative 2 as is.	3/12/2015 1:34 PM
401	I like the idea of consolidating the 70s. With the light rail, we no longer need multiple routes connecting UW, Capitol Hill, and Downtown. Turning the 49 and 70-74 into feeder routes that connect people to rail stations is a good idea. Don't mess with existing service that doesn't route to one of the rail stations. I'm OK with infrequent service for long trips, if I can plan ahead for it.	3/12/2015 1:10 PM

402	Keep routes extended to the S Jackson St area. It's hard to tell, but it looks like more of the bus service ends in mid-downtown area. I really like how there's a transit hub associated with the King Street Station (Sounder & Amtrak) / International District Light Rail Station / Pioneer Square area. Please make sure bus service continues to extend to this hub. Make sure there's enough service connecting Eastlake (Lake Union area) to downtown Seattle (including all the way to Pioneer Square) and Eastlake (Lake Union area) to U-district. The 70 may accomplish this (if it extends to Pioneer Square / International District), but it's hard to tell if this will help the capacity. It seems like both the 70 and 66 are in high demand during peak times, and not just for people traveling through the Eastlake area - lots of people get off at the major stations (Lynn St, Harvard, etc.) along Eastlake (Lake Union area).	3/12/2015 12:43 PM
403	Make it more friendly to get from Bellevue to Wedgewood without having to wait 30 minutes for a connection.	3/12/2015 11:46 AM
404	My improvements to Alternative 2 would be to implement Alternative 1.	3/12/2015 11:37 AM
405	Find a compromise between Alt 1 and 2 that addresses the concern of the majority.	3/12/2015 10:58 AM
406	More coverage in areas where people would catch buses on their way to train stations, not less.	3/12/2015 10:58 AM
407	More frequency.	3/12/2015 9:04 AM
408	During peak times provide less of a network & during off peak times provide more of a network	3/12/2015 8:01 AM
409	I would increase the frequency of the 75.	3/11/2015 10:23 PM
410	Scrap plan 2 and go with the substantial changes in Alt 1	3/11/2015 9:31 PM
411	I like some of the new lines that are introduced, but I like how Alternative 1 simplifies the University District service routes.	3/11/2015 4:51 PM
412	Maintain a connection from North Seattle/Jackson Park/Shoreline to the Eastside. One connection is doable, two connections is unrealistic. I don't understand why route 242 is being considered for deletion, it services Shoreline to Redmond and the new light rail will have no effect on that route.	3/11/2015 4:08 PM
413	If the buses will be coming less frequently, there may be more people who just hop in their car and drive to the rail station, or drive on to their destination. For this reason, ensure ample parking at the rail stations, so at least the drivers will be inclined to use the rail. This should help reduce congestion.	3/11/2015 1:38 PM
414	I would improve bus connections to the UW light rail station. It would be great if some fast busses went straight to the light rail station, perhaps down 25th or 35th avenues.	3/11/2015 1:21 PM
415	Keep the 16 route, add a stop in Fremont and have it run up Dexter.	3/11/2015 12:27 PM
416	not sure	3/11/2015 12:01 PM
417	Make it more like alternative 1 is a great way to make alternative 2 better.	3/11/2015 11:37 AM
418	30 minutes of waiting time is too long. 10 - 15 minutes is about the length of time before I begin to think how long I have been waiting, before I begin to find other ways of getting to where I need to.	3/11/2015 10:49 AM
419	Take a longer term view with more planned approach	3/11/2015 10:47 AM
420	I much more prefer Alternative 1, so uh, make it more like that.	3/11/2015 10:38 AM
421	Keep the 73 running up to 145th or at least 125th	3/11/2015 10:19 AM
422	Have one bus regularly go all along Madison from Lake WA to Pill hill and then veer off to down town (pretty much like present). Have one bus go regularly from Madison/East John to new Capital Hill Light rail (to UW).	3/11/2015 9:44 AM
423	More frequent service on key Children's <=> Light Rail route.	3/11/2015 9:24 AM
424	no recommendations at this time	3/11/2015 8:47 AM
425	Have direct connections between the light rail, buses along 25th (68, 372) and buses to east side (271) for easier transfer.	3/11/2015 8:39 AM
426	Not much room to improve it given the constraints - I much prefer Alternative 1.	3/11/2015 8:05 AM
427	Keep Route 43 service at current frequency to ensure that commuters can get to light rail stations easily	3/10/2015 9:17 PM
428	In general, make it more like Alt. 1, but include/maintain some of the most desired aspects of Alt. 2.	3/10/2015 8:48 PM
429	I don't prefer this alternative.	3/10/2015 8:27 PM

430	I would include multi-neighborhood stops that take into account safety for bus users over convenience of time. Safety should be of paramount importance.	3/10/2015 7:32 PM
431	I would implement Alternative 1 instead.	3/10/2015 6:59 PM
432	nothing to add	3/10/2015 5:26 PM
433	Need a reasonably fast route between Bryant and Seattle Center.	3/10/2015 4:41 PM
434	Can't think of anything.	3/10/2015 4:39 PM
435	Continue Service on 16 and 26 bus far into downtown along third or fourth Avenue	3/10/2015 2:46 PM
436	More bus connections to light rail.	3/10/2015 2:03 PM
437	By consolidating service into fewer frequently-served corridors (i.e. by doing Alternative 1 instead).	3/10/2015 12:32 PM
438	Simply put more people are riding metro, and miles driven in a car are going down. We need to shift money from roads to transit.	3/10/2015 12:25 PM
439	Direct service from Wallingford to husky light rail station	3/10/2015 11:38 AM
440	The UW light rail connection does not improve my transportation, as it's more efficient to go the the Westlake stop and then take a metro bus to Fremont/Wallingford. The buses between Fremont and UW are too infrequent for me to consider going to UW first.	3/10/2015 11:18 AM
441	Need close connection of light rail and a bus going to bryant / wedgwood / viewridge !	3/10/2015 11:09 AM
442	Nothing.	3/10/2015 9:48 AM
443	Specifically increase frequency of bus routes that connect directly with light rail, while keeping other bus routes at lower frequency.	3/10/2015 8:18 AM
444	I do not care about making connections to the light rail service. I shouldn't have to make any connections at all to get to downtown Seattle. Like I have stated before, until light rail comes to the Eastside, leave our service alone. In the evening, I want the 311 to take me straight home to the Woodinville park-in-ride. Please for goodness sake, we are not getting off the freeway to drop folks off at the Brickyard park-in-ride and then get back on the freeway, heading to Woodinville, in which we have to travel through the podunk city just to get to the Woodinville park-in-ride. Why don't we discuss making this route more efficient first, instead of creating some new hot mess express.	3/10/2015 8:13 AM
445	Be very careful about scheduling the timing of routes to minimize wait times.	3/9/2015 10:16 PM
446	I would change Alt 2 into Alt 1. Frequency before coverage.	3/9/2015 8:44 PM
447	I really wouldn't change much than what is proposed.	3/9/2015 8:40 PM
448	Not sure. But whatever can be done to shorten the distance between the buses and trains at UW station would be great. Perhaps consider adding realtime arrival info for trains near the bus stops by UW station, and realtime arrival info for buses in the UW Link station.	3/9/2015 8:27 PM
449	What do you define as North Seattle? Where is your boundary?	3/9/2015 8:15 PM
450	No one in the NE quadrant is getting any advantage of light rail service. How in the world am I suppose to get to the light rail station? This is absurd. All my tax \$ is being pissed away.	3/9/2015 8:11 PM
451	Direct Greenwood to Bellevue bring back the 48x!	3/9/2015 7:03 PM
452	No idea	3/9/2015 5:56 PM
453	it sounds great - preserves what we like about the bus and doesn't add new burdens. I'm a heavy bus user and I know how to get around with the current servuice - having to walk mroe for faster service seems like it oputs long term residents at a disadvantage and is perhaps playing towards a younger audience that you are lrying to lure out of their cars? this FEEDS the existing gentirficaiton and most of us long term residents want to SLOW it down or at least lead newer residents into supporting the exisiting strengths of our community.	3/9/2015 5:34 PM
454	I don't care, i use the 48 to get to the University district.	3/9/2015 5:22 PM
455	I would keep at least hourly service on the #25 route, but I would like to add Saturday service as well.	3/9/2015 4:24 PM
456	Include a late-night route along Roosevelt Way NE at least once per hour.	3/9/2015 3:34 PM
457	Same as my solution for alternative 1.	3/9/2015 3:14 PM

458	Better coverage for NE Seattle north of the U. District (Lk City, Wedgwood, Sand Pt.) and easy transport to light rail for us in the NE Seattle areas.	3/9/2015 3:07 PM
459	Keep both bus lines running at their current schedules, or how is anyone in Montlake/Portage Bay, the closest actual communities to the light rail station, going to get any benefit from it without increased access to the station? Bus service needs to minimally stay the same to make the light rail stop gain it's full potential, otherwise it will be a squandered opportunity for our community to want to take light rail anywhere.	3/9/2015 3:01 PM
460	Okay with expanded coverage, but make the stops further apart. Every 2 blocks is extremely inefficient and slow, people can walk a bit further to a stop.	3/9/2015 2:51 PM
461	If I was coming from further south catching the light rail is reasonable but if I have to drop my child off in Madrona it makes no sense to go all the way downtown to catch the light rail then transfer to the bus. There has got to be a better way for those that would likely have to take 2 or 3 connecting buses to get north.	3/9/2015 2:48 PM
462	The benefits of the limited places light rail serves do not offset the degraded bus service. Bus service is more useful and valuable than light rail will be in my lifetime.	3/9/2015 2:42 PM
463	more coverage might be good but longer wait time might counter the benefit of the link rail.	3/9/2015 2:41 PM
464	I'm not in favor of Alt. 2 if it means reducing frequency on key routes. I like Alt. 1, it just needs some tuning.	3/9/2015 2:19 PM
465	Adjust some of the routes that go downtown (for example, 72 and 73) so that instead of going downtown in traffic, they go to the Husky stadium. Once they get from north of NE 45th street, they go to campus and then downtown. Why not go from around NE 45th street to the Husky Stadium station instead? My main ideas for improvement of Alternative 1 would be along those lines. There's no need to delete routes that go downtown rather than shifting those portions of the routes to meet the light rail station.	3/9/2015 2:17 PM
466	Don't do it. Alternative 1 is much, much better.	3/9/2015 1:35 PM
467	More frequent North-South routes for buses that are already standing room only.	3/9/2015 1:21 PM
468	Literally keep all the schedules the same. Cutting access along 24th ave E is a failure to see the need to actually INCREASE access so people can take the new light rail station more often (because it is so poorly placed no one actually lives by the UW Hospital --- the nearest Montlake home is already 0.25 miles away, so we need bus access to get there to even use it).	3/9/2015 1:01 PM
469	Peak afternoon/evening travel through U Village and the UW area more often than not means a lot of standing-room-only rides, so increased frequency and use of double-sized buses for routes traveling through these areas at afternoon peak would be a huge improvement.	3/9/2015 12:04 PM
470	Expand, until midnight, the hours 372X runs on weekends.	3/9/2015 10:36 AM
471	maintain service frequency to 15th Avenue NE and 145th street	3/9/2015 10:26 AM
472	You do not want to provide bus service. concepts are great -- but in reality real people will suffer.	3/9/2015 10:08 AM
473	Direct buses to the link stations from all over the city, just like the buses used to be routed to the hubs of the UW and Downtown, now the Light Rails should be the focus, as a hub.	3/9/2015 10:02 AM
474	Keep some routes on 15th.	3/9/2015 9:55 AM
475	By tossing it and implementing Alternative 1 instead.	3/9/2015 9:17 AM
476	improved frequency. Wait time is the worst in the winter and often discourages me from taking public transit.	3/9/2015 9:14 AM
477	Expand light rail throughout Seattle neighborhoods.	3/9/2015 9:12 AM
478	Not sure it effects travel to & from Seattle from the South End	3/9/2015 9:06 AM
479	More connectivity to University Link Station along 25th/Montlake. You are NOT taking advantage of connections with new light rail service.	3/9/2015 8:31 AM
480	establish direct bus connections from eastside to major hospitals in downtown seattle	3/9/2015 5:44 AM
481	I would sacrifice some routes entirely if it would create opportunities for extremely frequent all-day routes elsewhere, especially serving those who would benefit the most from affordable public transit.	3/8/2015 9:58 PM
482	To put this bluntly -- the location of the University Stadium station renders light-rail access from most of Northeast Seattle worthless until Link comes farther north. The restructuring described in both alternatives is, literally, ahead of its time. Don't make these changes until the Roosevelt Station is available.	3/8/2015 9:23 PM

483	See response to Alternative 1.	3/8/2015 9:23 PM
484	So long as service is not eliminated from a region, I believe it is more important to maintain reliable service in high-traffic corridors. I would recommend making most of the changes in Alternative 1 with the possible exception of preserving service in Laurelhurst and Montlake, so long as those routes are sufficiently utilized to provide justification for their existence.	3/8/2015 9:19 PM
485	Increase frequency. Every 30 minutes is not sufficient. While I wait for the bus, and then for the link, I could have just driven to Cap Hill or downtown.	3/8/2015 8:29 PM
486	This alternative doesn't serve the needs of this area nearly as well as alternative one.	3/8/2015 6:26 PM
487	I think the light rail service being built right now really is not going to help my neighborhood. If anything, it is likely to draw a lot more traffic to the Husky Stadium area for people embarking and disembarking. I think the Roosevelt station and Northgate station will be more helpful. I don't really understand what alternative #2 will mean. I just hope I don't need to stand as much when I commute.	3/8/2015 6:25 PM
488	I would add service between Ballard and Sand Point (a direct NW to NE route).	3/8/2015 3:40 PM
489	Service that follows exactly the line of link is excess ie southern route of 8. if cut 66 there would be no route to east side of SLU which services the Cancer Care patients, Plymouth's low-income housing for disabled and disabled veterans, not to mention the tourists going to REI and workers to tech and amazonia.	3/8/2015 3:00 PM
490	Increase east-west service.	3/8/2015 11:16 AM
491	It's hard to know until I see or experience the outcome. My current concern is where would I park my car to take advantage of the northgate light rail. Parking as is @ Northgate transit center is usually full. Will there be enough parking to handle ridership you anticipate and will that parking be close enough to the light rail and given it rains here for months how far would I need to walk in the rain and would there be a place to wait that has coverage. I'm concerned about the bus drivers being overworked , longer routes, not enough breaks for, being stressed resulting in how customers are treated. you are not asking questions that have differentiated this city's service and care from other large cities where drivers are surly because their routes are too long, and not enough time is allowed to reach their destinations with ease. good luck in keeping the important values a trade mark of Seattle along with the speed of service the alternatives are designed to meet.	3/8/2015 9:08 AM
492	No comment.	3/8/2015 3:24 AM
493	A lot of jobs are in the Fremont and West Lake Union area. There should be a good connection between Ravenna and there.	3/7/2015 5:14 PM
494	Perhaps consider a crosstown shuttle (maybe at NE 95th Street or 110th) so that residents could access buses along Sand Point Way, 35th Ave NE or Lake City Way if they want to get downtown without having to change to light rail in the U District. Students going to Nathan Hale, Jane Adams and other nearby schools could ride the shuttle instead of school buses and perhaps grow up with a public transportation mentality. Other shuttles would probably help other neighborhoods especially those where the streets are hilly, there are no sidewalks and corner visibility is poor. Walking a half mile or more to get a bus is not safe in many north-end neighborhoods. When the light rail reaches to Northgate, many north-end neighborhoods will still have issues getting there unless crosstown transit improves.	3/7/2015 5:09 PM
495	How about having only folks who ride buses more than they drive vehicles make the decisions? Or at least participate strongly in the design?	3/7/2015 3:16 PM
496	More NE Seattle routes that end at the LR station.	3/7/2015 2:56 PM
497	Keep frequency the same for route 75.	3/7/2015 2:45 PM
498	Park and ride. this needs to improve. especially for red line buses. no where to park - that is safe. that's why i don't use it. it would be so much faster, but there is no place to park. so when you consider how fantastic this would be, you have to consider how are people going to get to the bus stops and where are they going to park. because a lot of people will be driving to the bus stop. there is no way to avoid that in this city. widen your focus, it's not just about the bus/light rail. it is also about how people get to it. especially for people who take a route home at night, have to park somewhere or walk somewhere. it it is not safe i will be driving my car.	3/7/2015 2:16 PM
499	Eliminate route 43	3/7/2015 2:11 PM

500	I think one concern either Alt 1 or 2 is increasing the distance people will have to go to take public transit. That could turn some people. Crossing Roosevelt, 5th and 15th as a pedestrian in some areas is not great. It is hard for motorists to see pedestrians, especially in low light/night. Another potential concern is ensuring that connections and frequency of service are improved. If people feel they have to wait too long or it takes longer in the bus, they will probably take their car. Ensuring strong connections between the light rail and NE neighborhoods will help increase its use and public transit in general. Of course much of these changes are somewhat temporary since the extension of light rail will be going further north and will be improving transit options.	3/7/2015 1:07 PM
501	Make your parallel routes such that they are 1-2 miles apart and even though they run every 30 minutes, their schedules vary by 15 minutes (e.g., one leaves at 1:05; the other leaves at 1:20, &tc.). In this way the Metro bus rider can determine and elect to walk to one or other based on personal schedule s/he is trying to keep utilizing transit bus service.	3/7/2015 12:44 PM
502	Provide frequent easy connection from UW light rail station to NE Seattle destinations	3/7/2015 12:24 PM
503	if the goal is to cater to able bodied commuters , bravo! you have done an excellent job! For your mid day riders -- seniors, mothers with strollers and infants/toddlers and the like, well we've been shafted once again	3/7/2015 12:19 PM
504	Keep Route 66x. Consider that people will be using light rail for more than simply commuting, such as to and from airport and evening downtown and Seattle Center activities. If people have to wait at Husky station for a connection that will then leave them walking a far distance at night or with with luggage they will drive it use a cab/Uber.	3/7/2015 12:09 PM
505	Frequent 15 min service to 92nd St in Seattle (either Ravenna, 25th, 35th, or Lake City Way and 95th)	3/7/2015 11:53 AM
506	Neither plan looks horrid for the north area. But #1 is fatal for North Capitol Hill. I know people who would have to sell houses and move if they had to walk up the steep hills to alternate routes. Distances aren't bad, but the planners don't seem to be thinking "in 3Dimensions" about the hills.	3/7/2015 11:46 AM
507	It wouldn't!	3/7/2015 11:24 AM
508	65 drops off by stadium station.	3/7/2015 10:25 AM
509	I would delete route 62 (as in Alt. 1) and use those service hours to improve the frequency of revised route 68.	3/7/2015 10:05 AM
510	increase the frequency of the buses running route 75. This is a popular route and fills up near campus.	3/7/2015 9:34 AM
511	I would prefer something closer to alternative 1 which provides frequent connection to many routes via the 16 and 372x.	3/7/2015 9:31 AM
512	Add a few 373 stops to make up for 73 not being on the same street (not necessarily all of them, maybe the 373 would take every other 73 stop, today it seems to be every fourth 73 stop).	3/7/2015 8:54 AM
513	What was alternative two? We need reliable, frequent service from north Seattle neighborhood centers to the UW stadium station (same bus comes every 5-7 minutes), especially at rush hour and commute times.	3/7/2015 8:53 AM
514	Make it more like alternative 1	3/7/2015 8:44 AM
515	Scrap it for Alternative 1.	3/7/2015 7:54 AM
516	Make it more like alternative 1, except keep service on 19th Ave and add service to 12th avenue	3/7/2015 7:46 AM
517	Increase weekend service. Increase "Feeder" buses from neighborhoods.	3/7/2015 7:01 AM
518	I take bus service service no matter what	3/7/2015 12:51 AM
519	Implement the 49 changes to make it more frequent and re-routed. Even if you can't do the whole thing, N Cap Hill is still in no-man's land with respect to the light rail stations and needs a way to get there.	3/7/2015 12:44 AM
520	No ideas.	3/7/2015 12:14 AM
521	I would have stronger east-west bus connections.	3/7/2015 12:09 AM
522	Moving bus stops to be as close as possible (1) to each other at transfer intersections, and (2) to actual destinations (such as significant retail centers, schools, and workplaces). Adding reverse commute runs on peak routes. Getting north- and west-bound routes to run remotely close to their schedules.	3/6/2015 11:29 PM
523	I wouldn't - ditch alternative 2 and adopt alternative 1. I want more frequent service.	3/6/2015 11:12 PM
524	set up connections between metro and light rail. But don't make transit more inaccessible.	3/6/2015 10:17 PM

525	implement Alternative 1	3/6/2015 10:13 PM
526	Make it easier for people to get to and from Capitol Hill without having to transfer at 3rd & Pine. That intersection is too close to Belltown to feel safe for a woman travelling alone.	3/6/2015 9:17 PM
527	Consider vans or mini-buses rather than full-size buses for neighborhoods like Laurelhurst that need service but do not have the population of users to fill a full-size bus. Use any cost-savings to extend service times to evenings and weekends.	3/6/2015 8:35 PM
528	See suggestions for improvements to speed and reliability noted in earlier answer.	3/6/2015 8:32 PM
529	I still think its most important to get people to the mass transit stations so they can use that method to get to the large hubs (DT, eastside)	3/6/2015 8:12 PM
530	Have a bus from Sandpoint area go to the Light Rail station!	3/6/2015 8:10 PM
531	add extra rapid E line services that support Sounders/Seahawks/Mariner events.	3/6/2015 8:03 PM
532	Same comment as in Alternative 1.	3/6/2015 8:03 PM
533	I would implement alternative 1.	3/6/2015 8:01 PM
534	Coverage, schmcoverage. People should be prompted to run trip planner for their main trips and most usual times, to compare old and new (alternative 2 and alternative 1) to learn whether they really have lost service, increased walking distances, or gained in speed, service frequency, etc. If they aren't prompted to get real about how the alternatives will affect them, they'll all just bellyache about how it works now and change will make it worse without knowing in fact what the impact on them will be. One should be required to do a comparison for a major trip (more than a mile) using alternative 1 and alternative 2. They can be given help or your staff or programs can do the work for them, but they should pay attention to the facts before they get a chance to waste other people's time at public meetings with their "NIMBY" attitudes and know-nothing obstructionism.	3/6/2015 7:57 PM
535	I fundamentally disagree with the premise behind this network. However, if I had to make it better, here's what I would suggest: - Every bus that connects with Link should have a frequency that's a multiple of Link's, and ideally with the same span of service. If Link's all-day frequency will be 10 minutes, then core routes should come every 10 minutes, while route with lower ridership should come every 20 or 30 minutes. Why is 20 minutes better than 15? Because of beat frequency. Imagine that a 20-minute bus departs UW Station after every other Link train arrives. A rider coming from Link will either have to wait 0 minutes (if there is a bus waiting), or 10 minute (if there isn't), for an average wait time of 5 minutes. With 15-minute frequency and no timed connection, a rider will have to wait an average of 7.5 minutes -- 2.5 minutes longer. Why pay extra for worse service? - Restructure the 5/16/26/28/71 as follows. The 5 takes Dexter to Fremont, then heads north to rejoin its current route. The 16 takes Dexter to Fremont, then 35th/Stone to its current route. The 26 is deleted. The 28 does not cross the Fremont Bridge, but instead takes 35th/Wallingford/40th/Pacific to UW Station. The 71 is extended to UW Station, using 65th/Latona/40th. These changes would create a new connection between Ravenna and UW Station. They would also improve connections between Fremont/Phinney/Greenwood, and would simplify service in general. No streets would lose service, although riders on the 28 would lose their direct trip to downtown. - Delete the 32, a route that largely duplicates the 31 and RapidRide D. Instead, upgrade the 31 to frequent service. Alternatively, truncate the 32 so that it only runs between Fremont and the U-District (basically a turnback version of the 31), and use the savings to upgrade the 31 and 32 to 20-minute service each (combined frequency of 10 minutes). - Modify the 75 to stay on NE 125th St, following the 41's route to Northgate TC. Extend the 40 along Northgate Way/LCW to the 41's current terminus. Terminate the 41 at Northgate TC full-time. This would simplify the network, since every Route 41 would have the same service pattern. It would also bring back a connection between Ballard and Lake City.	3/6/2015 7:50 PM
536	Make the buses more frequent - which is Alternative 1	3/6/2015 7:47 PM
537	Please considsder adding routes with direct access to Husky Stadium from NE Seattle via 25th Avenue NE and Sand Point Way.	3/6/2015 7:42 PM
538	I like alternative two. It meets my needs and allows me to get around with my disability.	3/6/2015 7:40 PM
539	Make it match Alternative 1!	3/6/2015 6:53 PM
540	Your operators are over paid for their level of skills and ability to interact with the public in a healthy way. Get the State of Washington to give King County the authority to roll back their compensation till they can meet performance tested levels of skill and humanity!	3/6/2015 6:22 PM
541	I don't know. Given the time schedules for light rail completions, I doubt it will be much use to me.	3/6/2015 6:19 PM

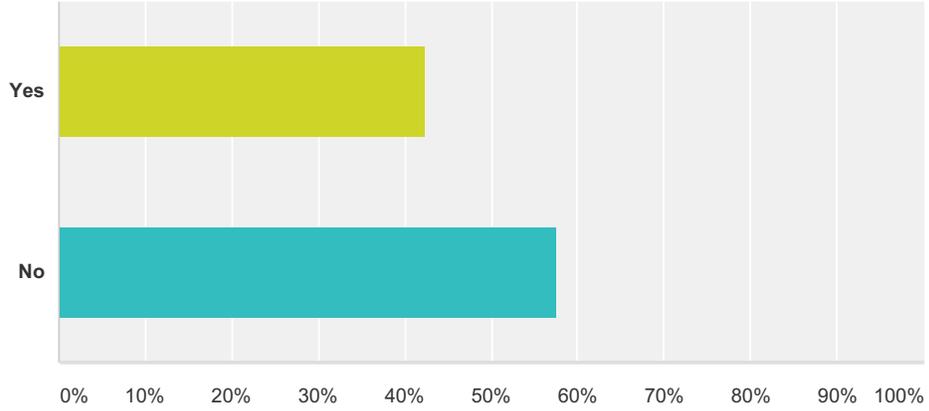

542	I would like to have frequent service, not just more routes going near my house. Frequency, as well as speed, are the two things that most influence my decisions to ride transit vs drive. I happen to live near a "consolidated" route, as you described in Alt 1, so there is really no benefit to me personally in Alt 2.	3/6/2015 6:17 PM
543	I don't know.	3/6/2015 6:04 PM
544	Alt 2 is so incremental that it really doesn't deserve a response.	3/6/2015 5:53 PM
545	I would go with alternative 1.	3/6/2015 5:51 PM
546	Most everything really. I don't like the idea of more waiting times. If one bus is late for some reason, then even more waiting times.	3/6/2015 5:50 PM
547	None I can think of.	3/6/2015 5:40 PM
548	Make 28/28X more frequent.	3/6/2015 5:38 PM
549	Keep the friggin 71 and 76.	3/6/2015 5:37 PM
550	keep the south half of the 66 as is!	3/6/2015 5:29 PM
551	I really think the 545 dogleg needs to be replaced with stops at the I-5 onramp for all trips.	3/6/2015 5:20 PM
552	not sure	3/6/2015 5:19 PM
553	Maintain 71 between U District and Wedgwood and terminate route at Campus PKWY NE. All other alternates involve dramatically more walking and travel time. Alternate 1 makes travel to University Ave prohibitive from Wedgwood. There's literally nothing there for us.	3/6/2015 5:17 PM
554	Bring back the 79!	3/6/2015 5:13 PM
555	Until the light rail service can reach the N. Seattle neighborhoods, the bus service has to remain broad coverage, with express and frequent buses taking commuters to the link rail.	3/6/2015 5:10 PM
556	Actually make some new connections with light-rail service	3/6/2015 5:09 PM
557	I don't like Alternative 2 due to increased wait times.	3/6/2015 5:01 PM
558	I am satisfied with Route 49 to the U District and can transfer, if necessary, to a bus to University Village. I won't use the link from Capital Hill to the U of W on the trolley. I prefer buses as they carry more people are more effective means of transportation.	3/6/2015 4:53 PM
559	have rapidline along 15th ave ne with faster connection to buses to Bellevue from uw	3/6/2015 4:51 PM
560	No ideas for improvement.	3/6/2015 4:45 PM
561	More frequent service along main corridors	3/6/2015 4:43 PM
562	71 is an essential route between downtown to Ravenna/Wedgwood/Sand Point commuters. I probably didn't read everything as well as I should, but please maintain a clear connection between these two destinations.	3/6/2015 4:34 PM
563	Again, have the bus Travel south all the way on 35th to 45th and North from 45th to 35th.	3/6/2015 4:30 PM
564	Keep the advantages that Alternative 1 provides, while making sure no areas with key locations are cut off. Maybe by modifying 48 or 49 and adding a connection through Montlake to the new University light rail station. And I would keep the stop on route 242 on 148th Ave NE by adding the 541 stop/route to the alternative 1 too, not just alternative 2.	3/6/2015 4:26 PM
565	As a person who does not own a car -- just implement alternative 1. Please. It would be a game-changer for public transit in Seattle.	3/6/2015 4:18 PM
566	Add some options for us eastsiders please	3/6/2015 4:10 PM
567	Think it over more carefully and take into account the needs if all of your customers. Since you took away route 30 during the day I do not have convenient, time sensitive access to my grocery store, my library, my grandchildren, my exercise class and other frequent destinations. I suggest the planners ride bus routes before they make decisions.	3/6/2015 4:08 PM
568	Well, I'd look long and hard at what the actual advantages of connecting to light rail are. the UW Link station is in a terrible place with terrible traffic for making connections. I'd likely wait until the 2021 extension of Link to integrate the two systems fully. I'd also start by looking into improved service north of 65th. Both alternatives are the same or worse for timing and both abandon 15th Ave NE creating a longer walk for multiple neighborhoods.	3/6/2015 4:04 PM

569	Haven't really thought that far yet. I don't usually travel that far but can ask students who do to see what they think.	3/6/2015 4:03 PM
570	I think it strikes that balance as well as it can. Anywhere that you can find to squeeze in a few more short, direct connections instead of long-haul routes will improve the flexibility of the web, but I really appreciate keeping distributed coverage.	3/6/2015 4:00 PM
571	Increase frequency of Rte 8 to allow connection with light rail from Queen Anne and Belltown without going through downtown	3/6/2015 3:58 PM
572	Keep the local 73 on 15th Ave. NE - moving it to Roosevelt will be a hardship for everyone in Victory Heights and Pinehurst who walk to catch the bus. Do you really intend for people to drive to a bus stop?	3/6/2015 3:52 PM
573	More frequent service. Given the poor location of the husky stadium station, the light rail will not be very useful until either the university district or roosevelt stations open.	3/6/2015 3:51 PM
574	Cannot have cake and eat it too, so it would be impossible to continue with similar service Consistency and frequency while implementing light rail to bottom-line costs.	3/6/2015 3:36 PM
575	better connection between Sand Point and UW Link station.	3/6/2015 3:32 PM
576	The new route 30/68 hybrid seems to not be all that useful. Along NE 75th St, it's an inefficient way to get the UW, especially for anyone living near Roosevelt Way, 25th Ave, or 35th Ave. Likewise along 40th Ave NE why not just take Route 65 instead. Also, the 71 shuttle along 65th doesn't seem hugely useful, since it seems it's main purpose would be shuttling people between the North-South routes (73, 68, 372, 65, 75) as opposed to travelling to any specific destinations.	3/6/2015 3:31 PM
577	No idea	3/6/2015 3:27 PM
578	Increase frequency of trips toward downtown.	3/6/2015 3:27 PM
579	More direct service to Downtown Kirkland	3/6/2015 3:27 PM
580	again -- why nothing that goes along sandpoint/montlake and connects to the light rail station?	3/6/2015 3:24 PM
581	have 65 stop nearer Link station	3/6/2015 3:23 PM
582	Have more buses that go TO where the rail locations are, then it's just one transfer. This seems like a way to keep it slightly more convenient for people in suburban areas while those actually in the highest traffic zones will suffer.	3/6/2015 3:20 PM
583	The corridor between 35th and Lake City Way, especially north of Wedgwood, needs more consideration. There seems to be a lot of east-west connections being made from the U-District to Wedgewood/Green Lake at the expense of north-south routes.	3/6/2015 3:18 PM
584	Consolidate more routes to focus on frequency and on-time operations instead of prioritizing geographical distribution.	3/6/2015 3:14 PM
585	I would be sure that a route would continue north of 92 around Northgate Way to the transit center.	3/6/2015 3:09 PM
586	I can't improve it. The improvement is to go with A1, having the fortitude to weather all the public complaints that will result from having to possibly walk farther to a line. The general public often undervalues all day frequency when it comes to transit lines.	3/6/2015 3:07 PM
587	Having frequent service from the Link Light rail station up Sand Point Way (including NOAA) that doesn't involve going along University Way. Besides a direct route up Sand Point, another route could run from the Link Station up the west side of University Village to North 50th and then follow the existing route of #30.	3/6/2015 2:56 PM
588	Light rail does not help South Lake Union / Eastlake areas. This plan has no advantages for me, only disadvantages. No access from Northgate to Eastlake without multiple transfers will make me have to consider driving to get to and from work in a timely manner.	3/6/2015 2:53 PM
589	More Eastlake options.	3/6/2015 2:53 PM
590	More frequent, reliable service.	3/6/2015 2:48 PM
591	Frequent service is key.	3/6/2015 2:45 PM
592	Keep the 255/256 treatment from Alt. 1. This would allow for easy transfers between 255 and light rail while still maintaining a 1-seat ride from Kirkland to downtown during peak.	3/6/2015 2:44 PM

593	Don't know, do Alternative 1 instead? ;-)	3/6/2015 2:41 PM
594	None	3/6/2015 2:41 PM
595	Scrap the plan and go with #1.	3/6/2015 2:40 PM
596	I'd like more frequent rides, but I understand there's only so much you can do.	3/6/2015 2:36 PM
597	On time service that gets people to work on time. Currently bus drivers on care if they are downtown before the half hours not about the people who have to catch a nother bus.	3/6/2015 2:36 PM
598	WORK WITH UNIVERSITYOF WASHINGTON TO RUN PEAK PERIOD TRIPS IN THE E1 PARKING LOT(BUS ONLY LANE) DIRECTLY TO CONNECTION WITH LINK LIGHT RAIL STATION.	3/6/2015 2:12 PM
599	ignore it. Do Alt. 1 instead.	3/6/2015 1:11 PM
600	Keep direct north-south routes between Jackson Park or Shoreline and the U District along 15th Ave NE. Feeder routes to Northgate will only cause more congestion and crowds from the Northgate station.	3/6/2015 1:04 PM
601	Why you can't just fuse the 67 & 68 routes to form a loop between Northgate and the UW is something that has baffled me for years. It's such an obvious thing to do, and that way you would maintain the important street links along NE Northgate Way, Roosevelt between NE Northgate Way and 75th, 75th to 25th, and the rest of the loop along Stevens Way, through 11th up to 5th and back to the Northgate transit Center.	3/6/2015 12:27 PM
602	Increase 11 frequency, break 8 at Madison Valley & MLK, and extend to Madison Park.	3/6/2015 11:48 AM
603	To do so little to expand frequency while only preserving token coverage on infrequent portions of the network is practically unconscienable. Any and all possibilities for improving frequency on core corridors, expanding the grid-like nature of the network to improve cross-town trips and network legibility, should be undertaken. If some compromise between Alternative 1 and Alternative 2 is the ultimate destination, one would hope it would lean much, much, more heavily toward the former. Any concessions to retaining the status quo layout of the network (as basically proposed by Alternative 2) should be limited to corridors with the highest density of destinations and residents, AND that already have at least nominally frequent service.	3/6/2015 11:47 AM
604	See my comments for Alternative 1.	3/6/2015 10:59 AM
605	Delete Routes 25/62 and reallocate elsewhere. Revise routing of Route 68.	3/6/2015 10:49 AM
606	Less downtown connections (we should be using link), more neighborhood connections and connections to light rail.	3/6/2015 10:32 AM
607	Delete the 43, split the 48, re-route the 49 to Madison as in Alt 1, cut the 12 to hourly and possibly truncate it at 15th, send the 73 straight down Roosevelt then to UW Station, keep the 48N on 15th (or else move it to the Ave instead of Roosevelt), send the 62 to the 76's terminal, truncate the 11 at Capitol Hill Station.	3/6/2015 10:14 AM
608	dead on arrival	3/6/2015 10:12 AM
609	Keep the Route 73 to Pinehurst!	3/6/2015 9:07 AM
610	Option two seems nice but I cannot think of a way to have my cake and eat it too. Option 1 is probably better overall but option 2 seems less scary because it is less of a change in the near future.	3/6/2015 9:02 AM
611	I'd opt for Alternative 1.	3/6/2015 8:47 AM
612	Route 68 does not seem to provide a lot of additional coverage, so its resources could be re-invested into improving frequency on other routes. Maybe moving the 73 to UW Station instead of downtown would also allow more frequent service, although there is definitely a trade-off between faster service (in some directions) and more frequent service.	3/5/2015 10:39 PM
613	Provide service on Ravenna Avenue at NE 92nd to either connect to the Light Rail at Husky Stadium or don't cancel # 72.	3/5/2015 10:24 PM
614	Improve service frequency and bus-train transfers.	3/5/2015 6:52 PM

Q15 Would you like to give us feedback on changes being considered for the Capitol Hill and Central Area, including Montlake and Madison Valley?

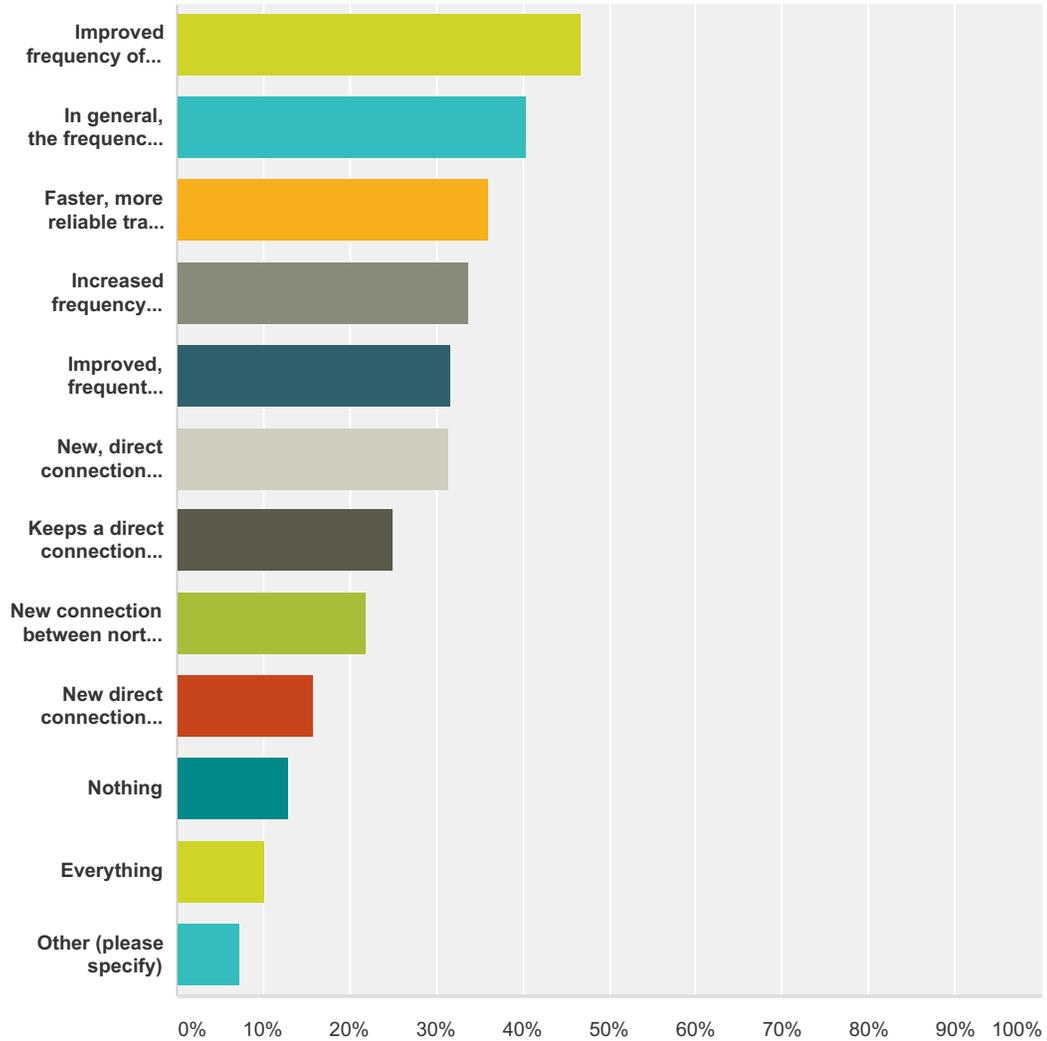

Answered: 4,498 Skipped: 2,061

Answer Choices	Responses
Yes	42.40% 1,907
No	57.60% 2,591
Total	4,498

Q16 What do you like most about Alternative 1 on Capitol Hill and in the Central Area? (choose up to five)

Answered: 1,508 Skipped: 5,051

Answer Choices	Responses
Improved frequency of all-day service connecting Madison Valley, Capitol Hill, Denny Regrade, South Lake Union, and Seattle Center (concept for Route 8)	46.75% 705
In general, the frequency of service in this network concept	40.45% 610
Faster, more reliable travel times between Capitol Hill and northeast Seattle	36.21% 546
Increased frequency between southeast Seattle, the Central Area, the University of Washington, and the University District (concept for Route 48)	33.89% 511

Improved, frequent all-day service along Madison Street between Broadway and downtown Seattle (concept for Route 49)	31.83% 480
New, direct connection between Madison Valley, E John Street, and Link light rail at the new Capitol Hill Station (concept for Route 8)	31.56% 476
Keeps a direct connection between the Central Area – along Martin Luther King, Jr. Way – and Link light rail at the new Capitol Hill Station (concept for Route 38)	25.07% 378
New connection between north Capitol Hill and Madison/Marion corridor (Concept for Route 49)	22.02% 332
New direct connection between Rainier Freeway Station, First Hill hospitals, Seattle Central College, and Group Health on 15th Avenue (concept for Route 9X)	15.92% 240
Nothing	13.00% 196
Everything	10.28% 155
Other (please specify)	7.23% 109
Total Respondents: 1,508	

#	Other (please specify)	Date
1	It's actually less convenient for me, but it does seem reasonable to split the 48 route up -- it's such a long route as it is now.	3/31/2015 11:04 PM
2	I have never been inconvenience by the schedule on the 43	3/31/2015 6:31 PM
3	Keep Route 12 service. Run Route 11 on Madison from Ferry Terminal to Madison Park	3/31/2015 5:11 PM
4	Please keep #12 and #43 buses running to service North Capitol Hill	3/31/2015 4:52 PM
5	You're. Forgetting about the taxpayers in montlake	3/31/2015 4:41 PM
6	There are a few good features, but removing the route 12 is a deal-breaker	3/31/2015 4:05 PM
7	I use the 43 for a non-stop ride downtown all the time. You put the light rail station so far away from the residential homes of the north side of capitol hill it's impractical to walk/wait 20 min for a bus (48) to take me to a train so I can ride to downtown. I could still take the 48 but transfers are a pain.	3/31/2015 10:28 AM
8	See previous comments.	3/31/2015 9:35 AM
9	I need to get (without transfer) from Boyer/Newton to the University and downtown. I am worried the 43 or 48 service will change.	3/31/2015 8:47 AM
10	This option would eliminate service in some areas.... that's not an improvement!	3/31/2015 7:19 AM
11	na	3/31/2015 12:18 AM
12	The connections between central and southern Capitol Hill and Link light rail. That's the line of demand for service to UW via Link; that's what needs to be fed.	3/30/2015 5:37 PM

13	Generally, I have concern for any changes from Metro current service, UNLESS THERE IS AN INCREASE/IMPROVEMENT OF SERVICE (additional routes, frequency & buses). ANY PLAN THAT DELETES ROUTE 43 IS UNACCEPTABLE. ANY PLAN THAT REDUCES SERVICE TO ALL NEIGHBORHOODS, INCREASES WALK & WAIT TIME TO/FOR BUSES IS UNACCEPTABLE. Living in the west edge (7th to 8th Ave NE, NE 45th St to NE 47th St) of the U-District, using Light Rail is not really an option I will consider except for novelty from time to time or if going to SeaTac, which I never do. Both Alternatives appear to reduce service to my area of the U-District. I go to the Group Health area of Capital Hill (I call East Capital Hill) 2-4 times a week. Deleting route 43 or it's current frequency will be a burden for me. Using route 48 & 8 increases walk time 10 min and wait time 10-15 min (I've tested it the past 2 weeks). It takes me an average of 20 min of additional time from leaving my home to reach my destination in the Group Health area.	3/30/2015 2:40 PM
14	Will only work if i can get to light rail from Montlake at convenient intervals	3/30/2015 9:58 AM
15	Increased frequency of ST542, to cover off peak hours, is the only thing i like.	3/30/2015 9:15 AM
16	dividing Route 8 or Route "late"	3/30/2015 7:18 AM
17	I am retired so frequency is not such a big issue for me. I prefer keeping the routes that access my home, 43, 48 and 25.	3/29/2015 6:12 PM
18	I like the breakup of the #8. Remember there is a big hill between Madison Valley and Capitol Hill. I predict people who used to get the #8 on MLK will either walk to Madison (me), or will get the other bus and transfer. Point is the walk is on the flat. The alternate 3 being proposed provides 2 choices for those who catch the #8 on MLK -- walk straight up hill, or walk 4-5 block and catch a bus and immediately get off to transfer. People will quit the bus at that rate.	3/29/2015 12:13 PM
19	I already walk or use transit in the daytime. With Alternative 1 I would use transit for night-time events downtown, Seattle Center, and University District because of the increased frequency.	3/29/2015 10:58 AM
20	Faster, more reliable trips between Redmond / Kirkland and central Capitol Hill via transfer to light rail at new UW station (from routes 255 and 542).	3/29/2015 10:21 AM
21	The number of stops should outweigh frequency. People in the central District can use the Jackson St and International district light rail stations.	3/29/2015 12:58 AM
22	I don't want to see any cutbacks in the 49 going downtown from N. Capital Hill	3/28/2015 11:58 AM
23	Faster, more reliable travel times between Capitol Hil and northwest Seattle.	3/28/2015 9:53 AM
24	What about Madison Park?	3/27/2015 5:11 PM
25	There are some good features, but losing local transit negates those.	3/27/2015 3:48 PM
26	We need more buses on Capitol Hill. Many people are disabled and need the transit.	3/27/2015 1:53 PM
27	This is a dream come true!	3/27/2015 11:36 AM
28	I live in Montlake and take the 43 downtown and to stops in capital hill. This would be bad for me and for my 79 year old husband who takes the bus home every day between the University and Boyer. Changing buses would be extremely inconvenient as would a longer wait. Connecting to rapid transit in the u district would involve a long walk or a long wait to get there. WE have lived in Montlake for over 40 years and depend on the 43.	3/27/2015 10:11 AM
29	I like that it funnels riders to the newly available seats on Link potentially allowing busses to funnel people from smaller neighborhoods and maintain a high level of service to small neighborhoods.	3/27/2015 9:13 AM
30	I am not sure how to answer these questions. Metro needs to improve the bus frequency and connections between light rail and buses. In my case I want to get to Children's and with the soon to open light rail stations in UW and U District I could take light rail downtown or to Rainer Ave and get a bus home. But if these buses don't run frequently 7 days a week I end up having to drive to work	3/26/2015 11:42 PM
31	Frequency of service is key!!	3/26/2015 4:41 PM
32	It would take a lot longer because by the time I got to the Broadway link station I could have walked downtown. A lot of people use the 12 to reach Country Doctor Clinic, and there would be no way for those people to get there if they could not walk far.	3/25/2015 3:36 PM
33	I like the new 49 concept as it adds to the Madison corridor downtown. Southbound passengers have many destinations and this change will not result in most of one load unloading to be reloaded onto another bus. Northbound passengers board at many different locationss as well, and the university District	3/24/2015 11:40 PM

34	It attempts to ensure the new service hours on Link are useful to the entire system. The lack of common understanding between the two systems regarding transfers and locations of stations make it difficult to ensure that there is an actual improvement. The new plan for the 49 has real potential to add to the system and improve rider experience. That is the only real improvement that I see. Otherwise, many passenger loads will be loaded and unloaded unnecessarily often and the loss of the 12 leaves a real hole in the service on Capitol Hill.	3/24/2015 5:29 PM
35	You're trying to sell your plan even as you're offering a "survey" of people's wishes. Your survey seems dishonest, like you're a shill or something.	3/24/2015 3:51 PM
36	New access to light rail is an inherent benefit for the neighborhood	3/24/2015 2:42 AM
37	Makes light rail the centerpiece of Seattle transit.	3/22/2015 11:26 AM
38	There is no 47 service in this alternative, and you have not restored the service levels to central buses such as the 10, 11, 12, 43, 47 and 49. All of these routes have suffered greatly under the management of current King County Metro. The "Capitol Hill to Madison Marion Corridor" is just a reboot of the old 7, which was stupidly removed years ago by King County Metro. It's return is long overdue. Restore multiple bus stops along Pike eastbound for routes heading into Capitol Hill. The current situation of only stopping at 2nd and at 7th is ridiculous, dangerous, and creates more anger and resentment in my opinion of King County metro than most anything else because it shows how little you value central ridership. You're too busy decorating your nice new suburban buses, in an idiot attempt to convince Issaquah and Woodinville they ought to be riding commuter buses. If they wanted it they'd vote for it - which the resoundingly did not. Meanwhile, we that live in the central city of Seattle get services cut after we vote overwhelmingly in favor of more buses.	3/20/2015 5:39 PM
39	Define " all day service"	3/20/2015 3:13 PM
40	My main concern is catching the bus at Pine/Pike and being able to go downtown, or back up to Capitol Hill from downtown. Right now the frequency is very good for that area, between the 10/11/43/49. However, going back up the Hill, I don't feel the frequency is as consistent. It seems a group of buses will come, then a long 10 minute stretch, then another big group. It would be better (and it sounds like Alternative 1 may improve this) if there was less wait between buses going up the hill.	3/20/2015 9:17 AM
41	More frequent service for the route 11	3/20/2015 7:33 AM
42	Would the 49 concept duplicate the First Hill trolley if it ever starts up?	3/19/2015 10:02 PM
43	Current routes and alternatives give me lots of choices to use light rail on Capital Hill.	3/19/2015 9:59 PM
44	This plan has many merits, but it does not work for our bus needs. The 12 takes me to my office (1st and Madison) and also along the medical centers on Madison for appointments. Losing the 12 in Plan 1 will mean I am no longer able to bus to work easily. Also, losing route 43 connection to downtown Seattle would be a big loss. We use this bus for family trips to downtown.	3/19/2015 2:39 PM
45	I like the increased *span* of frequent service on the 8, I'm not a huge fan of the increased frequency during peak hours due to reliability problems on that route.	3/19/2015 11:32 AM
46	No Comment	3/19/2015 10:46 AM
47	Keep 545 running from Overlake Transit Center to downtown area as that is how i get to work please. I know 545 runs through Montlake so please keep that too. It's alot easier and benefits me going to work. Please don't change it.	3/18/2015 10:25 PM
48	This is a terrible idea. For anyone living in North Capitol Hill more than five minutes walk from the Broadway and John light rail station, this will mean longer commute times to the University District. I make this commute every single day. These buses are full every day, and most travelers from the UW to Capitol Hill get off the 43 more than 5 minutes walk before Broadway and John. Moreover, the walk from the UW light rail station will add an additional five minutes to my journey. I estimate that my daily commute from my house (16th and Republican) on the light rail will be 20 minutes LONGER than it currently is using the #43. This is not public transportation progress. It is a light rail boondoggle. Sincerely Robert Wood Professor, University of Washington PS. The same thing happened with bus route 194 which reliably took passengers from downtown Seattle to the airport in 30 minutes until it was cancelled because of the light rail. The trip now takes 40-45 minutes on light rail. Is this progress? The idea is that new transit systems augment the public transportation system, not replace existing components.	3/18/2015 8:55 PM
49	More frequent 49s between the university and Broadway	3/18/2015 5:16 PM
50	I take bus 43 to GH Capitol Hill only from the University of WA.Campus	3/18/2015 4:25 PM
51	As long as the 49 runs from Roy/Mercer to the U District every fifteen minutes, I'm good.	3/18/2015 3:24 PM

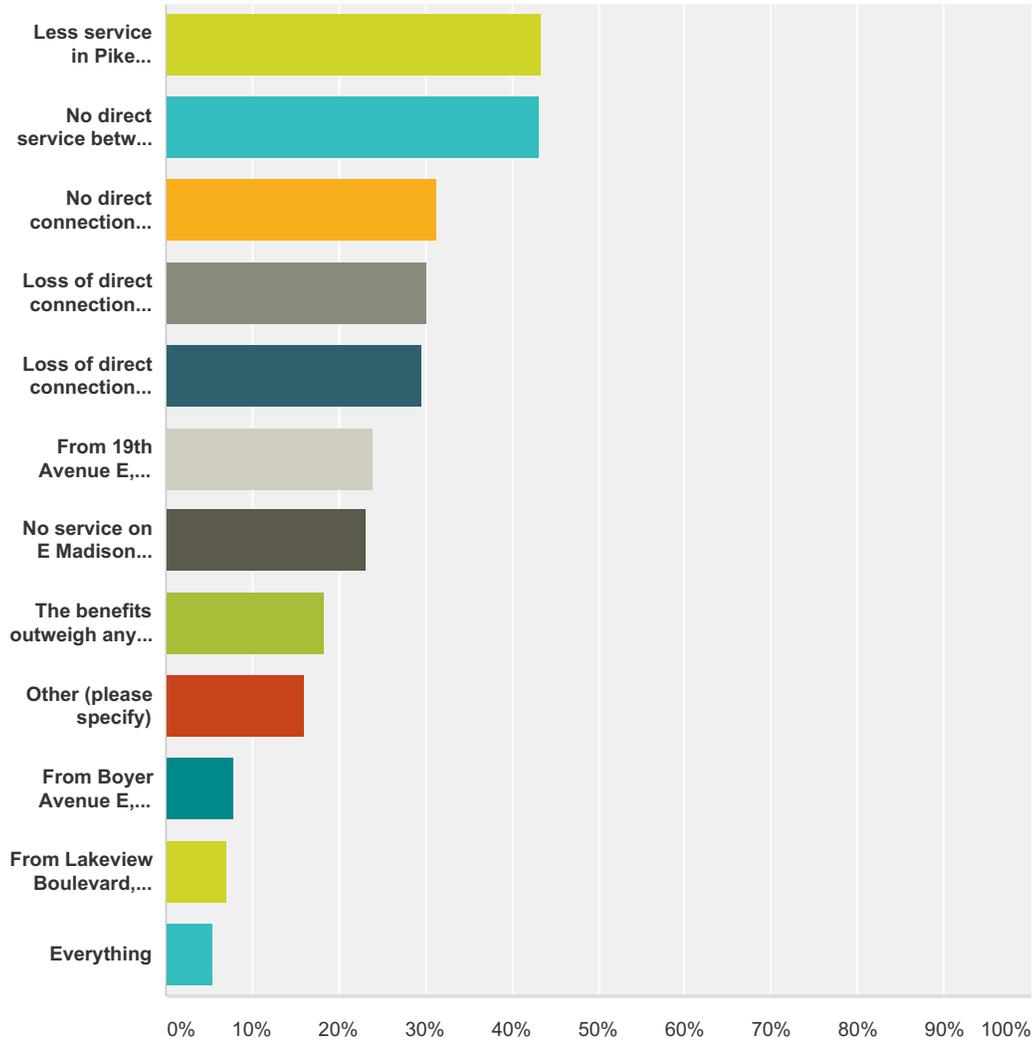

52	not sure	3/18/2015 12:19 PM
53	The eastern side of N Cap Hill gets screwed in this alternative - 12 and 43 gone means I have to transfer to get anywhere. This is a terrible plan for my neighbourhood.	3/18/2015 12:06 PM
54	These are very extensive and important changes - and sitting at work I really do not have time to go over every detail - but I offer this comment and thank you for the opportunity. To reduce service where there is duplication is one thing (e.g. buses coming up from downtown to capital hill) but to take out service entirely can really hurt people on the hill - the most densely populated area and still growing. And the buses can be packed coming up from downtown and packed going to Montlake (all the tech workers) and then the hospital and university workers. Light rail is long overdue but cutting too much until you can track ridership is going to be very hard on a lot of people. Tough job. Thanks	3/18/2015 11:54 AM
55	I gave my feedback already in the previous section; I was so mad about the 43 disappearing I didn't read the question properly.	3/18/2015 11:49 AM
56	My girlfriend works at the Dearborn Goodwill, and gets off work at 1am. The bus comes right at 1am, so she can't make it. Next bus comes at 2am. Any way to fix that? No way can she be safe at that bus stop for one hour, so she has to drive, but would prefer bus.	3/18/2015 11:43 AM
57	Reiterating the everything selection--I absolutely love this alternative! More frequent service; easier to understand network--it's all going in the right direction!	3/17/2015 10:52 AM
58	In Capitol Hills, it nice to have bus route 38 stop at the Hearing Speech and Deafness Center (HSDC) You are making different to the Deaf and Deaf-Blind Communities because bus route 38 provide a better connection between Seattle Lighthouse for the Blind and Seattle Deaf-Blind Service Center at the HSDC....thank you for doing it and hopefully public are strongly support to have alternative 1 into reality	3/17/2015 12:25 AM
59	I am so sorry but the proposed changes are very confusing and I am not sure how this will impact me so I don't have enough understanding to provide feedback	3/16/2015 12:30 PM
60	To make Seattle a world class city, we need more frequent and reliable transportation not only in Downtown, but to the neighboring regions. This is a good step in the right direction, with regards to frequency. Better use of the new network.	3/16/2015 12:21 PM
61	It's absurd that there the ability to have a freeway station at Montlake has been taken away with the 520 design. This was never addressed as to why in the draft EIS. There are nice new freeway stations on the eastside, but you have limited your ability to have connected transit from the eastside to downtown, with a short stop at Montlake, creating this tortured set of alternative plans that require people to transfer. I don't believe that this is a time savings.	3/16/2015 11:47 AM
62	Simplicity. Fewer routes at higher frequencies makes it easier to maintain a mental map of the transit system, allowing more flexibility and spontaneous trips (rather than elaborate route planning via schedule books and the online trip planner). In short, it makes transit use more like biking/driving in that I don't have to plan my life around Metro's schedule. Greater simplicity also makes giving transit a try less intimidating for new riders.	3/15/2015 4:53 PM
63	The route 48 link between UW Link Station and Mt. Baker Station (along 23rd) serves a vital link between North Capitol Hill and access to the Light Rail. Currently, I take the 48 to Mt. Baker Transit Center to access the Light Rail (northbound or southbound). Once the Link Light Rail is complete, from Downtown, I envision taking the service all the way to UW then transferring southbound on the 43 or 48 and getting off on North Capitol Hill (Aloha). Alternatively, when I return from the Airport, I plan to get off at the Mt Baker Station, then catch the 48 northbound, as this will take less time, then all the way to UW and then south bound.	3/14/2015 3:55 PM
64	What ARE the alternatives for the Capitol Hill area? I haven't seen them, I don't know what they are--where and how can one review them? I can't vote on them because I don't know what they are!	3/14/2015 8:39 AM
65	It looks like the 8 already provides a direct connect to the Link station on Capitol Hill	3/13/2015 11:20 PM
66	The 8 has serious timing problems. Shortening the route would increase efficiency, and the increased frequency would mean less crowding.	3/13/2015 6:41 PM
67	I still don't see anything about the buses from Kirkland.	3/13/2015 6:12 PM
68	What is Alternative 1 ?	3/13/2015 2:52 PM
69	There needs to be pick ups into Madison PArk. The seniors rely on that mode of transportation. It is not right to cut that service out and force people to use their cars	3/13/2015 2:42 PM
70	The fix of swapping the 545 to be a peak-only service and the 542 to be all-day, directly to light rail.	3/13/2015 10:16 AM

71	After providing desperately needed capacity on the city's most chronically overcrowded lines (hello, RapidRide), my biggest wish for Metro is to improve frequency and service hours between downtown and the heart of Capitol Hill. This sounds like it would achieve that goal.	3/13/2015 9:53 AM
72	Keep the 48 route from rainier valley to rainier beach	3/12/2015 2:18 PM
73	I live in Columbia City and work at Swedish Medical Center. I was eager to take the route #9 to work, but then found it was impossible because there is no weekend service or evening service after 7 pm.	3/12/2015 10:26 AM
74	You need to keep the quality of service you currently have for the number 9 and 60(on Broadway and the 49(to downtown from Broadway) but I don't believe this will be done as these buses aren't even listed . You've also made a comment that we in the future will know where the busses stop and the times. Don't we know now? You have listed bus stops and bus schedules. Busses don't stop where there are no bus stops.	3/12/2015 9:36 AM
75	The alternative plans are very confusing--difficult to comprehend	3/11/2015 11:46 AM
76	I hate everything about it. I like NOTHING about this plan and am mad I voted to fund it. It appears all benefits move to Broadway & everyone else is screwed. We don't need more transit to the retail core, it's everything else. You are also cutting mobility to elderly and less physically able.	3/11/2015 7:53 AM
77	No bus near madison park..we are not all rich with nice cars you know.	3/11/2015 12:53 AM
78	There should be some direct route from the Central District to the downtown shopping district. This appears to be missing in both Alternative 1 and Alternative 2. The current #2 routing is excellent.	3/10/2015 2:58 PM
79	I am really excited to see the 8 split off to go to Madison Valley and a separate bus for Rainier Valley. Need to figure out how to speed up the 8 on Denny. (No easy task, I know)	3/10/2015 2:45 PM
80	Alt 1 is very bad for my neighborhood. I live near 19th and Aloha. This proposal would get rid of both the 12 and the 43. I take the bus down to Montlake to connect to the 545/542. Today I can take the 43 or the 48. this proposal gets rid of the 43 so I have 1/2 as many ways to get to Montlake. This makes what is currently a convenient route into an inconvenient one. Getting rid of the 12 is also terrible for us as it is the way to get to the south end of downtown and the Seattle U area. The ULink is not a replacement because we don't live anywhere near either the Capitol Hill or University District ULink stations. This proposal basically takes what is a very friendly bus neighborhood, removes 1/2 the buses (the 12 and the 43) and doesn't replace them with anything. Please come up with something else.	3/10/2015 2:04 PM
81	I am not qualified to comment since I have only just perused the Alternative.	3/10/2015 10:52 AM
82	simpler transit system by removing unnecessary inefficient routes	3/10/2015 9:15 AM
83	Why decrease bus service when the goal is to have MORE people take public transit? My son rides the bus to high school: O'Dea on First Hill.	3/10/2015 8:15 AM
84	It's hard to believe that consideration is being given to eliminating the direct Madison Park/Downtown route that is so full mornings and evenings. This is a major commuter route and gets people who could afford to drive out of their cars!	3/9/2015 4:41 PM
85	Everything I read (or don't read) indicates that the 11 will no longer travel to Madison Park. If that is the case, there will be issues...	3/9/2015 3:09 PM
86	Keeping Route 11 the way it is now.	3/9/2015 2:16 PM
87	Need to keep the 25 & 43 running at their current schedules, or how is anyone in Montlake/Portage Bay, the closest actual communities to the light rail station, going to get any benefit from it without increased access to the station?	3/9/2015 12:40 PM
88	Please keep access from 15th & Pine to downtown (currently Routes 10 & 11 / revised Route 8?). I use that to connect to Route 77. It would be too far to walk from my workplace at 17th & Olive to the new transit station at Broadway & Denny. Thanks!	3/9/2015 11:52 AM
89	I am worried about what these changes will do to traffic to and through First Hill.	3/8/2015 6:31 PM
90	I like the increased frequency on the #8 (new #38). That's great.	3/8/2015 10:34 AM
91	Anything that makes it easier to travel to and from UW	3/8/2015 10:20 AM
92	Totally unacceptable because it ends the route #12	3/7/2015 11:52 AM
93	Don't cut bus routes! We need them!	3/7/2015 10:11 AM

94	number 8 is not affected to the central area; it looks like it goes at least to Madison Park anyway	3/7/2015 3:57 AM
95	mobility is a big question for me. I would NOT like longer distances between stops.	3/7/2015 12:43 AM
96	greater frequency would be great! Like when I was in Chicago.	3/6/2015 6:00 PM
97	I live in Madison Park. With the 15 minute or better service from Madison Park to the Capitol Hill light rail station, I won't have to time the bus when leaving to work, I can simply go walk to the bus stop and grab whatever bus comes next. Frequency is key. Then, taking light rail from Cap Hill to UW will be a snap. Love Alternative 1. I can also zip downtown super fast this way and have my choice of exits in the bus tunnel far faster than I can today. Great stuff.	3/6/2015 5:35 PM
98	I am not sure I understand the changes or know enough about the impacts	3/6/2015 5:20 PM
99	Route 8 definitely needs more frequent and more on time service. It's very unreliable now, leaving early or late on a regular basis.	3/6/2015 4:32 PM
100	I am concerned that you will change the express bus to the hospitals on capital hill. How can I take the light rail when there is no place to park?	3/6/2015 4:06 PM
101	Removes service on 19th Avenue E.	3/6/2015 3:58 PM
102	I live in Madison Park and you expect me to take 3 buses to get anywhere! I don't drive and I'm a senior and you want me to transfer twice, please think about what you asking!!!	3/6/2015 3:56 PM
103	I said no to this section and it directed me here anyway	3/6/2015 3:48 PM
104	Montlake Freeway Station to Kirkland direct	3/6/2015 3:29 PM
105	I would like a connection from Capitol Hill to University Village	3/6/2015 3:22 PM
106	I am worried that the Central Area is in the shadow of all the new transit and that if you take away some of our stops, we will have even less service than we do now. We do NOT have a quick, direct bus downtown!!! The 4 take forever as does the 14. The 27 has been almost eliminated! The only place we can get to quickly is the U district.	3/6/2015 3:08 PM
107	Faster frequency of Eastlake to Downtown and UDistrict through the 70 bus.	3/6/2015 2:43 PM
108	This bold plan is great. Frequency equals freedom, especially is this area with lower car ownership and all day/night ridership. Show up at the bus stop and go, no schedules.	3/6/2015 10:21 AM
109	need to maintain something on madison east of broadway or 15th. i dont see that listed anywhere here but i live on 27th... walking from 27th to 15th seems like a lot to ask to hop on a bus downtown. unless im just missing something here.	3/6/2015 8:37 AM

Q17 What concerns you the most about Alternative 1 on Capitol Hill and in the Central Area? (choose up to five)

Answered: 1,404 Skipped: 5,155

Answer Choices	Responses
Less service in Pike Street/Pine Street corridor (concept for routes 11, 43, and 49)	43.52% 611
No direct service between the University District and the top of Capitol Hill (concept for Route 43)	43.30% 608
No direct connection between the 24th Avenue E corridor and the new Link Capitol Hill Station (concept for Route 43)	31.27% 439
Loss of direct connection between Madison Valley and downtown Seattle (concept for routes 11 and 8)	30.20% 424
Loss of direct connection between the 24th Avenue E corridor and downtown Seattle (concept for Route 43)	29.70% 417

From 19th Avenue E, having to travel farther to access service on 15th Avenue E, 23rd Avenue E, E John Street, E Thomas Street, or E Madison Street (concept for Route 12)	24.00% 337
No service on E Madison Street between Broadway and 16th Avenue (concept for routes 11 and 12)	23.15% 325
The benefits outweigh any concerns I might have	18.30% 257
Other (please specify)	16.10% 226
From Boyer Avenue E, having to travel farther to access service on 24th Avenue E or Harvard Avenue (concept for Route 25)	7.83% 110
From Lakeview Boulevard, having to travel farther to access service on Broadway or Eastlake Avenue E (concept for Route 25)	7.12% 100
Everything	5.34% 75
Total Respondents: 1,404	

#	Other (please specify)	Date
1	Generally, I am concerned that Metro seems very high on the idea that express service and service with transfers (sometimes multiple transfers) is a substitute for local service. I don't think it is -- at least, not a very satisfactory substitute. For example, if I want to get to 19th & Galer (current end of the 12 line), how do I do that with the 12 gone? Walk from the 48? Have you ever walked up that hill? Or down from the 10 on 15th. Not a big deal, unless you have trouble walking (ill, mobility impaired), or you're carrying a heavy load (couple bags of groceries, perhaps), or have small children in tow. How about if I want to go from Montlake to Group Health? Right now the 43 is a direct run. So now I'll have to take the 48 and transfer to the 8. More standing around waiting for the bus -- especially as you can't be sure you'll make the transfer unless you get there plenty early. And if I have to be sure I get there at a specific time, I have to allow for two buses running late, so I have to leave even earlier, since I might miss the transfer connection. Faster, more frequent service is great, but it's not faster if you have to walk farther and/or make more transfers to get where you want to go. And people are much less inclined to use transit if it's not convenient -- enough with the Tayloristic talk of "efficiency"! Express services are good, but cutting routes so that the system goes fewer places isn't my idea of "more transit".	3/31/2015 11:04 PM
2	Loss of service on 19th. Loss of direct connection from MLK to Seattle Center. Current proposal does not provide for a direct transfer between the 8 and 38. Note:If the 8 and 38 overlapped along John between Broadway and 15th, it would provide the opportunity to get off and on at the same stops to transfer between the routes. If this were done with the 38 traveling north on Broadway to Aloha and the 8 turning around at Group Health, the 11 could continue its current route and the 8 would be shortened so it might be more reliable.	3/31/2015 10:12 PM
3	Please keep #12 and #43 buses running to service North Capitol Hill	3/31/2015 4:52 PM
4	I'm writing to express my disapproval in any alteration of the current 12 route. It's a vital link for working parents with children at Stevens Elementary, St. Joes and Holy Names to downtown Seattle. Please keep the 12 as is. Eric and Tina Anderson 931 20th Ave East	3/31/2015 4:48 PM
5	The 43 is the only way I can get to capital hill or downtown.	3/31/2015 4:41 PM
6	Please maintain a direct route linking the UW Light Rain Station to Capitol Hill. I cannot believe that Metro is seriously considering making people take 2 buses to get from the UW Light Rail station up to Capitol Hill. What about all the people who live in between these two destinations? What about older people who cannot drive and will be forced to wait out at bus stops or walk blocks to connections?	3/31/2015 3:58 PM

7	<p>On Broadway: While I support all of Metro's alternative 1 proposals on Capitol Hill, I would like to point out that there is absolutely no way that Broadway (especially south of Pine) has the physical capacity to support the both the Streetcar and the 49 at 10 minute frequencies in addition to the the existing 9 and 60 . You are courting disaster by attempting it. Already with just the 9 and the 60 it can sometime take quite awhile for two busses to be able to stop @ Broadway and Pine. This brings up another point: Metro is always talking about reducing duplication but in this case you are heaping it on. The 9 no longer needs to exist. All of it duplicates the streetcar or the 7. All of it. The route 49 of alternative 1 also makes the entire northern quarter of route 60 duplicative. Considering the congestion issues on Broadway that I mentioned a moment ago, it is even odder and less reasonable to not reconsider there routes right now in this phase. Additionally, it is simply a wasted opportunity. Rather than send every bus in Seattle down Broadway, why not use those resources to provide first-time service on Boren or 12th, both long-standing requests of the community?</p>	3/31/2015 3:31 PM
8	<p>I will have to go all the way to uw to get to the east side. That is pretty stupid.</p>	3/31/2015 2:53 PM
9	<p>43 is a pivotal route to downtown. Please do not eliminate.</p>	3/31/2015 12:45 PM
10	<p>Losing the 43 sucks. If you have ever ridden the 48 and the 43 during peak times the long busses are standing room only all the time.</p>	3/31/2015 10:28 AM
11	<p>See previous comments</p>	3/31/2015 9:35 AM
12	<p>it will take me at least 30 minutes to walk from my home in Montlake to the UW light rail station. I am willing to do that for a ride to the airport, but not to go downtown - that's longer than it takes me now to get downtown on the 43 bus. In bad weather, this is an especially bad option.</p>	3/31/2015 9:15 AM
13	<p>No attention to service to downtown after 5 p.m. Service drops off quickly after 5:30. Improved daytime service is not useful for commuters. More attention to commuter hours.</p>	3/31/2015 8:58 AM
14	<p>I need to get (without transfer) from Boyer/Newton to the University and downtown. I am worried the 43 or 48 service will chang</p>	3/31/2015 8:47 AM
15	<p>I really enjoy the fact that the 11 is right outside my apartment and is accessible from downtown and Capitol Hill. That concerns me that I'll have to walk a significant distance to get to the lightrail</p>	3/31/2015 8:24 AM
16	<p>Transfers present problems for the disabled. The 43 provides connection to hospitals, shopping, restaurants from. Central Capital Hill to U District.</p>	3/31/2015 6:51 AM
17	<p>Keep the 12 and the 43. We live in between link stations. We aren't helped by the train. Don't cut the buses that service our neighborhood.</p>	3/30/2015 9:26 PM
18	<p>Elimination of route 12 service on 19th would not be adequately replaced by service on 24th and 15th. In many places, there is significant hill-climbing needed. Recent construction of higher-density housing along 19th has added ridership on route 12.</p>	3/30/2015 8:49 PM
19	<p>reduced availability for wheelchair people.</p>	3/30/2015 8:28 PM
20	<p>Put the trolley buses back on Madison from lake to the sound</p>	3/30/2015 7:08 PM
21	<p>This survey is very complex and sophisticated, and I worry that the riders who truly need bus service might not have the language skills or knowledge, or even access to participate in this survey. Yet, this is the population that RELIES on Route 43. In other words, this survey is written for people who work at UW and want to make sure our easy public transit is maintained. This survey is not written for segments of residents in the Central District and neighborhoods south who rely on transit that runs on 23rd Ave S and MLK, yet this is a very large group who use bus transit. ---Just a concern.</p>	3/30/2015 6:38 PM
22	<p>The 8 would be the only Thomas/John service connecting to Link, and it is hugely unreliable in the PM peak thanks to Denny Way congestion. The route should be split at Capitol Hill Station to insulate Capitol Hill from Denny, or else aggressive transit-mobility-promoting measures should be put in place on Denny - perhaps the ideas outlined in http://seattletransitblog.com/2011/12/06/the-denny-dilemma/ .</p>	3/30/2015 5:37 PM
23	<p>The loss of the ability of the 43 to go downtown via East John Street. The lightrail is too expensive to do this run.</p>	3/30/2015 5:29 PM

24	Generally, I have concern for any changes from Metro current service, UNLESS THERE IS AN INCREASE/IMPROVEMENT OF SERVICE (additional routes, frequency & buses). ANY PLAN THAT DELETES ROUTE 43 IS UNACCEPTABLE. ANY PLAN THAT REDUCES SERVICE TO ALL NEIGHBORHOODS, INCREASES WALK & WAIT TIME TO/FOR BUSES IS UNACCEPTABLE. Living in the west edge (7th to 8th Ave NE, NE 45th St to NE 47th St) of the U-District, using Light Rail is not really an option I will consider except for novelty from time to time or if going to SeaTac, which I never do. Both Alternatives appear to reduce service to my area of the U-District. I go to the Group Health area of Capital Hill (I call East Capital Hill) 2-4 times a week. Deleting route 43 or it's current frequency will be a burden for me. Using route 48 & 8 increases walk time 10 min and wait time 10-15 min (I've tested it the past 2 weeks). It takes me an average of 20 min of additional time from leaving my home to reach my destination in the Group Health area.	3/30/2015 2:40 PM
25	Service being focused on downtown via Madison Street instead of Pike/Pine.	3/30/2015 2:22 PM
26	Loss of Route 43	3/30/2015 1:10 PM
27	frequency of ST545 is reduced. There is no direct connection from Amtrak/Boltbus on 5th and King, to Bellevue/Redmond, especially on weekends.	3/30/2015 9:15 AM
28	There are significant coverage gaps for the north side of Capitol Hill. I would have expected more service in the area east of Broadway, west of MLK and north of the Pike/Pine linking this area with the trolley and the Broadway station. My assumption is that the cost of light rail to Capital Hill is the loss of the 11, 12 & 43. Losing the 43 makes some sense as the route directly competes will light rail but the loss of the 11 & 12 significantly reduces options for people (read: sick and elderly) who live on Capitol Hill and regularly go to First Hill	3/30/2015 9:07 AM
29	loss of bus 11 to Madison Park	3/29/2015 9:19 PM
30	Already with the loss of the 47, living in the Bellevue/Summit neighborhood has added a 10-15 minute walk each way. Losing the 43 + the loss of Pike/Pine service means it's more likely I'll give up and just walk directly downtown rather than walking the additional five blocks up the hill to Link. It has never worth the time and effort to walk five blocks straight up to the 49 at Roy, and with the 49 being diverted to Madison that slow trip is even longer. It's yet another significant loss to a dense neighborhood. Coming home is fine; walking downhill is always easier. But going out is going to suck.	3/29/2015 7:40 PM
31	This area is the most densely populated in the city and lots of stops are necessary. There should be no reduction or cutting of stops in this area. Many parts of this area have no parking, so maximizing the NUMBER of stops is essential. People should not have to walk more than 2 blocks to catch a bus. Look at Chicago and San Francisco.	3/29/2015 12:58 AM
32	No connection to Madison Park, where we begin all metro trips.	3/28/2015 4:02 PM
33	no direct service to Group Health on Capitol Hill	3/28/2015 1:30 PM
34	This feels like a significant reduction in transit options in one of the most densely populated and rapidly growing areas of Seattle.	3/28/2015 9:56 AM
35	It seems like the Montlake commuter doesn't have many options, a huge downgrade from living in Montlake today.	3/27/2015 9:12 PM
36	No 545 service outside of peak hours	3/27/2015 4:46 PM
37	It makes sense to funnel riders in North Seattle to Link, because those are long trips and passengers will benefit immensely from the improvement, even with the added transfer. But on Capitol Hill, Central District and Madison Valley, the trips are much shorter -- we're not all going downtown, and the added transfer is a big pain. Please retain at least a major bus route up and down Madison Street along its entirety. Besides isn't Seattle doing a BRT on Madison? You should be talking to them.	3/27/2015 3:51 PM
38	From our end of 19th, it is seven long blocks to Thomas (8) and up a VERY steep hill to 15th (10). Impacts kids and parents at Stevens school quite drastically.	3/27/2015 3:48 PM
39	no direct connection between the central area and south lake union!	3/27/2015 3:34 PM
40	We often travel to Madison Park where my mom lives. She also rides many times per week to get to QFC, drugstore and hospitals on S. Capitol Hill. She is 88 and will be seriously impacted if this alternative is implemented.	3/27/2015 2:40 PM
41	Loss of 43 is a real issue. 48 + Madison Ave service does not allow you to reach the same locales on Capitol Hill. Real concern! Access to the Light Rail Station from Montlake as planned by WSDOT is horrible, due to poor at grade connections, and use of out of way tunnels and bridges and also, the loss of the direct connection to downtown from 520/Montlake will not be replaced. 43 is the main tie to downtown. Keep it.	3/27/2015 2:27 PM

42	I live in Montlake and take the 43 downtown and to stops in capital hill. This would be bad for me and for my 79 year old husband who takes the bus home every day between the University and Boyer. Changing buses would be extremely inconvenient as would a longer wait. Connecting to rapid transit in the u district would involve a long walk or a long wait to get there. WE have lived in Montlake for over 40 years and depend on the 43.	3/27/2015 10:11 AM
43	It's difficult to say at this early stage but I think most of my concerns about routes 8, 11 and 43 will be addressed by the Madison BRT project.	3/27/2015 9:13 AM
44	I don't see my route (27) on the maps at all	3/27/2015 9:03 AM
45	Loss of #48 through-service down Montlake - 23rd through Capitol Hill, Montlake, Central, alongside Madronna and to Mt. Baker.	3/26/2015 10:38 PM
46	There should be some way to frequently connect major sections of the city - e.g., U district and Capitol hill.	3/26/2015 4:41 PM
47	More frequent service sounds lovely in theory. But in practice if I have to walk further and transfer, it will take more time, not less, and be much less accessible. Tools like One Bus Away already let me meet a less-frequent bus without long wait times.	3/26/2015 9:02 AM
48	hopefully the 9x service to Rainier Valley/Beach is not affected (preferably improved)	3/26/2015 2:49 AM
49	It will be impossible for people using Country Doctor Clinic to get there without the 12, without walking a distance that may be difficult for people seeking medical care.	3/25/2015 3:43 PM
50	Capacity on LINK to absorb the revisions. 43's are regularly crush loaded.	3/25/2015 1:39 PM
51	Lack of service on 19th. The issue of transfers between	3/24/2015 11:40 PM
52	Will it lead to inefficiency due to the number of passengers, strollers, wheelchairs, not-totally-abled persons having to exit one form of transportation to enter another. Disruptions of service and need to better outline how it would work for students, elders, and disabled who might not feel safe with transferring. Will transfers be direct like stepping of one mode and onto the other. What will be involved? Friends and family members who are occasional users and may not have an Orca Card or may not have it with them at times will have a difficult time with transfers unless Link finally accepts the paper transfers. It is not the riders fault that the Orca programmers and technology is not able to serve the need. I am not comfortable forcing so many unnecessary transfers and very concerned that there is a company whose specialty is transit has not developed a system that allows for easy transfers between Metro and Sound Transit.	3/24/2015 5:29 PM
53	No north-service on 12th Avenue.	3/24/2015 3:30 PM
54	Removes a direct connection to downtown Seattle from Redmond outside of peak times (concept for route 545)	3/23/2015 1:38 PM
55	I live in Madison Valley and work downtown. I don't want to have to transfer on Capitol Hill to get to work, only 2.5 miles away from my house!	3/23/2015 11:20 AM
56	Breaking the route 48 into 2 routes requiring a transfer near the UW station.	3/22/2015 11:01 PM
57	I would have to walk alone, at night, through poorly-lit neighborhoods to the new stations, instead of catching a bus right in front of my apartment.	3/22/2015 11:26 AM
58	Consolidating the 8 and 11 doesn't make sense. We don't take the 8 to get downtown. We take the 8 to get to Seattle Center, Lower Queen Anne.	3/22/2015 9:47 AM
59	I am 70 years old and use Rte. 43 constantly to go downtown. I am right on 24th street and about a mile away from both the new Link centers as I am right in the middle. This plan would make it impossible for me to go downtown on public transportation any more.	3/21/2015 7:41 PM
60	less service in the pike/pine corridors would be very detrimental i think	3/21/2015 10:57 AM
61	Loss of route 25.	3/20/2015 8:33 PM
62	Loss of route 25 from Boyer and 14th.	3/20/2015 8:29 PM
63	No restoration of Route 47 (former 14 to Summit Ave)	3/20/2015 5:39 PM
64	Decreased service between 545 and Capitol Hill	3/20/2015 1:02 PM
65	Changing the 49 to go down Madison while removing the 43 at the same time makes it difficult to get to north Broadway (John to Roy) from downtown, especially from places farther from Westlake Station (such as the Convention Center or Boren)	3/20/2015 7:30 AM

66	The 8 already gets bogged down in traffic, adding more busses into that traffic jam doesn't seem to be terribly effective. Improvements will need to come from SDOT.	3/20/2015 12:41 AM
67	Please keep the 43	3/19/2015 10:27 PM
68	Increasing frequency during peak hours on one of Metro's most unreliable routes (concept for Route 8) The whackadoodle routing between 23rd & Madison and Broadway (concept for Route 38)	3/19/2015 4:05 PM
69	The 49 running down Broadway is bad too	3/19/2015 3:58 PM
70	This plan clearly favors people who live in more upwardly mobile neighborhoods and hurts people who live further away from the proposed transit hubs. It reduces service.	3/19/2015 2:33 PM
71	It seems like the 8 will continue to run into a lot of traffic on Denny Way. I think that working with the City of Seattle on traffic mitigation options to keep the 8 running faster and more on time would help.	3/19/2015 2:14 PM
72	Transfers required to get somewhere	3/19/2015 1:57 PM
73	The Capitol Hill routing for 38 seems very roundabout to me, I'm not sure that portion is worth while compared to going straight into downtown.	3/19/2015 11:32 AM
74	If any of Alt. #1 changes would cutback service/stops now available on Routes 7, 8, 10, 11, 12, 43, 48, 49, Rapid Ride D/C -- I am against Alt. #1. Don't forget people who are dependent on these lines for short trips are areas no longer covered -- like ME.	3/19/2015 10:46 AM
75	It is already soooo difficult to get to Children's and to Magnuson Park (where someone who lives in my house works). My son goes down to Madison Park to hang out at the beach during the summer all the time - we go to Seattle Center as a family to enjoy festivals, museums, plays, etc -	3/19/2015 9:09 AM
76	It sounds like people who don't live on major roads will have to travel farther to get buses. I worry about people with lack of mobility and people who can't afford to move being squeezed out of the system so we can focus on more efficiency. It seems regressive.	3/19/2015 8:07 AM
77	The loss of the 43 connecting into the 44 (which gives easy access from Capitol Hill to Fremont).	3/19/2015 1:08 AM
78	There significant service gaps in service with Alt 1. Areas east of 15th Ave lack direct connections to downtown. The new 38 would make much more sense if it went downtown instead of turning north on Broadway to Roy, which is not really a destination. The lack of service on Madison, especially connecting downtown and destinations east of Broadway, is also missing.	3/18/2015 9:33 PM
79	This is a terrible idea. For anyone living in North Capitol Hill more than five minutes walk from the Broadway and John light rail station, this will mean longer commute times to the University District. I make this commute every single day. These buses are full every day, and most travelers from the UW to Capitol Hill get off the 43 more than 5 minutes walk before Broadway and John. Moreover, the walk from the UW light rail station will add an additional five minutes to my journey. I estimate that my daily commute from my house (16th and Republican) on the light rail will be 20 minutes LONGER than it currently is using the #43. This is not public transportation progress. It is a light rail boondoggle. Sincerely Robert Wood Professor, University of Washington PS. The same thing happened with bus route 194 which reliably took passengers from downtown Seattle to the airport in 30 minutes until it was cancelled because of the light rail. The trip now takes 40-45 minutes on light rail. Is this progress? The idea is that new transit systems augment the public transportation system, not replace existing components.	3/18/2015 8:55 PM
80	In general the lack of service areas. I would have checked more than five if I could.	3/18/2015 6:51 PM
81	loss of 43 and 66 mean northwest Capitol Hill (Lakeview, Melrose, Bellevue, etc) will be caught in between routes to go north - will have to walk pretty far to either 10th/Broadway, Capitol Hill Link station, or Fairview	3/18/2015 5:16 PM
82	43 is a very well-used route and its service is not replicated in Alternative 1	3/18/2015 4:31 PM
83	As long as the 49 runs from Roy/Mercer to the U District every fifteen minutes, I'm good	3/18/2015 3:24 PM
84	Lack of east side connectivity	3/18/2015 2:46 PM
85	You CANNOT eliminate the 43 route. That would be devastating to those who commute to the UW that way and cannot easily access the Link station on Broadway or the 48 route.	3/18/2015 1:42 PM
86	longer distances to get to the bus	3/18/2015 1:17 PM

87	Given travel times of the current 12 between 19th Ave and Colman Dock, I'm worried about the reliability of the 49 when it has to contend with downtown traffic on Madison/Marion. I do like the direct connection to the ferry terminal, but not at the expense of unreliable buses.	3/18/2015 11:51 AM
88	This idea stinks even worse than I thought it would. There are a lot of old and disabled people on the Madison corridor; the 11 and 12 are always packed to the gills. How are they supposed to get to their doctors' appointments in the Pill Hill area?	3/18/2015 11:49 AM
89	The buses used for Route 48 "throw" the passengers around more than the buses used for Route 43. Will there be an improvement in the equipment on Route 48? I often prefer to take the 43 between Capitol Hill and the University District because I am petite and the seats on the 48 seem to be tilted toward the front of the bus. I have to hang on for dear life. I'm sure this won't get any better as I get older.	3/18/2015 11:44 AM
90	With the loss of connections going across town, it seems that there would be more congestion on routes that remain. It is unclear from the description given what capacity looks like.	3/18/2015 11:25 AM
91	Overall, quicker transportation within Capitol Hill to get from the South End to other parts of Seattle	3/18/2015 11:18 AM
92	It's disappointing that you are not doing anything to the 8 in SLU. Denny is a mess, and the buses take FOREVER to get up to Cap Hill during rush hour. And it's really my ONLY option, which forces me to drive. Can't you move the bus off of Denny?	3/18/2015 9:59 AM
93	Loss of single direct route from South Lake Union to the Central Area (concept for routes 8 and 38)—this means two transfers coming from Fremont, or else continuing to downtown to pick up the slow and unreliable route 2 (destination MLK & E Union). However, *the benefits outweigh any concerns I might have*.	3/18/2015 4:14 AM
94	First and foremost, the loss of a direct connection from Madison Park to the Pike/Pine corridor. Connecting to the light rail station on Broadway diverts far out of the way of most of what I'm trying to access. (Pike/Pine, downtown)	3/17/2015 11:50 PM
95	I depend on the 48 as it is. It is an easy way for me (with my bike) to get from my home in Crown Hill to my jobs in the CD, Capitol Hill, Madrona, Montlake, and yes, Mercer Island. If the 48 is broken up, I will just ride more or drive.	3/17/2015 8:27 PM
96	I live north of downtown. The 49 bus I currently take appears to go down Broadway to Madison, then turns west, so it skips the whole of downtown. The alternative seems to be to transfer to the Link, but that will probably significantly add to the time required to get downtown.	3/17/2015 7:33 PM
97	The 545 won't be running during the hours I go to work (9a-11a)	3/17/2015 2:16 PM
98	Alternative 1 provides service that is unnecessarily frequent, at a cost that requires the destruction of good existing bus commuter service elsewhere.	3/17/2015 1:08 PM
99	Change on route 8 in Central Area... No connections between Central Area and Mercer corridor in South Lake Union, while riders from Woodinville(!) get a one seat ride... instead we are getting more service to a no man's land Rainier Valley? WHY? what job in Rainier Valley will pay enough wages to afford housing in mostly residential 98122(cap hill/central district)??	3/17/2015 12:51 PM
100	More walking for the disabled	3/17/2015 11:53 AM
101	Ability for road capacity and traffic congestion to accommodate more frequent service.	3/17/2015 10:52 AM
102	Inability to understand your survey full of jargon.	3/17/2015 8:19 AM
103	It makes it inconvenient to get to Redmond in off peak hours.	3/17/2015 12:10 AM
104	No direct off-peak service from Redmond to Capitol Hill (concept for Route 545)	3/16/2015 5:08 PM
105	Plan is confusing, but from my understanding my commute from the currently Montlake station to Overlake transit center would be less frequent making me more likely to just drive.	3/16/2015 3:35 PM
106	I go a lot to Fremont so it sounds like my commute will be longer. IF this is wrong then it will just be better.	3/16/2015 3:11 PM
107	My home-work commute is a one way bus trip via 545. I picked my home based on this optimal route. I often work past peak-hour times, so I really dislike the idea of a commute that requires a transfer and makes my overall commute time longer.	3/16/2015 2:47 PM
108	How do you get from Capitol Hill and Redmond?	3/16/2015 2:13 PM
109	Impact on 545	3/16/2015 2:08 PM

110	The 15th Ave & E John corridor seems to have gotten a very bad short shrift here. What's the impact on Route 10?	3/16/2015 12:52 PM
111	Less service on Pike/Pine is a deal breaker.	3/16/2015 12:45 PM
112	I am so sorry but the proposed changes are very confusing and I am not sure how this will impact me so I don't have enough understanding to provide feedback	3/16/2015 12:30 PM
113	Unnecessarily adding 20-30 minutes commute time for people who use the downtown area as their 'hub' for connecting routes. Say you commute Redmond - Renton or Redmond - Downtown. Now, unless you adhere to peak times, you would have to go to University District via 542, cross the bridge (6 mins walk), wait for your link (6 mins), and ride to downtown (16 mins).	3/16/2015 12:21 PM
114	The Madison > Downtown route is KEY for me. I ride it every day. I would be required to walk 6+ blocks to Broadway to catch the 12. Please keep the 12 along Madison.	3/16/2015 12:16 PM
115	Loss of all day one seat service from Bellevue & Olive in Seattle to Redmond	3/16/2015 12:16 PM
116	Having to take more buses and make more transfers.	3/16/2015 12:13 PM
117	Loss of 545 outside of peak hours	3/16/2015 12:03 PM
118	Losing a bus line between Montlake freeway station and top of capitol hill - long walk up from light rail stop to the 15th Ave area	3/16/2015 12:01 PM
119	Reduced 545 service between Redmond and Capitol Hill during off-peak hours.	3/16/2015 11:55 AM
120	Changing the 545 to peak hours only would probably force me to not use public transit as much to get to and from work.	3/16/2015 11:50 AM
121	The removal of a stop that is used heavily (Montlake freeway station). This freeway station needs to be built into 520's redesign -- oh, that's right -- the redesign doesn't exist other than the railroaded version being implemented.	3/16/2015 11:47 AM
122	Loss of Montlake station.	3/16/2015 11:47 AM
123	Loss of 545. Like I said in other concepts, this is a huge issue for me.	3/16/2015 11:40 AM
124	Reliance on The 8 is Late to move central Capitol Hill residents to the light rail connection. Removal of routes serving 19th Ave on Capitol Hill (there's a big gap between 15th and 23rd). And, it's unclear if the 49 is going to still travel down Broadway or do you only pick it up in N. Cap Hill. That seems like a potential mistake, unless the increased frequency of the 9 is going to get people to the light rail station. Again, it's hard to make educated responses here because the new service improvements are not included in this map/survey.	3/16/2015 10:57 AM
125	It is incredibly clear that you are pushing alternative 1. I live in the CD and am dependent on having close bus stops. This is the first time I've been asked for input and I highly doubt the longtime residents of this community even know about these changes. Also - NOTHING has been mentioned about the 23rd avenue corridor project that is going to seriously impact our streets for two years. Coordination between government entities should be a matter of course. Look at: City transportation plans, development for this area (bringing hundreds into affected route areas), and your transit plans. LEAVE ROUTES alone until some of this has stabilized!!! Special mention re: route 8 - how can you even consider changing this massively-used bus??? It clearly works without slogging through a transit center.	3/16/2015 10:49 AM
126	Both alternatives will increase crowding on the 49 due to elimination or reduced schedule of the 43.	3/16/2015 7:29 AM
127	No more 545 leg to capitol hill in the morning, providing a direct line from our more dense neighborhood to one of it's biggest employers? I'm confused..	3/15/2015 6:25 PM
128	My primary concern is that you won't have the guts to actually pursue these changes. That said, I am also concerned that you are not going far enough with respect to frequency. In Vancouver, BC, their "B-Line" bus routes come every 2 minutes during peak times, and slow down to 5 minutes during off-peak, and they are still not frequent enough. The fact that we seem to consider 10 minutes headways to be "high frequency" really just reveals how low our standards are with respect to high-quality urban transit service here in Seattle. Alternative 1 provides fewer single-seat rides than alternative 2 (or the status quo). Everyone, including me, hates transfers, but there is a big difference between transferring to a route that comes every 5 minutes and a route that comes every 15 minutes. In addition to potential transfer troubles, I am also concerned about crowding. Alternative 1 will attract NEW riders, people like me who do not currently use transit regularly because the service quality (frequency, speed, etc) is too low. To accommodate this induced demand, you will need more frequency than you are currently planning.	3/15/2015 4:53 PM

129	Loss of direct service from Madison Valley/ North Capitol hill to ferry docks. This is highly impactful to those who commute to and from Bainbridge and work on Cap and firt hill.	3/14/2015 8:12 PM
130	The route 48 link between UW Link Station and Mt. Baker Station (along 23rd) serves a vital link between North Capitol Hill and access to the Light Rail. Currently, I take the 48 to Mt. Baker Transit Center to access the Light Rail (northbound or southbound). Once the Link Light Rail is complete, from Downtown, I envision taking the service all the way to UW then transferring southbound on the 43 or 48 and getting off on North Capitol Hill (Aloha). Alternatively, when I return from the Airport, I plan to get off at the Mt Baker Station, then catch the 48 northbound, as this will take less time, then all the way to UW and then south bound.	3/14/2015 3:55 PM
131	In this alternative, there is no access to Madison Park/Beach--no service for residents there? Or for folks wanting to recreate there?	3/14/2015 8:39 AM
132	I often take the 11 to downtown, Belltown and the stadiums. If I have to transfer, I'll be more likely to drive.	3/13/2015 11:20 PM
133	Identified, existing, eastbound bunching & increased load on #8 through reliably congested E John St corridor from CHS to Madison Valley & on. Separately; would like direct lake to Sound bus service on Madison through central financial & municipal offices district. (Courts, library, major office buildings.) Of course Rt #11 is lightly used by downtown office commuters; it's not convenient to the densest office area in rainy Seattle. One seat rides are very attractive to business commuters.	3/13/2015 9:18 PM
134	no direct access from central district to first hill medical centers	3/13/2015 4:18 PM
135	What is Alternative 1 ?	3/13/2015 2:52 PM
136	Please keep frequent service for route 43.	3/13/2015 1:01 PM
137	No concerns directly on my part as I live near the 49 and the new Cap Hill station, but I wonder generally if having a more consolidated system screws (poorer) people who live farther out from the core, and not on a major street.	3/13/2015 10:16 AM
138	What are the benefits for disabled riders?	3/12/2015 4:06 PM
139	Keep the 11, 12, 8 route	3/12/2015 2:18 PM
140	No opinion	3/12/2015 2:12 PM
141	- Reliability of eastbound 8 from SLU to Capitol Hill via Denny Way during PM Peak -- I-5 congestion on Denny is a major, major, problem. The Link-to-EB 8 transfer must work as good or better than the slow-if-mostly-reliable 11. - That dogleg in the current 8/future 38 at Yesler/23rd/Jackson is still there. Get rid of it!	3/12/2015 12:45 PM
142	Loss of route 12 that services Country Doctor Community Clinic at 19th Ave E and Republican. It's a very popular bus stop for patients.	3/11/2015 8:51 PM
143	The potential longer walks to the bus stop for some folks in my neighborhood	3/11/2015 1:30 PM
144	The through-routing of the 48 and 67 is ABSURD! This solves zero problems associated with the 48-45 split and merely places these montlake issues upon the 48 and 67. Separate these two routes like you did with the 48-45 and previously with the 43-44, 49-7, etc. etc. The on-time performance will FINALLY increase for the 48 and the 67 has a fighting chance of remaining 10 minute new headways instead of 3 buses bunched up going north on the ave and roosevelt.	3/11/2015 11:39 AM
145	The 48 does not continue to North Ballard. The 9X's service time is not expanded to include evenings and weekends.	3/11/2015 10:50 AM
146	The University Light Rail Station is too far to walk fro Boyer and 24th in bad weather, or when i need to get somewhere early. Your revisions do not allow any convenient options for Montlakers to get downtown efficiently. The University Light Rail stop is not efficient focus, neither is it convenient. You will lose riders and not serve our public with these changes. i have been an ORCA card holder and regular bus rider for over 15 years, and feel sad to be losing services i value and rely on. Our planet needs people to use public transit more. Why are you making it harder?	3/11/2015 10:33 AM

147	As I mentioned before, I am afraid that the transit will not meet my needs (i.e. leaving at 3 p.m. and getting to the Eastside on time not to pay for additional full-time child care) but will ruin my existing solution, which is driving. Again, don't want to be selfish, but it is not a question of 5, 10, or even 20 minutes. I can't pay for child-care by the minute. I have to pay by the month. To get me to switch, I need a solution which beats my car. A parking pass is 5% the cost of child care. Add in fuel, even at \$5/gallon, and I am still not there. Child care is so expensive and my time = child care so that is the opportunity costs I am trying to overcome. 5+ minutes after school = I have to pay for on-site care or care with transport = \$700/month per kid for after school. I have two kids. Doesn't matter if you are "getting close". For me it is all or nothing, unfortunately, because I just cannot leave my kids sitting there. It is not legal. I voted in 1996 for transit, and here we are 20 years later and I feel like the goal of every individual transit faction in Seattle is to make me miserable using any other faction's form of transport, so no matter what I do, it doesn't work well. It makes me very unhappy. Transit and my commute are the worst part of my life and I have student loans so that is saying something.	3/11/2015 8:59 AM
148	I am concerned about all the cuts to service however, # 12 is my single biggest issue. The routes on 15 and 23rd DO NOT replace the 12. The 12 is the only bus that crosses the hill & goes to SOUTH downtown. Is this passes, I will drive every day because I can afford to. I voted for transit dollar to save the 12 (down 19th). The hills between the routes are steep. The blocks between the streets are very dark. I have had issues with safety crossing the hill at night. If you cut the 12, I will NEVER vote another \$ for transit. My services are being cut & I'm paying more.	3/11/2015 7:53 AM
149	No service to madison park area. no bus east of mlk on madison. not being able to pick up kids at McGilvra elementary aftercare program.	3/11/2015 12:53 AM
150	This concept forces people to walk in a high crime area (drugs, armed crimes and assault) - this is incredibly poorly planned and places people in danger! I can't believe planners would be so dismissive of safety!	3/10/2015 7:39 PM
151	Alt. 1 makes it considerably harder for me to go downtown. I currently have 3 bus routes to choose from; the 2 most convenient will be eliminated and I would be limited to the #10 which is a substantial walk away. Taking the 8 and switching to LINK is not a feasible option--connections are always a huge loss of time.	3/10/2015 5:14 PM
152	Continued delays of the 8 along eastbound Denny Ave	3/10/2015 3:57 PM
153	Alt 1 is very bad for my neighborhood. I live near 19th and Aloha. This proposal would get rid of both the 12 and the 43. I take the bus down to Montlake to connect to the 545/542. Today I can take the 43 or the 48. this proposal gets rid of the 43 so I have 1/2 as many ways to get to Montlake. This makes what is currently a convenient route into an inconvenient one. Getting rid of the 12 is also terrible for us as it is the way to get to the south end of downtown. The ULink is not a replacement because we don't live anywhere near either the Capitol Hill or University District ULink stations. This proposal basically takes what is a very friendly bus neighborhood, removes 1/2 the buses (the 12 and the 43) and doesn't replace them with anything. Please come up with something else.	3/10/2015 2:04 PM
154	Loss of Downtown service for Summit riders except for an infrequent and Prop-1-funded Route 47. This could be mitigated by routing the 10 on John/Olive instead of Pine and taking the proposed 38 Downtown.	3/10/2015 1:20 PM
155	The route 12 should be retained at least for peak-only service. This is a very well-used route during commuting hours. Inbound trips are often standing room only by the time it reaches 15th Ave.	3/10/2015 11:25 AM
156	The elimination of Route 12 along 19th Ave E is significantly difficult for elderly persons who physically cannot make the walk up E Galer St to the 15th Ave E option (route 10). It also requires more dangerous walking for Stevens Elementary access, Interlaken Park, and Miller Community Center access.	3/10/2015 10:54 AM
157	I am not qualified to comment since I have only just perused the Alternative.	3/10/2015 10:52 AM
158	Not sure what the concept is for route 25, but it is used daily by my daughter, a student at TOPS K-8	3/10/2015 9:59 AM
159	in general, I am concerned about the lack of a plan for moving neighborhood residents who are near light rail but outside the half mile walking radius to the light rail stations. Seattle has unique geographic barriers that require creative solutions, rather than all simple north-south or east-west routes. It's baffling to provide light rail service without planning for nearby residents to access to the stations. We are encouraging people to live out in Northgate and Tukwila and use park and rides, because they will get downtown faster than most people living in the central Seattle area.	3/10/2015 9:15 AM

160	- "Alternative 1", deleting Route 25 service and combining the 43 and 48 to a less frequent schedule (every 10 minutes rather than the 7 minutes we get down 24th ave today) - "Alternative 2", which preserves the 25, but the 43 is further cut to once every 30 minutes from the current 10 to 15 minute frequency (and the 48 remains the same). We need to comment *to keep both bus lines running at their current schedules*, or how is anyone in Montlake/Portage Bay, the closest actual communities to the light rail station, going to get any benefit from it without increased access to the station? A quick Google Earth distance measurement shows that the nearest home in Montlake is already a quarter mile away from the stop. The "Hop In" (aka Montlake Blvd Market) is a half-mile away. Bus service needs to minimally stay the same to make the light rail stop gain it's full potential, otherwise it will be a squandered opportunity for our community to want to take light rail anywhere.	3/10/2015 8:15 AM
161	I don't see why the 49 has to go all the way down to Madison and then go down Madison. I also don't see why the 43 has to be deleted. It's a trolley route it's cheaper than a diesel or hybrid route.	3/9/2015 8:53 PM
162	Loss of direct connection from MLK to Group Health Capitol Hill complex and north Capitol Hill.	3/9/2015 6:15 PM
163	Service hours described are mostly for peak times and the plans don't address offering service as an alternative to taxi for late night (especially Friday/Saturday nights). Depending on frequency of trains a barely-missed connection would have a 10-minute trip penalty, so a 5-minute savings (on ideal trip) may actually be 5-minutes longer.	3/9/2015 5:41 PM
164	takes away existng strengths and feeds gentrification (younger riders who can walk furhter and see the bus/light rail as an alternative to cars_	3/9/2015 5:36 PM
165	This is straight-up a stupid idea. More density is coming in the form of townhouses & apartments east of capitol hill everyday.	3/9/2015 5:26 PM
166	In addition to eliminating a direct commuter route to downtown for people who can otherwise afford to drive, what becomes of direct transportation for the workers who commute to Madison Park/ Washington Park?	3/9/2015 4:41 PM
167	The 43 serves my neighborhood and connects me to Group Health on 15th, Broadway and the new light rail station, South Lake Union by walking down Denny, First Hill, and most importantly downtown. The added frequency of service on the 48 and 8 routes would be more than offset by the need to transfer to get to Capitol Hill and getting Downtown would involve transferring on Madison which is more congested.	3/9/2015 3:54 PM
168	See above. Please clearly outline what both of these alternatives will mean for transit users in Madison Park.	3/9/2015 3:09 PM
169	I LOVE the current No. 8 which takes me from Olive and MLK Way directly to Group Health and to South Lake Union and to Seattle Center and to northern Denny Regrade. It is an extremely useful route that my husband and I take all the time. Under Alternative 1, we'd have all this taken away from us. The only way we could have these connections is to transfer from the 38 to the 8. BOO!	3/9/2015 2:44 PM
170	Please see comments under previous section (N.Seattle). I didn't realize the survey was in two (or more?) sections! In short, we need the link from Montlake to 15th Ave. NE.	3/9/2015 2:40 PM
171	For the majority of senior riders they need an easy direct route to medical services on first hill. Preferable without a stop in the new Broadway station	3/9/2015 2:25 PM
172	Connection between Madison Valley and Madison Park!	3/9/2015 2:16 PM
173	No direct connection between my Central District home and work in South Lake Union, as currently available on the Route #8.	3/9/2015 1:31 PM
174	Less frequent buses along 24th ave E (you say "more frequent service") but it isn't (every 7.5 mins on average to every 10 mins). Most importantly ---- and you are skirting the issue with your options --- you don't have "elimination of the 25" as an option here (you rather say "concept for route 25 --- you need to be more transparent).	3/9/2015 1:17 PM
175	Reducing the number of busses that ACTUALLY go Downtown and pushing people to take Link Downtown will dramatically increase the amount of time allotted for travel.	3/9/2015 12:36 PM
176	Do not kill the route 11 link between Madison Valley and Madison Park. There are large numbers of families, elderly people, businesses, and employees that rely on the public transportation link to these areas. Families that seek to commute from the 98112 zip code rely on route 11 for getting to/from work, school, and capitol hill medical facilities. Large populations of elderly/retired people use the transportation for access to essential services around the city. Employees that work at businesses in the neighborhoods depend largely on public transportation. And local businesses get significant inbound traffic from people visiting the neighborhoods, especially during the spring/summer/fall months.	3/9/2015 12:25 PM

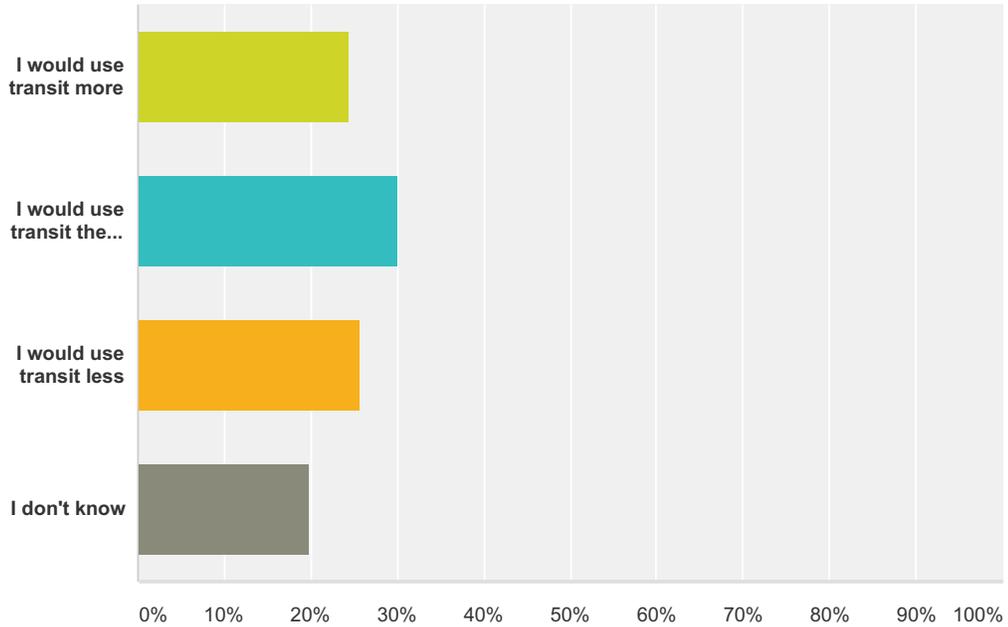

177	I'm worried routes on Cap Hill (specifically routes 10 & 11) will be reduced under the assumption that people will be willing to walk to the new light rail station. I need connection from East Cap Hill to Downtown, or from East Cap Hill to Maple Leaf. Thanks!	3/9/2015 11:52 AM
178	Making sure that this station will be "safe" in that there have been a number of crimes occurring lately in this neighborhood and the fact that this station will be underground, my concerns are around rider safety and staffing of appropriate security personnel.	3/9/2015 11:51 AM
179	It also removes the weekend #43 that becomes a #44, requiring me to walk several additional blocks to the transit station and make a change in the UDistrict. I'm also having trouble visualizing how the connections will work. Right now, one of the biggest frustrations as a transit user is missing a connection by minutes. This might not be an issue if the frequency is more frequent. I'm also a little worried about walking distances for some of my neighbors. There are a lot of senior citizens and people with disabilities in the neighborhood. Changes in the bus lines often fail to take the topography of the neighborhood into account, creating physical challenges for those who have trouble with steep grades but aren't disabled enough to qualify for Access.	3/9/2015 10:49 AM
180	Doesnt effect bus route 193.	3/9/2015 9:13 AM
181	loss of direct service between Madison Park and downtown.	3/8/2015 9:24 PM
182	I don't fully understand the options being considered.	3/8/2015 8:34 PM
183	Many of the routes seem more convoluted. I don't have enough information to know if these will make people's commutes shorter or longer.	3/8/2015 6:31 PM
184	Current service to Montlake and Douglas Truth library branches is more direct via stops on 15th and John	3/8/2015 5:09 PM
185	Feasability of increasing frequency on the Denny corridor. More frequent buses do no good if they are bunched up.	3/8/2015 4:14 PM
186	I'm very concerned about losing direct connection between Madison Valley and downtown. This doesn't seem to make any sense. The #11 is routinely full during peak commute times between Madison Valley and downtown. We have a lot of density - and it's only increasing. It would be absurd to have to transfer - from the 38 to the 10 - just to get downtown. Please don't do this. I would like to see the current #11 route preserved AND I would like direct bus service from Madison Valley all the way down Madison Street. These two lines would serve a real need.	3/8/2015 10:34 AM
187	Loss of service along Olive Wy E to/from downtown & the U-District.	3/8/2015 3:33 AM
188	Lack of service to/from North Capitol Hill. Make 25 go up Lakeview to Boston, then down 10th to Roanoke and Harvard to Boyer and to UDist to serve North Capitol Hill/Seattle Prep students and U students renting on North Hill.	3/7/2015 7:58 PM
189	No longer direct link between Capitol Hill and Greenlake (Route 48).	3/7/2015 5:38 PM
190	This plan assumes people go to a limited number of places. Not everyone goes from Capitol Hill to the UW. You now have a large number of tech workers on the Hill that need transportation to places like Bellevue or Redmond and need to change at Montlake. I see this plan adding 20 min minimum to my commute time.	3/7/2015 4:02 PM
191	I am elderly (88) and can take the 11 from near my apartment to get to Broadway for Dr. appts, shopping etc. It is challenging for me to take more than one bus.	3/7/2015 3:01 PM
192	Again it makes it harder for older people and the handicapped to reach a bus. I would probably have to stay home more because of this.	3/7/2015 1:45 PM
193	Changes to Rt 8 appear to mean either losing a direct connection between SE Seattle and Seattle Center or increasing time it takes to make that already long, roundabout trip.	3/7/2015 11:59 AM
194	The route #12 concept is devastating to people toward the 19th & Galer intersection. Distances are not bad to the #10. but event he #43 which can be reached by a downhill walk now, would not be available. I know several people who would sell houses and move (they do not have cars) because of inability to climb the steep hill to the #10. Walking to John/Thomas is far for them, and not safe at night. That #12 is our lifeline.	3/7/2015 11:52 AM
195	Both the #11 and #8 buses are generally very full--regardless of the time of day. Eliminating the #11 from 23rd to 15th alienates all of the residents (including elderly and disabled) who rely on the #11 to get to their homes as well as Trader Joe's and the Central Co-Op via one bus.	3/7/2015 10:22 AM
196	Please don't cut the bus routes! Not everyone can easily get to a light rail station. You know we have old people living in the city?	3/7/2015 10:11 AM

197	While the 8 might gain some reliability from separating it from its run up and down MLK, it will still be painful in Denny traffic.	3/7/2015 9:42 AM
198	Residents east of 15th Ave are ill-served by these changes	3/7/2015 7:54 AM
199	how do I get form Queen Anne to Central district area without #8?	3/7/2015 3:57 AM
200	Getting downtown will be slow from N cap hill (corner of Bellevue/Bellevue/Bellevue). I will have to walk 5 minutes to the 49, wait for the bus for up to 10 minutes, then take it to the lightrail station, another 5 minutes, then wait for a train for up to 10 minutes, then take it downtown (2-3 minutes?). Over 30 minutes and I could walk in 45! Bringing back the 47 would fix this, but I'd be happy with some other solution.	3/7/2015 1:08 AM
201	Without the 43, people along the 24th Ave corridor will have to take three buses/light rail to get downtown (43 to the 8 to the rail).	3/6/2015 10:19 PM
202	loss of direct service between Central District and South Lake Union/Denny Regrade	3/6/2015 10:00 PM
203	You do not have enough data to make these major changes and decisions. You need to see what happens as people adapt to using the light rail, take more surveys, see what usage is really like, and see the state of metro and sound transit funding at that time. Safety issues are also a concern. If I had to choose between getting a bus right near where I live and taking it to another neighborhood without transferring (even if it took longer), I'd choose that over walking in the dark alone to the light rail even if once I got to the light rail it would be faster. You just don't have enough data yet on ridership. You have models and it's not enough for the major changes in Alternative 1. I also recently voted for more Metro funding and what I'm going to get for it is bus cuts?! That is a massive betrayal. Don't call it efficiency when it's cuts. Messing with the 49 to that extent and the 43 is insane. Plus increased frequency of the 8 does nothing to address that Denny is a traffic jam with people getting onto 99 and I5 and all the Seattle Center activity. There will be 3 number 8s arriving simultaneously instead of 2. Then a huge gap until the next one. Unless you can have some bus only lanes on Denny, it's a joke that you could increase the frequency of the 8 in a way that justifies other cuts. Yes the 8 should be better in frequency, but without addressing Denny traffic, you won't succeed. More frequent routes in Alternative 1 won't make sense unless they are the right routes. Plus we already voted for more frequent routes, such as 43 & 49, and bringing back the 47. We haven't even seen those come into play.	3/6/2015 8:27 PM
204	- Complexity of First Hill service - Complexity of the new 38 - Lack of service on 12th Ave - Lack of a direct connection between 15th Ave service and Capitol Hill Station	3/6/2015 8:16 PM
205	Loss of route 11 is HUGE. That route goes to Bailey Boushay House.	3/6/2015 5:22 PM
206	I am not sure I understand the changes or know enough about the impacts	3/6/2015 5:20 PM
207	Less service between Summit and downtown (relegated to the infrequent daytime-only 47)	3/6/2015 5:13 PM
208	I am concerned about the loss of service on 19th Ave. It has a growing number of businesses, new buildings (sans parking) not to mention several schools. It's also an uphill climb to services on 15th Ave, which is difficult for anyone with reduced or impaired mobility. John Street and Aloha St. are the main walking arterials, but the rest of the neighborhood from 19th does not have well-populated side streets, which means it sometimes feel unsafe walking there in nighttime going east or west of 19th. Aloha is narrow with few places to cross the street, and cars have a tendency to drive quickly, so it doesn't feel like a great walking route to services on 15th or 23rd. I would be sorry to see the burgeoning 19th Ave micro-neighborhood end up with a transit arrangement that would induce me to drive during late or inclement days.	3/6/2015 4:45 PM
209	In general having to travel further to a stop.	3/6/2015 4:34 PM
210	The main route that I use to get to Montlake Community Center (25) will be much more difficult to access by public transportation if no buses go there.	3/6/2015 4:30 PM
211	Making 8 go to Madison Park instead of down MLK is a big problem for me.	3/6/2015 4:26 PM
212	Loss of the 12 leads to long walks up or down steep hills, not manageable for many of the regular bus commuters	3/6/2015 4:22 PM
213	Keep the status quo as it is currently.	3/6/2015 4:20 PM
214	See my comments on part 1, which are general to the whole system. The economic disparity issues I raised there will be even more pronounced south of Cap Hill.	3/6/2015 4:03 PM

215	We still need the 47 or a similar route brought back to Capitol Hill. There is an entire service area that does not have bus access. If you remove the 49 and 43 under Alternative 1 from serving adjacent areas then there is no service at all to Downtown. It is a 25 minute walk for me to access the the nearest downtown bus terminal - Convention Place. It will be at least a 15 minute walk to access the Capitol Hill Light Rail -- and rather pointless to go there and wait 10+ minutes to catch the train downtown. In bad weather the walk sucks. It's horrible for people with disabilities and elderly -- many of whom absolutely relied upon the 47 for their downtown work commute. This bus absolutely needs to be bought back at least during peak hours 6 am to 10 am and 3 pm to 7 pm.	3/6/2015 3:56 PM
216	I am 73 years old with severe arthritis, I do not drive. The loss od the 12 and 43 makes it very difficult for me.	3/6/2015 3:54 PM
217	Same as above	3/6/2015 3:48 PM
218	1) Central District and Capitol Hill residents outside the LINK walkshed who commute to Redmond/Bellevue/etc should be able to take a two-seat ride: local bus to Montlake TC or University LINK Station, then transfer to SR-520 express bus. Instead of cutting both 12 and 43, retain one of these as a feeder for SR-520 buses. 2) This plan reduces access to South Lake Union at a time when more people are commuting there. 8/43 are major routes for SLU/Westlake (ie Amazon) commuters from Capitol Hill and Central District. Some kind of service from these neighborhoods to Denny Way should be retained.	3/6/2015 3:43 PM
219	The 11 is already always late or a no-show. Madison is a GREAT street for buses- wide and often not clogged with traffic. Why don't we have MORE buses going down Madison? The 8 is terribly packed and is always late or a no-show. We MUST increase service along this route. The 8 also gets severely delayed going down Denny way in the evenings- is there a way to ameliorate?	3/6/2015 3:22 PM
220	I think Metro should consider consolidating service on Madison to improve legibility and to prepare for BRT service in the near future. Having a bunch of bus routes change streets multiple times hurts the general public's ability to learn where the routes go in short order.	3/6/2015 3:19 PM
221	Disable and elderly riders are tossed under the bus. Don't give me that line about how great the Access service is unless you have used 10 or more times	3/6/2015 2:53 PM
222	bus #47 was removed....so I walk up to Summit/Olive way to catch the 43. I have heard that in option 1, bus 43 would be eliminated, It currently takes me 30-45 minutes to go from Capitol Hill to SODO, with a transfer. I can drive in about 10. I prefer to take the bus because we are a 1 car family and I like the greener nature of it, however if I have to walk even farther to catch transit, I could have driven to my location much faster and it becomes pointless	3/6/2015 2:45 PM
223	Reduction of 66 Express during weekdays and elimination on weekends. That bus is always full, including on weekends all the way from the ferry terminal to Northgate. Why would that be eliminated with the light rail on Capitol Hill if it doesn't serve it at all?	3/6/2015 2:43 PM
224	the trade off for the losses from deleted Route 43 are worth it, but they are still significant losses. Possibly Prop. 1 money could be used to ameliorate this issue.	3/6/2015 10:21 AM
225	loss of direct connection from the CD to Denny/lower queen anne (existing route 8 vs new route 38)	3/6/2015 10:10 AM
226	Please don't use the route number "Thirty-late".	3/5/2015 11:57 PM

Q18 How would your use of transit be affected if Alternative 1 were implemented on Capitol Hill and in the Central Area?

Answered: 1,490 Skipped: 5,069

Answer Choices	Responses
I would use transit more	24.50% 365
I would use transit the same	30.07% 448
I would use transit less	25.64% 382
I don't know	19.80% 295
Total	1,490

#	Why?	Date
1	See previous answers re: no other option.	4/2/2015 2:26 AM
2	Frequent service	4/1/2015 7:43 PM
3	I'd have more certainty and frequency; could get more places quickly and reliably. I could accept clients further than I can now.	4/1/2015 2:15 PM
4	More connections close to my home to more destinations with higher frequency.	4/1/2015 1:05 PM
5	harder to get to nearby station	4/1/2015 9:41 AM
6	I see little impact on current usage.	4/1/2015 9:05 AM
7	Too many changes to evaluate in a short time; but so far it looks like the areas of increased inconvenience would outweigh the areas of greater convenience.	3/31/2015 11:10 PM
8	Because some of the connections and routes would be taken away, thus I would have less access to my destinations. Frequency is not as important as access.	3/31/2015 10:24 PM

9	more frequent service.	3/31/2015 9:34 PM
10	I would take my car to Madison Park instead of taking the bus.	3/31/2015 9:24 PM
11	The Group Health connection would be gone for us.	3/31/2015 6:31 PM
12	presently it is a one block walk to 24th; walking to light rail at Husky Stadium would be 20 minutes; additionally the current frequency makes transit a viable alternative to using car; .	3/31/2015 5:59 PM
13	I'd be forced to switch to driving almost entirely.	3/31/2015 5:03 PM
14	No way to get to the transit center	3/31/2015 4:41 PM
15	I have medical appointments in that area, so more of an as-needed basis.	3/31/2015 4:08 PM
16	Losing the 12 makes it almost impossible to get to transit from our neighborhood. Too far to Thomas, too steep to the route 10 and Alternative 1 also removes the 43 from our reach on 23rd.	3/31/2015 4:06 PM
17	The elimination of the 25 and 43 would make a number of trips I make today so much less convenient that I would no longer make them on transit. Often I make shopping trips to Capitol Hill on the 43 in which a transfer (often at night and/or in the rain) with shopping bags would be a major disincentive to use transit. The transfer at 23rd/John involves crossing two busy streets and the operations at that major intersection would suffer from having tons of pedestrians transferring there who would otherwise just stay in their seats. There are zero services at that location, and a lot of traffic; it is basically impossible to make that an attractive transfer location. Route 12 I use less often than 25 and 43, but appreciate it as another option to/from the top of Interlaken Park.	3/31/2015 4:04 PM
18	I use routes #43 and #25 many times a week to travel from the area near the Montlake Bridge to Capitol Hill. If routes #43 and #25 were eliminated, I would be more likely to drive my car and add to the traffic problems. (I actively avoid driving my car alone, but if I have to take two buses to get up to Capitol Hill, I'm going to just jump in my car and drive.) There are elderly people in my neighborhood who take #25 and #43 on a regular basis. I hate to think of these older people having to wait for bus transfers out in the cold rain/at night.	3/31/2015 4:02 PM
19	It would be too far to walk to Thomas and the hill to 15th E is too steep. Without the route 12 I would have to move, or obtain a car.	3/31/2015 3:56 PM
20	I have to commute between Capitol Hill and UW daily.	3/31/2015 3:37 PM
21	loss of service between cap hill and university	3/31/2015 3:34 PM
22	Reducing the 545 at all is stupid.	3/31/2015 2:53 PM
23	I am Transit-dependent.	3/31/2015 2:34 PM
24	My bus stop is at 23d and Republican. The deletion of the #43 directly impacts me. I regularly take this bus to downtown and to the U District (where I connect to Seattle Children's Hospital). If this route is deleted, I'll have to rely on the 48, which is a busy route and often standing room only. I would also have to rely on the 8 to downtown. This is a horrible option. First, it would force me to transfer at Broadway, which I'd rather not do. Second, it would mean I'd have to be on a packed bus most of the time. Have you taken the #8 from Lower Queen Anne to Capitol Hill? It gets really packed at Whole Foods and the bus often gets stuck in traffic on Denny Way. A commute that should be 25 minutes can be an hour on this bus. Even though there would be more bus routes on this plan, it doesn't change traffic. Third, I don't understand why the #43 and #11 would be deleted - they both go directly to the Pike/Pine Corridor, which is where the majority of things are. I go to shows, restaurants, etc there all the time. I love being able to get on the 43 and get to downtown without having to transfer. I prefer the bus over the light rail. I also imagine the light rail will be packed and the last thing I want to do is be on a packed light rail underground. I'm lucky that I'm near Madison and can catch the 8. But what about the other people who live on or around 23rd? Between John and Montlake?	3/31/2015 1:57 PM
25	Additional walking time combined with wait time may outweigh benefit of using metro over driving or simply walking.	3/31/2015 1:06 PM
26	The route (12) I take everyday would be deleted. But, I would consider the 9X as an alternative.	3/31/2015 12:56 PM
27	No way to get from Montlake to downtown or the Capitol hill.	3/31/2015 12:46 PM
28	Same as before. Less wait times, and closer services will get me on transit.	3/31/2015 12:25 PM
29	I don't have a choice. I have to use transit, even if the routes are less ideal and direct for me than they are today.	3/31/2015 12:21 PM
30	I would still have a bus to Capitol Hill from near my home, it would just be a slightly different route and a new number.	3/31/2015 12:17 PM

31	The current route 43 suits my needs perfectly (both route and frequency). I would have to drive to and from school.	3/31/2015 12:09 PM
32	I live at 19th and Howell, so I rely on transit on 19th quite heavily, both for going to the University District and for going to downtown Seattle. So, while the link light rail is walking distance, it's a farther walk than many of the buses that go along Madison or the 19th corridor.	3/31/2015 11:57 AM
33	The 43 serves the neighborhoods(s) that pay taxes and that it drives through. The light rail station serves the stadium, the hospital and dorms of UW. It DOES NOT serve north capitol hill in a practical fashion. Don't kid yourself that it does.	3/31/2015 10:30 AM
34	The main route I take would be altered (Pike/Pine).	3/31/2015 9:55 AM
35	Alternative busses add too much walking/commute time.	3/31/2015 9:41 AM
36	Lack of easy access to the train.	3/31/2015 9:37 AM
37	I don't use the bus and don't intend to.	3/31/2015 9:28 AM
38	I will drive my car downtown before I will walk 30 minutes to get to the light rail station at the UW. It's cheaper for me to drive and park than it would be to spend an hour walking (round trip) and pay round trip fare on the light rail.	3/31/2015 9:17 AM
39	It would delete route 43 which I use by far the most.	3/31/2015 8:49 AM
40	I need to get (without transfer) from Boyer/Newton to the University and downtown. I am worried the 43 or 48 service will chang	3/31/2015 8:47 AM
41	I can't walk as far as this option would require	3/31/2015 7:30 AM
42	I can't walk as far as this option would require.	3/31/2015 7:21 AM
43	Not interested in transferring when my trip is 2 to 3 miles in length.	3/31/2015 7:02 AM
44	I would able to reach destinations which currently are more convenient to drive	3/30/2015 10:26 PM
45	I don't think it would as I currently catch a bus downtown and except for holidays then catch a shuttle to the hospital.	3/30/2015 10:09 PM
46	I like the idea of catching the train from Broadway to get downtown. But it's not clear to me how I will be able to get from North Cap Hill via bus to the train station. By dropping a number of lines that come out to North Cap Hill, will the #8 service be significantly increased? I currently like that the 8 and the 43 stop along John & 19th -- but I worry about only one bus servicing that whole area. As the 8 is OFTEN very late (20 mins +) esp when leaving downtown at the end of the day.	3/30/2015 9:51 PM
47	I wouldn't have easy access to a bus, and I can't get to a light rail station WITHOUT a bus.	3/30/2015 9:28 PM
48	I currently use routes 10 and 12 from north Capitol Hill to downtown. Route 10 provides convenient access to the north end of downtown, while route 12 serves the south end. Elimination of route 12 makes it less feasible to take transit to south downtown (financial district, civic center, public services.)	3/30/2015 9:10 PM
49	One of my children takes #43 bus from Montlake to Bellevue/Pike to school. It's our direct bus route to downtown (without having to go on I5).	3/30/2015 8:55 PM
50	I use route 43 often	3/30/2015 8:04 PM
51	This survey is challenging because I cannot easily go back to study the possibilities of Alternative 1! You should have provided the description of Alternative 1 on each page! My personal concern is to retain transit on Route 43.	3/30/2015 6:40 PM
52	Because it eliminates access to bus stops in my Montlake neighborhood. I cannot walk more than the two blocks I now walk to a stop.	3/30/2015 6:31 PM
53	I would have a problem with accessing buses.	3/30/2015 6:15 PM
54	When I'm going to Capitol Hill, I now need to connect in downtown, and I frequently jog up the hill rather than wait for an infrequent bus. This will put in place actual more-frequent service.	3/30/2015 5:41 PM
55	The routes look pretty good.	3/30/2015 5:30 PM
56	It would depend on the route 49 remaining close to the same in terms of frequency. I take it to work daily. If the times remain the same, I would continue to use it, if it becomes more infrequent. I would not. Taking the light rail to the stadium and transferring would involve more time for me and defeat the purpose of using the light rail.	3/30/2015 5:25 PM

57	The cuts on the 8 and 11 make my commute much longer and sometimes not at all useful. I would be forced into much longer commute times. I would opt to drive.	3/30/2015 5:22 PM
58	It would be less convenient	3/30/2015 4:09 PM
59	Will buy a car.	3/30/2015 2:40 PM
60	Cap Hill is a secondary destination for me.	3/30/2015 2:25 PM
61	inconvenient	3/30/2015 2:13 PM
62	Losing service on 24th Ave corridor means walking to a stop with serious uphill grade--resulting in arriving at work a sweaty mess. It is likely to mean I will use less transit.	3/30/2015 11:18 AM
63	To get from the top of Cap Hill on 15th to the U District would require a transfer on 24th, unlike the direct connection now. The elimination of the 43 route assumes that people can easily access light rail to the U District. Not true for those of us living in the 15th Ave. area. No other option than to walk to 24th or Broadway or transfer from the 8.	3/30/2015 11:15 AM
64	time from montlake to Seattle Children's Hospital needs to improve.	3/30/2015 10:59 AM
65	If I could use more frequent bus service to access light rail, I would use transit more.	3/30/2015 10:58 AM
66	It would depend on which routes were taken away and/or modified. Route 8 is the ONLY bus that connects north and south MLK.	3/30/2015 10:53 AM
67	Anything that increases service from North Capitol Hill to downtown, Seattle Children's, Ballard, and Greenwood would cause me to ride more often.	3/30/2015 10:11 AM
68	I don't own a car and rely on Metro buses and walking for transportation. I don't know if these changes would increase, or decrease, my use of transit, but it'd make transfers and getting around town a lot easier and quicker for me--and therefore, I'd be a happier citizen.	3/30/2015 9:59 AM
69	I am personally served pretty well by both alternatives however the 12, 11, 10 & 43 are go-to routes for me. Having 3 of 4 change or be eliminated will take some getting used to.	3/30/2015 9:22 AM
70	I couldn't get from home to work. couldn't use the bus to commute.	3/30/2015 8:54 AM
71	shorter waits	3/30/2015 7:19 AM
72	It would have to walk further to get to my bus, probably three or four times further. I would still do it, but I'd be concerned about elderly or the infirm who couldn't make it that distance.	3/30/2015 12:27 AM
73	ZOMG: 550 + Link + 8 would hit most of the places I go on a regular basis.	3/29/2015 10:45 PM
74	My old car shd a\soon be off the road and soon I am too old to drive	3/29/2015 10:08 PM
75	Service would be limited while relying on unproven efficiency of light rail.	3/29/2015 9:27 PM
76	It is important for me to not have to walk so far to take the bus	3/29/2015 9:19 PM
77	The changes are tradeoffs: the pros and cons are about the same.	3/29/2015 9:15 PM
78	There comes a point when it's easier to walk the whole way. This is that point.	3/29/2015 7:41 PM
79	To long a walk to UW Light Rail and no easy access to Capitol Hill.	3/29/2015 6:13 PM
80	I might use transit more if I didn't have to fuss with schedules or stand around waiting a long time. I mostly walk and bike and am an opportunistic bus rider - if buses come more frequently, I'm more likely to hop on.	3/29/2015 5:41 PM
81	Though I mostly walk and bike everywhere, I'd likely use transit more if I didn't have to fuss with schedules and worry about timing of transfers. With a more streamlined system and greater frequency, I'd likely resort to taking transit a little more frequently. I don't know that that's a good thing -- since I never drive, so my taking transit is taking a bike off the road, not a car, and makes transit more crowded!	3/29/2015 5:20 PM
82	Loss of connections and coverage due to changes to Routes 11, 8, 43	3/29/2015 5:13 PM
83	Would not send my kids on bus to school on capital hill or let them go shopping downtown on the bus.	3/29/2015 5:08 PM
84	I have to use transit as part of my daily commute, and that would not change.	3/29/2015 4:48 PM
85	I use transit mostly to get to and from work in NE Seattle	3/29/2015 3:17 PM

86	Reduced service on 25 and 43 routes	3/29/2015 11:39 AM
87	I already walk or use transit in the daytime. With Alternative 1 I would use transit for night-time events downtown, Seattle Center, and University District because of the increased frequency.	3/29/2015 10:58 AM
88	From madison park there would be less options ad times for the route 11, or it would be eliminated totally forcing me to use alternative and costly transit options.	3/28/2015 7:02 PM
89	I volunteer in downtown. Alternative 1 would make my trip more complicated. I would have to transfer, and when I reached downtown either have a much longer walk to my destination or take a 4th segment to get there. In all, I would end up taking a bus, train, and another bus to duplicate my current travel. I would also be less likely to use the bus to Group Health on Capitol Hill under this plan.	3/28/2015 1:34 PM
90	The elimination of the 43, revisions to the 8 and addition of the 38 greatly reduces my flexibility to transit home (Madrona) from work (U Washington) at hours after 7pm. Currently, the 43 and 48 provide two opportunities to transit from UW to Capital Hill to either transfer to the 8 or walk from 23rd to Madrona. Alternative 1 reduces the	3/28/2015 1:13 PM
91	More frequent and predictable trips	3/28/2015 1:06 PM
92	Expect to continue my bus travel as before since my family only has 1 car and I hate paying to park in S Lake Union, Downtown, Capitol Hill, and the UW.	3/28/2015 10:46 AM
93	it would increase my route time	3/28/2015 9:56 AM
94	More frequent service. Routes that make more sense.	3/28/2015 1:24 AM
95	I live in montlake; I don't have any good choices.	3/27/2015 9:12 PM
96	I HAVE ANSWERED THIS QUESTION PREVIOUSLY	3/27/2015 6:31 PM
97	Light Rail is unusable for me. My only connection is to Mt. Baker to ride to SEATAC. My 16 minute commute to DT becomes a 45 minute commute for route 12.	3/27/2015 6:13 PM
98	I only use 545 service during non-peak hours	3/27/2015 4:46 PM
99	This is not an area that I would utilize	3/27/2015 4:32 PM
100	Probably try to connect to light rail at one of the two new stations, currently about halfway between them	3/27/2015 4:13 PM
101	The added transfer and destruction of the 12-route makes short trips in between destinations on Capitol Hill, Madison Valley and Central District much less convenient.	3/27/2015 3:52 PM
102	Would be too hard to walk up to 15th so I would either need to move, or to use Uber/taxi much more.	3/27/2015 3:49 PM
103	Required transfer between Routes 48 and 8.	3/27/2015 3:40 PM
104	no direct connection between central area and south lake union	3/27/2015 3:37 PM
105	frequency allows fewer car trips	3/27/2015 2:49 PM
106	No direct way to get to my mom's house.	3/27/2015 2:40 PM
107	efficiency and reliability make it a go to option	3/27/2015 2:37 PM
108	it is really hard to decipher the maps, but it looks as if I will be doing a lot more walking because the consolidation will cut service where I now can take the bus, and/or I will be transferring around more to eventually get where I am going.	3/27/2015 2:33 PM
109	Moving by car would be more tempting, albeit more expensive, and may cost a lot of loss time also. Yet, I would be left with no choice.	3/27/2015 2:29 PM
110	Better ability to predict transit.	3/27/2015 1:59 PM
111	Capitol Hill is a place I travel weekly, but I don't have enough experience on most routes there to say either way which ones would most impact me.	3/27/2015 1:56 PM
112	my only transportation is public. if there is no access then I can't get to where I want to go	3/27/2015 1:48 PM
113	This would be so terrible omigod. I would give up entirely and just take taxis everywhere or move. I shouldn't have to transfer 1-2 times to move 2 miles! What the hell.	3/27/2015 1:41 PM
114	to get to SeaTac	3/27/2015 1:27 PM

115	because I ride the 11 to and from work each day and that route would be removed, I would have no way to get directly home or to work from my home.	3/27/2015 1:08 PM
116	I can't predict what losing route 25 will do to my transit use.	3/27/2015 12:04 PM
117	I would have to walk further to get to my destinations, and i am concerned that the route 2 will be way over crowded. I might use transit less and try to ride my bike, however, a bike is not always a good option when heading to work.	3/27/2015 11:59 AM
118	More frequent service makes driving less desirable	3/27/2015 11:37 AM
119	What's with that crazy streetcar? Is that to replace busses or will it make a more direct ride than is possible today? Seems to be another "deluxe to nowhere" like the SLUT -	3/27/2015 10:10 AM
120	It sounds like the bus lines I use the most, the 10 and the 11, might be made less direct from 15th ave & madison to downtown than they are now. Also, the 12 sounds like it may not connect directly 19th & madison to downtown. This is another useful direct connection. Increasing the frequency of the #8 line is a good idea, connection to Seattle Center and Capitol hill is challenging right now.	3/27/2015 10:04 AM
121	I believe this trip would still be significantly faster than walking.	3/27/2015 9:15 AM
122	Easier access and travel times	3/27/2015 8:45 AM
123	if it there were more convinient bus times, i would take the bus to theater events on Capital Hill.	3/27/2015 7:38 AM
124	More options	3/27/2015 6:50 AM
125	Same reason stated before.	3/26/2015 10:39 PM
126	can visit relatives in Capitol Hill without worrying about parking	3/26/2015 7:40 PM
127	frequent connections to my neighborhood	3/26/2015 5:09 PM
128	because of connections from south seattle to capitol hill	3/26/2015 4:30 PM
129	It would make it very difficult for me to use transit with Alternative 1. It would mean i would need to take multiple connections when as of now, I have one direct route and the wait is almost never that long.	3/26/2015 1:08 PM
130	Loss of route 43 would reduce the ease of getting to downtown or broadway - it is now a simple trip from my front door. With alt 1 I face at least one transfer, or at least a half mile walk. Route 43 may not be fast, but it gets me where I need to go. The loss of route 12 also means I have one less way to get downtown.	3/26/2015 11:53 AM
131	Much less convenient. By the time I walk half a mile to the bus, I might as well keep walking. Or drive.	3/26/2015 9:05 AM
132	I work downtown.	3/25/2015 9:52 PM
133	The loss of service in the Pike/Pine corridor would be a huge problem for me	3/25/2015 4:49 PM
134	Too damn much trouble, no convenient connection.	3/25/2015 3:38 PM
135	I don't use transit often to travel inside Capitol Hill	3/25/2015 2:19 PM
136	Faster and more frequent.	3/25/2015 1:39 PM
137	I don't use transit much now because of fragmented or infrequent service.	3/25/2015 1:31 PM
138	I use the bus a lot, it just make my life easier.	3/25/2015 12:41 PM
139	there would be no convenient route for me to go anywhere. I would have to walk at least 15 to 20min to go to a bus stop to go downtown, uistrict, or to get to work in redmond. By extending my commute time, I would not benefit from taking the transit ever. I would also have to transfer 3 times (my place -> capitol hill broadway stations -> downtown/montlake -> overlake transit center) instead of simply taking 2 legs for one trip to get to redmond	3/25/2015 10:29 AM
140	It would likely be about the same. However I might drive to Steven's Elementary on 19th.	3/24/2015 11:40 PM
141	I'm considering moving from Redmond to Capitol Hill and if Alternative 1 were implemented, it would be a positive factor both in me making the move and using transit more in Capitol Hill.	3/24/2015 6:03 PM

142	I think I would use it about the same. Some trips would be longer some shorter. Steven's Elementary would become less accessible by bus. Maybe I would just drive. Getting to Northgate looks faster, but to the northwest area served by the 48 would take longer. I would really miss the 12 along 19th to Stevens School. I would have to transfer more to get downtown from the north part of Broadway. Transferring takes effort and time. I anticipate more anger from friends and family regarding the fact that Link won't accept paper transfers.	3/24/2015 5:29 PM
143	Alt 1 would provide better connections to destinations in and around Capitol Hill by leveraging Link.	3/24/2015 4:10 PM
144	I'd give up my plan to get an monthly card and just use my truck more.	3/24/2015 3:51 PM
145	Increased frequency would encourage me to use transit more.	3/24/2015 3:30 PM
146	The 11 and 43 are the two closest routes to my residence that connect me to downtown Seattle, Madison Park and the U District, which is where I most frequently go.	3/24/2015 12:26 PM
147	I already commute daily, it will just be easier or more difficult	3/24/2015 11:28 AM
148	provided the service was more frequent/reliable and distances not an impediment I would use metro service more. Although the majority of my commute is between west seattle and the downtown corridor, a major criticism of my experience with metro right now is the lack of reliable service and more frequent buses that make the commute less reliable and sometimes result in driving in to work (even though my preference would be to bus in). Hopefully the system would perform better than rapid ride which is feast or famine (i.e. several buses at the same time and then long gaps before the next one).	3/24/2015 8:55 AM
149	I recently moved away from Capitol Hill but still take transit there frequently. I'm not sure these specific changes would impact my plans.	3/24/2015 2:42 AM
150	My commute time would be longer and more tiresome, but I'd still have to go through with it, getting to and from work.	3/23/2015 11:20 AM
151	I take route 49 to Convention Place and then take route 255. This will no longer be possible. How this will affect my use of transit is unclear.	3/23/2015 10:44 AM
152	I already use it all the time. It would just make it faster.	3/22/2015 7:01 PM
153	I will have to walk to the streetcar and then walk downtown. I easily double my transit times	3/22/2015 1:06 PM
154	In most cases, I don't have an alternative to using transit--the routes I use most would likely be eliminated or more crowded, but I would still use them. In some cases, though, I might choose to walk instead.	3/22/2015 12:11 PM
155	No car.	3/22/2015 11:26 AM
156	Generally I would adapt to what becomes available, so it's hard to say how I would use transit since I do not have a car.	3/22/2015 10:27 AM
157	Because why should I use the bus services if it's going to be essentially nonexistent? I'd rather drive.	3/22/2015 3:33 AM
158	Probably wouldn't use. It would just be too complicated and take me much longer. Right now the bus comes frequently, my stop is across the street, and I'm downtown in 20 minutes.	3/21/2015 7:41 PM
159	Madison valley line	3/21/2015 3:18 PM
160	I rely on the 25 bus route in Montlake. I also need the buses on 24th ave E to remain as frequent as they come now.	3/21/2015 11:20 AM
161	im not positive but i think the same, maybe more	3/21/2015 10:57 AM
162	It would be harder for me to get to, since I live in Montlake. My commute to Ballard is already 1.5 hours one way - making it more difficult to get a direct connection on the 24th Ave E corridor and increases in bus fare would make the negatives outweigh the positives.	3/21/2015 9:33 AM
163	These proposed changes don't seem to have too much of an effect on the time it takes me to get to Cap Hill from Greenwood or the U-district - so I don't think I'll be tempted to visit Cap Hill any more or less.	3/20/2015 11:43 PM
164	Because there would be no transit from my home near Boyer and 14th to the places I need to go, UWMC and downtown.	3/20/2015 8:33 PM
165	There is no other alternative routes from Boyer and 14th area to get to Pioneer Square without significant walking/biking.	3/20/2015 8:29 PM
166	I am car-free, using transit more or less isn't really an option.	3/20/2015 8:13 PM

167	Because I would actually be able to get from First Hill to businesses on Broadway without having to walk because the service is so bad. Also I would be able to better get to Capitol Hill from Interbay because of improved service on the 8.	3/20/2015 7:19 PM
168	Because it partly restores bus service to 1992 levels, back when it was Seattle City Metro, and did not suck yet because King County wasn't running it yet.	3/20/2015 5:39 PM
169	It's less convenient for me. Maybe I'd bike to the station and take the train, but I'm not going to bus to the station and transfer all the time.	3/20/2015 2:52 PM
170	My main transportation in the region is negatively impacted. This alternative directly diminishes my transit options. I would have no alternative other than to use transit less.	3/20/2015 1:34 PM
171	I don't have a car.	3/20/2015 1:24 PM
172	better connections more frequently	3/20/2015 11:49 AM
173	I could walk to the new Link light rail station at UW instead of taking 43 from montlake (to get to cap hill) but that would be a longer walk so I might be less likely to do it. It seems like getting to capitol hill from my neighborhood would be made tougher, which is a significant downside to me.	3/20/2015 11:19 AM
174	It will be quicker and easier to use the car.	3/20/2015 8:41 AM
175	My most frequent routes are the 8, 43, and 49. With downtown (Pike/Pine) connections via the 43 and 49 being eliminated (and not easily covered by Link in all cases), I would use transit less often.	3/20/2015 7:30 AM
176	The increase frequency of the 8 later at night will make me much more likely to consider it a viable alternative to driving to the Seattle Center for evening events.	3/20/2015 12:41 AM
177	Luckily, you'd be keeping the 49 and the 8, which I use all the time.	3/19/2015 10:27 PM
178	Looks like it would preserve the routes I use the most and could speed up my commute.	3/19/2015 10:02 PM
179	The value of Metro and the new light rail would be diminished for me and my family.	3/19/2015 9:59 PM
180	I might ride the 8 more often. For the University District, the light rail stations opening will have more impact than either alternative; I currently rarely travel there.	3/19/2015 7:27 PM
181	Alternative 1 provides easier options for recreational trips I take occasionally.	3/19/2015 7:05 PM
182	The increased span of service on the 8 will be nice for getting between the Seattle Center and Cap Hill, although bus downtown + Link might be a better option if there aren't considerable improvements to bus reliability on Denny.	3/19/2015 4:05 PM
183	I would like to explore Capital Hill and the Central Area more	3/19/2015 4:02 PM
184	I will stop taking the bus, likely in its entirety, if Alternative 1 occurs. I'm a real person, with a life and a family. I don't have a fucking hour to transfer 1-2 times and walk in the rain just because you think it makes a prettier map with simpler corridors.	3/19/2015 3:58 PM
185	Capitol Hill is difficult to navigate to and from because things are spread out, so I never know which route to take. Easier access via the Link rail would mean I would know where to go, and it doesn't seem like the routes that would be cut would affect me that much.	3/19/2015 3:36 PM
186	see answer to #10.	3/19/2015 3:24 PM
187	Regardless of what changes, I am completely dependent on transit to get around so I can't change how often I use it depending on how "convenient". I have no alternatives.	3/19/2015 3:10 PM
188	Increased frequency of buses makes transit a more feasible option	3/19/2015 2:44 PM
189	The buses would no longer take me to where I need to go!	3/19/2015 2:39 PM
190	I live across the street from what used to be #27 and has now been diminished to a commuter only service. Despite the fact that hundreds of new housing units are being built, the full service route was cut. I really distrust this entire process.	3/19/2015 2:33 PM
191	I don't own a car, so I don't have any other choices if I want to go longer distances.	3/19/2015 2:14 PM
192	I'm car-less, so must go everywhere by bus, whatever the travel time or level of convenience.	3/19/2015 2:04 PM
193	More frequent service & better connections	3/19/2015 1:31 PM

194	No direct connections would result in longer trips.	3/19/2015 1:17 PM
195	It would make it easier for me to get to places on Capitol Hill that I currently visit very infrequently because of transit hassles. Since this alternative uses the light rail station as a connecting hub, I will be able to easily transfer to get where I want to go if it's out of the capitol hill station walkshed (and because there are places within the walkshed of the new station that I'd like to visit more anyway, I will be on capitol hill more and willing to hop a short busride elsewhere).	3/19/2015 12:13 PM
196	Again, I don't know how these changes would impact bus service further south.	3/19/2015 12:06 PM
197	Easier to get to the light rail station would help me when traveling to the airport.	3/19/2015 11:15 AM
198	these changes may increase my walking distance, but it could also increase the amount of transit.	3/19/2015 10:57 AM
199	I live close to a mile from Broadway and with no alternative to getting to the light rail station, I just foresee having to purchase car to get around instead of depending on the bus.	3/19/2015 10:19 AM
200	I have to. I strongly rely on public transit to get around Seattle.	3/19/2015 10:11 AM
201	A main portion of travel is from the montlake area to UW and montlake to capitol hill. If these routes are decreased or removed I would have to find alternate travel options.	3/19/2015 10:01 AM
202	I already use transit less and use Uber. If two or three of us want to go downtown or somewhere it is cheaper to split an Uber then for all of us to take the bus sometimes or the difference in cost is so small that it is worth it. I also would like to point out the my older son who lives in the U District is going broke from his bus fares.	3/19/2015 9:09 AM
203	With further walks to bus stops, might as well just walk the whole way.	3/19/2015 9:00 AM
204	My transit habits would not change, but improve if Alternative 1 is implemented.	3/19/2015 7:40 AM
205	I hardly go to Capitol Hill, so none of this really affects me.	3/19/2015 2:12 AM
206	Need to know more about this one.	3/18/2015 10:25 PM
207	This is a terrible idea. For anyone living in North Capitol Hill more than five minutes walk from the Broadway and John light rail station, this will mean longer commute times to the University District. I make this commute every single day. These buses are full every day, and most travelers from the UW to Capitol Hill get off the 43 more than 5 minutes walk before Broadway and John. Moreover, the walk from the UW light rail station will add an additional five minutes to my journey. I estimate that my daily commute from my house (16th and Republican) on the light rail will be 20 minutes LONGER than it currently is using the #43. This is not public transportation progress. It is a light rail boondoggle. Sincerely Robert Wood Professor, University of Washington PS. The same thing happened with bus route 194 which reliably took passengers from downtown Seattle to the airport in 30 minutes until it was cancelled because of the light rail. The trip now takes 40-45 minutes on light rail. Is this progress? The idea is that new transit systems augment the public transportation system, not replace existing components.	3/18/2015 8:55 PM
208	Doesn't give me any better way to get to Capitol Hill/Madison Valley from Phinney Ridge, or even from downtown.	3/18/2015 8:42 PM
209	N/A	3/18/2015 8:10 PM
210	Better service between downtown and Capital Hill (assuming that Capital Hill's culture is not completely changed by development)	3/18/2015 4:57 PM
211	more difficult	3/18/2015 3:17 PM
212	I love riding the bus	3/18/2015 3:13 PM
213	Greatly impacts commute	3/18/2015 2:46 PM
214	Less convenient to get to bus for departure, less convenient point of arrival.	3/18/2015 2:44 PM
215	I don't live on Capitol Hill anymore, but a lot of the businesses I frequent are on Capitol Hill. I'm mostly concerned about getting from my work (the UW) to various places around central Capitol Hill--which seems to be mostly addressed. I might just have to walk further to get to places on 15th Ave. Traveling to and from Beacon Hill to Capitol Hill will be addressed once the light rail opens. In the meantime I take the 60 or take the 10 or 11 to the light rail.	3/18/2015 2:25 PM

216	If there was a direct connection between North Capitol Hill and the downtown Madison Corridor (down to the ferries), this would create a beneficial direct link for people traveling from the most dense neighborhood to a major work area (downtown financial). I work on Madison and 1st Ave, so it would be nice (versus having to take 2 buses as in my current situation).	3/18/2015 1:54 PM
217	I would drive to the UW and add more congestion to the streets.	3/18/2015 1:42 PM
218	I often have to get to First Hill as a medical student and improving the frequency of transit to this area would increase my use.	3/18/2015 1:40 PM
219	I don't have a car	3/18/2015 12:49 PM
220	With more frequent Route 48 trips, i will be more likely to catch a bus that gets me to the UW at the right time, plus not thinking about it is positive.	3/18/2015 12:48 PM
221	Less convenient. I'm so tired of having to walk longer and longer distances to catch bus or rail, I'd probably drive or go places fewer times.	3/18/2015 12:41 PM
222	If the link rail connected downtown to the U district, I'd probably be fine	3/18/2015 12:37 PM
223	I would bike	3/18/2015 12:33 PM
224	I frequently visit restaurants/theater/friends in Central Seattle and Lake Union and would prefer not to deal with parking; would use the bus more.	3/18/2015 12:25 PM
225	I have no choice, I don't drive	3/18/2015 12:06 PM
226	It wouldn't run in my neighborhood; how could I use it?!	3/18/2015 11:49 AM
227	I might choose to walk to/from the Link rather than take the 48 if the equipment on the Route 48 is not improved.	3/18/2015 11:44 AM
228	If the long wait times between buses is decreased it would have a huge impact on flexibility of travel. This is important because I am usually traveling with a child and it is easier and safer when we are not waiting 30 minutes between buses. Congestion on Denny Way essentially cuts us off from family in Lower Queen Anne most of the week. More frequent trips for the 8 would hopefully improve that.	3/18/2015 11:41 AM
229	restricts my options and makes me travel farther from home	3/18/2015 11:35 AM
230	The light rail station is extremely out of my way, and may double my commute time. I take the 11/12 and 43/48 to work from 17th and Madison, and it is impractical for me to get to Denny and Broadway when my current commute is so quick when timed correctly.	3/18/2015 11:31 AM
231	With the elimination of route 12, there is no direct or close connection to my home to Capitol Hill. I work at UW and would still need to get to Capitol Hill to right link light rail. No bus will easily do that for me now. I either need to walk many blocks to Capitol Hill or to catch another bus, or walk downtown (in the opposite direction of where I need to get for work), to catch the light rail. I would have to likely drive my car from home to a place I could catch the light rail or route 48 (park somewhere on 24th) because of the elimination of route 12. With the elimination of route 43, I would likely have to wait much longer for a 48 even if I did this.	3/18/2015 11:29 AM
232	I would lose my 12 bus. No good alternatives. I would walk or drive.	3/18/2015 11:26 AM
233	Hard to tell if this will speed up transit between U district and capitol hill -- as it is it can take 30+ minutes, sometimes 60+ minutes to get downtown	3/18/2015 11:21 AM
234	43 is my everyday bus that takes me from the UW to the top of Capitol Hill	3/18/2015 11:18 AM
235	I'm not sure if the light rail will be a viable option for me from North Capitol Hill. I don't know where the station will be, nor do I know where it will drop off downtown (I guess probably westlake station and Broadway, but that's just a guess).	3/18/2015 9:59 AM
236	The two bus services I use most often (pike/pine corridor between 15th and downtown) and the 12 between 17th and downtown on madison are being reduced.	3/18/2015 9:01 AM
237	frequency	3/18/2015 1:21 AM
238	It would be more pleasant to transfer to Link and get to Capitol Hill faster, but I already use Metro to its full extend when traveling within city limits	3/18/2015 1:10 AM
239	Duh. Take away service from where I live and my ass won't be riding the bus.	3/18/2015 12:20 AM
240	I regularly want to go from Madison Park to the Pike/Pine corridor, and there's no direct route anymore.	3/17/2015 11:50 PM

241	I travel the Pike/Pine corridor heavily, and so loss of frequency (with the loss of 49) would make me less inclined to take the bus overall if I was planning to come home later in the evening and needed to go from downtown to Central District.	3/17/2015 9:54 PM
242	See #9	3/17/2015 8:27 PM
243	The route that goes near my house would no longer take me downtown to where I go. It would leave me more than a half-mile from where I need to be.	3/17/2015 7:33 PM
244	I take the 44 & 43 from Ballard to Cap Hill 5 days a week. If the 43 could no longer get me to work I would have to find a different route to work.	3/17/2015 6:18 PM
245	I would adapt to changes because transit is my primary mode of transportation. But if possible, I would not like such drastic changes to occur at one time.	3/17/2015 6:04 PM
246	More options for quickly getting to North and Northeast Seattle areas	3/17/2015 5:46 PM
247	I still need to use it.	3/17/2015 2:38 PM
248	Alternative 1 excesses on Capitol Hill and the Central Area would divert dollars away from other routes to the extent that reductions elsewhere would make our use of transit impractical. I would no longer be able to use transit to go to medical appointment using the lost Central Seattle routes. If sound transit wants to add feeder busses as part of their light rail system, they should do so; they should not steal local transit service from King County Metro.	3/17/2015 1:08 PM
249	Because route 8 will no longer connect me to SLU. No bus from 98122 will serve Mercer Corridor in SLU. Route 4 is not connected to Mt Baker station. Route 14 still makes a time consuming loop to Hanford st, which can be done by simply extending 4 to Mt Baker station and then on to Hanford where the 4 can have its terminus.	3/17/2015 12:51 PM
250	I depend on transit for most of my transportation needs.	3/17/2015 12:00 PM
251	I live in the Pike/Pine corridor and am concerned that a reduction in service in that area would make it difficult to access any transit	3/17/2015 11:35 AM
252	Frequent service, longer service periods, more reliable system--it's easier to understand, and I wouldn't have to make decisions based on whether or not I want to use Uber/Lyft to get home since so many routes go to reduced service at a relatively early time (waiting at Denny/Aurora for an 8 at 8pm for 30 plus minutes is not comfortable/convenient/safe feeling)	3/17/2015 10:52 AM
253	My concerns are mostly about convenience of current trips. I do wish that this plan had done more to create a through-service to Fremont, Wallingford, and Ballard from capitol hill, which would have increased my use of transit.	3/17/2015 10:17 AM
254	I don't have a car, I need to use the bus, so I'd make it work. I might have to walk a bit farther though.	3/17/2015 10:14 AM
255	My primary use of transit is between my home in Madison Valley and my work downtown. With the deletion of a direct route to downtown, I would likely ride my bike more or find some other route to work.	3/17/2015 9:57 AM
256	less frequent trips	3/17/2015 9:26 AM
257	I hate your survey.	3/17/2015 8:19 AM
258	It makes it inconvenient to get to redmond in off peak hours.	3/17/2015 12:10 AM
259	I would use Route 8 more to get to the Seattle Center rather than to walk.	3/16/2015 5:08 PM
260	The 43 is my lifeblood. Without it I would need to resort to alternate transit for my Montlake<->Capitol Hill travel	3/16/2015 4:39 PM
261	Madison corridor access	3/16/2015 4:35 PM
262	Grid would make connections to all parts of Cap Hill easier from wehre I live downtown.	3/16/2015 3:43 PM
263	Tranit from 19th and Madison area to almost anywhere, but especially downtown, would require at least one transfer, multiple waits on unreliable services, and long walks to get to the station.	3/16/2015 2:37 PM
264	the increased frequency would allow me to be more flexible in time constraints.	3/16/2015 2:36 PM
265	Having to change at the Stadium (Rail >> 542) - a walk and a wait, seems ridiculous.	3/16/2015 2:08 PM
266	Makes more places easier and quicker to get to.	3/16/2015 1:53 PM

267	I rely on Route 11 when going from Madison Valley > Downtown. If there were no longer a direct bus downtown there would be less incentive to take transit.	3/16/2015 1:17 PM
268	I don't own a car and already rely predominantly on transit to get around the city and region.	3/16/2015 12:52 PM
269	I rely on transit for getting around Seattle, especially when it's raining. I don't own a car, and don't plan to purchase one. If Alternative 1 were implemented, I would greatly appreciate the ability to make a reasonable transfer, rather than the current 20 min expected wait for a transfer(what I face most of the time). The frequency has to be coupled with reliability. I would love increased frequency on the 8, but not if all of those buses are stuck between Westlake and Fairview.	3/16/2015 12:52 PM
270	Possibly walk downtown rather than take the (deleted) 43. The 49 along Broadway is too slow.	3/16/2015 12:47 PM
271	higher frequency of routes. frequency means freedom for me.	3/16/2015 12:38 PM
272	24th Ave E between Montlake and Capitol Hill seems worse off after Alternative 1 because of the loss of the 43. It's more difficult to get downtown and to the Capitol Hill link station. It's unclear if the increased 48 frequency would make up for that.	3/16/2015 12:32 PM
273	Might need to take alternatives to route 43/44, but will more likely use transit on short trips since it is more frequent.	3/16/2015 12:21 PM
274	Downtown to Pike/Pine corridor wouldn't be as convenient	3/16/2015 12:21 PM
275	The Madison > Downtown route is KEY for me. I ride it every day. I would be required to walk 6+ blocks to Broadway to catch the 12. Please keep the 12 along Madison.	3/16/2015 12:16 PM
276	Needing to transfer will make me drive more often when I am running late	3/16/2015 12:16 PM
277	My decision to use transit is mostly based on the proximity of transit stops, and that doesn't seem to change much under this plan for those living in Central Cap Hill.	3/16/2015 12:13 PM
278	I would have to transfer and walk farther than I have to now to get home/to work.	3/16/2015 12:13 PM
279	The 11 to 545 to get to Redmond required getting to Pine and Bellevue for a single transfer to Bellevue and Olive pickup of 545. With the new proposal, it is two transfers: 11 to 43/48/Link to 545 at Montlake	3/16/2015 12:12 PM
280	#43 is my main link to downtown from my home (22nd / E. Republican). It is also my main link to Montlake station where I transfer to ST545 for work.	3/16/2015 12:05 PM
281	Microsoft offers a shuttle during peak hours. However, outside of peak hours, there would be much more transfers (take the 542 from Overlake Transit Center to UW, then Light rail to Capitol Hill, then 8 to Belltown, instead of just 545 from Overlake Transit Center to Denny Triangle, and 8 to Belltown.)	3/16/2015 12:03 PM
282	It would be more difficult for me to commute to/from work during off-peak hours.	3/16/2015 11:55 AM
283	It depends on how time efficient and reliable these routes turn out to be. These changes may make traffic so bad it's faster to walk a few miles.	3/16/2015 11:51 AM
284	I mainly use the 545	3/16/2015 11:51 AM
285	I use the 545 every day to get to and from Redmond. Because my work schedule is dynamic, I often have to stay late or arrive during the middle of the day. If the 545 schedule were reduced to peak hours I would no longer be able to use it as my primary transit option.	3/16/2015 11:50 AM
286	Longer walk to the Husky Stadium station	3/16/2015 11:47 AM
287	Loss of Montlake station.	3/16/2015 11:47 AM
288	Proximity to transit stops and need to transfer.	3/16/2015 10:49 AM
289	I live on E. Lake Washington Blvd, 3 houses down from Montlake Blvd. It sounds like I won't have access to all of the buses from downtown Seattle to the Eastside. I would be forced to use the 43 which is not a pleasant bus to ride. The population using that bus, especially at night, not pleasant to be around.	3/16/2015 10:46 AM
290	see below	3/16/2015 10:03 AM
291	As I don't own a car, I'll need to use whatever transit is available.	3/16/2015 9:17 AM
292	If transit were faster and more efficient I would prefer it over my car.	3/16/2015 9:03 AM
293	The alternative is buying a car	3/16/2015 7:29 AM

294	I like visiting Capitol Hill for nightlife and shopping	3/15/2015 8:34 PM
295	I may use transit less, because walk, 545 at MSFT will become, walk, train, transfer, 545. I may use the same because of the 23rd on-ramp to eastbound 520 freeway exchange might be a total disaster. Right now, I feel like my commute to MSFT will be worse until the train is done in '23.	3/15/2015 6:25 PM
296	All the fun bars are between Broadway and 15th Avenue. Plus, it will be very inconvenient having to travel farther on 15th Avenue East for infrequent or even unavailable bus service especially when its cold and raining. Leave Route 43 alone; there's nothing wrong with it. Route 43 provides reliable night time service because its one of the few routes that runs late at night and connects all of Capitol Hill with the U-District.	3/15/2015 5:20 PM
297	The commute from 19th & Madison area becomes extremely unattractive with long walks and multiple out of the way connections.	3/15/2015 5:16 PM
298	Current transit service throughout King County is too slow and too infrequent for me. For most trips under 5 miles, biking is faster than busing. For trips over 5 miles, I drive, even though it is more expensive. I would really like to use transit more, especially when it is raining or in circumstances where parking is expensive or traffic is highly congested. I still use transit occasionally, but I never enjoy the experience. Alternative 1 is a step toward a system I might actually want to use.	3/15/2015 4:53 PM
299	Eliminating the 12 would force riders to use the 8, which would not take a quick route up and down Madison.	3/15/2015 4:34 PM
300	With the deletion of the 11, there is greater frequency at the current ending, E42nd and Madison. That means greater reliability during the week at least. I worry about the transfer points.	3/15/2015 2:18 PM
301	Routes I would use 43 and 25 would not be in service.	3/15/2015 12:42 PM
302	My routes would be cut, so Id be walking or renting a car.	3/15/2015 9:59 AM
303	I don't really want to drive on my commute. It isn't a real choice.	3/14/2015 8:12 PM
304	I use either the 43 or 12 everyday	3/14/2015 4:01 PM
305	Uncertain what my future transit needs will be with respect to that corridor	3/14/2015 3:26 PM
306	I generally go through the University District and transfer to either the Routes 43 or 49. If route 43 is cut or rerouted it would mean fewer alternatives for me to travel to Capitol Hill. I know the assumption is that we'll all be taking the light rail to Capitol Hill, but to go to Capitol Hill I might prefer to use a bus that is less crowded.	3/14/2015 3:04 PM
307	I would use it LESS because I wouldn't have access to it!!!	3/14/2015 8:39 AM
308	There would no longer be routes taking me the places I need to go. I would have to walk further and it would be way less convenient.	3/14/2015 4:57 AM
309	Likely would be less compelled to change to transit. More transfers. More convoluted routes.	3/13/2015 9:18 PM
310	I gave up my car and travel frequently to Madison Park and to UW	3/13/2015 7:32 PM
311	The 8 is my mainstay. But sometimes I'll prefer to walk because the buses are so behind or overcrowded.	3/13/2015 6:41 PM
312	Because it eliminates the route I use to go to and from work and all the alternatives are worse (more time in both directions, more walking distance). No benefits whatsoever.	3/13/2015 5:03 PM
313	The loss of Route 11 into Madison Valley and Madison Park would reduce my bus use, even though the changes in Route 48 would increase my use.	3/13/2015 4:07 PM
314	This would make traveling between Broadway and University District faster & more convenient for me.	3/13/2015 4:01 PM
315	What is Alternative 1 ?	3/13/2015 2:52 PM
316	One always has to observe how the actual routes work in terms of time and efficiency.	3/13/2015 2:32 PM
317	Really only concerned with north capitol hill/montlake access here.	3/13/2015 12:38 PM
318	Shorter/faster transit time	3/13/2015 10:59 AM
319	The 8 would actually be a reasonable option, the 49 would come so often I would probably take it short distances (e.g. north/south on Broadway), and the 38 would provide a direct connection (for me) to friends/drinking/brunch up at 12th and Madison :-).	3/13/2015 10:16 AM

320	I'm tired of paying Ubers to get me home after Midnight when I go out on Capitol Hill. I'd rather give you that business, and if I knew it wouldn't be as expensive for me to get home after a night out I'd be more likely to consider Capitol Hill more often.	3/13/2015 9:53 AM
321	Loss of my primary neighborhood links.	3/13/2015 7:34 AM
322	Could not access it.	3/12/2015 10:17 PM
323	Transferring from one bus to another is a waste of time. Frequent and adding number of buses is a fallacy since it will just results in clusters of buses coming at the same time. This is due to drivers are not given consistent motivation/directions to serve customers - they work as individuals to get one bus driven on a route and not to work as a team to best serve needs of customers.	3/12/2015 9:05 PM
324	I am retired and thus my hours are flexible.	3/12/2015 8:43 PM
325	Improve 12th Avenue Service, current Metro destinations in CD/Cherry Hill are practically useless. I choose to walk or other transit modes 99% of the time.	3/12/2015 7:43 PM
326	Route 11 is the only route that runs all the way from Madison Park to downtown Seattle -- I plan to remain in my condo into retirement and beyond and this is the only route that covers the major neighborhoods I would need to travel to if I end up using car transportation less often.	3/12/2015 7:16 PM
327	Inconvenient. I would walk.	3/12/2015 5:55 PM
328	Until it is in place, it is hard to know which buses, etc. really will provide the service needed	3/12/2015 4:06 PM
329	I live on the 24th Ave E corridor, so I would lose my direct connection to downtown and Capitol Hill. I especially rely on the 43 to get home from Capitol Hill nightlife late in the evenings, when no routes run often enough to make a transfer. I don't drive and I bought my house in north Madison Valley partly because of the convenient location to transit. I'd be using transit less because I would have to stop going to Capitol Hill at night.	3/12/2015 3:35 PM
330	Need to frequently travel between Capitol Hill/Montlake/Downtown	3/12/2015 3:29 PM
331	Frequent service!	3/12/2015 2:37 PM
332	I don't often travel to the areas affected by these changes. However, I do like the changes proposed in Alt. 1 to make the network more legible, more frequent and hopefully more reliable.	3/12/2015 1:57 PM
333	Most of my destinations are served by both existing and Alt1 service.	3/12/2015 12:45 PM
334	Madison Valley and the Central District are places I'd like to visit more often but often don't because of bus frequency issues and how far I'd have to walk to catch the buses. Alternative 1 addresses these issues.	3/12/2015 11:40 AM
335	The light rail system provides great convenience for mobilizing through the north-south corridor, but is not as practical for transit through east-west corridor. I do most of my rides from Madison Valley through Pike/Pine to downtown Seattle for both leisure and business. Business as I get my connection to the East side in downtown, and for pleasure as I visit shops and restaurants in downtown and Pike/Pine areas. The convenience of jumping into 1 bus and being able to reach both of those areas (downtown and Pike/Pine) is what provides the value for me instead of driving. Is fast, direct and I don't need to park. If the route where to be eliminated, I would just drive as it would take me longer to get to my connection in downtown to then go to the eastside. As for leisure, I have a young baby, so having to do change of buses, is not really an option. I like the increased frequency of the route 8, but this does not compensate for the extra time it will take to get to downtown. Also, the light rail station is not close enough to Pike/Pine to be a feasible option for walking to those areas for entertainment with my family. I feel that by eliminating the 11, a huge area between Madison and St. John will be left without any convenient bus service to cover it.	3/12/2015 10:57 AM
336	Less service = less use	3/12/2015 8:03 AM
337	Because if I am on Broadway and want to get back to the Udistric having the 49 come more frequently will make it easier.	3/11/2015 10:26 PM
338	I use it every day already	3/11/2015 10:17 PM
339	I'm far enough from UW Stadium that I'd rather drive than take time to get to the subway.	3/11/2015 9:58 PM
340	friends in that part of town, so I currently take the bus to see them but couldn't if changes were made	3/11/2015 9:51 PM
341	loss of #11	3/11/2015 8:11 PM
342	More frequent service would mean taking the bus more than just walking (because the bus isn't coming soon) or using a car share	3/11/2015 7:49 PM

343	no direct route downtown, the 11 is gone. Less frequent access to UW with half hour vs 15 min.	3/11/2015 7:06 PM
344	No Madison Park access	3/11/2015 4:32 PM
345	Better chance of arriving at destination in a timely fashion.	3/11/2015 4:04 PM
346	There are many elderly people living in Madison Valley and Madison Park. Taking away the No 11 bus makes it difficult to get to Safeway, Trader Joe's, Benaroya Hall, Seattle Art Museum, Pike Place Market, medical buildings downtown, Target, Nordstrom's and other stores in the downtown area. GOing the other way, how would we get to the bank from Madison Valley, or the hardware store? In fact it would be a real loss to us, particularly those of us on a limited budget. Parking is far too expensive downtown for many of us. How do you expect us to get there? I can take two buses to get neat the main library or the Polyclinic, but without the No. 11 I couldn't do that at all without a car. 23rd Ave and 24th Ave are up the hill which can be difficult to walk for the elderly. Also on Capitol Hill it is much easier to take a bus as there is nowhere to park there.,	3/11/2015 3:39 PM
347	If service is not fast and frequent we'll just drive.	3/11/2015 3:36 PM
348	I use transit all the time during the week. This won't change. Only the convenience will change.	3/11/2015 1:25 PM
349	I would rather drive downtown than require a transfer. Even though Alt 1 leverages the tunnel for faster CH-downtown connection, it will take much longer overall to walk to bus, wait for bus, go, get off bus, get my kids across a busy intersection at Broadway/John, enter the tunnel, wait for bus, go, get off bus, exit tunnel. I'm insulted by the lack of respect of my time and the nonchalant attitude at forcing my elementary-age kids to unnecessarily cross a major intersection--twice.	3/11/2015 1:04 PM
350	Let's see how it goes	3/11/2015 12:47 PM
351	Because my service levels aren't directly affected on my work-commute. Overall, random or supplemental rides don't account for a sustainable nor forecastable amount of transit use on my part.	3/11/2015 11:39 AM
352	Again, the 48 would be split up and I would need to transfer.	3/11/2015 10:50 AM
353	Loss of route 11 & 12	3/11/2015 10:39 AM
354	as above.	3/11/2015 10:33 AM
355	I travel from Madison Park to Downtown, and then catch any bus (at the Westlake Tunnel station) to the International District Tunnel station, and the reverse travelling home. I am concerned about the congestion on the busses coming over Capitol Hill on the Pike/Pine Corridor. The busses are already packed, so I would hate to see service reduced.	3/11/2015 10:31 AM
356	It would likely take me even longer and require at least one transfer to go 3 miles. I would likely become a single driver because I won't be able to get from Madison Park to Downtown or First Hill easily.	3/11/2015 10:26 AM
357	Treats CHS as a hub, and opens up much more of Capital Hill and the Central District with a single/frequent transfer.	3/11/2015 10:22 AM
358	I specifically chose to live (Mercer/24th Ave) where I could easily catch a bus to Seattle Center, Pike/Pine and Montlake/University. I rely on transit to get to work every day via Montlake, and the ability to use either 43 or 48 is what gives me confidence that when I get to the bus stop, a bus will be by within minutes to get me to Montlake. Increased 48 frequency alone doesn't give me that confidence. Loss of connectivity to downtown corridors is a big drawback as well.	3/11/2015 10:05 AM
359	I need to cut 10 minutes off estimated transit time (right now it is about 40 minutes from SCC to Bellevue P&R using transit, on a good day). If you can do that, great. If not, then I won't use it because I simply cannot afford the child care. On the other hand if I can no longer drive, and transit is not an option, but the roads are clogged, I might just quit my job because I am already exhausting my options by cobbling together backup etc.	3/11/2015 8:59 AM
360	I don't really have a choice. I have to keep using transit to get to and from work. It would just be more or less convenient.	3/11/2015 8:52 AM
361	I would still rely heavily on public transit, but I am concerned about the alternative for route 49. If it's changed, then getting downtown (Westlake) would require a transfer, which will not reduce transit time. Transfers add time because the bus is rarely on time, I would have to wait longer.	3/11/2015 8:49 AM
362	Don't go there too often.	3/11/2015 8:45 AM
363	I am opening a small business in Madison Valley and the 11 is a very important transportation component for my clients. I am opening a therapy clinic in the valley and a few extra blocks to navigate is enough for clients to choose to go somewhere else.	3/11/2015 7:57 AM

364	I would essentially stop taking the bus except for the occasional shopping trip downtown. Alt 1 is less convenient for everyone East of Downtown, less safe (dark), more difficult for residents with mobility issues. Capital hill has lots of subsidized housing that includes elderly and disabled. Lots of my neighbors are elderly.	3/11/2015 7:53 AM
365	I would still use transit, as it is my main mode of transportation and I use it daily to drop my son off at school, get to work, and come home. However, as I understand the proposal, Alternative 1 would propose to eliminate one of the primary routes I use - the number 12, which currently provides me with direct, one route access, from my work near Pioneer Square to the Central District. Eliminating This route would require me to transfer to different bus routes and increase my commute time.	3/11/2015 7:02 AM
366	Right now I primarily use my bike to get around. If there were more convenient buses between work (belltown) and home (north cap hill) i would bus more. Also, if there were more frequent weekend bus routes, I'd take them with my daughter more to go to the zoo, aquarium, and seattle center.	3/11/2015 5:45 AM
367	NO BUS	3/11/2015 12:53 AM
368	Increases difficulty of getting to Capitol Hill area. Walking or wait times makes it more convenient to drive	3/10/2015 9:27 PM
369	I will not walk through a dangerous area to get to Trader Joe's or other areas along East Madison.	3/10/2015 7:39 PM
370	It generally works well with light rail to improve transit mobility	3/10/2015 7:03 PM
371	More frequent 8 running later means I'd be more comfortable taking it to the Seattle Center for events. The Link to 542 connection would probably become my commute trip to/from work.	3/10/2015 6:56 PM
372	The change to route 49 brings me much closer to my work place on Broadway and Madison	3/10/2015 5:30 PM
373	I use routes 12 and 43 the most, and there do not seem to be good replacements in Alt 1.	3/10/2015 5:14 PM
374	I take the 8 from Madison Valley to SLU. I'd now have to transfer, which will be a big frustration and time penalty (in addition to the chronic lateness of the 8 and the 1 mile walk to reach it in Madison Valley). I'd rather just drive.	3/10/2015 4:50 PM
375	More reliability would make it more likely that the 8 would actually run on time.	3/10/2015 3:57 PM
376	more direct service to my employer (SCH)	3/10/2015 3:36 PM
377	I wouldn't be able to get to downtown as quickly and efficiently; further walk to shopping district.	3/10/2015 2:58 PM
378	As I don't have a car, I would still rely on transit the same as I do now.	3/10/2015 2:35 PM
379	This proposal basically takes what is a very friendly bus neighborhood, removes 1/2 the buses (the 12 and the 43) and doesn't replace them with anything. Please come up with something else. The ULink is not a replacement because we don't live anywhere near either the U District or Cap Hill stations.	3/10/2015 2:04 PM
380	I only occasionally go to Capitol Hill and Madison Park, so these improvements will not substantially affect my transit usage.	3/10/2015 1:26 PM
381	I use the 11 and 12 the most. I might as well drive without them.	3/10/2015 12:52 PM
382	I live 1.3 miles from where I work, so I haven't been using the buses as often as I did when I worked 3 miles from home. I tend to walk to work and only use the bus for random things that occur usually on the weekend.	3/10/2015 11:55 AM
383	I frequently commute from MLK/Madison intersection to Capitol Hill & SLU. More frequent bus times would be beneficial for me personally, and others since very often the #8 is packed to the gills with standing passengers. More frequent service would alleviate that pressure.	3/10/2015 11:52 AM
384	I live in the Miller Park neighborhood and work downtown. I can bike or walk pretty easily to work, but the direct service provided by the 12 is roughly competitive with those other modes. Using the 10 or 8 would require more walking and a transfer to get to my job location, approximately doubling my trip time.	3/10/2015 11:25 AM
385	The route 12 is a lifeline and I pick it up at its origin. Eliminating it and forcing me up to Route 10 on 15th Ave E would often be a dealbreaker and I would need to drive instead.	3/10/2015 10:54 AM
386	Route 25 is essential to our commute	3/10/2015 9:59 AM
387	I currently walk up a steep hill a quarter mile to Route 49 from Portage Bay to Downtown. With the new route, I would have to transfer at the light rail station. With transfer and wait time and additional walking, this makes the route even less convenient. Theoretically, Route 25 is the best current route, just a few blocks away but the low frequency makes it not an option.	3/10/2015 9:15 AM
388	Key connections b/w Montlake and Cap Hill and Montlake and U-District :(3/10/2015 8:57 AM

389	I typically only go that route for doctor appointments on First Hill a few times a year.	3/10/2015 8:20 AM
390	I ride the 12 from 14th/E Madison to 5th/Madison as my regular commute. Door to door is about 1.2 miles and it takes about 20 minutes, costing \$99/month. With Madison losing service under Alt 1, I'd have to use the 2 which is already crowded, stops further from my apartment, and has a slower route. My commute would probably become 30-35 minutes, worse if I had to let a full bus pass me by at 12th/E Madison which I've seen happen.	3/10/2015 6:03 AM
391	I use transit mostly to get to the airport from Madison Park, so the new bus 8 route seems like it would work well.	3/9/2015 10:29 PM
392	Due to the loss of direct service from Madison Park to downtown. As I wrote previously, this alternative essentially tells me to get back in my car.	3/9/2015 9:58 PM
393	While it doesn't really matter to me which Alternative is implemented, I worry about the deletion and consolidation of routes and how it will affect other people.	3/9/2015 8:53 PM
394	No service to Madison Park.	3/9/2015 8:19 PM
395	Now it's very convenient to get to Group Health, the Capitol Hill Safeway and other business in that neighborhood. I might be inclined to drive more to Group Health, since they have an inexpensive parking garage.	3/9/2015 6:15 PM
396	Better service to areas of interest and frequent travel. Less dependence on rideshare	3/9/2015 5:59 PM
397	Increased frequency would allow me to less frequently take a taxi.	3/9/2015 5:41 PM
398	I still need to get around.	3/9/2015 5:36 PM
399	Because cutting route 11 removes my ability to get downtown, i'd have to walk up a big hill.	3/9/2015 5:26 PM
400	I would have to walk further to access transit; I would have to make transfers. I also worry that concentrating ridership in fewer places may mean higher congestion. When traveling at night, I'd be concerned about having to walk further distances (as a woman, it's a safety concern)	3/9/2015 4:40 PM
401	Still need to get around	3/9/2015 4:37 PM
402	I would lose the bus that services my neighborhood.	3/9/2015 4:28 PM
403	I live very close to the Capitol Hill Light Rail station and the UW station is convenient to my commute, but I also enjoy the walk over the top of the hill that I would need to take if I want to get to 19th.	3/9/2015 4:08 PM
404	See above. The need to transfer buses is a major disincentive, especially when the buses are going in the same general direction within the city.	3/9/2015 3:54 PM
405	Obviously more time consuming since we live in Madison Park.	3/9/2015 3:30 PM
406	To make a simple 20 minute trip downtown I would have to make a connection instead of a choice of 43 or 12, both of which would be eliminated.Waiting 10 minutes for a bus and then 10 minutes for a train takes longer than the trip does now.	3/9/2015 3:22 PM
407	I would probably take the light rail to Westlake instead of transferring to a bus at the Capital Hill station to get to the Pike/Pine and Minor area.	3/9/2015 3:18 PM
408	Your concepts are not clear as to how Madison Park will be effected.	3/9/2015 3:09 PM
409	I'm getting older (currently 73), and finding it harder to walk long distances to and from bus stops.	3/9/2015 2:54 PM
410	I would have to see what was the easiest way to get across town would be first.	3/9/2015 2:53 PM
411	I LOVE the current No. 8 which takes me from Olive and MLK Way directly to Group Health and to South Lake Union and to Seattle Center and to northern Denny Regrade. It is an extremely useful route that my husband and I take all the time. Under Alternative 1, we'd have all this taken away from us. The only way we could have these connections is to transfer from the 38 to the 8. BOO!	3/9/2015 2:44 PM
412	More frequent service.	3/9/2015 2:35 PM
413	I don't think any of the changes affect my daily commute from Swedish Cherry Hill down to the stadium district	3/9/2015 2:29 PM
414	I use transit service only because of the convenience of the bus routes to and fromMadison Valley. If this were to be removed I would stop using transit altogether!	3/9/2015 2:16 PM
415	i already use transit for all my transportation, but it would be more hassle free.	3/9/2015 2:16 PM

416	It would be less convenient and a waste of time to transfer buses. I already walk 3/4 mile and spend 45 minutes traveling the 4.5 miles from home to work on the #8 bus. Longer wait times while transferring buses, plus more walking and higher fares does not make sense. I can drive my electric car to work in 12 minutes and it costs me pennies in electricity. Why should I continue to ride the bus when it is less convenient and costs more?	3/9/2015 1:31 PM
417	Currently, getting from Central district area to north Capitol Hill requires a transfer. It's quicker to walk.	3/9/2015 1:25 PM
418	Less frequency along 24th ave e means I'm just going to drive rather than wait.	3/9/2015 1:17 PM
419	Loss of route 11	3/9/2015 12:48 PM
420	It makes no sense to me to have to add 25-40 additional minutes to my commute to compensate for traveling to a bus stop and waiting for a transfer.	3/9/2015 12:36 PM
421	The new light rail station doesn't help me get to downtown faster (with the extra walking added in), and doesn't help me get between East Cap Hill & Maple Leaf at all.	3/9/2015 11:52 AM
422	I don't drive	3/9/2015 11:47 AM
423	I do not own a car and transit is my only option.	3/9/2015 11:21 AM
424	I don't own a car so I don't have much choice.	3/9/2015 10:49 AM
425	Better options and better frequency.	3/9/2015 9:58 AM
426	I could get a connection from downtown to capitol hill/first hill	3/9/2015 9:30 AM
427	Not sure how it effects me.	3/9/2015 9:13 AM
428	Busses are packed getting up and down Madison street - usually standing room only. I used to ride Metro before the direct route 264 was cancelled. It is difficult to make transfers - I wish there was a direct route from the east - side like before.	3/9/2015 9:07 AM
429	I will need to know the exact routes that will be available to make my choice.	3/9/2015 8:25 AM
430	One of my main transit uses other than work is getting to the Madison Valley from West Seattle on weekends. If the 11 is reduced in frequency or eliminated I will just forgo transit all together. It already runs infrequently on Sundays.	3/9/2015 7:44 AM
431	More frequency, more connections, and more destinations.	3/9/2015 6:38 AM
432	proably makes my commute even more complicated and i do not want to walk any further than i alreday do from 5th and seneca every morning to swedish first hill	3/9/2015 5:47 AM
433	no direct route between Madison Park and downtown.	3/8/2015 9:24 PM
434	More frequent options are better. I don't mind walking a few more blocks to have them.	3/8/2015 8:34 PM
435	If I can get to the link station in capital hill in a quicker/predictable way then my outgoing options improve.	3/8/2015 4:32 PM
436	It seems like my main bus lines would be really impacted. I live in Madison Valley and I rely on buses to get just about everywhere (including work in Bellevue and school at Seattle U). The hills in Madison Valley are killer and it's already a struggle just to get to John/23rd or Madison/25th (for the 43/48 and 11 buses, respectively). If I had to walk further that would diminish my interest in taking the bus. I also like being able to reach downtown from Madison Valley with one bus (43 or 11).	3/8/2015 3:51 PM
437	Because it would be too frustrating waiting on multiple transfers to get to the places I've been using one bus for years!!	3/8/2015 3:04 PM
438	Many more connections required to get from Madison Valley to the downtown financial center and shopping center.	3/8/2015 12:38 PM
439	Alternative 1 would really mess up my commute to work. I currently ride the #11 from Madison Valley to 3rd & Pine. It already takes so long; with a transfer, I'm afraid it would take even longer.	3/8/2015 10:34 AM
440	Recently retired and developing new patterns.	3/8/2015 10:11 AM
441	Currently, I use the 49 and 43 a lot. I would rather have the 49 available a lot more than switch back and forth. However, the 43 gets service to Group Health which I think is a really really important connection - especially for people who might not be as mobile, so I hate to lose it.	3/8/2015 9:15 AM
442	I have no other choice.	3/8/2015 3:33 AM

443	Increased frequency would make it more reliable and less need for car.	3/8/2015 12:05 AM
444	I would use these routes if I could get there from Newcastle.	3/7/2015 11:30 PM
445	More frequency of connections after embarking from/to Capitol Hill Transit Station.	3/7/2015 7:58 PM
446	The main things I care about are conveniently getting to downtown, the U Dist, Int'l Dist./Pioneer Square and First Hill from N. Capitol Hill without having to walk too far, wait too long or transfer to another bus.	3/7/2015 6:53 PM
447	Because I don't drive so I have no choice (other than walking).	3/7/2015 5:38 PM
448	Some of the changes are good ie 8 & 11 combination, but some of them are concerning. Capitol Hill residents are not just going downtown or to UW, so its important to realize they may be traveling to other parts of city using current lines.	3/7/2015 5:08 PM
449	It already takes me double to time to bus than it does to drive. Increasing time and inconvenience will mean I'll be driving.	3/7/2015 4:02 PM
450	Too complicated to switch buses, especially in winter	3/7/2015 3:01 PM
451	Service is simplified making it easier to ride	3/7/2015 2:16 PM
452	It would be harder to reach a bus.	3/7/2015 1:45 PM
453	I use the 48 a lot, so more frequent service would mean I might use it more. But the 8 no longer looks like a good way to get to/from the Seattle Center and Columbia City.	3/7/2015 11:59 AM
454	Because the #12 is my main route, used twice daily. Without that I would need to move to an area with transit in walking distance, or stop working and ride only occasionally. I am not yet ready to want to retire! but can't climb that hill to 15th daily.	3/7/2015 11:52 AM
455	I live on the top of Capitol Hill (16th Ave). Taking transit would now +/- require going to Broadway or 23rd. I'd do it sometimes but quick convenient easy spontaneous access would be more difficult	3/7/2015 11:04 AM
456	I use transit - the route 8 specifically - to get to school (5 days a week), and I would still be able to use it this way, though that route would be called the 38.	3/7/2015 10:47 AM
457	I live on Capitol Hill and make most of my local trips on foot. Alt. 1 would improve the mid-length trips I'm already making, but I probably wouldn't make any more.	3/7/2015 10:46 AM
458	I have never had a drivers license and rely almost solely on the bus to get me where I need to go. It would take longer and more connections for me to get to businesses I frequent several times per week purchasing items I need on an as needed basis. I'd have to haul more on each trip, which is not preferable. When the weather is inclement, it makes it unpleasant to have to walk to alternate bus stops/make transfers when there is nothing broken with the #11 (except the drivers don't seem to have time to use the bathroom, which I know you are working on fixing).	3/7/2015 10:22 AM
459	Fewer buses make it harder to get around.	3/7/2015 10:11 AM
460	Difficulty of access	3/7/2015 9:49 AM
461	Without 43 going from 26 Ave along John St to downtown, my once a month need to catch an MT 111 express bus home to Renton from that area is more complicated. Possibly could take 8 and then walk to connect with 49. Otherwise, my usual weekly travel is not impacted.	3/7/2015 9:46 AM
462	I currently avoid going downtown because the transfers take too long.	3/7/2015 9:39 AM
463	I currently take public transit on my weekends to get around, particularly downtown and currently commute to work by bus 3 - 4 days a week.	3/7/2015 8:53 AM
464	Streamlines service between cap hill and downtown.	3/7/2015 8:49 AM
465	i don't use transit too often (my work depends on my vehicle), but when I do I really appreciate the frequency of and geographic coverage of buses.	3/7/2015 7:55 AM
466	I am transit dependent. I might just travel less if getting to the bus is harder. The light-rail additions are largely inconsequential for me.	3/7/2015 7:54 AM
467	Higher frequencies would be more convenient	3/7/2015 7:52 AM
468	It'll be easier, faster, convenient and more efficient to drive going to and from Capitol Hill from the university area	3/7/2015 3:28 AM

469	I would use it more for everything except getting downtown which will become super-inconvenient for me from N Seattle. I will probably just start taking Uber downtown... Similarly, I would probably start taking an uber from my doctor at 19th at mercer since it'll take me too long to get to work in pioneer square after an appointment.	3/7/2015 1:08 AM
470	I don't own a car so all my trips are via transit.	3/7/2015 12:56 AM
471	mobility is a big question for me. I would NOT like longer distances between stops.	3/7/2015 12:43 AM
472	Travel from my origin to destinations in these areas won't be significantly improved.	3/6/2015 11:43 PM
473	It doesn't directly serve the area I work it or to my medical appointments.	3/6/2015 10:41 PM
474	new connection from Madison/9th to Broadway/Pine	3/6/2015 10:26 PM
475	I don't have a car.	3/6/2015 10:24 PM
476	Without the 43, people along the 24th Ave corridor will have to take three buses/light rail to get downtown (43 to the 8 to the rail).	3/6/2015 10:19 PM
477	no direct service from Central Area(Jackson st) to South Lake Union.	3/6/2015 10:00 PM
478	Frequency increases on Capitol Hill make me think I'd use transit slightly more when in that area of the city.	3/6/2015 9:01 PM
479	I do whatever I can to speed up my commute (I don't drive, just public transportation and walk). I am a data point and you don't know how I'll adjust to the new system because I don't even know what neighborhood I'll be commuting to or from (assuming I can still afford to live on Capitol Hill at all). So your projections as to my behavior have no basis in fact. And multiple that by everybody and you get data based on nothing. Perhaps some more dramatic changes should happen, but not until light rail has been going for much longer on Capitol Hill.	3/6/2015 8:27 PM
480	If transit were more reliable and frequent I'd be more likely to take spur-of-the-moment trips.	3/6/2015 8:20 PM
481	Much better frequency and network design throughout the whole area, and to many neighborhoods that I visit frequently.	3/6/2015 8:16 PM
482	proof is in the pudding....but I suspect a more modest approach would be a wiser beginning.	3/6/2015 8:08 PM
483	I would more easily be able to get to capital hill for food.	3/6/2015 8:05 PM
484	I'm currently rather active in Capitol Hill, often going to downtown or the U-District. This limits both.	3/6/2015 7:57 PM
485	Takes away a bunch of routes I use	3/6/2015 7:45 PM
486	Really really need 24th avenue service, not just to U District - taking away the 43 along 24th would be devastating for me.	3/6/2015 7:44 PM
487	I would take the bus to Capitol Hill more, and not drive as often	3/6/2015 7:44 PM
488	I don't drive, so I'm at the mercy of the bus schedules and routes.	3/6/2015 7:39 PM
489	Better and more frequent connections	3/6/2015 6:54 PM
490	I think it would be about the same overall.	3/6/2015 5:55 PM
491	More frequent service / less wait time.	3/6/2015 5:44 PM
492	Work commute daily twice a day between pike belmont to u district	3/6/2015 5:42 PM
493	Faster, more reliable connections that don't rely on busses not getting stuck in traffic.	3/6/2015 5:35 PM
494	I would not be able to take the bus to where I needed to get without having to transfer and would be more likely to drive.	3/6/2015 5:22 PM
495	I am not sure I understand the changes or know enough about the impacts	3/6/2015 5:20 PM
496	So much faster!	3/6/2015 5:13 PM
497	I live at 23rd & John, so Alternative 1 gives me 3 very frequent routes to choose from. Each of them goes to a different place I'd like to go and connects to either a light rail station or other frequent routes. This proposed network looks great!	3/6/2015 5:02 PM

498	I'm at 15th & Pine and appreciate that the #12 goes straight to downtown. With alternative 1, my particular commute to work on transit would actually get longer. The only reason I'm not taking the bus every day now is that service is so unreliable (so that walking is more reliable). I've had periods of injury where I've had to depend on the #12 bus though, and don't like the idea of it going away while BRT on Madison is just a dream. Also I sometimes need to bus back from the Arboretum and wouldn't be able to do that without the #43.	3/6/2015 4:59 PM
499	I have no choice -- I don't own a car. I wouldn't be happy, though, since this would result in a THREE BUS COMMUTE to and from work. It already takes an hour in the morning and an hour and a half in the evening -- changing Route 8 will make my life a living hell. If the only way to get reliable service on Route 8 is to truncate it, it should still go as far as East Cherry. :(3/6/2015 4:58 PM
500	I am one of the "tail end of the 12" users. This bus actually gets a lot of use (particularly at commute times). Eliminating both the 43 and the 12 leaves a lot of users out in the cold -- a long walk up to 15th for getting the 10, or transferring at or near 23rd/John (which doesn't make sense given the overall short commute distance to downtown).	3/6/2015 4:56 PM
501	Probably the same, although depending on the difficulty of transit on 19th Ave, possibly less.	3/6/2015 4:45 PM
502	I live at 20th and Republican and go downtown. I currently take either the 12 (at 20th and Mercer) or the 43 (at 19th and Thomas), or ride my bike. Under Alternative 1, I would need to either walk all the way to 15th to catch the 10, or take the 8 and transfer to the light rail at the Capitol Hill station. Both of those would almost certainly be more than either of my current direct routes. I already bike most days, but I would likely bike even more and take transit less if my only transit options involved either a long walk or a transfer.	3/6/2015 4:44 PM
503	I am having a hard time understanding how the changes proposed will effect me.	3/6/2015 4:34 PM
504	I travel by bus between home in Wallingford and work at Group Health on Capitol Hill (only 4 miles) due to the price of parking. Alternatives that eliminate the 43/8 will lengthen my commute time due to having to travel farther to a bus stop/Link Station. This also concerns me regarding safety in winter and after dark (that is more than 1/2 of the year).	3/6/2015 4:33 PM
505	Faster, more reliable buses make using transit easier and more likely.	3/6/2015 4:30 PM
506	Route 8 is currently crowded, frequently late. The idea of improved frequency would have me use it more than other methods of transportation.	3/6/2015 4:29 PM
507	more transfers, therefore longer trip time for me	3/6/2015 4:26 PM
508	Added time to walk much longer distances to catch the bus for my morning commute	3/6/2015 4:22 PM
509	Easier access & more frequent service.	3/6/2015 4:10 PM
510	I might travel to Capitol Hill more often	3/6/2015 4:09 PM
511	I have tried to take the light rail from Tukwila several times only to find there is no where to park. Don't make getting to work even harder. I take the 193 now and have to take any earlier bus every day since the recent changes is order to get to work on time. The buses used to be on time and now the are usually late.	3/6/2015 4:06 PM
512	My route is eliminated	3/6/2015 3:58 PM
513	I agree that the light rail is great for the region, but it's actually useless for my commuting patterns. It doesn't go anywhere near Georgetown. The Cap Hill Light Rail station is too far away from me and in the wrong direction to make it practical - 90% of my commuting goes through downtown. The loss of intermediate access buses on Cap Hill -- 43 and 49 and the very much missed 47 actually makes my commute much much worse. I should probably be choosing Alternative 2 with fewer changes that impact me, but I think that in general Alt. 1 is better for the region, with the exception of a sorely missing bus that actually runs through the capitol hill neighborhood to the core of downtown --pike/pine.	3/6/2015 3:56 PM
514	I currently avoid going to Capitol Hill because parking is so bad and transit takes so long. Opening up the Light Rail station will definitely increase my travel to Capitol Hill. My use of transit beyond the station will depend on where I need to go at the time. So long as the main streets/areas of the Hill are covered, I will likely use them a lot.	3/6/2015 3:54 PM
515	As stated above, I cannot walk as far as necessary with the change.	3/6/2015 3:54 PM
516	I could get to where I wish to go in a more direct, time effective, and predictable manner.	3/6/2015 3:49 PM
517	I don't live there	3/6/2015 3:48 PM
518	My needs will not have changed.	3/6/2015 3:45 PM

519	Connections are less intuitive: you'd have to go backward to go forward. For example, from Group Health in Capitol Hill to Redmond, a rider would bus west to Capitol Hill LINK, then on rail northeast to University LINK, then south and east on an express bus, where before, there was a two-seat ride that was more direct.	3/6/2015 3:43 PM
520	Because I do not drive, and this alternative gets me to most places I wish to go in a timely and predictable manner.	3/6/2015 3:42 PM
521	Whenever I travel into the U District, Seattle, First Hill or Fremont I always use transit now. I travel several times a month into Seattle.	3/6/2015 3:29 PM
522	I currently take the bus LESS than I used to because it is IMPOSSIBLE to get from the Central District to South Lake Union in the evenings (the 8 is backed up for miles) and VERY CHALLENGING in the mornings (the 8 is ALWAYS late or a no-show). I can't spend the little time I have gambling on when the bus is coming to get to work so I'm forced to drive in order to make my day more efficient.	3/6/2015 3:22 PM
523	Easier service to and from First hill hospitals where I work and the rest of downtown and even the U district. I could even go farther for lunch (since we don't have many options at HMC).	3/6/2015 3:21 PM
524	Faster, more direct connections with the light rail station, and the higher frequencies mean more predictable bus schedules and more reliable transfers.	3/6/2015 3:20 PM
525	I mainly use the 49 and that route will be preserved.	3/6/2015 3:19 PM
526	44/5/E & D are my most used routes now and in the immediate future.	3/6/2015 3:15 PM
527	I would find a way to make it work.	3/6/2015 3:13 PM
528	The elimination of #12 has significant negative impacts for my daily commute. Service on 19th Ave E is important.	3/6/2015 3:10 PM
529	Depending how reliable the buses are with the new changes, I might make use of transit from Capitol Hill to north Seattle (and vice versa). Otherwise, I already use transit for most of my other routes already, and these plans wouldn't make me stop using those routes.	3/6/2015 3:09 PM
530	Most of my transit use today is my morning commute, which has become walking from 25th Ave and Madison to 19th and Madison in order to catch the 12 at 7:10, getting off at 5th & Madison, then zig-zagging across 5th 3 times (because so many sidewalks are closed) to 5th and James St where I work. This is about a 25 minute commute (7:00 to 7:25). If you remove the 12 and force to me take the 8 & Link then maybe it will be faster, but only if everything runs on time and transfer wait times are minimal. My next best alternatives are walking to work (33 minutes) or taking a pronto bike from 17th and Pine to Seattle City Hall, which cuts my commute down to 25 minutes. If I find that taking the 8 and Link consistently takes more than 30 minutes I'll just walk everyday.	3/6/2015 3:09 PM
531	Most of my travel needs would still be met.	3/6/2015 3:06 PM
532	If the timing is more reliable I will learn to work with it. If I need to walk further it inhibits regular bus use for everyday errands such as shopping.	3/6/2015 3:06 PM
533	I don't have a car and depend on transit completely, so I don't really have a choice to use it less.	3/6/2015 2:57 PM
534	Lots of missing routes. Service every 15 minutes not good enough to make up for forced connections	3/6/2015 2:55 PM
535	When traveling to these areas the commute is more simplified and more dependable by light rail.	3/6/2015 2:54 PM
536	Better South Lake Union to Capitol Hill is a huge advantage.	3/6/2015 2:49 PM
537	More frequent 8 would be a great boon	3/6/2015 2:49 PM
538	No route 12.	3/6/2015 2:49 PM
539	I am a captive audience.	3/6/2015 2:48 PM
540	bus #47 was removed....so I walk up to Summit/Olive way to catch the 43. I have heard that in option 1, bus 43 would be eliminated, It currently takes me 30-45 minutes to go from Capitol Hill to SODO, with a transfer. I can drive in about 10. I prefer to take the bus because we are a 1 car family and I like the greener nature of it, however if I have to walk even farther to catch transit, I could have driven to my location much faster and it becomes pointless	3/6/2015 2:45 PM
541	I feel like this would benefit me in some ways, but the downsides might outweigh the benefits.	3/6/2015 2:44 PM
542	Because you want to reduce and eliminate one of the vital routes in my neighborhood.	3/6/2015 2:43 PM

543	better connections	3/6/2015 2:43 PM
544	I need bus service to travel wherever I go. However, I DO walk to many places, and will continue to do so - especially if service is curtailed or stalls due to clogged streets.	3/6/2015 2:42 PM
545	The only reason I use transit for my weekday commute is that my employer pays for my ORCA card. For everything else, I drive.	3/6/2015 2:41 PM
546	Because service from my residence downtown would remain the same. I would probably use transit more from Central District to University District. I would probably not use transit more for trips to Capitol Hill because I still live far from the closest light rail.	3/6/2015 2:41 PM
547	See previous answer!	3/6/2015 2:40 PM
548	I would consider combining bike and bus for more frequent commutes, especially ones that involve returning (to Bellevue) after classes and cultural events.	3/6/2015 2:40 PM
549	Easier to get from Fremont to Capitol Hill, which is a 45-minute journey now.	3/6/2015 2:37 PM
550	I use transit so I don't have to use my car so often. If the 12 and 43 were cut I would most likely start driving to work in the northern UDist (a 25 minute walk from the husky stadium light rail station), and driving to the grocery store (trader joes) and gym. I would also have to more often pick my babysitter up (she usually takes the 12). Having routes nearby also lends itself to impromptu trips - going downtown to see a movie at Regal or shopping at nordstrom, going to a festival at Seattle Center, etc. I imagine I would be less likely to take those trips if they involved a good deal of walking or driving.	3/6/2015 2:36 PM
551	No routes would go near my home	3/6/2015 2:36 PM
552	Because I rely on transit. I will have to ride no matter what happens. But it would suck to have to walk farther to get to the stations I need.	3/6/2015 2:34 PM
553	Right now, I have a frequent (every 6 minutes) one seat ride on the 43 from my apartment at John & 18th to my office at 45th & the Ave. Getting rid of the 43 means a much longer walk, a 2 seat ride on unreliable bus routes (8 & 48) or a 3 seat ride via Link. With all of those moving parts and extra effort, I might as well drive. It is faster and without the convenience of a one seat ride or a demonstrably faster two seat ride, transit is unattractive. Beyond my daily commute, between the 12 and the 43 I have ample service downtown. Alternative 1 removes all direct downtown service. After seeing what was proposed after Prop 1 passed, I considered giving up my car. If Alternative 1 is chosen, I will almost never take transit again. Having to transfer to get anywhere plus being served by only one unreliable route is a non-starter.	3/6/2015 12:22 PM
554	It would be a wash between many trips that become much more convenient to further-flung destinations which become shorter due to Link, and trips I make now via transit that cease to be competitive with walking, the latter specifically with the reduction along Madison related to the changes to routes 11 and 12.	3/6/2015 11:58 AM
555	Transit is my primary mode, so I would probably use it the same. However, it would be more convenient.	3/6/2015 11:54 AM
556	Having a direct connection between Upper Broadway (where I live) and Madison Street (where my favorite grocery store's are located, and where my wife has doctor appointments) is huge.	3/6/2015 11:02 AM
557	Buses would be more frequent, and combined with Link would make trips on transit much faster, and way faster than driving.	3/6/2015 10:27 AM
558	easier to access Capital Hill from DT	3/6/2015 10:21 AM
559	increased frequency means I don't need to plan out my trip in advance. This gives me the flexibility to go somewhere and not worry about planning my trip home.	3/6/2015 10:10 AM
560	I currently take the 12 or the 10-to-Link to commute from 15th & Harrison to Pioneer Square. The new rail station and the streetcar will both be clearly superior for this commute than what I do now. I am most leery about taking transit outside of my commute because the service is so infrequent and complex. Anything that gets us away from that is a good thing in my book!	3/6/2015 9:34 AM
561	Walking to the UW from my home might take just as long as walking to 23rd or the Capitol Hill station. I will probably bike more.	3/6/2015 9:29 AM
562	Parking is an issue.	3/6/2015 9:04 AM
563	Better connection with the 8 to Madison Park and N Capitol Hill.	3/6/2015 8:50 AM

564	Having no transit on Madison between Broadway and 16th is HUGE! That's A HUGE HILL. Currently there are multiple routes within a block of my house and you want to take out all the stops near me on the 11 and 12?? The 8 is NOT the same as the 11. And unless you're also adding a bus that goes along madison (between Trader Joe's and Broadway) and then swings up broadway towards light rail, that's a HUGE change in my ability to get places. There are lots of seniors and disabled people, and people shopping at Trader Joe's and Central Co-op who would NOT want to walk extra blocks (or roll in wheelchairs, or cart groceries?) especially when it becomes uphill!	3/6/2015 8:42 AM
565	i would probably drive more. unless im totally misunderstanding things, i dont see many bus options from 27th and mercer/madison area to downtown. is the 11 going away? im not going to walk up to 15th to get on a bus.	3/6/2015 8:37 AM
566	Frequent Grid. I can travel to destinations all over Capitol Hill without a schedule.	3/5/2015 11:57 PM
567	Because of improved route , service and frequency.	3/5/2015 6:55 PM

Q19 How would you improve Alternative 1 on Capitol Hill and in the Central Area – keeping in mind that the goal of this network concept is to have a consolidated, frequent network of service?

#	Responses	Date
1	As previously stated, I do not share your goal for service. I find your goal flawed and any concept drawn from it will most likely not meet with my expectations or satisfaction.	4/2/2015 2:26 AM
2	I think your whole premise is wrong. The state of traffic means we want expansion of options not consolidation. Also most concerned about rumors of loss of or less frequency at Montlake freeway station. This is a critical hub and will feed riders to light rail...	4/1/2015 5:33 PM
3	Better connection between 24th and new link station	4/1/2015 4:51 PM
4	Electrify the 8 and 48. Consider shifting the 8 to Mercer St via Fairview or Eastlake to avoid heavy congestion on Denny, especially eastbound in the PM peak. Make the 60 more frequent and truncate the 9 at Jackson St? Take the 47 to CapHill station instead of downtown? Eliminate the jog to 23rd Ave on Route 38?	4/1/2015 2:15 PM
5	Ensure Seattle funds are not redirected to other neighborhoods when this service starts, peak only route 47 and the Madison corridor should still be funded by Seattle voter approved funds, where Capitol Hill always leads the way in approving such measures.	4/1/2015 1:05 PM
6	provide continued service from 24th Ave E.	4/1/2015 9:41 AM
7	?	4/1/2015 9:05 AM
8	I disagree that consolidation should be a primary goal. Ease of use/convenience are more important, I think.	3/31/2015 11:10 PM
9	Keep route 12 and overlap it with Route 49 to provide augmented service on the First Hill section of Madison, but also provide essential access to services, such as Country Doctor, along 19th. Overlap Routes 8 and 38 on John between Broadway and 15th with the 38 going north on Broadway to Aloha to lay over and the 8 turning around at Group Health. Route 8 can then have the service level it needs and the 11 can be geared to the level it might need. Those two routes do not seem well matched. Keep some level of service on Boyer since otherwise it leaves a large gap where people have always had service.	3/31/2015 10:24 PM
10	none.	3/31/2015 9:34 PM
11	My mother-in-law is moving to Madison Park and lack of bus connections will make it more difficult to take advantage of her offer to be a nanny.	3/31/2015 9:24 PM
12	rather than "consolidated" pursue the concept of integrated and frequent; "consolidation" is not applicable to travel on 24th Ave; if the goal is to wean residents from their cars, alternative 1 will encourage use; I am not going to walk 20 minutes in each direction to ride light rail.	3/31/2015 5:59 PM
13	Keep Route 12. Feel distributed service convenient to users is as important as frequent service. If walk times from route stop to final destination is greater with a consolidated network, more frequent service on fewer routes does not help provide efficient transit service to the user. Run Route 11 on Madison from Ferry Terminal to Madison Park/Madison Valley with more frequent service, together with Route 12, to provide better service to First Hill and Downtown. Drop the idea of a very expensive BRT on Madison (\$40 million/mile?!?!?) and just improve frequency and stop upgrades.	3/31/2015 5:22 PM
14	Ensure connections between existing routes is not lost.	3/31/2015 5:03 PM
15	Keep the 43	3/31/2015 4:41 PM
16	No specific thoughts	3/31/2015 4:08 PM
17	Keep route 12 running on Madison. Find some way from North Capitol Hill to downtown.	3/31/2015 4:06 PM
18	Retain routes 12, 25 and 43.	3/31/2015 4:04 PM

19	Do NOT eliminate routes #43 and #25.	3/31/2015 4:02 PM
20	Add back the route 12 service. Consider needs to get downtown .. to PINE or PIKE not just to the Madison part of downtown.	3/31/2015 3:56 PM
21	Eliminate route 9 except for peak hour/peak direction - it is totally 100% duplicative. Use the savings for new connections. Revise the northern end of rt 60 to not duplicate rt 49. One concept that I think could have some merit would be to revise the route to turn off Broadway on Olive or Denny and serve the Summit neighborhood in place of route 47 (route 47 would continue to operate peak only). Demographic data indicates a very strong relationship between work-home destination pairs on first hill and summit respectively and this re-routing could reduce duplication, provide a connection between summit and the Capitol Hill station, and make transit service more cost-effective. As an additional way to reduce duplication between routes 49/60 and the streetcar, revise route 60 to serve Seneca street on First Hill. This would provide additional service to Virginia Mason and could help metro remove route 2 service from the street at a future date.	3/31/2015 3:41 PM
22	Make it easy to reach the light rail station with all bus routes!	3/31/2015 3:37 PM
23	Maintain or increase 545.	3/31/2015 2:53 PM
24	Look for places where the stated concerns of "experts" in specific problem areas can be mitigated; hybridize where it makes sense to do so to keep the service human.	3/31/2015 2:34 PM
25	Keep the #43 and the #11.	3/31/2015 1:57 PM
26	Keep the 12. The lack of service between 19th and 24th north of Aloha and the Harborview Hospital area is an issue. Under Alternate 1 travel times between these areas outweigh the benefit of using the metro. Additionally, travel from this area to central downtown would require a couple of transfers (48 to 8 to light rail) or significant amounts of walking.	3/31/2015 1:06 PM
27	I like the idea of a consolidated, frequent network of service. But, local routes within the neighborhoods need to be preserved/structured for individuals who are not traveling between downtown and the U. Or who would like to use the Light Rail, but do not have easy access to the station (meaning, local routes within neighborhoods that can transport travelers to the Light Rail station).	3/31/2015 12:56 PM
28	Keep route 43!	3/31/2015 12:46 PM
29	Maintain a direct line between the 24th Ave. area (East Capitol Hill/Montlake) and downtown. The loss of that is my biggest concern.	3/31/2015 12:21 PM
30	Retain route 43	3/31/2015 12:09 PM
31	Keep major connections along Madison and 19th so that people who live more towards the top of Capitol Hill have ways to get to the light rail station that doesn't involve a long walk.	3/31/2015 11:57 AM
32	Keep number 43 bus on 24th Ave. E. to Capitol Hill and downtown Seattle	3/31/2015 11:15 AM
33	Keep the 43	3/31/2015 10:30 AM
34	I just don't think you should add transit at the expense of other forms of transit. We need more options overall so that commute times stay the same.	3/31/2015 9:41 AM
35	Keep access from Montlake to U District and downtown.	3/31/2015 9:37 AM
36	Keep the 43 route.	3/31/2015 9:17 AM
37	Keep route 43	3/31/2015 8:49 AM
38	I need to get (without transfer) from Boyer/Newton to the University and downtown. I am worried the 43 or 48 service will change	3/31/2015 8:47 AM
39	Don't eliminate the network that is in place	3/31/2015 7:30 AM
40	leave the network in place that is already there; ADD to that; don't eliminate lines!	3/31/2015 7:21 AM
41	Main current 43 service between U and Capital Hill link stations. Provide additional time points for transfers augmenting 8 service to central hill.	3/31/2015 7:02 AM
42	we need a faster more direct route from downtown to Seattle Children's Hospital. The buses are unreliable in arrival times and picking up a connection is difficult. I find I often opt to walk two miles to make it to work on time bc the first bus downtown is almost always late to the U District. It would be nice to ride one bus straight to Montlake	3/31/2015 12:21 AM

43	Maintain current 12 and 43 routes	3/30/2015 10:08 PM
44	don't take away old routes 25 and 43. 25 is critical for Montlake (with 43 as backup on wkends). Would rather have more routes and direct service to destination w/o transfer, even if must have decreased frequency.	3/30/2015 10:03 PM
45	Increase the 10 along 15th and the 8 along John to significantly more frequency -- if really the 43 and 12 are going away.	3/30/2015 9:51 PM
46	It would make transit from North Capitol Hill MUCH worse. Everyone will just drive.	3/30/2015 9:28 PM
47	Find a way to continue route 12 on 19th Ave, even if it is only weekday service, and/or requires a transfer to get downtown. I support the Alt. 1 concept in general, but eliminating service along 19th would be a negative for this urban neighborhood. (I think it's worthwhile to compare route 12 to route 47, which was eliminated last year and is now being restored. In both cases, it looks like a short walk to alternate service on a flat map, but in the "real world" the topography of the area makes it impractical to assume that most users can or will use the proposed alternative services.)	3/30/2015 9:10 PM
48	I think you still need a bus route that runs from U through Montlake, Capitol Hill and to downtown.	3/30/2015 8:55 PM
49	it would cause more transfers.	3/30/2015 8:28 PM
50	Keep the 43 line.	3/30/2015 8:04 PM
51	Retain routes #8,#12 and #43 as close as possible to what they are.	3/30/2015 6:54 PM
52	Don't implement it.	3/30/2015 6:31 PM
53	Don't use it--frequency is not as importance as access.	3/30/2015 6:15 PM
54	I'd increase service in the Pike-Pine corridor - it's in-between Link stations, so bus ridership will probably not significantly decrease there. I'd guarantee a good and safe transfer experience at the Capitol Hill light rail station. I'd split the Route 8 at Capitol Hill station, to insulate Thomas/John service from Denny Way congestion. This will be the only service for Thomas and John St now; they must not be delayed due to Denny Way.	3/30/2015 5:41 PM
55	Frequency is great, but access to transit is more important. Consolidation is of no use to me when my access is cut. I use the 8 to commute south daily, and I use the 8, 11, 12 and 43 on a regular basis. All of these routes will be cut in ways that negatively affect my ability to use metro. I think it's a bad idea. For me, it's an unacceptable alternative.	3/30/2015 5:22 PM
56	consolidated service negates convenient service in the Cap Hill and CD areas	3/30/2015 4:09 PM
57	Generally, I have concern for any changes from Metro current service, UNLESS THERE IS AN INCREASE/IMPROVEMENT OF SERVICE (additional routes, frequency & buses). ANY PLAN THAT DELETES ROUTE 43 IS UNACCEPTABLE. ANY PLAN THAT REDUCES SERVICE TO ALL NEIGHBORHOODS, INCREASES WALK & WAIT TIME TO/FOR BUSES IS UNACCEPTABLE. Living in the west edge (7th to 8th Ave NE, NE 45th St to NE 47th St) of the U-District, using Light Rail is not really an option I will consider except for novelty from time to time or if going to SeaTac, which I never do. Both Alternatives appear to reduce service to my area of the U-District. I go to the Group Health area of Capital Hill (I call East Capital Hill) 2-4 times a week. Deleting route 43 or its current frequency will be a burden for me. Using route 48 & 8 increases walk time 10 min and wait time 10-15 min (I've tested it the past 2 weeks). It takes me an average of 20 min of additional time from leaving my home to reach my destination in the Group Health area.	3/30/2015 2:40 PM
58	Keep regular transit along the 24th Ave corridor.	3/30/2015 11:18 AM
59	Bus schedules need to be highly synched up to ensure that those who have to transfer to other routes don't have long wait times.	3/30/2015 11:15 AM
60	Maintain service or increase service at Cap Hill as that is a growing area that will need service to the east side.	3/30/2015 11:03 AM
61	Add additional buses to 9X connecting Mt Baker to Broadway. (Weekends)	3/30/2015 10:53 AM
62	More transit options from Capitol Hill to Northwest Seattle (Ballard and Greenwood in particular).	3/30/2015 10:11 AM
63	I would not implement it	3/30/2015 9:59 AM
64	The 8 shouldn't go on Denny or there should be an alternate similar route since traffic on denny is horrible.	3/30/2015 9:43 AM
65	I'm a huge fan of making stations the center of communities, using rail as the city's transit backbone and reducing bus routes that compete with rail, like the 43 or 7 for example. I would expect better geographic coverage for north east Capitol Hill, firmly connecting this area to the Broadway station and the trolley.	3/30/2015 9:22 AM

66	I prefer a reliable mode of transit involving as few transfers as possible, instead of fast multiple connections for long distance travel. It will become more difficult for me to reach Bellevue/Redmond using ST545 on weekends/off peak hours.	3/30/2015 9:19 AM
67	Attempt to schedule better transfer frequencies so that riders taking the 43 today can find a decent alternative to get back home and get to work without feeling like the 43/11/10 was just ripped out. Cap Hill is one of the densest neighborhoods and people move there for the reasons of accessibility. I want the light rail, but not at a tremendous sacrifice of access.	3/30/2015 8:43 AM
68	restore Route 43	3/30/2015 7:19 AM
69	Insure Montlake service to downtown Seattle.	3/30/2015 12:27 AM
70	I would use Alternative 2	3/29/2015 9:27 PM
71	William C has drawn up an alternative: http://seattletransitblog.com/2015/03/15/musings-on-capitol-hill-restructure/ . I'm not 100% convinced it's better but it's worth considering. It would give east Madison better access to central Capitol Hill and west Madison. Put a good transfer station at 23rd & John: bus stops close together, with amenities and safety features. Putting the 49 on Madison seems mediocre: neither great nor horrible.	3/29/2015 9:15 PM
72	Reconsider the Summit gap	3/29/2015 7:41 PM
73	Generally, the route proposals are smart and bold and effective. I'd like to see some creative approach that brought in a stop at 19th & John to serve 19th -- and that could be a bus that goes from the top of the Hill and follows the 43 route to the U District, I guess. Mostly my concern is about the challenge in getting to the light rail station for people whose only routes are being eliminated due to redundancy with the light rail stations.	3/29/2015 5:41 PM
74	Generally, I think the new route ideas are brilliant, but I'd like to see an option that gives a stop at 19th & John, at least (to accommodate folks on 19th), and I've heard pretty loudly that folks in Madison Park and Madison Valley really want a direct link downtown even if it's slower. Otherwise, I'd like to see a bus on 12th, but I suspect that's more likely to come through the multi-modal study.	3/29/2015 5:20 PM
75	Maintain direct connection between Madison Valley and downtown Seattle	3/29/2015 5:13 PM
76	Keep some of the changes to the Madison Valley/Madison Park area - namely, divide the current route 8 into two separate routes with some overlap, but keep route 11 in its current form to continue to provide direct service from Madison Park to downtown Seattle/Westlake Center.	3/29/2015 4:48 PM
77	Maintain service on routes 25 and 43	3/29/2015 11:39 AM
78	Consider a frequent, direct route from downtown Bellevue to the UW light rail station.	3/29/2015 10:23 AM
79	Consolidate all transportation entities...metro, sound transit and the streetcar, which is destined to clog traffic on Broadway. It should be the same as a bus and have more stops if you expect people to use it. Quit trying to put Mikes and buses on the same roads or else make buses, bikes and taxis share the same lane as they efficiently do in Paris.	3/29/2015 1:03 AM
80	Keep #43 and #25 as planned in alternative 2.	3/28/2015 1:34 PM
81	There are too few buses, and therefore low frequency, servicing south and central district Seattle, where it would benefit the greatest number of working class people. If the 43 is being eliminated/reduced, then the frequency of #48 should increase by at least two-fold especially at NIGHT (past 7pm) rather than the 30% max that is indicated (midday). The frequency of the 38 at NIGHT (30 min) does not change from what is currently available with the #8 but should increase by 50% (every 15 min).	3/28/2015 1:13 PM
82	Want to continue to be able to easily access Group Health on Capitol Hill from the UW and Central Area; not sure if there is an easy connection from the Central Area?	3/28/2015 10:46 AM
83	don't know	3/28/2015 10:45 AM
84	I would stuff it in a drawer and start with more modest changes in Alternative 2	3/28/2015 9:57 AM
85	If the light rail is dependable, this might work	3/28/2015 9:56 AM
86	Create a direct connection between Capitol Hill and northwest Seattle.	3/28/2015 9:53 AM
87	Maintaining service on 19th AVE E. For instance, any Route 10 starting service before noon would travel south on 15th inbound, and north on 19th outbound, turning on E Galer to travel south on 15th, etc; and reversing this system for all trips starting after 12pm.	3/28/2015 1:24 AM

88	COMBINE SOME ASPECTS WITH ONES FOUND IN ALTERNATIVE 2	3/27/2015 6:31 PM
89	speed light rail to rapid transit speeds which can never happen with the current network	3/27/2015 6:13 PM
90	Have bus lanes!!!!	3/27/2015 5:32 PM
91	Make no change to 545 service during non-peak hours.	3/27/2015 4:46 PM
92	19th Ave kind of gets lost, suggest considering some form of service in this area. Also, if Madison BRT ever happens, this system needs to be integrated into the plan as well, to the extent possible	3/27/2015 4:13 PM
93	Retain all-day, frequent service up and down Madison Street.	3/27/2015 3:52 PM
94	Maintain route 12 and restore route 47 as we expected when we campaigned for the City ballot issue last fall.	3/27/2015 3:49 PM
95	delete 8 between rainier beach and Mt baker station. Keep it the same between Mt baker station and Denny way at Fairview... then let it travel on Fairview and Mercer, instead of Denny.	3/27/2015 3:37 PM
96	dedicated row	3/27/2015 2:49 PM
97	Do Alt. 2	3/27/2015 2:40 PM
98	more spots for bikes on buses :)	3/27/2015 2:37 PM
99	retain current route 12, retain current route 48 so I don't have to transfer from new 45 to 48	3/27/2015 2:33 PM
100	Keep 43 and 48!	3/27/2015 2:29 PM
101	Definitely keep a bus route between the U District and Capitol Hill, because many people may rely on that bus to transfer in between the distance that the University link station to Capitol Hill would take them.	3/27/2015 1:56 PM
102	The 19th Ave corridor and a direct connection to the U District are vital. The idea of replacing the 43 with the 48 is JOKE. Have you ever tried to catch the 48 during peak transit times? It comes every 10-15 minutes MY ASS. More like every half hour IF YOU'RE LUCKY. The idea of breaking the 48 into two separate routes is smart though because the length of the route probably has something to do with it's constant delays. All my friends call it the "forty-late."	3/27/2015 1:41 PM
103	You have to understand that most people who live in the city don't have cars or use their cars to commute to work. It's very convenient for me to step out of my condo building and the bus stop is a few feet away. However, I don't like the idea of having to walk further to get to my stop.	3/27/2015 1:22 PM
104	The 8 could go to John and then Broadway to Pine to downtown.	3/27/2015 1:22 PM
105	Bring back the 47 bus	3/27/2015 1:20 PM
106	keep the 11 or the 43 at good frequencies so there is a way to get to Madison valley/back side of capital hill on a regular basis.	3/27/2015 1:08 PM
107	Keep Route 11! I understand consolidation, but don't sacrifice accessibility to a large area of professional workers who commute downtown. They might decide to drive.	3/27/2015 11:59 AM
108	I lean towards Alternative 2 since several bus lines may be less direct. If the idea is to connect everything more directly to the light rail, then I am not so confident that I will need that connection more than my connections to the downtown area. I would keep the direct connections serviced by the 10, 11, and 12 lines.	3/27/2015 10:04 AM
109	Improvements on Denny NEED to be part of this plan to help prevent the 8 from bunching and completely nullifying the value of frequent service with connections to Link.	3/27/2015 9:15 AM
110	Keep Routes 8 and 43 as they are today. They are both extremely important bus routes for the neighborhood.	3/27/2015 8:25 AM
111	keep up 25,43,48	3/27/2015 8:10 AM
112	I am not sure how to answer these questions. Metro needs to improve the bus frequency and connections between light rail and buses. In my case I want to get to Children's and with the soon to open light rail stations in UW and U District I could take light rail downtown or to Rainer Ave and get a bus home. But if these buses don't run frequently 7 days a week I end up having to drive to work	3/26/2015 11:42 PM
113	Keep continuity and length of #48 line intact at least until the Roosevelt stop opens on Light Rail.	3/26/2015 10:39 PM
114	n/a	3/26/2015 7:40 PM
115	Make sure there is SOME way to frequently get from Capitol Hill to every major section of the city.	3/26/2015 4:42 PM

116	continue improving connections from other areas of the city	3/26/2015 4:30 PM
117	Keep the 43.	3/26/2015 1:08 PM
118	Retain the 43; for those of us midway between the light rail stations it remains the best connection to downtown. The loss of route 12 also leaves a large hole for those in north Capitol Hill; retain it.	3/26/2015 11:53 AM
119	I think the word "consolidated" is an insolvable problem. If you concentrate service in a few locations, you will hang the rest of us out to dry. It would be less intolerable if you at least keep a direct route to downtown (e.g. the 43).	3/26/2015 9:05 AM
120	More frequent service between 8:00 pm to 10:00 pm.	3/25/2015 9:52 PM
121	Put a link station in between the U District one and the Capitol Hill one	3/25/2015 3:44 PM
122	If you are going to have a network of service, you are going to have to add a little net, like from 19th Ave. neighborhood (especially the north part) to a link station.	3/25/2015 3:38 PM
123	Keep 545 stop at Bellevue and Olive, possibly make more frequent, it's always standing room only, once a week we can't fit all the people on it and they have to wait for the next bus.	3/25/2015 1:01 PM
124	not a good idea for alternative 1 at all. especially for people with no cars, which are the people taking this route in the first place	3/25/2015 10:29 AM
125	I don't know	3/25/2015 8:58 AM
126	You need a light rail stop at 520 and montlake.	3/25/2015 6:21 AM
127	Maintain the 12 on 19th Avenue, as the 12 fills a hole in service around 19th and on Madison. Consider which routes make sense in terms of the numbers that would have to transfer and how to ensure that the paper transfer can be used between the different systems. The plan for the 49 probably makes more sense than some in that southbound passengers are not mostly trying to get to the downtown retail core. Capitol Hill areas and Central College are among other destinations. The 10 and the Link would provide service from downtown to Central. Light rail and the 49 would provide service from Capitol Hill to the University of Washington.	3/24/2015 11:40 PM
128	Can't think of a way to improve it. Sounds great!	3/24/2015 6:03 PM
129	Make sure that the 12 is restored. If 49 is really going to change to serve Madison and Marion downtown make sure that is sustainable and won't be disrupted. Those living around 15th Avenue do not have direct connection to the University and would have to transfer to the 49 or the 48 from the 8, 10 or 38. At least the transfer is between Metro buses. The 48 does give 23rd/24th Avenue access to two link stations.	3/24/2015 5:29 PM
130	The lack of a straight-shot route up Madison all the way to at least 15th Ave is a concern. Retaining both the Madison and Seneca (Route 2) corridors two blocks apart seems wasteful. The 38 takes a somewhat indirect route from Madison Valley to Capitol Hill station. Restore 30-60 minute service on Boyer connecting to UW station.	3/24/2015 4:10 PM
131	Keep the #11 and add more frequent service on that route.	3/24/2015 3:51 PM
132	I would put in place a north south route on 12th Avenue. Perhaps on the north end it could have a connection at the Capitol Hill light rail station. The south end --- I'm not sure, but perhaps the Beacon Hill light rail station.	3/24/2015 3:30 PM
133	Go to Alternative 2	3/24/2015 3:21 PM
134	I really do not want to have to transfer on Broadway and John, going deep into the bowels of the earth with hoards of people just to travel one additional stop to get downtown. I like the #11 route the way it is.	3/23/2015 11:20 AM
135	Even partial restoration of the 12 helps fill a Madison gap, particularly near the busy 12th Ave. corridor in the vicinity of Seattle University, and could help relieve delays on the busy (and particularly wheelchair-user-heavy) hospital segment of First Hill, which could otherwise hurt the northbound 49's schedule reliability.	3/22/2015 3:24 PM

136	In general, I do not support Alternative 1--I think it is better to have more routes closer to where people are, rather than a more consolidated network. With that said, there are two things that most concern me personally. The first is the elimination of route 43 with no increase in the frequency of the 48. I ride these two buses to and from work every weekday. They are already often standing-room only and occasionally so crowded that the drivers don't even stop to let more passengers on. Along the stretch of 23rd where the 43 and 48 are the only north-south routes, the two new light rail stations will be a 20-30 minute walk in either direction and not really feasible for commuters. North-south passengers in this area really won't have any option except to wait for a more crowded, less frequent bus. My second concern is the elimination of some of the direct routes between Capitol Hill and other parts of the city (the 43/44 to Wallingford and Ballard, the 12 to downtown and the ferry terminal, the 43 to downtown and Pike Place, the 8 toward Rainier Valley). It is much more convenient to have a single bus going to other neighborhoods than to have to make connections.	3/22/2015 12:11 PM
137	Better streetlights and other safety features along dropped service routes.	3/22/2015 11:26 AM
138	Keep 8 and 11 separate. Keep the 43.	3/22/2015 9:47 AM
139	Keep the 43!	3/21/2015 7:41 PM
140	Keep schedules the same all day, every day. Peak/weekend changes are extremely confusing for riders.	3/21/2015 12:36 PM
141	Keep the 25 bus route going through Montlake, if anything increase the service.	3/21/2015 11:20 AM
142	I'm extremely concerned about what seems to be a removal of connections and the current ease of access to transit in the Montlake area with alternative 1. As I previously said, there are a lot of college students sharing houses here and that will only increase as time goes on. Many of the families I know also use transit. It'd be an easier to sell transit to the more monied families here too if access and reliability increased along the 24th Ave E corridor. The 43/48 always seem healthily full at the stop I use (McGraw/Calhoun). Please seriously reconsider this!!	3/21/2015 9:33 AM
143	I wouldn't get rid of the 43, or at least would keep some service between 23rd/24th Aves and UW and Cap Hill/downtown. It wouldn't affect me too much if it didn't exist because I don't go to that area often. But when I do need to, I really appreciate having it. But, I don't think UW bus riders overall will be happy losing the 43.	3/20/2015 11:43 PM
144	Run the 10 more frequently, or run the 38 all the way into downtown on Pike/Pine to improve connectivity on Pike/Pine corridor. 15 minute headway is not frequent enough, especially considering the amount of density that is coming to this corridor. Headway from 3rd/Pike to Broadway is now about 6 minutes on average with the combined 10, 11 and 49, and 10 minutes with the 10 and 11. Include more frequency for the 47 to compensate for the loss of the 43. Many people riding the 43 or 47 from the Melrose/Bellevue/Summit corridor would much rather not walk up the hill to Broadway or CHS, and it makes transit travel times uncompetitive with giving up and driving or taking a G-d damn taxi. The 47 would compensate for this. It is a major part of the most dense neighborhood in Seattle and the benefits outweigh the costs.	3/20/2015 8:14 PM
145	Connect bus to light rail!	3/20/2015 6:42 PM
146	Put more buses on central Seattle city routes in general, because all the existing routes are over subscribed as it is, as a direct result of years of neglect and bogus arrogant prioritizing of suburbia and trains. You've abandoned the central city, where we actually use buses.	3/20/2015 5:39 PM
147	Do not touch the 43 or the 11. Any reductions to either of these is not only a non-starter, but a Bridge Too Far. It is untenable, and precisely what I feared would be proposed after seeing the damage done to Sea-tac's transit infrastructure.	3/20/2015 1:34 PM
148	Have more shared bike programs connecting the LINK to streets that have bus service cuts. Somehow make Car-to-Go more available along the same lines.	3/20/2015 1:24 PM
149	More stops on the light rail!	3/20/2015 11:19 AM
150	"Consolidated, frequent network of service" is not "ligtrail is a substitute for bus lines." It should be an additional feature of the public transportation network.	3/20/2015 8:41 AM
151	I understand the need to remove duplication between Link, the 11, 43, and 49 - however, removing downtown connections from all three bus lines makes it a little too difficult to get to the Hill from the downtown core (especially the northern end).	3/20/2015 7:30 AM
152	The routing of the 38 looks inefficient and I'm not sure entirely what constituency is well served by it compared to just having it go the quickest path to the Cap Hill light rail station from MLK. (I suppose down Madison *could* be that... but that doesn't seem likely to me, if that is the case then consider me wrong and ignore this comment.)	3/20/2015 12:41 AM
153	Keep the 8 going through the central district, say at least to Beacon Hill or mt baker	3/19/2015 10:27 PM

154	I'm concerned about how to get home after a concert or other event downtown. After the Link Light station, then would the 43 and 8 be running frequently until midnight?	3/19/2015 10:02 PM
155	I would keep the 43 as it is, since a good connection can be made at the Cap Hill Station in-between it and the streetcar. Also it gives people choices incase there are problems with the Link Light Rail Line. I also worry about loss of trolley coaches on the 12 and not using them on the 11. The 11 should be a Rapid Ride line (as identified in the SDOT plans) and the 8 terminate at capitol hill, while retaining the 38 proposal either as a continuation of the 8 along John/Madison to MLK (sharing with the 43) or as its current 38 proposal.	3/19/2015 8:46 PM
156	Increase 38 frequency	3/19/2015 7:46 PM
157	Offer a new route to make it easy to get from Capitol Hill to Fremont/Ballard. It's a huge hassle to get there now.	3/19/2015 7:27 PM
158	I have no particular suggestions for improvement.	3/19/2015 7:05 PM
159	Cannot improve without changing concept of 'consolidation'.	3/19/2015 6:50 PM
160	I'm not sure what a better routing for the 38 would be, and the problems with the 8 won't be solved without solutions that are well outside the scope of a network revision.	3/19/2015 4:05 PM
161	No idea. Your ideas seem sound:-)	3/19/2015 4:02 PM
162	Don't eliminate the 12. Don't eliminate the 43. Don't force people to transfer from the 49 to the light rail. STOP IT.	3/19/2015 3:58 PM
163	all of the lines that serve the area now cross the Capitol Hill Link station cross near the station at JOHN st. and Broadway, so I think the best idea would be to continue that, and maybe adjust the routes between Capitol Hill and the University district.	3/19/2015 3:24 PM
164	Direct connection from Capital Hill to U-District is critical.	3/19/2015 3:10 PM
165	Increase service on the 8 and leave the route as is. Leave more service on Pike/Pine, which are much more vibrant areas for pedestrians	3/19/2015 2:44 PM
166	Keep the 12 and the 43 as currently designed.	3/19/2015 2:39 PM
167	Work on options to improve the 8's timing on Denny Way.	3/19/2015 2:14 PM
168	If the #8 *really* runs more frequently than it does now, then getting, say, from Montlake to Group Health via the "new, improved #48" to E. John St, then transferring to the #8 to Group Health, should be OK, even on a rainy winter day [or night]. Will the bus stop at 23rd & John [on south side of street,on John] be improved? And how about the bus stop on 23rd, just north of John? --if one imagines lots of folks waiting to transfer, especially at night, then these bus stops must accommodate. Thank you.	3/19/2015 2:04 PM
169	Improved connections from CD to Downtown	3/19/2015 1:17 PM
170	Considering the reliability problems with the 8, I'm hesitant to call adding more service to it a good idea without some serious investments from SDOT to get the buses unstuck on Denny	3/19/2015 11:32 AM
171	Show/highlight how the new above-ground light-rail will help with 24th street corridor and pioneer square travel.	3/19/2015 11:15 AM
172	If I'm understanding correctly, the 43 would no longer service U-District to Cap Hill. If that is the case, this is problematic - particularly for folks coming from Microsoft and going to the Hill.	3/19/2015 10:57 AM
173	No Comment	3/19/2015 10:46 AM
174	As someone living in Montlake, the increase in frequency on the 48 is not convenient enough to make up for the loss of connectivity of the 43, which I use more often. I would want a way to get to Capitol hill and downtown that does not require going up to the U District or down to Central District first.	3/19/2015 10:27 AM
175	Don't cancel any of the above bus routes.	3/19/2015 10:19 AM
176	Don't delete the 43, it's necessary to connect the Hill with downtown and the UWMC.	3/19/2015 9:35 AM
177	I would have buses that run all the time. I would let people in the CD be able to get to North Seattle in less then one hour. Transportation in this city is horrible. I have lived in many cities and this is by the far the worse. Why are there trolley lines???? You can't move those as the city changes! Why is there only one stop between downtown and the U with new line??? Why isn't 15th Street and the CD served better. Look at the development around 23rd and Union and down 23rd. Your talking about limiting people's choices. Horrible idea.	3/19/2015 9:09 AM

178	I would like to see an interactive map to provide best answer. I would use service more if it ran more frequently. I frequently walk to another route when wait times or delays are too long. Service should be on time more frequently.	3/19/2015 5:16 AM
179	I don't think Alternative 1 would make a big difference because there's already the Street Car in the International District that will take people to Capitol Hill. As for the Central Area, there's not a vast amount of people taking routes like the 48 so if there's less frequency in service then it's okay.	3/19/2015 2:12 AM
180	Make the new 38 go downtown instead of turning north on Broadway to Roy. Maintain the 12, at least during peak periods.	3/18/2015 9:33 PM
181	This is a terrible idea. For anyone living in North Capitol Hill more than five minutes walk from the Broadway and John light rail station, this will mean longer commute times to the University District. I make this commute every single day. These buses are full every day, and most travelers from the UW to Capitol Hill get off the 43 more than 5 minutes walk before Broadway and John. Moreover, the walk from the UW light rail station will add an additional five minutes to my journey. I estimate that my daily commute from my house (16th and Republican) on the light rail will be 20 minutes LONGER than it currently is using the #43. This is not public transportation progress. It is a light rail boondoggle. Sincerely Robert Wood Professor, University of Washington PS. The same thing happened with bus route 194 which reliably took passengers from downtown Seattle to the airport in 30 minutes until it was cancelled because of the light rail. The trip now takes 40-45 minutes on light rail. Is this progress? The idea is that new transit systems augment the public transportation system, not replace existing components.	3/18/2015 8:55 PM
182	keep good connections between CD and Capital Hill and Downtown while giving better North End connections.	3/18/2015 8:14 PM
183	N/A	3/18/2015 8:10 PM
184	KEEP the 43 !!!!!!!!!!!!!	3/18/2015 4:31 PM
185	need 43 at john and 15th ave east to get to UW	3/18/2015 4:31 PM
186	At least connect #43 southbound to the Capitol hill transit station.	3/18/2015 3:34 PM
187	I have to admit that I find this survey somewhat confusing. I don't exactly understand what is meant by the phrase "concept for...." I did look at the alternative 1 all-day routes but really only looked at routes 43 and 49. As long as the 49 runs from Aloha to the U District every fifteen minutes, I'm good. Loss of 43 is puzzling.	3/18/2015 3:24 PM
188	Keep the 25 and the 43 in service.	3/18/2015 2:56 PM
189	Need direct connection from roughly MLK and Union to both Montlake (for eastside connections), and also, MLK and Union to CapHill Station (for north seattle / south seattle / SeaTac connections).	3/18/2015 2:50 PM
190	Maintain integrity to east side or wait until east link is established to enact bus changes.	3/18/2015 2:46 PM
191	Nothing short of retaining the 12 would make this acceptable. Note also that there would be no downtown service south of Pike/Pine while the 12 serves Madison/Marion, much closer to government buildings, courts, Safeco/Qwest, etc	3/18/2015 2:44 PM
192	I don't have any solutions. I just think you need to consider access to 15th, 19th, and 24th avenues, especially for those who are elderly or have disabilities. I would imagine that this would be of particular concern for those living along those corridors on Capitol Hill trying to get to the UW Medical Center.	3/18/2015 2:25 PM
193	Bring back the 47, and continue it through downtown, down first Ave. Maybe even North to Belltown.	3/18/2015 1:54 PM
194	Anything that can get Eastside commuters from bridges into mass transit to mitigate the chaos on I-5 and I-405 between the bridges, would make life for thousands (if not 100s of thousands) easier. I drive to Bellevue to commute via 271 from Bellevue to UWMC. In the evening, the driving aspect of my commute between Bellevue and Issaquah is a no-win situation. If Westbound I-90 (Bellevue to Seattle) is backed up, which happens ALL the time, Bellevue Way backs up and I can't go Eastbound I-90. Obviously Eastbound I-90 backups affect me too but are less frequent. I cannot drive via I-405 as it is a parking lot both ways at all times. Please help us bridge-dependent commuters get out of our cars! Additionally, we do not have enough parking in South Bellevue P&R or Bellevue in general. Eastgate P&R access is problematic - so problematic that I bike there if I use that P&R. We need more direct frequent, faster service from Eastgate/Issaquah to UWMC - I'm okay making a connection at i-90 or 520 but there are limited options. Think 556 route, with less stops, more frequent, if possible. Even 271 with less stops would be better. I don't mind walking or biking. When will light rail help with bridge traffic and in-between bridge traffic?	3/18/2015 1:45 PM
195	Keep the 43 route.	3/18/2015 1:42 PM

196	Anything that can get Eastside commuters from bridges into mass transit to mitigate the chaos on I-5 and I-405 between the bridges, would make life for thousands (if not 100s of thousands) easier. I commute via 271 from Bellevue to UWMC and the driving aspect of my commute between Bellevue and Issaquah is a no-win situation. If Westbound I-90 (Bellevue to Seattle) is backed up, which happens ALL the time, Bellevue Way backs up and I can't go Eastbound I-90. Obviously Eastbound I-90 backups affect me too but are less frequent. I-405 is a parking lot both ways at all times. Please help us bridge-dependent commuters get out of our cars!	3/18/2015 1:31 PM
197	Not sure I can say. It looks ok and I am a little skeptical about the lack of East West routes.	3/18/2015 12:48 PM
198	why can't there be a win/win situation.	3/18/2015 12:46 PM
199	Keep the bus rates the same, raise taxes on corporations.	3/18/2015 12:33 PM
200	More buses along Pike/Pine corridor which is a major tourist hub for bookstores, restaurants, and retail. Extends tourist dollars to the Hill and not just centered around downtown shopping and the Market.	3/18/2015 12:25 PM
201	Keep route 43, getting rid of this would be one of the stupid things metro could do	3/18/2015 12:19 PM
202	I can accept losing the 12 maybe, but the 43 is a vital, well-used connection. Scrapping it is a terrible, terrible idea. Really bad.	3/18/2015 12:06 PM
203	see above	3/18/2015 11:54 AM
204	Perhaps the extra Seattle money can fill in the gaps geographically (i.e. keep 25/43 at current service levels).	3/18/2015 11:51 AM
205	One of my biggest concerns with Alternative 1 is that service from North Capitol Hill to the Pike/Pine corridor, adjacent to downtown, will be disrupted. I am excited about the light rail, but want to be able to avoid transfers for areas that are just beyond a one mile walking distance.	3/18/2015 11:51 AM
206	There's no improving this idea other than keeping those routes. You are assuming that people want to go from Capitol Hill to some other neighborhood--that isn't how most people use the bus here. They ride 1-2 stops and get off. Personally I don't mind walking one or two stops at a safe time--but as I mentioned, there is a lot of Section 8 housing up here and a large number of seniors who can barely manage the bus as it is; what are you going to do for them?	3/18/2015 11:49 AM
207	Improve the Route 48 equipment	3/18/2015 11:44 AM
208	Most of the changes would have a positive impact on my use of transit, especially with the addition of the First Hill Street Car which will close the gap (geographic and time between buses) between Broadway & Yesler, where the 60 drops me, and 14th & Yesler, which is where I need to pick up my daughter on Saturdays. So I don't really have any suggestions to improve it.	3/18/2015 11:41 AM
209	I don't think there's much that can improve it. I would rather it not be implemented at all.	3/18/2015 11:31 AM
210	Keep route 12 and route 43.	3/18/2015 11:29 AM
211	Keep am/pm rush hour service on the 12 all the way to Interlaken on 19th Ave E	3/18/2015 11:26 AM
212	Need to get from Jefferson/Cherry corridor to the capitol hill link station with ease or to the street trolley....	3/18/2015 11:16 AM
213	Improve light signals' responsiveness to pedestrians wanting to cross the street during off peak hours. / Prioritize pedestrian traffic over vehicle traffic when there are fewer vehicles & pedestrians present.	3/18/2015 10:09 AM
214	Re-route the 8 off of denny. There are a lot of holes. Seems like you need to fill in some routes in cap hill.	3/18/2015 9:59 AM
215	I like the concept of route 38 continuing west down Pine Street to downtown, rather than turning north up Broadway to Aloha. Continuing west down Pine Street would help maintain frequent service along Pine Street, addressing one of my concerns.	3/18/2015 4:14 AM
216	na	3/18/2015 1:21 AM
217	Move the goalpost. Taking away service from Pike/Pine and telling residents they need to walk 1/2 mile uphill is ludicrous.	3/18/2015 12:20 AM
218	Maintain a direct route from Madison Park to downtown via Pike/Pine (EXACTLY what the 11 provides currently)	3/17/2015 11:50 PM
219	Keep service along Pike/Pine the same especially during the evening hours (even though it serves less people, I'm more inclined to ride the bus during the day if I know that I'll have an easy commute home)	3/17/2015 9:54 PM

220	It's all in the timing -- if the Link leaves frequently (say, every 5 minutes), then transferring is feasible. If it leaves every 15 minutes, then I wait up to 15 minutes for the bus, ride for 5 minutes to the Link station, wait 15 minutes for the train, and ride for 5 minutes downtown. Total time: 40 minutes. Total time for me to walk downtown: 35 minutes. Why would I take transit? If the Link leaves every 5 minutes, then the total trip downtown would take 30 minutes, making it a more attractive option.	3/17/2015 7:33 PM
221	Direct transit from Seattle U to UW	3/17/2015 6:58 PM
222	Same as before.	3/17/2015 5:33 PM
223	keep and improve 43	3/17/2015 2:48 PM
224	Keep concept of Route 12	3/17/2015 2:38 PM
225	Don't reduce 545 service on weekdays. Take into account crazy Microsoft working hours!	3/17/2015 2:16 PM
226	Metro service on Capitol Hill and the Central Area should serve local residents first. We don't fund Metro just so they can turn around and give our service hours to make Sound Transit's trains look better.	3/17/2015 1:08 PM
227	Restructure route 8 to operate on Mercer St in SLU. Keep the same routing between Broadway and Mt Baker Station, except use 23rd ave and Rainier Ave between Jackson and Mt Baker Station since route 4 is already serving MLK. Extend route 4 a few blocks south to Mt Baker Station and then east on to Hanford st. This way 14 will not have to make a time consuming loop where not many people get on or off. Absolutely no need for route 8 or 38 to travel south of Mt Baker Station... There are no jobs or services beyond that point. And residents over there will find no use to travel to another residential area, which most of the Central Area is. Not liking 38, unless it connects riders to SLU and the Lower Queen Anne, instead of empty lots of Rainier Valley south of Mt Baker Station. I am not understanding the need for a route from 98122 to have a frequent service to another residential area like 98118 and along MLK duplicating the light rail. There is no employment in Rainier Valley that pays enough wages to afford rents in the 98122 or even in 98144 zip codes... Keep 43(or whatever number you want to give it) between Downtown and 15th ave e, then on to a loop clockwise: 15th ave E > E Galer st > 19th ave E >Madison > 15th ave. You will need to install wires for a few blocks one way on Galer st, but it will pay off ;)	3/17/2015 12:51 PM
228	Add more east-west routes, and add more frequency to existing east-west routes. Especially for route 8, increase frequency to 5 minutes.	3/17/2015 12:00 PM
229	More service in the Pike/Pine corridor	3/17/2015 11:35 AM
230	I appreciate the effort to increase frequency and improve transit times, but I think you misunderstand some of my priorities for commuting. I don't necessarily need more frequent service, or even faster service; I just need a single seat ride that I can plan on, board, and arrive at work. I live in north capitol hill and work in the udistrict -- this plan creates longer walks in the rain (I don't mind them in the sun) or more disruptive connections and transfers (e.g., 8->48 or 8/9->Link).	3/17/2015 10:17 AM
231	I would put route 43 back. I ride the 43 regularly.	3/17/2015 10:14 AM
232	Implement BRT from Downtown along Madison all the way to MLK.	3/17/2015 9:57 AM
233	Use alternative 2	3/17/2015 9:26 AM
234	I don't remember what this alternative is. Fire whoever designed this.	3/17/2015 8:19 AM
235	By not eliminating what's already available on the street surface, and maintaining bus services throughout the day even when colleges are closed.	3/17/2015 7:19 AM
236	just make sure the Madison Street Bus Rapid Transit project get done and begin operating ASAP many people from Deaf and Deaf-Blind Communities in Seattle/King County really need to have better transit connection between Downtown Seattle and HSDC on E Madison Street at 19th Ave E I recommend to revise bus route 38 that should end up the Downtown Seattle via either Madison Street (like replacing the new Bus Rapid Ride) or Pine Street instead of Capitol Hills on Broadway I recommend to revise or delete bus route 49 and revise bus route 10 due to many riders in North Capitol Hills and University District will be using streetcar and/or light rail more often in next 5-6 years	3/17/2015 12:25 AM
237	Keep the 545 running as normal even during off peak hours.	3/17/2015 12:10 AM
238	keeping early morning service (5am) to montlake/520 interchange. if 43 is deleted it don't appear the 48 would come early enough to make my current transfer as i do with the 43.	3/16/2015 5:17 PM
239	Keep the 43. It's an _incredibly_ useful route.	3/16/2015 4:39 PM
240	Keep route 11	3/16/2015 3:45 PM

241	Run the 38 downtown on the existing 10/11/49 path. This will help quell 12 riders worried about losing their direct connection. Probably not all trips on the new 8 need to go to the end of the run, so consider turning back some early to save money for use elsewhere. Also Denny simply must improve to make the 8 transfers reliable. STB has a post with suggestions here: http://seattletransitblog.com/2011/12/06/the-denny-dilemma/	3/16/2015 3:43 PM
242	Madison Park has a beach and cute small business area- it is a fun place to visit. So far it has been easy to get there from capitol hill and spend a sunny day. Although I must say that the people who live there drive and mostly do not use the bus, are clearly not going to give up their cars, and do not deserve transit service. Nothing you do is going to get them out of their cars. So if there is less service there that is OK, but it still is a nice place to visit and it would be great if the bus still went there.	3/16/2015 2:41 PM
243	Have the 542 pickup/drop off at the stadium into a covered lot with a clear path/queuing system avoid a melee during rush hour.	3/16/2015 2:08 PM
244	Retain downtown service along Madison/Pine.	3/16/2015 1:17 PM
245	I think the increased frequency and ability to make reasonable transfers is an important step forward for effective bus transit. The devil is in the details though, and my experiences on East West routes in Seattle has been extremely challenging. The routing that seems to be most effective to get cross I-5 is the Pike Pine corridor served by the 10,11,12,43 & 49. Other options, including the 2,3,4, and 8 are horrendous to ride as they are constantly stuck in traffic and blocked intersections. If the increased frequency is truly going to work on these lines as viable transfers, there are very needed improvements to bus rights of way and signal timing. Otherwise, alternative 1 leaves people waiting for connections that may or may not arrive.	3/16/2015 12:52 PM
246	Don't decrease service on the Pike/Pine corridor	3/16/2015 12:45 PM
247	Rt 8 is increasingly becoming a really important connection between Capitol Hill and SLU, Seattle Center, LQA. Given its growing ridership it is really important that it receives some kind of peak reliability improvements. Whether that be a re-routing on a street less congested than Denny, or whether that means removing stops to avoid some of the most gridlocked section, something needs to be done about it.	3/16/2015 12:38 PM
248	Maintain the 43.	3/16/2015 12:35 PM
249	Keep a bus that goes from 24th Ave E to downtown and the Capitol Hill link station.	3/16/2015 12:32 PM
250	I am so sorry but the proposed changes are very confusing and I am not sure how this will impact me so I don't have enough understanding to provide feedback	3/16/2015 12:30 PM
251	stop running 2 and 3 through downtown. They need to loop and come back up the hill. I can't use them as frequently as I would like because they are reliable.	3/16/2015 12:22 PM
252	Increase service on 545, reduce 542. Once you're downtown, you don't have to walk BEFORE waiting for your Link. This is important, because walk time is wasted time when you're about to connect to another bus. Instead, you get off near Westlake, hop on the Link, go to University. If you're commuting south, you're not affected.	3/16/2015 12:21 PM
253	Keep some portions of Rte 43.	3/16/2015 12:21 PM
254	Keep the Madison 12 Route. All of the residential units in the Hilltop area (15th, 19th, etc.) use that route to get downtown and to pioneer square. Extremely annoying to have to walk 6 blocks to catch the same bus at Broadway.	3/16/2015 12:16 PM
255	Keep the 11 going into downtown and the 545 stop at Bellevue and Olive	3/16/2015 12:12 PM
256	Preserve Rt 43.	3/16/2015 12:05 PM
257	Just one stop on 19th somewhere? Realistically I already walk to the 8 or the 18 anyway if I'm going to use a bus though. The 43 is the bus I use most frequently, but the walking won't kill me, I think.	3/16/2015 12:01 PM
258	Maintain a way to get from top of capitol hill to redmond without needing 3 changes	3/16/2015 12:01 PM
259	Increase peak hour 545 service between Seattle and OTC.	3/16/2015 11:55 AM
260	Change 545 times to 7am-11pm during the week.	3/16/2015 11:50 AM
261	Don't get rid of the Montlake freeway station so you don't have to come up with these tortured transfer scenarios in alternative 1 or 2. You should instead be touting how you will have direct bus service to downtown with an easy stop at Montlake, and when 520 has light rail in the future, that will be done via light rail.	3/16/2015 11:47 AM
262	Keep montlake.	3/16/2015 11:47 AM
263	Keep building out the light rail over time... Eventually decreasing our dependence on the bus system.	3/16/2015 11:39 AM

264	Since Denny Way/Olive/John is such a nightmare now, have the 8 terminate at the light rail station and take people down to SLU and LQA. Then, have a bus that mimics the 43 from the light rail station to serve Montlake, possibly turning down 19th and then Aloha so it doesn't duplicate everything that the 48 does. (Heck, it would also be great if we could have a transit only lane on Denny/Olive/John - then maybe more people would use the bus. The problem is that Denny is key for drivers to the highway, so reducing Denny/Olive/John to one lane for cars could be deadly.)	3/16/2015 10:57 AM
265	Scrap most all of it. Include more than Madison Valley residents in discussion - extend south from CD and use communication methods that work with our neighborhoods.	3/16/2015 10:49 AM
266	leaving the 43 route as it is and leaving all the buses going to the eastside the way they are. having to ride across the bridge and get on a bus heading west seems like a ridiculous route home for me.	3/16/2015 10:46 AM
267	My main use of transit starts on 19th E. Density in the 19th E area is increasing rapidly. With the steepness of Capitol Hill ALL along 19th, walking to 15th or 23d/24th is not viable for many people, including those with young children and physical limitations. IMO, people will walk farther to get directly on light rail; people will transfer from bus to rail for speed; but in our hilly city, a 4 to 5 block steep walk uphill (often in bad weather) will prevent people from using an otherwise very useful bus. This is why we have historically had service on Broadway, 15th, 19th and 23rd, in times of much lower density. It reflects the reality of the topography. Also, population is increasing along all these corridors and it will continue to grow with zoning changes. New construction does not have to have parking. NOW is the time to get people out of their cars in this neighborhood (including the working wealthy who may think they have an alternative), not encourage them back into their cars. This area of the city is rapidly changing and it is not appropriate to take drastic and permanent action based on untested assumptions. A more gradual approach is warranted, as we can continue to fine tune with changes large and small in the future. We want to create permanent and life long changes to how our people get around this part of the city; slamming the door on routes people have used for decades (30 years for me) is not going to get us where we need to go. It is tactic likely to fail.	3/16/2015 10:03 AM
268	I think you should run one bus route each alone: Yesler, Cherry, Union, Madison, Olive continuing as John and then Thomas, and put a streetcar on Denny from Western until it intersects with Olive/John. The routes would just go up and down, all day, every 10-15 minutes, following a more-or-less straight line. (Okay, slightly curved). But just up and back. No milk run service. But all routes should go all the way to Lake Washington Blvd, which would have a route along it, and you would also have buses running along 34th, MLK Way, 23rd, 19th, 15th and 12th, intersecting the east-west routes at easy transfer points.	3/16/2015 9:03 AM
269	Expand rideshare programs; streetcar	3/15/2015 8:34 PM
270	Leave Routes 8 and 43 alone! Link them with the light rail and have frequent day and night time service.	3/15/2015 5:20 PM
271	1.) Even more frequency (target 5-minute headways all day, not 10-minute) 2.) Wider stop spacing (what good is frequency if the bus still putters along at 5 mph because it is stopping every 2 blocks?) 3.) Stations with off-vehicle fare payment at the stops that remain. 4.) Rapid Ride branding (as well as frequency, stop spacing, stations etc) on routes 49, 8, 48, 10, 2. 5.) Extend high-frequency service into the late evenings (1:00 a.m.) and on weekends (people's lives don't take place exclusively from 9 to 5). 6.) Invest in hanging the wires necessary to convert all these high-frequency routes to electric trolley buses. Diesel buses are noisy and smelly. No one likes them. This could be a long-term goal if you can't afford it now and should not be seen as a reason to maintain existing routes. Get the routes right now, add the wires later as resources allow. 7.) Consider routing the 49 down Seneca rather than Madison. This would allow it to connect up to the University Street Light Rail station in downtown, and when combined with route 2, provide a very high-frequency connection between light rail and Virginia Mason for both northbound and southbound commuters. VM got the short end of the stick with respect to the routing of the First Hill Streetcar (just ask them). Routing the 49 on Seneca rather than Madison would compensate. Furthermore, this routing would likely be less annoying to people trying to get from north capitol hill to the southwest corner of Pike-Pine, since Seneca is much closer to Pike-Pine than Madison is. Finally, as the "Main Street" of First Hill, Madison also tends to be more congested than Seneca. In truth, you actually don't need ANY transit service on Madison. Seneca and James provides more than enough east-west service for First Hill and consolidating east-west service on these two streets (which both connect to downtown light rail stations) rather than splitting it onto 3 streets furthers the "consolidated, frequent network" concept.	3/15/2015 4:53 PM
272	Provide a unified version of the 11 and 12 that simply travels up and down Madison, all the way from downtown Seattle (e.g. 1st or 2nd Ave) to Madison Park (e.g. 42nd).	3/15/2015 4:34 PM
273	Making sure transfers between bus and bus really work is important. Frequency can take of that for sure, but trying as hard as possible to make the wait time minimal and the physical conditions (bus shelter, rain protection, wind protection) optimal.	3/15/2015 2:18 PM
274	smaller buses, running more frequently. I do not mind transferring between transit options, if the wait is short.	3/15/2015 12:49 PM

275	Assure there is a feeder bus from 23rd to light rail every 10 minutes to assure commute times from 23rd to the UW are the same on the 43 to the UW and from light rail to the UW.	3/15/2015 11:24 AM
276	Keep a direct route along Madison street to downtown	3/15/2015 10:59 AM
277	Dont cut the areas the buses are already going. The link should add to the buses, not take away from them.	3/15/2015 9:59 AM
278	I am not sure.	3/14/2015 8:12 PM
279	we need to have consistent and reliable access to the bus or light rail in order to use them.	3/14/2015 4:01 PM
280	The route 48 link between UW Link Station and Mt. Baker Station (along 23rd) serves a vital link between North Capitol Hill and access to the Light Rail. Currently, I take the 48 to Mt. Baker Transit Center to access the Light Rail (northbound or southbound). Once the Link Light Rail is complete, from Downtown, I envision taking the service all the way to UW then transferring southbound on the 43 or 48 and getting off on North Capitol Hill (Aloha). Alternatively, when I return from the Airport, I plan to get off at the Mt Baker Station, then catch the 48 northbound, as this will take less time, then all the way to UW and then south bound.	3/14/2015 3:55 PM
281	Restore bus servie to Cap Hill	3/14/2015 3:04 PM
282	Use alternative 2	3/14/2015 11:12 AM
283	If that's the goal it cannot be anything other than a disaster. You need greater geographical coverage	3/14/2015 4:57 AM
284	See the blog @: http://seattletransitblog.com/2015/03/10/alternative-1-capitol-hill-and-first-hill/ Most issues are pretty well evaluated with seemingly rational solutions.	3/13/2015 9:18 PM
285	That's your goal, not mine. Mine is getting to and from work and you are proposing to make that worse in every way.	3/13/2015 5:03 PM
286	People have to have service that is close to them, otherwise they won't make the effort. It has to be easy and reliable and I worry that centralizing service will not make it a more attractive alternative for people.	3/13/2015 3:23 PM
287	What is Alternative 1 ?	3/13/2015 2:52 PM
288	I would maintain frequent service on route 43.	3/13/2015 1:01 PM
289	Wi-Fi on buses	3/13/2015 12:38 PM
290	Create a shorter run of the proposed 38 that runs at peak time in order to get people to the link light rail on Broadway.	3/13/2015 11:34 AM
291	Focus on making it easier to connect from Cap Hill neighborhoods to the city's "main line," 24/7 transit. In my case that would be the C/D line.	3/13/2015 9:53 AM
292	Preserve and INCREASE frequency of vital neighborhood links to the Capitol Hill and UW light rail links. Alt 1 will reduce overall service by making it impossible for riders to reach the main stations with reasonable frequency.	3/13/2015 7:34 AM
293	I like Alternative I but please have the 38 continue past Broadway to downtown and have route 10 use John St to replace what the 43 gave to the Summit neighborhood.	3/12/2015 11:14 PM
294	keep service to all communities in a manner that works for seniors and children.	3/12/2015 10:17 PM
295	More frequent bus service is not going to solve any problems. Transferring and walking long distances punishes those who are unable to walk or can't risk making a transfer since it will mean they maybe late for work.	3/12/2015 9:05 PM
296	I want to be able to access light rail, and connect to bus service to Madison Valley	3/12/2015 8:43 PM
297	Improve 12th Avenue Service, current Metro destinations in CD/Cherry Hill are practically useless. I choose to walk or other transit modes 99% of the time.	3/12/2015 7:43 PM
298	Retain Route 11!	3/12/2015 7:16 PM
299	include 12 bus	3/12/2015 4:45 PM
300	Provide some connection between the Montlake/24th Ave E corridor and the Capitol Hill light rail station. The existing 43 is already a high frequency, high ridership route.	3/12/2015 3:35 PM

301	- Eliminate the 38 dogleg at Yesler/23rd/Jackson. Just do it already! - The 38 to CHS via Pine and Broadway is silly. Run the 38 into downtown! Either follow the 2 on Union and loop back via 3rd (connect to University St Link at 3rd/Seneca) with the 49, or continue on Pine St with the 10 (like the current 11 does). The 38 will serve at least two link stations -- Mt Baker (and points south), and either Westlake or University Street. Say it with me now, "turns onto Broadway are bad, mmkay".	3/12/2015 12:45 PM
302	Keep a direct bus connection from East to West that covers the areas between Madison and St. John and goes to downtown.	3/12/2015 10:57 AM
303	As proposed, Madison Valley and Madison Park will have NO direct service to Downtown! The new route 38 should go downtown. There has never been service between Seward Park, Madrona, Leschi, and Madison Park. Why not link them all with a bus that terminates at the University Station? There should be direct service between Madison Park and the University District.	3/11/2015 10:13 PM
304	Keep 43.	3/11/2015 9:58 PM
305	Improve the ability of the 8 to get through traffic on Denny	3/11/2015 7:49 PM
306	I think the 11 needs to stay. Moving people in and out of downtown is more efficient, particularly when it would relieve congestion at the Broadway/John stop for both bus and light rail.	3/11/2015 7:06 PM
307	Consolidation works against the purported meaning of public transit. It makes it more difficult for people to use it, not easier.	3/11/2015 3:39 PM
308	Do what was promised when I voted. I voted my tax dollars to increase frequency on routes, not eliminate them. http://crosscut.com/2014/11/approval-prop-1-will-your-bus-route-see-upgrades/	3/11/2015 1:04 PM
309	19th Ave service should not be cut. Metro needs to understand that the geography prevents easy walking in this neighborhood.	3/11/2015 12:37 PM
310	Overall, I like the griding, re-thinking and frequent service. My only beef is the new unreliability the plan builds into the new 67 and new 48. Split them, layover in the montlake triangle, call it good. If they're not trolleys, there is still layover space on the south end of the ave. The loss of all service on 19th, boyer and lakeview is a bit troubling.	3/11/2015 11:39 AM
311	If changes to the 49 were made, please make sure it continues as the 7. There are too few buses that connect North Seattle and South Seattle communities. When buses run infrequently, and Metro has continued to take out benches for people to sit on, this means that we can be waiting for up to 30 minutes to transfer to a bus that connects north and south Seattle. it's pretty messed up, considering that UW is in North Seattle. There should be more direct routes to UW from all communities!	3/11/2015 10:50 AM
312	Keep the 25.	3/11/2015 10:49 AM
313	We need to keep route 24 and 43 and 48 and 44 all offering service around north capitol hill regularly, Every 30 minutes is better than obliterating the option of having these routes altogether.	3/11/2015 10:33 AM
314	Keep a direct route from Madison Park to downtown. Other than Amazon employees, no one needs to go between the valley and SLU regularly. Keep the 12!	3/11/2015 10:26 AM
315	Turn the tail of the 38 to run downtown after CHS.	3/11/2015 10:22 AM
316	Keep 11 and keep the frequency of 8.	3/11/2015 9:24 AM
317	More buses up and down Pike-Pine from downtown	3/11/2015 8:52 AM
318	Place a stop in Madison Valley on E. Madison St.	3/11/2015 7:57 AM
319	I would rather have more distributed transit that works for everyone, not just the condos & apts in the Broadway area. The only thing that would fix alt 1, is to remove it and do alt 2.	3/11/2015 7:53 AM
320	A direct route from Madison Valley to south Downtown along Madison would be key. I know this concept is currently being explored with bus rapid transit and I support this concept.	3/11/2015 7:02 AM
321	I love the idea of getting rid of the line on 19th. Does it get used? I'd try to keep a good connection to Redmond routes. A lot of people bus from cap hill to Redmond.	3/11/2015 5:45 AM
322	more connections to the U District and downtown from Capitol Hill	3/11/2015 2:38 AM
323	Continue a bus down to east end of madison st. It is being increase to every 15 mins. now u want to eliminate it?	3/11/2015 12:53 AM
324	Improve transit to light rail stations to maximize light rail usage. Reducing access to light rail will not optimize usage.	3/10/2015 9:27 PM

325	There needs to be a direct link (without transfers) that continue the Route 11 line.	3/10/2015 7:39 PM
326	Keep the 12, run the 10 more frequently.	3/10/2015 7:03 PM
327	You've got to really question whether frequent "network service" is a customer benefit over a small geographic area. The time penalty of a transfer is significant, even if service is frequent. And that transfer penalty can end up being a significant part of the travel time. It ends up being an even bigger deal given the sort of schedule delays you see in congested areas like Capitol Hill, which this plan doesn't do anything to prevent. Here's my logic: It takes 13 minutes to walk to the #8 from my home in Madrona It takes 5 minutes to wait for the bus (rather be early than miss it) It takes ~25 minutes on average to travel from Madison Valley to Fairview It takes 8 minutes to walk from Denny to my office on Republican That adds up to 51 minutes. Which is already very close to the time to walk the whole thing, which is about 65 minutes for me. I can drive it in an average of 18 minutes, at the cost of \$80 per month for parking. Adding a transfer would be another 5-15 minutes on top of that, and even longer at the 90th percentile of poor-schedule performance, plus more time in the rain/cold for much of the year. That gets it very close to walking time, and well-worth the cost of parking. So while frequent service is nice, it's just really difficult to make the case that frequent service outweighs total travel time.	3/10/2015 4:50 PM
328	Consider Route 12 as originating from downtown, East on Madison, then north on 19th to Thomas, then taking the old 43 section on 23rd between Thomas and Husky Stadium. That would fill in the gap on 23rd, Madison and require fewer transfers for those in the Montlake/North Capitol Hill area.	3/10/2015 2:45 PM
329	Shift a route to E Olive Way/E John St to continue to serve that east-west corridor between Capitol Hill and Downtown. Increasing the frequency on the 8 is much needed, but won't do much to improve service without improving flow on Denny Way.	3/10/2015 2:35 PM
330	Maintain more frequent 43 and 48 service.	3/10/2015 2:21 PM
331	Frequent buses are nice but they do not help if they don't take you near where you are or want to go. Rather than removing routes please add capacity and frequency where needed.	3/10/2015 2:04 PM
332	Less cars is better. So any changes to service may have little impact on me as I would check service to those areas in which I am traveling to or from.	3/10/2015 12:05 PM
333	I don't have any specific recommendations. I have 2 goals in mind. I want the buses to primarily serve the low-income citizens of our city who need to most assistance and I want to buses to provide a viable option that gets people to stop driving. So, please establish connections that will most promote these goals.	3/10/2015 11:55 AM
334	I like most of the concept -- just keep the 12, at least for peak-only service! I'd also restructure the 2 as proposed in the past, to make it more reliable downtown (move it from Spring/Seneca to Madison).	3/10/2015 11:25 AM
335	Keep the 43 and the 12	3/10/2015 11:14 AM
336	Keep route 12 as an access up and down on 19th Ave E.	3/10/2015 10:54 AM
337	Not sure.	3/10/2015 10:52 AM
338	Rather than completely eliminating the inefficient routes that serve centrally located urban neighborhoods, such as the 25, replace the routes with a few neighborhood van routes that shuttle residents to the nearest light rail stations. With the 25 for example, the only unique, non-duplicating part of the route is the section that travels around Portage Bay. Instead of the expensive 25 bus operations, Metro could have a small passenger van operate a continuous shuttle route clockwise around the bay, serving both neighborhood residents and UW students, faculty and visitors.	3/10/2015 9:15 AM
339	maintaining some kind of access all day on 19th ave north of madison.	3/10/2015 9:03 AM
340	Keep 43 and 25 with increased frequency	3/10/2015 8:57 AM
341	Keep some sort of transit on Madison! Maintain the 12 to at least 15th. One idea is to run the 12 to 19th and then have it turn onto the 43 route to Montlake and UW Station. The 12 is already very frequent during peak hours, so I value the route proximity more than added frequency, which has diminishing returns. Madison and Pine are far enough apart downtown that they deserve distinct services. Reducing the 10/11 pairing from 15th/E Pine to downtown is also bad. That is a busy corridor off-peak, I use it a lot to get downtown on the weekend. With no 11 to downtown the 10 would need 2x service just to maintain frequency never mind improve it. The 12 has a lot of riders who chose to live in a transit dense area. Taking away their bus is not fair especially since the neighborhood supported Prop 1 strongly.	3/10/2015 6:03 AM
342	Restore direct service from Madison Park to downtown.	3/9/2015 9:58 PM

343	I'd keep the trolley routes but perhaps reduce frequency. Otherwise, keep service the way it currently is being implemented.	3/9/2015 8:53 PM
344	Maintain route 11 for Madison Park.	3/9/2015 8:19 PM
345	I am not a transit expert - I'm not sure.	3/9/2015 6:15 PM
346	No idea	3/9/2015 5:59 PM
347	Add a late-night schedule for social nights (Friday/Saturday) so that I'm not stranded away from home if I go out with friends.	3/9/2015 5:41 PM
348	not do it?	3/9/2015 5:36 PM
349	Consider Alternative 2.	3/9/2015 5:26 PM
350	.	3/9/2015 4:49 PM
351	Do not eliminate #25.	3/9/2015 4:28 PM
352	I don't see any improvements, the concept is exactly the direction I expected you to go in, with some well thought out additions (loving the 38 route!)	3/9/2015 4:08 PM
353	I would retain the 43 and accept the current level of service in terms of frequency on that route. If the 48 is more heavily used, perhaps increase the frequency during peak hours.	3/9/2015 3:54 PM
354	Make the service along 24th/23rd to Link at UW much more frequent than suggested.	3/9/2015 3:22 PM
355	No idea - what is going to happen to transit into Madison Park?	3/9/2015 3:09 PM
356	I would not sever everything south of Madison Street from all the great things the No. 8 does: Group Health, South Lake Union, Seattle Center, northern Denny Regrade.	3/9/2015 2:44 PM
357	Please see comments under "North Seattle".	3/9/2015 2:40 PM
358	Not sure.	3/9/2015 2:35 PM
359	Refocus it back on arterial streets like 23rd/24th Ave E, E Madison, and 19th Ave E.	3/9/2015 2:26 PM
360	Please keep Routes 11 and 8 to and from Madison Valley! This convenient service is the reason I moved to Madison Valley!	3/9/2015 2:16 PM
361	It is difficult for me to connect to/from the Central District and Central and North Capitol Hill.	3/9/2015 2:16 PM
362	Keep the #8 bus route operating from the Central District to South Lake Union and Seattle Center.	3/9/2015 1:31 PM
363	Having a central exchange stop that takes you to other neighborhoods (i.e. greenlake) without having to transfer downtown.	3/9/2015 1:25 PM
364	Keep all the buses on the same schedule --- why are you cutting access and pretending to call it "more frequent service". You are deleting a 43 and increasing the new 48 service, but the net is a loss from 7.5 minutes to every 10 minutes. Stop hiding this math buried in all your "alternative options" as though alternative 1 is somehow better for us but is really what you want to implement to make more cuts. I voted for Prop 1, for what?! For you to make more cuts?! This is a bad trajectory for Metro and will mean full divestment from further funding and access --- you need to stay invested or you will lose the masses.	3/9/2015 1:17 PM
365	Keep at least one route that travels Madison all the way to Downtown.	3/9/2015 12:36 PM
366	Can buses from all parts of Cap Hill use the light rail tunnel to get to downtown faster, but still maintain their Cap Hill stops? Can busses that use the tunnel downtown keep going through the tunnel up to Cap Hill to get more people?	3/9/2015 11:52 AM
367	I think we still need a route that goes through the northeast/top of Capitol Hill, like the 43 and 12 currently do. I use the 43 every day.	3/9/2015 11:47 AM
368	The 43 provides an important connection through Eastern Capitol Hill and Montlake. The Light Rail train will not serve those neighborhoods and it seems short-sighted to cut/reduce that route, particularly as there is no Montlake light rail station. I ride the 12 home nearly every day. If the BRT replaces the 12, then I am less concerned, but this route provides one of the only direct rides from the South end of downtown to Capitol Hill.	3/9/2015 11:21 AM
369	Northwest Seattle needs a line to Capitol Hill	3/9/2015 9:16 AM

370	Not sure how it effects bus route 193	3/9/2015 9:13 AM
371	Make sure that outlying routes can connect to the main street, consolidated routes. If people live outside the area, don't punish them for not smashing like sardines closer into the city.	3/9/2015 8:25 AM
372	11 is an arterial route that connects Madison Valley with the rest of the city. I think reducing it's service will be a horrible idea. It will also have a major impact on the people who are disabled and use it to get to and from Bailey Boushay House by possibly requiring them to take a second bus. If you don't think that is a major inconvenience then I challenge all of the team making the decisions to spend one day in a wheelchair taking public transit.	3/9/2015 7:44 AM
373	I would like to have a more direct connection between Capitol Hill and the western Central Area. Right now getting from 23rd to the heart of Capitol Hill involves at least one transfer, usually at the poorly-designed 23rd and John.	3/9/2015 6:38 AM
374	establish direct bus connections from eastside to major hospitals in downtown seattle	3/9/2015 5:47 AM
375	I don't fully understand what Alternative 1 entails to adequatley answer this question	3/8/2015 8:34 PM
376	I would increase the service of the 8 as well as break up the route in some way. It is very unreliable and is often too crowded to get on when it does arrive. I would ensure the 8 always used the full size (accordion) buses. I would also make sure that there was a direct connection between the top of capitol hill and Madison valley.	3/8/2015 5:10 PM
377	Keep route 8 between 15&John and 23& Yesler service - without transfer	3/8/2015 5:09 PM
378	Getting the madison street rapid ride all the way to the arboretum	3/8/2015 4:32 PM
379	Increase frequency on the 10 at the expense of the (likely to get stuck in traffic) 8.	3/8/2015 4:14 PM
380	Base bus stops on ridership info - how many riders use each stop?	3/8/2015 3:51 PM
381	Leave the 66 alone!	3/8/2015 3:04 PM
382	Retain service on Broadway to Downtown Seattle currently provided by Route 49.	3/8/2015 2:07 PM
383	Some ways for the people in Madison Park and Madison Valley to get the places the use the bus to go: Medical Center on 1st Hill, future Whole Foods at 23rd, Financial Center, and Pacific Place.	3/8/2015 12:38 PM
384	Maintain service along 19th Ave E and Madison between Broadway and 16th Ave E.	3/8/2015 11:19 AM
385	Somehow preserve direct service from Madison Valley to downtown. We deserve direct and more frequent service. Alternative 1 would be a step backwards for all the residents of this densely settled area. Redevelopment is happening like crazy - it doesn't make sense to remove the direct service to downtown that we currently have.	3/8/2015 10:34 AM
386	I would have the 43 go from the U District to the Capitol Hill station along the current route. It could be a bit less frequent than it currently is, but this would allow connections to either station to group health and others on the back side of capitol hill.	3/8/2015 9:15 AM
387	Take the current 49 and have it terminate at Group Health (the same as you are doing with the 9X). Restore the 43 (or service similar to it).	3/8/2015 3:33 AM
388	Increased frequency of route 9.	3/8/2015 12:05 AM
389	Make 25 go up Lakeview to Boston, then down 10th to Roanoke and Harvard to Boyer and to UDist to serve North Capitol Hill/Seattle Prep students and U students renting on North Hill.	3/7/2015 7:58 PM
390	Keep some kind of good service on 15th E, and 19th E. Keeping some portion of service to Madison Valley, at a decent frequency (but maybe peak only or less frequent) Making sure Lakeview Blvd and Boyer aren't deleted because people don't always have time or access to walking up slopes on Capitol Hill to get to their stops. If it wastes time, or if they can't walk uphill, it may deter riders. Capitol Hill needs the most service to everywhere in the city second to Downtown. That's something to consider.	3/7/2015 5:08 PM
391	keep it safe and have places for people to park in order to use it.	3/7/2015 2:20 PM
392	Keep in mind how this affects SE Seattle residents' connections to the central and northern parts of the city.	3/7/2015 11:59 AM
393	Just focus on making Route 8 more frequent during peak hours.	3/7/2015 11:58 AM
394	Put back the #12! MANY of the other features would be good to have.	3/7/2015 11:52 AM
395	My greatest concern is for members of my family to be able to be able to get to the VA from Capitol Hill quickly for work via transit. Perhaps a bus from the Beacon Hill light rail station to the VA?	3/7/2015 11:47 AM

396	Keep Transit activity on/around 15th Ave. Reducing service on 19th Ave is OK (quick walk to 15th or 23rd).	3/7/2015 11:04 AM
397	Given the city's Madison BRT vision, it seems short-sighted to leave a large gap on Madison St. for now. (Route 2's awkward turns to get past Madison don't count.) Perhaps route 10 could use the Madison/Marion couplet and route 49 could stay on Pike/Pine? The transfer experience between revised routes 8 and 48 at 23rd/John will need to be improved (route timing, stop positions and amenities, intersection pedestrian improvements, etc.) to make those two routes an adequate replacement for route 43's local service in that area.	3/7/2015 10:46 AM
398	I would keep the #11& #8 the same as trying to push everyone to fewer options would result in customer dissatisfaction and more crowded (and potentially overcrowded) buses/trains. This phenomenon occurred with the Rapid Ride buses were implemented. Buses were too full to pick up people, who were extremely frustrated with the delays/lack of foresight.	3/7/2015 10:22 AM
399	NO CONSOLIDATION! I voted to provide *more* money for more buses, not for less!	3/7/2015 10:11 AM
400	Don't strand people who live on 19th Avenue, especially elderly people and those who use the Country Doctor Clinic (often with young, sick kids). This is the quieter part of the Hill that has more of both younger and older populations than the Broadway area - walking to the Broadway station might not be feasible. The 12 is a vital route that should not be cut.	3/7/2015 10:02 AM
401	Need to better understand the options. It might be better than the current way I am traveling.	3/7/2015 9:46 AM
402	More frequent bus service on major arterials connecting to Link Light Rail without extending light rail (buses are cheaper and travel on any street; no rails need be laid).	3/7/2015 8:06 AM
403	I don't know how to improve it, but my qualm with decreased coverage in lieu of increased frequency is that walking around the Capitol Hill/Central District at night to a bus stop can already feel unsafe, so having to walk further for a stop makes me feel uneasy.	3/7/2015 7:55 AM
404	Maintain service on 19th Ave E; maintain service from U district to the GHC area	3/7/2015 7:54 AM
405	Preserve service on 19th Ave, add service to 12th ave between capitol hill, the ID, and Beacon Hill	3/7/2015 7:52 AM
406	Probably bring back the 47 or some way for me (1000 Bellevue Place E) to get downtown in 20 minutes or less. Considering I'm a 40 minute walk, that seems reasonable. All of my options are being removed with alternative 1: The 49 no longer goes downtown, the 25 and 66x are being cut, the 47 was already cut. The only remaining alternative is walk to the 49 (5 minutes), wait for it (up to 10), transfer at the lightrail (5 minutes), wait for train (up to 10 minutes), take the ride (2-3 minutes) = up to 33 minutes when the walk is 40 minutes! Also, my doctor is at 19th and Mercer and it would take quite a long time to get to work in Pioneer Square if the 12 is deleted. So maybe having some transit on 19th to connect to some other bus -- maybe connect to the 49 at Madison and Broadway...	3/7/2015 1:08 AM
407	Resources freed up, by shift of passengers from NE to Broadway rail station, should be allocated to connecting the Capitol Hill / Central areas more directly to other parts of the city.	3/6/2015 11:43 PM
408	Make it possible for people living in that Capitol Hill quadrant between 16th and 23rd/24th and Madison have some kind of service down Madison to all the Medical Facilities AND to get to a Link Rail Station without having to backtrack on the 48 to the University. If I am going to the Eastside along I-90 I am NOT going to want to catch the 48 to the U Station and then go to Broadway AND THEN figure out how to get to Pill Hill when I used to be able to catch the 12 to Pill Hill.	3/6/2015 10:41 PM
409	split the 8 but keep the 11	3/6/2015 10:26 PM
410	Keep the direct connections and add the frequency of service.	3/6/2015 10:24 PM
411	Provide bus service for those that connects 24th Ave to the Broadway station without requiring a transfer. For example, for those in the Aloha and 23rd Ave E area that ride the 43, the rail stations are too far to walk. If the 43 is deleted, they will have to take the 48 to John, transfer to the 8 to Broadway, and then get on the light rail to go downtown.	3/6/2015 10:19 PM

412	*Keep route 8 the same between Lower Queen Anne and 23rd and Jackson, change it to travel more direct between 23rd/Jackson and Mt Baker Station via 23rd ave and Rainier ave instead of Jackson and MLK detour. Delete route 8 between Mt Baker Station and Rainier Beach. Create a local frequent stop shuttle on MLK between Mt Baker Station and Rainier Beach station for commuters who live between stations and can't walk to them. *Create a loop on via 15th ave, E Galer st, and 19th ave for route 10 and have it operate on route former 43 wires between 15th/19th corridor and downtown. *Extend route 4 to Mt Baker Station and then to MT Ranier Dr S & S Hanford St using route 14 wires. Delete confusing time consuming detour for route 14 to MT Ranier Dr S & S Hanford St. *Terminate buses under the Mt Baker Station instead of across the Rainier Ave. *Have a direct route between residential Central Area/Capitol Hill and Bellevue/Redmond jobs instead of route 38. Even if it is only for peak hours. There is no alternative while the residential density just doubled in the area.	3/6/2015 10:00 PM
413	Save the 43! Increase the 8!	3/6/2015 9:37 PM
414	Would like to see more frequent service between central district and north capital hill.	3/6/2015 9:18 PM
415	Have bus only corridors or lanes besides 3rd Ave. And do not do Alternative 1 at all until Capitol Hill light rail has been active long enough for you to have genuine reliable data and community input. You can't predict what you should do no matter how you think you can and no matter how many PhDs you have.	3/6/2015 8:27 PM
416	- See my prior comments about beat frequency. For services that begin/end at Capitol Hill Station, 20-minute headways are often better than 15-minute headways. - Implement "Corridor 3". Modify the 49 to continue south on Broadway/Boren all the way to Jackson, then merge with the 36 and continue south to Othello. Delete the 9. Delete the 60 (north of Beacon Hill). This would be a much simpler service pattern, and the savings could be reinvested elsewhere. - Consider modifying the 2 to use Madison, in lieu of the 49. I know this is a very politically sensitive change, but it's the right thing to do. Plus, with the cost savings of deleting the 9 and 49, the 2 could have 10-minute frequency, which would be a nice carrot. - Since the 2-Madison will never happen, consider this instead. Bring back the 11, which would take Madison all the way to Madison Park. Modify the 8 to head south at MLK (like today), but terminating at 23rd and Jackson. Modify the 38 so that, at Jackson, it continues west to downtown. (Basically, the 8/106 restructure that you proposed before.) I believe this is a much simpler service pattern than what is proposed. The 38 takes a shorter and simpler route to downtown (connecting to Link at International District Station). The 11 provides a simple, frequent service to a corridor that is very hard to effectively connect to Link. MLK still has a Link connection (the 8). - Consider modifying the 10 to use Bellevue/Olive/John instead of Pine/15th. This would improve service on the densely-populated western slope, and it would provide a direct connection between 15th Ave service and Link.	3/6/2015 8:16 PM
417	I'm not looking for consolidation.....	3/6/2015 8:08 PM
418	I would not change anything.	3/6/2015 8:05 PM
419	Need the 43 service along 24th	3/6/2015 7:44 PM
420	make it run later so people could take it to C.H. nightlife and home	3/6/2015 7:44 PM
421	not sure	3/6/2015 6:00 PM
422	Lack of service between Capital Hill and the U-District is not a good thing. Lots of people work and travel there for school.	3/6/2015 5:55 PM
423	Keep routes 49 10 and 43 going as they do today in addition to light rail	3/6/2015 5:42 PM
424	I see no way to improve Alternative 1 until I can see how the First Hill Trolley and Light Rail effect my trips.	3/6/2015 5:26 PM
425	not sure	3/6/2015 5:22 PM
426	Garfield High School students in n Capitol Hill do not have easy options to get to school -- not sure how to fix this with a single-seat option	3/6/2015 5:16 PM
427	I would consider two things: 1) finding a way to make the 47 more frequent and have longer hours; 2) finding a way (send the 38 downtown instead of to Broadway?) to add service to Pike-Pine.	3/6/2015 5:13 PM
428	Alternative 1 doesn't seem to make much use of the proposed Madison BRT east of Broadway (from Broadway to 16th). While I don't think that warrants retaining the 12, it would be nice to make better use of that planned investment. Maybe by rerouting the 2 to Madison?	3/6/2015 5:02 PM
429	Keep something on Madison St all the way from the lake to downtown. Circulator through Capitol Hill/Montlake to cut perpendicular over the N-S routes?	3/6/2015 4:59 PM
430	I would keep the 43 and terminate it at the capitol hill light rail station.	3/6/2015 4:58 PM

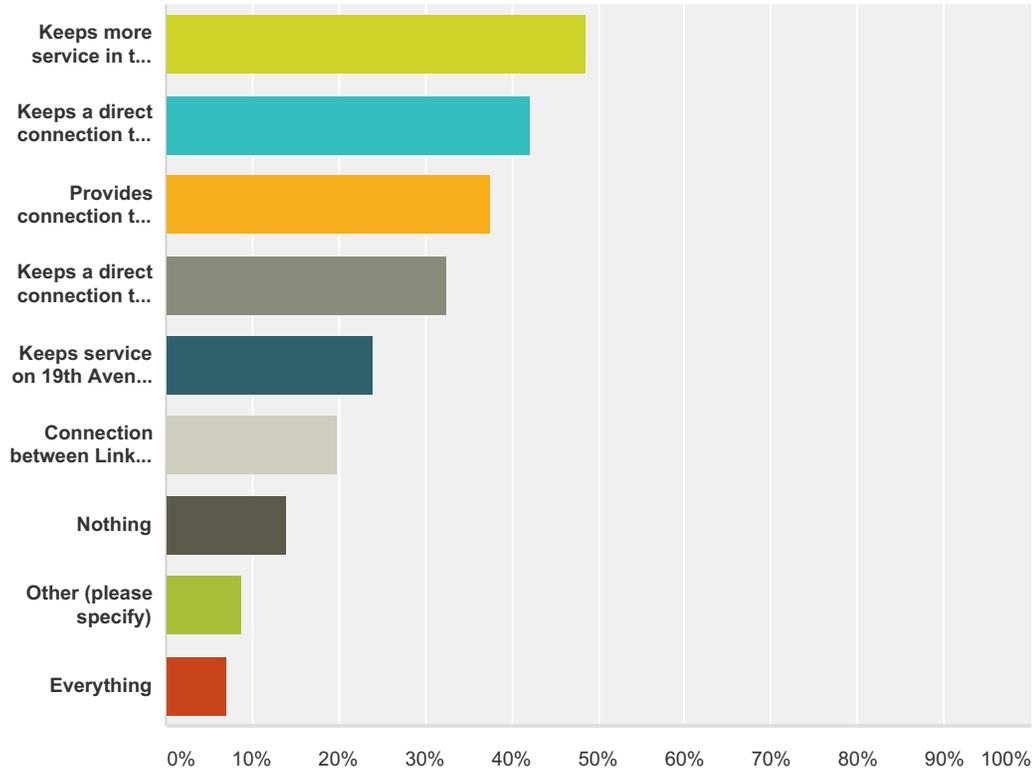

431	Keep the 12 (or something like it) at least during an extended commute time. Keep some surface connection like the 43 b/t Montlake, along 23rd, to downtown. (There's a lot of space between UW and Cap Hill station--you cannot drop service along here just because the two end points are covered by the subway.)	3/6/2015 4:56 PM
432	I would reconsider loss of service on 19th Ave.	3/6/2015 4:45 PM
433	I really like the goal of consolidating lines and increasing frequency, but it would be rough to lose not one, but *both* of my direct routes downtown (i.e., the 12 and the 43). I would be fine with losing the 12 if the 43 were still an option. It seems especially harsh for folks further north than I and closer to 23. To get downtown, they would have to take the 48, transfer to the 8, and then transfer to the light rail... If the 43 were still operating with increased frequency, they would have a direct route to both the light rail and downtown.	3/6/2015 4:44 PM
434	Pike/Pine is essential. It needs more busses, not less. The busses are always packed and it's a very dense area with many residents and many destinations like bars and restaurants.	3/6/2015 4:32 PM
435	Primary concern is the lack of "hub" service from both Capitol Hill and UW Stations. Seems the best alternative would be to "spoke out" service from those destinations as the light rail would continue on to downtown if heading into town. For those riders arriving at either station southbound, they would need to either ride all the way to downtown to catch a connecting route to destinations on Capitol Hill OR walk a significant distance to catch a current route (i.e. To go to Madison Valley, one would need to walk from Broadway and John 6 blocks to Broadway and Pine to catch the 11 to Madison Valley.) it would be easier for some to ride the light rail into Westlake and then walk one block to 4th and Pine to continue to Madison Valley. If a frequent route that travels from downtown to Broadway and John and THEN continues up John to 15th and south to Madison and on to Madison Valley/Central District , that would be ideal.	3/6/2015 4:27 PM
436	Frequency is a key for me.	3/6/2015 4:22 PM
437	Leave the 12 in service	3/6/2015 4:22 PM
438	There needs to be continuous bus service for transportation to all of the hospitals on First Hill and Capitol Hill. I live in the area where HMC, SWEDISH and Virginia Mason are. Service should not be changed at all. People that do not have cars, need public transportation to get to these hospitals.	3/6/2015 4:20 PM
439	I'd want to ensure that service is frequent, reliable, and unencumbered by street traffic. Dedicated bus lanes would be ideal, alongside dedicated bike lanes.	3/6/2015 4:18 PM
440	No feedback.	3/6/2015 4:04 PM
441	Install one bus that goes from 24th to downtown that approximates a route such as 24th to Aloha to Broadway to Roy Steet to Bellevue Avenue to Pine Street to 3rd Avenue downtown. It should run at least every 15 minutes during peak and 20 minutes or 30 minutes off peak.	3/6/2015 3:56 PM
442	There should still be at least one bus option that travels between Capitol Hill (for example, 15th Ave) and down to downtown so that people who don't want to go directly to downtown but want to visit the shops and places along the way don't have to walk up (or down) the hill to get there.	3/6/2015 3:54 PM
443	I do not know.	3/6/2015 3:54 PM
444	Make sure that the 15 minutes or less timing included Saturday and Sunday.	3/6/2015 3:49 PM
445	Keep in mind that this is one of the hilliest areas of Seattle. For accessibility and end-to-end travel time, this is one of the most challenging pedestrian corridors. You will lose people who need to walk many blocks.	3/6/2015 3:45 PM
446	Keep a few more local routes but have them terminate at LINK stations like University and University District so that commuters to the Eastside from dense Seattle neighborhoods have efficient connections. A route going from South Lake Union to University LINK or Montlake TC by way of Capitol Hill LINK, hitting dense neighborhoods in between (hybrid of current 8/43), would keep the hordes of Amazon-Microsoft commuters moving.	3/6/2015 3:43 PM
447	Make sure that Saturday and Sunday service has the 15 minutes or less component.	3/6/2015 3:42 PM
448	More FREQUENT service on the 8 route. Is there an alternative arterial road to use besides Denny Way? Nearly all of the problems with this bus line come from backed up cars on Denny. Additionally, the 8 and the 43 stall because E John street is too narrow. Is there another arterial route to take?	3/6/2015 3:22 PM
449	Very little, I actually really like Alternative 1.	3/6/2015 3:20 PM
450	No input for this area. However, I would like to see weekend transit on the Sammamish Plateau north of the Issaquah Highlands.	3/6/2015 3:13 PM

451	1) Have more direct and frequent routes between Madison Valley and South Downtown (Seattle City Hall, Pioneer Square, International District, etc) 2) Implement BRT improvements on Madison Street from Downtown all the way to Madison Park. If BRT improvements stop at 23rd Ave, then routes should continue from there to Madison Park (on Madison St), UW (north on 23rd), and the Central District (south on 23rd) so that people don't have to get off and transfer at 23rd and Madison.	3/6/2015 3:09 PM
452	Give the Central Area a linking bus to the light rail that doesn't go all the way into Madison Valley like the 8 does (or all the way down to Rainier like the 48 does). We need a direct bus that goes from 23rd and Jackson to Capitol Hill!	3/6/2015 3:08 PM
453	Keep something like the #27	3/6/2015 3:06 PM
454	Keep the 43	3/6/2015 2:55 PM
455	When services are consolidated, this simplifies the options that commuters have getting from point a to b. What not to like with these options!	3/6/2015 2:54 PM
456	Work with SDOT to change the street configuration on Route 8 neat Stewart. This would make route 8 more frequent and more reliable.	3/6/2015 2:49 PM
457	Keep the route 12.	3/6/2015 2:49 PM
458	keep the 43 or bring back the 47 with peak hours only. Have a direct route from Capitol Hill to SODO without a transfer	3/6/2015 2:45 PM
459	Increase the frequency of the 66X through Eastlake instead of eliminating weekend service and reducing frequency. Why is a plan about Capitol Hill and Central Area eliminating service to other neighborhoods that will not be served?	3/6/2015 2:43 PM
460	Maintain service on 23rd Ave E	3/6/2015 2:41 PM
461	No idea. Sorry!	3/6/2015 2:40 PM
462	Keep the 12 and 43. Getting around my own hilly, parking-limited neighborhood is more valuable to me and saves me more time than going anywhere the light rail goes or will go.	3/6/2015 2:36 PM
463	There needs to be better access to 23rd/24th ave	3/6/2015 2:36 PM
464	I would combine alternatives 1 and 2 - increased frequency, better amenities AND better coverage.	3/6/2015 2:34 PM
465	Keep the 43 - DON'T make the same mistake of thinking that once light rail is in place, alternative parallel service is not needed. Whenever light rail is delayed by the usual car or pedestrian crashes in the south, no one can get to the airport. The same thing would happen for people living on the hill and working/studying at the UW Medical Center whenever the light rail breaks down. Also the light rail cannot replace the 43 between Broadway and Pine	3/6/2015 12:33 PM
466	I would keep the 43 and the 12 the way they are now. Keeping them serve more people better than increasing service on the 8 and 48. Especially without other changes to make those routes more reliable.	3/6/2015 12:22 PM
467	I don't know from where I would pull the requisite service hours, but maintaining the service coverage along Madison and the avenues north of it East of Broadway would be a nice perk. Whether doing so would result in a net negative for the rest of the utility of the network is hard to visualize, though it's impacts are likely minor.	3/6/2015 11:58 AM
468	My only suggestion would be to add a direct connection between Capitol Hill and Eastlake.	3/6/2015 11:02 AM
469	Consider splitting the 8 - have the split routes overlap between Capitol Hill station and Group Health. This would improve reliability. Or, get the 8 off Denny as much as possible. Either cut the tail of the 3, or truncate it back to MLK. The 9X will have trouble making the left turn from WB John to SW Broadway. Not sure how to fix this while retaining connection to Link.	3/6/2015 10:27 AM
470	This bold concept is great	3/6/2015 10:21 AM
471	The Madison bus routes are weird and counterintuitive. Having a bus that runs straight up Madison frequently is clearer. I know we're headed for Madison BRT in the future - can we incorporate elements of that now?	3/6/2015 9:34 AM
472	Extend the 10 to merge with the 49 going North. Or: Keep the 12 and have it merge with the now non-existent 43 going North. The area served by the 12 is not served by any other bus going to Downtown and the area is slated to grow denser. Whatever the alternative, you need at least one bus that gets North-East Capitol Hill people to the U District and beyond.	3/6/2015 9:29 AM
473	A route servicing Madison between the gap of the 2 and 38. I'm guessing this is supposed to be the eventual Madison BRT, but if it's not up and running, it would be unfortunate to not have a continuous Madison route.	3/6/2015 8:50 AM

474	What happened to the plan of bus rapid transit up and down Madison?? I would keep more in mind the TOPOGRAPHY of Seattle and less just the number of blocks. 17th is at the top of a hill, people don't want to walk up and then back down a hill from 19th, nor do they want to have the bus stop at 15th and have to walk home up a hill??	3/6/2015 8:42 AM
475	I think realignment as outlined looks good. I wish, as part of the plan, some of the bus stop locations would be reduced so the stops were more spread apart and speed the routes up. Why, on the 11 for example, are there stops at 23rd, 22nd, 20th? between three and a half blocks, couldn't you just have one stop?	3/6/2015 8:37 AM
476	The 10 should serve Capitol Hill Station more directly. To protect the reliability of the eastern portion of the "thirty-late", keep an extra 38 bus on standby near CHS, to plug any major gap resulting from bunching along Denny.	3/5/2015 11:57 PM

Q20 What do you like most about Aternative 2 on Capitol Hill and in the Central Area? (choose up to four)

Answered: 1,315 Skipped: 5,244

Answer Choices	Responses
Keeps more service in the Pike/Pine corridor (concept for routes 10, 11, 43, and 49)	48.75% 641
Keeps a direct connection to downtown Seattle from 24th Avenue E and the top of Capitol Hill (concept for Route 43)	42.13% 554
Provides connection to the new Link Capitol Hill Station from 24th Avenue E (concept for Route 43)	37.49% 493
Keeps a direct connection to downtown Seattle from Madison Valley (concept for Route 11)	32.55% 428
Keeps service on 19th Avenue E (concept for Route 12)	24.11% 317
Connection between Link light rail at the new University of Washington Station and Boyer Avenue E, Furhman Avenue E, and Lakeview Boulevard E (concept for Route 25)	19.92% 262
Nothing	13.99% 184
Other (please specify)	8.67% 114

Everything	7.07%	93
Total Respondents: 1,315		

#	Other (please specify)	Date
1	General easy access to multiple route and destinations.	4/2/2015 2:28 AM
2	less change = easier to adapt	4/1/2015 2:22 PM
3	Keeps a direct connection between Montlake, 24th/23rd and Capitol Hill	3/31/2015 11:12 PM
4	Keeps access to transit for streets where residents, businesses and services have invested relying on transit being available. Access is more important than too much frequency. Without access frequency doesn't matter.	3/31/2015 10:37 PM
5	Does not keep in mind the needs for the taxpayers of montlake	3/31/2015 4:43 PM
6	Biggest is keeping the route 12.	3/31/2015 3:56 PM
7	I take Route 12 everyday, but am intrigued by the option of the new 9X.	3/31/2015 12:58 PM
8	Accessible service to Downtown and U district.	3/31/2015 9:39 AM
9	not relevant to me personally. Do people with babies in prams really want to take a bus?	3/31/2015 9:31 AM
10	I need to get (without transfer) from Boyer/Newton to the University and downtown. I am worried the 43 or 48 service will chang	3/31/2015 8:49 AM
11	Without the 12 and the 43, there are no reasonable bus options for North Capitol Hill. We live in between link stations. We aren't helped by the train. Don't cut the buses that service our neighborhood, leaving us with no public transit options.	3/30/2015 9:30 PM
12	Ugh! You need to repeat the details of Alternative 2! I am too far embedded in this survey to know the finer points. I was so excited to participate in this survey, but the execution is awful. I repeat my concern that if I, a highly educated, concerned bus-riding citizen, cannot navigate this survey, how do others who might rely on it more, yet lack the language skills to complete this task.	3/30/2015 6:43 PM
13	has routes on more streets than the consolidated plan	3/30/2015 4:10 PM
14	Generally, I have concern for any changes from Metro current service, UNLESS THERE IS AN INCREASE/IMPROVEMENT OF SERVICE (additional routes, frequency & buses). ANY PLAN THAT DELETES ROUTE 43 IS UNACCEPTABLE. ANY PLAN THAT REDUCES SERVICE TO ALL NEIGHBORHOODS, INCREASES WALK & WAIT TIME TO/FOR BUSES IS UNACCEPTABLE. Living in the west edge (7th to 8th Ave NE, NE 45th St to NE 47th St) of the U-District, using Light Rail is not really an option I will consider except for novelty from time to time or if going to SeaTac, which I never do. Both Alternatives appear to reduce service to my area of the U-District. I go to the Group Health area of Capital Hill (I call East Capital Hill) 2-4 times a week. Deleting route 43 or its current frequency will be a burden for me. Using route 48 & 8 increases walk time 10 min and wait time 10-15 min (I've tested it the past 2 weeks). It takes me an average of 20 min of additional time from leaving my home to reach my destination in the Group Health area.	3/30/2015 2:41 PM
15	Maintains the 43	3/30/2015 1:11 PM
16	I like the fact that ST545 is going to maintain its service, giving me a quick, single bus route from Boltbus on 5th & King, to Bellevue/Redmond.	3/30/2015 9:23 AM
17	Keeps service to Madison Park via route 11	3/29/2015 9:20 PM
18	A little uncomfortable with the radical shifts proposed in Alternative 1, although I could still favor Alternative 1 if I could be sure I could still get to Group Health from the Central Area/UW without too much hassle.	3/28/2015 10:49 AM
19	Our neighborhood campaigned extensively for the Seattle transit funding issue last fall. Our purpose was to maintain the #12 and hopefully restore the #47 for our friends in the Summit area. When funding was found, we thought we were "done". This is truly scary.	3/27/2015 3:51 PM
20	I do not like the less frequent service. Keep 43 as is.	3/27/2015 2:30 PM
21	I like the idea of keeping the 11 for now but recognize that it will be redundant and need to be reconsidered once the Madison BRT project is finalized.	3/27/2015 9:17 AM
22	Keeps the #48 intact.	3/26/2015 10:40 PM

23	Much better access to bus routes than alternative 1. Frequency is not really helpful if you can't get to the route.	3/26/2015 9:14 AM
24	It is less disruptive. The 12 fills in holes of coverage on Madison.	3/24/2015 11:40 PM
25	Location of the stations makes it difficult to use Link as a good alternative especially in the University District. Husky Stadium is a good location for Husky games, but is a difficult destination otherwise. Alternative 2 is the least disruptive and continues to provide the service people expect. Alternative 1's proposal for the 49 seems interesting and could be an improvement.	3/24/2015 5:29 PM
26	Keeps service on Madison between Broadway and 16th Ave.	3/24/2015 4:10 PM
27	It's o.k., but doesn't seem to provide much in the way of increased frequency.	3/24/2015 3:30 PM
28	Keeps a direct connection to downtown Seattle from Redmond	3/23/2015 1:38 PM
29	Alternative 2 would allow me to commute to and from downtown from home without having to make a transfer! Having to make a transfer when your commute is so short is pretty absurd.	3/23/2015 11:20 AM
30	Nothing changes for me	3/23/2015 10:44 AM
31	Keeps 545 service hours	3/20/2015 1:02 PM
32	keeps the 8 on the same route	3/19/2015 10:27 PM
33	Less transfers required	3/19/2015 1:57 PM
34	Metro still needs to provide the 47 route.	3/19/2015 8:59 AM
35	This is a terrible idea. For anyone living in North Capitol Hill more than five minutes walk from the Broadway and John light rail station, this will mean longer commute times to the University District. I make this commute every single day. These buses are full every day, and most travelers from the UW to Capitol Hill get off the 43 more than 5 minutes walk before Broadway and John. Moreover, the walk from the UW light rail station will add an additional five minutes to my journey. I estimate that my daily commute from my house (16th and Republican) on the light rail will be 20 minutes LONGER than it currently is using the #43. This is not public transportation progress. It is a light rail boondoggle. Sincerely Robert Wood Professor, University of Washington PS. The same thing happened with bus route 194 which reliably took passengers from downtown Seattle to the airport in 30 minutes until it was cancelled because of the light rail. The trip now takes 40-45 minutes on light rail. Is this progress? The idea is that new transit systems augment the public transportation system, not replace existing components.	3/18/2015 8:55 PM
36	As long as the 49 runs from Roy/Mercer to the U District every fifteen minutes, I'm good	3/18/2015 3:24 PM
37	Maintains east side connectivity 545.	3/18/2015 2:46 PM
38	Keeps service to southern half of downtown.	3/18/2015 2:44 PM
39	Not clear what would benefit me.	3/18/2015 1:54 PM
40	not sure	3/18/2015 12:19 PM
41	KEEP 11, 10, 43, and 49!	3/18/2015 11:49 AM
42	Keeps the First Hill hospital group directly connected to the elderly population in Madison Park, who are forced to transfer or walk great distances (for their age) otherwise.	3/17/2015 11:50 PM
43	Keeps the 48 as it is!	3/17/2015 8:27 PM
44	It is far less harmful to local transit service will still making use of Sound Transit's dead end spur to the middle of nowhere.	3/17/2015 1:08 PM
45	Service to Green Lake and Aurora ave on route 48	3/17/2015 12:51 PM
46	There are a lot of school and businesses on 19th with need service. The Miller Community Center is one of the few places that is affordable to take children and to participate in affordable sports and clubs. These need good access. Also - north Capitol hill needs routes that run east west - it is too far to walk, especially after sports, from Miller Community Center to Broadway or from TOPS to 24th. Even for fit adults, it is difficult to walk from the businesses on Broadway or the community college to North Capitol Hill.	3/17/2015 7:04 AM
47	Makes it convenient to get to redmond during off peak hours.	3/17/2015 12:10 AM
48	Doesn't make my commute worse	3/16/2015 3:35 PM

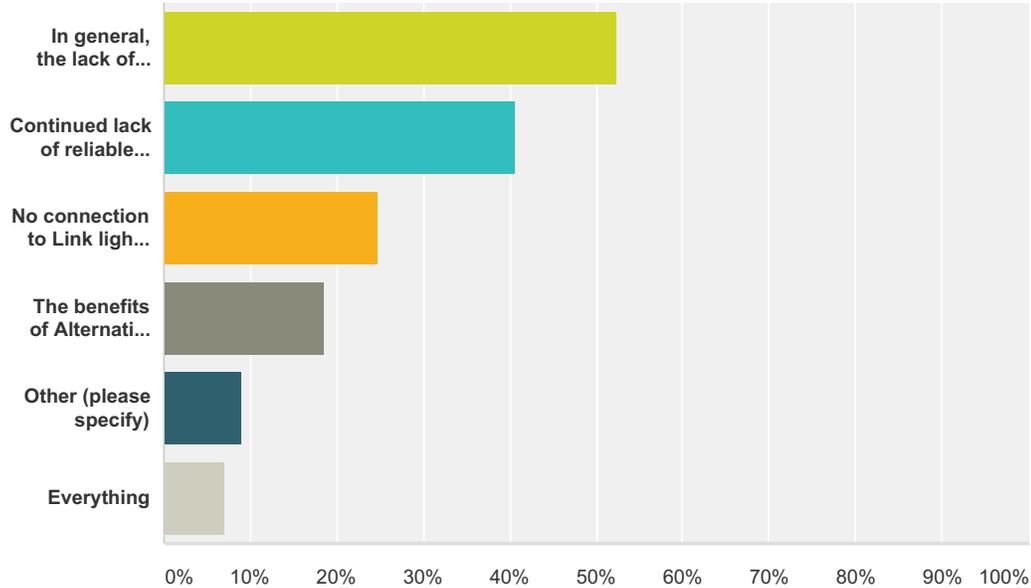

49	It does not disturb my existing one bus direct-route commute trip to/from home and work.	3/16/2015 2:47 PM
50	No impact on 545?	3/16/2015 2:08 PM
51	Keeps the 43 (though unfortunately with reduced service).	3/16/2015 12:47 PM
52	I am so sorry but the proposed changes are very confusing and I am not sure how this will impact me so I don't have enough understanding to provide feedback	3/16/2015 12:30 PM
53	It's important to maintain inbound and outbound downtown coverage and frequency!!! You can't just cut service in downtown to maintain/extend geographic coverage. While it's ideal to extend/maintain coverage to the north/south, it should never come to the cost of reducing downtown-ish area service	3/16/2015 12:21 PM
54	Keeps the 12 on Madison 19th > Downtown link.	3/16/2015 12:16 PM
55	Still makes it possible to get from top of Capitol Hill to redmond without needing 3 different buses	3/16/2015 12:01 PM
56	Increased peak hour 545 service between Seattle and OTC.	3/16/2015 11:55 AM
57	Maintains the status quo for 545.	3/16/2015 11:50 AM
58	It's absurd that there the ability to have a freeway station at Montlake has been taken away with the 520 design. This was never addressed as to why in the draft EIS. There are nice new freeway stations on the eastside, but you have limited your ability to have connected transit from the eastside to downtown, with a short stop at Montlake, creating this tortured set of alternative plans that require people to transfer. I don't believe that this is a time savings.	3/16/2015 11:47 AM
59	KEEPS ROUTE 8 AS IS!!!	3/16/2015 10:49 AM
60	see above under option 1	3/16/2015 10:03 AM
61	Retains the 12 service on Madison.	3/15/2015 4:34 PM
62	Same as with this question re: Alternative 1--I don't know what the alternatives are so I can't speak to what I think about them.	3/14/2015 8:39 AM
63	This is the most important for me.	3/13/2015 11:20 PM
64	What is Alternative 2 ?	3/13/2015 2:52 PM
65	Please maintain frequent service on route 43.	3/13/2015 1:01 PM
66	Service on 19th Avenue is essential. Please send this survey to the many schools which are served by this line - many people drop off their kids at school, park their cars and use this to get to downtown jobs. Holy Names and St Joes. The density of the neighborhood is increasing and it needs more bus service not less.	3/12/2015 9:05 PM
67	These changes don't directly affect me.	3/12/2015 1:57 PM
68	If I don't have No 11 and No 12, I can't get to the Polyclinic at Madison and 6th..	3/11/2015 3:39 PM
69	Maintains the 48 route	3/11/2015 10:50 AM
70	Service on 19th is my single biggest issue. The routes on 15 and 23rd DO NOT replace the 12. The 12 is the only bus that crosses the hill & goes to SOUTH downtown. The hills between the routes are steep. The blocks between the streets are very dark. I have had issues with safety crossing the hill at night. Connection to the link station is also important as all the people who will be going to the airport will have luggage.	3/11/2015 7:53 AM
71	There should be some direct route from the Central District to the downtown shopping district. This appears to be missing in both Alternative 1 and Alternative 2. The current #2 routing is excellent.	3/10/2015 2:58 PM
72	Alternative 1 rocks.	3/10/2015 2:45 PM
73	This option keeps the main buses to my neighborhood in place 12 / 43. With this approach I can get to montlake and downtown in a convenient way.	3/10/2015 2:04 PM
74	Many students use Route 12 to can access to Holy Names Academy and St. Joseph School. Without this route it will increase the need of using personal vehicles to get to school and the need to park in the neighborhood may increase.	3/10/2015 12:24 PM
75	Not familiar enough with the Alternative to comment.	3/10/2015 10:52 AM
76	Keeps downtown service on Madison east of Broadway	3/10/2015 6:03 AM

77	Keeps access from MLK to Group Health, Safeway and other businesses on north Capitol Hill.	3/9/2015 6:15 PM
78	I will need to do less research into better routes as there are fewer changes.	3/9/2015 5:41 PM
79	keeps spirit of the neighborhood for long term residents	3/9/2015 5:36 PM
80	How does it effect Madison Park? Are you seeing a theme develop here.	3/9/2015 3:09 PM
81	Keeps No. 8 route as is. I LOVE the current No. 8 which takes me from Olive and MLK Way directly to Group Health and to South Lake Union and to Seattle Center and to northern Denny Regrade. It is an extremely useful route that my husband and I take all the time.	3/9/2015 2:44 PM
82	Keeps route #8 running through Central District to South Lake Union	3/9/2015 1:31 PM
83	Please keep access from 15th & Pine to downtown (currently Routes 10 & 11 / revised Route 8?). I use that to connect to Route 77. It would be too far to walk from my workplace at 17th & Olive to the new transit station at Broadway & Denny. Thanks!	3/9/2015 11:52 AM
84	Do we have more service from South End to 1st Hill.	3/9/2015 9:13 AM
85	no comment	3/9/2015 9:07 AM
86	keep a direct route from Madison park and downtown, (11)	3/8/2015 9:24 PM
87	These don't really seem to impact me	3/8/2015 8:34 PM
88	It is not clear to me how these changes will affect First Hill. Are you lumping it into the Capital hill information?	3/8/2015 6:31 PM
89	Keeps 48 service to Greenlake.	3/7/2015 5:38 PM
90	I can get to everything I need, including my daughter's apartment on Capitol Hill, with one bus	3/7/2015 3:01 PM
91	Overall seems fine.	3/7/2015 2:20 PM
92	Alternative 2 would make it easier for me to get out since I wouldn't have to go so far for a bus.	3/7/2015 1:45 PM
93	Keeps direct connection between SE Seattle and Seattle Center with route 8.	3/7/2015 11:59 AM
94	See comments above. the #12 is a lifeline for my neighborhood.	3/7/2015 11:52 AM
95	Maintains connection from the Central District to Seattle Center (without having to transfer).	3/7/2015 10:47 AM
96	More coverage of the area seems much more important than some more frequency of service. With Alternative #1, for example, 19th Ave bus service that currently serves 4 schools and Country Doctor clinic, as well as the residences of many older people, is eliminated. The alternative routes require people to walk long distances, some on steep hills. This will affect many older and disabled people. With reliable schedules and phone apps, people could live with less frequent service. Less frequent service is a lot better than no service and will enable more people to use public transportation.,	3/7/2015 10:33 AM
97	It doesn't cut bus service the way alt. 1 does.	3/7/2015 10:11 AM
98	keep #8 same, more frequent service? every fifteen minutes, I would hope	3/7/2015 3:57 AM
99	Keeps an easy way for N Cap Hill to get to downtown.	3/7/2015 1:08 AM
100	mobility is a big question for me. I would NOT like longer distances between stops.	3/7/2015 12:43 AM
101	Keeps people from having to travel further for transit.	3/6/2015 10:24 PM
102	It doesn't make as major a set of changes as Alternative 1. And by the way, there should be way more than 2 alternatives. You need more data before you can know if/what major changes to make. And it acknowledges the reality that Capitol Hill is more than the few square blocks around the future light rail station. If, after more data, some of the changes in Alternative 1 (or other changes not yet considered), make sense scientifically, and have support among users (including the elderly who use transit), then those can come into play. But a full year of data (as seasonally activity may vary with transit, and the economy has a big impact too), will be needed. I also don't have a lot of faith in how metro and Sound Transit work together, so I don't want to see light rail added and metro makes cuts.	3/6/2015 8:27 PM
103	Keeps direct connection between Madison Park and downtown. We are spoiled here!!	3/6/2015 5:49 PM
104	better than alt 1	3/6/2015 5:34 PM
105	I am not sure I understand the changes or know enough about the impacts	3/6/2015 5:20 PM

106	Also that the connection on Madison from 15th Ave is preserved.	3/6/2015 4:59 PM
107	Not messing up Route 8.	3/6/2015 4:58 PM
108	link light rail connection to SR-520 allows me to get to the eastside more conveniently. and the addition of route 541 will allow me to keep my transit work commute.	3/6/2015 4:30 PM
109	I much prefer keeping route 8 pretty much the way it is now.	3/6/2015 4:26 PM
110	Particularily important to keep the 12 route (which is standing room only right now in the morning and afternoon peak periods). There are 3 schools and a community center along this route on 19th alone, and the city has approved new developments with little or no parking under the assumption of transit availability.	3/6/2015 3:58 PM
111	MIsdirected here	3/6/2015 3:48 PM
112	Older, handicapped and those with children will be able to walk to the bus lines even in a hilly area with terrible parking.	3/6/2015 3:45 PM
113	Keeps connections from Central District and Capitol Hill to SR-520 express buses via Montlake TC or University LINK station.	3/6/2015 3:43 PM
114	I have friends that drive from Madison Park to Seattle. If you take the direct #11, they will not even bother taking it ever.	3/6/2015 3:20 PM

Q21 What concerns you the most about Alternative 2 on Capitol Hill and in the Central Area? (choose up to two)

Answered: 1,236 Skipped: 5,323

Answer Choices	Responses
In general, the lack of frequent service in this network	52.35% 647
Continued lack of reliable service on Route 8	40.61% 502
No connection to Link light rail from Madison Valley	24.92% 308
The benefits of Alternative 2 outweigh any concerns I might have	18.61% 230
Other (please specify)	9.06% 112
Everything	7.12% 88
Total Respondents: 1,236	

#	Other (please specify)	Date
1	I'd much rather have a reliable, fast, frequent grid than infrequent routes to more places. Mt. Baker TC is kind of a joke--across the street from Link with no good connection or wayfinding to and from it. Poor coordination between ST and Metro.	4/1/2015 2:22 PM
2	Please note the statement above is wrong. There are excellent connections to light rail from Madison Valley. Take the 8 south to Mt Baker Light rail station to go to the airport and take the 11 to Pine and Broadway and/or Downtown to Pine and Fourth to access Light Rail north or south. Why would you put such a misleading statement in this questionnaire? Do you not know how your transit system works? Route 43 is redundant with the new Link Light Rail.	3/31/2015 10:37 PM
3	No connection to link light rail to University Village, and the 25th ave corridor.	3/31/2015 6:33 PM
4	presently one attraction of the #43 route is its frequency; a cut back to 15-20 minutes is tolerable; 30 minutes is not	3/31/2015 6:02 PM

5	Keep Route 8 but consider breaking it into two routes, intersecting at Group Health or CHS to improve reliability. Install transit signal priority on Denny	3/31/2015 5:31 PM
6	No way for taxpayers in montlake to get to the transit center	3/31/2015 4:43 PM
7	how much service do you really need to the pike pine corridor?? that is a lot of lines going the same place - that are all walkable	3/31/2015 3:35 PM
8	Reducing the number of trips on the 43 / Reducing the options to downtown for people on and around 23rd.	3/31/2015 1:58 PM
9	Lack of accessible service to Downtown and U District.	3/31/2015 9:39 AM
10	Concerns about service after 5 p.m. to downtown.	3/31/2015 8:58 AM
11	I need to get (without transfer) from Boyer/Newton to the University and downtown. I am worried the 43 or 48 service will chang	3/31/2015 8:49 AM
12	I don't use most of these routes.	3/30/2015 10:10 PM
13	Retain routes #8,#12 and #43 as close as possible to what they are. I am currently disables and these routes take me close to my destinations with minimal walking and transfers.	3/30/2015 6:58 PM
14	Nothing. I can still use buses if the current routes are preserved.	3/30/2015 6:33 PM
15	Nothing, the current system is fine as it is.	3/30/2015 6:15 PM
16	Just because I leave near the lightrail station, doesn't mean I'll be using it to go downtown. Please leave the 43 as it is--it is already a very slow and unreliable bus, but at least it exists.	3/30/2015 5:32 PM
17	Generally, I have concern for any changes from Metro current service, UNLESS THERE IS AN INCREASE/IMPROVEMENT OF SERVICE (additional routes, frequency & buses). ANY PLAN THAT DELETES ROUTE 43 IS UNACCEPTABLE. ANY PLAN THAT REDUCES SERVICE TO ALL NEIGHBORHOODS, INCREASES WALK & WAIT TIME TO/FOR BUSES IS UNACCEPTABLE. Living in the west edge (7th to 8th Ave NE, NE 45th St to NE 47th St) of the U-District, using Light Rail is not really an option I will consider except for novelty from time to time or if going to SeaTac, which I never do. Both Alternatives appear to reduce service to my area of the U-District. I go to the Group Health area of Capital Hill (I call East Capital Hill) 2-4 times a week. Deleting route 43 or its current frequency will be a burden for me. Using route 48 & 8 increases walk time 10 min and wait time 10-15 min (I've tested it the past 2 weeks). It takes me an average of 20 min of additional time from leaving my home to reach my destination in the Group Health area.	3/30/2015 2:41 PM
18	the need is greater in the south end in terms of equity	3/30/2015 10:00 AM
19	ST542 will still operate during peak hours only from Udistrict to Bellevue/Redmond. But 545 will be an alternate solution, as how it is currently.	3/30/2015 9:23 AM
20	Missed opportunity to really make some bold changes and see how they work.	3/29/2015 5:22 PM
21	Doesn't really apply to me	3/29/2015 3:22 PM
22	Fewer opportunities for trips between Kirkland / Redmond and Capitol Hill because some routes don't stop at UW light rail station (545 and 255 don't transfer). Complexity of choosing between 542 and 545 at Overlake Transit Center (some riders may not realize the 542 transfers to light rail).	3/29/2015 10:34 AM
23	Reduced service for the #43	3/28/2015 1:13 PM
24	not sure	3/28/2015 10:46 AM
25	8 is only not reliable because it's on narrow denny way... put it on Mercer between Fairview and Lower Queen Anne. and extend to Ballard's Fred Meyer by the Ballard bridge, instead of so far south beyond Mt Baker station... there is nothing meaningful south of Mt Baker Station...	3/27/2015 3:41 PM
26	frequency	3/27/2015 2:49 PM
27	I'm in for Alternative 1, as long as we keep the 11.	3/27/2015 12:00 PM
28	Lack of frequent service between U district and Capitol Hill	3/26/2015 4:43 PM
29	The addition of Link on Capitol Hill does not enhance service to the degree that should be expected for the expenditure.	3/24/2015 11:40 PM

30	Location of the stations makes it difficult to use Link as a good alternative especially in the University District. Husky Stadium is a good location for Husky games, but is a difficult destination otherwise. It is unfortunate that the light rail does not seem to add to the network as much as it should.	3/24/2015 5:29 PM
31	Please note: Current Route 8 connects Madison Valley to Light Rail at Mt Baker and Route 11 connects Madison Valley to Light Rail at Pine, so the statement above makes no sense.	3/24/2015 4:42 PM
32	Nothing concerns me about your No. 21.	3/24/2015 3:51 PM
33	Generally inefficient connections to Capitol Hill station	3/22/2015 3:24 PM
34	Doesn't make light rail the centerpiece of Seattle transit.	3/22/2015 11:26 AM
35	overall, I feel really indifferent about this Alternative 2 - it doesn't seem like too much would change for me.	3/20/2015 11:43 PM
36	Please allow me to vote twice for "Continued lack of reliable service on Route 8" as a concern for Alt 2. Alt 2 preserves a 100+ year old service pattern that is outdated and awful, especially when a frequent subway will cut travel times dramatically and make it even more awful to connect from a bus to it.	3/20/2015 8:14 PM
37	No restoration of Route 47, and no continuation of Route 49 through downtown to at least King St. Station.	3/20/2015 5:39 PM
38	The station at UW is not where I typically go so I will seldom use light rail to get there unless there is frequent transfer service to get north	3/19/2015 10:27 PM
39	Use transit to go downtown/and return more frequently. Need a reliable alternative to the 8.	3/19/2015 10:02 PM
40	I have already figured out connections to the new light rail service with existing bus serve that is currently available. I am happy with my bus service, just need more frequent times for the number 11 bus.	3/19/2015 9:59 PM
41	Again, I'm not keen a no-change alternative.	3/19/2015 12:16 PM
42	Like Alt1 545 service more. I need to go to Bear Creek P-R, so turning around at Overlake would not help.	3/19/2015 11:15 AM
43	Again, if Alt. #2 would cutback service/stops currently available on bus lines 7, 8,10,11,12,43, 48, 49, 15X, Rapid Ride Lines D/C -- I am against it!	3/19/2015 10:46 AM
44	This is a terrible idea. For anyone living in North Capitol Hill more than five minutes walk from the Broadway and John light rail station, this will mean longer commute times to the University District. I make this commute every single day. These buses are full every day, and most travelers from the UW to Capitol Hill get off the 43 more than 5 minutes walk before Broadway and John. Moreover, the walk from the UW light rail station will add an additional five minutes to my journey. I estimate that my daily commute from my house (16th and Republican) on the light rail will be 20 minutes LONGER than it currently is using the #43. This is not public transportation progress. It is a light rail boondoggle. Sincerely Robert Wood Professor, University of Washington PS. The same thing happened with bus route 194 which reliably took passengers from downtown Seattle to the airport in 30 minutes until it was cancelled because of the light rail. The trip now takes 40-45 minutes on light rail. Is this progress? The idea is that new transit systems augment the public transportation system, not replace existing components.	3/18/2015 8:55 PM
45	Still nothing to assist people in the North Capitol Hill neighborhood near Bellevue + Roy St area. Perhaps extend the 8 or 25 through there? Or bring the 47 back. :)	3/18/2015 1:54 PM
46	not sure	3/18/2015 12:19 PM
47	lack of reliable, on-time bus schedules	3/18/2015 11:26 AM
48	Just because service is being preserved in Pike/Pine does not mean it's OK to cut frequency. I do not think it is prudent to assume that ALL of these riders will migrate to LLR once service launches, particularly those who board/de-board between Downtown and the new Capitol Hill LLR Station.	3/18/2015 12:20 AM
49	Retention of route 43	3/17/2015 7:50 PM
50	Not ruining the 545 route during weekdays	3/17/2015 2:16 PM
51	Route 8 is still on Denny and not on Mercer where all of the employers and services are... It duplicates light rail south of Mt Baker station with unusually high frequency. Route 4 is not extended to Mt Baker station. 14 still makes that long loop to Hanford st where no one uses the bus and houses have like 3-4 cars in front of them. This area can be a terminus for route 4 instead, with lesser frequency.	3/17/2015 12:51 PM
52	The system is too confusing to promote use of transit at this point -- lack of frequent network, lack of reliability.	3/17/2015 10:52 AM

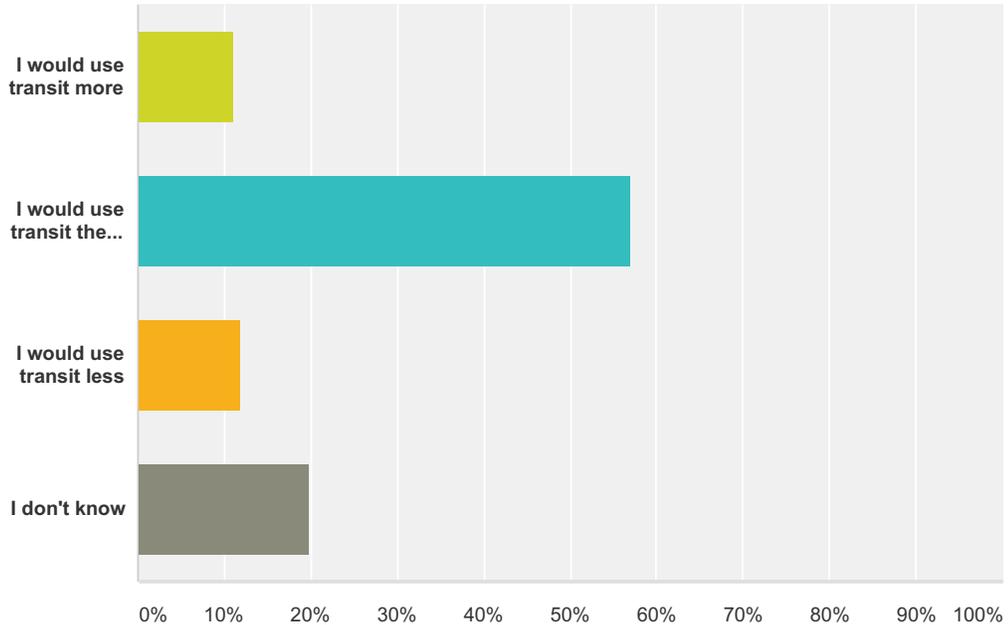

53	This is not a very ambitious or creative proposal. Despite my *personal* concerns about Alternative 1 (outlined above), I believe that Alternative 1 is superior to Alternative 2 for most of the city.	3/17/2015 10:17 AM
54	I think that current frequency of 43 is acceptable	3/16/2015 5:50 PM
55	The number 8 is a super great bus that does not run enough and is packed when there is an event at Seattle Center. It should run more often, and be bigger.	3/16/2015 2:41 PM
56	Assume no impact on 545.	3/16/2015 2:08 PM
57	I am so sorry but the proposed changes are very confusing and I am not sure how this will impact me so I don't have enough understanding to provide feedback	3/16/2015 12:30 PM
58	Not using the new network potential routes more	3/16/2015 12:21 PM
59	The removal of a stop that is used heavily (Montlake freeway station). This freeway station needs to be built into 520's redesign -- oh, that's right -- the redesign doesn't exist other than the railroaded version being implemented. Also, since I get off at 51st street in Redmond, it looks like there is less access to that using the alternatives.	3/16/2015 11:47 AM
60	no montlake station on 520.	3/16/2015 11:47 AM
61	Increase service, don't take route away.	3/16/2015 10:49 AM
62	You are not going to get a second chance to do this. Alternative 1 presents an opportunity to change the conversation about what high quality urban transit service should look like. Implement alternative 1 and no one will ask you to change it back in 10 years. Miss this chance and you look these neighborhoods into mediocre transit service for yet another generation.	3/15/2015 4:53 PM
63	The route 48 link between UW Link Station and Mt. Baker Station (along 23rd) serves a vital link between North Capitol Hill and access to the Light Rail. Currently, I take the 48 to Mt. Baker Transit Center to access the Light Rail (northbound or southbound). Once the Link Light Rail is complete, from Downtown, I envision taking the service all the way to UW then transferring southbound on the 43 or 48 and getting off on North Capitol Hill (Aloha). Alternatively, when I return from the Airport, I plan to get off at the Mt Baker Station, then catch the 48 northbound, as this will take less time, then all the way to UW and then south bound.	3/14/2015 3:55 PM
64	What is Alternative 2 ?	3/13/2015 2:52 PM
65	Not familiar with these specific issues.	3/13/2015 12:38 PM
66	Above it is stated that Madison Valley would not have connection to Link Light Rail. However, under alternative 2 the route 8 will continue to run between Madison Valley and the new Capitol Hill station.	3/11/2015 10:13 PM
67	This doesn't affect me.	3/11/2015 6:52 PM
68	The No. 8 connects to the Link Light Rail, unless you plan to change that also. You could just tighten up the No 8, which is a most useful bus for getting to Seattle Center or, the other way, to Lowe's, Douglas' Truth library, Grocery Outlet and more.	3/11/2015 3:39 PM
69	Alternative 2 also does not do what was promised when I voted for Prop 1. It feels like a bait and switch. Route 8 does not solve with increased frequency. Reliability and frequency are not the same.	3/11/2015 1:04 PM
70	Does not utilize our region's investment in Light Rail. Duplicate service via bus and rail is not a good use of our limited funds.	3/11/2015 10:22 AM
71	I'm not sure about access to 85th & Wallingford under either plan. Kids Citywide take the 48 to Blanchet High School.	3/11/2015 7:53 AM
72	Need for direct route between the central district/madison valley and the downtown shopping district.	3/10/2015 2:58 PM
73	Status Quo	3/10/2015 2:45 PM
74	Not familiar enough with the Alternative to comment.	3/10/2015 10:52 AM
75	The 8 is unreliable, but so is driving along Denny. Not sure what would fix this, but it is a deterrant to taking this bus to work.	3/10/2015 9:59 AM
76	potential for lack of frequent service.	3/10/2015 9:03 AM
77	Such minimal adjustment to routes given the opportunity of the new connections will not allow riders to take advantage of the LINK rail.	3/9/2015 5:41 PM

78	Route 8 is a problem because of the lack of sufficient capacity during rush hour. It may be one of the routes that requires more investment in service. The 43 provides some relief in the morning commute because it is a down hill walk to South Lake Union from Denny and John.	3/9/2015 3:54 PM
79	As Above	3/9/2015 3:09 PM
80	I don't understand why you say Alt 2 would provide "no connection to Link light rail from Madison Valley." The map shows that Route 8 would stay as is. It goes from MLK and Madison to Broadway and John, where there would be a connection with Link Light Rail. Is there something I'm misunderstanding? (Currently, when we have to take the bus to get to Link Light Rail, we take the No. 8 south to the Mt Baker Station.)	3/9/2015 2:44 PM
81	You are making unnecessary cuts and calling them "duplicative".	3/9/2015 1:17 PM
82	I'm worried routes on Cap Hill (specifically routes 10 & 11) will be reduced under the assumption that people will be willing to walk to the new light rail station. I need connection from East Cap Hill to Downtown, or from East Cap Hill to Maple Leaf. Thanks!	3/9/2015 11:52 AM
83	#8, #8, #8. Come ride it one weekday morning. Busses chronically late. Massive demand. Something better needs to happen between Cap Hill and SLU.	3/9/2015 11:03 AM
84	Does 1st Hill get more service from South End	3/9/2015 9:13 AM
85	no comment	3/9/2015 9:07 AM
86	I am most concerned/hopeful that people who currently get on the bus in Downtown and travel east and northeast through First Hill will now get on the bus at the Capital Hill station, and travel from there. I can't tell from the information if the altered bus routes will facilitate or impede this change, and what the changes in traffic patterns may mean for First Hill. I am especially concerned about the lack of park and ride amenities at the station. Will parking/traffic overflow into the adjacent community?	3/8/2015 6:31 PM
87	I like how Alternative 1 improves the #8 - but I just don't want that improvement to come at the expense of the #11.	3/8/2015 10:34 AM
88	same concerns for all - safety getting to/from and parking. i have to drive to any route proposed.	3/7/2015 2:20 PM
89	- Same problems faced today will still persist	3/7/2015 2:16 PM
90	The less frequent service on Alternative 2 is offset by the distances would have to go to reach a bus on Alternative 1.	3/7/2015 1:45 PM
91	This is really just the current network. We can do better.	3/7/2015 10:46 AM
92	mobility is a big question for me. I would NOT like longer distances between stops.	3/7/2015 12:43 AM
93	The potential loss of a direct route to medical appointments and downtown without going round the mulberry bush.	3/6/2015 10:41 PM
94	why are you planning to maintain unreliable service on 8. This question seems like a set up. Make the 8 reliable.	3/6/2015 10:24 PM
95	Fewer benefits compared to Alt 1	3/6/2015 9:01 PM
96	As I state above in a separate question, Route 8 is unreliable at least partially due to horrible traffic on Denny due to I-5 connection, 99, Seattle Center. Address that and it can alleviate that issue within Alternative 2.	3/6/2015 8:27 PM
97	Doesn't alleviate all the 'bus bunching' on the pike/pine corridor	3/6/2015 5:44 PM
98	I am not sure I understand the changes or know enough about the impacts	3/6/2015 5:20 PM
99	This would be a wasted opportunity!	3/6/2015 5:16 PM
100	I live near 23rd & John, and Alternative 2 actually *reduces* my service (reduced frequency on the 43) while providing no new benefits.	3/6/2015 5:02 PM
101	I like keeping the 43, but the rest of Alternative 2 seems pretty weak and unambitious.	3/6/2015 4:44 PM
102	Wow!	3/6/2015 3:48 PM
103	Less efficient, more costly.	3/6/2015 3:43 PM
104	Alternative 2 doesn't benefit my travel at all.	3/6/2015 3:29 PM
105	This alternative sucks.	3/6/2015 3:22 PM

106	As I stated before, pursuing a conservative restructure like A2 would be the biggest missed opportunity in Metro's recent history. The principle of augmenting a high frequency grid and ensuring that everywhere in the city is accessible with a one transfer ride between two 15 minute or better bus lines is on worth pursuing. I would encourage Metro to retain the mental fortitude in order to resist all the public feedback that wants its existing coverage-oriented service preserved. The people want frequency, some of them just don't know it yet.	3/6/2015 3:19 PM
107	The Route #8 improvements are the main attraction of Alternative 1 for me.	3/6/2015 2:49 PM
108	What about direct connections from the squire park area to the light rail station? The 8 doesn't work very well for me since I live west of 23rd and also too far south of Madison to use the routes that travel in that area. I suppose if the 8 was more frequent/reliable I'd walk further out of my way to use it, but as it is now the wait is often too long.	3/6/2015 2:44 PM
109	Similar case as alternative 1. Why on earth are you eliminating a route that will not be served by the light rail or the expanded service?	3/6/2015 2:43 PM
110	It disregards how much traffic will be alleviated through rail by the streetcar and light rail.	3/6/2015 2:37 PM
111	Does not take advantage of Link - why keep the 43?	3/6/2015 10:27 AM
112	It isn't Alt 1.	3/5/2015 11:57 PM

Q22 How would your use of transit be affected if Alternative 2 were implemented on Capitol Hill and in the Central Area?

Answered: 1,355 Skipped: 5,204

Answer Choices	Responses
I would use transit more	11.14% 151
I would use transit the same	57.05% 773
I would use transit less	11.96% 162
I don't know	19.85% 269
Total	1,355

#	Why?	Date
1	...	4/2/2015 2:35 AM
2	It's my primary commuting method. I don't own a car, so I'll rearrange my commute regardless of which alternative is chosen. It's just that some alternatives will be more or less convenient. A real question is how easy the access will be between the new U District station and the main campus.	4/1/2015 4:53 PM
3	Link would get me to Capitol Hill and Husky Stadium/UWMC much more quickly and reliably. Beyond that, the bus restructures wouldn't add much for me.	4/1/2015 2:23 PM
4	Nothing has improved under this concept.	4/1/2015 1:08 PM
5	Because I could access the Capitol Hill Light Rail station and still access Seattle Center.	3/31/2015 10:44 PM
6	currently, use of transit in this area is limited by lack of frequency of service; this would not change with this concept.	3/31/2015 9:35 PM
7	Keeping service to Madison Park / Madison Valley will mean I don't have to drive my car!	3/31/2015 9:25 PM
8	No way for older and disabled taxpayers to get to the transit center	3/31/2015 4:44 PM

9	Used for medical appts.	3/31/2015 4:09 PM
10	I would add the Link service to my available options	3/31/2015 4:07 PM
11	Possibly more, since I would use the new Link service as well.	3/31/2015 3:57 PM
12	I'm Transit-dependent.	3/31/2015 2:35 PM
13	I understand the reason for pushing light rail, but light rail won't benefit all of us. The changes proposed directly impact my route. I'd have less access to downtown and would end up on busier buses.	3/31/2015 2:00 PM
14	Reduced frequency of 43.	3/31/2015 12:47 PM
15	Same.	3/31/2015 12:26 PM
16	I have no choice. I have to use transit.	3/31/2015 12:22 PM
17	It wouldn't change transit very much for me.	3/31/2015 12:19 PM
18	The reduction in frequency would increase the amount I would need to use my car.	3/31/2015 12:11 PM
19	Connections from where I live to the light rail station are important for days when I don't have the time or ability to walk.	3/31/2015 11:58 AM
20	Accessible, convenient service to Downtown and U District.	3/31/2015 9:40 AM
21	The frequency of route 43 would drop.	3/31/2015 8:51 AM
22	I need to get (without transfer) from Boyer/Newton to the University and downtown. I am worried the 43 or 48 service will change	3/31/2015 8:49 AM
23	It provides me reasonable access to central capital hill without transfer.	3/31/2015 7:06 AM
24	I am waiting to see if it is going to be feasible time wise to use the light rail.	3/30/2015 10:12 PM
25	though disliking the decreased frequency	3/30/2015 10:08 PM
26	I worry about enough service to the Broadway train station from North Capitol Hill area.	3/30/2015 9:54 PM
27	Because the bus lines that I use would remain instead of disappear.	3/30/2015 9:31 PM
28	Bus use would be the same, but improved access to Light Rail would increase use.	3/30/2015 8:57 PM
29	If I understand, there would be minimal change in the 43 and so my ridership would remain the same. I may have read alternative 2 wrong?	3/30/2015 8:06 PM
30	I simply want route 43 to be maintained.	3/30/2015 6:44 PM
31	Nothing significant would change.	3/30/2015 5:44 PM
32	Because you would be taking the bus I rely on and getting rid of it.	3/30/2015 5:34 PM
33	The cuts in service make my commute nearly impossible, certainly much longer. I would need to drive. Additional cuts create significant inconvenience for me.	3/30/2015 5:27 PM
34	Generally, I have concern for any changes from Metro current service, UNLESS THERE IS AN INCREASE/IMPROVEMENT OF SERVICE (additional routes, frequency & buses). ANY PLAN THAT DELETES ROUTE 43 IS UNACCEPTABLE. ANY PLAN THAT REDUCES SERVICE TO ALL NEIGHBORHOODS, INCREASES WALK & WAIT TIME TO/FOR BUSES IS UNACCEPTABLE. Living in the west edge (7th to 8th Ave NE, NE 45th St to NE 47th St) of the U-District, using Light Rail is not really an option I will consider except for novelty from time to time or if going to SeaTac, which I never do. Both Alternatives appear to reduce service to my area of the U-District. I go to the Group Health area of Capital Hill (I call East Capital Hill) 2-4 times a week. Deleting route 43 or its current frequency will be a burden for me. Using route 48 & 8 increases walk time 10 min and wait time 10-15 min (I've tested it the past 2 weeks). It takes me an average of 20 min of additional time from leaving my home to reach my destination in the Group Health area.	3/30/2015 2:41 PM
35	Cap Hill is a secondary destination.	3/30/2015 2:26 PM
36	I'm used to it.	3/30/2015 11:16 AM
37	Depends on the modification to the routes. Increased routes, probably use more.	3/30/2015 10:54 AM
38	if the wait times were longer and didn't match my schedule, I would be more likely to take an uber or cab.	3/30/2015 10:12 AM

39	I don't own a car and rely on Metro buses and walking for transportation. I don't know if these changes would increase, or decrease, my use of transit, but it sounds like wait times and transfers could take longer, and the travel time from NE Seattle to Capital Hill/First Hill/Central District is already very long.	3/30/2015 10:01 AM
40	I travel from Renton and Kent	3/30/2015 10:01 AM
41	Continued reliable services between UDistict-Bellevue/Redmond-International District	3/30/2015 9:25 AM
42	similar to current	3/30/2015 7:21 AM
43	I mostly use transit that is frequent or has very reliable transfers	3/29/2015 10:47 PM
44	The routes are close to the same, so I'd use them the same.	3/29/2015 9:15 PM
45	Because it's basically unchanged.	3/29/2015 5:42 PM
46	Because Alternative 2 makes no changes to the system!	3/29/2015 5:23 PM
47	It keeps my main bus routes - 11 and 8 - the same	3/29/2015 5:15 PM
48	I can access the light rail services given the existing service map/frequency. If anything, I may use transit more because there will be an additional option (Capital Hill light rail to UW) for me to get from home/work.	3/28/2015 1:13 PM
49	Concerning for the lack of transit service in more outlying areas (e.g. Madison Valley)	3/28/2015 1:07 PM
50	Don't like to drive and park in these congested areas.	3/28/2015 10:49 AM
51	I would use light rail the most, trying to get to NE Seattle, (Children's)	3/28/2015 9:58 AM
52	Still not very easy to move around.	3/28/2015 1:25 AM
53	I already use transit exclusively, this would let me continue, assuming the frequency of 43/25 didn't drop too much.	3/27/2015 9:14 PM
54	I HAVE ALREADY ANSWERED THIS QUESTION	3/27/2015 6:31 PM
55	Currently take the 12 every day, would probably continue to use the 12, or may consider a transfer to one of the light rail stations (43 or 48)	3/27/2015 4:15 PM
56	I would expect to make more use of the Link service.	3/27/2015 3:51 PM
57	no improvement for me	3/27/2015 2:50 PM
58	Its the status quo	3/27/2015 2:38 PM
59	There aren't many significant changes that would impact my use.	3/27/2015 1:59 PM
60	I don't travel widely enough in Capitol Hill to know.	3/27/2015 1:58 PM
61	I depend on mass transit for my work and personal life. If you you cut availability you can be affecting my livelihood and my social life	3/27/2015 1:50 PM
62	The 43 only coming every 20 minutes during peak times? Are you kidding me? I'd be better off walking the 2+ miles. Maybe I'll just buy a car. This is not an improvement.	3/27/2015 1:45 PM
63	Not good for my area	3/27/2015 1:29 PM
64	Only option.	3/27/2015 1:24 PM
65	If my routes (11 or 43) were still intact, I would continue to use them.	3/27/2015 1:10 PM
66	I use transit up and down the hill from downtown Seattle - don't often travel North to South on the hill.	3/27/2015 10:11 AM
67	Improved service along the #8 line would allow me to take that route more. Right now, I try to avoid it because of the frequent delays. Frequent service along the pike pine corridor would keep me using these service routes daily.	3/27/2015 10:09 AM
68	My trip form Madison Valley to Downtown Seattle would still likely be significantly faster than walking.	3/27/2015 9:20 AM
69	Better connections and eliminates needing to drive	3/27/2015 8:46 AM
70	Because of reduced service.	3/27/2015 8:29 AM

71	I always pick transit whenever possible. If short of time or walk is too far (especially since one has to usually walk on both ends of transit route), I would alter trip.	3/27/2015 8:12 AM
72	Les frequent service to major sections of the city	3/26/2015 4:43 PM
73	Much easier for my family and I to get where we need to go with this method.	3/26/2015 1:09 PM
74	The addition of light rail to the network will make access to downtown slightly faster (I hope), but the reduction in frequency of route 43 offsets that potential gain.	3/26/2015 12:00 PM
75	I work downtown.	3/25/2015 9:54 PM
76	Don't use transit often to travel inside capitol hill	3/25/2015 2:20 PM
77	Anything is better than the current situation	3/25/2015 1:31 PM
78	I don't own a car and would have to figure out a way to adopt to Alternative 2.	3/25/2015 11:11 AM
79	I would have access to the lightrail station from south east capitol hill much quicker and easier. especially since I don't own a car, efficiency and the convenience of being able to carry things and get to places I need to get to is greater than alternative 1 plan.	3/25/2015 10:30 AM
80	Most of my current service would not be disrupted and the service to light rail and tunnel transit would be enhanced.	3/24/2015 11:40 AM
81	Very little disruption and some added connections to tunnel transit and SODO on Link.	3/24/2015 5:29 PM
82	This alternative offers no real improvement in connectivity.	3/24/2015 4:10 PM
83	It's pretty much what I have now.	3/24/2015 3:30 PM
84	capital hill is more assessible via tranist	3/23/2015 10:43 AM
85	I already use it all the time.	3/22/2015 7:01 PM
86	Sounds like it keeps 43.	3/22/2015 3:04 PM
87	No car.	3/22/2015 11:26 AM
88	Because I would actually be able to get some place from my house.	3/21/2015 7:41 PM
89	Keeps the buses in the areas I need them	3/21/2015 11:20 AM
90	same reason as above	3/20/2015 11:43 PM
91	As the reliability of the 8 gets worse every year, it will eventually be faster to walk this corridor than take the 8. Wait, never mind, it is already faster to walk than take the 8. Doing nothing to improve the 8 is a crime. I can't believe something to help the 8 wasn't included in Alt 2.	3/20/2015 8:14 PM
92	Look, I can't use transit more or less. I'd just be more irritated.	3/20/2015 8:13 PM
93	Because the 8 sucks and Alternative 2 would not improve it.	3/20/2015 7:19 PM
94	It is a complete abandonment of downtown and central bus service in favor of stupid wrongheaded solutions created by King County metro to serve regions other than the central city -- trying to con people that don't want bus service into riding, while abandoning we who do want more routes.	3/20/2015 5:39 PM
95	Transfers suck.	3/20/2015 2:52 PM
96	My transit options would be maintained.	3/20/2015 1:34 PM
97	I don't have a car.	3/20/2015 1:24 PM
98	I hope it would be more, if there were two choices for more frequent service to downtown. #11 and #43	3/19/2015 10:02 PM
99	I will use it to get to the light rail on Capital Hill and the Univ. of Washington.	3/19/2015 9:59 PM
100	I already drive to the Seattle Center instead of taking the 8 if I'm going to anything in the evening, that might not change (although a bus -> link connection might change that...)	3/19/2015 4:05 PM
101	If you manage to get your heads out of your ass and keep a reasonable amount of bus service for north capitol hill and montlake i would actually keep using the bus.	3/19/2015 3:58 PM

102	This seems like an okay concept, just less convenient than Alternative 1. I would rather the routes be reliable and frequent than not have to travel as far to get to them.	3/19/2015 3:36 PM
103	see answer to #10.	3/19/2015 3:24 PM
104	Regardless of what changes, I am completely dependent on transit to get around so I can't change how often I use it depending on how "convenient". I have no alternatives.	3/19/2015 3:10 PM
105	Similar to current plan	3/19/2015 2:44 PM
106	I don't own a car, so I don't have any other choices if I want to go longer distances.	3/19/2015 2:14 PM
107	No car [same reason as for Alt. 1]	3/19/2015 2:04 PM
108	Prefer alt 1, but still would be more service	3/19/2015 1:31 PM
109	I use light rail as my primary transit, and that would increase as I went to capitol hill more for events and things. But without tying a frequent bus network to the station, I'm less likely to hop a bus to go to other parts of capitol hill/central district that are outside of the station walkshed.	3/19/2015 12:13 PM
110	The most impactful changes in Alt1/2 for me are to the east side routes,	3/19/2015 11:32 AM
111	I live in Montlake, and having this connection to both Capitol Hill and the light rail would probably mean I go around town more often.	3/19/2015 10:27 AM
112	I have to.	3/19/2015 10:11 AM
113	The routes I use would remain the same.	3/19/2015 9:00 AM
114	Does not concern me.	3/19/2015 2:12 AM
115	This is a terrible idea. For anyone living in North Capitol Hill more than five minutes walk from the Broadway and John light rail station, this will mean longer commute times to the University District. I make this commute every single day. These buses are full every day, and most travelers from the UW to Capitol Hill get off the 43 more than 5 minutes walk before Broadway and John. Moreover, the walk from the UW light rail station will add an additional five minutes to my journey. I estimate that my daily commute from my house (16th and Republican) on the light rail will be 20 minutes LONGER than it currently is using the #43. This is not public transportation progress. It is a light rail boondoggle. Sincerely Robert Wood Professor, University of Washington PS. The same thing happened with bus route 194 which reliably took passengers from downtown Seattle to the airport in 30 minutes until it was cancelled because of the light rail. The trip now takes 40-45 minutes on light rail. Is this progress? The idea is that new transit systems augment the public transportation system, not replace existing components.	3/18/2015 8:55 PM
116	Doesn't help me get anywhere in those neighborhoods from my home, or even from downtown.	3/18/2015 8:42 PM
117	N/A	3/18/2015 8:10 PM
118	Convenient for traveling downtown for entertainment, shopping	3/18/2015 4:57 PM
119	Less impact	3/18/2015 2:46 PM
120	Only slightly more, easier to get to airport.	3/18/2015 2:44 PM
121	Lack of frequency! I would probably stick exclusively to light rail travel and walk to final destination.	3/18/2015 2:25 PM
122	See above.	3/18/2015 1:54 PM
123	Using transit with Link would decrease my waiting time and travel time.	3/18/2015 1:40 PM
124	I would have better options coming home from Redmond getting to Capitol Hill. Right now it's either 545 through traffic on I5 or get off at montlake, wait a random amount of time for the 43 (or 48 if I'm willing to walk 2 miles)	3/18/2015 1:20 PM
125	No car	3/18/2015 12:49 PM
126	I don't travel over Capitol Hill much, just once or twice a month. I think that Route 43 would still get me to where I need to go with this alternative. Light rail will not get me where I need to go when I visit Captiol Hill.	3/18/2015 12:48 PM
127	It's convenient.	3/18/2015 12:41 PM
128	I would bike	3/18/2015 12:33 PM
129	I would have more choices.	3/18/2015 11:54 AM

130	I use the 8 often, so I would continue to use it, with the continued aggravation it brings as it is now.	3/18/2015 11:41 AM
131	It would broaden my transit options rather than restrict them. Light rail provides fast and reliable service, I also want my normal buses for less travel to light rail and more options.	3/18/2015 11:35 AM
132	It keeps my transit to work bud	3/18/2015 11:26 AM
133	The 8 is the perfect route for me, but the crowdedness and lateness during rush hour makes me want to take it much less....	3/18/2015 11:16 AM
134	I prefer alternative 1. When transit starts getting to frustrating, I start riding my bike more and considering buying a car.	3/18/2015 10:09 AM
135	frequency!	3/18/2015 1:21 AM
136	It would be more pleasant to transfer to Link and get to Capitol Hill faster, but I already use Metro to its full extend when traveling within city limits	3/18/2015 1:10 AM
137	I would still have access to my routes, which is important. I would use it MORE if it weren't for the cuts to frequency, which is stupid.	3/18/2015 12:20 AM
138	Because that's how I use it now.	3/17/2015 11:50 PM
139	See #9!	3/17/2015 8:27 PM
140	See previous answer in Alternative 1.	3/17/2015 6:04 PM
141	I still need to use it.	3/17/2015 2:38 PM
142	I continue to increase my ridership because the existing one-seat local and commuter travel is convenient. If the existing service continues I will continue increasing my ridership. If you destroy local transit in an effort to divert local transit dollars to Sound Transit's light rail excesses, then I'm done with you.	3/17/2015 1:08 PM
143	I depend on transit for most of my transportation needs.	3/17/2015 12:00 PM
144	I feel like my use of the 8 is the only thing that would be effected (I don't really care about this route personally though I agree it is not reliable)	3/17/2015 11:35 AM
145	It wouldn't change much so it would remain about the same.	3/17/2015 10:52 AM
146	Makes it convenient to get to redmond during off peak hours, specifically the weekend.	3/17/2015 12:10 AM
147	I would continue to use 10 and 49 the way I currently do.	3/16/2015 5:08 PM
148	Alternate 2 seems to be the same as what I have currently from what I can tell	3/16/2015 4:39 PM
149	Easier access to Capitol Hill from downtown.	3/16/2015 3:10 PM
150	I walk a lot anyway and use the bus when I have far to go, not enough time or pedal power, or the weather is bad.	3/16/2015 2:41 PM
151	Existing 10/11/12 service meets my needs from 19th & Madison area. Alternative 1 is devastating to my needs.	3/16/2015 2:37 PM
152	Route 8 is the main route from Madison Valley to South Lake Union.	3/16/2015 1:17 PM
153	I use the 43, 10, and 8 to get from downtown to 15th Ave.	3/16/2015 12:52 PM
154	I don't own a car and already rely predominantly on transit to get around the city and region.	3/16/2015 12:52 PM
155	The 43.	3/16/2015 12:32 PM
156	I am so sorry but the proposed changes are very confusing and I am not sure how this will impact me so I don't have enough understanding to provide feedback	3/16/2015 12:30 PM
157	Still frustrated by unreliable and infrequent busses, but would continue to use due to wide breadth of network.	3/16/2015 12:21 PM
158	It depends on how time efficient and reliable these routes turn out to be. These changes may make traffic so bad it's faster to walk a few miles.	3/16/2015 11:51 AM
159	Longer walk to Husky Stadium station	3/16/2015 11:47 AM
160	no montlake station on 520.	3/16/2015 11:47 AM
161	I will continue to use whatever transit available to me as I don't own a car.	3/16/2015 9:17 AM

162	Do not own a car.	3/16/2015 7:29 AM
163	I visit Capitol Hill via whatever transit is available	3/15/2015 8:34 PM
164	Route 8 connects all the bars and clubs between Queen Anne to Capitol Hill. It's a life-saver especially when you're too drunk to drive and the incimate weather prohibits you from walking around. Cutting back service will hurt businesses along the corridor and make it more difficult for tourists to see what Seattle has to offer.	3/15/2015 5:20 PM
165	I would use transit about the same because alternative 2 makes very few meaningful changes relative to the current system. The current system does not meet my needs as a visitor to Capitol Hill and for the most did not meet my needs as a resident when I lived there. Alternative 2 does not change this, but alternative 1 does (somewhat).	3/15/2015 4:53 PM
166	I might use transit a little less. Not really sure about that. The reality is that this proposal is simply not as conceptually strong as alternative 1. There are details to quibble with for sure, I don't know enough about those, but as far as creating a faster network, alternative 2 is less good than alternative 1. And therefore would induce me to travel more often via Metro less.	3/15/2015 2:18 PM
167	Its where I live!	3/15/2015 9:59 AM
168	Too far from Madison store and shops to a bus stop	3/14/2015 10:54 PM
169	I use the bus everyday to get to work, once in a while to go downtown or to the U district, and on occasion to get to the light rail to go to the airport.	3/14/2015 4:01 PM
170	Fewer changes, more bus access to Captiol Hill from the University District.	3/14/2015 3:04 PM
171	It doesn't eliminate the route options I rely on	3/14/2015 4:57 AM
172	Central Seattle is becoming less practical for SOVs.	3/13/2015 9:18 PM
173	Still have to use the 8 for almost all my transit.	3/13/2015 6:41 PM
174	N/A	3/13/2015 4:01 PM
175	What is Alternative 2 ?	3/13/2015 2:52 PM
176	I just don't know.	3/13/2015 12:38 PM
177	Shorter/faster transit time	3/13/2015 10:59 AM
178	This plan doesn't sound like it offers anything which would make transit to Cap Hill appreciably more accessible for me.	3/13/2015 9:53 AM
179	Improve 12th Avenue Service, current Metro destinations in CD/Cherry Hill are practically useless. I choose to walk or other transit modes 99% of the time.	3/12/2015 7:43 PM
180	Keeps the routes that I use for work.	3/12/2015 5:55 PM
181	My regular routes are the 43 and 48, which currently have some of the most frequent service of any Metro routes. I can't imagine any changes to these routes that would improve transit for me.	3/12/2015 3:35 PM
182	Infrequent service.	3/12/2015 2:37 PM
183	As for Alt. 1, I don't often have a need to go to these areas.	3/12/2015 1:57 PM
184	Well, it wouldn't affect much, would it?	3/12/2015 12:45 PM
185	Most of my transit use relies on the 10/11 to downtown for transfers. I'm sure I'd end up doing the same thing instead of taking advantage of walking to the new Link station.	3/12/2015 11:40 AM
186	I use it every day already	3/11/2015 10:17 PM
187	Nothing would substantially change	3/11/2015 7:49 PM
188	I would have to judge the then current schedule to suit my travel plans.	3/11/2015 6:52 PM
189	I'm old and as I get older I will be using the bus more rather than driving.	3/11/2015 3:39 PM
190	I use transit all the time during the week. This won't change. Only the convenience will change.	3/11/2015 1:25 PM
191	reduced frequency = reduced utilization. We were making moves to reduce to a 1-car family, definitely not now.	3/11/2015 1:04 PM

192	Because my service levels aren't directly affected on my work-commute. Overall, random or supplemental rides don't account for a sustainable nor forecastable amount of transit use on my part.	3/11/2015 11:39 AM
193	as above.	3/11/2015 10:33 AM
194	I rely on Routes 11 and 12, so this won't eliminate them like Alternative 1	3/11/2015 10:26 AM
195	Doesn't provide me with anything beyond what we already have. If anything my use of transit would likely decrease over time as these routes (8, 48) become less reliable in their current configuration as the city gets more dense.	3/11/2015 10:22 AM
196	I would be happy with the continued use of route 49 through Pike/Pine and into downtown. It is also helpful to have route 8 going to the Seattle Center.	3/11/2015 8:49 AM
197	I'll be able to access the train more for longer trips (Northgate, Beacon Hill), and the occasional trip to SeaTac.	3/11/2015 7:53 AM
198	Maintains the current routes that I use regularly.	3/11/2015 7:02 AM
199	Although Route 43 service is preserved, the frequency doesn't seem adequate enough. Car2Go or driving a personal vehicle become better alternatives.	3/10/2015 9:27 PM
200	I would not force riders to walk through high crime areas along 23rd and Madison.	3/10/2015 7:39 PM
201	Similar to the status quo for most trips I make	3/10/2015 7:03 PM
202	I don't often travel by metro in this area	3/10/2015 5:30 PM
203	Because it retains my existing travel pattern from Madison Valley to SLU	3/10/2015 4:50 PM
204	It is currently easy to access capitol hill without transfer, but now I would have to bus to the link station and then take the light rail. Easier to drive.	3/10/2015 3:55 PM
205	Lack of direct route between the central district/madison valley and the downtown shopping district.	3/10/2015 2:58 PM
206	As I don't have a car, I would still rely on transit the same as I do now.	3/10/2015 2:35 PM
207	43 bus would not come frequently enough for me to use it reliably	3/10/2015 2:21 PM
208	I would be able to continue to use route 49 between Portage Bay and downtown, with frequent service and without a transfer to light rail	3/10/2015 9:15 AM
209	It might cause me to use transit less if I can catch buses when I need to in the day.	3/10/2015 9:03 AM
210	My usual routes would not be cut or reduced so I'd use transit the same.	3/10/2015 6:03 AM
211	While it doesn't really matter to me which Alternative is implemented, I worry about the deletion and consolidation of routes and how it will affect other people.	3/9/2015 8:53 PM
212	I ride the 11 bus. It appears that the 11 bus is unchanged.	3/9/2015 8:17 PM
213	Would use rideshare less frequently	3/9/2015 5:59 PM
214	I'd still take advantage of the LINK but its extension would only really help me getting to the airport and Downtown. My U-District trips will likely still be better served by 49.	3/9/2015 5:41 PM
215	looking forward to more options on top of existing ones!	3/9/2015 5:36 PM
216	I commute to work on the 8, and use the 11 to travel downtown and to capitol hill on the weekends.	3/9/2015 5:26 PM
217	This would maintain my access to the routes I use	3/9/2015 4:40 PM
218	Still need to get around the sound	3/9/2015 4:37 PM
219	I would now be able to connect to the Light Rail Station by transit and use that to go downtown or to the airport.	3/9/2015 4:28 PM
220	The connections are still there for the central area	3/9/2015 4:08 PM
221	With the addition of light rail and continued bus service to all parts of Capitol Hill, public transportation will meet most of my needs.	3/9/2015 3:54 PM
222	Need answers to my question to understand how the alternatives will effect me.	3/9/2015 3:09 PM

223	I LOVE the current No. 8 which takes me from Olive and MLK Way directly to Group Health and to South Lake Union and to Seattle Center and to northern Denny Regrade. It is an extremely useful route that my husband and I take all the time. Under Alternative 1, we'd have all this taken away from us. The only way we could have these connections is to transfer from the 38 to the 8. BOO! If I'm understanding correctly, under Alternative 2, the No. 8 route would stay intact. That is what I want.	3/9/2015 2:44 PM
224	Easier, more frequency.	3/9/2015 2:35 PM
225	I don't think any of the changes affect my daily commute from Swedish Cherry Hill down to the stadium district	3/9/2015 2:29 PM
226	I would use transit more frequently if there is service to and from Madison Valley.	3/9/2015 2:16 PM
227	If I can continue with my current commute, then I will continue to ride the bus.	3/9/2015 1:31 PM
228	I use 43 to get to John and 19th. Removal of this connection would eliminate my ability to get to that location from downtown with one bus.	3/9/2015 1:25 PM
229	With less frequent buses, I'm going to drive as it will no longer be a more efficient option (because it is the way the operate currently)	3/9/2015 1:17 PM
230	I would still have direct, relatively quick access to downtown.	3/9/2015 12:36 PM
231	The new light rail station doesn't help me get to downtown faster (with the extra walking added in), and doesn't help me get between East Cap Hill & Maple Leaf at all.	3/9/2015 11:52 AM
232	See above.	3/9/2015 11:21 AM
233	Same reason as above.	3/9/2015 10:49 AM
234	Deos it effect travel from South End to 1st Hill.	3/9/2015 9:13 AM
235	Same as above.	3/9/2015 8:25 AM
236	Same as-is for the CD.	3/9/2015 6:38 AM
237	already no direct connections from the eastside to the major hospitals in seattle	3/9/2015 5:47 AM
238	I like having more accessibility to Boyer. However, not sure on the others - I used to take the 8 but moved a few blocks; not sure this impacts me much.	3/8/2015 8:34 PM
239	Same as above.	3/8/2015 6:31 PM
240	I don't know what the wait time would be for transferring on Madison Ave to Central District	3/8/2015 5:09 PM
241	I would have to transfer a bunch to get to the places I go from Madison Valley.	3/8/2015 12:38 PM
242	Recently retired and changing my patterns of activity.	3/8/2015 10:11 AM
243	If I could get there from Newcastle	3/7/2015 11:30 PM
244	It would depend on frequency of connection from/to Transit Station nearest to my destination.	3/7/2015 7:58 PM
245	I have no alternative since I do not drive.	3/7/2015 5:38 PM
246	Please don't cut the 43	3/7/2015 4:02 PM
247	my route doesn't change	3/7/2015 3:01 PM
248	I could still reach a bus route about as easily.	3/7/2015 1:45 PM
249	I would use it to get to LINK and the U of W which I don't do frequently with current options.	3/7/2015 11:52 AM
250	Plan continues to serve my immediate area (16th Ave)	3/7/2015 11:04 AM
251	I use transit - the route 8 specifically - to get to school (5 days a week), and I would still be able to use it this way.	3/7/2015 10:47 AM
252	Same service, same level of use.	3/7/2015 10:46 AM
253	I have never had a drivers license and rely almost solely on the bus to get me where I need to go. It would continue to allow me to get to businesses I frequent several times per week purchasing items I need on an as needed basis.	3/7/2015 10:22 AM
254	The buses will be there to use, not cut.	3/7/2015 10:11 AM

255	It depends on how easy it is to transfer between the buses and light rail.	3/7/2015 9:39 AM
256	Alternative 2 does not effect my commute as much as alternative 1. My primary bus route is the 48.	3/7/2015 8:53 AM
257	I like the idea of concentrating transit on fewer streets with more frequent service (more buses).	3/7/2015 8:06 AM
258	See previous answer to this identical question!	3/7/2015 7:54 AM
259	No significant change from today	3/7/2015 7:52 AM
260	#8, if cut less in service, I would have to find a different route	3/7/2015 3:57 AM
261	Since nothing is really changing for me.	3/7/2015 1:08 AM
262	I don't own a car so all my trips are on transit.	3/7/2015 12:56 AM
263	mobility is a big question for me. I would NOT like longer distances between stops.	3/7/2015 12:43 AM
264	It would possibly limit the number of times I COULD make No suggestions presently.use of transit in a day.	3/7/2015 12:21 AM
265	It doesn't make my destinations in the areas any more efficient / easy for me.	3/6/2015 11:43 PM
266	Because it would be a hassle and less direct than driving. For the same price I can drive and get there much faster and more directly. It feels like the pressure on the 48 would be intense and it would always be crowded and trying to do too much for too many and it wouldn't at all get me to medical appointments. Parking for medical appointments is very costly. But I'd rather pay than change buses several times.	3/6/2015 10:41 PM
267	no real changes	3/6/2015 10:26 PM
268	because it's not great, just like alternative 1 is not great either...	3/6/2015 10:00 PM
269	Not much difference between the alternatives from my perspective and use.	3/6/2015 9:01 PM
270	I suspect I would have more options available to me for transit combinations so would use transit more efficiently but I don't know.	3/6/2015 8:27 PM
271	Less frequency, no improvements.	3/6/2015 8:16 PM
272	because the routes I already use would most likely remain the same.....	3/6/2015 8:08 PM
273	Use the 8 bus route every day	3/6/2015 7:45 PM
274	there would be nothing to make me use the bus more, but no reason to use it less, either	3/6/2015 7:44 PM
275	I don't drive.	3/6/2015 7:39 PM
276	use transit mainly for work in Madison Valley and home on Capital Hill or going down to Queen Anne or up to Ballard, Wallingford, Northgate, etc...Fremont	3/6/2015 6:00 PM
277	About the same again. I would just have to wait longer for some routes or go somewhere else.	3/6/2015 5:55 PM
278	Additional flexibility with the 545 will make it easier to use.	3/6/2015 5:26 PM
279	I am not sure I understand the changes or know enough about the impacts	3/6/2015 5:20 PM
280	Nothing I currently use on Cap Hill would change.	3/6/2015 5:13 PM
281	Alternative 2 reduces service where I live, making it take longer to get to the Capitol Hill light rail station (and other destinations).	3/6/2015 5:02 PM
282	Get to keep existing uses (that won't involve light rail anyway) PLUS new trips on light rail.	3/6/2015 4:59 PM
283	I have no choice -- I don't own a car. It would	3/6/2015 4:58 PM
284	Same as before, I'm unable to conceptualize the difference.	3/6/2015 4:34 PM
285	Ease of use and frequency of service.	3/6/2015 4:10 PM
286	I would continue to drive to Central Seattle	3/6/2015 4:07 PM
287	I would still have the main route I use, plus I would have access to the extended light rail.	3/6/2015 3:58 PM

288	Same as previous question - I currently avoid going to Capitol Hill because parking is so bad and transit takes so long. Opening up the Light Rail station will definitely increase my travel to Capitol Hill. My use of transit beyond the station will depend on where I need to go at the time. So long as the main streets/areas of the Hill are covered, I will likely use them a lot.	3/6/2015 3:54 PM
289	I don't drive and I still need to get places regardless of the bus schedule and locations.	3/6/2015 3:49 PM
290	NOT	3/6/2015 3:48 PM
291	My needs will not have changed.	3/6/2015 3:45 PM
292	I don't see any advantage for my travel. However, I do not drive and need bus and LightRail to get to most of the places I need or want to go. Therefore, I would use whatever was available. If the First Hill Trolley ever comes to fruition, that would solve many of the drawbacks from Alternative 2.	3/6/2015 3:42 PM
293	Montlake Freeway Station to Kirkland direct	3/6/2015 3:29 PM
294	I always use transit when I travel into Seattle in any case.	3/6/2015 3:29 PM
295	I would use transit less because it would continue to be terrible and unreliable.	3/6/2015 3:22 PM
296	Doesn't provide much benefit	3/6/2015 3:21 PM
297	Because it doesn't do as good a job connecting with the light rail station, the bus service actually becomes less useful to me.	3/6/2015 3:20 PM
298	Not much will change for me.	3/6/2015 3:19 PM
299	44/5/E & D are my most used routes now and in the immediate future.	3/6/2015 3:15 PM
300	I would find a way to make it work.	3/6/2015 3:13 PM
301	I don't think Alternative 2 would be fast/reliable enough for me to increase transit usage where I'm not already using it. However, it wouldn't decrease it either.	3/6/2015 3:09 PM
302	Most of my travel needs would still be met.	3/6/2015 3:06 PM
303	I don't have a car and depend on transit completely, so I don't really have a choice to use it less.	3/6/2015 2:57 PM
304	Presently, my prefer travel alternative is using Rail options for the majority of my travel needs. Buses are available but lack the timeliness features offered by rail.	3/6/2015 2:54 PM
305	No advantage to take me out of a car from South Lake Union/Denny Triangle to east Capitol Hill.	3/6/2015 2:49 PM
306	Again nothing big to draw me in more, but it won't be that bad overall	3/6/2015 2:49 PM
307	Again, I'm not sure that the benefits outweigh the downsides for me.	3/6/2015 2:44 PM
308	I need bus service to travel wherever I go. However, I DO walk to many places, and will continue to do so - especially if service is curtailed or stalls due to clogged streets.	3/6/2015 2:42 PM
309	Metro seems to be becoming a Link station shuttle service. Sometimes I want to go to places other than a Link station. Driving is much more convenient.	3/6/2015 2:41 PM
310	Depending on the specific coverage, I would be less likely to use service due to a greater walking distance to transit point.	3/6/2015 2:41 PM
311	I imagine the 43 connection to the light rail might have me using the lightrail if it is more convenient for longer distance trips - e.g. going to the airport - whereas the prospect of a 20 minute walk with baggage up a hill to the cap hill station makes that unlikely.	3/6/2015 2:36 PM
312	While transit might still be viable to get downtown, making the 43 every half an hour rules it out as a commuting option for me.	3/6/2015 12:22 PM
313	So many of my trips in this area are either accomplished by walking or transit, that it's hard to see minor changes having much of an impact. Unlike with Alternative 1, however, there wouldn't be an increase in connectivity to areas that are NOT reachable on foot from Capitol Hill and the Central Area.	3/6/2015 11:58 AM
314	Unreliable service on the "late".	3/6/2015 11:53 AM
315	No real changes.	3/6/2015 10:27 AM

316	I would use the bus less, because i will switch my commute to rail. This plan doesn't address my existing concerns about the bus network - slow, too infrequent, stops too much, complicated - so I would not use it often.	3/6/2015 9:34 AM
317	Parking is an issue.	3/6/2015 9:04 AM
318	No significant changes.	3/6/2015 8:50 AM
319	The bus network around Capitol Hill wouldn't change much, so my travel patterns wouldn't change much.	3/5/2015 11:57 PM

Q23 How would you improve Alternative 2 on Capitol Hill and in the Central Area – keeping in mind that the goal of this network is to keep more coverage while still taking advantage of connections with new light rail service?

Answered: 283 Skipped: 6,276

#	Responses	Date
1	I cannot offer much to improve this option. This is more in-line with what I desire from metro, which is readily accessible service.	4/2/2015 2:35 AM
2	Electrify the 8, 11, and 48.	4/1/2015 2:23 PM
3	I would support Alternative 1 as it actually changes the network.	4/1/2015 1:08 PM
4	See comments on Alternate 1 - as an option to split the 8 on Capitol Hill and overlap with the 38. This might be good if it increased reliability of the 38 on MLK, but only if frequency was not lost. Extend the 49 to Madison to boost service on the First Hill section of Madison and be able to match the Route 12 service level to the need east of Broadway and on 19th, so we can keep service on 19th.	3/31/2015 10:44 PM
5	Keep the 43	3/31/2015 4:44 PM
6	Improve connections to downtown (5th and Pine for example) from capitol hill outside the reach of route 10	3/31/2015 4:07 PM
7	Look for places where the stated concerns of "experts" in specific problem areas can be mitigated; hybridize where it makes sense to do so to keep the service human.	3/31/2015 2:35 PM
8	Keep the same number of routes for the 43.	3/31/2015 2:00 PM
9	The current route 12 schedule works for my needs.	3/31/2015 1:11 PM
10	If you want to promote less driving and congestion on the roads the Light Rail service between downtown and the U is great, but you still have to provide transit within neighborhoods in order for people to feel like they can still get to their destinations (if not right near the light rail stop). I think it is safe to assume most riders will only switch to Light Rail when it benefits them, so you have to design it so that it can benefit all riders. Maintaining good coverage with connection to Light Rail stations would help in that goal.	3/31/2015 12:58 PM
11	Maintain frequency of 43.	3/31/2015 12:47 PM
12	Preserve direct lines from 24th Ave. area and Madison Valley area to downtown. Population seems to support that continued need.	3/31/2015 12:22 PM
13	Retain route 43 at its current frequency of service.	3/31/2015 12:11 PM
14	Your light rail service is on the other side of a major bottleneck - the montlake bridge. There is nothing you can do to fix that. Removing the 43 to downtown for residents of North Capitol hill is clearly done by folks who don't live here and aren't impacted by it - looking only at numbers. We, who live along 24th's corridor pay very high taxes when metro levy's are passed. Students (who the station primarily serves) don't.	3/31/2015 10:33 AM
15	Provide bus service from Montlake to Downtown.	3/31/2015 9:40 AM
16	Increase frequency of 43.	3/31/2015 8:51 AM
17	I need to get (without transfer) from Boyer/Newton to the University and downtown. I am worried the 43 or 48 service will chang	3/31/2015 8:49 AM
18	if the goal is more coverage, don't eliminate or increase difficulty of access!	3/31/2015 7:32 AM
19	the light rail service is barely available to those in Montlake, we need at least the network that is already in place.	3/31/2015 7:26 AM
20	I just want light rail service to Seattle Children's hospital	3/31/2015 12:22 AM

21	don't decrease freq of routes 25 and 43.	3/30/2015 10:08 PM
22	Way more frequency of buses that remain. Maybe this is more Alt 1 concern -- but I worry about families who need to take the metro bus out to Steven's Elementary.	3/30/2015 9:54 PM
23	By not eliminating the only buses that connect this neighborhood to light rail!	3/30/2015 9:31 PM
24	I really dislike light rail. particularly because it discriminates against wheelchair people.	3/30/2015 8:31 PM
25	Why doesn't Metro merge with light rail and Seattle Transit into one administration and stop spending a fortune on three different agencies? If you want to make improvements, this would be the most cost-effective way to go.	3/30/2015 6:33 PM
26	This is an area where more frequent buses would be helpful.	3/30/2015 6:16 PM
27	I'd split the 8, to provide more reliable connections. I'd also reroute either the 10 or 12 to the light rail.	3/30/2015 5:44 PM
28	Don't assume people who live near the lightrail don't need the bus anymore! Improve on-time service; when people call to complain because they were stranded for an hour by the bus, don't blow them off; make a ride from Capitol Hill to downtown the same cost as the bus or keep both the bus and the lightrail.	3/30/2015 5:34 PM
29	The new light rail service is of little use for me on a regular basis. It doesn't serve the places I travel most.	3/30/2015 5:27 PM
30	As I mentioned earlier, frequency of service is everything	3/30/2015 5:16 PM
31	Generally, I have concern for any changes from Metro current service, UNLESS THERE IS AN INCREASE/IMPROVEMENT OF SERVICE (additional routes, frequency & buses). ANY PLAN THAT DELETES ROUTE 43 IS UNACCEPTABLE. ANY PLAN THAT REDUCES SERVICE TO ALL NEIGHBORHOODS, INCREASES WALK & WAIT TIME TO/FOR BUSES IS UNACCEPTABLE. Living in the west edge (7th to 8th Ave NE, NE 45th St to NE 47th St) of the U-District, using Light Rail is not really an option I will consider except for novelty from time to time or if going to SeaTac, which I never do. Both Alternatives appear to reduce service to my area of the U-District. I go to the Group Health area of Capital Hill (I call East Capital Hill) 2-4 times a week. Deleting route 43 or its current frequency will be a burden for me. Using route 48 & 8 increases walk time 10 min and wait time 10-15 min (I've tested it the past 2 weeks). It takes me an average of 20 min of additional time from leaving my home to reach my destination in the Group Health area.	3/30/2015 2:41 PM
32	Keep Montlake service as is	3/30/2015 10:01 AM
33	Include direct connections for Renton, Kent, Seatac, Federal Way	3/30/2015 10:01 AM
34	See my comments for Alternative 1. I would prefer a solution that ties neighborhoods to their transit stations, uses rail as the backbone for transit and serves neighborhoods with excellent geographic coverage.	3/30/2015 9:27 AM
35	Divide Route 8 or Route late	3/30/2015 7:21 AM
36	Direct connection with Eastlake	3/30/2015 6:56 AM
37	If ridership on the new light rail was consistently high and bus ridership reduced at the end of a 1-year period, I would revisit maintaining all of the service in Alternative 2.	3/29/2015 9:30 PM
38	Take route 9X off Broadway and move it to 12st	3/29/2015 9:21 PM
39	A half-hourly 43 is too infrequent to be useful: you might as well delete it at that point.	3/29/2015 9:15 PM
40	Connect Madison Valley to Link Light Rail	3/29/2015 5:15 PM
41	Keep route 11, but divide the 8 into two routes - one that goes between Rainier Beach and Capitol Hill or 23rd and one that goes from Capitol Hill/23rd to the Seattle Center. This would help improve the reliability of service along the current route 8 while maintaining direct service from Madison Valley to downtown.	3/29/2015 4:51 PM
42	See previous comments	3/29/2015 1:04 AM
43	Maintain current frequency of route 43 to promote ease of transfer to light rail.	3/28/2015 1:37 PM
44	Improvements to the reliability and frequency to the #8 are severely needed.	3/28/2015 1:13 PM
45	don't know	3/28/2015 10:46 AM
46	Connect Capitol Hill to northwest Seattle.	3/28/2015 9:54 AM
47	COMBINE SOME ASPECTS OF THIS WITH SOME FOUND IN ALTERNATIVE 1.	3/27/2015 6:31 PM
48	better connections to light rail.	3/27/2015 6:14 PM

49	Have buss lanes on major streets like Broadway, John St, 23rd ave, 15th	3/27/2015 5:33 PM
50	Add back the route 47 which was cut in February. Many people in that area have no cars.	3/27/2015 3:51 PM
51	implement alternative 1	3/27/2015 2:50 PM
52	Keeping it the same is perfect for me, my husband, and my mom - our little 11-Connected Family. It allows my mom almost complete independence for all her needs and appointments with Dr. at Swedish.	3/27/2015 2:41 PM
53	Keep 43 and its current schedule.	3/27/2015 2:30 PM
54	Use Alternative 1.	3/27/2015 1:59 PM
55	I think it is best to consolidate routes with new Link connections coming in, but that it is best to also keep at least one bus route between neighborhoods in case there is a need for more specific stop locations.	3/27/2015 1:58 PM
56	The geographic coverage is already pretty good. Just have everything come more often everywhere. Dump some money into lobbying the legislature to get us the funding we need to make that happen. This survey is making me feel like everything is terrible. Every situation is lose-lose-lose.	3/27/2015 1:45 PM
57	Same as alternative 1	3/27/2015 1:24 PM
58	Shorten wait times, provide more direct connections	3/27/2015 1:22 PM
59	I feel like the Capitol Hill light rail station will be conveniently accessed enough using the current bus routes 10 and 11 from my home.	3/27/2015 10:09 AM
60	The reliability of route 8 vis-a-vi Denny Way will still need to be addressed.	3/27/2015 9:20 AM
61	can't wait for light rail so exciting	3/27/2015 8:48 AM
62	Increase service to its current levels. Link rail with one stop on Capitol Hill is not an alternative for the convenience of boarding a bus near one's home. I was always afraid rail would be used as an excuse to reduce bus service. Rail should be treated as an addition to the system, not a replacement for some of its components. Aren't you planning for growth?	3/27/2015 8:29 AM
63	I am not sure how to answer these questions. Metro needs to improve the bus frequency and connections between light rail and buses. In my case I want to get to Children's and with the soon to open light rail stations in UW and U District I could take light rail downtown or to Rainer Ave and get a bus home. But if these buses don't run frequently 7 days a week I end up having to drive to work	3/26/2015 11:42 PM
64	improve connections to link light rail service	3/26/2015 4:31 PM
65	Maintain the frequency of route 43 at its current level.	3/26/2015 12:00 PM
66	Put the 48 on the wire.	3/26/2015 9:16 AM
67	More frequent bus service between 8:00 pm to 10:00 pm (especially Route 49).	3/25/2015 9:54 PM
68	I don't know	3/25/2015 8:58 AM
69	I would implement Alternative 1's idea for the 49. This along with the 12 would provided needed service on Madison.	3/24/2015 11:40 PM
70	Not interested in improving Alternative 2. I vote for Alternative 1.	3/24/2015 6:03 PM
71	Metro should avoid forcing transfers where most passengers will want to transfer to another bus or link. It is a waste of time in the system for all to be loaded and unloaded twice. While the loss of the 49 to downtown would not be desirable to some, Capitol Hill and Central College tend to be major destinations. Most on the southbound 49 do not necessarily want to go downtown. The University of Washington is a major northbound destination. Those who have to transfer downtown to the 49 to get to Broadway or Central could use the 10 or Link to get to Central College. I would consider the Alternative 1's plan for the 49.	3/24/2015 5:29 PM
72	Split the 8 at Capitol Hill station to increase reliability for the southern part of the route. Truncate the 11 to Capitol Hill station to allow for increased frequency elsewhere. Reroute the 43 to use the 9's current terminal at 10th and Aloha instead of going downtown so it Link's local shadow service; use the savings to increase frequency.	3/24/2015 4:10 PM
73	Add more frequent runs on Rt. 11 and MAKE THEM RUN ON TIME!	3/24/2015 3:51 PM
74	I would add a north/south route on 12th Avenue.	3/24/2015 3:30 PM
75	Make sure you retain the trolleys and their current schedules.	3/24/2015 3:21 PM

76	One more East West connection across N Capitol Hill	3/23/2015 4:05 PM
77	You need both systems until you have a reliable streetcar and more rail service. Right now by taking it away you will anger voters. I for one will never vote for transportation again if I have to walk at this point. If you have dedicated bike lanes that might work, but you are basically telling everyone in Madison Park, capitol hill, madison valley to walk to work or bike up the hill. Good luck. The rents are high enough, you will not lose the entire population based on transit. Plus my kids will no longer have Metro on buses, nor are there school buses. If you don't have bus for regular people, are there going to be school buses in Seattle now?	3/23/2015 12:56 PM
78	I don't think people who live in Madison Park and Madison Valley need to use light rail on their way into downtown Seattle - that's what buses are good for. Light Rail is fine for people who live close to those hubs, but it's not a substitute for people who live in other outlying areas. Square peg, round hole.	3/23/2015 11:20 AM
79	Look, people can't walk up hills that easily and there are hills in the Capitol hill Madison valley area. If you wish to increase ridership and traffic congestion moving away routes would be disastrous.	3/22/2015 1:06 PM
80	I think it is important to keep more coverage and to bear in mind that even with the two new light rail stations, there will still be large distances between stations where buses will be the only feasible option. The 10, 11, 12, and 43 are all important connections between east Capitol Hill/Madison and downtown, and they will continue to be the best way to move east-west even after the new light rail stations open.	3/22/2015 12:11 PM
81	Make sure 43 and 48 arrival times are staggered so that wait times for a bus are shorter.	3/22/2015 9:47 AM
82	Keep schedules the same all day, every day. Peak/weekend changes are extremely confusing for riders.	3/21/2015 12:36 PM
83	not sure	3/20/2015 11:43 PM
84	I wouldn't improve Alternative 2. I would throw it out. Throw out this stinky, leaking diaper of a plan!	3/20/2015 8:14 PM
85	I would add more normal buses and let the train service evolve organically by providing many more connections to it by all existing bus routes. I would stop cutting existing services to central bus stops throughout downtown and Capitol Hill - - you killed the 9, you killed the 47, you ruined the 7 (or 49 now) and gave nothing back. I want more bus service. The trains are fancy San Francisco Muni like tthat you overpaid for, and now are ruining core bus service in order to afford. Its ridiculous that you even have to ask the public for input like this. It shows how far divorced from reality current King County Metro is. Our central city buses are regularly packed full, run late, and still you cut services.	3/20/2015 5:39 PM
86	Pretty please, is there any way the 8 could run south to Union or Cherry on MLK instead of out to Madison Park? That would preserve service btw Madison Valley and Cap Hill....	3/20/2015 4:32 PM
87	I would maintain even more of the present system than alternative 2 currently does.	3/20/2015 1:34 PM
88	Minimize waiting times between buses as much as possible.	3/20/2015 1:24 PM
89	light rail service is a great addition to the over all transit plan. for those with physical limitations, "walking" the several blocks to the transit stop is not a viable option.	3/20/2015 10:20 AM
90	I would prefer using the 8's routing in Alternative 1 for Alternative 2, while modifying or eliminating the 11 to attempt to remove service duplication.	3/20/2015 7:30 AM
91	Get rid of the 43. What's the point of the 43? It's already a highly redundant route (albeit high ridership) route, so nixing it has almost no noticeable impact on geographic coverage. For most combination of points along the 43 it'll be better served by another bus and/or a transfer onto Link anyways. Might as well get rid of it and use those service hours somewhere else. Use the alt 1 49 routing, as there will be more then enough capacity on Pike/Pine anyways.	3/20/2015 12:41 AM
92	I think that keeping the coverage is important. There are a lot of seniors and disabled people in the city who would be disadvantaged by the deletion of routes.	3/19/2015 10:27 PM
93	what about a smaller circulator bus which would circle from MLK to Madison to Pine then turn around near 12th and Pine to go back down to MLK and Madison.	3/19/2015 10:02 PM
94	The connections to the light rail stations will work fine as currently served.	3/19/2015 9:59 PM
95	I have no particular suggestions for improvement.	3/19/2015 7:05 PM
96	Kill the 43. It's currently a duplicative, but defensible route. The addition of the light rail station ends up dividing the segments of this route where even if you're on the 43 it's probably faster to transfer at Cap Hill station anyways, and there's other routes that serve most of those segments. The Alt 1 49 routing should be brought over.	3/19/2015 4:05 PM

97	You need to fix the 8 - especially before you consider major changes that put even _more_ people on the 8 b/c its the new transfer corridor. If you can't fix the 8 it's fucking useless to tell people that's the main bus they're going to ride up and down the hill on and expect people to use it. Denny is a cluster-fuck, and it's not getting better. If you can't fix that, any plan that relies more heavily on the 8 is stupid.	3/19/2015 3:58 PM
98	The #8 bus MUST be maintained, for the elderly and handicapped in the Rainier valley.	3/19/2015 3:24 PM
99	Make it more like Alternative 1.	3/19/2015 2:14 PM
100	One would have to run certain buses more often, but I'm not sure that is allowed under this alternative. Appears than METRO is clearly leaning toward Alt. 1.	3/19/2015 2:04 PM
101	I would like to See full BTR from the Ferry dock to Lake washington along Madison	3/19/2015 12:54 PM
102	Kill the 43, adopt the 49 changes from Alt 1. I live on the 43 route and take it often, but once the light rail is in for most trips on the 43 will be redundant with not just two buses but the light rail as well. It's hard to justify the 43's existence, especially once the Montlake Flyer stops are removed.	3/19/2015 11:32 AM
103	Show/highlight connection between Madison Valley and Pioneer Square - not clear how above-ground new light rail will impact that.	3/19/2015 11:15 AM
104	The 8 is a mess. My friends and I joke that the only way to fix the 8 from QA to CH is to build a gondola. I know, this isn't helpful feedback. I'm at a loss.	3/19/2015 10:57 AM
105	Make sure current service/stops on bus line s7,8,10,11,12,43,48,49, Rapid Ride Line C/D are maintained!!!	3/19/2015 10:46 AM
106	More Service. Service up to Children's without a transfer.	3/19/2015 9:09 AM
107	Current bus service on Capitol Hill is excellent and allows people to get around the neighborhood efficiently. The Sound Transit addition will be a fast way to go from downtown to Broadway and John and Montlake. This will benefit commuters more than residents.	3/19/2015 7:22 AM
108	N/A	3/19/2015 2:12 AM
109	This is a terrible idea. For anyone living in North Capitol Hill more than five minutes walk from the Broadway and John light rail station, this will mean longer commute times to the University District. I make this commute every single day. These buses are full every day, and most travelers from the UW to Capitol Hill get off the 43 more than 5 minutes walk before Broadway and John. Moreover, the walk from the UW light rail station will add an additional five minutes to my journey. I estimate that my daily commute from my house (16th and Republican) on the light rail will be 20 minutes LONGER than it currently is using the #43. This is not public transportation progress. It is a light rail boondoggle. Sincerely Robert Wood Professor, University of Washington PS. The same thing happened with bus route 194 which reliably took passengers from downtown Seattle to the airport in 30 minutes until it was cancelled because of the light rail. The trip now takes 40-45 minutes on light rail. Is this progress? The idea is that new transit systems augment the public transportation system, not replace existing components.	3/18/2015 8:55 PM
110	N/A	3/18/2015 8:10 PM
111	just leave a connecting bus like the 43 on John st and 15th ave east connecting to UW	3/18/2015 4:31 PM
112	As long as the 49 runs from Roy/Mercer to the U District every fifteen minutes, I'm good. I guess I'm pretty myopic.	3/18/2015 3:24 PM
113	Need direct connection from roughly MLK and Union to both Montlake (for eastside connections), and also, MLK and Union to CapHill Station (for north seattle / south seattle / SeaTac connections).	3/18/2015 2:50 PM
114	Maintain frequent connectivity to 19th and 24th corridors.	3/18/2015 2:46 PM
115	No changes needed.	3/18/2015 2:44 PM
116	Put in more frequent service on the connection streets to the hill from the cd, like union and Madison. The 8 is way too infrequent for the amount of riders at rush hours.	3/18/2015 2:38 PM
117	I have no idea. Smaller, but more frequent buses?	3/18/2015 2:25 PM
118	As I've noted, we need to have service for the people who are in the north capitol hill neighborhood (centered around Bellevue and Roy). When I was injured 2 years ago I could still get to work via the 47. If I was still injured now, there is no way that I could easily get up the hill to the 49 or 10 min walk away (if you're healthy) to the 43 (especially in the winter, it's a problem). We feel a bit abandoned as a neighborhood, and new apartments are going up every month! Thanks.	3/18/2015 1:54 PM

119	Anything that can get Eastside commuters from bridges into mass transit to mitigate the chaos on I-5 and I-405 between the bridges, would make life for thousands (if not 100s of thousands) easier. I drive to Bellevue to commute via 271 from Bellevue to UWMC. In the evening, the driving aspect of my commute between Bellevue and Issaquah is a no-win situation. If Westbound I-90 (Bellevue to Seattle) is backed up, which happens ALL the time, Bellevue Way backs up and I can't go Eastbound I-90. Obviously Eastbound I-90 backups affect me too but are less frequent. I cannot drive via I-405 as it is a parking lot both ways at all times. Please help us bridge-dependent commuters get out of our cars! Additionally, we do not have enough parking in South Bellevue P&R or Bellevue in general. Eastgate P&R access is problematic - so problematic that I bike there if I use that P&R. We need more direct frequent, faster service from Eastgate/Issaquah to UWMC - I'm okay making a connection at I-90 or 520 but there are limited options. Think 556 route, with less stops, more frequent, if possible. Even 271 with less stops would be better. I don't mind walking or biking. When will light rail help with bridge traffic and in-between bridge traffic?	3/18/2015 1:45 PM
120	Keep the 43 route the same	3/18/2015 1:42 PM
121	Anything that can get Eastside commuters from bridges into mass transit to mitigate the chaos on I-5 and I-405 between the bridges, would make life for thousands (if not 100s of thousands) easier. I commute via 271 from Bellevue to UWMC and the driving aspect of my commute between Bellevue and Issaquah is a no-win situation. If Westbound I-90 (Bellevue to Seattle) is backed up, which happens ALL the time, Bellevue Way backs up and I can't go Eastbound I-90. Obviously Eastbound I-90 backups affect me too but are less frequent. I-405 is a parking lot both ways at all times. Please help us bridge-dependent commuters get out of our cars!	3/18/2015 1:31 PM
122	Keep service the same, tax corporations to pay for it.	3/18/2015 12:33 PM
123	keep route 43 the same, I do not want to walk further to get to a stop	3/18/2015 12:19 PM
124	Stop thinking about people going from Capitol Hill to other neighborhoods and start thinking about how people use the bus locally. In addition, think of the extra number of cars going from Madison Valley to downtown. Light rail is great; I would be super-happy to not deal with the stupid Montlake/520 junction anymore. But this is a walking neighborhood where people take the bus when they have heavy packages and/or are not able to walk far. Have your planners even been here? I'm shocked that Alternative 1 would even be considered.	3/18/2015 11:49 AM
125	Improve the equipment on Route 48.	3/18/2015 11:44 AM
126	Frequency of service is a huge need, no matter how you configure the routes and connections.	3/18/2015 11:41 AM
127	Make more direct access available from East CD/Leschi area to Link Light rail	3/18/2015 11:40 AM
128	Light rail and north capitol hill are not well connected to the bus.	3/18/2015 11:26 AM
129	Not sure; I prefer alternative 1.	3/18/2015 10:09 AM
130	Don't adjust service the day LLR starts. Give it a few months. Then make adjustments.	3/18/2015 12:20 AM
131	Add more frequent service. The light rail is currently useless, and will be until it begins running. Make changes to the bus service once it is in place and the effects have been numerically assessed.	3/17/2015 11:50 PM
132	Move route 8 to Mercer corridor in SLU. Delete route 8 between Rainier Beach and Mt Baker station. This segment can be served by a local shuttle that will connect riders to stations.	3/17/2015 12:51 PM
133	Need more east-west routes and more frequency on these routes, especially route 8.	3/17/2015 12:00 PM
134	Alternative 2 is a missed opportunity. While I know a hybrid of these two options will be selected in the end, something more similar to Alternative 1 will bring the best benefit to the region and show forward thinking as we grow and expand our transit system.	3/17/2015 10:52 AM
135	NA	3/17/2015 9:26 AM
136	Your survey is terrible.	3/17/2015 8:19 AM
137	Maintaining surface street bus services throughout the day and allowing choice options whether or not someone chooses to use the new link service or not, and to combine alternate options as best possible for a win win for everyone.	3/17/2015 7:19 AM
138	Do whatever you want with the light rail. I don't care. Just don't screw up the 545 during off peak hours.	3/17/2015 12:10 AM
139	Just go ahead and cut the 43. It will already be faster for most people to backtrack on the existing 48 and take link to downtown, and the additional waiting time due to the lower frequency will make this problem worth.	3/16/2015 3:43 PM
140	Either make the Light Rail <> 542 interchange as painless as possible; or leave the 545 as is...	3/16/2015 2:08 PM

141	More frequent service on route 8, especially during peak hours.	3/16/2015 1:17 PM
142	Improve frequency from downtown & Seattle Center to 15th Ave	3/16/2015 12:52 PM
143	Make it easy to get from lower Capitol Hill to Bellevue, Ballard, The University District, or Queen Anne.	3/16/2015 12:45 PM
144	I am so sorry but the proposed changes are very confusing and I am not sure how this will impact me so I don't have enough understanding to provide feedback	3/16/2015 12:30 PM
145	I am open to changes in commute options. Planning to take the bus more.	3/16/2015 11:51 AM
146	Don't get rid of the Montlake freeway station so you don't have to come up with these tortured transfer scenarios in alternative 1 or 2. You should instead be touting how you will have direct bus service to downtown with an easy stop at Montlake, and when 520 has light rail in the future, that will be done via light rail.	3/16/2015 11:47 AM
147	keep montlake station on 520. I take 44 to 545 and vice versa to go from Stone Way to Redmond.	3/16/2015 11:47 AM
148	Keep building out the light rail over time... Eventually decreasing our dependence on the bus system.	3/16/2015 11:39 AM
149	Provide preferential bus service (lane?) on Denny Way.	3/16/2015 10:49 AM
150	Expand light rail, expand rideshare programs	3/15/2015 8:34 PM
151	Connect Madison Valley to Light Rail via First Hill/Broadway Streetcars.	3/15/2015 5:20 PM
152	My strong preference for alternative 1 should be clear, but if coverage is necessary, I would pursue this approach: Split the routes into 2 "tiers": primary and secondary. For primary routes, pursue a strategy similar to alternative 1: more frequency, wider stop spacing, greater service span, electric trolley wires, stations, etc. For secondary routes, drop frequency to 30 minutes (or run peak only). Organize the secondary network as a feeder system that brings people to the primary network. The main purpose of the secondary network is to serve the niche market of people who strongly prefer waiting to walking or who live in live in low-density single family areas that are essentially auto-dependent, but for whatever reason want / need to use transit anyway. Use branding to advertise that these are two different, complementary networks. Most people can focus their effort on understanding the primary network and even those who use the secondary network don't need to worry about the whole thing, just "their one route" that gets them from their house to the primary network. This split approach allows for the simple mental map advantage of alternative 1 and the creation of a few high quality urban routes while maintaining suburban-level transit quality for those who need it.	3/15/2015 4:53 PM
153	I would add more of alternative 1's thinking into alternative 2 to make it better.	3/15/2015 2:18 PM
154	More frequent service on route 11	3/15/2015 10:59 AM
155	not sure, but I do think we need to continue to offer the service to the people both north and south of the city center, in order to make it truly a working system.	3/14/2015 4:01 PM
156	The route 48 link between UW Link Station and Mt. Baker Station (along 23rd) serves a vital link between North Capitol Hill and access to the Light Rail. Currently, I take the 48 to Mt. Baker Transit Center to access the Light Rail (northbound or southbound). Once the Link Light Rail is complete, from Downtown, I envision taking the service all the way to UW then transferring southbound on the 43 or 48 and getting off on North Capitol Hill (Aloha). Alternatively, when I return from the Airport, I plan to get off at the Mt Baker Station, then catch the 48 northbound, as this will take less time, then all the way to UW and then south bound.	3/14/2015 3:55 PM
157	Alternative 2 is fine with me.	3/14/2015 3:04 PM
158	No changes needed	3/14/2015 4:57 AM
159	Improve Rt #8 & John / Denny traffic constriction. By my estimation "traffic calming" measures in central Seattle have produced as many newly dangerous car-pedestrian conditions as they have solved. I support reduced speed limits in central Seattle. I have witnessed more dangerous driving & pedestrian behavior under newly constricted lanes and revised sidewalk & intersection schemes that project pedestrians further into former traffic lanes.	3/13/2015 9:18 PM
160	I would like you to keep in mind that my goal is to get to and from work as I am now and to have you not implement a plan that makes that worse. Alternative 1 fails to meet my needs. Alternative 2 meets them.	3/13/2015 5:03 PM
161	N/A	3/13/2015 4:01 PM
162	What is Alternative 2 ?	3/13/2015 2:52 PM
163	more frequent busses along rt 11	3/13/2015 2:38 PM

164	In general improve public transit so more people find it an attractive alternative to using their cars.	3/13/2015 1:01 PM
165	Wi-Fi on buses	3/13/2015 12:38 PM
166	More frequent service, longer hours of service.	3/13/2015 9:53 AM
167	Increase frequency of neighborhood routes to the light rail. Alt 2 is the only plan that makes sense to move people from neighborhoods onto the main routes in a city that built transit with the concept of not having park and rides. Routes 25 and 43 are vital links to my neighborhood.	3/13/2015 7:34 AM
168	Increase services on routes that serve schools, such as Stevens, Holy Names, St Joe's, etc.	3/12/2015 10:17 PM
169	What if you take an incremental approach? Why do you need to risk making changes BEFORE you know what transit users like? dislike? Why not wait until AFTER the light rail is running, then consider the travel patterns with light rate, instead of trying to predict transit users behaviors/likes/ dislikes? Computer models are notoriously wrong and why upset us for no reason, other than your theories?	3/12/2015 9:05 PM
170	It would be great if one could transfer between light rail and bus lines without additional costs. In many cities, this is a reality.	3/12/2015 8:43 PM
171	Improve 12th Avenue Service, current Metro destinations in CD/Cherry Hill are practically useless. I choose to walk or other transit modes 99% of the time.	3/12/2015 7:43 PM
172	Light rail service is essentially a north-south benefit. The concern for those of us who live outside that corridor is how to get service across or to the north-south corridor.	3/12/2015 4:06 PM
173	Ditch it. Alternative 1 is better.	3/12/2015 2:37 PM
174	n/a	3/12/2015 2:23 PM
175	- Eliminate the 38 dogleg at Yesler/23rd/Jackson. Just do it already! - Flip the 10 and 12 between 15th and 19th: 10 to 15th via Madison/Marion, 12 to 19th via Pike Pine.	3/12/2015 12:45 PM
176	I would implement the route 8 connection to light rail station; and maintain 11	3/12/2015 10:57 AM
177	The route 11 current "shuttle" schedule is inadequate; the busses cannot stay on time. Simply add vehicles to maintain reliability. Turn-around time downtown is very slow - perhaps turn around on 5th or 6th rather than on 2nd Ave?	3/11/2015 10:13 PM
178	Don't know.	3/11/2015 6:52 PM
179	I'll use the link light rail to the airport IF there are other people on the platform. The only time I tried it to see what it was like, mid-morning from Mt Baker, it was quite scary as there wasn't a soul around except for a couple young men loitering on the pedestrian bridge over Rainier.	3/11/2015 3:39 PM
180	New light rail service is great if you live within walking distance of a LR station. Stop trying to force those who can't walk that far to suffer through a connection.	3/11/2015 1:04 PM
181	Maintain the 19th, boyer and lakeview at some level, and do more alternative 1 realignments...the 43 is pretty worthless in the new light rail world, but north cap hill/montlake/arboretum connections to central cap hill are important, because there are things to do, eat and drink there, and nothing in those other spots.	3/11/2015 11:39 AM
182	Expand service on the 9 to include evenings and weekends. Ensure that the 49 continues as the 7.	3/11/2015 10:50 AM
183	Give up the idea that Link Light Rail is improving public transport options for the Montlake community. Continue to assume that older Montlake riders rely on buses and need regular options to get around the city.	3/11/2015 10:33 AM
184	I don't know enough about this plan. The Transit Blog has only covered Alternative 1 in detail	3/11/2015 10:26 AM
185	Nothing	3/11/2015 7:53 AM
186	Definitely take out the route on 19th and increase frequency on other routes. In general, spacing stops more than 2-3 blocks apart, say 5-7, would speed up travel and not be that much longer to walk.	3/11/2015 5:45 AM
187	more frequent service	3/11/2015 2:38 AM
188	keep #11 on madison east to west end.	3/11/2015 12:53 AM
189	Improve transit (and frequency) to light rail stations to maximize light rail usage. Reducing access to light rail will not optimize usage.	3/10/2015 9:27 PM
190	I would not force riders to walk through high crime areas along 23rd and Madison.	3/10/2015 7:39 PM

191	Alternative 2 is not worth considering.	3/10/2015 7:03 PM
192	Direct route between central district and madison valley to the downtown shopping district. These are in-city neighborhoods that are only a few miles from downtown & it would be ridiculous to not be able to get directly to the downtown shopping district quickly and efficiently without the need for transfer.	3/10/2015 2:58 PM
193	I wouldn't implement Alternative 2	3/10/2015 2:45 PM
194	Service on Denny Way still needs to be improved with or without frequency changes.	3/10/2015 2:35 PM
195	43 needs to come more frequently - Light Rail does not preserve local neighborhood access, which is what I use.	3/10/2015 2:21 PM
196	A	3/10/2015 2:04 PM
197	Alternative 2 is terrible, making no substantive improvements and cutting frequency on the 43.	3/10/2015 1:20 PM
198	Not sure.	3/10/2015 10:52 AM
199	The idea of cutting back Route 25 to eliminate the redundancy with other routes is a good idea but doesn't go far enough. The infrequent service alone prevents it from being successful. There is no reason for it to have to go all the way downtown as this duplicates many other routes. The critical gap in service it should provide is as a neighborhood circulation route to the nearest light rail station. It could instead be operated as a small van route, operating as a continuous shuttle clockwise around Portage Bay, helping both residents and UW students, visitors and faculty easily reach the UW light rail station as the majority of such people are further than the half mile walking distance to the station.	3/10/2015 9:15 AM
200	I would keep it about the same, maybe increase the reliability of the 8, and maybe split the 48 in the University District and electrify the 48 from about 15th ave NE and NE 45th st to Mt. Baker Transit Center.	3/9/2015 8:53 PM
201	No idea	3/9/2015 5:59 PM
202	I'm not sure I can; I think the main problem with Alternative 2 is that some of the routes are prone to congestion at peak and other traffic issues that LINK avoids and has unnecessary redundancy with the new route.	3/9/2015 5:41 PM
203	the basic idea sounds great	3/9/2015 5:36 PM
204	On the #25 route, do not reduce the frequency of the buses which are now once per hour! And add Saturday hourly service.	3/9/2015 4:28 PM
205	I really can't make a recommendation on this.	3/9/2015 4:08 PM
206	Choose certain routes that see the most service e.g. 43 which is frequently full and make those more frequent.	3/9/2015 3:22 PM
207	refer to my previous responses	3/9/2015 3:09 PM
208	Probably look at the 43 & 48 services and see how to combine or merge the efforts without taking away a bus. Maybe make the 43 less frequent or turn into a 48 when it gets to 23rd.	3/9/2015 2:53 PM
209	As I said above, the No 8 route, as currently configured, would connect with Light Rail at Broadway and John.	3/9/2015 2:44 PM
210	Definitely need connection to Link Light Rail from Madison Valley and Madison Park. This is important and would increase the amount of people who would use transit.	3/9/2015 2:35 PM
211	More frequent service on Route #8.	3/9/2015 1:31 PM
212	Make no cuts to the 43. At least keep options for a stop at the light rail station	3/9/2015 1:17 PM
213	If you want to use light rail more we need more parking at light rail or more busses from Park-N-Rides to light rail.	3/9/2015 9:13 AM
214	Scrap it and do Alternative 1.	3/9/2015 6:38 AM
215	establish direct bus connections from eastside to major hospitals in downtown seattle	3/9/2015 5:47 AM
216	Drop 19th ave! there are other options.	3/8/2015 8:34 PM
217	Consider park and rides at the station. Consider bicycle park and rides at the station. Consider it to be one of a series of sunbursts, radiating traffic into the adjacent community. Consider how trashy and unkempt Broadway is right now - it is going to need a big boost for people to consider this to be a desirable destination. More policing, more MID-like cleaning and efforts at increasing the civility of that part of Seattle.	3/8/2015 6:31 PM
218	Keep 8, but terminate at 23rd and Jackson	3/8/2015 5:09 PM
219	Keep 11 or merge it with the madison street rapid ride Make 8 higher frequency option	3/8/2015 4:32 PM

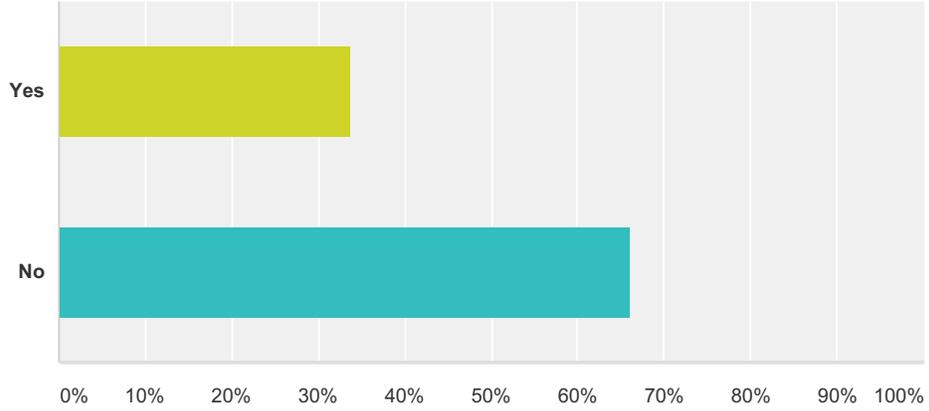

220	Make it look more like Alternative 1	3/8/2015 4:14 PM
221	Service that follows exactly the line of link is excess ie southern route of 8. if cut 66 there would be no route to east side of SLU which services the Cancer Care patients, Plymouth's low-income housing for disabled and disabled veterans, not to mention the tourists going to REI and workers to tech and amazonia.	3/8/2015 3:04 PM
222	Too much redundant, overlapping service, like Routes 43 and 48.	3/8/2015 12:37 PM
223	One way you could improve Alt 2 is to incorporate some of the improvements suggested in the other alternative for the #8. I think we can keep the #11 AND improve the #8.	3/8/2015 10:34 AM
224	No Comment	3/8/2015 3:33 AM
225	Make 25 go up Lakeview to Boston, then down 10th to Roanoke and Harvard to Boyer to UDist to serve North Capitol Hill/Seattle Prep students and U students renting on North Hill.	3/7/2015 7:58 PM
226	Just be sure, if you discontinue the 9X that the link rail follows the same route. People from N. Capitol Hill need to get to the hospitals without having to transfer too often.	3/7/2015 6:53 PM
227	Most of the changes are ok for Alt 2, and I would still combine 8 & 11 to make the better West-East route, and maybe keep Pike/Pine the same, except consider extending either 10 or 12 to be the new Madison Valley extension instead. Right now there are too many buses on Madison that follow the same route to a point. One is fine as long as its frequent and connects with everything. Pike/Pine however could use same or more routes.	3/7/2015 5:08 PM
228	safety walking to/from & a place to park once i get there....none of these routes are within walking distance for me.	3/7/2015 2:20 PM
229	Just focus on making Route 8 more frequent during peak hours.	3/7/2015 11:58 AM
230	n/a.	3/7/2015 11:04 AM
231	Bringing in any actual changes from Alt. 1 would be an improvement.	3/7/2015 10:46 AM
232	Given that most of my frequent travels are on the improved section as show in question 12, it appears to work well for me specifically.	3/7/2015 9:46 AM
233	Scrap it for something more like Alternative 1.	3/7/2015 8:06 AM
234	Make it look more like Alternative 1	3/7/2015 7:52 AM
235	keep #8 and #10 same	3/7/2015 3:57 AM
236	Make the 49 and 8 more frequent.	3/7/2015 1:08 AM
237	Resources freed up, by shift of passengers from NE to Broadway rail station, should be allocated to connecting the Capitol Hill / Central areas more directly to other parts of the city.	3/6/2015 11:43 PM
238	Either have new bus routes from the Station on Broadway or leave either the 12 or the 43 AND service up and down Madison.	3/6/2015 10:41 PM
239	split route 8 at Madison	3/6/2015 10:26 PM
240	Keep more coverage and add connections to light rail.	3/6/2015 10:24 PM
241	Wait for data on actual usage before making changes. As I state above in relation to Alternative 1. I only want very minor changes in advance of light rail launch on Capitol Hill as you don't have enough data. And Alternative 2 is less extreme.	3/6/2015 8:27 PM
242	As before, I fundamentally disagree with the premise of Alternative 2. Regardless, I do think it's possible to do better while still aiming for the same goals: - Same comments about beat frequency. - Delete the 43, and bring back the 47. If the 47 is running, then the 43 has no unique stops, meaning that it does not meaningfully improve the coverage of the proposed network. Bringing back the 47, on the other hand, would greatly increase coverage. - Merge the 49 with the 9. This would not sacrifice any coverage (since the 49 has no unique stops west of Broadway), and it would simplify the network, while also improving connections to Capitol Hill Station.	3/6/2015 8:16 PM
243	stop the gentrification of capitol hillso I would keep the reasons I go there to begin with.	3/6/2015 8:08 PM
244	I would use alternative 1.	3/6/2015 8:05 PM
245	increase frequency of #8 and make it run later	3/6/2015 7:44 PM

246	Make it like Alternative 1	3/6/2015 6:54 PM
247	I can't think of anything.	3/6/2015 5:55 PM
248	Na	3/6/2015 5:42 PM
249	1) Add a 545 stop at the I-5 onramp and remove the dogleg. 2) Build a Denny Way aerial cable car to replace or augment 8 service.	3/6/2015 5:26 PM
250	Focusing on regular and more frequent service along main corridors	3/6/2015 5:16 PM
251	Find some way to make routes more frequent. Split the 8.	3/6/2015 5:13 PM
252	Can't tell if route 43 stops at Husky Stadium - I think it could (rather than going up to 15th Ave NE).	3/6/2015 4:59 PM
253	Make a bunch of changes that make it more like Alt 1.	3/6/2015 4:56 PM
254	Realistically, I don't think holding onto the 12 really makes sense. I'd rather see the 12 replaced with more frequent service on the 10, 8, and 43. It would also hopefully allow for the sidewalks to be widened on 19th Ave E, which could make it a much more pedestrian-friendly street.	3/6/2015 4:44 PM
255	More frequent service on #8 and more service on Pike/Pine.	3/6/2015 4:32 PM
256	Make it more like alternative 1, but keep access to boyer Ave/montlake community center.	3/6/2015 4:30 PM
257	Increase frequency of service to be comparable with Alternative 1, even though I know it's not feasible.	3/6/2015 4:18 PM
258	No feedback.	3/6/2015 4:04 PM
259	Yeah, so I'd mostly keep Alt.1 but with the connector between 24th and downtown that I suggest. Sort of a bit of a combination between Alt 1 and Alt 2 is definitely needed in the capitol hill area.	3/6/2015 3:56 PM
260	Direct service from Madison Park on it's same route as today, but provide 20 minute service all day long!	3/6/2015 3:56 PM
261	?	3/6/2015 3:48 PM
262	Keep the terrain in mind whenever thinking of consolidating lines. In flat areas, walking is a lot less taxing.	3/6/2015 3:45 PM
263	Keep the idea from Alternative 1 of terminating express buses at LINK stations (e.g. SR-520 buses terminating in the University District), but keep Alternative 2's retention of local connections to the routes.	3/6/2015 3:43 PM
264	Don't Know. Isn't that your job?	3/6/2015 3:42 PM
265	Consolidate more routes to increase frequency on major routes.	3/6/2015 3:20 PM
266	I can't improve A2, but can recommend and advise the selection of A1. However, the Madison corridor issue is one I think needs to be addressed by consolidation and simplification.	3/6/2015 3:19 PM
267	No input	3/6/2015 3:13 PM
268	Give the Central Area a linking bus to the light rail that doesn't go all the way into Madison Valley like the 8 does (or all the way down to Rainier like the 48 does). We need a direct bus that goes from 23rd and Jackson to Capitol Hill! Give us a direct, quick bus that is reliable and doesn't take forever to get downtown. When I catch the bus on the weekend from Downtown to the Central Area it can take an HOUR to get home.	3/6/2015 3:08 PM
269	See item 11.	3/6/2015 2:54 PM
270	the 8 is CLEARLY an issue (aka the L-eight) but it's a lifeline - I know it's unreliable but that's partly due to a total lack of service during non-peak hours and the fact that it covers a massive stretch of land - the only way to solve that sounds like combining FREQUENT routes, or just sucking it up. There just isn't another equivalent to connect the Hill to the southeast end.	3/6/2015 2:51 PM
271	I'd still axe the 12, since there's sufficient supplemental service nearby, and pour the benefits into increasing the 8 frequency.	3/6/2015 2:49 PM
272	Maintain or add more frequent service along 23rd Ave E or MLK for N/S trips	3/6/2015 2:41 PM
273	extend the 10 down to 19th.	3/6/2015 2:36 PM
274	Again, I just do not see the benefit in trading 43 and 12 service for more 8 and 48 service. When NorthLink opens, I could maybe see getting rid of the 43 since Link would serve two of the major stops around UW for the 43. But until then? Absolutely not.	3/6/2015 12:22 PM

275	See Alternative 1 for some GREAT ideas!	3/6/2015 11:58 AM
276	More frequent 11 service, break the 8 at MLK in Madison Valley and extend to Madison Park.	3/6/2015 11:54 AM
277	If you keep Route 25, perhaps have it offer a direct connect through Capitol Hill also via Lakeview Avenue E.	3/6/2015 11:02 AM
278	Delete the 43. If the 49 is staying on Pike/Pine, then cut back the 10 to turn north on Broadway and use the old 9-Local's terminal wire. Don't send it downtown - the objective is coverage, and this is retained via a connection with Link. The 49 can be the heavy lifter on Pike/Pine.	3/6/2015 10:27 AM
279	I think it does that. I just hope people understand that the trade-off here is a few blocks of walking for significantly less convenient bus service. Personally, I would choose to walk the extra couple blocks every time.	3/6/2015 9:34 AM
280	Include the 8/11 thing from Alternative 1.	3/6/2015 9:29 AM
281	I'd opt for Alternative 1.	3/6/2015 8:50 AM
282	Maybe have the 11 swing up Broadway towards/past the light rail and then go either downtown via Olive, or duplicate the 8 towards Seattle Center?	3/6/2015 8:42 AM
283	Truncate the 10, 11, 12, 43, and 49 at CHS. Split the 8. Add a new circulator route on Pike/Pine between Westlake and CHS.	3/5/2015 11:57 PM

Q24 Would you like to give us feedback on changes being considered for the Eastside, including service that travels on State Route 520 and State Route 522?

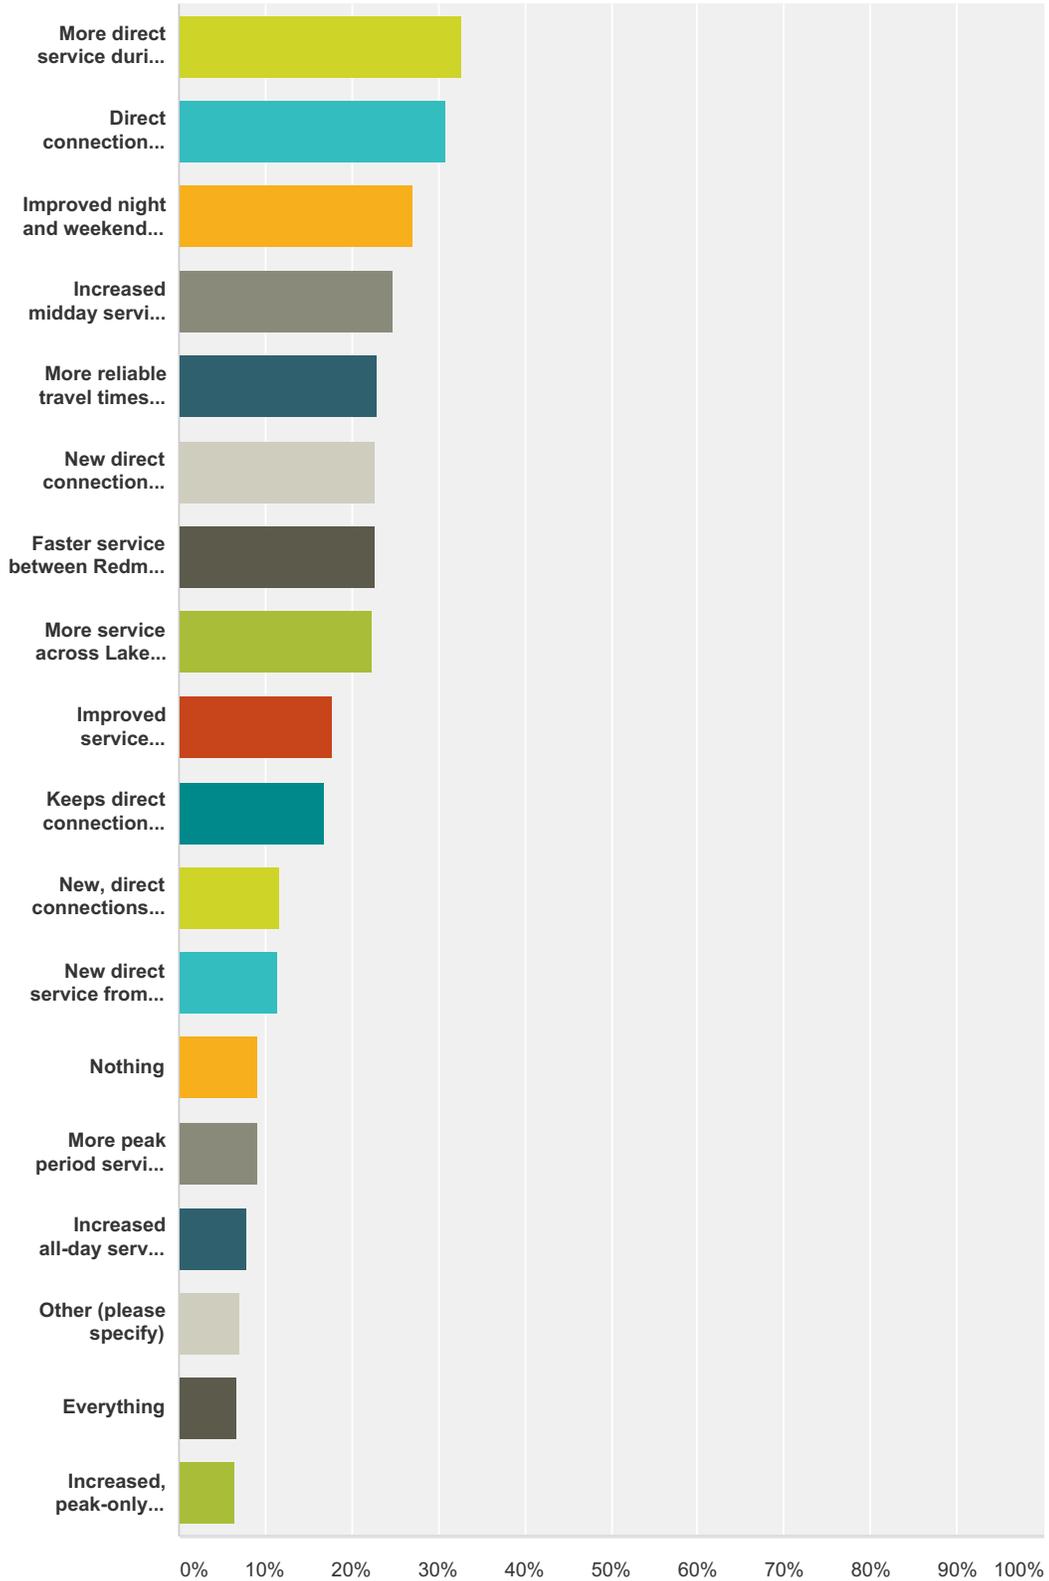

Answered: 4,107 Skipped: 2,452

Answer Choices	Responses
Yes	33.87% 1,391
No	66.13% 2,716
Total	4,107

**Q25 What do you like most about
Alternative 1 on the Eastside? (choose up
to 10)**

Answered: 1,165 Skipped: 5,394

Answer Choices	Responses
More direct service during peak shoulders (on either side of peak periods) from Redmond to downtown Seattle to help address overcrowding (concept for Route 545)	32.79% 382

Direct connection between downtown Kirkland, the University of Washington, Link light rail at the new University of Washington Station, University Village, and Seattle Children's Hospital (concept for Route 255)	30.90% 360
Improved night and weekend service between Eastgate, Bellevue, and the University District (concept for Route 271)	27.04% 315
Increased midday service between Redmond, the University of Washington, the UW Medical Center, and the University District (concept for Route 542)	24.89% 290
More reliable travel times between Redmond and the south end of downtown Seattle, via a connection to Link light rail (concept for Route 542)	22.92% 267
New direct connection between Eastgate, Bellevue, Ballard, Greenwood, and Green Lake (concept for through-routing routes 45 and 271)	22.83% 266
Faster service between Redmond and Seattle Children's Hospital via a transfer to frequent bus service at Husky Stadium (concepts for routes 65, 255, 542, and 545)	22.66% 264
More service across Lake Washington from downtown Kirkland (concept for routes 255 and 256)	22.32% 260
Improved service frequency between Bothell, Kenmore, Lake City, and the University District (concept for Route 372)	17.77% 207
Keeps direct connection between downtown Kirkland and downtown Seattle during peak commute times (concept for Route 255X)	16.82% 196
New, direct connections between South Lake Union, Woodinville, Totem Lake, and Kirkland (concept for Route 311)	11.76% 137
New direct service from Bear Creek Park-and-Ride to the University of Washington and Link light rail at the new University of Washington station (concept for Route 542)	11.42% 133
Nothing	9.27% 108
More peak period service across Lake Washington from the Woodinville Park-and-Ride, Brickyard Park-and-Ride, and Totem Lake Freeway Station (concept for Route 311)	9.18% 107
Increased all-day service to Issaquah Highlands (concept for Route 207)	7.90% 92
Other (please specify)	7.12% 83
Everything	6.70% 78
Increased, peak-only service across Lake Washington from Houghton Park-and-Ride (concept for Route 540)	6.52% 76
Total Respondents: 1,165	

#	Other (please specify)	Date
1	It is not clear if the plan takes I to consideration people who need to catch the 271 in montlake at 520	3/31/2015 4:47 PM
2	more service on Mercer Island and to connect to light rail	3/31/2015 10:26 AM
3	Issaquah to the UW station? There are a lot of us in BELlevue and Issaquah who would use this service.	3/30/2015 8:54 AM
4	More peak service for route 167	3/30/2015 8:42 AM
5	I really hope you are not going to bypass the Kirkland Transit center with peak only 540 route	3/30/2015 7:50 AM
6	more direct service from Bothell to Bellevue	3/28/2015 2:55 PM

7	Would like to see a bus stop on Hwy 520. That you can walk to South Kirkland Park and Ride(Like evergreen pt and 68 st)	3/27/2015 1:23 PM
8	I *MIGHT* have a chance to get a seat on the bus (311) if I can queue up before the crowds of downtown folks arrive on the train, but I'm not optimistic	3/27/2015 1:03 PM
9	Maybe, and I mean *MAYBE* I'll have a chance to get a seat on the bus (311) before the downtown folks arrive for their connection up to Totem Lake. I usually have to stand if I catch the bus at Montlake on 252, 257, 311, or 255 during peak hours. Right now, if I want to reliably have a seat, I still have the 277 option (deleted in future for all options) Frankly, that's about it for those of us traveling between UW and Kingsgate.	3/27/2015 12:34 PM
10	Route 372 must be preserved and improved. The riders on that route have no alternatives with no light rail coming to that area. Route 540 must be preserved, and extended up to NE 116th. Right now it originates in downtown Kirkland, and it has no parking!	3/26/2015 4:17 PM
11	direct connection from Kirkland to Roosevelt off 45th in the University District	3/26/2015 3:30 PM
12	There are a lot of health care workers trying to ride transit to Seattle Children's hospital from Kirkland and the number of connections is prohibiting that from being a viable option for transit on a regular basis.	3/26/2015 9:18 AM
13	direct bus from Bellevue to Seattle Childrens Hospital	3/26/2015 8:56 AM
14	service from south kirkland park and ride to Seattle Children's. More frequently leaving from both areas.	3/25/2015 6:12 PM
15	Direct route to Seattle Children's from north end of lake washington (bothell park and ride or kenmore park and ride)	3/25/2015 2:43 PM
16	Absolutely need to improve 542 frequency and reliability of service. Please extend 542 service hours past 6:30 as last departure time from Seattle to Eastside. This is forcing dozens of passengers to 545 which doesn't even stop at Montlake and 520 due to overcrowding. We are being asked to wait up to 1 and a half hours to get on a bus heading to the Eastside. This is absurd.	3/25/2015 1:26 PM
17	Direct connection to Seattle Children's would be great.	3/25/2015 1:15 PM
18	Pls consider a direct express route for those us who live in Issaquah.	3/25/2015 12:59 PM
19	Direct Route 255 connection to Husky Stadium and other UW sports venues.	3/25/2015 11:32 AM
20	I don't want to change buses and take the risk of standing for half my trip	3/25/2015 8:13 AM
21	I don't want to have to xfr to light rail. it will add to my already long commute time.	3/25/2015 8:12 AM
22	I don't want to have to xfr to light rail. it will add to my already long commute time.	3/25/2015 7:54 AM
23	Improved service on the 372, only if more stops are added between Lake City Way and 25th Ave. NE.	3/24/2015 1:20 PM
24	weekend, midday 542	3/24/2015 11:51 AM
25	again, need more parking for commuters, currently Redmond TC parking is full after 7:15am as well as Bear Creek P & R. parking facilities or lots need to be expanded.	3/24/2015 9:39 AM
26	Other than potentially improving the nightmare that the 255 is currently, I think this option is absolutely terrible.	3/24/2015 7:47 AM
27	I'd like rapid ride added along Rt 202 between Woodinville & Redmond Transit Center --- Rt 202 is extremely crowded during office hours. You also need to improve crosswalks and bus stop locations along Rt 202	3/23/2015 5:14 PM
28	Why is direct service to Children's Hospital a priority?	3/23/2015 10:25 AM
29	PLEASE give us back our 243!!!	3/23/2015 9:43 AM
30	This isn't a territory I know that much about, except parts of 522	3/23/2015 8:26 AM
31	My primary concern is my daily (direct) commute from the Kirkland Transit center to Westlake (Seattle)... I don't see any other place to put this so I'll add it here. One frustration about using the LightRail to go to SeatTac is how early the bus system shuts down. When your flight lands at 11 pm and you have to pick up baggage, get to Westlake and hope to catch a bus, it's just too late. Most city's run some bus service till 1 am or so.	3/22/2015 6:11 PM
32	I could use more frequent and off-peak travel on 255 via 108th in Kirkland to commute for work. But it does not outweigh my other concerns for Alternative 1	3/22/2015 4:21 PM
33	increased number of trips for 311	3/20/2015 6:04 PM

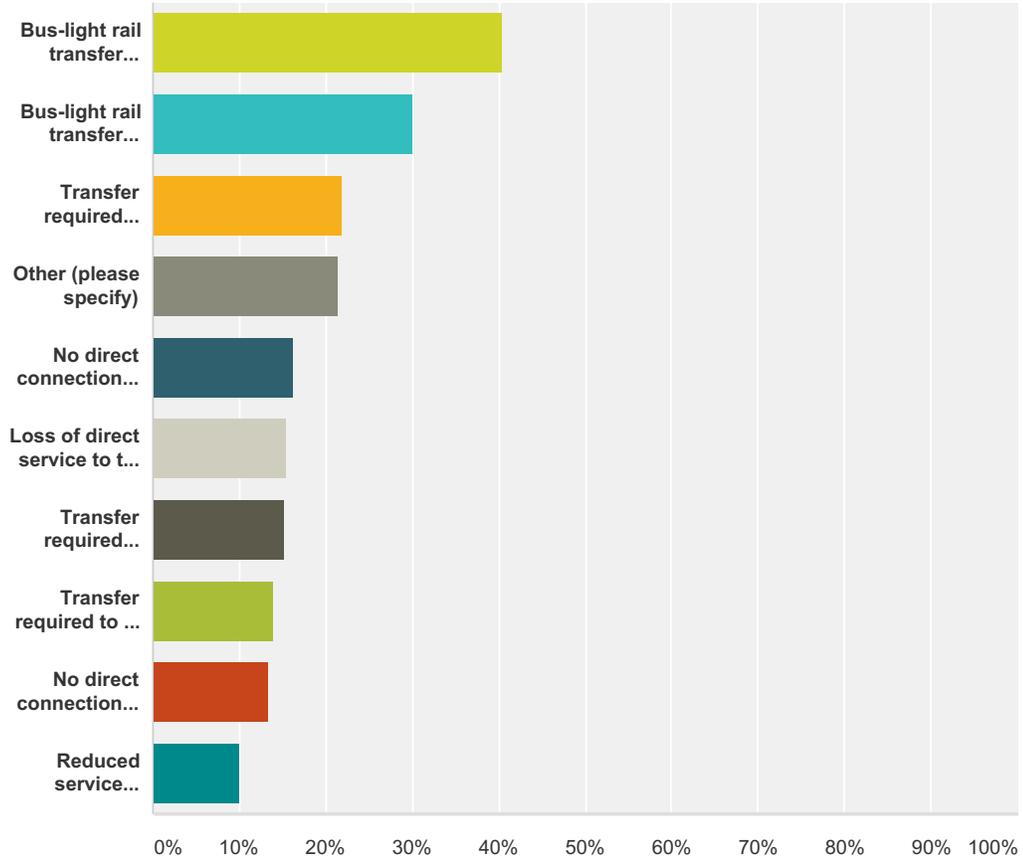

34	This is not a time saver, this would add on at least 30 minutes to my commute. I only live 15 miles from downtown Seattle. You're taking away the only express bus from the Brickyard PNR. Quit catering to Google and Amazon. I'm furious and so are the other 311 riders	3/20/2015 1:35 PM
35	I read the description of the two alternatives but didn't see this level of detail to be able to answer differently, specifically about route 271.	3/19/2015 3:55 PM
36	If we could moves the bus stops on NE 40th ST and NE 51st Street to lower level (similar to 92nd AVE) would save 10-15 minutes by avoiding the traffic.	3/19/2015 10:40 AM
37	Please keep the 545 running through there. Sorry i have to repeat this because this is the only way i get to work and i don't drive. I'd greatly appreciate it. You guys do great work but i'd love that you keep the 545 going from Overlake Transit Center in Redmon to Downtown area etc.	3/18/2015 10:26 PM
38	Kingsgate park and ride to university	3/18/2015 4:18 PM
39	I shouldn't have picked this but I don't seem to be able to go back.	3/18/2015 1:39 PM
40	Services have gone so useless, After over 25 years of using buses, I'll be driving from next month and canceling my bus card.	3/18/2015 1:35 PM
41	Not perfect. The 265 was perfect. Taking the 265 that went up First Hill is sorely missed.	3/18/2015 12:50 PM
42	For Route 271, Alternative 1 is by far the better choice. Please, let's start using Alternative 1. Thank you.	3/18/2015 12:45 PM
43	In general, the ability to transfer buses from/to different destinations on either side of the lake at the 520 freeway stops, made possible by good service frequency.	3/18/2015 12:12 PM
44	Please consider adding additional routes from Redmond, including Overlake Park & Ride, to UWMC. I take 3-4 buses instead of just 2 to get home now that the Metro 250 route has been cancelled.	3/18/2015 11:43 AM
45	I take route 311 from Brickyard; I work in lower Queen Anne. Alternative 1 would require me to take to THREE (3) different buses/trains, and more than likely MORE than DOUBLE my commute time both coming in to work and returning home. I already have an hour and a half commute each way. Is this proposal Metro's way of saying "stay on the Eastside; we don't want you here"????	3/18/2015 10:07 AM
46	Increase auto capacity	3/16/2015 4:09 PM
47	Hate that you are making my commute from Maple Leaf to Redmond take longer	3/16/2015 12:36 PM
48	Ballard Redmond link	3/16/2015 12:04 PM
49	Less frequent stops at 51st street is undesirable.	3/16/2015 11:50 AM
50	Connect Ballard and Redmond not just Bellevue	3/16/2015 11:44 AM
51	I live in Fremont and, in general, in northern seattle, getting to Redmond/East side requires taking a very inefficient v-shaped trip down to downtown seattle and then back up to 520 or hopping on several buses that would attempt to take you in a straight(er) line home but in all likelihood will take longer because you missed a connection (ex - 542 -> 44 -> 16). Would be great if we could fix that!	3/16/2015 11:38 AM
52	More buses going across the bridge to carry bikes	3/16/2015 11:36 AM
53	The fact that bus 256 is only planned to be a rush hour bus and that there's a need to detour to UW to be able to get downtown (and home) using the new tram line: "To downtown Seattle, use Route 256 during peak periods or transfer to Link light rail at University of Washington Station."	3/16/2015 11:14 AM
54	255 is the only bus that frequently connects Kingsgate and Downtown Seattle. Why change the 255 Route to Children's Hospital? Create a new service from the Eastside to the University. Changing buses during the travel to Downtown Seattle adds more time. We need frequent all-day service between the Eastside and Downtown Seattle! You proposal will create slower connection from the Eastside to Downtown Seattle	3/16/2015 7:20 AM
55	This hard to understand on what you are trying to do with the buses. Where is the Rt. 277?	3/13/2015 6:21 PM
56	Woodinville Park and Ride has space to park if you delete route from Bothell UW and Woodinville PR, there are no space to part on Bothell UW.	3/13/2015 1:28 PM
57	More transfers are not an issue for me if the service is more reliable & I don't risk standing on a corner for half an hour or more by missing a tight connection.	3/13/2015 10:26 AM

58	We need a bus from Kirkland to Seattle to run as late as midnight. 11pm is too early. sometimes I get off work at 11pm in kirkland	3/12/2015 9:26 PM
59	I don't understand the proposed changes to 545 included in this text: Keep existing alignment and convert span to two-way extended peak-period-only service. AND even in the text above.	3/12/2015 5:29 PM
60	More space at the Kenmore park and ride! It's frequently full. Buses from this area are always full, and standing room only. Better service to NE Kenmore. NE Kenmore to South Lake Union = 2 transfers and likely 1.5 hours each way. It's faster to be drive in a SOV than take the bus.	3/12/2015 3:54 PM
61	Do not eliminate the Montlake Flyer Stop...make it better,	3/12/2015 2:53 PM
62	Looks like Woodinville gets neither new or improved service.	3/10/2015 10:15 PM
63	South lake union for the 311? How do I get to downtown. Your concept seems to be of another world. You need to get out to Woodinville and tell us what the plan for 311 and 522 is. You have a lot of work to do	3/10/2015 10:00 PM
64	More 545 service is always better.	3/10/2015 4:35 PM
65	weekend service of 545 important, may not need 15 minute frequency but still well used.	3/10/2015 2:44 PM
66	Getting rid of the flyer stop is going to be terrible for folks who commute from the east side to cap hill, the u district etc. Today the 545 and the 542 do great work in this area. Reducing this to just the 542 is going to make what is a very easy commute into a very inconvenient commute. We need another solution for this.	3/10/2015 2:06 PM
67	peak service for the 271 should be extended from 7pm to 8pm	3/10/2015 9:26 AM
68	More service for Bothell necessary.	3/9/2015 10:04 PM
69	Opportunity to increase off-peak frequency of trips to/from Redmond and Downtown Seattle	3/9/2015 5:52 PM
70	I am not seeing direct connection between Bryant area (north seattle) and Bellevue.	3/9/2015 8:38 AM
71	I don't go to the east side very often.	3/9/2015 7:53 AM
72	More frequent service between kirkland and downtown seattle during peak and non-peak hours.	3/8/2015 3:59 PM
73	as long as this consolidation has minimal impact on cars. how is the impact to car traffic being addressed? safety getting to/from; parking at the stop location.	3/7/2015 2:23 PM
74	I commute from NE 56th and Roosevelt to and from Eveegreen hospital in Totem Lake (NE Kirkland) and the one time I used public transit it was a 3 bus two plus hour trauma - not helped by the fact that 66 was unreasonably late. I've never done it again and cannot envision transit that would work for my work schedule.	3/7/2015 12:20 PM
75	The concept of frequent all-day service between Eastgate-Issaquah-Issaquah highlands is brilliant, however as characterized for Alternative 1 principles (more frequent service), however, the details for the 207 shows far less service, going from the 30 minutes to 60 minutes, and eliminating early morning service, eliminating evening service, and eliminating weekend service, which our family of five relies on. The route is superb, but the frequency cuts would be devastating to our family.	3/7/2015 10:25 AM
76	In general, more frequent service to east side reduces car traffic and increases discretionary ridership.	3/6/2015 5:23 PM
77	I'd like to see improved service from Children's to Bellevue - is Kirkland really a priority as a destination over Bellevue?	3/6/2015 5:13 PM
78	The extra Bear Creek service is a huge winner for me, as I visit someone who lives in Outer Redmond and it's always a slog. There have been many non-peak times where it seemed like there Just Wasn't A Bus To There when trying to travel the east side. It looks like this solves some of those issues.	3/6/2015 4:14 PM
79	Improved efficiency and improved LINK ridership due to express routes terminating in University District.	3/6/2015 3:52 PM
80	Direct service Northgate to Kirkland	3/6/2015 3:31 PM
81	I would rather see routes from Redmond (545 and 542) stop at the U-District station and riders connect with the U-Link train instead of busses wasting time on surface streets in Seattle. It should provide more frequent service back and forth to Redmond if that time savings were plowed back into service on the same corridor. Having ridden the 545 for about a year in the past, I know how much time was wasted trying to navigate through pedestrian filled crosswalks and dealing with the narrow lanes along the entire downtown route. Getting on light rail where it's available is key to efficient use of our transit resources and will allow more frequent busses.	3/6/2015 3:27 PM
82	simplify routes and increasing frequency builds ridership and make use easier	3/6/2015 10:34 AM

83	Anything that reduces peak service on the 255 is nothing short of incompetent. The bus is packed at 7 a.m. and 95% of these people are going downtown not the U-District. The new 256 helps zero with this problem. In non-peak hours the commute becomes a two connection trip which will push travel times in excess of 90 minutes after evening peak. No way. This plan guarantees that I will stop using transit and drive.	3/6/2015 7:55 AM
----	---	------------------

Q26 What concerns you the most about Alternative 1 on the Eastside? (choose up to five)

Answered: 827 Skipped: 5,732

Answer Choices	Responses
Bus-light rail transfer required to travel between Redmond and downtown Seattle during weekday off-peak hours (concept for Route 545)	40.51% 335
Bus-light rail transfer required on weekends between Redmond and downtown Seattle (concept for Route 545)	30.11% 249
Transfer required between Link light rail and bus service during off-peak commute times between Kirkland and downtown Seattle (Concept for Route 255)	21.89% 181
Other (please specify)	21.40% 177
No direct connection between Woodinville and the University District (concept for Route 372)	16.20% 134
Loss of direct service to the center of the University District and the UW campus from South Kirkland (Concept for Route 540)	15.36% 127

Transfer required between Issaquah and downtown Bellevue and the University District outside of peak commute times (concept for Route 271)	15.24% 126
Transfer required to get between neighborhoods north of Totem Lake and downtown Seattle (Concept for routes 277 and 255)	13.91% 115
No direct connection between Overlake and neighborhoods north of the University District (concept for Route 242)	13.30% 110
Reduced service frequency between Issaquah and the Eastgate Park-and-Ride (concept for Routes 207 and 271)	10.04% 83
Total Respondents: 827	

#	Other (please specify)	Date
1	Loss of direct service from Kingsgate P&R to downtown Seattle - currently this is a no-transfer ride during peak commute times	4/1/2015 1:44 PM
2	Loss of non-stop service from Woodinville to Downtown with multiple stops.	4/1/2015 1:40 PM
3	The potential slow connections at the Light Rail station, the station locations for the 271, 542, etc are WAY too far from the actual station and can require long waits at busy crosswalks. This is unacceptable for a network that is BUILT on using connections. MAKE THE CONNECTION WORK. The Seattle Transit Blog even proposed a great idea for connections at the station using a loop around the station box. Work with the UW to make these connections feasible.	4/1/2015 1:12 PM
4	I am greatly concerned if this alternative eliminates the Montlake freeway stop.	3/31/2015 11:32 AM
5	Difficulty of transfers between UW Link Station and Montlake Freeway station for 545	3/31/2015 8:42 AM
6	Lack of bus connection between Montlake and the Eastside. Please, no decreases in the 542 or the 545.	3/30/2015 9:33 PM
7	still no good connection for Sammamish...need better connection from Bear Creek Park and Ride to UW light rail and then connection to Seattle Childrens.	3/30/2015 8:50 PM
8	No guarantees about the transfer experience at Husky Stadium - it's a wonderful concept, but in execution, will we need to cross multiple busy roads and maybe miss our bus while waiting for a stoplight? Also, I'm concerned about congestion on the Montlake exit ramp	3/30/2015 5:46 PM
9	No direct route to Children's Hospital	3/30/2015 10:22 AM
10	Annual talk of cancelling route 167 even though there are plenty of commuters during peak times in the morning and afternoon - please do not cancel this route	3/30/2015 8:42 AM
11	placement of Route 255 in traffic congestion on Montlake Boulevard NE; the ST network does not get simpler in Overlake and Redmond.	3/30/2015 7:25 AM
12	Distance between bus stops and station at UW Station.	3/29/2015 9:20 PM
13	I would love a direct connection between Woodinville and Seattle Children's Hospital.	3/29/2015 1:45 PM
14	Why is the southend being ignored???	3/28/2015 10:57 AM
15	Access to bus service to Eastside from Montlake is damaged by WSDOT plans. We need connections to express service at 520.	3/27/2015 2:32 PM
16	no direct connection to downtown Seattle, already bad enough that the 265 was cancelled being the only direct line to Swedish	3/27/2015 1:13 PM

17	- There's really no benefit to anyone traveling from Totem Lake to either downtown Seattle or the U-District. The consolidation of the express routes leaving from the Kingsgate Park & Ride (252,257) with the one leaving from the freeway stop (311) means that passengers will be queuing up and arriving at a narrow platform that doesn't have the capacity to handle all of these people. I take the 311 to that stop fairly often and it's not easy to get through all of the people transferring there at rush hour. There are also stoplights and crossings there that are already quite dangerous will likely be more so since everyone parking at the Park & Ride will need to cross a couple of streets to the freeway station - The Kingsgate park & ride is already overflowing. People who took 252 or 257 aren't going to wait for a local bus to get them to the freeway stop. They're going to drive to the Kingsgate Park & Ride. It doesn't have the capacity for all of them.	3/27/2015 1:03 PM
18	- The Totem Lake freeway stop can't handle the volume of passengers that will be funneled through there if you eliminate 252 & 257 from the Park & Ride. The sidewalk there is very narrow and I have a hard time getting through other folks waiting to get on or off the buses stopping there. There are serious safety issues with the stoplights and crossings in that area as well once all of those people are rerouted from waiting/arriving inside the park & ride to that freeway stop. - I have no reason to believe that consolidating these routes into 311 will provide better service unless you add more frequency during peak hours. According to your charts, there will be an equal number or less number of peak trips once you add up the numbers for these routes (plus you have to add the deleted 277 folks) and more people will be without a seat. There are already a lot of people standing in the morning and evening on these routes between Kingsgate and downtown.	3/27/2015 12:34 PM
19	The 255 is my bus. I live in a neighborhood north of Totem Lake. Right now if I'm downtown late, I ride the 255 and then walk a third of a mile. If alternative 1 happens, I'll have to catch a 235 if it runs late enough and if I'm comfortable waiting by myself late at night or walk 2.75 miles.	3/27/2015 12:00 PM
20	No re-establishment of metro route 265. It used to serve daily commuters to Seattle from 148th Avenue and Bellevue/Kirkland.	3/27/2015 11:32 AM
21	Connection convenience between buses like the 545 and 542 and the Link. I think transferring to the Link has tremendous potential to improve the commute from the Eastside to downtown and especially to the ballparks as long as the transfer mechanism is convenient. If the bus drops off at the U-Link station this would be a great success, but if it drops off a half mile away under the freeway or even a few stoplights away I wouldn't be inclined to take it.	3/27/2015 11:13 AM
22	nothing	3/27/2015 7:21 AM
23	Compared to 545, ridership on 542 is abysmal. It makes no sense whatsoever to cancel 545 off-peak hours and have people switch to 542. Instead, you should extend the peak hours of 545 to at least until 9.30 and have it even more frequent around 8-9AM, as well as 4-6 PM, by cancelling 542 completely and using those buses to support 545 better during peak hours. 542 riders can take the more frequent 545 and transfer over on Montlake to UW and probably go to their destination faster than what 542 offers. I don't understand why 542 goes as far as Greenlake as I anticipate less than 5% of its ridership uses that to go to Greenlake from Redmond.	3/26/2015 10:04 PM
24	311 no longer going straight downtown	3/26/2015 5:22 PM
25	Route 372 must be preserved and improved. The riders on that route have no alternatives with no light rail coming to that area. Route 540 must be preserved, and extended up to NE 116th. Right now it originates in downtown Kirkland, and it has no parking! Kirkland, and it has no parking!	3/26/2015 4:17 PM
26	It takes up to three transfers for me to get to work at Seattle Children's. It would be so incredibly helpful to eliminate a transfer for my bus route to work. It would also encourage me to ride the bus more frequently knowing that it shortens the amount of time that it takes for me to get to work by reducing a transfer or two.	3/26/2015 2:01 PM
27	no express route across I90 to Seattle from Eastgate P&R - I do use this connection to access downtown Seattle (Uwajimaya and Westlake center) and would consider connecting to light rail in the bus tunnel to either go to the airport or the UW	3/26/2015 11:16 AM
28	I use the 540 from south kirkland to the UW, and my kids do as well. They can walk to stops on 108th Ave NE. It will be a major inconvenience if the 540 is moved to the Houghton P&R, because we can't realistically walk there from our house.	3/26/2015 10:34 AM
29	Eliminating the 252 and 257 will put too much pressure on the 311. If you want to remove both of those buses there should be a 311 that runs at least every 5 minutes during peak hours as all three already have double buses that usually full, often with standing room only. The 311 currently runs a double bus in the morning and many of the buses in the afternoon are only single short buses with everyone packed in like sardines. It seems that you would run the same size buses in the afternoon that you run in the morning, as the same number of people that are going to Seattle in the morning will be coming back at night. I get on at 520 and sometimes the afternoon bus just drives by because there is no room. If you try to combine 252, 257 and 311, it will be an even bigger mess without seats for all the passengers.	3/26/2015 10:33 AM

30	More Seattle Bellevue options needed	3/26/2015 10:22 AM
31	As a commuter from Totem Lake Freeway Station to UW who walks to the bus, I am concerned about the volume of people currently coming into Seattle on 311, 252 & 257. I usually end up standing on the bus and several times have gotten left at the stop by a full bus. Same in the evenings, sometimes worse because while articulated buses come into Seattle in the AM, regular sized buses go out in the evening. Any changes are going to have to have the capacity to to accommodate the current volume plus more.	3/26/2015 10:08 AM
32	Route 252 is not mentioned but for years it has been the preferred commute to Seattle as it is an "express" bus. Transfers are no where near "express."	3/26/2015 9:57 AM
33	No direct connection between Bellevue & Seattle Childrens Hospital	3/26/2015 8:56 AM
34	The main concern is the cancelling of the 257 and 252 route. This will add pressure to an already overcrowded Kingsgate corridor. The Kingsgate P&R is full by 7:30 am, so where will the current riders of 252 and 257 park? 311 is not an viable option as there is no good connection between the freeway stop and the P&R (all riders crossing 116th at a pedestrian crosswalk where cars are speeding, not a safe alternate) and the route will be full by the time it reaches the Totem Lake Freeway stop. For increased connection to Link 311 could stay as proposed without cancelling 252 or 257; these routes need to be maintained.	3/26/2015 8:47 AM
35	THREE transfers to go from Kingsgate to downtown Seattle? You must be joking! That would end my use of transit and put me back in my car.	3/26/2015 7:33 AM
36	Reduced frequency of an option of U-District or Seattle Children's area to Eastgate/South Bellevue which the ride takes long up to 2 hours would not be good for me and my co-workers that I know that also live in my area. We are already sometimes willing to do it sometimes in the interest of using an alternative commute mode, saving money and the environment. We'd use it even less if that option reduced.	3/26/2015 7:14 AM
37	No direct route from Bothell to SCH. Multiple transfers required	3/25/2015 2:43 PM
38	No direct express route for those in Issaquah	3/25/2015 12:59 PM
39	What park and ride available to park our car coming from Sammamish.	3/25/2015 12:31 PM
40	Discontinuing express service from Kingsgate (252 & 257). This will increase my commute time even more, so I'll likely start driving more rather than making multiple transfers to reach King St. Station area.	3/25/2015 12:22 PM
41	By deleting the 257, I will need to drive to a Park and Ride to catch a bus, and parking space will be a problem. Also, I don't always have a car available.	3/25/2015 11:37 AM
42	The uncertainty about total travel time from Kirkland to downtown Seattle due to the transfer, especially for scheduled events like symphony concerts at Benaroya Hall.	3/25/2015 11:32 AM
43	Loss of the 252 route	3/25/2015 9:38 AM
44	I don't want to change buses and take the risk of standing for half my trip	3/25/2015 8:13 AM
45	I don't want to have to xfr to light rail. it will add to my already long commute time.	3/25/2015 8:12 AM
46	no direct connection between Woodinville and downtown Seattle. also, the likelihood of increased time need to commute to work. this might be more efficient for Metro but it's less efficient for the rider. who should benefit from efficiency?	3/25/2015 7:40 AM
47	Removal of direct connection between North Kirkland/Kingsgate and downtown.	3/24/2015 8:47 PM

48	Concern 1: You're taking my very simple commute (take one bus from the Kingsgate park and ride to downtown, then walk - 311 concept) and potentially adding TWO transfers. That REALLY sucks and I'm going to have to seriously consider alternatives (driving). I get off at Westlake, and it's already pretty far from there to my office. The end of the light rail is even farther, and I would probably want to try to take a bus on that end. Plus there's the transfer to the light rail in the first place. Concern 2: One of your goals was: "Takes the uncertainty and pre-planning out of choosing to ride. Riders would know where to go to catch the bus and would not have to worry about when the bus is coming." I already have this with routes 252/257/311 - I go to the bus stop, wait for one of those, and then get on. I feel like you're taking this away from me since if I'm reading the charts correctly (wtf does 22/22 trips mean? 22 minutes?) the time between buses is increasing? and I might have to start paying attention to that. Concern 3: Please please please do not reduce peak bus service on the new 311 route. As I said above, I'm not sure what 22/22 trips means, but it seems like it might be less than the 3 buses original service (6/6 + 7/8 + 12/11 = ?? 25/25 ??). The buses are super full already during peak times (7:15am-8:00am).	3/24/2015 8:30 PM
49	When the primary eastside hub is Redmond, that doesn't help me, in Kirkland.	3/24/2015 7:39 PM
50	I do not lake the changes to 255, 252, and 257.	3/24/2015 5:51 PM
51	Please keep 545 service to downtown Seattle. It appears to be the only direct route that will remain. Expanded service during peak hours is essential as buses are often overcrowded. I would also like to see a direct route from Houghton Park and Ride to downtown Seattle.	3/24/2015 5:48 PM
52	Transfer to LINK for Kirkland to downtown is a concern only because I don't trust LINK to run frequently enough in practice and to not get bogged down going through the tunnel. As an aside, 545 has so many rider who work near Stewart & Yale (Metro Park buildings)--Convention PI "tunnel" stop isn't close enough to their work.	3/24/2015 4:56 PM
53	The afternoon Overlake TC deviation needs to go away. The 271 should operate via 112th St and use the HOV direct access ramps at 108th Ave NE instead of providing local service in Medina; another route such as the 235 should be extended into Medina instead. This would speed up the 271 and also allow for same-stop transfers at the SR 520 freeway stops between the SR 520 routes; presently this is only possible at Montlake, and that opportunity is going away soon.	3/24/2015 4:25 PM
54	Still no option to get downtown quickly via 522 unless you are up at NE 125th and Lake City Way. Adding a couple more stops for people who live/work closer to NE 85th St. or so would help. The 312 is a very useful route for downtown and back, but only if you happen to be traveling in a certain direction at certain times. But a transit systems needs to work for those who are doing something other than commuting between home and work in the downtown area.	3/24/2015 1:20 PM
55	Very curious how transfers would be handled between bus and light rail. Would the fare remain the same, or would there be a significant with the two types of service.	3/24/2015 10:01 AM
56	Elimination of both the 252 and the 257 and replacing those with a 311 which requires a transfer to get to downtown Seattle is HORRIFIC! The 252 and 257 are regularly at capacity and all of us are getting off in DOWNTOWN Seattle. Not having ANY SINGLE BUS option which gets you into directly into downtown Seattle from Kirkland is a TERRIBLE design. Yes, fine, it's good to have options elsewhere. But HELLO... a lot of us still travel to the downtown core. And requiring us to now: 1) park at Kingsgate; slog over to the freeway station; wait for the bus; slog from the freeway station to the new Link station; wait again for the train; ride the Link to downtown which will drop us off BLOCKS from where the office is and into the out-of-date, land of the never-working escalators, smelling of piss tunnel stops vs. one or two blocks from the office at street level; is NOT AN IMPROVEMENT. HORRIBLE HORRIBLE HORRIBLE	3/24/2015 7:47 AM
57	Will new route between downtown Kirkland and UW cover more zones, i.e. cost more?	3/24/2015 7:01 AM
58	cutting service from kirkland to downtown seattle on the 255 is an atrocious idea. tremendously popular route that should be enhanced and not dismembered. Making riders travel deep into the u district to then transfer is a crappy way to treat Kirkland transit riders.	3/23/2015 9:14 PM
59	bus-light rail transfer required at all times between Redmond or Kirkland and downtown Seattle	3/23/2015 5:54 PM
60	Less frequent options for commuting between Kirkland and SLU	3/23/2015 5:47 PM
61	Currently 542 is very convenient, changeover at UW light rail station is not appealing.	3/23/2015 5:14 PM
62	lack of consideration for those riders from Kingsgate and Brickyard P&R	3/23/2015 7:57 AM
63	The 207 is proposed to begin at 6:00 (from Issaquah) and stop at 8:00. (In addition to running only every hour and only on weekdays.)	3/22/2015 9:05 PM
64	No direct route from woodinville to downtown via 520	3/20/2015 6:04 PM

65	MAJOR concern about loss of direct 255 route from South Kirkland to downtown Seattle. MAJOR concern about the change for the 540 bus - Although I only take the 271 infrequently, it is always crowded and I worry about these services. OK for services to change once light rail is available on the East Side.	3/20/2015 2:33 PM
66	increase wait times and more transfers	3/20/2015 2:02 PM
67	The 255 is the slow boat to China. It makes more stops and takes more time to get from point A to point B than I've got time for.	3/20/2015 1:35 PM
68	The 372 bus route serves University of Washington Bothell Campus. Please be aware that many students that live in the city depend on this route as an alternative to ST 522	3/20/2015 10:22 AM
69	The efficiency of transfers to Link Light Rail	3/20/2015 9:08 AM
70	Reduced service to bear creek/north redmond	3/20/2015 9:01 AM
71	The location of the bus stops and the overall time required for the bus-light rail transfer is the most concerning thing to me. The current stops are way too far from the station, and potentially requiring two street crossing seems far from ideal. The 545 having higher frequency then the 542 strikes me as counterproductive towards trying to push as many rides as possible onto Link. The 15 minute frequency at Husky Stadium also creates transfer penalty issues.	3/20/2015 12:53 AM
72	It will take 2 transfers and 3 bus/light rail services to get to downtown. The current schedule of the 252 express is MUCH better! If the current schedule is changed it will become VERY prohibitive of taking the bus to Seattle.	3/19/2015 9:58 PM
73	Current bus service via the 252 is excellent; why would I want to take a 35 minute non-transfer method of travel from Kirkland to Downtown Seattle and trade if for a minimum 90 minute, two transfer system to take a tour thru the UW. Makes absolutely no sense, theoretical or actual. Experience with transfers between buses (ie 236 to 255) is at least 10 to 15 minutes of stand/wait time. Double that for each transfer plus heavy traffic thru the UW area....adds hours per week of commute time.	3/19/2015 6:53 PM
74	I read the description of the two alternatives but didn't see this level of detail to be able to answer differently, specifically about route 271. Oh, no transfers please for 271! And keep the volume of rides up (HIGH) since we don't have a light rail option. (Weekdays)	3/19/2015 3:55 PM
75	The increase in service during the day is not important. I take the bus sometimes during the day and there are very few riders at those times. Increased buses during congested times is important, but more frequent rides during the day isn't needed.	3/19/2015 3:26 PM
76	I wish that this alternative provided a direct connection from northeast Seattle to Downtown Bellevue. I live in Queen Anne and am considering a move to northeast Seattle, but work in Bellevue, and it would be nice to have transit options other than just the 550.	3/19/2015 2:20 PM
77	It doesn't appear specifically on either alternative, but connections from Finn Hill (route 234) to/from University district routes (either 372 via Kenmore/Lake City or 255/256/540/? via 520) are my chief concern for any changes made to the system. To keep my morning commute to UW under one hour, I have to ride 4 routes now (234 / 277 / 252 / first available at evergreen point). Morning commute via Kenmore (234 / 372) is extremely inefficient with current timing of routes.	3/19/2015 10:46 AM
78	DOes nothing to address congestion, air pollution, noise, and safety issues in Kenmore, Bothell, Lake Forest Park, Juanita and Kirkland. Does not address capacity and access issues for Park and Rides in Kenmore, Bothell, and other places in the area.	3/19/2015 8:55 AM
79	only a minor inconvenience to have to transfer from 545 to Link to go downtown	3/19/2015 8:30 AM
80	I like service from Totem Lake/Kingsgate to South Lake Union but I fear that there will be an overall reduction of service with the removal of 252 and 257. Typically, 252 alone is standing room only and now riders will have to combine on the 311. It seems like there won't be enough room on the bus. Also, the I-405 & Totem Lake Freeway Station doesn't seem equipped to handle large volumes of people during peak hours. Furthermore, there will be a lot of people parking at the Kingsgate P&R and then crossing 116th Ave. NE, which is dangerous and inefficient. Also, the detour of 311 through UW is annoying. I would prefer direct access from SR520 to SLU.	3/18/2015 2:33 PM
81	Need late night runs (10pm-1am) for getting home after events in Seattle (plays, shows, concerts, etc). We don't currently take the bus since we can't get home after events due to routes ending too early.	3/18/2015 2:28 PM

82	Deleting route 242 makes no sense especially since the peak trips for the 542 are remaining the same. The 542 busses are already packed. This will make them much worse. Also, a lot of the 242 ridership comes from 148th in redmond which there will be no bus support for. The evening 242 that I take is packed to standing room only every day. Not having more 542s will make the evening ride very, very crowded as the 542s are also packed both ways.	3/18/2015 2:07 PM
83	We need increased service from the neighborhoods people like to live in (Capitol Hill, Ballard) and their workplaces (SLU, Bellevue, Redmond). Simple.	3/18/2015 1:58 PM
84	Given the frequent service on ST 522, losing the MT 372 connection between the U District and Woodinville can be coped with. I say this, however, as a Lake City resident. If I understand the change projected for the 372, the change will have an impact on commuting UW Seattle campus employees who live beyond the Bothell Park and Ride.	3/18/2015 1:56 PM
85	less buses and routes, FULL buses (most of the time we can't even get on and buses even drive by sometimes because they are TOO full, all these and more are making it impossible to use bus anymore. I had been commuting by bus from east side to everywhere in metro Seattle area for past 25 years and I have to stop now.	3/18/2015 1:35 PM
86	Please, please, PLEASE do not introduce a transfer to get from Seattle to Redmond/Bellevue. These communities are inextricably linked via Microsoft	3/18/2015 1:26 PM
87	I will say it again. First Hill was left out of all of the planning. U of W is in the mix, but what about Swedish and Virginia Mason, not just for the employees, but for the patients.	3/18/2015 12:50 PM
88	Running the 271 through Medina. Put it on 520 so it can interchange with other eastside routes. Gets stuck in afternoon traffic getting onto 520 from Medina.	3/18/2015 12:12 PM
89	I use the South Kirkland Park and Ride on a daily basis. Rerouting the 540 and/or 255 routes would make it impossible for me to use this site.	3/18/2015 11:15 AM
90	Severely degraded service between Shoreline/Maple Leaf/Green Lake, and the Redmond campus of Microsoft. The 542 stops only at 520 and 40th, and 520 and 51st. This significantly reduces the convenience and utility of taking the bus. Why do you keep trying to kill the 242. It was designed specifically to get Microsofties on the West side over to the campus, and it's a huge success--packed buses every day. Just leave it alone!	3/18/2015 10:55 AM
91	If anyone has bothered to notice, the reason there is not a high ridership to Brickyard on 255 mid-day is that it takes MORE THAN AN HOUR to get there, because there are SO MANY stops in Kirkland.	3/18/2015 10:07 AM
92	I am concerned that there is no mention of the DART. Is that because service is unaffected or because service is being cancelled? If cancelled, will there be an alternate early morning route that will include service to Willows Rd in Redmond?	3/18/2015 9:59 AM
93	none	3/18/2015 1:25 AM
94	Alternative 1 destroys effective commuter transit in favor of trying to make the uncompleted North Link look useful. Leave service the way it is, except for Seattle routes that coincide with the path of the North Link dead end spur to Montlake.	3/17/2015 1:09 PM
95	Getting from Woodinville to Downtown Seattle already takes a long time. At 6:15 in the morning it took 45 minutes for me to get to work. Changing the time by two minutes to 6:17am now takes 55 minutes. Adding a longer route, additional stops, and requiring transfers will take WELL over an hour for me to get to work - and this is BEFORE traffic gets bad in the morning.	3/17/2015 10:20 AM
96	N/A	3/16/2015 9:34 PM
97	Nothing concerns me - I think it is awesome	3/16/2015 5:11 PM
98	Your throwing away money at the wrong problem	3/16/2015 4:09 PM
99	Reduced hours for the 545	3/16/2015 2:22 PM
100	No direct connection between Montlake and 148th Avenue NE between NE 31st ST and NE 40th St.	3/16/2015 1:29 PM
101	Walking to the new light rail station would make my commute longer on the 545 then it currently is.	3/16/2015 1:26 PM
102	Reduced access from the east side to the I5&65th park and ride (542)	3/16/2015 1:16 PM
103	Potential overcrowding on 542/5 routes. I think that even in peak 545 should terminate at UW station, rather than stay on the highway and continue to downtown Seattle. I'd rather have the 545 frequency increased than have it go through downtown.	3/16/2015 1:06 PM

104	Light rail as implemented in Seattle is so horribly slow. 45 minutes from downtown to the airport? 40-50 miles per hour max even on dedicated portions of the line? WTF! If the light rail was *fast* from UW to downtown (i'm talking like about 5-8 minutes), then this becomes a viable alternative for eastside buses. Also "Peak" for Metro/ST has a crappy definition. We need longer "Peak" hours. People don't work fixed 9-5 any more.	3/16/2015 12:53 PM
105	Making the 545 route harder during off-peak or on weekends is a deal-breaker.	3/16/2015 12:50 PM
106	Hate that you are making my commute from Maple Leaf to Redmond take longer	3/16/2015 12:36 PM
107	542 not covering Green Lake Park & Ride	3/16/2015 12:35 PM
108	The Link to ST 545 or 542 transfer at Husky Stadium should be a net positive for all times of day, but only if transit has priority lanes/signaling for getting on/off SR520 quickly, and short walk from Link to bus stop.	3/16/2015 12:27 PM
109	This will greatly increase 520 traffic, as a large number of people will drive instead of take the bus.	3/16/2015 12:26 PM
110	Unnecessarily adding 20-30 minutes commute time for people who use the downtown area as their 'hub' for connecting routes. Say you commute Redmond - Downtown. Now, unless you adhere to peak times, you would have to go to University District via 542, cross the bridge (6 mins walk), wait for your link (6 mins), and ride to downtown (16 mins).	3/16/2015 12:22 PM
111	Reduced 545 service hours - don't want to have to catch the light rail and switch.	3/16/2015 12:21 PM
112	Sorry, I accidentally wrote this in the wrong place. 542- DO NOT divert to Overlake Transit Center. It adds 10 minutes to the commute. It's not that far to walk and it's a safe walk across the overpass. No need to go over there.	3/16/2015 12:15 PM
113	Traffic on Montlake between 520 and Husky Stadium may erase the benefit of faster more frequent light rail service? Especially late at night when traffic through I-5 into Downtown would be presumably much quicker. My total trip time from NE 51st to University Street w/o traffic can be 30 minutes. The transfer/wait time may increase my total lowest trip time. Having an option for a beefier 545X as in Alternative 2 would be preferred.	3/16/2015 12:00 PM
114	Reduced service hours for Route 545, which directly connects downtown Seattle and Capitol Hill to Overlake Transit Center.	3/16/2015 11:57 AM
115	Lack of off peak hours or weekend service for those of us that live on the west side and commute to Redmond for work	3/16/2015 11:55 AM
116	I would have to use transit less if the 545 did not run during the day between Capitol Hill and Redmond.	3/16/2015 11:53 AM
117	Looks like less service to 51st street.	3/16/2015 11:50 AM
118	not seeing West Seattle figuring into the plan.	3/16/2015 11:45 AM
119	many individuals use the 545 to get from seattle to work in Redmond. this would lengthen our commute time significantly	3/16/2015 11:39 AM
120	Crowding on 542 for people getting on at Montlake / Train stop	3/16/2015 11:33 AM
121	Elimination of direct bus service to/from the eastside. Forcing riders to transfer on 520 instead of having direct routes to/from Seattle is not time-efficient.	3/16/2015 10:13 AM
122	I continue to see a systematic abandonment of East/West service servicing the Houghton P&R. Where is route 277 in this plan, replaced with #540? Why does the #25x and 311 busses not stop at the Houghton Freeway station?	3/16/2015 9:12 AM
123	Having to transfer during peak hours to get from Downtown Seattle and Woodinville.	3/16/2015 9:11 AM
124	255 is the only bus that frequently connects Kingsgate and Downtown Seattle. Why change the 255 Route to Children's Hospital? Create a new service from the Eastside to the University. Changing buses during the travel to Downtown Seattle adds more time. We need frequent all-day service between the Eastside and Downtown Seattle! You proposal will create slower connection from the Eastside to Downtown Seattle	3/16/2015 7:20 AM
125	Deletion of routes 252 and 257	3/15/2015 6:36 PM
126	All I see is that you are making it hard all of us who work in the middle of UW campus. It looks like you are making us walk more then we need to. Just remember that a lot of us are standing most of the day.	3/13/2015 6:21 PM
127	Loss of Kingsgate and Juanita peak service with removal of 252 and 257	3/13/2015 5:18 PM

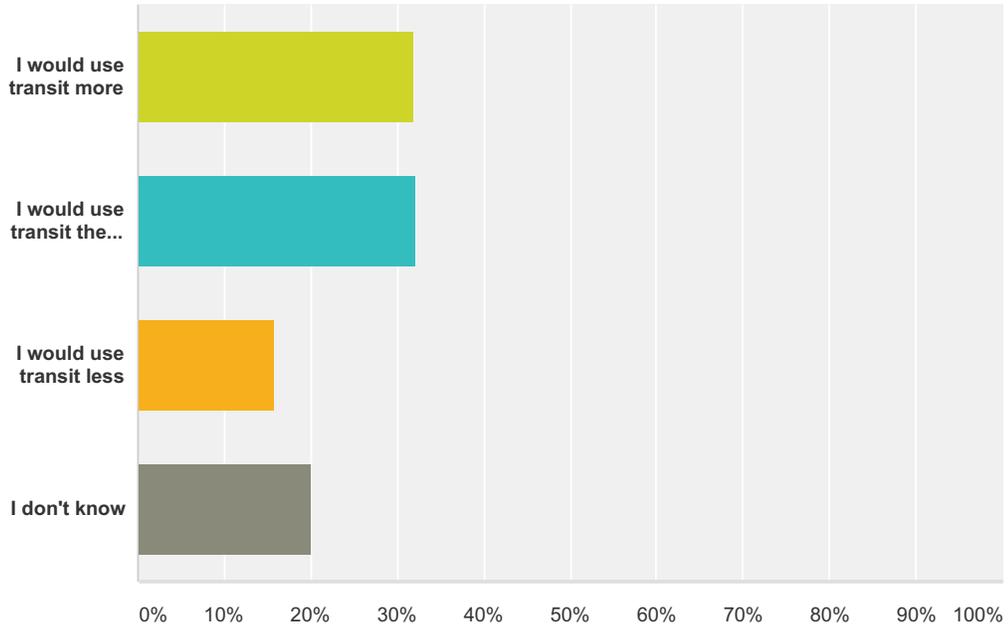

128	neutral - I would be able to use route 542 for all my trips from Northeast Seattle and U District to/from Redmond instead of having to use route 545 and routes 43, 48, and 271 to connect at Montlake	3/13/2015 3:50 PM
129	Woodinville Park and Ride has space to park if you delete route from Bothell UW and Woodinville PR, there are no space to part on Bothell UW.	3/13/2015 1:28 PM
130	Keep well balanced frequency of service.	3/13/2015 1:05 PM
131	I already have to drive to a park and ride after my bus was cut September 2014. Now I might have to transfer, too, as a 545 rider? Taking 4 modes of transportation will not be too appealing (drive, walk, bus, walk?, rail, walk) - especially after years of simply walk, bus, walk.	3/12/2015 5:29 PM
132	No direct connection between NE Kenmore and South Lake Union.	3/12/2015 3:54 PM
133	As it currently stands, it takes me an hour to get from Kingsgate to my work in SODO. Deviating my route north (to UW) would add time and money. It would also make it more difficult to plan trips home when i have to stay late and work. I strongly feel that eliminating routes which go from Kirkland to SODO would create much added stress and it would make taking the bus more of a burden. Since I have to commit to a year bus pass at a time, it would also be incredibly inconvenient for me and take away more of the little time i have with my family.	3/12/2015 1:41 PM
134	no direct service from South Kirkland Park and Ride to downtown Seattle. The so called Transit Center in downtown Kirkland has NO PARKING. It's useless as a transit center hub. This will delay my trip and my current trip includes transferring in downtown Seattle to Magnolia. I have maybe 5 minutes max to try and catch that bus to get to work on time. Any delay will cause me to miss my bus.	3/12/2015 9:52 AM
135	I most often use 311 and (232&)545 to go between Woodinville (Cottage Lake) and Seattle. Metro already removed the portion of the 311 that served Duvall and Cottage Lake. Although this removed service past my house, it was not a busy route, and I agree the route should have been truncated in Woodinville to increase efficiency. However, now I am concerned that not only do I drive to downtown Woodinville to catch the truncated 311, but to reach downtown Seattle, with the forced transfer to Link at UW Hospital, the 311 will take at least a 5 minute detour from 520 to reach the UW hospital Link station, I will then need to walk 5 minutes-crossing a busy street and walk downstairs to the platform, spend another 5 minutes waiting for the train, for a 10 minute ride to downtown - 25 minutes from Montlake to downtown - versus ~12 minutes currently on the 311. The first point, if ST and metro want to truncate Eastside to downtown Seattle bus service at Montlake, and force a transfer to Link at Montlake, it should happen right at Montlake, with a Link station at Montlake, not across the cut. For the purposes of transferring from a bus using 520 to Link, the chosen location of the station is as poor as the location of Seatac Link station. To compound this the transfer facilities at the poorly located station are not designed for quick and efficient transfers. A poorly located and inefficiently designed station should not be used for the forced transfer for people coming or going from the Eastside to downtown Seattle. If the transfer situation at UW Hospital Link station can't be vastly improved, continue running all buses from the Eastside to downtown Seattle all the way to Seattle - without a transfer to Link at UW Hospital.	3/11/2015 11:42 PM
136	Alternatives to get to downtown seattle during off peak all go through University District - transfer to Link light rail. Although the transfer itself isn't a real such a big deal (somewhat of an inconvenience, especially at night - safety concerns) the added time to get back to Kirkland from downtown during non-peak times, especially during weekdays - is an inconvenience). Also going from Kirkland to downtown and getting to the station on Saturdays during UW events (football, commencement, other high attendance) will totally impact times to get to the station while you sit on the Montlake ramp on 520 - I see that as a problem.	3/11/2015 5:03 PM
137	Less capacity on the already overcrowded 545 during the peak	3/11/2015 11:10 AM
138	How is metro planning to accommodate ADA access from the Kingsgate PR for service to downtown Seattle? With no service by any direct to downtown destined route into the PR people will have to park and walk out to the freeway station which is probably a thousand feet. Will people unable to make the walk be forced to use the Brickyard PR?	3/11/2015 10:07 AM
139	The 277 is eliminated.	3/11/2015 8:31 AM
140	Woodinville appears to be left out.	3/10/2015 10:15 PM
141	no comment	3/10/2015 8:53 PM
142	stop wasting service hours going to downtown seattle. all 520 bus service should go to the U district light rail station.	3/10/2015 7:04 PM
143	The benefits of more frequent 545 service during peak times greatly outweighs the annoyance of having to transfer to a Link stop (plus with the long-term Link expansion to Redmond, it won't last forever)	3/10/2015 4:35 PM
144	Overcrowding on 271 with the increased route, since it is already overcrowded.	3/10/2015 3:57 PM

145	- Reliability on the proposed 255 on southbound Montlake Blvd - the time penalty for the proposed 311 for SLU through riders, due to the UDistrict/express lanes deviation.	3/10/2015 1:26 PM
146	Not enough planning for regional transit between North Seattle, UW and fast growing downtown Bellevue. 271 is good for the UW students but more frequent and longer peak service for 555 and 556 is needed.	3/10/2015 9:26 AM
147	Off-peak near-misses of LINK connections will incur a 15-minute penalty and adding the last-train of LINK means that getting the last bus home might still mean you won't fully make it. 545 can already take a long time to get home when working late and missing peak hours.	3/9/2015 5:52 PM
148	Concern about the transfer taking to long, not being reliable - especially when connecting from rail to bus.	3/9/2015 4:42 PM
149	Route 522 would still make no stops between NE 125th st. and downtown. A couple more stops along Lake City way before getting on the freeway would make some of the Alternative 1 changes less useless to people who live/work/shop in that area.	3/9/2015 2:21 PM
150	No longer a direct route to First Hill from Houghton Park and Ride	3/9/2015 11:45 AM
151	I'm concerned about added congestion caused by losing the 252 and 257 routes.	3/9/2015 8:45 AM
152	Transfer required between route 311 and Link, longer commute, and despite the advertising, no apparent increase in service to Kingsgate, merely replacing 3 routes with one. More loss of neighborhood routes. Transit service in the Juanita/Kingsgate area appears to be a low priority.	3/9/2015 7:08 AM
153	there are already no good commuting opportunities from the eastside, the 255 takes forever and does not take me where i need to go nor does the 311, 252, 257	3/9/2015 5:51 AM
154	Any cutbacks to existing routes servicing kirkland. There is insufficient coverage and frequency to kirkland neighborhoods. Make sure you include a plan for increased parking.	3/8/2015 3:59 PM
155	252 and 257 is the ONLY routes i take; it's always full at 7:40 and 8am. You should be extending it's service, not cutting it! Still nothing for supporting Kingsgate Park and Ride and it's lack of parking. We need another more service to other Park and Rides You done nothing to address direct service to South Lake Union. The SLU Streetcar is essentially useless - it doesn't stop often, it gets stuck in traffic, and it's a poor excuse for a lack of express buses from the eastside to SLU.	3/8/2015 8:44 AM
156	The interlining between the 45 and the 271. It seems like a perfect recipe for major delays.	3/8/2015 4:44 AM
157	as long as this consolidation has minimal impact on cars. how is the impact to car traffic being addressed? safety getting to/from; parking at the stop location.	3/7/2015 2:23 PM
158	Would like to have an Express bus from Northgate around the North end of the lake to downtown Kirkland. The buses from d.t. Seattle to d.t. Kirkland are slammed at rush hour.	3/7/2015 2:12 PM
159	Nothing to Totrm Lake / Evergreen Hospital and back for commuters.	3/7/2015 12:20 PM
160	My job requires that I get to the Eastgate Park and ride by 5:45, and the loss of early morning service would be devastating, and force us to drive our only car to Eastgate Park and ride. One of our kids is at Bellevue college, and the reducing in frequency and loss of evening service would eliminate options for evening classes and greatly impact scheduling for classes. Our frequent trips to Issaquah, including evenings would be completely lost.	3/7/2015 10:25 AM
161	I would like to be able to get more direct service between Bellevue and Issaquah from Capitol Hill.	3/7/2015 8:36 AM
162	No direct bus service between the Redmond/Bellevue and Upper Capitol Hill, Central Area. It will require 2 transfers!	3/6/2015 10:30 PM
163	Kingsgate Park & Ride cannot handle the vehicle capacity that would result from eliminating Routes 252 and 257 to consolidate them into a more frequent Route 311	3/6/2015 9:33 PM
164	Bus schedules need to be coordinated with light rail to minimize wait at transfer stations	3/6/2015 7:53 PM
165	Frequency of service between Medina and UW (Route 271)	3/6/2015 7:52 PM
166	Loss of the 542 stop at the Greenlake P&R - it will now be too far for me to walk to the 542	3/6/2015 5:31 PM
167	no concerns, don't travel there often	3/6/2015 5:23 PM
168	No stop at 148th Ave NE in Redmond (removal of route 242)	3/6/2015 4:31 PM
169	None of these are a concern for me. I don't mind transferring and do it frequently.	3/6/2015 3:33 PM

170	Lack of service from Kent Station to Seattle Other than the Sounder outside of narrow commuter hours.	3/6/2015 3:26 PM
171	If transferring from bus to rail, make distance short for older persons- a block or at most 2	3/6/2015 3:17 PM
172	No concerns	3/6/2015 2:41 PM
173	Make all day tickets available as Portland does that will cover both bus & lightrail. Will lightrail be more expensive that the bus trip without the transfer? The Bear Creek Park & Ride is already over maximum capacity for parking on week days - will any parking be added?	3/6/2015 1:11 PM
174	Potential severe transfer penalties (primarily mobility-based) at UW Stadium Station for 520 bus routes. It is not clear that there is a sufficient plan in place with the City, UW, and Metro to coordinate good rail-bus transfers at this station. If this turns out to be a poor implementation, could have negative impacts on all cross-lake trips that don't head directly downtown (which if done well WOULD be a marked improvement, possibly even over the often not-terrible status quo).	3/6/2015 12:06 PM
175	need clear signage/ education of continued (improved) all day service between Kirkland/ Redmond but now via Link light rail transferring at UW station.	3/6/2015 10:34 AM
176	I currently ride the 255 everyday. My concern is regarding Route 256 -- Express service to downtown doesn't make sense for several reasons: Coaches bunch up and become overloaded in the morning when the trips do not have the same terminals. Route 256 does not serve north Kirkland, where many of the 255 riders live. The express service will waste thousands of service hours getting stuck in downtown traffic, where the time would be better utilized to add service hours to the *New* 255..	3/6/2015 10:14 AM
177	The 372 needs to stop much closer to UW Station to be considered a transfer.	3/6/2015 12:10 AM

Q27 How would your use of transit be affected if Alternative 1 were implemented on the Eastside?

Answered: 1,136 Skipped: 5,423

Answer Choices	Responses
I would use transit more	31.95% 363
I would use transit the same	32.13% 365
I would use transit less	15.93% 181
I don't know	19.98% 227
Total	1,136

#	Why?	Date
1	Lack of a direct, no transfer route between Kingsgate and downtown Seattle means that Metro is of NO use to me. I would drive as an alternative.	4/1/2015 1:47 PM
2	Trasnfer now required at South Lake Union to get to downtown.	4/1/2015 1:42 PM
3	Better access between Seattle Children's and Eastside	4/1/2015 1:19 PM
4	My family would lose direct access to downtown Seattle on route 255 and require a transfer at Husky Stadium. This gets much more difficult and time consuming with 2 young kids and variable amounts of gear (diaper bag, stroller, etc). We moved to our home in Juanita 2 years ago enjoying how we could walk to the 255 in less than 10 minutes. I support light rail and enjoy riding it, but a detour to UW is not a desirable alternative for me.	4/1/2015 7:29 AM
5	I would not change my use IF the bus between Kirkland and downtown Seattle continues to run every 15 minutes. If the bus is not as frequent, I will not use it. Since the bus is currently often very crowded, it could probably support both routes 255 and 256 each running at 15" frequencies.	4/1/2015 12:00 AM
6	It seems that I would have to be rerouted downtown before heading eastbound	3/31/2015 5:18 PM
7	Too inconvenient. I would rather pay the tolls and drive daily.	3/31/2015 5:06 PM

8	Not being able to catch the 271 in montlake at 520	3/31/2015 4:48 PM
9	I always have to drive as the bus service is very complicated and too many connections	3/31/2015 3:18 PM
10	I am Transit-dependent.	3/31/2015 2:39 PM
11	Regardless of the bus system, I use it every day. I would prefer it to be more frequent so that I can spend less time everyday commuting.	3/31/2015 11:40 AM
12	I would switch to commuting by car if this eliminated the Montlake freeway stop.	3/31/2015 11:32 AM
13	Ironically when seattle Metro fails me I rely on the sound transit 545 to get me downtown. If you cut the 43 I would end up taking the 545 to downtown more. It's closer to N capitol hill than the light rail station.	3/31/2015 10:41 AM
14	It will be a huge pain to travel from N. Capitol Hill to the Eastside if connectivity at Montlake is reduced. This is a big deal to MANY residents who live in this area and work on the Eastside.	3/30/2015 9:35 PM
15	My regular commute is from Lake City to Overlake business park. I usually take 522-->545 (non rush hours) + 12 minute walk and back on 242-->64X. With the elimination of non-rush hours 545, and 242, my remaining option is a significantly longer commute, changing at the UW + additional walk on the return, or driving (at least to Ravenna P&R)	3/30/2015 8:54 PM
16	Easier to get to Seattle CHildrens, even if I still have to drive 1/2 way from my house in sammamish to seattle	3/30/2015 8:50 PM
17	I would have direct service to Link, with a reliable connection to downtown Seattle and Capitol Hill that does not get stuck in traffic on I-5 and Stewart St.	3/30/2015 5:51 PM
18	No convenient alternative under either option to my current commute (mid-day 545 and 242 afternoon).	3/30/2015 5:22 PM
19	Potential increased access to Seattle Children's Hospital and downtown from Kingsgate Park and Ride, Brickyard, and South Kirkland Park and Ride.	3/30/2015 4:15 PM
20	save time. right now it is 3 bus and 2+ hours. Not ok.	3/30/2015 11:56 AM
21	There is no single bus route that would take me from Boltbus/Amtrack station on 5th & King to Bellevue/Redmond. ST545 would not operate on weekends/off peak hours	3/30/2015 9:32 AM
22	You seem to disregard Issaquah.	3/30/2015 8:54 AM
23	Why would you screw up up a perfectly good 540 because of the link, which doesn't really have any effect on people going from the Eastside to UW.	3/30/2015 7:51 AM
24	more direct connections	3/30/2015 7:26 AM
25	My route would be unaffected (i.e. not improved). Therefore, I am not able to use public transportation to commute to/from work. I was hoping for earlier and better commute between the SE Bellevue Park N Ride to Seattle Childrens.	3/30/2015 5:54 AM
26	I have no alternative, so I'll have to accommodate whatever you guys create.	3/29/2015 8:17 PM
27	Better service to Kirkland (via light rail and new routes) will make many trips more convenient for me in the future.	3/29/2015 10:39 AM
28	Buses go more places	3/28/2015 8:01 AM
29	Bus-Light Rail transfer to get to eastside.	3/27/2015 9:16 PM
30	Better option to get to Seattle Children's	3/27/2015 9:12 PM
31	I HAVE PREVIOUSLY ANSWERED THIS QUESTION.	3/27/2015 6:31 PM
32	Trips to redmond	3/27/2015 5:35 PM
33	I mainly use the 545 during non-peak hours.	3/27/2015 4:48 PM
34	weekend use.	3/27/2015 2:48 PM
35	See the answers to all the other questions	3/27/2015 1:51 PM
36	it is going to be more difficult to get to Swedish and going home, even longer transit time vs. driving time is less	3/27/2015 1:15 PM
37	I live north of Totem Lake on the 255 line. During the day it wouldn't be too much of a problem to have a two seat ride to downtown. At night when the 235 doesn't run as often or late enough, two buses would mean I couldn't do as many downtown activities.	3/27/2015 12:03 PM

38	A bus directly to my place of work would be the best thing ever!! (Seattle Children's Hospital)	3/27/2015 11:21 AM
39	All day frequent service for the 542 would be a major boost to my work commute adding reliability if I need to stay at work late or leave work early. Also extending the 542 to the Bear Creek P&R is an added bonus for me.	3/27/2015 11:14 AM
40	I would use transit to commute to Seattle Children's due to a direct connection!	3/27/2015 11:11 AM
41	It would be better options for getting around and not having to drive places.	3/27/2015 10:28 AM
42	I anticipate that the impending tolls will make commuting by car prohibitively expensive and cause more congestion than already exists.	3/27/2015 9:31 AM
43	This is my work commute and it only make my choices greater and easier.	3/27/2015 8:49 AM
44	If it was easier to get to Kirkland on Lighrail or Bus from Ballard, Fremont, or Wallingford, I would definitely use it.	3/27/2015 7:29 AM
45	Direct connection between Bellevue and Seattle Children's Hospital. It currently takes way too long to use multiple busses.	3/27/2015 12:17 AM
46	I would probably give a go few times, and it turns out this means adding additional to my commute, I will switch to driving.	3/26/2015 10:06 PM
47	I rarely travel to the Eastside.	3/26/2015 9:22 PM
48	Access from Bear Creek to Link light rail and travel from there.	3/26/2015 8:54 PM
49	If I cannot get to my office efficiently or have to transfer, I am more likely to drive	3/26/2015 5:23 PM
50	I currently have to make a few transfers and take a slower route to get to my job in the University District, but with more frequent 542 service, I will make it there in less time. Regardless, I use transit daily.	3/26/2015 4:58 PM
51	I have to.	3/26/2015 4:20 PM
52	EASIER, FASTER	3/26/2015 3:26 PM
53	It would greatly help me knowing that it would take less time to get from point A to point B.	3/26/2015 2:51 PM
54	right now if i bus, it requires a decent wait between connecting bus to the hospital b/c i start at 0600. I used to bus and bike, but my bike was stolen and i am also 3 1/2 months pregnant now - so a direct bus from kirkland to seattle children's hospital would be amazing	3/26/2015 2:06 PM
55	Save on gas and traffic.	3/26/2015 1:52 PM
56	right now I have no way to take the bus from Bellevue Children's to the main Children's campus	3/26/2015 11:33 AM
57	With direct service to Seattle Children's Hospital, I would not have to make a transfer.	3/26/2015 11:27 AM
58	I commute from Bellevue to Seattle Children's Hospital. I currently don't use transit because there is no direct route and it more than doubles by commute time.	3/26/2015 11:24 AM
59	loss of direct bus across I90 to International district and bus tunnel	3/26/2015 11:17 AM
60	It depends how many buses are available to get to work and get home. If I am left too often without a bus I would be very unhappy, but I do not know what the alternative might be.	3/26/2015 10:36 AM
61	540 reroute makes it harder to use	3/26/2015 10:34 AM
62	traffic and bridge toll are terrible	3/26/2015 10:24 AM
63	because I am not interested in driving to work	3/26/2015 10:09 AM
64	I do not want any longer commute than I am doing now.	3/26/2015 9:58 AM
65	I need transit to get to work, so i would need to use it the same, but I would be much more dissatisfied. My commute will take longer.	3/26/2015 9:56 AM
66	More convenient	3/26/2015 8:56 AM
67	My bus routes are getting deleted and there is no good way to commute to DT Seattle- will have to drive.	3/26/2015 8:50 AM
68	more options to get to work on time	3/26/2015 7:41 AM
69	Three transfers to go downtown instead of direct service	3/26/2015 7:36 AM

70	Bus-light rail transfer on trips between Eastside and downtown Seattle would add 20 minutes or more to trip. Peak and all-day routes are at opposite sides of city forcing commitment to one or the other.	3/26/2015 2:50 AM
71	Quicker commute times. Better connections. Service to Seattle Children's.	3/25/2015 8:11 PM
72	Faster /Easier service from Redmond to Seattle Children's	3/25/2015 7:46 PM
73	I might move. Currently I can make it to work or home on time due to 520 now being a toll road. Now I will have major delays as I will have to transfer between bus / link light rail and also drive to a park and ride on Kirkland streets that are currently being used as a branch of 405.	3/25/2015 7:23 PM
74	I would hope to use transit more.	3/25/2015 6:15 PM
75	I rarely can justify the time it would take to make trips to the Eastside by transit because I tend to travel their off peak and I come from North Seattle but this would open up some possibilities.	3/25/2015 3:03 PM
76	I much prefer to use the bus if tiem allows	3/25/2015 3:01 PM
77	Convinient	3/25/2015 2:51 PM
78	better service to/from work	3/25/2015 2:48 PM
79	If I could take a direct route without transferring I would be more inclined to use public transit	3/25/2015 2:47 PM
80	if there is a direct route from S. Kirkland P&R to Seattle Childrens - I would definitely ride more!	3/25/2015 2:40 PM
81	Less transfer/walk time. I curenly walk 2.5 miles each way to Childrens. This is the same amount of time it takes me to transfer and take the bus to Childrens. In the dark winter months, I would prefer not to walk so far.	3/25/2015 2:23 PM
82	Better commute times.	3/25/2015 2:16 PM
83	Please have a direct connection from Seattle to Kirkland. It takes too long from Northgate to get to Kirkland.	3/25/2015 2:05 PM
84	I use it for commuting to and from work.	3/25/2015 2:02 PM
85	my trouble has been the evening commute is up to 1.5 hours from SCH (via route 75) through UDistrict, connecting to 542 to Redmond. I still have another 20 minutes to Sammamish. if the routes, particularly in afternoon and evening, could be more frequent or streamlined, I would use transit more. The am hours are not an issue typically.	3/25/2015 1:59 PM
86	Ease of commute	3/25/2015 1:24 PM
87	quicker getting from the Eastside to Seattle Children's Hospital	3/25/2015 1:17 PM
88	I would use it if it went directly to Seattle Children's.	3/25/2015 1:16 PM
89	I try to ride Metro as frequently as possible.	3/25/2015 1:09 PM
90	more direct access to the places I want to go	3/25/2015 1:02 PM
91	i would take the bus to Bellevue every day	3/25/2015 12:58 PM
92	reduce carbon footprint and my expenses on commute	3/25/2015 12:58 PM
93	I work at Seattle Children's - improved transit access to the workplace would certainly increase my use of transit.	3/25/2015 12:49 PM
94	faster commute time	3/25/2015 12:46 PM
95	Be easier to get to work.	3/25/2015 12:45 PM
96	Saving time	3/25/2015 12:43 PM
97	because I could bus directly from the South Kirkland P&R to Seattle Childrens where I work. I used to bike and bus to work, but my bike was stolen and I am now 3 1/2 months pregnant - so bike ridding will not be possible sooner than later. Right now if I bus, I bus to Montlake and walk 20-25 min to catch a shuttle from E1 to the hospital and reapeat the same thing on the way back. I have been driving a lot b/c I already work 12 hour shifts and an extra 25 min walk both ways is a lot to ask of my pregnant self:)	3/25/2015 12:36 PM
98	faster	3/25/2015 12:34 PM
99	Direct route from Kirkland to Seattle Children's hospital	3/25/2015 12:32 PM

100	Multiple transfers with the elimination of the 252 & 257 would increase my commute time, so I'd likely start driving to work more.	3/25/2015 12:23 PM
101	Transit service will not be easy for me to get to.	3/25/2015 11:39 AM
102	I would go to more Husky sports events for two reasons: 1. Route 255 stops at UW Light-rail station next to Husky Stadium will eliminate a one-mile round-trip walk in bad weather. 2. Evening events with unpredictable end times will be less likely to cause me a one-hour wait for a bus after 10:20 PM or so, because the walk to the bus will be much shorter.	3/25/2015 11:33 AM
103	The route I currently use wouldn't be affected by the change.	3/25/2015 11:13 AM
104	I still have to get to work.	3/25/2015 9:38 AM
105	I would drive more often	3/25/2015 8:50 AM
106	I don't want to have to xfr to light rail. it will add to my already long commute time.	3/25/2015 8:12 AM
107	You so-called effort to consolidate will simply make a normal one-bus direct trip from Brickyard park-n-ride to Downtown Seattle into an indirect, multi-modal transfer situation that will take longer. Yes, it will take longer. Stop screwing the eastside. We're already screwed now with impending tolling on I-405 by the state, and Metro now sees fit to combine the bus system into Link, which will not save the rider any time or effort.. No thanks.	3/25/2015 6:40 AM
108	I would use transit the same but may use 520 route instead of I-90. Depends on which is quicker, used to be able to take 271 and transfer on 520 to downtown seattle, but, lost my transfer pt on 520 and have to take montlake exit, then walk back down to 520. Route 550 is better now.	3/24/2015 8:50 PM
109	Any transfer between bus/light rail will slow down my commute, and introduce a much greater likelihood of a missed connection, either due to traffic or a full light rail car, either of which will result in me being late to work. Which is unacceptable.	3/24/2015 8:47 PM
110	I like the 271-207 detachment idea, though I have concerns that the proposed 207 isn't yet designed so that its ridership/viability would be maximized. For me, having more frequent 271s Bellevue-Eastgate would probably offset the noncompetitive nature of the current 207 proposal. Whether Alternative 1 is a benefit or a detriment to me will depend on the specific timetables and which transfers end up conveniently timed.	3/24/2015 8:44 PM
111	To repeat what I said above, You're taking my very simple commute (take one bus from the Kingsgate park and ride to downtown, then walk - 311 concept) and potentially adding TWO transfers. That REALLY sucks and I'm going to have to seriously consider alternatives (driving). I get off at Westlake, and it's already pretty far from there to my office. The end of the light rail is even farther, and I would probably want to try to take a bus on that end. Plus there's the transfer to the light rail in the first place.	3/24/2015 8:30 PM
112	I need to get to work and back (no car)	3/24/2015 7:49 PM
113	Transit is my way to get around.	3/24/2015 7:39 PM
114	Need better connections between Brickyard Park N Ride and Seattle.	3/24/2015 7:27 PM
115	Better, more frequent and more reliable service between Redmond and Downtown Seattle.	3/24/2015 6:08 PM
116	I might have to start driving to work and stop using metro.	3/24/2015 5:51 PM
117	Added trips for 545 during peak hours	3/24/2015 5:48 PM
118	Hassles with connections. Increased transit time.	3/24/2015 5:05 PM
119	I could go from Kirkland to Ravenna much easier than now; especially weekend and off-peak	3/24/2015 4:56 PM
120	More frequency, better connections, and increased reliability.	3/24/2015 4:25 PM
121	I am not very familiar with most of the routes that are being examined in this section.	3/24/2015 1:20 PM
122	More options make the commuting experience easier, but I would continue to use it for everyday commuting, and not more.	3/24/2015 1:07 PM
123	more 542	3/24/2015 11:51 AM
124	Would depend on the fare structure.	3/24/2015 10:01 AM
125	I would have to see what kind of adage of time it will have on me. I understand maybe during peak times when traffic is bad it may be better but for people who take the first or second buses (311,257,252) before traffic gets bad it will take us more time to get into work.	3/24/2015 8:30 AM

126	work	3/24/2015 8:24 AM
127	It would take much longer to get to and from work. I take the 252, 257, or 311 and they all are direct with no transfers and run constantly from the Eastside to Downtown Seattle. I would have to drive to the park and ride, get on the 311 which will now be packed with people because of cutting the other busses, get off at the UW area and walk two blocks to wait for a rail transit which will be packed as well since all buses I usually ride will be doing the same thing, and then take that into the city increasing my commute time. it just doesn't seem appealing. Additionally there aren't enough parking spaces at the park and rides to accommodate the people using them now. Will new parking structures be built?	3/24/2015 7:47 AM
128	It will be MUCH LESS convenient and probably more expensive. From one direct ride to multiple waits, transfers, and being dropped off blocks from my office (and into the YUCKY bus tunnel with its continually out of service escalators and smell of piss) vs within one block. Not remotely desirable.	3/24/2015 7:47 AM
129	The transfer here is a killer, especially for cases when it's bus to light rail involving a walk between the two. Redmond is a huge employment center and people choose where they live based on existing transit options - this could significantly disrupt that.	3/24/2015 2:55 AM
130	It is unclear how much time this would add to my commute. If alternative 1 added significant time to my commute outside of peak hours I may decide to drive to work instead of using transit.	3/23/2015 10:26 PM
131	would be forced to use a car because of the knuckle-headed plan to chop up the 255 route	3/23/2015 9:14 PM
132	no alternatives	3/23/2015 5:54 PM
133	Longer commute times.	3/23/2015 5:47 PM
134	I have no desire to have to go to the University Link station and transfer to go downtown. Waste of time and effort. The 255 is already overcrowded during rush hour, we need more direct service downtown. Many of the people will choose another route and adding another bus route just during peak times, means the majority of the 255 people will try and take that bus which will be instantly overcrowded. Also taking the 540 away from South Kirkland is crazy, 1/2 of the 540 riders come from the South Kirkland P&R. Most of us are looking for the most direct routes and as a person with mobility issues, I want the least amount transfers possible for my commute.	3/23/2015 5:23 PM
135	Currently 542 is very convenient, changeover at UW light rail station is not appealing.	3/23/2015 5:14 PM
136	Connections, even if they in theory talk about a faster "overall" trip, can never beat the convenience of having to take one trip, one seat, not having to worry about being stranded, waiting for a connection that might never come (or already left).	3/23/2015 1:08 PM
137	I will not use 255 from Kirkland to downtown because of the required transfer	3/23/2015 9:21 AM
138	Eliminating the 252 and 257 routes would increase congestion on the 311 route (even with the increased frequency) and mean that I would almost always have a standing commute, eliminating the option to do work or read on the bus. Also transfers would increase travel time and create uncertainty with total commute time. Together this means that driving would be the only feasible option much more of the time and greatly reduce the incentives to take the bus from the Kingsgate Park & Ride.	3/23/2015 8:46 AM
139	see previous statements	3/23/2015 7:57 AM
140	I don't like more transfers and would drive if the option was 2+ transfers from Ballard to Redmond.	3/23/2015 7:52 AM
141	I will be able to continue using the 255 from NE Seattle. With the elimination of the Montlake Freeway station, it is uncertain how I would get to Kirkland otherwise...	3/22/2015 10:52 PM

142	Simply put: We will be very adversely impacted by the plan for the exchange of the Eastgate-Issaquah 271 for the 207. We are a family of 5 adults, and 1 car, living in Eastgate south of I-90. There are: one weekday daily bus commuter to downtown Seattle, one Bellevue College student who buses to class, and 3 others who frequently use the 271 to travel between our home and the Issaquah TC, weekdays and weekends AND between our home and all parts of Bellevue and the U District and other parts of Seattle. Eastgate can be very congested, as is the freeway between Eastgate and Issaquah, as is Newport Way between Eastgate and Issaquah. We are glad we are able to NOT contribute to the congestion, by taking the bus. I can "understand" the hub system represented by Route 207. It has been lovely to have one bus between home and the UW and BC colleges all these years, but hubs are an efficient way to address service to a variety of areas. However the proposed 207 would completely change our lives: **The commuter needs to catch the 271 westbound BEFORE the first 6:00 run (5:30!) in order to get to Eastgate P&R for the #212 (this has been our new life since the end of the 210 which was direct to downtown Seattle). If there were no 271 equivalent at that time, there will be another car on the road. **The student could not access evening classes by bus, because there would be no bus service after 8:00 in the evening. **We would not be getting to Issaquah by bus on the weekends!! When we ride the 271 evenings and weekends, riders are students and young persons who have no alternatives but the bus! I believe Metro should be there for the people who can't drive.	3/22/2015 9:05 PM
143	It's hard to use service to get to the Eastside. I mostly go there on nights and weekends. Travel time at 7pm on a Friday is currently 77-223 minutes. To really use transit to get to the Eastside I would need to have a 45 minute or less transit time.	3/20/2015 7:25 PM
144	I would probably take the 522 to/from Woodinville/Downtown more often than the 311 since it wouldn't require a transfer. I don't think having to make a transfer would improve my commute.	3/20/2015 6:04 PM
145	Interline 271/48	3/20/2015 4:13 PM
146	Increased service between South Kirkland Park and Ride and the UW Medical Center and increased service between Issaquah and the UW Medical Center would reduce the need for me to drive alone. Direct service between Bear Creek Park and Ride and UW Medical Center would add a commute option for me.	3/20/2015 3:07 PM
147	Too inconvenient.	3/20/2015 2:33 PM
148	The 271 and 372 are already insufficient. Reducing their frequency and connectivity would directly adversely impact my transportation options.	3/20/2015 1:37 PM
149	I would adjust my work schedule to begin earlier and drive my car in.	3/20/2015 1:35 PM
150	I don't have a car.	3/20/2015 1:30 PM
151	Better frequency	3/20/2015 1:24 PM
152	Because the 277 is perfect for the north Rose Hill area. Switching buses can be a hassle and requires more coordination and a much longer commute time. Where it normally takes me 30 minutes to get to and from school, it would now take over an hour.	3/20/2015 1:13 PM
153	trips that require miles of extra walk time and multiple transfers would extend commute times to hours each way.	3/20/2015 11:11 AM
154	Mostly the all day/weekend connection between the 542 and the 44. I also might use the connections to Issaquah Highlands, Kirkland, and Bellevue more often.	3/20/2015 9:08 AM
155	Increased service with 542 to Link makes great sense for off-peak travel to downtown Seattle from redmond. During peak, it will spread the heavy load now on 545 to downtown. off-peak trips on 542 to BearCreek will give me more flexibility and will let me use transit on days when I have a non-peak workday.	3/19/2015 10:21 PM
156	I'm reliant on the bus so it wouldn't change how much I use it. But it would make it so so much easier to commute from Ravenna to Bothell in the morning.	3/19/2015 9:31 PM
157	Would quit or otherwise drive or carpool. Commute times are drastically increasing; makes no sense to add time to use 3 separate transportation methods....ie 236 to Totem Lake transit station, walk a couple blocks to freeway, wait, get on a 311. Then over to the UW, get off, stand and wait for the next train...then finally to downtown. Would rather use a private car. Safety is a big concern at any stop especially at night in tunnels in high crime areas such as the UW and of course downtown.	3/19/2015 6:53 PM

158	To be perfectly honest, i'm not entirely sure what's happening between the two options. However, from what I understand, it seems as though Alternative 1 will make a commute from South Bellevue to University District easier, which is my main concern (as I am a student at UW - Seattle, but my home is in South Bellevue/Renton). There are currently many buses that travel from my two main destinations, but none of them are as direct as I'd like. I usually take either the 167 to Newport Hills P&R, or the 271 & 240 to travel from the University District to Bellevue (transferring in Downtown Bellevue or Eastgate P&R). In short, I would use transit more often if there were less transfers or shorter wait times between transfers in traveling from South Bellevue to the UW.	3/19/2015 6:03 PM
159	I don't have enough info	3/19/2015 3:55 PM
160	Too inconvenient for me to take the 540 if it's re-routed. Convenience is extremely important. I take the bus/train from Kirkland to the Airport because it's convenient. But my return flights often arrive later, and I take a taxi instead of the train/bus because it's more convenient. Convenience is very important.	3/19/2015 3:26 PM
161	I don't want to drive and have to find regular parking in Seattle for my daily commute.	3/19/2015 3:16 PM
162	I don't get over to the Eastside much.	3/19/2015 2:22 PM
163	I don't own a car, so I don't have any other choices if I want to go longer distances.	3/19/2015 2:20 PM
164	Right now no transfer for 255 service. Future requires transfers, which add times and confusion.	3/19/2015 1:51 PM
165	A direct connection from Greenwood to the eastside would mean buses are easier to use	3/19/2015 12:31 PM
166	It would enable me to do late night or weekend research on the UW campus. I use the 542 most frequently and it does not run at these times which limits the amount of time I can do work on campus.	3/19/2015 11:58 AM
167	I'm moving to South Seattle and need to get to Bear Creek P-R, so that would be great!	3/19/2015 11:15 AM
168	I currently have no non-metro options to commute. If Finn Hill connections to UW are compromised enough, I'll no longer use Metro (will purchase a car and drive).	3/19/2015 10:46 AM
169	I will be 65 soon. If I take the bus from Redmond and have to transfer to Link Light Rail, how will that affect the price? As a senior, I will be on a limited income. I enjoy taking the 545 to downtown Seattle, but if I have to start paying more, I will be discouraged from going into the city. In addition to seeing doctors in the city, I frequently see shows (e.g., 5th Avenue Theatre), visit the Seattle Art Museum, Benaroya Hall, McCaw Hall, and Pike Place Market/Waterfront area.	3/19/2015 9:11 AM
170	My habits would stay the same, but a plus would be improved service should they change.	3/19/2015 7:57 AM
171	I need to get where I want to go	3/18/2015 10:19 PM
172	I live in Kenmore, and Kenmore is not mentioned much in any of this questionnaire. Our Park and Ride lots are full to overflowing and turning away prospective bus riders.	3/18/2015 8:53 PM
173	The possibility of bussing from Greenwood to Bellevue (hopefully without transferring).	3/18/2015 8:45 PM
174	Better service to Redmond during peak hours	3/18/2015 5:03 PM
175	Buy less gasoline, not have to pay tolls, fight traffic and don't have to pay for parking. I love Alternative 1	3/18/2015 3:49 PM
176	Less service between work and home (specifically 252).	3/18/2015 2:33 PM
177	Bus to work	3/18/2015 2:07 PM
178	It would make it easier for me to visit my uncle in Redmond.	3/18/2015 1:42 PM
179	Services have gone so useless, after over 25 years of using buses, I'll be driving from next month and canceling my bus card.	3/18/2015 1:35 PM
180	Because you would be making my commute harder	3/18/2015 1:26 PM
181	I'd have to reevaluate how much time my commute would take with the changed routes. The morning commute would probably be the same, but the changes would greatly increase my afternoon commute, since I start the commute before 3 pm.	3/18/2015 1:24 PM
182	I would use it the same amount, but I think it'll be easier and I'll have more flexibility if the bus runs more often.	3/18/2015 1:18 PM
183	I commute to work	3/18/2015 12:51 PM
184	Way less easy to get to U. District. I'd rather walk than transfer to light rail.	3/18/2015 12:50 PM

185	The only way to get to where I am going.	3/18/2015 12:50 PM
186	I hate going over the 520 and I-90	3/18/2015 12:49 PM
187	I would use it similarly but Alternative 1 would give me more options that I could utilize because of work demands (I work at UWMC)	3/18/2015 12:45 PM
188	I need to commute no matter what happens!	3/18/2015 12:27 PM
189	252 currently stops in front of my house (NE 132nd St/ 120th Ave) and operates during times that I commute to/ from UW Medical Center.	3/18/2015 12:15 PM
190	My commute needs to be convenient. I have on campus parking and would only use bus 540 if there were a route on campus.	3/18/2015 12:01 PM
191	I will continue to use transit to travel from my home in Bellevue to school at the University of Washington because it is easier, faster, and cheaper than driving.	3/18/2015 11:57 AM
192	Hard to tell how it will affect my commute. I certainly use transit much less than I used to after the 250 cancellation. It takes longer than before, is overcrowded which requires that I stand with my persistent back pain, and takes 3 to 4 buses instead of the predictable 2 that I took previously. Our transit service is certainly not improving as of late. As a long-time (15+ years) transit user, I'm truly disappointed that service is decreasing and getting worse. I'm tired of the excuses!	3/18/2015 11:43 AM
193	Bothell doesn't seem to exist.	3/18/2015 11:37 AM
194	Having 542 run at such limited times is a real factor. Especially when I need to work past 6 which is fairly frequent. Having to walk down to montlake to catch 545 is unreliable because even in the evening it's SUPER crowded. 545 in general is just a mess, it skips you most of the time on montlake due to over-crowding, and you feel like a sardine in the mornings if you opt for that over 542. I do just about anything I can to avoid 545.	3/18/2015 11:36 AM
195	I still have to commute via bus no matter what changes are made.	3/18/2015 11:16 AM
196	Because right now it's convenient, and with your change, it becomes a huge pain in the ass.	3/18/2015 10:55 AM
197	See above concern. If the DART remains in service, I believe my day-to-day use of transit will be the same. That being said, if Link service has high ridership and commute times improve, I may even use the bus more.	3/18/2015 9:59 AM
198	Transfers are a complete pain.	3/18/2015 8:23 AM
199	There are trade-offs.	3/18/2015 12:28 AM
200	My work schedule usually means I take the 545 from Capitol Hill at around 9:30. Alternative 1 would mean I would not be able to do that. Having to make a transfer would effectively mean I would not be able to take the bus at all, given the peak service only runs from 5am-9am. In the evenings, having service stop by 7pm is probably OK, but would mean I would lose flexibility - if I anticipate I might have to leave work after 7pm, then I would just not take transit at all that day to maintain flexibility	3/17/2015 10:02 PM
201	Route 542 is not a Metro route and route 242 runs along 148th Ave NE so I can use it to get to work.	3/17/2015 7:34 PM
202	Daily commuter to Redmond	3/17/2015 6:19 PM
203	I still need to get to the U-District from Eastgate.	3/17/2015 4:08 PM
204	I still need to use it.	3/17/2015 2:47 PM
205	frequent 271 bus gets me to the Bellevue transit center more reliably.	3/17/2015 1:20 PM
206	I would stop riding transit under Alternative 1 because I would have to walk twice as much and take three different routes to get to work.	3/17/2015 1:09 PM
207	More transfers would generally be required, and if there is bad traffic that increases the chance of missing a connection.	3/17/2015 12:12 PM
208	I would drive in more often or work from home more. The time wasted sitting on the bus would be worth paying to park.	3/17/2015 10:20 AM
209	I would wait to hear about crowding and best route options once it's in place.	3/17/2015 10:15 AM
210	Less frequent routes	3/17/2015 9:28 AM
211	More frequent busses between N Seattle and Bellevue	3/17/2015 7:32 AM

212	Worse 545 service	3/17/2015 12:07 AM
213	I almost exclusively go off-peak. I don't want to increase my commute significantly, so if I don't make peak-hours I won't take public transit.	3/16/2015 11:03 PM
214	I use it 5 days a week already, so I am most interested in the service improvements to increase the speed and convenience of my commute.	3/16/2015 6:32 PM
215	I need to use transit to get from Redmond to Capitol Hill. I would alter my route to use 542 and the Link during off-peak hours.	3/16/2015 5:11 PM
216	I'll still be commuting to work by bike + bus.	3/16/2015 4:49 PM
217	I will use transit the same because it's how I get to work and even if that's more inconvenient that won't change.	3/16/2015 4:46 PM
218	No more route 242. No service connecting North Seattle to 148th Ave NE.	3/16/2015 4:18 PM
219	Better connection frequency	3/16/2015 3:46 PM
220	I would use transit the same because that's how I get to work.	3/16/2015 3:20 PM
221	Transfers.	3/16/2015 3:15 PM
222	Because I would have less options during off-peak hours to get to work.	3/16/2015 2:26 PM
223	I might use it less because I wouldn't trust the 545 would be available if I needed to stay late in Redmond. However, if the 542 or other routes could get me back (not familiar enough with them), I might be fine.	3/16/2015 2:22 PM
224	no choice for my daily commute	3/16/2015 2:21 PM
225	I want as easy access as possible from Overlake Transit Center to the light rail station at UW or Capitol Hill	3/16/2015 2:20 PM
226	The interchange at the Stadium sounds awful and avoidable - why have a 5min walk in between?	3/16/2015 2:11 PM
227	I commute Capitol Hill -> Redmond every day. I will take the bus there every day no matter what unless service is disrupted	3/16/2015 1:58 PM
228	Generally gives me more flexibility for getting to work.	3/16/2015 1:51 PM
229	It makes it less convenient to get to downtown Seattle (since I usually travel there on weekends), but since I usually only travel downtown for special events, that might not be enough to deter me from travelling at all. On the other hand, it does make it easier to visit U District, which I hardly ever go to because it's currently out of the way.	3/16/2015 1:44 PM
230	It would have no choice but to still use it. It will add about another 30 mins to my travel per day by having to walk from the 545/542 stop to to 148th AVE NE and NE 31th st There is no easy way to connect from the 542/545 to connect to 148th AVE NE without walking.	3/16/2015 1:29 PM
231	I commute between downtown Seattle and Overlake on a daily basis (545). It seems like alternative one could possibly decrease by travel time a little but require a transfer if I use 542 and the light rail link.	3/16/2015 1:27 PM
232	Driving is not an alternative for transit during peak times	3/16/2015 1:24 PM
233	ST 545 is the lifeblood between Microsoft and downtown Seattle. If the route required a transfer to Link Light Rail this would lose me as a rider.	3/16/2015 1:20 PM
234	With the 242 gone and significantly reduced 542 access to the I5&65th park and ride it's hard to say if I'll be pushed back into an SOV or not. I hope to make it work, but only empirical experience will know for sure.	3/16/2015 1:16 PM
235	I commute every day on the 242, and with this change I would have to transfer and add 15 minutes of walking to get to work via the bus. Due to the slower nature of the 542 going through the U-district, this would easily double my commute time. The issue isn't just getting to the 542: it is the slowness once you are on the bus, and the lack of flexibility where it drops you at Overlake. Today the 242 circles through the entire Microsoft campus to get you quickly to your destination, instead I would be stuck walking 15 minutes from Overlake to my building every day (including the very unpleasant crossing of 520). Please keep the 242!	3/16/2015 1:01 PM
236	Most my travel is on weekends - so off peak.	3/16/2015 1:00 PM
237	I cannot tell what route I can take that replaces the 242 (direct from my house to my office).	3/16/2015 12:56 PM
238	See above.	3/16/2015 12:56 PM
239	I commute by bus, so I'll have to make do.	3/16/2015 12:55 PM

240	I don't own a car and already rely predominantly on transit to get around the city and region.	3/16/2015 12:54 PM
241	less convenient service	3/16/2015 12:53 PM
242	No mid day 545	3/16/2015 12:52 PM
243	Hate that you are making my commute from Maple Leaf to Redmond take longer	3/16/2015 12:36 PM
244	my main goal is to get from the U-district to Microsoft Campus on weekdays without making a connection, I'll have to walk farther to get to the bus stop, but I prefer that over a connection.	3/16/2015 12:35 PM
245	Might use 545 more if the times work out	3/16/2015 12:32 PM
246	The loss of the 545 from downtown would require me to drive or move out of Seattle.	3/16/2015 12:26 PM
247	Improved 542	3/16/2015 12:25 PM
248	I would probably stop using transit for commuting	3/16/2015 12:22 PM
249	I would likely have to buy a car because of increased bus time to get to Fremont from Redmond.	3/16/2015 12:20 PM
250	Transfers may be a concern depending on travel times	3/16/2015 12:06 PM
251	Still need to get to work via public transit	3/16/2015 12:04 PM
252	I currently work in Bellevue. Transit makes way too many stops on my way to downtown Seattle so I drive. If I work in Redmond, I would use transit again.	3/16/2015 12:03 PM
253	I see situations where the transit tunnel is closed or light rail service is impacted. What alternatives would I have if light rail is unavailable and there is no more 545 operating outside of Peak?	3/16/2015 12:00 PM
254	It would be more difficult to travel to/from Redmond during off-peak hours.	3/16/2015 11:58 AM
255	It depends on how time efficient and reliable these routes turn out to be. Adding transfer time between Capitol Hill and Redmond may cause me to stop riding transit.	3/16/2015 11:57 AM
256	More reliable and frequent 545 runs during peak times.	3/16/2015 11:57 AM
257	I take the 545 to Redmond every day, at slightly unorthodox hours to avoid traffic (10:30 am, 7 pm), as well as occasionally on weekends. Having to take the light rail and transfer to the 542 would add a substantial amount of time on to my commute that would either drive or move. If no-transfer transit wasn't available from a desirable area of Seattle to OTC, I would likely move out of Washington.	3/16/2015 11:57 AM
258	My use of transit for commuting wouldn't change. I would take route 542 instead of route 242.	3/16/2015 11:56 AM
259	More convenient connection via 542 from Redmond to Fremont / Wallingford.	3/16/2015 11:51 AM
260	If it doesn't go to 51st, then the services doesn't take me there.	3/16/2015 11:50 AM
261	I wouldn't have to drive to work when I have circumstances that require me to stay late or drive to Kirkland or Bellevue during the day.	3/16/2015 11:46 AM
262	I would be less likely to use transit on days when I need to travel off-peak between downtown Seattle and Redmond if it means transferring between bus (545) and light rail.	3/16/2015 11:45 AM
263	I *MIGHT* use it more, depending on how hard it is to get from West Seattle to the UW connection, and how early connection is available, as I get to Redmond by 6:30am from West Seattle now commuting by car.	3/16/2015 11:45 AM
264	I work on the eastside	3/16/2015 11:44 AM
265	I walk 500' from ferry and drop off at 51st and Microsoft, no transfers	3/16/2015 11:39 AM
266	It's slower and it already takes a long time to get from Fremont to Redmond with 1 bus switch. I would try harder to wake up on time to take the Microsoft bus.	3/16/2015 11:38 AM
267	I would have to get taxis to make last-minute trips between Redmond and downtown during off peak hours	3/16/2015 11:36 AM
268	I use 545 for commuting to work and my work hours are always during the off peak hours.	3/16/2015 11:34 AM
269	Increased transit time between Kirkland and the first stop off of I-5 where I get off 255 today. Having to get off at Westlake Center after the detour to UW to pick up the train must increase both the travel time and the walk to South Lake Union. I am not interested in route 311 either.	3/16/2015 11:14 AM

270	My transportation to and from the eastside would be taken away from me and it would take me longer to get around. I would find myself stranded a lot. It would take me about 4 hours to get to work. This is not a good idea.	3/16/2015 10:13 AM
271	Convenience of frequency and less crowding on the 255 line	3/16/2015 9:12 AM
272	I may opt to not use transit at all and go back to driving.	3/16/2015 9:11 AM
273	I use it for work. I don't drive so I have no other option.	3/16/2015 8:30 AM
274	Both routes I use will be getting deleted.	3/15/2015 6:36 PM
275	I like the concept of more direct service between the Eastside to downtown to address crowding especially during peak hours and football season.	3/15/2015 5:31 PM
276	Depends on travel time and connection times. Prefer non-connection travel between Redmond and downtown as it is today.	3/15/2015 10:38 AM
277	Easier to catch a bus at the times I need it.	3/15/2015 9:17 AM
278	I would go to Eastside more often if mass transit improved (no car).	3/13/2015 7:33 PM
279	Have to wait and see what your plan is. What the Dollar amount going to be for us to ride the rail as well as the buses?	3/13/2015 6:21 PM
280	I don't travel to the Eastside very often via transit, but the better connections from Redmond and Bellevue to North Seattle without forcing a transfer downtown could make for an easier trip when I do take the bus over there.	3/13/2015 5:17 PM
281	I use it regularly	3/13/2015 1:05 PM
282	More options from Redmond.	3/13/2015 12:41 PM
283	Mid-day commutes to Redmond wouldn't require a ~20 minute walk alllll the way down to downtown from Broadway & Republican. From the 545 heading west, no more guessing whether or not I should get off at Montlake to take the 43 or hope there's an 8 so I don't have to walk 15 mins uphill.	3/13/2015 10:20 AM
284	If transit were a reliable, convenient option to get me to more places on the Eastside, I would use it more often (vs. driving myself or opting not to make the trip)	3/13/2015 10:07 AM
285	The time it would take me to get to Bothell from Capitol Hill would be to much if the 372 didn't run the same way. I would have to use my car which I would also hate to do because of pollution and traffic	3/13/2015 4:03 AM
286	right now it takes too long to get from wedgwood to kirkland and sometimes get off work after the last bus leaves kirkland	3/12/2015 9:26 PM
287	I would have to weigh the cost of driving in by myself, the inconvenience of carpooling, driving to a different park and ride (eastgate), and the inconvenience of another transfer at Montlake. Those are the 4 options that I see at this time.	3/12/2015 5:29 PM
288	The current commute is long enough without adding a transfer to the trip. You already deleted my bus #260 now you want to take away the 257 and the 252!	3/12/2015 3:48 PM
289	My route from on the eastside isn't affected by this change, except that catching the 540 wouldn't be a possibility.	3/12/2015 1:42 PM
290	I must commit to a 1 year bus pass so i would not have much of an option. I would have to weigh if my time is worth it to drive and pay for a spot or spend more than 2 hours a day on a bus, all to travel 20 miles.	3/12/2015 1:41 PM
291	Alternative 1's changes to 520/Eastside routes would allow me to get places on the Eastside quickly from capitol hill. With additional/more frequent buses, I'd also be able to hitch my bike to a bus for travel on the Eastside.	3/12/2015 11:43 AM
292	Since buses (both Metro and Sound Transit) are my only method for getting from home (in Bellevue/Kirkland) to work (Eastlake/downtown Seattle), I have no choice but to continue relying on them.	3/12/2015 10:35 AM
293	I have no choice - I will not drive to downtown Seattle.	3/12/2015 9:52 AM
294	I could take the bus to school during mid-day when my classes don't start until later.	3/12/2015 9:43 AM
295	I have no other choice in getting to work.	3/12/2015 9:20 AM
296	The increased amount of time it will take to reach and later return from downtown Seattle, due to the forced inefficient transfer to Link at the US Hospital station. If this change is implemented, and the speed and ease of transferring between Link and Eastside Metro buses is not vastly improved, do not count on future support from me or many other eastside residents for ST3 or any other transportation taxes.	3/11/2015 11:42 PM

297	I guess I put this in the wrong spot before but having less 545 service will make my commute between Redmond and Seattle Center much more of a hassle, both to get to work and to visit friends on the Eastside. I would want to explore vanpools and other options to see if there are easier ways that don't involve transfers. Again, I do understand why this is the suggestion. But it's irritating to have to change busses and add time to my commute (waiting for the next train, then physically getting from the 542 down to the light rail and then from the light rail station up to the street) to not get any closer to home (since the new stations aren't any closer to the west and there aren't any new east-west alternatives).	3/11/2015 7:43 PM
298	I'm committed to transit for commuting - not sure if the alternatives would get me to ride more for other purposes.	3/11/2015 5:03 PM
299	If the 242 is deleted and no other routes are moved/added to take its place I would end up having to drive from Shoreline to Redmond everyday. My only transit option being to string 3 buses together, taking over 2 hours. A 4-5 hour daily commute is not practical or realistic. I currently take the 242 everyday, and there are no suitable alternatives.	3/11/2015 4:17 PM
300	Transferring at the U-District to get to downtown would be such a pain in the b*** that I wouldn't bother. Having to stand and be squished like a sardine on my peak rides into and out of Seattle would be so uncomfortable it would force me off the bus.	3/11/2015 11:10 AM
301	The elimination of the 252/257 and the changes to the 311 do not help me in anyway as I work in the CBD and not SLU. I lived in the city for 10+ years and on average find that transfers *add* 10 minutes to my commute. In all honestly the 252/257 are extremely reliable (from my POV) due to the toll on 520 and only sit in traffic for more than 5 minutes on the worst of days. Right now metro *saves* me time over driving which is most valuable to me. This change is sufficient that I will likely consider driving several days a week.	3/11/2015 10:07 AM
302	Still not that easy to get from Childrens / Laurelhurst to downtown Bellevue - everything is going to Microsoft.	3/11/2015 9:33 AM
303	I didn't realize you had an Eastside-specific question, so please see other answers (regarding traffic, exact timing, etc.)	3/11/2015 9:03 AM
304	I keep seeing references to riders going from a one-bus to two-bus ride. Most of us in Kirkland already have a two-bus commute and this isn't being taken into consideration. Under these plans we go to a three-segment commute (neighborhood to transit center/P&R, transit center/P&R to UW Link.) Connections are what make commutes intolerable because Metro and Sound Transit publish fictional schedules with infrequent and uncoordinated transfers east of the lake. Let's do basic math. I can drive in under 25 minutes to work or (now) take transit at 70 minutes. Under Alternative 1 that increases to 90+ minutes. No way. Even with a free ORCA pass, I'll be driving.	3/11/2015 8:31 AM
305	Currently I am not commuting to Redmond, but I did for years and may in the future.	3/11/2015 5:50 AM
306	I don't see any improvements for 311 or Woodinville	3/10/2015 10:15 PM
307	I can't imagine all those buses converging on the light rail station in the U district. The noise and the fumes and the buses. Wow, not really will thought out.	3/10/2015 10:00 PM
308	Enhanced 372 service.	3/10/2015 8:53 PM
309	I commute to Redmond every day for work, and I'm not going to stop using the bus barring some extremely dumb changes.	3/10/2015 4:35 PM
310	I am very worried about the bus-to-Link transfer coming to/from 520. The new exits at Montlake may not be done by the time U-Link opens and may not work in any case given Montlake Blvd's traffic. The 255 may get stuck coming from Children's Hospital and be very unreliable.	3/10/2015 3:51 PM
311	Consolidated more-frequent service across the bridges; convenient transfer to rail.	3/10/2015 12:40 PM
312	more 271 service	3/10/2015 9:26 AM
313	Most of my trips to the Eastside would use existing routes. 545 to Redmond and 550 to Bellevue. The only difference being I'd take LINK from Capitol Hill to Westlake to transfer to 550 rather than walking to Convention Place.	3/9/2015 5:52 PM
314	Don't know how long the walk would be. It would be easier to use on the weekends, but if its a pain, I would use it less than I do today. Also, I use it a lot during the mid-day, to Seattle. Also: it doesn't commit enough to the benefits of Link.	3/9/2015 4:42 PM
315	I have no car and I have to ride between Downtown Seattle and Redmond to get to work, so I'd have to make the same number of trips; but instead of being one-seat I'd have to walk farther to Link Light Rail, then transfer to 542.	3/9/2015 3:41 PM

316	I don't live on the Eastside, nor go there often. However, I do use transit in the area the 522 drives through between NE 125th st. and downtown.	3/9/2015 2:21 PM
317	Driving to Redmond is the current default for my partner. A bus would make him use transit more.	3/9/2015 1:43 PM
318	I don't travel to the eastside by transit.	3/9/2015 12:50 PM
319	Currently I ride the 311 directly from the Woodinville P & R to the ID - no transfers. Requiring a transfer at the UW Station to light rail is adding time to an already very long commute. The return commute is adding even additional time.	3/9/2015 12:00 PM
320	I rode the bus until it was eliminated, now I drive. The transit time would be a factor, I am willing to increase my transit time if I don't have to drive, but only to a point. The hassle factor is important too.	3/9/2015 11:45 AM
321	Frequency would stay the same, but would start using 372X on weekdays and weekends to get to work. Would no longer have to burn fossil fuels to drive to Northgate Park & Ride, to use the 41!	3/9/2015 10:50 AM
322	Again, having service between Redmond and NE Seattle in the middle of the day would make a huge difference for me.	3/9/2015 10:03 AM
323	Having to drive further to a Park and Ride or having to transfer would add time to my already overly long daily commute. I already spend over three hours per day commuting in order to use public transit. I do not want to add more time to a trip that would take me 40 minutes each way in a car.	3/9/2015 10:02 AM
324	Because I would have to either drive further to a park and ride or transfer and thus increase my already overly long commute time. Since I already spend three hours or more commuting each day, I am not willing to give up even more of my day.	3/9/2015 9:48 AM
325	I'd have no other choice but to make it work. It might lead to a more dangerous bike-to-bus commute for me, though.	3/9/2015 8:45 AM
326	no bus = I drive	3/9/2015 8:38 AM
327	no direct connections, more travel time, i might as well drive then	3/9/2015 5:51 AM
328	Better connections between northeast and northwest Seattle and the Eastside	3/9/2015 3:01 AM
329	It already takes twice to three times as long to take transit as it does to drive. Buses are already infrequent and only come during peak hours. Impossible to reach Seattle in an hour or less from the Eastside during non-peak times.	3/8/2015 10:25 PM
330	My use of transit is not significantly dependent on its frequency; I use it when other modes of transportation are infeasible.	3/8/2015 9:31 PM
331	I wouldn't have to work and re-work my commuting/work schedule around the insufficient service and parking that we currently have. I	3/8/2015 3:59 PM
332	you continue to remove access to dt Bellevue from NE Seattle	3/8/2015 12:00 PM
333	I rely on daily use of the 271 between the University District and the BTC (my office is located right at the BTC). There would be no reason for me to use transit less. The more frequent/ optimal night and weekend service would improve my commute by allowing me better options for alternative work hours so I can spend time with my family.	3/8/2015 10:27 AM
334	Because I would no longer have convenient access.	3/7/2015 11:42 PM
335	I like using public transit. Someone else drives, I don't have to find downtown parking.	3/7/2015 8:08 PM
336	if i can get to it (and park) and it is safe i will use it.	3/7/2015 2:23 PM
337	I don't use transit to the Eastside and none of the proposed changes would help me do so.	3/7/2015 12:20 PM
338	All the park and rides near me fill up early so i use vanpool instead - this plan does not include more park and ride capacity.	3/7/2015 12:10 PM
339	Our family is a "poster family" of public transit, having only one car, but having great service to get around on the eastside so far, however, the details for the 207 shows far less service, going from the 30 minutes to 60 minutes, and eliminating early morning service, eliminating evening service, and eliminating weekend service, which our family of five relies on. The 207 route is superb, but the frequency cuts would be devastating to our family.	3/7/2015 10:25 AM

340	I sometimes use routes 271 to connect to route 560/566 at the Bellevue Transit Center. If this option was reduced, I might have to drive more or look for an emergency ride home.	3/7/2015 10:00 AM
341	getting to bellevue for work would be easier than it is now. my boyfriend drives in daily as he would have to change buses now. It is much too long of a commute for bus travel now.	3/7/2015 8:58 AM
342	Less likely to go to Redmond if there is an extra transfer due to 545 not going to downtown.	3/7/2015 1:02 AM
343	improved 271 frequency + through-route to 45	3/6/2015 10:53 PM
344	no direct transit service between Redmond and the residential Central Area	3/6/2015 10:30 PM
345	Much easier/more reliable trips to Kirkland	3/6/2015 8:24 PM
346	reduced coverage area...farther to travel to bus stops	3/6/2015 8:14 PM
347	It's already awful to take the bus east except for the 550.	3/6/2015 7:59 PM
348	Because it would decrease the time waiting for buses & allow me to drive less	3/6/2015 7:53 PM
349	nothing would change for the way I ride the busses	3/6/2015 7:48 PM
350	It looks like it would take roughly the same amount of time, any time of the week, to get from the Redmond Transit Center to a light rail station under Alternative 1, so I would use transit the same.	3/6/2015 5:40 PM
351	More frequent service for the 545 will always make its use easier.	3/6/2015 5:30 PM
352	My daily ride is already across SR-520. I'd ride regardless.	3/6/2015 5:17 PM
353	Less coverage times and locations. I need breadth of service, not mon-fri daytime commuter hours.	3/6/2015 5:16 PM
354	Better service to the east side from childrens	3/6/2015 5:13 PM
355	Light rail transfer will probably take longer on 545 redmond to seattle than off-peak 545 bus-only service so I would be less likely to use transit. The main route that I use to get to key places on the Eastside (242) will be much more difficult to access by public transportation if no buses go there, so I will be more likely to drive instead of using transit to commute to work every day.	3/6/2015 4:31 PM
356	I'm not thrilled about the idea of relying on a bus that only comes once an hour (the 207), especially with an additional transfer involved to/from the 271, but Metro is my only option to get to school short of buying a car, so I don't have much of a choice.	3/6/2015 4:25 PM
357	If there are later evening trips to Woodinville being planned it would change my behavior considerably if there are downtown events	3/6/2015 4:19 PM
358	I could visit my friend out by Bear Creek more reliably.	3/6/2015 4:14 PM
359	Does a nice job unifying service between Seattle and Eastside at University transfer point, letting commuters take any bus and transfer to light rail, instead of having to choose a more specific bus route.	3/6/2015 3:52 PM
360	Would use less of off-peak service	3/6/2015 3:49 PM
361	Better connections the eastside would make me consider traveling there more often.	3/6/2015 3:34 PM
362	I use transit as often as possible even now.	3/6/2015 3:33 PM
363	The current system which I use nearly every day has worked well so far, but I think it would be slightly easier with Alternative 1.	3/6/2015 3:25 PM
364	I may use the 372 more.	3/6/2015 3:23 PM
365	44/5/E & D are my most used routes now and in the imediate future.	3/6/2015 3:20 PM
366	My main use of transit to downtown Seattle. The proposed transfer is far too slow and unreliable. Montlake Bridge is a traffic nightmare. Bridge openings are unpredictable. The transfer conditions are unreliable and slow. If the concept had been to terminate SR-520 buses at UW Husky, there needs to be dedicated right of way created to make those transfers reliable. That hasn't been done. Metro might as well tell Kirkland riders to just buy cars and drive, then to subject them to the vagaries of southbound Montlake Blvd. Keep our SR-520 buses on SR-520 to downtown and make WS-DOT retain the Montlake Flyer station. I can walk between there and UW Husky as fast as a bus can make it.	3/6/2015 3:02 PM
367	No car	3/6/2015 2:57 PM

Q28 How would you improve Alternative 1 on the Eastside – keeping in mind that the goal of this network is to have a consolidated, frequent network of service?

#	Responses	Date
1	Provide no transfer service between Kingsgate P&R and downtown Seattle during peak commute times. The commute is long enough now - forcing a transfer completely negates any advantage to using Metro. I'll put together a carpool rather than transfer to Link.	4/1/2015 1:47 PM
2	Work with Sound Transit and turn the 255 route into a light rail extension. Seriously. I understand that's not realistic right now in this study, but light rail needs to cross 520 to make the Husky Stadium Station a more viable and easily accessed hub for Eastside transit users like me.	4/1/2015 7:29 AM
3	Build a Sounder line on the connecting the city's of Bellevue to lake Stevens.	3/31/2015 5:47 PM
4	direct bus to/from CHRMC/Overlake Hospital Campus instead of going through Bellevue transit	3/31/2015 5:42 PM
5	keep the 255 running eastbound from the university light rail station	3/31/2015 5:18 PM
6	Be able to catch the 271 in Montlake where it stops now on 520	3/31/2015 4:48 PM
7	I love the route 255 connections between the UW station, U Village, and Children's Hospital. I urge Metro to swing into action in terms of applying pressure to get Montlake Blvd transformed into a bus-friendly corridor. The executive and the council truly need to show some leadership and get Montlake Blvd HOV lanes on the radar immediately.	3/31/2015 3:45 PM
8	Look for places where the stated concerns of "experts" in specific problem areas can be mitigated; hybridize where it makes sense to do so to keep the service human.	3/31/2015 2:39 PM
9	I would ask to keep 372 and concentrate on culling lines that congest more within Seattle... some people rely solely on 372 and 72 to get from the Bothell / Woodinville area to the UW Campus. There are no alternatives in this scenario.	3/31/2015 1:32 PM
10	545 needs to be more express and buses from Montlake need to be more frequent to Seattle Children's with only having to walk less than a mile.	3/31/2015 12:10 PM
11	More direct busses connecting downtown cities to Seattle and the University District.	3/31/2015 11:40 AM
12	Keep the Montlake freeway stop.	3/31/2015 11:32 AM
13	I'm most worried about route legibility. Some routes go some places some of the time, which is one of Metro's nasty habits. There are multiple routes all masquerading under the same route number. They're _almost_ the same, but not quite, which is difficult unless you know the route well. Please add letters to the routes. So you'd have a 542G that goes to Greenlake park in ride in addition to everything else. (The letters don't necessarily have to be descriptive, they can just be A, B, C, D if there isn't an obvious differentiator.)	3/31/2015 1:59 AM
14	Maintain the same or greater bus connectivity at Montlake, No reductions in service for the 542 or the 545.	3/30/2015 9:35 PM
15	Add a segment to some 542 runs to make up for loss of 242. Make some of the runs of buses connecting UW Link to neighborhoods north of UW express with very few stops in between. Keep some non rush-hour runs of 545.	3/30/2015 8:54 PM
16	I would do whatever is necessary to give the 271 a direct same-stop transfer to other SR-520 routes. I would give the best possible Husky Stadium transfer, so that as few people as possible will need to cross Montlake Blvd at-grade. These ideas sound excellent: http://seattletransitblog.com/2015/01/30/improving-bus-rail-integration-at-uw-station/ I would ensure no bus is delayed by traffic on the Montlake Blvd exit ramp. I would consider dialing back direct-to-downtown service on the 545 during PM peak, as that is exactly when the jams on Stewart St are worst. Frequently, I've spent much longer waiting on the bus there than it would take to transfer to Link. I would guarantee that buses departing Husky Stadium - especially in the late evening - would wait for Link trains, and publish that someone arriving at downtown stations by a specific time would be guaranteed to catch a specific 542/255/whatever bus.	3/30/2015 5:51 PM

17	Extend route of 242 to overlake	3/30/2015 5:22 PM
18	Extend peak hour service through 8:30	3/30/2015 4:15 PM
19	Direct line from Bellevue to Seattle Children's Hospital	3/30/2015 1:48 PM
20	direct service between eastside and Seattle Childrens Hospital	3/30/2015 1:41 PM
21	i can get to montlake but takes too many buses to get up to Children's and too many hours from when i can leave my house. a 20 min max car route or a 2+ hour bus....	3/30/2015 11:56 AM
22	Add all day direct service to downtown.	3/30/2015 9:47 AM
23	Please do not change St 545 express routes.	3/30/2015 9:32 AM
24	Direct connections from North Seattle/U district to Eastgate.	3/30/2015 8:48 AM
25	Keep options open for connecting southend I-405 transit riders with I-90 and 520	3/30/2015 8:45 AM
26	Keep the 540 as is.	3/30/2015 7:51 AM
27	Extend Route 255 to another place in northeast Seattle that does not use Montlake Boulevard NE	3/30/2015 7:26 AM
28	Glad to see some acknowledgement of the Houghton Park and Ride. Right now, the 245 is the major transfer from the 255 up the 70th Street hill to the east. So it would be ideal if there was some synchronization between the two buses.	3/29/2015 8:17 PM
29	Unknown.	3/29/2015 4:24 PM
30	don't know	3/28/2015 10:48 AM
31	More 24 hour bus service	3/28/2015 8:01 AM
32	Have a direct route to Seattle Children's Hospital.	3/27/2015 10:22 PM
33	Keep the montlake flyer stops.	3/27/2015 9:16 PM
34	mass transit over bridge, park and ride esp evening and weekend	3/27/2015 7:57 PM
35	IN ALL CASES, SOME ASPECTS OF BOTH ALTERNATIVES 1 AND 2 SHOULD BE INCORPORATED.	3/27/2015 6:31 PM
36	Make no changes to 545 during non-peak hours.	3/27/2015 4:48 PM
37	Build the light rail to the east side	3/27/2015 3:58 PM
38	Keep Express service in Montlake	3/27/2015 2:33 PM
39	Please keep the 540 route. Would like to see more frequent service every 15 min. up until 7 pm.	3/27/2015 1:25 PM
40	establish direct connection do Swedish campuses	3/27/2015 1:15 PM
41	You need to provide an alternative express route from downtown to Totem Lake other than just the 311 during peak hours and it needs to go into the Park & Ride, not just the freeway stop.	3/27/2015 1:03 PM
42	Extend the 256 to Juanita via Market St.	3/27/2015 12:36 PM
43	Don't truncate the 255 at Totem Lake, please	3/27/2015 12:03 PM
44	Reinstate route 265.	3/27/2015 11:32 AM
45	Most Eastside commuting assumes that travelers are going to Seattle for work, while there are a fair number who commute the opposite directions. Increasing service West to East for the work day should be considered. Especially with Microsoft, etc.	3/27/2015 10:06 AM
46	Get light rail closer to Renton/Maple Valley to the Eastside and over to SCH & UW area	3/27/2015 8:48 AM
47	To have the 372 drop off closer to Seattle Childrens	3/27/2015 8:14 AM
48	Consolidating 545 and 542 makes sense, but I think it should be 542 that gets cut and that 545 gets service extension, including extending its peak hours to at least 9.30.	3/26/2015 10:06 PM
49	Keep direct service downtown on the 311	3/26/2015 5:23 PM
50	Connect Roosevelt & 45th and Convention Place Station area	3/26/2015 4:29 PM

51	Extend 540 to the North along Market and then 98th--up to NE 116th or NE 124th. Increase the frequency of 372.	3/26/2015 4:20 PM
52	I would create a more direct route in particular for Seattle Children's employees. It would be so helpful to eliminate being routed through the UW campus somehow and being able to go more directly from Montlake to Seattle Children's.	3/26/2015 2:51 PM
53	Direct service from Kirkland/Issaquah to Seattle Children's Hospital.	3/26/2015 11:27 AM
54	Ideally, I'd like a direct service from the Eastgate Park and Ride to Children's hospital.	3/26/2015 11:24 AM
55	direct frequent all day service across I90 into the bus/rail tunnel	3/26/2015 11:17 AM
56	Run the 311 every 5 minutes as you do the buses to Redmond, and they must all be double buses. Although the buses to Redmond are already crammed with people even though they run very often, so I am not sure that would even work.	3/26/2015 10:36 AM
57	keep 540 on 108th ave NE	3/26/2015 10:34 AM
58	A more central park and ride to 520 so that I do not need to go out of the way to get the bus.	3/26/2015 10:24 AM
59	I would take the bus and not drive if there was a direct line from kirkland to seattle childrens	3/26/2015 10:14 AM
60	have enough bus capacity to meet demand....presently, given that I stand on the bus most days a week & have been left behind by a full bus at my stop several times, demand is not being met	3/26/2015 10:09 AM
61	Light Rail on the Eastside is the only answer for a consolidated, frequent network of service.	3/26/2015 9:58 AM
62	Keep 242! And make sure there is a way to move between Overlake and North seattle during mid-day. Currently 545 is the only way to do this, with a transfer to 41 downtown.	3/26/2015 9:56 AM
63	Proposed 311 route could stay as proposed. Do not delete 252 or 257. 255 should still go thru Kingsgate P&R and could end at UW station for transfer to Link.	3/26/2015 8:50 AM
64	Bus service expand beyond the UW and up Sand Point way.	3/26/2015 8:35 AM
65	The current alternative 1 is horrible for anyone living north of Totem Lake. Some sort of direct service from Woodinville / Kingsgate to the UW link station may be acceptable IF the route and rail schedule can be aligned so the wait at the transfer is short. That's assuming everything runs on-time.	3/26/2015 7:36 AM
66	More frequency of connections to hubs like light rail station and/or U-District to Eastgate area. Have a shorter ride (less than 2 hours) from those hubs to Eastgate/South Bellevue area.	3/26/2015 7:15 AM
67	Consolidate multiple Eastside routes for transfers at Evergreen Point or Yarrow Point stations. I'd rather take a transfer on the 520 corridor than have to detour through UW to get from the Eastside to central Seattle. Align Eastside peak routes along the same streets in downtown Seattle to allow taking the first available one for more frequent service.	3/26/2015 2:50 AM
68	Make sure that direct service from Bear Creek P&R is available to UW and downtown Seattle without having to go through Redmond, which adds 15 to 20 minutes in each direction.	3/25/2015 8:11 PM
69	Leave the 255 bus route as it stands now. frequent and no transfers involved.	3/25/2015 7:23 PM
70	There are many medical personel that meet at south kirkland park and ride and travel to UW and Seattle childrens hospital. If we could have a direct bus to these hospitals, I believe ridership would go up.	3/25/2015 6:15 PM
71	Please consider the increase in time for commuting Secondly, when there is a mechanical failure in the tunnel this would impact serverly	3/25/2015 3:44 PM
72	I currently park at Bothell due to the lack of service to Woodinville. Missed connection in Lake City to 75 too many times. I have had to wait up to 30 minutes in Lake City for a bus to Woodinville. Better connections and or direct service from Bothell would be a plus.	3/25/2015 3:04 PM
73	Extend the 255 further north to Magnuson. Make sure as many buses as possible have good connection opportunities at Evergreen Point.	3/25/2015 3:03 PM
74	frequent service	3/25/2015 2:51 PM
75	Working 12 hour shifts, none of us want to take public transit that increases out communte time based on mulitple transfers. If a direct route were available without increasing commute times more 12 hour staff would engage	3/25/2015 2:47 PM
76	Please have a direct connection from Northgate, Seattle to Downtown Kirkland.	3/25/2015 2:05 PM

77	Would have to see the new link rail line to comment.	3/25/2015 1:59 PM
78	More busses from Kenmore to Downtown, they are so crowded.	3/25/2015 1:36 PM
79	Bus must have dedicated lanes and not sit in traffic with all the cars. Need frequent service connections with bus and light rail for at least 6A-9P Safety	3/25/2015 1:27 PM
80	Direct from SR-520 to Seattle Children's from Kirkland	3/25/2015 1:17 PM
81	Keep the 277 running as a direct route from Houghton P&R to the UW. So important to do so for students, staff, faculty of the UW!!!!	3/25/2015 1:09 PM
82	Pls consider taking some of the many 550 buses and use them for other routes. It feels like Bellevue always has 5-6 550 buses that come every 3-7 minutes versus the 1 or 2 that come for others on the Eastside (Issaquah) every 25-30minutes which is quite frustrating b/c these are packed during rush hour (morning/evening). We could use at least 1 or 2 added express buses for us too.	3/25/2015 1:04 PM
83	direct service from issaquah to seattle childrens hospital	3/25/2015 12:54 PM
84	Increase service on route 268 from Bear Creek Park and Ride to Montlake Freeway stop so that riders from Sammamish do not have to spend 15-20 minutes going through Redmond to get to the freeway. I've been at the Bear Creek Park and Ride waiting for the 268 when the 545 comes through. No one gets on the 545 but everyone gets on the 268 to the point of the double bus 268 being standing room only.	3/25/2015 12:46 PM
85	Would make it an Express or at least have it so only one transfer were necessary.	3/25/2015 12:46 PM
86	255 going to Seattle Children's in Bellevue.	3/25/2015 12:45 PM
87	From Seattle Children's Hospital directly to Eastside.	3/25/2015 12:43 PM
88	I really love the idea of a direct route to Seattle Childrens and back from Kirkland. I would use it every weekday I work. Weekends - I would need a route that runs early enough to get me to the hospital by 6am and home again after 6:30 pm.	3/25/2015 12:36 PM
89	ST route between Tacoma and Bellevue	3/25/2015 12:34 PM
90	I prefer Alternative 2. It is the only one that serves my needs.	3/25/2015 11:39 AM
91	Extend new Route 256 (or 255-X?) to off-peak hours. Extend Route 540 into the evening hours.	3/25/2015 11:33 AM
92	in my case, consolidating and providing more frequent service creates inefficiency. who should benefit from efficiency?	3/25/2015 7:40 AM
93	Make all the improvements you want, but leave bus routes from Brickyard park-n-ride to Downtown Seattle alone. Working/middle class people with families that choose to live in decent neighborhoods outside of the ghetto that is Seattle should not penalized and marginalized. Let us get to work without it taking hours.	3/25/2015 6:40 AM
94	sounds good to me.	3/24/2015 8:50 PM
95	Maintain the express services currently running during peak hours. These busses are already crammed full of people, consolidating these busses with other busses at a light rail transfer will not work.	3/24/2015 8:47 PM
96	I have comments specific to the proposed Route 207; however, since it is a single local route, and I see that there's a section for giving feedback on specific routes later in the survey, I'll put those comments there. Otherwise I generally like Alternative 1 as-is.	3/24/2015 8:44 PM
97	I don't mind the idea to consolidate 252/257/311. I probably wouldn't even mind a detour for the 311 to stop at the light rail station. I'm just concerned about the changes to the Seattle end of the service for my commute.	3/24/2015 8:30 PM
98	It's difficult for older and handicapped people - most likely to use bus service - to walk further to catch a different bus now that their service has been cut to make way for Alternative 1. So - find a way to keep some of the outlying service - maybe using the smaller buses.	3/24/2015 7:49 PM
99	Always run 545 between Overlake and Downtown Seattle without a transfer to light rail on weekdays.	3/24/2015 7:48 PM
100	Alternative 1 sounds pretty good the way it is, I like it.	3/24/2015 6:08 PM
101	Keep direct trips between Kirkland & DT Seattle (business district). Transfers to this area are not necessary.	3/24/2015 6:01 PM
102	do not change 255, 257 or 252 or extend light link rail to Kirkland.	3/24/2015 5:51 PM
103	Have some direct services into Downtown for 311	3/24/2015 5:05 PM

104	The afternoon Overlake TC deviation needs to go away. The 235 and 238 crisscross in Totem Lake, for no obvious reason. The 238's current alignment requires a deviation into Houghton P&R; consider re-routing it to allow a straighter route alignment. The 271's deviation into Bellevue College should be deleted, unless Bellevue College and the City of Bellevue commit to improving Snoqualmie River Road for buses. The 271 should operate via 112th St and use the HOV direct access ramps at 108th Ave NE instead of providing local service in Medina; another route such as the 235 should be extended into Medina instead. This would speed up the 271 and also allow for same-stop transfers at the SR 520 freeway stops between the SR 520 routes; presently this is only possible at Montlake, and that opportunity is going away soon. The service pattern for the 542 and 545 is too complicated, with too many different terminals and routings depending on the time of day.	3/24/2015 4:25 PM
105	Reduce the walking distance between bus and light rail at the University District station.	3/24/2015 12:53 PM
106	Have 542 stop at overlake park and ride/village in addition to the stops at 40th.	3/24/2015 11:51 AM
107	Make it more clear how fares/transfers would work between bus and light rail modes.	3/24/2015 10:01 AM
108	again, if you have parking, more will take bus or rail if they can get there and find parking.	3/24/2015 9:39 AM
109	Kind of like what I said in the last one that having the alternative of taking a bus to Montlake then transferring maybe better for peak traffic times but for non peak times like early morning bus riders it will add time for us because we will need to do 2 transfers instead of our direct shot right now. I know it may not be possible but for the early buses maybe have a route that alternates taking you to Montlake or taking you downtown directly on the current route of 311,252, or 257.	3/24/2015 8:30 AM
110	More direct travel no transferring!	3/24/2015 8:24 AM
111	Since there are 3 buses that go basically the same route starting at the Kingsgate Park and Ride - 252, 257, and 311, I would say it would be feasible to eliminate one either the 252 or 257 but still have them go all the way into the city.	3/24/2015 7:47 AM
112	You need to keep some options for direct bus service from north Kirkland into Downtown Seattle that does not require transferring buses or to LINK. Otherwise, feel free to build a LINK station in Kirkland for more seamless service.	3/24/2015 7:47 AM
113	all day service between Kirkland and UW	3/24/2015 7:01 AM
114	A direct, no-transfer route from downtown to Overlake Transit Center (545) is still needed. Maybe it doesn't need as many stops (timing studies can be done to see if south downtown would benefit more from taking light rail to U-District), but the detour and transfer is too much to build into other commutes.	3/24/2015 2:55 AM
115	I would change the peak hour schedule for the 545 to 6-10 am for the 545 route instead of 5-9 am.	3/23/2015 10:26 PM
116	Keep the 255 intact and run more buses more often.	3/23/2015 9:14 PM
117	don't screw up the 255 and 540 routes!	3/23/2015 5:23 PM
118	I'd like rapid ride added along Rt 202 between Woodinville & Redmond Transit Center --- Rt 202 is extremely crowded during office hours. You also need to improve crosswalks and bus stop locations along Rt 202	3/23/2015 5:14 PM
119	Keep 545 service on evenings and weekends	3/23/2015 1:41 PM
120	One Transit Agency for all. Metro buses, ST light rail and trains, and the trolleys. All should work on ONE system (if that is ORCA or whatever I do not know), but when needing to transfer, one should not have to worry about having to "pay again". That only keeps people in their cars. More service frequency is needed across 520 to at least South Kirkland P&R. Today, one can be stuck for a long time on the western side of the lake, with no options of getting across, period. Getting across would at least open up the option to walk or bike home.	3/23/2015 1:08 PM
121	Extend ST 560 to service the Houghton Park/Ride. Those of us who live in the Kirkland area need convenient access to a bus route to the airport. Currently, we must negotiate our way to the Bellevue Transit Center in order to board the 560: very time consuming via bus (at requires 2 buses to get to BTC) and a hassle to have someone drop us at BTC via private vehicle: traffic, non-existent parking.	3/23/2015 10:25 AM
122	Keep direct route between downtown Kirkland and Downtown Seattle Bus Tunnel.	3/23/2015 10:19 AM
123	Bring back the 243!!!	3/23/2015 9:43 AM
124	Keep the 252 and 257 routes.	3/23/2015 8:46 AM
125	Keep routes 252, 257 and 238 as is - NO CHANGES.	3/23/2015 7:57 AM

126	I do not ride the 545 but I notice that it is one the most packed routes. It probably has enough riders to support frequent service under both concepts.	3/22/2015 10:52 PM
127	207: I could tolerate the reduction to hourly service--on weekends and evenings and mid-day. I believe that half-hourly service is crucial during the commute times. I believe that service should begin an hour earlier, and extend until late evening. I believe that service should be extended to weekends. I would suggest that a smaller bus be used, if the reasoning for canceling service is that the bus is not running full.	3/22/2015 9:05 PM
128	Increase number of trips to/from Woodinville on the 522 during peak hours. Too many stop/start in Bothell only	3/20/2015 6:04 PM
129	Extend Interline 271/48 to Issaquah TC via I-90 and not route through all the neighborhood.	3/20/2015 4:13 PM
130	Retain 255 to downtown and 540 to UW.	3/20/2015 2:33 PM
131	I ride the 255 from downtown seattle (Convention Place) to South Kirkland. It seems that this commute would be enhanced by the changes (I almost always ride during peak times). having to transfer during this trip would really suck. However, I am looking forward to attempting to transfer to light rail to get to the capitol hill station, so i can skip traffic on I5. I like the consolidated frequent network idea, although of course it is going to suck for some people that get shafted here. Not everyone is going to all of the sudden start using light rail, and transferring to light rail could still take more time than just driving there straight on a bus.	3/20/2015 2:06 PM
132	I would not alter the current 372 or 271 schedules, and would add Saturday and Sunday service to the 372.	3/20/2015 1:37 PM
133	More express buses from the Brickyard PNR, rider ship is way up on the 311. I had to go to an earlier time bus because the one I had been taking for two years became a sardine can at 6:29am. We pay taxes too, quit giving us the short end of the broom stick. Eastsider's are being treated like we don't matter. Give us more buses from the Brick Yard PNR that run all day and are express. I will not ride a bus or lightrail that takes me 30-40 minutes longer than I'm already enduring.	3/20/2015 1:35 PM
134	Just make sure transfers work well.	3/20/2015 1:24 PM
135	Don't cancel the 277. Everything else looks great.	3/20/2015 1:13 PM
136	Keep the direct connection between Redmond 148 AVE NE 242 and Green Lake, NorthGate etc.	3/20/2015 11:11 AM
137	Extend Bus Route 246 to Clyde Hill/ Yarrow Freeway Station.	3/20/2015 10:38 AM
138	I'm mostly concerned about the logistics of a transfer between buses and the University Link Station. If this is simple, like get off the bus and walk downstairs, this will be a broad success in my opinion. If the bus drops off blocks away I will be more frustrated - especially when it's raining.	3/20/2015 9:08 AM
139	i only ride to montlake & 520, work at NOAA	3/20/2015 7:45 AM
140	I would nix the 545 and 256 and put those hours into increasing frequencies on the 542 and 255 and possibly have these trips terminate at Husky Stadium.	3/20/2015 12:53 AM
141	coordinate transfers	3/19/2015 11:40 PM
142	Include more service between Eastside and Downtown later at night	3/19/2015 11:10 PM
143	My additional improvements would increase service on the 269 to the Sammamish plateau	3/19/2015 10:21 PM
144	With the proposed consolidation of service I don't see how it is possible to make it work. There needs to be some way of getting from the Kingsgate area to downtown seattle in much the same way it happens now.	3/19/2015 9:58 PM
145	I think all routes that serve the Eastside that operate on SR 520 should all terminate at the University of Washington Campus expect the 255 should terminate at Children's Hospital. Routes 542, 555, 556 should maintain routing past U District except the 555 should serve NE 145 ST Freeway Station	3/19/2015 8:00 PM
146	No improvement seen except to provide light rail direct connection from Kirkland to Downtown Seattle if light rail is the key to the this alternative.	3/19/2015 6:53 PM
147	No transfers on 271 and we need the same level of frequency since we don't have light rail options to get to the Eastside!!	3/19/2015 3:55 PM
148	Because it's not convenient, I can't see how to improve this alternative.	3/19/2015 3:26 PM
149	I would add more direct service from northeast Seattle to Downtown Bellevue. Not everyone who lives in northeast Seattle works in the cities north of Bellevue (i.e. Kirkland, Redmond, etc.).	3/19/2015 2:20 PM
150	More frequency of 545 routes would help with transfer time between various Seattle side connection to that route.	3/19/2015 11:15 AM

151	Better coordinate route timing to/from Finn Hill with express routes to/from UW.	3/19/2015 10:46 AM
152	Do not charge extra for the transfer to Link Light Rail.	3/19/2015 9:11 AM
153	Add service to NE corridor: 522 and Juanita Dr. in Kenmore, Bothell, Lake Forest Park, Woodinville, Juanita, and Kirkland. Expand park and ride capacity in Kenmore and Bothell and other locations. Include some of the features from Alt. 2 (should not be either-or) (Raise my taxes, please!)	3/19/2015 8:55 AM
154	More trips from center of Sammamish (along 228th) to Redmond. Route 269 needs expansion; even if it just goes to Redmond and not Overlake	3/19/2015 8:30 AM
155	No matter how much change is made, as long as connection times improve would be greatly appreciated. Over the years, the one constant ire is the lack of decent transfer timing between connections. As traffic gets worse, buses can't always get us to our connection due to the small window of accomplishing this, and 5-10 minutes can be eaten up in no time causing you to miss your connection and having to wait for 20-30 minutes for the next one.	3/19/2015 7:57 AM
156	reduce fair by 50 cents	3/18/2015 10:19 PM
157	In the context of this questionnaire, "Eastside" doesn't seem to include much for Kenmore/Bothell residents.	3/18/2015 8:53 PM
158	...	3/18/2015 7:40 PM
159	Maintain integrity of service during off peak hours.	3/18/2015 2:47 PM
160	Maintain route 252 (access to SLU from Kingstate). Add Carpool lane for buses between SR520E and I-405N. The South Kirkland P&R (i.e. current 255 and 540 routes) are much more preferred than the proposed routes from SR520E to I405N (e.g. new route 540 to the Houghton P&R) because the wait times to get on I405N from SR520E are so long! It's faster to take surface streets during peak hours.	3/18/2015 2:33 PM
161	More hub-hub coverage including late evening trips at least every 30 minutes	3/18/2015 2:28 PM
162	Alter either the 542 or 545 routes to take on some of the 242 stops on 148th.	3/18/2015 2:11 PM
163	Keep 242 or increase frequency of 542 during peak hours.	3/18/2015 2:07 PM
164	I don't know.	3/18/2015 1:56 PM
165	Anything that can get Eastside commuters from bridges into mass transit to mitigate the chaos on I-5 and I-405 between the bridges, would make life for thousands (if not 100s of thousands) easier. I drive to Bellevue to commute via 271 from Bellevue to UWMC. In the evening, the driving aspect of my commute between Bellevue and Issaquah is a no-win situation. If Westbound I-90 (Bellevue to Seattle) is backed up, which happens ALL the time, Bellevue Way backs up and I can't go Eastbound I-90. Obviously Eastbound I-90 backups affect me too but are less frequent. I cannot drive via I-405 as it is a parking lot both ways at all times. Please help us bridge-dependent commuters get out of our cars! Additionally, we do not have enough parking in South Bellevue P&R or Bellevue in general. Eastgate P&R access is problematic - so problematic that I bike there if I use that P&R. We need more direct frequent, faster service from Eastgate/Issaquah to UWMC - I'm okay making a connection at i-90 or 520 but there are limited options. Think 556 route, with less stops, more frequent, if possible. Even 271 with less stops would be better. I don't mind walking or biking. When will light rail help with bridge traffic and in-between bridge traffic?	3/18/2015 1:48 PM
166	Bringing expert from Europe, Japan, East-coast anywhere that has a good public transportation.	3/18/2015 1:35 PM
167	Forget smaller neighborhoods. Focus on improving transit between the large, high-frequency areas during commute hours and shoulders	3/18/2015 1:26 PM
168	We lose the capability of traveling between downtown Seattle and Kirkland other than during rush hours without a lot of hassle if the 255 route is changed. The 255 route has increased ridership from 2:30 pm on, which is before the peak hour window. And is there that great a need to reroute the midday run thru the U-District and up to Children's Hospital?	3/18/2015 1:24 PM
169	Why isn't the 522 listed anywhere in either of these options?	3/18/2015 1:18 PM
170	Add weekend service from 522 to U District, to new light rail stations.	3/18/2015 1:02 PM
171	Option for late night/overnight service and weekends.	3/18/2015 12:51 PM

172	Go up First Hill without a transfer to another bus. Right now I get off at Yale. Walk up the hill. Take the VM Shuttle. At night, I walk down the hill and take the 255 in the tunnel. Just a lot more walking up and down hills. Yes it is good exercise, but sometimes when it is raining, it just isn't a good thing. The sidewalks need so much work, you really have to watch where you are walking. And pass by people who are using drugs or homeless people. My bus stop was across the street from VM. Oh well. It seems like you are more concerned about Seattle then the surrounding cities. We all don't live in Seattle.	3/18/2015 12:50 PM
173	For Route 271, I like the 10 - 15 minute frequency throughout the day especially during UW school days (we could nickname 271 the UW school bus because the majority of riders are UW students during school times). Also, it would be so nice to have newer buses on Route 271. The old 271 buses need to be updated soon, please. Thank you.	3/18/2015 12:45 PM
174	I would use transit more if the 556 bus from Northgate to Issaquah Highlands ran more frequently, like having some of those buses travel after 6:30 PM on Weekdays. Right now, I have to ride the 271 and then transfer to the 554 if I want to stay in the U-District after normal work hours. It takes about 45 minutes longer.	3/18/2015 12:30 PM
175	I like the improvements to 542 but I would not reduce 545. Both 542 and 545 are important and I do not think the Light Rail completely replaces 545.	3/18/2015 12:27 PM
176	Improve frequency of route 540	3/18/2015 12:18 PM
177	Ensure consistent service (peak and off-peak) between UDistrict and Issaquah, not just to Eastgate.	3/18/2015 12:13 PM
178	Put 271 on 520 and find another way to service Medina if the ridership justifies it.	3/18/2015 12:12 PM
179	No suggestions. I would not use light rail.	3/18/2015 12:01 PM
180	Make sure service between Bellevue College and the University of Washington continues to be about every 10-15 minutes (route 271).	3/18/2015 11:57 AM
181	Add route 541 as in alternative 2. Please have more service for overlake village - there are apartments going up there. Or, have the 542 stop at overlake village.	3/18/2015 11:48 AM
182	DO NOT TAKE AWAY STREAMLINED OPTIONS FOR TRANSIT REQUIRING MORE TRANSFERS!!! What benefit is there to those who are able to take a 545 or 542 directly to their destination right now if that is broken up with a transfer and ultimately adding more time to their commute? This is a backwards movement.	3/18/2015 11:43 AM
183	Consolidated away in other areas if that means you actually provide for Bothell more to areas into and out of Seattle.	3/18/2015 11:37 AM
184	I'd leave an occasional bus straight to downtown, but if it's going to be frequent with the light rail, maybe that would suffice	3/18/2015 11:36 AM
185	I would have the link light rail run down 522 to the U District Station. The eastside, especially north and east of Kirkland/Redmond, is generally ignored when considering public transit options. Most people have to drive a good distance to be able to find good transit, or just drive the entire way.	3/18/2015 11:28 AM
186	Add a trip to the 235 so I don't have to wait as long to make a transfer after the 277 is eliminated. If I miss a transfer I'd have to sit around for 30 minutes for the next one and that sucks.	3/18/2015 11:16 AM
187	We don't need more frequent service on the 242, the cadence is just right. Six buses between 6am and 9am running to Overlake. Six buses between 3:30pm and 6pm running to Ridgecrest. The concept of a "consolidated, frequent network of service" sounds great, but if it means killing a popular, targeted, highly efficient route, then your concept is making things worse, not better.	3/18/2015 10:55 AM
188	Make the 311 an Express into downtown from Brickyard.	3/18/2015 10:07 AM
189	There needs to be one or two "trunk" routes connecting major Eastside hubs (Issaquah-Bellevue-Redmond-Kirkland-Totem Lake). With fast, frequent connections, much of the direct service to Issaquah and especially to the Issaquah Highlands/Sammamish can be eliminated (off-peak hours especially). There are already too many routes crisscrossing Lake Washington.	3/18/2015 12:28 AM
190	Increase 545 morning service to 10am, and 545 evening service to 8pm	3/17/2015 10:02 PM
191	I would try and make the transfer to UW Link as low-friction as possible by having westbound passengers drop-off directly in-front of the station on Montlake Ave and move the eastbound pickups as close to the station as possible.	3/17/2015 7:52 PM
192	Keep route 242. Keep route 542 to Greenlake P&R instead of killing the service from the U District to there.	3/17/2015 7:34 PM

193	Maintain a stop at Shelby to preserve ability to transfer to southbound routes before the stadium station for routes coming in from westbound 520, like the 542.	3/17/2015 6:19 PM
194	The only worry I would have is that there is already not enough parking at the Eastgate Park and Ride and reducing the extension to Issaquah might increase the number of people driving from Issaquah to the Eastgate Park and Ride.	3/17/2015 4:08 PM
195	No eastside routes should be changed. We already have a consolidated, frequent network. Sound Transit is simply adding a superfluous stub that happens to cross SR 520. Alternative 1 tries valiantly to make use of the North Link for eastside routes that cross over it. But the concept only succeeds in ruining a perfectly good square peg that we rely on daily, by trying to ram it into the round hole that is North Link.	3/17/2015 1:09 PM
196	For commuter routes, it is important to keep the commuter in mind as they are your customer. As a commuter I want the shortest, quickest, most direct route. A longer route causes stress and transferring causes much more stress as there are more chances for delays, etc.	3/17/2015 10:20 AM
197	Use alternative 2	3/17/2015 9:28 AM
198	Increase choices and options.	3/17/2015 7:29 AM
199	Keep 545 service during off-peak hours on weekdays (I am willing to accept the 545 not operating on weekends)	3/16/2015 5:11 PM
200	Redmond to Downtown is a very popular route. Making it more difficult seems ill advised.	3/16/2015 4:46 PM
201	Make one of the routes that connect North Seattle and Overlake to pass on 148th Ave NE.	3/16/2015 4:18 PM
202	311 routing looks really slow. Maybe run it back on 520 at montlake then exit at Stewart, it can take the routing of today's 309. Also I wish the 311 was bi-directional, since it has to deadhead anyways consider making some of these trips revenue hours. Why do we still need the 268? Axe that and restructure as necessary on the east side.	3/16/2015 3:46 PM
203	Keep Downtown Seattle stops.	3/16/2015 3:15 PM
204	Have a closer interchange 542<->Rail	3/16/2015 2:11 PM
205	More frequent service during peak hours for the 545 route...especially in the evening when there can be no seats. One major challenge is that the OTC stop will often get more access and all subsequent stops are sometimes skipped due to overcrowding.	3/16/2015 1:58 PM
206	Generally I am happy as long as I have a way to get downtown from Redmond - the light-rail transfer from the 545 is a negative but not a huge one. More important is that the 545 runs reliably and frequently without being overcrowded.	3/16/2015 1:43 PM
207	If there are fewer stations, meaning a longer travel time to the nearest station, then I'd consider expanding some of the park & ride stations (depending on how full they are currently) to accommodate more cars. Consolidate the 545 and 542 lines, and have the line end at UW. The 545 seem to run late a lot, particularly during peak times, because of congestion in downtown Seattle. If commute times during peak between Redmond and Downtown are faster when using the light rail link, then this might improve schedule reliability.	3/16/2015 1:27 PM
208	The definition of peak hours is key here. Because Microsoft employees don't have set times to the start and end of the workday, peak is between 7am and 11am in the morning and 3pm to 8pm in the afternoon/evening. If the plan is to use "standard" peak hours of 6-9am and 3-6pm for the increased service for a "revised" route 545, it won't be nearly enough, and lots of folks who today can get a direct route from Overlake Transit Center to downtown Seattle would have to take a transfer under the new proposal, say if they needed to come in to work at 10am or needed to stay at work until 7pm or 8pm (both frequent occurrences for Microsoft employees with schedules that vary each day of the work week).	3/16/2015 1:17 PM
209	I'd keep the peak 242 in the AM, but if the 542 started running earlier again from the I5/65th P&R then I could make it work.	3/16/2015 1:16 PM
210	1) Off-board payment and all-door boarding when transferring from Link to 542/5 routes. 2) HOV on/off ramps from 520 to UW station (I think already planned) 3) Ability to increase frequency on 542/5 routes as needed to meet demand (as more service hours will be freed up when the 545 is truncated at UW this should be possible).	3/16/2015 1:06 PM
211	Keep the 242! Or at the minimum, extend the 542 up to Northgate to continue the current direct service to the eastside.	3/16/2015 1:01 PM
212	keep 545 schedule and frequency same off-peak.	3/16/2015 1:00 PM

213	I'm assuming you're removing this north route because the ridership is sparse until Northgate. If so, move the 242 route to the east (to 15th NE). By having it run within 1-2 blocks from the highway, you're losing potential riders to automobile transit. Move it to 15th, where there are far more eastside commuters.	3/16/2015 12:56 PM
214	Maintain 545 runs during the day. It's very convenient to get directly from Redmond to Downtown Seattle easily throughout the day.	3/16/2015 12:55 PM
215	Do not make the 545 route any slower, harder, or less direct during off-peak or on weekends.	3/16/2015 12:50 PM
216	Keep 242 or provide some option that doesn't make my commute from Maple Leaf to Redmond significantly longer	3/16/2015 12:36 PM
217	Transit lanes between SR520 and Husky stadium Link station. Bus transfer facility at stadium station. Increase frequency of ST 542 to match current frequencies of ST 545 (10 minute instead of 15 minute)	3/16/2015 12:27 PM
218	Keep the 545 and 255 as they are now.	3/16/2015 12:26 PM
219	Increase service on 545, reduce 542. Once you're downtown, you don't have to walk BEFORE waiting for your Link. This is important, because walk time is wasted time when you're about to connect to another bus. Instead, you get off near Westlake, hop on the Link, go to University. If you're commuting south, you're not affected.	3/16/2015 12:22 PM
220	1. Do not change the off-peak 545 or 2. Add a connection between Seattle's NorthWest neighborhoods and the U-District to take advantage of the 542 revisions without affecting travel time for anyone who lives in the North West neighborhoods.	3/16/2015 12:20 PM
221	Rail tunnel under lake Washington--probably not in consideration, but if BART can do it under the bay, why can't we use that solution here?	3/16/2015 12:11 PM
222	Keep the 545 during offpeak hours, though frequency could be once an hour..	3/16/2015 12:06 PM
223	Need a way to get to top of Capitol Hill from OTC without changing bus 3 times	3/16/2015 12:04 PM
224	Change the net same result in the 542 schedule to the current 545 off peak. This means that the additional transfer will just take longer to get to Downtown Seattle to get to the ferry terminal.	3/16/2015 12:04 PM
225	Make 550 truly express or have an express way to the station prior to 520 from Bellevue downtown so I can transfer to the new ST545 route.	3/16/2015 12:03 PM
226	Continue running 545 all day service as option.	3/16/2015 12:00 PM
227	Increase peak hour 545 service between Seattle and OTC.	3/16/2015 11:58 AM
228	N/A	3/16/2015 11:57 AM
229	Leave the 545 as it is - or even make it more frequent. It's already crowded.	3/16/2015 11:57 AM
230	I would maintain extended hours for the 545, such as 7am-11pm.	3/16/2015 11:53 AM
231	Keep some type of connection extending to neighborhoods north of the U-District.	3/16/2015 11:53 AM
232	keep montlake station on 520. I take 44 to 545 and vice versa to go from Stone Way to Redmond.	3/16/2015 11:48 AM
233	I would be okay with requiring bus-light rail transfers from Seattle to Redmond on weekends, but I would like to continue to have direct bus routes on off-peak weekday hours.	3/16/2015 11:45 AM
234	A better solution for Microsoft employees with respect to the 545 who live in cap hill and belltown/QA	3/16/2015 11:45 AM
235	do not increase commute time for workers	3/16/2015 11:39 AM
236	Make it run farther west. From Fremont to use Alternative 1, I would need to take 16 -> 44 -> Light Link rail which is a lot of bus hopping.	3/16/2015 11:38 AM
237	Do not change route 545	3/16/2015 11:36 AM
238	Don't eliminate 242	3/16/2015 11:35 AM
239	Several alternatives: Don't reroute 255 or make 256 a non-rush hour route as well as rush hour, it can be less frequent then and still satisfy the use case. Have 545 stop by South Kirkland Park and Ride.	3/16/2015 11:14 AM

240	Solutions: Don't cut exiting bus service to/from the eastside, and don't require riders to transfer on 520 to get to/from Seattle The network concept as stated is contra-indicated by indicated bus service cuts. Elimination of routes in the early morning during early commute time (i.e., 255) and midday (545) is directly contradictory of what you say you are trying to do. Don't cut them. Also, requiring people coming from the eastside have to de-board a bus on 520 and transfer to get to Seattle takes longer. Connections to buses south of Seattle are already difficult to make due to the lack of cohesion of the Sound Transit schedules; for instance, the 545 already misses the buses to Tacoma by 1-2 minutes. Since these are city-to-city buses it would have been a logical idea to coordinate these schedules. Additional time is added to the trip by making riders have to exit their buses 520, and then wait for the light rail to show up, then finish their trip to/from Seattle. This creates more time for needed travel to/from the eastside. This is supposed to be commuter service, not feeding Metro agenda, right? If you think the rail transfer on 520 to Seattle will take less time than the bus and you are going to move forward with this, make sure the timing of the train catches riders AS they exist the buses (so they don't have to wait) or else you are increasing the travel time of the taxpayers to fund your own agenda, and discouraging use of mass transportation. Make it simple: don't require riders to transfer on 520.	3/16/2015 10:13 AM
241	Invigorate trunk-to-trunk (Freeway-to-freeway) service with bus service simply running up and down the major freeway corridors that have freeway stations. Think of it as freeway-only routes superimposed over your existing route structures as the first of a three-tiered traffic distribution scheme. Easy movement between main facilities in the primary transportation corridors, connection at those facilities to both regional (tier 2) and local service (tier 3). For example, a SR520 route would feature short frequent East/West Stewart & Denny, Montlake, Evergreen, Yarrow Pt. Redmond (only). An I405 N/S might look like Southcenter, Renton, Newcastle, Bellevue, Houghton, Totem Lake, Brickyard, Bothell, Lynnwood. Call these routes the 747s. These feed into the regional routes, think of those as the 737s, and to the local routes, "the puddle jumpers" I think high-level blunt-object freeway station to freeway station service diversifies your structure so that your regional routes can be much shorter and targeted. Each spoke on your network connects to a hub that offers both local, national, and international connections. Please forgive my repeated use of air travel similes, but hey, it's all about transportation :).	3/16/2015 9:12 AM
242	Get the various agencies to cooperate and implement this (http://seattletransitblog.com/2015/01/30/improving-bus-rail-integration-at-uw-station/).	3/15/2015 9:00 PM
243	Keep routes as is for 252 and 257. Route 311 is not a viable substitute for deletion of these two routes. More people will be driving to find parking in already crowded P&R's.	3/15/2015 6:36 PM
244	Sound Transit needs to work out some type of transfer agreement with bus and light rail service. Also, there needs to be more nightly and week-end service because it's not cool getting stuck downtown when you need to get back to the Eastside.	3/15/2015 5:31 PM
245	545 between Redmond and Downtown is a busy route. Keep it unaffected with more buses during peak times and run is a little less frequently during non-peak and weekends, while still offering direct service without needing to connect to light rail. This gives people the option of transiting to light rail during non peak when they cannot wait for direct route.	3/15/2015 10:38 AM
246	Speed up light rail to Eastside via I-90.	3/13/2015 7:33 PM
247	* Increase frequency of the 256 concept to avoid a choke point at the U District LRS during peak hours; with all routes funnelling into the U District LRS, there are certain to be extreme crowds at this station if something is not done. 256 frequency increase will allow for freeway stop transfers at Yarrow and Evergreen from other routes to serve downtown/Tunnel. * If ridership warrants, use the 252 snow shuttle routing to provide service for riders of routes 252 and 257 * Consider tunnel and downtown transfers. Shuffling the 255 to U District will reduce the ability of passengers to directly transfer to a route served by downtown, requiring instead a transfer to light rail between the 255 and the other routes they may use.	3/13/2015 5:18 PM
248	Woodinville Park and Ride has space to park if you delete route from Bothell UW and Woodinville PR, there are no space to part on Bothell UW.	3/13/2015 1:28 PM
249	could add more express lines.	3/13/2015 1:05 PM
250	Wi-Fi on buses	3/13/2015 12:41 PM
251	People do not want to transfer...they want a direct route to take.	3/13/2015 7:30 AM
252	372 needs to go further on weekends!	3/12/2015 10:39 PM
253	Don't make passengers that are already packed on a bus get off and transfer at Montlake unless there's an accident.	3/12/2015 5:29 PM

254	Having a connection point to the link South of UW. It would be acceptable if the bus just stopped at convention place and i could catch the link from there to my place of work. My biggest issue is having to go west across the bridge, then north to connect to a southbound transit option in order to get to my work in South SODO	3/12/2015 1:41 PM
255	Transfers at University Link station should be examined to improve reliability of service.	3/12/2015 11:43 AM
256	I do not fully comprehend Alternative 1, but what I do know is this: As long as this plan is able to keep my ability to get to work and back (in a timely manner) intact, I am all for it.	3/12/2015 10:35 AM
257	Leave the 255 direct to downtown Seattle alone.	3/12/2015 9:52 AM
258	I would rather have a direct service between Redmond and downtown Seattle--Route 268 does that for me and I would prefer that not to change.	3/12/2015 9:20 AM
259	Add a Link station at Montlake, In the meantime vastly improve the design of the UW Hospital station, so buses can stop immediately in front of the Link stations, so passengers can walk between a bus and a link train within one minute.	3/11/2015 11:42 PM
260	I agree with the overall concept of Alt 1 - but I think it makes a simple trip from So Kirkland P&R to downtown more complicated/time consuming then it needs to be during off peak.	3/11/2015 5:03 PM
261	Maintain a connection between North Seattle/Shoreline and the Eastside that requires less than 2 transfers. One connection is realistic, two connections becomes untenable.	3/11/2015 4:17 PM
262	Keep a one-seat direct all-day frequent bus route from Downtown Redmond to Downtown Seattle with enough capacity to accommodate all the people who want to make this trip!!!!!! These 2 urban areas should have a direct fast, frequent all-day everyday transit connection without forced out-of-direction travel and transfers in inconvenient locations!!!!	3/11/2015 11:10 AM
263	Retain direct service during peak hours from Totem Lake and Kingsgate to downtown at current levels. I am also concerned that the elimination of the 252 and 257 would lead to overcrowding at the Kingsgate PR due to people trying to avoid making a 2nd transfer as part of their commute (previously it was none). They would now be required to utilize the 238/235 and other local transit service. Please look at the # of boarding's prior to the Kingsgate PR for the 252/257 and assume that *all* these patrons would drive to Kingsgate and park to avoid the transfer, ensure that parking is sufficient to accommodate this "worst case" scenario. At least wait for the completion of the SR-520 work and improved access to Montlake before moving so many buses to this route. The traffic there is crap and these buses will just end up sitting in it.	3/11/2015 10:07 AM
264	Completely reliable & free reasonably priced way across the damned lake with a bike on 520. I can catch a base bus in the morning & there's usually little wait. But I have to pay \$2.50 or more to travel 1 mile back across the bridge in the evenings and I may have to wait 20 minutes or more for the privilege at rush hour. Someday, there'll be a sidewalk, but that will be 2 or 3 years from now. So, take a low-floor bus, rip out the seats, and have it circle from Montlake to Evergreen Point & back hauling bikes & riders.	3/11/2015 9:33 AM
265	Frequent? Are you joking? You reduce buses directly to downtown and force people to make yet another connection at the UW Link station (a location that will require crossing strings and long walks -- something so great to do in a place where it never rains). You make non-peak travel a complete hassle and complicated. What's needed is to improve connections on the Eastside, not send jam-packed buses to UW Link. These plans just solidify Eastsiders reluctance to fund mass transit because we get sub-par service.	3/11/2015 8:31 AM
266	Add Park & Ride in Lake Forest Park or Lake City.	3/10/2015 8:53 PM
267	stop sending peak 255 and 545 downtown. wasteful and slow.	3/10/2015 7:04 PM
268	I wouldn't implement forced transfers at U-Link until it was certain the busses could make it to/from 520. This may mean waiting for the new exits for Montlake or even for the new bridge. It will certainly mean making some changes on Montlake Blvd to give busses priority. And what is the plan during Husky games?	3/10/2015 3:51 PM
269	Add service between Bothell/Woodinville and U District via 520.	3/10/2015 2:45 PM
270	- Improve UW Station transfers by reducing walking distance and convincing UW to give up parking. - Figure out a way to add bus lanes on Montlake Blvd. - If the 311 deviation into the UDistrict ends up not attracting SLU/Uptown riders, add a few trips to the proposed 64/66 and instead route the 311 via 520/Stewart/Denny/Westlake/Mercer (proposed map below) https://www.google.com/maps/dir/47.6446666,-122.2856342/47.6246115,-122.356702/@47.630801,-122.3258929,14z/data=!4m9!4m8!1m5!3m4!1m2!1d-122.3319003!2d47.6185095!3s0x5490153436e85e09:0xe74b5a0dea4dc29d!1m0!3e0	3/10/2015 1:26 PM
271	more regional 555 and 556 service between North Seattle, UW and downtown Bellevue	3/10/2015 9:26 AM

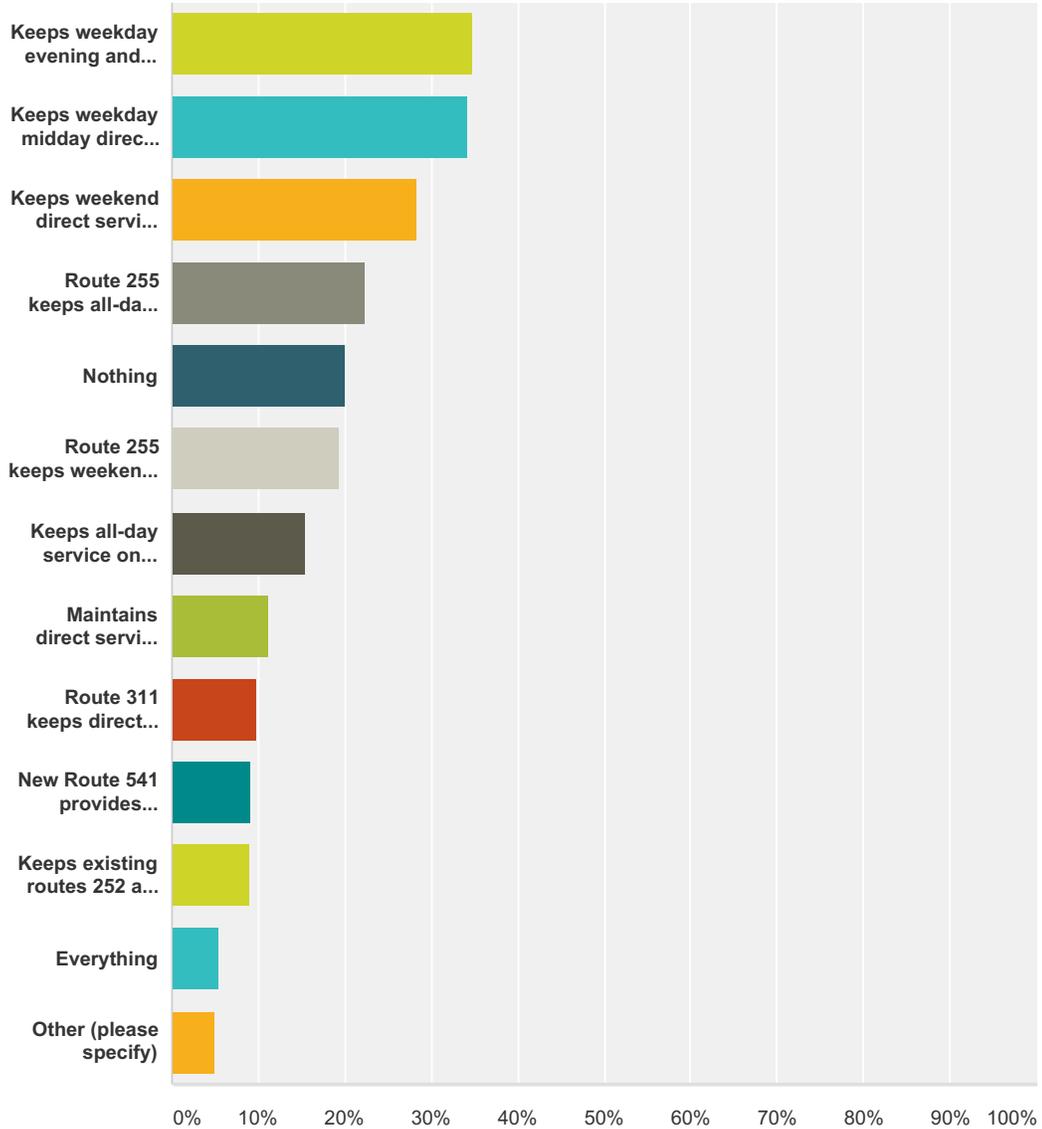

272	More service is needed from the U-District to Wallingford/Femont/Ballard	3/9/2015 10:04 PM
273	Ensure that LINK runs a few trains after the last 542 so that working late still means I can get home (without missing last train). Add some social late-night trips to 542/LINK so that visiting friends in Redmond doesn't strand me, either.	3/9/2015 5:52 PM
274	Actually commit more to the Link/542 connection. 15 minutes isn't really frequent, and 30 minutes in the evening really doesn't work for transfers. it seems like you're straddling the fence, and are in danger of getting hung up on it.	3/9/2015 4:42 PM
275	Keep every 30 min midday service of 545. I don't mind transferring from 542 in the evenings.	3/9/2015 3:41 PM
276	Enhance bus service and not force everything to light rail stations.	3/9/2015 2:45 PM
277	I have no comments for this question.	3/9/2015 2:21 PM
278	Increase the feeds from the eastside into hub points of transfer to link light rail to offer more options for riders. I like having to wait no longer than 15 minutes so please retain frequency.	3/9/2015 11:45 AM
279	Keep the 372 route starting and ending at the Woodinville Park and Ride. Make it a true "Express" by eliminating stops between the UW campus and Lake City Way.	3/9/2015 10:02 AM
280	Keep Route 372 starting and ending at the Woodinville Park and Ride.	3/9/2015 9:48 AM
281	Keep the 257	3/9/2015 8:45 AM
282	establish direct bus connections from eastside to major hospitals in downtown seattle	3/9/2015 5:51 AM
283	Extend route 255 to NOAA campus during peak periods to serve commuters from the Eastside going to NOAA	3/9/2015 3:01 AM
284	There are too many milk-run buses which make transit time from the Eastside ridiculously long, if this plan is focused on TOD and more transit centers, there needs to be one further out, such as in Woodinville since that captures riders past that point who aren't going to drive to Kirkland just to take a slow bus.	3/8/2015 10:25 PM
285	I have no improvements to suggest.	3/8/2015 9:31 PM
286	Parking Keep bus service to/from kirkland/seattle especially 252 and 257 the only express routes Make available to various kirkland neighborhoods	3/8/2015 3:59 PM
287	Try to push Bellevue College into letting the 271 pass through the college instead of wandering around it. Maybe have the 271 serve the 520 freeway stations? granted this doesn't improve much on top of what's already proposed given the lack of transfer opportunity with this plan.	3/8/2015 2:35 PM
288	through route the 271 & 65 continuing to service dt Bellevue	3/8/2015 12:00 PM
289	Direct lines to SLU for 311 / 252 / 257. Or at least consolidate at say Houghton Park and Ride for an express route to SLU.	3/8/2015 8:44 AM
290	255 Night service after Mariner Games and symphony concerts is dismal. We must leave events early to catch the 10:08pm bus, or wait a whole hour for the 11:08. It would be wonderful to have a 10:40 bus.	3/7/2015 8:08 PM
291	as long as this consolidation has minimal impact on cars. how is the impact to car traffic being addressed? safety getting to/from; parking at the stop location.	3/7/2015 2:23 PM
292	Would like to have an Express bus from Northgate around the North end of the lake to downtown Kirkland. The buses from d.t. Seattle to d.t. Kirkland are slammed at rush hour.	3/7/2015 2:12 PM
293	I'd need to be able to get to and from NE 56 th and Roosevelt Way to Evergreen Hospital and be on site between 8 am and 5, 6 or 7 pm.	3/7/2015 12:20 PM
294	Better service to Bellevue College	3/7/2015 11:55 AM
295	Adopt the route 207 as mapped, but retain same frequency as the current 271 between Eastgate-Issaquah-Highlands, or with slight increases in frequency to every 20 minutes through peak hours.	3/7/2015 10:25 AM
296	More service from Renton Transit Center to University of Washington	3/7/2015 10:00 AM
297	I think it is great to provide all day service between NE seattle and Redmond, however I'm some what concerned that we will lose peak trips from green lake park and ride when eliminating the 242. If this was compensated by adding additional trips on the 542 that go all the way to greenlake that would help.	3/7/2015 9:34 AM
298	I would like to be able to travel directly between Capitol Hill and Bellevue.	3/7/2015 8:36 AM

299	more through-routes, make 271 to Link transfers at UW station feasible as a faster route from Bellevue to Downtown Seattle	3/6/2015 10:53 PM
300	Have peak time route between the Central Area and the Eastside/Redmon instead of a new route 38. delete route 8 between Mt Baker and Rainier Beach stations since it duplicates service... Have a small shuttle service for riders who live in between stations on MLK.	3/6/2015 10:30 PM
301	Instead of sending the 255 on a roundabout loop to Children's, have it continue west to Fremont. This would enable a 2-seat ride between Kirkland and virtually all of North Seattle; riders could transfer to the 255 from the 5, 16, 26, 28, and 40, among others. It's similar to how the 45-271 connection dramatically improves trips between North Seattle and Bellevue.	3/6/2015 8:24 PM
302	Quicker routes to light rail going across the lake (520)	3/6/2015 8:16 PM
303	free coffee	3/6/2015 8:14 PM
304	As above minimizing time waiting at transfer stations	3/6/2015 7:53 PM
305	I'd create buses directly from the Capitol Hill Station and the Mt. Baker Stations to the Eastside	3/6/2015 7:48 PM
306	Combine with plan two	3/6/2015 6:07 PM
307	Keep the 542 stop at the Greenlake P&R (and/or have the new 541 stop there)	3/6/2015 5:31 PM
308	I want only two things for the Eastside. 1) Good light rail transfers at UW Station!! 2) Reroute the 271 so it can serve Evergreen Point.	3/6/2015 5:17 PM
309	create a route from children's to downtown bellevue or down 25th/35th to downtown bellevue	3/6/2015 5:13 PM
310	Reroute the 271 out of Medina so that it can serve the Evergreen Point freeway station, making an important connection with routes that won't be stopping at Montlake (e.g. 545, 255/6)	3/6/2015 5:09 PM
311	Good afternoon, I would like to have better transportation commute for the Eastside Woodinville, Duval a light rail would be wonderful. Thank you for taking the time to read this.	3/6/2015 4:50 PM
312	Keep the advantages that Alternative 1 provides, while making sure no areas with key locations are cut off. Maybe by modifying 48 or 49 and adding a connection through Montlake to the new University light rail station. And I would keep the stop on route 242 on 148th Ave NE by implementing the new route 541 in alternative 1 instead of just alternative 2. Then it would be perfect. :)	3/6/2015 4:31 PM
313	My greatest concern is whether the 207 and 271 will be carefully coordinated to facilitate transfers between the two (i.e. don't schedule the 207 to leave Eastgate TC right when the 271 arrives) - switching service between Eastgate and Issaquah to a separate route isn't a bad idea, but as a commuter who already spends at least an hour in transit each way every day, I'm not convinced that an hourly 207 will be a reliable substitute for direct service.	3/6/2015 4:25 PM
314	Later, more frequent trip availability. Extend evening trips to 8pm. Add some mid-day trips to 311!!! If one has a doctor appt or other reason to leave early there are minimal options without it taking over an hour to get there.	3/6/2015 4:19 PM
315	The East Side is very sprawly, and people there tend to have cars, but the people there who don't have cars tend to suffer more when bus routes "consolidate" and thus get further away from them. Transfers are fine as long as people can get there at all. See suggestion earlier in survey about doing a walking heat map. Do that here as well.	3/6/2015 4:14 PM
316	Eliminate peak-period service to downtown Seattle, which is always stuck in traffic anyway, as a way of encouraging LINK ridership.	3/6/2015 3:52 PM
317	Keep 255 going to the downtown bus tunnel and keep increasing the frequency	3/6/2015 3:49 PM
318	I would end all 520 routes at UDub and transfers to Light Rail would be issued on those routes to continue to downtown.	3/6/2015 3:27 PM
319	Keep the 255 and 545 as 7 day/week 20 hours/day direct service to downtown Seattle.	3/6/2015 3:02 PM
320	Add light rail from Redmond across Lake Washington to the UW and Downtown	3/6/2015 2:57 PM
321	I think the 311 concept is great, would love to see some reverse peak trips though. Since this is a peak route it has to dead head anyways so maybe only run reverse peak during core peak hours. Maybe have some 372 trips still go to Woodinville, like you have peak-tails on the other routes. Maybe make it express with no stops between UWB and the Woodinville P&R.	3/6/2015 2:55 PM

322	Find a way to bypass the 520/Montlake bottleneck.	3/6/2015 2:50 PM
323	Continue direct service from Kirkland to center of UW campus/u district.	3/6/2015 2:37 PM
324	Don't send 255 downtown at all; truncate it at UW Light Rail station.	3/6/2015 2:33 PM
325	Make all day tickets available as Portland does that will cover both bus & lightrail. Will lightrail be more expensive that the bus trip without the transfer?	3/6/2015 1:11 PM
326	keep the 277. eliminate something else	3/6/2015 12:11 PM
327	Clearly define how bus-rail transfers will be addressed to not penalize the mode-switch at UW Stadium Station.	3/6/2015 12:06 PM
328	Reroute the 271 onto 112th and use the SR 520 HOV direct access ramps at 108th. This enables the 271 to interline with other SR 520 routes at the freeway stations and speeds the route up. Extend another route into Medina to provide coverage. Stop deviating the 271 into Bellevue College - stay on 148th all the time. Do not have the 542 do the Overlake TC afternoon deviation. Extended peak 545s should start/end at Redmond TC as the 542 currently does, and should retain the Overlake TC deviation. Move the 248 down to NE 70th and serve the shopping center at 70th and 132nd. This provides a better connection at Houghton P&R too.	3/6/2015 10:41 AM
329	no comment	3/6/2015 10:34 AM
330	Delete Route 256. Please.... Implement more frequent service on the **NEW** RT 255. My current experience riding the 255 shows me that a lot of time is wasted in the downtown area. It seems like everyday I spend 30+ minutes waiting on the platform for a bus to come. Transferring at UW avoids the horrible downtown traffic saves those many service hours for more productive service in the city of Kirkland.	3/6/2015 10:14 AM
331	255 remains at 10 minute (or better) intervals at peak and continues to offer direct service to downtown. These plans don't do ANYTHING for the 25,000 workers in South Lake Union -- many commuting from the Eastside. You've made a difficult commute even worse under both options.	3/6/2015 7:55 AM
332	First, have the 372 serve UW Station more directly. Second, eliminate the off-peak 522, and roll its service hours into 10-minute headway on the 372.	3/6/2015 12:10 AM

Q29 What do you like most about Alternative 2 on the Eastside? (choose up to five)

Answered: 889 Skipped: 5,670

Answer Choices	Responses
Keeps weekday evening and night service between Redmond and downtown Seattle (Concept for Route 545)	34.87% 310
Keeps weekday midday direct service between Redmond and downtown Seattle (Concept for Route 545)	34.31% 305
Keeps weekend direct service between Redmond and downtown Seattle (Concept for Route 545)	28.35% 252
Route 255 keeps all-day direct service to downtown Seattle on weekdays	22.38% 199
Nothing	20.02% 178
Route 255 keeps weekend direct service to downtown Seattle.	19.46% 173

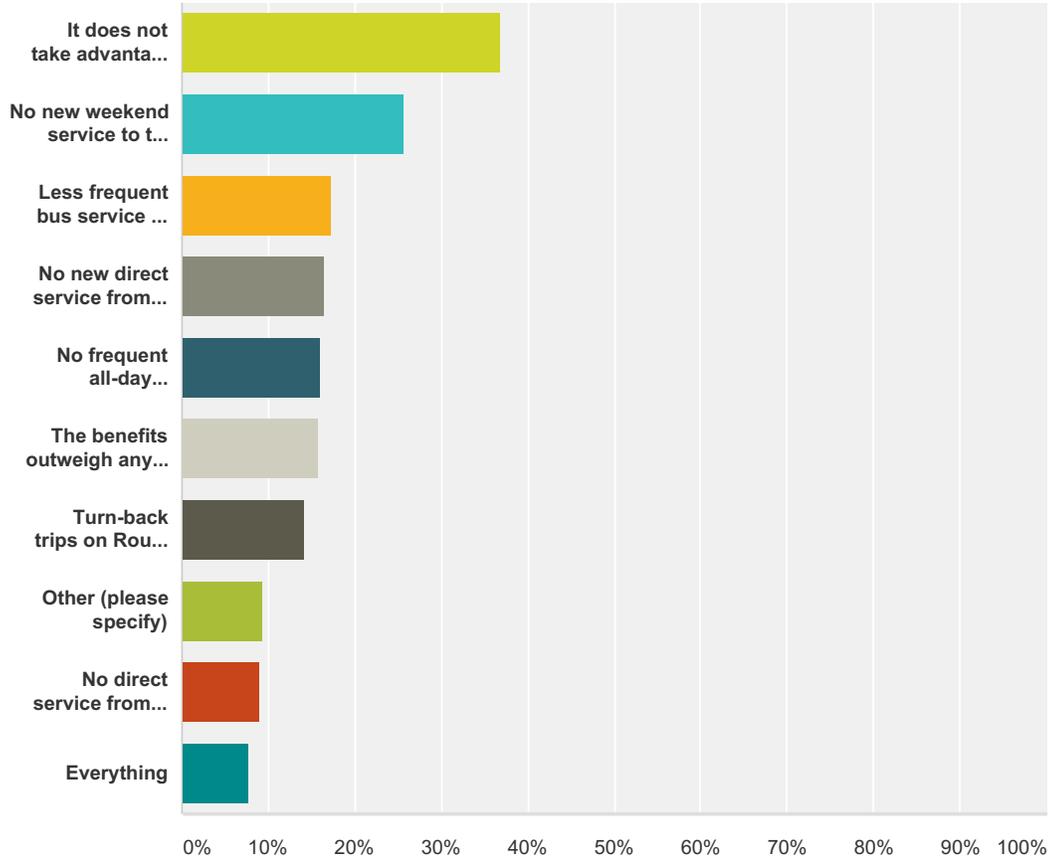

Keeps all-day service on Route 271 from Issaquah to the University of Washington	15.41%	137
Maintains direct service to the center of the University District and the UW campus from South Kirkland (Concept for Route 540)	11.25%	100
Route 311 keeps direct service to downtown Seattle without deviating to the University of Washington	9.90%	88
New Route 541 provides increased peak service to the new Link University of Washington Station via Overlake Village	9.11%	81
Keeps existing routes 252 and 257	8.89%	79
Everything	5.51%	49
Other (please specify)	5.06%	45
Total Respondents: 889		

#	Other (please specify)	Date
1	Non-stop from Woodinville to downtown is the primary benefit of riding (Rte 311) for me. I am likely to return to single occupancy driving if this is changed.	4/1/2015 1:45 PM
2	Too little information given above - will the 540 still originate at the Kirkland Transit Center?	3/30/2015 7:52 AM
3	Does not affect me.	3/30/2015 5:54 AM
4	No opinion on this part.	3/28/2015 9:29 AM
5	The 255 continues to Brickyard	3/27/2015 12:05 PM
6	Need better service to Seattle Children's	3/27/2015 10:29 AM
7	again, direct routes without multiple transfers would be a huge incentive to use public transit	3/25/2015 2:59 PM
8	Must have Park and Rides near bus stations. It takes too much time to get a bus to the bus station, then transferring again to light rail when going from East side to UW and/or Seattle Children's as that would take too long and add to commute time.	3/25/2015 1:31 PM
9	Please include Sammamish in your plans. 50,000 people live in Sammamish and want bus service to the University District and downtown Seattle without going on a milk run through Redmond.	3/25/2015 12:47 PM
10	I can get to a park and ride, but there is no direct connection to Seattle children's hospital	3/25/2015 12:44 PM
11	Express service to Seattle from 252 & 257 are the key reasons I choose metro. Those routes are partly why I bought my house.	3/25/2015 12:25 PM
12	I don't want to have to xfr to light rail. it will add to my already long commute time.	3/25/2015 8:12 AM
13	I don't want to have to xfr to light rail. it will add to my already long commute time.	3/25/2015 7:54 AM
14	Route 311 keeps direct service to someplace slightly close to where I need to be in downtown Seattle	3/24/2015 8:30 PM
15	no changes to 255, 252, and 257.	3/24/2015 5:51 PM
16	I don't know if I read wrong, but doesn't this add new route 541 - that's what I like about this	3/24/2015 11:51 AM
17	Keeps direct bus service from Kirkland park and rides into downtown seattle core.	3/24/2015 7:47 AM
18	Really no improvements for me	3/22/2015 4:21 PM
19	Please keep the 271. It is one of the best, most useful routes Metro has.	3/21/2015 1:03 AM
20	no obvious improvements because the 542 to Link completely replaces what is reduced on the 545.	3/19/2015 10:21 PM
21	Alternative 2 provides non transfer direct service.....and is working; leave it alone. Also, Alternative 2 leaves the 255 (and 236 conn if wanted) for mid day leave early if need to get home for emergencies, medical appointments (Evergreen and Totem Lake family medicine right there) and etc.	3/19/2015 6:53 PM
22	More convenience, easier to walk to bus stops.	3/19/2015 3:26 PM

23	I like that there's a bus that will go as far as Queen Anne, but I wish it linked to Downtown Bellevue, not just the cities north of Bellevue.	3/19/2015 2:20 PM
24	Ambivalent	3/19/2015 12:58 PM
25	Need to know more about this one.	3/18/2015 10:26 PM
26	I like that coverage is not sacrificed just for the purpose of connecting to the Light Rail. The Light Rail is only a means to reduce commute times and if it causes a reduction in coverage (i.e. increase in commute time) then its not worth it.	3/18/2015 2:33 PM
27	Increasing service frequency between the U Distrct and Eastside cities across 520 will help UW students and staff.	3/18/2015 1:56 PM
28	I would think that the buses that are being deleted as in 252 and 257 will cause more crowding on the 255 and the 256. Aren't we trying to make this better?	3/18/2015 12:50 PM
29	The possible 541 may help to make my route more direct. Coming from the Redmond/Bellevue edge (24th ST) where the 250 served, this would be a more direct route than going backwards to catch transfers at SR520/Overlake @ 40th. It would be great if there were more local 249 options during peak hours as the connections in either direction are severely limiting and make for a frustrating and stressful commute to run for a transfer with only two options available in one peak hour.	3/18/2015 11:43 AM
30	Alternative 2 leaves untouched the parts of the transit system I use.	3/16/2015 4:49 PM
31	No change to the 542! That's my favorite route and I love that this would stay a one-seat commute for me.	3/16/2015 3:20 PM
32	Hate that you are making my commute from Maple Leaf to Redmond take longer	3/16/2015 12:36 PM
33	Increase peak hour 545 service between Seattle and OTC.	3/16/2015 11:58 AM
34	More frequent 545 service via Overlake Transit Center turn-backs	3/16/2015 11:55 AM
35	neutral - this alternative does not change the way I would use service from Northeast Seattle and U District to/from Redmond	3/13/2015 3:50 PM
36	Woodinville Park and Ride has space to park if you delete route from Bothell UW and Woodinville PR, there are no space to part on Bothell UW.	3/13/2015 1:28 PM
37	545 times are still similarly predictable.	3/9/2015 5:52 PM
38	Alternative 2 actually commits to getting "Frequent" peak service on the 541/542, making transfers more viable - during the peak at least.	3/9/2015 4:42 PM
39	Expanded hours of service for 372X.	3/9/2015 10:50 AM
40	overall seems fine to me, but I don't use some of the specific bus routes mentioned above.	3/7/2015 2:23 PM
41	Would like to have an Express bus from Northgate around the North end of the lake to downtown Kirkland. The buses from d.t. Seattle to d.t. Kirkland are slammed at rush hour.	3/7/2015 2:12 PM
42	Please see above. Same problem for me as with alternative 1. I commute from NE 56th and Roosevelt to and from Eveegreen hospital in Totem Lake (NE Kirkland) and the one time I used public transit it was a 3 bus two plus hour trauma - not helped by the fact that 66 was unreasonably late. I've never done it again and cannot envision transit that would work for my work schedule.	3/7/2015 12:20 PM
43	None of these affect me.	3/6/2015 5:43 PM
44	better than alt. 1	3/6/2015 5:38 PM
45	Route 542 still goes to the greenlake P&R	3/6/2015 5:31 PM

Q30 What concerns you most about Alternative 2 on the Eastside? (choose up to four)

Answered: 799 Skipped: 5,760

Answer Choices	Responses
It does not take advantage of the investment in Link light rail service to better distribute bus resources	36.92% 295
No new weekend service to the new Link University of Washington station	25.78% 206
Less frequent bus service on Route 271 on nights and Saturdays	17.40% 139
No new direct service from State Route 520 to Children's Hospital	16.40% 131
No frequent all-day connection between downtown Kirkland and UW Link light rail station	16.02% 128
The benefits outweigh any concerns I might have	15.89% 127
Turn-back trips on Route 545 at the Overlake Transit Center	14.14% 113
Other (please specify)	9.39% 75
No direct service from Bear Creek to the University of Washington	8.89% 71
Everything	7.76% 62
Total Respondents: 799	

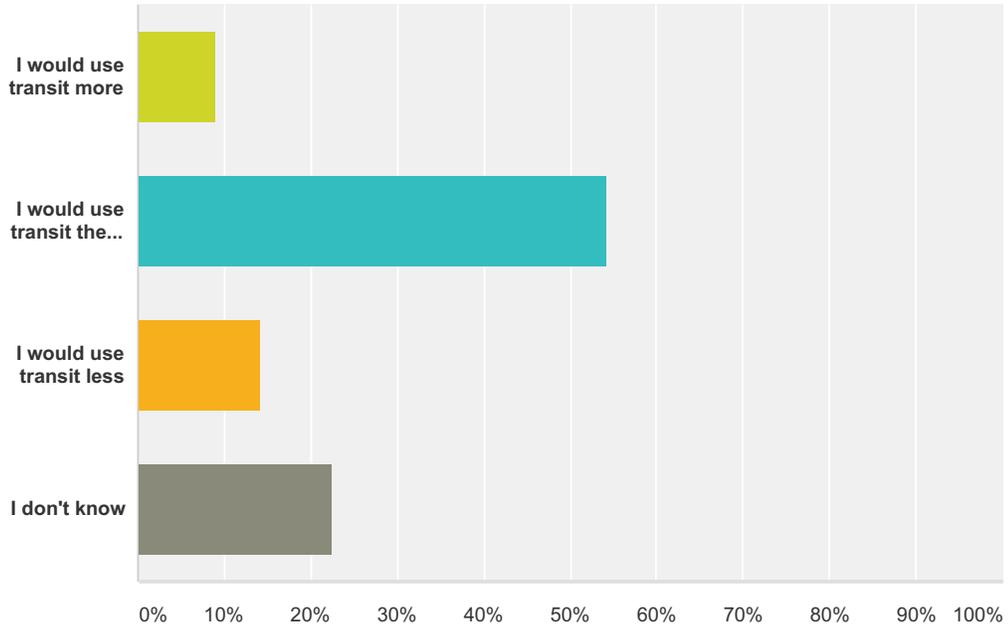

#	Other (please specify)	Date
1	242 Deletion	3/31/2015 11:25 AM
2	Legibility.	3/31/2015 2:01 AM
3	My regular commute is from Lake City to Overlake business park. I usually take 522-->545 (non rush hours) + 12 minute walk and back on 242-->64X. With the elimination of non-rush hours 545, and 242, my remaining option is a significantly longer commute, changing at the UW + additional walk on the return, or driving (at least to Ravenna P&R)	3/30/2015 8:56 PM
4	Weekend SR-520 service is distributed over many infrequent routes	3/30/2015 5:52 PM
5	No direct service to SLU from eastside.	3/30/2015 9:49 AM
6	ST542 does not operate during off-peak hours, but 545 is an alternate option as how it is currently.	3/30/2015 9:36 AM
7	too much service on congested I-5	3/30/2015 7:28 AM
8	Access to bus service to Eastside from Montlake is damaged by WSDOT plans. We need connections to express service at 520.	3/27/2015 2:33 PM
9	cut of existing bus routes 252 and 257	3/27/2015 1:16 PM
10	lack of direct bus service across I90 from Eastgate P&R into the light rail tunnel	3/26/2015 11:19 AM
11	Still need to increase the size of the buses on the 311 run in the afternoon - no small buses should be used.	3/26/2015 10:39 AM
12	See previous comments.	3/26/2015 9:59 AM
13	No direct connection between Overlake and Northgate.	3/26/2015 9:57 AM
14	No Parking at Redmond Park and Rides. The transit center and Bear Creek lots are full by 7am.	3/25/2015 3:06 PM
15	see above	3/25/2015 2:59 PM
16	Please do not have anymore transfers. It takes an hour and 15 minutes to get from Northgate Transit Center to Kirkland.	3/25/2015 2:06 PM
17	I need transportation from Seattle Children's in Seattle to Seattle Children's building on 116th (near Overlake Hospital) also.	3/25/2015 1:31 PM
18	It doesn't appear to have any advantages to me over the existing service.	3/25/2015 11:33 AM
19	I don't want to have to xfr to light rail. it will add to my already long commute time.	3/25/2015 7:54 AM
20	no 242	3/23/2015 10:30 PM
21	dismembering the 255 through Kirkland to downtown seattle and forcing transit riders deep into the u district for a transfer to downtown	3/23/2015 9:14 PM
22	number of trips for 311 stays the same	3/20/2015 6:04 PM
23	I don't see the 242 or 542 listed	3/20/2015 2:02 PM
24	Hard to say that the positives are actually positives when they are already a bare minimum that is lacking	3/20/2015 1:53 PM
25	No direct service between Redmond and Green Lake	3/20/2015 11:11 AM
26	I have no concerns at all with the present service and recommend it.	3/19/2015 6:53 PM
27	I read the description of the two alternatives but didn't see this level of detail to be able to answer differently, specifically about route 271.	3/19/2015 3:55 PM
28	It doesn't appear specifically on either alternative, but connections from Finn Hill (route 234) to/from University district routes (either 372 via Kenmore/Lake City or 255/256/540/? via 520) are my chief concern for any changes made to the system. To keep my morning commute to UW under one hour, I have to ride 4 routes now (234 / 277 / 252 / first available at evergreen point). Morning commute via Kenmore (234 / 372) is extremely inefficient with current timing of routes.	3/19/2015 10:46 AM
29	DOes nothing to address congestion, air pollution, noise, and safety issues in Kenmore, Bothell, Lake Forest Park, Juanita and Kirkland. Does not address capacity and access issues for Park and Rides in Kenmore, Bothell, and other places in the area.	3/19/2015 8:55 AM

30	Kenmore and Bothell seem to have been left out of your planning considerations. There are a lot of commuters using our local highways, and it is often very difficult to get into either Seattle or Bellevue.	3/18/2015 8:53 PM
31	Deleting route 242 makes no sense especially since the peak trips for the 542 are remaining the same. The 542 busses are already packed. This will make them much worse. Also, a lot of the 242 ridership comes from 148th in redmond which there will be no bus support for. The evening 242 that I take is packed to standing room only every day. Not having more 542s will make the evening ride very, very crowded as the 542s are also packed both ways.	3/18/2015 2:07 PM
32	I would prefer having the 556 bus run more often than the 271 bus. The 271 takes far longer and doesn't go to the Issaquah Highlands, and it already runs pretty often. The 556 is fast and direct, but it doesn't run very often.	3/18/2015 12:30 PM
33	Doesn't improve anything in Bothell	3/18/2015 11:37 AM
34	The 277 is still canceled with this option so I'm still screwed.	3/18/2015 11:16 AM
35	Severely degraded service between Shoreline/Maple Leaf/Green Lake, and the Redmond campus of Microsoft. The 542 stops only at 520 and 40th, and 520 and 51st. This significantly reduces the convenience and utility of taking the bus. Why do you keep trying to kill the 242. It was designed specifically to get Microsofties on the West side over to the campus, and it's a huge success--packed buses every day. Just leave it alone!	3/18/2015 10:55 AM
36	Reduce 545 service direct Redmond/Downtown	3/18/2015 8:23 AM
37	Deletes Route 242	3/17/2015 7:34 PM
38	Might not address the constant 4:00 to 5:30 overcrowding on the 545	3/17/2015 3:41 PM
39	545 changes	3/17/2015 8:22 AM
40	No more route 242. No service connecting North Seattle to 148th Ave NE.	3/16/2015 4:18 PM
41	less frequent 545s	3/16/2015 4:11 PM
42	No direct connection between Montlake and 148th Avenue NE between NE 31st ST and NE 40th St.	3/16/2015 1:29 PM
43	Hate that you are making my commute from Maple Leaf to Redmond take longer	3/16/2015 12:36 PM
44	No direct service from MS Campus to U-district	3/16/2015 12:35 PM
45	No real concerns.	3/16/2015 12:26 PM
46	Route 255-- where does it stop in Montlake?	3/16/2015 11:50 AM
47	No 242	3/16/2015 11:35 AM
48	The longer commute time I will have due to rerouting to UW. Show me that it won't be longer and I'd be ok with the transfer.	3/16/2015 11:14 AM
49	When light rail arrives to the Eastside then the investment in link light rail services will pay big dividends. Until then Eastside residents will continue commuting by bus or by car.	3/15/2015 5:31 PM
50	I am very disappointed with all of the people who have been working on this. You all are keeping Kirkland out of your plans. What are we chopped Liver?	3/13/2015 6:21 PM
51	Woodinville Park and Ride has space to park if you delete route from Bothell UW and Woodinville PR, there are no space to part on Bothell UW.	3/13/2015 1:28 PM
52	No service to/from Houghton P&R (unless I read the 540 service change incorrectly) - need service to Houghton P&R.	3/11/2015 5:03 PM
53	No connection between Overlake and neighborhoods north of the University District (concept for Route 242).	3/11/2015 4:17 PM
54	The 277 is eliminated.	3/11/2015 8:31 AM
55	311 and Woodinville are left out	3/10/2015 10:15 PM
56	Long on thoughts, short on details. Start announcing the plans on the bus...	3/10/2015 10:00 PM
57	no comment	3/10/2015 8:53 PM
58	There's a possibility of reduced service as some would transition to a 271 connection where they currently take 545. Traffic on the Westbound 520 bridge would still be bad because drivers wouldn't see improved total travel times by bus (as they might in Alt 1).	3/9/2015 5:52 PM

59	Reduced options for traveling to Seattle (First Hill) from Eastside.	3/9/2015 11:45 AM
60	No direct service from Woodinville Park and Ride to the UW Seattle campus.	3/9/2015 10:02 AM
61	I have concerns, but I'll live with the changes, though I can't go as far as to call them "benefits." I understand that the budget is tight and cuts need to be made somewhere.	3/9/2015 8:45 AM
62	cancelling of 252 and 257, what is the point of having busses going from the eastside then at all?	3/9/2015 5:51 AM
63	252 and 257 need more extended hours, not to be cut. the last stop at Kingsgate is 8am; that is ridiculous. You should be running until at least 9am. There is no parking in Kingsgate P&R. You need another central stop	3/8/2015 8:44 AM
64	as long as this consolidation has minimal impact on cars. how is the impact to car traffic being addressed? safety getting to/from; parking at the stop location.	3/7/2015 2:23 PM
65	Please see above	3/7/2015 12:20 PM
66	We need both plans	3/6/2015 6:07 PM
67	No concerns.	3/6/2015 5:43 PM
68	Lack of transit options to SE corridor like Kent Station outside of narrow commuter hours and the Sounder.	3/6/2015 3:26 PM
69	I don't see a benefit to Alternative 2 compared to how it is now	3/6/2015 2:48 PM
70	elimination of 277	3/6/2015 12:11 PM
71	prefer bold changes and simplify and increase frequency. We need to utilize Link and get buses off very slow Stewart St (i.e. Rt 545).	3/6/2015 10:34 AM
72	Does nothing to improve transit service.	3/6/2015 10:14 AM
73	cropping of 372 before woodinville	3/6/2015 8:40 AM
74	Elimination of Route 277.	3/6/2015 7:55 AM
75	All-day SR 520 service to UW will only work if it is combined with the routes carrying riders going downtown, meaning a forced transfer at UW Station. If some routes continue downtown mid-day, they will be packed with downtown riders transferring to them. Anything short of eliminating off-peak SR 520 service to downtown will pull the rug out from under all-day UW connectivity.	3/6/2015 12:10 AM

Q31 How would your use of transit be affected if Alternative 2 were implemented on the Eastside?

Answered: 992 Skipped: 5,567

Answer Choices	Responses
I would use transit more	9.07% 90
I would use transit the same	54.23% 538
I would use transit less	14.21% 141
I don't know	22.48% 223
Total	992

#	Why?	Date
1	Nonstop from Woodinville to Downtown is the key benefit of riding for me. Alt2 does not change this.	4/1/2015 1:47 PM
2	It retains existing 255 routing. This benefits my family on weekends and me during the week when I work or have meetings in downtown Seattle allowing me to have a quick and direct ride to my car at the South Kirkland P&R near my family's day care.	4/1/2015 7:31 AM
3	Not able to catch the 271 in montlake	3/31/2015 4:50 PM
4	I am Transit-dependent.	3/31/2015 2:40 PM
5	I use bus systems the same every day. If busses come more often, I spent less time commuting.	3/31/2015 11:42 AM
6	The 545 travels from downtown to north capitol hill at times the 43 doesn't So I often use it. I'm not sure how your changes would affect it.	3/31/2015 10:42 AM
7	I'd still be able to take the bus with relative ease from N. Capitol Hill to the Eastside.	3/30/2015 9:37 PM

8	My regular commute is from Lake City to Overlake business park. I usually take 522-->545 (non rush hours) + 12 minute walk and back on 242-->64X. With the elimination of non-rush hours 545, and 242, my remaining option is a significantly longer commute, changing at the UW + additional walk on the return, or driving (at least to Ravenna P&R)	3/30/2015 8:57 PM
9	Nothing significant would change, except for the possibility of walking from Montlake Freeway Station to Husky Stadium	3/30/2015 5:53 PM
10	Not convenient	3/30/2015 1:49 PM
11	if no routes to Seattle Children's that save time... i will not use it.	3/30/2015 11:58 AM
12	Continued reliable services between UDistict-Bellevue/Redmond-International District	3/30/2015 9:37 AM
13	Because its not clear what the new 540 route would be. It would be nice if such surveys included an actual map of the new route.	3/30/2015 7:53 AM
14	no change	3/30/2015 7:28 AM
15	I don't have a car so I have to use transit. But I would travel between Seattle and the Eastside more with Alternative 1.	3/29/2015 9:21 PM
16	If there was a route from the brickyard park and ride to Seattle's Children's Hospital,.	3/28/2015 6:23 PM
17	THIS QUESTION'S ALREADY BEEN ANSWERED	3/27/2015 6:34 PM
18	I depend on mass transit for my livelihood and social life	3/27/2015 1:52 PM
19	does not have much of a choice if I want to get to work on time and not travel for more than an hour. driving time is 25 minutes so public transit gets useless at the point of travelling more than an hour the same route.	3/27/2015 1:17 PM
20	Yay, more Link. But yay, 255 that will get me to Link at all times of the day.	3/27/2015 12:10 PM
21	My routes would be mostly unaffected.	3/27/2015 11:21 AM
22	I wouldn't have to drive from Maple Valley all the way to Seattle Children's.	3/27/2015 8:49 AM
23	no direct service to SCH	3/27/2015 7:53 AM
24	I have to.	3/26/2015 4:20 PM
25	More of a direct route implemented for Seattle Children's from the eastside.	3/26/2015 2:53 PM
26	no plans for a direct route to seattle childrens hospital. Consolidated route times would make it very difficult for me getting home in the evenings as the time i leave the hospital varies.	3/26/2015 2:13 PM
27	It depends upon how Alternative 2 is implemented.	3/26/2015 10:40 AM
28	because I do not drive to work	3/26/2015 10:10 AM
29	I need transit to get to work, so i would need to use it the same, but I would be much more dissatisfied. My commute will take longer.	3/26/2015 9:58 AM
30	I use transit for nearly every trip. Alternative 2 offers the same or better travel times so I would continue doing that. Light rail is additionally accessible with a downtown transfer.	3/26/2015 3:01 AM
31	because there would be no change to my current route of 255	3/25/2015 7:25 PM
32	No direct service to Seattle Children's Hospital	3/25/2015 6:55 PM
33	convinient	3/25/2015 3:22 PM
34	See previous write in answer	3/25/2015 2:25 PM
35	No benefit to my commute.	3/25/2015 2:17 PM
36	Ease of commute	3/25/2015 1:25 PM
37	direct route to Seattle Children's from Kirkland	3/25/2015 1:18 PM
38	Time consuming	3/25/2015 12:43 PM
39	My priority is transit service to my workplace, which Alternative 2 provides the best.	3/25/2015 11:43 AM

40	I still go to work.	3/25/2015 9:38 AM
41	I don't want to have to xfr to light rail. it will add to my already long commute time.	3/25/2015 8:12 AM
42	I don't want to have to xfr to light rail. it will add to my already long commute time.	3/25/2015 7:54 AM
43	more likely to continue to use I-90 route instead. at least until light rail comes to Bellevue in 2023? then I think my stop for 550 will disappear and it'll be faster to take whatever is available on 520 rather than try to get to light rail stop which is farther away and the wrong direction.	3/24/2015 8:50 PM
44	I primarily commute for work, the only thing likely to effect my frequency of using transit is a change in my work schedule.	3/24/2015 8:47 PM
45	As an Issaquah/Bellevue transit user, Alternative 2 is not a big change for my specific transit use cases.	3/24/2015 8:44 PM
46	Just as before - I need to get to work and back	3/24/2015 7:49 PM
47	There are virtually no changes to the Eastside network proposed in Alternative 2.	3/24/2015 4:25 PM
48	Same as my response for this question regarding Alternative 1 for this service area.	3/24/2015 1:20 PM
49	if there is a 541 stopping at overlake village I'd use that more	3/24/2015 11:51 AM
50	It is the quickest and most economical way to travel from Totem Lake area to Downtown Seattle.	3/24/2015 7:47 AM
51	I commute from the Denny Triangle area to Overlake Transit Center on a daily basis. This would at least maintain that service without a detour down to the transit tunnel and an additional transfer in the U-District!	3/24/2015 2:55 AM
52	I commute daily on transit and often use weekend service to shop downtown or go to shows/dinner downtown.	3/23/2015 5:23 PM
53	Direct routing w/o transfer is important - even if the overall trip might take a bit longer.	3/23/2015 1:08 PM
54	Keeps existing routes that I use in place.	3/23/2015 8:46 AM
55	Not having access to kirkland routes with the elimination of the montlake freeway station (route 255) is a game changer. Alternative 1 solves this nicely. Alternative 2 is worse than the current status.	3/22/2015 10:52 PM
56	It doesn't affect me much	3/20/2015 6:04 PM
57	Route 540 between South Kirkland Park and Ride and the UW Medical Center and Route 556 between the Issaquah Transit Center and the UW Medical Center would remain unchanged.	3/20/2015 3:07 PM
58	Convenience.	3/20/2015 2:33 PM
59	I favor convenience when taking public transit so would probably just drive if my routes were impacted	3/20/2015 2:02 PM
60	I don't have a car.	3/20/2015 1:30 PM
61	Insufficient frequency	3/20/2015 1:24 PM
62	it will not be convenient and would leave me out in the cold rain and dark a lot due to multiple waits for transfers	3/20/2015 11:11 AM
63	No real change in my present transit situation	3/20/2015 9:08 AM
64	live downtown seattle, work at montlake @ NOAA	3/20/2015 7:45 AM
65	This is a double whammy, because when you add in the loss of the Montlake Flyer freeway stops that means that there will be no service outside of peak hours at UW station to Redmond... I might as well drive.	3/20/2015 12:53 AM
66	Because I can actually get to work quickly and efficiently.	3/19/2015 9:58 PM
67	The improved service on the 372 would be very appreciated.	3/19/2015 9:31 PM
68	Current service is the best; would use the same...if not increase by utilizing the 236 or 255.	3/19/2015 6:53 PM
69	No transfers on 271 and we need the same level of frequency since we don't have light rail options to get to the Eastside!! (Weekdays)	3/19/2015 3:55 PM
70	I use the 540 and 255, which don't change.	3/19/2015 3:26 PM
71	I don't want to drive and have to find regular parking in Seattle for my daily commute.	3/19/2015 3:16 PM
72	I don't own a car, so I don't have any other choices if I want to go longer distances.	3/19/2015 2:20 PM

73	Nothing changes for my preferred route. The 542 remains the most convenient line, but it does not fit my needs.	3/19/2015 11:58 AM
74	Need better connection between South Seattle (and various routes to downtown or UW) and Bear Creek P-R.	3/19/2015 11:15 AM
75	I currently have no non-metro options to commute. If Finn Hill connections to UW are compromised enough, I'll no longer use Metro (will purchase a car and drive).	3/19/2015 10:46 AM
76	I need to get where I want to go	3/18/2015 10:19 PM
77	Does not affect most trips I take.	3/18/2015 8:45 PM
78	Travel to Redmond from South Seattle is still poor	3/18/2015 5:03 PM
79	I use 252 or 257 daily	3/18/2015 4:18 PM
80	Wouldn't force a transfer through UW which is already congested.	3/18/2015 2:47 PM
81	bus to work	3/18/2015 2:07 PM
82	less buses and routes, FULL buses (most of the time we can't even get on and buses even drive by sometimes because they are TOO full, all these and more are making it impossible to use bus anymore. I had been commuting by bus from east side to everywhere in metro Seattle area for past 25 years and I have to stop now.	3/18/2015 1:35 PM
83	I use it a lot. Don't change it except to make it better	3/18/2015 1:26 PM
84	I'm not sure if there is a difference between Alternative 1 & 2 for me since I live in Bothell and take the 372 it seems like they're both relatively the same.	3/18/2015 1:18 PM
85	I still have to use Metro and Alternative 2 would not be much change, if any, for me. Alternative 1 is much better!!!	3/18/2015 12:45 PM
86	I need to commute no matter what happens!	3/18/2015 12:27 PM
87	I need route 271 to keep functioning the way it is. If it became less frequent (especially between 5pm and 9pm), I would most likely drive more often than taking the bus.	3/18/2015 11:57 AM
88	I can walk to overlake village and take the 541 and transfer to downtown seattle or directly to the Udistrict, yay!!!! The overlake park and ride fills up crazy early. Overlake village serves an area that is much more in the middle of a residential area (and more apts are being built) so many people can walk to it. Please add more service between overlake village and employment destinations (u district,northgate, slu, downtown seattle), via light rail connection or however.	3/18/2015 11:48 AM
89	Same as above: Hard to tell how it will affect my commute. I certainly use transit much less than I used to after the 250 cancellation. It takes longer than before, is overcrowded which requires that I stand with my persistent back pain, and takes 3 to 4 buses instead of the predictable 2 that I took previously. Our transit service is certainly not improving as of late. As a long-time (15+ years) transit user, I'm truly disappointed that service is decreasing and getting worse. I'm tired of the excuses!	3/18/2015 11:43 AM
90	Because you didn't do anything to Bothell it seems.	3/18/2015 11:37 AM
91	Still have to commute by bus.	3/18/2015 11:16 AM
92	Because right now it's convenient, and with your change, it becomes a huge pain in the ass.	3/18/2015 10:55 AM
93	frequency	3/18/2015 1:25 AM
94	There are trade-offs.	3/18/2015 12:28 AM
95	Route 542 is not a Metro route and route 242 runs along 148th Ave NE so I can use it to get to work.	3/17/2015 7:34 PM
96	If overcrowding continues I will likely look to move or switch jobs, I've pushed my job start time back 1 hr in the past 2 years, and the 4pm bus is starting to get overcrowded as well. With my childcare situation 7am is my earliest feasible start time.	3/17/2015 3:41 PM
97	I still need to use it.	3/17/2015 2:47 PM
98	I continue to increase my ridership because the existing one-seat travel between Kingsgate and downtown is convenient. If the existing service continues I will continue increasing my ridership. If you destroy local transit in an effort to pay homage to the ghastly expenditure of light rail dollars, then I'm done with you.	3/17/2015 1:09 PM
99	I would wait to hear about crowding and best route options once it's in place.	3/17/2015 10:15 AM
100	More frequent service	3/17/2015 9:28 AM

101	My peak is not your peak.	3/17/2015 8:22 AM
102	I already use the 545 5 days a week, so I'm pretty much maxed out.	3/16/2015 11:03 PM
103	I would continue to use the 545 the way I currently do.	3/16/2015 5:11 PM
104	I might use the 541 some, but the 545/542 route will continue to serve me well.	3/16/2015 4:49 PM
105	I would use transit the same because that's how I get to work.	3/16/2015 3:20 PM
106	More options is nice, but I would travel the same amount	3/16/2015 2:26 PM
107	It retains all the routes and stops I currently use.	3/16/2015 1:44 PM
108	It probably wouldn't affect my current commute much since I'm going between Overlake and downtown Seattle both ways every day. This doesn't seem to provide quite as much flexibility as alternative 1 if I decided to move somewhere else in the metro.	3/16/2015 1:27 PM
109	I commute every day on the 242, and with this change I would have to transfer and add 15 minutes of walking to get to work via the bus. Due to the slower nature of the 542 going through the U-district, this would easily double my commute time. The issue isn't just getting to the 542: it is the slowness once you are on the bus, and the lack of flexibility where it drops you at Overlake. Today the 242 circles through the entire Microsoft campus to get you quickly to your destination, instead I would be stuck walking 15 minutes from Overlake to my building every day (including the very unpleasant crossing of 520). Please keep the 242!	3/16/2015 1:01 PM
110	See above.	3/16/2015 12:56 PM
111	I don't own a car and already rely predominantly on transit to get around the city and region.	3/16/2015 12:54 PM
112	Hate that you are making my commute from Maple Leaf to Redmond take longer	3/16/2015 12:36 PM
113	no direct service between U-district and MS Campus, I am not willing to make connections	3/16/2015 12:35 PM
114	I already use it daily and would be able to continue to do so.	3/16/2015 12:26 PM
115	My transit routes/ time would be unaffected.	3/16/2015 12:20 PM
116	Still have to get to work	3/16/2015 12:04 PM
117	With the 545 no longer extending to NE 51st; I would need to walk to 40th street or take 542 and transfer at 40th street.	3/16/2015 12:00 PM
118	I primarily use public transit to travel to/from work.	3/16/2015 11:58 AM
119	It depends on how time efficient and reliable these routes turn out to be.	3/16/2015 11:57 AM
120	I would make due with the 545.	3/16/2015 11:57 AM
121	I would not use transit when I need to go past OTC into Redmond at off-peak hours.	3/16/2015 11:57 AM
122	My use of transit for commuting wouldn't change. I would take route 542 instead of route 242.	3/16/2015 11:56 AM
123	Loss of the Montlake station makes it difficult to get from Overlake to Fremont / Wallingford.	3/16/2015 11:51 AM
124	I would use it about the same, however I sometimes use the 545 to travel between Overlake and downtown Redmond during off-peak weekday hours, so I'd no longer be able to do that.	3/16/2015 11:45 AM
125	No 242	3/16/2015 11:35 AM
126	Frequent services of 545 would be beneficial.	3/16/2015 11:34 AM
127	Because I believe my commute will be significantly longer the moment I am in Seattle pas peak and 256 no longer runs.	3/16/2015 11:14 AM
128	My routes would not be cut. I take the buses because I have to. I cannot possibly use transit more than I do. I ride transit 4-6 hours per day every weekday already. Using it more on weekdays would be a very bad thing.	3/16/2015 10:13 AM
129	I don't drive.	3/16/2015 8:30 AM
130	There's no direct connection between bus and light rail services near to where I live. Yet. In a few years, the light rail will arrive, so I'll have to be patient.	3/15/2015 5:31 PM

131	Depends on 545 schedule as that is my primary route for commute and any connectivity options, if 545 does not run all the way to Bear Creek P&R from Seattle due to Overlake turn back.	3/15/2015 10:38 AM
132	Have to see the plans.	3/13/2015 6:21 PM
133	Cause rt 255 wouldn't change.	3/13/2015 5:18 PM
134	Nothing would change dramatically in routes I ever use over there, and I don't travel to the Eastside via bus very often anyway.	3/13/2015 5:17 PM
135	I use it regularly	3/13/2015 1:05 PM
136	Not entirely sure on difference between Alt 1 and Alt 2.	3/13/2015 12:41 PM
137	The only things I like about this route are the "keeps" things - what you're already doing today. How is this an improvement?	3/13/2015 10:07 AM
138	Please please don't delete anymore busses in Kirkland!	3/12/2015 3:48 PM
139	Since buses (both Metro and Sound Transit) are my only method for getting from home (in Bellevue/Kirkland) to work (Eastlake/downtown Seattle), I have no choice but to continue relying on them.	3/12/2015 10:35 AM
140	I primarily use public transit to go between UW and my house in Kirkland. Alternative 2 makes this more difficult for those who live in suburbs and not close to major roadways. If you're trying to get more people to take the bus, the highest concentration of drivers is in suburbia because public transit doesn't adequately cover it. More coverage and convenience in suburbia= more bus riders.	3/12/2015 9:43 AM
141	I have no other choice getting to work.	3/12/2015 9:20 AM
142	If the 242 is deleted and no other routes are moved/added to take its place I would end up having to drive from Shoreline to Redmond everyday. My only transit option being to string 3 buses together, taking over 2 hours. A 4-5 hour daily commute is not practical or realistic. I currently take the 242 everyday, and there are no suitable alternatives.	3/11/2015 4:17 PM
143	Elimination of 277.	3/11/2015 8:31 AM
144	Currently I am not commuting to Redmond, but I did for years and may in the future.	3/11/2015 5:50 AM
145	Don't see any advantage for Woodinville	3/10/2015 10:15 PM
146	big changes little infomation	3/10/2015 10:00 PM
147	??	3/10/2015 8:53 PM
148	This option is just as bad as current service from downtown Seattle to Redmond. Do better.	3/10/2015 7:04 PM
149	My service wouldn't be changed under this option.	3/10/2015 3:51 PM
150	I still use transit as my primary travel means.	3/9/2015 5:52 PM
151	I use the 545 during the mid day. This doesn't change things or maybe would make it worse since I'm traveling east of Overlake.	3/9/2015 4:42 PM
152	I have no car and I have to ride between Downtown Seattle and Redmond to get to work, so I'd have to make the same number of trips; but some trips I'd unexpectedly be booted out at the transit center and have to walk to my stop at NE 51st Street, or have to wait for the next bus there, making me late to work.	3/9/2015 3:41 PM
153	Rarely take transit to cross 520. We drive for convenience.	3/9/2015 1:43 PM
154	when the rubber hit the road and the dust settles on what changes are actually implemented and the hours I would have to access my options.	3/9/2015 11:45 AM
155	Frequency would stay the same, but would start using 372X on weekdays and weekends to get to work. Would no longer have to burn fossil fuels to drive to Northgate Park & Ride, to use the 41!	3/9/2015 10:50 AM
156	Losing direct service from Woodinville P&R to the UW would increase my commute time because I would have to drive further to a P&R or transfer. I would be spending more than my current 3+ hours on my daily commute, a commute that would be reduced to 1 hour in a car.	3/9/2015 10:02 AM
157	travel time is too long, hassel of walking too far to the major hospitals in seattle from bus stop because there is no early connections, i rather drive then	3/9/2015 5:51 AM

158	No improvement to transit service between North Seattle and the Eastside	3/9/2015 3:01 AM
159	My buses wouldn't be cut or reduced so I'd be able to continue commuting by bus.	3/8/2015 10:25 PM
160	As above, my use of transit is not dependent on its frequency. Nonetheless, if Alternative 2 were to be implemented, I would be personally inconvenienced when I chose to use transit.	3/8/2015 9:31 PM
161	Redmond and Issaquah bus stops are way to far for me to walk to.	3/7/2015 11:42 PM
162	if i can get to it (and park) and it is safe i will use it.	3/7/2015 2:23 PM
163	Which is to not use transit at all.	3/7/2015 12:20 PM
164	All the park and rides near me fill up early so i use vanpool instead - this plan does not include more park and ride capacity.	3/7/2015 12:10 PM
165	I would not use transit; I have no interest in transit to Redmond, only Bellevue.	3/7/2015 8:36 AM
166	no major changes	3/6/2015 10:53 PM
167	It's no different	3/6/2015 8:24 PM
168	Bellevue college and Redmond's bear creek will remain (I think) supported under alternative 2 on weekends.	3/6/2015 8:14 PM
169	too much time waiting	3/6/2015 7:53 PM
170	nothing would change for the way I ride	3/6/2015 7:48 PM
171	Being able to transfer to light rail at Westlake Center from a 545 works well for me now, so I would continue doing that.	3/6/2015 5:40 PM
172	It keeps most of my important and frequent stops, especially for my work commute (new route 541 and route 25).	3/6/2015 4:31 PM
173	Since my route wouldn't be cut, I would continue to use it as frequently as I do now :)	3/6/2015 4:25 PM
174	Seems like there would be more non rush hour trips available that wouldn't take an hour to get home?	3/6/2015 4:19 PM
175	Without good bus connections to light rail, transit wouldn't be as useful, so I would expect to use it less.	3/6/2015 3:34 PM
176	I use transit as often as possible even now.	3/6/2015 3:33 PM
177	44/5/E & D are my most used routes now and in the imediate future.	3/6/2015 3:20 PM
178	No car	3/6/2015 2:57 PM
179	Wouldn't improve anything	3/6/2015 2:55 PM
180	Why do you think? I AM A BUS COMMUTER	3/6/2015 2:50 PM
181	Not sure it would directly affect me.	3/6/2015 2:44 PM
182	Nothing here that would make me use transit less, but I would be less happy about having to ride down I-5 on a bus from the Eastside when Link was an option.	3/6/2015 2:33 PM
183	In the very near future, my trips across the lake will transition from 520 to I-90, and I am not familiar enough with the AM commute via transit from downtown Seattle to Eastgate (on the 217/554), relative to from UW to Eastgate (on the 271) to comment constructively.	3/6/2015 12:06 PM
184	Which is to say I wouldn't use transit on the weekend - no improvements, so the network isn't really usable.	3/6/2015 10:41 AM
185	Elimination of Route 277.	3/6/2015 7:55 AM
186	I'd still ride Link, but I would avoid going to the eastside.	3/6/2015 12:10 AM

Q32 How would you improve Alternative 2 on the Eastside – keeping in mind that the goal of this network is to keep more coverage while still taking advantage of connections with new light rail service?

Answered: 200 Skipped: 6,359

#	Responses	Date
1	So long as 252/257 service is maintained, anything else is gravy.	4/1/2015 1:49 PM
2	Long buses on all return trips from downtown to Eastside.	4/1/2015 1:47 PM
3	Again - Make the 255 route a light rail line for the future.	4/1/2015 7:31 AM
4	More frequent weekend service when there are big sporting or other events occurring in Seattle.	4/1/2015 12:03 AM
5	Keep the 271 stop on 520 in montlake as it is now	3/31/2015 4:50 PM
6	Look for places where the stated concerns of "experts" in specific problem areas can be mitigated; hybridize where it makes sense to do so to keep the service human.	3/31/2015 2:40 PM
7	I prefer Alternative 1 as it has more frequent busses and keeps in mind the people who cannot drive to park and rides.	3/31/2015 11:42 AM
8	Many riders can't "take advantage of connections with the new light rail service" because their commute doesn't go through downtown Seattle or parallel with the light rail. This new plan is worse for many of those riders.	3/31/2015 11:26 AM
9	Same suggestions as to alternative 1. For my use, there is no difference between Alternative 1 and 2.	3/30/2015 8:57 PM
10	I would redirect at least some resources to routes connecting to Husky Stadium, and I would also ensure the 271 shares some same-stop transfer with other SR-520 routes so as to let people transfer to it and get to Husky Stadium and Link.	3/30/2015 5:53 PM
11	Direct service from Bellevue to Seattle Children's Hospital	3/30/2015 1:49 PM
12	more routes to Seattle Children's with less bus changes and less time overall.	3/30/2015 11:58 AM
13	Add direct service to SLU and Seattle center.	3/30/2015 9:50 AM
14	make it more like alternative one	3/30/2015 7:28 AM
15	Just bear in mind the transfer from 255 to the 245, as our only means of heading east.	3/29/2015 8:18 PM
16	convenient and frequent buses from Montlake to Seattle Childrens between hours of 6 and 9a.m and 3 and 6:30pm	3/29/2015 7:49 PM
17	Unknown .	3/29/2015 4:26 PM
18	don't know	3/28/2015 10:50 AM
19	More 24/7 bus service	3/28/2015 8:02 AM
20	COMBINE SOME FACETS OF ALTERNATIVE 1 AND 2 TO CREATE A "HYBRID APPROACH" THAT WILL WORK FOR MORE PEOPLE	3/27/2015 6:34 PM
21	Build the light rail on 520 and 405	3/27/2015 4:01 PM
22	establish direct bus route from eastside to Swedish campuses	3/27/2015 1:17 PM
23	I'd like an all-day and weekend express-ish service from Totem Lake to the rail station at UW. I think it's important to provide at least a weekday peak express service from Totem Lake to Downtown to encourage the downtown commuters to explore transferring at UW to light rail (like is proposed in alt1)	3/27/2015 1:12 PM
24	um, see Alternative 1.	3/27/2015 12:37 PM

25	Have an easy Sunday Brickyard to Bellevue Transit Center option. On weekdays, the trip takes 13 minutes via the 535. On Sundays when the 535 doesn't run, the trip takes 50-80 minutes, via a 255 to 234/235 with a transfer at Kirkland Transit Center.	3/27/2015 12:10 PM
26	I said before consolidate 545 and 542, but cut 542 not 545. For this to work light rail station on Montlake and the current highway station should be conveniently placed (if not in the same exact location).	3/26/2015 10:10 PM
27	Extend 540 to the North along Market and then 98th--up to NE 116th or NE 124th. Increase the frequency of 372.	3/26/2015 4:20 PM
28	probably more frequent service times	3/26/2015 2:13 PM
29	Direct service from the Eastside to Seattle Children's Hospital.	3/26/2015 11:26 AM
30	add frequent service across I90 from the P&R please also make sure bus routes planned are easy to understand - stops in opposite directions should be on facing sides of the SAME street - current system is VERY CONFUSING. System is not just for daily commuters - it shouldn't take a PhD to figure out ones connections. Buses with the same number should always serve the same stations - if they don't - give them a different label! I had my children accidentally take a bus to Seattle because it wasn't clear which direction it was headed	3/26/2015 11:23 AM
31	Double buses for the 311	3/26/2015 10:40 AM
32	Alternative 2 really doesn't take advantage of the light rail...so it has a lot of room for improvement	3/26/2015 10:10 AM
33	Keep 242	3/26/2015 9:58 AM
34	The addition of the 256 route has merits but it needs to be switched with 255 i.e. there needs to be a route (can be less frequent) that takes you from Brickyard P&R to downtown Seattle and another route with more frequency that will connect downtown Krikland to UW Link Station where folks can transfer to Light Rail. Provides more options for commuters from the Eastside. Proposed changes for route 311 from Alternate 1 could be added to this alternate to provide the connection to Link.	3/26/2015 9:01 AM
35	If the goal is to take advantage of light rail, maybe think about shortening the 255 and 252 routes to end at the UW light rail station, but keeping the routes as they are on the east side of Lake Washington. That would provide the best coverage to the eastside neighborhoods and also make use of light rail. Transfer times must be short. My commute home at night on route 252 is already over an hour. Making it longer would not be acceptable.	3/26/2015 7:40 AM
36	Shorten long-haul routes during peak hours to maximize the number of bridge crossings each bus can make. Compensate by offering more circulator services between transit centers and outer areas or improve park-and-ride capacity.	3/26/2015 3:01 AM
37	Remember the citizens of Sammamish. Service to Seattle Children's.	3/25/2015 8:12 PM
38	Keep in mind medical personnel hours starts and stops. Even though buses run less often, they can still run us across the lake at these times.	3/25/2015 6:19 PM
39	frequent services	3/25/2015 3:22 PM
40	Please have a direct connection from Northgate to Kirkland. Thank you	3/25/2015 2:06 PM
41	see previous comment	3/25/2015 1:32 PM
42	From Seattle Children's Hospital to Eastside	3/25/2015 12:43 PM
43	I am really hoping to get a direct connection between kirkland and seattle childrens hospital	3/25/2015 12:33 PM
44	I don't see an easy, logical way to use light rail to improve Eastside service. It doesn't make sense to degrade Eastside service just to 'take advantage' of light rail.	3/25/2015 12:27 PM
45	No comment	3/25/2015 11:33 AM
46	restrict one or two north/south and west/east (one or two with hwy access) streets to buses. move cars to the remaining streets (including the remaining west/east streets with hwy access).	3/25/2015 7:40 AM
47	No recommendations.	3/24/2015 8:44 PM
48	I don't mind the idea to consolidate 252/257/311. I probably wouldn't even mind a detour for the 311 to stop at the light rail station. I'm just concerned about the changes to the Seattle end of the service for my commute.	3/24/2015 8:30 PM
49	Seems OK as is	3/24/2015 7:49 PM
50	Not interested in improving Alternative 2. Like Alternative 1.	3/24/2015 6:08 PM

51	Extend light link rail to Kirkland.	3/24/2015 5:51 PM
52	Do not provide weekend service on the 545, and instead offer it on the 542 with a connection to Link. Delete the 545's afternoon Overlake TC deviation.	3/24/2015 4:25 PM
53	I have no informed response for this question.	3/24/2015 1:20 PM
54	Transferring is super stressful, especially on the journey home! Please make all routes longer so we will need to make no transfers (one should be the absolute max!).	3/24/2015 1:19 PM
55	Combine both alternatives. Have an option for doing a direct shot downtown and an option for Montlake and using light rail. I know it may not be possible but for the early buses maybe have a route that alternates taking you to Montlake or taking you downtown directly on the current route of 311,252, or 257.	3/24/2015 8:30 AM
56	no input	3/24/2015 7:47 AM
57	all day service between downtown Kirkland and UW	3/24/2015 7:01 AM
58	You are trying to force connections to the link rail at the University, it should not be thought of as a transfer point to downtown Seattle, we all want direct service downtown. Those of us going the the University District won't want to get off at the link station as we are trying to go the the school and have no desire to walk from the link station, we want to be let off on Pacific, 15th or on campus. Especially those of us with mobility issues.	3/23/2015 5:23 PM
59	I'd like rapid ride added along Rt 202 between Woodinville & Redmond Transit Center --- Rt 202 is extremely crowded during office hours. You also need to improve crosswalks and bus stop locations along Rt 202	3/23/2015 5:14 PM
60	One Transit Agency for all. Metro buses, ST light rail and trains, and the trolleys. All should work on ONE system (if that is ORCA or whatever I do not know), but when needing to transfer, one should not have to worry about having to "pay again". That only keeps people in their cars. More service frequency is needed across 520 to at least South Kirkland P&R. Today, one can be stuck for a long time on the western side of the lake, with no options of getting across, period. Getting across would at least open up the option to walk or bike home.	3/23/2015 1:08 PM
61	No turnback for route 545. This should go all the way till Redmond.	3/23/2015 11:43 AM
62	Extend ST 560 to service the Houghton Park/Ride. Those of us who live in the Kirkland area need convenient access to a bus route to the airport. Currently, we must negotiate our way to the Bellevue Transit Center in order to board the 560: very time consuming via bus (at requires 2 buses to get to BTC) and a hassle to have someone drop us at BTC via private vehicle: traffic, non-existent parking.	3/23/2015 10:25 AM
63	Increase frequency; extend light rail to reduce or eliminate bus transit. Keep the 238.	3/23/2015 7:57 AM
64	Instate the concept of a NE seattle route to Kirkland route from (i.e. 255 alternative 1) in some form. Childrens makes sense because roosevelt and U district already have access whereas there is no good access coming from NE of campus to the eastside.	3/22/2015 10:52 PM
65	Please retain the 271 service, especially between Eastgate and Issaquah!!!	3/22/2015 9:05 PM
66	More trips to Woodinville during peak times	3/20/2015 6:04 PM
67	Hold off until there is light rail on the East side to connect with light rail at UW.	3/20/2015 2:33 PM
68	I would not reduce the 271's service. If anything, I would expand it.	3/20/2015 1:37 PM
69	Then provide light rail from Woodinville though Kirkland directly into Seattle. HELLO!!!!	3/20/2015 1:35 PM
70	Alternative 1 is better	3/20/2015 1:24 PM
71	Keep rout 242 as there isn't any other coverage that makes up for that, so is not a duplicate.	3/20/2015 11:11 AM
72	Extend Bus Route 246 to Clyde Hill/ Yarrow Freeway Station.	3/20/2015 10:38 AM
73	coordinate buses w/ light rail	3/19/2015 11:40 PM
74	Only improvement would be to create Metro only lanes; the worst situation of course is the trip from the 520 interchange onto northbound 405 evening commute. One other possible method is to explore exclusivelyusing the regular 252 "re-route" down to Bellevue to be able to get immediately into the HOV lanes heading north on 405 without idling down the usual northbound direct ramp from 520. This would be after the new lanes/prices/metering, etc are put into effect hopefully reducing the number of cars using the HOV lanes. One other thought, provide two lanes on that direct 520 to northbound 405 ramp assuming that two vehicle "turning lanes" will fit. This at least provides the bus with the ability to bypass stacked traffic from 405 up and back onto 520.	3/19/2015 6:53 PM

75	No transfers on 271 and we need the same level of frequency since we don't have light rail options to get to the Eastside!!	3/19/2015 3:55 PM
76	Routes going from the eastside towards seattle easily connect with light rail because of the Montlake bus stop. Perhaps a covered walkway from the bus stops to the light rail station would be useful.	3/19/2015 3:26 PM
77	If you're going to make direct connections to the Eastside from Queen Anne, I would suggest creating a direct route to Downtown Bellevue in addition to the routing for the new 311.	3/19/2015 2:20 PM
78	Expand the 542 route to run later into the evenings and on Saturday.	3/19/2015 11:58 AM
79	I like Alt 1 better.	3/19/2015 11:15 AM
80	Better coordinate route timing to/from Finn Hill with express routes to/from UW.	3/19/2015 10:46 AM
81	Add service to NE corridor: 522 and Juanita Dr. in Kenmore, Bothell, Lake Forest Park, Woodinville, Juanita, and Kirkland. Expand park and ride capacity in Kenmore and Bothell and other locations. Include some of the features from Alt. 1 (should not be either-or) (Raise my taxes, please!)	3/19/2015 8:55 AM
82	Need expansion of 269 service to provide more frequent trips from Sammamish 228th Ave NE to Bear Creek and downtown redmond. Does not need to go to Overlake.	3/19/2015 8:30 AM
83	reduce fair 50 cents	3/18/2015 10:19 PM
84	I do not have the expertise to adequately answer this question.	3/18/2015 8:53 PM
85	In one of the designs, I would be required to take the 542 back to Seattle from the OTC, instead of the 545. The problem with the 542 is that it is a 10 minute walk away from the current 545 bus stop, and you have to cross a highway, including both a busy/daunting onramp and offramp along 40th street. Not pedestrian friendly. I am completely against forcing tens of thousands of people every day having to hike all the way over to the 542. I hope to god that my bus trip home is from the OTC proper, and not the bus shelter on the onramp of 520, which is where the 542 is today.	3/18/2015 2:54 PM
86	Ensure alternative 2 evolved into taking eastlink into account when appropriate.	3/18/2015 2:47 PM
87	Increase access to South Lake Union from Kingstate.	3/18/2015 2:33 PM
88	More frequent hub to hub or end of line locations (one per major metro area I.e. Westlake/seattle, Redmond, Bellevue,udist, airport)	3/18/2015 2:28 PM
89	Keep 242 or increase frequency of 542 during peak hours.	3/18/2015 2:07 PM
90	Anything that can get Eastside commuters from bridges into mass transit to mitigate the chaos on I-5 and I-405 between the bridges, would make life for thousands (if not 100s of thousands) easier. I drive to Bellevue to commute via 271 from Bellevue to UWMC. In the evening, the driving aspect of my commute between Bellevue and Issaquah is a no-win situation. If Westbound I-90 (Bellevue to Seattle) is backed up, which happens ALL the time, Bellevue Way backs up and I can't go Eastbound I-90. Obviously Eastbound I-90 backups affect me too but are less frequent. I cannot drive via I-405 as it is a parking lot both ways at all times. Please help us bridge-dependent commuters get out of our cars! Additionally, we do not have enough parking in South Bellevue P&R or Bellevue in general. Eastgate P&R access is problematic - so problematic that I bike there if I use that P&R. We need more direct frequent, faster service from Eastgate/Issaquah to UWMC - I'm okay making a connection at i-90 or 520 but there are limited options. Think 556 route, with less stops, more frequent, if possible. Even 271 with less stops would be better. I don't mind walking or biking. When will light rail help with bridge traffic and in-between bridge traffic?	3/18/2015 1:48 PM
91	Bringing expert from Europe, Japan, East-coast anywhere that has a good public transportation.	3/18/2015 1:35 PM
92	Why isn't the 522 listed anywhere in either of these options?	3/18/2015 1:18 PM
93	Need weekend service to new light-rail stations. Need to get people from NE King County to U District, to downtown Seattle, to Sea-Tac.	3/18/2015 1:02 PM
94	I guess the answer is who is going to use the light rail? Where are the riders going who are riding the rail? They aren't going to First Hill..... I don't know. I'm confused. Anytime you have to transfer instead of a direct shot is inconvenient for all the riders.	3/18/2015 12:50 PM
95	more buses from downtown Seattle and the UW to downtown Bellevue	3/18/2015 12:49 PM
96	Implement Alternative 1 ideas to make Alternative 2 better	3/18/2015 12:45 PM
97	I would add the 542 improvements from Alternative 1 to Alternative 2.	3/18/2015 12:27 PM

98	Increase night and weekend service on 271.	3/18/2015 12:13 PM
99	Keep route 271 the way it is currently, do not decrease frequency in the late evening.	3/18/2015 11:57 AM
100	I would like the old metro route 250 to come back and fine if it would only go as far as uw light rail station and allow people to transfer on from there.	3/18/2015 11:48 AM
101	Consider route additions that would be direct to the light rail. I'm not convinced that the new options will reduce transit time for me or other commuters. The park & rides are already over capacity - especially the 40th ST Overlake Transit Center. Adding more routes to get to light rail is great but not extremely helpful when there's no option to park to utilize transit! I already opt to park in MS parking since it's a given that the park & ride will already be full. It's a sad testament that our family was a one-vehicle family for many years and Metro's decisions to reduce transit options have forced us into a two-vehicle family... quite the opposite of what mass transit should facilitate!	3/18/2015 11:43 AM
102	retain frequency of 271 in early evenings (up to 8:30 pm)	3/18/2015 11:19 AM
103	Add a trip to the 235 so I don't have to wait as long to make a transfer after the 277 is eliminated. If I miss a transfer I'd have to sit around for 30 minutes for the next one and that sucks.	3/18/2015 11:16 AM
104	We don't need more frequent service on the 242, the cadence is just right. Six buses between 6am and 9am running to Overlake. Six buses between 3:30pm and 6pm running to Ridgecrest. The concept of a "consolidated, frequent network of service" sounds great, but if it means killing a popular, targeted, highly efficient route, then your concept is making things worse, not better.	3/18/2015 10:55 AM
105	There needs to be one or two "trunk" routes connecting major Eastside hubs (Issaquah-Bellevue-Redmond-Kirkland-Totem Lake). With fast, frequent connections, much of the direct service to Issaquah and especially to the Issaquah Highlands/Sammamish can be eliminated (off-peak hours especially). There are already too many routes crisscrossing Lake Washington.	3/18/2015 12:28 AM
106	Keep route 242. Route 541 needs to run both ways (not just from the Eastside to Seattle in the morning and Seattle to the Eastside in the evening) to increase commuter options to Redmond/Microsoft.	3/17/2015 7:34 PM
107	NA	3/17/2015 9:28 AM
108	Have a realistic peak definition.	3/17/2015 8:22 AM
109	Combine both 1 & 2 alternatives with choices and options.	3/17/2015 7:29 AM
110	I am willing to accept the 545 not operating on weekends.	3/16/2015 5:11 PM
111	Why don't you provide value back to the taxpayers by investing in increasing capacity along the 405 and I5 corridor instead of wasting taxpayers money by investment in mass transit that relatively few people can use or leverage?	3/16/2015 4:09 PM
112	Keep the deletions proposed in Alt 1 and increase frequency on the existing 311 routing.	3/16/2015 3:46 PM
113	Consolidate the 545 and 542 lines, and have the line end at UW. The 545 seem to run late a lot, particularly during peak times, because of congestion in downtown Seattle. If commute times during peak between Redmond and Downtown are faster when using the light rail link, then this might improve schedule reliability.	3/16/2015 1:27 PM
114	Keep 545 downtown seattle Redmond all day every day	3/16/2015 1:24 PM
115	I think you really have to be careful about adjusting route 545. It is very heavily used because so many Microsoft employees live in downtown Seattle and value being able to get back and forth between downtown and Overlake Transit Center directly and with no transfers throughout the day, evenings, and on weekends. Reducing service on route 545, which is so heavily used, and increasing it in route 542, which isn't, seems like you have the priorities backwards.	3/16/2015 1:17 PM
116	Keep the 242! Or at the minimum, extend the 542 up to Northgate to continue the current direct service to the eastside.	3/16/2015 1:01 PM
117	I'm assuming you're removing this north route because the ridership is sparse until Northgate. If so, move the 242 route to the east (to 15th NE). By having it run within 1-2 blocks from the highway, you're losing potential riders to automobile transit. Move it to 15th, where there are far more eastside commuters.	3/16/2015 12:56 PM
118	Make it easy to get from Redmond to downtown Bellevue and from Downtown Bellevue to Seattle and back.	3/16/2015 12:50 PM
119	Keep 242 or provide some option that doesn't make my commute from Maple Leaf to Redmond significantly longer	3/16/2015 12:36 PM

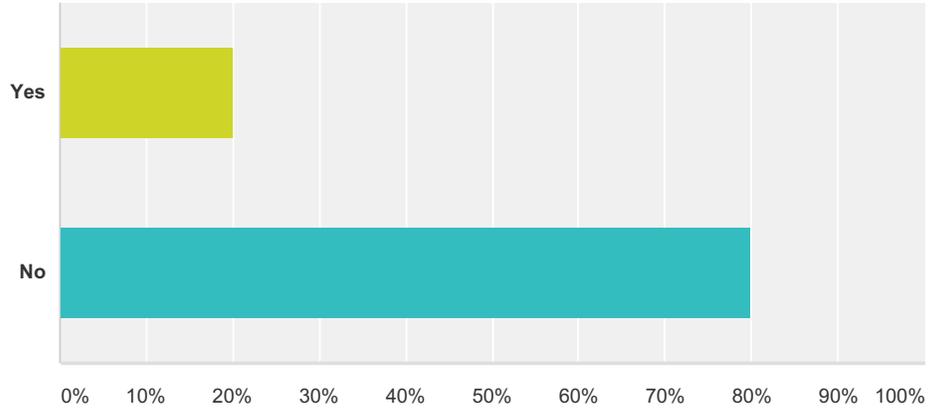

120	keep 542	3/16/2015 12:35 PM
121	Have some peak 545 routes that aren't turn-arounds. Leverage the capitol hill light rail station more than the U-District one.	3/16/2015 12:26 PM
122	Extend 545 to Redmond Town Center for turnbacks. Run 545 all day.	3/16/2015 12:00 PM
123	Target the 545 with more frequent buses during peak hours.	3/16/2015 11:57 AM
124	Leave the 545 as it is - or even make it more frequent. It's already crowded.	3/16/2015 11:57 AM
125	Frequent, all-day service connecting Overlake to Rt 44 (Fremont / Wallingford).	3/16/2015 11:51 AM
126	keep montlake station on 520. I take 44 to 545 and vice versa to go from Stone Way to Redmond.	3/16/2015 11:48 AM
127	I'd continue to have the 545 travel between Overlake and Bear Creek during weekday off-peak hours.	3/16/2015 11:45 AM
128	Keep 242	3/16/2015 11:35 AM
129	Run a (less frequent 256) from Seattle to Kirkland after rush hour. I understand the goal but I am skeptical. Prove that the commute will be the same or quicker with a transfer at UW to 255 and I'd be happy to use that.	3/16/2015 11:14 AM
130	Allow riders to decide if they want to take the light rail; do not force it on them. Keep the buses and allow the alternative.	3/16/2015 10:13 AM
131	255 is the only bus that frequently connects Kingsgate and Downtown Seattle. Why change the 255 Route to Children's Hospital? Create a new service from the Eastside to the University. Changing buses during the travel to Downtown Seattle adds more time. We need frequent all-day service between the Eastside and Downtown Seattle! You proposal will create slower connection from the Eastside to Downtown Seattle	3/16/2015 7:20 AM
132	Addition of route 256- direct service from Kirkland to UW is a good option and should be considered.	3/15/2015 6:36 PM
133	Make week-end link trips between Kirkland, Redmond, and the UW via bus and light rail. This will be very good during peak hours and football season. Also, put ORCA card vending machines at the Kirkland and Redmond Transit Centers.	3/15/2015 5:31 PM
134	Provide 7-day connectivity to Link university of WA light rail station from Bear Creek P&R.	3/15/2015 10:38 AM
135	I don't think any of this will help.	3/13/2015 6:21 PM
136	South King County - Port of Seattle (Sodo) could use more route connections to the eastside, maybe turn rt218 into an all day service and/or revive rt280 but start from tukwila international blvd station?	3/13/2015 5:18 PM
137	Woodinville Park and Ride has space to park if you delete route from Bothell UW and Woodinville PR, there are no space to part on Bothell UW.	3/13/2015 1:28 PM
138	N/a	3/13/2015 1:05 PM
139	Wi-Fi on buses	3/13/2015 12:41 PM
140	More service between major hubs at more times of the day.	3/13/2015 10:07 AM
141	372 needs to go further on weekends! Particularly if deleting the 72.	3/12/2015 10:39 PM
142	I'd look to leave the 255 and 545 alone. They are staples on the Eastside that people have come to rely on when all the other cuts to the Eastside were being made. (250, 260, 265, etc.)	3/12/2015 5:29 PM
143	Nothing to add here.	3/12/2015 1:41 PM
144	I do not fully comprehend Alternative 2, but what I do know is this: As long as this plan is able to keep my ability to get to work and back (in a timely manner) intact, I am all for it.	3/12/2015 10:35 AM
145	I don't think this plan is proving that its "keeping coverage". It concentrates and consolidates instead of expand. Incorporate more, infrequent routes to the suburbs in peak hours to bring commuters to and from work. These infrequent, peak-hour routes can converge at the Link Light Rail stations and bring workers into downtown Seattle, Redmond, etc.	3/12/2015 9:43 AM
146	I would rather have a direct service between Redmond and downtown Seattle--Route 268 does that for me and I would prefer that not to change.	3/12/2015 9:20 AM
147	Maintain a connection between North Seattle/Shoreline and the Eastside that requires less than 2 transfers. One connection is realistic, two connections becomes untenable.	3/11/2015 4:17 PM

148	During non peak hours all routes to downtown could truncate at U-Link as traffic is not as bad in the UW.	3/11/2015 10:07 AM
149	Completely reliable & free reasonably priced way across the damned lake with a bike on 520. I can catch a base bus in the morning & there's usually little wait. But I have to pay \$2.50 or more to travel 1 mile back across the bridge in the evenings and I may have to wait 20 minutes or more for the privilege at rush hour. Someday, there'll be a sidewalk, but that will be 2 or 3 years from now. So, take a low-floor bus, rip out the seats, and have it circle from Montlake to Evergreen Point & back hauling bikes & riders.	3/11/2015 9:33 AM
150	Retain 277.	3/11/2015 8:31 AM
151	Keep some direct service to downtown, the more I transfer the less I like it	3/10/2015 10:15 PM
152	get the word out. Announce it daily on the bus and make the survey easier to find	3/10/2015 10:00 PM
153	Enhance 372/522 service. Add Park & Ride in Lake Forest Park or Lake City.	3/10/2015 8:53 PM
154	keep 520 buses out of downtown seattle.	3/10/2015 7:04 PM
155	Alt 2 is a stopgap in my mind. Fix the 520/Montlake Mess and then use Alt 1 for 520 routes. Keep things as are until you fix Montlake. Then, implement Alt 1.	3/10/2015 3:51 PM
156	Improve the walkway at the Montlake Freeway Station to allow a 545-LINK transfer via the 43 at U-District station.	3/9/2015 5:52 PM
157	Make which 545 trips are turn-back trips really, really, really obvious, through signage or different colors or even a different number.	3/9/2015 3:41 PM
158	Same as for Alternative 1.	3/9/2015 2:21 PM
159	Same as option 1 - increase the feeds into the link light rail hubs from the eastside.	3/9/2015 11:45 AM
160	Keep the direct connection between the Woodinville Park and Ride.	3/9/2015 10:02 AM
161	Cut the 252.	3/9/2015 8:45 AM
162	establish direct bus connections from eastside to major hospitals in downtown seattle	3/9/2015 5:51 AM
163	There need to be more mid-day options from the Eastside to Seattle--it should not take over an hour and a half to get from Woodinville to Seattle in the middle of the day via bus.	3/8/2015 10:25 PM
164	Don't obsess so much over keeping every existing route; better to let some just go if it means you can establish frequent routes elsewhere.	3/8/2015 10:01 PM
165	If that's the goal, then connect with light rail. Truncate routes at UW Station where appropriate, and direct the savings toward improved, more reliable cross-lake service. No significant downtown coverage will be lost.	3/8/2015 9:31 PM
166	through route the 271 & 65 continuing to service dt Bellevue	3/8/2015 12:00 PM
167	Keep frequent 271 service on night and weekends.	3/8/2015 10:27 AM
168	you haven't done anything to improve overall service; there is no light rail to the eastside, the traffic going North on 405 is still bad and the buses are stuck trying to get from 520 to 405.	3/8/2015 8:44 AM
169	Expand bus service and add more bus stops through southwest Newcastle (along Lake WA Blvd. near SE 73rd Street) that connects to Renton, International District, Bellevue	3/7/2015 11:42 PM
170	as long as this consolidation has minimal impact on cars. how is the impact to car traffic being addressed? safety getting to/from; parking at the stop location.	3/7/2015 2:23 PM
171	Would like to have an Express bus from Northgate around the North end of the lake to downtown Kirkland. The buses from d.t. Seattle to d.t. Kirkland are slammed at rush hour.	3/7/2015 2:12 PM
172	See above suggestion to alternative 1.	3/7/2015 12:20 PM
173	more park & ride space	3/7/2015 12:10 PM
174	Better service to Bellevue College	3/7/2015 11:55 AM
175	The concept map of the 207 from alternative 1 is brilliant, so if combined with the frequency of the current 271, that would be superb for retaining and even attracting more ridership.	3/7/2015 10:25 AM
176	I prefer the concept of Alternative I.	3/7/2015 8:36 AM
177	send 255 to UW, reduce Bellevue-Issaquah service, increase Bellevue-UW service	3/6/2015 10:53 PM

178	If "coverage" means "which destinations are accessible via transit, given a certain amount of energy expenditure", then Alternative 1 does not meaningfully reduce coverage of the Eastside. All the same destinations are available; all that's being asked of anyone is to switch from a bus to a train at UW Station. Therefore, my suggestion would be to implement most of Alternative 1, with the exception of those changes that take service away from particular corridors.	3/6/2015 8:24 PM
179	Concentrated service to light rail stations and park and rides	3/6/2015 8:16 PM
180	ensures evening/weekend service remains.	3/6/2015 8:14 PM
181	don't know	3/6/2015 7:48 PM
182	1) Speed up 545 service by replacing the Cap Hill dogleg with an I-5 on-ramp stop.	3/6/2015 5:30 PM
183	I would reroute the 271 so it can serve Evergreen Point.	3/6/2015 5:17 PM
184	Make it more like alternative 1 to take advantage of the new light link rail stops, but keep the cool new route ideas for 541 (stop at 148th Ave NE) and 311 (direct access to eastside-seattle).	3/6/2015 4:31 PM
185	More evening trips and mid-day trips on the 311.	3/6/2015 4:19 PM
186	More coverage needs to include non-peak times. People who aren't doing the 9-5 Microsoft grind will always exist, and really need a way to get around at midday and on weekends.	3/6/2015 4:14 PM
187	To improve Alternative 2, make it identical to Alternative 1 ;)	3/6/2015 3:52 PM
188	No idea	3/6/2015 3:41 PM
189	More route consolidation, higher frequencies, and better connections with light rail.	3/6/2015 3:34 PM
190	Northgate to Downtown Kirkland service.	3/6/2015 3:31 PM
191	Use the UDub as a hub for eastside arriving and bound trips to leverage the light rail route when it opens.	3/6/2015 3:27 PM
192	Keep 255 & 545 7/day week 20 hour/day direct service to downtown Seattle.	3/6/2015 3:02 PM
193	Would be nice if there were some all day connection between Kirkland and the UW light rail station, but I'm not sure at all how to fund it without making the cuts from Alt 1.	3/6/2015 2:55 PM
194	don't know	3/6/2015 2:44 PM
195	Truncate 545 and 255 at UW Light Rail station	3/6/2015 2:33 PM
196	Keep the 277	3/6/2015 12:11 PM
197	See Alternative 1 for GREAT ideas!	3/6/2015 12:06 PM
198	Provide for connections to Link. Find a way to make sure the 541 would be reasonably fast. With the 541, lose the 545's afternoon deviation to Overlake TC.	3/6/2015 10:41 AM
199	Do alternative 1	3/6/2015 10:34 AM
200	Increase 277 service as an alternative to rerouting 255.	3/6/2015 7:55 AM

Q33 Would you like to give us feedback on changes being considered for Eastlake and South Lake Union?

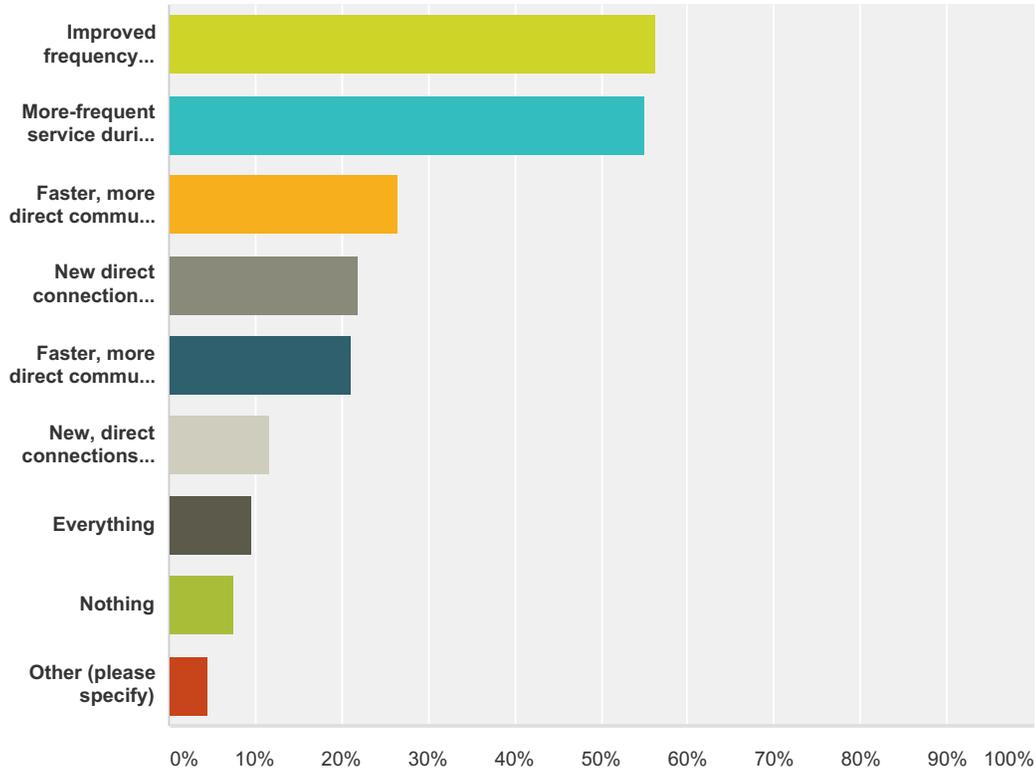

Answered: 3,868 Skipped: 2,691

Answer Choices	Responses
Yes	19.98% 773
No	80.02% 3,095
Total	3,868

Q34 What do you like most about Alternative 1 in Eastlake and South Lake Union? (choose up to four)

Answered: 673 Skipped: 5,886

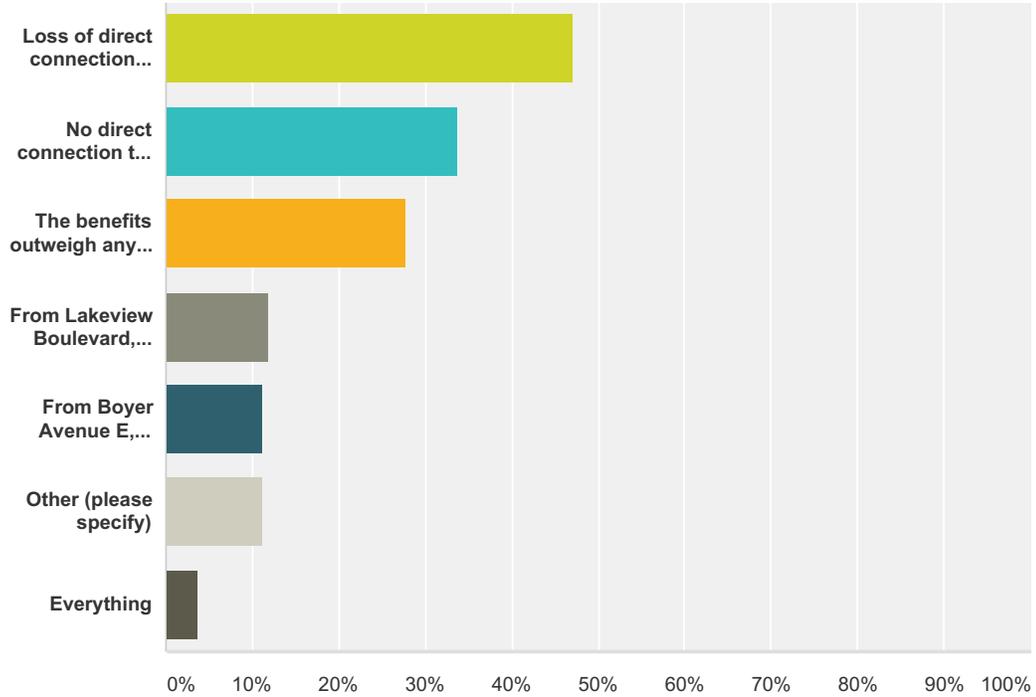

Answer Choices	Responses
Improved frequency between South Lake Union, Seattle Center, and Capitol Hill (Concept for Route 8)	56.32% 379
More-frequent service during peak commute times between Eastlake, South Lake Union, the south end of the University District, the University of Washington, the UW Medical Center, and Link light rail at the new University of Washington Station (concept for Route 70)	55.13% 371
Faster, more direct commuter connections between Maple Leaf, Green Lake, and South Lake Union via I-5 (Concept for Route 66)	26.45% 178
New direct connection between South Lake Union and Madison Valley (Concept for Route 8)	21.99% 148
Faster, more direct commuter connections between Wedgwood, Ravenna, and South Lake Union via I-5 (Concept for Route 64)	21.10% 142
New, direct connections between South Lake Union, Woodinville, Totem Lake, and Kirkland (concept for Route 311)	11.59% 78
Everything	9.66% 65
Nothing	7.43% 50
Other (please specify)	4.61% 31

Total Respondents: 673		
#	Other (please specify)	Date
1	There already is a direct connection between South Lake Union and Madison Valley provided by Route 8. Do you not know your own system??	3/31/2015 10:48 PM
2	want to be able to get from u district to down town - sounder train	3/31/2015 11:42 AM
3	want to be able to get to the Sounder train from Sand Point way, or U district	3/31/2015 11:34 AM
4	The South Lake Union area will continue to be an extension of downtown Seattle. The needs will be even greater as time goes by. It is imperative that the public transit system seriously consider how to service this area.	3/31/2015 11:00 AM
5	South Lake Union is a traffic MESS!!!! It should have bee 4 lanes wide not 3 and the light rail just jams things up (like it will do on Broadway). The lights should be timed better and from 3:30 pm you need traffic cops there to keep things moving. It just got almost finished and it is already past traffic capacity!!!!!! Transit of any kind can't help the Mercer Mess and access to I-5. A true mess! I go by there 3 times a week and it is ALWAYS blocked up!	3/30/2015 9:44 PM
6	Generally, I have concern for any changes from Metro current service, UNLESS THERE IS AN INCREASE/IMPROVEMENT OF SERVICE (additional routes, frequency & buses). ANY PLAN THAT DELETES ROUTE 43 IS UNACCEPTABLE. ANY PLAN THAT REDUCES SERVICE TO ALL NEIGHBORHOODS, INCREASES WALK & WAIT TIME TO/FOR BUSES IS UNACCEPTABLE. Living in the west edge (7th to 8th Ave NE, NE 45th St to NE 47th St) of the U-District, using Light Rail is not really an option I will consider except for novelty from time to time or if going to SeaTac, which I never do. Both Alternatives appear to reduce service to my area of the U-District. I go to the Group Health area of Capital Hill (I call East Capital Hill) 2-4 times a week. Deleting route 43 or its current frequency will be a burden for me. Using route 48 & 8 increases walk time 10 min and wait time 10-15 min (I've tested it the past 2 weeks). It takes me an average of 20 min of additional time from leaving my home to reach my destination in the Group Health area.	3/30/2015 2:42 PM
7	splitting Route 8 or Route late; fast service between U District and SLU in commute times on Route 311	3/30/2015 7:31 AM
8	More direct connections to Capitol Hill, Fremont, Ballard, downtown along eastlake avenue	3/30/2015 6:58 AM
9	I like the general concept of more service to South Lake Union.	3/29/2015 9:23 PM
10	unsure	3/27/2015 9:09 AM
11	Keep route 70 going downtown!! It is important the Eastlake neighborhood has this link.	3/23/2015 10:02 PM
12	it would be nice to have something on westlake or a quick route for a connection to the light rail	3/23/2015 12:22 PM
13	Improved frequency between South Lake Union and Downtown, connecting to/from West Seattle during commuting hours.	3/22/2015 2:33 PM
14	This idea is nonsense. Really? We already have poor bus service now you want to give us a longer commute with transfers.	3/20/2015 1:37 PM
15	Again, hard to say, no mention of the 309, which is a key service from far NE Seattle to SLU, would hope that this is one of the routes that is kept & possibly increased in frequency.	3/19/2015 1:09 PM
16	What kind of changes are being made to places? my email is: wilybros@yahoo.com	3/18/2015 10:27 PM
17	I like service from Totem Lake/Kingsgate to South Lake Union but I fear that there will be an overall reduction of service with the removal of 252 and 257. Typically, 252 alone is standing room only and now riders will have to combine on the 311. It seems like there won't be enough room on the bus. Also, the I-405 & Totem Lake Freeway Station doesn't seem equipped to handle large volumes of people during peak hours. Furthermore, there will be a lot of people parking at the Kingsgate P&R and then crossing 116th Ave. NE, which is dangerous and inefficient. Also, the detour of 311 through the University is undesirable. I would prefer a direct path from SR520 to SLU.	3/18/2015 2:40 PM
18	Love the concept for 64.	3/18/2015 12:14 PM
19	I would like to have more transit options between Northgate Park and Ride and South Lake Union.	3/18/2015 11:27 AM
20	The specific items you list here are irrelevant to me.	3/17/2015 4:45 PM
21	I do not have a good understanding of the changes	3/16/2015 11:42 AM
22	Again, Route 8 is my lifeblood.	3/13/2015 6:42 PM

23	None of the above be even slightly convenient to my home.	3/11/2015 10:48 AM
24	simpler for riders by removing the crazy 71, 72, 73 schedules	3/10/2015 9:43 AM
25	New, direct connections between South Lake Union, Bellevue, Issaquah	3/10/2015 9:23 AM
26	seems fine overall, as long as there is parking and it is safe....	3/7/2015 2:26 PM
27	What was alternative 1? You really should have restated it on this page, I don't know how you expect us to just remember it. We need rapid, reliable service (same bus comes every 5-7 minutes at rush hour) between northeast Seattle and Queen Anne or South Lake Union.	3/7/2015 8:55 AM
28	more frequent service	3/6/2015 10:26 PM
29	I like that there's no streetcar!	3/6/2015 4:05 PM
30	Potential for route 16 to be an alternate assuming a connection with service to NOAA.	3/6/2015 3:09 PM
31	Not sure yet. Our office is moving to Dexter & also to Lynnwood. I will need to travel from North Capitol Hill to both of these places regularly.	3/6/2015 3:07 PM

Q35 What concerns you the most about Alternative 1 in Eastlake and South Lake Union? (choose up to three)

Answered: 563 Skipped: 5,996

Answer Choices	Responses
Loss of direct connection between Eastlake and the heart of the University District (concept for routes 66X and 70)	47.25% 266
No direct connection to neighborhoods north of the University District during off-peak hours (concept for Route 66X)	33.75% 190
The benefits outweigh any concerns I might have	27.71% 156
From Lakeview Boulevard, having to travel farther to access service on Broadway or Eastlake Avenue E (concept for Route 25)	11.90% 67
From Boyer Avenue E, having to travel farther to access service on 24th Avenue E or Harvard Avenue (concept for Route 25)	11.37% 64
Other (please specify)	11.19% 63
Everything	3.73% 21
Total Respondents: 563	

#	Other (please specify)	Date
1	Adding service on the 8 is good, but it will still be unreliable due to extreme congestion on Denny. Shift it to Mercer St or get signal priority, queue jumps, and even BAT lanes to improve the 8 on Denny.	4/1/2015 2:26 PM
2	Loss of direct connection to MLK by dividing route 8. Lack of convenient transfer between Route 8 and 38.	3/31/2015 10:48 PM
3	Still no service that goes directly to the Seattle Center.	3/31/2015 10:12 PM

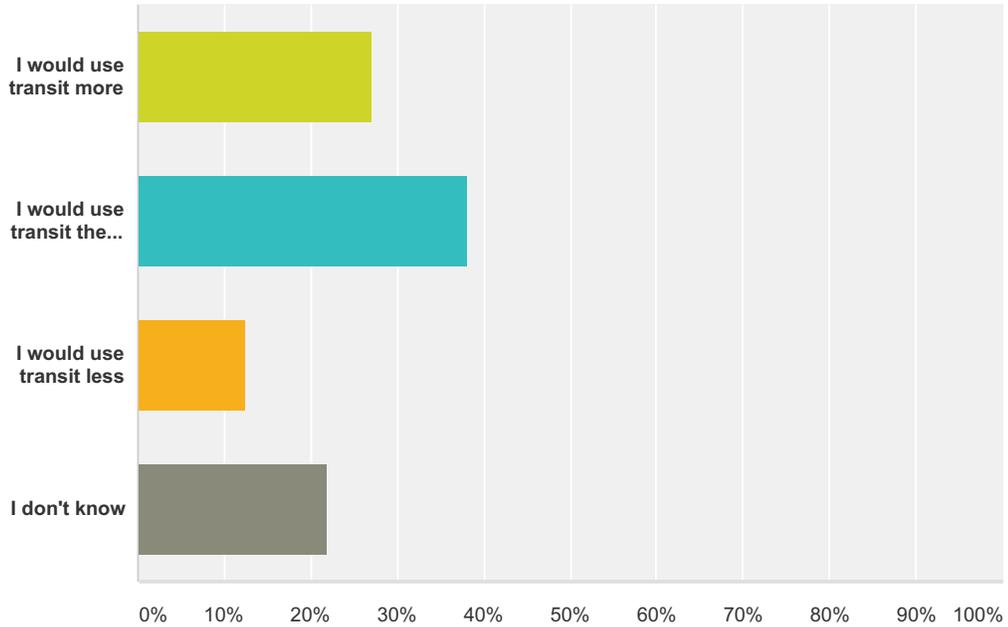

4	Although I like the added route 8 service, I think Metro needs to explore a parallel service (Mercer/lakemont/summit) - Denny is simply unfixable and have a second service for those crossing the northern part of the area would be very useful	3/31/2015 3:47 PM
5	want direct connection to down town area	3/31/2015 11:34 AM
6	Transit is not the problem there it is the high volume of cars! And they are not going away, sorry City, County and Amazon!	3/30/2015 9:44 PM
7	Generally, I have concern for any changes from Metro current service, UNLESS THERE IS AN INCREASE/IMPROVEMENT OF SERVICE (additional routes, frequency & buses). ANY PLAN THAT DELETES ROUTE 43 IS UNACCEPTABLE. ANY PLAN THAT REDUCES SERVICE TO ALL NEIGHBORHOODS, INCREASES WALK & WAIT TIME TO/FOR BUSES IS UNACCEPTABLE. Living in the west edge (7th to 8th Ave NE, NE 45th St to NE 47th St) of the U-District, using Light Rail is not really an option I will consider except for novelty from time to time or if going to SeaTac, which I never do. Both Alternatives appear to reduce service to my area of the U-District. I go to the Group Health area of Capital Hill (I call East Capital Hill) 2-4 times a week. Deleting route 43 or its current frequency will be a burden for me. Using route 48 & 8 increases walk time 10 min and wait time 10-15 min (I've tested it the past 2 weeks). It takes me an average of 20 min of additional time from leaving my home to reach my destination in the Group Health area.	3/30/2015 2:42 PM
8	• "Connect Roosevelt & 45th and Convention Place Station area"	3/30/2015 10:26 AM
9	No easy way to get from Cherry Hill to Eastlake and Fairview Avenues.	3/30/2015 7:48 AM
10	Route 311 is on congested Mercer Street too long	3/30/2015 7:31 AM
11	Fairview routing for 66X and 64X	3/30/2015 4:59 AM
12	NO DIRECT ROUTE FROM RAINIER VALLEY TO SEATTLE CENTER AREA	3/27/2015 6:35 PM
13	no direct connection between Central Area and SLU. Why Kirkland and even Woodinville get direct bus route to the mercer corridor in SLU and the Central Area doesn't?! Unlike the eastside, no one has cars here...	3/27/2015 3:46 PM
14	Could the 311 be faster? Seems to be a lot of worries about delays getting to SLU.	3/27/2015 12:38 PM
15	Connect Roosevelt & 45th and Convention Place Station area	3/27/2015 10:40 AM
16	unsure	3/27/2015 9:09 AM
17	Connect Roosevelt & 45th and convention place station area	3/27/2015 8:21 AM
18	Connect Roosevelt & 45th and Convention Place Station area No direct connection to Roosevelt during off-peak hours is very troubling. I ride the 66 to work from 65th and Roosevelt to 9th and Stewart every weekday and most weekends, and sometimes have to work outside of business hours. Keeping that service is very important to me.	3/26/2015 4:51 PM
19	No direct connection from SLU and Northgate.	3/26/2015 10:00 AM
20	The loss of 64 to downtown. It is my current bus to and from work, faster than 76, and direct (no transfers needed). This is a real disaster for me.	3/23/2015 1:15 PM
21	Consolidation results in increased ridership on existing routes 70 and 40 to/from Downtown and South Lake Union during commuter/peak hours. These routes already operate at capacity or standing-room only between Downtown and SLU during peak hours. More coaches/increased frequency is needed!	3/22/2015 2:33 PM
22	Very concerned about the loss of direct connections north as those are some of the busses used most frequently my myself and my family.	3/22/2015 10:53 AM
23	Please don't sentence bus riders to having to choke on exhaust on Mercer. More service to SLU is great, but not along Mercer.	3/20/2015 8:17 PM
24	No restoration of Route 47.	3/20/2015 5:40 PM
25	Still no mention of connections between downtown and Eastlake ave.	3/20/2015 1:28 PM
26	Potential loss of connection btw NE Seattle/Lake City to SLU.	3/19/2015 1:09 PM
27	The majority of ridership between the UW and SLU already has private shuttles. They don't need the short distance frequency. Commuters from further north have really poor connections under the new plan particularly with moving routes to Roosevelt. Walking down from Eastlake from the 66 - when it runs- is a long scary haul in on dark winter mornings. this isn't an improvement at all.	3/19/2015 8:48 AM

28	Can someone explain the use of the trolley, for example, shouldn't it be getting people from Eastlake/South Lake Union to the downtown core to hook-up with light rail? The E/SLU area is right in the middle of the Mercer 'Mess' so I can't imagine trying to add more buses to further congest the area.	3/19/2015 8:20 AM
29	Reduced access from Kingsgate to SLU (see comment above).	3/18/2015 2:40 PM
30	lack of recognition of need to service SLU in an east/west direction.	3/18/2015 1:42 PM
31	I have to travel from the University District to South Lake Union. Metro is the best alternative. If the 66 goes away, I'm not sure how I will make this commute.	3/18/2015 11:47 AM
32	Route 8 would still be stuck in traffic along Denny Way.	3/17/2015 10:41 PM
33	Route 64 no longer goes west of Boren Ave on Stewart St.	3/17/2015 7:40 PM
34	The specific items you list here are irrelevant to me.	3/17/2015 4:45 PM
35	route 8 is not on Mercer corridor in SLU... it remains on congested Denny way and bypasses all employment and services and the the Cancer Center... It is not connected to the Central Area anymore, which will require transfer now	3/17/2015 12:59 PM
36	No direct routes from South Lake Union to the eastside, despite tons of commuters going between South Lake Union and Bellevue, Issaquah, Sammamish, and Kirkland.	3/16/2015 4:53 PM
37	Why is the newly-revamped Mercer not getting a bus line?	3/16/2015 1:00 PM
38	I do not remember what Alt 1 is.	3/16/2015 11:42 AM
39	Loss of direct service along Eastlake	3/12/2015 12:48 PM
40	You can't fix the 8 without fixing Denny. More busses simply means more clusters of late busses.	3/11/2015 1:06 PM
41	Loss of the 25 is quite troubling, as these are neighborhoods that will be left without transit and long walks to get to a bus.	3/11/2015 11:50 AM
42	Loss of Routes 26 and 28 down Dexter.	3/11/2015 8:56 AM
43	311 will take forever because of the routing through the University District. Why is the 311 not stopping at the freeway stop for the Houghton P&R. It's under utilized and you're driving right by the freeway stop.	3/11/2015 8:37 AM
44	The #8 doesn't travel down MLK. This introduces either another transfer or 10 minutes more walking in my commute	3/10/2015 4:58 PM
45	See earlier comment about my concerns about the 311 deviation into the UDistrict.	3/10/2015 1:32 PM
46	Route 25 is used by my daughter from TOPS K-8. Having a longer walk with the existing infrequency of the service would not work for my daughter.	3/10/2015 10:03 AM
47	There is no plan to help move residents and UW students, visitors and faculty around Portage Bay to quickly reach the nearest express bus or light rail station.	3/10/2015 9:43 AM
48	Loss of direct connection between Central District and South Lake Union via Route #8	3/9/2015 1:34 PM
49	Still too much service from U District to Downtown, take the Link.	3/8/2015 12:39 PM
50	loss of the 64 in dt	3/8/2015 12:01 PM
51	311 should be going straight to SLU, not weaving through UW! this will extend the overall commute to the point it is worthless for those trying to get to work.	3/8/2015 8:48 AM
52	as long as there is parking and it is safe....	3/7/2015 2:26 PM
53	still no fast transit from capitol hill to seattle cancer care alliance	3/7/2015 11:50 AM
54	Nothing	3/7/2015 11:19 AM
55	What was alternative 1? You really should have restated it on this page, I don't know how you expect us to just remember it. We need rapid, reliable service (same bus comes every 5-7 minutes at rush hour) between northeast Seattle and Queen Anne or South Lake Union.	3/7/2015 8:55 AM
56	no service between Central Area and South Lake Union/Fred Hutchison/Seattle Cancer Care Alliance	3/6/2015 10:46 PM

57	Loss of the quick ride downtown that the 64X used to provide to me (again, I live in Wedgwood). With this new plan, the 64 doesn't go downtown. Then again, the light rail + 65 may be just as fast.	3/6/2015 6:20 PM
58	deletion of one of my most frequently used routes!	3/6/2015 5:42 PM
59	Change of Route 64X.	3/6/2015 4:09 PM
60	Slowdown of transit service between I-405 stops and downtown Seattle	3/6/2015 3:04 PM
61	no comment	3/6/2015 2:59 PM
62	No direct access to Eastlake/South lake union from north of the U-district (removal of 66 from Eastlake)	3/6/2015 2:58 PM
63	This is a missed opportunity to get public feedback on the proposed ST Express route 591, which will hopefully provide direct service into SLU.	3/6/2015 12:19 AM

Q36 How would your use of transit be affected if Alternative 1 were implemented in Eastlake and South Lake Union?

Answered: 654 Skipped: 5,905

Answer Choices	Responses
I would use transit more	27.22% 178
I would use transit the same	38.23% 250
I would use transit less	12.54% 82
I don't know	22.02% 144
Total	654

#	Why?	Date
1	Because I would probably not choose to use route 8 as an efficient way to get to my destinations.	3/31/2015 10:50 PM
2	I would like to use more transit, but it doesn't look like any of the proposal makes that viable for me.	3/31/2015 10:12 PM
3	I would likely have to bike or drive more (or just not go) on transit if there is less direct connections between Eastlake and downtown or the U-District	3/31/2015 9:28 PM
4	I often end up walking from my work on Eastlake to the UW medical center or to downtown because the service is infrequent. If the 66 ran more often, this would improve my transit.	3/31/2015 7:08 PM
5	I am Transit-dependent.	3/31/2015 2:42 PM
6	I only rarely catch the bus on Eastlake.	3/31/2015 12:36 PM
7	Same	3/31/2015 12:27 PM
8	It's not much of a change from the current situation for the routes I use.	3/31/2015 12:21 PM
9	not clear how this might benefit my commute	3/31/2015 11:34 AM

10	effects on route 25	3/30/2015 10:11 PM
11	SLU and U District need a good continual connection.	3/30/2015 9:56 PM
12	Eventually, less, I will buy a car.	3/30/2015 2:43 PM
13	better frequency and speed and reliability	3/30/2015 7:33 AM
14	Frequency = freedom.	3/29/2015 10:48 PM
15	This is one case where I might use transit more because it's a pain to walk or bike to South Lake Union from Capitol Hill/the CD, where I live. But right now, it's much more of a pain to get to SLU with transit, so if that changed, I might use it more often. But we're still talking about maybe 2 times a year more -- and as I said in an earlier note, getting me to use transit more isn't really such a win because I never travel by car. Bikes aren't currently causing congestion or carbon problems.	3/29/2015 5:26 PM
16	Loss of direct connection between Eastlake and the heart of the University District (concept for routes 66X and 70)	3/29/2015 11:45 AM
17	QUESTION HAS ALREADY BEEN ANSWERED	3/27/2015 6:36 PM
18	Connect Roosevelt & 45th and Convention Place Station area	3/27/2015 3:50 PM
19	i will buy a car and drive from the Central Area to SLU.	3/27/2015 3:49 PM
20	If I can't get from the U-District to Eastlake or South Lake Union via the bus, I would have to use transit less.	3/27/2015 2:05 PM
21	Better connections to other neighborhoods so I wouldn't have to walk as far.	3/27/2015 2:01 PM
22	I depend on mass transit for my livelihood and social life	3/27/2015 1:53 PM
23	I may use transit more but seeing the concept in action would determine that.	3/27/2015 9:33 AM
24	Might be the closest point from Maple Valley to be able to get to work more easily and not have to drive.	3/27/2015 8:51 AM
25	don't travel this route as much and that would not change here	3/27/2015 6:52 AM
26	My daughter is considering going to high school at the Center School. These options would make it easier and quicker for her to take Metro.	3/26/2015 4:31 PM
27	Don't use this enough to say for certain yet.	3/25/2015 8:51 PM
28	Currently I can hop on a bus without thinking too much about it for short trips down Eastlake or up to Roosevelt from my office but this would definitely make it trickier to do so.	3/25/2015 3:09 PM
29	deletion of 66x would impact my travel from the UW to SLU	3/25/2015 2:12 PM
30	The 70 is a major route of travel when I need to get to the UW main campus. Less a reliable and direct connection from either downtown or south lake union area (other university locations where I travel for work) I would not be inclined to use metro.	3/24/2015 8:59 AM
31	Loss of 64 as a commuting option.	3/23/2015 1:15 PM
32	Increased frequency SLU to Downtown=better connection options Downtown to West Seattle.	3/22/2015 2:33 PM
33	loss of 66	3/21/2015 12:38 PM
34	I don't travel to these neighborhoods often (but am filling this section out because I do from time to time and know that service to South Lake Union needed to be improved).	3/20/2015 11:47 PM
35	I only occasionally take transit to Eastlake. If it was easier to get there, I would probably do so more often. As is, the rush hour 70 is packed and late and keeps me from going that way usually.	3/20/2015 9:24 PM
36	Reliability on the 8	3/20/2015 8:17 PM
37	I'd use transit the same, but I'd be a lot happier. :D	3/20/2015 8:17 PM
38	Improvement on the 8 means I could actually rely on it to get between Seattle Center and Capitol Hill which means I would actually be able to go to the Hill to do stuff.	3/20/2015 7:27 PM
39	I'd smile at the new arrivals riding down to Amazon and know that at least they were clogging the streets up slightly less with their Car2Go's and Ubers.	3/20/2015 5:40 PM

40	Still have to take the bus downtown for work.	3/20/2015 1:28 PM
41	better connections and more frequently	3/20/2015 11:51 AM
42	I usually just walk up to Capitol Hill if I don't see the 8 coming, since I find it to be unreliable and I can walk to Broadway from Westlake faster than the bus can get me there. I would probably ride the 8 more frequently with these changes.	3/19/2015 7:30 PM
43	Must travel to Eastlake already	3/19/2015 2:46 PM
44	I don't own a car, so I don't have any other choices if I want to go longer distances.	3/19/2015 2:21 PM
45	This may decrease my riding to and from work if I can not get from work at UWMC to home in Eastlake. I would have to find alternates.	3/19/2015 10:05 AM
46	I required the 70 route to get anywhere	3/19/2015 9:43 AM
47	I don't use the transit in that area, but it does affect my commute if that area gets more congested. My bus can take forever getting through 4th to Olive to get on to I-5. If something happens anywhere in the Mercer 'Mess' or E/SLU area, the rippling effect begins to permeate the rest of the downtown core.	3/19/2015 8:20 AM
48	When going to South Lake Union, I need to be able to return to the U District in off peak hours.	3/18/2015 7:12 PM
49	I don't bike to the SLU area so would continue to use buses.	3/18/2015 5:10 PM
50	timing	3/18/2015 4:27 PM
51	Not sure I understand where the routes would go.	3/18/2015 1:55 PM
52	If there truly is service from the U District to SLU, I would use transit frequently. Right now I don't use it at all when I go to SLU.	3/18/2015 1:39 PM
53	Less convenient. The U District light rail station is in an almost pointless location for most of the U District, I can't see the point of taking light rail there.	3/18/2015 1:05 PM
54	Still meets my needs, but doesn't make things much better.	3/18/2015 11:35 AM
55	Transit in these areas is already difficult--SLU is a tough area to get in and out of. Other than the 32 I have very few viable options for getting from Seattle Center/SLU to the UW.	3/18/2015 11:22 AM
56	I need consistent, peak transportation to and from Eastlake during the peak hours.	3/18/2015 11:19 AM
57	More frequent 64s are attractive to me, but I don't fully understand the new route that they would take.	3/18/2015 10:52 AM
58	better access	3/18/2015 1:27 AM
59	It means that I can't use Route 64 as a commute option	3/17/2015 7:40 PM
60	The specific items you list here are irrelevant to me.	3/17/2015 4:45 PM
61	Transfer between the CD and the SLU will not work.	3/17/2015 12:59 PM
62	I depend on transit for most of my transportation needs.	3/17/2015 12:06 PM
63	i often skip activities in south lake union because direct, fast bus service between there and mapleleaf does not exist.	3/17/2015 8:58 AM
64	more options	3/16/2015 8:50 PM
65	Work on Eastlake Ave. Would like to see faster, more frequent service, though.	3/16/2015 8:15 PM
66	People will only start using metro more if there are more frequent routes to more locations.	3/16/2015 4:53 PM
67	With more direct routes from South lake Union I would be able to get around the area much quicker than before.	3/16/2015 12:58 PM
68	The 8 is SLOW when it gets caught up in the Denny rush-hour traffic. I can walk home to Capitol Hill faster.	3/16/2015 12:20 PM
69	Very little of my transit travel is between Green Lake and South Lake Union. The revised route 64 will make that travel more efficient for me.	3/16/2015 12:01 PM
70	South Lake Union is an area I would like to explore more, but have shied away from due to limited transit options	3/15/2015 8:36 PM
71	The direct access and connections with existing routes will serve my needs.	3/15/2015 5:34 PM

72	It seems like I would not be able to get to the UDistrict as conveniently as before.	3/15/2015 3:31 PM
73	I am not as big a user of here as I am of other areas. I simply know that the area is growing so fast that people there need transit as reliable as other dense areas in the city.	3/15/2015 2:20 PM
74	While I am generally not frequently visiting South Lake Union, I see the current repercussions of no direct transit service to the neighborhood - single occupancy vehicle commuters, in both private cars as well as car sharing vehicle services. Improving service to the neighborhood may help lessen the current traffic issues seen today.	3/15/2015 8:34 AM
75	Better and more reliable service on the 8 is key	3/13/2015 6:42 PM
76	I don't drive, so with reduction of local service (aka "consolidation") I don't have other choices, except walking more, transferring more, and taking longer to get everywhere.	3/13/2015 4:07 PM
77	Better frequency	3/13/2015 3:48 PM
78	The 8 would be usable!	3/13/2015 10:21 AM
79	This plan seems to offer no benefits or drawbacks for me.	3/13/2015 10:09 AM
80	Terrible plan. Eastlake-UW connections and Route 25 around Montlake are vital neighborhood connections for residents and University students and employees. T	3/13/2015 7:48 AM
81	Improve 12th Avenue Service, current Metro destinations in CD/Cherry Hill are practically useless. I choose to walk or other transit modes 99% of the time.	3/12/2015 7:44 PM
82	Use it the same, but it may not be as convenient	3/12/2015 12:48 PM
83	I would still use buses the same amount.	3/12/2015 10:44 AM
84	Easier to get from UW to South Lake Union where I have lots of meetings. Sometimes I drive because it's faster than wait for buses.	3/11/2015 10:29 PM
85	If the 8 were more reliable, faster, and frequent I would use it more	3/11/2015 7:53 PM
86	Currently I have to transfer or take a very circuitous route to South Lake Union. I'd be much more likely to take Metro if it was quick (i.e., express) and didn't require a transfer.	3/11/2015 3:53 PM
87	Because my service levels aren't directly affected on my work-commute. Overall, random or supplemental rides don't account for a sustainable nor forecastable amount of transit use on my part.	3/11/2015 11:50 AM
88	I would never use transit	3/11/2015 10:48 AM
89	Anything to improve the 8 will be helpful.	3/11/2015 10:27 AM
90	311 sounds like it adds service to SLU from the Eastside but the routing is so long it's not worth it. Also, getting to a starting point on the Eastside is problematic as it stops at the Totem Lake freeway station which isn't exactly close to the Kingsgate (packed) P&R.	3/11/2015 8:37 AM
91	#8 would be better	3/11/2015 5:52 AM
92	SLU badly needs peak service...it's basically an extension of Downtown now, and it needs to be treated as such. I would personally greatly benefit from increased service on Route 8.	3/10/2015 1:32 PM
93	Depends on if the stop on Roanoke and Boylston is moved. Right now it works well with TOPS dismissal, but with service every hour, it would not work if she missed the bus due to having to walk farther and not having the stop in-sync with dismissal.	3/10/2015 10:03 AM
94	I would use the 70 more because of the simpler scheduling	3/10/2015 9:43 AM
95	I take transit to SLU from Seattle downtown, not sure how this will be changed	3/10/2015 9:23 AM
96	The bus I now use would be eliminated.	3/9/2015 4:31 PM
97	To inconvenient and time-consuming to transfer buses	3/9/2015 1:34 PM
98	I would take advantage of the more frequent 8 bus route.	3/9/2015 3:05 AM
99	Because the 66 would be deleted	3/8/2015 3:13 PM
100	Right now I can get to Northgate on 66 and to Colman Dock on 66 from Fred Hutchinson bus stop on Eastlake.	3/7/2015 8:06 PM

101	I use the 70 and 66X because I like them the way they are. Not everyone will use the Light Rail to get to Roosevelt & 45th for example or from SLU to downtown. They are important Routes for Eastlake & Fairview and Downtown.	3/7/2015 5:24 PM
102	as long as there is parking and it is safe....	3/7/2015 2:26 PM
103	Taxi would be quicker & easier.	3/7/2015 11:05 AM
104	depends on how long it takes to transfer from the north end of town	3/7/2015 9:41 AM
105	What was alternative 1? You really should have restated it on this page, I don't know how you expect us to just remember it. We need rapid, reliable service (same bus comes every 5-7 minutes at rush hour) between northeast Seattle and Queen Anne or South Lake Union.	3/7/2015 8:55 AM
106	Since the routes are peak only I would likely not be able to take advantage.	3/7/2015 8:54 AM
107	More frequent service is more convenient	3/7/2015 7:55 AM
108	route 8/70 improvements	3/6/2015 10:53 PM
109	no direct service between the Central Area and South Lake Union/Fred Hutchinson	3/6/2015 10:46 PM
110	Better frequency	3/6/2015 8:28 PM
111	If transit were more reliable and frequent I'd be more likely to take spur-of-the-moment trips.	3/6/2015 8:21 PM
112	Better and more frequent connections	3/6/2015 6:56 PM
113	I don't normally ride the 64X downtown.	3/6/2015 6:20 PM
114	deletion of one of my most frequently used routes!	3/6/2015 5:42 PM
115	loss of route 11	3/6/2015 5:25 PM
116	More frequent and reliable service on the 8 is sorely needed. I often end up walking the 2 miles between my house and SLU rather than wait for it.	3/6/2015 5:12 PM
117	Don't have a frequent use for transit in SLU.	3/6/2015 4:59 PM
118	Direct commute for south lake Union from Woodinville	3/6/2015 4:23 PM
119	The same but better. It would be quicker for me to access my office in South Lake Union	3/6/2015 4:14 PM
120	Would use the transit the same number of times but might change my route to go through U-district to Ballard rather than ride the way over crowded #40	3/6/2015 4:13 PM
121	Changing the 64X route to Fairview will result in longer travel times, especially in the evening. Fairview traffic is terrible and will only get worse with all the new construction.	3/6/2015 4:09 PM
122	More frequent service on the 8 would make it much more useful.	3/6/2015 3:37 PM
123	Don't usually have a need to travel between Eastlake and UW, but I have considered moving to Eastlake because the commute would be much shorter than I currently have from Lake City to UW. If there were no direct route from Eastlake to UW, I would not relocate.	3/6/2015 3:29 PM
124	Another way to get between SLU and Capital Hill which is always nice.	3/6/2015 3:25 PM
125	Currently, the 70 buses that travel from SLU to the U District after 8pm are completely terrible. Most don't show up or are very late. The entire system is currently unreliable after 5pm. There is no way to physically get anywhere from SLU due to traffic at this time.	3/6/2015 3:24 PM
126	44/5/E & D are my most used routes now and in the immediate future.	3/6/2015 3:22 PM
127	I don't travel often from Eastlake to SLU or vice versa -- just occasionally, so my usage would not change much.	3/6/2015 3:13 PM
128	I am getting old and do not like to walk very far	3/6/2015 3:06 PM
129	The additional time required to find transfers to get to Eastlake/Fred Hutchinson would make me reconsider using transit at all. I have to be home in time to get child from childcare and I can't spend 1+ hours with transfers, etc. Light rail as it currently is does not help the Eastlake area at all.	3/6/2015 2:58 PM
130	No car	3/6/2015 2:58 PM

131	Transit is my back-up plan for trips to this area	3/6/2015 2:52 PM
132	Less 66 going to Northgate=less use.	3/6/2015 2:44 PM
133	The 8 might become a viable route, and having frequent all-day service on the 70 would open up the potential to treat the Eastlake corridor as a destination, rather than something to look at out of the 71/72/73 window.	3/6/2015 12:09 PM
134	Not a regular rider in this area.	3/6/2015 10:45 AM
135	I would use route 8 more	3/6/2015 10:39 AM
136	Additional routes will increase my usage.	3/6/2015 8:52 AM
137	70 offers more non-peak options to U-District.	3/6/2015 7:58 AM
138	Frequent 70 - yes!	3/6/2015 12:19 AM

Q37 How would you improve Alternative 1 in Eastlake and South Lake Union – keeping in mind the goal of this network concept is to have a consolidated, frequent network of service?

#	Responses	Date
1	I would add in service. Just generally, any service. I was shocked to find that of all the busses I now catch through SLU, only the 40 would not be cut; but despite that the 40 would also not be expanded.	4/2/2015 2:41 AM
2	Shift the 8 to Mercer St and electrify it.	4/1/2015 2:27 PM
3	Ensure that there is a direct transfer point between routes 8 and 38 with comparable frequencies.	3/31/2015 10:50 PM
4	More frequent service is of little use to me if the buses don't connect to the Eastlake neighborhood.	3/31/2015 9:28 PM
5	Connect Roosevelt & 45th and Convention Place Station area	3/31/2015 5:20 PM
6	Look for places where the stated concerns of "experts" in specific problem areas can be mitigated; hybridize where it makes sense to do so to keep the service human.	3/31/2015 2:42 PM
7	Connect Roosevelt & 45th and Convention Place Station area	3/31/2015 8:43 AM
8	SLU and U District need a good continual connection.	3/30/2015 9:56 PM
9	Connect Roosevelt & 45th and Convention Place Station area	3/30/2015 4:18 PM
10	Increase connections between Eastlake/South Lake Union and the north end of the University District. Also, increase connections between University District and the Coleman Ferry Docks.	3/30/2015 3:10 PM
11	Generally, I have concern for any changes from Metro current service, UNLESS THERE IS AN INCREASE/IMPROVEMENT OF SERVICE (additional routes, frequency & buses). ANY PLAN THAT DELETES ROUTE 43 IS UNACCEPTABLE. ANY PLAN THAT REDUCES SERVICE TO ALL NEIGHBORHOODS, INCREASES WALK & WAIT TIME TO/FOR BUSES IS UNACCEPTABLE. Living in the west edge (7th to 8th Ave NE, NE 45th St to NE 47th St) of the U-District, using Light Rail is not really an option I will consider except for novelty from time to time or if going to SeaTac, which I never do. Both Alternatives appear to reduce service to my area of the U-District. I go to the Group Health area of Capital Hill (I call East Capital Hill) 2-4 times a week. Deleting route 43 or its current frequency will be a burden for me. Using route 48 & 8 increases walk time 10 min and wait time 10-15 min (I've tested it the past 2 weeks). It takes me an average of 20 min of additional time from leaving my home to reach my destination in the Group Health area.	3/30/2015 2:43 PM
12	Connect Roosevelt & 45th and Convention Place Station area	3/30/2015 9:34 AM
13	Connect Roosevelt & 45th and Convention Place Station area	3/30/2015 9:30 AM
14	stop Route 311 in south Lake Union; wait for Bertha and north portal to extend to Uptown	3/30/2015 7:33 AM
15	connect roosevelt and 45th and convention place station area.	3/30/2015 6:35 AM
16	I don't know.	3/29/2015 9:32 PM
17	Unknown .	3/29/2015 4:28 PM
18	Connect Capitol Hill and northwest Seattle through South Lake Union.	3/28/2015 9:57 AM
19	keep the route the same, do not delete off peak and weekend service, and increase frequency at night and on weekends.	3/27/2015 8:18 PM
20	SOME ASPECTS OF ALTERNATIVE 1 SHOULD BE COMBINED WITH SOME ASPECTS OF THIS ONE.	3/27/2015 6:36 PM
21	Connect Roosevelt & 45th and Convention Place Station.	3/27/2015 5:50 PM
22	Have Bus lanes between south lake Union and Downtown all the way to pioneer square!!!	3/27/2015 5:35 PM

23	restructure 8. delete the portion between Mt Baker light rail and Rainier Beach. shift it to Mercer in SLU. extend it north to Ballard's Fred Meyer...	3/27/2015 3:49 PM
24	Connect Roosevelt & 45th and Convention Place Station area	3/27/2015 3:27 PM
25	Connect Roosevelt & 45th and Convention Place Station area	3/27/2015 3:03 PM
26	retain current service for #66 on Eastlake #66 and #70 are already overcrowded, and removing #66 will only make it worse	3/27/2015 2:52 PM
27	Connect Roosevelt & 45th and Convention Place Station area	3/27/2015 2:18 PM
28	Do not interrupt the connections between U-District and Eastlake and South Lake Union.	3/27/2015 2:05 PM
29	Connect Roosevelt & 45th and Convention Place Station area	3/27/2015 1:36 PM
30	Connect Roosevelt/45th and Convention Place Station	3/27/2015 1:21 PM
31	n/a	3/27/2015 1:16 PM
32	The low frequency of busses on Denny makes it really difficult to reliably plan trips.	3/27/2015 1:12 PM
33	Connect Roosevelt & 45th and Convention PLace Station Area	3/27/2015 12:08 PM
34	Connect Roosevelt & 45th and Convention Place Station area	3/27/2015 12:01 PM
35	Connect Roosevelt & 45th and Convention Place Station area	3/27/2015 11:57 AM
36	Connect Roosevelt and 45th and Convention Place Station area.	3/27/2015 11:21 AM
37	Connect Roosevelt & 45th and Convention Place Station area	3/27/2015 11:17 AM
38	Connect Roosevelt & 45th and Convention Place Station area	3/27/2015 10:47 AM
39	Connect Roosevelt & 45th and Convention Place Station area	3/27/2015 10:41 AM
40	Connect Roosevelt & 45th and Convention Place Station area	3/27/2015 9:25 AM
41	Connect Roosevelt & 45th and Convention Place Station area	3/27/2015 9:21 AM
42	Connect Roosevelt & 45th and Convention Place Station area	3/27/2015 8:43 AM
43	Connect Roosevelt & 45th and Convention Place Statain area.	3/27/2015 8:37 AM
44	Connect Roosevelt & 45th and Convention Place Station area	3/27/2015 8:22 AM
45	Connect Roosevelt and 45th, and the Convention Place Station area.	3/27/2015 8:14 AM
46	not sure	3/27/2015 8:13 AM
47	connect Roosevelt & 45th and Convention Place Station	3/27/2015 6:52 AM
48	Connect Roosevelt & 45th and Convention Place Station area	3/27/2015 5:31 AM
49	Connect Roosevelt & 45th and the Convention Place Station	3/26/2015 5:28 PM
50	Connect Roosevelt and 45th and Convention Place Station area	3/26/2015 5:26 PM
51	Connect Roosevelt & 45th and Convention Place Station area	3/26/2015 5:00 PM
52	Keep the connection from Roosevelt to downtown along Eastlake frequent, or even more frequent.	3/26/2015 4:52 PM
53	Connect Roosevelt & 45th and Convention Place Station area	3/26/2015 4:45 PM
54	I'd like to be able to connect from the downtown tunnel to the Roosevelt/NE 45th area	3/26/2015 4:40 PM
55	I would like a direct connection between Roosevelt and 45th and Convention Place/ the bus tunnel.	3/26/2015 4:37 PM
56	Connect Roosevelt & 45th and Convention Place Station area	3/26/2015 4:14 PM
57	Connect Roosevelt & 45th and Convention Place Station area	3/26/2015 3:54 PM
58	Connect Roosevelt and 45th to the convntion place station area	3/26/2015 3:41 PM
59	Connect Roosevelt & 45th and Convention Place Station area	3/26/2015 3:41 PM

60	Connect Roosevelt and 45th and Convention Place Station area	3/26/2015 3:38 PM
61	Connect Roosevelt & 45th and Convention Place Station area	3/26/2015 3:29 PM
62	Connect SLU and Northgate.	3/26/2015 10:00 AM
63	keep transit between eastlake and U district	3/26/2015 7:39 AM
64	Maintain the spine of Roosevelt/Eastlake	3/25/2015 3:09 PM
65	na	3/25/2015 1:33 PM
66	Sounds like the light rail need to go further to the north of the U District.	3/22/2015 3:08 PM
67	Keep a direct connection to north seattle.	3/22/2015 10:53 AM
68	Keep schedules the same all day, every day. Peak/weekend changes are extremely confusing for riders.	3/21/2015 12:38 PM
69	not sure	3/20/2015 11:47 PM
70	The 66 and the 70 are workhorse routes. Revising them simply makes no sense at all.	3/20/2015 1:40 PM
71	Connections along Eastlake Ave that get downtown quickly.	3/20/2015 1:28 PM
72	SLU needs more bus service. the streetcar has problems at rush hour with both traffic and high passenger volumes (not to mention weak connections with buses at Westlake)	3/19/2015 8:48 PM
73	I have no particular suggestions for improvement.	3/19/2015 7:05 PM
74	Keep service along eastlake	3/19/2015 9:43 AM
75	One direct local route from further north in north Seattle to SLU - NOT Eastlake. Actually to SLU, not as far away as you can put it without crossing I-5! Its a half mile walk!	3/19/2015 8:48 AM
76	Cleanse the area of congestion. More buses is not the answer, let alone the number of cars trying to maneuver in such a small area. Still don't understand the trolley concept as they are not the most efficient people-movers. Speaking of trolleys, just a note for the future, working on Broadway and having trolley tracks already in place, when the City finally gets them (wherever they are in the Czech Republic), they will never run on time due to the addition of bike lanes which cause emergency vehicles or Access vans to park close to the trolley tracks. Just a future heads up, more congestion on the way!	3/19/2015 8:20 AM
77	Keep the 71-73 buses	3/18/2015 4:33 PM
78	unsure	3/18/2015 4:27 PM
79	Keep 70	3/18/2015 3:27 PM
80	I wonder if smaller buses for more frequent trips would be an alternative. Use the big buses at rush hour and then the smaller ones on the less busy times of day, but more frequently.	3/18/2015 2:41 PM
81	Maintain route 252.	3/18/2015 2:40 PM
82	service SLU in an east west direction (in addition to Denny	3/18/2015 1:42 PM
83	It would be nice to have an express bus from South Lake Union to South Seattle (stops for Beacon Hill, Columbia City, Rainier Beach)	3/18/2015 12:17 PM
84	How do you commute from University District to SCCA and UW Medicine Lake Union quickly? Answer: You drive.	3/18/2015 11:47 AM
85	Once the roosevel station opens, you may want to alter the route 70 to terminate at that location rather than down by Husky Stadium. Many more people from the UW community will find Roosevelt to be a much more convenient transition point between rail/bus service.	3/18/2015 11:35 AM
86	Please do not cancel route 66	3/18/2015 11:15 AM
87	Have Route 64 go so it connects with at least one light rail station and downtown bus connections (Westlake since Convention Place isn't a station) and then head up to First Hill.	3/17/2015 7:40 PM
88	Route 8 to Mercer st in SLU. Keep route 8 the same in the Central Area. Why riders from Woodenville who all have cars can travel to the SLU faster than riders of Capitol Hill/Central who do not have cars?!	3/17/2015 12:59 PM
89	Add frequency to 66. Add a direct route connecting Phinney Ridge and Greenwood to Eastlake and SLU.	3/17/2015 12:06 PM

90	By not eliminating choices.	3/17/2015 7:32 AM
91	Use the newly-revamped Mercer as a connector between South Lake Union and Lower Queen Anne.	3/16/2015 1:00 PM
92	The City should make the "on ramp" street from eastbound Denny onto southbound I-5 a one way street. It's currently a two way street, but "wasted"... no one uses it westbound. If that street was one-way and multiple lanes, much of the traffic from Denny could be packed into that "holding area" for I-5. Currently, those cars stack up on Denny and make everyone (and the 8 bus) late. Remove the parking, make it one-way, and suddenly you can fit 100 of the cars from Denny into that area. Then use lane-specific traffic signals to get them onto the freeway.	3/16/2015 12:20 PM
93	Expand rideshare programs; streetcar	3/15/2015 8:36 PM
94	Increase the week-end frequency of the rail lines from every half four to every fifteen minutes.	3/15/2015 5:34 PM
95	Eastlake needs 10 min headways all day between Downtown and the heart of the U District. Ok to transfer there to points North and West.	3/13/2015 3:48 PM
96	Increase frequency of the above neighborhood connections.	3/13/2015 7:48 AM
97	Improve 12th Avenue Service, current Metro destinations in CD/Cherry Hill are practically useless. I choose to walk or other transit modes 99% of the time.	3/12/2015 7:44 PM
98	Make sure there's enough service connecting Eastlake (Lake Union area) to downtown Seattle (including all the way to Pioneer Square) and Eastlake to U-district. The 70 may accomplish this (if it extends to Pioneer Square / International District), but it's hard to tell if this will help the capacity. It seems like both the 70 and 66 are in high demand during peak times, and not just for people traveling through the Eastlake area - lots of people get off at the major stations (Lynn St, Harvard, etc.) along Eastlake (Lake Union area).	3/12/2015 12:48 PM
99	I want to see more service for the route 70, especially during peak hours, when all the buses are standing room-only, if that.	3/12/2015 10:44 AM
100	I primarily use the 70,71,72,73 routes to get to the Ave. This is a pretty major retail, shopping, and food area. Seems like a bad idea to lose this. I would recommend keeping a route that goes from SLU to the Ave. I am also concerned that moving the 26/28 to Aurora is a bad decision for SLU transit riders. Aurora is a divided highway with really only one place where it can be crossed (the pedestrian bridge). Aurora is also on the top of a fairly steep hill in relation to SLU. Transit riders who use the 26/28 to get to SLU from north Seattle will have a much more difficult time and a longer walk to get to work in the morning. The hill also makes this route far less accessible.	3/11/2015 10:25 PM
101	There ought to be bus service down Mercer in SLU	3/11/2015 7:53 PM
102	maintain some sort of bus coverage on the 25 route, potentially just peak time routing, only am and pm but not mid-day or evening?	3/11/2015 11:50 AM
103	Keep the 25.	3/11/2015 10:51 AM
104	Keep #25 on the Boyer Ave. E. route and every 30 minutes is manageable.	3/11/2015 10:48 AM
105	More connections from Downtown to SLU. Easy to get from SLU to downtown by catching any of the buses running down Stewart, but there is a lack of a clear concise transit corridor running the opposite direction. Probably out of the scope of this proposal, but the 8 needs more help than splitting it into 2 routes. Denny Way will continue to be a mess eastbound in the afternoon, and a reliable connection from SLU to CHS needs more help. Hopefully Metro is working with SDOT on this problem.	3/11/2015 10:27 AM
106	311 should bypass Montlake exit/U-District. This would save 15 minutes. Instead, exit at I-5/Stewart street, turn right onto Denny, then right on Fairview or Westlake. You've got tens of thousands of SLU workers, many coming from the Eastside. There also needs to be direct service from South Kirkland P&R, Redmond, and Bellevue TC to SLU.	3/11/2015 8:37 AM
107	Don't send the #8 to Madison Park	3/10/2015 4:58 PM
108	- Install a bus only left-turn signal from the Mercer off-ramp to Fairview for routes 64/66, and also for Sound Transit deadheads from Pierce County. - Install full-time bus lanes on Fairview between Mercer and Denny. Since this is a double turn lane, you can still preserve GP access. - Find a way to fix Denny to improve reliability (hard, I know)	3/10/2015 1:32 PM

109	There is still too big of a difference between the 66 and the 70. The 66 express service is appreciated but it would help if it just introduced one more stop somewhere, anywhere along the dense strip of Eastlake between Lynn and Harvard. Meanwhile, the 70 stops are too close together. It's so much faster to downtown on the 66 -- why do we encourage people to drive to Northgate and take the 66 instead of providing decent express service for people that live in the urban cores?	3/10/2015 9:43 AM
110	I'd highly appreciate a direct route from east side to SLU, don't mind < 1 mile of walking.	3/10/2015 9:23 AM
111	Do not eliminate #25 route.	3/9/2015 4:31 PM
112	Keep current Route #8 service.	3/9/2015 1:34 PM
113	keep Route 25 as is	3/9/2015 1:24 PM
114	establish direct bus connections from eastside to major hospitals in downtown seattle	3/9/2015 5:53 AM
115	keep the 66 route	3/8/2015 3:13 PM
116	dont change the 64	3/8/2015 12:01 PM
117	311 to SLU; no UW. simple, don't extend that trip further	3/8/2015 8:48 AM
118	Provide staircase to Cascade neighborhood from Capitol Hill underneath I-5 midway between Denny and Eastlake I-5 flyover to Belmont and Lakeview. Complete surface light rail service to UDist from Fred Hutchinson	3/7/2015 8:06 PM
119	I like the 8 redesign, but I don't like changes to 66X or 70, unless its more frequency following the same routes they already do.	3/7/2015 5:24 PM
120	as long as there is parking and it is safe....	3/7/2015 2:26 PM
121	connect to the Seattle Center	3/7/2015 1:19 PM
122	What was alternative 1? You really should have restated it on this page, I don't know how you expect us to just remember it. We need rapid, reliable service (same bus comes every 5-7 minutes at rush hour) between northeast Seattle and Queen Anne or South Lake Union.	3/7/2015 8:55 AM
123	Give Metro more money to make some of the routes all day.	3/7/2015 8:54 AM
124	Serve SLU with more regional routes	3/7/2015 7:55 AM
125	By making route 8 travel on Mercer st instead of Denny way in South Lake Union. As well as keeping it's route through the Central Area.	3/6/2015 10:46 PM
126	Reroute the 5 to Westlake (or possibly Dexter, but I'd prefer Westlake). A direct connection between Greenwood/Phinney and the heart of SLU would be highly valuable. Consider creating a new crosstown service along Boren. While this does not directly connect to Link, it would dramatically improve the connection between SLU and First Hill, which should be worth something. :)	3/6/2015 8:28 PM
127	minimize waits at transfer stations	3/6/2015 7:56 PM
128	Keep the 66 between downtown & eastlake as is!!	3/6/2015 5:42 PM
129	I would like some transit between SLU and Cap Hill more or less along the Mercer / Aloha spine. East-west connections in this area need to be enhanced.	3/6/2015 4:59 PM
130	More off hour service (evening and mid-day).	3/6/2015 4:23 PM
131	If the 64X were to turn west and Denny and travel north on 3rd it would capture an area of SLU/Belltown that isn't served now. Otherwise, one would have to travel to the central business district then transfer to a northbound bus from there.	3/6/2015 4:14 PM
132	Leave the 64X route as it is.	3/6/2015 4:09 PM
133	The Fairview Section is the bottleneck during rush hour, especially from the Cancer Research Center through Mercer. Look at alternates for avoiding these areas.	3/6/2015 3:09 PM
134	Put in local shuttles to connect to the main routes	3/6/2015 3:06 PM
135	Keep 66 on Eastlake, and only run it during peak times. Moving it to I5 does nothing for the commuters along Eastlake.	3/6/2015 2:58 PM

136	Keeping a route on lower Roosevelt would help with sending the 70 the UW Station. This results in good connections to Link while retaining a connection into the heart of the U District.	3/6/2015 10:45 AM
137	Add ST 591 to the concept. Have the 9x continue on Boren into SLU.	3/6/2015 12:19 AM

Q38 What do you like most about Alternative 2 in Eastlake and South Lake Union?

Answered: 69 Skipped: 6,490

#	Responses	Date
1	I didn't even look at it, but just about anything will be better than option 1.	4/2/2015 2:42 AM
2	Keeps the route 8	3/31/2015 10:50 PM
3	Retains direct connections between the U-District and Eastlake. Retains direct connections between downtown and Eastlake.	3/31/2015 9:29 PM
4	Increased efficiencies.	3/31/2015 2:43 PM
5	keeps route 25	3/30/2015 10:13 PM
6	SLU and U District need a good continual connection.	3/30/2015 9:57 PM
7	Generally, I have concern for any changes from Metro current service, UNLESS THERE IS AN INCREASE/IMPROVEMENT OF SERVICE (additional routes, frequency & buses). ANY PLAN THAT DELETES ROUTE 43 IS UNACCEPTABLE. ANY PLAN THAT REDUCES SERVICE TO ALL NEIGHBORHOODS, INCREASES WALK & WAIT TIME TO/FOR BUSES IS UNACCEPTABLE. Living in the west edge (7th to 8th Ave NE, NE 45th St to NE 47th St) of the U-District, using Light Rail is not really an option I will consider except for novelty from time to time or if going to SeaTac, which I never do. Both Alternatives appear to reduce service to my area of the U-District. I go to the Group Health area of Capital Hill (I call East Capital Hill) 2-4 times a week. Deleting route 43 or its current frequency will be a burden for me. Using route 48 & 8 increases walk time 10 min and wait time 10-15 min (I've tested it the past 2 weeks). It takes me an average of 20 min of additional time from leaving my home to reach my destination in the Group Health area.	3/30/2015 2:43 PM
8	not much.	3/30/2015 9:56 AM
9	full time Route 70	3/30/2015 7:33 AM
10	I don't see the details of Alternate 2 on this page. Can't answer the question.	3/29/2015 9:32 PM
11	Unknown.	3/29/2015 4:28 PM
12	NOT SURE	3/27/2015 6:36 PM
13	not sure	3/27/2015 2:05 PM
14	n/a	3/27/2015 1:17 PM
15	better service in my [Portage Bay, Eastlake] neighborhood	3/27/2015 8:14 AM
16	Nothing	3/26/2015 10:20 PM
17	Increased service for the 70	3/25/2015 4:41 PM
18	na	3/25/2015 1:33 PM
19	Keeps the 66.	3/21/2015 12:38 PM
20	Keeping a direct route between Eastlake and downtown.	3/20/2015 1:28 PM
21	Not much.	3/19/2015 6:03 PM
22	Sounds like it will be about the same as current.	3/19/2015 1:09 PM
23	The retention of all the routes I already use.	3/19/2015 10:05 AM
24	If it leaves the 70, I like that.	3/19/2015 9:43 AM
25	At least I can take the 373X or 73 to connect to the 70 - ridiculous but doable.	3/19/2015 8:48 AM

26	faster service	3/18/2015 4:27 PM
27	Keep 70	3/18/2015 3:27 PM
28	Ditto	3/18/2015 2:41 PM
29	Maintain route 252 (access to SLU from Kingstate).	3/18/2015 2:40 PM
30	Seems like the more reasonable plan to me.	3/18/2015 1:42 PM
31	Better and more convenient service.	3/18/2015 1:05 PM
32	For the routes I use - the alternatives aren't really different from each other.	3/18/2015 11:35 AM
33	nothing	3/18/2015 1:27 AM
34	I don't understand Alternative 2. What are its features?	3/16/2015 1:48 PM
35	Nothing	3/15/2015 8:36 PM
36	What are the alternatives in Eastlake and South Lake Union? They didn't appear on the survey. :(3/15/2015 5:34 PM
37	Where is the list of advantages?	3/14/2015 3:09 PM
38	nothing	3/13/2015 4:07 PM
39	Maintains mid-day routes through high density neighborhoods to link with light rail.	3/13/2015 7:48 AM
40	Nothing	3/12/2015 7:44 PM
41	Continued route 70 service between downtown Seattle/Eastlake/UW.	3/12/2015 10:44 AM
42	Is there much to like? It is clearly inferior to Alternative 1	3/11/2015 11:50 AM
43	Nothing	3/11/2015 10:48 AM
44	direct service from wallingford to south lake union? direct service from greenlake to south lake union?	3/10/2015 1:46 PM
45	Nothing.	3/10/2015 1:32 PM
46	Nothing.	3/9/2015 4:31 PM
47	It maintains current Route #8 service.	3/9/2015 1:34 PM
48	I don't travel to Eastlake	3/8/2015 5:13 PM
49	less changes	3/8/2015 3:13 PM
50	Service is retained.	3/7/2015 8:06 PM
51	overall seems fine but is has to have parking and be safe....	3/7/2015 2:26 PM
52	What was alternative 2? You really should have restated it on this page, I don't know how you expect us to just remember it. We need rapid, reliable service (same bus comes every 5-7 minutes at rush hour) between northeast Seattle and Queen Anne or South Lake Union.	3/7/2015 8:55 AM
53	Keeping the closeness to access transit.	3/6/2015 10:26 PM
54	Nothing	3/6/2015 8:28 PM
55	light rail comes closer	3/6/2015 7:56 PM
56	Nothing.	3/6/2015 6:56 PM
57	better than alt 1 but still pretty lousy	3/6/2015 5:42 PM
58	More direct commute	3/6/2015 4:23 PM
59	Direct connection to SDU from Maple Leaf/Northgate	3/6/2015 4:14 PM
60	Anything that eases congestion in South Lake Union is welcome!	3/6/2015 4:13 PM
61	Keeps the 64X route.	3/6/2015 4:09 PM
62	I like that there's no streetcar!	3/6/2015 4:05 PM

63	Provides some additional options between U District and Downtown.	3/6/2015 3:09 PM
64	Nothing	3/6/2015 2:58 PM
65	I prefer Alternative 1 to 2	3/6/2015 2:52 PM
66	Greater coverage. Would love to have both greater coverage and more frequent service.	3/6/2015 2:36 PM
67	I don't like it.	3/6/2015 10:45 AM
68	Nothing changes too much. I think the city has the potential to keep the existing routes busy over the next 10 years.	3/6/2015 9:37 AM
69	Increase 70 service.	3/6/2015 7:58 AM

Q39 What concerns you the most about Alternative 2 in Eastlake and South Lake Union?

Answered: 67 Skipped: 6,492

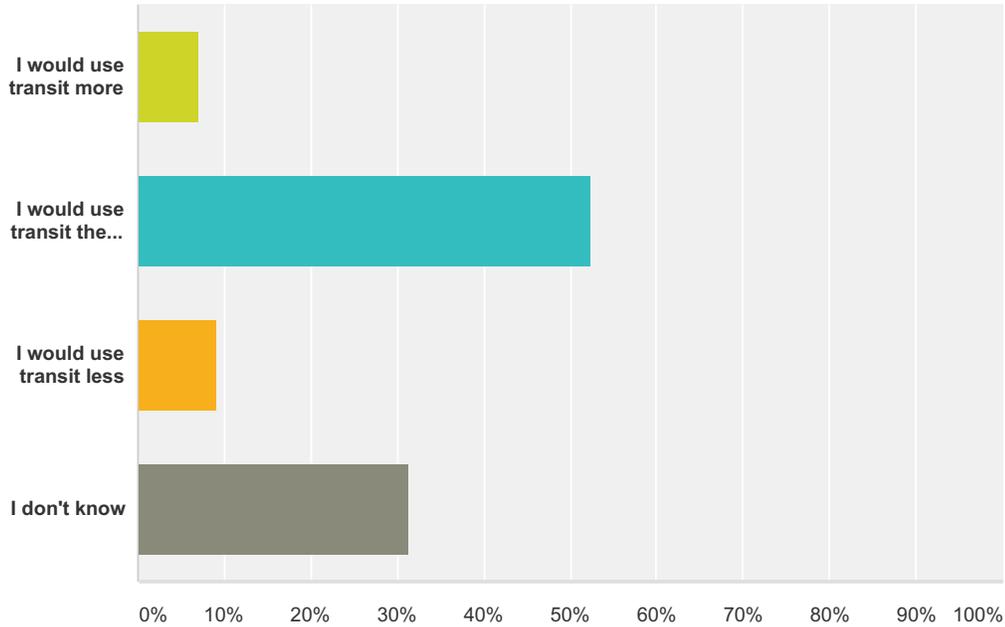

#	Responses	Date
1	...	4/2/2015 2:42 AM
2	I'm worried about the 25 going away, and being stuck with just one route (the 70) is concerning because what if that gets cut in the future? Then I would be out of luck.	3/31/2015 9:29 PM
3	Benefits outweigh negatives.	3/31/2015 2:43 PM
4	SLU and U District need a good continual connection.	3/30/2015 9:57 PM
5	Generally, I have concern for any changes from Metro current service, UNLESS THERE IS AN INCREASE/IMPROVEMENT OF SERVICE (additional routes, frequency & buses). ANY PLAN THAT DELETES ROUTE 43 IS UNACCEPTABLE. ANY PLAN THAT REDUCES SERVICE TO ALL NEIGHBORHOODS, INCREASES WALK & WAIT TIME TO/FOR BUSES IS UNACCEPTABLE. Living in the west edge (7th to 8th Ave NE, NE 45th St to NE 47th St) of the U-District, using Light Rail is not really an option I will consider except for novelty from time to time or if going to SeaTac, which I never do. Both Alternatives appear to reduce service to my area of the U-District. I go to the Group Health area of Capital Hill (I call East Capital Hill) 2-4 times a week. Deleting route 43 or its current frequency will be a burden for me. Using route 48 & 8 increases walk time 10 min and wait time 10-15 min (I've tested it the past 2 weeks). It takes me an average of 20 min of additional time from leaving my home to reach my destination in the Group Health area.	3/30/2015 2:43 PM
6	No direct service from eastside.	3/30/2015 9:56 AM
7	does not split Route 8	3/30/2015 7:33 AM
8	Missed opportunity to connect this vital, growing area (with an abysmal SOV commute rate) to the rest of the city.	3/29/2015 5:27 PM
9	Unknown.	3/29/2015 4:28 PM
10	it deletes my route, which stops right in front of my door.	3/27/2015 8:19 PM
11	NOT SURE	3/27/2015 6:36 PM
12	deletion of route 66	3/27/2015 2:54 PM
13	not sure	3/27/2015 2:05 PM
14	Longer wait times, less direct connections	3/27/2015 1:24 PM
15	n/a	3/27/2015 1:17 PM
16	Loss of frequency	3/26/2015 4:45 PM
17	Busses are already packed leaving SLU in the evenings to go north; if routes get less frequent, it will make everyone's commutes impossible and will probably lead to more people driving.	3/26/2015 4:39 PM
18	I have concerns about other aspects of alternative 2 that would prevent me from ever reaching Eastlake or SLU	3/25/2015 4:41 PM
19	The elimination of route 66x would impact my travel from the UW to SLU	3/25/2015 2:13 PM
20	na	3/25/2015 1:33 PM
21	The reduction of connections to north seattle.	3/22/2015 10:53 AM
22	the 70s are so crowded.	3/21/2015 12:38 PM
23	that I will lose a direct route between Eastlake and downtown and will be forced to transfer.	3/20/2015 1:28 PM
24	Probably wouldn't use it ever (kind of like now).	3/19/2015 6:03 PM
25	The longer wait times for my rides.	3/19/2015 10:05 AM

26	If it removes the 70, I hate that.	3/19/2015 9:43 AM
27	The 66 goes away The majority of ridership between the UW and SLU already has private shuttles. They don't need the short distance frequency. Commuters from further north have really poor connections under the new plan particularly with moving routes to Roosevelt. Walking down from Eastlake from the 66 - when it runs- is a long scary haul in on dark winter mornings. this isn't an improvement at all.	3/19/2015 8:48 AM
28	Do the powers-that-be who make decisions actually partake in public transportation daily? To actually see how frustrating everyday commuters get dealing with the 'patch work' planning on how to resolve the lack of foresight?	3/19/2015 8:20 AM
29	na	3/18/2015 4:27 PM
30	Keep 70	3/18/2015 3:27 PM
31	not much.	3/18/2015 1:42 PM
32	For the routes I use - the alternatives aren't really different from each other.	3/18/2015 11:35 AM
33	Removing 66 is the wrong thing to do.	3/17/2015 12:06 PM
34	Service infrequent	3/15/2015 8:36 PM
35	Where is the list of disadvantages?	3/14/2015 3:09 PM
36	deletion of route 66 takes away an existing local route that I use regularly. revision to route 64 (to bypass downtown) takes away a part of an existing route that I use occasionally - although I usually use the Boren Avenue stops.	3/13/2015 4:07 PM
37	Any reduction of frequency in these areas.	3/13/2015 7:48 AM
38	Everything	3/12/2015 7:44 PM
39	Roundabout bus routes that are forced to incorporate the new Link Light Rail bus stop.	3/12/2015 10:44 AM
40	Are there any changes here in alternative 2? SLU is so full of people who commute in and out and they are STILL waiting for metro and ST to catch up and provide service and maybe even GOOD service to them. Maybe add some bus only lanes in SLU and you may find a lot more bus riders and improved on-time performance.	3/11/2015 11:50 AM
41	Everything	3/11/2015 10:48 AM
42	Everything.	3/10/2015 1:32 PM
43	Loss of the #25 route.	3/9/2015 4:31 PM
44	More frequent and reliable service is needed for Route #8	3/9/2015 1:34 PM
45	I don't see much value in alternative 2; too conservative.	3/8/2015 10:05 PM
46	I don't travel to Eastlake	3/8/2015 5:13 PM
47	loss of the 66	3/8/2015 3:13 PM
48	Still too much service from U District to Downtown, take the Link.	3/8/2015 12:39 PM
49	loss of the 64 in dt	3/8/2015 12:01 PM
50	nothing is actually being improved for riders from the Eastside to SLU.	3/8/2015 8:48 AM
51	Surface rail transit is not scheduled to be completed between Fred Hutchinson and UDist. Change of 66 routing.	3/7/2015 8:06 PM
52	overall seems fine but is has to have parking and be safe....	3/7/2015 2:26 PM
53	What was alternative 2? You really should have restated it on this page, I don't know how you expect us to just remember it. We need rapid, reliable service (same bus comes every 5-7 minutes at rush hour) between northeast Seattle and Queen Anne or South Lake Union.	3/7/2015 8:55 AM
54	Lack of additional service over today's conditions means SLU is almost impossible to access via transit.	3/7/2015 7:55 AM
55	no improvements	3/6/2015 10:53 PM
56	Everything	3/6/2015 8:28 PM
57	too much time waiting for buses	3/6/2015 7:56 PM

58	Not enough service	3/6/2015 6:56 PM
59	deletion of one of my most frequently used routes! (66)	3/6/2015 5:42 PM
60	Nothing	3/6/2015 4:23 PM
61	Too geographically distributed and doesn't prioritize SLU connectivity.	3/6/2015 3:37 PM
62	Getting through the Mercer Mess.	3/6/2015 3:09 PM
63	No 66 at all, no access to and from Northgate/north end from Eastlake/SLU.	3/6/2015 2:58 PM
64	Less service	3/6/2015 2:52 PM
65	It is not an improvement on current service.	3/6/2015 10:45 AM
66	No route to South Lake Union from Eastside.	3/6/2015 7:58 AM
67	It isn't Alternative 1.	3/6/2015 12:19 AM

Q40 How would your use of transit be affected if Alternative 2 were implemented in Eastlake and South Lake Union?

Answered: 539 Skipped: 6,020

Answer Choices	Responses
I would use transit more	7.05% 38
I would use transit the same	52.32% 282
I would use transit less	9.28% 50
I don't know	31.35% 169
Total	539

#	Why?	Date
1	I officially hate this question...	4/2/2015 2:45 AM
2	More direct connections to my home in the Eastlake neighborhood.	3/31/2015 9:29 PM
3	I am Transit-dependent.	3/31/2015 2:43 PM
4	Same	3/31/2015 12:27 PM
5	It doesn't change the routes I use.	3/31/2015 12:22 PM
6	effects on route 25	3/30/2015 10:16 PM
7	same	3/30/2015 7:34 AM
8	The streetcar is a good example. I'll ride it if it happens to be coming soon, but if I have to wait more than about 5 or 10 minutes, I just walk. In instances where transit makes me wait too long, I just drive, even though I really dislike driving.	3/29/2015 10:50 PM
9	QUESTION ALREADY ANSWERED	3/27/2015 6:37 PM

10	no details given	3/27/2015 2:06 PM
11	I depend on mass transit for my livelihood and social life	3/27/2015 1:53 PM
12	always (tho I haven't answered this box each time) use transit when convenient (I avoid car and having to park it)	3/27/2015 8:15 AM
13	Elimination of route 66x would affect my travel between the UW and SLU	3/25/2015 2:13 PM
14	Reliability (or lack of improvement of) the 8.	3/20/2015 8:17 PM
15	You didn't provide a list of specific alternative 2 options for the region. It is hard to know how one's transit will be affected if one doesn't tell people how one's transit use will be affected.	3/20/2015 1:40 PM
16	Still have to take bus downtown for work.	3/20/2015 1:28 PM
17	I don't own a car, so I don't have any other choices if I want to go longer distances.	3/19/2015 2:21 PM
18	Even though wait times are longer, I prefer to use metro for commuting.	3/19/2015 10:05 AM
19	I don't know what it would do to the 70	3/19/2015 9:43 AM
20	ease	3/18/2015 4:27 PM
21	No transfers, and no need to walk a long way to light rail, to get where I need to go.	3/18/2015 1:05 PM
22	Changes don't affect me	3/17/2015 7:40 PM
23	The specific items you list here are irrelevant to me.	3/17/2015 4:45 PM
24	I would use transit less because the 66 is my main bus route.	3/17/2015 12:06 PM
25	i often skip activities in south lake union because direct, fast bus service between there and mapleleaf does not exist.	3/17/2015 8:58 AM
26	Nothing is changing here I don't think	3/16/2015 3:47 PM
27	I use transit no matter what	3/15/2015 8:36 PM
28	Still have to use the 8.	3/13/2015 6:42 PM
29	I don't drive, so with reduction of local service (aka "consolidation") I don't have other choices, except walking more, transferring more, and taking longer to get everywhere.	3/13/2015 4:07 PM
30	Minimal changes	3/13/2015 3:48 PM
31	This plan seems to offer no benefits or drawbacks for me.	3/13/2015 10:09 AM
32	Reduction in frequency of 25 and local stop Eastlake services would mean I would use my car more.	3/13/2015 7:48 AM
33	Improve 12th Avenue Service, current Metro destinations in CD/Cherry Hill are practically useless. I choose to walk or other transit modes 99% of the time.	3/12/2015 7:44 PM
34	Use it the same, but it may not be as convenient	3/12/2015 12:48 PM
35	I would still use buses the same amount. It's my only means of getting to work.	3/12/2015 10:44 AM
36	Because my service levels aren't directly affected on my work-commute. Overall, random or supplemental rides don't account for a sustainable nor forecastable amount of transit use on my part.	3/11/2015 11:50 AM
37	I would not use it.	3/11/2015 10:48 AM
38	Not sure what that alternative entails.	3/11/2015 8:50 AM
39	No improvements.	3/11/2015 8:37 AM
40	It would provide the same inadequate, infrequent service as today.	3/10/2015 1:32 PM
41	The #25 route is being eliminated.	3/9/2015 4:31 PM
42	Maintains my current commute route.	3/9/2015 1:34 PM
43	because the 66 would be deleted	3/8/2015 3:13 PM
44	Connections have been dis-jointed at north UDist on 66 to get to Northgate.	3/7/2015 8:06 PM

45	has to have parking and be safe....	3/7/2015 2:26 PM
46	What was alternative 2? You really should have restated it on this page, I don't know how you expect us to just remember it. We need rapid, reliable service (same bus comes every 5-7 minutes at rush hour) between northeast Seattle and Queen Anne or South Lake Union.	3/7/2015 8:55 AM
47	Same as today's conditions wouldn't offer travel time savings over bike	3/7/2015 7:55 AM
48	no real changes, aside from more 70s	3/6/2015 10:53 PM
49	It's no different	3/6/2015 8:28 PM
50	deletion of one of my most frequently used routes!	3/6/2015 5:42 PM
51	Don't have a frequent use for transit in SLU.	3/6/2015 4:59 PM
52	Direct commute	3/6/2015 4:23 PM
53	44/5/E & D are my most used routes now and in the imediate future.	3/6/2015 3:22 PM
54	Commuting by metro would be much more difficult.	3/6/2015 2:58 PM
55	No car	3/6/2015 2:58 PM
56	Not a regular rider in this area.	3/6/2015 10:45 AM
57	No significant changes.	3/6/2015 8:52 AM
58	Same transit. Same travel pattern.	3/6/2015 12:19 AM

Q41 How would you improve Alternative 2 in Eastlake and South Lake Union – keeping in mind that the goal of this network concept is to keep more coverage while still taking advantage of connections with new light rail service?

#	Responses	Date
1	See previously, I did not read option 2, I just find option 1 ridiculous.	4/2/2015 2:45 AM
2	Look for places where the stated concerns of "experts" in specific problem areas can be mitigated; hybridize where it makes sense to do so to keep the service human.	3/31/2015 2:43 PM
3	don't decrease freq of line 25	3/30/2015 10:16 PM
4	SLU and U District need a good continual connection.	3/30/2015 9:57 PM
5	Generally, I have concern for any changes from Metro current service, UNLESS THERE IS AN INCREASE/IMPROVEMENT OF SERVICE (additional routes, frequency & buses). ANY PLAN THAT DELETES ROUTE 43 IS UNACCEPTABLE. ANY PLAN THAT REDUCES SERVICE TO ALL NEIGHBORHOODS, INCREASES WALK & WAIT TIME TO/FOR BUSES IS UNACCEPTABLE. Living in the west edge (7th to 8th Ave NE, NE 45th St to NE 47th St) of the U-District, using Light Rail is not really an option I will consider except for novelty from time to time or if going to SeaTac, which I never do. Both Alternatives appear to reduce service to my area of the U-District. I go to the Group Health area of Capital Hill (I call East Capital Hill) 2-4 times a week. Deleting route 43 or its current frequency will be a burden for me. Using route 48 & 8 increases walk time 10 min and wait time 10-15 min (I've tested it the past 2 weeks). It takes me an average of 20 min of additional time from leaving my home to reach my destination in the Group Health area.	3/30/2015 2:44 PM
6	I feel like there should be some service along Mercer...	3/30/2015 2:30 PM
7	Add keep the route 311 from concept 1.	3/30/2015 9:57 AM
8	split Route 8; make it more like alternative one	3/30/2015 7:34 AM
9	Unknown.	3/29/2015 4:29 PM
10	Connect Capitol Hill and northwest Seattle through Lake Union.	3/28/2015 9:57 AM
11	COMBINE ASPECTS OF THIS WITH SOME ASPECTS IN ALTERNATIVE 1	3/27/2015 6:37 PM
12	Bus lanes	3/27/2015 5:36 PM
13	retain current route 66 - this is coverage, not duplication	3/27/2015 2:58 PM
14	need more details to decide	3/27/2015 2:06 PM
15	Shorten wait times, provide better connections	3/27/2015 1:25 PM
16	n/a	3/27/2015 1:17 PM
17	not sure	3/27/2015 8:15 AM
18	Direct connect SLU and Northgate/Lake City.	3/26/2015 10:01 AM
19	na	3/25/2015 1:33 PM
20	Keep schedules the same all day, every day. Peak/weekend changes are extremely confusing for riders.	3/21/2015 12:38 PM
21	I would improve Alternative 2 by making it look much more like Alternative 1.	3/20/2015 8:17 PM
22	Direct route between Eastlake and downtown.	3/20/2015 1:28 PM
23	I have no particular suggestions for improvement.	3/19/2015 7:05 PM

24	Make it more like Alternative 1.	3/19/2015 2:21 PM
25	One direct local route from further north in north Seattle to SLU - NOT Eastlake. Actually to SLU, not as far away as you can put it without crossing I-5! Its a half mile walk! The light rail doesn't go where I am going at all.	3/19/2015 8:48 AM
26	na	3/18/2015 4:27 PM
27	Keep 70	3/18/2015 3:27 PM
28	Add Carpool lane for buses between SR520E and I-405N. The wait times to get on I405N from SR520E are so long. It's faster to go to the South Kirkland P&R and take surface streets during peak hours.	3/18/2015 2:40 PM
29	service SLU in an east west direction and not just at Denny.	3/18/2015 1:42 PM
30	#70 should cross at 50th or 45th to make walking to anywhere in the U District viable, and thus avoid having to transfer to get north in the U District.	3/18/2015 1:05 PM
31	I'm not sure.	3/17/2015 7:40 PM
32	move route 8 to Mercer in SLU...	3/17/2015 12:59 PM
33	Add more frequency to 66 and 70. Connect Phinney Ridge and Greenwood to Eastlake and SLU in a single route.	3/17/2015 12:06 PM
34	Use the newly-revamped Mercer as a connector between South Lake Union and Lower Queen Anne.	3/16/2015 1:00 PM
35	Expand light rail, expand rideshare programs	3/15/2015 8:36 PM
36	Retail express bus service from the University District Retail Core to downtown along Eastlake. Access only on I-5 is not reliable and will only get worse.	3/14/2015 3:09 PM
37	More frequent service on Eastlake between downtown and the U-District.	3/13/2015 3:48 PM
38	Increase frequency of local Eastlake services and maintain 25 at least at current service level.	3/13/2015 7:48 AM
39	Improve 12th Avenue Service, current Metro destinations in CD/Cherry Hill are practically useless. I choose to walk or other transit modes 99% of the time.	3/12/2015 7:44 PM
40	Make sure there's enough service connecting Eastlake (Lake Union area) to downtown Seattle (including all the way to Pioneer Square) and Eastlake to U-district. The 70 may accomplish this (if it extends to Pioneer Square / International District), but it's hard to tell if this will help the capacity. It seems like both the 70 and 66 are in high demand during peak times, and not just for people traveling through the Eastlake area - lots of people get off at the major stations (Lynn St, Harvard, etc.) along Eastlake (Lake Union area).	3/12/2015 12:48 PM
41	Keeping the route 70's schedule frequent when needed most.	3/12/2015 10:44 AM
42	Add actual service to SLU. A few more 70's does not a solution make. This neighborhood will have 70,000 amazon employees in the next 5 years as per their own published projections. They're halfway there now, and it is BAD. Let alone all of the other bio, tech and biotech that are popping up around it as well as new residential in SLU, this is potentially the most underserved part of the city, and it is surrounded on all sides with great service. this is a travesty and a complete oversight on metro and ST's part. This big service change absolutely MUST address this complete transition of the SLU neighborhood from 100's of employees, to 100,000's of employees.	3/11/2015 11:50 AM
43	I would improve it, by leaving it as is.	3/11/2015 10:48 AM
44	Keep the #25 bus.	3/9/2015 4:31 PM
45	More frequent and reliable service on Route #8.	3/9/2015 1:34 PM
46	establish direct bus connections from eastside to major hospitals in downtown seattle	3/9/2015 5:53 AM
47	Fewer routes, run more frequently.	3/8/2015 10:05 PM
48	keep the 66!	3/8/2015 3:13 PM
49	keep the 64 through dt	3/8/2015 12:01 PM
50	Keep 66 connection to Northgate; put 66 back in service to Colman Dock after seawall construction is finished.	3/7/2015 8:06 PM

51	The trick about SLU is that the new Rail service won't really help this area as much at all, because the stations aren't relevant. Westlake is too far south for many Eastlake & Fairview riders, they won't want to ride a street car and then the train. Also if they have to get on the train at Westlake, its only worth it if they're going longer haul rides- ie Airport, Bellevue, or Northgate. I doubt people will want to go out of their way walking to get to a train that takes them only 1 stop to UW. Unless there's Rail at Convention Place or Further North at Eastlake, eliminating any portion of Eastlake Service isn't helpful to anyone in that corridor. The train has to stop where people live for them to bother riding it. So far, the train doesn't appear to serve Eastlake very well so 66x & 70 at minimum should be kept the same. This neighborhood shouldnt be sacrificed and cut out of service to Downtown & UW because the train came in. The train is meant for longer rides than SLU. That's why buses are needed on Eastlake to pick up the shorter rides, ie to Downtown or International District, or to UW/Roosevelt. South Lake Union has a lot of people who ride shorter trips to save time most frequently, ie to Ballard, to Fremont, to UW, to Roosevelt, to Wallingford, Queen Anne, Capitol Hill, Downtown & SODO. They still need mobility, Night and Weekend Service, because they live inside the hub. As long as the new Rail coming in doesn't disrupt their needs to get to places outside SLU which are close by, these plans are fine.	3/7/2015 5:24 PM
52	overall seems fine but is has to have parking and be safe....	3/7/2015 2:26 PM
53	connect to the Seattle Center	3/7/2015 1:19 PM
54	What was alternative 2? You really should have restated it on this page, I don't know how you expect us to just remember it. We need rapid, reliable service (same bus comes every 5-7 minutes at rush hour) between northeast Seattle and Queen Anne or South Lake Union.	3/7/2015 8:55 AM
55	Make it more like alternative 1	3/7/2015 7:55 AM
56	Make route 8 travel on Mercer instead of Denny way in South Lake Union.	3/6/2015 10:46 PM
57	Reroute the 5 to Westlake (or possibly Dexter, but I'd prefer Westlake). A direct connection between Greenwood/Phinney and the heart of SLU would be highly valuable. Consider creating a new crosstown service along Boren. While this does not directly connect to Link, it would dramatically improve the connection between SLU and First Hill, which should be worth something. :)	3/6/2015 8:28 PM
58	minimize waits at transfer stations	3/6/2015 7:56 PM
59	Make it like 1	3/6/2015 6:56 PM
60	Keep 66 between downtown & eastlake as is!!	3/6/2015 5:42 PM
61	I would like some transit between SLU and Cap Hill more or less along the Mercer / Aloha spine. East-west connections in this area need to be enhanced.	3/6/2015 4:59 PM
62	Add service mid-day and evenings for express busses (311).	3/6/2015 4:23 PM
63	Keep the 66 running along Eastlake, or expand the 70 to go to Northgate Transit Center. Eastlake needs a bus route that goes all the way to the north-end - plenty of people commute up there.	3/6/2015 2:58 PM
64	Provide for some kind of peak connection to SLU ala the 311 in Alt 1.	3/6/2015 10:45 AM
65	Direct service to South Lake Union from the Eastside is needed.	3/6/2015 7:58 AM

8	Any routes stopping at Montlake freeway stop	3/31/2015 11:49 AM
9	40- this route often runs late and is often so crowded that no more folks can get on Northbound past Denny and Westlake until we are out of downtown. The one that is supposed to come at ~5:15pm is almost always absent and I end up catching teh next one at 5:30. The 18 and 17 southbound into downtown in the mornings are almost always packed beyond what can fit in the bus by the time these buses reach Market Street. 44-this bus is packed during rush hour when the UW is in session and the light at 45ht and Aurora is soo short it takes forever to get through there. Any thoughts to re routing through a different intersection or adding an express route with less stops?	3/31/2015 11:39 AM

Q44 What would you like to tell us about this route or these routes?

Answered: 1,435 Skipped: 5,124

#	Responses	Date
1	I do not know what would possess you to cut local service for the 26 & 28 in favor of express service, but if you do I remind you that those riders would instead catch the 40. I bring this up because the 40 is already beyond capacity on the vast majority of its runs. You will feel no greater hatred for metro than having to wait an hour and a half for a bus that is scheduled to run every 15 and you have actually already had three busses pass your stop by because they cannot fit another passenger. Except for the hatred you feel when you realize they will be forcing triple the bodies on the route without offering more frequent service because they wrongly and foolishly assume people will take an alternative route that does not service their area but runs at more reliable intervals.	4/2/2015 3:01 AM
2	Eliminating these routes would create a lot more foot traffic from the Kingsgate Park-n-Ride to the Totem Lake freeway stop. This would often slow the traffic on 116th, outside the Park-n-Ride, to allow pedestrians to cross the road, and, potentially, cause more accidents there. It could also create large lines of people at the freeway stop, where there is less room for them than at the Par-n-Ride.	4/1/2015 9:08 PM
3	The on time performance in 2015 seems to have been consistently bad. In midday mostly more than 10 min early, evenings almost always 15 to 20 min late. I'm trying to commute on this route with my kid but it's so unreliable I bike, or ends up driving instead. Get it together route 75.	4/1/2015 5:44 PM
4	I am staff at the UW so I work year round during the UW break times. I don't like the reduced service on the 373 during the times the UW is on break. I would hope the 373 service is not reduced more. I am too far north to catch a 73 express, without transferring. it's already a grind time-wise from 175th to 45th, so transferring is unappealing.	4/1/2015 4:25 PM
5	I'd like to understand the rationale for swapping bus routes between Dexter and Aurora.	4/1/2015 2:28 PM
6	The 252/257 routes have huge ridership. The buses are frequently 3/4 to completely full during peak commute hours. The Kingsgate P&R is always overflowing, with cars parked almost to the point of impeding clear traffic lanes. To willfully lose that ridership and force riders to use routes that would require a transfer is irresponsible. I have used the Link from Tukwila Station to downtown Seattle before. Although the ride is comfortable, it is by no means FASTER than the bus when the roads are not bogged down with traffic. I have my suspicions that the promised 8-minute ride from University to downtown would be longer than that, and that the Link would be so crowded as to make the ride extremely uncomfortable.	4/1/2015 1:55 PM
7	This new routing for the 8/28 will be amazing. Please please please make this happen! Even if the NIMBY mobilization forces mostly Alternative 2, splitting route 8 and rerouting through Pike/Pine is a great idea for increased connections throughout Capitol Hill and the Central District.	4/1/2015 1:16 PM
8	I need the 5am 43/44 route to U-District/Ballard from Capitol Hill in order to get to work by 6am in the morning	4/1/2015 1:03 PM
9	This route either needs to be made more efficient (for example, making the first stop outside of the neighborhood the light rail station) or scrapped. I see the bus come through the neighborhood in the evening or in the morning and it is often empty or maybe has one person on it. It seems that the primary reason it is kept is because of Seniors in the neighborhood, but it seems that King County Metro Access (or whatever the elderly service is called) is a better option for this relatively small population, especially given the cost of the route. Given the profile of our neighborhood, if the route were more efficient, it may get used more frequently, however if that's not feasible than it is not worth the resources.	4/1/2015 11:57 AM
10	This route is so meandering that it has almost no value as a way to get from Laurelhurst to downtown. The ridership is very low, at least from the UDistrict to Laurelhurst. It really demonstrates the inefficiency of the current bus routes.	4/1/2015 10:35 AM
11	It would be nice if you could travel from Ballard/Fremont neighborhood all the way across town (Seattle Children's Hospital) / Magnuson Park area without transferring bus lines. The 44 is the main bus-line east-west and it is always extremely crowded. If there were other options, without having to transfer, I would use the metro system much more.	4/1/2015 10:27 AM
12	These routes are very crowded during peak hours.	4/1/2015 9:13 AM

13	Maintain existing routing to downtown Seattle rather than forcing users to go to UW. ...also, make this a light rail line by coordinating with Sound Transit. Only then will it make sense to route to UW for me.	4/1/2015 7:38 AM
14	Start the runs earlier. One of your alternatives suggests the 48 will start at 5 instead of the current 5:54 am from Loyal Heights. I believe there are others who would ride at earlier times rather than drive.	4/1/2015 6:10 AM
15	I would like a route from Queen Anne (Seattle Center) to University District going somewhere along East Lake	3/31/2015 11:50 PM
16	Please see previous comments and suggestions. Why did you not list the 38 or 9X?	3/31/2015 10:53 PM
17	frequent service both mid-day and commute times.	3/31/2015 9:57 PM
18	I enjoy having all these routes stop (on varying schedules) in the Eastlake neighborhood. I always have an option and don't have to rely on just one route. Having just one bus route is worrisome to me as it may get changed in the future, the stops condensed, or its route changed. Putting all my eggs in one basket makes me nervous about the future of direct bus access to my neighborhood in Eastlake.	3/31/2015 9:31 PM
19	We need more frequent service and bigger buses in all routes passing Children's Hospital at rush hour. These buses are crammed, and that's even with standing room. (I.e., standing room is crammed.) If you discontinue routes from 15th Ave. NE at the junction of Northgate Way/105th St., you will stop serving a LOT of people who rely on those routes for work, especially as both parking and service at the Northgate P&R are overused. Same goes for routes serving NE 105th near the junction of 15th Ave. NE (yes, there are both). And BTW, in case this ill-conceived survey isn't going to give me a chance to say so later, PLEASE fix and maintain the bike racks. Many simply do not work.	3/31/2015 5:47 PM
20	Moving 31/32 will leave a huge part of Fremont/Wallingford without an easy way to get to UW.	3/31/2015 4:57 PM
21	More frequent	3/31/2015 4:56 PM
22	I am an older citizen taxpayer who greatly depends on the 43 route from montlake to capital hill where my medical care is With your proposed route changes I would have no way to get to capital hill from montlake.	3/31/2015 4:53 PM
23	Please keep #12 and #43 buses running to service North Capitol Hill (especially 12 all the way to Galer)	3/31/2015 4:53 PM
24	I'm writing to express my disapproval in any alteration of the current 12 route. It's a vital link for working parents with children at Stevens Elementary, St. Joes and Holy Names to downtown Seattle. Please keep the 12 as is. Eric and Tina Anderson 931 20th Ave East	3/31/2015 4:48 PM
25	Route 25 is needed for access in Montlake and Portage Bay given the topography; I know a number of people who depend on this bus who are physically incapable of walking to the alternatives. This route used to have more frequent service years ago (pre I-695) and it has already been reduced to minimal levels. Route 8 will remain unreliable due to congestion on Denny that is likely to get worse. Adding frequency would help but it's often faster to go from South Lake Union to Capitol Hill on foot or via downtown than it is to take route 8. I'm not sure what can be done about that short of a subway, gondola or other major project. Perhaps after the street grid is reconnected across Aurora at John, Thomas and Harrison we'll have some new routing opportunities. The portion of Route 43 between UW station and Broadway is needed to enable access from Montlake to the core of Capitol Hill, and the light rail station and other connecting routes without having to make an additional transfer at 23rd/John. My use of transit would drop precipitously if this route is eliminated. Relying on transfers at the busy destination-free intersection of 23rd/John to the unavoidably unreliable route 8 to connect Montlake and Capitol Hill does not make sense. Perhaps trolley Route 12 could be modified to directly connect 19th Ave. to the light rail station at Capitol Hill via Thomas/John, rather than eliminating it. Route 12 provides access to Interlaken Park as well as institutions and a growing number of apartments and businesses along 19th Ave.	3/31/2015 4:43 PM
26	This route served as a valuable connection between my neighborhood and First Hill/Broadway.	3/31/2015 4:43 PM
27	The NB 48 always arrives late in the University District during the afternoon/evening commute. Often when a bus finally arrives, there are 2-3 in quick succession. Or the bus is so full, the driver will only let a few people on or none at all. The elimination of the 48X severely increased crowding and delays in service. I think effectively cutting the route in half at the U District as proposed in Alternative 1 may help.	3/31/2015 4:41 PM
28	Please continue to offer these routes, increasing frequency if possible.	3/31/2015 4:32 PM
29	Please maintain routes #25 and #43.	3/31/2015 4:19 PM
30	If the 25 was to be removed, I would have no bus service in my neighborhood	3/31/2015 4:13 PM
31	Really miss having the bus available during the day - even every 30", and on Sundays. Very limited service in Ravenna area and these changes cut our legs out from under us. Even the rush hour buses are severely limited and run right before or after 74x (which is always crammed).	3/31/2015 4:11 PM

32	Removing the 12 would be devastating to our North Capitol Hill area. Old people, and people pushing strollers and carrying babies, simply cannot climb up to 15th or walk to Thomas.	3/31/2015 4:09 PM
33	Please do not cut this route. Alt 1 makes it a lot harder to get where i need to go. It will be more walking and waiting and scrambling. This city needs more East/West travel options as it is. Cutting the ones we have is not going to make things easier or better. There cannot be zero options between 65 and 125th. That's just not reasonable.	3/31/2015 3:58 PM
34	Taking away the 12 on 19th would be catastrophic to a wonderful neighborhood. Several of us mentioned that we would then have to walk down to 23rd to the 43 (downhill that way!) and then found out the 43 would also vanish.	3/31/2015 3:58 PM
35	Please don't cancel. The morning off peak 73 is the only direct shot I have from Jackson park to south lake union.	3/31/2015 3:47 PM
36	I live in Capitol Hill and commute to UW every day. If the light rail from Capitol Hill to Husky Stadium ran extremely frequently (every 5-10 mins) that would make my commute so much faster and easier and convenient! It would also be good to have continued service at night and on weekends, maybe only 20 minutes in between trains.	3/31/2015 3:43 PM
37	Especially since Route 76 is back at North Base, I would love to see it provide service farther north on 35th Avenue NE than it currently does. Even 5 more blocks would help me personally.	3/31/2015 3:38 PM
38	Coming from Downtown to Capitol Hill, the 49 is extremely unreliable and almost always late, especially during rush hour times. These delays should be considered when writing timetables.	3/31/2015 3:34 PM
39	This is a VERY important route for all riders coming from the South. This bus route not only accommodate students but it also for UW staff, faculty and patients ride this bus. It would be great if service was provided year round...meaning also when the students are on break. UW hospital and school never completely close down.	3/31/2015 3:13 PM
40	43 - please keep this route. Both alternatives reduce service along 23rd, which doesn't seem fair. I rely on this bus and many others do too. 8 - pushing riders onto this bus isn't a good idea. The 8 is packed and gets stuck in traffic. It also doesn't serve the retail core of downtown.	3/31/2015 2:01 PM
41	this route is going to be missed. It should be maintained for peak hours.	3/31/2015 1:37 PM
42	Please keep it. Removing service will cause transit times from the area between 19th and 24th Avenues to downtown to become prohibitively long due to the walking distance and/or number of transfers required.	3/31/2015 1:15 PM
43	The 8, 12, 43, and 48 are the routes I use most often. Living in North Capital hill there is a need for a direct way to get to downtown and the U and to get to the hospitals in the area (as the 9X would serve). Without the 43 there would be no way to get from the North Capitol Hill neighborhood to downtown without shuttling to the Light Rail- this is not convenient and could promote individuals to drive instead. I take the 12 every morning, however as long as it is replaced with the 9X it would be fine (and maybe an improvement). The 8 is never on time coming from SLU, if there was a way to improve that it would benefit many.	3/31/2015 1:04 PM
44	Please don't move the 73 over to Roosevelt.	3/31/2015 1:00 PM
45	I do not believe that it makes any sense to move the 31 and 32 from Stone Way to Wallingford Ave. Stone Way currently has three giant multi-unit apartment buildings under construction, which will be full of potential new transit riders. It is in general a street in transition and will likely have even more residents as time passes. Getting to the U District will always be important for people who live on and just west of Stone Way. Wallingford Ave., on the other hand, is a more residential street which is at building capacity and does not offer the same number of new transit riders to the routes.	3/31/2015 12:52 PM
46	Please maintain this route. Montlake needs access to Capitol hill and Downtown.	3/31/2015 12:48 PM
47	Frequent peak service is the most important aspect of this route, allowing residents of NE Seattle to reach Downtown Seattle and back home with relatively little hassle.	3/31/2015 12:38 PM
48	Please keep the 72 for one bus connection between Lake City and the U District!	3/31/2015 12:36 PM
49	I use this route frequently, and it seems to be very well-used at peak hours in both directions. Many people start and end rides on the 23rd Ave. corridor. Seems like a major loss to lose that frequent direct service to downtown from that area. I would hate to replace a direct route with a transfer.	3/31/2015 12:25 PM
50	I'm glad you're doing something to improve the reliability of Route 8.	3/31/2015 12:22 PM
51	The current route 43 perfectly suits my needs. Please do not discontinue or reduce the frequency of service!	3/31/2015 12:12 PM
52	This route is heavily used even mid-day. It is often standing room only. University and high school students use it heavily. Why is it being taken out of our neighborhood.	3/31/2015 12:10 PM

53	Cutting 17's service has resulted in more frequent private vehicle usage. It was a very short sighted move.	3/31/2015 12:02 PM
54	Please don't get rid of route 73. This is my major reliable connection to the University District from Pinehurst. Also, it would be great to have the 372 run on weekends as it is a quick alternative to get to that area.	3/31/2015 11:54 AM
55	I use the Montlake freeway stop five days a week to commute to downtown Seattle and will no longer be able to do so if these routes no longer stop there.	3/31/2015 11:49 AM
56	They should have all-day service instead of just peak!	3/31/2015 11:43 AM
57	71- I have had to catch this occasionally to go up to Northgate and often by the time it gets to the Convention Center it is full and I cannot board. Love how fast this gets between Northgate & downtown though!!	3/31/2015 11:39 AM
58	more frequent buses in the evening as always running late and can make less frequent stops during mid-day (possibly) to help with cost and allowing more buses in evening. Very full route and buses always packed.	3/31/2015 11:38 AM
59	It's regularly full No other routes directly connect Redmond to points north of Green lake Riders don't live near the current light rail area Riders aren't heading into the current light rail area Why delete a bus that's full and doesn't have a replacement?	3/31/2015 11:28 AM
60	The 16 is really a dangerous bus to ride. They way the drivers squish people in, if there were any sort of collision, Metro would be in real trouble. Lots of people would get hurt. Other times I have to be late to work due to already crowded buses passing me by.	3/31/2015 11:12 AM
61	Need better connections for buses coming from North King County, Snohomish county and Eastside (125th & Lake City Way) to Children's & UW	3/31/2015 11:04 AM
62	Route 76 drives right by South Lake Union. It would be a simple fix to have this Southbound route exit the express lanes at Denny/Stewart, make one stop near REI, and then head to the Convention Center. There should be a similar option Northbound. Also, this route spends a lot of extra time on the Northbound route when it exits the I-5 express lanes and makes two stops in the University District. There are so few people that these two stops help and it adds about 10 minutes to this route during rush hour.	3/31/2015 11:04 AM
63	The 43 serves North Capitol hill. A neighborhood. It's a direct route downtown. (the 48 does not go downtown). The neighborhood pays taxes. The neighborhood is basically cut off geographically by the 520 and the montlake bridge from the lightrail station. It's not the tax paying neighborhoods fault the UW complex with high convenience (UW funded by taxpayers) got the lightrail station (with no tax paying neighborhoods directly around it.) The tax paying neighborhoods of N Capitol hill are not served by a light rail station miles from their homes. The 43 is often blocks from our homes and very easily utilized. The light rail station is exactly the opposite of the 43. Waiting for the 48 to take me through the montlake/520 bridge mess to get on a rail line makes little sense. If the 43 is cut I WILL drive downtown almost exclusively whereas currently I take the bus downtown every chance I can. Let the university folks take the light rail and keep the 43 for the tax paying neighborhoods please. The 545 is a fail-safe for the 43. I suppose if you cut the 43 I would take the 545 more - unless, of course, its hours are cut as well. It's hard to tell from the data.	3/31/2015 10:52 AM
64	I've said this already but I want to be clear how important this service is for our neighborhoods along 15th Ave NE. We have a lot of apartments, a lot of density, and a mixture of incomes that make transit very valuable. We've also got specific needs like an SHA senior housing building where adding extra transfers complicates the trips significantly.	3/31/2015 10:40 AM
65	I miss the 25 route from Mercer Island . used to take it. now usually have to drive due to increased commute time.	3/31/2015 10:30 AM
66	I like the idea of switching the 48 to the 45 between Greenwood and the UW, as this would decrease wait times during certain peak hours (evening, I believe). I'm also pleased to see the hours extended to 1am.	3/31/2015 10:25 AM
67	These routes provide accessible, convenient service from the neighborhood to Downtown and/or the U district.	3/31/2015 9:42 AM
68	For those who take the bus, keeping the route close to where people live is important, especially for old people and young people with children.	3/31/2015 9:32 AM
69	This route serves a lot of people on a popular corridor, 24th/23rd Avenue. Doing away with this route and forcing people to ride the light rail will make it impossible for them to travel the corridor. School kids from Holy Names and anyone else who lives between the UW light rail station and the Capitol Hill station on Broadway will be shut out from riding transit.	3/31/2015 9:20 AM
70	Don't change it.	3/31/2015 9:01 AM
71	Even though it is currently at very low frequency, it still allows important access... don't eliminate this line.	3/31/2015 7:33 AM

72	I like how frequent they are, one every 10 minutes. I transfer from the light rail to these routes to get to work and from one of these routes to the light rail to get home. When the extension opens next year, I probably won't be able to use them as often since they don't go in the direction of the UW station but hopefully I'll still be able to get to work, which is on the intersection of NE 64th St and 12 Ave NE in the Roosevelt neighborhood.	3/31/2015 7:21 AM
73	Keep current route and schedule	3/31/2015 6:47 AM
74	I'm worried about the clarity of connections on the proposed replacements for 71 (route 71/16.) How do transfers work etc? (Timed transfers??)	3/31/2015 2:05 AM
75	Why is route 11 chronically late - even on weekends? Why is route 12 chronically late during evening rush hour? Does it need to travel a block on 1st Avenue - is that the source of the delay? Or is it getting stuck headed toward downtown in the all the traffic merging onto I-5 from 6th & Madison?	3/30/2015 10:32 PM
76	Please return route 25 to weekend service as well. Route 43 is critical to Montlake as it is, especially as last resort when 25 not running.	3/30/2015 10:18 PM
77	These are th routes I use to transit between work and home when I need to take the bus all the way to Seattle Childrens.	3/30/2015 10:16 PM
78	Keep as is or perhaps drop the frequency	3/30/2015 10:01 PM
79	Ensure these routes provide enough reach/frequency to branch out from the train station to/from downtown. I worry that too many of these being removed will make it tough to get to the train station/from the train station (on Broadway) and over to North Capitol Hill.	3/30/2015 9:59 PM
80	The 12 ends at the public Stevens Elementary school. Many families live outside the school-bus zone (which is very small), and parents rely on the 12 both to take their kids to school, and to get downtown from school after dropping kids off.	3/30/2015 9:39 PM
81	I currently use routes 10 and 12 from north Capitol Hill to downtown. Route 10 provides convenient access to the north end of downtown, while route 12 serves the south end. Elimination of route 12 makes it less feasible to take transit to south downtown (financial district, civic center, public services.) Find a way to continue route 12 on 19th Ave, even if it is only weekday service, and/or requires a transfer to get downtown. I support the Alt. 1 concept in general, but eliminating service along 19th would be a negative for this urban neighborhood. (I think it's worthwhile to compare route 12 to route 47, which was eliminated last year and is now being restored. In both cases, it looks like a short walk to alternate service on a flat map, but in the "real world" the topography of the area makes it impractical to assume that most users can or will use the proposed alternative services.)	3/30/2015 9:14 PM
82	Intermediate connections needed like #43 route between light rail stations at Stadium and Capital Hill.	3/30/2015 9:13 PM
83	Neither alternative offers an alternative for night owl runs of 72, or users of 242 with limited mobility ability to walk much. Elimination of 545 non rush hours would significantly lengthen commute time from Lake City to Redmond. Consider a rapid link similar to E that will run east of I-5 and along SR522	3/30/2015 9:03 PM
84	A lot of children/teenagers use this route to get to and from school, and to visit friends on Capitol Hill and to get to/from downtown. It's safe and easy. It gives them freedom to get around by themselves without having to walk far from home or from their destination at the other end. It has been very convenient for us and it is by far the bus route we use the most.	3/30/2015 9:00 PM
85	In the 1970s, the #25 went from Montlake to Capitol Hill & downtown so often, that it was viable. Service cuts have made it pathetic, and not usually worthwhile compared to #43. Yet a few people near Portage Bay have a real need for it, even if it is infrequent. It should be kept.	3/30/2015 8:49 PM
86	It takes too long right now to get to downtown-almost a full hour to go 5 miles. The new 62 along Montalke directly to Link Rail would be a huge improvement, and encourage ridership, especially if it operates past 6:00pm . Right now, no employees can get home by 6:00pm!	3/30/2015 8:42 PM
87	Connection to SCH would be excellent! Please keep this idea.	3/30/2015 8:28 PM
88	71 is the most convenient route for me to use to go downtown and also minimizes walking up/down View Ridge.	3/30/2015 8:24 PM
89	I would like the 43 route times and route to stay the same	3/30/2015 8:08 PM
90	#43 is a work horse. It serves many people who would find walking to light rail station difficult. This is a very popular route. Please keep it as is.	3/30/2015 7:12 PM

91	These routes provide me ease of access, and take me very close to where I need to go. Need to access destinations with minimal walking or transfers. These are the routes I use most often. I am presently disabled and changes in these routes will make uses of transit more difficult and I would probably need an alternative mode of transportation.	3/30/2015 7:05 PM
92	I think Route 43 is critical because it allows transportation from south of Central District to UW, and beyond. This route carries a large number of low income residents who would not have easy north-south access, and access to Downtown. Finally, this route is critical to residents of Montlake. If you remove it, Montlake and south Capitol Hill becomes an island.	3/30/2015 6:46 PM
93	This bus is only one block from my home and has been a vital access point.	3/30/2015 6:34 PM
94	Under either alternative, the 8 must be split at Capitol Hill Station to insulate everyone else from the Denny Way congestion. This's especially important under Alternative 1, when it becomes the only service on John and Thomas. People transferring from Link to get to eastern Capitol Hill must not be forced to wait for an unreliable bus that is eternally late in afternoon rush hours. The new 66 under Alternative 1 should perhaps use the new Westlake bus lanes? The 271 needs a same-stop transfer with other SR 520 routes. Given low ridership in Medina, it should be rerouted onto Bellevue Way to use the Evergreen Point freeway station. The 545 should not be running frequently in the afternoon peak; that's exactly when Stewart St congestion is at the worst. I've routinely spent fifteen minutes trying to go a few blocks there. That's exactly when people should transfer to Link at Husky Stadium.	3/30/2015 5:57 PM
95	Please keep this route from Capitol Hill to downtown intact. And please get it to stick with its schedule. Please get GPS so I know where the bus is. Don't think that just because people live near the lightrail they won't be taking the bus--unless you make the lightrail the same cost with the same transfer abilities.	3/30/2015 5:36 PM
96	The proposed cuts are bad for me. They will cause significant inconvenience and I will be unable to use metro service as much as I currently do. I will be forced to drive much more often.	3/30/2015 5:29 PM
97	As I age, I really want to reduce my car usage. I want to be able to go to Mariners games at night without using my car. Ditto to concerts at Benaroya and the Seattle Center or a dinner downtown. Yet night frequency doesn't seem to be much better and why would a petite senior citizen want to be walking long distances at 10:30 or 11 pm at night? Cross-town between Ravenna/UDistrict and Fremont/Ballard/Wallingford also remains a concern. I'm thinking that small feeder transit vehicles might work for late at night--they'd run frequently.	3/30/2015 5:20 PM
98	There are few buses going to Magnolia, so it's very important for residents to have an available and reliable bus line.	3/30/2015 5:09 PM
99	I ride route 48 twice a day most weekdays, and I like the changes under Alternative 1.	3/30/2015 5:02 PM
100	Have later times scheduled for sounder train have a stop from King street station to seattle children's hospital	3/30/2015 4:24 PM
101	More bus per hour during the weekends	3/30/2015 4:22 PM
102	These are essential bus routes for my family and I in accessing different parts of the city. These routes enable us to use our car less and to lessen our carbon footprint.	3/30/2015 3:49 PM
103	I would use the #25 five days a week if it were on time. I also would like to see it run more often to Seattle Children's Hospital.	3/30/2015 3:44 PM
104	The service on the 8 is so unreliable, something really needs to be done, but I don't know what. The traffic on Denny in South Lake Union is often so bad that I just get off the bus and walk, and it's faster than staying on the bus. This is simply an unsustainable situation for public transit.	3/30/2015 3:38 PM
105	From the North end of the University District, I would like to see fast and frequent service (on both Weekdays and weekends) to Downtown Seattle, to the Coleman Ferry Docks, to Downtown Bellevue, to Eastlake, to Northgate and to Ballard. The service between the University District and Downtown Seattle is often standing room only, if you can even get on a bus, during rush hour commutes. Any alternative needs to address this stretched to capacity situation for University District to Downtown commuters with faster and more frequent service.	3/30/2015 3:19 PM

106	<p>Generally, I have concern for any changes from Metro current service, UNLESS THERE IS AN INCREASE/IMPROVEMENT OF SERVICE (additional routes, frequency & buses). ANY PLAN THAT DELETES ROUTE 43 IS UNACCEPTABLE. ANY PLAN THAT REDUCES SERVICE TO ALL NEIGHBORHOODS, INCREASES WALK & WAIT TIME TO/FOR BUSES IS UNACCEPTABLE. Living in the west edge (7th to 8th Ave NE, NE 45th St to NE 47th St) of the U-District, using Light Rail is not really an option I will consider except for novelty from time to time or if going to SeaTac, which I never do. Both Alternatives appear to reduce service to my area of the U-District. I go to the Group Health area of Capital Hill (I call East Capital Hill) 2-4 times a week. Deleting route 43 or its current frequency will be a burden for me. Using route 48 & 8 increases walk time 10 min and wait time 10-15 min (I've tested it the past 2 weeks). It takes me an average of 20 min of additional time from leaving my home to reach my destination in the Group Health area. Route 43, currently in both directions, leaves on time, stays on time and covers the U-District, UW, UW Medical Center, Montlake, East Capital Hill (16th & 17th Ave and E John St) to West Capital Hill (Broadway & John) and Downtown. What route(s) duplicate that? None? Route 48 is consistently 10 or more minutes late to U-District in either direction. Route 8 goes to Seattle Center, not downtown.</p>	3/30/2015 2:56 PM
107	<p>I would advocate keeping these routes. I use them for getting home after the Husky games (I usually walk to the game unless its raining). As you know, there are special buses that allow people to easily access the games. I am afraid that once light rail gets connected at the University station that Metro will discontinue the special buses designated for downtown. I live in the area and taking the bus is more convenient to me than light rail. But I also know that a lot of people park along the side streets around 23rd Avenue and take the buses to get to the game. So there will still be a great demand for these buses. The other thing to consider.....when I went to the Husky Bowl game in San Diego, I took their rail system to the game. After the game there was an extremely long line of people wanting to get on the light rail. It took about an hour to get on a light rail. I would imagine that we would have the same problem here when light rail goes into effect. Especially when you consider that people from S 200th in SeaTac all along the line way will be wanting to access it. So I would like to encourage you to keep the special buses to downtown, particularly the local buses. It will keep the entire system moving well. Remember you have 72,000 people that you want to move out of the area quickly.</p>	3/30/2015 2:44 PM
108	<p>increase frequency of 25</p>	3/30/2015 2:15 PM
109	<p>This is the perfect route for me! Stops in front of my house in Wallingford (31, 32) and takes me all the way to my job at Seatte Children's Hospital (75). I don't have to transfer buses to go from home to work -- I love that, and I hope that connection remains intact. Always great service, always friendly drivers. Thank you!!!</p>	3/30/2015 1:58 PM
110	<p>More routes through Lakemont</p>	3/30/2015 1:50 PM
111	<p>It is so unreliable. Please make an alternative that does not take Denny.</p>	3/30/2015 12:00 PM
112	<p>I love this route. It is my local commuter bus and it is always full by the time we reach downtown. Pleas do not eliminate or reduce this route.</p>	3/30/2015 11:40 AM
113	<p>Please do not make modifications to these routes other than to increase service or make more reliable. (Taking out the jog for route 8 down Jackson to 23rd and then back to MLK via Yesler)</p>	3/30/2015 10:55 AM
114	<p>Run it more often</p>	3/30/2015 10:42 AM
115	<p>I use these routes frequently and find service excellent</p>	3/30/2015 10:05 AM
116	<p>these routes do not include south king county</p>	3/30/2015 10:03 AM
117	<p>I prefer a single bus travel as opposed to multiple quick connections for long distances. I use 545 for a direct express connection between international district and bellevue/redmond, especially during weekends. 545 also serves me as an alternate to connect between udistrict and bellevue/redmond, during off peak hours when 542 is not available. Although i like the idea of 542 to be extended to an all day service, it would be a deal breaker if the services of 545 were to be removed.</p>	3/30/2015 9:41 AM
118	<p>As previously stated, need to get rid of the short buses used on the #40 during rush hour -northbound, people are packed like sardines by the time the bus hits Westlake and Denney. People are regularly passed up on this route due to overcrowding. It's odd that the double buses are regularly used on the line during weekends when ridership is far less. Seem like resource allocation on this needs more study. Growth in Ballard / Fremont / South Lake Union is exploding, and Metro is not keeping up with this demand</p>	3/30/2015 9:39 AM
119	<p>The 43 is the lifeline to Montlake...please don't eliminate its connection to downtown.</p>	3/30/2015 8:56 AM
120	<p>Please consider running route 167 more often like every 15 minutes vs 30 minutes especially if the smaller electric busses are used as it is too crowded with people standing and is a safety concern.</p>	3/30/2015 8:53 AM

121	There should be extended routes for these buses beyond the work-week hours, or more frequent & reliable connections between the Alaska & Admiral junctions. If I miss a direct route to the Admiral district I might have to wait 45 minutes for a connection at the Alaska junction. This has caused me to use transit less, and find alternate ways to connect my trip such as walking or taking a cab.	3/30/2015 8:45 AM
122	please keep these on my street. Just make them quieter	3/30/2015 8:37 AM
123	26 and 28 go down Dexter Ave but they are so loud and dirty. While improving routes you should also upgrade buses to a cleaner energy source. Electric would be quieter and cleaner. I have to transfer from the 26 or 28 and take the 31 or 32 to the U district, there should be a more direct route even if it means walking a little farther	3/30/2015 8:28 AM
124	Please keep it originating from the Kirkland Transit Center and going by Google.	3/30/2015 7:54 AM
125	why not connect it with Link; it is quite slow now	3/30/2015 7:36 AM
126	What exact date will the Gillman trail be done between the UW Medical School stop and IMA?	3/30/2015 7:33 AM
127	Need earlier service between Bellevue and UW (Husky Stadium).	3/30/2015 5:56 AM
128	Please continue service on the 60 later in the evening.	3/29/2015 10:08 PM
129	I take these routes several times per week. I like that the #8 serves such a wide area, I'm able to go to several places that I need to get to - Dr.s office, shopping and then back home! I wish the #11 ran more often. I am very happy with the current #12 I think if the neighborhoods are under served by Metro, then people will use public transit less. Many people that I see riding the bus are not able to walk so many blocks to catch a bus. It seems necessary to have neighborhood connections to more main routes! Regarding Broadway streetcar and Route 9x - I think this bus route should be moved to 12th Ave. Currently there are only 2 lanes and a turn lane on Broadway, the light rail tracks are in these lanes. At 401 Broadway emergency vehicles are frequently called to assist, and they have no where to pull off the street, therefor busses, and the trains are going to be held up. I live across from 401 Broadway - I see emergency vehicles there at least once per week - this is going to create a huge bottleneck (can't believe that the emergency lane was removed from Broadway at this location!!! Thank you for listening!	3/29/2015 9:35 PM
130	Having the 311 on Pacific Street between UW Station and the 42nd St express-lane entrance sounds like wishful thinking: it would take a long, unreliable time to get from the Eastside to SLU.	3/29/2015 9:30 PM
131	The 245 is crucial for many eastsiders, who used to be served by the 265 and before that, by the old 276. As we ride the 255 or 540, the 245 is the only way to head east. So synchronizing the service would be lovely. I mean, let riders know whether the best connections is in downtown Kirkland or at 108th Avenue and 68th Street, in Houghton.	3/29/2015 8:20 PM
132	Route 43 is my neighborhood entry into public transportation. The buses run frequently enough for my needs and permit me to get downtown easily or to other services between Capital Hill and my home. I would stop using the 48 to get to the Light Rail for travel from the airport and use the 43 to the UW station.	3/29/2015 6:17 PM
133	Desperately need to do something about Denny if the 8's frequency is going to be effective.	3/29/2015 5:42 PM
134	Losing direct connection from Madison Valley to downtown Seattle is the main drawback I see for Alternative1, by losing route 11.	3/29/2015 5:17 PM
135	The 8 is occasionally unreliable in its current form due to the length of the route between Seattle Center and Rainier Beach. I think this could be improved by splitting the 8 into two routes - similar to the concept for the 8 and the 38 in Alternative 1. However, as someone who lives in Madison Valley, I am most concerned by Alternative 1's plan to eliminate route 11. I currently have easy and direct access to both Seattle Center and downtown, but Alternative 1 would make it more difficult to get to downtown. That is why I would suggest keeping route 11 as is, while dividing the 8 into two routes.	3/29/2015 4:56 PM
136	You have the current schedule changing to hourly too early in the day. On weekends, you have got to also increase the frequency.	3/29/2015 4:32 PM
137	I like the way this route is and only wish there were more buses on this route.	3/29/2015 3:38 PM
138	I would like to see a direct route from Woodinville or Bothell to Seattle Children's Hospital	3/29/2015 1:47 PM
139	There is no longer a direct route from mid Beacon Hill (15th & Nevada) to the Downtown corridor. transfer to light rail is good 40 min trip	3/29/2015 12:06 PM
140	I would like to maintain a minimum service level for these two routes. It is our direct connection to downtown Seattle. Without these routes, we would be forced to walk about a mile to the light rail connection at Husky stadium.	3/29/2015 11:41 AM

141	I believe that an Alternative 3 has been proposed, part of which would have the route 11 following Madison all the way downtown to the Coleman dock, then coming back up Marion over to Madison and back down to Madison Park. Selfishly this would be perfect for me since I work at 4th & Madison downtown and frequently need to take the ferry over to Bainbridge Island. This also gives folks the ability to get to the hospitals on First Hill without having to walk further or transfer.	3/29/2015 11:31 AM
142	Turn-back transfers of 545 into 542 at Overlake Transit Center seem complicated and may make choosing the right bus more difficult.	3/29/2015 10:43 AM
143	Don't change it	3/29/2015 12:19 AM
144	235needstogotototemlakefromkirklandonweekendsmoreoften.	3/29/2015 12:03 AM
145	Routes 25 and 43 are the link from Montlake to downtown. 43 is a busy and frequently used bus, light rail would not substitute for the bus since the distance between UW and the next station (Capital Hill) is too long to walk (many elderly live in this area). At least the 43 should continue to run, no matter which alternative will be chosen.	3/28/2015 9:33 PM
146	KEEP IT AND MAKE IT MORE EFFICIENT AND ON TIME!	3/28/2015 7:03 PM
147	ALTERNATIVE 1: I would start the 67 earlier in the morning to meet the needs of 73's current early riders. The first southbound service should depart from Roosevelt & Northgate Ways around 4:50am. I would also start running the 347 and 348 even earlier in order to have make successful transfers @ Northgate & Roosevelt Ways. ALTERNATIVE 2: I would start the 373 earlier in the morning to meet the needs of 73's current early riders. The first southbound service should reach NE 145th Street around 4:45am. I would also start running the 347 and 348 sooner for the same reasons. The weekend 73 would have to start as early as the current 73. Also, the 347/348 would have to start even earlier than that so that passengers can make the connection to the University District.	3/28/2015 2:39 PM
148	I am a senior citizen. I currently use both of these routes to volunteer downtown and to enjoy cultural activities there. While I look forward to the increased light rail, having to transfer to downtown significantly adds to the walking I must do to connect, and also increases the distance I must walk when I reach downtown.	3/28/2015 1:40 PM
149	See previous comments to questions 10, 11 and 15. In particular, I would like to reiterate the need to improve the reliability and frequency of the current #8. It is not clear how the proposed #38 addresses this problem (the frequencies are the same - 15, 15 30 min for peak, midday and night - these are identical to the current #8 and does not resolve existing problems with this line).	3/28/2015 1:15 PM
150	The changes to route 16 look amazing. Please keep route 76 unchanged for transit commuters.	3/28/2015 12:15 PM
151	I ride the 8 to get to Mt Baker transit center, Group Health, and South Lake Union/Denny to/from 23rd & Yesler in the Central Area and need to have this functionality maintained in the new system. I don't mind transferring at the Capitol Hill light rail station if I don't have to wait more than 5-12 minutes for the next bus. The 8 sure is crowded from Denny to Capitol Hill in the pm commute.	3/28/2015 10:54 AM
152	these routes are consistently full with many trips during peak times standing room only. To discontinue these routes or require the riders on these commuter routes to make multiple transfers to get to downtown Seattle will only force more people to abandon metro transit and start driving. There are enough of the same people that ride the commuter buses everyday that if multiple transfers become required we would start forming our own carpools to circumvent having to deal with the additional hassle.	3/28/2015 10:54 AM
153	16: Midday and nighttime route should maintain the Northgate Way track, while rush hour could have an alternative route across I-5 on 92nd. 28: As with most northbound routes through downtown, the schedule performance of the 28 is unbelievably bad. Perhaps this could be improved by not having it originate in a distant place as a different route and/or the schedule could be better adjusted. At least the drivers now have a northern holdover near facilities... 28X: There should be an experiment with a reverse commute route that would serve education and employment areas such as the Greenwood Avenue area of Bitter Lake/Broadview. Could a few northbound 28s continue on 3rd and then up 125th or 130th? 48: The westbound segment is in terrible shape whenever students crowd it. Besides the obvious solutions of adding more busses and encouraging drivers to leapfrog, the route should simply be divided into two at the new Link station to provide a better chance at schedule adherence. 5: The 5 has the usual problem that the northbound reverse commute is unreliable, and eliminating its connecting route could give a chance for improvement. 40: The 40 seems designed as a catch-all route that is thereby guaranteed to be interminable, besides being unreliable in the usual northbound, out-of-downtown way. The all-around-the-mulberry-bush nature could be mitigated if it actually provided a transfer-free way between currently isolated loci, such as Capitol Hill and northwest Seattle. D: The routing through Lower Queen Anne sabotages the promise of a rapid trip from Crown Hill to downtown, but it's unclear whether that could be eliminated at this point. The distance between the terminal on 100th Place and the first stop, west of Mary on Holman, discourages use of this route by most residents of Greenwood and Crown Hill. One adjustment could be a new southwestbound stop between 6th and 7th that could be shared by the 28 and the 40; another would be establishing a stop at the top of Crown Hill near 13th.	3/28/2015 10:42 AM

154	Can take every 15 minutes on peak hour.	3/28/2015 8:53 AM
155	Elevated light rail from Burien, through the Myers Olson Park and Ride, to downtown, could be put down the median strip of 509 and would potentially greatly lighten traffic from West Seattle and Burien to downtown and would increase rider usage (and decrease cars going to and through the downtown corridor) due to more efficient and available public transportation.	3/28/2015 8:35 AM
156	I never use this route but would use this route when link starts running if this service ran past midnight and ran on weekends.	3/28/2015 8:04 AM
157	love this route! would be nice to have at least some service on the weekends love that you extended into later evening	3/28/2015 7:50 AM
158	Please keep frequent service on these routes. Please extend service in Ballard on some route to Shilshole Marina / Golden Gardens (on 44?)	3/28/2015 2:37 AM
159	These routes are gone or just feed other routes. They don't seem to go anywhere which makes them less convenient. This especially applies to the 71, which I use the most.	3/28/2015 1:39 AM
160	PLEASE have the 74 run a more frequent schedule!?!?!?	3/28/2015 1:29 AM
161	I think the 8 is an important route for many people connecting farther south on MLK, rather than people in the Madison Valley. In order to make it a more reliable form of transportation I think the wait times between buses at peak hours should be decreased. The 10 is important for access to the north end of 15th. There's no other bus that goes that far, and I think it would be a bad idea to get rid of it/change the route, aside from making it more frequent. The 49 is a very integral route for students, both at the UW and at SCC. As someone who lives on Capitol Hill and is planning of attending the UW in the next couple of years, it is very important for me to have a few options to get from my home to school, and easily to work.	3/28/2015 12:47 AM
162	A direct route to Seattle Children's Hospital from the Eastside would be a top priority for me.	3/27/2015 10:25 PM
163	many routes stop too frequently. i would prefer they be faster, but stop half as many times, for instance, every 2-3 blocks rather than having a stop every block as #26 does through parts of wallingford/fremont and lower QA.	3/27/2015 9:47 PM
164	Keep it the same.	3/27/2015 9:20 PM
165	keeping a stop just before you enter the highway is great as so many people make the connection there.	3/27/2015 9:18 PM
166	74 - Needs service to downtown all day (even if infrequent), not just during commute times. 372X - Should be re-routed along Montlake Blvd., past the UW Link station. 62 - Why are you proposing that only Laurelhurst residents get direct bus service to UW Link station, rather than other residents in N. and NE Seattle with larger population bases?	3/27/2015 9:16 PM
167	Love this route!	3/27/2015 8:13 PM
168	Need this route for travel between Montlake and downtown.	3/27/2015 7:05 PM

169	ALL OF THESE ROUTES SHARE A NUMBER OF THINGS--THEY NEED FURTHER WORK. IN FACT, IT MIGHT BE WISE TO LOOK AT THEM CAREFULLY BEFORE DOING ANY MAJOR "SURGERY" ON THEM. WHILE THE CONCEPTS FOR ROUTES 16 AND 26 SOUND GOOD ON PAPER (FASTER SERVICE TO GREENLAKE VIA 26X), THERE IS AN ISSUE RELATING TO THE ROUTING TO AND FROM NORTHGATE. SEVERAL PEOPLE LIVING IN A RETIREMENT COMMUNITY NEAR GREEN LAKE FEEL THERE SHOULD BE A DIRECT BUS ROUTE TO SEVERAL OUTPATIENT MENDICAL CENTERS NORTH OF NORTH SEATTLE COLLEGE--IT'S NOT PROVIDED IN THIS SCENARIO, EVEN THOUGH A "TRANSFER CENTER" IS AVAILABLE--NOT TOO MANY PEOPLE LIKE HAVING TO CHANGE BUSES TO GET FROM ONE LOCATION TO ANOTHER, ESPECIALLY IF THEY HAVE MOBILITY LIMINATIONS (AND ESPECIALLY IF THEY ARE LIFT OR RAMP USERS). SERIOUS THOUGHT ON THIS NEEDS TO HAPPWN.	3/27/2015 6:44 PM
170	they go down Meridian to N122nd st and turn left to go around Haller lake. If one could go left, and the other right tio 1st Ave NE, then turn on 128th M to go to Meridian you would have much better neighborhood coverage. People on 1st Ave NE can have over a 1/2 mile to reach a bus stop. This wouldn't add any distance to the routes.	3/27/2015 6:42 PM
171	44 - could benefit from more buses running at peak hours 271 - I love alternative 1 for the increased buses in the evening and would dramatically improve my quality of life	3/27/2015 5:38 PM
172	Run more often	3/27/2015 5:37 PM
173	Preserve the 73! And in general don't change much until the train reaches Northgate.	3/27/2015 5:17 PM
174	It would be great if there was 1 bus, with no transfer that went from Seattle Children's north to Lake City, Kenmore, and Bothell.	3/27/2015 5:08 PM
175	I mainly use the 545 during non-peak hours. Please do not remove its schedule in Alternative 1.	3/27/2015 4:49 PM
176	I would like to see regular service restored to the 27.	3/27/2015 4:36 PM
177	Keep and increase the services	3/27/2015 4:02 PM
178	Route 12 serves a true neighborhood on North Capital Hill. Many people there are either older and no longer drive, or have small children and only one family car. When we were told the 12 might go away, many of us planned to walk down the hill to the 43 (on 23rd). If that goes away, too, we would have to use the 48, probably transferring to an 8, but still not getting downtown. Many people bring children to Stevens Elementary by bus and then get back on the bus with babies and strollers. Walking up the hill, or to John/Thomas would be impossible for them. Students use the 12 to reach St. Joseph's school, Holy Names, Hebrew Academy as well as Stevens. We could live with less frequency (unhappily) but not with NO service	3/27/2015 3:55 PM
179	The timing of the route when it leaves UWMC heading west could be improved. If it left at 15 mins and 45 mins after the hour instead of 7 minutes after it would give employees who get off work on the hour or half-hour time to make the walk to the bus stop on Stevens Parkway. Also, I would like it if the 31 ran on Sunday.	3/27/2015 3:54 PM
180	extend it to Mt Baker.... Get rid of the loop on 14... route 4 can terminate at that loop, instead of 14 making this slow loop in the middle of it's route...	3/27/2015 3:51 PM
181	Please keep the 12 running to Interlaken/Stevens School on 19th and improve its frequency. Thanks!	3/27/2015 3:10 PM
182	please keep service on 15th NE north of Ravenna and north of NE 65th. the consolidation of all routes on Roosevelt Way NE and the elimination of route 72, create a transit desert in the Ravenna/Bryant area, which currently has good local and downtown service. It looks as if the service cuts that were proposed last year because of lack of funding are now being proposed all over again in the name of light rail.	3/27/2015 3:08 PM
183	This is the direct route to many services, including hospitals, colleges, and pharmacies, for Madison Valley and Madison Park. Broadway and Pine is the HUB of the hill these days. It is NOT the Light Rail Station. You do not live here if you think that. A direct shot to Bway and Pine or to downtown is far preferable for far more people on the route than having to transfer on the light rail. Another note, if it weren't for me, my mother would have no idea what was happening here. There is a sign at her bus stop. She is very educated and with-it but she had no clue what it meant. Many people will potentially be impacted without every knowing about this survey or the "alternatives". Your map is unreadable because you tried to put too many routes on one map. The website is trying to deal with all routes at once when most of us only ride a handful.	3/27/2015 2:45 PM
184	WSDOT and King County and the Light Rail planners are making using their systems more difficult by not thinking enough about access to service in Montlake.	3/27/2015 2:36 PM
185	I would use this route more if it were able on weekends and later at night.	3/27/2015 2:24 PM
186	I need all of these routes to stay active and service my area.	3/27/2015 2:07 PM

187	Many of these routes selected are ones that I rely on for the main bulk of my transportation around the city. They're frequently used by many people because they're the only routes of their kind in a lot of areas. That being said, Metro has been very cut happy on these routes, and I'm sorry to see that they've even been completely on the chopping block before, without concern for the riders who have no other close alternatives. If we are to make significant changes to the public transit system, I would like to see these routes maintained or efficiently replaced by the new system in a manner which will positively impact riders instead of providing an inconvenience or extra travel time on their commutes.	3/27/2015 2:02 PM
188	These routes are extremely unreliable and are frequently late, or just never show up. Is this because of the bridge?	3/27/2015 1:56 PM
189	If you are trying to solve the traffic problem, pollution problem and give people a reason to live in the area you need to reduce the need for cars, restrict sov's in certain areas and give people an efficient trustworthy way to move about the city and suburbs.	3/27/2015 1:56 PM
190	Keeping service to Seattle Center	3/27/2015 1:56 PM
191	Please return it to service.	3/27/2015 1:54 PM
192	These are the most useful routes for our family and it would be difficult if they were cut back more than they already are.	3/27/2015 1:54 PM
193	Please keep the route #2 frequent, running from Lake Washington Blvd through Madrona into downtown. A route running down Madison St after crossing Broadway (which has been proposed in the past) diverts people away who will want to connect to Link Light rail at Convention Place and gain access to downtown directly.	3/27/2015 1:38 PM
194	Keep the route on Seneca St. into downtown as the travel time will be greatly improved vs. Madison and the stops are better for me and for many riders at a group home at Boylston.	3/27/2015 1:33 PM
195	Service on weekends and more frequent service during the day is a great idea.	3/27/2015 1:29 PM
196	Please bring this route back. It was an easy, direct way to get to the Pike/Pine corridor, as well as downtown. I live on Bellevue Ave. East and am visually impaired, so the 47 was extremely important to me.	3/27/2015 1:28 PM
197	I rely heavily on these route to get to and from work often the 255 is so full form 5-630 pm some times the driver can not even stop.	3/27/2015 1:27 PM
198	It would be great if the 11/8 went from Madison Park to Light Rail on Capitol Hill to Downtown.	3/27/2015 1:24 PM
199	MORE FREQUENTLY!	3/27/2015 1:21 PM
200	if you cancel these routes i will have to drive every day after cancelling of the 265	3/27/2015 1:18 PM
201	These routes are currently the routes I use to get home and also are the only routes from Downtown Seattle to Madison Valley/Capitol Hill. Without these, I would need to walk at least 10 blocks to get home or to a bus to take me downtown. In my area, there is Agis Senior Living, The hearing speech and deafness center, many senior living homes or elderly residents and many handicapped residents. It would be extremely challenging for people of this population to take on the additional commute. The goal is to make traveling from the cities nearby neighborhoods an easy commute to downtown. removing these or reducing frequency would make it extremely challenging. I would stop using metro service because it would be easier just to walk.	3/27/2015 1:14 PM
202	Helpful to have more frequent morning service and fill the 30 minute gap between the second to last and last service in the morning	3/27/2015 1:14 PM
203	I would love to see this route not only connect efficiently to the UW light rail station but also provide better transition - or even extension - into Capitol Hill.	3/27/2015 1:14 PM
204	2 is my everyday bus and my everyday errands and doctor appts.	3/27/2015 1:14 PM
205	Make sure it connects with the Light Link Rail.	3/27/2015 1:13 PM
206	I'm disappointed that 277 is being canceled under all plans. It was the one bus I could count on to provide a seat on my morning or afternoon peak commute from Totem Lake/Kingsgate Park & Ride. PERHAPS 277 CAN BE REPURPOSED AS A PEAK ROUTE FROM KINGSGATE P&R TO UW LINK RAIL. THIS MIGHT ENCOURAGE SOME OF THE 252 AND 257 DOWNTOWN RIDERS FROM THE KINGSGATE P&R TO EXPLORE THE UW RAIL TRANSFER OPTION TO DOWNTOWN.	3/27/2015 1:12 PM
207	Please do not cut this route.	3/27/2015 12:40 PM

208	Daytime routes need to be kept for the 74 or the 30 71 need to service NE 75th in View Ridge 5th Ave NE needs to have daytime service (66)	3/27/2015 12:21 PM
209	Please please please don't truncate at Totem Lake. I live north of Totem Lake on the 255 line. I really like being able to catch a bus home from late night downtown Seattle activities. I wouldn't be able to do that if the 235 doesn't run late enough. While I'm comfortable walking the 2.75 miles from Totem Lake to home during the day, I don't feel that is safe super late at night. Also, Totem Lake is somewhat isolated. I don't feel very comfortable waiting for a bus there late at night.	3/27/2015 12:14 PM
210	Please keep this route! If this route is eliminated, I will have to travel too far into the dark and cold in the fall/winter to access transit. It is a safety matter.	3/27/2015 12:09 PM
211	I would scrap the concept all together, and redesign the light rail as a "spine" of the system, and use the buses as the "ribs" or branches off of the spine. I would set up larger transfer stations at each stop to facilitate transferring from one route to another. Think of the transit system of Mexico City, where the trains are the mass transit, and buses get people from the train to the farther outlying areas. It is highly efficient and very convenient.	3/27/2015 12:03 PM
212	Please do not cut off access for the Madison Valley area to downtown Seattle! I am very concerned about how I will get home everyday with Alternative 1. If you remove the 43 and the 11, how do people who live around 23rd and Madison get home from downtown? the light rail divides off to the U- district too soon, and the 8 takes you to Seattle Center. The 11 especially is an important route for those of us in this area and the 11 is always full in the morning and evenings with commuters from central downtown. Where will these people go? The light rail does not service us. Will we all be forced to clog up the 2?	3/27/2015 12:02 PM
213	Increase 545 frequency during peak times from Seattle to Redmond, reinstate service of 265.	3/27/2015 11:36 AM
214	there needs to be more parking available at light rail stations to make this a more usable system. If you live in south sound the buses take a long time to get to the link and then if you link and take another bus on the other end it is too long.	3/27/2015 11:15 AM
215	The 66 and 67 (northbound) do not need to stop at 41st, 43rd, 45th, 50th, 52nd, 55th, Ravenna, and 61st. Very few people get on or off those stops--consolidate. Same with 72 and 73 on Fairview.	3/27/2015 11:04 AM
216	Please eliminate routes 71 and 76 north of 65th ave in Wedgwood and ViewRidge. These routes are empty as they traverse the residential, narrow roads in the neighborhoods. Please find a way to utilize/combine the 71/76 with bus routes on Sand Point Way, and on 65th.	3/27/2015 10:56 AM
217	More frequent on weekends would be great!	3/27/2015 10:47 AM
218	It would be nice if these routes were more frequent on the weekends and if 65 actually stopped where the 75 does for SCH. It is a lot farther walk between stops.	3/27/2015 10:46 AM
219	The 545 is over crowded and not able to get on bus at Montlake during rush hour. I have waited up to an hour trying to get on a bus. The other day 6 buses went by that were too full to board.	3/27/2015 10:31 AM
220	I love this route. It's faster and more convenient than the 545. Please consider increasing this route.	3/27/2015 10:20 AM
221	8 - I try to avoid because of frequent delays. improved frequency of service in general would make this more useful. 10 & 11 - Satisfied overall with these but they can be overcrowded at rush hour 12 - I like having this direct connection to downtown around the Central Library. 43 - I don't take this as much but use it as a backup if the 10 and the 11 are full. 48 - I am satisfied with this service. This is one of the few lines that connect distant regions of Seattle without having to transfer downtown. I wish there were more lines like this.	3/27/2015 10:17 AM
222	There are very few routes that connect neighborhoods to Seattle Children's Hospital, making the above routes very essential. It would be great if these routes could remain accessible to Seattle Children's hospital as well as run reliably for later/evening hours on work days.	3/27/2015 10:15 AM
223	Try to make transfer to Light rail as smooth as possible.	3/27/2015 10:15 AM
224	There used to be an express bus that started at Mercer Island P&R, stopped at First Hill near Swedish/Virginia Mason, and then went directly to UW HUB. It only ran during the hours of about 6am to 7:30am. I would consider taking this bus every day, if it were reinstated. Currently, I drive to work nearly every day.	3/27/2015 10:00 AM
225	The 65 is very reliable in the morning and unreliable in the afternoon and evening. The route times drop off considerably after 6pm and this is a problem for those of us that work long shifts at Seattle Children's Hospital. There should be continued frequent route times after 6pm.	3/27/2015 9:43 AM
226	43 is important for going between N Capitol Hill and University and Downtown and Cap Hill (15th Ave -- Group health) Must keep good service for Group health	3/27/2015 9:37 AM

227	Ballard is an urban village and yet the transit situation there is dire. Especially off peak. It is poorly connected, the buses run infrequently, and some routes were cut. What is left discourages ridership.	3/27/2015 9:34 AM
228	Route 8 needs some really significant help to improve reliability and capacity. KC Metro should study improvements to the Denny corridor, especially west of I-5. Proposal one is dead on the table for me unless route 8 is fixed since I will be relying on it for connections to Link.	3/27/2015 9:28 AM
229	want to make sure the #75 runs frequently between Northgate and SCHospital	3/27/2015 9:25 AM
230	Please find a way to increase the frequency of the buses and please extend the bus times. I work the graveyard shift and so I have to go into work earlier for a later shift. I also have to find alternative means to get home afterwards. Also, more often than not I just end up stranded and I have to wait outside until the buses start running again.	3/27/2015 9:13 AM
231	Please add more trips to the 316 for morning commuters, at least one more at the end of its schedule. How about a 8:10 am trip? It is very common for the 7:55 am bus to leave passengers behind as it hits capacity at Greenlake.	3/27/2015 9:09 AM
232	There cannot be too many of these buses, especially at peak commute times.	3/27/2015 9:07 AM
233	I don't know how these routes would be affected	3/27/2015 9:05 AM
234	The Maple Valley area is one of the fastest growing areas in the state, yet we are woefully underserved and bus service is almost non-existent. There is no way to go directly to the U District or the Eastside from Maple Valley area and the congestion on Hwy 169 is atrocious. If better transit was provided, more of us would ride it.	3/27/2015 8:54 AM
235	Please work to have connector routes from the new Unviersity of Washington Link station to Seattle Children's Hospital	3/27/2015 8:37 AM
236	This route is the Capitol Hill's most important. It is a bad idea to alter it or reduce its service. It enables many residents to have convenient access to public transportation.	3/27/2015 8:31 AM
237	Please add the Park and Ride under the West Seattle Bridge back on this route (Spokane & 26th).	3/27/2015 8:23 AM
238	Very unreliable in the mornings from Capitol Hill to U-District (Connection to Seattle children's hospital for me, and the Eastside for my husband). Results in missed connections and delay in getting to work.	3/27/2015 8:20 AM
239	If one of these routes became available to drop off closer to Seattle Children's. Having to wait for the 75 to go to work is not so much a problem, but waiting on Lake City w/ the crack addicts on the way home is dangerous. Also, having to walk a mile or so in the rain to/from the 372 is pretty uncomfortable.	3/27/2015 8:19 AM
240	25 route provides "E-W" service to the main corridors (Eastlake, downtown, Montlake, Madison Park) Seattle is very short on E-W service. Look at a route map, and 25 is the only E-W one in the north Cap Hill/Portage Bay, Montlake neighborhoods. While it has low ridership mid day, it is very important for our neighbors to get to U Village, Downtown, and to the East side via the Montlake Flyer station.	3/27/2015 8:18 AM
241	The rush time routes from Kenmore, Woodinville, Lake Forest Park to Downtown are very problematic. With significantly increased ridership, these buses are grossly overcrowded to the point of not always being able to board. They are also increasingly unreliable in terms of arrival times. I ride 3-4 times a month but am seriously considering driving at peak times because I can't get a seat.	3/27/2015 8:01 AM
242	I take this routes to get to the Light Rail in Downtown Seattle. I would like to be able to end my travel in UW Medical Center.	3/27/2015 7:58 AM
243	Make these more frequent in the afternoon after 3:00 PM	3/27/2015 7:51 AM
244	More frequent bus times to work or downtown make it more convinient for me to take the bus rather than my car.	3/27/2015 7:46 AM
245	More service is needed for Richmond Beach	3/27/2015 7:35 AM
246	I would use transit daily if able to take a bus from Redmond/Woodinville to Seattle Children's.	3/27/2015 7:35 AM
247	These routes are wonderful. I love the frequency during the day, too!	3/27/2015 7:34 AM
248	Keep them and increase bus frequency throughout day but especially during weekday peak hours	3/27/2015 7:26 AM
249	Many shifts at Seattle Children's begin at 05:30, but this is the time that the first buses for this route run. Starting earlier service would reduce the times that I have to drive in alone.	3/27/2015 5:54 AM

250	Direct route between Eastside (specifically Bellevue) and Seattle Children's Hospital from one of these buses would be very useful. It is currently very difficult to get to Laurelhurst from the Eastside, necessitating multiple buses with long waits, or walking/biking a long distance. If I could use a direct bus route between those locations, I would drive on the freeways ~20 fewer times per month.	3/27/2015 12:20 AM
251	Already stated in the rest of the survey, but I rely on the #48 a lot for 1-seat rides (bike and heavy gear in tow, so transfers are not "better service")! It gets me to a lot of access points for work sites south of UW and down through to Mt. Baker and beyond. Losing this connectivity will decrease my use of transit because it will make it even more difficult. This route will become more redundant after the Roosevelt stop opens up for Light Rail, but until then is essential intact.	3/26/2015 10:43 PM
252	Too slow, too unpredictable - some days it is fast and other days it is very, very slow and delayed	3/26/2015 10:31 PM
253	Highly prefer express versions of 26 and 28. Need significant improvement between Fremont/ship canal and downtown core, fewer stops, and more bus only lanes throughout downtown and a bus only on ramp/light for merging onto Aurora north.	3/26/2015 10:24 PM
254	Keep 545 extend its peak hours travel to 9.30A, cancel 542.	3/26/2015 10:10 PM
255	It's really difficult to get from where I live, 124th and 8th Ave SW, to the Sodo district for stadium events and to Seattle Center and some places downtown. The buses don't go near enough to the stadiums and there is an extremely long walk from the nearest stop to the stadiums, especially the Wamu theater where I attend concerts. I think metro should put a bus stop(s) that go right in front of the stadiums or right behind. When they built the stadiums, they should have taken bus transportation into account. Not everyone comes from the north and east sides and can use the nearby bus tunnel etc. The long walk prevents me from taking the bus as I can't walk super far and I end up having to take a taxi. It's not great for less abled persons right now. I've tried to use light rail from Tukwila and the parking lot is often too full to find a spot so I end up driving instead.	3/26/2015 9:21 PM
256	Add frequent times during day time and late night, with stops at Aurora Village in Shoreline	3/26/2015 8:34 PM
257	I would again like to suggest that Route 74 be turned into an all day, two-way route service route. This route serves the Sand Point/Magnuson Park area with it's continuing growing population, as well as the View Ridge, Ravenna & U District areas with direct, quick transportation to downtown and back. There are no transfers &/or long walks involved -- this is a VERY GOOD route! I would propose that the Route 75 do a "loop" so that access to Link Light Rail would be directly at the Station instead of on Stevens Way. The 75 could then continue on into campus as planned but would at least offer service that would not require a 10 minute transfer from Stevens Way, to the station and then eventually on to a train to downtown -- kind of defeats the purpose of a rapid ride to downtown, don't you think?	3/26/2015 8:06 PM
258	please keep frequency and try to eliminate the Capitol Hill stop	3/26/2015 7:41 PM
259	NO matter what time of day, I have to stand on this route. Stop adding housing without upgrading infrastructure. Delridge needs its own bus route, not connected to Burien.	3/26/2015 6:57 PM
260	Because the last bus runs from Seattle Children's Hospital at 1145pm, I can no longer use it as transportation to/from work. I need a ride at 1230am. Also, bus stop closest to SCH is a decent walk with little to no street lights. Dangerous for nurses getting off after dark. Thanks!	3/26/2015 6:42 PM
261	It makes no sense to me that this extremely LONG route goes so often from Issaquah to the Bell Transit center, and then continues to the U District. It seems like it would be more cost effective to break this in to 2 routes and offer better service...when the busses get off schedule, I often see (or ride) an almost empty bus that is following an over-filled bus.	3/26/2015 5:31 PM
262	Needs more frequent service at peak times -- the bus routinely passes customers at this hour (particularly near Denny & Stewart in each direction)	3/26/2015 4:57 PM
263	With the masses of Amazon employees in SLU, rush hour buses going north on the 40 during the week are kind of miserable. Not many lines seem to go to Ballard area in general, so the 40 is always overflowing with passengers and frequently skips stops with 15+ people waiting because it is too full at rush hour (even double buses are smashed full!). Perhaps if this line ran a bit more frequently from 4:30 - 6pm (or if all buses were double at this time period) it could help prevent congestion and overflow. Glad there are some improvements in the works, I think it will really help.	3/26/2015 4:51 PM
264	Transportation to Seattle Children's Hospital and First Hill should be very frequent.	3/26/2015 4:46 PM
265	It would be great to have extended trip times for either/both of these routes. They are the ideal routes for commuting between downtown and the area around NE 55th and NE 65th streets. If I work late, both have stopped running and I have to wait quite awhile for the 71.	3/26/2015 4:40 PM

266	The 48 is great!	3/26/2015 4:35 PM
267	Extend 540 to the North along Market and then 98th--up to NE 116th or NE 124th. And add one more run to both the morning and evening schedules. Increase the frequency of 372. Thank you!	3/26/2015 4:21 PM
268	73 and 65: If these came more often (rather than every 30 minutes) that would be wonderful; it is too bad that the 65 is impacted on when UW school is in session 373: this is a great bus but only happens in the morning and afternoon. Would be great if it did go through all day and had later evening options.	3/26/2015 3:41 PM
269	direct route from kirkland to seattle childrens hospital and back!	3/26/2015 2:14 PM
270	Like to see route directly to Seattle Childrens hospital.	3/26/2015 1:55 PM
271	Please keep this one. Looking at the Alternative One map looks like a nightmare. Even if there's increased speeds,it would be so much more difficult for me to get where I'm going.	3/26/2015 1:10 PM
272	eastside route directly to Seattle Childrens that includes a direct route and runs frequently	3/26/2015 12:33 PM
273	The loss of route 43 in alternative one will measurably reduce the attractiveness of metro as a means getting downtown. Instead of a door to door trip I will be facing a two transfer trip (one transfer if I backtrack to the university light rail station), which likely offsets any gains to be had from more frequent service. I saw the reduction of route coverage we were facing under the recent budget crunch as a real problem for this city; I am unlikely to support any similar voluntary reductions, even given the benefits of increased frequency. Please let the light rail and RapidRide routes handle the fast, frequent cores of the transit system, and use the regular bus service to provide the "last mile" to our homes. Thank you.	3/26/2015 12:17 PM
274	I'd use the transit system daily if there was a direct route from Eastgate Park and Ride to Seattle Children's Hopsital.	3/26/2015 11:28 AM
275	Need bigger buses in the afternoon	3/26/2015 10:43 AM
276	Please keep this route on 108th Ave NE in Kirkland. Numerous people board this bus along that street.	3/26/2015 10:36 AM
277	I think you should keep it running to Woodinville and not just end at UW Cascadia. Why would you give less options for people who live in Woodinville? People still ride it to Woodinville like myself you would want them to get to the Link better.	3/26/2015 10:30 AM
278	The buses run too close together on many days. lots of dealys.	3/26/2015 10:04 AM
279	I am strongly against removing 242. But if you need to, add more frequent service for 555. The only alternative for 242 is transferring between 555 and 545/542. 555 is already often at capacity and comes once every 30 min. We need more service if it is expected to also take on the 242 capacity.	3/26/2015 10:02 AM
280	252 is an express and the shortest commute without a transfer. 255 is the backup for in between times when 252 is not running. Both are great routes and should not be changed.	3/26/2015 10:01 AM
281	Drivers need to stay at bus stop if they arrive earlier than scheduled departure time	3/26/2015 9:39 AM
282	We moved to East Capitol Hill 18 years ago because of the density of transit and convenient access to both downtown and to the Eastside (via Montlake). Alternative 1 and losing both the 12 and 43 would leave us in a transit HOLE, with no easy way downtown. Please don't put us there.	3/26/2015 9:20 AM
283	See all previous comments, in particular the paragraph about "improving alternative 2".	3/26/2015 8:43 AM
284	Hopefully I will be able to take the light rail in (provided I can find a place to park my car) into Childrens Hospital. It takes too long to take the bus with all the transfers	3/26/2015 8:29 AM
285	Per my previous comment...please make it easier to commute in from Kent/South Sound. I moved out of the city, like many other residents, because of the cost of living. However, I continue to commute into the city for work. Some people I know are able to take the train or bus from Kent and get to work easily. However, I work on Sand Point Way and it is hard to get there with train/bus without making my commute significantly longer. For me, it doesn't seem like the addition of the light rail is making the commute any easier. There would be three transfers and three modes of transportation (train/light rail/bus) to get to work? I would prefer to drive in if that is the case. As you can see from the congestion and long lines of traffic on I5 and 167, there are many drivers that make the same commute as me on a daily basis. It is already a long distance and any added complexity (i.e. three transfers) adds time and frustration. What if I miss a connection? Alternative commuting needs to be easy, fast and accessible. Otherwise people will not give up driving on their own even if that means sitting in traffic. Thanks for listening to feedback, it is appreciated!	3/26/2015 8:20 AM

286	Route 71 is the ONLY bus in View Ridge. We voted for improved bus service not its elimination. Please keep the current route until the Roosevelt station opens or route the 71 to the University Station. I would rather maintain the 30-min intervals than lose our bus.	3/26/2015 8:11 AM
287	Just a general thought - my idea was that once the Shoreline Light Rail station at 185th opened I would then use that to get to the University stop then from there up to Sand Point Way.	3/26/2015 8:10 AM
288	Keep these routes the same on the east side of Lake Washington to maintain the best neighborhood coverage. Alternative 1 suggests 3 transfers to get from Kingsgate to downtown. I would not use the system under those conditions.	3/26/2015 7:42 AM
289	This is a very important route that serves east side and U-District/Seattle Children's. It is already very hard to get to Seattle Children's and proposed changes will make it even harder making more people drive.	3/26/2015 7:30 AM
290	The over crowding on route 545 on weekdays is unacceptable. The drivers should not be allowed to pack the bus as full as they currently do. This causes a huge safety risk to have people standing while traveling on the freeway. Please increase the frequency of this route during peak times to reduce the risk of over crowding.	3/26/2015 6:57 AM
291	Need more frequent service between 8:00 pm and 10:00 pm.	3/25/2015 9:55 PM
292	PLease keep route and frequency the same	3/25/2015 9:51 PM
293	This is the only bus that currently serves View Ridge. I travel daily to the IMA (near Husky Stadium) but no bus goes there (except for route 65 on 35th Ave, 10 minutes walk and another walk from the HUB). Since the IMA is near the new Link Rail it would be great if a bus went from View Ridge to the University station. This would also be a great way to get to Capitol Hill or downtown.	3/25/2015 9:16 PM
294	For the 44. It's a great connection but it really needs it's own lane. For the 372. This would be awesome for the weekends. 68- This bus never comes frequently enough, especially on the weekends since I need to go in to the UW. For the 70s. Something should run on 25th Ave to Downtown. Having to walk 5-10 blocks to get to downtown bus is not easy.	3/25/2015 8:53 PM
295	255 - yes, please, please add direct service to Seattle Children's from the Eastside. 542 and 545 - residents of Sammamish want direct service to UW (Montlake Freeway stop) and downtown Seattle without having to go through Redmond. 268 is a great route from Bear Creek P&R to Montlake Freeway stop and downtown Seattle but it runs too infrequently.	3/25/2015 8:16 PM
296	Please provide a direct route from the Eastside to Seattle Children's Hospital. There are a lot of us that need this to get to the hospital for work. Also, the 75 is ALWAYS running late... in both directions. If the direct route does not happen I will most likely stop using metro as I currently cannot rely on a timely commute with the connection issues with the 75. I am a full time working mother who needs to be consistant in my commute with work and daycare pick up. Please help those of us that work at the hosptial!!!	3/25/2015 6:57 PM
297	I love the frequency of the 16 (in alternative 1) and the fact that it runs all the way down 65th and connects to Magnuson park, Roosevelt, Green Lake, Wallingford, Fremont, and Seattle Center. My only concern is that with the loss of the 71, there is no quick, direct way to get to downtown or the Ave from 65th. While the 65 mostly fulfills this need (it doesn't reach the Ave either), I still anticipate some issues. Keeping in mind that the goal of alternative 1 is to reduce the number of routes overall, I'm not sure how this problem can be fixed without creating another route. I am fine with having to transfer to the 48 or another bus that runs along the Ave if these buses are able to stick to their schedules. In alternative 2 I have major, major concerns with the treatment of the 71. It would basically become a shuttle for high school students and would become useless for anyone else. I commute to work and class in SLU/Eastlake and UW and would be unable to make my daily trips using the 71 (currently a bus I use 7 days a week).	3/25/2015 5:24 PM
298	I like the proposed 256 route, but S. Kirkland PR to downtown must run all day.	3/25/2015 4:32 PM
299	We need more of them.	3/25/2015 4:16 PM
300	Continue the 255 up to Magnuson Park	3/25/2015 3:44 PM
301	Continue the route up to Magnuson Park	3/25/2015 3:30 PM
302	Would like to see accurate & timely manner service. In some cases, the buses are really late (more than 10 minutes) or not show up at all.	3/25/2015 3:24 PM
303	Good job making the changes in the last year or so. Now if you can just get the drivers to not leave their stops early.	3/25/2015 3:19 PM

304	I just want to reiterate that frequent service to and from UW Station on Montlake should exist. The city should put in an HOV lane for southbound traffic. It would be great if this corridor had robust service all the way to Magnuson Park. After traffic like I experienced yesterday where I was stuck trying to take transit home for 2 hours I think we need to take as much advantage of grade separation as possible so I hope Eastside to downtown commuters can see the benefits of reliable service to downtown rather than hoping traffic keeps moving on 520, I-5 and surface streets.	3/25/2015 3:13 PM
305	Elimination of these routes severely affected my family's commute for three people, including one not able to drive.	3/25/2015 3:07 PM
306	Please improve the reliability of arrival times.	3/25/2015 3:03 PM
307	There should be an express version of this bus that maybe stops at less places within the UW campus.	3/25/2015 2:59 PM
308	Why is this the only route to one of the busiest hospitals in the pacific northwest. It is impossible to get to Seattle Childrens without taking multiple buses and they do not run frquently. We are a 24/7 hospital and there is limited service on the weekends and after hours. There are no direct routes from Bothell. I would need to ake at least 3-4 buses to make a connection.	3/25/2015 2:47 PM
309	Route 30 brings me to the NOAA campus where I work. I would like to see its service can extend to all day (not just peak hours) like before the budget cut.	3/25/2015 2:36 PM
310	Please make sure that route 255 to and from Kirkland serves Downtown Seattle and Kirkland. Please have route 235 or 234 serve Downtown Kirkland to South Kirkland Park and Ride. Thank you.	3/25/2015 2:08 PM
311	Could the time tables for these routes be staggered a little more? It often seems that there is one bus right behind another and then a gap before there is another group of these buses at least once you get to Lake City Way and the further reaches. It's really maddening to miss the last of the group and then wait and wait only to have 2 or three buses within 5 minutes of each other.	3/25/2015 1:54 PM
312	More frequent service, please.	3/25/2015 1:52 PM
313	This connection will provide much needed direct service from the eastside to Seattle Children's. This is important as the hospital continues to grow, and also connects to its Bellevue facility. This will attrach many new riders, and will also double as a valuable connection from UW Station.	3/25/2015 1:43 PM
314	Needs greater frequency based on population growth. the 28 route has been sacrificed for the 40 - Ballard core getting still more preferences. The 75 needs to have routes that do not go through the campus of University of W.	3/25/2015 1:33 PM
315	Many times these buses do not run on time. Especially in the afternoon	3/25/2015 1:33 PM
316	Please extend service hours in the evening. There are dozens of passengers complaining of short service hours - forcing us to use the 545 service at peak times which doesn't even stop at the closest stop which is 520 and Montlake.	3/25/2015 1:27 PM
317	there needs to be a route that travels North Cap Hill to Magnuson Park without 2-3 transfers.	3/25/2015 1:27 PM
318	please continue up to magnuson park	3/25/2015 1:21 PM
319	I would like it to go to Seattle Children's directly	3/25/2015 1:19 PM
320	25 used to Children's Hospital in a great way. More than convenience - it was safer to take in the dark whether arriving or departing from work. Many of the times have been eliminated and it is less useful because of the long time between buses.	3/25/2015 1:12 PM
321	Please keep direct routes to the UW for those of us who commute.	3/25/2015 1:11 PM
322	Please include the residents of Sammamish in your plans; we pay taxes, too!!!! We need more direct service from the north end of Sammamish and/or the Bear Creek Park & Ride to the University District and downtown Seattle. Do not force us to make traffic congestion worse in Redmond by making us travel to the Redmond Park and Ride in order to get decent bus service.	3/25/2015 12:52 PM
323	Run more frequently,especially in the evening.	3/25/2015 12:46 PM
324	I hope these two routes can pass Seattle Children's Hospital.	3/25/2015 12:45 PM
325	The service of the above routes need to be maintained as they are, and not re-routed or reduced.	3/25/2015 11:45 AM
326	372 is ALWAYS packed at peak hours, morning and evening. There have been numerous times where I've had to miss 2 busses because there isn't enough room for me and other riders. In the evenings, between 5 - 6:30 PM, there needs to be more busses coming through heading North.	3/25/2015 11:03 AM

327	This route is continually late in the morning and very full at night. Increased route times would greatly help!	3/25/2015 10:57 AM
328	These routes need to be maintained in some form (including express service) until the U-District Link station open around 2021.	3/25/2015 10:49 AM
329	Does not run frequently enough. I have to drive into Woodinville or to Brickyard to get the 311 or Bothell to get the 372. There should be a 6AM from Monroe and a 5PM from Montlake station.	3/25/2015 10:49 AM
330	these are the routes I take every single day. 10 and 11 gets me downtown, which I go to every other day. 12 gets me further down to financial district and the hospitals closer to that, which I take 3 times a week in the morning. 43 is the only route that is convenient for me to go to the university district.	3/25/2015 10:33 AM
331	This route is the most convenient for me to get to DT Seattle. You removed my 260 Route and the 252 is the next best. Please don't take it away.	3/25/2015 9:39 AM
332	Like I've said, I can't find any info about this route north of 145th. Please don't change it off of it's current route on the streets through Shoreline.	3/25/2015 9:16 AM
333	252 is a direct route between Kingsgate/Totem Lake to downtown Seattle. It already only runs during Peak hours. It is almost always full to the point of standing room only. It takes 40 minutes to get downtown Seattle. How long could it take to catch bus at current location on NE 132nd St at 129th NE, then get off at Evergreen Hospital transit center, walk to I-405 freeway, catch 311 bus (probably have to stand up) then transfer at UW link rail station and walk to office from rail station. I already catch the bus before 6:30 am! If route 252 is eliminated and Alternative 1 implemented I would probably choose to drive by myself much more.	3/25/2015 8:56 AM
334	Improved frequency would be great. Especially at rush hours in the morning and evening.	3/25/2015 8:48 AM
335	provide a comprehensive/holistic view to the public of the problems with directing various commute options, including buses and lightrail, into the downtown area. help the public understand how their specific route is a faction of a bigger problem. provide a view of the master plan; how does the entire county system impact downtown Seattle and other popular stops.	3/25/2015 7:44 AM
336	Leave this route alone. It allows sensible non-Seattle residents the only decent means of direct and somewhat timely/reliable bus service from Brickyard park n ride to downtown Seattle. How on god's green earth is it helping any of the people riding that bus to have to re--route to the U District and queue up for what will undoubtedly be an overpacked and unreliable train situation, or to have to transfer to another bus on the floating bridge? You do realize, yes, that everyone will transfer at that spot ... why would they go out their way 2 or 3 miles to the U-District? Stop!!!	3/25/2015 6:44 AM
337	Maintain the 12 for service on 19th and Madison. Consider Alternative 1's plan for the 49 to distribute service in Capitol Hill and provide service on Madison. If this is implemented for the 49, it is a big enough move that is should be productive and sustainable. Do not do it if it is not a good plan for the decades to come. If the 62 is implemented ensure that it is long enough to be productive and sustainable over the long term.	3/24/2015 11:47 PM
338	Keep the 43!	3/24/2015 10:41 PM
339	I really like that the 43 turns into 44 going between Cap Hill and Ballard. I hope this doesn't change.	3/24/2015 10:29 PM
340	I need a direct route to have any confidence in transit travel times to the office. The removal of commuter routes dramatically reduces my incentive to use metro at all.	3/24/2015 8:49 PM
341	This comment is specific to the proposal to detach 271 Eastgate-Issaquah as a new Route 207. I like the detachment idea; however, I'm concerned that the 207, on its current proposed routing, won't be competitive against other transfer options (esp. involving the 554). Even so, I think the 207 proposal is close to being a useful and convenient local route -- the current proposal just barely misses some good chances to improve local service both in Bellevue and in Issaquah. I'd propose tweaking the 207 routing on both ends. On the east end: - From Issaquah Highlands P&R to Issaquah Transit Center, do not route through downtown Issaquah -- the 554 already serves IH-DT-ITC at higher frequency. Instead, from IHP&R to Issaquah Post Office, follow Black Nugget Rd to 62nd St to 4th St to Gilman Blvd. This routing is 0.8 miles shorter, and dodges the worst-traffic areas (Issaquah Highlands stoplights, Sunset Way and Front St, NW Sammamish Rd). It also restores some of the coverage/connectivity lost when the 927 was deleted. Using the savings from shortening the east end of the route, do one of the following on the west end: - Extend the 207 to Factoria and Newport High School (using 142nd PI SE and SE 36th St). This restores Newport High School to Eastgate connectivity lost due to the deletion of the 210. - Extend the 207 to South Bellevue P&R (using 142nd PI SE and the I-90 express ramp, as the 555/556 does, to avoid Factoria traffic backups). An additional 550/207 transfer option could help the route attract riders, especially off-peak (midday, evening). Either of these options would allow the 207 to serve the southern Bellevue College stop on 142nd PI SE. From my observation Bellevue College is a significant destination for Eastgate and South Cove 271 users.	3/24/2015 8:47 PM

342	<p>Concern 1: You're taking my very simple commute (take one bus from the Kingsgate park and ride to downtown, then walk - 311 concept) and potentially adding TWO transfers. That REALLY sucks and I'm going to have to seriously consider alternatives (driving). I get off at Westlake, and it's already pretty far from there to my office. The end of the light rail is even farther, and I would probably want to try to take a bus on that end. Plus there's the transfer to the light rail in the first place. Concern 2: One of your goals was: "Takes the uncertainty and pre-planning out of choosing to ride. Riders would know where to go to catch the bus and would not have to worry about when the bus is coming." I already have this with routes 252/257/311 - I go to the bus stop, wait for one of those, and then get on. I feel like you're taking this away from me since if I'm reading the charts correctly (wtf does 22/22 trips mean? 22 minutes?) the time between buses is increasing? and I might have to start paying attention to that. Concern 3: Please please please do not reduce peak bus service on the new 311 route. As I said above, I'm not sure what 22/22 trips means, but it seems like it might be less than the 3 buses original service (6/6 + 7/8 + 12/11 = ?? 25/25 ??). The buses are super full already during peak times (7:15am-8:00am). Comment: I don't mind the idea of consolidating 252/257/311 in general if my other concerns are addressed.</p>	3/24/2015 8:31 PM
343	<p>Please strongly consider Alternative 1 for Route 542. There are many students and employees of the University of Washington who live in the Redmond/Sammamish area. This would provide these riders with an excellent way of travelling to the U District and avoid the costs of the 520 toll and traffic congestion. I have enjoyed the service that Route 542 has provided me for the past 2 years. My sister may also be attending the UW in 2016. She will also rely on this route for transportation to the UW.</p>	3/24/2015 8:10 PM
344	<p>Please consider extending 242 terminal from Overlake to Redmond Town Center, like 555 concept. One more stop only adds about 5 minutes to the whole route but might attract a lot of potential commuters from the offices near Redmond Town Center. I see the potential demand by looking at the amount of vanpool routes between Northeast Seattle and Redmond Town Center.</p>	3/24/2015 7:50 PM
345	<p>Allowing continuous weekday direct service between downtown Seattle and Overlake allows people to help reduce congestion by commuting at off-peak times. Adding a Link transfer would add a considerable amount of commute time.</p>	3/24/2015 7:49 PM
346	<p>311 needs to run more frequently; it's always packed, especially for the evening commute. I hope the next project will be Rapid Ride down 405.</p>	3/24/2015 7:28 PM
347	<p>Route 545: Feels great to have an opportunity to comment on my favorite bus route. Would love to see one or more trips from Seattle back to Redmond added after midnight on Friday and Saturday nights. Often, the reason I drive into Seattle on Fridays and Saturdays is because the last 545 back to Redmond is too early.</p>	3/24/2015 6:10 PM
348	<p>These routes are integral for moving people from Kirkland/Totem Lake/Kingsgate to DT Seattle. Without these routes the freeway will be more clogged with more cars driving to DT Seattle. These routes tend to be full if not standing room only most days. Adding the need to make transfers will no doubt push people away from using Metro as the means of commuting.</p>	3/24/2015 6:04 PM
349	<p>Restore the 12. Seriously consider implementing Alternative 1's 49. The new 62 does not seem to long enough to be productive and sustainable. 15th Avenue NE is an important area for transit. Ensure that there is good transit there.</p>	3/24/2015 5:53 PM
350	<p>Please either extend light link rail to Kirkland or do not change these routes.</p>	3/24/2015 5:53 PM
351	<p>235 would not be frequent enough because appears 234 would no longer go from downtown Kirkland to BTC via Group Health. 249 could be alternative if it coincided better at S.Kirk P&R with other routes from KTC.</p>	3/24/2015 5:01 PM
352	<p>Traffic on Broadway is extremely busy. The 60 bus is always overcrowded in the evening and it can take 3 times longer than usual going from Beacon Hill to Capitol hill after work because of the crowding and traffic on Broadway. This bus is an important connection since it goes places the light rail doesn't and is more direct, but it needs to be more frequent and/or moved to another street, like 12th. I worry that with the addition of the light rail and the streetcar, Broadway will become a nightmare and the bus will take even longer.</p>	3/24/2015 4:37 PM
353	<p>Will these bus routes between downtown and udistrict be eliminated?</p>	3/24/2015 4:34 PM
354	<p>Do not continue the afternoon deviation to Overlake Transit Center. The 271 should be routed along 112th Ave NE to the HOV ramps at 108th Ave NE, and no longer serve Medina. The 271 should no longer deviate into Bellevue College unless the College and City of Bellevue commit to improvements to Snoqualmie River Road. There needs to be a better, fast all-day connection between Redmond TC and Bellevue TC via Overlake. Rapid Ride B is far too slow, and the 232 only runs at peak. Coordinate the 545 and 542's schedules in the SR 520 corridor to provide a consistent combined headway. Coordinate connections with the 232/566/567 at Overlake to ensure connectivity to Bellevue.</p>	3/24/2015 4:31 PM

355	Without this route, it looks like for many trips, we will need to walk up a substantial grade or at least a mile. That will be difficult for my husband and perhaps for me. I understand that both plans delete this route. Alternative 2 seems to mitigate that better for us, but we still might use transit less.	3/24/2015 4:28 PM
356	I heard this will be removed, I ride this number very often from Roosevelt way to downtown, hope this will not be removed	3/24/2015 3:50 PM
357	Route 70 acts as the main route between the University of Washington and the SLU community. Many students and professionals who travel frequently between these two site utilize this route throughout the day, but especially during peak travel times. Increased frequency along this corridor would greatly improve its use. Route 75 is the only route that reaches a large portion of Sand Point regularly (especially now that route 30 has been eliminated). Increased frequency of this route would be necessary, especially with the deletion of Route 71 from traveling to the downtown transit tunnels. With route 74 not operating on weekends, and route 71 being cut from going downtown, route 75 would be the only option to get downtown on weekends and evenings.	3/24/2015 3:48 PM
358	The westbound stop nearest my place of residence is on Madison between 12th and 13th. It seems that the WB buses arrive at this stop at the same time. If the schedule were adjusted might they not arrive on an alternating basis so there would be 2X frequency down town? The #2 east bound through down town and past the Central Library is very slow, particularly during peak times. Can you do something to solve that? I understand that there will be a bus-only lane that will help the competition with Interstate 5 bound cars ---- thank you for that. Why does the #2 have to start so far north? Travelling through the frequently congested Seattle Center area and making the left turn south of the Seattle Center causes unreliability. Please make the #2 shorter. I'm willing to transfer downtown when I want to go to the Seattle Center. The WB #3 and #4, particularly in the afternoon, have difficulty making the left turn onto WB James St. As you know, I'm sure, the bus often has to wait through several traffic signal cycles. What can you do to improve that? I know that there is a thought that the #3 and #4 could be on Yesler, but that can't be implemented overnight. Maybe there could be a police person (traffic director) at the intersection of James and 9th to help the bus through, as a short-range solution.	3/24/2015 3:38 PM
359	Essential route!!!	3/24/2015 3:22 PM
360	wow... that's a lot of routes... Route 8 has problems with being late that is being partially addressed by the Alternative 1 plan. Splitting it into two separate routes should help since the amount a bus can be late won't have a large of a cumulative effect. One of the things that makes this route run late is that it runs through the Denny Triangle area and roads with very high congestion issues, which is not being addressed by Alternative 1's plan. Route 48 being split into two separate routes is another hopefully wise move to make a chronically late route more likely to be more reliable. The plan with the 45 also looks like it will be a good option for some East/West travel. Route 30 is a surprisingly useful route as it travels East/West, and not very many other routes actually do this in NE Seattle. Unfortunately it got knocked down to Peak only service, and I am hoping that with the Proposition 1 funding the full day service will be restored. 372x: if the 68 gets deleted or does not see increased frequency and deletion on non UW days, the 372 needs more stops along Ravenna Ave and south. 72 and 73 both run very infrequently. This tends not to matter when you are south of NE 80th St. and 15th Ave. NE, but north of that point makes these routes difficult to use when you need to make a trip rather than having time to make a plan to make your timing appropriate at their bus stops. Improved frequency would be very nice for these routes. Routes 31/32 confuse me. Based on looking at maps and schedules I still cannot figure out if one of them travels one direction and the other in the other direction or if something else is going on. Maybe I'm the only one who is confused about this, but it might be worth looking into...? If Alternative 1 is not used, please keep the 68, and increase its frequency (including running when UW is not in session). It is one of the only options for travel on 25th Ave. NE as the 372 makes very limited stops and is currently only very useful during peak hours. 74.... It's like the 75, but shorter? What? 312: Great route, only if you happen to be going the right way at the right time. 522 runs along the same corridor all day long, but doesn't make any stops south of NE 125th St. until downtown. Adding a few more stops south of there would help a lot.	3/24/2015 1:32 PM
361	If you are not happy about the ridership, make routes longer so there are more reasons (more places that each route goes) to climb onto that bus.	3/24/2015 1:23 PM
362	If there are changes to the 255, I'd like to see an 'express' that would look like this: 1. only stops at Kirkland Transit Center and South Kirkland Park and Ride to insure a quicker commute. 2. No stops on 520 3. leaves frequently.	3/24/2015 12:48 PM
363	Don't be so lazy, just slavishly following your "bright" idea on how to reduce service (2014 budge reductions) as you look to "improve" service now. You don't improve service in NE Seattle by completely eliminating Rt 71 service north of 65th, and "make up" for that with very modest improvements to Rt 65 frequencies as selected times of day. Don't pretend to be improving service when you are really creating a new large doughnut hole area with no all-day service. You could avoid a large part of this critique by simply retaining the northern part of the 71 service area and drop the silly proposed 16/71 connection east of 55th to Magnuson Park.	3/24/2015 10:58 AM

364	Route 255 needs to stop at Mountlake rather than requiring one to go downtown to transfer to Kirkland and Route 65 needs to increase frequency to improve service and decrease traffic congestion passing the UW stadium. Much of the traffic is generated by Children's Hospital and University of Washington employees or students, not just on event weekends. Many people living in NE Seattle work on the Eastside and need a more time efficient way to get to/from work. Efficient public transportation also translates to better air quality and better community for all! Thank you for an opportunity to give feedback.	3/24/2015 9:56 AM
365	need more parking	3/24/2015 9:40 AM
366	This route says that it should connect with times with the D Line, but it never does. I am consistently having to wait over 10 minutes after being dropped off at NW Market and 15th Ave NW. The reason these bus times are so far off is extremely annoying. Other riders look upset too as we are all trying to transfer- but never smoothly.	3/24/2015 9:21 AM
367	This route (25) should only provide service from Laurelhurst to lightrail stops at UW. Once lightrail is available there is no need to have the 25 going all the way downtown. It will be faster for route 25 commuters to transfer to lightrail, and the 25 should be more frequent given that its travel distance will be 1/3 of its current distance. Bus stops between UW lightrail and downtown should be covered by other bus routes.	3/24/2015 9:19 AM
368	This route is continually over packed, delayed, and slow- it takes up to an hour to get from downtown to Magnuson! It's called an express route but really it's a milk man route. It would be much more efficient if you cut out the stops in the U District and just serve the Sand Point through Ravenna neighborhoods, going straight to downtown from there.	3/24/2015 8:55 AM
369	This is an imperative route that connects the Madison area with Downtown. Without this route, many in the Madison area will not be able to get downtown.	3/24/2015 8:29 AM
370	Please don't cancel these routes. They are the fastest commute to downtown from Kirkland.	3/24/2015 8:25 AM
371	Route 48 needs more buses--there are not as many and they don't arrive as stated on the bus schedules. It would be nice to have 48x back--but running at more frequent intervals--1x to 2x per day during the work week was not that helpful for most riders. We'll need more Park and Rides within Seattle.	3/24/2015 8:10 AM
372	Please keep frequent service	3/24/2015 8:04 AM
373	I would appreciate more options for traveling FROM the University District TO Redmond later into the evening...last bus now is just after 6 p.m., and I often have events that go until 7 p.m. or after.	3/24/2015 7:30 AM
374	Schedule cuts already too drastic. Need all day and evening service reinstated.	3/24/2015 7:03 AM
375	Keep 26 service via Alt 2	3/24/2015 5:23 AM
376	The 545 is a critical route for commuters to the Overlake Transit Center (Microsoft campus). For those of us living downtown, who chose our living situations based on our expected commute, adding an additional transfer in the U-District from train to bus would be a significant degradation in service.	3/24/2015 2:59 AM
377	I forgot to give my 271 feedback earlier when filling out the survey. The bus is a critical link between UW, Downtown Bellevue, and Eastgate P&R. It should be running as fast as possible, not performing coverage missions in Medina. Route it down Bellevue Way. This will allow it to use the Evergreen Point Freeway Station permitting easy same stop transfers for all eastside service.	3/23/2015 11:20 PM
378	This is a very well used route and you want to kill it. It doesn't go through the U district, so it's not affected by the light rail there. The suggested alternate of taking the 41 to the 542 doesn't actually work.	3/23/2015 10:32 PM
379	There are no routes from Northeast seattle to northgate. You have to go to 125th to get anything even close.	3/23/2015 9:52 PM
380	these expensive transit boondoggles are completely unfair to riders on the eastside when they destroy what small service we get over here. destroying the usefulness of the 255, one of the most heavily used routes on the east side, because Seattle has a train is completely thoughtless	3/23/2015 9:18 PM
381	Provides good, on and off peak access to Univ of Washington and downtown Seattle from View Ridge.	3/23/2015 8:20 PM
382	Route 26 is an essential route for connecting Wallingford to downtown. I would like to see it remain in service. Route 16 alone to service Wallingford-downtown results in overcrowding and additional walking (hardship) to reach bus stops. Route 16 is an essential connector from Wallingford to Northgate, and I hope it remains generally the same for that portion of the route.	3/23/2015 8:05 PM
383	I tend of travel during non-peak hours to Microsoft as tech companies have less strict hours. Alternative 1 would really increase my commute time. I love the 545 route today - that would be ideal.	3/23/2015 6:43 PM

384	Those of us taking the 255 want a direct service to downtown Seattle and more frequent service during rush hour. Busses are overloaded as is but none of us want to be forced to transfer at University link station, what a waste of time and effort. The majority of the riders of 540 access the bus at South Kirkland P&R. Don't leave that P&R and we need service after 10 am! 271 is always busy throughout the day going to the UW, the route works, quick screwing it up. Also, keep it running all the way to Issaquah!	3/23/2015 5:26 PM
385	542 is an awesome service from Redmond downtown to U District and beyond. Please don't mess with this!!	3/23/2015 5:15 PM
386	"Continue the 255 up to Magnuson Park"	3/23/2015 4:05 PM
387	I'm curious why route 41 is not listed. Is it because no changes are planned? These are the routes I use most, and in general, I'd like there to be more of them. Route 41 is great during commuter hours, but tapers off later in the evening. I wish it didn't. But more importantly, it would be great if I had a way to get home from Downtown Seattle to Shoreline at any time of the evening on a weeknight without using my car. I frequently like to stay after work in the city and attend theater or visit friends, but I can't do that if I don't have a way home, so I have to drive to a park & ride that has a later bus. Route 77 could be increased to have more hours, or alternate buses between Shoreline and Northgate in the evenings.	3/23/2015 2:51 PM
388	This is a great route for me from Houghton to the UW campus. The drivers are all great and you get to know them all.	3/23/2015 2:36 PM
389	The proposed changes to the 64 in alternative one make it useless to me. I commute to work in downtown Seattle; I am physically challenged and transferring is difficult. It also takes longer to have to transfer, and it's miserable when I have limited ability to stand and to walk. The proposed changes to 71 take away the only non-transfer non-rush hour option to and from Wedgwood and downtown. Same comments about physical changes. this would be a bad blow.	3/23/2015 1:20 PM
390	255: Great connection through Kirkland to Seattle. Needs more frequency and more "marketing" as many if they knew about it would take it to go in for dinner, etc. Today is known just as a way too packed bus. It is not uncommon to see 3, 4, sometimes 5 northbound 255 buses coming within a few minutes here on the Eastside (Kirkland). They need to be better coordinated even when they are stuck in traffic. 44: Good cross town route, but the wait at the Montlake Transfer station in the evening to cross over 520 can be abysmal. "Why did I not drive instead?"	3/23/2015 1:13 PM
391	Reliability is very poor.	3/23/2015 11:49 AM
392	PLEASE leave the #11 route the way it is. It doesn't need more frequency, it just needs to go all the way into downtown Seattle. My commute already feels long enough as it is, without having to transfer on Broadway.	3/23/2015 11:22 AM
393	It is very frustrating when the bus does not show up at all. This is mainly a commuter bus, meaning the same people ride the bus at the same time every day. There should at least be consistent service for this route, because if one bus is late or doesn't show up, the entire commute for the 77 is ruined. Most people can't even get on the bus at the last stop before downtown because the bus is so full.	3/23/2015 11:03 AM
394	I mentioned earlier that the 48 tends to run late during rush hour and they tend to stack up together, sometimes 3 buses within a 10 minute window (at the UWMC). Some buses get overcrowded and the empty buses behind pass the earlier buses. A little frustrating. Would it make sense to split the 48 into 2 routes, maybe overlap at the UWMC stop?	3/23/2015 10:55 AM
395	One bus ride direct to the new University Link station is key for Wallingford residents to use link. Figure out a way to make this happen to serve a large population of residents that currently use transit	3/23/2015 10:48 AM
396	Extend ST 560 to service the Houghton Park/Ride. Those of us who live in the Kirkland area need convenient access to a bus route to the airport. Currently, we must negotiate our way to the Bellevue Transit Center in order to board the 560: very time consuming via bus (at requires 2 buses to get to BTC) and a hassle to have someone drop us at BTC via private vehicle: traffic, non-existent parking. At Houghton P/R: private vehicle drop off of riders would be easy/convenient. When picking up riders who are coming from the airport, sufficient parking available while waiting for the bus to arrive. Bellevue Transit Center does not have these drop-off/parking conveniences.	3/23/2015 10:28 AM
397	The 255 is already over capacity during peak commutes. you know this because you hire people to get on at Westlake to get people to take up less room so that more people can get on at Convention Place. Immediately, add more buses to this run during peak hours.	3/23/2015 10:22 AM

398	This route seems to often run late or off schedule, which makes a commute difficult when you're also trying to use ferry schedules. It would be most helpful if the C line buses could coordinate (at least a little bit) with Fauntleroy ferries. Sometimes the buses are a few minutes late which makes for up to an hour and half wait for another boat. This sort of connection, ongoing scheduling does not encourage people to use transit. One of the main reasons I like Alternative 1 is that I believe in order to get more people to use the mass transit options is to make the service FREQUENT, FAST, and AFFORDABLE. If we could get the basic structure working with lots of frequent rides available for people, even if they have further to go to reach mass transit in the first place, I feel like people might get more used to using mass transit and the system could later be expanded to increase the coverage area from routes that were ended. If mass transit could be made to work effectively, though I know this is a difficult task, our lives would be immeasurably improved. Thank you for all you're doing to make this happen.	3/23/2015 10:19 AM
399	These are great routes that service a great deal of Seattle commuters. Please make sure there are additional buses during after work (5p-7p) hours.	3/23/2015 10:06 AM
400	These routes (71 and 72) MUST be retained! There are so many UW students who ride the bus to downtown Seattle and catch the buses from the dorms off Campus Pkwy. These buses are ALWAYS full! How will they get downtown now? The 73 will be PACKED! If anything, WAIT until the Brooklyn Light Rail station opens before deleted the 71 and 72. It's a long walk to the Husky Stadium Light Rail station from these dorms. Much closer walk to Brooklyn. Bad timing to propose to delete the 71 and 72!	3/23/2015 9:46 AM
401	These are great routes that serve a substantial basin of commuters in the Juanita / Totem Lake area who would normally drive. The 311 is typically standing only by the time it gets to Kingsgate, so eliminating the 252 and 257 routes greatly reduces the incentive for these commuters to ride the bus. Additionally, transferring to the Link Light rail at UW, would create a substantial amount of uncertainty with whether / how long the wait to transfer would be and the availability of seats. It also decreases the time available to work or read on the bus, which is currently a substantial benefit for many of these commuters. If these routes are eliminated, I think it will substantially increase the traffic on I-405 between Kingsgate and 520 and reduce the effectiveness of the new HOT lanes.	3/23/2015 8:56 AM
402	I use 257 every day unless I need to stay late at my office I work at. The I am at the mercy of the 255 and a connection to the 238. This is not how public transportation is met to be for a developed country. My travel times are punitively long as they are. Not to mention the lack of cover from the rain and snow during the winter. Why there is not some sort of shelter at Westlake is beyond me ... but that is what it is. I've been riding the system for 10 years. I think all the decision makers should be required to take public transit like the rest of us. Get a taste of standing in a cold rain or waiting for a bus at 10 PM with temps at 30 degrees. Only to get on a bus where the driver won't turn the heat higher than 55 degrees - it is such a joy!!	3/23/2015 8:04 AM
403	I think existing service on these routes is great.	3/23/2015 7:54 AM
404	Service from Convention Place Center going Northbound during rush hour is miserable. Always large crowds waiting, rarely enough room for everyone to get on, busses always overcapacity for an uncomfortable ride	3/23/2015 6:39 AM
405	This is our closest route and most often goes directly to and from our destination. We often carry bulky items with us.	3/23/2015 6:25 AM
406	Have a stop for ST route 522 between Lake City and downtown, maybe I-5 at NE 45 St or Lake City Way & NE 80 St. Or for a Metro equivalent route. Concept is to provide night service between Bothell/Kenmore/Woodinville & NE Seattle. Better night service to Lake City would also solve this.	3/22/2015 11:02 PM
407	The alternative 1 concept for 255 is brilliant. When taking the route directly into downtown it gets so horribly stuck in traffic and merges just getting to the tunnel, that transferring to light rail will probably be a win on time even if it is an extra step. The main win is the improved east side connections to the neighborhoods around Childrens (and it is remarkably easy to ride a bike to childrens from points further out). This area does not currently have a good transit connection to either eastside or downtown, and that is the reason why so many people drive and traffic can be bad at montlake. This option may be a game changer to reduce vehicle congestion because it will be link into both the light rail and all the 520 eastside services.	3/22/2015 11:01 PM
408	Please make them reach Northgate and the eastern side of UW campus. I don't want to be limited to what's on the western side and have to walk in a bad neighborhood/area that seems to be plentiful in crime.	3/22/2015 10:07 PM
409	This route is the only east/west option for the area along NE 65th St to get downtown. Keep it running.	3/22/2015 8:31 PM
410	Sorry to be redundant and probably this is not the point of your survey but I'm going to take advantage to provide feedback on another issue. One of the main advantages in using metro (and light Rail) is to be able to get to SeaTac from Kirkland via public transportation. However, if your flight arrives later in the evening (say 11 pm), by the time you get your bags, get to the light rail and into Seattle, the metro bus system shuts down. Most major cities I've visited run their buses (even if infrequently) until 1 AM. We just close too early.	3/22/2015 6:14 PM

411	I would like more frequent trips of the 242 from Greenlake Park and Ride. If not all day, then definitely during morning and evening commute times. This is currently the fastest way to get from Greenlake/Greenwood area to Microsoft area. The 48 could sometimes use more buses during the evening rush commutes. Perhaps there could be less stops in the U District for the 542? Thanks for all the service you provide and all your hard work!	3/22/2015 5:20 PM
412	The 26 provides direct single-bus service from Wallingford to Downtown Seattle. Additionally, it turns into 131 and 132 routes which continue south to Georgetown. From my house I can take a single bus to downtown, and to Georgetown.	3/22/2015 4:52 PM
413	This route is a key connection between Wallingford and destinations to the south. The 31/32 are not a substitute. I understand the need to redistribute bus resources but cutting off neighborhoods is not the way to do it.	3/22/2015 4:22 PM
414	I would like to see 245 extended to the Capital Hill Light Rail Station. and I would like to see 311 extended to Bridle Trails Shopping Mall.	3/22/2015 3:12 PM
415	During peak hours, coaches tend to be at capacity/SRO. More coaches, increased frequency, please!	3/22/2015 2:35 PM
416	One word: unreliable. I live about two minutes from the 65 route (and that's because the walk is steeply uphill). Nonetheless, I drive to the UW because I don't know when or if the 65 will show up. An unusually engaging driver told me this is because the 65 is actually the continuation of some other route that is constantly delayed by traffic. The result is whether I'm trying to get to UW (where I usually am meeting someone at a given time) or get home from UW, I have no idea when I will actually get where I'm going. The current 30 minute schedule means that if 65 decides not to show up, it's AT LEAST a half hour before I'll see another bus. I simply cannot do things this way.	3/22/2015 2:23 PM
417	Please do not eliminate or move these routes. So many people rely on these routes, especially students commuting from North Seattle neighborhoods.	3/22/2015 1:32 PM
418	You have a separate system that link does not completely fill. Look at the map and not the final destination! If I'm going from UW to downtown, yes the light rail will do, but until you have streetcars everywhere it would be lunacy to get rid of the buses. Remember the areas removed are often financially less able and removing it would mean movement of more lower wage earners out of the city due to transit.	3/22/2015 1:08 PM
419	I ride the 43 and 48 to and from work every weekday. They are already often standing-room only and occasionally so crowded that the drivers don't even stop to let more passengers on. Along the stretch of 23rd where the 43 and 48 are the only north-south routes, the two new light rail stations will be a 20-30 minute walk in either direction and not really feasible for commuters. Both of these alternatives make cuts to the 43 without increasing service on the 48. North-south passengers in this area really won't have any option except to wait for a more crowded, less frequent bus. I am also concerned about the possible elimination of some of the direct routes between Capitol Hill and other parts of the city (the 43/44 to Wallingford and Ballard, the 12 to downtown and the ferry terminal, the 43 to downtown and Pike Place, the 8 toward Rainier Valley). It is much more convenient to have a single bus going to other neighborhoods than to have to make connections.	3/22/2015 12:15 PM
420	In alt 2: - I noticed that the 67 was deleted. I didn't really care for that. In alt 1: - The 67 no longer goes onto campus, which was the main reason I rode it. - I like that it doesn't change into the 68 for no reason mid route. - There didn't seem to be a reverse route for the 67. As in, it goes down past the UW, but never seems to come back up, unless I missed something.	3/22/2015 11:36 AM
421	I catch the bus at 19th and Madison. If you look at the current options, especially option 1, I would have to walk through dark, unpatrolled, shady areas to get to another bus stop at night.	3/22/2015 11:27 AM
422	8: Frequently off schedule, serious delays on Denny Way. 43 and 48 are both frequently packed in the mornings and I have seen them drive by without stopping to pick up passengers because they were full. Reducing service for either of these routes would be seriously problematic, particularly for riders who do not live near the light rail station.	3/22/2015 9:49 AM
423	Please keep them for the love of god. I don't care/mind if you reduce the frequency slightly, but please keep them.	3/22/2015 3:36 AM
424	I love bus route 71! I live along that line, bought my house because of that route. It takes me to the U District/UW, it takes me to medical app'ts, it takes me downtown, it takes me to Wedgwood to my bank, it takes me everywhere i want to go, any time of day, *without having to transfer.* It takes me to the tunnel where i can get Light Rail to the airport. It is so easy. And now I am about to lose all this? I am shattered. I took the bus everyday for 25 yrs from my house to UW without having to transfer. This is going to be a huge loss. I don't mind 30 min between buses. I hate having to transfer! I can't find a schedule anywhere telling me how long it would take me to get the bus 16 from my house downtown, but since it goes via Wallingford, then Fremont, then lower Queen Anne, i'm guessing more than the 30 min it currently takes!	3/21/2015 10:15 PM

425	There is currently no service from Woodinville to the Mountlake Freeway Station on weekends. During the week it's great.	3/21/2015 7:58 PM
426	Please just see how you can keep this route. Many people use it along 24th to go downtown. Otherwise, I guess I can walk a mile ,either way from my house, to get to light rail. I am not seeing a way for me to travel downtown without a long walk uphill to catch on of the buses on 15th to get there. Very unhappy right now because I have just started to depend on public transportation more and more. I guess progress is not the solution for all.	3/21/2015 7:45 PM
427	As per my previous comments, one or both of these routs should be kept in tact or with modifications proposed in my answers throughout the survey. These routes are consistently full to overflowing - to the point where I have been passed by because buses are already full. Leaving downtown, these routes are often full before they arrive at the Westlake Tunnel Station. Please rethink your plans.	3/21/2015 6:22 PM
428	Currently if you arrive at SeaTac airport past 12:10am at night, there is no connection to downtown Seattle, let alone getting into Lake City until 5am. Would be nice to at least have a couple of "OWL" times from the airport to Lake City. Before Link Light Rail, you could get into Downtown Seattle all during the night.	3/21/2015 4:02 PM
429	Since the 306 route has ended, the 312 is always packed (seats full and all standing room taken) on both directions. Increasing capacity on this route would help.	3/21/2015 3:11 PM
430	Please work on the east to west and west to east routes, it is very time consuming to get from Ballard, Greenlake, Greenwood, Interbay, Fremont to the University district and back, and with the link expansion, more people will be coming thru the area.	3/21/2015 2:56 PM
431	--It's imperative that the route 25 stays in Montlake. Please increase service on this route. More trips on weekdays (throughout the day and night) and start service on weekends/holidays too. --Routes 43 and 48 should stay on 24th Ave E. Many people live in between the two future light rail stations on Cap hill and U District.	3/21/2015 11:25 AM
432	Keep as they are !!	3/21/2015 10:45 AM
433	Have them later	3/21/2015 2:56 AM
434	There needs to be a non-15 route to get from north of the U-District to Eastlake without backtracking or transfers. The 66 currently fills this requirement, and as far as I can tell, neither alternative has such a route.	3/21/2015 12:19 AM
435	This is the only access from the Portage Bay area to downtown or to UWMC. My job requires me to go to multiple locations at multiple times of day, so if there was better access to UWMC (earlier in the morning and later at night), access to UWMC Roosevelt clinic, access to HMC, and access to the VA hospital, I would use public transit more.	3/20/2015 8:37 PM
436	This route should not travel down Boylston Avenue East. This route gets delayed sometimes up to 30-45 minutes because of this stretch of the route. For a route that is only once an hour, it makes the 30+ minute delays very frustrating.	3/20/2015 8:34 PM
437	Please, please include frequency improvements for the 8 through SLU regardless of which plan you adopt! Please split the 8 so westbound riders don't suffer from the unreliable long northbound corridor, and southbound riders don't suffer from the unreliable eastbound LQA / SLU corridor. Why are you not getting rid of the 9X? What a pointless route when Link opens. The corridor will be served by LINK, the 7, 49, 60 and streetcar. We can ditch the 43, but please make the 47 more frequent! There are thousands of riders on this corridor that will need the 47 once the 43 goes away.	3/20/2015 8:23 PM
438	FOR THE LOVE OF ALL THINGS - please make the 8 run on time. Or add more busses, or something. This route is a mess, always late, busses skip constantly. I have to plan to be 45 minutes early any time I use the 8 because I never know if the bus will actually show up, and it's never on time. The 255 just needs more busses that actually go to Seattle during peak time. I just spend almost 60 minutes tonight, standing in the rain at the Kirkland Park and Ride waiting for a 255 that was going to SEATTLE, not farther into Kirkland. The 550Express is slow as hell, but at least the bus shows up on time!	3/20/2015 8:20 PM
439	The are the most frequent routes I use to get around. However all these listed routes are important. We need to improve our public transportation system with the population growth.	3/20/2015 8:09 PM
440	More trips please!	3/20/2015 6:04 PM

441	I miss the 47, as it served a steep part of Capitol Hill that now must hike up to Broadway and hope they timed it right. It was "our" bus for this little region of Capitol Hill. I find seething rage at King County Metro as you cut the 9 away, you wreck the 49 by not letting it continue past Pike, and you killed the 47 and all for what? A constantly put off train that may or may not do anything for getting downtown. In fact, all it will do is make getting to the ID and Uwajimaya easier, both of which were fine before using the 9. King County Metro has so screwed up Capitol Hill by taking away downtown eastbound bus stops, by cutting service, by removing routes. It's such a far cry from before when Seattle City Metro was winning those Best Bus Service awards in the early 90s. It was clear back then Metro was a great outfit. It's just as clear that it now is not. Not for the central city at least.	3/20/2015 5:44 PM
442	This route is perfect for my needs as it is. It allows me to not have a car because it connects well with other bus lines, shopping and my work.	3/20/2015 4:51 PM
443	555/556 - All day service, increase frequency 48/271 - I like the interline concept a lot and would like it to extend to Issaquah TC	3/20/2015 4:14 PM
444	Keep these routes. Do not remove them. A great number of people use these routes regularly.	3/20/2015 3:30 PM
445	I'd love to see more shoulder trips on this route.	3/20/2015 3:08 PM
446	I would like to see more cross-city routes, rather than just those going to downtown. I live in Queen Anne and work in SLU and I have to walk over half the distance or take a bus for between 45 minutes and an hour. Seems like it could be easier.	3/20/2015 3:07 PM
447	I commute on the 8 from Broadway to Jackson and 23rd 5 days a week both directions during non-peak times. Please do not split this trip into two busses, it would really lengthen my trip and it already is dark and dangerous as a young woman alone to be waiting for the bus after 8 pm.	3/20/2015 2:47 PM
448	Moving these routes further away would cause me a significant burden	3/20/2015 2:36 PM
449	PLEASE keep these direct routes until there is light rail from the East Side.	3/20/2015 2:34 PM
450	I have a physical disability and use a motorized wheelchair and I live at 115th and 30TH AVE NE right by Nathan Hale High School in Lake City. It would be easier for me if you were to put an additional 522 stop at 120TH and Lake City Way or allow bus drivers to night stop drop off for wheelchair users we need to get home too	3/20/2015 2:08 PM
451	These are great routes - quick and direct from my neighborhood to Microsoft! I see lots of Microsoft employees on this route.	3/20/2015 2:03 PM
452	The plan to shift traffic from 28 to 16/40 is terrifying given how high in capacity these routes are with commuters along Dexter Ave. At the same time, moving 16 from the Aurora corridor and along Dexter helps, at the cost of creating a much longer trip that will double commute times for many living in Wallingsford who are not in walking distance of Aurora. However, the other portions of Alt 1 are strong, but not these corridors.	3/20/2015 1:58 PM
453	8 Always late. The route is too long and changes direction to often. 26X I don't understand why it doesn't go up stone. 28X I don;t understand why this doesn't stop anywhere on 99 between 38th and 46th.	3/20/2015 1:51 PM
454	These are fundamental throughput routes. They cannot be reduced in any manner that can be considered logical. Even the thought of reducing them coming out of a transit agency is troubling.	3/20/2015 1:42 PM
455	Give us more buses that run through out the day not just in the morning and the late afternoon. From the Brickyard PNR there are no other alternatives. The 255 sucks, it stops EVERYWHERE and takes a ridiculous amount of time to finish the loop. NO more short buses either. I suggest all the planning committee take the 311 from 6:30am and from 4:00pm on and tell me you don't have enough riders to keep this bus line running.	3/20/2015 1:40 PM
456	I live between Lake City Way and 15th Ave NE and rely on transit every day for transportation. I really like the consolidation and increased frequency of the routes in this area under alternative 1. As for the 271, I have mixed feelings about the proposed route-through all the way to Ballard. On one hand, more East-West bus lines are desperately needed north of the canal so this seems like a good way to fulfill that need. On the other hand, I worry that this will result in far more crowded buses and more delays on that line which I could foresee as being fairly problematic due to the fact that the 271 is already predominately a commuter bus that is often pretty packed during peak hours.	3/20/2015 1:35 PM
457	Please make sure we don't lose these routes or people in Eastlake will be forced to transfer buses just to get downtown.	3/20/2015 1:29 PM
458	We need more expresses. The 16 is too long a local route to be reliable. The new idea to reroute it across 65th is great. The 76 and 316 are great, we need more of them. The 26 needs to be express. The 66 should be more of an express. Stops are too spaced to provide good local service, but it's too slow to be an effective express. Alternative 1 addresses all this well.	3/20/2015 1:28 PM

459	Please don't cancel the 277. I use it twice a day, five days a week. It's cancellation would drastically change my morning commute and time away from my kids.	3/20/2015 1:14 PM
460	Alternative 1 changes are good concepts. My daughter travels to North Seattle Community College which seems to be covered in the revised Route 26.	3/20/2015 12:37 PM
461	This is a good well used root, and getting rid of it doesn't make sense. How will transit be used if people have to walk much further to get to a bus, then make multiple transfers to get somewhere. People who can will drive. People who can't drive will be forced to leave the area, there jobs etc. because they can't use transit to get around in any reasonable time frame.	3/20/2015 11:14 AM
462	Clyde Hill/ Yarrow Freeway Station is best location for 246 to connect with ST Express buses.	3/20/2015 10:42 AM
463	Above Lake Union, I would REALLY like to see a route that links north-northeast Seattle with north-southwest Seattle. (i.e. Maple Leaf to Ballard). Currently you have to take two buses and transfer in the University District, which isn't all that safe at night. And this takes over an hour. The only alternative is driving, which is not ideal.	3/20/2015 10:41 AM
464	Please stop omitting the ST #522 route from your planning. This is a vital route for University of Washington Bothell Students. The #372 route serves as a vital link between the Seattle and Bothell campuses.	3/20/2015 10:25 AM
465	I use the 4 routes (10/11/43/49) to go to downtown from Capitol Hill, and back up the other way. A problem I've noticed with these routes is they seem to come in groups, i.e. 3 will come all within a minute then no more for 10-15 minutes sometimes. Especially going from downtown to Capitol Hill, this creates a bottleneck of people waiting for the stop. When a bus arrives, it takes more time for people to load on (often the front bus that arrives in the group is overloaded), which slows down the commute. I would like to see a more spread out frequency, where a bus is consistently coming every 3 minutes.	3/20/2015 9:21 AM
466	It's important to me that the route and frequency remain the same, I commute to bear creek	3/20/2015 9:03 AM
467	48 is one of the few routes that currently provides a continuous connection from southern Seattle to the North through the central district. Please don't cut it/re-route it/lessen its frequency/... just because there'll be a light rail station or 2 close by soon...	3/20/2015 8:45 AM
468	I like alternative 2	3/20/2015 8:26 AM
469	Route 43 remains important even with the Light Rail to maintain transit service to a wide swath of Capitol Hill not well served by the Light Rail.	3/20/2015 8:25 AM
470	Alternative 1 will Dev estate the commuter communities of Kirkland. We rely heavily on these routes as evidenced by the packed buses. It will increase the time we spend commuting and the talk at the bus stop this morning was about setting up carpools.	3/20/2015 8:14 AM
471	Bus comes earlier and earlier everyday (before normal schedule time). Very full buses	3/20/2015 8:13 AM
472	Please keep 41 even when light rail comes. It's fast, easy and convenient!	3/20/2015 8:00 AM
473	i commute daily via bus from downtown seattle to montlake/520 everyday. i would like to see the frequency of service remain the same.	3/20/2015 7:47 AM
474	These routes are much need and are in high demand for more frequent trips.	3/20/2015 7:35 AM
475	Include 1+ hours of later service	3/19/2015 11:11 PM
476	I don't understand how the 43 provided duplicative service which needs to change. It certainly doesn't provide redundant service after the route leaves 23rd east. Please update your marketing materials to illustrate service redundancies and overlap more clearly.	3/19/2015 10:05 PM
477	Removing the route 11 would have a very significant negative impact on my use and evaluation of Metros provided service.	3/19/2015 10:01 PM
478	PLEASE, PLEASE, PLEASE don't take these routes away. They make a HUGE difference to those that live on these bus routes! Thanks!!	3/19/2015 9:59 PM
479	I think the changes to the 372X are great and will be very very appreciated for commuters towards BotheLI/Woodinville! I think it would be great to consolidate routes through the U-district, I just hope that it includes other transit improvements/changes to ensure that buses don't get bogged down getting through University Ave. (the slowest of the current routes through the U-district).	3/19/2015 9:35 PM
480	Continue the fight to get better eastbound reliability improvements along Denny Way. The alternative to avoid I-5 entering traffic should be considered.	3/19/2015 9:24 PM

481	I frequently travel by bus between Capitol Hill and Ballard, often in the evenings, and I take the 43. My difficulty with this route is that I can never tell until the bus reaches Campus Parkway whether or not it's going to continue as the 44 (which is what I want it to do!) or if it's going to go out of service. Is there a way to tell which 43 buses continue as the 44? Is there any kind of rhyme or reason to this that I haven't figured out yet? It's a mystery to me every time I catch this bus!	3/19/2015 8:27 PM
482	I already said this, and I'll repeat it. University Way NE -- The Ave -- is a major shopping area for residents of the Sand Point area and as such they/we need direct access all day long. The loss of #30 during the day is a major problem. Please reinstate all day service of the #30 to the upper Ave -- 41st and up. The #30, between the Sand Point area and along the Ave also provides access to the west side of the upper campus of the University of Washington for students, faculty and staff. Access needs to be available for these people all day long, as we/they come and go all day.	3/19/2015 8:13 PM
483	Even if wait times are longer please please don't cut / consolidate direct 72 U-district--Lake City service including nights and weekends. People who live and work in less central (and often under-served) areas such as Lake City need easy and close access to bus routes including folks with disabilities and women getting off work at night. I would beg the same for other Lake City/Northgate routes including 73, 66/7, 41, etc. Other routes I use often are 44, 43, 48, 49, 32. Thank you for considering.	3/19/2015 7:57 PM
484	#8: It is important to maintain (or improve) service between Madison Valley and Mount Baker. I use the "southern half" of the 8 to go between Madison Valley and Mount Baker (light rail to airport), or will take a 48 northbound from MBTS if that's departing much sooner. Routing to CHS is not an acceptable alternative for travel to the airport. #11: It would be valuable to talk about the impact of Madison BRT on the existing route or proposed alternatives.	3/19/2015 7:56 PM
485	You didn't mention this route or how these changes will impact transportation to and from Ballard	3/19/2015 7:50 PM
486	Giant square of no service between 125th and 145th and between 15th Ave NE and 30th Ave NE. I have to walk five blocks to get to 15th Ave. NE now, but at least I have the option of a shorter walk, to 20th to catch a 73 all day every day. With no service on 20th, this large gap leaves everyone in the center having to walk 7.5 blocks at least to find a bus. As I get older, all that walking distance will make bus riding pretty tough, just when one needs it most, i.e. not driving as much. When we bought our house in the Jackson Park neighborhood both the 73 and the 77 ran on 20th. I commute downtown for work every day, I live at the intersection of NE 140th. St and 19th Ave. NE. Since condos and apartments block my direct access to 15th Ave NE I have to walk either to 143rd or 137th to get to 15th Ave NE. Should I at some point find that walk to be too far, the option of the 73 on 20th is a great one. But of course if it is not there - well? Not to mention all the folks that live east of 20th clear to 30th. they have even further to walk to find a bus, and then it is the 64 or 65 which don't readily connect to any routes to major destinations. I am really not sure why they were introduced into this neighborhood/grid in the first place.	3/19/2015 5:54 PM
487	During peak hours, the 545 bus is already overcrowded. From both the Cap Hill stop and the Montlake stop to Redmond, most peak times, one cannot get a seat, and some of the time during peak times, you can't even get on the bus! Similar situation coming back from Microsoft to Denny/Stewart stop. Please do not reduce buses for this. Please INCREASE buses during peak hours. No worries about stopping at OTC; the 545 is basically a Microsoft bus anyway.	3/19/2015 5:47 PM
488	More frequent service please! Split in the U District to improve reliability.	3/19/2015 5:40 PM
489	The Alternate 1 version of 16 is extremely appealing. It would single handedly close the coverage gaps relevant to me in NE Seattle and would greatly increase my use of transit in the area.	3/19/2015 5:04 PM
490	I think the 72 and 372 are overlooked routes, yet I find that lots of people use them and need them in order to get home. Many of the other routes are not nearly as accessible/close to the area where these buses run. I hope these routes are increased in frequency.	3/19/2015 5:03 PM
491	I would like to request that the FIRST run of the #510 (which usually does NOT take the Express Lanes southbound) make a flag stop in the University District (NE 45th Station.) Thanks:-)	3/19/2015 4:03 PM
492	I've said it before, I'll say it again - the 8 is terrible and I see no evidence anything in your plan would fix that. And yet you seem to waive your magic fairy wand and assume pushing more people onto it and making them use it to transfer to the 48 (or vice versa) is a good idea. STOP IT. Find a way to get a dedicated lane or a different route that doesn't use Denny or give up your wet dreams of using the 8 as a corridor for anything but misery. The 12 is the best route for people living in that section of the hill and has been around a 100 years. Taking it away and forcing people to walk significant distances up-hill to the 10, or downhill to the 48 and then transfer to the 8 and then AGAIN transfer at light rail is one of the most asinine transit ideas I've heard in my entire fucking life. Go back to the drawing board. Keep the 12. Same thing with the 49 - why you push that down Madison except that you think everyone will transfer at the Capitol Hill light rail station (not in existence yet) is beyond me. A lot more people working in the core of downtown than down Madison. STOP IT.	3/19/2015 4:02 PM

493	Please don't cut service on 271 during the work week or make us have to transfer to get to Bellevue/Issaquah. Please. My commute - JUST the bus part - is almost an hour long. Then I still have to get in my car and drive home. I'm commuting almost 3 hours a day. It's only JUST bearable because I don't have to transfer.	3/19/2015 3:57 PM
494	I'm concerned about the lack of direct connection between NE 65th St and the station.	3/19/2015 3:41 PM
495	At present, there is NO service on route #30 during midday. That should change back to day service , no more than 30 minutes apart. The #74 should be kept the same, knowing that it stops near the University station. The #s 66 and 271 should have their schedules lengthened and tightened at night. Both should only be 30 minutes apart, and both should run till 11pm.	3/19/2015 3:30 PM
496	These routes are very crowded during rush hours. That means they are already effective and good routes. Changing them would disrupt a number of passengers. The convenience of their bus stops is worth the headache of waiting a little longer for them. But there should be increased service during rush hours.	3/19/2015 3:28 PM
497	There seems to be an underground knowledge of dead-head trips for certain busses and routes. I'm using the term dead-head to refer to the unpublished trip a bus takes from either a base, or the end of a route to the beginning of a route. Is there anyway for these to become routes that riders could take advantage of? I understand they're probably not listed because they're not a common route, but as someone that rides the opposite way of a commute, I could benefit from these a great deal. They seem like little nuggets that I'm missing. Just a thought, a dream.	3/19/2015 3:23 PM
498	The current route 72(72X) is very, very full at peak times and therefore delayed and therefore becomes unreliable. I believe this is true of other routes, but I am most familiar with the 72. Clearly there is demand for this route at least from the University District through to Lake City and probably from downtown as well.	3/19/2015 3:20 PM
499	I live north of Juanita and the current 255 route stops within a block of my house. I appreciate trying to integrate the new light rail station into the network efficiently, but am also nervous about depending on a transfer either at downtown Kirkland to route 256 or a transfer in the U district to the light rail. If I were assured that my already long trip would remain fairly similar in length, I wouldn't mind dealing with the extra hassle.	3/19/2015 3:19 PM
500	I do think it is important that there be direct bus service from the transitional & community housing in Magnuson Park to the new (Husky Stadium) light rail station.	3/19/2015 3:02 PM
501	I don't drive and rely heavily on metro to get me around. I live in north capital and use routes 8, 49 and 12 to get to downtown Seattle, UW and east capital hill. It's convenient that the bus stops are located outside my home and take me straight to downtown without transfers needed. It's fast and easy. The changes to these routes would make travel time even longer with having to transfer from one route to another or having to walk or find an alternative way to get to the link station. These routes are frequently used by residents and adding changes would just make traveling inconvenient.	3/19/2015 3:01 PM
502	The 66X is a much more reliable means of accessing Downtown from Eastlake especially in the afternoon. it misses the mercer mess and rerouting it so it won't run on Eastlake would significantly increase commute times for a lot of the biotech employees around Eastlake as it would place them in freeway entrance congestion.	3/19/2015 2:52 PM
503	I use this route on 19th Ave E frequently to get to and from First Hill and downtown at different times of day, on weekdays and weekends, days and evenings. There are always people on the bus along 19th, and many of these people would have difficulty making it up the hill to the 10 on 15th ave e. I think that eliminating that route would significantly reduce service for many people.	3/19/2015 2:36 PM
504	The 586 stops running before my evening class at the UW Medical Center ends. So, it would be great if the link rail would connect to a clean, well lit bus stop that connects with the 590 to Tacoma. Also, the link rail should run later, at least until 9 or 10:00pm, so that students can get home easier and not have to drive multiple cars to campus.	3/19/2015 2:26 PM
505	I wish that it was a more-frequent, all day route in both directions, and I wish there was a second route that would go directly to Downtown Bellevue.	3/19/2015 2:22 PM
506	It would be nice to have a direct connection from South Lake Union to First hill.	3/19/2015 2:14 PM
507	I appreciate how often the 545 currently runs. A ton of people board the bus in Cap Hill at Bellevue & Olive when the bus runs from Seattle > Eastside. Would be nice if the bus stopped in Cap Hill on the return trip from Eastside > Seattle.	3/19/2015 1:59 PM
508	The 77 is great, and I would love for it to continue existing as it does now, until there is a Link station at Northgate.	3/19/2015 1:52 PM
509	I use the 72 and 73 daily and for the 72 to be deleted would be very problematic for me. It would also create a lot of trouble for the 73 to be moved to roosevelt ave. I normally take buses from 15th ave to the U-district.	3/19/2015 1:50 PM

510	Re #43. I really like alt 2, but see losing the 43 as a significant loss. Especially personally, as I live right near CHS. Sure I can get to Husky Stadium faster with link, but the 43 is great for all the points in between. Re #8, I know it's outside of the scope of alt 1/2, but that bus will still suck due to traffic on Denny. Denny really needs to get fixed (along the lines proposed by STB), and long term needs a dedicated lane or better yet a subway! Or if not a subway, perhaps that quirky gondola they keep talking about... And in general, I strongly support more rail. AND, finding ways to speed the construction of the rail network. It is taking an awfully long time.	3/19/2015 1:43 PM
511	Please make sure that this route has a consistent weekday service.	3/19/2015 1:28 PM
512	Best connection to Downtown Seattle. It is not duplicated anywhere.	3/19/2015 1:18 PM
513	Not much mention of the 40 and 309, both of which are major SLU buses! What is the plan for these? Also, when you talk about high-frequency buses (every 15min), the 40 is supposed to be at this rate right now, but they consistently run late so that usually you get two buses back to back every 25-35min. Is this what really will happen with a high-frequency plan? As for the 312/522, again NE Seattle to downtown, necessary routes that are always packed during rush hours, hard to imagine your ignoring these or reducing stops, etc. Would like to know more about these as well.	3/19/2015 1:12 PM
514	Appreciate the current frequency of service in the morning hours from 8-9:30 from Woodinville/Kenmore to UW Need more frequent service going outbound (from UW to Woodenville/Kenmore)--leaving UW between 4 and 5 pm...buses are often overcrowded and people are left behind to wait for another bus which sometimes may not come for 15-20 mins. That later bus is also very crowded.	3/19/2015 12:51 PM
515	The current 48 is too unreliable/crowded to use for commuting in the afternoons. Separating the 48N and 48S is imperative to making the route more usable.	3/19/2015 12:32 PM
516	I really feel strongly that service for the 542 should be expanded. It would cut down on crowding on the 545 during the weekdays after 6:00 out of Seattle, when the 542 stops service. It would also be very helpful to me as a graduate student to be able to access my research on the weekends. Even if the 542 only runs on Saturday.	3/19/2015 12:00 PM
517	I'm still confused about what happens to the 41. Will it be eliminated upon completion of U-Link? This will lengthen my commute considerably, and mean more transfers.	3/19/2015 11:44 AM
518	increase frequency	3/19/2015 11:41 AM
519	All of these provide much needed service to and from Sand Point. With a regional park and significant multifamily and multigenerational housing in and around the park, there needs to be coordination between Metro and SDOT to get the most effectiveness out of transit service to the area. Safety and access for transit users trying to access the existing stops along Sand Point Way is abysmal with speeding cars across four lanes and intermittent sidewalk connections to transit stops.	3/19/2015 11:17 AM
520	I'd like to see improved service between First Hill and SLU. Perhaps down Boren Ave. Right now there are no good transit options between First Hill proper and SLU (the 8 is too far of a walk).	3/19/2015 11:16 AM
521	The 26 serves my current neighborhood well but there is hardly ever anyone on it. I ride it during peak morning commute time and I've never seen more than 15 people on the entire bus (which is a larger articulated coach). I then transfer to the 44 which is often full to the very front with standing room only. So I've been curious about the proposed changes to the 26, which I had heard was merging with the 31 or 32 in the future. It seems like a lot of valuable ridership space is wasted on the 26, being so empty. I am not sure if the smaller coach can travel the back roads of the 26 route but it would make more sense.	3/19/2015 11:08 AM
522	# 16 northbound from Green Lake is just fine the way it is. Something should serve Northgate Way between Meridian and 5th NE. There are many Dr.'s offices, Target, and a way to enter Northgate Mall, and the businesses at 5th and Northgate Way.	3/19/2015 11:00 AM
523	Just want to add that I think keeping these routes frequent would be the most beneficial as there tend to be a significant number of riders on these routes.	3/19/2015 10:57 AM
524	These three routes are the primary routes that I use and would like to have more frequent service. I would like to have have regular, say every 10 minute service on all 3 of these routes.	3/19/2015 10:49 AM
525	please keep these routes!	3/19/2015 10:41 AM

526	<p>Currently, the 71/72/73 from Downtown to the U-District is terribly crowded. Most riders load at the International District and disembark at the first or second stop in the U-District. A great portion of these riders take Link to get to the ID in the first place. I feel strongly that Alternative 1, with the increased options and frequency of transfers between UW Stadium Station and The Ave/15th, will more evenly balance the number of riders on the buses and reduce the amount of time spent waiting at the stations/stops as well as on the bus as people decide if they're actually going to move all the way back. If I'm reading the interactive map accurately, there are at least three routes (45, 48, 67) a rider could take from UW Stadium Link Station to the general UW corridor, all with 10min interval frequency, which seems to imply there would be a bus every 3-4min. Wonderful! Knowing there will be another bus in just a couple minutes will go a long way to quell riders' impatience and sense of urgency to push their way on to the first bus that shows up. Alternative 2 seems poised to give fewer choices for these riders, maintain current congestion and wait times, and engender irritation at the perceived lack of improvement in spite of the new Link service to the U-District. Riders with this particular commute (south of Downtown to U-District) would appear to have two options--ride to downtown and switch to a 71/72/73 OR ride to UW Stadium and switch to a 48. This seems like forcing riders to guess which option will be the best/fastest choice on any given day, and that is never a recipe for success. Thank you for all the hard work in trying to improve ridership and service for Seattle's public transportation system. A first rate city deserves a first rate system.</p>	3/19/2015 10:40 AM
527	<p>These are vital connections between NE and NW Seattle. Being able to link directly to the Light Rail could have great advantages. I would like to see that the frequency of these routes are maintained and increased. 48 should either be split into two routes as in Alt1 or bring back the 48X for commute during peak hours.</p>	3/19/2015 10:31 AM
528	<p>Ballard is in greater need of transit service improvement than the U District, and we are just as populous/important, and similar distance from downtown. The Sounder should stop near the intersection of NW 57th St and 37th PI NW. There's a ton of empty space all around the rail line to build a bus turnaround, bus stops, and even a parking lot. A frequent Ballard bus loop could easily be made to go right past there, Golden Gardens, downtown Ballard/hospitals, Ballard Senior Center, Ballard Locks, and anyplace nearby with a large park and ride, etc. This would provide vastly improved transit service to thousands of near downtown neighborhood taxpayers and commuters at a much lower cost than building new rail across bridges and through existing developed areas. If a good turnaround and park and ride were included it would also provide a much closer/faster stop-off point for buses used when landslides temporarily interrupt the Sounder service farther north. The trains could just run back and forth from the Ballard stop and the buses could go from north back and forth to the Ballard stop.</p>	3/19/2015 10:20 AM
529	<p>Concerned for safety while on bus.</p>	3/19/2015 10:08 AM
530	<p>The 41 needs to run more often in the evening after rush hour. I often ride it at night and it's packed full of people. It needs to run more often than every 30 minutes. Keep the 66/67 on 5th Ave NE, and if anything you should be increasing the frequency of service on 5th Ave NE. There should be more frequent service in Maple Leaf to the Northgate Transit Center, especially when the Light Rail starts running. DO NOT MAKE EVERYONE IN MAPLE LEAF CATCH A BUS ON ROOSEVELT!!!! THAT'S A REALLY BRAIN-DEAD IDEA!!!!!!</p>	3/19/2015 10:04 AM
531	<p>These buses converge on the same route for the last few miles on 25th ave into the UW campus and they're frequently overcrowded, to the point of leaving people behind with the next bus nowhere in sight, and the buses are often off schedule (more often late, but I've missed busses that came 6 minutes early for no apparent reason). Increasing the frequency of one or both routes, under either alternative plan, so this doesn't happen is key for the UW students in the Laurelhurst/Ravenna/U district junction there (the area surrounding 25th Ave between 50th and 75th).</p>	3/19/2015 10:00 AM
532	<p>Eastlake is very isolated, except for the 70 and 66. Removing these would be a disaster; I would stop using transit in this case.</p>	3/19/2015 9:44 AM
533	<p>should have one or the other run later at night</p>	3/19/2015 9:28 AM
534	<p>There use to be one route from Alki/Harbor to the UW (37/25) and then you split them up and didn't coordinate their schedules so we could actually get off one and easily catch the other. Then you reduced when they ran. So now I have to drive everyday via 99 to get to work on time. But that means parking in Wallingford in order to catch the 31/32. So, until you have better public transportation options for West Seattle - including routes that cover more locations - none of this interests me.</p>	3/19/2015 9:11 AM
535	<p>I'm on a van pool now. I sometime use 121/122/123 to downtown Seattle then take 71/72/73/255 to the University street and 45th then get any bus to the Medical Hospital. Now I'm happy to cross the Pacific street then get on the Light rail Link to get down to my place close to SeaTac Airport. I'm excited to wait for the Link. It will be great if King county Metro can expand the parking lot in Tukwila Sound Transit Center. Thanks</p>	3/19/2015 9:07 AM
536	<p>Please restart the 47 route. It was extremely short-sighted to remove this route during the previous cuts. This was a primary route to downtown that did not need to be cut. Services could have been reduced, but the deletion of the route was a poor decision.</p>	3/19/2015 9:01 AM

537	This could be a acceptable commuter route although it would be better rerouted to Fairview. that would serve both the Eastlake side and the SLU side. It is useless to SLU/Eastlake if it is just another I-5 express	3/19/2015 8:53 AM
538	I have heard that the express 255 will not stop at Montlake during Peak travel times, but I board that bus almost every day and there are many riders who get on and off at the Montlake Freeway Station during that time. Please maintain frequent service to Montlake during peak times!	3/19/2015 8:47 AM
539	Thank you for bringing back this crucial route.	3/19/2015 8:23 AM
540	I hve a concern about moving route 31 and 32 service away from Stone Way & 40th Street. The 40th Street corridor attracts heavy ridership to and from the University of Washington campus. The 44 is not a usable alternative, both because of the steep and long walk up the hill to 45th Street and also due to significant reliability and crowding issues during rush hours. I recommend keeping the 26 along 40th Street/Wallingford Avenue/35th Street and keeping the 31 and 32 along 40th Street/Stone Way (as is the current service pattern). The 26X should also stay as it currently is. I also recommend keeping the 16 as the Aurora Avenue route between Fremont and downtown Seattle.	3/19/2015 8:00 AM
541	70'S EXPRESS BUSES NORTHBOUND AM ROUTE SHOULD TRAVEL EAST ON 45TH AFTER EXITING I5 THEN NORTH ON UNIVERSITY WAY, CURRENT ROUTE DOWN ROOSEVELT, CAMPUS PARK WAY TO UNIVERSITY WAY IS NOT EFFICIENT. SOUTH BOUND EXPRESS PM BUSES ARE PACKED WITH TOO MANY RIDERS, NEED TO CONSOLDATE STOPS IN U DISTRICT FROM 5 TO 2.	3/19/2015 7:58 AM
542	Wish to maintain a route that connects from Capitol Hill to Fremont (like the 43 changing into the 44).	3/19/2015 1:08 AM
543	It'd be great if 545 still stopped at Montlake. It's helpful to have the 43 even with light rail.	3/19/2015 12:28 AM
544	Hi there, my name is Alphonse Wily. I just wanted to say please keep the 545 running from downtown (Westlake) to Redmon SR520 OTC (Overlake Transit Center). It's the only way i get to work. Without it, i can't work and i can't help my family with financial needs. I'd greatly appreciate it you guys keep that route as that is the only way i go to work etc. I know i can't speak on behalf of everybody else that uses that bus to go to work but i'd like to say that it's been very helpful as i dont drive and like to use the bus most times to go to and from work. A great bus route, great bus drivers etc. Thank you. Please contact me if needed: wilybros@yahoo.com	3/18/2015 10:29 PM
545	Route 372 is the main north/south route between 15th ave NE and 35th ave NE to UW. It would be nice to have a stop at NE 82nd St where Ravenna Ave NE and 25th Ave NE merge, b/c those of us who live in the neighborhood not only have to walk down the hills but also have to walk down 25th to the nearest stop. The walk is almost the same amount of time as the bus ride. The walk time would be cut in 1/2 with this stop added. I have missed the bus many times b/c of this walk as it passes me b/f I arrive at the stop. More frequent 373 trips to/from UW.	3/18/2015 10:22 PM
546	I love alternative 1 except for one item. My primary concern is the traffic associated with Southbound Montlake Blvd. from 45th street to the UW light rail station. In the evening traffic is terrible and would heavily impact the travel time to get to the UW station. I typically use route 65 to get to UW, and would continue to use the 65 to get to the light rail. However, if traffic is terrible, it might be easier (and maybe quicker) for me to drive, which would completely defeat the purpose of the light rail. I strongly urge you to assess ways to improve the route time for bus traffic along mountlake blvd, from 45th, to the access point of the UW light rail station. The benefit of public transportation shouldn't merely be that it can get you places without a car. It should also get you to that place in the same or less time.	3/18/2015 10:02 PM
547	Please bring back the 48 express. The 48 is standing room only every day and buses pass us by because they are too full in the evening	3/18/2015 9:16 PM
548	This is a terrible idea. For anyone living in North Capitol Hill more than five minutes walk from the Broadway and John light rail station, this will mean longer commute times to the University District. I make this commute every single day. These buses are full every day, and most travelers from the UW to Capitol Hill get off the 43 more than 5 minutes walk before Broadway and John. Moreover, the walk from the UW light rail station will add an additional five minutes to my journey. I estimate that my daily commute from my house (16th and Republican) on the light rail will be 20 minutes LONGER than it currently is using the #43. This is not public transportation progress. It is a light rail boondoggle. Sincerely Robert Wood Professor, University of Washington PS. The same thing happened with bus route 194 which reliably took passengers from downtown Seattle to the airport in 30 minutes until it was cancelled because of the light rail. The trip now takes 40-45 minutes on light rail. Is this progress? The idea is that new transit systems augment the public transportation system, not replace existing components.	3/18/2015 8:56 PM
549	More park and ride spaces are needed in Kenmore.	3/18/2015 8:54 PM
550	concept 1 for route 16 would be great!	3/18/2015 8:15 PM

551	This bus route is extremely dangerous to take at night. More metro security is needed so people feel safe. I have personally witnessed drug use, fights, and other prohibited activities time and again on this route.	3/18/2015 8:12 PM
552	Please increase the frequency. I would especially like to see the 72, 73, 66 and 67 run more frequently after 7pm and the 68 to run daily and more frequently.	3/18/2015 8:08 PM
553	Route 48 should be extended to Columbia City.	3/18/2015 7:46 PM
554	Frequent delays, and more needed, there're many times that there are too many people, half of the people waiting at the bus stops cant get on, and have to wait another half hour.	3/18/2015 7:42 PM
555	- Route 48 gets very crowded to and from U district. - Route 28 has stops too close together. It makes little sense to have stops less than 5 blocks apart.	3/18/2015 7:19 PM
556	The 75 now suffers more delays than previously. The 372x is always too full during peak hours (I frequently need to wait for 2 buses to find space). The 68/67 stops service too early, thus leaving only the 372X after 6 pm. I use the buses most frequently in the evening and during to the 45 min to 1 hour waits after 8 pm, I am forced to rely on UW shuttles instead of transit to go home.	3/18/2015 7:15 PM
557	This bus route is still over crowded and inconsistent during the afternoon peak times. More buses are needed between 4 and 6 pm on this route desperately.	3/18/2015 7:00 PM
558	Keep a 71 express to downtown from Viewridge, please.	3/18/2015 5:54 PM
559	Make sure there is a contingency route to get from the Ave/U District to downtown as fast as you can today in case of any issues with the link.	3/18/2015 5:38 PM
560	316/76 - There is clearly demand for later morning runs on these. 48 - North of the UW Link station, if restructured into the 45, there should be peak-period busses that skip some of the many Ave stops.	3/18/2015 5:22 PM
561	This is the route I use most frequently. During rush hour it is frequently late and there is usually only standing room available. The 255 route needs more capacity (more buses arriving more frequently)!	3/18/2015 5:19 PM
562	Route 48 is broken. There are too many people riding it at rush hour, the traffic causes unpredictable and unavoidable delays, and the route is so long that a time-consuming problem can delay an individual bus for a very long time. The only way I see to fix this is to break the route in half and the UW is as good a place as any for the break. Make two routes that overlap in this area and put sufficient coaches on it for the anticipated riders at predictable times. Route 67 does all I want it to: Take me from UW to Northgate. Once light rail can make this trip, I won't have any more need for it.	3/18/2015 5:15 PM
563	Frequent service on the 49 from North Capitol Hill/Roanoke is a critical link not only to the future East John station, but also to the Pike/Pine corridor.	3/18/2015 4:50 PM
564	These routes are very well used and should be continued !	3/18/2015 4:48 PM
565	These routes are currently incredibly crowded during peak hours, forcing people to pack together in an unsafe manner and often leaving others behind. Numerous bus drivers have complained how it is a safety hazard for them to drive such overloaded buses, as their braking ability is diminished. This needs to improve.	3/18/2015 4:40 PM
566	Currently this route is very effective and efficient from my neighborhood at 85th and 35th going to and from the UW campus. I would like this to remain the same if at all possible.	3/18/2015 4:39 PM
567	48 is often standing room only 8 is often late	3/18/2015 4:37 PM
568	Please keep this bus running. Do not cut this service. We have a lot of students and employees that rely on this bus to and from work. Bus 566 should stop by the Library in Renton rather than going straight to Renton Landing. There should be a good connection between Route 566 and bus 271 in Bellevue, Sometimes 271 leaves right as our bus 566 arrives in Bellevue transit center. So we end up standing there for another 15 or 20 minutes before the next 271 comes.	3/18/2015 4:31 PM
569	This route is crazy crowded. I sometimes have to wait for 3 buses to get home if I get on at Montlake. I love the 542. Not crowded, buses newer and cleaner, straight shot.	3/18/2015 4:25 PM
570	I wsh there would be more and all day trip especially for RT 373 making it a regular trip not only one way in the morning and in the evening.	3/18/2015 4:02 PM
571	I use route 43 quite a bit, though if alternative 1 were used, I can see why the route would be deleted.	3/18/2015 3:42 PM

572	255 is a life line direct to downtown. it should not be just peak times on workdays, nor should it require a transfer to get downtown. that means three (!) buses to get downtown for those who do not live directly on the 255 271 is a wonderful bus, and is often fully subscribed. this bus needs to run at all times and days of the week. More frequently is not the issue for me. closing bus stops to make the run faster, or more "efficient" is not a good idea as mobility is an issue for many who depend on this bus. thank you	3/18/2015 3:41 PM
573	The 44 has been so crowded that stops are often skipped further on the route, or I have to wait for a later bus.	3/18/2015 3:40 PM
574	Please do not change these routes! For people coming from the far south (Pierce County) near the JBLM military base. There aren't many routes available for students who live this far south to get to the University of Washington in Seattle. It would be a travesty to see one of the only routes available to people located in this area to be diminished in some capacity or taken away all together for the now unreliable Link Light Rail. University Students need a reliable and on time/timely solution to getting to an from school.	3/18/2015 3:36 PM
575	Please consider that this bus is always full and at least link it to the trains to get both downtown and UW.	3/18/2015 3:36 PM
576	I live too far north on Capitol Hill to use the light rail regularly between Cap Hill and U District. I still need the 49 to run from the rail station or Roy Street to the U District every fifteen minutes. Thank you!	3/18/2015 3:29 PM
577	The connection between the 31/32 coming from Fremont to the U-District and the 71/72/73 going north on University Way: Needs better timing.	3/18/2015 3:25 PM
578	I'm concerned about there being no 72 services as I do use those on occasion, particularly on weekends. My husband also frequents the 66 on weekdays. I would be concerned on losing a connection to-from the U-District/South Lake Union unless other routes had their frequencies increased.	3/18/2015 3:21 PM
579	I wish this route joined the new UW Link station	3/18/2015 3:18 PM
580	They provide quickest direct route from Westlake Center to SLU, in particular FHCRC/SCCA campus and to Eastlake 1616. I would hate to lose 66X route from Westlake Center to SCCA and it seems to always be full during weekday peak times.	3/18/2015 3:08 PM
581	It's good to have additional service on the new 45 proposal. The linkage to a route that crosses Lake Washington seems to be a recipe for consistent delays. My usual commute is to take route 355 down to the Roosevelt Medical Center and then transfer to a route serving the main UW campus. That option appears to be eliminated in both proposals. There is a distinct constituency	3/18/2015 2:59 PM
582	A double bus would be helpful at peak times 7-9am and 3-6pm. Those times are when there are the most people on the bus. Often, people have to stand on the bus between UW and Magnuson Park heading North and sometimes not everyone can get on when it is a single bus. If I see a single bus when I am leaving UWMC after 2:30pm I sometimes will wait for the next bus, hoping its a double, because I am more likely to get a seat even if I have to wait 20-30 more minutes.	3/18/2015 2:53 PM
583	I have been riding this route over 400 times a year, for over 25 years. I use it to/from work, to/from Safeco Field, to/from Benaroya Hall, to/from the library, etc. It serves the Country Doctor, St. Josephs, Holy Names, the ferry service, Swedish, Virginia Mason, etc.	3/18/2015 2:50 PM
584	The 73, 77 & 373 are my family's most used routes. Having reliable access to the University District and downtown at peak and non-peak times is very important to us. Please don't reduce the service on 15th Avenue NE. Adjusting the schedule for those three routes would be a better solution to consolidation of service.	3/18/2015 2:48 PM
585	The 66X and 67 routes are the ones I use most often to get from the Northgate Transit Center to the University District for work. Alternative 1 seems to suit me the best with 10 minute wait times. Alternative 2 would be acceptable with 15 minute wait times, but I much prefer Alternative 1. Thanks for continuing to include these services in your ongoing plans.	3/18/2015 2:42 PM
586	Keep 252	3/18/2015 2:41 PM
587	Why is this bus ALWAYS LATE ? we call it the Forty-Late. Really, why are the across town transit times shown in your schedules so unrealistic? You need MORE 48 busses. MORE often. That way we can hopefully avoid having two 48 busses, back-to-back. The first one horribly late, the second on-time. Many times that late bus does not come at all. Are there random cancellations? Please revise the schedule for this bus. It is frustrating to ride, and unreliable during morning and evening commutes. Thank you, - a daily rider	3/18/2015 2:39 PM
588	Keep the route the same. Do not dump it downtown for transfer to 13 or some other route.	3/18/2015 2:34 PM

589	545 needs a late evening route so we can get back to the east side after plays/events. Currently we can't take transit and attend events in Seattle which end after late in the evening due to lack of routes or lack of frequency. Same with trips from the airport to the east side, 545 doesn't run late enough for the last arriving flights of the day or the first flights of the morning. This makes taking light rail impossible for those trips (and light rail is often slower than bus due to all of its stops). I wish light rail had express runs from airport to Westlake and other new major hubs	3/18/2015 2:32 PM
590	Please keep the connection between SLU and the heart of Madison Valley!!	3/18/2015 2:30 PM
591	I have always thought that the current route is so long -- across the city from Rainier Valley to the north Ballard area. Whenever there is a traffic situation somewhere along the route, it makes for buses being either really late or sometimes 2 or 3 buses come within 10 minutes since they've been backed up. I like the idea that there is consideration for routes that serve the Univ. District area (UW and UWMC) as many students and workers depend on the bus for transportation.	3/18/2015 2:24 PM
592	With this route many people can walk directly from their homes to their bus stop. It would be great if there were earlier afternoon routes available.	3/18/2015 2:24 PM
593	Deleting route 242 makes no sense especially since the peak trips for the 542 are remaining the same. The 542 busses are already packed. This will make them much worse. Also, a lot of the 242 ridership comes from 148th in redmond which there will be no bus support for. The evening 242 that I take is packed to standing room only every day. Not having more 542s will make the evening ride very, very crowded as the 542s are also packed both ways. The changes to the 71 make the 65 to light rail the main access to downtown for Wedgwood, but the 65 bus only runs until Midnight. This makes it not an ideal route when returning from downtown. The current routes 64, 71, 76 all travel along NE 65th street. The way they are scheduled, they all arrive within a couple of minutes of each other. Often one bus will pass another on 65th. If a rider misses the window when these busses come, it is about a 20 minute wait for the next bus. 20 minutes seems like an excessive time when there are 3 busses on this street. Please look into staggering the times of these busses on 65th more to make it more convenient for both riders and drivers who will no longer have to deal with passing another bus.	3/18/2015 2:13 PM
594	49: Likes: -Frequency is pretty good. -We have larger buses running this route most of the time, which are needed for the demand. Dislikes: -Seem rarely on-time, especially in the morning. -The buses are in horrible condition and especially smell bad in comparison to other routes (even without people on them). Please, for the love of god, give this heavily used route new buses. -Would love to extend the route further into downtown (perhaps going South down 1st or 2nd during high commute hours to take people to work) instead of turning around at 2nd. 47: This was the perfect bus and connected so many blind, elderly and disabled people who live in "I-5 Shores", who are now put out. It was ALWAYS on time, heavily filled during commute peak hours, and had kind drivers + patrons. I felt safe on this bus late at night. Please reinstate this bus! :) Thanks.	3/18/2015 2:06 PM
595	Avoid University Avenue -- move traffic to 15th, or Brooklyn	3/18/2015 2:01 PM
596	This route could use an express option for people traveling to the U-district from Ballard and Wallingford. It can take almost an hour to commute even when traffic is light-- huge chunk of time to be sitting carsick on a bumpy bus.	3/18/2015 2:00 PM
597	271 is my main route because it is frequent enough that my irregular work schedule can be accommodated and I can link it with driving (Issaquah to Bellevue/271 to UWMC) to get to and from my kids schools in Issaquah in ~45 minutes average. There is not enough parking in Bellevue. Eastgate P&R does not have easy access, plenty of parking. South Bellevue P&R has great access for my commute but not nearly enough parking. And the East Bellevue church P&R's are great but also either full or now closed. If 271 were frequent and made less stops, I could ride literally from my neighborhood entrance to my office. Currently when I do that, it takes about 1 hour 15 minutes. Perfect route - impossible to use practically. I'm a working mom. 556 is better - I can bike up to the P&R faster than drive and park. It is not frequent enough and doesn't cover the commuting hours, particularly the evening, as well as I need. Again, I would like to see the route more direct, less stops. It's a full bus. I do not use 556 at all because it's not frequent enough and doesn't have good evening or late morning coverage.	3/18/2015 1:59 PM
598	I only hope that ST will continue to support this extremely important route that takes people all the way between downtown and Woodinville. It is a lifeline!	3/18/2015 1:57 PM
599	The Rapid Ride "D" Line, the 355X, the 40 and the 48 are what I ride most. (Only the 48 seems to be mentioned above in the choices). Thank you for these routes, and especially for the late hours of Rapid Ride. The late hours are invaluable for folks who like to attend concerts and clubs without spending \$30 or \$40 for a taxi home at the end of the night--especially if they drink. I've never had a car, but I pay attention when I'm on Rapid Ride, & I'm certain that Rapid Ride averts drunk driving every single day of operation.	3/18/2015 1:53 PM
600	This bus is often late. Not sure if any of the alternatives will help with this. If the 73 does not extend to 145th, it is important to have the 373 run more often.	3/18/2015 1:52 PM

601	PLEASE do not eliminate the 43 route.	3/18/2015 1:44 PM
602	16-- chronicle and consistently running behind schedule in the mornings	3/18/2015 1:42 PM
603	It is ridiculous that there is no Northbound service after 6PM.	3/18/2015 1:33 PM
604	Is this route being affected?	3/18/2015 1:31 PM
605	For metro routes, we need more frequency/reliability. For ST routes, we need more commute capacity and more service between metro areas at night	3/18/2015 1:28 PM
606	Route provides very convenient access to services on Madison	3/18/2015 1:28 PM
607	I don't agree with the proposal to change the route to not provide downtown off peak and weekend service. Those two timeframes are not really addressed in the first plan. For me, having to use the light rail on off peak hours would add enough time to my commute that I would probably consider driving and parking downtown instead. I already spend 2 hours a day commuting, more than that is unacceptable to me.	3/18/2015 1:27 PM
608	Keep the 73 running.	3/18/2015 1:25 PM
609	Increasing the frequency of this route would be great as the bus is almost always packed, particularly at peak hours. In addition, weekend service would be useful to get between UW - particularly the Medical Center and up to at least Lake City (or further north) where another bus could be caught to get up to Kenmore/Bothell.	3/18/2015 1:23 PM
610	More frequent trips. Also I live on 64th and have to walk a half mile to get to the 44 in order to get a direct bus route to the u-district. It would be nice if there was a bus that ran north-south along 24th or 14th that went directly to the u-district. Also a 44X between these areas would be awesome!	3/18/2015 1:22 PM
611	I'm not sure if this would change with either Alt 1 or 2, but I don't like that not all of the 372 buses go to Bothell. The ones that stop in Kenmore usually have less riders and the ones that go to Bothell are packed by the 2nd or 3rd stop on the route. This tells me that there are more people that want to travel north of Kenmore so there should be more trips that go beyond Kenmore P&R. And why isn't the 522 listed anywhere in these options? That is currently the only bus I can take from Bothell to downtown without transferring. Since my mother is disabled with mobility, the less transfers I have to take the better.	3/18/2015 1:22 PM
612	The routes mentioned are always full and do not provide fast service to the University of Washington. The times for the 556 are infrequent in the morning when it is needed the most.	3/18/2015 1:22 PM
613	buses are crowded during peak. I hope there will be an easy connect between route 550 from Mercer Island and from Bellevue to the Lite Link to get to UW.	3/18/2015 1:21 PM
614	Please do not change timing on a morning, specifically to arrive at the HUB around 7:20 and 7:50am - Look at potential to provide longer/ a second bus during first week of classes in September - buses are full and do not stop for passengers frequently.	3/18/2015 1:19 PM
615	I know this route wasn't listed, most likely because it isn't affected, but I want to say that it has become a very frequent, highly reliable route and I love it -- hopefully it won't change with any of this.	3/18/2015 1:18 PM
616	This route serves the south Sound workers and students who commute to the U District every day. The route is heavily used, with most buses full to the point that many people are standing up the entire way, which is 25 to 35 miles. We need the second bus in the morning replaced, as there is a 50 minute gap between the first and next bus, coinciding with the time that many of us need to get to work at the hospital. We also need the schedule to not be reduced every Fall right when the new crop of students begins. In the Fall, we are so horribly overcrowded for the first two weeks of student attendance that many of us give up and drive. That is very costly, frustrating, and time-consuming for us, as driving takes considerably longer than the bus ride.	3/18/2015 1:17 PM
617	The 43 takes so much longer than the 43 for seemingly no reason. I would love to see this route speed up!	3/18/2015 1:15 PM
618	General comment: Transfers (involving either bus or light rail) are the weakest link in getting somewhere, even if the goal is more frequent / more reliable service -- it doesn't take many failures to convince me not to trust a schedule. So the thought of having to transfer to bus or light rail means higher risk of a longer commute, and therefore I'll find another way to get there: walk, bike, or drive. And walking an extra 2 or 3 blocks to catch transit really is too much in some cases -- I already walk a lot to catch some buses. And the light rail stations are so far apart, and so far away from useful locations (for me) I'd much rather take a bus even if it's slower.	3/18/2015 1:12 PM
619	In favor of expanded service for this route.	3/18/2015 1:10 PM

620	<p>These are the 2 main routes that I use to get to and from work, the first problem is that one or the other does not come and then I am at least 30 minutes late to work. This happens so frequently that in the summer time I walk to my second bus because I am so afraid of being late. It already takes me 10 minutes walk to get to the first bus! The next problem is that they do not connect to one another, for example I catch the 31 at 5.39pm at the Hub and by the time I get to Magnolia it is 6.26pm - the 24, my next bus left at 6.14pm and the next one is not until 6.43pm. So I frequently have to walk for 20 minutes to get where I am going - not so bad in summer, but pouring rain means I am soaked by the time I get to my destination. Not so great. The next problem is that the 31 is so full when I get on at the Hub or thereabouts, that I worry about being able to get home. This is the only bus from where I work that goes close to where I live, I have no alternate route and get off at the last stop. It appears that many people get off in Fremont perhaps there needs to be more frequent service, at least to Fremont. It has become so bad lately that I run to Fremont, even in the pouring rain! The 24 now has the same issue since the 19 was taken away - so full it's a joke. The last issue I have is that there is no service on Sundays on the 31. This means that anywhere I go must be via the 24. I hope light rail fixes a lot of these issues, although it won't be anywhere near where I live, perhaps you can put a few more buses out my way!</p>	3/18/2015 1:08 PM
621	<p>Don't get rid of it please!!</p>	3/18/2015 1:08 PM
622	<p>This route is too long and unreliable. Often too crowded to get on in the U district heading north. Perhaps split into two routes as the 44/43 which seems to be more frequent.</p>	3/18/2015 1:05 PM
623	<p>Please have them run more frequently, particularly during peak hours. These buses are very busy when UW classes are in session, but VERY few students actually live in Magnolia. Often, students are riding this bus to Fremont, but this causes huge delays due to frequent stops in addition to the significant amount of traffic. Plus, the buses are packed and often uncomfortable. After the Fremont bridge, there is maybe a dozen riders and all end up in Magnolia. In addition, having the 31 run later at night would be great!</p>	3/18/2015 1:04 PM
624	<p>The 372 is already overcrowded. I can foresee even more people using it in order to get to the light-rail station at UW (in order to continue to downtown Seattle and the airport). If this happens, the route must increase capacity. Or, it must be a strict express route and not serve all of 25th AVE NE between UW and Lake City. The buses are standing room only already.</p>	3/18/2015 1:03 PM
625	<p>Keep the frequency of buses for the 48 route high. This route is always packed with people.</p>	3/18/2015 1:02 PM
626	<p>wait what's happening to the 522?</p>	3/18/2015 1:01 PM
627	<p>At the moment, it's always late and too full to accommodate all passengers.</p>	3/18/2015 1:00 PM
628	<p>The 41 should not end at lake city it should go on to sound point and end at the Magnason Park. there you should make a small Park and ride for the 41, 71x and 75. you have the space and many people living in the area could benefit from it. people going to downtown, Northgate and the UW. please consider it I think it would help a lot.</p>	3/18/2015 12:55 PM
629	<p>70 comes way too infrequently for the population it serves. The area is dominated by new apartments. More frequency is needed. 31 and 32. there are so many areas in Fremont that are not SERVED especially around pacific place...by the waterfront. You literally have to walk 6-8 blocks up a hill to find a bus. Ridiculous. Why i could not move there. Also need more service times. 75 needs express buses to northgate mall-takes an hour...really? 74 is a great addition to serve Laurelhurst area 25 bus should run longer routes up the neighborhoods in sand-point. It doesn't go into the neighborhoods enough so less use... 71,72,73 should run as often as possible. They're probably the busiest buses in Seattle next to the smelly 49 oh another thing Air freshners on the 49 would be great!</p>	3/18/2015 12:53 PM
630	<p>Well I know in your survey you did awhile ago, you stated that the 255 wasn't crowded. I have been on the bus many times with standing room only. I don't know what times of day the survey is talking about with the 255, but it isn't peak hours....</p>	3/18/2015 12:52 PM
631	<p>Alternative 1 is the best choice, at least for me, and it would be very nice to have newer, updated buses on 271 (more like Sound Transit would be nice). The current old buses should be recycled. Thanks.</p>	3/18/2015 12:49 PM
632	<p>more frequent and on time buses</p>	3/18/2015 12:49 PM
633	<p>For the most part, I am a SOV commuter. I take the bus maybe 1x per week and sometimes more, depending upon after-work activities. Once light rail is an option, I will try a direct Downtown Seattle to UW Medical Center/Husky Stadium ride. If it is frequent and saves time, and I feel safe I will use it. If not, I likely will continue to be a SOV commuter. One of the main reasons I don't use METRO bus more frequently is the absolutely horrible ride those trolley buses (Route 43) provide - jerky, uncomfortable and, if standing (because those routes are so full during peak times), almost impossible to do. Also, the busses are dirty and smell musty/moldy. There is nothing pleasant about that ride - period.</p>	3/18/2015 12:47 PM

634	Please don't cancel the 167 route. I like the fact that I can take one bus to get to and from my destination. All of the people on this route are UW employees or UW students with no drama. It is a nice pleasant ride that I'm comfortable with.	3/18/2015 12:43 PM
635	I'm wondering what the thoughts are about those of us who live in West Seattle getting a reliable connection to the LINK. The only connection I can think of is either drive to Tukwilla and park there, or find a route that connects with the 50 or 60 to get to a downtown station.	3/18/2015 12:40 PM
636	DO NOT CHANGE THESE ROUTES. Many people use them. If you remove them there will be a SERIOUS decline in riders from campus to the hill.	3/18/2015 12:34 PM
637	I love this route. It is fast and direct. It unfortunately doesn't run after 6:30 PM. I would love to stay later in the U-District some nights, but if I stay until 7:00 PM, it means I have to take a far longer commute (271 and transfer to the 554). Since the 556 is usually packed, I imagine many other people would feel the same way.	3/18/2015 12:32 PM
638	Bring back the 48 Express. 66X is not really very "express". It still takes a long time.	3/18/2015 12:30 PM
639	It would be great if we had more buses available during the peak morning commute times.	3/18/2015 12:30 PM
640	You told us travel time would be reduced by eliminating direct routes to downtown when the Rapid A would connect to the light rail. It didn't even come close to your estimated savings in commute time. I don't know where you come up with this misinformation. This is not rider experience. These connections don't work, add more delays, which equates to more commute time. You eliminated direct bus routes which were far more timely than your advance Rapid A/Light rail connection. A simple fix would be by extending the Rapid A into downtown to achieve the timeframe you told us we would save by connecting to the light rail.	3/18/2015 12:29 PM
641	542 and 545 are important routes and I would live to advocate for continued support of them both. 545 is a crucial trunk line linking communities in Redmond and the Microsoft ecosystem to downtown Seattle. 542 links Redmond to the UW and the U District.	3/18/2015 12:29 PM
642	540- Moving it to Houghton P&R seems favorable because at times South Kirkland P&R will be at full capacity in terms of parking spaces available. However, because 540 only operates during peak hours, it would mean that students who go to school in the morning and get out early in the afternoon would have no options of getting back to Houghton P&R whereas currently students have the option of taking 255 to South Kirkland during off-peak hours. 271- Many students coming from the Eastside to UW take bus routes that go from Eastside to Seattle Downtown and transfer on one of the 520 bridge stops. 271, use to be the best available transfer option since it is the only route that runs all day from 520 bridge to UW campus. However, this option has been eliminated. I would like to see an alternative or have 271 stop at Evergreen Pt. again so that eastside commuters have more flexibility crossing the bridge to UW.	3/18/2015 12:24 PM
643	Provides most convenient connection between Capitol Hill and UW for commuters, would be difficult to lose.	3/18/2015 12:24 PM
644	Who funds this bus, that is usually mostly empty? It seems a no brainer to discontinue.	3/18/2015 12:23 PM
645	I would like to see more frequent buses and additional buses. Especially when the afternoon buses drop out during the Summer. There are still a lot of employees that use this route when students are not in school. I would like to take 1/2 days in the Summer but am currently unable to because the 586 doesn't start until 2:30. The morning buses are frequently full and leave riders behind.	3/18/2015 12:22 PM
646	this route services way too many people through the most populated part of Seattle, This route must stay, right now they need more busses on this	3/18/2015 12:21 PM
647	Would like a light rail option to Everett, Wa.	3/18/2015 12:20 PM
648	In all cases, it is difficult to say how the changes will impact me without knowing which stops may be added or removed. For example, the new routing of the 71 or the creation of the 16 could be great for me, unless I have to walk farther to get to a stop. Similarly, I generally use the 68 because there is a stop closer to my house (25th Ave NE and NE 60th St). I imagine that with the elimination of this route, this stop will be removed and the 372 will not stop here, but I'm not sure. I'm concerned about the elimination of the 30, as it is pretty much the only bus that runs directly from Ravenna to the U-District. If I wanted to get to the Ave, I would need to take a bus that routes through UW and get dropped off at the very south end of the Ave, which makes the route longer than I would like. In this case, I would probably end up using car2go instead of transit.	3/18/2015 12:19 PM
649	The 48 makes too many stops during peak times. Commutes from Mt. Baker to UW could be much more efficient. The #7 bus is always overcrowded and the busses themselves are sub-par to the 9. The 9 is much more efficient; I wish it ran more in the afternoons.	3/18/2015 12:19 PM

650	I wish there was an express version of this route. I heard there used to be but it was cut. It can take a very long time to travel from Greenwood to U-district because of the many stops and busy route that this bus takes. I am thankful for a direct route to the stadium, however.	3/18/2015 12:18 PM
651	43 - this is essential! Don't get rid of it! 44 - We need more connections to Ballard. In general I like that the 44 runs long hours and is pretty frequent. It would be good to have another alternative between Cap Hill/U Dist/Fremont/Ballard. Bring back the old 47 or whatever it was 8 - I volunteer at Pacific Science Center and the 8 is a dreadful route. Denny is the worst. We need more reliable service crosstown. I don't know if this can be rerouted to a faster street or what. Neither alternative addresses this problem	3/18/2015 12:11 PM
652	This route is bizarre. I often travel from near the start of the route (145th and 25th) to UW and back. There are essentially two sets of people who use it - people north of Lake City who aren't served by any other bus, and people who live along Sandpoint Way and Bryant/Wedgewood. This pattern, combined with the frequency of local stops means that the riders traveling the farthest have an incredibly long commute time on a bus that is frequently way overcrowded for part of the route. In my opinion, the best way to approach this would be to have a less frequent Express option available that bypasses stops in the early part of the route to serve north wedgewood/lake city/shoreline. this could be every other bus, or one of every 3 buses for example.	3/18/2015 12:11 PM
653	Frequent service on this route is key. Delays are often a problem in the late afternoon and early evening.	3/18/2015 12:08 PM
654	The direct, all-day service this route provides between NE Seattle and downtown is more important to me than more frequent buses on the 76 route during only peak hours.	3/18/2015 12:07 PM
655	It seems that the 43 could run more frequently during peak times as an alternate connection to UWMC from downtown. My quickest connection from West Seattle is the 255 in the tunnel, but during bad weather or if I need to avoid the walk from 520, having additional access to the 43 would be helpful.	3/18/2015 12:06 PM
656	It works very well now. Both alternatives would make my commute take longer and force me to walk uphill to my office, Changing the north end of route 70 (to end at the stadium) is counterintuitive. Do you assume lots of people will come from downtown or Eastlake, then want to turn around and go south to Capitol Hill and downtown?	3/18/2015 12:05 PM
657	Keep this route and make it run more often.	3/18/2015 12:05 PM
658	restore direct route from sandpoint to key arena	3/18/2015 12:03 PM
659	I really like the route and the frequency of the 271. A lot of the time the bus doesn't follow the schedule (running about 5 minutes early at my stop), but with them coming every 10-15 minutes, it doesn't make too much of a difference. It might be nice to have an express that doesn't stop at all the stops, maybe just the Bellevue Transit Center and Bellevue Square as well as a few stops through Medina.	3/18/2015 11:59 AM
660	It looks like the 540 will not go to Kirkland Transit Center there are a lot of passengers that get on at that stop that go to UWMC i'm not sure if there is an alternative.	3/18/2015 11:58 AM
661	The loss of the 25 will effectively kill transit use in Portage Bay. I don't think anyone will walk over hills and around curvy streets to the 48/49. The 43's route may be inefficient, slow, and redundant, but it provides the only useful connection between the top of Capitol Hill and UW/U District for anyone who can't walk up or down that hill. The 10 does not connect to light rail close enough to reduce travel time. From the top of the hill, the only option is to walk downhill (not especially easy on the knees). The hospital will only be accessible from the 8/10/9x, none of which go north. The 12 frequently gets caught in massive amounts of traffic on Madison/Marion. If the 49 takes over that route, something needs to be done to speed it's way down/up the hill. Pike/Pine may have lots of traffic, but there seems to be less highway-bound traffic that holds up the 12. If the 12 can be saved by Seattle funds, I hope the 49 keeps its Pike/Pine route.	3/18/2015 11:57 AM
662	The consistency and reliable of this route is atrocious for those of us looking to use it for daily commutes. 16 is much more reliable.	3/18/2015 11:57 AM
663	The 31 would be the best route for Magnolia - UW connection, and others, if it continued from 34th & McGraw down 34th to Government way and looped back around to Emerson and Fisherman's Terminal, thus completing a loop through Magnolia before starting it's route again. It currently only goes along the east side of Magnolia, and the connection with 24 to continue is not a good connection.	3/18/2015 11:54 AM
664	Route 49 should not be changed, as it is not completely redundant to the light rail link. I use it regularly to go to the Pike Pine corridor from Capitol Hill, and I do not want to bus less than a mile before having to transfer at the Light Rail Station.	3/18/2015 11:54 AM
665	I consider the service provide by 540 to be minimal. Would like to see adding back service during non-peak hours and 15-minute service during rush hour.	3/18/2015 11:53 AM

666	I would really like to see route 73 be spared from cut backs because it is the only bus route that comes into our neighborhood.	3/18/2015 11:52 AM
667	It would be great to see the 250 brought back for peak hours. There's no viable "excuse" I've seen thus far that would work against it. Metro did not do due diligence in sleuthing out options, which could have included it as a one-way "545-like" route going eastbound to MS and the Overlake Transit Center and then continuing on the old westbound route covering West Lake Sammamish & 24th back into Seattle. *For the 542, more frequent routes would be helpful as the service to/from the UW is limiting. Do not cut it off at the light rail station. This will require another transfer for me to get to work at the UW. The limited service requires that I drive at times since there's no quick service in the middle of the day. *For the 545, add more buses. While I comprehend that standing may be a necessity at times, it makes for a very unpleasant commute when one suffers from back pain and take away any benefit of being able to work/read/etc. while commuting. Plus, it really just plain sucks to be the one cut off when the bus is full just to wait for the next, possibly full, option and stand! As of late, this has held true for some 542 routes as well.	3/18/2015 11:51 AM
668	Please serve overlake village, in addition to overlake transit center. Thanks for your good work, things are getting better!	3/18/2015 11:50 AM
669	Not a fan of changing the 16 that much. I would love to see services retained North of 92nd, up to 105th. The 345 and 40 do not come often enough for me to feel comfortable that an alternate is possible. For the 44, why not just make that go over to Sandpoint, rather than changing the 16? Not that far of a walk from UDistrict to UWMC (Though I do love the direct service).	3/18/2015 11:50 AM
670	48-I am excited by the prospect of splitting this into a 45/48 and creating a later run that is being proposed in Alt. 1. 44-Needs committed bus lanes. Rapid Ride D-needs committed bus lanes between Lower Queen Anne and downtown, it really bottlenecks here.	3/18/2015 11:49 AM
671	Please maintain the Kenmore only route times even when the UW is not in session. The buses at these times are predominantly employees of UW and we rely on the bus to get to and from every day :) Thank you.	3/18/2015 11:48 AM
672	I'm sure I have the same complaint as most people who use the 8: it's totally unreliable and too infrequent. Please increase the 8, even on weekends, so people can take their families to and from the Seattle Center, or grocery shopping at Whole Foods, without devoting half the day just to navigating the bus travel. It's a workhorse route and hugely important, so it's always overcrowded, and thanks to Denny it's always late. Can you cut the eastbound stop at Denny and Fairview so the bus can at least travel in the left lane to Stewart Street? Also, why is the One Bus Away data for the 8 always wrong?	3/18/2015 11:47 AM
673	Retain route 373X express service from Univ of Washington north to Shoreline.	3/18/2015 11:46 AM
674	The bus is frequently 15 minutes late or 10 minutes early. I end up waiting 20-40 minutes for a bus because it can never come on time, making it difficult to plan a commute to work in the morning. there is no consistency in the time	3/18/2015 11:46 AM
675	Even though I catch these buses at the beginning of the routes they are typically late up to 10 minutes, or don't show at all if not with in that time period. I am unsure if it is because its a problem with the time schedule on the internet or the drivers but I find it hard to believe it should be happening so much. Also, I am unsure why or how it is possible all these buses are late and by the end of the trip I suddenly see 2+ 522 or 312 buses following each other. I understand traffic changes will adjust the speeds and make it sometimes possible for so many buses to group up but, again, the frequency at which I get picked up/they actually arrive versus the amount of buses at the end of the trip (hour+ ride) seems odd. Not sure if this should be looked at better. 3 and 4 buses I have accepted at late by 5+ minutes now, but are always full by 3rd and Union and always trying to pack in more. The style of bus used on this route seems wrong if two buses can't seem to handle the load.	3/18/2015 11:44 AM
676	Basically these routes are unchanged and would remain mainstays of the E-W 45th st corridor and the N-S aurora corridor. Alternative1 would probably be best for route 44, 5 and E- the increased frequency might reduce the extreme overcrowding one sees during commute times. Otherwise the 2 plans are equivalent from my point of view.	3/18/2015 11:44 AM
677	Frequently during rush hour I must stand all the way from the UWMC to Bellevue Transit Center.	3/18/2015 11:44 AM

678	I would like to say that they are okay. If they were any worse I would not ride the bus. When I say okay I mean that they are ALWAYS completely FULL and sometimes if I don't walk up a few stops the bus passes me by because it is full. Both ways. Morning and evening. I work at the UW and live in West Seattle. Less than 10 miles away and it takes over an hour most days. I have waited in the U district on a Friday night while 5 buses (70, 71, 72, 73) passed by completely full. I could have walked to downtown faster had I know I was to wait over an hour to get a standing spot. The 125 is the bus that is closest to my house and it is ALWAYS standing room barely only and the 120 in the morning is also full and sometimes passes me by full. The Puget Ridge and Delridge area need frequency as well as the 70-73 routes. They are always so full people get passed up. That completely sucks for people counting on the transit to get to work.	3/18/2015 11:43 AM
679	I currently use the 71, 72, and 73 express combined with the Water Taxi to commute between Vashon Island and the University District. My place of work is far from the Husky stadium station (University Tower), so I am concerned that proposed changes focusing on Husky Stadium as a hub might increase my travel time or frequency of service between the University District and the downtown tunnel. Since the water taxi only comes once per hour, I am particularly nervous about schedule changes making it more difficult to connect.	3/18/2015 11:40 AM
680	Service to Portage Bay/Eastlake is relatively limited as is, especially with the express busses not stopping in Eastlake. Please keep this area covered.	3/18/2015 11:40 AM
681	This is a popular sound transit bus route. If light rail does end up coming to the UW this would have an effect on ridership provided connections are available.	3/18/2015 11:39 AM
682	I mentioned this at another point in the survey but the route 48 (or 45 in Alternative 1) REALLY NEEDS an express service to handle the commuting rush to and from the UW. It's regularly packed to the brim, with timelines disrupted by as much as a half hour or so for individual coaches. The bus then makes its way slowly through Greenlake, even though very few people get on or off at these stops during rush hours. Bolstering southbound morning service and northbound evening service during rush hours with an express route that makes limited stops would be extraordinarily helpful. Sometimes I just give up and walk the 3 miles because it's more convenient than dealing with the 48.	3/18/2015 11:38 AM
683	Basically, 542 running a bit more often, into the late morning at least and later into the evenings would be excellent. And then fixing the 545 to keep it from being sardine-land.	3/18/2015 11:37 AM
684	This route is very important to me for both my work commute and for leisure-related trips downtown on weekends, and appears to be packed full of people in the mornings and evenings. This bus is my only option for work--the 49 stops 15 minutes away from my work and the light rail is a 10+ minute walk from my home and requires a transfer to a bus (the 43!!) that would then stop at my work. Please do not eliminate this route! I would be forced to drive to and from work most days, rather than face some 20+ minutes in the rain and cold at either end of my commute. The light rail does not cover so much area that it can take the place of important bus lines such as this one.	3/18/2015 11:36 AM
685	Particularly in the university district, there is still not nearly enough seating due to the large volume of students who use the bus for just a few stops. It would be helpful on days with high volume traffic to run the 48 "express" from, say NE Campus Parkway to 65th St & 15th Ave NE in order to discourage students from crowding up the bus for 3-4 stops during peak traffic hours.	3/18/2015 11:36 AM
686	These three routes are so important for students, faculty and staff working at the UW both on and off campus I highly recommend not cutting service back. I believe it would cause many challenges for those of us who have to make certain connections if these routes were all eliminated or cut back to only peak hours. These three routes are heavily used and quite often standing room only from 5:57am - 9am and from 2pm- later. I am on the bus at 2:15pm to make my connection home to pick up my child from care and every day the bus is standing room only. Without these buses running all day, I would not be able to use mass transit anymore to come to work - I would have to drive. I think many people would be put in a similar situation.	3/18/2015 11:36 AM
687	Please keep the 12 along Madison! Will make many have to travel much farther to get to Link Light Rail w/o it.	3/18/2015 11:35 AM
688	It would be nice if this route existed outside of peak hours as well so it could be used past 9:00am.	3/18/2015 11:34 AM
689	If Alternative 2 is used, I'd like more frequent service for the 31. The current 30 mins wait is horrible.	3/18/2015 11:34 AM
690	This route is great, but always late. I think the proposal to make it more frequent is good and having later service is great (Alternative 2). Never understand why it doesn't just continue down 15th, rather than veer to University Way.	3/18/2015 11:34 AM
691	28 - re-establish the route so that it runs during non-peak times. 44- try and work out a schedule where there are not three or four 44 buses that come by when waiting for the 28 at the corner of 8th NW and Market. ie more 28 buses!	3/18/2015 11:33 AM

692	By elimination of 252 and 257 you increase the inconvenience of waiting for a connecting bus to go to the neighborhoods from Kingsgate Park and Ride. By restricting the 255 North of and beyond the Totem Lake P&R you also increase the inconvenience and unavailability of access to that route.	3/18/2015 11:33 AM
693	Route 12 provides me with access to all places along Madison (I live on Madison and 9th). Without route 12, I would need to walk over to catch route 2, but this does not go in the same direction I usually end up or need to transfer to bus/light rail (I work at UW). I also lose the ability for easy downtown access. The loss of route 43 means I would need to wait much longer for a bus on 24th if I take that option. My only options currently along that route are either 43 or 48. Loss of route 12 isolates me from much of the benefits of the new light rail in Capitol Hill and my ability to get to work at UW easily by taking the bus. What are my options, living on 9th and Madison for getting to work at UW with the first proposal? It will require a substantial amount of walking on my part or me driving my car to catch a connection. The 12 bus is by far the most important to me and my most frequent bus.	3/18/2015 11:33 AM
694	As they are now, these routes work great. I feel like riding transit is easy with how they're connected and the frequencies of trips. Any changes would make my commute longer and more frustrating, and once again I'll find that using the bus is more annoying than dealing with traffic.	3/18/2015 11:33 AM
695	Route is typically congested. As a University student, I can attest that it is usually crowded on weekdays, and that more bus times need to be available esp. past 10pm. Because, link light rail is not available in the east (Bellevue, Kirkland, etc.) there needs to be more routes and/or times. Thank you!	3/18/2015 11:32 AM
696	As I previously stated, I feel it is a huge inconvenience to delete the part of the 372x route that goes from UW Bothell to Woodinville Park and Ride.	3/18/2015 11:32 AM
697	PLEASE don't cut this service. This is the only bus that goes in front of my house and I take it everyday for school.	3/18/2015 11:32 AM
698	They stop way too often. The buses are full close to the U-district and we still stop and let people on. It might be helpful to put in some kind of U-shuttle just in the immediate University area for all the students, so that employees like me can get to work without being bombarded with students.	3/18/2015 11:31 AM
699	The 44 route between Ballard and the U district has too many stops and gets held up in traffic on NE 45th street causing passengers to be late for work and get home later. The distance is only a little over 4 miles, and yet it can take 40+ minutes to get from campus to downtown Ballard. It would be nice if there was an express bus from Ballard to the U district that did not stop in Wallingford, or if the amount of stops could be reduced. Rerouting the bus to not go along 45th st may also be a solution.	3/18/2015 11:31 AM
700	Should bring the 48X back on line	3/18/2015 11:31 AM
701	More efficient service.	3/18/2015 11:30 AM
702	67 & 68 - moving the line further East is inconvenient from coming from Northwest Seattle, also will be a longer route 70-73 getting downtown in the evenings from the UW is still inconsistent and at rush hour takes 50+ minutes, which makes transit not an option for getting to evening meetings and activities on time 355 - please do not remove the UW stop from this express bus	3/18/2015 11:29 AM
703	Please keep route 31! There was talk at one point to cancel or reduce this route. I use it daily to travel between Magnolia and the U-district, and there isn't an alternate route if this went away. 31 is critical - please keep it!	3/18/2015 11:28 AM
704	I ride this route at least 2 times a day, please don't eliminate it. It provides easy access to both downtown and UW for those that live on and near 15th Ave E.	3/18/2015 11:27 AM
705	Please don't take away my bus to work! I don't want to drive or walk 20 minutes both ways.	3/18/2015 11:27 AM
706	The 8 is a heavily used route by a few different neighborhoods. It is a lifesaver for Capitol Hill to Queen Anne. Wish it was more reliable time wise, more frequent and bigger buses for the more heavily traveled times of the day. I live at 22nd & John and work at UWMC. I would like to continue to use the 43 and 48 to get back and forth to work. I will not be walking or taking a bus down to the light rail in Capitol Hill to get to UWMC. The 43 is also most convenient for me to travel downtown.	3/18/2015 11:25 AM
707	Please keep the U District routing for 71 as is. As it is, the M-F morning commute buses are standing room only and packed. Increased morning frequency (every 15min) would be very helpful. Reducing the 71 altogether would cause me to stop using transit.	3/18/2015 11:25 AM
708	311 - please keep service to Woodinville if possible and increase frequency during PM commute especially. 372 - please increase frequency during PM commute. Buses can be overcrowded. 540 - please keep direct connection between South Kirkland PR and the U-District. The new parking garage and lot at this PR has increased its capacity significantly and it doesn't make sense to remove the direct route to the University.	3/18/2015 11:24 AM

709	The 65 runs really slow and it's usually very delayed which is bad for getting to school. I wish the 373 would run more often.	3/18/2015 11:24 AM
710	In Alternative 2 would eliminate using either of these routes as an option for me making it far less convenient to commute via bus.	3/18/2015 11:23 AM
711	It would be great if route 75 would let off closer to the new light rail at Husky stadium. That is the only way I would give up driving my car. Right now, it takes me 1 1/2 hrs on a bus/UW shuttle combo if I want to get from 75th St and sand point to my job at SLU. I drive because I don't have 3 hours per day to commute via mass transit. If the 75 route let off close to/at the new light rail at Husky stadium, then I would consider taking mass transit to work.	3/18/2015 11:22 AM
712	I am willing to walk farther to get a fast bus or rail link. I'm less interested in many stops routes that take a lot of time.	3/18/2015 11:22 AM
713	The frequency of this route is sporadic. The driver's can be quite rude to the passengers.	3/18/2015 11:22 AM
714	retain fequency of service for 271 in early evening (up to 8:30 pm) retain 167	3/18/2015 11:21 AM
715	Buses are usually full, consider express with less stops prior to day shift hours (7am start time)	3/18/2015 11:21 AM
716	The growing population areas need to be considered. My personal myopic view shows me Ballard is growing fast and needs addressing.	3/18/2015 11:20 AM
717	More routes that continue into Route 7 through the Yesler route rather than downtown in the traffic	3/18/2015 11:20 AM
718	Service on this route needs to be maintained year round. Service is cut when the UW is on breaks and during the summer. This route is heavily used by UW staff that live in the area and the crowding on the buses and the lack of convenience when service is cut is absurd. It is not just students using this route. Please maintain the frequency of service year round.	3/18/2015 11:20 AM
719	If these new plans are implemented in a similar fashion as the rapid ride routes were implemented, this will be a transportation nightmare. Rapid ride implementation removed more route capacity than rapid ride routes could carry. Rapid rides still do not run timely and buses are often over capacity.	3/18/2015 11:19 AM
720	More frequent would be nice; and the ability to take this to the link light rail would make it very easy for me to get to the airport without needing to use a car at all.	3/18/2015 11:19 AM
721	I get why the 277 is being eliminated. Since I will have to transfer, increase the frequency (235,238) so I don't have to stand around as much waiting for my transfer.	3/18/2015 11:18 AM
722	It would be great to have more frequent service on this route, especially as it gets very full during peak hours and there often isn't enough room for all the riders.	3/18/2015 11:18 AM
723	372 is a very popular route. During peak hours 7:30am to 10am and 4:30pm to 6:30pm there needs to be more buses and the longest buses you have available. When you send a short bus for a busy route like this, it gets filled up at 1 stop and leaves 100 people out in the cold. For the 65, I would recommend cutting the number of stops. Does it really need to stop every single block? No. It can afford to go every other or even more than that. It shouldn't take an hour to go 6 miles.	3/18/2015 11:16 AM
724	I use this route often, and it is the only route close to where I live without hills. It is convenient for access to school/work (UW) and downtown. Besides, I rely on this route if I ever want to wear nice shoes.	3/18/2015 11:16 AM
725	I'm hoping that future plans preserve the link from Shoreline to the UW.	3/18/2015 11:15 AM
726	Please keep these routes with service to the South Kirkland Park and Ride	3/18/2015 11:15 AM
727	would like to retain this route to northgate neighborhood	3/18/2015 11:13 AM
728	If possible, would you make it easier for residents in Redmond Ridge to the Seattle area, e.g. University District, Downtown Seattle, and International District? I know quite a number of citizens living there. They are old people and no longer able to drive, but they like to travel to the Seattle area for part time jobs and volunteer work.	3/18/2015 11:10 AM
729	The 242 was designed specifically to get Microsofties on the West side over to the campus, and it's a huge success--packed buses every day. The 542 is not a realistic alternative. It stops only at 520 and 40th, and 520 and 51st. This significantly reduces the convenience and utility of taking the bus for most current 242 riders. We ride it, every work day, because it's convenient,. With your change, it will become a huge pain in the ass, and most of us can and will go back to driving to work. Is that what you want? Just leave it alone.	3/18/2015 10:59 AM

730	There are no options for people who took the 133 to get from Burien/White Center to the U-District in a timely manner. The buses you have going through White Center are slow, and always off-time (late or early). The lightrail could be an option if parking was actually available at the major stops.	3/18/2015 10:51 AM
731	It would be great if the 8 could be more reliable and on-time. It always gets bunched up somewhere along the route and comes across capitol hill in batches of 2 or 3 with long wait times in between. Maybe subdivide the more busy areas to ensure some timeliness? Like, have a 2nd bus start part way through the route during busy times so that there's not a large gap. Also, it might mitigate the issue if there were some way to counteract the busses getting stuck in the denny portion of the route, like maybe have one or two start from capitol hill during rush hour.	3/18/2015 10:31 AM
732	These routes are often very crowded with students coming from the north going to campus. This leaves little room for commuters, and creating faster service to downtown will do nothing to help this problem. I use these routes every day to commute to and from work and am very concerned with reduced service I will encounter buses that pass me by because they are too full (already happens sometimes). If KC Metro has to reduce service UW should be forced to provide a shuttle bus for students so they don't overcrowd services for the working population. The additional stations of Roosevelt and north U should eventually help these problems but they are years away at this point.	3/18/2015 10:11 AM
733	Peak ridership in the am often has lines of 20 or more people at the Brickyard. Why not resolve this? Why not offer some mid-day routes back to the Brickyard. If I get sick at work, I have no way of getting home under the current schedule. Route 255 to the Brickyard is TORTURE.	3/18/2015 10:09 AM
734	I like having this route because I can easily commute from Downtown Seattle to Redmond	3/18/2015 9:42 AM
735	Route 8 is so unreliable during peak times. Even with the proposed increased frequency, I don't have confidence in it as an important trunk line for connections.	3/18/2015 9:15 AM
736	Please keep the 43! 48 is a pretty good alternative but I'm worried it will be extremely crowded as the only commute option from Capitol hill to UW that is east of the light rail	3/18/2015 8:19 AM
737	Route 8 has serious problems. Addressing these should not require a massive overhaul of ALL routes in the area. There need to be more buses more often, period, no matter what grand plan is finally adopted. Route 10 cannot be the only route in the Pike/Pine corridor. That is just silly. Density is too high and the topographical obstacles (i.e. the big-ass hill it runs along) are too great to rely on just one route in this area. Route 16 should not be fooled around with further. It has been tinkered with and tinkered with. Either dismantle it altogether and create new routes or leave it alone, but don't bastardize the route into something totally unrecognizable and continue to call it "Route 16." Routes 11/43/49: I find it interesting that the proposed solution is to shift service further south along Broadway. So instead of "duplicating service" with the LLR, which has two stops in the area, you are instead duplicating service with the First Hill Streetcar, over many more stops. Get real. If one route has to go, fine. But we cannot afford to lose all three.	3/18/2015 12:32 AM
738	Regardless of alternative, please keep frequent service during the weekdays up - and keep in mind that a lot of Microsoft employees can and do work flexible hours, so a bus schedule that only allows for a 9-5 schedule would not accommodate that group of people's needs.	3/17/2015 10:03 PM
739	Please don't cancel route 12. It is my only access to downtown Seattle. I already have to walk a considerable distance even with this bus route.	3/17/2015 9:48 PM
740	242 provides a valuable service that is unmatched by any other route. its cancellation will leave many riders like me stranded, as there would be no viable options to commute from north of UW to Redmond :(3/17/2015 8:53 PM
741	Again, see #9!	3/17/2015 8:28 PM
742	Please do not get rid of the connection on Pine/Pike, there are many people on my bus that I see get off and walk right into their office buildings along that area, myself being one of them with the my office building being one of the many along 7th avenue.	3/17/2015 8:01 PM
743	Please do not gut these routes. We who live right off NE 65th St (and who can't walk very far) and rely on them for transportation are tired of losing our bus connections since we vote to fund transit and so do our representatives. Council members who vote against increased transit funding should have their routes cut.	3/17/2015 7:46 PM
744	When coming back from downtown to Capitol Hill, there are generally two #10 buses and two #43 buses for every #49 bus, even at rush hour. That seems unreasonable.	3/17/2015 7:35 PM
745	I use these routes every day to get from Ballard to Cap Hill. If there was a simpler, more streamlined way to get across and down to the Hill I would use it. If I can switch to using the light rail I plan to!	3/17/2015 6:20 PM

746	With the efforts to make the U District/Roosevelt more dense and livable for professionals (e.g., Bridges@11th), it is nice to have a route that runs through the U District on a road other than 15th or the Ave. The walk is long to do when dressed for work rather than as a student or for those who are less mobile, and the UW campus is large enough that the walk is substantial (and uphill) from the light rail station, so it's nice to have a bus like the current 67 that swings through campus (or some hybrid of the 67/373 that would catch both the north and south ends of campus).	3/17/2015 5:43 PM
747	I look forward to never having to ride these routes again between UW and downtown. Currently I have to allow more time to travel the 3-4 miles from UW to International District Station than it takes me to travel all the way from King Street Station to Sumner - your bus service is that unreliable. And, even allowing almost an hour to get from UW to the International District Station, I sometimes miss the last Sounder train. I look forward to mostly removing Metro from my life, and just relying on Sound Transit.	3/17/2015 4:49 PM
748	More frequency for these, especially 31! Have physically different busses rather than changing the route numbers on the 26/X & 28/X.	3/17/2015 4:09 PM
749	Why is it and any other route from the U District to Lake City being eliminated? What are the alternatives for people who want to go to and from these areas? The 372 is down the hill and far away from the center of the U District. It is not an adequate replacement for this route.	3/17/2015 3:38 PM
750	As mentioned earlier, the alternatives offer no solutions for the older person or others not on a commuter schedule who want to travel downtown or other place during the day on a direct route as used to be offered. A direct link from more neighborhoods to light rail at more times during the day other than just peak times would provide more options for people to travel around Seattle more conveniently, and would get non-commuters out of cars for trips other than work.	3/17/2015 3:15 PM
751	Very important for connections between downtown, North Capitol Hill, Montlake, Group Health, and U district	3/17/2015 2:50 PM
752	See my earlier remarks.	3/17/2015 2:48 PM
753	Frequency throughout the day, even offpeak, seems critical for such a vital route between Seattle and the Eastside	3/17/2015 2:32 PM
754	I think that the disconnect in service on Roosevelt Way is problematic. As I noted earlier, for someone to use Roosevelt to leave Northgate and get into the U District, they have to do a transfer, often at either 80th or 75th (getting off at 11th). The lack of a consistent route that travels the length of Roosevelt is the biggest impediment.	3/17/2015 2:30 PM
755	Please add more trips on Rt 76 in the am and pm. It is very crowded with lots of standees. Also, reduce the number of stops on NE 65th street (operate more like Rt 64 on NE 65th Street) to speed up operations.	3/17/2015 2:28 PM
756	I take this route every weekday (along with several Microsoft coworkers) and rely on it to get to and from work at all hours. Some days I go into work much later than 9a, and some days I come home either early or late and need to be able to rely on the 545 at any time. The notion of peak hours isn't compatible with a Microsoft work schedule.	3/17/2015 2:18 PM
757	If this became a higher frequency route, it would change the way my family can use transit for the better. Particularly with the connection to light rail.	3/17/2015 2:15 PM
758	This route is an ideal path from south Wallingford to Downtown. Even though I prefer Alternative 1 overall, losing my direct connection to Downtown may force me to take other modes of transportation.	3/17/2015 1:37 PM
759	I would love to see more constant and safe service here.	3/17/2015 1:23 PM
760	255 and 252 represent the kind of public transportation that Metro is in business to provide. Alternative 1 is a theft of service hours from your taxpayers for King County service in an attempt to provide unnecessarily frequent feeder bus service in support of Sound Transit's regional mission.	3/17/2015 1:18 PM
761	Route 8: Delete service between Rainier Beach and Mt Baker Station, move it to Rainier and 23rd ave between Mt Baker and Jackson, keep it the same between Jackson and Fairview, move it to Fairview and Mercer between Denny and the Lower Queen Anne. Extend to Ballard's Fred Meyer, a much more meaningful destination than empty lots and gas stations of Rainier Beach... Route 4 and 14: extend the 4 south to Mt Baker station and then on to Hanford st, and get rid of the loop to Hanford on the 14! You just need to move a few wires for the 4. It's worth it, if you truly trying to consolidate service by making it faster and direct... Routes 10, 12: Turn it into a one route that loops on 15th ave e, Galer st, 19th ave e, Madison, and back on 15th ave to John. It will travel on John both ways all the way down the hill as current 43.	3/17/2015 1:14 PM
762	Need much more frequency on all of these routes.	3/17/2015 12:06 PM
763	not frequent enough!	3/17/2015 11:54 AM

764	545/555 More frequent options would be great! 10/11/43 More frequent/reliable routes from downtown to Capitol Hill during week day PM rush hour would be great due to capacity constraints (the amount of people riding the bus) rather than wait time concerns. Several times busses are full and driver after driver is unable to stop to allow more passengers on which defeats the purpose of having transit	3/17/2015 11:38 AM
765	Something needs to be done about the 8. It provides connection to many other important routes, without having to travel through the mess that is the Third/Pine stop downtown (which also needs something for improved safety). Wlth improved frequency (esp in the evening/weekend), this route will help provide important connections to Link and other areas of the city.	3/17/2015 10:54 AM
766	These are the two routes that I use the most. I prefer riding the 49 rather than the 43, when possible.	3/17/2015 10:24 AM
767	If it makes sense to keep 77 due to high ridership by all means do it. 15th is a great road to pick people up on. 41 is a bit unwieldy since there are two versions on the line.	3/17/2015 10:05 AM
768	Very important service between Madison Valley/Central District and downtown. Would love to see more frequent service.	3/17/2015 9:58 AM
769	It seems like there is no added service on the 44 in either of these alternatives. The bus is often too full to board during peak hours, and I imagine many people will be taking it to get to the new University District and Husky Stadium stations once they are open. Hopefully more service is proposed as part of the transit additions in 2015?	3/17/2015 9:28 AM
770	Based on where I live (16th Ave E and Republican) and where I work (the UW Tower), this route will continue to be much more convenient than the light rail. My current commute is around 30 minutes, including 5-7 minutes walk time. For me to take the rail in 2016, my commute would be closer to 40 minutes, including 35 minutes walk time. This will be a different story once the station next to the UW Tower opens, meaning my commute on rail would be closer to 25 minutes. My hope is that alternative 2 is implemented, then alternative 1 can coincide with the system expanding in the 2020s.	3/17/2015 8:34 AM
771	Please do not alter the frequency and choices with these routes throughout each day.	3/17/2015 7:44 AM
772	Keep the frequency up during non peak hours. It allows people to get from capitol hill to redmond and back without sitting stuck in traffic on the 520 for hours.	3/17/2015 12:11 AM
773	This route is very good as-is. Reducing service will also remove me as a passenger from 10 trips per week to at most 1-2.	3/16/2015 11:05 PM
774	I see this route as busy during the times that I take it. losing this route would most likely make me drive to work most or all of the time as when it rains, I don't want to walk the mile down to the green lake park and ride and I don't want to have to transfer	3/16/2015 10:59 PM
775	Route 72 provided direct service to downtown and under the proposed changes this route would be eliminated and replaced by 372 which only goes to the U District and if you want to go to downtown you are forced to transfer to Light Rail at the UW station but to do so you will be required to walk at least 5 minutes in all kinds of weather. That is a bunch of BS. Seattle voters were told if you vote in favor to raise your taxes Metro will maintain the service you have today and add to that service but under the proposed elimination of route 72 we will get less service. In other words Metro and the politicians lied to the voters but then what else can you expect from politicians and the bureaucrats at Metro. Keep route 72 or route the 372 directly to the UW Station and eliminate the walk on the UW campus to make the transfer to Light Rail.	3/16/2015 9:59 PM
776	Please keep North-South routes (such as the 48) that bypass the downtown area at night. I have found that going home after work late at night can be quite dangerous at times because of all the mentally-ill, drug users, and drug dealers that come onto buses or hang out around downtown bus stops.	3/16/2015 7:49 PM

777	<p>I live in the Lake of the Woods subdivision in unincorporated King Country near Redmond Ridge. I used to ride ST 545, but the traffic to get to Bear Creek P&R is heavy and the 545 takes too much time winding through Redmond, so I switched to Metro 311. I can drive to Brickyard P&R (freeway station) faster than Bear Creek P&R, despite the longer distance, and the 311 is a direct route to Downtown Seattle. My destination is 5th & Pine. For me, speed and convenience are the priorities, with convenience defined as seating availability, seating comfort (ST is better than Metro), minimal or no transfers, and bus frequency. In terms of the alternatives, transferring to Link is mainly a function of time. At the time I commute, the published travel time between Montlake and 5th & Pine is 13 minutes. A transfer to U link from disembarking the bus to reaching the sidewalk at 5th & Pine must beat 13 minutes to be worth it. Given how deep the platform is and the time to reach street level at Westlake, combined with train frequency, beating 13 minutes will be difficult to achieve. That's with less convenience, since it's easier to just remained seated on a bus rather than transfer. Some of the time waiting for the 311 on both ends of the commute can be factored in. If the 311 is running at double the frequency, then that adds about 8 minutes to the time budget. All in, there may be 10 minutes to gain between increased bus frequency and faster travel time on the U-Link. If traffic continues to worsen on I 5 and downtown, then the 13 minutes grows while the U-Link alternatives do not. In summary, I'm for the alternative than can carry me from Brickyard P&R (freeway station) to 5th & Pine the fastest, all factors considered. I appreciate your efforts to improve service and hope that over-crowding and travel times reduced.</p>	3/16/2015 6:51 PM
778	<p>The concept of the 48X was great -- avoid bogging down with students just riding 5 or 10 blocks along 15th NE and bypass the logjam on greenlake way/wallingford ave. It was a quick connection between the U district and northern neighborhoods on the other side of Aurora. we didn't get many runs, just 4 times a day, so most 48 runs still serviced those neighborhoods along the way, but for those of us who planned ahead a little, we could catch a bus that was 10-15 minutes faster and not packed so full of short trip riders that we needed to wait for up to 3 minutes at each stop on 15th because people couldn't get on and off the bus.</p>	3/16/2015 6:22 PM
779	<p>I have been a loyal user of Metro for over 25 years. I used it for commuting to work until I retired 5 years ago. I am now 71 years old and still take Metro frequently. I leave near the intersection of Sand Point Way N.E. and N.E. 70th Street, and I often take the 74 Express if I have appointments in downtown Seattle in the earlier morning hours. I feel it is important to continue the 74 Express, even though it runs only during Peak AM & PM hours. If I need to go downtown during off-peak hours I know I can take the Route 75 and transfer to a tunnel bus at Campus Parkway (currently Routes 71, 72 & 73) -- this works pretty well during the day. *I do have concern with proposed changes to current Route 71. When I have a late-night downtown event to attend (such as I often attend evening symphony performances at Benaroya Hall), I prefer to drive & leave my car on a residential street off of NE 65th St and catch the current 71 Express bus which goes downtown and into the bus tunnel. After the performance is over (often 9:45 pm at night), I can then catch the Route 71 inside the tunnel and take it back to my car without having to transfer busses. I do not see an option under either Alternative Proposals which would conveniently allow me to do this -- both options seems to make it necessary for me to have to transfer busses when leaving downtown Seattle at night and trying to get back to Sand Point Way NE. If you can tell me there is a way to do this, I'd like to know.</p>	3/16/2015 5:24 PM
780	<p>if this route (43) is deleted the early morning (5:17; 5:33am) times must, MUST be made up by route 48. 48 doesn't currently come that early and it appears (from what i can read) that adjustment wouldn't be made to the 48 to make up for these early morning departure times.</p>	3/16/2015 5:23 PM
781	<p>This route is crucial to my commute. A Link transfer is bearable but not ideal. Cutting weekend service is acceptable if it means retaining weekday off-peak service.</p>	3/16/2015 5:13 PM
782	<p>As a Microsoft employee who doesn't drive, the 545 is the main way I have to get to and from work. If I stay late for some event, or leave early due to an emergency, I want to have a direct path back to Seattle, rather than having to switch to the light rail partway there. It's possible I'm misunderstanding Proposal 1, but if not, this seems like a problem for what otherwise looks like the superior option.</p>	3/16/2015 4:59 PM
783	<p>These routes are the backbone of my travel: 43: Running from downtown to the university district through capitol hill and montlake. It goes pretty much anywhere I ever care about, and it runs often enough that I don't mind if it's sometimes slow along the way. 545: Running from downtown to Redmond. This takes me to work every single day. Some days I can take the 542 because I don't need to go all the way to downtown, some days the 542 is just fine. Any other bus I take is extremely uncommon, as I can largely compose some amount of 43 and walking to get where I need. I'll comment on the 8 because it's the most frustrating route I've ever interacted with. In theory it should be useful to me but in reality I've found it so unreliable and slow that I will prefer a less direct route just to avoid it.</p>	3/16/2015 4:50 PM
784	<p>242 is the only route that directly connects North Seattle and Overlake. 242 is the ONLY route that connects west and east sides that passes on 148th Ave NE. By removing this route, you remove direct connections between North Seattle and Overlake, and you also remove the only route that passes on 148th Ave NE from Seattle.</p>	3/16/2015 4:22 PM
785	<p>Can 271 and route 32 combine/connect through?</p>	3/16/2015 3:39 PM

786	This is a great bus. Please do not mess with it.	3/16/2015 3:37 PM
787	I love the 542. It's a lovely commute--it's usually on time, has sufficient seats, comes often enough, has some nice drivers, and goes right where I need to go. I know that sometimes we forget to thank Transit for all that it does, so I wanted to take this opportunity to share. I love the 542. Please, please, please keep this route! I will be sorry to see the 242 go. The timings rarely worked for my schedule and it was often really late, but it was lovely when it worked. Practically door-to-door service for me.	3/16/2015 3:24 PM
788	Overcrowded during peak hours around U districts. First bus get too full and because it still needs to stop at every stop and it takes time for people to get out in full capacity bus, all buses get very late (I often see a bus 20mn+ behind schedule with another 48 just behind it completely empty).	3/16/2015 3:17 PM
789	Increase frequency for 12 for 545 we need a route that goes redmond to capitol hill.	3/16/2015 3:14 PM
790	I don't get why these routes get re-routed on Saturdays. Would prefer them to just keep the regular route on Saturdays.	3/16/2015 2:22 PM
791	A more frequent route between Overlake Transit Center and Capitol Hill would lead me to ride the bus more. I don't mind a light rail transfer as long as it is easy.	3/16/2015 2:21 PM
792	This is the route I use every day- its constantly packed.	3/16/2015 2:18 PM
793	please ensure this continues to be a high quality experience with sufficient access to buses for commuting.	3/16/2015 2:15 PM
794	If you eliminate 277, you need to provide a alternative direct bus route to UW from Houghton P&R.	3/16/2015 2:13 PM
795	How is this route affected?	3/16/2015 2:13 PM
796	Per Alternative 1, route 66 would no longer provide service on the weekends as current service would be replaced by route 67. If I needed to go Downtown on the weekends or in the evening, I would have to either take the 67 up north to Northgate and then take route 41 or take the 67 south to the UW rail station to connect Downtown. I am open to these options; however, I am wondering why the revised route 67 needs to travel all the way north to Northgate Way only to make its way back south to Northgate Transit Center? Is there a reason that route 67 has to backtrack to make its way to Northgate Transit Center? Also, I would hesitate to travel south to the UW light rail station as the proposed new route would appear to take longer. I avoid riding on routes that travel through the U-District on the Ave because they have frequent stops and get very crowded with university students. My concern is that commuters that live north of the U-District would have no choice but to get funnelled through Ave which is already slow going. Also, the Ave only provides one lane in each direction and contains too many bus stops, so I fail to see why this street, rather than 15th Ave would be selected.	3/16/2015 2:12 PM
797	These routes are really efficient for moving people across the bridge, I don't need to plan my trip during peak hours as I can depend on a bus arriving within 15mins - good when things are cold/wet.	3/16/2015 2:12 PM
798	The service is not frequent enough. One of the biggest challenges with the route in the morning is that many of the commuters only use this line as a way to move 1-2 stops and it can sometimes limit access to people taking the bus to Redmond. From Eastside to Seattle, all stops after OTC seem to be incredibly overcrowded and it's often not possible to get on the bus. A significant share of ridership seems to only use this bus to get to the University district.	3/16/2015 2:01 PM
799	Please keep frequent busses on this route!	3/16/2015 1:55 PM
800	Downtown Seattle to Redmond is packed during commute times. Can't get a seat. More buses please.	3/16/2015 1:50 PM
801	The 545 gets very crowded during peak times, which is pretty inconvenient for the long trip. It is most crowded from Olive to Overlake (AM) and from Overlake to Yale (PM). The buses often run 10-15 minutes late during peak, and more when there are events going on in downtown Seattle. The light rail seems like it would ease a lot of this, so I wonder if it makes sense to either have the 545 end at the light rail station at UW, or have a dedicated line between Overlake and UW during peak. Also, the 545 into Seattle, during evening peak, can take a long time to travel down 5th Ave. The Stewart and 5th intersection, immediately followed by Olive and 5th, can be quite a jam in the evenings, so it often makes more sense to get off the bus at Stewart and 7th and then walk the rest of my trip instead of getting off at 5th and Seneca. I usually gauge the traffic on Stewart ahead of the bus just to see if I should get off early, then I "race" the bus on foot. I've won quite a few times. The 545 outside of peak is great, so I actually try to adjust my daily work schedule to get closer to non-peak.	3/16/2015 1:43 PM
802	A lot of people use this route to get to and back from Microsoft Main Campus from Seattle. While peak hours is when most of us commute, we also rely on the bus for emergencies. If there is not route to downtown Seattle I will not have a solution how to get to my home and my family in case of emergencies. Bus + light rail sounds complicated and I would not even know where to go.	3/16/2015 1:42 PM

803	This route does more than connect Ridgecrest-Overlake. It connects Montlake to lower 148th Ave NE. There will be no feasible workaround using buses to access 148th AVE NE and NE 36th ST. It will be faster and more reliable that I take the 542/545 to Overlake and walk the rest of the way instead of going further into redmond and taking the 221.	3/16/2015 1:31 PM
804	Current routing of the 542 westbound typically loses several minutes per trip on the I-5 off ramp. Changing the route to turn north on 11th Ave NE and then left on Ravenna Blvd would usually save time. Even better, if only for me, would be for the route to continue north on 15th Ave NE instead of turning west on NE 50th, and to turn west on NE 65th (with a stop near 65th & 15th). I love the idea of the 542 providing all-day service.	3/16/2015 1:28 PM
805	Routes 11, 8 & ST 545 are all overcrowded during peak periods today. Because of this cutting down on service makes no sense.	3/16/2015 1:23 PM
806	I use the first 242 East bound almost every weekday morning from the I5/65th part and ride. This is a peak time commuter run and usually pretty full. I'd hate to lose it, but open to discussion after the trains get further north. Not everyone is trying to get downtown... Keep the 542 as it's the main 'option' for getting between the east side and I5/65th park and ride...	3/16/2015 1:20 PM
807	Not enough routes. Also Connector service in Capitol Hill is TERRIBLE - there just aren't enough stops in enough locations and as a result the 545 is overcrowded. Microsoft please fix this - it's embarrassing!	3/16/2015 1:18 PM
808	I think you really have to be careful about adjusting route 545 to favor route 542 and introduce a transfer on 545 for those who use it currently throughout the day and on weekends to go between downtown Seattle and Overlake Transit Center. Route 545 is very heavily used because so many Microsoft employees live in downtown Seattle and value being able to get back and forth between downtown and Overlake Transit Center directly and with no transfers throughout the day, evenings, and on weekends. Reducing service on route 545, which is so heavily used, and increasing it in route 542, which isn't, seems like you have the priorities backwards.	3/16/2015 1:17 PM
809	8: I mentioned this on prior pages but want to emphasize - the 8 is a very important cross-neighborhood connection and its potential is hampered by low reliability and low frequency. It will see a lot higher ridership if its frequency is increased (10-minutes peak, 15-minutes off-peak) and it's reliability is increased either by routing via less congested streets or via using the less congested center inside lanes and skipping some more problematic stops. 542/545: As mentioned, off-board payment at the Link station for transferring to those routes and increased frequency with the freed up service hours from truncating the southern portion of 545 would help greatly.	3/16/2015 1:11 PM
810	542: - It would be great to add a few stops on Roosevelt Ave when going from Green Lake toward Redmond - It would be great to go north on 12th rather than getting onto I5 because the 65th exit is usually backed up.	3/16/2015 1:10 PM
811	Right now to commute between Madrona and downtown Bellevue, I have to take 2 to 3 buses no matter what (2/3 --> 48 --> 271, or 2/3 --> 550). The new transit plan doesn't seem to solve this problem, so my request is to ensure frequent runs for these routes so passengers don't spend too much time waiting for the connecting bus.	3/16/2015 1:06 PM
812	The 242 is an essential connection from North Seattle to the eastside, and the 542 is a poor replacement. The 242 circles the entire Overlake business center and drops you near your office, instead of the 542 just stopping at Overlake where it is a 15+ minute walk to the office. Also, the 242 serves a much larger area and runs much faster since it doesn't have to go through the U-district. Please keep the 242!	3/16/2015 1:03 PM
813	Please do not reduce service hours	3/16/2015 1:03 PM
814	I would use transit to downtown Seattle more often if the frequency of trips was improved in the late evening (10 PM or so). That's when evening downtown events usually conclude. I suppose in the future this will be the role of light rail.	3/16/2015 1:02 PM
815	Without the 47, the 43 is a very convenient route to downtown from the west side of Capitol Hill.	3/16/2015 12:59 PM
816	I am super bummed that the 242 is being cancelled. This route was a factor in my house purchase because it was a direct route from my house to my office.	3/16/2015 12:59 PM
817	You should maintain these routes, and increase the frequency of the 555 around peak hours - there is not a day between 7:00 and 9:00am where the bus isn't jammed with people standing for 40 minutes or more. Not a great experience, and hard to grow ridership under those conditions.	3/16/2015 12:59 PM
818	I use transit to get from south Wallingford to the top of Capitol Hill. On the best of times this takes about an hour. Or, it's just 15 minutes by car. I'm not sure that any of the changes you've proposed is going to make my travel time faster. And at night/weekends I suspect it is going to make the trip take even longer. I'm also concerned about killing off the 545 at off-peak times. Given what "Peak" means in Metroland, I suspect this will result in worse bus service off to Redmond.	3/16/2015 12:58 PM

819	8 - needs more frequency 49 - great as it is especially the service to north broadway 545 - needs more frequency at peak times	3/16/2015 12:53 PM
820	The 16 coming from Sounders games is notoriously late/absent, presumably because of traffic redirection as people get out of the game. Would be great to have a faster option direct from the game to Greenlake.	3/16/2015 12:52 PM
821	These routes are important to me.	3/16/2015 12:51 PM
822	It is very valuable to me that ST 545 runs late in the evenings. This allows me to work late when needed without having to worry about a long commute time back.	3/16/2015 12:50 PM
823	Please keep/increase frequency of 545 during peak hours	3/16/2015 12:42 PM
824	The 542 is an important route, whatever you do, do not cut this route. There are many people commuting from the U-District to MS Campus in Redmond, and it seems that also many people commute from Redmond to the UW Hospital. This bus is always full, do not cut it. Making a connection to get from the U-district to MS Campus is not an acceptable solution.	3/16/2015 12:38 PM
825	Keep 242 or provide some option that doesn't make my commute from Maple Leaf to Redmond significantly longer	3/16/2015 12:37 PM
826	The location and frequency of the 545 as it currently stands is optimal for my commute (as well as many other people I work with). I currently live downtown 4th & Virginia and commute to the OTC. My work schedule varies so sometimes I commute to work after 9 am and return home after 7 pm (my return trip home happens later than 7 on a regular basis). If the frequency of the current 545 route was to change I would almost certainly never take the bus and would drive to work daily.	3/16/2015 12:35 PM
827	These routes keep Seattle connected to Kirkland and Redmond. Without them operating all day and on the weekends, there isn't a reason to live in Seattle. Or, at least, use metro service at all.	3/16/2015 12:28 PM
828	1. Do not deviate the 16 from the 5 in Fremont so riders have more flexibility for what route to take downtown. 2. Do not reduce off-peak service for the 545 unless you add a direct connection between Seattle's North West neighborhoods and the U District. If Metro riders in these neighborhoods have to start making 3 connections instead of 2, they will buy cars, and Seattle will get more congested.	3/16/2015 12:24 PM
829	Rte 8 - Needs more frequency and reliability. Like that about alternative 1. Rte 43 - This is great in conjunction with Rte 44. 24th Ave E corridor needs good connection to Wallingford and Ballard. Worried about removing this in alternative 1.	3/16/2015 12:23 PM
830	Keep the 12 bus on Madison. Super important for people who live on 15th and 19th to get downtown. The 8 (and Denny in general) is a mess. The city needs to improve traffic flow onto the freeway so that traffic doesn't back up onto Denny.	3/16/2015 12:21 PM
831	I would like to see the 545 continuing to run on the same route and at at least the same frequencies all day and all evening.	3/16/2015 12:15 PM
832	Please keep this route!	3/16/2015 12:15 PM
833	Link light rail does not provide any stops along the rt43 currently serves between Broadway and Montlake. Loss of RT 43 adversely affects the area residents' access to downtown since they will be required to take RT48 in the opposite direction first to catch the LRR at University station to get to downtown. Daytime and off-peak RT 545 runs are critical backup to the company provided transportation like Microsoft shuttles which only runs during peak hours. Loss of off-peak service will encourage more people to drive for the fear of losing "return home" options.	3/16/2015 12:14 PM
834	25 weaves around Laurelhurst to much. Suggest you come in via 45th and out via 41st, skip the point. 271 is getting very crowded in the morning. Sometimes I can't get on the bus at Montlake.	3/16/2015 12:11 PM
835	It is unclear what your changes re:starting in University mean. Does that mean on the Ave, or at the light rail station? On the Ave is great. Light rail station is a little out of the way if living in the U district and will require multiple busses. Only good if you increase the frequency to every 5 minutes so as any bus you take to the Light Rail station will never require you to wait.	3/16/2015 12:10 PM
836	Keep it please! Would like at least some bus service for off-peak	3/16/2015 12:07 PM
837	I like the increased service between Seattle/Eastside. I think the benefits of having more reliable service outweigh the costs of making a transfer. However, I wish there was a late-night route (until 1 or 2am), even if it only ran once per hour.	3/16/2015 12:06 PM

838	8 - would love to see route 8 more reliable, but does not help me if night 545 is cancelled 43 - Would love to keep 43 for fast connection from Montlake to top of capitol hill - alternative seems to require 2 changes of bus, which probably, with wait times, takes a lot longer on average 542, 545 - not sure what the removal of the Montlake freeway station does to travel from OTC to top of capitol hill...	3/16/2015 12:06 PM
839	Route 242 serves a major employer (Microsoft). Route 542 is a flawed substitute for route 242. For example, 542 is not a convenient for employees on Microsoft's West Campus like route 242 is. Also, that the 542 snakes through the UWU District makes for a longer trip.	3/16/2015 12:05 PM
840	Please make the 550 Express be truly express. It should not stop as often as it does in Bellevue. It adds 20-30 minutes of commuting to downtown Seattle. I drive all the time because it's a lot faster despite the awful traffic. If there could be a new 550 express during Peak hours only that went straight downtown from the Bellevue downtown station to the tunnel, I would start taking transit again.	3/16/2015 12:05 PM
841	This route is currently very overloaded during peak hours, especially between Capitol Hill and OTC. Any plan considered should increase peak hour service between these two locations. Better planning with Microsoft to improve Connector stop placement could help reduce the strain on this route. Currently, the first Connector stop is less than a block from the morning 545 stop in Capitol Hill, but the 545 gets to Remond in half the time. Better Connector stop placement could shift some of these riders back to the Connector, mitigating the need for increased service.	3/16/2015 12:04 PM
842	This bus is consistently full coming out of Redmond to Northgate and is used by hundreds of employees at Microsoft. If this route is discontinued it will add more commute time to people's schedules, using connections. I have completely quit driving to Redmond over the past 4 years because of the ease of using the 242 to get to and from work, if this change is implemented I think more people will decide to drive because of the additional commute time.	3/16/2015 12:03 PM
843	This route is a lifeline for Microsoft employees, including those not served by the Connector in the Downtown core. Dismantling it, especially for off-hour trips & when Light Rail is unavailable (metro tunnel shutdown/derailment/medical emergency, police activity etc etc) would place riders in a tough situation.	3/16/2015 12:02 PM
844	The 48 is a great bus but is always delayed, due in large part to the obscene frequency of the stops. In the morning and afternoon on weekdays it's overrun by UW students (of whom I am also one). The problem arises when the bus stops at Cowen Place, then 55th, 52nd, 50th, 45th, 43rd, Campus Parkway, and 41st. If the stops were consolidated to every 5 blocks, it would save considerable time for the bus in reentering and leaving the stream of traffic every 2 blocks. Also, and I know you're not the bike-share committee, but if there were a bike share location at, say, Green Lake as well as at the University, a lot of students would at least have the option to partake. I'd love to bike but don't own one and the bike share only goes downtown. Could you pass that along?	3/16/2015 12:02 PM
845	I would use route 8 often (instead of driving) if it were more reliable, cleaner, and frequent. It's ridiculously overcrowded going from Seattle Center to Capitol Hill during peak times. On evenings when I would ride 8 to events at Seattle Center, it would have to come every 10-15 minutes...not maybe every 45 minutes.	3/16/2015 12:01 PM
846	I would like to see improved coverage for these routes.	3/16/2015 12:00 PM
847	Direct connection without transfers between Eastside (Redmond and Bellevue) and downtown Seattle during off-hours on weekdays is still important because people work late. Direct service on weekends is less important.	3/16/2015 12:00 PM
848	71 currently runs past 1AM. There's got to be at least one trip past 1AM, please.	3/16/2015 11:58 AM
849	The 545 is already undesirable since it gets such heavy traffic at peak hours. Particularly the Capitol Hill stop is always flooded with people. I specifically wait for off-peak hours to have a seat and not jostle for position at the stop. If anything, service should be increased for this heavily utilized route.	3/16/2015 11:58 AM
850	This is the route I use by far the most, at least ten times a week. It is overcrowded during peak hours, so I often try to schedule my day so that I am able to ride outside of peak hours, and I am concerned that reducing service to peak hours only will exacerbate this problem. I really appreciate being able to use it during the day and in the evenings, and if that were not an option I would probably be pushed towards carpooling or another option.	3/16/2015 11:56 AM
851	545 needs to run more frequently from 730 to 9AM. I find myself having to stand far too often on this bus in the morning. Keeping the route from capitol hill to Redmond allows me to live without a car.	3/16/2015 11:56 AM
852	should come to OTC not the freeway	3/16/2015 11:56 AM
853	Keep it the same.	3/16/2015 11:56 AM
854	You really should have a Montlake freeway station and have this route go downtown.	3/16/2015 11:51 AM
855	Great route. Wish it wouldn't ride all the way up to Capitol Hill.	3/16/2015 11:51 AM

856	The proposed change (Alternative 1) that requires riders coming from Downtown Seattle trying to get to Overlake in off-peak hours and weekends to have to take light rail to University and then catch a bus would seriously impede my ability to get to and from work at Microsoft. I do not own a car and rely solely on public transportation. I often have to work late or early hours and sometimes go into work on the weekends and having the additional steps seems like an unnecessary hassle when the current Alternative 2 would allow me to get to and from work without the additional hassle, risk of missing trains / buses when transferring, or time out in the rain. That change would mean I'd have to seriously consider purchasing a car and driving daily just to avoid the hassle, which would reduce if not eliminate my use of Seattle public transit services.	3/16/2015 11:50 AM
857	Use 545 during the week for late nights at the office. Please do not remove this.	3/16/2015 11:48 AM
858	They are fine the way they are	3/16/2015 11:48 AM
859	I take the 545 nearly every day between downtown Seattle and Redmond (OTC). While most of my trips are at peak times, on days when I need to travel off peak I would be less likely to take transit if it required a transfer.	3/16/2015 11:47 AM
860	This is a great route which reduces the amount of bus traffic that needs to pass through the university district which is the main issue of the 542. Please do not remove this route	3/16/2015 11:47 AM
861	It is my daily commute between Downtown Seattle and Redmond. I normally come back to Seattle AFTER the peak hours, so I'd have a longer commute every day by having to transfer to the lightrail.	3/16/2015 11:47 AM
862	Concerned about "peak hours" for the 545. If I work late, will I be stuck? how can I get home from redmond to belltown outside of peak hours?	3/16/2015 11:46 AM
863	545 is a convenient one bus way to get a lot of people to the eastside from downtown and vice versa. The light rail + 542 option seems to increase the time of transport	3/16/2015 11:44 AM
864	Keeping the travel-time/frequency of the 545 between Overlake Transit Center and Downtown Seattle is very important to me. I use it daily. I believe it is one of the most heavily used routes around. Please optimize for it to be well serviced moving forward.	3/16/2015 11:43 AM
865	You have removed stops between Aloha and Denny on Dexter Ave - this is way too far between stops.	3/16/2015 11:43 AM
866	please keep the connection between Capitol hill and Madison valley/ Madrona on Route 2	3/16/2015 11:39 AM
867	The 545 route through downtown Seattle is unnecessarily slow due to traffic on surface streets. A version of the 545 that used the bus tunnels to bypass surface streets would help immensely, making 545 a faster and more convenient option for residents downtown. SLU residents would remain well served by the South Lake Union Streetcar which is easy to access from the downtown bus tunnels.	3/16/2015 11:38 AM
868	The 545 route is great. I'd love it if it kept running through capitol hill all day	3/16/2015 11:37 AM
869	I find the transit system today to be too complicated. I get on a bus and feel like I never know exactly where it is going to go. I would like a simpler system that has more logical routes (hub and spoke) than a more complicated direct route system. The biggest reason I don't use transit is that the cognitive barrier is too high compared with just driving somewhere. I can't tell you how many times that I have tried to use the bus system to find myself on the wrong bus, or the bus going the wrong way, etc. and ended up having to taxi to my final destination in order to make it on time.	3/16/2015 11:37 AM
870	would like to see it retained, in some fashion	3/16/2015 11:37 AM
871	The 542 is a frequently used route. Increasing the time it's available would greatly help those of us in the Green Lake district that depend on to get to and from work on the Eastside.	3/16/2015 11:36 AM
872	Don't eliminate 242.	3/16/2015 11:35 AM
873	During rush hour, I see very few people getting off 255 at Montlake so why would you reroute the bus to UW? It makes little sense when half of people spill out of the bus at the first stop after getting off I-5 and the rest at Westlake and the next stop...	3/16/2015 11:16 AM
874	Major commuter routes need to be more frequent and reliable. Need a faster direct route from UDistrict to Seattle Center (via Eastlake)	3/16/2015 10:57 AM
875	These are the only direct routes between Kirkland and Seattle since Metro cut the 265. Cutting service from these routes while still collecting money from the Kirkland residents' taxes to pay for the light rail (which will not only not provide them any service, but will directly hinder commuter traffic) is unethical and immoral. If we lived in an actual Republic it would be illegal as these residents are paying more and more money for service for other people that they themselves cannot use.	3/16/2015 10:19 AM

876	Route 12 is an essential route for the east side of Capitol Hill. with the steep topography, 15th and 23d are not easily accessible. This is a reality. 12 is a critical link for downtown and Madison/First Hill. Density is increasing all along route 12 on 19th and Madison on Capitol Hill. We need to get people onto the buses and out of their cars. Eliminating service to this part of the hill is the wrong strategy, particularly in light of density that is coming to this area in the future. Also, people can connect to the Broadway street car from the 12. Route 8 is a critical cross town connector. Please fix as you can. thank you	3/16/2015 10:06 AM
877	It appears Alternate 1 will not provide the ease of route 43 to get me from Downtown to Boyer Ave. E and 24th Ave. E or from Downtown to 16th Ave. E and E John St.	3/16/2015 9:20 AM
878	(Already said) - Add stop at Houghton Freeway Station. That's what it's there for.	3/16/2015 9:13 AM
879	The 311 takes long enough as it is without having to make riders transfer too.	3/16/2015 9:12 AM
880	You need to figure out a way for it to go faster. I understand that, because it's at street level (at least in this neighborhood) the inclination is to go slow to protect pedestrians and street traffic. However, the train is so slow, it's no faster than a car, and that's a problem. I drive a car. In rush hour, I can sometimes outrun the train. Why on earth would I take the train if it's slower than taking my car? Before Seattle, I lived in Vancouver, BC. The Skytrain is super fast. It's the best, fastest way to get from anywhere in the eastern suburbs to downtown Vancouver or anywhere in between. I prefer it over my car. It's fun to ride. The light rail in Seattle is just too slow. It should get to downtown from Columbia City in ten minutes instead of 20. Then it would be worth the ten minutes it takes me to walk to Othello Light Rail, because with the same total travel time, including walking, I'd be ahead by not having to look for parking when I got there. Does that make sense? And whenever I take the light rail, it's half empty, yet there's no shortage of cars on the street. I'm pretty sure that I and a lot of other drivers would be happy to ditch our cars and jump on the light rail if it was at least as fast as driving, but even with traffic congestion, it's still faster to drive. This needs to change if you want the ridership to really support public transit.	3/16/2015 9:10 AM
881	They're essential to my travel between Seattle, Kirkland and Redmond.	3/16/2015 8:31 AM
882	If I am reading alternative 1 correctly, service on the 26 from Wallingford to Downtown would be discontinued, requiring me to backtrack East to the U and then take Link light rail downtown. I am opposed to this, and given how many people take the non express 26 (boarding after I do at 35th and Wallingford) on weekdays, I do not understand how this route would not be maintained. Backtracking and transferring will take about 25% longer for my commute both ways, and I would be more likely to use my Wageworks benefit for parking and drive if this change was made. Thank you.	3/16/2015 7:43 AM
883	These routes have good frequency in the morning but in the evenings, especially after 5:30pm the lack of frequent service becomes inconvenient and the few that do run are often very crowded. Additionally the first stop at heading northbound at 7th Ave NE & NE 42nd St is unnecessary as the area is also served by an adjacent stop for the 71, 72, 73, & 74 at 42nd St & 8th Ave NE. The stop for the 76 & 316 on 7th Ave NE causes the bus to get caught in additional traffic trying to get through the light at NE 45th ave and delays to the trip. The stop at 7th Ave NE & NE 42nd st should be eliminated.	3/16/2015 7:33 AM
884	255 is the only bus that frequently connects Kingsgate and Downtown Seattle. Why change the 255 Route to Children's Hospital? Create a new service from the Eastside to the University. Changing buses during the travel to Downtown Seattle adds more time. We need frequent all-day service between the Eastside and Downtown Seattle! You proposal will create slower connection from the Eastside to Downtown Seattle.	3/16/2015 7:21 AM
885	255 goes straight to and from Seattle for my morning & evening commutes to and from work. The convenience and time factors 255 is a straight shot to Seattle. I then take the 124 to work. I do not want to take additional bus/ or train to and from work. My work schedule is 6:30 am - 5:00 pm. Mon-Thurs.	3/16/2015 6:59 AM
886	Routes 252 and 257 are highly used routes in the North Kirkland neighborhoods since the deletion of route 260 last year. Proposed alternate of 311 is not viable as it does not run thru neighborhoods or P&R stops and would not support the large masses that currently use these two routes. Therefore both these routes should be maintained.	3/15/2015 6:39 PM
887	Don't mess with these routes!	3/15/2015 5:35 PM
888	Some redundancy with previous responses, but consolidated here: Route 49: Consider routing the 49 down Seneca instead of Madison to make a more direct connection the University Street tunnel station and Virginia Mason. Route 8: the new route 8 (assuming you proceed with alternative 1) seems an ideal route to convert to an electric trolley since most of the route already has the wires and Denny has some nasty hills than electric trollies are especially good for. The proposed changes to route 8 in alternative 1 are fantastic and probably my favorite part of alternative 1. Routes 43/48: Strongly support the elimination of Route 43 as it is essentially redundant with the light rail route. Beefing up frequency on the 48 and 8 (alternative 1) is great compensation for the trips that relied on the "in-between" parts of the 43 (which is a minority of the ridership on that route, speaking as a former rider).	3/15/2015 5:04 PM

889	It's very convenient to use for going to the UDistrict.	3/15/2015 3:32 PM
890	Need more frequent and more reliable service between South Lake Union and Madison Valley. In particular, the bus gets caught up in traffic at Fairview on Denny, causing long delays particularly between 4pm and 6pm. The timing of the lights at Fairview and then the entrance to I-5 further up on Denny are terrible, and traffic crawls at this one section.	3/15/2015 2:48 PM
891	This route is way too crowded. More buses are needed with more room.	3/15/2015 2:37 PM
892	Stops are close, increased frequency would be extremely helpful.	3/15/2015 12:52 PM
893	43 is essential to reach top of Capitol Hill---Also needed to reach the light rail station if you live on North Capital or in the Southern area of Montlake. Please do not eliminate it.	3/15/2015 12:44 PM
894	I need direct transport from Pioneer square where I live directly to Redmond. Currently, the 545 route goes through ALL downtown Seattle and then to CAPITOL HILL, which adds 15min to my commute every day. Plus there is no Wi-Fi on the bus, which is terrible for my productivity.	3/15/2015 12:36 PM
895	Always keep the 43 going every 10 minutes the the UW.	3/15/2015 11:25 AM
896	It's critical for me that buses on these routes run as frequently as possible and with enough room for everyone to sit down.	3/15/2015 9:18 AM
897	The loss of all-day service in the Maple Leaf neighborhood and north would affect many non-peak hour-only commuters - especially those to the University of Washington (staff and students). This could increase vehicle traffic in the neighborhoods	3/15/2015 8:35 AM
898	At the present time these buses are often overfilled with passengers. I think that Alternative 1 would only make matters worse.	3/15/2015 8:28 AM
899	I hope that the 8 would pickup all the stops in Madison Valley, Washington Park, and Madison Park that 11 currently has. I was unable to tell if 8 would incorporate all the 11 stops, or only a subset. I like the focus on direct route from Madison Valley to Denny Triangle area. I travel this route several times a week and a direct route would increase my use of public transportation. I'm bummed about losing a direct route from Madison Valley and Madison Park to downtown, but if frequency is improved such that even with a transfer overall time is not impacted then I'm okay with it. The only risk is will the actual frequency be as timely as the plan.	3/14/2015 10:41 PM
900	I really miss the late night route 30 service to Sand Point, I know it wasn't a very popular route but there are a large number of UW students living in Sand Point and it was nice to have the frequent service continue into the evenings (at least through 9 PM on weekdays).	3/14/2015 10:28 PM
901	16 - I like the concept of alternative 1 where this bus now becomes a connector of Sandpoint, View Ridge, Ravenna, Roosevelt, Green Lake, Wallingford, Fremont, and downtown Seattle. This crosstown connection bus is currently missing and very much needed. 65 - I like the increased frequency of Alternative 1. 372 - I like the increased frequency of Alternatives 1 and 2. 71 - I dislike the changes to 71 under both alternatives. In alternative 1, the deletion of the 71 will force a transfer to reach the northern University District and downtown Seattle, plus a longer walk for many people to get to a bus that will get them to the light rail station at Husky Stadium. In alternative 2, the service truncating at Roosevelt will make it useless in most situations. Please keep the 71 in place on its current route and frequency until the Roosevelt light rail station opens. The transfer at Husky Stadium will be far and inconvenient. It is a long walk between Stevens Way on the campus and the new link station.	3/14/2015 10:14 PM
902	Shortening the 48 route and eliminating the 11 route would take out buses that my family uses regularly and would force us to shift to alternative transportation.	3/14/2015 8:01 PM

903	68 - this route goes to Northgate - I only have to walk a long block to get to a bus to go to this major shopping area. I only have to walk 1 block to get to this bus to go to work. 71 - I only have to walk 3 blocks to get this bus to go downtown for shopping and for entertainment (live theaters). I would have to walk from NE70 and 25NE to get to the light rail station at Roosevelt if the 71 is discontinued. I am most worried about returning home at night - not that I'm afraid of bad people - I'm afraid of being older and not as numble and spry as I am now. I've lived in Seattle a long time and always used the bus. Suddenly, the convenience is not going to be there when I may need it most.	3/14/2015 4:55 PM
904	I use all these routes regularly. I would like to see more frequency on some like #65, and I would to see Route #72 retained. But for most of these I like and us the service as it is. I don't see myself generally taking light rail from the Montlake Station (When it gets to Roosevelt maybe). To work for me, any changes have to retain good frequent 7 days a week bus access to both Capitol Hill and Downtown even after the Montlake Light Rail station opens.	3/14/2015 3:16 PM
905	Route 11 is the only connection for Madison Valley and Madison Park with downtown Seattle. I don't want to have to change to light rail on Broadway if I am only going downtown. Transferring is NOT efficient. Please keep the #11 route.	3/14/2015 3:07 PM
906	Please don't alter as it's hard to get out of Madison Park without the bus service.	3/14/2015 2:52 PM
907	The lack of weekend service via route 30 to Sand Point and U district from NE 55th St.	3/14/2015 11:50 AM
908	* 16 - It will be GREAT to have this frequent service through View Ridge. As I mentioned previously, I would prefer that it use 70th westbound at all times rather than just evenings and weekends. * 64X - Service to SLU has been sorely lacking. I used to work there and could again some day. 64X to Fairview will make this much better. * 65 - It will be GREAT to have this frequent service through the 35th Ave business district to the new Husky Stadium station. I would prefer that the southbound route go directly to the station rather than through the campus, but its a minor quibble. * 71 - Not a great loss given the coming of light rail, adding the 16 on 65th and retaining the 76. * 75 - I would prefer if it directly served the Husky Stadium station rather than going through campus, but it's a minor quibble. * 76 - This is my main downtown commute, so retaining it during peak hours is important to me.	3/14/2015 11:49 AM
909	This provides people from Madison Park and Madison Valley a direct connection to downtown. There are a lot of elderly people in Madison Park, and a lot of working people in Madison Valley who are or could potentially be bus riders. The parking situation in downtown, Belltown and Capitol Hill continues to worsen dramatically. This means the incentive to take the bus is growing, but if the best, non-transfer alternative is taken away, we will be losing a chance to get more people out of cars and onto transit.	3/13/2015 11:23 PM
910	I depend in the #2. Don't cut it!	3/13/2015 7:34 PM
911	The 8 has serious timing problems right now. It can't even begin in LQA at Mercer and Queen Anne on time after 12pm (roughly). Coming from Rainier Valley, it's always behind schedule, and sometimes packed two or three in a very short period of time and then nothing for a very long time. I have walked from Capitol Hill to LQA faster than it took a bus to show up, and vice versa.	3/13/2015 6:43 PM
912	The Rt. 277 is a great bus for me for I just need to walk down the street to catch the bus or even go to Houghton P&R. When I have things to do at night. I last few weeks I have been taking to 540 for I got hurt and it runs longer then the 277 at night. I take the 25 when I stay at a friends home. right from their home. If I park by the UW at Mary Gates I can walk to 45th and catch 31,32,75 to get me to UW. I can take the 542 and transfer at EG. Br. However I like my RT 277 best of all.	3/13/2015 6:31 PM
913	rts 71-2-3-4 - There are people that still would rather get to university district via i-5 (local) and would want the main destinations to remain. And also to still want want them to be all day services 66x - not possible to run its current route off peak? 255 - there's nothing wrong with this route no need to change it (besides not stopping at the main destination at all times).	3/13/2015 5:35 PM
914	255 - This may be best kept as is. 252/257/311 - If these routes are merged, passengers will not be served without some help, and you run the risk of overcrowding the 238 and 236. Moreover, the current schedule has the last 257 serving a portion of the 238 at about the time that the 238 has stopped running. If the intention is to use the 236/238 as shuttle routes to cover for the missing 252/257, it would be best ot increase frequency of these routes during Peak to match select 311 runs. Otherwise, i would suggest using the 252 snow shuttle as an every day service to fill in the gap for the missing coverage, and provide service in a loop between Kingsgate PR and Brickyard PR via Kingsgate and Juanita, with an extension of the 252 shuttle to cover the service area in Juanita and Queensgate currently covered by the 257. (The portion on 124 NE north of NE 144 could potentially be eliminated, as this is covered fairly well by the 255.)	3/13/2015 5:25 PM
915	Route 28 gets me to work. It's the route I use most often, but I rarely ride it all the way downtown. The proposal to make it all-express, all the time is unappealing to me.	3/13/2015 5:18 PM

916	Keep it exactly as it is. It provides perfect service. Its ridership has steadily increased as residential and commercial development have come on line on 19th Ave. and on Madison. I am certain, in addition to the inconvenience of going to either 15th or 23rd, that routes on either street will become overcrowded due to an insufficient number of buses on either run relative to the number of people who would need to use them with the elimination of Route 12. Keep 12.	3/13/2015 5:05 PM
917	expand its service time in the future (no need for weekends, but please put more buses in this route since it is quite important for students).	3/13/2015 4:33 PM
918	these are all routes that I use frequently, both to move around locally in Ravenna/Roosevelt/U District area, and to go back and forth to downtown and other transfer points. The planned changes to these routes seem to be mostly the same as the service cuts proposed last year to accommodate the funding shortfall. These changes would/will be a significant reduction in service to my neighborhood (15th Ave NE, North of NE 65th). My nearest bus stop(s) will be half a mile away and I will have to do more walking and more transfers, in most cases for both alternatives. I use a lot of other routes frequently also (I don't drive), but I'm not commenting on them here because this information is just waaay too much to try to figure out all in one go!	3/13/2015 4:23 PM
919	It is vital for the Madison Park/Valley area to maintain a bus route into Madison Park, particularly in the mornings and early evenings (work related schedule)	3/13/2015 4:11 PM
920	route 74 should run all day and route 30 should go to Seattle center. There are no buses to Seattle Center from the Ave or from Bryant. Route 32 takes a lengthy round about way to Seattle center and does not stop on the Ave.	3/13/2015 4:08 PM
921	This route is CONSTANTLY late - usually 10-15 minutes by the time it gets from Beacon Hill to Capitol Hill and it seems that the scheduling hasn't been evaluated or updated at all. I frequently ride this bus and it is extremely frustrating to constantly be late to work when I should be able to arrive in plenty of time. For this city to truly be "green" we need a vast improvement in our public transportation options. It is laughable when you compare a city like Seattle to almost any other metropolitan city - we have the means to make change (especially if companies like Amazon or Microsoft actually payed their fair share of taxes and fees associated with new construction) and yet we wait and wait and wait for any meaningful change. I have been car-free for several years now and while it is doable in this city, it does not come with a lack of frustration and disappointment with the state of service in Seattle and King Co.	3/13/2015 3:31 PM
922	The 10 and the 12 have been so useful to me over the years, so keeping those routes or an ability to move up and down the Hill with some efficiency would be great. The C line is frequent, but the fact that it "goes backwards" through West Seattle (I get the bus and then it weaves through Fauntleroy and the Junction) which is remarkably inefficient-- so much so I am using my car much more now.	3/13/2015 2:36 PM
923	Keep the number 111 operative. It is O.K. to cut it back to say one an hour. Also please please stop the transit people from using those extra long buses. They are not necessary on the 11 route, they jam up the corners at Martin Luther King Way, and seem like a huge waste of money. O. k. to cut back but not eliminate route number 11. Jim Rigos 4105 East Madison Seattle, WA 98112 206-325-1800	3/13/2015 2:25 PM
924	It would be great if the 347/348 ran more frequently during rush hour or have the 41 go all the way to Lake City rather than ending at 125th & 5th. Seeing as how the tax initiative and the car tab fees both passed, I would hope that Metro can improve and increase service rather than cutting back. I understand the need to close underutilized routes in order to maximize efficiency, but would hope that that would lead to more frequent runs on the heavily used routes. Every time I take the rush hour 41 (@15th NE & NE 125th) for example it's full before it even gets to Northgate Transit Center, It would be nice if the every 5 min rush hour service ran not just from 5th Ave, but from Lake City and the same in the evenings going back north.	3/13/2015 2:02 PM
925	Woodinville Park and Ride has space to park if you delete route from Bothell UW and Woodinville PR, there are no space to part on Bothell UW.	3/13/2015 1:28 PM
926	Route 43 is currently my commuting route and my family's weekend route. Reducing service on this route will have a significant negative impact on our use of public transit.	3/13/2015 1:02 PM
927	Crowed in the morning with school children you can't sit down. Crowed in the evening with people. You can't sit down or pick up people.	3/13/2015 12:11 PM
928	We need peak overcrowding relief NOW, not in June.	3/13/2015 10:09 AM

929	I don't understand why the Madison Valley, Madison/MLK areas are always so short changed? I ride multiple buses during the day (to various parts of the city) and I always dread #11 & #8. They are often standing room only and predictably late. Very frustrating. I don't have a car so I am stuck with those 2 buses and rarely a day goes by that I am not frustrated during my commute.	3/13/2015 8:23 AM
930	Please improve route 44 to be more frequent and direct to connect with the UW Link station.	3/13/2015 8:09 AM
931	These are vital neighborhood links that should run frequently. Without these, investment in light rail is wasted. Concerning 25, the alternative of routing through the U District by transfer is not satisfactory- I would not use transit at all if this were the alternative. Metro needs to be investing in more frequency of service in these high density areas around the University where new developments have limited parking and residents are reliant on mass transit.	3/13/2015 7:51 AM
932	Please increase the frequency. It's a great route.	3/13/2015 7:09 AM
933	I have only good things to say about these routes. They save my life all the time. I also wanted to say that the concept for the retired route 2 should be revisited because it was so incredibly handy for those who depended on it. I'm not sure if I have a suggestion for getting the #2 route back but it was great. The routes I checked are good but any of the 40's that go to Ballard and Fremont could really be improved. They're simply is not enough of them and not frequent enough routes to these areas. It should not take me over an hour to get from Cap Hill to Ballard or Fremont by metro.	3/13/2015 4:12 AM
934	I'd like a route from Madison valley that goes closer to south lake Union	3/12/2015 10:55 PM
935	All Downtown Seattle-Kenmore busses are overfilled and we need more of them, not fewer. i hope the 306 will be returned and the 312 not cut. I am confused about the status of the 309 but have friends who use it and hope it will be increased.	3/12/2015 10:41 PM
936	These routes are critical for seniors (including access to a seniors program), health care (Country Doctor), and children (St Joe's, Stevens, Holy Names). The alternative routes are on steep hillsides and therefore not reasonably accessed by the young and old. It would be community killing to lose route 12.	3/12/2015 10:19 PM
937	you can't count on the 65. almost always late. One bus away app never works on that route. 71 has started getting unreliable as well. Sometimes the bus leaves early and I have to take a cab to the waterfront to work.	3/12/2015 9:28 PM
938	Please consider the handicapped/ elderly who have time but can't walk long-distances.	3/12/2015 9:07 PM
939	16: I like this concept. I like the ability to take the bus to Magnuson Park and also to Fremont without a connection. I would never take this bus all the way downtown. It would be too slow. 65: If the bus is supposed to be frequent and fast, it needs to remove the extraneous jog over to 40th that few people use and is a total waste of time. The bus should go straight up 35th. The southbound bus stop needs to be closer to the light rail station. 71: Losing midday and evening 71 service will be hard for me. There are no good alternatives, since the bus stops by the Husky Stadium station are so far away and involve the painfully slow 65 bus' journey on 40th. 372: The bus stops need to be close to the Husky Stadium station.	3/12/2015 8:52 PM
940	The # 11 is very convenient to travel to downtown and capitol hill. It also covers many neighborhoods including the Madison Valley, Capital Hill, Downtown areas with connections by transfers.	3/12/2015 8:48 PM
941	372X needs more service on weekends and at night. Yesterday evening I wanted to take the bus from Lake Forest Park to the U., but I ended up driving as there was only one bus/hour for me to return on after about 8:00 pm.	3/12/2015 8:25 PM
942	I do not want route 16 changed to go down Wallingford ave and down Dexter. That would significantly increase the travel time to go downtown, as well as the distance I would have to walk to get to the bus, all of it uphill. I do not understand why this change is being proposed as it has nothing to do with the light rail service. It does not connect to the light rail; it doesn't even come close. This would be a significant decrease in bus service for my neighborhood.	3/12/2015 7:45 PM
943	Improve 12th Avenue Service, current Metro destinations in CD/Cherry Hill are practically useless. I choose to walk or other transit modes 99% of the time.	3/12/2015 7:44 PM
944	You could shorten the loop that the bus uses to turn around, but the number 11 must go east at least as far as mcgilvra blvd. Too many workers at Parkshore and the shops depend on the bus and the parking is completely congested there already. Workers at Parkshore are unable to find local parking.	3/12/2015 7:16 PM

945	# 11 is important to me because it runs as far down E Madison as 25th E, which is where I stop. I dont want to have to transfer to another route - currently i don't need to and i don't want to have to, due to time waste involved. Please keep it! #12 is important to me because it goes to the south end of downtown that I work in, rather than the north end that the new routes go to. It takes 15 minutes to walk from Pine/Pike to Columbia/Cherry where I work, and transferring to another bus would be irritating and not save me time. The #12 is perfect, it goes within 2 blocks of my work and i dont need to change buses. Please keep it!	3/12/2015 5:59 PM
946	I would very much like to have a true express from Woodinville to UW. The route should only stop at the Woodinville P&R, Cascadia Community College, Bothell P&R, Kenmore P&R, one stop in Lake Forest Park, one stop in Lake City, then direct to UW. The current 372 makes a "milk-run" of stops. For those of us who have far to go, a true express with limited stops would be very helpful.	3/12/2015 5:35 PM
947	Please don't try and make me transfer. I already have to transfer out of my car at a park and ride(which was not the case when I bought my house 2 years ago). Please don't make it worse.	3/12/2015 5:30 PM
948	without the 11 route I will have no way to reach downtown on the bus or light rail	3/12/2015 4:47 PM
949	Please keep this route. It is heavily used.	3/12/2015 4:46 PM
950	Far too packed, not frequent enough. During inclement weather it's not uncommon to have to stand and wait for the next bus.	3/12/2015 3:55 PM
951	Please don't delete these routes!	3/12/2015 3:49 PM
952	I ride the 43 regularly and some of the stops that would lose service if it was eliminated are heavily used. Losing the 43 would eliminate the possibility of a quick commute to any place I'm likely to work in the future.	3/12/2015 3:43 PM
953	Like more frequently schedule.	3/12/2015 2:31 PM
954	no change, please	3/12/2015 2:25 PM
955	Save these routes because some people need these buses they do not catch link light rail	3/12/2015 2:21 PM
956	This route serves residents who work at University of Washington, as well as student who commutes to UW and Roosevelt high. Cutting the route shorter than current for 73 does not help anyone but most likely increase number of cars on street to catch 73 at the north end terminal or drive to work. Knowing it would take longer time, people will NOT first go to downtown to take light rail back to their destination. Also that the area do not have enough adequate side walk and street light. Having drivers going through the area speeding (which is current problem we have), this would most likely increase number of accidents for both bicyclist and pedestrian early morning and late afternoon. Good number of employees at UW have odds hour. Rather than waiting for long time for a bus at stop of walking in the dark, I personally would drive everyday even though parking price at UW is quite high. During last election, people who take route 73 oppose for cut and voted for paying tax in order to keep the current schedule. I'm quite sure this is true about other route Metro is considering cutting. If I knew Metro was going to alter route or schedule, I would not vote for paying more taxes at all.	3/12/2015 2:04 PM
957	I'm really excited about the overlap between routes 65 and 255, making it easier to get from Bellevue/Kirkland to northeast Seattle neighborhoods. Currently, the transfer between these two is a pain and requires a bit of a hike. And if you're timing is off, might result in a lot of waiting--which is why I have avoided the connection and drive to a place where I can catch 255 in the past. I would love to be able to ride metro door to door.	3/12/2015 1:49 PM
958	There are few routes which enable me to get from my house in Kirkland all the way down to south SODO. A lot of the changes would increase the time it would take me.	3/12/2015 1:42 PM
959	Please keep the trips on the 65 that throughroute as the 32.	3/12/2015 1:13 PM
960	48 - In general, I like the new concept for Alt 1. Direct, frequent service to U-District from Loyal Heights remains, which is good. I might be a little concerned that there is not direct service from Loyal Heights to Capital Hill - mainly 24th Ave. I don't ride that part of the route, but I used to ride to/from Loyal Heights and 24th Ave on Capital Hill every day. 66X - I currently ride the 66 several times a week to/from Eastlake and Harvard to end of the line in Pioneer Square (near the King Street Station / International District Light Rail transit hub). It's much better than the 70 right now. I'm concerned that changes along this route to eliminate the Eastlake portion would make for longer travel times to Eastlake and Harvard from Pioneer Square via the 70. 70 - As noted above, I have the option to take the 70 to/from Eastlake and Harvard to/from the end of the line in Pioneer Square several times a week. I mostly take the 66X because it's a more pleasant route. I'm concerned that with the elimination of 66X, the 70 becomes the only choice to get from downtown to the Eastlake neighborhood. More frequent service on the 70 will help, but I'm not sure it will alleviate the congestion and travel time issues. PLUS - a huge dislike is the termination of the route in mid-downtown, with longer walk time between the final stop and Pioneer Square area (specifically the current transit hub near the King Street Station).	3/12/2015 12:56 PM

961	Losing the 11 from Madison Park to downtown is problematic if and only if the new proposed 8 -- which is brilliant -- doesn't get its existing problems solved in downtown and South Lake Union. It will render a large chunk of peak riders to fend for themselves if the afternoon peak isn't locked in. Seriously, that eastbound 8 has to work, and right now, it doesn't even come close. The new 38 is weird; I get what's trying to happen, but dog-legging to CHS doesn't seem like the best way. Run it into downtown, and you mitigate the loss of the 11 for MP to Downtown riders while also building the mega-frequent service between the CD and Link. Losing the 43 will be a minor pain for 24th Ave riders going to central Capitol Hill; maybe a tail off the 12 via Aloha to Montlake (not necessarily across the bridge to UW station, though)	3/12/2015 12:50 PM
962	People are stewed like sardines on both most of the time during the times listed above.	3/12/2015 11:01 AM
963	This bus has been more and more full over the years, and currently it is completely packed as it passes by the Roosevelt neighborhood. I would expect, with trains, more people would catch lines like this on their way to the train stations, not less. This route, and routes like it, will need increased coverage.	3/12/2015 11:00 AM
964	To get from downtown to Swedish in AM bus full and unable to board.	3/12/2015 10:07 AM
965	This is a heavily used route - buses during the commute hours are full and the majority of people go direct Kirkland to downtown Seattle and back. Minimal riders in comparison get off at UW.	3/12/2015 9:53 AM
966	Make sure the number 8 runs more on schedule. Have the #50 make a decent connection with the number 9 at Genessee Ave. So and Rainier so I don't have to wait 20 minutes for the next connection.	3/12/2015 9:41 AM
967	I like the idea of consolidating them on Roosevelt Way and having more frequent rides	3/12/2015 9:16 AM
968	The 28 and 28X Inbound need to be staggered with more frequent service to serve riders South of NW Market Street to Denny Way. I commute weekdays from Fremont to South Park and the evening commute times are always very long, longer than the scheduled times with the bus arrivals usually missing their schedule time stops. Explore the possibility of making this route an express from Denny Way to Downtown Fremont as the Route 26 also serves this route on Dexter.	3/12/2015 8:46 AM
969	Maybe the new link/light rail connections will help this issue, but I live in Tacoma and use the 586 and have late classes, often until 8 pm and wish the 586 ran later or had one or two more trips south after the currently scheduled last trip	3/12/2015 8:30 AM
970	I really like the concept for the new 16 going from sandpoint to greenlake then to wallingford fremont and seattle center. I think the 16 complements the 75 nicely for the Sandpoint area as the 75 goes north and south and provides access to the light rail while the proposed 16 opens up lots of east-west and many seattle neighborhood connections. Also if it's not possible to get the funding for every 15 min for the 75 would it be possible to do every 20 min?	3/11/2015 10:31 PM
971	The 11 has always been the neglected bus among the routes going eastward from downtown. Typically, while waiting for the 11, one sees multiple 49s, 43s and 10s. Now you propose to eliminate it all together! Surely it's a minimum standard of service for neighborhoods to have a route going downtown. It actually makes me angry to think that Metro would consider eliminating this service. The 43 is just about the most useful bus in the system. How else is one to get between Montlake and Capitol Hill?	3/11/2015 10:27 PM
972	I think moving the 26/28 to Aurora is a bad idea for reasons already stated. I think we should be moving routes off of Aurora instead of onto it.	3/11/2015 10:26 PM
973	The route 25 is an easy way for me to go to University Village. I also like to take it downtown, although is is not as handy as it used to be when it went farther south than currently.	3/11/2015 10:09 PM
974	72 - we will miss having our neighborhood route. 372x - we are not clear on exactly where the stop would be for 372, and the distance to the bus stop (From 77th & 20th) could be far enough to decrease likelihood of taking transit	3/11/2015 9:34 PM
975	This route is perfect for those in Cap Hill neighborhood who work downtown. It also services several local schools and Country Doctor Clinic on 19th Ave E. Without this route, it would be more difficult to commute to work downtown in a timely manner. Patients at the clinic need a convenient bus stop, as many do not drive or own cars. Thank you.	3/11/2015 8:53 PM
976	Crosstown service like the 8 is especially important for those of us who don't own cars - the degree to which Denny Way is so car-centric through SLU up to Capitol Hill makes transit a poor option compared to driving. So much of the focus is still on getting people to/from downtown, which is really irrelevant for people like me who don't work downtown	3/11/2015 8:02 PM
977	Please maintain it with at least current frequencies.	3/11/2015 5:41 PM

978	43/44 should always or more frequently connect from Capitol Hill to Ballard. I travel frequently from Capitol Hill to Wallingford.	3/11/2015 5:33 PM
979	Okay with deletion of 277 if 540 starts going to Houghton P&R - it is absolutely a nightmare (2 or 3 buses) to get from downtown Seattle to Houghton P&R after deletion of 260 & 265 - need service there.	3/11/2015 5:05 PM
980	During weekday afternoons, when returning from the Eastside heading to Stewart / Yale Stop (# 3427 - SW bound), about 10 to 15 minutes--or more--can be wasted waiting in traffic on the Mercer exit while waiting to reach the bus stop which is just mere yards away. But traffic prevents bus movement. Meanwhile, while waiting we are at a good location where the commuters can be let off. However the bus driver will not do that for some reason (safety?) though that particular locale has no less of a curb than the actual stop. It just doesn't have a sign. However, once traffic begins to move, the driver will now drive all the way to the end of the block (passing the actual stop) to let people off in a different area (presumably to make room for more busses). So letting commuters off at a completely different unmarked curb is somehow more ideal than the curb earlier. Apologies for my tone as I am always a little annoyed that most of my time spent on a crowded bus is in traffic for 10 minutes, looking at the bus stop about 40 yards away.	3/11/2015 4:28 PM
981	I currently ride the 242 everyday from Shoreline to Redmond. If it's cut I will end up driving every day, as my only transit option will be to string 3 buses together, which will take over 2 hours each trip. Please maintain a connection between North Seattle/Shoreline and the Eastside that requires less than 2 connections. Me and many fellow commuters depend on it and would love to continue utilizing public transportation everyday.	3/11/2015 4:23 PM
982	More frequent and more on time	3/11/2015 3:57 PM
983	Please don't take away No 11.	3/11/2015 3:40 PM
984	If these routes could come every 15 minutes during rush hours, that would be great. On a separate note, If ST522 could stop at Lake City Way and NE 95th St., it would really help those who live in the Maple Leaf/Revena/Lake City Way area get a regular bus from downtown home or from home to downtown.	3/11/2015 3:29 PM
985	Please do not move these to replace the 26 bus. Leave bus service in Wallingford alone!!!	3/11/2015 2:55 PM
986	please keep this route!	3/11/2015 1:53 PM
987	#12 service requirements need to look forward vs backward. Significant development has occurred along 19th Ave E, bringing in new bus ridership that has not yet been accounted for. In addition, developers of these new buildings have relied on a DPD exemption to get out of building parking, so they built more housing units and less (or zero) parking. This rule explicitly requires <= 0.25 mi of walking (on streets, not as the crow flies) to frequent service (every 15 min) in both N/S and E/W directions. The #10 line exceeds the max walking distance for residents that live 19th-23rd. Get rid of the 12 and, according to DPD, you will have more residents who are not going to walk it (and I assume will have to circle the neighborhood looking for a parking spot). Here's the DPD ruling used by developers in the 19th Ave corridor http://www.seattle.gov/dpd/codes/dr/DR2012-11.pdf questions I don't have answers for--What about those families south of madison whose kids were assigned to Stevens (40% FRL) and then had their bussing removed... do they take metro--oh wait, they can't anymore. What about Country Doctor staff and patients? Are we honestly saying that we should make sick people haul it up the hill?	3/11/2015 1:06 PM
988	West Seattle is left out of any future light rail development. The population in West Seattle is exploding. Check out how many new apartment buildings are being created just off the West Seattle Bridge. So we do get more buses at rush hour? No Do we get included in future plans for light rail? No Will we lose access to downtown Seattle once the viaduct is torn down and a tunnel is built? Yes Will all we have is the overcrowded C route? Yes Why does the City of Seattle discriminate against West Seattle? You owe the residents of West Seattle an apology and an explanation for your reprehensible policies.	3/11/2015 12:51 PM

989	<p>This survey is slightly confusing to start with. I am confused about the New Trolley system. How was this going to help people move from Point A to Point B faster. It sure adds to traffic situation on Broadway, with bus, bikes, normal traffic, and cars parked on side of street. I am waiting to add a lane for skate boarders. I want the following when it comes to taking the transit: 1. I want quick service from Downtown to Central Capitol Hill. I often take bus from U-Dist to Downtown, to Capitol Hill, depending if I have business in Downtown Seattle. I also take bus from U-District to Capitol Hill. 2. I want dependable transportation. I understand stuff happens, and you count plan for all events, congestion, etc, but No matter what bus I happen to take, it seems, I can't count on the my transit to be on time. I can't count on the reader boards at some of the bus stops to give me accurate information on my bus being on time. 3. I take the #255 from Seattle to Kirkland, once a week, but sometimes 2-times a week, and that bus in the afternoon Is often late, and very crowded. 4. The bus #11 from Downtown to Madison, almost always late, and often crowded. I know that on this route that we have frequent wheelchair and people with other disabilities, and elderly, and that effects the travel times. That needs to be considered in planning of the routes. I know bus drivers on this route, and other routes, can't take breaks due to frequent delays. I use the bus daily, and it seems everyday I have to deal with late transit, and over crowded, and what really gets to me is when you put a short bus, on a busy route, at busy time, and you have to stand, or wait for the next bus. In the morning when going to work, having to wait for another bus is not acceptable. I work for the Seattle Community Colleges, and having to wait for a bus from downtown to Cap Hill, is real problem. The bus #8, from Cap Hill to Seattle Center, or back, is also always way to crowded, and often late, and standing room often, but not always. A short bus on the weekend, at any time is bad situation, and that creates delays. When the bus is crowded, and you have a short bus, then you have to deal with people in wheelchairs, and people getting on and off the bus, and it becomes a real problem. If your not going to have a longer bus, then have more frequent trips, or find a way to solve this problem. I LIKE TO JUST TAKE LIGHT RAIL TO ANY LOCATION I NEED TO GO.</p>	3/11/2015 12:10 PM
990	Frequent service is important	3/11/2015 12:02 PM
991	<p>Split the 67 and 48. This is just an "out of the frying pan, into the fire" situation for the 48. Actually commit to splitting it, like you have done with the 43/44, 49/7, etc. Also, consider peak both directions of the 25, commuters from those locations will have no option but to drive in the future, and that is not what we are looking to do as part of a transit planning process.</p>	3/11/2015 11:52 AM
992	<p>Please don't take away Route 16 access to North Wallingford. We rely on this to get downtown easily since there is a stop close to our house. Also, my brother uses this regularly to get from downtown to our house since he does not have a car. If you take away the stops along Meridian in North Wallingford, we would have to walk 10 blocks to find a stop. The 26 would be the only route going downtown from North Wallingford.</p>	3/11/2015 11:33 AM
993	<p>Keep the connections between Lake City and Northgate! Currently, after rush hour, Lake City suffers from infrequent services if you are going anywhere other than downtown</p>	3/11/2015 11:21 AM
994	<p>255: Ending this early at UW is a great idea; currently, if I want to head downtown from Kirkland, after work, I am constantly getting stuck on 520 West of Montlake, I-5, or on Stewart before Denny, all of which have terrible traffic. A fast transfer at UW is much better. My only concern is how to get buses efficiently on/off 520, as that's already a bit of a hassle. 372: I appreciate the improved 7-day Seattle<->Woodinville connection. We enjoy visiting the Woodinville wineries, and while we've taken buses up there a few times (because drinking & driving is bad), the 522 takes forever, and the 255 doesn't quite make it without a long sidewalk-free walk at the end.</p>	3/11/2015 10:55 AM
995	<p>The 8? I mean come on. Keep the 25. The 74 must run more frequently, always full to capacity by convention place</p>	3/11/2015 10:54 AM
996	<p>Keep the 48 route intact. It's unfair to people who live in South Seattle to have to transfer at least once to get to college, considering that people in South Seattle tend to have lower levels of educational attainment and economic opportunities. To encourage more equity in our city, Metro should be concerned about making it easy for folks who live in RB or Rainier Valley to get to UW. The fact that the 48 has already been cut is shitty. Traveling from Hillman City to UW requires at least 2 buses or a 15 minute walk to the Light Rail. Living in Magnolia, Queen Anne, Ballard, Northgate, Ravenna, Wallingford, etc means that people get frequent DIRECT service to UW AND a ton of different routes and options!</p>	3/11/2015 10:53 AM
997	Keep #25 running on Boyer Avenue	3/11/2015 10:49 AM
998	<p>Important to still have access to Tangletown (either 16 or 26) and east side of greenlake (either 16 or 26). Opportunity to provide quick and easy access from Greenlake to Husky stadium light rail stop (since it's too far to walk regularly).</p>	3/11/2015 10:49 AM

999	#373 is NOT an Express bus. It stops at every other street other than a couple of times where there is not stop for just a few streets (50th to 65th.) It takes up to an hour from Shoreline to the Univ of Wash and takes over an hour to ride from the UW to Aurora Village Transit Center. The bus is crowded with passengers standing many times. Over the last 5+ years, the bus does not seem to be reliable. It runs late most of the time and has a high percentage of no-shows or being 15-20 min. late at the start of the route from the UW. Complaints about these issues have been made by many riders to Metro, but obviously Metro does not care about fixing the problems because nothing over the years has been done to solve the problems.	3/11/2015 10:46 AM
1000	Proposal 2 has no proposed changes to the 49	3/11/2015 10:44 AM
1001	each provides essential options for Montlake residents. if I want to avoid clogging up the Seattle Center area with a car, or equally so downtown, or Ballard, I need these bus routes. If I need to get to the airport, ditto. LinkLight Rail at UW is not a convenient or efficient or accessible choice for Montlake senior citizens.	3/11/2015 10:35 AM
1002	I support the idea of improving service along Madison to Downtown by creating a Rapid Ride route. My only change would be that the Madison Rapid Ride extended further into Madison Park.	3/11/2015 10:33 AM
1003	Keep the 73 running clear through north Seattle. Adding another transfer for North Seattle neighborhoods, especially through the inefficient traffic at the northgate center, will make busing from up there impossible. My mom and sister can call access and spend all day riding the door to door service, but my school-aged kid cannot, so her school-issued orca pass would become entirely useless to us.	3/11/2015 10:31 AM
1004	There is demand and a need for these. Don't leave us stranded, literally.	3/11/2015 10:29 AM
1005	These routes are very reliable and when I ride them (8AM to 9AM roughly) never spend more than 10 minutes stuck in traffic on all but the worst days. A transfer to link would add 10 to 15 minutes to my commute. 5 minutes to get off the bus and down to the station and then 6 to 8 minutes (worst case) to wait for a train. I ride metro because it saves me time over driving, this is sufficient where in combination with the HOT lanes on 405 I may consider driving 1 to 2 days a week (telecommuting is not an option for me). I'm excited however to see better direct service to SLU using the 311.	3/11/2015 10:10 AM
1006	please consider options that allow ST545 to robustly serve the full population of capitol hill/Madison valley/montlake. In particular, consider either maintaining 545 connectivity at Montlake (I know the WSDOT lid design doesn't optimize for this, but it's certainly possible), or make the change to route 545 via John/23rd/24th. We had exhaustive and frustrating conversations about this years ago, and the single new stop on olive was a big step -- and it gets huge utilization. I bet you'd see likewise big utilization from ST545 stops at 15th/e john, 23rd/e john and 24th/boyer.	3/11/2015 10:08 AM
1007	Please do not delete this route. It is a convenient route for folks that live between downtown Seattle and Summit/Melrose.	3/11/2015 9:35 AM
1008	There needs to be a completely reliable & free reasonably priced way across the damned lake with a bike on 520. I can catch a base bus in the morning & there's usually little wait. But I have to pay \$2.50 or more to travel 1 mile back across the bridge in the evenings and I may have to wait 20 minutes or more for the privilege at rush hour. Someday, there'll be a sidewalk, but that will be 2 or 3 years from now. So, take a low-floor bus, rip out the seats, and have it circle from Montlake to Evergreen Point & back hauling bikes & riders.	3/11/2015 9:34 AM
1009	My transit times would probably double if significant changes were made to this route	3/11/2015 9:14 AM
1010	26/28 are super important and seem well-used. Moving them to Aurora Ave would be a terrible decision because pedestrian access to Aurora Ave is a nightmare. Areas of sidewalk along it are constantly being closed for construction, and there are very, very few places for pedestrians to cross Aurora. Using Dexter, on the other hand, allows these routes to be accessed by the growing population of South Lake Union. You don't have to walk up a huge hill, then walk several blocks in one direction or another to find a pedestrian bridge to cross the street if you use Dexter. Dexter is very walkable and pedestrian friendly. We would lose a lot of options for reaching Ballard if 26/28 were moved, even if they were replaced along Dexter by 16.	3/11/2015 9:09 AM
1011	65 - keeping 30 min frequency at minimum and more frequent during peak hour is critical. I would use it more often if 15 min frequency was the service standard. 68 - all day service would be very useful. Getting from Wedgwood to Northgate in any efficient time is difficult.	3/11/2015 8:51 AM
1012	It would be helpful if this route would not change to Madison. It is nice that it goes through Pike/Pine straight to Westlake. If it is changed to Madison, any chance of getting to downtown would require a transfer, which takes much longer, especially if the bus is not on time.	3/11/2015 8:51 AM

1013	<p>277 - This route provides a way not only for Kirkland/North Rose Hill residents to get to/from UW, but also to get to the Houghton P&R for connections to the 245/238 and the proposed reroute of 540. The elimination and reroutes of existing routes are one step forward and two steps back for options and flexibility for Kirkland riders.</p> <p>255 - This route is packed even in early hours to Seattle and you want to penalize all of the riders by making them go to UW Link or take the new 256 which you offer far less service. And mid-day or weekends? "Just drive" should be your new slogan if you go through with this. 60-90 minute commutes to go less than 15 miles is absurd. You're going to end up with a 256 that is packed far beyond capacity for all the disgruntled riders who don't want to be forced to transfer at UW Link. If someone wants to make UW Link a new transfer hub they should have considered not having the buses and stations so far apart. The best way to describe this plan is like flying from Dallas to Denver and having to connect in Atlanta with your plane landing in Charlotte.</p> <p>235 - More frequent service. Since we're all going to be transferring so many times, it'd be helpful to have feeder service that was more frequent on the Eastside. This route is a perfect candidate. You don't need to run a big bus. Run smaller shuttle buses, but do so more frequently. Metro's reluctance to run smaller vehicles just dumbfounds me. It's not uncommon to have to wait the full 30+ minutes at a connection point like Kirkland Transit Center or South Kirkland P&R because the 255, 245, 238, or 248 are so badly coordinated. The geographies of Seattle and the Eastside are different. Eastsiders don't all live next to a P&R or Transit Center and these neighborhood feeder routes are essential to us being able to use the transit system reliably.</p>	3/11/2015 8:49 AM
1014	these buses are always at max capacity at 5pm rush hour	3/11/2015 8:44 AM
1015	#12 - 19th street It is the only route that bisects Capitol hill and goes to south downtown. The routes on 15 & 23rd do not replace it. It has a Community Center, Country Doctor Clinic, churches and schools. I've been seeing on blogs that it's a "Short Walk" to the link station (.7+ miles and hilly), well it's just a "short walk" to downtown from Broadway. It's an HOUR walk from where I live.	3/11/2015 7:59 AM
1016	43 is integral to get from Cap Hill to the U District and from Cap Hill to downtown. I would be very sad to see this one go as it is by far the route I use the most and hits all the hot spots in those neighborhoods. 271 westbound has severe overcrowding issues during rush hour, and I would like to see more frequent service with this, or turning it into a double-length bus instead of a single-length bus. 255 is generally pretty great, but can have issues with buses bunching up at the South Kirkland park and ride. I think it would be a terrible idea to delete the direct connection 255 provides from the Eastside to downtown Seattle.	3/11/2015 2:46 AM
1017	#11 serves the Arboretum, Bush school, MCGilvra elementary, Fame mlk community center, the beach at madison. it is very crowded with people going to work in am and pm, the sccc, seattle U., .do u expect people to walk 1.5 miles to get a bus to go downtown? this route has been in place for a long long time, 45 yrs at least.	3/11/2015 12:58 AM
1018	Stop pushing back the start times. Now the 6:15 bus departs at 6:18 and gets downtown 10 minutes later. Can't be because the bus can't get to the P&R timely they wait 5-15 minutes before the route starts.	3/10/2015 10:17 PM
1019	You keep degrading the service on this route, delaying the 6:15 am bus (actually was 6:13, now 6:18. Gets to seattle 10 minutes later... You have a poor track record of public meetings in the impacted areas. You cut service to Duvall, but the meetings all seem to be in Bellevue. Make it easier to find the survey and schedule meetings in Woodinville. Let's try to improve the service from Woodinville rather than degrading it more...	3/10/2015 10:04 PM
1020	Please increase frequency of the 542 to connect to the Link. Make the 44 more direct (fewer stops) to connect to the Link and also extend the route to Montlake. Thanks for taking our opinions into consideration!	3/10/2015 9:46 PM
1021	These routes needs to be more frequent, and they need to be better synchronized with One Bus Away app.	3/10/2015 9:14 PM
1022	Make the transfer to & from Link as short, safe, illuminated and "idiot-proof" as possible. I mean the latter demeaning comment to say that signage for going to & from Link be as lucid as possible. The signage must be nearly continuous through the route(s) between bus(es) & Link.	3/10/2015 8:57 PM
1023	Love the changes proposed in Alternative 1.	3/10/2015 8:28 PM
1024	we still need buses from around capitol hill to get us to broadway light rail station. if you take away these lines or reduce them, then people will not have a way to get to downtown and u district easily. many people work in those areas who live in central capitol hill, central area, montlake, madison valley, madrona and all the way down madison to lake. 48 needs to run really frequently and then buses need to run off of 23rd on main streets going east and west. i dont use the bus everyday but that may change when i have a different job and when light rail opens. i live 14 blocks from the broadway station so it doesnt make sense to go there to go to university district. i would still take the 48. and if i want to go to light rail station to go downtown and not have to walk part of the way, i need a bus to the station.	3/10/2015 8:17 PM
1025	I would not force riders to walk through high crime areas along 23rd and Madison.	3/10/2015 7:39 PM
1026	These routes should terminate at UW light rail station.	3/10/2015 7:05 PM

1027	It gets me from my home in the 13000th block of Aurora Ave N to downtown Seattle, faster than any other route or routes. I need this bus to go to doctors' appointments, which I have frequently, and anything else located downtown.	3/10/2015 4:41 PM
1028	Overall, I'd love more frequent bus service during peak times for the 545. So I'm willing to put up with the inconvenience of having to transfer to the link rail during off-peak times in exchange for better service during peak times. Hopefully it won't be standing room only every time :P My vote is for Alternative 1.	3/10/2015 4:36 PM
1029	The loop to the east between 40th NE and NE 75th and coming back to the route downtown via NE 65th is time-consuming and very few passengers seem to get on/off the bus on that part of the loop.	3/10/2015 4:22 PM
1030	The 16 currently services so many kids at Bishop Blanchet. In Alt. 1, the changes make this route unusable for all of these kids. Please help keep the kids independent without a need for a car!	3/10/2015 4:04 PM
1031	Alt 1 is a good mix of express service to downtown on 520 and U-Link connectivity, if and only if the bus to U-Link transfer is easy and quick. Otherwise, it is terrible. Please fix Montlake before forcing a transfer.	3/10/2015 3:52 PM
1032	it is important to keep direct service from Madison park to downtown AND to more directly connect Madison park to the light rail stations and/or to husky stadium.	3/10/2015 3:39 PM
1033	#8 is great to get to Mt Baker station for travel to the airport. #2 is a fantastic route--well conceived and always seems to be pretty busy--for getting to capitol hill and downtown quickly and efficiently without the need to transfer. It would be silly to have to transfer from the #2 to get to the downtown shopping district.	3/10/2015 3:00 PM
1034	More frequent!!! Some connection to Seattle center	3/10/2015 2:48 PM
1035	More frequent service throughout the day and evening	3/10/2015 2:48 PM
1036	This route is vital to Redmond, so many people rely on it and not just for a direct trip to Seattle, but to get to Overlake. Nice to have fast, frequent, service	3/10/2015 2:45 PM
1037	While improving frequency on the 8 is definitely an improvement, it may not translate to improved service without drastically improving conditions on Denny Way. Splitting the southern half of the route off will help reliability on that end, but the Seattle Center-SLU-Capitol Hill-Madison Park leg will still suffer. Even with the deletion of the 43, a route should still service the E Olive Way/E John St/E Thomas St corridor between 23rd Ave E and Downtown. With or without routing changes on the 49, increased frequency on that corridor is extremely important to helping a chronically late route.	3/10/2015 2:40 PM
1038	We need these routes to access the Light Rail stations at Montlake and Capitol Hill. Service should be increasing, NOT decreasing.	3/10/2015 2:22 PM
1039	Alt 1 basically takes what is a very friendly bus neighborhood--- the area around 19th and Aloha-- removes half the buses (the 12 and the 43) and doesn't replace them with anything. The U link does not serve this area. Please do not remove these two buses from our community.	3/10/2015 2:08 PM
1040	I'd like to see a bus route from Northwest Seattle directly to Queen Anne Hill before ending downtown.	3/10/2015 2:05 PM
1041	Please do not cut these routes. If the neighborhoods these routes service are the same neighborhoods that are allowing micro-housing with no parking, we need to maintain or increase our transit service not cut it.	3/10/2015 1:15 PM
1042	It would be nice to have either more frequent bus service or larger buses in the afternoon rush hour times as this bus tends to be standing room only during these times. Also there are two bus stops at Seattle Children's hospital, would be nice to be consolidated into one bus stop.	3/10/2015 12:33 PM
1043	The 8 is critical for me as a person who uses this bus most frequently at times 10 or more times a week. i cannot even fathom not having this critical need of transportation. It connects so many important neighborhoods that I travel in for work and pleasure, shopping and personal visiting and consumer/political/city committees I work on as a volunteer.	3/10/2015 12:08 PM
1044	I ride & rely on the #8 along MLK, then uphill Madison Ave., to South Lake Union near daily. (The days I don't ride the bus, I bicycle). And aside from the fact that the drivers are pretty great, the morning hours buses tend to be pretty packed. Between 8 am and 9am especially. For some reason the circa 9am buses tend to be shorter (standard length) buses, and those fill up very quickly. I think that more frequent service, especially between the 7:30 and 9:30 hours, would definitely improve the use of bus capacity and reduce 'sardining' :>) All in all, I think Metro is pretty great. Thanks for your efforts in re-arranging the buses vis-a-vis light rail, and thanks for your work generally. . . Npc	3/10/2015 11:59 AM

1045	Please, please, please keep the 12 - it is by far the most convenient and reliable route to/from downtown for our family and so many others who need access to services along 19th Ave E. We were so relieved when this route was spared reductions in early 2015 and are very disappointed to hear that it may be impacted in the future. I understand that the 10 covers some stops near to the 12, but the 12 is just perfect!	3/10/2015 11:28 AM
1046	I like them all, but I would prefer to use the light rail to get around. Right now I use OneBusAway to coordinate my usage and it makes it easier to catch buses when I need them.	3/10/2015 11:27 AM
1047	Why is this bus consistently late going both north and south?	3/10/2015 11:19 AM
1048	Provide more parking spaces along this route.	3/10/2015 11:14 AM
1049	Please keep to the schedule. Because of where I live (Belltown) and where I work (Capital Hill, Madrona, Green Lake, West Seattle, Renton) I do not keep a car and use Metro for almost 100% of my transportation needs. The one recommendation I would give to Metro is to have the drivers be more aware of keeping to the schedule, especially on the two routes I've mentioned. I UNDERSTAND that due to weather, traffic problems, maintenance issues, etc. the schedule cannot be adhered to every minute, but it is frustrating to be consistently 5 or 10 minutes late for work because the schedule is not realistic or because the driver just plain doesn't care.	3/10/2015 11:07 AM
1050	Route 12 along 19th Ave E is very important for multiple reasons. The steep hill on E Galer St is not usable for the elderly, nor for those of us with infants and groceries to cart. If route 12 was eliminated, I would be forced to completely not access public transportation for anything towards that direction.	3/10/2015 10:56 AM
1051	Please keep this route. It is essential for many people. Shouldn't we be simply increasing more mass transit in general?	3/10/2015 10:23 AM
1052	I find the lack of frequent transit between Wallingford and Fremont a hole in the system. From Fremont, I can use frequent transit to go to Ballard, to UDist, to SLU, to Downtown, but not to Wallingford? (Disclaimer: I live in Wallingford). I love this new routing for the 16.	3/10/2015 10:07 AM
1053	Please keep this route! It is a great option for some of the school kids in the area to quickly get downtown from Eastlake/N Capitol Hill.	3/10/2015 10:04 AM
1054	The bus has become a sardine-stuffed torture chamber. I often catch the E route in Wallingford around 8:30 a.m. after dropping off my daughter at school. At that point, it's only 3 - 4 miles to downtown, but the bus takes 30 minutes. And the ride is an endurance course. You have to fight your way on, it's so full, and then work to find a spot to stand.	3/10/2015 9:49 AM
1055	Route 25 should be replaced by a van service that operates as a continuous shuttle around Portage Bay, helping residents as well as UW students, visitors, and faculty reach the nearest express transit or light rail station. The rest of Route 25 is unnecessary as it duplicates many other and better routes.	3/10/2015 9:45 AM
1056	this route was removed and limits travel for a lot of us in this area.	3/10/2015 9:32 AM
1057	too infrequent	3/10/2015 9:23 AM
1058	I would like to keep route 586. It is the fastest, most efficient way to get from Tacoma to UW. Many riders use it and are very dependent on it.	3/10/2015 9:13 AM
1059	We need frequent (every 15-20 minutes) public transportation from Madison Park to downtown Seattle. With the number of new buildings and the concurrent population increase along the Madison corridor the need for transportation will only increase. Many of these new residential buildings do not have spaces for cars so residents rely on public transportation.	3/10/2015 9:02 AM
1060	Need better (any?) connections to Washington State Ferries terminal.	3/10/2015 8:54 AM
1061	More reliable service is important. Relying on the Link for connections between SE Seattle and Capitol Hill/U. District is difficult for those of us who live along Rainier Ave and not MLK. Particularly between Columbia City Station and Othello, it's possible to live outside a 1/2 mile walk radius of the Light Rail. I'd also love to see considered more frequent service via Rainier at night. The 9X stops running really early and has no weekend service.	3/10/2015 8:45 AM
1062	Keep my route the same until light rail comes in 2023. I am not going for the okie dokie no more. Your plans for the Eastside as it stands suck. The only thing great is that the 545 will remain the same. So if you decide to jack up the 311 route, I can at least drive all the way from Woodinville to Redmond and catch the 545 at the Redmond Transit Center. Way to go Metro. Freakin' awesome!!!!!!...	3/10/2015 8:17 AM

1063	The 12 corridor along Madison east of Broadway is very busy during peak hours today. Where will those riders go? Connecting or walking longer on 1-2 mile commutes simply isn't appealing. Many of us would see 50%+ increases in our commute times, while riding on buses even more crowded than before. That's not an improvement, that's punishment. I might even start walking or move closer to work and give up my bus pass, which is now nearly \$1200/year. Link on Capitol Hill is too far north and west for riders living east of 13th and south of Pine to access easily. Especially when your final destination is in the southern part of downtown, the 12 is faster and is direct with no transfer. Cutting service on the 11 requires more service on the 10, but that which is missing from the plan. Link connections are going to be clunky at best: escalators and elevators are often broken in the bus tunnel - I'm sure they will be bad in Capitol Hill station too.	3/10/2015 6:14 AM
1064	If you want the public to make use of the new light rail, it is imperative to retain the feeder routes.	3/9/2015 10:29 PM
1065	The 16 is too long under Alternative 1 and will be overcrowded and running late by the time it reaches the Dexter corridor. The 26/28 is currently overcrowded and constantly late by the time it reaches lower Dexter and this needs to be improved under Alternative 2. Metro needs to recognize the high-growth future that is the Dexter corridor and provide adequate bus service.	3/9/2015 10:25 PM
1066	These routes all currently service my neighborhood. From the U-district, they are all approximately equivalent in terms of transit convenience. However, they often leave the U-district at almost identical times, and the 74 and the 30 run identical routes. This is inefficient, since either buses run empty (if passengers were just picked up by a different bus), or there are long wait times. By shifting departure times by 15 min, the same buses could provide no more than 15 min wait intervals between the U district and Hawthorne Hills. So it is not only an issue of where the buses run, but also when they run relative to other buses.	3/9/2015 10:25 PM
1067	Very important -- provides access from lake to sound (almost). As Madison Park resident access to Capitol Hill and Downtown are very important to me. Time between buses (when it's 30 minutes) can be a major disincentive to use the bus.	3/9/2015 9:11 PM
1068	There will be no way for the elderly to get downtown if 71 goes away.	3/9/2015 8:29 PM
1069	Route 11 is the only service to Madison park. You need to provide a lifeline for these residents to reach downtown and the Link.	3/9/2015 8:20 PM
1070	Please connect this route to the new light rail station by having it travel along Montlake, instead of winding it through UW campus up to the Campus Parkway hub. All the people who suffer through a 45-minute, 8-mile commute from the Sand Point corridor to downtown would love to connect to the light rail terminal. It's insane that we're still cut off from it in your proposals.	3/9/2015 8:14 PM
1071	Leave them alone. They are not relevant to the Udistrict Link service and the proposal to combine them degrades the service and won't meet the demand.	3/9/2015 7:10 PM
1072	It would be great to have more frequent service to Bellevue (555 and 271) and more direct from Greenwood area to Bellevue or Northgate	3/9/2015 7:08 PM
1073	It is imperative that these routes do not change much, as they are my only alternative to get to work from the U-district to Kirkland and Bellevue	3/9/2015 6:36 PM
1074	The 550 right now takes a while to get to/from Bellevue especially on weekends (so time with friends from Bellevue means taxi). 545 in the late evening (after 8p) has a painful 30-minute frequency. Likely due to demand, but also a chicken-and-egg problem. What I'd like out of this would be some changes to improve service for those working late and improve service for visiting friends in those parts of the city - but those improvements would need to come with enough advertising to get the ridership to make them viable. Mostly, please make sure that if you improve a particular route to try to advertise to those that might not be bussing now so they realize they can bus later.	3/9/2015 5:55 PM
1075	This is the only route that gets me anywhere near by job in Pioneer Square.	3/9/2015 5:54 PM
1076	Alternative 1 would reduce my travel time from the ID district to home in Madison Park. It would reduce the amount of time on a bus. Since the roads are so bad in Seattle riding the bus is very tiring, I would spend less time on the bus commuting but still retain connections to Capitol Hill business areas.	3/9/2015 5:49 PM
1077	I work at the UW medical center as a nurse traveling from Northgate/Maple Leaf neighborhoods. I am a SHIFT worker rotating nights and days and need to get to the Medical center at strange hours, weekends and holidays too. Please do not cut down on hours but increase them, I need earlier and later bus times (get to the medical center by 6:30 AM and also 6:30 PM and 10:30 PM. By consolidating routes I may have to walk farther to get to the bus and they may not run very early or very late at night.	3/9/2015 5:48 PM

1078	I think an option similar to what Tri-Met (portland) offers where riders can purchase an all day bus/train pass would be beneficial to residents that don't have passes, and for tourists. Having the ability to hop between services without having to worry about transfer validity and cost would make both services more attractive.	3/9/2015 5:45 PM
1079	please don't take these away - they are staples of the community and serve ppl who live here well	3/9/2015 5:37 PM
1080	You cannot delete route 11 and assume that splitting route 8 will provide 'coverage'. Route 8 can be split (into the proposed 8 & 38) but keep 11 for downtown-bound madison valley people.	3/9/2015 5:27 PM
1081	This route services a wide stretch of residential areas with no other bus service. We need this bus to keep us connected to the rest of Seattle and the airport!	3/9/2015 4:32 PM
1082	Keep Route 11!!!	3/9/2015 4:25 PM
1083	Need to retain service from 15th Ave NE north of Northgate Way to the U district.	3/9/2015 4:23 PM
1084	More frequent service is needed to run North-South on 25th Ave NE (372 and 68). Service is extremely limited before 7:30am and after 6:30pm on weekdays and also service is currently limited on weekends. For the new proposed plans, it is a shame to lose express bus service along 65th straight to downtown (71 and 76). More buses is needed for the route East-West on 65th.	3/9/2015 4:20 PM
1085	I really like the proposals in Alternative 1 of how to utilize these routes to connect Capitol Hill, the U District, Madison Valley and the Central District	3/9/2015 4:10 PM
1086	Current 68 and Concept 67 both provide service along Roosevelt Way NE corridor. Concept 67 adds Sunday service, which is so needed. Late night service along Roosevelt Way NE through Maple Leaf, even if only every 40-60minutes.	3/9/2015 4:00 PM
1087	Keep it!	3/9/2015 3:55 PM
1088	this is an extremely valuable connector between madison valley and downtown seattle.	3/9/2015 3:51 PM
1089	Ridiculous to consider altering this route. It is fine and convenient the way it is.	3/9/2015 3:31 PM
1090	The last stretch of bus 71 in Wedgwood involves it traveling on 38th Ave NE and NE 86th St, which are small streets with many cars parked there usually. Its route should not include that last stop to avoid awkward maneuvers that I often see there.	3/9/2015 3:30 PM
1091	Will the 11 still come to Madison Park? With improved or downgraded frequency from today's schedule. Simple question. Thank you.	3/9/2015 3:10 PM
1092	This route should be kept because its the best route to get to Husky Stadium from our area. I would imagine once the light rail system goes into effect that the special husky buses would diminish particularly the downtown express, but the special local buses should continue. Otherwise it would be a mess for all those people waiting for a 48.	3/9/2015 3:08 PM
1093	This route must be retained. Otherwise we are isolated and are too far a way from the other routes	3/9/2015 3:05 PM
1094	I LOVE the current No. 8 which takes me from Olive and MLK Way directly to Group Health and to South Lake Union and to Seattle Center and to northern Denny Regrade. It is an extremely useful route that my husband and I take all the time. We take it south to get to Light Rail at the Mt Baker station or to hook up with routes 27 and 14 to get to the ID. Please do not bust up the No. 8. It is a GREAT route as is.	3/9/2015 2:47 PM
1095	The 43 and 48 are the two routes I use the most, followed by the 31/32, 10, 44, 66, and 26/28 (downtown-Fremont link). I'm nervous about splitting the 48 in half (at the U.District), though there may be some benefits that outweigh the losses...I'm willing to experiment. Would it be possible to overlap the 48 and 45? Run the 45 south to the UW Station, but run the 48 north at least to Roosevelt or maybe SE Greenlake? Once the Roosevelt rail station is completed the need for that section would be reduced. As for the 43 please see my comments under "N. Seattle". We rely heavily on the 43, especially for getting my elderly mother to the doctor and back at Group Health.	3/9/2015 2:45 PM
1096	If I can take a bus to the link rail and be at work on time or faster then before and more predictable and reliable service would be great.	3/9/2015 2:44 PM
1097	Very difficult and time consuming right now trying to use these routes to or from Madison Valley and Madison Park. We need something efficient, faster and easier. It take way too long to get to the UW and Children's Hospital as it, making too many connections from the 11 to 48 to 75. Quicker to drive.	3/9/2015 2:38 PM
1098	I walk to the 312 running through Lake City. Not sure what this change would offer, but the busses are too full now with not enough seating for everyone. I find it challenging to stand for the whole trip.	3/9/2015 2:32 PM

1099	Something needs to be done to improve the reliability of the 3 and 4, particularly when catching it downtown in the late afternoon/early evening. It seems the buses are rarely on time and therefore almost always overcrowded.	3/9/2015 2:30 PM
1100	These routes do a pretty good job of connecting much of Capitol Hill to the surrounding areas (Downtown, U-District, etc.), the proposed changes appear to take away from the arterial and efficient connection currently offered by these routes and this would negatively impact quite a few people in the Capitol Hill, Madison Valley, Montlake, and Central District neighborhoods.	3/9/2015 2:29 PM
1101	Route 30: One of the only ways to go East/West in that area only runs during peak hours? People do travel outside of those times. Route 44: Awesome route for East/West travel. Could there be more options for similar travel north of NE 45th St.? Route 48: This route is very useful, and it might not be so consistently late if it wasn't so long. Route 68: This route provides one of the only options for getting across NE 75th St. (even for a short distance), and going on 25th Ave. NE. It is infrequent at best, and doesn't run when UW isn't in session? There are people that use the busses who aren't students. When it doesn't run, there aren't many options for traveling somewhere on 25th Ave. NE. Route 72: Please don't delete the north part of this route. Please. It would be great if it was more frequent, especially late evenings and Sundays, to start with. Route 73: Same as comment about Route 72. Route 372(x): If routes 72 and 73 get deleted, it would be helpful if this bus had more stops between Lake City way and the U-district.	3/9/2015 2:27 PM
1102	The residents of Madison Park need to maintain a reliable consistent bus service that doesn't require them to go to the Broadway Station.	3/9/2015 2:26 PM
1103	Please please keep service on these routes going to and from Madison Valley!	3/9/2015 2:23 PM
1104	Route #8 is the ONLY direct connection between Rainier Valley, Central District, Capitol Hill and South Lake Union. It is used HEAVILY, particularly with the growing tech sector in South Lake Union. Also, a great deal of new multi-family housing development is taking place in the vicinity of the current Route #8 because tech workers frequently move to Seattle from elsewhere, they don't have cars and they ride the bus. Changing the Route #8 now will create a hardship for many workers in the South Lake Union tech center as well as disconnecting transit from housing development. If light rail was going to South Lake Union, this would be OK. But light rail will NOT serve South Lake Union, and it is not practical for people to transfer among bus, light rail and bus again. In just the past year, traffic in the South Lake Union area has become nearly impossible because of the influx of new workers in this high-tech employment center. Cutting short the route of the #8 bus will encourage more people, including me, to drive to work, making the congestion problem even worse.	3/9/2015 1:43 PM
1105	Would be really great if we could have 48 Express back again as many people mostly ride from right before freeway all the way to u district area. Would like to keep 355 as is.	3/9/2015 1:39 PM
1106	Keep the schedules the same for these bus routes. A quick Google Earth distance measurement shows that the nearest home in Montlake is already a quarter mile away from the stop. The "Hop In" (aka Montlake Blvd Market) is a half-mile away. Bus service needs to minimally stay the same to make the light rail stop gain it's full potential, otherwise it will be a squandered opportunity for the community to want to take light rail anywhere. Combining the 43 and 48 to a less frequent schedule (every 10 minutes rather than the 7 minutes we get down 24th ave today) The 25 is obvious --- that covers an area that would require a multi-mile walk across the community, where a large percentage are elderly and don't drive currently (and we don't want to tempt them to drive either...)	3/9/2015 1:26 PM
1107	Please keep service to North Seattle College!	3/9/2015 1:22 PM
1108	These routes are critical as they serve a community at the far east of Seattle that is not well served by transit and is especially hilly. There are quite a few elderly people as well as young families that rely on these routes, not to mention commuters whose patronage of these routes helps to relieve congestion downtown.	3/9/2015 1:04 PM
1109	Currently, it takes about 1 hour to get from Lake City Way and 125 St NE to the Fremont Bridge. Due to the number of jobs in Fremont, why isn't there a more direct route? Currently, I have to take 75/31 or 75/32 in order to avoid a transfer. 75 to Northgate, then transfer to 16 may cut down the time, but only if the transfer time is very short.	3/9/2015 12:58 PM
1110	It would be nice to have a route similar to 65 or 75 that goes to the new UW station from Lake City.	3/9/2015 12:51 PM
1111	I'm sure you are already aware that this bus (545) is super crowded. Many times I am turned away because the bus is so full and I cannot get on.	3/9/2015 12:38 PM
1112	Please keep route 11 It's critical for families, children, and elderly people that use it as a critical transport link to/from work, essential services on Capitol Hill and downtown, and medical facilities in the First Hill corridor. It is also a key route for businesses in the Madison Valley and Madison Park neighborhoods.	3/9/2015 12:27 PM

1113	I rely most on the 30. Seeing the route first cut short from its complete route to a starting point at the UW a few years ago, then seeing it trimmed to a peak-hour only route last year (and now being eliminated in both options presented) has been disappointing. The changes made to this route were what made it less and less useful, and therefore an easy target to eliminate. However, the proposed changes for the 74 on Option 2 may prevent the services that I use from being eroded further. My ideal route would be one that ran all day between NOAA Sand Point and the UW Campus Pkwy. I understand that levels of ridership may not warrant this, but it does seem that if there is increased interest in getting from U Village and areas of the UW Campus to the UW's light rail station, perhaps by integrating the rail stop with the 74 route that goes via Campus Pkwy to NOAA Sand Point, you would see the ridership on this route expand greatly. As for the proposed changes with the 71 on Option 2, anything that opens up options for riders to/from NOAA Sand Point is something that I fully support and expect to make use of.	3/9/2015 12:20 PM
1114	First, please add Route 10 to the web page detailign which routes will and won't be changed: http://metro.kingcounty.gov/programs-projects/link-connections/alternatives.html#explore Route 10 will need more frequency from Cap Hill to Downtown if Route 11 is moved away from Pine/Downtown.	3/9/2015 11:57 AM
1115	I really appreciate these two lines, they are probably the ones I have used the most. I like that they connect neighborhoods that would otherwise require transferring buses.	3/9/2015 11:49 AM
1116	It would be very helpful if this route could run more frequently to NOAA Sand Point. I currently utilize Sound Transit, Community Transit and the Metro 30 commuting by bus and if my CT bus is late due to traffic, I have to wait 25 to 30 minutes extra to get to work.	3/9/2015 11:34 AM
1117	The 43 and 49 provide service to areas of Capitol Hill that will not be served by light rail. Eliminating these routes is foolish. Please adjust routes to reflect light rail, but do not eliminate. Route 12 could be incorporated into BRT, but it should not disappear completely.	3/9/2015 11:24 AM
1118	Don't want a transfer to get downtown. Would like a direct route from 35th Ave. & 95th to Northgate Mall.	3/9/2015 11:19 AM
1119	The 60 is a long route and already has trouble staying on time. Please do not take it away as it is a very vital route! Instead, please find ways to improve it without taking away it's frequency.	3/9/2015 11:09 AM
1120	Route 60 service from South Beacon Hil near Cleveland Highschool to the Beacon Hill light rail station. This service is not frequent enough, and is very unreliable going from Beacon Hill light rail station south in the evening. Also it doesn't run late, like 9pm.	3/9/2015 10:59 AM
1121	At present, not frequent enough service from downtown later at night. I've had two recent instances when, having come out of performances at the 5th Avenue theater, I've had to wait 45 minutes for a 10 or 43 to take me to 15th Ave. E. That is unacceptable. As a woman, I am fearful of standing around that long at that hour.	3/9/2015 10:59 AM
1122	Improve on "on time & connections for both routes". As it is now route 40 is rarely on time and connecting with the 16 route is haphazard at best.	3/9/2015 10:58 AM
1123	This route runs during the midday & after hours, and the before-midnight hours, I need for my transit from Maple Leaf to downtown Seattle, for work 5-6 days/nights per week.	3/9/2015 10:58 AM
1124	The 11 should not turn north to Pine. It should just continue to madison street up pine street. The left turn (turns in general) for this route kills the time. It would only be an additional block south of the SCC campus. The 11 as is, seems to always run late. I believe it is due to its bumblebee like path at the top of the hill.	3/9/2015 10:55 AM
1125	higher frequency during peak needed so I don't need to drive to northgate park and ride	3/9/2015 10:30 AM
1126	Many of the changes for these routes seem good, but I am concerned that we will be left with a situation in which access to the new University Link Station from the western side of the U District requires a bus transfer (i.e., 2 buses) and perhaps also a not-insignificant walk. That would pretty well negate any convenience and time benefit to be gained from the light rail. If I have understood the proposals, it appears that from 2016, when the proposed changes occur, to 2021, when the UDistrict Link Station opens, some kind of bus transfer will be required for one to reach the University Link Station from the lower Roosevelt area, for example. If that is correct, it does not seem adequate.	3/9/2015 10:22 AM
1127	The routes that run along Sand Point Way are very critical to me. Since the 74 only runs downtown during peak hours, the idea of connecting Sand Point Way to the University of Washington light rail station is very appealing. I ride the bus at least 10-12 trips per week.	3/9/2015 10:22 AM
1128	I miss the frequency of the 30 and having it run all week. It was an important route to our family because it allowed the kids to get to and from Magnuson Park and View Ridge Swim & Tennis Club safely on their own.	3/9/2015 10:19 AM

1129	Although the 372 is designated as an "Express" route, that seems to be a very loose definition. It would significantly improve the route to make it more of an express and eliminate most of the stops between the UW Seattle campus and 125th and Lake City Way. Many people ride this route from the campus to 145th, Kenmore P&R and beyond. The coach is so overcrowded when it leaves the campus that some people get left behind at the last stop only to have a great number of students who are only going down to U Village get off there. People who have worked all day and who are trying to get home at a somewhat reasonable hour are thus forced to wait for a later bus. They can't take the 68 and many of them can't take the 372s that go only as far as the Kenmore P&R. Some of us actually live past Kenmore and even past Bothell! Students actually get on at UW Bothell and go to Woodinville. However, it seems that service to Woodinville is no longer going to be in our network, thus we will be adding more cars to our already crowded roads.	3/9/2015 10:13 AM
1130	for morning peak, it doesn't make sense for both buses to arrive at the same stop at the same time. They should be staggered 15 minutes a part. That way a rider does get 15 minute service to downtown.	3/9/2015 10:12 AM
1131	This is how I get to work. You already limited my preferred route, the 79. You were going to eliminate the 72 before we voted to give you more money. Now you've gotten your \$\$ and you are still eliminating the 72. You are not trustworthy -- your grand schemes make it impossible for me to take Metro. Congratulations	3/9/2015 10:12 AM
1132	I love it that the 71 runs late at night. This is great for kids in our neighborhood who go to the U-District in the evening and don't want to drive back. I hope that this option will be kept. The 65 is a great way to get to campus and if it were to run every 15 minutes all day long, it would be fantastic! The 242 and 542 are the routes I use to get to the Eastside. Having all-day service on those would also be fantastic.	3/9/2015 10:06 AM
1133	I use the 10 between Capitol Hill and downtown Seattle every day in order to travel to and from work. It is often full, and behind schedule, especially at peak times. There are frequent delays because there are so many passengers attempting to get on and off the bus.	3/9/2015 9:39 AM
1134	I currently take this route from Northgate way to the UW for work. Unless it will be available more frequently, I do not want any changes to this route. It's currently the only one that goes from my neighborhood directly to the UW campus without having to change buses.	3/9/2015 9:19 AM
1135	These busses in the Am & PM are standing room only how do we improve on that.	3/9/2015 9:15 AM
1136	I would like to see it run past 7:30 PM, but instead of ending at NOAA's facility after 7:30 PM, end at Magnuson Arena Sports.	3/9/2015 9:15 AM
1137	It's great just the way it is currently operating. That route has existed for a very long time in the neighborhood and has functioned very effectively. It allows older residents in Sand Point Country Club and View Ridge to access the QFC in Wedgwood and it effectively links Wedgwood, View Ridge, Bryant, Ravenna, etc. with both the University District and downtown without transferring. It's a wonderful feature of our neighborhoods that has been relied on and used for decades. It's popularity is seen everyday by the intensive use of the route by the residents of the neighborhoods it serves. Thank you for considering these comments.	3/9/2015 9:01 AM
1138	I am not sure what to select but basically I want a bus that will take me from 65th and 35th (#64/#76) to Stewart & Denny. Currently the #64 shoots pass this intersection (it used to be a stop) and those of us who work at Denny or north of Denny have to walk 5+ blocks back we just came. The #76 requires the same amount of walking. But, if I understand the plan correctly, the convention center will no longer be a stop when the light rail Northgate route is opened. I don't want to transfer between buses/ rail unless it is aweekedn and there is more time. Nor I do not want to 1) walk to bus stop 2) take a bus to the light rail 3) Walk down stairs and wait for light rail that will be filled with students 3) be dropped off Westlake Center (is this correct?) and walk all the way back to Denny.	3/9/2015 8:43 AM
1139	More routes in the evening and weekends would be appreciated. More articulated buses should be used during peak travel times so half the bus doesn't have to stand during the ride.	3/9/2015 8:26 AM
1140	Need weekend service and more service weekdays. Poorly route setup. Waiting at Children's is ridiculous.	3/9/2015 8:20 AM
1141	Routes between Downtown Seattle and Sand Point are infrequent and very long -- about an hour total travel time (can be up to 90 minutes) with one transfer, for a relatively short travel distance. Taking this route is unnecessarily tiring and time consuming. Additionally, please consider altering the 30 schedule to and from Sand Point such that it more closely aligns with common working hours (in the morning, five minutes prior to each 15- or 30-minute interval; in the evening, five minutes after; e.g., a morning arrival at 6:25 AM, 6:55 AM, and 7:25 AM instead of the current, which is 6:37 AM, 7:09 AM, and 7:41 AM; e.g., an evening departure at 4:05 PM, 4:35 PM, 5:05 PM, instead of the current, which is 4:12 PM, 4:42 PM, 5:12 PM). Thank you!	3/9/2015 8:05 AM
1142	30 should be back to an all day route. It supports the NOAA campus.	3/9/2015 7:58 AM

1143	I appreciate the increased frequency on the 120. I do not appreciate the way that all the other routes have been so greatly reduced that the 120 is constantly over crowded. I live half way between the 125 and 120 and it used to be that I could catch the 125 and be likely to get a seat. Now that service has been cut down so much that I am forced to take the 120. I live at the north end of the run, so by the time the 120 reaches my stop at Delridge and Juno in the morning it is usually full and I am forced to stand. I don't look old but have bad knees. Because there is no physical indicator I don't ask for a seat at the front, but it makes it a very PAINFUL ride. If you hadn't eliminated or reduced the side routes to such a degree as to force everyone onto the 120 this would not be as often a problem. I dread what it will be like if we get snow. Prior to the consolidation and reduction if there were snow I knew that I may as well use leave because the 120 would be full and drive past by the time it got to me. Now I can't imagine that it will ever have a seat.	3/9/2015 7:49 AM
1144	30 does not meet any of the link light rail stops. 75 needs to make pickups at NOAA.	3/9/2015 7:32 AM
1145	The route 48 split is only very beneficial to the CD if it contains the through route up to Northgate. If it dead-ends at the university, the split is very bad for people living along 48S because we lose destinations while still sitting in the same traffic. The 8 is good for getting from middle/eastern CD to Capitol Hill. I would very much like to have some form of direct service from western CD to Capitol Hill if at all possible.	3/9/2015 6:42 AM
1146	route 64 is not running early enough for people starting before 6.30 because guess what patient care is 24/7. if the 252 and 257 are cancelled i will have to drive every day.	3/9/2015 5:54 AM
1147	The new Route 16 under Alternative 1 is such a good idea. North Seattle needs better East-West bus service.	3/9/2015 3:06 AM
1148	Please keep the 41! It is great.	3/8/2015 11:29 PM
1149	277 - better mid-day option to continue than the 255 255 - having to take this bus to get to Seattle in the middle of the day is the worst!!!! You can literally feel all of the time you are wasting just sitting on this bus and then it either gets you where you need to be way too early or way too late.	3/8/2015 10:27 PM
1150	Only add routes don't take them away	3/8/2015 10:08 PM
1151	It's nice to have a direct to downtown from my area (65th and 35th) during non-peak hours. However, it appears that the travel time from my area to downtown is not changing significantly based on the the trip time map.	3/8/2015 9:49 PM
1152	I would like to see the direct route between Madison Park and downtown,(11), stay as is. We have a large number of senior citizens using this bus, and it will be very difficult for this group to get on and off busses to make the transfers. Also we have a large number using bus 11 for getting to work downtown. Having to change buses to make this trip will make the journey longer, and it might result in these people choosing their cars for the commute. Ergo more car traffic.	3/8/2015 9:34 PM
1153	extended service during the day	3/8/2015 8:53 PM
1154	Need for Route 75 to connect easily and conveniently with UWMC Link Station for me to use it more.	3/8/2015 7:35 PM
1155	While I'm not sure if I'll switch to the link light rail or stay on the 41 for my twice-daily commute, I'd like to see better integration between the buses and the light rail. For example, it is frustrating when waiting for the bus in the tunnel downtown to see buses wait while one train is at the platform. If buses can run both directions in the tunnel the trains and buses should be able to run simultaneously too.	3/8/2015 7:26 PM
1156	First Hill is still suffering from the loss of the First Hill light rail station. The delayed streetcar will be slow and meandering. The BRT is years away. Please do not make transit coverage on First Hill worse as you revise service on nearby Capital Hill. We are already SRO on many routes - consider how popular we are as a destination, and how much of the city is dependent on being able to get through First Hill. We need more, better, more local, more frequent coverage.	3/8/2015 6:33 PM
1157	Are we ever going to get this route back?	3/8/2015 6:02 PM
1158	I would love to see the 44 or a similar bus, continue down 45th toward the u village area. Currently there is nothing along 45th after 15th and it makes it very difficult to get to and from that area.	3/8/2015 5:18 PM
1159	19th Ave service -route 12 should be kept.	3/8/2015 5:15 PM
1160	Options are very limited between kirkland and seattle. With the removal of 260, there has been an overflow at park and rides. People who formerly didn't have to drive as part of their commute now find themselves driving to the park and ride or to their destinations. 252/257 are the only reasonable timely options for a kirkland/seattle daily commute. If 255 is eliminated this will also impact 252/257 riders as the 255 is the only option to get back to kirkland at a non-peak time. The frequency and coverage between kirkland and seattle has been insufficient for a long time and has only gotten worse. Do NOT cut these routes unless there is a plan that actually keeps and even better expands what is available.	3/8/2015 4:08 PM

1161	I love all these routes and appreciate how convenient they are to my home and my various destinations. The 11 and the 8 have the biggest issues with timing; the 43 and 48 typically do a good job, although it would be great if the 48 were more frequent.	3/8/2015 3:55 PM
1162	It would be great if the 372x ran on weekends. Even if it only made a 5 of trips per day, that would be better than nothing.	3/8/2015 2:39 PM
1163	I would really appreciate stops in North Seattle that were closer to Metro hubs. I just don't feel safe using 145th Street. the 45th Street stop if good, but I would really prefer a stop at 105th or near there, so I could connect with the Metro hub at Northgate.	3/8/2015 2:11 PM
1164	Extend the current 15 minute service during the day and most of the evening so that it is provided later in the evening (e.g., after 11:00 pm).	3/8/2015 2:10 PM
1165	8 - make it realiable 11 - make it more frequent 43 - make transfer from westbound Montlake freeway stop to Montlake 43 (bound to Capitol hill / downtown Seattle) easier - the current intersection is extremely pedestrian-unfriendly, causing me to often miss buses. Alternatively, build an interchange between Husky stadium Link station and Montlake freeway station 49 - make it reliable.	3/8/2015 2:04 PM
1166	Don't mess with the no. 2. It goes exactly where i need to go, from Queen Anne to Madrona	3/8/2015 1:39 PM
1167	While I would greatly appreciate an increased frequency of travel time on these routes over the weekend, as alternative 1 suggests (as I do commute over the weekend and would love to have this commute shortened), I would be still concerned about my bus fares increasing inordinately, and I would still want to know how this would affect pricing.	3/8/2015 1:14 PM
1168	There seems to be an impression that the people of Madison Park and to some degree Madison Valley do not use public transportation, and therefore the city should not include those areas in it's consideration. This is simply not the case. There are people in Madison Park and Madison Valley who use public transit. Please note, we also pay more in taxes than any other neighborhood. City services for our neighborhood should not be overlooked due to an outdated assumption.	3/8/2015 12:43 PM
1169	The revision to the route 10 that has it terminate on Pine Street has been one of the most inconvenient changes—for me—in the entire time I've used Metro (35 years). It seems extraordinary to me that one cannot navigate from Capitol Hill—one of the densest neighborhoods adjacent to downtown—through the length of the central downtown core. Big mistake.	3/8/2015 12:21 PM
1170	loss of the 64 in dt is terrible making the 71 stop at i5 isn't useful. i dont want to have to transfer 3 times. bring back a direct connection between dt Bellevue & Lake City via NE Seattle (25th, 35th) more 76 buses are nice	3/8/2015 12:04 PM
1171	They are almost always over crowded and running behind in the evenings. Especially the routes that start in the downtown tunnel-71, 74, and 76. It shouldn't take 20 minutes to get out of the tunnel. If there is a reliable way to get from the U-District light rail stop to my house, I'd give up the bus and take light rail all the way north. You should have easy bus connections from the light rail stop to standpoint, 65th, View Ridge etc. Ideally, one won't get off the light rail and then have to wait 20 or 30 minutes for a bus connection.	3/8/2015 11:40 AM
1172	Keep this route as is. If mid-day service is eliminated, it will impact many students who attend the Stevens, Holy Names, and St. Joseph's schools - requiring that they walk longer distances to catch a bus on 15th Ave E or 24th Ave E.	3/8/2015 11:23 AM
1173	Again, I'm mystified why Madison Valley would lose direct service to downtown. It doesn't make sense given the density that we have here. Please maintain direct service from Madison Valley to downtown. I love the improvements suggested for the # 8. I think you can implement some of those improvements while still maintaining the #11 (direct service to downtown).	3/8/2015 10:37 AM
1174	I'm happy with the proposed Alternative 1 plans for both routes but do have concerns about reliability southbound.	3/8/2015 9:42 AM
1175	The plans to connect the U-District to downtown using mostly lightrail are great for when the U-District station opens, but the Husky stadium is pretty far away for such an extreme reduction in bus service between Roosevelt/Campus Parkway and downtown. (I.e. the reduction in frequency/service for 71X/72X/73X/74X). Even during the day, non-peak hours, these buses seem packed. I know some of that would change, but I think a lot of us are still off on the far side of campus...	3/8/2015 9:21 AM
1176	252 and 257 - these routes need to be extended - they are always full in the morning and they stop at 8am. We need more direct lines to Seattle 252, 257, 311 - you only serve Kingsgate; why are no stop at other park and rides that have capacity such as Houghton? parking is really limited at Kingsgate.	3/8/2015 8:51 AM

1177	University Way has its own demand for service to downtown. Forcing people to transfer is beyond inconvenient, doesn't make sense and shows that Metro has failed to realize that "The Ave" isn't just for people attending the UW. Please have some sort of frequent service between the Ave and downtown. Once North Link opens, then bus service can be cut. But until then, Metro is getting ahead of itself in eliminating the 71/2/3	3/8/2015 4:47 AM
1178	No convenient bus stops exist - closest stop is 2 miles from home, and this stop provides no routes where I need to go. Can't get parking at park & ride unless I park before 7:45 am. Have to sit in car for 2 hours (with no bathroom available) to catch 9:30 am bus (destination does not open before 9:30 am, and I would feel very unsafe hanging out in Pioneer Square for 2 hours - wouldn't know where to go or what to do). A stop for route 550 on Lake WA Blvd. near SE 73rd Street, and a route going to Renton: near Renton Center Way and Rainier Ave. S., would be appreciated.	3/8/2015 12:03 AM
1179	Route 30: Would be fantastic to have service on Saturday mornings to help people get to the farmer's market. Route 65 is my best connection to UW campus, please keep it running! Route 74: would love to see more buses on this route since it's a great way for me to get downtown, but would be very happy if you don't cut it back.	3/7/2015 10:49 PM
1180	There is essentially no way for me to get to east lake and sly without an hour long bus ride from magnolia even though I live 15 minutes away	3/7/2015 9:24 PM
1181	Keep Route 77, expand service hours, and increase frequency.	3/7/2015 8:18 PM
1182	As I mentioned before, 255 service after 10pm does not recognize how many people use this route after Mariner games or events at Benaroya Hall. An additional bus at 10:35 or 10:40 would recognize when events end & riders want to get to Kirkland.	3/7/2015 8:13 PM
1183	47=Give it back to the densely populated neighborhood it served. 8=improve frequency and consistency of service between Capitol Hill and Lower Queen Anne (Seattle Center) 43/44=Improve frequency of through service to Ballard Keep 66 between downtown and UDist and to Northgate and Colman Dock	3/7/2015 8:10 PM
1184	I'm happy with the service on this route (49) and don't want to see it change. I hope the link service from SCC will duplicate the route of 9X. Otherwise do not eliminate it. It's hard to tell from your maps and information exactly how I would be impacted by these changes. The routes with bus #s are not clearly delineated.	3/7/2015 7:03 PM
1185	More busses for the 555 route. Like every 15 or 20 mins during the commute times. Also a connector to the light rail from its stop on montlake.	3/7/2015 6:22 PM
1186	It looks awesome!	3/7/2015 5:50 PM
1187	8- Like the idea of combining with 11. Provides better E-W through Denny corridor and up Madison 66X- NO CUTS TO weekend, night, or frequency. Sorry, this one is fine the way it is because Eastlake riders need it 70- No Cuts except maybe late night frequency. Weekends and Nights are needed, the route shouldnt be redesigned. 545- Like the current midday service on Weekdays. Plenty of people are riding at 10am, 11am, all hours, so any cuts arent really going to be that great. Remember not only Microsoft employees ride this one, but the people who work Food Service and other Janitorial, etc for them also do. These people ride at hours that are not peak. Their shifts may begin early AM or Afternoon Midday. 28-Ambivalent about the change to the more 28X route. The Routing is fine either way, the Express does save time. As long as the frequency improves and the 28X runs more often ALL the time including NIGHTS and WEEKENDS, the shift to all Express shouldnt be too bad. Just make sure there are enough stops on 8th NW and that they aren't too far apart and that the North end of the Route isn't affected too badly. 16- Don't like it stopping only at Northgate TC. Continue it on same route as now.	3/7/2015 5:31 PM
1188	I hope that increased frequency increases capacity enough so that riders are no longer left on the sidewalk and told another bus is right behind me and that the 75 runs frequently even when the UW is not in session. The southbound 41 fills up before it gets to the Northgate Transit Center and, when I rode it every day, I was often left on the Convention Place station as packed northbound 41's would not even stop. Is it the assumption that everyone will go through the U District instead of riding the 41? The fact that the 41 stops at a park and ride will always attract commuters who have small children or need to run chores on the way home.	3/7/2015 5:18 PM
1189	Weekend availability on this route would be excellent. How might 372 connect to light rail at UW connections (walking distance)?	3/7/2015 4:36 PM
1190	Connection to a light Rail	3/7/2015 4:30 PM
1191	Please make these route more frequent during commute times. The 271 is frequent but this is a standing room only bus. The 555 doesn't run often enough. I would hate to have to rely solely on this (also often standing room only) bus.	3/7/2015 4:11 PM
1192	Rte 8 is too crowded. Rte 66x could be express for more of the route, not just through Eastlake.	3/7/2015 3:45 PM

1193	73 keep it on 15th NE 41 all buses should go all the way thru to Lake City, not stop at NE 125th.	3/7/2015 3:45 PM
1194	Please please do not remove the 11 route! Needed by so many to get out of Madison Park, Madison Valley to get to Pine and Broadway and downtown. Those who use it really really need it.	3/7/2015 3:03 PM
1195	It should really end at the new LR station instead of veering towards NE campus parkway.	3/7/2015 2:58 PM
1196	Please do not reduce the frequency of this route - the bus is already standing room only at many points during the day.	3/7/2015 2:46 PM
1197	These are routes I use more than others. they all require I drive & park; some of the pick up locations are kind of sketchy. I am all for consolidation, economy as long as the focus is on not just the bus/light rail but on the people getting to the pick up spot and being safe there. This survey seems not to address that fact. This is not a build it and they will come deal. i'm the taxpayer paying for it. there doesn't seem to be any plan for getting people to the pick up spots. and making sure they are safe....it none of those are present in this survey. you are forgetting the people who are paying for this. too much money is at stake to over look the people paying for it - at the state or federal level.	3/7/2015 2:31 PM
1198	These routes run close to and/or duplicate other frequent routes for most of their length. It seems like a lot of waste. It just doesn't make sense. Take for example route 43, it runs with the 49, 8 and 48, throughout its length all of which are frequent all day routes!	3/7/2015 2:21 PM
1199	16--please change it to downtown, back to Seattle Center, Green Lake, N. Seattle CC & then to go to Northgate--please, please please! 73 please continue all the way up to 145th st. on 15th NE 255 please consider having an alternate route from Northgate (or 145th St.) & Lk City Way around the North End of the Lake and directly to downtown Kirkland P.S. I really like #D and 31, 32. Thank you!.	3/7/2015 2:15 PM
1200	Loss of sections of current route 12 under Alternative 1 would be a big blow for me. I would probably stay home more.	3/7/2015 1:48 PM
1201	Currently, when boarding a North-bound 31 or 32 in Fremont, I never know whether it will become a 65 or 75 when it arrives at Campus Parkway in the U-District. I hope in the next revision it will be easier to know the full bus route when you board.	3/7/2015 1:46 PM
1202	The 25 would be useful for laurelhurst if it just had a few less stops in laurelhurst but more frequent and just went to the uvillage, campus and a light rail station. We just need to get downtown fast at peak hours. Also to the elementary school.	3/7/2015 1:25 PM
1203	Bring back the 45 from Seattle Center/ Queen Ann to the University of Washington!!!!	3/7/2015 1:20 PM
1204	The 66x is the only safe way to get to and from Roosevelt and downtown Seattle. Leaving riders to traverse the documented unsafe pedestrian route from the 70 buses is an untenable option. I will continue to use my car.	3/7/2015 12:23 PM
1205	Need increase in frequency of service	3/7/2015 12:13 PM
1206	please add more park & ride space near Redmond! Overlake especially and Bear creek Also an express route from Bear Creek to Seattle would be great (one that doesn't go through Redmond downtown). Serve Redmond Ridge better - more frequent busses - more park & ride space.	3/7/2015 12:12 PM
1207	Need frequent feeder between Laurelhurst and Light Rail	3/7/2015 12:10 PM
1208	Just focus on making Route 8 more frequent and reliable during peak hours. Better weekend transit from Capitol Hill to Fremont would also be appreciated.	3/7/2015 11:59 AM
1209	The #12 is a lifeline for many people toward the Interlaken Park area. Planners seem to be looking at distances, and it's not a long distance up to 15th, but this is Capitol Hill and the hill is steep. When earlier budget crises threatened to end the #12, a number of people were frantic. Mothers bringing kids to Stevens school often have little brothers or sisters in arms or strollers. They ride the 12 to drop off the school kids but could not walk up to 15th with babies and strollers. A number older of neighbors have no car, or one very busy car. Some say they would have to sell and move without transit closer than the steep hill to 15th. Depending on options, some would walk down to 24th, but that is a steep walk, too. Walking to John/Thomas is flat but very unsafe at night, and too far for man older people to walk. This neighborhood "dodged a bullet" with the rescue and successful election last fall.At neighborhood gatherings there is lots of talk about how happy they are that we didn't lose the 12. With this info (received yesterday) there is panic again.	3/7/2015 11:58 AM
1210	The more 372 runs, the better - midday, evenings, weekends. the 312 is great too.	3/7/2015 11:56 AM

1211	Route 16 - Really like the simple east-west connection with Sand Point Router 68 - Great connection between View Ridge and the US link station Route 71 - Good to U District if the fair was lower. Router 76 - Really good for getting downtown	3/7/2015 11:46 AM
1212	Cutting the 68 would leave nothing or would make it very difficult to get from Northgate to the University Village area. It is used by a great number students. We use it to get to our medical appointment as it is 1/2 to the stop by our home and 1 block to the clinic. Saves us from driving which our mayor is demanding of us. The 72/73(to Jackson) we use to get to Lake City and downtown. If the 73 is cut there will be no service going north between Roosevelt and 35th leaving people to walk great distances in dark areas. The 72 would also leave large gaps where people would not have CITY SERVICES. We pay both in taxes and bus fares and continue to get less service. SOMETHING IS WRONG WITH THIS PICTURE!	3/7/2015 11:39 AM
1213	don't reduce service on this route. light rail to u-district/downtown is not a convenient option for anyone who lives between 14th and 24th aves from capital hill through montlake.	3/7/2015 11:06 AM
1214	I use the route 8 to get to school. I am a freshman at Garfield, and I plan on using it for the rest of my time in high school. Lately, the bus (I take the one that is supposed to come at 7:31 am) has frequently been 10 - 15 minutes late, resulting in me arriving at school late. I support Alternative 1 for this reason, as it would make the 8 faster and more reliable, and I'd be able to get to school on time without having to wake up even earlier.	3/7/2015 10:52 AM
1215	Not enough buses during peak hours.	3/7/2015 10:47 AM
1216	During times when UW is in session busses coming west from the U district are often late. I wonder if there's a way we could speed up moving through the U district bottleneck.	3/7/2015 10:45 AM
1217	Elimination of the 19th Ave arm of this route under Alternative #1 would have have a number of negative impacts--on school children and parents attending 4 different schools; on patients using Country Doctor, many of them low income and ill; on a population of aging residents who cannot negotiated the long, hilly walks to alternative routes; and on inhabitants of the growing number of apartments who use this route for daily commutes.	3/7/2015 10:39 AM
1218	The 271 is our family lifeline to work and to school, including early morning rides, mid-day frequency, and evening/weekend service. Reducing frequency between Eastgate - Issaquah would be devastating. The potential route of a 207 would be very promising, but only if frequency matched or slightly improved the frequency of the 271.	3/7/2015 10:29 AM
1219	As I mentioned in other sections of the survey, these routes are regularly utilized by large numbers of individuals. The #8 especially tends to be full from Lower QA to the Madison Valley so keeping or increasing the number of buses especially during peak times would lead to increased customer satisfaction. I hope the weekend service continues down the back of Capitol Hill toward MLK as numerous people enjoy the benefit of being able to take only one bus to get to where they need to go. Regarding #11, please don't reduce/eliminate the frequency and path of this route. Many people on this bus use it to get to the grocery stores along the route with minimal hauling of shopping bags/carts. There are a large number of elderly/disabled who use the bus that would be greatly impacted by proposed changes.	3/7/2015 10:28 AM
1220	More frequent bus service throughout the day, every 15 would be nice. Connect better to light rail stadium station.	3/7/2015 10:26 AM
1221	12: It's used by a lot of people who use Country Doctor clinic on 19th, who may not be able to access other transportation. Heading downtown in the morning, the bus is often standing room only before any stops near Broadway - there are lot of Cap Hill residents not living near Broadway who use this route. Also, on the route in the afternoon/ evening heading towards Interlaken, it's standing room only before the bus gets to Madison. Many people get off at Trader Joe's for shopping. Speaking for myself, if I couldn't get off at that stop, I'd have to take my car to Trader Joe's on the weekend for shopping. 43: For those Cap Hill residents who live a mile or more away from Broadway, the 43 is the fastest and easiest way to get directly to the U District. Especially if Metro is considering getting rid of the 43 and the 48 - how are those who live in eastern Cap Hill expected to get to the U District? Thanks for listening!	3/7/2015 10:10 AM
1222	This route is full to standing on a regular basis. It should run more frequently when UW is in session. Also, gridlock on 405 is so terrible - have alternative routes been evaluated? Like I-90 or I-5?	3/7/2015 10:01 AM
1223	These need to be more frequent and there needs to be a way to extend the routes to within a reasonable walking distance to the new University of Washington Light Link Rail station.	3/7/2015 10:01 AM
1224	MT 111 is my preferred way to get into Seattle and back home. ST 560 runs very infrequently and often just misses connections with ST 550, but is my back plan for MT 111.	3/7/2015 9:49 AM
1225	I don't know what can be done, practically speaking, but the traffic on Denny, and being stuck in the I-5 queue, is bad.	3/7/2015 9:43 AM

1226	The 71, 72, and 73 northbound are terribly overcrowded during rush hour. I think this experience must be very uncomfortable and even dangerous for the elderly and people with disabilities.	3/7/2015 8:55 AM
1227	The 125 is a vital route to keep since it is the only link between downtown and South Seattle College. The 47 has been removed and is projected to return. Lower capitol hill has suffered without this route and I am eager for it's return.	3/7/2015 8:24 AM
1228	We desperately want quick connections to the U-Link from Wedgwood.	3/7/2015 8:12 AM
1229	Move route 75 to Montlake Boulevard for direct access from Sand Point to UW Link Station and higher frequencies on montlake boulevard	3/7/2015 8:00 AM
1230	The proposed changes in #1 would make bus service much less useful for people who live east of 15th Avenue on Capitol Hill.	3/7/2015 7:55 AM
1231	It might be effective to split Route 49 at the Cap Hill Link Light Rail station, with different frequencies at some times of day for the approaches/departures to the north/to the south.	3/7/2015 7:36 AM
1232	From N 122nd Ave to N 128th Ave the bus turns east to make a loop around Haller Lake. Very few people get on and off there. Would you please consider having at least one of the buses turn right instead of left on N 122nd street and go down 1st Ave NE to N 128th. Then it could reach the NSA church, active all week long, the Bridge coffee shop the free health clinic, and North Acres Park at 128th and 1st Ave NE a very active park. It would not change the distance, or timing of the routes. That would be a slight change in the route but a massive change in making the bus's more accessible to the local neighborhood.	3/7/2015 7:11 AM
1233	this route, or another, should go to south lake union from view ridge in peak hours. many south lake union employees now live in view ridge, laurelhurst, sand point areas	3/7/2015 6:42 AM
1234	I am afraid that proposed changes will drastically reduce service on these areas/routes. . With metro receiving much more funding between November 2014 vote and increase in fare as of March 1 2015, I would expect most routes to have more frequent service. Regardless of this important project, as outlined in Alternative 1 and 2, bus service ought to be more frequent, as in every 15 minute runs, like performed in may European countries, like Italy, where I am from	3/7/2015 4:04 AM
1235	Regardless of which alternative is decided on, please consolidate the bus stops along NE 55th and University Ave. Having a bus stop every block or every other block is inefficient.	3/7/2015 3:35 AM
1236	8: I LOVE making this route more frequent and reliable. It can't be trusted right now and I'm often more comfortable walking. 12: My doctor is at 19th and Mercer. Without the 12 I have no quick way to get to work in Pioneer Square. Without it, I will need to walk at least 10 minutes, then take the bus to the lightrail, then connect, which turns a 20 minute ride into something like 45 minutes. 49: I really like the idea of making this more reliable. And I think taking it Madison is a cool step. The thing is, this leaves my neighbourhood (Summit area -- I'm at 1000 Bellevue Place E) without a way of getting downtown reliably in less than 30 minutes, which is crazy considering how close I am to downtown (about a 40-45 minute walk).	3/7/2015 1:12 AM
1237	Have 76 stop at 45th and I-5 during peak times while going southbound to Downtown Seattle (currently it only stops going Northbound). Consider increasing frequency if deleting route 71 entirely. In an ideal world would ask for route 71 to remain service between Ravenna (stop at 23rd and 65th) and UDistrict (45th and University). Looking for some sort of direct service on that route still.	3/7/2015 1:11 AM
1238	I sometime take the 44 just one stop but hope about extending it to Sunset/North Beach neighborhood, Since the 61 was eliminated it would help the Sunset hill neighborhood out	3/7/2015 12:55 AM
1239	It is very important for me to NOT have any changes on route 2	3/7/2015 12:44 AM
1240	Schedule adherence on the northbound versions of these routes (& westbound for the 48) is abominable, and any planning should address this efficiency problem by breaking up lengthy routes and creating more realistic schedules. Several of the transfer intersections for these routes have weirdly inconvenient bus stops; these include 105th & Aurora N, Holman/105th & Greenwood N, and 85th & 8th N. Peak routes (e.g., the 28X and the 355) need to experiment with "reverse" commute runs. Even before the UW rail station, the 48 needs augmentation on its overcrowded portions: several runs could originate and terminate some distance north of 85th St. on current routes for the 5, 16, and 28; it might be best to add northbound stops @ 85th where needed.	3/7/2015 12:27 AM

1241	Move route 8 to Mercer st between Lower Queen Anne and I-5 then keep it the same through Capitol Hill and Central Area, then make Mt Baker Station its south terminal (instead of Rainier Beach). use a van shuttle on MLK to shuttle riders to stations who live in between stations on MLK between Mt Baker and Rainier Beach. Do not implement route 38 to prevent duplication in service. Operate route 10 from Downtown to 15th ave & E John as old 43, then continue in a loop via 15th ave, E Galer st, 19th ave, Madison ave, 15th ave, and back on E John to Downtown(via the Cap Hill station). Delete 12 and 43. Extend route 4 south to Mt Baker Station and then east to S Hanford where 14 currently makes a detour loop. S Hanford will become the southern terminus for route 4, while service on 14 will become faster and more productive. At the same time route 4 will have a meaningful southend service by reaching the Mt Baker Station and connecting riders east of 31st street S. Decrease route 4 frequency.	3/6/2015 11:23 PM
1242	Please please please dear transit overlords, give me	3/6/2015 11:13 PM
1243	This route is pretty fast in the morning. Making the commute to downtown in a reasonable time with little slow down. However it's frequently standing room only and sometime leaves people behind. This route is horrible in the evening. It takes at least twice as long as the morning commute, and people are very often (almost always) left on the platform at the Convention Center. I'd like to see this route replaced with a very frequent feeder bus that goes to the UW light rail station. That would cut out a good portion of the delay in the evening commute, i.e. the slow bus tunnel, the ridiculously slow detour from the express lane exit on 42nd up to the I-5 on ramp, and again the I-5 off ramp at NE 65th St.	3/6/2015 11:03 PM
1244	This route is a lifeline to people going to Country Doctor. They are often low income and need to use that facility and they often aren't real mobile. It would totally leave them high and dry. Also this route serves many students who attend Holy Names. Many of them from some distance. It is already a long commute for many of them and it would only get longer if they had to go to the University AND THEN catch a bus down 23rd. 23rd is also a much more "scary street" in the dark than 19th with it's restaurants and churches.	3/6/2015 10:45 PM
1245	9- more frequency 11- more frequency 48 crucial link bet Univ Dist and S. Seattle and CD/Capitol Hill	3/6/2015 10:29 PM
1246	Please keep the 43 connecting Montlake/Capitol Hill to the Broadway light rail station!	3/6/2015 10:21 PM
1247	I like more service from Laurelhurst/Children's Hospital and UW light rail station	3/6/2015 10:20 PM
1248	bring back the 47!!	3/6/2015 10:02 PM
1249	I would like to see faster, more reliable connections between Seattle Center/SLU/Capitol Hill (basically the length of Denny Way). Maybe make it a Rapid Ride? Also, it would be nice to have a bus (or, ideally, a train) connecting Ballard, Wallingford/Fremont, and Capitol Hill.	3/6/2015 9:38 PM
1250	Need more busses during peak hours.	3/6/2015 9:06 PM
1251	I commute to work five days a week from Tacoma to the Magnuson Park area. I depend on the 586 to get me to U District and the 30 and 75 to get me from their to work. I do not want to be slowed down by being forced onto the light rail if the 586 route is shortened. The 586 is heavily used by workers at Children's Hospital, UW and UW Medical. It is not just a student route. Adding the light rail could increase commute time by changing a two bus route to a two bus/one train route.	3/6/2015 8:58 PM
1252	eliminating the 71 as it is now constructed causes a hardship to get from my neighborhood to bellevue, I make this trip twice a day and already feel the 271 is too crowded, the only way for me to connect to the 271 from my home is with the 71. On my route each day there are at least 5-6 people that also make the same connection from the 71 to 271 to commute to downtown bellevue. This number is sure to grow, the 271 is overcrowded, it does not need to be altered, it needs to run more frequently during peak times, less at off-peak. each bus is dirty, crowded and not enjoyable. this is how I get to work every day. I don't know why Metro feels so strongly about eliminating the 71, every time I ride the 71 it is crowded to standing room only, and most peak trips have to leave people when there is no more room. I really don't understand the reasoning behind this decision. It will have a very negative impact on my neighborhood, there are many seniors, students and working people that use this route (71)	3/6/2015 8:51 PM
1253	More frequent service...and add back weekend service,	3/6/2015 8:43 PM
1254	28/28X: Please consider the impact to Greenwood riders from losing their only direct service to Fremont. I support the proposed change to the 28, but this would be a lot more palatable if the 5 were sent to Fremont in its place. 43: The proposal to delete this route, and reinvest the savings in higher frequency on the 8 and 48, is my single favorite thing about this plan. Please, please, please follow through with this. 49: I think there's a real missed opportunity to simplify service by connecting the 49 and 9. You're already making changes here; just go the whole way!	3/6/2015 8:30 PM
1255	Packed busses and standing room only almost 24/7. West Seattle is booming and Metro is not addressing this major increase in ridership.	3/6/2015 8:22 PM

1256	Work with SDOT to fix the 8 and the Denny Slog!	3/6/2015 8:21 PM
1257	I use rapid E from aurora village, then use MT to travel primarily to the U-district, Capitol hill, Sounder matches, downtown and the CD and/or Seatac airport. Sometimes we go to Bellevue or Redmond, the most important thing is that they are available on the weekends/evenings.	3/6/2015 8:19 PM
1258	Keep the frequency;	3/6/2015 8:17 PM
1259	The 27, when it connected First Hill to Fremont to Ballard, was one of the most useful routes I had, and one of the best from Ballard to downtown. The 27/33 is not a useful bus, and rarely runs. As it is, losing it entirely is close to happening, and it's frustrating to lose the route I was most reliant on.	3/6/2015 8:01 PM
1260	43 needs to get to N 45th even after the UW Husky Station comes on line, until the University District Station is completed.	3/6/2015 7:50 PM
1261	you can never have too much service on route #2 and #3. They need to run more frequently and later.	3/6/2015 7:49 PM
1262	Service every 15 minutes	3/6/2015 7:48 PM
1263	The 43 is absolutely essential for me. It connects me to 24th, where I work, to Capitol Hill, where I live. The Link light rail station in the U District would be too much of a walk and the traffic in the area too unpredictable. PLEASE don't completely eliminate service to 24th like this.	3/6/2015 7:46 PM
1264	I like Route 48 on 15th Northeast. It gets me close to my church which is very important as I have limited walking. Also, the bus can get backed up now and moving it to university way would make the problem even worse.	3/6/2015 7:44 PM
1265	It is working pretty well for me currently. Greater frequency is always nice. What I'm concerned about is how do I get to light rail/UW Station?	3/6/2015 7:24 PM
1266	We need a downtown bus that will move passengers up from 3rd Avenue (or wherever) via Madison to Capitol Hill. I do not want to ride a trolley from Jackson Street via a longer slower route and the light rail would drop me off 1/2 mile from B'way & Madison.	3/6/2015 6:59 PM
1267	We need more service on this route. I'd add two buses each morning to downtown that depart NE 75th St and 35th Ave NE at these times: 7:45 am 8:15 am	3/6/2015 6:32 PM
1268	I would like later night service. I can understand the issue with having frequent late night service, but could you add a run at midnight or later? I would find it	3/6/2015 6:31 PM
1269	These are the routes I use most. 71 most of the time, and transfer to 31 to get to Seattle Center. My 71 bus stop is one block away, easily walkable for me for years to come (I am 80.) I don't anticipate using light rail much. On route 71 I can go to the U district, to the Convention Center to Benaroya Hall and any other current downtown tunnel stops, or transfer to light rail if I so choose. Without 71 it would be a long walk to a bus, making it necessary to drive to a bus stop and park, especially at night. Route 71 is very popular. The bus is usually full once it gets to the U district. Please don't take my transportation away, afte I voted myself more taxes to keep it!!!	3/6/2015 6:30 PM
1270	The 24 and 33 are always 20+ minutes late. I don't understand why nothing is being done about this. the 72 isn't any better, especially northbound, I've had to wait over 2 hours in the tunnel for a 72 in the past (the train was blocking the tunnel). I don't understand why the buses and train are sharing the tunnel when they tend to slow everything down. The 312 is not adequately taking over the loss of the 306. It is frequently late, and always packed to the gills (sometimes it doesn't even stop on the last two southbound stops before I-5 because it's full). I am tired of being late to work because the buses can't run on time. I am tired of spending 2+ hours each way on my daily commute of 13 miles. You can, and should, do better.	3/6/2015 6:28 PM
1271	For me, it would be really great if the 65 did not detour all the way to the Children's Hospital on its way south to the U District (instead, it could just go down 35th all the way). This detour adds 10 minutes to my ride to the U District as opposed to driving.	3/6/2015 6:23 PM
1272	more frequent service OUT OF MADISON VALLEY!!!! Especially evenings & Weekends. I work there and after 12 hours on my feet the last thing I need is to wait 30-40 minutes for the fricken bus!	3/6/2015 6:02 PM
1273	25 does not run frequently enough, especially at commuter times, and ends at Boyer and does not connect between UWMC and North Capitol Hill through Montlake up the DelMar ave Hill connecting Boyer to Seattle Prep High school, Roanoake Neighborhood, and 15th Ave NE Capitol Hill Neighborhoods.	3/6/2015 5:57 PM
1274	Are they changing?	3/6/2015 5:56 PM
1275	These routes should connect in the most efficient, timely way, to the Montlake/UW Link station. Period.	3/6/2015 5:54 PM
1276	Please, please keep these routes!	3/6/2015 5:50 PM

1277	continue the 49 route as is	3/6/2015 5:44 PM
1278	Run later than now between Magnolia and University campus.	3/6/2015 5:44 PM
1279	Save the south half of it AS IS!!	3/6/2015 5:43 PM
1280	Should be faster and more frequent. Alternative 1 will make them faster, but not more frequent.	3/6/2015 5:40 PM
1281	Keep them...plain and simple.	3/6/2015 5:38 PM
1282	The 8 should really be replaced with a cable car. Denny Way is a mess and mass transit will not solve the issue because a BRT setup similar to the Madison concept will never work. The best way to close the "triangle" of downtown is to have a quick, direct means of connecting Lower Queen Anne/Seattle Center and the Cap Hill light rail station that bypasses the rush hour traffic. The 545 needs to have more trips at rush hour, but off peak should be increased as well. One proposal that I have heard and never understood why it was not implemented, would be to eliminate the dogleg in Cap Hill and instead add a bus stop at the Olive Way NB on-ramp to I-5.	3/6/2015 5:37 PM
1283	I'd like to see route 47 re-instated, as it provides easy bus access with less walking distance to go from the residential area along and near Bellevue on Capitol Hill to downtown.	3/6/2015 5:35 PM
1284	Please keep the 542 stop at the greenlake P&R - it is practical for many people going to the eastside	3/6/2015 5:32 PM
1285	how best to connect my home/office to the station for quick travel via bus or bike storage	3/6/2015 5:31 PM
1286	I'm very happy to see route 8 broken into two routes along with increased frequency, as this should help with on-time performance. I have the following suggestions for working with SDOT to improve this route: -I would like to see queue jumps, bus and right-turn only lanes, and protected left-turn signals at Broadway and John in order to improve traffic and bus movement at this intersection and reduce car-pedestrian interactions (I see a lot of close calls there). A short signal cycle would prevent long pedestrian waits. -I'd also like to see a right-turn signal with "no turn on red" at Olive and Denny (westbound) to reduce auto/bus/pedestrian safety issues and move traffic more smoothly. -Reduce eastbound Denny to one through lane from Westlake to Olive, with left- and right-turn lanes/pockets at various points, including right-turn only lanes onto Boren and Yale (where freeway backups frequently occur). This would help reduce backups, confusion, and competitive (and dangerous) lane changing. Altogether, these changes would improve safety and help normalize travel times along this heavily-used route.	3/6/2015 5:27 PM
1287	It is very important to maintain a direct route from downtown to Madison Valley because there is a major social service program there (Bailey Boushay House) that serves people who rely on bus transportation due to disability.	3/6/2015 5:26 PM
1288	When I was riding the bus (I stopped two years ago), 60 was basically a standing-room-only situation. Now my neighborhood has parked cars everywhere, as people drive to BH to catch the bus in, which I imagine makes an even more packed route. I hope this is kept in mind.	3/6/2015 5:23 PM
1289	248 used to be the route I was on the most until its hours were cut. Choking outlying areas out of the system is a self-defeating premise. the more you cut them, the less people can use them, and the less they are ridden, which justifies more cuts. I had to move to Seattle because of cuts to 248 and I am still in debt from this hardship. before that, I had to switch to 248 because 232 and 931 were no longer useful, forcing me to travel 2 miles to get to the 248. Strategies like Alternative #1 have adversely affected my life in HUGE ways.	3/6/2015 5:21 PM
1290	For the 255: please do what you can to make sure it's reliable for people transferring onto it from Link, even though it has to wait on southbound Montlake. Maybe make it wait a bit at the stop nearest to UW Station? For the 271: please reroute it to serve Evergreen Point for easy transfers. That could be via the 108th HOV ramps and 112th Ave NE, or via Bellevue Way... whichever. Right now, it's very frustrating to have this great frequent route -- which would get even better under Alternative 1 -- that is hard to use because there is no good transfer.	3/6/2015 5:19 PM
1291	I really like the new concept of recombining the 8 and 11 into the 8 and 38, though I wonder if this sends too much service all the way out to Madison Park. These routes look really useful! I'm a little sad to see the 43 go away, partly out of nostalgia but also because it means that all of the trolley wire along 23rd and 24th will be unused. I know that converting the 48 to be a trolley route has been on the radar for awhile, but interlining it with the 67 (while I like the routing and direct connection to Northgate) seems to preclude that. Broadly speaking, I like the changes on Capitol Hill that provide more of a grid of frequent service than the downtown funnel that we have today.	3/6/2015 5:18 PM
1292	This is terrible. Maintain 71 between U District and Wedgwood and terminate route at Campus PKWY NE. All other alternates involve dramatically more walking and travel time. Alternate 1 makes travel to University Ave prohibitive from Wedgwood. There's literally nothing there for us. People who live north of 75th and east of 40th will be almost completely cut off from University Avenue. This is very very bad.	3/6/2015 5:18 PM
1293	Don't take them away. It's the way to get to the stadiums from Eastlake.	3/6/2015 5:17 PM

1294	Nearly all proposals for north Seattle assume the 26 and 26x service the same areas. The do not. The 26x does not make stops in Wallingford. All of the recent proposals assume riders of the 26 can take the 26x instead. If that were true we would already be taking the 26x. It is faster to walk a mile to Fremont than it is to walk to a 26x stop. These routes need to be recognized as servicing different areas.	3/6/2015 5:16 PM
1295	74 - this is a great / fast service from NE seattle to downtown - please keep it! 65 - sad that it no longer continues down 35th to 5 corners - also, it would be better to prioritize stopping at UW stadium link station first then go to campus.	3/6/2015 5:15 PM
1296	This is the most direct route for commuters to go from Pinehurst/shoreline area to UW. Removing this route will force more people to drive instead of using public transit.	3/6/2015 5:14 PM
1297	Route 68 stops too early in the evening - before the evening commute is over. Route 372 is too infrequent at night, and during the morning commute there is often a long wait followed by 2-3 buses that come almost simultaneously.	3/6/2015 5:13 PM
1298	Please add route 372X. It will be a great addition for UW Bothell Students and also a great connection with Community Transit service to the north.	3/6/2015 5:10 PM
1299	have an option to go directly down 35th rather than detour to 40th	3/6/2015 5:09 PM
1300	PLEASE reinstate all day and weekend service on the 30/74 between the UDistrict and Sand Point! I used to use this bus ALL the time.	3/6/2015 5:03 PM
1301	I love this bus as the 9 stops before continuing on to Roanoke. It is important to not change this route but to increase frequency at rush period. At the end of the day I have to get on the 49 at 4th & Pike to find a seat going Northbound. The 25 used to come to the Roanoke area but was partially discontinued and is infrequent. We live off 10th E by Roanoke and the 49 is really our only option.	3/6/2015 5:03 PM
1302	The 12 is too heavily used to be abandoned! (Particularly when you consider the proposal also includes dropping the 43, which is one of the alternatives to the 12). At least keep the 12 as a 4 peak hours in the morning, and 4 peak hours in the evening route. Otherwise, the alternatives would just get more over-crowded, and more people would drive from north Cap Hill to downtown -- which is a perfect bus commute if done well. With elimination of the 12 or requirement to transfer to get downtown, it becomes an obvious drive scenario for so many more people that really should be taking transit. Also there is a lot of growth in apartments and other density in the north Cap Hill area -- don't give us all another incentive to drive more!	3/6/2015 5:02 PM
1303	They don't run on time consistently, and OneBusAway doesn't help.	3/6/2015 4:52 PM
1304	As a frequent use of this line (71), I support Alternative 1 that removes this line. I will have to walk 5 blocks farther to get to route 65, but I really like the idea of much more frequent service and more reliability, and it is a trade-off I am willing to make. I think this trade-off will serve NE Seattle better. However, I am healthy and active, and if Alternative 1 takes effect, I worry about my elderly and disabled neighbors that depend on this route, and will not be able to walk to the bus anymore. If the 71 goes away, Metro needs to plan for these folks, and make some sort of provision to serve these people. Thanks for your attention to this.	3/6/2015 4:51 PM
1305	I would like to see my bus 311 be more frequent and on time.	3/6/2015 4:51 PM
1306	I primarily use route 372 but like having the flexibility of also having route 72 available. If 372 weekend hours were added though, I'd be less concerned about the loss of the 72.	3/6/2015 4:47 PM
1307	When I go to the University of Washington, my goal is Suzzallo Library. I fear that I will have a substantially longer walk from the light rail station to the library than I currently do from University Avenue. Perhaps then I wouldn't save any time by taking light rail.	3/6/2015 4:42 PM
1308	i am not looking forward to losing the 43. Now my stop on Capitol Hill is one block from my work. The Link station is 4 blocks away on Broadway. My next option at this time is 7 blocks away on 23rd and John. The walk between 16th and 23rd is very dark in the fall/winter and the sidewalks are uneven. I have security concerns about having to walk to 23rd. I am not looking forward to making either one of these walks in inclement weather. Also, I have a bad knee that will impact both a walk to Broadway or to 23rd.	3/6/2015 4:40 PM
1309	Connecting between these routes to West Seattle/Highland Park is very inconsistent. Travel times from Capitol Hill to Highland Park range from 50 minutes (my personal best), and 1.5 hours. This for a route that can be driven by car in 20 minutes. I plan to switch over to light rail ASAP to get off Cap Hill faster after work, but suspect I will still have horrible wait times downtown for the 131/125 routes. The 131 in particular is plagued by being continually late, as it has to also serve the north end. If it could be a stand alone route that turned around in downtown, the service would be vastly improved as far as reliability and knowing when the bus will come!	3/6/2015 4:38 PM

1310	It would be great to have the ideas for alternative 1, more frequent reliable service connecting to light rail, for the following routes: 44, 48, 16, 25, 66, 49, 242. And, Especially for route 8, which has infrequent service and is pretty much the only way to access columbia city and rainier from NE seattle - which is concerning. That should be a reliable route. Route 311 should be able to access downtown without getting clogged up or being forced to wait for a light rail transfer at university district which can get extremely backed up during high traffic times. It is very concerning that alternative 1 removes access to 148th Ave NE (remove 242) but does not add it back in as 541 stop at 148th like alternative 2 does. Why can't 541 be added to both alternatives? It is also very concerning that the same is true for route 25. Most of Montlake will become inaccessible by transit if you remove route 25, including the community center.	3/6/2015 4:37 PM
1311	I like the idea of the 207 (much better than cutting that part of the 271's route altogether, anyway), but I'd really like to see it run more frequently - even now, only about half the 271's runs serve that part of the route (on weekdays), and cutting down to one bus an hour in addition to the new transfer will make it quite a bit more complicated for people trying to get somewhere on time.	3/6/2015 4:36 PM
1312	There have been cuts to the number of routes during the day on the 255. Because of this on the morning commutes, it is standing room only. 255 needs to go back to the number of times it was before the cuts. Route 43 - many of the buses used are old and need to be replaced. Route 12 - there are bus drivers on this route that will not stop to pick up passengers when the bus is 3/4 full. I take this bus home everyday. There are numerous times when the bus is late. Consequently the buses tend to be filled up quickly. I don't understand why this is since the bus route is relatively short compared to many metro routes.	3/6/2015 4:35 PM
1313	route 8 is very unreliable. It needs more busses that arrive when they're scheduled. It's the only bus I take that regularly departs before the scheduled time, and also is regularly late. route 7 is always packed. More service is needed.	3/6/2015 4:35 PM
1314	The route 49 is the best line as it connects the U-District, Capitol Hill and down town with a frequent reliable service.	3/6/2015 4:33 PM
1315	Please have it travel all the way south on 35th like it use to and turn north on 35th at 45th.	3/6/2015 4:31 PM
1316	They are the routes that I use, and I would like more frequency on the 27.	3/6/2015 4:24 PM
1317	We need more mid-day and later trips on this line.	3/6/2015 4:23 PM
1318	Route 8: the split sounds like a great idea for reliability all-around, and the frequency improvements would be huge. Please move forward with this plan!	3/6/2015 4:20 PM
1319	Service on the 70 during peak hours is still too unreliable and erratic. Service on the 44 still takes too long to get from the U-district to Ballard, how about an East-West Rapid ride?	3/6/2015 4:16 PM
1320	I hope Route 75 connects w/new UW light rail. I guess one can get off on campus near the entrance. People needing to get to Childrens Hospital would be grateful for such a connection	3/6/2015 4:15 PM
1321	Changing the route to Fairview is a BAD idea. Traffic on Fairview is terrible, especially in the evening, and will only get worse with all the new construction. I understand the desire to better serve this area of high growth but it is better to stay on the perimeter of South Lake Union such as on the current Stewart Street route (mornings) and Olive route (evenings).	3/6/2015 4:12 PM
1322	More frequent service is a great benefit.	3/6/2015 4:12 PM
1323	The service has changed a lot in the last year. They are less reliable, constantly late and overcrowded. I find I need to take an earlier bus in order to get to work on time and also have to get to the park and ride earlier in order to get a seat on the bus.	3/6/2015 4:11 PM
1324	Frequency, how far I'd have to walk, number of transfers involved.	3/6/2015 4:11 PM
1325	I think you're blowing it with these. From neighborhoods to high schools, these changes impose hardships to current riders while adding limited to no benefits for the northern neighborhoods in NE Seattle	3/6/2015 4:07 PM
1326	These routes are essential for any CH resident (getting up to the U-District or to downtown or to SLU). Any plan for CH needs to involve improvements to those routes-- not eliminations!	3/6/2015 4:05 PM

1327	The 545 is very heavily used from Redmond to downtown, and is a fast trip, except for always getting stuck on Stewart Street (and getting stuck in heavy evening traffic getting through and out of Seattle). I would hate to have to transfer, which will add time to many of my trips, although rail may perhaps make it faster at peak times. I am concerned that it will add hassle and not save me any time. Just as with flights, I want to NOT have to transfer. Finding transfers is also hard for bus/rail riders that are not familiar with where to go--this is the hardest single part of commuting for me. It's also not possible to see ALL the stops on your route maps, so I can never tell what time a bus will be at what stop, when I am PLANNING a trip.	3/6/2015 4:03 PM
1328	This is an important route that is now standing room only in the morning and afternoon peak. The light rail service would not replace the area serviced. There are 3 school and a community center along this route on 19th Ave E alone. This route gives a better connection to the southern end of downtown in an area that does not have a tunnel station nearby. Access to the 10 is all uphill from much of this area (one-way) and it is much slower service to downtown, and would require those in the center and southern parts of downtown (including quite a number of King County, City of Seattle, and Sound Transit employees) to transfer after taking a slower ride to downtown.	3/6/2015 4:01 PM
1329	Route 77 is excellent. The only really problem is that we need 1-2 additional buses during the peak times. The new 73 in alternative 2 is quite good. Alternative 1 massively fails in routes outside of maple leaf due to the need for transfers. The lack of sidewalks on Ravenna near ne 95th ST make getting to and from route 372 very unsafe in the dark. Futhermore, walking up the stairs from Lake city near 95th is also not safe to do at night.	3/6/2015 3:59 PM
1330	Is anyone looking at what the Metro and SDOT are doing? Why are both of you trying to destroy transit service on the E Madison corridor! There is NO coordination, just threats to give us less service that I and others depend on. Have you guys No Shame?	3/6/2015 3:59 PM
1331	Keep the 31/32 on Stone Way and the 26 on Wallingford. Switching them is going to impact a lot of people.	3/6/2015 3:57 PM
1332	Bring back the 47!	3/6/2015 3:56 PM
1333	In general, customer service needs to improve by Metro. And, better management of passengers. As the buses are more crowded, it becomes very uncomfortable to be crammed in next to people, particularly the homeless who are typically dirty and smelly. Light rail has a newer, cleaner feel to the cars. But if these become sleeping cars for the homeless, other ridership will decrease. Please improve air circulation on the buses and be mindful of providing a decent clean environment for your passengers.	3/6/2015 3:55 PM
1334	These bus routes are my life line to doctors, shopping and other activities.	3/6/2015 3:54 PM
1335	I feel there is a push to force use of the light rail stations over the convenience of existing routes. I ride the Light Rail to Sea Tac about three or four times a year and believe you are not achieving the ridership you forecast. When further cuts in service were planned last year, the #60 route was an example of a route that has a high number of riders but which you essentially would have forced riders north of Albro Place to transfer to Light Rail at the Beacon Hill Station. That area of Seattle is less than 15 minutes from downtown by car, but such a plan is not convenient to your riders.	3/6/2015 3:52 PM
1336	I Would like to have more frequent service on bus route 2. It seems like bus route 13 up Queen Anne Hill is more frequent than bus # 2 which brings me closer to home.	3/6/2015 3:47 PM
1337	Frequency of these routes is what would make my neighborhood feasible for me.	3/6/2015 3:47 PM
1338	1) 26/26X - I very much like how this route is becoming express only. I use it primarily to get from Wallingford to DTS and will likely use it to go to Northgate at times. Improving express service to DTS from Wallingford and points west of I-5 is a concern of mine, even though I know it is lower priority than several other concerns. It would be amazing if it were more frequent than every 30, but I'll take the improvement if it's just express. However, I don't like so much that the 26X service ends earlier than presently. I understand that the 16 will be the new all purpose all day route for the area. 2) 16 - I first and foremost like that it's becoming 15 min frequency line. I also like that there will be frequent service to Magnuson, as I never go to Magnuson because there is no frequent transit there. However, I do wonder if a single east-west 85th-65th corridor has been considered. I think it's likely that the travel demand market from Crown Hill and Magnuson is more oriented toward the U-District and Downtown than their respective neighborhood ends. A single 85th-65th line would be so easy for transit customers to remember though and would serve to feed customers to the high frequency north-south corridors, such as the D, 5, E, U-X/Link, and 372.	3/6/2015 3:41 PM
1339	I strongly support running the 372 on weekends. It might make sense for it to be LESS of an Express on weekends and non-peak hours on Monday through Friday because it breezes past may stops. Also. I am concerned by the long hike between the current 372X route and the Husky Stadium Link station. Could it run on Mason Road instead of Stevens Way on the UW campus?	3/6/2015 3:41 PM
1340	I am greatly concerned about the changes coming to these two routes specifically. They are the two closest lines to my residence. Ultimately, I am concerned, what will happen to these, once the Roosevelt station opened.	3/6/2015 3:41 PM

1341	76 is totally packed in the morning. Needs either more frequent service, or if you provided a quicker ride to the light rail at Montlake via Sand Point Way and Montlake, you might move some of the congestion off of the bus.	3/6/2015 3:39 PM
1342	I like that these routes do a better job taking advantage of light rail connections. The improved frequency will help the routes become much more reliable and useful.	3/6/2015 3:38 PM
1343	This route provides great, reliable rush hour service to downtown. The buses get very crowded, so any increase in service is greatly appreciated. I would also like to see the morning route extended by another 15-30 minutes later. Thank you for a well thought-out survey.	3/6/2015 3:35 PM
1344	Route 372X is almost always off-schedule, if service were every 15 minutes, I wouldn't even need to look at the schedule, I could just go to the stop and know that the next 372X won't be more than 15 minutes away. Also, the times the buses run when UW is not in session (marked with D on the schedule), it would be better if the D routes weren't so close together - especially in the mornings.	3/6/2015 3:34 PM
1345	For either alternative the 372 would be the primary route on 25th Ave NE and Lake City Way NE through 125th St. That's since the 68 would either be deleted or not go on 25th Ave NE north of NE 55th St, and since the 72 would be deleted either way. So the 372 should become a local bus, not an express bus between UW and 125th Street, Also, it's frequency would need to increase to compensate for taking on more passengers. As it is, the current 68/372X supply isn't enough to carry all UW-bound passengers at peak time, passengers are left behind at NE Blakeley St fairly often.	3/6/2015 3:33 PM
1346	Need a faster connect from Rainier Beach to Renton TC.	3/6/2015 3:33 PM
1347	I would like to thank you for keeping this route (271) available during the transit cuts because traveling from the SE corridor (Kent Station) leaves two options, Sounder train with overloaded buses to the UW during a narrow commuter time frame, or connecting from the east side with ride shares and slightly less overloaded buses. I would be very pleased if consideration was taken to run some buses from the Kent Station transit center directly to light rail stops. A one hour route from Kent Station to link to light rail cuts out the utility of having it for King County's largest suburb.	3/6/2015 3:32 PM
1348	There needs to be a direct link from Northgate to Downtown Kirkland.	3/6/2015 3:32 PM
1349	Transit is my only option to get around, other than the areas close to Home in the South Delridge are of West Seattle, that I can access without too much distance from Home, for shopping and other errands, and that does not involve even a moderate incline, *especially* when carrying heavy bags with one hand, due to using a cane. Currently, I ride Route 60 on the average of once per week, to Harborview, to pick up prescriptions and/or for appointments. I am fortunate enough to currently live close enough on the West Seattle end, to be maybe about 1/4 mile, flat walk away from the 60's bus stops at Delridge and Barton, and can tolerate the walks, even with chronic respiratory issues. If it weren't for this one seat ride, I would have to go Downtown first, then transfer to a Rt or 4, to get up to Harborview. This would not only add the inherent problems that come with transferring, but would mean extra walking, including uphill. Plus, there's the issue of the 3 or 4 being popular and crowded, often running late, and many passengers appearing to be at my level of disability, or even more so. I rode the 3 & 4 regularly, throughout much of 2012, while in a Transitional Homeless Shelter in Pioneer Square. They were often crowded, standing room only, by the time they reached to 3rd & James stop, outbound. It's very difficult to stand on those Routes going up James St., with the abrupt starts inherent to the ETB's, the gravity caused roll-back at stops, and the poor timing on lights, to where it seems the buses hit red lights at every intersection. Back to the 60, I have noticed many people that are either already on the 60, or get on later nearby, or at 12th & Jackson, that ride at *least* to 15th & Roxbury, if not still onboard when I get off at Delridge & Barton. Same heading the other direction *to* Harborview. I realize that a one seat ride can be a bit of a "luxury", these days, what with budget constraints, the changing structure of transit in Seattle with the Streetcar System evolving, and other reasons. I know that it is a luxury coming clear from the southern edge of West Seattle. However, Metro and Sound Transit must keep in mind that there is a, likely growing greatly in coming years, Senior and Disabled Community, that has Transit as their only option. In many cases, even what to Able-Bodied people may seem like a simple transfer, and in their mind a short, quick walk to do so, can be a great struggle for those with Disabilities, depending on their particular issues. Easy access to Medical Facilities; Harborview, Virginia Mason, and Swedish on First Hill, as well as the VA Med Center on Beacon Hill, needs to remain for them	3/6/2015 3:30 PM
1350	Prefer quick service from Sand Point to Husky Stadium rail station.	3/6/2015 3:30 PM
1351	This is a more general comment about the survey, so I hope this will be received: I don't think the survey was very effective at explaining or showing the nature of the proposed changes. I recognize how difficult it must be to succinctly represent changes to route locations and frequencies, but I would have preferred a better explanation for the specific changes being considered. I'm worried that you will have a hard time getting feedback because the options aren't presented clearly enough.	3/6/2015 3:29 PM

1352	The 30 route's time schedule is about 10 late. I ride from NOAA HQ (as do quite a lot of employees) to the University District, where we transfer. The schedule does not coincide with routes 71X, 72X, or 73X which head to Downtown Seattle. The current schedule results in arriving in the U District just after the Seventy series buses go through. This results in a 15 to 20 minute wait, sometimes longer. If the 30 bus left 10 minutes earlier than current scheduling, passengers would have a faster, smoother transfer and commute to Downtown. Also, the 74 and 75 bus route is a REVERSE route...meaning, the scheduling for transport is backwards to the peak times. No one leaves Sand Point in the morning. It is ARRIVAL only. Thus, no one actually rides the bus. This also pertains to the Evening route..it too, is REVERSE. Thanks for the opportunity to comment.	3/6/2015 3:28 PM
1353	Overcrowded. You cut the wrong route in terms of offerings. It was short-sighted to appease a few people.	3/6/2015 3:28 PM
1354	I really don't understand this route was cut. It had so many commuters during almost every trip, meanwhile the 277 runs fairly empty most times.	3/6/2015 3:27 PM
1355	There is a large population of elderly people who live in Wedgwood who need access to other parts of the city via these buses. By reducing these routes, you are limiting access to essential services, stores, etc. and isolating them.	3/6/2015 3:27 PM
1356	The 8 is PACKED and completely unreliable, time-wise. We really need to have more frequent 8 service or a redesign that routes on a road other than Denny Way. The 43 and 48 are phenomenal and should stay as is- very useful and frequent. Why can't more buses be like these? The 70 is an atrocity after 5pm. I've waited for hours and zero buses arrive because they're all stuck downtown/in the Mercer mess. Reroute. Give us ONE option to get to the U district. There are NONE because this bus SUCKS.	3/6/2015 3:26 PM
1357	I find it dismaying that Route 72 consistently seems to be on the cutting block, especially for nighttime frequency, when 71 does not. in my experience, going north at night, 72 is still quite full passing my stop at 98th, but 71 is virtually empty once it's passed the first couple of stops on 65th (they're virtually the same route until 65th). In my experience, it's the 71 that should be considered for being cut back way before the 72. It makes me wonder why the very few passengers going to the Wedgewood area seem to have a much-greater influence than the higher number of those going toward Lake City.	3/6/2015 3:26 PM
1358	There are TOO MANY 41's IN THE DOWNTOWN BUS TUNNEL! They are rarely if ever even 2/3 full, and often there are literally 4-5 stacked up one right after the other. Meanwhile, the buses to the University District (71, 72, 73, 74) are filled way past capacity--at least 3x a week I am on a bus where the driver will try to get people to stand double-file in the bus aisle to pack more on. I fear that this incredibly dangerous practice will continue until one of the buses is in a wreck, at which point you will be looking at injuries because of how unsafely packed in the riders are. I realize the link is going to hopefully help getting people to the U District but the distribution of buses currently is irritatingly miscalculated. I think if you had someone do a survey in the bus tunnel at evening rush hour you would find that nearly everyone present has noticed this, and everyone trying to get to the U District shares this complaint. Basically, you aren't able to get on past University Street Station as the bus is entirely full.	3/6/2015 3:25 PM
1359	On route 65 would appreciate loop through campus and then around along Pacific Place to stop at UWMC and near Link Station.	3/6/2015 3:24 PM
1360	Keep the #72 or add more service. It is often packed going home at 6PM. If you cut the #72, add service on the #372 on weekends. #372 is a great bus that runs even when all other buses are not running due to snow. I can count on the #372 when it is running. Please keep the #11 direct from Madison Park to downtown.	3/6/2015 3:23 PM
1361	Greater reliability and consistency on this route would be incredibly valuable.	3/6/2015 3:18 PM
1362	As I'm sure you know, the 44 buses are almost always very packed. Sometimes the bus can't even stop for more people. I would love to take 1 bus from Wallingford to Downtown Bellevue. I usually get a ride to UW and catch 271 there. Or I drive to Northgate for Sound Transit bus. One bus is fine, but taking 2 becomes less appealing.	3/6/2015 3:17 PM
1363	I would like to see either a version of route 60 that enters downtown or less wait time at the stations nearest to downtown when transferring from the 60 to the 12 (towards downtown), and then between the 12 and the 60 when heading back to Capitol Hill.	3/6/2015 3:14 PM
1364	This is a vital route, the only one that goes to the Eastlake/South Lake Union areas directly from Northgate. The 70 is not a viable option: it is too crowded, and does not go north far enough. I think Metro should cut back the 66 to peak hours only, but don't move it to I5 - there are a lot of businesses along Eastlake that people commute to, and a lot of condos where people who go downtown live -who all use the 66.	3/6/2015 3:13 PM

1365	Any new schedules that do not include service to NOAA (not just along Sand Point but into NOAA itself) will probably cause me to reconsider my use of transit and look for alternatives. My preference would be a direct route from NOAA to the University Light Rail Station, a return of the old Route 30 from NOAA to the Seattle Center, or a connection between NOAA and the Downtown that does not involve University Way. Running the 74 both directions in the morning and afternoon would be of great appeal to me and many coworkers.	3/6/2015 3:12 PM
1366	Whichever one goes north of Green Lake should include the continuation on Meridian north of 92nd St, on around Northgate Mall to the transit center.	3/6/2015 3:12 PM
1367	right now...it is a very long time to get off capital hill in the afternoon rush hour. I do hope that the future revisions will help my afternoon commute. I do love the short direct route into capital hill from the u district. I think it would be nice to have more frequent routes but are unnecessary. It is my favorite all though I have taken others.	3/6/2015 3:11 PM
1368	I use a lot of routes but use the 8 almost everyday. The frequency and timing are important and I am certain you have plenty of feedback on how crowded the buses are and how they go past without stopping due to overcrowding.	3/6/2015 3:09 PM
1369	It would be nice if the 55 bus that is scheduled to be at 5th & Wall would actually show up 5 days a week. This bus route does not run the 4:21pm stop on a regular basis. I believe that 2 days a week it is not the regular driver. It is really annoying not to have reliable bus service since the shake up. If you want people to ride the bus they need to be reliable and not strand people for 20 minutes when a bus does not show up.	3/6/2015 3:09 PM
1370	Eliminating direct service between the SR-520 stations, Kirkland/Redmond and downtown Seattle is a disaster for Eastside transit riders The vast majority of travelers are heading downtown - especially offpeak The Montlake Bridge is often congested, not just at peak periods. Montlake Blvd is often congested, not just at peak periods. The Montlake Bridge has unscheduled bridge openings. The connections near UW Husky are not good and not fast The road infrastructure does not exist to make the majority of riders have to go this extra time and distance and the increase in unpredictability of this clumsy transfer Keep 520 service heading into Seattle 7 days/week, 20 hours/day.	3/6/2015 3:08 PM
1371	It's important to have it start on Pine St. directly up to First Hill for easy hospital access.	3/6/2015 3:08 PM
1372	The 8 route currently is unreliable. The bus is either too full or 10-15min delayed. I have been passed so many times by a full or not full bus that it has forced me to drive my car to work instead, as I know I am more reliable. Eliminating the 14/47 was a huge upset to Bellevue Ave E commuters. This was a huge lifeline for us to go downtown and not have to walk up to Broadway to catch the 49.	3/6/2015 3:05 PM
1373	Please keep this express option running on 520 with bus service every 15 mins during peak hours. It is a popular route that often is filled to capacity. As Amazon and other tech companies grow and parking disappears, we will need more bus coverage from the eastside to downtown Seattle.	3/6/2015 3:04 PM
1374	Route 22 hours of operation should be extended at the end of the day. More frequency would be nice. Route 21X should have an additional, later departure from Downtown Seattle.	3/6/2015 3:01 PM
1375	I would like direct service to the UW Link Station from Sand Point Way stops	3/6/2015 3:00 PM
1376	I'm glad, with either option, both of these routes still offer good peak service between Ravenna Blvd & the Ave (55th St & 20th Ave for 74). With the change/deletion of 71 and 72, I still have options outside of finding my way to the UDist link station.	3/6/2015 2:59 PM
1377	this is the only route for the Hillman City/Seward Park Neighborhood. If this route was cut it's a 30 minute walk through some sketchy parts of Rainier to get to Light Rail. Please don't cut this route.	3/6/2015 2:56 PM
1378	I have been riding Route 255 for nearly 20 years now and I have to leave my theater on Capitol Hill by 11:55pm in order to catch the last Outbound Bus to Kirkland on some weekend nights. On Saturdays and Sundays, the last bus actually leaves at 11:15 which means that I have to drive in myself. It would be helpful to extend bus service by 1 hour on at least Saturdays, when I have a 10:30pm show scheduled.	3/6/2015 2:54 PM
1379	I NEED THE 43 I cannot comprehend your need to cut this, as it turns into the 44 in the evenings and weekends and is the only way I can get to Fremont, Ballard, etc. in less than an hour and a half.	3/6/2015 2:54 PM
1380	The 48 does not consistently in the evening during rush hour. It is especially inconvenient on rainy days. It is nicknamed by its frequent riders the "forty-late".	3/6/2015 2:53 PM
1381	Need more frequency	3/6/2015 2:53 PM

1382	242 -- It takes WAY too long to board the metered on-ramp on to I-5 in the morning. In short, I-5 is a colossal bottleneck for this route in general. 542 -- This route essentially duplicates the 48 for a large portion of the trip. Is there any way to streamline the trip through the U District? Additionally the corner on 50th street is too sharp for the eastbound 520 and the bus will regularly go up on the curb. 16 -- Tangletown/Wallingford is a slow, traffic-ridden mess. While 45th is a major hub, it is also a traffic nightmare. 26 -- Tangletown/Wallingford again.	3/6/2015 2:52 PM
1383	I am concerned about travel on Pike/Pine between downtown and Broadway. I rely on this route to and from my home.	3/6/2015 2:51 PM
1384	I would like there to be at least ONE bus route (preferably more) that goes directly from Mountlake Terrace Transit Center to South Lake Union. Right now, the bus drops me off downtown (9th & Stewart) and then I walk to my place of employment (UW Medicine) at South Lake Union. Every evening after work, I walk from South Lake Union to 6th & Union to catch the bus home. I enjoy the one-mile walk each way, but with so many employees working in South Lake Union, it seems as though more buses should stop there.	3/6/2015 2:50 PM
1385	It is convenient. I have been commuting on this route for over 28 years.	3/6/2015 2:50 PM
1386	43 should not be eliminated in any scenario where that route is not replaced in full it would be great if the 47 came back (and or switched to a longer route that goes farther than downtown)....it used to be the 14 that went all the way to the ID Ideally it would be nice to not have to transfer for a 3 mile ride....it takes a 10 minute drive and turns it into a 2 bus 30-45 minute trip	3/6/2015 2:49 PM
1387	this route is being deleted. I can't find any good alternate routes that go from Laurelhurst/Bryant to the U district. 65 (at least currently) does go to campus parkway, but it seems like there should be at least one route that passes through the central part of the u district (i.e. 45th st). I have found myself going to the u district much less often (for example, for dinner or to a movie) since the 30 quite running all day. hiking from 45th - 50th down to campus parkway seems long at night.	3/6/2015 2:48 PM
1388	All three routes indicated above -- 31, 32, and 48 -- need to stick to their schedule better.	3/6/2015 2:47 PM
1389	This route is terrible at peak hours in SLU. If it could be made to take a different route or get dedicated lanes to get through traffic, it would be a lot more usable.	3/6/2015 2:47 PM
1390	I use them the most frequently, and would love more frequent service, especially on weekends. Park and Ride capacity in Kenmore, Lake Forest Park and Lake City, right next to highway 522 really needs to be expanded.	3/6/2015 2:46 PM
1391	I use the 48 every day, both in the morning and evening commute times. It's often standing room only and I don't see that changing with the addition of the light rail. Along 23rd from I-90 north people will continue to ride the 48 to get to UW because it will be too far out of the way to get to a light rail station. My hope is that the 48 continues to come often!	3/6/2015 2:46 PM
1392	I think it'd be nice to have a route that circles Lake Union, with stops in Queen Anne or Westlake, South Lake Union, East Lake, The U District, Wallingford and Fremont.	3/6/2015 2:46 PM
1393	The 48 and 43 routes already get very busy. With all the development pending for 23rd and Union, I hope you're preparing a plan for even higher frequency complicated by the traffic problems coming when the 23rd greenway narrows the street. I would love to see express routes for 23rd/24th corridor and extending between Mt.Baker station through to UW or even Greenwood. Ideally route 12 should continue north down Crescent Ave and onto 24th.	3/6/2015 2:45 PM
1394	Please increase the service again	3/6/2015 2:44 PM
1395	I think that the proposed changes to route 16 in Alternative 1 would have very negative consequences. The 16 is already a route that is both unique and overcrowded - making it less convenient to access would be the straw that breaks the camel's back for many commuters that have the option to use their cars.	3/6/2015 2:43 PM
1396	Improving service between UW Bothell and UW Seattle via 372 would be wonderful for faculty, staff, and students. I support dropping Woodinville from this route. The 49 bus is consistently late for reasons I don't understand, and has been for as long as I've lived here (when it was the 7). I look forward to its obsolescence via light rail.	3/6/2015 2:43 PM
1397	I'm going to passionately opposed to re-routing 28X through Fremont. Rather I would like to see an increase in service. Had this not been part of Alternative 1, I would be so for it. But the fact that you're shoving a route that doesn't even serve the Udistrict/Link into the wrong direction under the banner of "Link Connections" is just grossly misrepresented.	3/6/2015 2:43 PM
1398	Please add more routes for 197. Standing room only most days.	3/6/2015 2:43 PM

1399	These routes service the U-District and are always busy. It would be important to keep these routes running. Continued service, frequent time intervals, and larger buses would be appreciated by staff and students at the UW.	3/6/2015 2:43 PM
1400	We have had the same driver for the past 6 rotations and he is late daily. He get downtown between 8 and 15 minutes late daily. Todate we have never been able to catch the #2 bus to complete my trip to work. We are stuck downtown for 10 to 15 minutes. It seems to me a driver who is late daily should not be rewarded with the same route each time. Calls to Metro and emails go unanswered. We called one time and was told there is no supervisors for the people aswnering the phones. I find this hard to believe. I think Metro is the biggest waste of taxpayers money in the state. All they do is as for more taxpayer money and they fail to provide the services they are paid for. 60.00 car tabs Mayor Budget wants more money for Metro State Budget more money for Transit programs How much more money are we going to give metro for very little service. At some point they should be embarassed to take money form the Seattle taxpayers.	3/6/2015 2:42 PM
1401	My drive time from North Seattle to downtown Seattle is about 20 minutes. My drive and bus time to the Northgate TC to downtown Seattle about 30 minutes My bus time from closest stop in North Seattle to downtown seattle is almost 60 minutes. (64X) I can't spend that much time on the bus only route even though it is easier, the commute is simply too long. I generally leave at 7am.	3/6/2015 2:42 PM
1402	Even though light rail will go to/from U District and at some point to Des Moines, the current schedule only has light rail running three trains (every 15 minutes) at 5 am. The 197 is always full for the first trip and the driver is always late. Because it would take 45 minutes from Des Moines to UW on the light rail and 20 minutes in on 197, it would be hard to switch to light rail unless there were more frequent trains between 5 am to 6 am. 197 doesn't run during UW breaks but there are more people who take the bus that are not students. You don't realize that there are over 30,000 employees at UW and you think only students ride the bus.	3/6/2015 2:42 PM
1403	waiting time at stops can be long. I took the 345 yesterday to Northwest Hospital for a medical appointment, and just missed the 75 at Northgate by only 2 minutes. Had to wait almost 30 minutes for the next bus.	3/6/2015 2:41 PM
1404	I really like the concept of this being a frequent line that runs through Fremont (no by it) and connects to multiple neighborhood centers in Wallingford, U Dist, Green Lake, Ravenna, and Roosevelt.	3/6/2015 2:40 PM
1405	Need to increase frequency or use larger buses to allow for more passengers to be seated during commute.	3/6/2015 2:38 PM
1406	There have been rumors that this route would be disconnected and riders would have to go to Tukwila to the light rail station and catch the light rail there to the U District. This would add a lot of time to passengers' commute as traveling either on I-5 or along Pacific Highway to that station takes a long time during peak commuting times. I think a lot of people would choose to drive rather than commute via light rail from Tukwila to the U-District	3/6/2015 2:34 PM
1407	I love the frequency updates for the 67, and I don't think the added .3 miles I'll need to walk to get to it will be an impediment, as long as it integrates well with Link. The 66X changes don't affect me personally, as SLU isn't really a destination for me, and the 66 will no longer serve the Northgate TC. I guess that hurts a little.	3/6/2015 1:24 PM
1408	This is on behalf of my son and his girlfriend, who use 72 and/or 73 everyday. They will have worse service from their apartment at 20th Ave NE and Lake City way with either alternative.	3/6/2015 1:15 PM
1409	I see both the 73 and the 77 being well used and am distressed about possible cuts to the portion of the route north of Northgate, with connections to Lake City or Jackson Park neighborhood.	3/6/2015 1:14 PM
1410	I depend on the route 72 early in the morning as it is the only route at that time that gets me directly from Lake City to my South Lake Union office quickly and with one bus. The alternative suggestion of 372 and then a connector to South Lake Union adds significant time to my commute and is unacceptable.	3/6/2015 1:10 PM
1411	The 71, 72 and 73 could probably be consolidated, and could even enter I5 from Lake City Way once Roosevelt/Northgate stations are finished	3/6/2015 12:46 PM

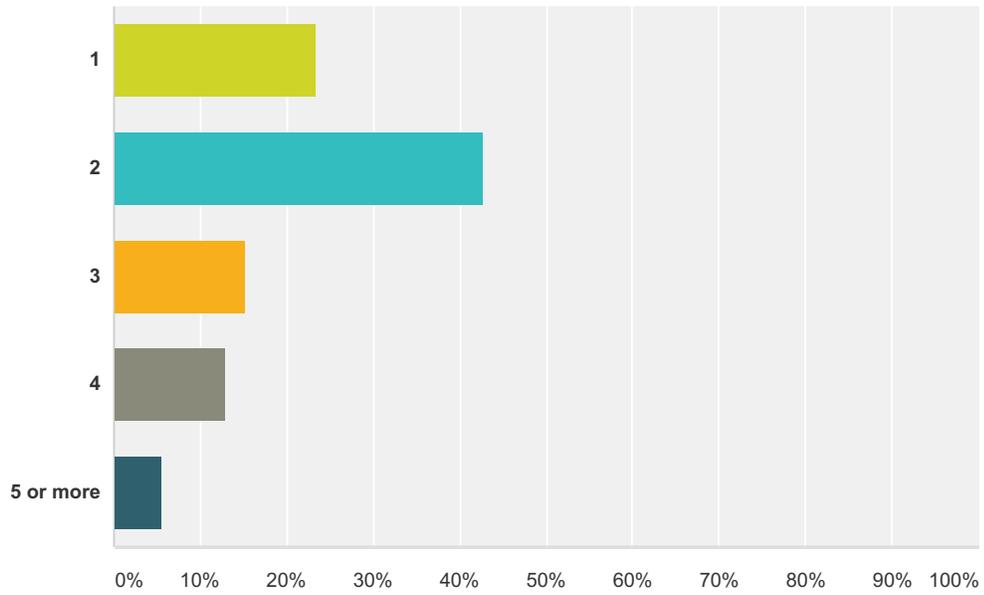

1412	<p>Regarding the #68, I see that yet again you are determined to delete this important route between Northgate and the UW Medical Center, despite getting more of our tax and car tab monies in the recent vote which allegedly 'saved' these routes. Now you have the money, I guess 'saved' was just another lie. Funneling most routes from Northgate down Roosevelt completely misses the eastern side of the UW, and access to the hospital becomes more problematic, with only 1 route, the 75 which takes twice as long, left to service that destination. The 75 is also standing room only in the evening throughout the U District and it is sometimes impossible to board it just THREE stops from where it starts the U District to Northgate journey. This would be alleviated somewhat if you used the higher capacity buses at these times. I often cannot get on at Stevens Way at 8:20pm! You have the data to verify this, but still the shorter buses are used - why? Why can you not understand that people who need to attend the hospital do not WANT, and often cannot afford the time for tedious transfers between multiple buses. As it stands with your proposed plans, there is no suitable transfer from Roosevelt to the UW Medical center - a MAJOR regional employer. This proposal also completely ignores the people who take the bus to work at the hospital and UW campus, often until late in the evening. I myself do not finish work until 8pm. I already have to then wait 20 minutes for a #75 to arrive, so I don't get home in Northgate until 9pm. That is one HOUR to travel just 4 miles on the bus. That is already pathetic. To have to do that on the way to work as well is just additional time wasted and frankly makes me want to just drive in instead. As with most low/moderate income and single earners, in order to find affordable housing, we have to continually move further and further away from the downtown core. The U District is extremely expensive, as is Capitol Hill, Downtown, Ballard, Queen Anne & First Hill. Hence people are pushed further north or south. Now your propositions, particularly to the north where light rail has yet to reach, are being screwed out of efficient, regular bus service - the only way of getting to and from the workplace. Stopping and starting most services at the Northgate Transit Center (just like you did with the 66 & 67 a few years back, and are still determined to do with the 16), removes local bus service options for anyone living on, or north of, NE Northgate Way. Do you REALLY consider it appropriate for senior citizens to have to walk (a distance that takes me 15 minutes, and I'm fit!), just to reach the Northgate Transit Center to catch a bus to see their doctor? This would not be quite so bad, ONCE light rail arrives in Northgate in 2021, but no cuts to services should be considered for this area until then at least. Why you can't just fuse the 67 & 68 routes to form a loop between Northgate and the UW is something that has baffled me for years. It's such an obvious thing to do, and that way you would maintain the important street links along NE Northgate Way, Roosevelt between NE Northgate Way and 75th, 75th to 25th, and the rest of the loop along Stevens Way, through 11th up to 5th and back to the Northgate transit Center.</p>	3/6/2015 12:34 PM
1413	<p>As I have mentioned throughout, the 12 and 43 are valuable. Trading frequent, reliable routes for more frequent unreliable routes is not a good trade.</p>	3/6/2015 12:24 PM
1414	<p>Route 44 should be looked at for its delays in the U District and through Wallingford. I avoid this route because of how delayed it can be sometimes. Maybe if there was a way for the buses to control the lights so it never has to stop at a red light? I know bus lanes might be impossible because there is limited space but anything that might speed up the bus would help!</p>	3/6/2015 12:03 PM
1415	<p>The new route 8 in proposal 1 would be absolutely fantastic! It would really make my transit life awesome, and I can't say enough positive things about it. The current 11 has really poor headways. If it ends up staying, and the curmudgeons win out in defeating proposal 1 (I'm sure they'll be out in force) I hope it gets an upgrade. Frequency is supposed to improve with the upcoming funding increase, but I would target even better weekend and evening service.</p>	3/6/2015 12:02 PM
1416	<p>Reliability on the 8 is horrific; it needs to get off of Denny. Delete the 43. What are ridership projections for a revised 49? It requires artics 24/7 right now, but being on Madison would preclude the use of artics. Re-route the 271 via 112th onto the SR 520 HOV ramps at 108th and use the SR 520 freeway stations. Don't deviate the 271 into Bellevue College - stay on 148th. The all-day SR 520 route should not do the Overlake TC deviation. The peak-only (or extended peak) route should do the deviation. This applies to the 542/545.</p>	3/6/2015 10:49 AM
1417	<p>Losing all access between Meridian/Northgate Way and Wallingford/Green Lake is unfortunate. Could some other route cover this slack with low (30 minute) frequency? There is no need for this to go downtown. Bringing the 26 up to Northgate Way also seems like a viable fix... I am hearing a lot of people from Pinehurst expressing concern in losing the 71 completely. Would it be possible to keep service just as far as the new UW station?</p>	3/6/2015 10:40 AM
1418	<p>Please use the new routing without the RT 256 option. Invest those service hours in better service through Kirkland where less time will not be wasted in the downtown CBD.</p>	3/6/2015 10:17 AM
1419	<p>electrify the 48! thank you for preserving the connection between the CD and capitol hill with the 8 restructure (ala rt 38).</p>	3/6/2015 10:16 AM
1420	<p>This is a very popular route for students going from UW to Capitol Hill. If you take out this route, you must provide an alternative with stops in the Northeast Capitol Hill area.</p>	3/6/2015 9:38 AM

1421	I look forward to the increases in frequencies and connectivity of the 372--it was a workhorse before, now it will be invaluable. The 68 seemed largely redundant--good riddance. I was initially concerned about the loss of the 72, but with the link/372X combo, and east/west service through the 16 I really like alternative 1. The 48 passes through this area, but fills in a lot of underserved spots. I'd love to see the 48 have later hours and hope it is well supported.	3/6/2015 9:34 AM
1422	Please see my comments a few questions prior about the proposed change of the 31 and 32 routes from Stone Way to Wallingford Avenue.	3/6/2015 9:28 AM
1423	Please keep these routes on 15th Ave! If this is not possible, please keep at least the one with all day service there! I would love it if the 373X could be made all-day service and stay on 15th Ave. If that can happen, then go ahead and make changes to the 73. If it can't happen, then please don't change the 73!	3/6/2015 9:20 AM
1424	You should keep the 73 all-day instead of reducing it to peak-time only until the Link station opens in Northgate. That's the only sane thing. If you still believe reducing the 73 to peak-time only BEFORE the Northgate Link station opens is a good idea, please elaborate.	3/6/2015 9:17 AM
1425	Metro needs to realize that the segment of Stone Way (from 35th to 40th St. in Wallingford) that LOSES 31/32 service here is among the fastest growing, developing sections of north Seattle. There are multiple dense apartment buildings going up, and many just opened, and the bus stop that I use most frequently -- Stone Way and 40th -- is busy all day and all night, with people going to/from the university and connecting. If you combine the 26 with the 31/32, as suggested in Alternative 1, you are running service through a lightly-populated corridor (Wallingford Ave) with a transfer station and NO development potential INSTAD of a densely populated corridor (Stone Way) with excellent development already in the works. Please reconsider Alternative 1 to keep the 31/32 on Stone Way.	3/6/2015 9:10 AM
1426	The 43 is a work horse route. With light rail coming on board a large portion of people living around 19th and Miller neighborhood will have to make some serious changes if option 1 is chosen. Walk to the 48. Or walk down to the light rail station. Walking to the light rail station would mean an additional walk to my office of 10-15 minutes up hill. Walking to the 48 runs the risk of being delayed because it is such a long route. An issue in Greenwood can affect the 48 going northbound and you would never know. Long routes have higher risk for longer delays. Currently, the 48 and the 43 also pick up people along 23rd/24th who are going to the UW. So it cuts even more on wait times. If there was only a 48 route, I would hope that the number of buses is increased to match or exceed current wait times.	3/6/2015 9:09 AM
1427	The loss if the 73 to Pinehurst is devastating. I actively supported Prop 1 to preserve this service. I rely on it for both of my kids to get home from school. Others in my neighborhood rely on it as their main transportation. Please do not cut this important service.	3/6/2015 9:07 AM
1428	I absolutely LOVE this reroute. I'm a frequent user of Madison Beach in the summer, Capitol Hill nightlife and the implied trips back to my residence and having previously lived in Belltown and now living in Lower Queen Anne/Uptown, I think this is a great example of a needed, frequent service crosstown reroute.	3/6/2015 8:53 AM
1429	372X: I don't the cropping before the Woodinville and the North Creek business park	3/6/2015 8:44 AM
1430	Alternative 1 would get rid of both the 11 and the 12, and leave no service at 17th and Madison. That seems a really bad plan, given the number of elderly, disabled, and burdened with shopping travelers at these stops, and the fact that Seattle is HILLY.	3/6/2015 8:43 AM
1431	reduce number of stops from madison park accross I5. It would be great if the bus extended more through downtown seattle instead of stopping at 4th ave. Maybe turn south on 2nd or 4th and go to university or marison street? the bus is always full and everybody gets off at 4th and has to walk 5-7 blocks to get to the business area.	3/6/2015 8:41 AM
1432	Against elimination of 277. This route provides efficient service from the U-District to points north of Kirkland Transit Center. Elimination means added connections and significant increase in commute time. Against reduction of frequency on 255 in peak time; against changing of 255 routing away from downtown Seattle. This is a heavily used route with most riders wanting to go to downtown. The new 256 is insufficient.	3/6/2015 8:01 AM
1433	74: Sand Point has employment centers. The 74 would ideally become 2-way, but serve UW Station directly. 44, 45: Push to get them 10-minute all-day headway. If not in Alt 1, make that a priority ask for Prop 1 funding, rather than back-filling service on the emptiest routes. 540/542: Their underperformance explains why all the off-peak SR 520 service should go to UW Station. Without all the service going there, there would end up being minimal off-peak connectivity between UW and the eastside. 372: Please serve UW Station. If it stays on Stevens Way, that can't seriously be called a transfer. 10-minute headway, matching Link, would be much more stable (for headway), possibly using service hours from getting rid of the mid-day 522.	3/6/2015 12:29 AM

1434	Neither alternative adequately replaces the 30. I used to be able to make evening and weekend trips around town without driving, but without 30, this has become prohibitively time-consuming. Expanded 372x helps, but not for connection to the 44.	3/5/2015 8:42 PM
1435	It doesn't make sense to have redundant peak-hour service from the U to Sandpoint on both routes and no non-peak service during other times.	3/5/2015 5:45 PM

Q56 Did these resources help you understand the change concepts being considered and how these changes would affect you?

Answered: 3,337 Skipped: 3,222

Answer Choices	Responses
Yes	80.85% 2,698
No	7.07% 236
I don't know	12.08% 403
Total	3,337

#	Why?	Date
1	The information was all present, but it was not presented in an easy to access manner. I know there was information I skipped in lieu of information I felt more pertinent to me specifically because access was tedious. JUST LIKE THE BUS! Zing!	4/2/2015 3:08 AM
2	there are a lot of changes and it's difficult to figure out what exactly is happening on each route	4/1/2015 1:50 PM
3	Wondering how the 43/44 route will be affected	4/1/2015 1:05 PM
4	The maps and explanations helped me see how fast everything would be and whether the routes I use would still be there.	4/1/2015 10:45 AM
5	Yes, but I think the travel time maps are misleading since they do not reflect the change for someone who loses service or has a greater travel time to reach a stop to access the transit service. It only shows the benefit if you live right at the stop.	3/31/2015 11:05 PM
6	Still pretty confused	3/31/2015 7:45 PM
7	South Seattle/Rainier Beach is not discussed.	3/31/2015 6:48 PM
8	This is pretty confusing and it is hard to evaluate the changes.	3/31/2015 6:37 PM
9	Because the information was from neighbors without an agenda (like metro) concerned for the wellbeing of my neighborhood	3/31/2015 4:58 PM
10	Too much to read through	3/31/2015 4:56 PM

11	?	3/31/2015 4:38 PM
12	Clear, voluminous, lots of explanation; lots of resources in lots of places.	3/31/2015 2:48 PM
13	I could see how my bus routes were going to be changed (and deleted) which made me take this survey and share this survey with others.	3/31/2015 2:03 PM
14	Somewhat. Could have been more clear about differences between 1 and 2	3/31/2015 12:14 PM
15	The information is vague.	3/31/2015 12:13 PM
16	Somewhat. Not greatly.	3/31/2015 11:56 AM
17	The breakdown of alternatives and the clarification of which routes were in question was helpful.	3/31/2015 11:45 AM
18	The maps were confusing. Don't get a solid understanding of the changes and potential improvements for each plan.	3/31/2015 11:42 AM
19	Still kind of hard to picture	3/31/2015 11:41 AM
20	Website was confusing and had a very poor user experience. Please hire some UX professionals. The worst part is the survey did not work on my phone.	3/31/2015 11:36 AM
21	It would be great to have a map with before and after comparisons, possibly even an overlay.	3/31/2015 11:07 AM
22	Metro bus maps are only really understood by metro. As a user you know your line(s).	3/31/2015 10:54 AM
23	The comparisons were well done, and the tool to choose your bus route and read about specific changes to that route was great.	3/31/2015 10:28 AM
24	I still need to study these changes.	3/31/2015 9:45 AM
25	difficult to find maps for visuals	3/31/2015 9:35 AM
26	I need to use direct service of the 43 to the U and downtown and am afraid this will change and cause more travel time	3/31/2015 8:54 AM
27	The links didn't work for maps. Too many words.	3/31/2015 4:31 AM
28	Honestly there is a lot going on. It's tough to groc how the whole network would work together.	3/31/2015 2:07 AM
29	I have questions about points that weren't covered in the information; so, I am not clear on the changes.	3/30/2015 10:23 PM
30	This is a difficult survey to complete since I couldn't refer to the alternatives when I was asked to give feedback on them. when I went back to read the alternatives I then had to start the survey all over again.	3/30/2015 8:55 PM
31	Yes and No. For people like me, who know my neighborhood and surrounding area extremely well, I could navigate the survey, mostly. I just wish the survey would have repeated Alternatives 1 and 2 with every question. Finally, although I care a lot about this issue, I do not have time to dig deep in the various website. I would have appreciated more detailed information in this survey.	3/30/2015 6:51 PM
32	It was clear once a good amount of research was done. It's still a bit muddy how these changes will affect those in NW Seattle. I feel too much of the metro site information is geared toward NE Seattle.	3/30/2015 5:40 PM
33	You only gave vague outlines on your site--nothing specific to each neighborhood.	3/30/2015 5:38 PM
34	I feel there has been little to no outreach from Metro itself re: these changes. The only way I learned that changes were coming was via the neighborhood blog/group I am a member of. What I learned about these changes made me very frustrated and highly opposed to the changes.	3/30/2015 3:52 PM
35	Not enough time to consider the changes to all routes & areas in time given. The email was sent out MARCH 6TH. And, then the neighborhood meetings began shortly after. A minimum of 3 months to have the time to review the website and all changes to routes & service areas should have been given. It was difficult for me to have time to review before taking this survey. And, I was ill for a week and was not able to attend the U-District meeting. It appears to me the short time frame of the notice to take the survey and the meetings was intentional to reduce participation.	3/30/2015 3:06 PM
36	The two choices are false choices. The initial information was lacking context about the City's investment in transportation. It appeared that the choices were merely splitting the existing resources. In reality there are new resources on the table (albeit temporary). There are other alignments that would serve the neighborhoods, eliminate duplicative service to downtown and enhance connections to Link- but they were not presented.	3/30/2015 2:56 PM

37	The whole survey is difficult. It requires having an understanding of all the implications of the changes to the bus lines, then one has to decide how it will effect them individually. It's a complex issue and affects different people in different ways.	3/30/2015 2:49 PM
38	Not enough info about the specific changes, not clear where to find the info before participating in the survey which requires prior knowledge	3/30/2015 12:44 PM
39	it was hard to tell exactly what the impact of the changes would be from the reading materials on kingcounty.gov.	3/30/2015 10:15 AM
40	The Metro website was overwhelming to review. I wish I had attended an in-person presentation (or watched a recording of one) to be better able to answer survey questions.	3/30/2015 10:05 AM
41	Laid out the plan changes for certain areas. But they don't directly affect my daily commute, only what would be extra.	3/30/2015 8:48 AM
42	I want to know exactly what is going to happen to each route to see if I will need to change my commuting options	3/30/2015 8:30 AM
43	Somewhat, still a little confusing most likely due to the fact that I do not use buses frequently	3/30/2015 2:04 AM
44	I didn't know the specifics of the changes proposed and now I do.	3/29/2015 10:13 PM
45	Information is essential; it's nice to think that riders have some voice in the process.	3/29/2015 8:22 PM
46	Maps and schedules showed routes (or lack of routes) and frequencies of service between locations I go to most frequently.	3/29/2015 6:01 PM
47	Comparing the service maps was very helpful	3/29/2015 5:19 PM
48	My neighborhood is not directly effected. So not sure how I feel about it as a user. But, I'm pleased to see progress nonetheless and look forward to seeing it in use.	3/29/2015 3:03 PM
49	The meetings seem to be a formality, as most decisions are already made.	3/29/2015 1:08 AM
50	Yes, the resources provided on the Metro website were exceptional and thorough. By reviewing all 5 options (differences, similarities, maps, routes, interactive), I felt confident in my understanding of the changes and impact of the two alternatives on my transit commute.	3/28/2015 1:18 PM
51	The map with the slider, plus the written explanation of why the changes were being made helped the most.	3/28/2015 12:18 PM
52	I don't have the time to examine and weigh the impacts of choosing either geographical coverage or trunk route adequacy. Obviously, both would be preferable.	3/28/2015 10:55 AM
53	Talking to Sound Transit and Metro staff at the meeting was very helpful. Thanks for doing that. I found the Metro website rather overwhelming.	3/28/2015 7:32 AM
54	THis is a complex change - could have used more information	3/28/2015 1:41 AM
55	I don't travel much beyond the U- district from Ballard, with the occasional diversion to downtown. i will welcome the U-district Link station.	3/27/2015 8:59 PM
56	A LITTLE TOO CONFUSING FOR MANY PEOPLE, INCLUDING ME	3/27/2015 6:47 PM
57	still don't understand them, and the changes keep changing	3/27/2015 6:45 PM
58	Easy to understand and concise	3/27/2015 4:43 PM
59	Kept crashing!!!	3/27/2015 3:57 PM
60	Luckily I'm a planner. I could figure it out more or less. I believe the average person would have great difficulty understanding this.	3/27/2015 2:48 PM
61	not very detailed	3/27/2015 2:09 PM
62	The most helpful information I found on the impact of these considerations was through this survey.	3/27/2015 2:04 PM
63	Too long and confusing.	3/27/2015 1:56 PM
64	They sort of helped. The only thing that I could make sense of were the sheets that showed what would happen to each individual route by number.	3/27/2015 1:47 PM
65	Maps and information about schedule were helpful.	3/27/2015 12:51 PM

66	Uses a lot of vague or complex materials to convey points. Needs to be simplified and specific. For example "We mean that ___ bus routes are going to change by doing ___ because ___." Or, "here are the differences in the maps at these times." "These are the areas most changed" "What this means for ridership prices" "If you live ___, this is how much it'll change your commute to ___"	3/27/2015 12:19 PM
67	It was unclear about the 60 route.	3/27/2015 12:05 PM
68	Seattle Transit Blog did a very thorough report which detailed all changes which applied to me. It was very helpful.	3/27/2015 11:28 AM
69	Not clear enough about the differences between alternatives--on each survey page, say what each alternative is.	3/27/2015 11:09 AM
70	the best laid plans... by the way - your new busses don't seem to accommodate the "larger" populations - aren't people getting bigger? And they already don't stay in one seat...	3/27/2015 10:21 AM
71	No much detail can be provided by the survey itself. but I think I got the gist of how my service would be affected.	3/27/2015 10:20 AM
72	Difficult to see the big picture.	3/27/2015 9:36 AM
73	They weren't as clear as they could be but they outlined the high points.	3/27/2015 9:30 AM
74	Gave me a clearer understanding of what was being proposed.	3/27/2015 8:56 AM
75	Provided solid background on both alternatives for North Seattle	3/27/2015 8:18 AM
76	Information was complex but relatively well compiled and explained. Suggest showing regular and express routes together like on bus schedules.	3/26/2015 10:28 PM
77	Sort of. The only thing was that because some routes were entirely new, the map got a little squirrely when trying to figure out if a particular new route might work for me, because I didn't already have knowledge of the route, i.e. does it end up downtown? Hard to tell with the maps because of the converging lines...	3/26/2015 8:41 PM
78	Need to share more - add ASL VLOG	3/26/2015 8:36 PM
79	they only discuss north seattle	3/26/2015 6:59 PM
80	because it is so complicated and theoretical	3/26/2015 5:32 PM
81	Maps were useful as were the transit time change "clocks"	3/26/2015 4:52 PM
82	only the survey	3/26/2015 4:49 PM
83	It's very complex. The actual individual narrative options in the survey helped to define the alternatives.	3/26/2015 4:23 PM
84	The information was laid out in such a way that I could both understand the proposed changes, the differences between plans, and how either might impact those I care about and myself.	3/26/2015 4:19 PM
85	The written descriptions along with the maps helped to convey the message about the two alternatives.	3/26/2015 3:24 PM
86	Not clear on the route and timing changes	3/26/2015 12:53 PM
87	I was able to see the general summary of each alternative giving me an idea of the proposed changes and specific goals. I was able to view the changes to specific bus routes in addition to the estimated travel times and network maps. It helped me have a more in depth understanding of what was going on and the potential changes/how they would affect me.	3/26/2015 12:26 PM
88	Hard to understand what that means vs current state.	3/26/2015 8:39 AM
89	Prior to our vote to increase the Metro budget I saw a plan to shorten the 71 route, which did not affect my needs. With increased funding I assumed our bus service would improve and meanwhile Metro's plans kept changing so I did not keep up with proposed route changes. The survey made me realize that our bus service could be terminated, not improved.	3/26/2015 8:16 AM
90	I still had to link to other sources - not a complete transportation picture at any one site.	3/26/2015 8:13 AM
91	Somewhat, when only considering the route I use when travelling to the U District. I'm not sure if the local route I use to connect to that peak route will be affected though.	3/26/2015 1:45 AM
92	????? Stupid question!	3/25/2015 9:58 PM
93	I looked at the proposed bus changes last year, but they kept changing before and after the referendum, so I never knew what would actually happen.	3/25/2015 9:19 PM

94	The information was a bit confusing, it took looking at all of the concepts for about 20 min before I could determine the overall impact for myself. I thought the most useful portion was the specific route PDFs, however more detailed maps would be useful for determining street changes. The interactive map was less useful, if every route could be highlighted individually, then this would be more useful.	3/25/2015 6:10 PM
95	Somewhat. I think attending one of the meetings would be better. The maps were less than clear.	3/25/2015 4:18 PM
96	One would greatly increase my use of public transportation. The other, not at all.	3/25/2015 4:16 PM
97	Still not completely clear to me.	3/25/2015 2:28 PM
98	Maps and proposed frequency/schedule information were quite helpful.	3/25/2015 11:36 AM
99	It is hard to quickly understand the changes to a fairly complex system, but it still helped to look at maps, specific routes, etc. online.	3/25/2015 10:52 AM
100	Lack of information outside of Seattle city limits.	3/25/2015 9:18 AM
101	only somewhat.	3/25/2015 8:50 AM
102	What would be useful would be projecting, accurately, for bus riders how long their new trip will be after you ignore everyone's feedback and proceed with your desired Alternative 1.	3/25/2015 6:47 AM
103	Meetings helped me understand how other would be affected and helped me think more deeply about the implications of the alternaives.	3/24/2015 11:51 PM
104	Some of the information on the site was confusing (wtf does 22/22 trips mean on the specific route info pages), and only the interactive map was clear enough to actually understand route map changes (and it had too much stuff on it at once)	3/24/2015 8:33 PM
105	Don't have a really clear idea of how Alt 1 and Alt 2 would affect each route.	3/24/2015 7:29 PM
106	I am moving from Redmond into Seattle soon and knowing about the proposed changes informs my decision of where to live to best leverage transit.	3/24/2015 6:12 PM
107	They helped me understand more about how others would be affected and to some degree how I would be. They helped me think about other alternatives better. Especially the meetings helped me think more deeply due to the concerns of others.	3/24/2015 6:00 PM
108	The links included in the email I got were fine	3/24/2015 5:04 PM
109	Maps and details of individual routes are clear and easy to read.	3/24/2015 4:32 PM
110	They helped somewhat by addressing what would change, especially the information for each route, but there was so much information to cross reference that I'm still not sure I understand the impact of all the changes (for instance, when a route is being cut but another route will serve part of that route).	3/24/2015 4:28 PM
111	I'm going to the Bellevue meeting tomorrow night.	3/24/2015 3:25 PM
112	The KCM website and Seattle Transit Blog had slightly different focuses for explaining the potential changes, so the combination of information helped. Also, people's comments on blogs and reddit.com/r/seattle helped fill in the gaps and improve my understanding of the real issues in various areas or for various routes.	3/24/2015 1:35 PM
113	a little complex and confusing	3/24/2015 10:41 AM
114	Will investigate more into the cost for a passenger between single mode bus transit, and two mode bus/light rail transit.	3/24/2015 10:03 AM
115	Since it is not clear at all from the postings on the bus and email that the new rail is going to affect people on the Eastside, namely Totem Lake and Woodinville I think a lot of people are going to be shocked that their bus might disappear. All advisements are titled Capital Hill and UW Light Rail most people would not think to check and see if their bus was on the chopping block if they live on the North end of the eastside.	3/24/2015 7:54 AM
116	somewhat	3/24/2015 7:05 AM
117	There were no specifics.	3/23/2015 9:54 PM
118	For the obvious reason that it wasn't designed to do so. I'm busy, so filling out the survey was all I had time for.	3/23/2015 2:53 PM
119	I think I understood them, but might not agree with them.	3/23/2015 1:15 PM
120	The alternatives can be confusing on the website.	3/23/2015 11:05 AM

121	I liked the overview of changes and the links to more details on specific routes. There is a lot of information so I got the overall gist then honed in on how it would affect me.	3/23/2015 10:57 AM
122	the route maps were a bit unclear, and the alternatives did not explain the differences clearly	3/23/2015 10:50 AM
123	I was able to compare both alternatives	3/23/2015 6:28 AM
124	Many details were unclear to me even after studying the multilayered maps. But they helped. The change-in-travel-time circles were useful even though details like the destination target exact location were not given. Ideally a plan-a-bus-trip function in the future alternative systems could give more details (I could guess that would not be cost effective). Marking the maps route lines with dashed lines for inaccessible express buses would make some details clear.	3/22/2015 11:18 PM
125	It's a lot of information, almost overwhelming.	3/22/2015 10:09 PM
126	Maps were really helpful.	3/22/2015 7:04 PM
127	Although (and I don't have any suggestions to get around this), there was a high density of information on the maps to understand.	3/22/2015 6:16 PM
128	Some practical descriptions of how these changes would affect specific routes (and route stops) would be helpful. Descriptions seemed to be more generic than specific.	3/22/2015 2:41 PM
129	But you should add more explanation about which routes will be cut or moved. It was a little challenging from just trying to figure it out from comparing routes on a map.	3/22/2015 1:34 PM
130	It had a map of the current bus routes, the new bus routes, and outlined the goals of each alternative.	3/22/2015 11:38 AM
131	Hard to get a full picture of what could happen when we have to click on each proposed bus change individually	3/21/2015 11:41 PM
132	Somewhat	3/21/2015 2:59 PM
133	Maps were very clear.	3/21/2015 12:39 PM
134	The interactive map with both alternatives selectable was very helpful.	3/21/2015 12:21 AM
135	Seattle Transit Blog and The Urbanist ran very thorough, detailed and clear stories about the concepts for each neighborhood affected. Attending an open house at Seattle University deepened my understanding of the proposals.	3/20/2015 8:26 PM
136	A list of all changes proposed in each Alternative would be helpful.	3/20/2015 3:11 PM
137	I didn't see anything referencing Queen Anne	3/20/2015 3:09 PM
138	the concepts seem complicated	3/20/2015 2:15 PM
139	Help me how? You're creating more stress on me as a commuter	3/20/2015 1:42 PM
140	Seattle Transit Blog explained it well.	3/20/2015 1:31 PM
141	Still no real mention of what is being proposed for Eastlake to downtown buses.	3/20/2015 1:30 PM
142	I don't know how fares will be paid	3/20/2015 12:28 PM
143	Good write-ups at the Seattle Transit BLog	3/20/2015 11:53 AM
144	Did not study it as much as I would need to to really get it. Feel comfortable with my answers though. Frequency is the biggest frustration I have with the busses. I would use them more if they were more reliable and frequent. I really hate driving around.	3/20/2015 10:54 AM
145	I understood, however the concepts and the website is not really ideal for those who are less educated. It was a bit complicated to gather the information I really needed.	3/20/2015 10:43 AM
146	There should be more detail on the changes alternative 1 proposes.	3/20/2015 9:56 AM
147	Vague explanations of changes being made, I understand this was used to simplify things but it's hard to give feedback sometimes when you don't know what's going on. Instead, people give opinions on what they think is going to happen (often assuming the worst)	3/20/2015 9:23 AM
148	Clearly laid out the proposed changes and alternative choices. Promo material got my attention on the bus during commute, and was talked about by transit riders during our trips to work and home.	3/20/2015 9:00 AM

149	There is a lot of information and the staff presenters were able to point out some new, frequent connections that would help me.	3/20/2015 8:32 AM
150	Very clear explanations for the 2 alternatives	3/19/2015 10:22 PM
151	More visual illustrations please.	3/19/2015 10:09 PM
152	I am very disappointed with the signage used to announce this potential change. everything I read said something to the effect of "see how the changes affect capitol hill and the UW". There was nothing obvious that talked about the eastside buses being discontinued and/or rerouted. After hearing from a stranger that there were changes I had to dig into the website to see that the person was actually right. there should have been (should be) more clear notification about such a large change to a route.	3/19/2015 10:04 PM
153	Resources were very clear in describing the changes (especially the maps). It was very appreciated!	3/19/2015 9:38 PM
154	I looked at the maps! -- I read the maps!	3/19/2015 8:35 PM
155	Somewhat. I'm afraid I expected the plan to be more clearly laid out *within* the survey, so I may not be providing the most well-informed opinions here.	3/19/2015 8:29 PM
156	It was useful to see the maps with both alternatives for each route. It would have been useful if there were lists of routes divided by pairs of common travel points, though, since the survey was asking specific questions about different pairs of points.	3/19/2015 7:34 PM
157	I did no particular research into the topics before giving feedback, counting on the questions themselves to explain the proposed changes.	3/19/2015 7:07 PM
158	The rider alert message on the 252 was very misleading until other passengers let other riders realize that the message involved more than just the link at Capitol Hill and the UW. No mention was made on the poster that Eastside Kirkland/Redmond/Woodinville riders would lose their bus in trade for a multiple transfer longer ride. Thus after entering the website was it made clear as to what the alternatives were.	3/19/2015 7:00 PM
159	A little bit...I was asked to go to the survey but I obviously did not have all the info I needed to answer all the questions.	3/19/2015 3:59 PM
160	Confusing maps. Would be better to have a close-up view of the major areas, like downtown and U-District.	3/19/2015 3:13 PM
161	It is unclear what street the link stop will be on near campus; alternative 1 and 2 did not show a map of where these options are located	3/19/2015 2:29 PM
162	STB went into very good detail about the proposed alternatives.	3/19/2015 2:24 PM
163	Good analysis, knowledgeable writers & commenters, robust discussion	3/19/2015 1:47 PM
164	Partially	3/19/2015 1:14 PM
165	They provided a clear explanation and maps.	3/19/2015 12:02 PM
166	Alerted me.,	3/19/2015 10:51 AM
167	Existing bus routes v proposed	3/19/2015 10:22 AM
168	The maps were a great resource for understanding the changes	3/19/2015 10:06 AM
169	Truthfully, this was sent to me at my workplace and I just had the time to scan the two alternatives. Although I am truly interested and wish I had the time to pay full attention and share my viewpoint on the areas with you, I honestly don't have the time. I have the time on the bus, if you present it to me there!	3/19/2015 9:17 AM
170	None of these changes affect me as you don't have good public transportation options where I live in West Seattle.	3/19/2015 9:14 AM
171	Somewhat	3/19/2015 5:17 AM
172	It did not include Seattle area to the south to Tukwila and Renton. I suggest an express route from the Renton TC and South Renton P&R to the Tukwila International Light Rail Station. The Rapid Ride F line takes too long with all the stops.	3/19/2015 4:26 AM
173	The maps were difficult to decipher what routes were going where.	3/18/2015 10:24 PM
174	there is nothing specific about proposed changes to the specific routes. so it's hard to know the impact.	3/18/2015 9:28 PM
175	Only somewhat.	3/18/2015 8:56 PM

176	N/A	3/18/2015 8:13 PM
177	But challenging to sort through website	3/18/2015 6:46 PM
178	Helpful maps	3/18/2015 5:06 PM
179	good maps and explanations.	3/18/2015 4:15 PM
180	Need to be spelled out verbally. No one has the visual analytical ability to look at two maps and digest the meaning of all the differences. Also too many by far links to look at separately to analyze the differences. Not digestible by a human mind.	3/18/2015 3:44 PM
181	Not really. It didn't specifically state how the change would affect my commute to the University District.	3/18/2015 3:41 PM
182	Confusing! I only paid attention to the routes I use (49, 43, 70). I don't feel qualified to give an opinion on routes I don't use as I'm not affected by changes to them.	3/18/2015 3:32 PM
183	None of the options would serve my household.	3/18/2015 3:20 PM
184	Maps were a little confusing	3/18/2015 3:10 PM
185	Fix the existing bus service before light rail even arrives, please	3/18/2015 2:41 PM
186	Since there's no actual schedule in place, it's hard to know how this will affect me.	3/18/2015 2:30 PM
187	Yes, especially once I looked at each of the individual bus routes I normally take.	3/18/2015 2:27 PM
188	Differences between Alternatives 1 and 2 not spelled out as clearly as they might be. Side by side comparisons of travel times for particular origin/destination routes would be helpful	3/18/2015 2:20 PM
189	The resources provided information on how my bus route would change and the potential effects of changes throughout the system.	3/18/2015 2:06 PM
190	They were somewhat helpful. The webpage is hard to navigate and complex to understand the new changes.	3/18/2015 2:01 PM
191	The reality of it may differ from the concept even if I think I understand the concept. I don't like change and I know it is inevitable.	3/18/2015 1:43 PM
192	It helped, but it was also very confusing. I couldn't tell from the maps exactly where the new routes were going to intersect, when changes were being made. The replacement routes weren't noted along with the changed routes.	3/18/2015 1:42 PM
193	it is not easily and on time accessible.	3/18/2015 1:41 PM
194	I appreciated the pages for individual routes. These helped me understand how the bus routes I use frequently would be affected. I had more trouble understanding the overall differences in transit strategies between the two plans. Alternative 1 seemed fairly well explained, but Alternative 2 was somewhat confusing.	3/18/2015 1:30 PM
195	don't make 545 have less service at any point	3/18/2015 1:29 PM
196	Yes, but the interactive maps were a little tricky to use and understand when trying to compare the two routes. Also the frequency and connection implications were not intuitive to understand using the maps.	3/18/2015 1:26 PM
197	Some of the differences between Alt 1 & 2 are confusing. It seems to me in Bothell that either option will affect me the same way. It does concern me that the 522 seems to be conspicuously absent from these materials.	3/18/2015 1:26 PM
198	No mention of my route at all, yet I spend 3 hours a day commuting into the U District.	3/18/2015 1:20 PM
199	the information on King County Metro's website is too complicated to understand. Not sure what is being changed or how it will effect me. Thanks for wasting my time.	3/18/2015 1:20 PM
200	None of the changes help me understand how I can connect with the upcoming LINK from SW Seattle.	3/18/2015 12:42 PM
201	Descriptions of the changes were vague but I did not seek out information outside of the email sent to me (subject: Your bus may change when Link opens; learn more, participate now) and the link it took me to where I took the survey.	3/18/2015 12:36 PM
202	Most of the resources were vague and unclear.	3/18/2015 12:25 PM
203	I liked the ability to have a full picture of the routes so I could see the ways that I could get from where I live to the places I want to go, but I also liked having the details available for each route that I currently use, or could see myself using after the changes.	3/18/2015 12:22 PM

204	Somewhat. Explanations are very long and sometimes difficult to track.	3/18/2015 12:20 PM
205	it seems like the explanations are kind of vague. At least the ones that I saw. In general I think that making people walk further to get the bus or transit is less desirable. It already takes long enough to wait for the bus, and when you put so much effort into getting the bus it adds to the time it takes to commute. It should not take over an hour to commute 10 miles. With bus fare being close to how much parking costs, it is a hard sell to ask me to walk further. Especially when it is full and I have to wait longer or if I do get on standing room only, it is a huge disappointment and not very satisfying. EVERY time I get passed up I think to myself I should have driven.	3/18/2015 12:14 PM
206	I found little help is planned for getting to/from the UW Link station. Why???	3/18/2015 12:13 PM
207	I'm a smart gal, but the information is not terribly clear. It's obviously complicated, but if you want good info, you've got to make it easy to QUICKLY assess. I just don't have the time (sorry) to dig through this stuff in detail. I just looked for new information about my long-held concerns. Saw nothing, therefore assumed that these options will be useless to me.	3/18/2015 12:11 PM
208	They were clear and easy to understand. The graphs/maps were helpful.	3/18/2015 12:08 PM
209	not completely - though generally. I can not say that I understand how "the concepts" translate to the plans.	3/18/2015 11:58 AM
210	It skipped my area - Magnolia! 20,000 people live there - one of the biggest suburbs in Seattle. Why such low bus service?	3/18/2015 11:56 AM
211	Information was not clearly presented or easy to navigate.	3/18/2015 11:54 AM
212	They're mostly relevant to those who live up North.	3/18/2015 11:52 AM
213	The changes to specific routes was the most helpful. The maps I'm afraid were too cohnfusing.	3/18/2015 11:52 AM
214	Could see the maps, read the information for frequency of bus routes, etc.	3/18/2015 11:52 AM
215	I didn't see what route you expect to replace 373x on Alternative 2 and why it would be deleted, but had limited time to see if METRO website provided this information.	3/18/2015 11:51 AM
216	The interactive maps were great- very informative	3/18/2015 11:46 AM
217	I did not have time to read all the materials. Many items were for routes that did not concern me.	3/18/2015 11:46 AM
218	visual map and color-coding helped	3/18/2015 11:42 AM
219	I ride the sound transit 586 bus each day. This had little to no mention of any effect on this route yet there are many rumors that it will.	3/18/2015 11:42 AM
220	Really very confusing to understand.	3/18/2015 11:42 AM
221	But hard to make out the service map - i.e. what bus goes down freeway versus side street	3/18/2015 11:39 AM
222	The differences between the 2 alternatives were not very clear or obvious to me. I'm still not sure which I would prefer. Will service be worse or better in Capitol Hill and U district? Faster or slower? I don't know.	3/18/2015 11:39 AM
223	Maps are so complex that they are hard to sort out	3/18/2015 11:38 AM
224	Looking at a flat map with the bus routes was not super helpful. It wasn't super clear what changed, where the routes were new or different. It's hard to know how this will impact me when I move. I feel like we shouldn't have to choose between more coverage and more frequent buses. You should be doing both, and making sure that we're not dealing with traffic. After all, that should be a benefit of public transit.	3/18/2015 11:37 AM
225	interactive features	3/18/2015 11:37 AM
226	Yes, they could have had more graphics and less words I think that would help people grasp the concepts sooner. Again it would be nice of you to work with Community Transit and Snohomish County to review these changes. We moved out of the city due to the increased costs of living and I avoid coming into the city now for anything but work as the commute is terrible and it's so hard to get around using public transit that competes with cars, bikes and peds.	3/18/2015 11:37 AM
227	I find the general city maps aren't useful. But I like being able to view proposed changes for individual routes. The changes are much easier to understand that way.	3/18/2015 11:36 AM
228	I don't completely understand what option 1 will mean for my neighborhood. But over all it sounds like more frequent service. Option 2 was easier to understand.	3/18/2015 11:33 AM
229	The map was very useful.	3/18/2015 11:28 AM

230	I could look up changes specific to the routes I currently use.	3/18/2015 11:25 AM
231	the changes affect areas and routes i don't ride in regularly - i ride from Northwest to the UW, so id rather not give feedback on areas that i'm not directly affected by	3/18/2015 11:25 AM
232	lack of detailed explanations; lots of route maps and other details are more distracting than helpful	3/18/2015 11:23 AM
233	Too much info to take in.	3/18/2015 11:20 AM
234	Didn't look at it yet.	3/18/2015 11:20 AM
235	The map on metro's website is really difficult to understand. The explanations on STB were much clearer about the bug picture changes that are proposed.	3/18/2015 11:19 AM
236	Because the explanation was on a different page than the questions. It would be nice to have it all on the same page of the survey so you know what you're talking about.	3/18/2015 11:18 AM
237	I learn better hearing than reading.	3/18/2015 11:17 AM
238	Explained what was happening clearly	3/18/2015 10:12 AM
239	The detailed maps were helpful.	3/18/2015 8:37 AM
240	A lot of information. Difficult to remember what I had read when I was taking the survey.	3/17/2015 7:58 PM
241	no specifics I could find for individual routes	3/17/2015 7:41 PM
242	The detailed maps were helpful.	3/17/2015 7:37 PM
243	The readily available information seems pretty vague. If there's specific info out there, it's not apparent (note that I'm responding from work, and don't want to take a large amount of time to drill down through the website).	3/17/2015 4:52 PM
244	The maps are somewhat confusing so I don't think I've actually understood the entire plan	3/17/2015 3:17 PM
245	Clearly explained, but had to go back and forth between resource pages. It would be easier to compare commute option with clear From A to B: currently, Alternative 1, Alternative 2.	3/17/2015 3:07 PM
246	Many resources are available to map out the whole system under each alternative, and the information on specific routes gives a good comparison of the changes, but it is hard to compare how the system as a whole changes under the two alternatives.	3/17/2015 12:17 PM
247	The Seattle Transit Blog is an invaluable resource when it comes to this stuff.	3/17/2015 1:26 AM
248	You should add a travel time calculator for each bus route under the proposed alternatives so that riders can quickly determine which option works best for them.	3/16/2015 6:53 PM
249	The helpful information in the website is how each route will be affected.	3/16/2015 6:05 PM
250	need to have exact departure times.	3/16/2015 5:25 PM
251	There were a large number of maps of dubious usefulness, because they tried to convey all the information about the changes, rather than some relevant subset. The impact on specific routes section was much better, but I came to that later, after the other parts had already proven confusing.	3/16/2015 5:03 PM
252	I'm not positive I understand the change concepts	3/16/2015 4:52 PM
253	Changes are complex when read route by route. Other than general statements about frequency of service, geographic coverage, and access to Link, I didn't see any clear organizing principles. What does the more frequent service shift hope to accomplish in accessibility between certain neighborhoods and communities that didn't exist before? Why were some routes deemed less useful in Alternative 1?	3/16/2015 4:43 PM
254	It's really confusing! It'd be helpful if you had a hypothetical transit planner where I could say I want to go from Montlake to OTC a 10:00 AM M-F and I could see the schedule.	3/16/2015 4:35 PM
255	I didn't notice a direct route from Belltown/Lower Queen Anne to Redmond, therefore it doesn't affect me at all. All I want is an easy way to get to work without driving but I'm not counting on it ever happening.	3/16/2015 4:03 PM
256	Very confusing. I had a hard time understanding the impact of the changes	3/16/2015 3:38 PM
257	There is a lot of information and it is somewhat confusing. I'm still wondering how I'm going to connect to the 542.	3/16/2015 3:24 PM
258	Limited-given the scope of the changes, the questions for each region in this survey were more helpful than looking at maps - ie they called out the specific changes in question for comment.	3/16/2015 3:19 PM

259	I was confused a bit wasn't clear exactly how the routes change.	3/16/2015 3:15 PM
260	Not clearly spelled out	3/16/2015 2:19 PM
261	very clearly laid out.	3/16/2015 2:17 PM
262	Explained proposed route changes and their rationales.	3/16/2015 2:15 PM
263	I appreciated the explanation of the affected routes as well as a detailed map that depicted how each route would be altered.	3/16/2015 2:14 PM
264	The maps gave sufficient details to find the changed routes.	3/16/2015 1:47 PM
265	The questions actually provided me with more details about the changes than just reading the site initially.	3/16/2015 1:37 PM
266	It would be nice to have a feature to answer the question "given I want to go from A to B" exactly what routes should I take under alternatives 1 and 2.	3/16/2015 1:06 PM
267	Because despite the email mentioning effects to the 242, I could find nothing on the site at all, suggesting the 242 is already decided.	3/16/2015 1:02 PM
268	The site linked by the survey was hard to navigate, so I had trouble finding the "alternatives" I was supposed to be commenting on	3/16/2015 12:52 PM
269	Because they told me that my bus is going to be cancelled and that this is going to make my commute from Maple Leaf to Redmond significantly longer	3/16/2015 12:39 PM
270	The alternatives and their map details and frequencies were very helpful.	3/16/2015 12:35 PM
271	Metro's website: Revision maps. Work Email: Summary of 545, 542 changes for each alternative.	3/16/2015 12:34 PM
272	The homepage was rather unclear. Hard to understand what you could click on. The first couple items were "big picture" generic items that I had a hard time understanding. When I clicked on each individual route I got a much better idea of the changes. Just looked at the routes I ride.	3/16/2015 12:24 PM
273	A lot of information to digest, especially in the aggregate. But ultimately the information was there.	3/16/2015 12:10 PM
274	Not entirely clear how the changes in the Montlake Freeway Station affect all this, which happens to be important to me	3/16/2015 12:08 PM
275	I think so; however the maps are not quite as clear as I would have expected. Maybe some detail views around the Park&Rides for further clarity.	3/16/2015 11:58 AM
276	Too much reading	3/16/2015 11:51 AM
277	Doesn't sound like much impact to West Seattle residents who commute to Issaquah.	3/16/2015 11:31 AM
278	Too detailed for first look.	3/16/2015 10:51 AM
279	The route maps and especially by individual route were very helpful	3/16/2015 7:36 AM
280	Test	3/15/2015 8:44 PM
281	Comprehensive coverage	3/15/2015 8:38 PM
282	I learned how the future of Metro and Sound Transit will affect my daily commute.	3/15/2015 5:37 PM
283	I was unclear about where the new stops would be for the revised bus routes.	3/15/2015 3:33 PM
284	I was never directly notified. I found out about the changes through neighbors who forwarded info to me via email.	3/15/2015 12:55 PM
285	They helped, but a more simplified (dumbed-down, I guess) description of how the changes impact travel to and from the light rail stations for those of us who may end up transferring our travel to Link would be helpful.	3/15/2015 12:05 PM
286	It was a little hard to understand the proposals, but managed to gather an idea of the changes after exploring Metro website for a few mins. not everyone is going to invest that much time to understand the changes.	3/15/2015 10:41 AM
287	Maps showing route locations are useful. Maps indicating frequencies are also useful.	3/15/2015 9:20 AM

288	Yes, I was able to see what route would replace the deleted #11 and that frequencies would be improved. I was not able to tell if the #8 would replace all the stops of the deleted #11, or just a subset.	3/14/2015 10:44 PM
289	Still need to see visual representations and hear the reasons.	3/14/2015 3:08 PM
290	Not fully	3/14/2015 8:42 AM
291	Some good data. Other concepts uncertain. - Your info includes no specific proposals for improved Metro bus service using newly available funding under recent proposition. It seems clear this would not work in favor of proposed revisions of bus service under the Alt 1 & Alt 2 options delineated in your materials. - One unverified comment alluded to separate fares for bus & Link light rail. That would be most unfortunate. If this IS the case, failure to disclose it would be gross misrepresentation. Cost & convenience matter. I do NOT want another account of any type for public transit; my Wave to Go (?) automated Hwy 520 tolls are routinely mis-assessed. Managing the account is a hassle. The administrative costs of tolling & billing business are huge, the collection rate low and bureaucracy has no accountability to the payors.	3/13/2015 9:34 PM
292	They clearly showed that the Route most important to me is to be eliminated if what is obviously the preferred alternative is selected.	3/13/2015 5:07 PM
293	The Map was most helpful - I found the concept descriptions to be confusing without that context.	3/13/2015 5:01 PM
294	didn't see the real changes anywhere before I took survey. so just textual. I would have liked to have seen a proposed service map with routes being changed.	3/13/2015 4:43 PM
295	this information is really complicated and hard to read and hard to grasp - so many different pieces. I can't claim to understand it all, but I don't know how it could have been presented any better.	3/13/2015 4:28 PM
296	I'm still confused	3/13/2015 4:21 PM
297	yes	3/13/2015 2:46 PM
298	Informative	3/13/2015 1:06 PM
299	I didn't fully read the Alternatives as they pertained to specific routes.	3/13/2015 12:43 PM
300	Yes, but the new route maps were very hard to understand.	3/13/2015 12:41 PM
301	The maps were the most helpful but I also liked the summary of differences and similarities.	3/13/2015 11:24 AM
302	Only a little bit. The survey questions were more descriptive than the info on the site was.	3/13/2015 10:33 AM
303	It was somewhat more challenging than I hoped to click through the pages of routes to get a good idea of service to Seattle destinations from my home in Kenmore (via ST connection on 522 or otherwise).	3/13/2015 10:32 AM
304	Summing up differences & similarities	3/13/2015 8:00 AM
305	Contextualization: when you just spew the numbers of bus lines---43, 8, 78--your brain kind of zeroes out and and the plan means nothing. Contextualization from human beings really helps "see" through the numbers and get what's going on.	3/12/2015 2:39 PM
306	Just because	3/12/2015 11:07 AM
307	unclear at times, took too long to go over	3/12/2015 9:44 AM
308	Good descriptions and maps	3/11/2015 10:20 PM
309	Written clearly.	3/11/2015 3:32 PM
310	The descriptions were clear, including impacted bus lines, so I could select those I'd be likely to use.	3/11/2015 1:42 PM
311	because I am educated, have a computer, and speak english.	3/11/2015 1:08 PM
312	It remains to be seen how these changes will impact my commute to work from West Seattle to Capital Hill.	3/11/2015 12:53 PM

313	Once I was aware of the updates coming down, I used the STB and the link connections page to look at some of the changes, but not all. I'll admit, the eastside routes are irrelevant to me. The north seattle and capitol hill routes do matter to me and many many others, I think some great thought has gone into this, there are just a few glaringly obvious holes in the process, and that is that cars and trucks share 99% of the ROW with these buses. Without thinking about that congestion on I-5, pacific, montlake, 520, mercer, denny, stewart and 23rd/24th these new improved headways can quickly be demolished and the painful bus bunching we see now will continue. Metro and ST need to think about that AND push on SDOT to provide more effective solutions to this. Still can't believe the 48 will not be split, it has to be a top 5 worst performing on-time bus in town (with the 8 nearing #1, great job splitting that nightmare). I mean, you did, but then you through-routed it as the 67, this breaks a performing bus and continues the terrible service of another. SPLIT THAT 48!!!	3/11/2015 11:59 AM
314	Too detailed and confusing	3/11/2015 11:49 AM
315	i had no prior information about the proposed changes.	3/11/2015 10:38 AM
316	Not easy to look at only the areas of interest. Couldn't clearly overlay Alt 1 and Alt 2 at the same time to see differences. Hard to see difference between current and the alternatives	3/11/2015 10:15 AM
317	I still want to know if my bus stop will remain the same and how I get from there to UW light rail station.	3/11/2015 9:28 AM
318	They are also overwhelming, with so many changes proposed at once.	3/11/2015 9:12 AM
319	With some time and persistence, I was able to mostly understand the alternatives. A better comparison would be to have an interactive route map that would show the change to the route under the two alternatives, i.e. click on the route then choose each alternative to have the frequency/route and other changes show. I had a difficult time being clear about the changes.	3/11/2015 8:57 AM
320	to much general inof not enough specific info	3/10/2015 10:18 PM
321	The Wallyhood blog described specific changes that affected me in an easy to see/understand way. Metro's Web site DID NOT do this.	3/10/2015 9:16 PM
322	Very good explanations on Seattle Transit Blog. Oran's map is super helpful.	3/10/2015 8:30 PM
323	Just dont change the Sixteen	3/10/2015 5:37 PM
324	Great summary of alternatives and good use of maps	3/10/2015 5:33 PM
325	Lots of good info. I particularly liked the alternative comparisons for specific bus routes.	3/10/2015 4:46 PM
326	Yes, but I really had to study the route maps. The changes are so significant (not that that is inherently bad). I would be nice to have a simulated TripPlanner for the proposed routes in order to really understand how my trips would be affected. (Because TripPlanner also includes walking distances that I have had to estimate by looking at the route maps and cross referencing with Google maps.)	3/10/2015 4:39 PM
327	Changes difficult to figure out	3/10/2015 4:01 PM
328	STB is a terrific resource!	3/10/2015 3:53 PM
329	They made it very clear which routes would be changing and what would be gained through those changes.	3/10/2015 2:41 PM
330	But there's a lot of detail to absorb, and it is hard to tease out the relevant info.	3/10/2015 2:24 PM
331	Still murky. Not very clear, so much uncertainty.	3/10/2015 12:12 PM
332	It all still seems very up in the air, so it's hard for me to tell the specifics of what is being considered.	3/10/2015 9:52 AM
333	I'm not sure if it will actually affect me or not	3/10/2015 9:15 AM
334	The Metro website was especially helpful. I liked the multiple ways the two alternatives were compared and contrasted, as well as the user's ability to check on individual bus routes.	3/10/2015 8:24 AM
335	But I think the tagline descriptions of the two alternatives for changes in bus service could be a little more descriptive.	3/10/2015 8:22 AM
336	In depth information on the website is useful	3/10/2015 6:16 AM
337	Not entirely -- routing, coverage, timing -- it gets pretty complicated. Hard to know how it will really work in practice.	3/9/2015 9:15 PM
338	The only place to easily find the specific information was in the details of the survey.	3/9/2015 8:20 PM

339	It's really hard to tell how any of this will work until it's put into action.	3/9/2015 6:38 PM
340	Clearly delineated	3/9/2015 6:01 PM
341	There was a lot of information, and I'm sure I don't have a perfect understanding of it - but I'm glad it was present. The route planner helped, but didn't allow me to test trips at specific times-of-day, so I couldn't tell if routes were good for 1:30am on Saturday morning (after Friday nights) or 9:30pm on a weekday (for working late).	3/9/2015 5:59 PM
342	I had no idea what the changes were previously.	3/9/2015 5:47 PM
343	now I know how much I don't like alternative 1 !	3/9/2015 5:38 PM
344	Maps are good.	3/9/2015 4:44 PM
345	I'm sure there are details that I am not sure of and I would like more detailed information.	3/9/2015 4:35 PM
346	As I went through the survey, I had questions and needed to refer to the website. However, if I left the survey form, I lost all my work. So, I had to do my best from memory. My comments may not be as clear as I would wish.	3/9/2015 4:26 PM
347	Comparison tables (current vs proposed) and maps for each concept route!	3/9/2015 4:03 PM
348	not clear	3/9/2015 3:53 PM
349	There should be a yes and no answer. Yes, it helps. And no, it creates more questions.	3/9/2015 3:17 PM
350	The network maps (Alt 1 and Alt 2) were especially helpful.	3/9/2015 3:01 PM
351	narrative is not helpful and the map was confusing -- and on a computer screen you can't see everything at once.	3/9/2015 3:01 PM
352	They weren't very good, I didn't think, but did provide some help. The map showed the route for No. 8 in Alt 2 as apparently unchanged but then made the statement that Alt 2 would provide no connection from Madison Valley to Link Light Rail, whereas the No. 8 DOES provide that link, so it made me think there's something I'm not understanding. I thought it could give a better definition of neighborhoods. What does it mean by "Madison Valley." I live at 30th and Howell. What neighborhood am I in? I think Madrona, but also some people call it Madison Valley. It looked to me as if you weren't seeking input from people who live where I do, because you didn't include Madrona in the list of neighborhoods. I can't remember whether you included Central District. Yet these are the neighborhoods that would be screwed by Alt 1.	3/9/2015 2:56 PM
353	A little confusing. Need to spend more time reading about it and thinking about it and talking to others.	3/9/2015 2:42 PM
354	Yes, but feel like I'm just learning about the impact.	3/9/2015 2:35 PM
355	There is a lot of information on the website, though it is kind of difficult to assimilate and understand in full.	3/9/2015 2:30 PM
356	No transparency --- I had to dig deep to figure out what was going on --- and to find out that "alternative 1" is also a bus cutting scheme sold as "more frequent bus service" along 24th ave E ---- dropping the 43 will result in a net loss of frequency from the every 7.5 minutes today to 10 minutes.	3/9/2015 1:29 PM
357	It clearly states which routes Alt. 1 will delete	3/9/2015 12:40 PM
358	One of the routes I was concerned about wasn't listed. I was also confused trying to decipher the pdfs for route-specific changes.	3/9/2015 12:01 PM
359	mild to weak yes 5 point Likert scale would have been a better measure	3/9/2015 11:47 AM
360	Maps and interactive maps were extremely helpful.	3/9/2015 11:00 AM
361	Took a lot of digging to translate the spin into the reality of your plans -- took multiple clicks and links to get to the bottom line that you are eliminating the 72. Good job hiding the truth. You must be taking lessons from the Board of Directors of the Zoo.	3/9/2015 10:14 AM
362	It was a little bit confusing but the detailed information about specific routes was the most helpful.	3/9/2015 9:21 AM
363	light rail is not explained	3/9/2015 5:57 AM
364	They keep going back and forth! I don't know what the options are anymore because first there were going to be bus cuts, then there weren't, and now it seems like they're back on the table again!	3/8/2015 10:29 PM
365	I still have not synthesized what the changes mean. There are so many proposed - it is hard to see what their cumulative impact might be.	3/8/2015 6:36 PM

366	I was able to view the map.	3/8/2015 5:21 PM
367	Very confusing.	3/8/2015 4:34 PM
368	Almost too much info. Very dramatic changes overall. maps need to list street names more for better clarity.	3/8/2015 3:16 PM
369	It's a lot of information to digest. It took a long time to study and understand the plans. I don't think most people will take the time to do so.	3/8/2015 12:46 PM
370	Yes, but I was surprised at the extent of the changes proposed. When I first got the email, I assumed they were going to be small changes. The email could have done more to alert readers that these are BIG changes.	3/8/2015 10:42 AM
371	The route maps are a little hard to follow. Especially on a mobile device.	3/8/2015 9:06 AM
372	bus riders told me how Alt 1 would run our neighborhood routes	3/8/2015 7:19 AM
373	I'm not completely familiar with the areas in Seattle that this project effects, and /or I am currently not in need of services in these areas.	3/8/2015 12:07 AM
374	I was confused by what seemed to be generalized statements about changes. Maybe I didn't find exactly the right information site.	3/7/2015 8:15 PM
375	While they were limited, I got the drift between Alternatives.	3/7/2015 8:13 PM
376	As yet they seem unspecified.	3/7/2015 6:23 PM
377	Kind of. The map could have been better, just more direct about new routes. Some of the individual PDF pages were helpful but it was still a little confusing to navigate the changes.	3/7/2015 5:33 PM
378	It looks as if service on the 41 will remain the same but it's hard to tell and I don't know what will happen when the Northgate station is added.	3/7/2015 5:23 PM
379	very complicated, confusing. I think that I got the general concept, but not all of the particulars.	3/7/2015 3:49 PM
380	The specific bus information for options 1 and 2 were in PDF format and were challenging to read using my screen reader software, Voice Over on Mac OS X	3/7/2015 3:25 PM
381	i didn't see a lot about the actual light rail route. lots to look at about the buses, i get that, but what is the actual light rail route.	3/7/2015 2:33 PM
382	Detailed	3/7/2015 2:23 PM
383	Gave map and explanations of two alternatives.	3/7/2015 12:28 PM
384	Interactive map with ability to compare current service with alternatives was helpful. The static maps that fail to show south Seattle were harder to understand as someone using routes from SE Seattle to connect to central, north and northeast Seattle. Still unclear about proposed changes to route 8, which was my biggest concern with Alternative 1.	3/7/2015 12:03 PM
385	The statements you asked us to check were confusing. Some just said the samething.	3/7/2015 11:43 AM
386	Yes, but it's still confusing. The concepts are large.	3/7/2015 11:08 AM
387	The maps showing the different options compared to what the routes are now were helpful.	3/7/2015 10:57 AM
388	too long. This survey was like taking a test. I would like to give feedback but not have to study before doing it.	3/7/2015 10:53 AM
389	While they do help, the maps were a bit confusing and not clear with regard to changes given the inclusion of all of the various routes in one map. I understand the intent, but perhaps it could have been presented in an interactive fashion.	3/7/2015 10:31 AM
390	I could only find general information on the webpage. If more detailed info about the alternatives is posted it is buried.	3/7/2015 9:43 AM
391	I find the language confusing at times. I hope I have an understanding of what change will look like. I answered based on what I was understanding.	3/7/2015 9:02 AM
392	I read the alternatives, but I forgot most of the details by the time you were asking me questions about them. I do survey research for a living and this survey was not well-designed.	3/7/2015 8:58 AM

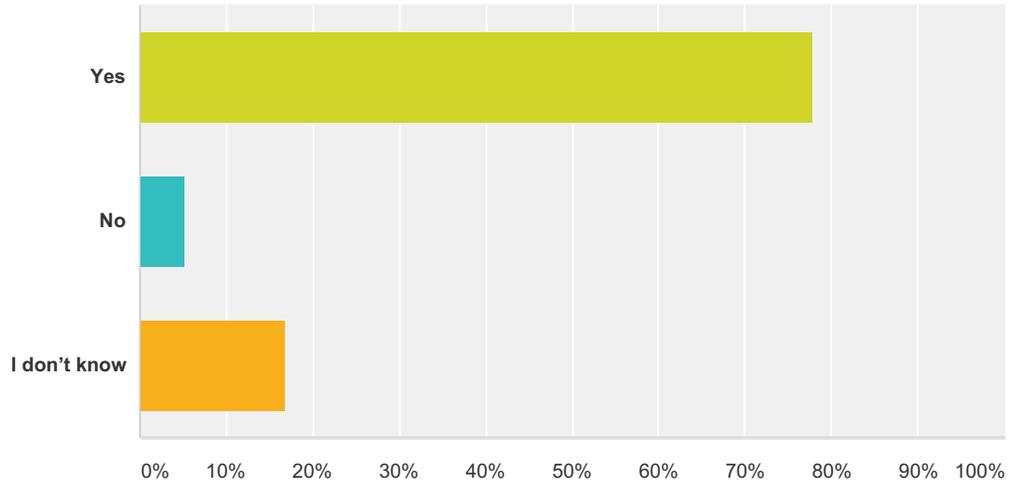

393	I do not use transit now; it is not very direct from anywhere but Downtown Seattle--and even that is inadequate on the weekends--so I just don't try. Therefore, I am not familiar with the routes addressed, let alone the changes. What I would like to see improve is the ability to go from Capitol Hill/First Hill to the U District and the Eastside directly and frequently.	3/7/2015 8:50 AM
394	They helped me understand the concepts, but I felt unheard.	3/7/2015 8:48 AM
395	very unclear how individual routes would change, especially with Alternative 1 in place	3/7/2015 4:09 AM
396	I need to read more about it, perusal attend a meeting.	3/7/2015 3:38 AM
397	The maps and route-by-route information was very helpful.	3/7/2015 1:14 AM
398	no comment	3/7/2015 12:58 AM
399	the presentations in the proposed change descriptions were well organized and easy to understand	3/7/2015 12:49 AM
400	You can't tell me how the changes would affect me. It's unpredictable. I see what the changes are but have no data to know the effect. Nor do you have data on how my transit-related behavior would or would not change with start of light rail and changes to metro buses.	3/6/2015 8:31 PM
401	in a very general fashion	3/6/2015 8:00 PM
402	Actually, I had to study the resources quite a bit to figure out the impact of the changes on me. And I have a Masters degree in economics. I also spent almost 2 hours studying things in answering your surveys. I wonder how other people are absorbing this.	3/6/2015 7:47 PM
403	I spent about an hour studying the maps. They are excellent.	3/6/2015 6:34 PM
404	I understand how Metro lies to the public.	3/6/2015 6:27 PM
405	It's difficult to look at the large map and truly understand the changes.	3/6/2015 6:25 PM
406	Clear maps were provided, along with details about each route.	3/6/2015 6:24 PM
407	have used metro exclusively since 1985	3/6/2015 5:48 PM
408	More explanation on the change concepts before asking us for pros/cos would have been helpful.	3/6/2015 5:48 PM
409	You will disrupt my commute with either alternative	3/6/2015 5:41 PM
410	Kind of... the summary of changes was insufficient text and the maps only made it difficult to understand what changes were being made compared to current service.	3/6/2015 5:28 PM
411	Lots of words, I didn't understand changes	3/6/2015 5:24 PM
412	It was helpful to read descriptions and analysis of the changes, beyond just looking at the changes to my particular routes.	3/6/2015 5:20 PM
413	the list of questions was better than the map - maybe tell people in what order to look at things.	3/6/2015 5:13 PM
414	There were too many different pages to have to go to to learn about the Link Connections alternatives. Not terribly well organized	3/6/2015 5:07 PM
415	Some what?	3/6/2015 4:54 PM
416	Good maps	3/6/2015 4:52 PM
417	I suggest that you have a tool that a person could plug in their route/commute, and compare that way. Having the big picture presentation was too much for me, a simple commuter. I'm interested in how it will effect/ improve or not, my personal commute.	3/6/2015 4:42 PM
418	This is the first exposure I've had	3/6/2015 4:26 PM
419	The detailed maps were a big help. I'd like to see a heatmap of walking distances, though.	3/6/2015 4:23 PM
420	Mostly yes	3/6/2015 4:17 PM
421	Two issue: frequency of service and how late/early service is available (in order to be useful for going to work early or coming home late) AND convenience (how far do I have to walk to transfer from light-rail to a bus (I am not getting younger & neither are many of my neighbors). While Metro addresses the ideas of frequency of service and "convenience," one aspect of convenience is accessibility of bus stops when people are transferring from one line to another. Having to walk 0.25 miles to catch another bus is not convenient by any means.	3/6/2015 4:16 PM

422	They are vague.	3/6/2015 4:14 PM
423	Your interactive map is broken. Lines display correctly, but clicking for information does not show data from the active layer. Instead I get 9 results for the same street regardless of which layers are on. [Firefox 31.4.0]	3/6/2015 4:09 PM
424	The changes are complicated!!!! And involve many routes and options. I did not want to spend too much time figuring it all out. Despite the complications, you did a reasonable job of presenting it.	3/6/2015 4:06 PM
425	Not logical given SDOT BRT plan.	3/6/2015 4:01 PM
426	To some extent, yes. The map showed the proposed routes, but not the frequency. I realize it's difficult to show that, but it makes it difficult to compare the two alternatives.	3/6/2015 3:57 PM
427	Frankly, it's very complex. Way too many charts and maps to try to understand. How many people can really take the time to study all these documents? Best to just provide the list of changes that people can check off, as you did in the survey.	3/6/2015 3:49 PM
428	Though I certainly would like to know more, if that is feasible.	3/6/2015 3:46 PM
429	The blogs made unofficial maps and easy to digest recaps of all the proposed changes.	3/6/2015 3:44 PM
430	The maps and bus times were confusing -- how about a chart that compares frequency and trip time -- maybe it is just me, but I felt the maps did a poor job of showing me what my options would be.	3/6/2015 3:42 PM
431	The route maps are great, but with the number of overlapping routes, it is easy to misinterpret a route (i.e. route 71 could be misinterpreted as still going downtown in alternative 2 unless you read the route description)	3/6/2015 3:39 PM
432	They provided a text and map summary of the revised routes.	3/6/2015 3:35 PM
433	I made this comment on a previous page, but I think the information could have been better presented, and I'm worried that you won't get a lot of great feedback on this survey because the information was too cluttered and hard to follow.	3/6/2015 3:31 PM
434	I have good reading comprehension.	3/6/2015 3:29 PM
435	Phenomenally confusing. Next time hire people who actually ride the bus to compose a clear, concise website explaining how things might change with the two options.	3/6/2015 3:28 PM
436	It's the only way I would have known anything.	3/6/2015 3:25 PM
437	Some of it hard to grasp, if not familiar with routes.	3/6/2015 3:20 PM
438	The two maps comparing the alternative options are unclear and difficult to read.	3/6/2015 3:15 PM
439	I didn't look at specific route changes (assuming those exist) before taking this survey, but I found the route descriptions and overall goals clear.	3/6/2015 3:13 PM
440	A little bit.	3/6/2015 3:12 PM
441	I skimmed quickly due to lack of time.	3/6/2015 3:11 PM
442	A little.	3/6/2015 3:10 PM
443	I didn't think the explanation was clear.	3/6/2015 3:09 PM
444	I live on NE 95th St in Lake Forest Park/Shoreline/Ballinger, and Ballinger way. If there were a bus that went down Ballinger Way to get me to Bothell Way to transfer to the 372 my commute would be much easier.	3/6/2015 3:00 PM
445	Being informed about transit improvements and options are important to everyone who use alternative means of travel for work, business and or pleasure.	3/6/2015 2:58 PM
446	Yes but they were not very clear - its a lot of info that I have to look at one at a time between different pop ups, unwieldy.	3/6/2015 2:56 PM
447	I think the changes are pretty clearly described. I know the actual using of any new system will be a bit different.	3/6/2015 2:55 PM

448	but then again, I don't know what don't know or hasn't been reported....so I may not have a full grasp of all of the changes	3/6/2015 2:51 PM
449	N/A	3/6/2015 2:49 PM
450	Not very specific information though	3/6/2015 2:42 PM
451	Up until I got this survey I was not aware of what change concepts were being discussed. I know that Like Light Rail is coming but have heard very little about these concepts.	3/6/2015 2:39 PM
452	I depended on a simpler breakdown of the changes to specific routes from this blog: http://www.theurbanist.org/2015/03/02/metro-to-propose-bus-restructures-around-new-light-rail-stations/ The metro website took awhile to locate changes and find info about specific route changes proposed.	3/6/2015 1:18 PM
453	It was clearly stated that you were getting rid of two routes I count on.	3/6/2015 12:25 PM
454	The frequent transit maps developed by Oran Viriyincy and posted on Seattle Transit Blog were invaluable in ascertaining the differences between the status quo, Alternative 1, and Alternative 2.	3/6/2015 12:12 PM
455	Metro does a FANTASTIC job at laying out all of their service changes on their 'Have A Say' portion of their website. It is SUPER clear to understand and to find information. Thank you so much!	3/6/2015 12:05 PM
456	The detailed information on Metro's website was extremely valuable.	3/6/2015 10:51 AM
457	alot of dialogue and comments from various angles. Provides a great understanding of networks and frequencies	3/6/2015 10:44 AM
458	Seattle Transit Blog and Capitol Hill Blog are always very thorough, and have been advocating for a massive restructure like this for ages. Although this restructure will make me transfer in situations where I'm used to a one-seat ride, these blogs have both done an excellent job explaining the benefits of what seems like an inconvenience.	3/6/2015 10:19 AM
459	I feel that it could have explained better. One single interactive map, for instance, where you can click on and off various options, the Alternatives etc. You could also have included a population density overlay.	3/6/2015 9:42 AM
460	Oran's pull over map feature does EXACTLY what Metro's comparison maps ought to--it shows current routing and service levels (weighted by frequency, unlike Metro's maps) vs. proposed levels under Alternative 1, the best option.	3/6/2015 8:57 AM
461	Information was presented. I was educated.	3/6/2015 12:33 AM

Q57 From the time you were notified, were you given enough time to provide meaningful feedback in Metro’s and/or Sound Transit’s decision-making processes?

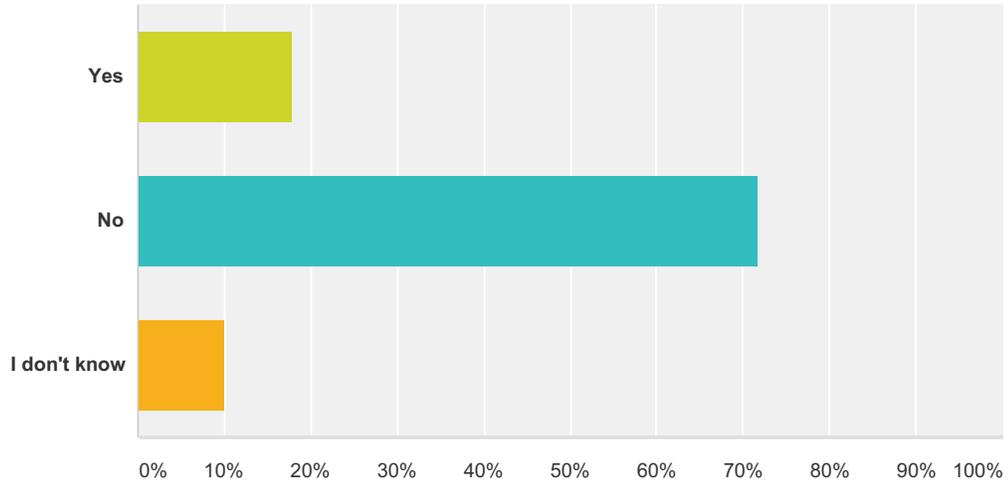

Answered: 3,354 Skipped: 3,205

Answer Choices	Responses
Yes	77.88% 2,612
No	5.25% 176
I don't know	16.88% 566
Total	3,354

Q58 Did you participate in the first round of public outreach about the Link Connections project last November?

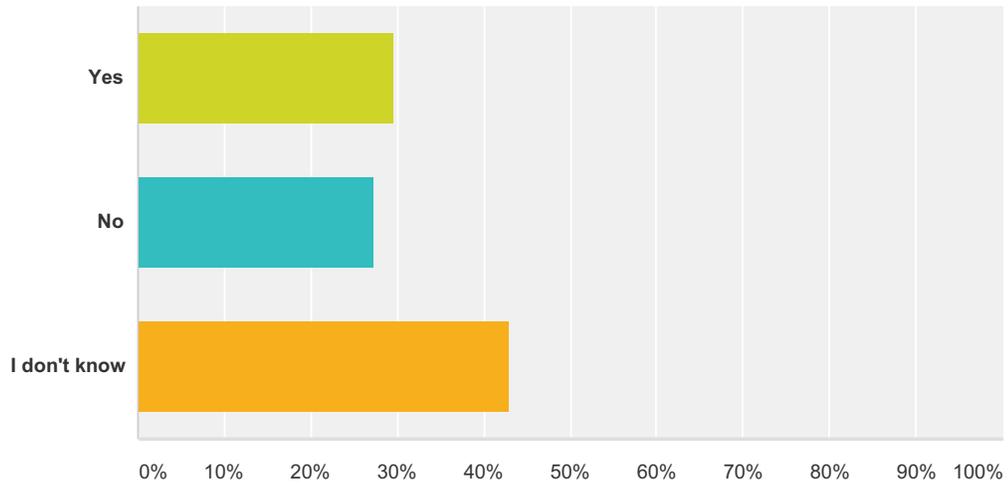

Answered: 3,430 Skipped: 3,129

Answer Choices	Responses	Count
Yes	18.02%	618
No	71.87%	2,465
I don't know	10.12%	347
Total		3,430

Q59 Do you see how your feedback helped shape some of the ideas being considered?

Answered: 671 Skipped: 5,888

Answer Choices	Responses
Yes	29.66% 199
No	27.27% 183
I don't know	43.07% 289
Total	671

#	Why?	Date
1	No of my concerns have been addressed or taken seroioulsy. King county metro seems to not listen to taxpayers concerns. They seem to have already made up,their minds to do what they want.	3/31/2015 5:00 PM
2	I need to hold on responding until I see the outcoms of the propositions.	3/31/2015 12:29 PM
3	I think feedback is gathered, then ignored	3/31/2015 7:36 AM
4	Looks like the plans are very limited in scope and basically addressing commuters	3/30/2015 5:22 PM
5	A subsequent blast of information described the role of the City funds.	3/30/2015 2:56 PM
6	Again, the changes being made are not to my daily commute.	3/30/2015 8:48 AM
7	frequency	3/30/2015 7:39 AM
8	I asked for a frequent route between Roosevelt Station and NOAA, or a two-way 74, and both appeared in different alternatives. I like the attempt to put as many routes as possible near UW Station and Capitol Hill Station, and to get the evening/Sunday frequency to 15 minutes on core routes. I like the frequent midday 75.	3/29/2015 9:34 PM
9	I appreciate that the initial survey last fall asked specific questions about where people are trying to go. It's a smart way to start the conversation and to ensure that you're meeting people's needs - and the alternative routes clearly reflect the paths that people want to take.	3/29/2015 5:45 PM

10	1. It seems like there is more outreach now than there was prior to the Tukwila station going in. 2. At a Metro outreach meeting, I was told that there is not enough ridership from Burien. Yet that is a catch 22. There is not enough ridership because the service is so bad, So people drive. Everyone in my vanpool has had problems with buses and moreover the light rail that is at ground level through Rainier Valley and gets into accidents, and even when light rail does not have a slow down due to an accident, it takes far too long! Also, the quickest I can get one-way from Burien to the U District by bus is 75 minutes. That is ridiculous!	3/28/2015 8:42 AM
11	My primary concern about having frequent, direct bus service to UW Link station was not addressed in proposed route changes.	3/27/2015 9:20 PM
12	I did not see the feedback results	3/27/2015 4:41 PM
13	Need coordinated planning for all Montlake connections (ped, bike, Light Rail, Bus). The city planners need to step up and take control of the process because the different transportation authorities are unable to coordinate their actions for the benefit of our city and our neighborhood.	3/27/2015 2:40 PM
14	Wasn't able to evaluate the overall results, so I don't know if I was part of the data set considered.	3/27/2015 2:25 PM
15	I'm sure that plenty of other people complained about a severe lack of coordination between crowd size and bus space on morning commutes to UW, and the new plans have responded.	3/27/2015 2:05 PM
16	Still no word on the 47 bus	3/27/2015 1:31 PM
17	I don't think I saw follow up of the results.	3/27/2015 10:21 AM
18	The light rail and busses still do not have consistant service early in the morning. I start work at 6:15AM, and driving is the only option that I feel is safe. Long wait times between connections keeps me standing alone pre-dawn in dangerous areas.	3/27/2015 6:38 AM
19	There seems to be a clear emphasis on a frequent, useful service network, which is awesome!	3/26/2015 9:27 PM
20	I kind of feel like the two alternatives being considered actually provide less quality service to my area and my use of Metro than the current service choices I have do. I prefer to use transit than take my car, but the 2 alternatives being proposed would make it difficult for me to have a 1 bus ride to downtown. The number of transfers and the lenght of walking distance involved are not good service options for service from my area (Sand Point Way) to downtown unless I only would ride the Route 74 during peak AM & PM hours.	3/26/2015 8:15 PM
21	120 schedule is still same, underserved	3/26/2015 6:59 PM
22	I see the Eastside, Northend and City being addressed and considered. There are many residents in Kent, Federal Way, Auburn and Renton that commute into Seattle. I don't see any of those areas mentioned in this Survey or how Light Rail will improve the commute from those areas? As I see it South Sound commuters may just continue their usual routine when additional routes are debuted since they will be advantageous to Eastside, Northend and City residents. My apologies if the Southsound areas are being thought about and just not a part of this particular survey...	3/26/2015 8:27 AM
23	Don't remember what I said in my online survey	3/25/2015 9:13 PM
24	This particular exercise is rather frustrating in that I cannot goo too far back. Any attempt to go back to another section results in the loss of all the work and comments made.	3/24/2015 11:54 PM
25	with alternative 1 it will be more difficult for me to get to a bus that will take me from Kingsgate to downtown Seattle. No light link rail extention to Kirkland yet.	3/24/2015 5:58 PM
26	A clear effort was made (with Alternative 1) to connect places people need and want to go, without regard to the existing network.	3/24/2015 4:33 PM
27	I think the idea of frequency and useful transfers was included in the the proposed changes, but the distance between stops was increased drastically to compensate, which leaves many unable or unwilling to use that transit system. I'm not sure why walking distance was not really considered....?	3/24/2015 1:36 PM
28	Hard to say one way or the other, it was more big-picture stuff. Not sure how to translate it into the actual changes proposed.	3/23/2015 8:33 AM
29	Sound Transit and King County Metro do a good job publishing (they could be a bit easier to find though) their reports on each survey they conduct which, if nothing else, arms me with some solid data to use when discussing transit issues in the community with family and friends and knuckleheads who think we pay our metro drivers too much and don't care about the funding gap ;)	3/20/2015 1:40 PM

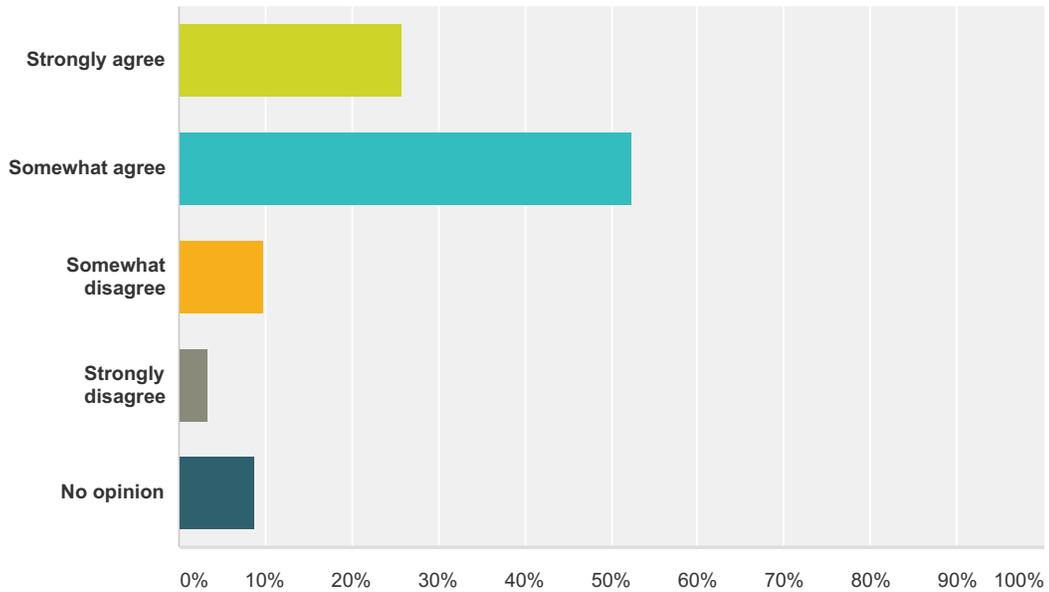

30	I'm a little bit outside the geographical area in question. But I'm REALLY happy about the Capitol Hill connection to UW - not only as a UW alumni who used the bus all through my time at the school, but as a person who frequently travels between UW and Capitol Hill. This will make things so much easier, I hope! Much better than the circuitous 43, anyway!	3/19/2015 8:31 PM
31	I'm not sure. I responded to a survey back then too but I felt like it was a little more straight forward.	3/19/2015 3:59 PM
32	Never have the feeling that this feedback matters, but I give it nonetheless!	3/19/2015 1:14 PM
33	545 route is being included in the updated plan.	3/19/2015 11:17 AM
34	Not really.	3/19/2015 10:52 AM
35	Nothing is being done to improve Ballard's abysmal bus service, despite a very large number of taxpayers and commuters/travelers.	3/19/2015 10:23 AM
36	The needs of our transportation corridor (Bothell/Lake City Way) are not being addressed at this time.	3/18/2015 8:58 PM
37	time will tell if the ideas implemented were used	3/18/2015 7:43 PM
38	unclear that proposals were changed in response to feedback/ input. perhaps they were but this was not well communicated?	3/18/2015 3:43 PM
39	Still does nothing to serve my household.	3/18/2015 3:20 PM
40	Unclear who's priorities are being taken into account.	3/18/2015 2:49 PM
41	Maybe. At least there is now some mention of folks living along 522.	3/18/2015 1:05 PM
42	I live in W Seattle and would take the bus every day if I could rely on service. While I'm excited about the light rail station at UW, I'm not sure there will be routes from where I live that will get me to a station. Honestly, this issue is what makes me miss living in NYC the most.	3/18/2015 12:43 PM
43	I got no response.	3/18/2015 12:15 PM
44	I think the attention to frequency was something I have mentioned at every opportunity, as I am sure others have as well. Also the need for amenities at bus stops.	3/18/2015 11:50 AM
45	It's hard to know what my feedback specifically did to shape the project but glad I was given the chance to voice my opinions	3/18/2015 10:13 AM
46	Presumably, though I don't think I suggested anything novel, so I think it would have been generally in line with revised planning.	3/17/2015 5:48 PM
47	I see no evidence one way or the other. I assume most of the "shaping" exists only as lip service.	3/17/2015 4:52 PM
48	Alternative 1 seems to ignore my primary concerns (which is fine if I am truly in the minority of riders); Alternative 2 seems to be the status-quo with some minor tweaks.	3/17/2015 10:19 AM
49	I've considered so many different possibilities for the realignment that I honestly can't remember which ones I was considering 4 months ago, nevermind which ones I may or may not have put in that survey. So, personally, I don't know. That said, your proposals do very clearly indicate that your brightest minds have been involved with and listening to the brightest minds in the Seattle community.	3/17/2015 1:28 AM
50	There were a number of people at the meeting I attended who were concerned about retaining the current Route 71 service	3/16/2015 5:30 PM
51	I don't recall the details of the feedback given that it was last November.	3/16/2015 5:15 PM
52	The 520 design process is a mess and doesn't reflect ideas for quality transit. Just a way to have a bigger freeway, and now you are making up weird ways to solve the problem created by WashDot's failed 520 design.	3/16/2015 11:53 AM
53	You keep trying to cancel bus services that the public uses and reduce the number of cars on the road. If my or a large portions of the communities feedback was considered then you wouldn't be trying to cancel bus routes	3/16/2015 11:50 AM
54	no evidence of it...	3/16/2015 11:47 AM
55	I like the proposal of alternatives with many options from which anyone can choose.	3/15/2015 5:38 PM
56	I really emphasized the importance of frequency, and it looks like you guys listened. Thanks!	3/15/2015 9:20 AM

57	I depend on using a computer at the public library - it is not always possible for me to read as long as it takes to understand and remember every little detail.	3/14/2015 4:59 PM
58	It seems like many of the changes are happening no matter what. The Madison BRT is an example: I don't know anyone who wants it, but it will happen anyway.	3/13/2015 2:39 PM
59	N/a	3/13/2015 1:06 PM
60	Because the bus to light rail connections in the plan are terrible.	3/12/2015 8:54 PM
61	I think Metro already has a plan in place and no survey is going to change anything....	3/12/2015 3:52 PM
62	The Lake to Lake concept. Now in new 16 and new 71.	3/12/2015 11:08 AM
63	Some... I'd rather have the city truly dedicate itself to light rail connecting all neighborhoods as opposed to rail connecting some with buses connecting the rest.	3/11/2015 1:55 PM
64	Using transit to/from the Eastside gets harder, not better.	3/11/2015 8:51 AM
65	Changes to the 8, 48, and 49 all meld with ideas I supported in the first round of public feedback.	3/10/2015 2:42 PM
66	I really have no idea how this survey will or will not be used.	3/10/2015 11:10 AM
67	My ideas are certainly reflected in the Alternative One principles but I don't know that they had any direct causation	3/10/2015 9:49 AM
68	In the first round of surveying I voted for the idea of decreasing transfer times, and that is one of the main qualities of a routing alternative now.	3/10/2015 8:24 AM
69	I don't know that my feedback helped, but Metro needs to be commended for being bold in the Alt 1 proposal. I look forward to the next round of restructurings when Brooklyn and Roosevelt stations are complete.	3/9/2015 8:46 PM
70	one drop in an ocean.	3/9/2015 6:38 PM
71	My initial rounds of feedback had little to do with routes; so were likely not considered. However directly emailing Sound Transit has given me confidence that my most important concerns are being addressed.	3/9/2015 6:00 PM
72	Absolutely no buses on 25th Ave NE --a logical north/south route to the new light rail station at husky stadium. seriously -- figure it out because if I have to go down University Ave, I am highly unlikely to use metro. Ever.	3/9/2015 3:02 PM
73	The 522 corridor still doesn't seem to be a priority for non-downtown transit. Especially, toward Fremont, Ballard, Queen Anne.	3/9/2015 1:01 PM
74	I was not tracking the changes that closely.	3/9/2015 11:01 AM
75	You are eliminating the 72 -- my feedback has had zero impact on your plans. You will only listen to the folks that agree with you.	3/9/2015 10:15 AM
76	Not sure we will see. But thanks for asking.	3/9/2015 9:19 AM
77	I supported more frequent service and I was pleased to see that option. I like the flexibility of not having a long wait if I miss a bus.	3/8/2015 9:53 PM
78	I did not see any improvements to the 45th Street corridor between Ballard and U-District/UW.	3/8/2015 9:26 PM
79	Can't remember the specifics of what was shared.	3/8/2015 4:17 PM
80	the 8 and 66 were not cut!	3/8/2015 3:16 PM
81	I will see soon enough if the feedback helped. Previously the changes didn't affect my neighborhood as much as this time. This time, it impacts routes I ride more than last time.	3/7/2015 5:34 PM
82	There is a mismatch/contradiction between the proposed improved frequency of Alternative 1, but the details reveal far less frequency (Route 207 only hourly, with greatly reduced service periods)	3/7/2015 10:35 AM
83	Alternative 1 has improved frequencies	3/6/2015 10:58 PM
84	The 72 was proposed for elimination when bus cuts were on the table. With the new funding package approved in Seattle, it appears the 72 will still be eliminated. I wrote numerous email about the 72 during the November process, so no, I don't see how my feedback helped shape the ideas of the current plans.	3/6/2015 8:08 PM
85	I don't remember what my feedback was	3/6/2015 7:47 PM

86	I see little effort to make bussing easier for the elderly.	3/6/2015 6:34 PM
87	The problems in Northeast Seattle have pretty much been ignored, especially the parts north of the University District. It seems the further you get from downtown, the less you matter to the ones making decisions.	3/6/2015 6:30 PM
88	You created more east-west routes and provided more frequent service on may routes.	3/6/2015 5:52 PM
89	Some of the specific ideas we discussed at my table in November (destinations, routes) have been incorporated into Alternative 1.	3/6/2015 5:21 PM
90	Many of the ideas being considered are in direct contradiction to the concerns I voiced.	3/6/2015 5:04 PM
91	The bus route is exactly the same	3/6/2015 4:33 PM
92	No one ever sent a link to the results of the feedback.	3/6/2015 4:17 PM
93	I can see that you care a lot about community feedback.	3/6/2015 4:14 PM
94	It seems that there are few to no considerations for people working swing shift. How can I access the Link rail from the Tukwila station after 12:30pm to get to UW by 3pm. The lot is full. There are no busses going east on 169 after midnight. Im not willing to spend over 4 hours per day commuting.	3/6/2015 3:58 PM
95	Not sure, many voices probably went into the shaping of the proposals.	3/6/2015 3:44 PM
96	It's hard to know how much the feedback was utilized in developing the 2 alternatives.	3/6/2015 3:35 PM
97	Because my main concern - removing access to Eastlake - was not addressed, and Metro is still planning on reducing access to South Lake Union via Eastlake.	3/6/2015 3:15 PM
98	If a direct connection to NOAA is maintained, then I will believe my feedback had some impact.	3/6/2015 3:15 PM
99	It addressed many concerns voiced by other passengers who currently use light-rail as "first option" traveling consideration. Having additional information about the connectivity of future projects and the city's plans for future growth plans is extremely important in this growing vibrant city!	3/6/2015 3:01 PM
100	I was worried about the 43 going away then and it is still going away....	3/6/2015 12:26 PM
101	Alternative 1 clearly reflects the importance of frequency and network legibility that I stressed in my previous feedback.	3/6/2015 12:13 PM
102	A clear effort was made (in Alt 1) to take advantage of the early feedback on destinations to serve.	3/6/2015 10:51 AM
103	A bold plan was put forth that focused on network of frequent routes	3/6/2015 10:45 AM
104	My suggestion was to plan a hypothetical Metro bus network as if none were existing. And then see how to best align it with existing routes. While I see some of it in the two alternatives, I would have expected something bolder, such as new routing (even wired ones), the use of smaller busses that can operate on narrower streets.	3/6/2015 9:47 AM
105	If they had, neither of the plans would have seen the light of day. Specifically, elimination of 277 and tinkering with the 255.	3/6/2015 8:03 AM
106	I don't know if my feedback had a marginal effect on the good work Metro was already doing.	3/6/2015 12:33 AM

Q60 I believe that taking the time to share my views will result in better decisions about bus changes that will be made following the start of Link light rail service to Capitol Hill and the University of Washington’s Husky Stadium.

#	Responses	Date
1	Nope. Thanks for asking for feedback! I appreciate contributing to the planning of the Link Rail, despite my limited knowledge on the subject. I'm looking forward to using it next year!	4/1/2015 9:58 PM
2	(not about outreach) My son will be using Metro exclusively next year to get to high school, so any changes will greatly affect us.	4/1/2015 6:07 PM
3	still needs improvement	4/1/2015 2:31 PM
4	At least you've asked. That is appreciated.	4/1/2015 1:50 PM
5	I believe this last question above won't result in useful information. Maybe if 43 were "Do I believe Metro will listen and fairly communicate the concerns?" might be a better way to ask the question. Also question 41 wasn't possible to answer, since there may have been time, but since the questions asked and options to check were often leading or misleading the real question is in the word "meaningful" and that's impossible to know. It would be good before questionnaires are put out to get a review by several folks who are not in Metro, have a good understanding of the system and reflect different points of view with the goal to try to remove any bias that is inherent in many of the questions and check boxes in this questionnaire. This questionnaire is an improvement over past ones but I still believe it will just reinforce what Metro wants to hear because of the way the questions have been asked. It would be important to acknowledge in any summary that you present where options of answers you provided are inherently wrong (as pointed out in my previous comments).	3/31/2015 11:19 PM
6	I don't think that public input really matters considering the plans that were put forth doesn't seem to take into account actual public ridership data, nor does it take into consideration where people live (in terms of neighborhoods that are not as well known as some others). This survey is rather convoluted in how the questions were asked concerning the routes as, to really complete it, one needs to have the actual proposal before one - and those are somewhat convoluted in the writing (though it is difficult to write in words something that is actually a visible change to a route that is best presented graphically on a map.) All in all, though, there were sufficient opportunities for public input -- but, again, I'm not so sure any of it was taken into consideration when the two options were developed.	3/31/2015 10:53 PM
7	I really wish that there was more information about this earlier. I don't remember seeing anything at the University District Street Fair last year or at the U-District Farmers' Market. No tables set up at QFC or Whole Foods or Safeway where people are bound to go for errands. Why not do more tabling at high traffic locations	3/31/2015 10:17 PM
8	I haven't heard a lot about how the different alternatives might affect family ridership, or ridership with teens. I am concerned about increased transfers for these young people.	3/31/2015 10:16 PM
9	based on other occasions where outreach was encouraged it has an element of window dressing	3/31/2015 6:08 PM
10	As I mentioned, the survey and background information were unreasonably complex for a native-English-speaking person with a graduate degree who excels at test taking and who covered infrastructure, transportation, and other government documents for a nearby newspaper. If I can't digest and respond to this information with ease, how is an ESL immigrant with, let's say, little advanced education who relies on the bus supposed to respond intelligently. I would strongly recommend redoing this survey or providing an alternative form of response more-accessible to others from different backgrounds, only from my experience as a government reporter, I'm guessing you've already blown the budget.	3/31/2015 5:55 PM
11	I do not trust that king county metro has the taxpayers best interests at heart.	3/31/2015 5:01 PM
12	This outreach process has been great. I only wish something like it were done about a decade ago when SR 520 was being planned.	3/31/2015 4:45 PM
13	Yay Buses!	3/31/2015 4:38 PM
14	Buses/lightrails are the future, we must have them to continue moving in this city.	3/31/2015 4:14 PM
15	Thank you for doing it.	3/31/2015 3:40 PM
16	Thank you for hearing my feedback. Please do not cut route 43.	3/31/2015 12:51 PM

17	I honestly question whether anybody at Metro even cares about the needs of transit users in Seattle. Decisions appear to be arbitrary. When heavily used routes are moved or eliminated it is often in neighborhoods with politically active residents making many of us wonder if it's a kind of extortion -- to coerce us to demand higher funding. It is also obvious that Seattle transit riders are being punished for existing.	3/31/2015 12:16 PM
18	Most people seem unaware of all the changes that are coming. Only two light rail stations are being added, but a lot of routes are changing, so many people don't know they should be looking	3/31/2015 11:30 AM
19	If it weren't for the montlake newsletter I would have missed this.	3/31/2015 10:55 AM
20	How do I get notified via email about these changes?	3/31/2015 9:46 AM
21	You know, the old-fashioned way, door to door with a person and a clip board showing the homeowner possible changes would have been the best, at least for me.	3/31/2015 9:36 AM
22	I heard about this survey from a friend and our neighborhood blog. This is the first time I've heard that you are considering doing away with the 43 bus route. There are a lot of people who depend on this route, including me. It would have been a better outreach effort if you handed out flyers to all passengers of the 43 bus that asked them what they think about doing away with the route. In addition, this survey is poorly done. I had to keep all the nuances of "Alternative 1" and "Alternative 2" in my mind while going through it, and since I am unfamiliar with those nuances it was difficult at times. When I tried to leave the survey to look for a detail, I couldn't get back in without starting all over. Plus, the first section asks about "North Seattle" which I assumed included Montlake and the UW, only to find that there was a whole second section about those areas. That should have been made clear from the beginning. As for why I answered question 43, about whether sharing my views will result in better decisions on your part, I checked "somewhat disagree" because when I've been involved in city outreach programs before, it has ALWAYS been the case that decisions have already been made and that the city picks and chooses the feedback they get to sell others on what they've already decided. I'm hopeful that Sound Transit follows a different path, but not expectant that they will.	3/31/2015 9:29 AM
23	Pkease do not take away the 43 from Boyer to downtown and the University as it will affect us very adversely	3/31/2015 8:55 AM
24	I'm a bit late to the game having just learned about the proposed changes. Thanks for taking in feedback.	3/31/2015 8:53 AM
25	you are working hard on the propaganda... you gather feedback, then often ignore it. I generally feel more processed than listened to.	3/31/2015 7:38 AM
26	I'd also like to have the survey request what qualities people want for their transit. (Frequent? Ontime? Timed transfers? etc.)	3/31/2015 2:07 AM
27	Uses too much doublespeak. Elimination of routes or decreased frequencies or having to transfer when prior was direct are not "improvements", etc. Too much positive spin on changes rather than having people think for themselves.	3/30/2015 10:30 PM
28	The way this survey is set up, is hard to answer clearly about Option 1 and Option 2 with the Options only explained once in the survey. You should keep a pop up box link as reference of options 1 and 2 when asking the pro/con questions and opinions on the various route proposals.	3/30/2015 10:02 PM
29	Nothing any one says will change any thing. The City and I bet the County just go thru the motions so it can be said "we asked" and then you go right on with what ever you already wanted to do or what Amazon wanted you to do or some other developer. The changes on Dexter Ave N have made it a mess, the Mercer Mess is still a mess Broadway is a mess and will be such fun once the light rail starts blocking it up, making 23rd more narrow will be a mess but how wonderful a few people on bikes are happy. Seattle is a dumb City! Sorry to say that but it is only getting worse.	3/30/2015 9:53 PM
30	I do not know the above, but hope it would, otherwise I wouldn't have bothered. Finding this feedback form on your site is not very easy.	3/30/2015 9:08 PM
31	Based on other transit projects, I doubt that you pay any attention to these surveys.	3/30/2015 8:56 PM

32	In my experience, agencies such as Metro ask for input but it never results in any meaningful output--the decisions have been made already and surveys, etc., are most often just window-dressing to avoid uproar. Seattle has the BEST bus drivers and the WORST transportation planning and use of funds. The duplication of transportation agencies is a disgrace. There are many examples of systems in use in other cities, but Metro re-invents the wheel in planning. For low-income people, getting around is expensive and irritatingly baroque. When I worked at Children's Hospital, I could drive there from Montlake in 6-7 minutes versus taking a bus into the University District and then transferring to another bus to go out Sand Point Way N.E--a process of over an hour. Guess which method I used? Now that I'm retired and a bit disabled, the sheer lack of convenient access to routes throughout the city is maddening. Oh, about "Outreach"--if the Montlake Forum had not run info on this, I would never have known that Metro was asking for "input". I watch TV and read the newspaper every day, but didn't know about this. Why don't you send information to the neighborhood Internet forums? Nearly all neighborhoods have them. As far as going to a public meeting, it would depend on whether I could get there by bus...	3/30/2015 6:55 PM
33	Thank you for soliciting public comment!	3/30/2015 5:49 PM
34	Love the concept and getting public feedback, but don't trust you all enough to think that my opinion really matters.	3/30/2015 5:16 PM
35	I never heard about the November meeting (when and where was that?!). And the proposed public "listening"/information sessions about the changes are a joke. I am a professional in community involvement, and we aim to have our public meetings, open houses, etc. at times when the COMMUNITY can make it. Wednesday morning?! at prime commute time? Seriously, not many who regularly use the routes can attend because they're USING the lines at that time! Maybe your management isn't allowing special dispensation for staff to conduct the meetings in the evening, e.g., 6-8pm, or on the weekends, e.g., a Saturday morning, so that professionals, families and others with commitments preventing them from attending the proposed listening sessions. However, there should be some flexibility when you're working with a community IF you are truly wanting their input and that input is truly valued in what decisions will be made.	3/30/2015 3:56 PM
36	NOT ENOUGH NOTIFCATION TIME IN ORDER FOR PEOPLE TO CONSIDER CHANGES AND PARTICIPATE IN THE OUTREACH PROCESS.	3/30/2015 3:09 PM
37	I'm not sure there was quite enough community meetings for this - there were none, for example, up around Wedgwood. I also wonder if there was really enough time to digest what is being proposed here.	3/30/2015 2:44 PM
38	I think it is great to be able to give my feedback. Thank you for "listening!"	3/30/2015 2:04 PM
39	I fear most bus riders will not get to fill this form. It is lengthy. Bus riders are not generally middle-class people!	3/30/2015 10:09 AM
40	Sincerely hope it's heeded.	3/30/2015 8:57 AM
41	Thanks for taking the time to come up with such an ambitious plan. No matter where things go, it's reassuring to be dealing with an agency that's not afraid to upset the status quo and rebuild the transit network with smart and reasonable goals in mind.	3/30/2015 5:03 AM
42	Metro often doesn't stand up to a vocal minority of passengers who complain about losing "their bus". Transit service needs to be focused in the densest areas of the cities. Those of us who live in more spread out areas can use Car2Go/Bikes/Longer walks/Taxis to bridge the gap. Park & Rides are fine, but also take away resources from Metro's core competency: Providing bus service. Park & Rides that are oversubscribed should have parking fees	3/29/2015 10:56 PM
43	Thank you for making sure this opportunity for my feedback is available	3/29/2015 9:36 PM
44	I did not know this survey was available or about the Alternative Plans for change until March 29th when my neighbor told me about the survey.	3/29/2015 6:22 PM
45	Great job with outreach! I hope lots of people are responding so they can give input on their transit needs, too.	3/29/2015 3:26 PM
46	For older people who are not used to doing things online, going hrough thisquestionnaire was a painful process, done only with assistance. All the print was too small for me. Pages and pages I had to go through. Hard to understand some of the cocepts.	3/29/2015 1:20 PM
47	The fact that you didn't list Beacon Hill as a neighborhood is baffling to me & makes me question what good these surveys do.	3/29/2015 12:11 PM
48	your outreach is appreciated.	3/28/2015 9:38 PM

49	In general, Seattle government makes a decision and then notifies the citizens that they can share their ideas, sometimes giving a "choice" of two unhelpful options. The people heard from in the "early" information collecting are usually special interest lobbying groups (like Cascade Bike Group) or friends of city planners. It takes a while for the situations to filter down to the people who will be most affected. Since it will be at least six years before the Roosevelt transit station is completed, you need to think about the issues but people can't yet tell how things will work out. I appreciate that you at least asked ordinary people to weigh in before the "set in concrete" lines on the maps are drawn.	3/28/2015 7:49 PM
50	Many people bought or rented a home because of excellent bus service. Both Alternatives would take away options for many of those who travel to the University District from Olympic Hills, Jackson Park, Victory Heights, and Pinehurst. It is a betrayal of Metro's strongest supporters. 15th Ave NE (between NE 143rd and NE 115th Streets) has ten thousand condos and apartments within 1/4 mile from the road. Depending on what you decide, I might have to start commuting by car, as well as buy another for my household.	3/28/2015 2:54 PM
51	It would be valuable to provide ridership data for each of the routes. For example, how many people are riding the #8 versus the #11 and how does this map to frequency.	3/28/2015 1:19 PM
52	Please see my comment for alternative 1. This is an added comment I already participated in the full survey.	3/28/2015 1:00 PM
53	As a regular rider in the northwestern quadrant of Seattle, it is difficult to address specifics about alternate route choices in central and NE Seattle, except for those that would affect our access to Capitol Hill and the U-District. In a selfish vein, I could prefer that all local routes in the latter areas be eliminated so that the east-west trunk lines are improved. However, we are dependent on our "own", often hapless but accessible, north-south routes, and would want them improved rather than gutted! The outreach being focussed on two alternatives for resource allocation is also frustrating, as it doesn't address serious Metro shortcomings such as the distance between transfer stops, the chronic irregularity of northwest bound routes, and the supposed efficiency of endless routes through congested areas.	3/28/2015 11:17 AM
54	It's great you are doing outreach. Thank you. I hope it is not too late for additional considerations from the south to downtown (and the U District).	3/28/2015 8:43 AM
55	Be nice if I didn't have to drive to the overcrowded Kenmore park and ride. If would be cool if more bus servirlce ran around the Kenmore area.	3/28/2015 8:08 AM
56	hurry it up for goodness sake.	3/28/2015 1:42 AM
57	I work at seattle childrens, which has always had a strong commitment to less driving/ more use of transit. It is really hard to get from mt baker to Childrens using the current system I have to do a lot of walking and always take at least 2 different forms of transport. Please prioritize a way for us to get from the university light rail station to childrens as this would be an amazing situation!	3/27/2015 9:37 PM
58	Earlier bus routes out of Duvall and more direct to Childrens's Hospital. Most nursing staff start at 7am, and we are off at 7:45pm. If I were to take the bus now it would take me 2 hours and I would arrive at 8:15 am. I can drive it in 35 min in the am. No benefit at all for me to ride the bus with the current public transportation.	3/27/2015 6:10 PM
59	Thank you!!	3/27/2015 5:47 PM
60	These are cuts, plain and simple, to NE Seattle transit. These are the cuts we voted to stop by raising our sales tax 0.1% in Prop. 1. It is so lame to propose the same cuts and call it better service and oh by the way keep the higher sales tax. LAME.	3/27/2015 5:20 PM
61	Being unable to look at alternatives 1 & 2 without the survey crashing is a perfect example of how bad Metro's IT cababilities are. This is Seattle! You should have access to lots of competent IT people! And along those same lines, why can't Metro make a Trip Planner that works. The old one was FAR better than the new one!!!! Especially when trying to use it on an iPhone!	3/27/2015 4:02 PM
62	Make your survey shorter. This is inappropriately long for people who work.	3/27/2015 3:44 PM
63	it is really hard to understand this material. there is probably no way around it, because it really is complicated, but I'm still not sure I understand all the impacts.	3/27/2015 3:21 PM
64	Thank you!	3/27/2015 3:04 PM
65	I do not recall receiving any mail regarding these proposed changes. As a Pike/Pine resident and member of PPUNC, I pay attention to these things. It might have been overlooked but I don't believe it was. Fortunately my friend is a transit planner, she knows my mom, and sent me the link.	3/27/2015 2:49 PM
66	COORDINATE via CITY DPD. PLEASE.	3/27/2015 2:41 PM

67	1. To achieve the frequency goals of Alternative 1, Metro must have a much more efficient payment system in place. Way to much time is lost loading and unloading passengers because of payment. 2. In concept, I prefer Alternative 1, even though I personally wish it had better connections for me to the light rail station. (Some bus routes that would get me there are moving further from my location, e.g. 48, and my new options will require more walking and more connections. (1/4 to the bus; 1/4 mile from Stevens Way to the light rail station. This makes is unlikely for me to use Metro to get to the light rail station.) However, Alternative 1 improves dramatically for me in 2021 when the Roosevelt station opens.	3/27/2015 2:35 PM
68	This survey was very long -- personally would prefer shorter surveys, more frequently (10-12 questions).	3/27/2015 2:33 PM
69	Don't remove areas of service. Please don't assume that just because light rail opens up (yay!) that routes will become obsolete; those in-between points still need to be accessible and that's where good bus service comes in. I've ridden the bus for commuting and personal purposes for the last 15 years, and much prefer using Metro to driving around Seattle.	3/27/2015 2:28 PM
70	I think the staff that attends the outreach events are great resources. Very welcoming and good at asking questions to get the information that some people have a hard time articulating.	3/27/2015 2:04 PM
71	I thought I had already taken this survey, but it seems you did not receive the results. I'm confused.	3/27/2015 1:56 PM
72	I'm highly skeptical of any plan that results in me having to transfer buses more often, regardless of how often they are supposed to arrive. One snarl and all those transfers will go right out the window and you'll be left stranded, waiting for who knows how long in some strange part of town that's in between wherever you want to be. At least with being on one bus, I always know where I'm headed and approximately how long it will take me to get there. I've avoided transfers like the plague for several years now and it would take A LOT for me to consider changing that. Like buses would have to show up on the dot and every 10 minutes or sooner for me to consider taking routes with transfers.	3/27/2015 1:48 PM
73	whatever the reason was to cancel route 265 it has caused for many people an issue and many people now have to drive or walk far to work. some of our patients have issues to come to get treatment.	3/27/2015 1:20 PM
74	I think you should make the results from the polls known and make it more available. Maybe have bus drivers pass out the information or have it available on the buses because I didn't know until my friend told me and I went on your website.	3/27/2015 1:16 PM
75	Thank you for letting me share my preference for Alternative 1 over Alternative 2 in Northeast Seattle.	3/27/2015 12:52 PM
76	I think that being in public places is a great start to listening to the public, but also being more open about where the blog is through emails, or tell the email viewers "This blog ____ is where we will update more than our monthly email so you do not get spammed with emails."	3/27/2015 12:20 PM
77	I hope my views will result in better decisions.. Keep the 11!!	3/27/2015 12:09 PM
78	I would scrap the concept all together, and redesign the light rail as a "spine" of the system, and use the buses as the "ribs" or branches off of the spine. I would set up larger transfer stations at each stop to facilitate transferring from one route to another. Think of the transit system of Mexico City, where the trains are the mass transit, and buses get people from the train to the farther outlying areas. It is highly efficient and very convenient.	3/27/2015 12:05 PM
79	I bus infrequently, so I would not know have known about this if my employer hadn't emailed me.	3/27/2015 11:10 AM
80	I think the decisions will be made regardless of rider feedback. Keeping riders happy does not seem to be a priority in this region.	3/27/2015 9:37 AM
81	This survey needs to be mobile-friendly, it's inaccessible on iPhone.	3/27/2015 9:31 AM
82	I don't think Metro is run well. Bad management	3/27/2015 7:53 AM
83	THANK YOU for asking the public for help. It makes me feel like Metro is really trying to do what people want, not just what is easy. We appreciate your efforts.	3/27/2015 7:36 AM
84	Looking forward to taking the Link light to the University district. Just wish they had better parking at the Tukwila Light rail station. It is already full to capacity. Maybe they should make a garage to accomodate more vehicles.	3/27/2015 7:29 AM
85	Thank you, I do hope you take our concerns in to consideration. Current access to Seattle Children's is inadequate to support the over 4000 staff there on a daily basis and the over 2000 patients, families, & visitors who come on a daily basis.	3/27/2015 6:55 AM
86	Too many questions - You are evaluating the evaluation process and thereby making it worse. Show a few clear tables or maps to help people understand their proposals and ask for their concerns and suggestions. A 40+ question survey is a serious deterrent to future participation.	3/27/2015 6:53 AM

87	I appreciate it.	3/27/2015 12:24 AM
88	Keep up the good work!	3/26/2015 8:41 PM
89	I just attended the Public Comment meeting held at University Heights this evening and wish to compliment DeAnne Martin and the young gentleman (I believe his name might have been Jeremy?) who wrote my suggestion down about the possibility of a "loop" for the Route 75 for letting passengers off at the U Link Light Rail Station instead of on Stevens Way -- they both "really" listened and encouraged suggestions & comments. I feel Jack really "knows his stuff", but is a little narrow in accepting comments, ideas & concerns from the ridership he should be striving to listen to and help. Thank you for hosting this public comment oppoutunity.	3/26/2015 8:26 PM
90	Thank you for asking! I feel really validated and excited about public transportation!	3/26/2015 4:44 PM
91	I feel with the great influx of people that will occur at the University of Washington light rail station near the stadiums, there should be buses that run from there to U-village and from U-Village to Seattle Children's hospital	3/26/2015 4:43 PM
92	Thanks for asking! More frequency is better! I don't mind walking but I do mind waiting!	3/26/2015 3:35 PM
93	I think its great that you are trying to reach more of the public in order to make it more interactive and reach a more knowledgeable grounds as to how people feel about the proposed changes and what future changes they want to see. Hopefully, enough people care enough to provide feedback that will help the public transportation service with their decisions. Keep it up!	3/26/2015 12:34 PM
94	Metro usually only does what they want to do and does not really care about feedback. I have been complaining about the double buses on the 311 in the morning and single in the afternoon for over one year and all I ever hear is we will pass on your concerns, but nothing changes.	3/26/2015 10:48 AM
95	More frequency on the buses. People drive to work because they can go get in their car and leave work right away. As a bus rider, I would like to do about the same, go to the stop and a bus will be by within minutes.	3/26/2015 10:09 AM
96	Not many folks are aware of the proposed changes and this was clear when I asked people on the bus, if they had taken the survey. Most people think the changes are for Seattle and north seattle neighborhoods and the Eastside routes are not affected. There needs to posters/info posted on bus routes that have changes proposed.	3/26/2015 9:09 AM
97	I would use the bus if I could take it directly to my work SCH from bellevue	3/26/2015 9:02 AM
98	I cannot believe anyone will actually consider these responses.	3/25/2015 9:59 PM
99	I will now search the web site to see if I can find the proposed 71 route changes. I started the survey but could not get back to the main Metro site to check for specifics.	3/25/2015 9:20 PM
100	None of the planning that I can see recognizes that people travel from NE Seattle to NW Seattle. WE DO!!!	3/25/2015 8:02 PM
101	Thank you for taking the time to ask people for feedback and needs. I can't wait for a direct route to seattle children's from the eastside!	3/25/2015 7:00 PM
102	Thank you so much for asking for feedback and for taking it into account!	3/25/2015 5:28 PM
103	I think the plans were already made and this process is merely a sop to the public. No one appears to know how people actually get where they want to go.	3/25/2015 3:48 PM
104	thanks!	3/25/2015 3:46 PM
105	Please continue the 255 up to Magnuson Park and frequent 75 route service.	3/25/2015 3:29 PM
106	I really don't believe that the people who ride public transportation in the Puget Sound region have any control over the decisions made about funding or service changes. Perhaps things would be better if there were just one transit authority serving the entire region, but the multiple, often competing, agencies just make it harder for riders to have any say in the services they desire and require.	3/25/2015 3:25 PM
107	My customer service experiences with Metro have been extremely negative. While I can hope for better service, the inability of Metro to solve a simple problem of the Access vans blocking the exit at the Bothell Park and Ride leave your ability to make good decisions about customers in doubt.	3/25/2015 3:10 PM
108	Let's do Seattle proud and create a usable and useful transportation resource for future generations!	3/25/2015 1:49 PM
109	I appreciate the outreach but will be interested in seeing how public sentiment will be used. I would love to be able to use mass transit more but with the multiple transfers I need to take to get from my home to work (Seattle Children's Hospital), it just takes way too many to make it worthwhile. I can drive there in close to half the time if I drive separately.	3/25/2015 1:41 PM

110	na	3/25/2015 1:35 PM
111	I really appreciate this survey being sent out, and hope that it proves to be valuable insight for you.	3/25/2015 1:29 PM
112	I hope it does, but I'm not sure it will.	3/25/2015 12:49 PM
113	Please listen closely to what I have said, and what other eastsiders are saying. We're all going to stop riding the bus because of this. I suppose that's really what you want though. It's far to logistically challenging to have to coordinate transportation from the eastside to the Puget Sound's mecca of Seattle.	3/25/2015 6:49 AM
114	At the moment I would like to go back to ensure that I expressed the need for transit on 15th Avenue NE. I filled this out several times and lost my comments when I attempted to go back.	3/24/2015 11:57 PM
115	The existing Central Link Light Rail has a lot of stations. These stations are in neighborhoods. These neighborhoods were not listed in questions 1 and 2. It seems like this survey would have been a good opportunity to find out how people in those neighborhoods would use the new U-Link and the connecting bus service.	3/24/2015 10:27 PM
116	I lost all of my comments three times to site crashes or accidentally hitting backspace. It sucked and if I hadn't been so concerned I would have given up and not finished the survey. I tried it first on my phone and although it let me, the survey really did not work well on the phone and I had to go back and do the survey at home rather than on the bus (again, could have been easier to fill out)	3/24/2015 8:35 PM
117	Thank you for making the effort to contact riders and ask for their feedback. I really appreciate it.	3/24/2015 6:13 PM
118	Please either extend light link rail to Kirkland or do not change routes 255, 252, 257.	3/24/2015 5:59 PM
119	You should provide more narrative about the proposed changes to individual areas and to individual routes, as opposed to generalized statements about the overall intent of an alternative.	3/24/2015 4:34 PM
120	As mentioned, although some of your tools were useful, it was hard to really grasp the impact on my specific situation. seattletransitblog.com helped with that somewhat. These plans are pretty confusing. It is not clear to me that you have adequately thought about how people will access transit if they can't walk farther. I don't know what your outreach has been to the disability community.	3/24/2015 4:30 PM
121	I think your outreach process is not bad. However, much of the benefits of the transit service you are proposing will go to those who do not yet live in Seattle, or do not yet use the bus. You need to find some way of giving more weight to future transit users and less weight to existing transit users. Those who are existing transit users will be inclined to advocate for no change.	3/24/2015 3:42 PM
122	I hope it's not too late for our opinions to matter.	3/24/2015 3:26 PM
123	Your questions are too vague.	3/24/2015 1:26 PM
124	I don't have a good view into how this will be used, or the weight it carries in decision making.	3/24/2015 11:33 AM
125	you will find it hard to sift through the comments (although the secretive way you are proposing to eliminate service and do major restructures with only vague public hints about Link-related service "improvements" may keep the number of comments low). For longer comments such as the ones I made, I suspect you will only see a truncated version. You obviously didn't have enough time to really work through multiple restructure scenarios, instead just building on the cutback scenario you built for last year's conditions. Speaking of which, since only Seattle voted to more revenue, where are the remaining county-wide cutback proposals? And why are you in such a hurry with these "Link-related" proposals that you couldn't work in at least some of the Seattle improvements we voted for last year? They shouldn't be divorced from this process when you are proposing cut-backs like this!	3/24/2015 11:09 AM
126	In-person meetings need to be in every neighborhood at times that are available for low income workers. As a university student, i have the opportunity to respond to this survey. However, I know that there are many who rely on the bus system who do not have the time or resources to respond to this issue. It is these people who you are affecting the most.	3/24/2015 8:57 AM
127	The only way to improve traffic is to increase transit not cut back and cancel routes that are well used and busses are always full to the brim.	3/24/2015 8:29 AM
128	This type of survey is a good way to go. Perhaps include a short video (under 3 minutes) of the proposed changes that people could or could decide not to watch.	3/24/2015 8:13 AM

129	Downtown Seattle is the prime transit corridor for public transit in this region. There are many jobs in the region in the suburbs (notably Microsoft in Redmond) and people rely on access to the downtown corridor to plan their commutes. The U-District, while obviously closer to the west end of the 520 bridge, is not a legitimate transit hub. Having people leave from a transit hub like downtown, only to have to transfer to a different transportation mode in a less dense area, will discourage people from taking that route. One day maybe light rail will extend from downtown to the employment centers on the eastside. Until then, don't force a transfer on people that have planned for and gotten used to a direct route.	3/24/2015 3:10 AM
130	employer notice followed by several meeting in the next few days - none of which I can attend.	3/23/2015 10:34 PM
131	Thank you for your efforts to re-examine our bus transit system as the light rail system is expanded. A commitment to monitor success and adjust if needed as necessary will be important.	3/23/2015 9:26 PM
132	It seems very important to have service to get ready for implementation of EASTLINK when it comes on line. My concern is that I would like to be able to go from the Eastside to the UW and by means of LINK RAIL TO DOWNTOWN SEATTLE EASILY.	3/23/2015 7:58 PM
133	the only demographic that should matter is whether and how often I ride the bus. These decisions affect every person that relies on transit for transportation, whether or not they have a car available, or what their income is, or what their income level is.	3/23/2015 6:00 PM
134	I hope you listen to those of us who use the bus on a daily basis. We want convenience and good commute times. Don't make it harder if you want people to take transit. I already have to arrange my work schedule around the bus schedule.	3/23/2015 5:30 PM
135	We need more light rail and more connectivity between Eastside locations and downtown Seattle, Madison, UD and Capitol hill!	3/23/2015 4:59 PM
136	I doubt that anything I say will influence what you intend to do; I believe it's just pro forma to invite feedback to meet funding requirements. These changes, if implemented, will have a real and very negative impact on my ability to get around, and the loss of non-transfer options will cause me real pain and misery.	3/23/2015 1:23 PM
137	Always questions if the feedback is taken seriously or not. There are so many aspects, so many small (tiny) stakeholders (passengers) to please, so at the end, the "professionals" are making the decision regardless.	3/23/2015 1:17 PM
138	So far, so good.	3/23/2015 1:01 PM
139	Thank you for listening and considering my point of view.	3/23/2015 11:25 AM
140	Seattle has historically done a terrible job of creating effective transportation options for roads, bus, ferry, train, link, light rail, trolley, SLU Transit, the tunnel to replace SR 99. The engineering of these projects, entering and exiting highways and byways on the left, removing the trolley which would have moved cruise travelers to downtown, increasing SLUT railways and no one uses it!!, tolling SR 520 and eventually I 90, loosing lanes to bike lanes that bike riders don't use, closing Bell St to through traffic and now the street that runs in front of Amazon in S. Lk Union - who is making these decisions? They are not serving the commuters who use mass transit. Look to other cities with transit systems that work: Portland, San Francisco, Chicago. We should have looked at Boston to determine the tunnel was a bad idea, and our tunnel is being built on 100+ years of silt - why is anyone surprised that buildings in Pioneer Sq are shifting? Seattle has continued to make bad decisions on the back of tax payers, starting with the I 90 bridge that sank in 1990 to the tragedy that is the SR 99 tunnel - All On The Backs Of Taxpayers. When will Seattle get it right?	3/23/2015 11:01 AM
141	I want and expect good government and a good public transportation system options. Seattle should not be lagging behind a city like Portland - but we are. I am sure all the decisions are not easy. But you all are paid to make positive tough decisions. When you do consider all the areas your decisions impact. Have planning ideas in place which we all can embrace not just a few - you can do that.	3/23/2015 8:09 AM
142	Please put this survey in its own web page. Clicking off the embedded window will close it and loose work. It is unusable on an ipad or other mobile device.	3/22/2015 11:06 PM
143	I'm glad you're reaching out (really reaching out) - putting staff on the metro platforms to encourage people to respond and to explain why is outstanding....please keep doing that.	3/22/2015 6:17 PM
144	Thanks again!	3/22/2015 5:23 PM
145	In my experience (I've lived in Seattle for the past 20 years, and several times previous to this), King County Metro Transit has solicited opinion, then ignored it. It almost seems like a game to Constantine. I'm not confident that this won't be another huge sinkhole of public money.	3/22/2015 2:29 PM
146	Alternative 1 is presented in a far more positive light than Alternative 2	3/21/2015 11:41 PM

147	Thank you	3/21/2015 10:17 PM
148	More information at bus stops would be helpful	3/21/2015 3:00 PM
149	i don't believe y'all actually read these but if you do i am very glad. i want the people here to be served by these buses.	3/21/2015 10:59 AM
150	Metro rarely considers views of transit riders. You only plan on how to revise, revise and shorten all current routes without regards to current established riders.	3/21/2015 10:48 AM
151	I hope any of this actually matters.	3/21/2015 12:22 AM
152	I worry that UW students/faculty/staff aren't going to be aware of this. I noticed the posters at the bus stops and made note in my mind to fill out the survey, but I have a feeling that most people see it but then forget. Any way to make it as little effort as possible for people to get to the survey would increase the likelihood, particularly students, of filling it out. I received an email but I think it was through a Metro-related list serve and not UW. Multiple emails tailored to UW people (as well as other college campuses in the city) with the survey link would really help. Thanks for the opportunity to give input!	3/20/2015 11:56 PM
153	Expanding the link light rail service to University of Washington would not only save so many commuters time and money, but reduce traffic and congestion. It is upsetting that so many individuals work or attend UW, but the light rail service does not stop at UW. There for commuters are taking their car to park at the lot, hop on the rail, then get on a bus. Three modes of transportation just to get to work. It would be nice to only use two.	3/20/2015 10:47 PM
154	Please understand that the people who will show up to hate Alternative 1 will be a very vocal minority. People defend existing service patterns because they fear losing a specific route or service pattern they use now, or may value in existence but don't actually use. If you were to reverse the situation... imagine it's the year 2020 and we had implemented Alternative 1, but were proposing to go back to what we have now... how many people would show up to protest that plan? Reducing the frequency of the 8, 48, 49, the loss of a direct SLU to Madison Valley connection, or LINK to Madison Valley connection, etc?	3/20/2015 8:41 PM
155	Lipstick on a pig. I will fully expect King County Metro to continue to fuck over Capitol Hill like it's been doing ever since Gary Locke and Ron Sims ripped it out of Seattle City government in 1995 and moved it under King County government. I am not in a Union, I am not affiliated with Metro and have no family members in Metro. I'm just a long term resident that's completely tired of your bullshit. RESTORE THE 47 NOW YOU ARROGANT FUCKS	3/20/2015 5:48 PM
156	Better engagement to those who use the most popular routes impacted - Many people who ride daily along these lines are completely unaware of the possible changes listed.	3/20/2015 2:00 PM
157	Please keep up the good work! With ST 3 on the horizon and our city's dire need of grade-separate transit, King County Metro and Sound Transit need to keep the pressure up in Olympia and need to continue informing the community at large as to what they can do to help the process. I fully support the new ORCA Lift program which I think goes a long way to off-set the fact that we have some of the highest fare rates in the country. I would like to explore ways to deal with the fact that we only recoup some 30% of costs at the farebox without making transit less accessible to low income families (ORCA Lift addresses the latter fairly well). I would like to explore ways to move Metro away from generating revenue from the ever-volatile sales tax. Well, a boy can dream right? Thanks again for all your hard work! I love living in a city where I can choose to live car-free and work in a different city (Bellevue), as frustrating as it can be at times.	3/20/2015 1:45 PM
158	I think you'll do whatever you want with no regards to how it impacts riders.	3/20/2015 1:43 PM
159	Please adopt Alternative 1	3/20/2015 1:31 PM
160	This survey is too long! Many will be turned off and won't contribute.	3/20/2015 11:21 AM
161	Honestly, I'm still doing this on the off chance my voice joins with others to be heard. But I don't believe I can make a difference, it seems like the decision is already made :(3/20/2015 10:44 AM
162	Metro Seattle / King County is a fast growing region getting crowded with people and cars. We need an affordable, accessible, and fast way to commute. This area is a great place to live as long as residents can get around while not polluting the air or making a paved nightmare, full of traffic jams.	3/20/2015 9:07 AM
163	Glad that you are soliciting feedback.	3/19/2015 10:32 PM
164	36 questions is a long survey, although I realize that I didn't complete all questions on all routes. Progress bar? Ability to access metro website directly from survey for additional maps and illustrations?	3/19/2015 10:11 PM
165	I HOPE that my comments will be seriously considered. :-)	3/19/2015 10:05 PM

166	It might be better to more clearly state what exactly goes into the alternatives in the course of the survey? This might be tedious for people who've done their research ahead of time (which I should have done) but would help people like me who jump on surveys without doing much prep-work. :)	3/19/2015 8:33 PM
167	I think you're handling the outreach process exceptionally well, given how generally demanding the community at large seems to be about being able to provide that feedback, and how conflicted it can be when given.	3/19/2015 7:07 PM
168	Be more specific and fair about announcing changes, affected bus routes and inhabited areas via posted rider alerts; bad or good.	3/19/2015 7:02 PM
169	Please consider a shuttle and hub concept in your planning. I wouldn't mind transferring if service was frequent - I think it wuld make commutes faster and more economical. Thank you	3/19/2015 5:58 PM
170	I'm most excited about being able to take light rail to the airport!	3/19/2015 4:47 PM
171	Thanks for asking!!!	3/19/2015 4:05 PM
172	Before sending the link to the survey - make it more clear where to go exactly for the more detailed info. I was directed to just the 2 descriptions of the Alternatives.	3/19/2015 4:01 PM
173	I would like a response to this survey, if possible, and I might be intersted in coming to a meeting to talk about directly.	3/19/2015 3:34 PM
174	It seems to me that your alternatives don't address the issue of the light rail services for Eastside bus routes. It's better to keep those routes unaffected.	3/19/2015 3:30 PM
175	Interactive map was not particularly useful, at least for someone with my limited technical skills	3/19/2015 3:04 PM
176	The process itself seems pretty good. Can't say that I was not informed about this. METRO will have to convince folks that Alt. #1 is better [which is what I think METRO would like to see]. One way is to tell us about all the amenities that will be there at these "major transfer stops" along the newly consolidated routes--eateries? shops? METRO security at night? Please let us know.	3/19/2015 2:13 PM
177	na	3/19/2015 1:52 PM
178	There needs to be more clarity about what date these changes will be put into effect. Also, is this the plan for just the new underground light-rail? What about the changes that are coming because of the new above-ground light-rail on 1st and Capitol Hill? Are there 2 sets of changes to routes coming with the opening of the two new light-rail implementations?	3/19/2015 11:18 AM
179	no comment	3/19/2015 10:52 AM
180	I wish there was more respect/priority given to the good citizens of Ballard.	3/19/2015 10:24 AM
181	I think you should be presenting bus route changes in Maple Leaf to the Maple Leaf Council neighborhood meetings. It's a really bad idea to eliminate bus service from 5th Ave NE and 15th Ave NE in Maple Leaf.	3/19/2015 10:07 AM
182	It is difficult to believe that opinions from actual riders will figure into anything at all. Primarily, politics and big business will determine where the lines go and how.	3/19/2015 9:18 AM
183	Please recognize that transportation is part of a larger issue of public health and quality of life. In our area, with the growth in the metro area and especially since the tolling of 520, car traffic, and all of the ills that accompany it, including air pollution, noise pollution, pedestrian deaths, and travel delays, have all increased. Mass transit can reduce these problems. So in your planning, I urge you to think larger than simply ridership on your buses (though clearly that is important and related to these issues).	3/19/2015 9:02 AM
184	I'm not sure whether my opinions truly make a difference because unless those making the decisions use public transportation, they would not understand or appreciate my concerns. I am trying to be a good steward of this earth by driving a hybrid to my park & ride and catching a bus into work. Can you say the same?	3/19/2015 8:27 AM
185	Keep up the good work Metro. I hope one day we have faster, timely, service with less wait times	3/19/2015 5:18 AM
186	I look forward to using the light rail to travel from home in Renton to work at the U of WA.	3/19/2015 4:29 AM
187	The link rail to UW seattle stadium will benefit many students including myself, as i see the bus can be very crowded at times and people even have to wait for the next one.	3/19/2015 12:03 AM
188	After my experiences with the Parks department in Maple Leaf, I have little optimism that Seattle City services actually listen to their local constituents.	3/18/2015 10:50 PM

189	I attended local meetings when changes were proposed to replace the 358 with the E line. It was clear that Metro did not listen to the vast majority of opinions expressed during the meetings. So I don't have much hope that Metro will pay any attention to survey results either, but maybe surveys carry a bigger impact than written and verbal feedback during public meetings.	3/18/2015 8:52 PM
190	Not really a big fan of metro for the most part due to safety issues with crazy passengers. I honestly feel unsafe riding the bus sometimes, and the advertising on bus ceilings among other places is extremely obnoxious. Fares are MUCH too high.	3/18/2015 8:15 PM
191	Thanks! I love Metro. Thanks for taking me to and from home every work day for for the past 18 years.	3/18/2015 7:43 PM
192	In the last election, you played budget games with the voters. Not impressed.	3/18/2015 5:08 PM
193	This was quite complicated.	3/18/2015 4:27 PM
194	please remember that although the u of w transit hub serves a lot of folks who work at the us, not all riders who have to pass through this mess want or need to stop off there. there are plenty of folks who need to get downtown.	3/18/2015 3:45 PM
195	Thanks for you hard work!	3/18/2015 3:32 PM
196	This survey was too long and may have the effect of people bailing out before finishing.	3/18/2015 3:29 PM
197	I would like more public hearings around the U-District or Husky stadium and perhaps in the early evening if possible so that I could get information and provide feedback in person.	3/18/2015 3:23 PM
198	I am a big fan of public transportation. I do think that the Madrona / Central District area does get overlooked. More transit options to get to hubs such as downtown, the cap hill station, and Montlake should be provided along MLK. Currently, all of Eastern Seattle has to walk all the way to 23rd to get bus service to these hubs. As we all know from historical research on consumer readiness for public transportation, almost no one is willing to take 3 buses to get somewhere, but 2 buses/trains is OK. Since many people who get to Montlake, or cap hil station, or then going to get on one more bus/train to get to where they actually want to go, all citizens should not have to walk more than six or seven blocks to get to a bus that takes you to one of those. I currently live on 37th Ave, and I have to walk all the way to 23rd. I will meet you in the middle and walk to MLK (aka 28th) if you can get me to cap hill station, and Montlake. Currently, I do have a way to get downtown, via the #2 bus.	3/18/2015 2:59 PM
199	None	3/18/2015 2:49 PM
200	This survey was extremely long and given the small window hard to follow. I really wanted to have a description of the changes next to me when answering questions.	3/18/2015 2:47 PM
201	An online survey is lame. Most people have better things to do on the Internet. Hold public meetings, LOTS of them. Record opinions of the public, the people who are your customers. LISTEN - why do you have preconceived solutions?? Don't float alternative 1 and 2 trial balloons without a "No Change" Alternative.	3/18/2015 2:43 PM
202	This survey was a good idea, but the sign in the bus with the URL was hard to read (the / was not noticed at first). But this survey is hard to use on mobile devices due to it being in a popup window.	3/18/2015 2:35 PM
203	I appreciate you taking the time to clearly poll the public's preference for public transit updates.	3/18/2015 2:29 PM
204	I know that Metro must get so many complaints, and so I appreciate that Metro is taking the initiative to gather information from the community themselves, and I hope that they really take it to heart. Thank you for considering my feedback!	3/18/2015 2:10 PM
205	Thank you for reading my comments. If any clarity is needed, please do not hesitate to contact me angelaljacobson@gmail.com. Thanks! Angie	3/18/2015 2:02 PM
206	Thanks.	3/18/2015 2:00 PM
207	I don't think you're really interested in hearing what the riders have to say, which is pretty sad.	3/18/2015 1:46 PM
208	In general, we need more buses. The city's traffic congestion is not going to be solved by bigger roads, or by tolls. It's going to be solved by having more readily available transit options. Whatever needs to happen to increase the frequency and availability of transit is what we need. I much prefer to take transit rather than driving, but right now I drive pretty frequently because transit is not a viable option. That needs to change. If my taxes need to increase to make that happen, then so be it.	3/18/2015 1:44 PM
209	I wish we had the system we had 25 years ago or was changed for better. I love to use the public transportation as I have for more than 25 years in greater Seattle area, but I have to drive now due to the service.	3/18/2015 1:43 PM

210	I really don't think my opinion will make much difference and that the decisions will be made with little to no attention given to these surveys. I would like to think I'm wrong, and that's why I filled this survey out, but I don't have a lot of confidence that Metro won't do what it considers best and not what's best for the riders.	3/18/2015 1:28 PM
211	Outreach seems to happen after decisions have been made. Build parking close to stations so that people can drive and get onto public transportation. It is insulting and infuriating to have to take additional buses just to get to LLR because there is no parking near the stations.	3/18/2015 1:21 PM
212	This is a complex set of changes to consider, so providing feedback is tough for me to feel I'm being thorough and as well-informed as I'd like. I'd be better able to prioritize my time in giving feedback if I knew if and how the feedback is going to be used.	3/18/2015 1:19 PM
213	I just feel that living on the south end of town it is making it harder to get to and from work and even enjoy what is happening in seattle.	3/18/2015 1:11 PM
214	Please keep up the good work. We depend on you!	3/18/2015 12:55 PM
215	I would love to see more paid outreach to take this survey via FB. I have seen a few UW employees sharing the survey, but no sponsored ads to hit the targeted demographics. I am fortunate to have educated friends who post these kinds of things, but imagine people who are less educated (and probably use the bus more) not seeing this kind of survey offering and missing out on an opportunity to have a say in future transit outcomes. Thank you.	3/18/2015 12:29 PM
216	Hopefully someone will read the feedback and compile the similar ideas and bring them to the table. Please hear me out. PLEASE do not make us walk any further. Us as in the riders of our city. As it stands if the 125 doesn't come for 35 minutes for me, I walk the 2 miles to my house from the 120 route. It is uphill on the way home and it really makes me not want to take the transit. Especially when I waited in the U District and transferred downtown to wait some more and then walk up the hill. Those days my 10 mile commute is about 90 minutes including the walk. I have actually ridden my bike faster. In general it is faster to ride my bike than take the bus but I can't do that every day. There are also people who are less mobile than I as well and they probably just can't ride the bus. It is not accessible for them. That is sad. Especially when we live 4 miles from the heart of our metro downtown area.	3/18/2015 12:23 PM
217	Why does Metro think it has to revise the whole Northend transit system at this time?? Makes for more confusion. Riders simply want to ride the buses for as short and a time as possible before getting on the quicker, more efficient light rail system. This is what is done in larger "real" cities. I have a substantial amount of experience with the Chicago CTA system, where I almost never was stuck riding the buses. I think Metro really isn't trying to provide good connecting service to the light rail.	3/18/2015 12:20 PM
218	Too complicated!!! Sorry. I know this is inherently complicated but sad to say that I don't have hours to commit.	3/18/2015 12:12 PM
219	The descriptions of the alternatives are not all that clear.	3/18/2015 12:07 PM
220	Out reach is not bad, but I only knew about the survey because I am associated with UW, which sends me email updates. Otherwise, I wouldn't know that Metro/Sound transit was looking for feedback.	3/18/2015 12:03 PM
221	In regards to question #35, I feel it's important to have a voice and speak my concerns. It's just unfortunate that I have an overwhelming feeling that my concerns and feedback will go to the wayside. I feel like Metro/Sound Transit will proceed with whatever they want regardless of the feedback given. Even though I've been a bus commuter for over 15 years, I'm losing joy in saving the environment since it's becoming more of an inconvenience and frustration.	3/18/2015 11:57 AM
222	I would have loved to hear more about this in the first round of outreach. Would also like clear updates and opportunities to add feedback (without attending public meetings- no time to get there). Although I have a car, parking in Seattle is unrealistic price-wise and so I depend on public transit to get to/from school and work. With big changes, such as those being proposed for the 16, my ability to get to school/work would most likely be negatively impacted.	3/18/2015 11:55 AM
223	Thank you for providing the opportunity to easily provide rider input. Metro seems to actually respond to input received from the community and that motivates me to continue to join the process. I receive info via my employer, UW, and that also makes it a lot easier to know what's happening and when we are able to participate. Great job!	3/18/2015 11:53 AM
224	Please offer more busses from overlake village to u-dub/seattle/northgate. Thanks!	3/18/2015 11:52 AM
225	Please consider having a representative at the UW tower during work hours to explain options and collect feedback. Many UW employees work here, and we are one of the farthest buildings from the new light rail station, so we will be impacted by service changes.	3/18/2015 11:46 AM
226	Too many questions.	3/18/2015 11:44 AM

227	Metro is, as the young folk say, awesome. You and your drivers do a great job.	3/18/2015 11:43 AM
228	No opinion until METRO shares the results of this survey along with its decisions. I wish SDOT involved citizens as proactively in its during the decision making process as METRO appears to be doing. All SDOT ever says is something like x number of accidents occurred in last 5 years; therefore, we decided to build y. That is using statistics to say what you want after the decisions have been made. I hope METRO is most honest and transparent with the citizens during the decision making process.	3/18/2015 11:39 AM
229	Unfortunately I do not believe that any of my comments will have any impact on this process. It seems like once a Metro-related plan is conceived riders matter very little.	3/18/2015 11:38 AM
230	Thank you for taking the time to ask, the increase in our community has really put a burden on all of our regions transportation systems.	3/18/2015 11:38 AM
231	Seems to me that actions speak louder than surveys. We will see how well you do.	3/18/2015 11:35 AM
232	As a resident of the Renton area and working at the University of Washington, I am very excited about the tunnel extension. But getting to Link station will be the issue. Most station don't have parking. At this point, I will drive to the Tukwila station. That will approximately double my current commute to the Renton Park and Ride. I would like to see bus routes that could connect with the Link service.	3/18/2015 11:35 AM
233	Please also consider the history and amount of feedback you've received in the past when thinking about discontinuing and limiting Capitol Hill service.	3/18/2015 11:30 AM
234	I prefer to use the bus compared with driving. There have been many excellent changes over the years. There are still many barriers to using the bus as a preferred method of transport even between major areas.	3/18/2015 11:28 AM
235	We need better crosstown public transport.	3/18/2015 11:22 AM
236	Thanks for asking for our feedback.	3/18/2015 10:54 AM
237	this survey is way too long tho	3/18/2015 10:32 AM
238	Please speed up, the city is suffocating with traffic and bad transportation options	3/18/2015 1:13 AM
239	Would be helpful to have more meetings, with capped participation in each. Capping the number of attendees ensures everyone can be heard, with a lessened chance of things getting out of hand as has happened in the past.	3/18/2015 12:34 AM
240	These plans were formulated without considering legislative changes that will impact bus service, which is a huge factor that is currently totally opaque to me. Also, this survey is too long.	3/17/2015 11:53 PM
241	I feel like although my neighborhood uses public transportation and votes to fund it, that we are ignored when it comes time to provide service.	3/17/2015 7:48 PM
242	I am mostly concerned with dispersing from the Husky Stadium throughout U District and timing of transfers. More specifically the ability to get to University village as a more streamlined route without more wait times.	3/17/2015 6:06 PM
243	This was a really time-consuming survey. On a computer, if you click outside of the survey area, it looks like the survey closes. This happened to me, and I'm not sure all my answers were recorded. It took too long to redo all my answers. The posters at the bus stops are the primary place people will hear about the survey, so the survey should be compatible with mobile devices so people can take the survey while on the bus or waiting for the bus. I tried this, but it was very difficult to scroll on my device.	3/17/2015 12:10 PM
244	More info on Alt.s 1 & 2 within this survey would be useful but thanks for that which was provided	3/17/2015 11:40 AM
245	Thank you for doing this! Community involvement is very important.	3/17/2015 9:30 AM
246	Thank you for the opportunity to provide feedback. I trust you will make the best decision that helps to impact our community in the most positive, convenient way.	3/17/2015 8:35 AM
247	My hope is that my feedback will make a difference. I take and use public transit to go anywhere and find that the more options and choices there is available, makes the network more user friendly and is important with options and choices. Thank you for your considerations.	3/17/2015 7:53 AM
248	This survey is a bit heavy. I would have loved to fill out all of the sections, but I just didn't have time. Some guerrilla survey methods might help in the future.	3/17/2015 1:30 AM
249	No comment.	3/17/2015 12:38 AM

250	Don't mess this up. I'll donate money to whichever political campaign keeps the 545 running properly during off peak hours. And I'll vote.	3/17/2015 12:14 AM
251	Like the lies the politicians and Metro told the Seattle voters about the proposal to raise our taxes this survey and other input from Seattle residents will be ignored because these politicians and bureaucrats at Metro will do want they want to do because they don't care what the residents think.	3/16/2015 10:04 PM
252	Thank you for offering the survey!	3/16/2015 8:21 PM
253	Your efforts are well publicized and if anyone objects to the plans at the end of the process on the grounds that they didn't have enough time, don't delay your plans.	3/16/2015 6:55 PM
254	I have some feedback on reducing bus service. Seattle is growing fast and traffic is getting worse so unless you provide a viable alternative to people to move around, people will keep using cars and traffic will continue getting worse.	3/16/2015 6:08 PM
255	Please consider the feedback of folks who use Metro for transportation other than commuting back & forth to work -- thank you	3/16/2015 5:31 PM
256	It'd be much easier to understand the effect of the changes by asking someone "what routes/connections to care about today?" Then filter the information to that, instead of giving data about neighborhoods I don't care about and just make it harder for me to find what I do care about.	3/16/2015 4:54 PM
257	Metro is my primary source of transportation for commuting to and from work, and I try to utilize it as much as possible when attending special events (Sounders games, concerts, etc) Downtown. I have made use of Metro services for over ten years, and I have noticed increasingly crowded buses as well as buses that arrive 10+ minutes late due to overcrowding. I do appreciate Metro reaching out to the community for feedback, but I am skeptical whether that feedback is incorporated back into the process. Also, I have lost some trust in Metro after it cried wolf back in 2014 and threatened that service would be drastically reduced if Seattleites did not approve additional funding only to find out that that cuts would not in fact be that drastic and that there was money after all. Seattle is projected to keep growing, and for folks to make use of public transportation it has to be worth it. I understand funding is limited, but I hope that Metro considers increased ridership when it starts light rail service. Northbound buses that stop within the bus tunnel are already packed to the brim. Please take this into consideration and ensure that there is adequate and frequent light rail service that can handle the demands of the Downtown to UW ridership. Thank you for your consideration.	3/16/2015 2:25 PM
258	I think you already have a preferred plan. It feels good to voice my opinion, but I don't know that your plan will change.	3/16/2015 2:18 PM
259	Let's get this right!	3/16/2015 2:14 PM
260	This is probably something that would be worth advertising on buses, if you're not doing that already. I feel like I am lucky to have heard about this. However, most of my recent bus trips have been intra-city (B Line) and not to/from Seattle, so I might just have missed it.	3/16/2015 1:49 PM
261	I think I will have to take this survey again when I better understand the full plan. I did not get the message that one should first attend a session and then complete the survey.	3/16/2015 1:25 PM
262	I find the Link Connections site outlining the alternatives, http://metro.kingcounty.gov/programs-projects/link-connections/alternatives.html , rather hard to navigate to get the "big picture" of the impact of the changes. There are no illustrations, and the text doesn't paint a very vivid picture. I'm given to understand that my route, route 545, an extremely popular route, is up to be reduced to peak hours only, while a much less traveled route, route 542, is up to be increased to all day service. The net result for me, as someone who lives downtown and commutes from downtown Seattle to Overlake Transit Center each day, is that unless I'm strictly a "peak hours" commuter--something that is hard to guarantee with the wide changes in my workday hours at Microsoft based on business needs that change daily--is that where today I'm assured of a direct route with no transfers, I may need to have a transfer involving Link light rail involving more exposure to weather that takes no less time than it does today, and possibly more. I'm not sure this is a "good deal" for route 545 commuters at Microsoft.	3/16/2015 1:18 PM
263	I used to ride the bus all the time, but now I drive to work because it's so much faster. More frequent & less crowded busses from downtown area to the eastside would make the bus a much better option for me. I think it's great how much Sound Transit is engaging the community in this discussion!	3/16/2015 1:05 PM
264	Thanks for making our transit options better!	3/16/2015 12:54 PM
265	As these changes evolve, it would be very helpful to be updated as things change.	3/16/2015 12:40 PM
266	Please don't cut the 542 connecting the University of Washington with Microsoft and Redmond in general.	3/16/2015 12:40 PM

267	Send email for what has changed as a direct result of the feedback provided. Right now this survey feels like a black box and I'm unsure what impact my feedback will make.	3/16/2015 12:37 PM
268	I am so sorry but the proposed changes are very confusing and I am not sure how this will impact me so I don't have enough understanding to provide feedback	3/16/2015 12:31 PM
269	Keep the 12, baby!	3/16/2015 12:24 PM
270	You need to have shorter questionnaires!	3/16/2015 12:12 PM
271	survey too long!	3/16/2015 12:12 PM
272	N/A	3/16/2015 12:11 PM
273	Maybe next time put a QR code or something on the posters so people don't have to remember to go to the website once we get home to fill out the survey. Remember of course that people are, by definition, in transit, so the more mobile friendly, the better.	3/16/2015 12:06 PM
274	I hope the feedback of current transit users is considered.	3/16/2015 12:03 PM
275	Only time will tell if sharing my views has any impact. I'm pessimistic.	3/16/2015 12:00 PM
276	The changes are not clear at all and I was unable to provide feedback since I did not understand the changes.	3/16/2015 11:59 AM
277	I'd like information about parking for lightrail at the University station. It would be great to park and right light rail to Redmond from University if parking was available down there. It's too much time in the day to bus to that station and then transfer.	3/16/2015 11:53 AM
278	The biggest weakness with this is that you're using maps and data that do not include the new service improvements that were voted in last November. I feel like you're going to need to do this all over again once those get rolled out (unless you expect those to get rolled back again in the near future?)	3/16/2015 11:02 AM
279	The elimination of the 71, 72, 73 routes seem like exactly the threatened changes that were being caused by budget shortfalls a couple of years ago. The voters of Seattle then approved a 0.1% hike in sales tax to keep these and other routes funded. Now that there is plenty of money, the same cuts are threatened, now in the guise of improved service! What the heck?	3/16/2015 11:01 AM
280	Thank you for having a survey and such great information on the alternatives!	3/16/2015 10:32 AM
281	I believe that Metro Transit has an agenda independent of the needs of the commuters who pay taxes and pay for the buses. I have submitted feedback before and been ignored; commuters have suffered because of Metro decisions. I doubt that rational feedback is being taken into any kind of account.	3/16/2015 10:23 AM
282	I appreciate the efforts, please keep up the good work!	3/16/2015 9:32 AM
283	This is not about the outreach process ... but about taking babies and small children on the bus. Persons in wheelchairs are appropriately provided a drop-down step, a special location and a way to strap their chair securely in place to avoid rolling when the bus moves. Children in strollers, on the other hand, are expected to sit in their parents laps? In a car, a child has to be strapped down in a special car seat with a special head rest, that can't be more than 5 years old, etc, etc, but on the bus they're supposed to be safe sitting in someone's lap? Most bus drivers make me fold up my stroller and carry my kid. Why? At least in a stroller, I can strap my daughter in and put on the brake so the stroller won't roll, which I think is safer than sitting on my lap. If we hit a bump, or a sudden stop, she could go flying out of my arms. On one bus ride, the bus was so crowded a large fat person was almost squashing my daughter when she was a baby. I feel that some safer provisions should be made for babies and small children on the bus. There are more safety provisions on shopping carts at the supermarket than there are on city buses. This needs to change!!	3/16/2015 9:20 AM
284	I appreciate the effort and tremendous time and resources involved to accept and process the volume of comments you no doubt must process.	3/16/2015 9:16 AM
285	255 is the only bus that frequently connects Kingsgate and Downtown Seattle. Why change the 255 Route to Children's Hospital? Create a new service from the Eastside to the University. Changing buses during the travel to Downtown Seattle adds more time. We need frequent all-day service between the Eastside and Downtown Seattle! Your proposal will create slower connection from the Eastside to Downtown Seattle	3/16/2015 7:32 AM
286	Test survey--do not include in stats	3/15/2015 8:45 PM
287	When is the next community meeting for link light rail service?	3/15/2015 5:38 PM

288	Please, please, please remember that the people who show up at your meetings and who fill out this survey or who give you feedback in general are NOT a random or representative sample. The psychological literature on change aversion and loss aversion is very clear: people will care more about and speak out against changes and perceived losses far more than they will speak out about potential gains. Furthermore, you are much more likely to hear from people who currently use the system than people who do not, which will further bias responses in favor of the status quo. Remember this about central Capitol Hill in particular: The large majority of people who live in central Capitol Hill did not live there 10 years ago. The large majority of people who will live there 10 years from now do not live there now. The changes you are considering (in alternative 1) may be disruptive because people have organized their lives, chosen where they live and how they get around based around the current system. If you proceed with alternative 1, people will adapt and once they do they will fight any attempt to change the system back to what it is now. Public comment through is one way by which the public reveals its preferences, but a much more powerful way, a more representative way, is by the choices they make in the marketplace: do they ride the bus or not. Every city that has pursued the consolidated, simplified, high-frequency approach embodied in alternative 1 has seen ridership increase as a result. Seattle will see the same. That change in behavior is as important as any comment you receive at public meetings or online. Please, be the advocates for those who can't or don't show up.	3/15/2015 5:23 PM
289	Please reach out to people who don't ride the bus. Although some never will, a lot of them would if certain changes were made, and it's worth asking about those!	3/15/2015 9:22 AM
290	I am not sure many people are aware of the changes that may be coming. My neighbors who also regularly ride transit were not aware.	3/14/2015 10:17 PM
291	I am not certain I believe my voice will have an impact. I would like to see after this is all over how the publics feedback impacted the overall decision.	3/14/2015 8:15 PM
292	I hope that not all the decisions are being made by 30 somethings or the young. If they are, your time will come. You'll be old someday too.	3/14/2015 5:00 PM
293	The process is grand in concept and very disappointing with respect to genuinely considering community input. It has been woefully apparent in the many meetings/forums I have attended that the decisions have been made and the "public" outreach is for show. I do not have a favorable opinion of Metro as an agency.	3/14/2015 3:31 PM
294	I like it, but my primary complaint about Seattle transportation is that anything with wheels takes precedence over feet. We have a large senior and disabled population in this important health center, but all the accommodations are for vehicles, especially bicycles. Also, we now have "parklets" intruding into the surface streets. Please, Metro, tell the city that we do not need parklets sticking out into our already congested traffic routes. This may not be the place, but in addition to reserving our streets for traffic, I would like to see more and better bus stops. Example: on Market St. in Ballard, the westbound #44 stop between 11th St. and (almost) 17th street is too long, especially because it is uphill. Please consider elderly and disabled in all things, and thanks for the service you already give us.	3/14/2015 3:21 PM
295	44 needs more frequent service too	3/14/2015 11:27 AM
296	I do hope you don't get rid of 49 early bus from Capital Hill To UW	3/14/2015 10:06 AM
297	Considering the manner or community engagement thus far on this issue, I am unsure if my or any other transit rider's opinion or input will sufficiently influence your decisions on route planning. There is only one public info.meeting planning for the Madison Valley area re: the changes to the 11 and the 8 routes, and it's on a Wednesday morning?!?! When folks are at work? And it's only a half hour!?! I do community involvement for my job, and this is a woeful effort to try and engage the community.	3/14/2015 8:47 AM
298	I certainly hope so. I wouldn't have taken the time to study the issues and evaluate alternatives if I though otherwise.	3/13/2015 9:36 PM
299	Keep going! Keep building light rail! I am a great believer in mass transit and sold my car as a result.	3/13/2015 7:36 PM
300	Just because you are giving us the time to give you feed back don't mean you are listening to all the riders that you are upsetting with all of these changes. You are doing this so you can say that you gave us little to say that you are being unfair to all of us that pay for service that now you are wanting to take away from us. 37 Years I have been riding Metro. When you see my name on the next page you might say not her again!!	3/13/2015 6:43 PM
301	I don't ride the lightrail.	3/13/2015 5:38 PM
302	I feel that the needs I have expressed here have little chance of having substantive impact and anticipate a negative outcome from my perspective.	3/13/2015 5:09 PM

303	it looks as if the local service cuts that were planned last year because of the funding shortfall, and were cancelled, have been revived for this project. can the outreach process at least explain why the service cuts are considered necessary this time around?	3/13/2015 4:37 PM
304	This is the first I heard about these changes/alternatives - i.e. info was posted on the "Nextdoor Homer Harris bulleting board". I'd strongly suggest the info be posted / distributed in the neighborhoods.	3/13/2015 4:22 PM
305	Frequency and simplicity of network design should be the top design priorities.	3/13/2015 3:51 PM
306	Also listen to drivers who know more about the needs of their routes than anyone else.	3/13/2015 12:42 PM
307	Design surveys that don't take an hour to complete. Make them possible to take from a phone on the bus, so that I can do it while I'm a captive audience vs. having to go out of my way to remember to weigh in when I reach the office. The mobile experience on this survey was impossible to navigate. Show that you're actually listening to our feedback and making adjustments accordingly, as opposed to checking off the "ask for feedback" box on your to-do list.	3/13/2015 10:36 AM
308	You need a better connection between the airport baggage area and light rail station....moving sidewalk shuttles etc. Other cities have this.	3/13/2015 10:34 AM
309	Not sure why, but missed the publicity on input into routes and only the fact that someone decided to mention it at a meeting prompted me.	3/13/2015 10:08 AM
310	It seems like the questions are presented in a manner to get a desired response favoring Alternative 1. There is much promotion of the plan, and very little about how the removed services would destroy communities and impact the elderly and young.	3/12/2015 10:21 PM
311	Thank you for asking for our opinion	3/12/2015 9:29 PM
312	I may have been out of town when the outreach feedback was posted.	3/12/2015 8:53 PM
313	Metro service is only good for a few users in select destination and arrival points. This changes nothing for me.	3/12/2015 7:50 PM
314	There is a rumor that the #11 will be eliminated. I am unable to clarify that on the website. Why would you eliminate service to an entire neighborhood when E. Madison St is already so terribly congested? Please send mailers or post notices all over the neighborhood.	3/12/2015 7:29 PM
315	I doubt that my feedback will have any effect. I somehow think the decisions have already been made and Alternative #1 will be implemented.	3/12/2015 6:02 PM
316	N/A	3/12/2015 5:40 PM
317	I didn't realize until today that the light rail extension to UW would impact my eastside/Seattle route. Scary! I wonder how many eastsiders are just like me?!	3/12/2015 5:32 PM
318	thanks for asking!	3/12/2015 4:48 PM
319	Thank you for inviting input from people who actually depend on public transit.	3/12/2015 4:39 PM
320	I would like a longer comment period. I also feel like little has been done to let bus passengers know about the proposed changes, especially considering the magnitude and scope of these changes.	3/12/2015 1:44 PM
321	Thanks for this opportunity for feedback!	3/12/2015 12:58 PM
322	The oil-versus-water approach to the two alternatives is good, except that the Alternative 2 is too close to the existing network to be used imaginatively. Alternative 1, however, shows great, great promise.	3/12/2015 12:52 PM
323	I'm extremely excited that it appears Metro is taking this feedback seriously and putting bold new ideas out there to improve our bus network. As someone who has a car, I much prefer taking the bus when I can -- and being able to participate in the process is extremely rewarding.	3/12/2015 11:46 AM
324	I think having an outreach process like this is great. I hope that Metro will Walk the Talk when it comes to making the new changes.	3/12/2015 11:10 AM
325	I hope we get a system that serves us as paying customers.	3/12/2015 9:45 AM
326	Do you all even read this stuff?	3/12/2015 9:07 AM

327	It is important to me as I age and for my neighbors who are older to have 1. close accessible and safe public transportation options 2. safe pedestrian access to public transportation 3. affordable public transportation 4. frequent transportation services that link well together so that we are not standing or waiting for long periods of time Over time, I have seen the distance between transit stops increase which makes some of my elderly neighbors, although mobile, hesitant to use the service. As I age I want to be able to walk to the stops in a reasonable amount of time and in safety. I recognize that more frequent stops adds time to the service.	3/12/2015 8:20 AM
328	more than 30 questions = TOO MANY	3/11/2015 4:45 PM
329	I would advise riders of buses that their routes will be affected with signage or route specific emails like the traffic advisories I get from you guys.	3/11/2015 4:26 PM
330	Bus service is part of a larger transportation system. The survey seemed to be focused only on bus service, yet many of our decisions are based on more than bus service alone. I've recommended that serious consideration be given to the larger picture, including the need for adequate parking at light rail stations. People may want to use light rail, but not always in connection with riding a bus. I lived in the San Francisco Bay Area for years, and was loved BART. Sometimes I used the bus, too, sometimes I didn't. It was flexible. That system took into consideration the tremendously various needs of a large number of customers to get around efficiently and affordably. The bus system there is well-integrated with the rail system, and parking is well-designed to provide to the needs of all. Please, if you haven't already, go visit the folks at BART or other transit systems, and benchmark with them.	3/11/2015 1:51 PM
331	I voted with my heart and soul and tax dollars, and now the county is going to renege on what was promised. I now feel that my opinion matters not at all. Establishments servicing low-income clients who ride the #12 were not informed of impending cuts, which only increases the heartbreak.	3/11/2015 1:11 PM
332	Get out to West Seattle and defend Metro. We are under-served and unappreciated out here. I can understand the history of West Seattle trying to secede from Seattle.	3/11/2015 12:54 PM
333	SPLIT THE 48-67!!!!!!!!!!!!!!!!!!!!	3/11/2015 11:59 AM
334	I might use Link if it went somewhere I needed to go.	3/11/2015 11:02 AM
335	Send out actual paper surveys to the homes in the affected neighborhood(s).	3/11/2015 10:58 AM
336	While I understand a need to do specific neighborhood outreach regarding these changes, and I know it's hard to choose what neighborhood to target for feedback, sometimes I feel as if this approach ignores the needs of people in neighboring communities --- again, for example, potential changes to the 48 has a potential to affect a lot of people who *do not use* the route to travel for Cap Hill to the U District. People are connected to Ballard from the CD or Rainier Valley.	3/11/2015 10:56 AM
337	Well done. I feel heard.	3/11/2015 10:50 AM
338	I'm unclear as to how this extension of the Link lightrail system will work in cooperation with the First Hill streetcar project that is supposed to be opening soon.	3/11/2015 10:16 AM

339	<p>Every time a decision is made, it seems like special interest groups who have time for this stuff are the ones deciding on the main routes, and that regular people's votes and voices are not heard. The people who have time for transit are important but most of us have very little time in our days to add to the commute even if we want to. They will just use what they want from what we write to back up their own opinions and the fight continues. But the people who are not taking transit, and those who are, are not taking it solely for some future reward like reduced congestion in the future, or because they need to get from A to B, or whatever. They are doing it because it is the best, most efficient choice for them. Your main website has a trip planner but your main features seem to be about fairness and process. Well that is great but most people, when they are thinking "how do I get to work" are not thinking, "What's the feedback process?" "Was this fair?" "Was this data driven?" Not that those aren't important but... They are thinking, how fast will it get me from A to B? Now if you don't have a car, 70% of the time in this city the bus is faster than walking if you are a fast walker. (I used to walk and beat the bus from Wallingford to the Hill.) So can we focus on that? Point A to Point B in how many minutes. How many people start at A (or B, or C, or D), and how long does it take them to get to B (or A, or C, or D). The end. That is seriously 95% of your job. That covers full buses, it covers "on time", it covers whether or not drivers are stopping. You need to track that, not people's opinions. You know which routes are full. You know how long it is taking people to get places in their cars (WSDOT has this information). Use that to determine where to best place buses. From the Hill to Bellevue P&R in a half hour, every hour. From the U to SLkU in 10 minutes every half hour. From downtown to Greenlake in 15 minutes every half hour. Then have people text in if they made it or did not. It is complicated to make it happen but tracking it is not. You're cheaper than parking. You're more environmentally friendly. You're less stressful. So why doesn't everybody use Metro? Timing. I am tempted to think you know this and are going through this whole process just to placate special interest groups, but then I see proposed projects and the last 20 years and I think... no, I think they are actually using surveys and politics to build our transit system. I don't know. But in case X people A to B in Y minutes was not THE driving factor in every decision, with environmental and cost factors being weighed against it, then that is my 10 cents. Eyes on the prize here, and the prize is not a participatory or fair process, it is maximum benefit to maximum people. Thanks.</p>	3/11/2015 9:41 AM
340	PLEASE SEE MY PREVIOUS ANSWER ABOUT A BETTER SET UP WITH INTERACTIVE MAPS SHOWING THE CHANGES BY ROUTE NUMBER.	3/11/2015 8:59 AM
341	Past experiences show little regard to riders concerns.	3/11/2015 8:52 AM
342	If this is the outreach then it is totally inadequate.	3/10/2015 10:19 PM
343	Need to do focus groups with current & prospective riders.	3/10/2015 9:01 PM
344	Please consider making maps like Oran's for effective outreach.	3/10/2015 8:31 PM
345	If I haven't been clear, I would endorse Alternative 1 over Alternative 2 (though either will work for me.)	3/10/2015 6:13 PM
346	Thanks for doing this.	3/10/2015 4:46 PM
347	Can't think of anything	3/10/2015 4:46 PM
348	<p>I'll reiterate that, in general, I support the consolidation of routes, increased frequency, and additional east-west routes. But, I do believe that, for many, it will result in lots more transfers and/or walking. This has a big impact on folks with limited mobility and those traveling with small children. Even though I'm able-bodied and love to walk, my location puts me a long way from some of the routes I'd really like to use. One other important note: I believe more frequent bus service will be hampered unless Metro also implements a more efficient payment system. Many routes take a long time because of payment happening at load time. If that continues, it seems the more frequent routes will not necessarily be more reliable or predictable.</p>	3/10/2015 4:45 PM
349	Good Luck!	3/10/2015 3:54 PM
350	Thanks!	3/10/2015 12:01 PM
351	Thank you for having easily accessible and usable information and surveys!	3/10/2015 8:25 AM
352	Metro is going to do whatever it needs to do. Our views, concerns, and suggestions will not be taken into consideration. I am not drinking the kool aide anymore. It's all about what you think is best for us.	3/10/2015 8:20 AM

353	- "Alternative 1", deleting Route 25 service and combining the 43 and 48 to a less frequent schedule (every 10 minutes rather than the 7 minutes we get down 24th ave today) - "Alternative 2", which preserves the 25, but the 43 is further cut to once every 30 minutes from the current 10 to 15 minute frequency (and the 48 remains the same). We need to comment *to keep both bus lines running at their current schedules*, or how is anyone in Montlake/Portage Bay, the closest actual communities to the light rail station, going to get any benefit from it without increased access to the station? A quick Google Earth distance measurement shows that the nearest home in Montlake is already a quarter mile away from the stop. The "Hop In" (aka Montlake Blvd Market) is a half-mile away. Bus service needs to minimally stay the same to make the light rail stop gain it's full potential, otherwise it will be a squandered opportunity for our community to want to take light rail anywhere.	3/10/2015 8:15 AM
354	You've got a tough job trying to improve service, stay on budget, and not cut people's favorite routes. There's bound to be unhappy customers whether you provide fast, streamlined service or slower, more comprehensive service. Best of luck you to finding the right alternative.	3/9/2015 11:02 PM
355	I took the metro bus more frequently before the bus stop a block away from my home was removed. I have to walk 2 1/2 blocks to and from the closest stop. Also, there is no shelter at this Harvard and Shelby stop.	3/9/2015 10:38 PM
356	I don't know about your specific process, but with multiple experiences with City outreach, in general it is very easy to tell what the City wants to do from the beginning. They go through a public input process, half-heartedly pretending to seriously consider the alternatives, then go ahead and do whatever they intended to do from the beginning. This is definitely true of City land use planning, which is dictated by the real estate developers who fund it. Please don't emulate that agency.	3/9/2015 8:27 PM
357	many people along the Rte 28 and other areas on the NW Seattle won't pay attention because they don't think their routes will be affected since there in no real reason they should be. You need to reach out more directly to the potentially affected routes - how about on board the buses?	3/9/2015 7:13 PM
358	I'm really pleased that you surveyed the riders, I only hope that you take our decisions as feedback and listen primarily to planning experts rather than having our routes decided by popular opinion and committee. I want a transit system like Ottawa (dedicated roads, faster than car) rather than San Francisco (if it's not BART it's almost unusable, and even still it's a pain).	3/9/2015 6:02 PM
359	None	3/9/2015 6:01 PM
360	thanks for doing a survey - even if you don't use what you find out, you at least have it and can tabulate and report it	3/9/2015 5:39 PM
361	I do hope that my views will help you to understand that eliminating the #25 bus will be a big hardship on the transit riders on this route.	3/9/2015 4:36 PM
362	Thanks for the opportunity to comment.	3/9/2015 3:56 PM
363	#34 I can only hope.	3/9/2015 3:03 PM
364	Thank you for making the effort to solicit feedback!	3/9/2015 3:02 PM
365	Need better definitions of neighborhoods. Need better descriptions of how routes would change	3/9/2015 2:57 PM
366	good effort.	3/9/2015 2:48 PM
367	I think Sound Transit will force whatever changes they want on us.	3/9/2015 2:47 PM
368	I am grateful for the opportunity to give feedback because the main reason I purchased my home in Madison Valley was the convenience and safety of Routes 11 and 8 being in close proximity to where I would be living. I studied the bus routes carefully before deciding on a location in which to purchase my home! It would be devastating to me to lose access to these two routes with stops at E. Madison Street and Martin Luther King Jr. Way. Thank you for the opportunity to give feedback!	3/9/2015 2:34 PM
369	I greatly appreciate the information that is available, but it is pretty difficult to understand it all. With some of the maps it is difficult to separate the various information, and the maps about trip length changes is simply confusing (the icons chosen to represent the information, for example). The interactive map is a good idea, but is currently not very useful because you can't actually see the differences between the two plans and the current set-up (the colors are the same). Some (hopefully simple) adjustments to these kinds of things would help.	3/9/2015 2:33 PM

370	More tax payer dollars on something that can not be re utilized if ridership decreases or doesn't get used. More lanes disappearing for drivers who pay the majority of all taxes to fund these projects. Between bike lanes. link light and cars all on the same lane on Broadway everything will come to a standstill. What happens when a bus or trolley breaks down? Everything behind it will back up and be off schedule. It's not like they can be moved out of the way. Fewer lanes for traffic and nothing back for those who do drive. More taxes rougher pot hole filled roads. Give something to drivers such a smooth roads.	3/9/2015 2:31 PM
371	These surveys need to somehow reach more people... advertise on the buses or something. I'm subscribed to King County transit alerts via email and haven't heard about these from there either.	3/9/2015 1:54 PM
372	I was disappointed that the survey was not compatible with my iPad, so I was unable to provide answers while riding the bus. The survey also was too long. It is not likely that many bus users will take the time to complete the survey. Break it up into 3 or 4 smaller surveys and you might get better results.	3/9/2015 1:48 PM
373	Binning everything into 2 alternatives is too weasely and is slighting the process by burying plans deep. I can't imagine many digging this deep to figure out what is truly happning to them, and especially who in the low income community has time for this and will lose the most.	3/9/2015 1:31 PM
374	The online maps did not work well.	3/9/2015 1:23 PM
375	this survery is too long!	3/9/2015 1:05 PM
376	I have given feedback every time a survey or an opportunity for feedback has been solicited regarding routes that I use. Unfortunately, the resulting changes have demonstrated over the years that my expressed views have not corresponded with the views of those who ultimately make these decisions.	3/9/2015 12:28 PM
377	In the end, King County politicians make all the decisions about the life of the routes because of the amount of money they decide to throw at public transportation. In turn, Metro has to make the best of what little money the city gives them. But their decisions never really seem to reflect the opinions of the riders. We could go on, all day, expressing our opinions, concerns, criticisms and still never be able to influence the final decisions. King County only cares about the bottom line - the profits. We take these surveys in the hopes that something will change for the better for the riders that actually depend on these services, but in reality, we have little hope of ever seeing our needs actually being met because they conflict with the city's budget. Metro can try, but if the city doesn't give them the money they need, then we end up with route "efficiency" changes - which is just a PC word for route cuts. I wish all politicians would be forced to ride public transportation for a year so they could see what it's like and how many people really rely on it. I wish they would have to plan their days around public transportation to see how things like infrastructure, traffic flow, population density, big business and the like affect the lives of their citizens; their constituents. Maybe then they could see what public transportation really means to the people they are supposed to be representing and start throwing some desperately needed money at it!	3/9/2015 11:30 AM
378	option to provide feedback in other languages	3/9/2015 10:32 AM
379	why are you wasting my time and tax dollars "reaching out" when it will have not impact on the final resolution. All show -- no substance.	3/9/2015 10:16 AM
380	We will see if a difference is made.	3/9/2015 9:19 AM
381	As a fellow bus rider who lives near Laurelhurt said, and I agree.. 'I have ridden the bus for 33 years and there has not been single change in the bus schedule" We seen bigger buses (thank you) but no increase in service. The buses are crowded - people staked like sardines - especially in the later routes. No later bus times for people who have young childern and their 9 am schedules. The 65th st P&P needs to be expanded and security provided.	3/9/2015 8:48 AM
382	Sure seems to me like special interests govern how routes are prioritized. For example, in Alternate 2, why is Route 62 to Laurelhurst one of only two routes serving University Link station? Why not a route that continues up Sand Point, serving Childrens (largest employer in this area!?!?) and more neighborhoods northward?	3/9/2015 8:42 AM
383	There seem to never have been changes implemented in the favor of the comments I have provided.	3/9/2015 8:29 AM
384	1. This survey is too long, with no indication (that I noticed) of total length. This will reduce the amount of feedback received. 2. The link in this survey to metro.kingcounty.gov, if left-clicked, will destroy any survey-in-progress. This should have been tested early and prevented (or at least notated) prior to the survey going live. Thanks.	3/9/2015 8:13 AM
385	the public transportation in seattle is really very dissapointing!	3/9/2015 5:57 AM
386	I believe transit will do what transit wants regardless of what the community needs	3/8/2015 10:10 PM
387	Nicely organized, thank you.	3/8/2015 9:53 PM

388	I work at a hospital. Many of the people who come to our campus on First Hill have some element of temporary or permanent physical, mental, emotional or spiritual disability as they come to us. For some, it is the worst day of their lives. Many have been financially devastated by their illness. They need to be able to get to and from our campus safely and reliably, on safe, well-lit streets, and with convenient (Less than 1 city block) walks. More distance than that is a hardship for them, especially if their healthcare visit is going to require them to walk a block or two within our campus to receive their care. They do not have the stamina or endurance or time to wait for the access vans. Right now, the bus works for them. Please do not take this lifeline away, or alter it in a way that disenfranchises our patients. Please make these changes while taking their special needs into consideration.	3/8/2015 6:41 PM
389	We need to involve more people. Putting fliers/surveys in buses would be more effective.	3/8/2015 4:35 PM
390	Over the years, I've seen the same areas get improved service while the kirkland area receives only cut backs. Based on this pattern, I think it is unlikely that our service will be impacted positively.	3/8/2015 4:12 PM
391	Thank you!	3/8/2015 3:44 PM
392	I was lucky I saw capitol hill blog mentioning this - otherwise I wouldn't have a chance to share feedback. Outreach efforts didn't really reach me.	3/8/2015 2:07 PM
393	you are getting info/comments only from people who have, maybe, the patience to sit here to answer these questions. what about the bus users without a computer?????	3/8/2015 1:43 PM
394	I feel that it would be in the public's best interest for Metro to be as transparent with the budgeting and spending plans throughout this process as it has been with the rest of their plans.	3/8/2015 1:17 PM
395	It would be interesting to know if the outreach process produced any actionable results.	3/8/2015 12:47 PM
396	Please do more outreach around these changes. I'd like to attend meetings. I'd like to see some variations on the current alternatives. I think there's a 3rd alternative that would address my concerns and still improve connections/reduce duplication.	3/8/2015 10:43 AM
397	Thank you for asking for input.	3/7/2015 8:16 PM
398	Planning in this consensus city does an end run around public hearings and surveys such as this to satisfy the public input law only.	3/7/2015 8:14 PM
399	I hope the link service from SCC will duplicate the route of 9X. Otherwise do not eliminate it. It's hard to tell from your maps and information exactly how I would be impacted by these changes. The routes with bus #s are not clearly delineated.	3/7/2015 7:03 PM
400	I believe that Metro really does try to do the best for the ridership and to meet its needs. Not everyone can be pleased.	3/7/2015 3:51 PM
401	Taking this survey using Safari on Mac OS X using the built in screen reader, Voice Over, is cumbersome. The information in PDF format is hard to read and understand. You should let Survey Monkey know of their shortcomings in this area and/or use a different tool. As an example I had to go through every check box item twice using the screen reader tool. I had to click in the text boxes to enter text and I should have been able to do this with the keyboard.	3/7/2015 3:29 PM
402	As a senior, I was not aware of any information about these changes. If a friend had not told me I would not have known. My daughter who lives on E Pine didn't get any notice either.	3/7/2015 3:05 PM
403	i don;t know if my opinion matters. how are the results of this survey going to be managed - what's the plan?	3/7/2015 2:33 PM
404	I don't think most Metro riders are aware of these Alternatives. I haven't seen any notices in buses about them.	3/7/2015 1:52 PM
405	Get us to the light rail stops in a timely manner so we don't have to drive to them.	3/7/2015 1:28 PM
406	Thanks for asking for feedback.	3/7/2015 12:51 PM
407	My input regarding the Roosevelt repaving project was dismissed. Assisting bikes avoid blocking cars turning right on red at NE 50 th from Roosevelt is not an option they will make viable. There are lots of creative potential solutions not being considered. Same with this project. Regardless of how transit is either not helping or making worse the commutes, driving will simply be more difficult and the transit solutions are not helping a great number of people.	3/7/2015 12:31 PM
408	The site mentions a new series of meetings but does not list any.	3/7/2015 12:00 PM
409	Thanks for reaching out!	3/7/2015 11:58 AM

410	You will make your decision on what YOU want to do and not put into thought what we the people need. It is the way of the governing body of Metro and the Mayor of Seattle. Again, he wants us to drive less and at the same time wants to cut bus service. Many of us can't get around as we did in our youth, walk as far or ride a bike, so we need our buses. All you want to do is make it meor difficult to do so.	3/7/2015 11:47 AM
411	50 questions is too much	3/7/2015 11:21 AM
412	Make it easier. This is way to long and complex.	3/7/2015 10:53 AM
413	Using SurveyMonkey lends this survey a streamlined and elegant appearance which I appreciate.	3/7/2015 10:47 AM
414	I provide feedback as often as possible. I am not sure it makes any difference, as I have not seen changes in a timely manner that echo the suggestions I have made, or there have been no changes/improvements at all, or a degradation of service.	3/7/2015 10:04 AM
415	Thanks for letting me add my specific needs into the database for consideration as you work to find the most cost effective solution for public transportation in King County.	3/7/2015 9:54 AM
416	I would like to see transit in Seattle become more like that of Paris' Metro--but above ground; that is, consisting of lines with connecting points between them and frequent service along those lines, on weekdays AND weekends. Then, when one must transfer (change lines), the next bus on the second line is just a few minutes away. There should not be transit on every street but frequent service on a few streets, a designated street or streets in every neighborhood. There is one flaw in such a plan as described above, access to a line for some disabled persons; however, I do not believe that any other transit plan, current or proposed, addresses disabled access more adequately.	3/7/2015 9:06 AM
417	I read the results of Metro's previous survey from earlier this year, in which respondents emphasized a desire for more frequent reliable bus service, especially at rush hour. We want bus service to be consolidated, and we want buses to come more frequently at rush hour (e.g., every 5-7 minutes) so we don't have to rely on a schedule. I expect you'll get similar results from this survey. However, given Metro's track record of unreliable, overcrowded, expensive service, I have very little trust in your agency and I truly doubt that you will increase bus frequency despite all of the feedback you are getting.	3/7/2015 9:00 AM
418	The design of this survey was confusing. There was no way of knowing that choices for other neighborhoods would be offered after the N/NE Seattle option.	3/7/2015 7:58 AM
419	I feel process already in place. not sure again how buses #8 and 10 would change to reach my desired destination, eg #8 for CD district	3/7/2015 4:11 AM
420	I'd love a personal response that references my comments directly to know that somebody read them.	3/7/2015 1:15 AM
421	none	3/7/2015 12:58 AM
422	I am glad you've undertaken this survey/outreach. I'm hoping the end result will be satisfactory to the largest possible number of riders.	3/7/2015 12:27 AM
423	Make audio announcements on trains and buses for people with bad vision. Make them brief and simple.	3/6/2015 11:28 PM
424	My feeling is that this is all a waste of time. That the plan is made up and that this is only done to make it look like someone might have a change of heart. I have been involved in several things going on lately by local entities, especially over transit and I feel that it's hard to budge an already implanted concept. But if I don't try I will never know. I have a car; I can drive. I am not needy like many of the people who use transit and depend on it completely to get to work, school or to medical appointments. I hate seeing them disenfranchised, and they probably aren't likely to have access to this poll.	3/6/2015 10:50 PM
425	You probably don't want to hear this, but you probably -need- to -really- =hear= it. Every time I've interacted with a live-person, they've treated me 'politely' .. but given me the distinct impression they were just going through the motions and/or -they- were the experts and what the hell could -I- know that was of any value. They have =no= idea who I am, what my background is, etc, etc, but they treat me -not- =quite= 'patronizingly' and/or 'dismissively'! [(I used to work for the City of Seattle, Engineering Department, Traffic Division as an Engineering Tech/Aide. I actually know quite a bit about the traffic aspects, et al, of the Greater Seattle Area, but because I appear to be a 'geezer' [70 y.o.] and a 'civilian', they don't -really- (want to?) pay any attention to what I have to say. If this -really- =is= the case, why are they even bothering with this charade/farce?! All it does is piss me off!	3/6/2015 9:32 PM
426	I don't trust my feedback will have any affect as I think a major part of my feedback is the timing of bus changes being too fast, you not having enough data to know what to do until Light Rail to Capitol Hill and Husky Stadium (and any already scheduled bus changes based on last vote), are up and running a good length of time. Also Capitol Hill is rapidly changing. Density is increasing even more. As are the economics. Another factor to consider, as is the bus price increase that just went into effect. You don't have enough data to decide.	3/6/2015 8:33 PM

427	These surveys seem a waste of my time. No matter what I say or vote for, service seems to increasingly decline here in West Seattle on the Rapid Ride C route with packed busses almost 24/7 and late busses. Metro turns a blind eye to the rapid growth here and instead focuses on lesser growing neighborhoods in the North. Wake up please!	3/6/2015 8:31 PM
428	thanks for asking for feedback, I have used Metro Transit from the early 1970's and have always appreciated and liked using KCMT and hopefully can contribute to KCMT's success!	3/6/2015 8:23 PM
429	You mean like when we voted for Monorails and got car crashing light rail on surface streets. We also voted 3 times to stop the tunnel idea. You don't listen!!	3/6/2015 8:08 PM
430	Good work, people, on this presentation and survey! Nice job.	3/6/2015 8:03 PM
431	There needs to be more activity on social media, and QR codes at bus stations. There was no information at any of the downtown tunnels.	3/6/2015 8:02 PM
432	Be sure to do outreach to communities with people with disabilities. And communities of elderly people. These people may have a more difficult time getting out and in more difficult time gathering information from your website. I recommend that you go to them and present the information and get their comments so you can serve them well.	3/6/2015 7:48 PM
433	Metro isn't a bad agency, it is just bloated with too much non revenue producing personnel. Take the time to train your people to perform their assigned jobs, expect them to meet those standards, give them the tools to fulfill them. Create realistic, workable routes that make sense (not routes du jour), Every time I ride the bus, someone is hassled by the coach operator for their fare, Merto gets US Government grants to purchase it's coaches, Federal Law requires Metro to allow people who can't pay to be allowed to ride, State Law keeps the regular scofflaws off Metro's equipment. In other words don't make the ride more unpleasant than it has to be. As for your out reach, quit going into it with a preset idea of what the out come is going to be and disregarding the public input. People are not as stupid as you think they are, they just are not as able to express their ideas in a way that makes sense if they are not there to explain themselves.	3/6/2015 6:40 PM
434	I have no faith that my views will make any difference. The assumption seems to be that everyone wants to ride light rail. I just want my bus route to stay. It works for me and many others, and light rail is still years away. Give some indication that transportation for the elderly, permitting them to stay in their homes and give up their cars matters!!	3/6/2015 6:38 PM
435	I frequently feel that I'm talking to a brick wall and my opinions and experiences with Metro transit don't matter.	3/6/2015 6:31 PM
436	It would be nice to have more stations between here and there, like in in Montlake or something, maybe at the 520 with a connection	3/6/2015 6:06 PM
437	Nothing I can think of.	3/6/2015 5:58 PM
438	Email notifications are perfect to keep me informed...	3/6/2015 5:49 PM
439	I would hope my input is considered...but it will be only if hundreds of others give you the same feedback...then you will listen.	3/6/2015 5:42 PM
440	Thanks for asking! Also, thanks for publishing the routes and timetables that could be implemented under each Alternative--that really helped me understand how each alternative would affect me. Good luck!	3/6/2015 5:42 PM
441	Thank you for making it easy to provide feedback. I look forward to improved service with the start of University Link next year!	3/6/2015 5:30 PM
442	I hope you are providing outreach in other languages. I am concern that Beacon Hill wasn't listed, and a lot of marginalized people are in my neighborhood. It would be unjust if the feedback you are acting upon is only from white people, or folks in the North and East side.	3/6/2015 5:26 PM
443	This website and survey form was extremely difficult to use on a mobile device (which can often be someone's only internet access).	3/6/2015 5:20 PM
444	Thank you!	3/6/2015 5:19 PM
445	Onward and upward with better public transportation in Seattle!	3/6/2015 5:18 PM
446	The precedent here is pretty bad.	3/6/2015 5:16 PM
447	I hope my feedback is considered.	3/6/2015 5:05 PM

448	The descriptions of the alternatives were too detailed for me to understand very well. Maybe a video would work better?	3/6/2015 5:01 PM
449	You haven't shared how often Link trains will run when the new stations open. I hope it is more often throughout the entire day, otherwise I am afraid that they will be too crowded due to the additional riders traveling to and from the new stations.	3/6/2015 4:50 PM
450	Reason for comment above is that bus service to my neighborhood is continually cut, or changed, never seems to take into account experiences of commuters on my routes.	3/6/2015 4:43 PM
451	I think you should come to Seattle Central College and have a number of presentations about the coming changes - these meetings should be open to the public and students. Multiple meetings should take place during different times of the day and different days of the week.	3/6/2015 4:38 PM
452	This survey is too long!	3/6/2015 4:33 PM
453	I feel a bit forgotten in Woodinville. We're part of metro too but don't seem to be a big concern. No real changes in bus service here in 15 years that I've had experience on the 311.	3/6/2015 4:28 PM
454	Clarifying #42, I don't think individual responses on surveys ever persuade any board to consider the needs of populations. In many cases, I still feel that decisions are made to suit the convenience of special interests rather than Metro's most frequent riders.	3/6/2015 4:19 PM
455	I am not sure you listen to the public. I think you will do what you already have plans to do	3/6/2015 4:15 PM
456	You need to talk to people on E Madison who are bus dependent and stop creating an environment we we will be unable get around Seattle without doing multiple transfers! Does Metro care, let along SDOT with their BRT project.	3/6/2015 4:04 PM
457	Honestly, not sure our feedback matters? Haven't seen much change in plans after previous rounds of feedback. Loss of 47 after much outcry and a petition to keep that bus still rankles. Especially when you announced 1 day after cutting that service that "oh by the way, actually we do have enough money and didn't need to cut the service." So, does our feedback matter?	3/6/2015 4:00 PM
458	Reach out to the thousands of shift workers trying to use Metro and Link. We don't all live in Seattle.	3/6/2015 3:59 PM
459	My experience with fighting dealing with government agencies is that they ask for information, but go ahead and do what they want	3/6/2015 3:55 PM
460	Please keep me informed as the process moves along. Thanks.	3/6/2015 3:47 PM
461	Thank you for reaching out, but this survey was a long and tedious trek. I'm not sure how to improve that experience, but I feel like it can be improved. Too much reading, not enough visuals would be a cursory assessment.	3/6/2015 3:45 PM
462	Very nice to have the wealth of maps and route information, HOWEVER, opening the survey like you do in a modal window means that a user has to open a separate browser window in order to reference the site while they are answering questions. And clicking outside the survey area looks like it closes your survey session, with no way to get it back; not a good user experience. I'd suggest that you either open the survey in a new child window, or open it completely within the parent window so you don't have folks accidentally lose their survey experience.	3/6/2015 3:44 PM
463	Keep up the good work and allowing us to be involved in the decision-making process	3/6/2015 3:44 PM
464	maybe you could use maps that isolate routes or neighborhoods into smaller chunks.	3/6/2015 3:43 PM
465	I appreciate the clear information and the opportunity to respond and take part.	3/6/2015 3:39 PM
466	I haven't noticed any flyers at major bus stops (e.g. the various bus stops on UW campus), that would be a good way to reach out.	3/6/2015 3:36 PM
467	I very much appreciate it.	3/6/2015 3:36 PM
468	Thanks for listening	3/6/2015 3:33 PM

469	It feels great to voice my opinion, although my hopes for change are quite low. I'm glad I am lucky enough to have a car to use, because I feel like I can't get anywhere on the bus in a reasonable amount of time. I feel that things could be a lot more efficient if those in charge of these decisions rode these bus lines at peak and non-peak hours to understand their decisions, rather than go by what a route is mapped to do. For example, on paper, the 8 looks great- it is slated to run pretty frequently and goes to convenient locations. But in reality, the bus is completely packed, always late, often never shows up, and is jammed on Denny Way in the evening. How long will it take before these simple problems are fixed? I'm a student and would be more impressed if I saw metro workers on actual buses, talking to actual people about their concerns, WHILE they're on the bus. THAT'S how you do outreach.	3/6/2015 3:32 PM
470	Surface busses in downtown are a nightmare and everything that Metro and Sound Transit can do to leverage the massive investment in light rail should be done. This makes more effective use of our dollars. Also, regardless of the routing changes, there should really be some thoughts as to making the hub at UDub the same place where the busses pick up and drop. Also, if that is the case, something needs to be done about the frequency and timing of boat traffic in the Montlake Cut so that traffic isn't snarled.	3/6/2015 3:32 PM
471	See above. The graphics on the maps and the interactive maps should be clarified.	3/6/2015 3:32 PM
472	Please remember that many that use the bus don't take surveys because they are elderly or students who are not aware so do not take these surveys to tell you things like add more service to our packed #72 or don't take away the direct #11.	3/6/2015 3:26 PM
473	Process is good, but you are asking individual households and NOT reaching out to RETIREMENT COMMUNITIES, GROUP HOMES, etc. These citizens should be considered as special needs people.	3/6/2015 3:21 PM
474	I the new phone app I also love the e-mail notifications please continue to keep us informed	3/6/2015 3:19 PM
475	Thank you for putting the effort in to solicit public feedback.	3/6/2015 3:17 PM
476	Would like to see additional, route specific updates on the buses themselves or at transit centers/stops. I am concerned that most people who ride the bus aren't aware of the specific changes being contemplated for their regular routes.	3/6/2015 3:16 PM
477	Metro will do what ever Metro feels like without any regard to the opinions of the people who support Metro	3/6/2015 3:12 PM
478	My experience is that public comment is just given lip service and staff does what they want to do. And they manipulate the information so as to minimize comment that is contrary to what they want to do.	3/6/2015 3:10 PM
479	thank you :)	3/6/2015 2:58 PM
480	Thanks for the opportunity to provide input! We appreciate all you do.	3/6/2015 2:51 PM
481	This survey is itself informative and I did not feel I needed to seek out further current, detailed information on the alternative proposals. However, it is probably too long to get a thoughtful response from most transit users.	3/6/2015 2:50 PM
482	Please remember those of us who do not drive and who ride the bus every day, or at least every working day.	3/6/2015 2:49 PM
483	I hope so!	3/6/2015 2:42 PM
484	You need to do more about getting these ideas out into the public so we can hear about what's going. A meeting at 5 or 6 PM week days doesn't work for working folks either.	3/6/2015 2:41 PM
485	-Don't do option 2. If you're gonna spend a billion dollars or whatever to build grade-separated transit, make use of that investment. -ST really missed the boat by not including a 520 bus connection point station in UW Link. I'm concerned about buses sitting on Montlake trying to crawl their way up to the Link station, especially during UW special events like football/basketball games	3/6/2015 2:36 PM
486	I am not optimistic regarding any feedback I provide, since it seems that Metro has their plan, and no matter how many times it is delayed by offers of more funding, you are STILL determined to push through your plans for certain routes, no matter what, the 16 & 68 in particular suffer from this tunnel vision.	3/6/2015 12:37 PM
487	Don't let the naysayers drive this process. Proposal 1 is bold, and it's going to take some backbone from Metro to keep driving its point home. I don't think a lot of the curmudgeons will understand how effective and useful the changes will be unless you guys talk very slowly and in a comforting voice. This is a visionary plan (proposal 1) and will be targeted by a lot of angry people whose myopic views curtail anything forward looking in this city. One (or two or three) loud voices should not be allowed to destroy this reorganization.	3/6/2015 12:12 PM

488	This information should be very predominately posed on Metro's homepage; it is buried under the Programs & Projects page, so it is hard to find. You need to get the word out more aggressively via Twitter, emails, news media, etc. I've only seen this on Seattle Transit Blog and Capitol Hill Seattle. The Urbanist jumped the gun with a preliminary proposal - that was bad form on their part, but you should be more careful with how Sounding Board members use the materials you give them.	3/6/2015 10:54 AM
489	Great job Metro and ST planners with Alternative 1. Hope Politics and complainers doesn't stop and great plan	3/6/2015 10:46 AM
490	Please consider fixing a few of the neighborhood access issues in the updated routes. Going downtown on the bus is not important, but getting people to the link station and interconnecting neighborhoods is.	3/6/2015 10:43 AM
491	I appreciate you asking your users.	3/6/2015 9:48 AM
492	This should be more prominently displayed on Metro Transit's homepage as a slider or cover.	3/6/2015 8:57 AM
493	I have no idea if sharing my views will help. I can only hope.	3/6/2015 8:45 AM
494	Please do a similar Sounding Board for changes around Angle Lake Station! I like how this process is going.	3/6/2015 12:34 AM

Q62 We're moving to more electronic notification to keep people informed about Metro's service planning. If you use email and would like to stay informed about next steps in this decision-making process, as well as future opportunities to participate in decision-making, please provide us with the information listed below.

Q22 Do you have anything else you'd like to share about the proposed changes in north Seattle, such as ideas you have for making this proposal better at serving the mobility needs of your community?

Answered: 699 Skipped: 1,273

#	Responses	Date
1	<p>Don't cross routes 67 and 73 at Ravenna Blvd/ NE 65th St. Instead keep 67 on the Roosevelt Way & 11th Ave NE couplet and route it on Campus Pkwy to the west entrance of UW then through campus on Stevens Way with a terminus where the proposed 73 terminus is shown. Route 73 should continue on 15th Ave NE & University Way NE then turn east on NE Pacific St to a terminus by the UW Med Center LRT station looping around the Montlake triangle (i.e., switch University terminus of 67 & 73). #48: University District terminus loop around University Heights Community Center at NE 50th & Brooklyn, instead of the fish-hook turn into campus. #16: Do NOT change from Northgate to Sand Point as the terminus. Keep 16 on Aurora Ave N., Bridge Way for routing into Wallingford, continue around east side of Green Lake and on to N Seattle College. Change only routing via N 92nd St to Northgate Transit Center from the south. East-West connection: Keep route #71 but revise to a Sand Point - Seattle Center route. The revised 71 from Sand Point travels NE 65th St., N 65th St., E. Green Lk Way & Green Lk Way N., Fremont Ave N., across the Fremont Bridge, then along either Westlake Ave N. or Dexter Ave N. to Mercer St. The 71 could loop clockwise around the Seattle Center on Broad St., Denny Way, 1st Ave N., and Mercer St. Keep #26 & 28 on Dexter Ave N. Route 26 on N 35th St. and Wallingford Ave N to N 40th St. Keep #31 and 32 on Stone Way N. between 35th and 40th St. Alternate plan for East-West connection: Route the #26 along NE 65th St. to Sand Point. Keep the 16 on a north-south trajectory connecting Wallingford, Green Lake, and Northgate. Route 941 DART terminus by UW Med Center LRT station is not obvious from map of Montlake Triangle area. Since it travels closest to Children's Hospital of NE routes, consider routing it to the south side of the UW Medical Center and Health Sciences Bldg along NE Columbia Rd where the UW Health Sciences express bus stops. More changes in the network for NE and north Seattle will be possible when LRT reaches the NE 45th St./ U-District Station. Don't expect to make all connections for downtown at the UW Med Center Station. The increased frequency and extended hours on the #70 will help, and keep the intermediate destinations between the University District and Downtown well served. Without all-day service on the 66, the connection between #67 and #70 is important to enable through trips from Northgate, Maple Leaf, and Roosevelt to Eastlake and South Lk Union. Finally, before Link LRT opens to UW Med Center, change the name of the downtown "University Street" tunnel station to "Seneca Street". With both a University of Washington and a University District station, the last thing the system needs is a source of confusion for a station downtown that also sports the "University" label. Change it to Seneca Street, the sooner the better!</p>	6/1/2015 12:58 AM
2	<p>A change was made a number of years ago to not have the #16 go up/down Wallingford via Stoneway and 40th to 45th. Then with the Mercer Street reconstruction to benefit Paul Allen the #16 rerouted down Aurora and no service to the Seattle Center to third avenue. Now you want to take the #16 and put it on part of the #26 route and add 15-20 minutes to the route. There are already enough delays with wheelchairs/lifts to make it necessary to take an earlier bus to get anywhere on time. Now you would have to leave two buses earlier to get to your destination. This means adding an hour on to the trip that in the past would require only a half hour. Poor decisions for work or appointments of any kind. Another reason to drive and not take the bus.</p>	6/1/2015 12:27 AM
3	<p>I support the elimination of Route 72, especially through the NE 80th corridor. The number of on / off's are low and this sector is no longer needed. Thanks for the improved efficiency!!</p>	5/31/2015 11:56 PM
4	<p>I would like to see better service to Northgate from the Wedgwood/View Ridge/Bryant areas. It looks to me now that the proposal will require transfers to be made either in the U District or perhaps on or near Lake City Way. The current route 68 fills that need somewhat, but it is not in the proposal. I consider Northgate to be the prime shopping area close to much of NE Seattle. There needs to be ways to get there - it doesn't have to be frequent service as in rush hour or going downtown, but something consistent.</p>	5/31/2015 10:43 PM

5	<p>Ending the 43 makes it very difficult for people to get from Capital Hill to the University District and downtown in a timely convenient way. I will not be using the light rail to go to the U district because it is not near where I live and even if I did take it I would have to transfer to a bus after 1 stop - definitely not worth it to me. Ending the 43 ends the flexibility we need to be to get to the U District, downtown and Wallingford as easily as we do now. We will now have to walk to 19th and Madison to get a bus downtown whereas currently we can walk to 23rd. I voted to improve and maintain existing bus service in Seattle. There was no indication at the time that measure was put on the ballot that there would be suggested changes involving the light rail that would diminish service. I feel that Metro and the City of Seattle were not honest with their plans with the tax payers of Seattle.</p>	5/31/2015 10:06 PM
6	<p>Routing 26 around the Wallingford area means either a 1/2-1 mile walk or multiple transfers to get to downtown. You are removing a convenient 26 route and replacing it with nothing - how is that supposed to better connect us to downtown?</p>	5/31/2015 9:05 PM
7	<p>Route 71 has existed for over 50 year serving the View Ridge Community, roughly bordered by 40th AVE, NE on the west, NE 75th on the north, Sandpoint Way on the east and NE 65th on the south. We have 30 minute bus service, 7 days a week from about 5AM to 1AM the following morning. The bus route has many stops along NE 75th, 55 Ave, NE 65th and on the return NE 50th. We have ONE bus service to the University District, close service to the University and downtown. View Ridge has a large number of seniors and students who regularly ride the bus. The proposed changes will be very difficult also for all ages with walking problems, especially since equivalent service to the University, University link tunnel, and downtown will require a bus transfer. This ONE bus service every 30 minutes, 7 days a week from 5AM to 1AM the following morning is being replace by a new DART route 971 which travels south on 45th AVE, NE. This leaves most of the east part of View Ridge with no scheduled service unless the rider calls 2 hours in advance and limited off route service will be available. Alternate routes to the University and the new University link are available but this requires a transfer. The amount of walking for those living near NE 75th, 55 Ave, NE and NE 50th is increased tremendously. Also the DART is 1hr service and does not run on weekends and after 7pm, a severe limitation for those of us going to the University or downtown for evening activities on nights and weekends. Also there is no convenient access to the University as there was with bus service along University avenue. What is needed is regular 30 minute service to the View Ridge neighborhood along NE 50th, NE 75th, 50 Ave, NE and NE 65th, 7 days a week, 5 AM to midnight daily. Important in any use of the proposed route 16 or proposed route 65 is the use of these streets. If route 71 is eliminated, we will find it extremely difficult to get bus use on these streets once it has been largely eliminated. These streets have had bus service for 40 year and so people expect buses to be on those streets. If the service is eliminated, it would be almost impossible to get that service back and those no convenient service to View Ridge in the future will be possible. What View Ridge residents want is one bus service to University District and downtown, with a bus every 30 minutes, 5AM to midnight, 7 days a week using the already existing route along NE 50th St, NE 75th, 55 Ave, NE and NE 65th. That is the service we currently have and should expect with any change. Using routes 16 and 65 as currently proposed are not acceptable alternates due to impossible amounts of walking for people with walking issues and vastly increased walking for the rest of us living in View Ridge, north of NE 70th. Perhaps routes 16 could be modified to allow the required service by being routed through View Ridge either north on 55 Ave, NE and the east on NE 75th and finally south on NE 50th. Perhaps every other bus could service View Ridge so we would get 30 minute service. Alternately, perhaps route 65 could be modified to service View Ridge along the route currently taken by route 71. However, this still means a bus transfer in many cases. Perhaps a better solution would be change DART route 941 to a regularly scheduled 30 minute, 5 am to midnight, 7 day a week METRO bus servicing the View Ridge community along NE 75th, 55 Ave, NE and NE 65th and then proceed south to the University Link via 35th Ave, NE. This would allow equivalent route 71 service thru View Ridge and get us conveniently to the University and the University Link Tunnel. Access to the University District would not be as good but a one bus transfer along NE 65th or at 35th Ave, NE to route 65 or route 16 would make this doable. DART as it is currently proposed will probably lead to less ridership and more autos on the road due to its routing and lack of regular schedule thru the View Ridge community.</p>	5/31/2015 8:59 PM
8	<p>Moving the 26 route away from south Wallingford will leave the area in a transit desert. The 26 line is the ONLY convenient line in the south Wallingford neighborhood, and it takes us downtown and north to Green Lake, allowing for ease of transit to major destinations. (The 31 goes through our neighborhood, but takes significantly longer to get downtown.) The light rail will not be close enough to compensate for this loss. Currently, residents in our neighborhood have to walk nearly a mile to reach any other bus lines; removing the 26 line from the south Wallingford neighborhood will damage the neighborhood and our residents unnecessarily. Please do not remove our best means of transit through the city.</p>	5/31/2015 8:58 PM

9	<p>I live in Lake City, work downtown, and visit Wallingford twice a week after work for an exercise class. I am delighted by the increased frequency of the 16 - it is often very crowded, and does not come frequently enough. I have found that driving to and parking in Wallingford in the morning, and then commuting by bus to work from Wallingford is the best way to accommodate my commute needs, and the changes you are proposing will improve this commute. I think re-routing the 16 to Sand Point will help with east-west connections, which is something I wanted to see more of. However, I'm not sure it will help my personal commute: I can currently get home to Lake City from Wallingford via the 16 to Northgate, and then the 75 to Lake City. It looks like this option (which admittedly is not great - it takes an hour) is going away. I will also miss the 72, which occasionally saved me from some commute nightmares and helps connect Roosevelt/Cowen Park area with Lake City. Overall, I do think serving more people with transit options is better than saving every little route. I think the proposed changes will improve some of my commutes but likely not increase how often I use transit, as I currently use it every work day. I'm also very glad that the 312 and 522 will continue going strong - they are great commuter buses and routes.</p>	5/31/2015 8:34 PM
10	<p>I am an active retired person who has lived in View Ridge for over 35 years. I have two UW students who rent rooms from me and one adult child who also lives at home. All 4 of us take the 71 bus everyday at different times of the day. The students need transportation home from the University District from 3:00 pm until midnight, depending on their classes and research projects. I have other friends who are retired with some handicaps and they are concerned about the length of walking to the 16th bus on 65th. They also want one bus that will take them downtown to doctor appointments and shopping. The 71 bus route has serviced View Ridge for over 50 years. Most of us bought houses in this area because of the use of one bus that will take us directly to UW campus and directly downtown. My fear is if you change any of these current routes and the streets that the buses have gone down for over 50 years; you will not ever get those routes back as new people move into the neighborhood. Route 16 does not service most of View Ridge. People living north of NE 75th St will have to walk over 10 blocks to reach NE 65th St; a mile to reach 35th Ave NE or go up or down Very Steep Hills to reach Sand Point Way. Route 71 has always come into View Ridge for us. Students at Roosevelt High School will also be affected by changes in route 71. Now that we have no school buses for those students living in View Ridge; many students need 71 to get them to school and home again in the afternoon. They also use 71 for after school activities and sports. One suggestion I would make is to make a special route to 65 such as (65B) that could leave 35th at NE 75th and wind through View Ridge on most of the current 71 route. If 65 bus is increased to 10 or 15 minutes, then an alternate 65B could come through View Ridge every 30 minutes. The problem with that is that we would have to connect with another bus to proceed downtown.</p>	5/31/2015 8:33 PM
11	<p>This proposal does not do enough to connect the Eastside to destinations in Northern Seattle. The original proposal connected the 271 and the 45, this allowed a 1-seat ride between the Eastside and many destinations, including connections to other routes such as the E line, the D line, the 5 etc... It looks like this connection was lost to maintain the tail of the 271 past Eastgate P&R. This seems like the wrong investment. The tail could be easily served with an infrequent coverage route. Moreover, there is no off-peak service between Kirkland or Redmond to the UDistrict! Although at the moment you can take the 255 or 545 and transfer to the 271 at Montlake, the Montlake flyer stop will be closed soon with the SR 520 replacement, meaning that there won't be any way (off peak) to get from Redmond/Kirkland to the Link or destinations north. The cheapest solution would be to have the 271 take 112 th ave NE to get to 520 and then take the HOV onramps. This was considered previously and would allow transfers at Yarrow Point or Evergreen Point between the 255/545/271. A more expensive solution would be to revisit having 1 of either the 545 or 255 go to the UDistrict. I assume there was a lot of pushback on having all routes truncate at Link, and possibly it was a bridge too far to have both the 255 AND the 545 change. But it should be strongly considered to have ONE of them switch. That would allow transfers between the other at Yarrow Point and also wouldn't be too negative impact to journey times.</p>	5/31/2015 8:18 PM
12	<p>* Please keep the 67 on its current path on 5th NE rather than looping around the traffic-clogged Northgate Way. Until Link actually gets to Northgate, we need a fast bus connection to the Northgate TC. While I can understand the desire to serve Roosevelt Way, that can be done on the 73; the frequent 67 should go directly to Northgate TC rather than get caught in traffic jams on Northgate Way. * Please put back the 45-271 through-route, or otherwise extend some service to Montlake. Currently, except during peak hours, everyone will need to either transfer to the 271 or 48, or walk from Pacific St to transfer to SR 520 service.</p>	5/31/2015 8:14 PM
13	<p>With the increase and increasing rental density on Stone way I would like to see keeping the 31 and 32 running down Stone way vs Wallingford. At least revisited the route. Thank you</p>	5/31/2015 8:05 PM
14	<p>Need better east-west connections across Seattle. This may help, but more needs to be done.</p>	5/31/2015 7:43 PM
15	<p>I think the following changes would make for a better overall system: http://seattletransitblog.com/2015/05/31/proposed-changes-to-the-new-67-and-73/ and http://seattletransitblog.com/2015/05/31/move-the-255-out-of-the-tunnel-and-move-other-buses-in/</p>	5/31/2015 7:38 PM

16	<p>I use Route 43 on almost all of my trips to NE Capitol Hill (Group Health area), N Capitol Hill (Broadway & John), and downtown. I go to the Group Health area (16th Ave NE & Thomas) 2-4 times per week. Currently, my trip (walk to bus stop, wait for bus to arrive/leave, trip, walk to destination) to this area from home to destination is 35 minutes. With the proposed deletion of Route 43 and having to use Route 48 (with more walking), in my testing 6 times, my trip takes 55-60 minutes. This is not progress, this is regress. My view is it is unnecessary and unwise to delete Route 43. Route 43 & Route 48 have about the same volume of ridership daily as of the rider stats I was able to find from 2015. I find it hard to believe, even with the increased frequency & hopefully timeliness with the split to 2 routes of this always late route, it will be able to handle the demand of both even with light rail. Also, I walk everywhere. But with a recent foot injury which may be permanent, my walking time will be increased 25-50%. This is my view as expressed by the Seattle Displacement Coalition: Bus service, station parking "I will fight for better and more frequent bus service into and through our neighborhoods. Right now, the bus service we need is being sacrificed and routes redirected to serve light rail. That isn't the answer for those of us who don't work downtown, and with the distance between rail stops, it's difficult even for those who do. "The vast majority who ride transit take the bus and always will. Enhancing bus service and expanding routes will do much more to get people out of their cars in the long run than rail. "Many low-income and working people commute to jobs in places other than downtown. Right now, their only choice is to commute by car. We need more bus service for these people, running to and from other activity centers — not just downtown. "Parking is needed around rail stops — not only to support light rail but to support the small businesses trying to make a go of it near those stops. Every study shows a huge portion of those taking rail drive to a rail stop. If there's no parking there, their cars spill over into surrounding neighborhoods. It's also folly to reduce or remove parking requirements for developers putting in dense projects around rail stops."</p>	5/31/2015 4:53 PM
17	<p>I will be using the DART 941 service for the first time and am excited to do this. I still need to get to work on time. If the estimated pick-up time is more than a 15 minute wait, this will be bad. Can we watch where a DART bus is, using the Metro app? To insure a successful launch, can you work with your variables so a rider will very rarely be denied a ride due to DART's reservations policy of a first-come, first served basis? The best thing about Laurelhurst is everyone talks to their neighbors. The worst thing about Laurelhurst is everyone talks to their neighbors. I would over service the DART for the first six months so that word gets to the neighbors that the DART system works.</p>	5/31/2015 4:08 PM
18	<p>Yes, I would like to propose this option for the revised Route #16. Instead of going through Fremont which is already congested with Routes 26, 31 and 32, plus the Fremont Bridge interruptions, what about the possibility of having the Route #16 go over the Aurora Bridge and then go onto Dexter Avenue? I think a fourth bus going through Fremont would be a mistake; too much congestion. I am a long time Metro rider of 30+ years and depend on it since I do not own a car. Getting downtown quickly from 54th Ave North and Meridian is extremely important for me since I go from there to work downtown. Thank you for taking this proposed change into consideration.</p>	5/31/2015 3:54 PM
19	<p>I use metro route 16 for the vast majority of my transit trips, primarily for commuting for work between Wallingford and downtown Seattle. Shifting route 16 to a path running through downtown Fremont and along Dexter Avenue and away from Aurora Ave would greatly increase my commute time, along with the commute times of all of the people who board the bus as it passes through Wallingford before getting onto Aurora Ave. The same case holds for the northward trip from downtown to Wallingford. The 16 route is almost always completely full each morning before getting onto Aurora Ave, so this is a popular commuting option to downtown for the increasing population of the Wallingford/Fremont corridor. Increasing the trip time would decrease the functionality of this bus for a lot of commuters, and drive them to other bus routes.</p>	5/31/2015 3:27 PM
20	<p>Could we experiment with a reverse commute run of the 28X connecting the regular route's 8th Ave. NW corridor with Bitter Lake's school, rehab, retirement, and commercial concentration? (The laborious track through low-density, low elevation Broadview could be eliminated.)</p>	5/31/2015 1:16 PM

<p>21</p>	<p>Yes. For those in-close/not-suburban households within the area ROUGHLY between S99 & I-5 between about N/NE 65th & N 35th, these changes will have seen the spending of \$1.9 MMM and, all things taken into consider, zero net benefit/deficit. I live in Wallingford, so I'm looking at this from my on neighborhood's benefit/cost. But I'm not a nimby, and I have a BA in Planning (Transportation), so I am basing this on some technical background. For getting downtown for work or Seattle Center for fun, clear deficit. Longer trips with worse traffic, though more frequent departures. Robbing Wally to pay Fremont. Only way this might net out is if expected donnybrook on Aurora comes to fruition after after/if they bring down the Viaduct, although a lot of that traffic may try to use Dexter and QA Ave to dodge that blockage, which would neutralize that potential add. As far as the 16 (my most frequently-used) route is concerned, I strongly believe this is a significant net negative). For going to Northgate/NSCC area, maybe not a frequent trip for non-shoppers/non-students, a little roundabout. Not fatal, not positive though. For going to the airport, maybe neutral. If the inescapable N-S traffic clog comes about when they take the Viaduct out of action, then the my 35 minute walk with luggage or 30 minute walk to the 44, 44 to University Station might net out as a benefit. Right now, I 16 or 26 to Westlake, then Light Link (which is great) but would become a little tougher. With no traffic clog, people in my hood who take bus+Light Link or ride+Light Link to SEA is the same or maybe better than it will be once Metro reroutes/schedules on this current plan. So for this chunk of four (plus two half-) census tracts that represent mostly walkable, traffic-suppression behavior voters who probably overwhelmingly supported paying for Sound Transit's giant cost, we're not really netting positive benefits, just a mix that totals out to neutral. It's sad. The one thing that might make this net out is if you could get them to keep the Viaduct in place reinforced, which would rationalize a lot of N-S trips and actually make the Murray Memorial Tunnel additive, but that's outside your brief. And I guess my "objections" (survey didn't provide any choice between can't live with it and neutral, so I had to lie and say I can't live with it) are that, over a billion dollars later, this set of voters with good car/energy consumption habits will, GENERALLY, be no better off transit-wise than they were before the expense and effort. Not much worse, maybe not worse at all, but no better. POSSIBLE SOLUTION Maybe the solution is something like bringing back the 6 and routing that through Fremont while leaving the 16 roughly intact so there's some Green Lake -->Wallingford-->Downtown without the rococo of the Fremont/Fremont Bridge/Dexter detour. Best wishes in your complex tasks.</p>	<p>5/31/2015 12:34 PM</p>
<p>22</p>	<p>I notices that a misleading flyer was posted around the stops on 35th and Wallingford, indicating that they would be closed and lose service. I wanted to make it known that, while less than ideal, losing a one seat ride downtown on the 26 at a stop at my doorstep is more than made up for by the increased frequency on the 16. I cannot stress enough how much more important frequency is than proximity. I often walk from 35th and Wallingford to 34th and Fremont anyway, as the frequency on the 26 is simply insufficient. Also, while I invariably choose the 26 from downtown, the proposed 16 would similarly be a massive improvement. Not just for the improved frequency, but for the increased connectivity. I urge Metro to make these proposed changes, and not bend to the fears of misinformed neighbors</p>	<p>5/31/2015 12:16 PM</p>
<p>23</p>	<p>At the meeting I did not see any improved connections to Children's Hospital. I know that for folks that work at Children's (and the neighborhood) that parking is an issue - especially for folks who work nightshift. Did I miss something or is there really no improved transit options to Childrens' hospital? And I hope Metro is able to respond quickly if a route is not working out as planned. We supported metro by voting in new taxes. It would be a shame to see our commute times lengthen.....</p>	<p>5/31/2015 12:12 PM</p>
<p>24</p>	<p>I may be missing something, but I can't figure out how I will deal with the elimination of the 71. I frequently catch ride it in the evening & weekends from Capitol Hill (15th Ave E & E. John St) either downtown via 10 or 43 or on University Ave. via the 43. I can't see how the new light rail like will be of use to me unless I want to go to the airport or to Northgate when that link is completed. Accessing the University business district from Capitol Hill will make more sense via the 43, 49 or 48.</p>	<p>5/31/2015 11:10 AM</p>

25	<p>I ride the 16 daily. It doesn't make sense to me why the 16 is switching with the 26 via Dexter rather than the quick trip on Aurora. Currently the 26 takes the slower route, but also has an express bus to compensate for the slower route. Not only is the 26 getting the faster route, they also are keeping their 30 min bus frequency with an express bus thrown in while the 16 is going to have a 15 minute frequency that takes a slower route. Currently, it doesn't make sense to switch a route that apparently needs higher frequency and therefore a faster route, with a route that has lower bus frequency along with an express bus. In my opinion one of two things should happen. 1. The 16 stays on its current route via Aurora with increased trips and the 26 stays on Dexter. If you want the system to have better efficiency, keep things the same until the light rail on 65th opens. Why couldn't the 26x take Aurora to speed up the trip to satisfy those riders who want a faster commute? 2. The 16 and the 26 switch at Dexter and Aurora, but the 26x goes away and the 16 gets an express bus that takes Aurora at least until the light rail station opens on 65th. Only problem with this option is I don't know if the 16x would bypass my stop. I do understand that the point of increased frequency on the 16 is for the future connection with light rail, which will probably make my trip to pioneer square more efficient. Only problem is that section isn't set to open till 2019, so why change the route now. Increasing bus frequency now if the changes to the route happens is a waste of resources. I might even walk over to the 26 because it will be quicker and not even take the 16, which has a stop that is 400 ft from my front door. I know how government can be through so its probably being done now because reallocating resources is not easy so it has to be done when you get the chance. Myself and others who currently take the 16, will likely abandon it for the quicker 26 because a frequency increase on a slower route won't help me get to work in a timely manner. I live on the street the 16 takes between 57th and 59th and I really don't like the idea of increased bus frequency because of the narrow street. I know a lot of others in the area feel the same way and they have even tried a petition with metro and have had no luck. I don't mind the bus on this street but increased frequency is going to be a problem and doesn't make sense until the light rail reaches 65th. I also couldn't tell if your planning on changing anything on the 16 downtown and I hope the answer is no because the first stop is 400 ft from my office. Just my 2 cents and I don't know all the factors that go into making these decisions, I am sure every one thinks they are an expert on transportation!!!</p>	5/31/2015 9:56 AM
26	<p>What happened to the 72 bus that serves my neighborhood and is packed with commuters?</p>	5/31/2015 9:21 AM
27	<p>My non acceptance of the Route 16 changes is due to the route the bus takes on Kirkwood Pl N. As a resident of the street, I find it unacceptable to increase bus traffic on this street because of the narrowness of the street. Currently, it's dangerous for cars, buses and pedestrians to be on the street together and it only works because the bus doesn't run that frequently. More busses means more possibility for accidents and parked car side swiping. The new routes do address a problem of east/west connection which I support, however, the bus needs to move off Kirkwood in order for me to accept the proposal. Please re-review the propose regarding the relocation of Bus16 submitted by Mr Douglas Martin on Dec 5th to Mr Kevin Desmond. I will only support any additioanal service for Bus 16 if it comes with a new route. Thank you for your consideration, Vivian Ma 5721 Kirkwood Place N</p>	5/31/2015 6:31 AM
28	<p>Please do not modify the bus 16 route. I live on this route and commute every day. The express bus makes it more convenient and easier to get downtown. This is a very popular route and the bus is often full or busy. The proposed changes would make me much less likely to utilize public transit. If the new route is significantly slower I would probably be encouraged to drive an automobile. Please do not re-route 16 through Freemont. Please leave it on Highway 99. Thank you.</p>	5/31/2015 3:35 AM
29	<p>I would use the bus and soon Light Rail to go downtown and to Seattle Center much more often than I do now if you provide me with better options than I currently have. Often it is quicker and easier to drive my car and use some discount parking coupons than it is to take 2 buses each way. Or on Sundays I can drive downtown and then find free parking for 2 hours, although this is difficult to do when there are Mariners, Sounders and Seahawks games. I do not work full-time but I do volunteer work downtown. Currently I can walk to my bus stop at 39th Ave NE and NE 55th St and take the #74 only if it is during commuter hours. If not commuter hours or if it is on the weekend, I drive about 11 blocks and park my car near the PCC on 40th Ave NE and NE 65th St. and take the #71 I do not understand all the changes but hope there will be a bus for me within walking distance (I live on 39th Ave NE between NE 52nd St and NE 55th St) running about every 20 minutes to the new Light Rail station so that I can get downtown in 30 minutes or less. Also I hope that where the bus lets me off is a short walk to the new University Light Rail station.</p>	5/31/2015 12:01 AM
30	<p>I may be missing something, but I am finding this survey difficult to relate to in terms of my regular transit use. I live in the vicinity of 15th Ave & E. John St on Capitol Hill. I frequently travel to NE 65th & 25th Ave NE including weekends and evenings. I currently take the 71 to Wedgewood- either from the Convention Center Station via the 10 or 43 or from University Ave via the 43. Walking or riding to the Broadway light rail station & then transferring again at the UW E. campus light rail station in order to travel to Wedgewood doesn't make any sense to me. Aside from trips to the airport or Northgate, when the route is extended, I can't see how the UW E. campus station is going be of any use to me.</p>	5/30/2015 11:20 PM

31	There is no option for weekend service to replace the route 71. Tis connection has been available for decades. We are an aging population along with many young families that need the weekend connection without walking a half mile to get it. Please provide a weekend option on 40th and 75th.	5/30/2015 9:36 PM
32	i bought a house partly because it was on route 71, but didn't know that during peak hours this bypassed south lake union (place of employment. Not amazon.) this was too bad. I live near sand point road and 70th. I've asked over and over in these surveys, apparently a minority, to be able to go from NE seattle east of 35th ave (e.g. not up and over the view ridge hill) to south lake union, which is only 7 miles. this area of seattle seems to be the ONLY area where you can't take a bus directly to south lake union. Connecting on a bus to go 7 miles, when you live in the heart of a busy residential area (sand point/magnuson) and are headed to south lake union, makes the bus about a 200 minuitees of extra commuting time per week (compared to car 20 min drive one way). I don't have this kind of time to take buses/transfers/etc. I will be forced to continue to drive (carpool) from sand point/magnuson to south lake union, with these change.s Deleting 71 doesn't effect me because it never worked for me (no peak hour service to SLU). I really wish the residents of magnuson/sand point-- and note, more income-based housing is being built IN MAGNUSON-- could get to south lake uniokn on the metro buses without transferring through the U and losing a lot of extra time. i am sure there are (and will be) many more residents who don't want to bus or walk up to 35th ave to take 64x or transfer through the U to get to SLU. thanks. thanks for listening.	5/30/2015 9:30 PM
33	I think it's a mistake taking Route 26 off of Wallingford and N 35th St. There are 2 new 4 story condo buildings being built near 35th and Wallingford, so now would be an especially bad time to take bus service away from that area.	5/30/2015 9:25 PM
34	First -- whoever in the planning department decided to build the link from downtown to Northgate in two phases five years apart should be forced to stand and watch the buses caught in the AM and PM rush hour traffic jams at Husky Stadium every day from 2016 to 2021. We could allow them to choose as an alternative to be shot . When the Northgate extension opens, I surely hope that you will not try to route people from NE Seattle to the stadium station. In the meantime I will have to live through five years of distinctly worse service. I probably will not ride Metro to downtown during this period. Thank you. Three concrete suggestions: 1. I ride a jammed-full 71 bus to the U-District every morning -- I will now have to transfer. I expect that it will be faster for me to transfer to the 45, not the 67 or 73. I doubt I'll be alone. Expect overloads on the 45 and perhaps plan for more buses at rush hour. 2. In the evening rush hour, I expect that people in the U-District, particularly students living on west campus, will find it faster to ride the 70 than to struggle over to Stadium Station on your frequent buses that will only add to the congestion along Pacific Way and be stuck there. Put more buses on the 70? 3. Your frequent service from Northgate to the U-District to the Stadium Station on the 67 is clearly intended as the route of choice for the many, many students who live between the U-District and Roosevelt. (When we get to the Ave, we are standing room only move to the back squeeze hard together folks maybe leave some people behiind every day on the 71's that arrive not long before class starting times). But your high-frequency service that students will want to use is 2 or 3 blocks farther away from campus. I predict that the 45 is going to struggle to pick up the load that now rides the 71, 72 and 73 from campus to 65th Street. WOULD IT MAKE MORE SENSE to run the high frequency service along 15th or on the Ave? Just because there will be a station at 65th and Roosevelt in six years doesn't make Roosevelt the route of choice now.	5/30/2015 9:23 PM
35	The 16 is awesome! An east-west route on 65th between Sand Point and Greenlake/Fremont is just what we need. My only wish is that it went west to Ballard rather than south to downtown. Thanks for resurrecting the 73. The lack of 15th Ave NE service was causing concern for friends living in Pinehurst , and made me reluctant to live there. It's fine if it's daytime only because the 347/348+67 transfer is more viable in the evening when the Northgate Way traffic has died down. I half wish the 67 stayed on 5th/80th rather than going up to Northgate Way and getting stuck in traffic. The expanded 372 will significantly help northeast Seattle.	5/30/2015 9:18 PM
36	I live in Wedgwood and use Route 71, specifically the stop at NE 80th St and 40th Ave NE. Many times I am riding the bus downtown for evening performances where I volunteer as an usher. Returning I walk the two blocks to my home at 10:30-11 pm. I would be much less comfortable walking from 35th Ave NE. I do not understand what the DART proposal is. In short, it appears that route 71 is going away without anything in its place. I looked at your maps and find them confusing. Am I mistaken about route 71? Will it still go north/south on 40th Ave at NE 80th. Are there places I could drive to in the neighborhood to get more frequent transit to downtown? If I pay to take the bus to the Husky Stadium light rail stop, will I get a transfer at no additional cost? thank you, Marcia Lupton 206-841-2909 marcialupton@gmail.com	5/30/2015 8:51 PM

37	<p>The proposed changes for route 16 do not meet your stated goals- in fact they do the opposite. The new Green Lake to Sand Point connection does not make it any more efficient for me to use the light rail. We currently have options for taking the bus to Fremont and do not need to divert the bus to this area. The existing bus lanes and infrastructure on Aurora are the fastest and most efficient connection to downtown. I do not see a reason to change the route to a less efficient street system in Fremont, a bridge without a dedicated bus lane and a bridge that opens for marine traffic. This proposal increases the time it would take to reach downtown- exactly the opposite of your stated goal. The current time is about 25 minutes with no traffic. If the time increases much more, it will be impractical for people to live in Wallingford and work downtown. Please leave the current routing from Wallingford to downtown.</p>	5/30/2015 8:32 PM
38	<p>I can't find anything about changes to the 26,so this survey and the graphics accompanying it are not informative.</p>	5/30/2015 8:16 PM
39	<p>My suggestion would be to start running the 373X, 67, 347, and 348 earlier in the day—as early as the current 73 —because Olympic Hills, Jackson Park, Pinehurst, and eastern Victory Heights communities will lose early morning bus service. The other suggestion is to have the 73 transfer to the UW station at the Montlake Triangle— not Stevens Way—because it would be faster. I've been taking the 73 in the morning from my home in Pinehurst to my job at UW Medical Center for over 8 years. However, I must now consider driving my car to work due to the current the proposal. If you don't want people driving cars (assuming that is even an option for commuters), then you can't reduce service hours. The current 73 would be replaced (in part) by the 67. However, it would be off to a later start. I'm not even sure if the 67 will start early enough on the weekends for me to get to work on time. If you want to increase ridership, then you will also need to eliminate gaps in service. Currently, I catch the 73 across the street from my home on NE 123rd Street. Under the proposal, I'll have to walk 0.7 miles on the weekends because the 347 and 348 won't start early enough—and even possibly weekdays! If you want to increase transit ridership to Downtown Seattle, then you will have to make transfers faster. This would be achieved by having the 73 terminate at the Montlake Triangle—instead of stopping on Stevens Way, which is a 5 minute walk to Husky Stadium—the only North Seattle LINK transfer point to before 2022. The 73 had more weekday ridership than the 67 & 68 combined in 2014. However, the new Route 67 will have the faster path (University Way); faster transfer to LINK (terminate at Montlake Triangle); weekend services; and longer weekday hours of operation. If you want people to ride transit, then service has to be fast, convenient and comfortable. Olympic Hills, Jackson Park, Pinehurst and the eastern part of Victory Heights will be receiving the opposite when the 73 is reduced.</p>	5/30/2015 7:48 PM
40	<p>I live in Maple Leaf, west of 5th Ave NE on NE 90th Street. I'll summarize my comments into a succinct plea, and that is to PLEASE KEEP THE CURRENT BUS ROUTE 66 ON 5TH AVE NE FROM NORTHGATE!!!!!! If you continue to read my comments I'll explain why I say this... I have mobility issues and cannot walk very far. Right now I'm using crutches to get around, and on a good day I use a cane. I often use the 66/67 to get to both the U-District and to the Northgate Transit Center. I work in the U-district and when I want to get downtown I take the 41. I am very upset that you are taking the current 66/67 bus service off of 5th Ave NE. Walking over to Roosevelt to catch the proposed new route 67 doesn't work for me. I will have to drive over there to use the proposed southbound 67. You are also making it impossible to get to the Northgate Transit Center. I'll have to drive up to that Park 'n Ride in order to use the 41 in the future. These proposed changed to the 66 and 67 bus routes do not serve people on the west side of Maple Leaf well at all, especially those of us who live west of 5th Ave NE. Another problem with removing the current 66 bus is that there is no way to get to Roosevelt in the U-District, and to Eastlake. I have also looked at the proposed new route 67, and it's going to be a slow ride down to the Stadium light rail station. Roosevelt in Maple Leaf is really backed up already since there's a dedicated bike lane, only one lane of traffic each way with no place for buses to pull over, and a new, popular Maple Leaf Reservoir park that draws a lot of people who are crossing Roosevelt to get there. Then when you get to University Ave NE that is going to be slow going as well. This is a milk run bus route, and it is going to take forever. Looking at the travel times you have published, you are saying it's going to take 30-40 minutes to get from Northgate to the Stadium station on the new route 67. Add on the time it's going to take to get to the light rail platform, wait for a light rail train to show up and then get downtown and you are talking over an hour of travel time. This is not efficient! In contrast the 41 will get to downtown still much faster from Northgate, and in six years the light rail will be running from the Northgate station. I really, truly hope you'll be restoring bus service up to the Northgate transit center by then!!! I get that you are trying to funnel people to the Stadium light rail station, and that makes sense from maybe NE 80th Street and southward. However if you live north of 80th, and certainly on NE 90th Street like I do it makes much more sense to go to the Northgate Transit Center and take the 41 from there, especially when the current 66/67 bus route is an efficient and quick way to get to the transit center. Just as the airlines say the closest exit may be behind you, in Maple Leaf the fastest way downtown is to go north to the Northgate Transit center and then take the 41 express bus from there. SDOT recently started to do a study called "Roosevelt to Downtown HCT Project Definition" and if you look at the map that shows their route you will see that it is the current Metro bus route #66 from Northgate down to Westlake!!!! I don't understand this duplication of effort between Metro and SDOT, especially when the current bus route #66 is already serving the exact corridor that SDOT is proposing. You could just leave the current bus route #66 in place and save everyone a lot of time and money. Here's the link to the SDOT project: http://www.seattle.gov/transportation/roosevelthct.htm In summary: Please keep the current bus route #66 intact!!!! Thank you, Ann Testroet ann.testroet@gmail.com</p>	5/30/2015 7:18 PM

41	<p>My suggestion would be to start running running the 373X, 67, 347, and 348 earlier—as early as the current 73—because Olympic Hills, Jackson Park, Pinehurst, and eastern Victory Heights communities will lose earlier morning bus service. The other suggestion is to have the 73 transfer to the UW station at the Montlake Triangle—not Stevens Way. I've been taking the 73 in the morning from my home in Pinehurst to my job at UW Medical Center for over 8 years. However, I must now consider driving my car to work due to the current the proposal. If you don't want people driving cars (assuming that is even an option), then you can't reduce service hours. The current 73 would be replaced (in part) by the 67. However, it would be off to a later start than the current 73. I'm not even sure if the 67 will start early enough on the weekends for me to get to work on time. If you want to increase ridership, then you will also need to eliminate gaps in service. Currently, I catch the 73 across the street from my home on NE 123rd Street. Under the proposal, I'll have to walk 0.7 miles on the weekends because the 347 and 348 won't start early enough on the weekends—and even possibly weekdays! If you want to increase transit ridership to Downtown Seattle, then you will have to make transfers faster. This would be achieved by having the 73 terminate at the Montlake Triangle—instead of stopping on Stevens Way, which is a 5 minute walk to Husky Stadium. The University District station will not be opened until 2022. This leaves the only transfer point to Downtown Seattle at the stadium. 73 had more weekday ridership than the 67 & 68 combined in 2014. However, the new Route 67 will have the faster route (University Way); faster transfer to LINK (terminate at Montlake Triangle); weekend services; and longer weekday hours of operation. Olympic Hills, Jackson Park, Pinehurst and the eastern part of Victory Heights will be the losers when the 73 is reduced. We will have diminished early morning service.</p>	5/30/2015 6:39 PM
42	<p>My biggest concern is that traffic on Aurora during rush hours will be worse than it is on surface streets and so my bus trips downtown on the 26x (currently take the 26) will end up being slower during peak times than they are now. Is there a bus lane on Aurora? If not, could there be? Otherwise, good show, this plan seems like a good one and while I was rather wary at first given all the changes to most of the routes I use, I think most of them are at least alright if not pretty good.</p>	5/30/2015 6:02 PM
43	<p>the #16 through Green Lake and Wallingford is a main artery for many people to downtown. please don't cancel this route or make it much longer.</p>	5/30/2015 6:00 PM
44	<p>The changes to route #16 as a route change is tolerable, but not ideal for our family. However, the increased number of buses that run down Kirkwood Pl. N. is not DOABLE. The street is too narrow for the buses that run on it today. A bus and any other vehicle cannot pass safely! A bus and a delivery truck, such as fed ex, UPS, furniture trucks, construction trucks, etc. can't pass at the same time which creates congestion. Increasing the frequency and number of the buses that run on Kirkwood Pl. N. doesn't make good sense since the street can't handle the current capacity. Don't increase the frequency of buses. If you must, move the bus line to Latona or Greenlake Way where it is safer for the community.</p>	5/30/2015 5:14 PM
45	<p>It would be helpful if more busses went directly to the UW light rail station instead of on campus. It seemed the only bus that went to the station was route 65 which is nowhere near the NE 65th St and 25th Ave NE area. A bus going down 25th Ave NE to the light rail station would help. With the elimination of route 71 and 64X going to and from downtown it only leaves route 76 which is already often standing room only. I believe the proposed changes had an increase in frequency of route 76 which would probably help with crowding. Also, with the elimination of route 71, it was hard to find out what was available after peak hours in the evening to get from downtown to the NE 65th St and 25th Ave NE area. It would have been helpful to have more detailed maps of the bus routes to know what the walking distances might be. In general it is most helpful to have the least number of transfers/connections as these just add more time and inconvenience to the trip.</p>	5/30/2015 4:15 PM
46	<p>I have concerns about having to pay two fares to get downtown from Bryant.</p>	5/30/2015 3:13 PM
47	<p>I've been taking the 73 in the morning from my home in Pinehurst to my job at UW Medical Center for over 8 years. However, I must now consider driving my car to work due to the current the proposal. If you don't want people driving cars (assuming that is even an option), then you can't reduce service hours. The current 73 would be replaced (in part) by the 67. However, it would be off to a later start than the current 73. I'm not even sure if the 67 will start early enough on the weekends for me to get to work on time. If you want to increase ridership, then you will also need to eliminate gaps in service. Currently, I catch the 73 across the street from my home on NE 123rd Street. Under the proposal, I'll have to walk 0.7 miles on the weekends because the 347 and 348 won't start early enough on the weekends—and even possibly weekdays! If you want to increase transit ridership to Downtown Seattle, then you will have to make transfers faster. This would be achieved by having the 73 terminate at the Montlake Triangle—instead of stopping on Stevens Way, which is a 5 minute walk to Husky Stadium. The University District station will not be opened until 2022. This leaves the only transfer point to Downtown Seattle at the stadium. 73 had more weekday ridership than the 67 & 68 combined in 2014. However, the new Route 67 will have the faster route (University Way); faster transfer to LINK (terminate at Montlake Triangle); weekend services; and longer weekday hours of operation. Olympic Hills, Jackson Park, Pinehurst and the eastern part of Victory Heights will be the losers when the 73 is reduced. We will have diminished early morning service. Here's what you need to do to fix this: My suggestion would be to start running the 73 at its current time or else start running the 67, 347, and 348 earlier in the mornings.</p>	5/30/2015 3:07 PM

48	Your survey needs to show the maps of the new transit routes. The website says new routes, but clicking on the line shows nothing whatsoever. It is therefore impossible to conclude that you are doing anything, but abolishing Route 71 and leaving the areas it serves without transit service. If you want to know how rider's feel, give out route information on the buses during the day the way that you give out transit schedules. A system that has been in effect for sixty years works well. Rumor has it that to get to downtown, North East Seattle will have to take a bus to the Husky Stadium station and transfer there. That puts transit riders into the congestion that for many hours extends back to University Village southbound and northbound extends back from N.E. Blakely to University Village and from N.E. 55th St. to McDonald's drive-in entrance. Both often takewaiting an intersection cycle to clear.	5/30/2015 2:09 PM
49	The problem seems to remain of getting from Northgate to Downtown in the evening. A travel time of 25 minutes on the 41 is mentioned. This does not seem to happen with the terrible traffic on I-5. It often takes much longer than that. A travel time of 35 minutes is mentioned for the route 67 from Northgate to UW Link. This is much longer than what I was expecting. What is the point of going to UW Link if no time will be saved? I had thought that the new 66X would serve the UW Link, but I seem to be mistaken. No travel time is mentioned for this route from Northgate to First Hill, so I don't know if it is a benefit to me. I don't see much in the package for me. I am doubtful that the terrible commute in the evening from Northgate to Downtown will improve. I am left to wait for the Northgate Link and may be dead by the time that happens. Northgate is a major hub and the UW Link is a connection to the CBD, but I don't see much in the way of connecting these two quickly. A fast connection is needed until Northgate Link is running.	5/30/2015 1:11 PM
50	It appears from the comparison map that 26 and 28 along Dexter would be going away. If that is true, many people who live on the east part of Queen Anne would have no way to get downtown. That's a lot of people, including myself!	5/30/2015 12:51 PM
51	We live in the 6200 block of 30th Ave NE. To get downtown, we walk 2/3 of a block, catch the 71, and get off the bus in the tunnel. The new plan: We walk 5 blocks (0.3 miles) to 35th Ave NE. Take a 65 that drops us off either A) 0.3 miles from light rail on the UW campus or B) finishes its run through campus and east on Pacific, dropping 0.1 miles from light rail. Then we wait for a train, board and get off in the tunnel. For us, this plan grades out as a fail.	5/30/2015 10:23 AM
52	Looks like there's more direct connections between Northgate/Maple Leaf and the 520 bridge stops at Montlake. That's going to make it a lot easier for me to get to/from work.	5/30/2015 9:42 AM
53	The loss of Route 72 will cause me to drive my car much more.	5/30/2015 5:43 AM
54	Please, please, please make sure there is a bus stop at Stevens Way & Rainier Vista. It's already a long walk from Husky Stadium to Stevens Way... don't make it worse by forcing people to walk to Garfield Lane or Benton Lane.	5/30/2015 12:28 AM
55	Make sure there is a stop on Stevens Way *AT* Rainier Vista. It's already a long walk from Husky Stadium to Stevens Way... don't make it worse by making people walk to Garfield or Benton.	5/30/2015 12:20 AM
56	The proposed changes to route 16 would diminish the useful role it currently serves for East Queen Anne as a Northbound connection to the U District and NorthGate, as well as Southbound. * Moving the stop from Aurora & Lynn down to Dexter will increase the walking distance from East Queen Anne, making it less convenient. * The change to Dexter may also reduce the timeliness of 16 since it will lose access to the bus lanes on aurora. * Changing the 16 to not directly serve NorthGate will break a useful, non-transfer required connection to that area from East Queen Anne. * Increased frequency of 16 would not be worth the trade-off. Right now, for some of it's service corridor where it partially overlaps with the Rapid E, that frequency is already achieved since the 16 and E tend to alternate arrival times. The Alternative 2 (Sound Transit?) proposal both sounds more appealing than Aternative 1. Better geographic coverage is more important than more frequent service. The current 30 minute service for many routes is sufficient, and increased frequency is not worth losing that. In addition, increased geographic coverage often creates the possibility of multiple routes to a destination or transfer, which can be useful when there are isolated traffic problems that may affect one route but not the other, or only one of the routes is running late. For example, having the ability to take either the 16 or the Rapid E north from Aurora and Lynn and transfer to the 44 at 46th/45th means there is an increased chance that one of them will be on schedule and make the 44 connection.	5/29/2015 9:34 PM
57	Fewer transfers to north shoreline and lake forest park. Love you transit!	5/29/2015 9:15 PM

58	<p>1. The reduction of relatively fast thru bus service from NE Seattle to Downtown; e.g., the elimination of the route 71 is very problematical. I don't think that we should rely solely on Link Light Rail service to get people between NE Seattle and Downtown Seattle. While the proposed new Route 16 does provide a way to get from NE Seattle to Downtown Seattle via one bus, it takes a very roundabout route, and therefore would take a long time to go from NE Seattle to Downtown Seattle. Therefore we need, in addition to Link Light Rail, fast, frequent, reliable direct bus connections between NE Seattle and Downtown Seattle at all hours, not just rush hour. 2. The lack of frequent link bus connections from Husky Stadium to NE Seattle on nights and weekends; e.g., 30-minute headway on the Route 65 is a problem. Therefore, I think that at most a 15-minute headway should be maintained at all times, with even more frequent service during peak travel hours. Otherwise, it is likely that the Route 65 will become as hopelessly overcrowded as the 71, 72 and 73 have been for years. The 65 gets very overcrowded at times now; what will happen when Link Light Rail goes to Husky Stadium? 3. We need to immediately deal with the frequently-gridlocked Montlake Boulevard near the Husky Stadium light rail station. To place a major Link Light Rail station at Husky Stadium, in the middle of one of the most gridlocked traffic areas in Seattle, without taking major action to improve bus access to the station, is unacceptable and will result in major delays for bus passengers wishing to get to and from Link Light Rail. Therefore, I suggest implementing one or both of the following: a - Construct a busway through the vast Montlake parking lot that would go from somewhere near NE 45th Street and Mary Gates Memorial Drive to as close as possible to the Link Light Rail station at Husky Stadium. b - Construct a bus-only lane on southbound (and possibly also northbound) Montlake Boulevard between at least about NE 45th Street and the Link Light Rail station at Husky Stadium.</p>	5/29/2015 8:56 PM
59	<p>The proposed change to the 28 leaves a huge gap in service between Fremont and north Seattle. From Fremont, riders can either take the 31/32 to the U-District, the 16 to Wallingford, or the 40 to Ballard. There is nothing in between, and there is no easy way to access other service except by walking half a mile up a steep hill, or taking a bus in the wrong direction (towards downtown). For anyone with mobility impairments -- and that's a *lot* of people -- the walk from 34th to 39th is essentially impossible. Even for able-bodied people, the walk is sufficiently annoying -- and the two bus stops (38th/Aurora and 39th/Fremont) are sufficiently unpleasant -- that many of today's would-be Route 5 riders choose an alternate path, such as the 28, the 40, or a private car. Metro clearly understands that there's a difference between stopping at 38th/Aurora (or 39th/Fremont) and stopping at 34th/Fremont. Similarly, there's a difference between stopping at 45th/Wallingford and 45th/Latona. This is why Metro is promoting the new 16 -- whose routing I applaud, and will use very often -- as a "new connection between ... Wallingford and Fremont". The new 16 will serve that trip much better than either the 16 or 26 do today. Further west, however, the opposite change is happening. RapidRide D does not serve Fremont, and it would make no sense if it did. The same is true for RapidRide E, which would not be very rapid if it had to detour through Fremont. However, the 5 and the 28 have no such problem. Both buses arguably have to go out of their way *not* to go to Fremont. The 40 is a poor substitute, both because the trip through Ballard is a lot slower than taking 8th Ave NW or Greenwood Ave N, and because it only serves the neighborhood's northern periphery. I'm mostly focusing on Fremont, but note that the Aurora routing is also bad for commuters heading to South Lake Union. While there will hopefully someday be a Mercer stop on RapidRide E, there isn't one right now. Meanwhile, the stop at Aurora & Denny is a 10-minute walk away from Westlake and Harrison (a rough midpoint of Amazon's campus). A routing along either Dexter or Westlake would be far better. Metro's proposed change to the 28 takes away these important connections, and replaces it with nothing. The benefit of this change, of course, is a faster and more reliable ride to downtown during off-peak hours. (During peak, riders can already take the 28X.) Speed and reliability are absolutely important, but so is access. Please don't take away the connection between Greenwood and Fremont. I don't care whether you restore the 28 local, or send the 5 to Fremont, or do something else entirely. I just want some way of getting between the two neighborhoods that doesn't involve a 10-minute hilly walk on both ends.</p>	5/29/2015 8:50 PM
60	<p>Please do not isolate the Wallingford neighborhood near Gasworks. Please keep Route 26 from 35th & Wallingford into Fremont and up Dexter. Eliminating this access is equivalent to eliminating livelihoods. Thank you.</p>	5/29/2015 8:36 PM
61	<p>I think anything you can do that keeps transit more accurate and on time and more frequent are good changes!</p>	5/29/2015 7:35 PM
62	<p>Thank you for expanding service for 372x ending as early as it does is a major problem for students and staff at UWB who work nights.</p>	5/29/2015 5:04 PM
63	<p>My question is this: Would these changes mean less express bus service from the U District to the downtown tunnel?</p>	5/29/2015 4:52 PM
64	<p>Don't add more time to my Route 16 commute!</p>	5/29/2015 4:45 PM
65	<p>You completely miss the point on Green lake. What we need are DART buses to get us from here to a transit hub so we can take one of the north/south sound transit lines. EG, from Green lake to the U W station, or perhaps to Roosevelt Station when it's completed. they are too close to drive and to far to walk.</p>	5/29/2015 3:56 PM

66	Most of these proposed changes make transit service much more difficult and time-consuming for me. I will have to transfer more often and/or walk further to catch/transfer buses. I live in Ravenna, near 15th NE and NE 73rd, and I currently have all-day service on 15th NE of 4 buses per hour to UW and express service to downtown (72, 73), with the option of more routes if I walk (twice as far) to 15th NE and NE 65th (71, 64, 76, 48), or to 15th NE and NE 75th (68). All of these routes, except 76, are either being deleted (71, 72, 68) or re-routed in ways that require more walking and/or transfers. The most awkward example is the 73, which will be the only route near my home, which will not go downtown (current route), but will terminate on UW campus, and will not even actually go to the stadium - this will require either an additional walk (campus to stadium) and a transfer, or two transfers (73 to a bus to stadium, then 2nd transfer to rail) to get downtown. The only ideas I have for making the proposal better are to retain the current routes & schedules for 72 and 73, so that people in this area do not have such a negative impact to transit service, at least not until the Roosevelt rail station opens.	5/29/2015 3:47 PM
67	I don't think I'm paranoid, but the changes proposed by Metro are making me less sure. I am certain that virtually every change Metro makes (in this instance route 16) makes my travel by bus WORSE. How do you people dream these things up. Your new proposal is going to make my getting to downtown from Wallingford awful. Please retire those people who work on making changes to bus routes; they're the enemy.	5/29/2015 3:38 PM
68	Many people from downtown and south of downtown Seattle rely on Bus 66X to get to the Roosevelt Clinics near UW. We can take link to Husky Stadium but need good bus connections from there to the Roosevelt Clinics. Hope such transit services will be provided and with good frequency throughout the day.	5/29/2015 3:29 PM
69	Many students in the north end take the 48 to get to Garfield and Holy Names high schools. I wonder how they would get there and back with the changes to 48. Also, I would like to know about service changes planned for 23rd Ave while street improvements close the roadway down. Finally, it may be awkward to make a change from local service to light rail to capitol hill and then transfer again to get to Garfield, but I wonder if that would be possible with any degree of efficiency -- thinking about this as an option if the 48 can't travel along 23rd Ave because of construction.	5/29/2015 3:24 PM
70	Eliminating the 28 would greatly reduce bus options for Crown Hill and Whittier Heights. It is a great connector to downtown for north Ballardites. Without it, we would walk 7 blocks to the D or 8 blocks (uphill) to the 5 on Greenwood. 40 goes up 24th and then at 85th crosses 15th NW. It's unwieldy for north Ballardites. More frequent 44 route would help east/west, but it doesn't connect well to 40, 5, nor 5. By not even listing Ballard as one of the areas for this survey, it is apparent that its concerns are not a priority.	5/29/2015 3:11 PM
71	These new routes have effectively cut west Maple Leaf to downtown bus service during non-peak hours.	5/29/2015 3:07 PM
72	More frequency	5/29/2015 2:43 PM
73	As I understand it, route 71 would turn into an east-west shuttle. I hope it would continue to run the hook (or is it a dogleg) up 40th to it's current terminal point on 35th & 85.	5/29/2015 2:18 PM
74	Don't slash route 71, as it is the only reliable way for me to get downtown!	5/29/2015 2:09 PM
75	We are transitioning from a one-seat transit system to a frequent service system. The transfers at the UW Light Rail station must be lightning fast. Time them and make transit a first-class mode of transportation. Lessons must be learned from the atrociously slow transfers between Mount Baker Station and Mount Baker Transit Center, as well as between the Downtown Seattle Transit Tunnel and any bus except those on 3rd Ave.	5/29/2015 2:04 PM
76	quicker bus service between maple leaf and first hill in the evening and from first hill to maple leaf in the morning	5/29/2015 1:54 PM
77	I find the change to Route 16 between Green Lake and Northgate unacceptable. There are many students riding from south of Green Lake to the North Seattle College on this route and having to schedule around transfers is problematic when making it to class on time. This is especially true since the proposed lag time between rides on the 26X is 30 minutes compared to the current 20 minutes on the 16. Since you were able to create a 'new' route (45) between Ballard and the University, why can you not create a new East-West route along 65th instead of totally removing the 16 between Green Lake and Northgate? And, more importantly, when did Sand Point become a destination? I commented in the March survey that an East-West route that connected Green Lake to an easier access to U Village would be helpful. I am assuming that somehow this change to the highly used, and very conveniently located 16, is a response to that. I highly suggest that this change be reconsidered.	5/29/2015 12:21 PM
78	Creating parking/making parking at the light rail site accessible. I would take light rail from the UW station to my work in Pioneer Square but in order to do that, using transit and not a car, I would have to take 2 different buses just to reach the light rail station. This makes no sense. Having parking available would make the choice for me about using the light rail. There is already free parking available and in use at the transit stop under the freeway on NE 65th (the Greenlake Park and Ride); why cannot something similar been done for the UW light rail station?	5/29/2015 11:20 AM

79	On the first map showing routes for NE I did NOT see any indication of service on NE 75th, at least from Roosevelt to at least 25th. The text descriptions of proposed changes for the 67/68 are not at all clear. Please clarify. If it is correct that there will be no #68 or 67 (whatever the route that goes from Northgate down 75th to the University and back North) down 75th, I am vehemently opposed. If service will continue on 75th between 25th and Roosevelt, please make this clear. If service from 25th and Roosevelt on 75th will be eliminated, it will pose a major hardship for me. I have limited mobility and no car. Having to walk uphill to catch either a 72 or 73, or walk further to catch the 66, is very difficult on good days and impossible on bad days.	5/29/2015 11:06 AM
80	Where possible, it would be great to address reliability concerns through capital improvements such as bus lanes, queue jumps, etc. rather than cutting long through-routes such as the 48 in half. I know that is not immediately implementable but it should be the long term goal.	5/29/2015 10:51 AM
81	I thought the new proposal was to keep 49 as it was currently routed AND provide more frequent service - yet the map seems to show it has been proposed to be rerouted off of Pine? This is a big impact to my ridership because I depend on 49 (Summit & Pine) to get me to 15th & 42nd in the UW area frequently. I have disabilities, so this route, though lengthy, requires no transfers and minimal walking. It would be helpful if the interactive map allowed you to click on a specific bus # and have the route highlight on it. If it is as it appears by only seeing periodic bus numbers without the route loop showing, the Link station on Broadway is too far for me to walk to and is too far away from the UW area I go to for doctors. So getting to these frequent appointments is going to drastically and negatively impact my transit use and, therefore, my health. Having to catch a bus to the Link, then to another bus vs just getting on 1 bus is a true hassle I do not look forward to. I was honestly hoping the Link would be a benefit to my ridership, but appears at this point to be a problem instead. Wish Seattle would have taken input from other more successful transit cities so the entire system was less complicated and, hence, more streamlined and fast. Just seems to be too disjointed as a whole and not necessarily looking to get better.	5/29/2015 10:11 AM
82	Since the 65 line was extended north there has been routine delays (at least 5 minutes) and crowding in the early morning southbound buses (between 6 and 7am). I live in Wedgwood and by the time the bus arrives in my neighborhood (about 1/3 of the route) the bus is full. Please address this by modifying the early morning timetable (perhaps add more early routes). I work at UW hospital in the operating room and I cannot count on the bus to get me to work on-time. The other issue with the 65 bus is the limited schedule during UW campus holidays/breaks. Most riders on this line are not students, but the staff of both Children's Hospital and UW Hospital. When the University is not in session we are forced to take busses that bring us to work at least 45 minutes early and the busses to and from the hospital are very crowded.	5/29/2015 10:03 AM
83	Improve sidewalks at key access points, taking into account fall risk where tree roots and untended plantings make walking unsafe and signage not visible. Improve visibility of street signage along main routes. Enlarge letters and use reflective, high-contrast materials. Better coordinate/regulate bicycle traffic on routes designed for primarily pedestrian access. Take into account how auto, bike, bus and light rail use will change with the development of 65th St. and Northgate stations.	5/29/2015 9:55 AM
84	The new Route 16 will definitely alleviate traffic and congestion in the Ravenna area. I like this new bus route because it will open up the Ravenna corridor to more business in the area.	5/29/2015 9:52 AM
85	Whatever bus services the route of the 31 & 32- Fremont to U-district, would need to address big gaps in service during the 8am - 9am hour.	5/29/2015 9:34 AM
86	The 16 should NOT be made into a Wallingford-Fremont connection. Every commute rush, it is standing-room-only, and (when heading downtown) is occasionally over-full by the time it gets onto Aurora. It sheds 1/3 of its riders in SLU and the majority of the rest in the downtown core. Adding 20 minutes to the commute time to provide Wallingford-Fremont connection is solving the wrong problem. The 26X is already a slower option than the 16: please don't degrade the 16 in favor of the already inferior 26X. East-west connections are helpful, but not at the expense of commuter routes that already have demand exceeding supply. Also: The "sounding board" meetings are a bit insulting - we are invited to come and talk with people who have no decision making authority? That seems like a tremendous waste of everyone involved's time.	5/29/2015 9:31 AM
87	First, thank you for allowing us to comment on the proposed changes. But, I do have concerns. First, despite reading the proposed service changes several times and watching Tedd's video, I am still confused about how Route 941 or DART would work. Where would it stop? At my house? Would it run after 7pm on weekdays or on weekends? How much would it cost? I could not find answers to these questions in the proposals. Second, with the removal of Route 71, how would I, a View Ridge resident, get to and from Downtown Seattle after 7pm on weekdays and all day on weekends? Also, since I have taken Route 71 from my house to Downtown Seattle and then hopped on Light Link Rail to Sea-Tac airport, how would I do that if the bus stop were far from my house and I was carrying luggage? In sum, unless Route 941 (DART) stops near my house and was available at least until 9pm on weekdays and on weekends, it seems to me that the proposed changes would make my transit options to Downtown Seattle LESS convenient and more complicated. Regards, A long-time View Ridge bus rider	5/29/2015 9:27 AM

88	Thanks for the extension of Route 16 to View Ridge. I will be able to take the bus from View Ridge to Green Lake instead of driving -- parking is so difficult there! I will need to transfer at 15th to get to the UW campus (work) or downtown, but increased frequency along NE 65th makes this trip easier.	5/29/2015 9:26 AM
89	I'm glad extra routes are being added to 76. I'm extremely disappointed that the 64 route is being changed and is not even a possible option to get downtown any longer. I'm TERRIFIED that route 71 has been discontinued...cannot figure out how I'll freaking get home if I have to work late and miss the 76. Your model of a half-mile walk to a stop is NOT PRACTICAL for an aging population, and will simply put more people into cars...	5/29/2015 9:12 AM
90	I live near Jackson Park and my main bus to UW and downtown is the 73. I appreciate that you have modified the earlier proposal to keep the 73 running through Pinehurst to NE 145th St. I can accept a bus that runs to Husky Stadium to connect to Link light rail. There are still some improvements you could make to the proposal. The 73 is a commuter bus for people in northeast Seattle to get to the UW and downtown. As such it should not make a pointless detour through the Roosevelt district and wander down Roosevelt Ave to the UW. Just send it straight down 15th Ave NE the whole way. The point is to get to Husky Stadium as quickly as possible. The 73 is usually full by the time it moves south of NE 80th so there is nothing to be gained by swinging through the heart of Roosevelt and then going down Roosevelt instead of 15th. You want to get people to the light rail at Husky Stadium, then go there instead of fooling around. The proposal calls for the end of weekend service on the 73. This is insupportable. Use a smaller bus on the weekend if you must, but we live in a 24/7 society and weekend service must continue. Finally, the proposal eliminates the loop through Olympic Hills at the north end of the route. Why? That is a pretty big chunk of Seattle that will not be served by bus except at the edges. Please do not lose this piece of the bus line. Thank you for the opportunity to comment. Chris Burke Olympic Hills 206-371-6450	5/29/2015 9:10 AM
91	Unless I have missed some critical information, the loss of route 68 means I start commuting in a personal vehicle rather than public transit which I currently use. From the information I have read, the 68 is claimed to be a "redundant" route to the 372. This is just not true and I think a poor argument for the many people I share rides with that live north of University Village and travel along 25th Ave NE to the Northgate Transit Center. The 372 is a north/south route. As far as I can tell, this would make my commute to and from work a three bus as opposed to two bus commute. This is no longer acceptable for me. It would add an additional wait to an already lengthy commute. I am all for more frequent runs N/S and E/W, but there are key destinations (transit centers) that might require a few exceptional routes. Seattle's roadway grid just does not make certain N/S and E/W routes possible. Without certain exceptions, users would be required to make more transfers. Not good. Please reconsider the 68.	5/29/2015 9:09 AM
92	I live in Wedgwood at 45thNE and NE75th - currently take the 76 to work and back; it takes 3 times as long as driving, but that's what is available. I have a problem with the proposed 65 route - in a morning commute, walking to 35th, catching a high frequency bus, it's about 15 minutes at the top. Then, instead of heading directly to the stadium light rail station, it's going to go through campus - uphill, windy, slow stopping for peds all the time, finally getting off campus, into the hospital - slow again, wheelchairs (it's a hospital stop, right?) and finally, finally getting to the light rail station. I peg that at 20 minutes minimum. Then wait for a train. then train to downtown. Up to a 10 minute wait, then 8 minutes to downtown. 15+20+10+8 = 53 minutes. The 76 is faster. Why would I bother with walking further, two waits for a vehicle, transfer in foul weather or fair - you've given me nothing. You need to optimize the route (65) at peak hours for commuters, or there's no gain. Every morning, on the 76, in both directions, by the time the bus hits the freeway, at least half, if not all of the standing room is full. You say that ridership is light in the NE, but on the few routes that I frequent, we're at capacity. Shorter, more direct, more frequent shuttles would make more sense to me as a rider, and spring for an independent route to cycle through the campus, rather than adding that baggage to what should, in concept, be an express. And the 941, running once an hour? What if it's full? Why gamble on that?	5/29/2015 8:47 AM
93	This is a great start. Hopefully, the buses can be made more frequent, especially nights and weekends, in the future. When scheduling the routes, please attempt to coordinate the evening schedules of the 65 and 372 so that people living between the two routes, who could take either bus, can see something coming within 15-minutes (as opposed to both routes leaving the UW Station at the same time).	5/29/2015 8:41 AM
94	the changes proposed for the 16 route which is already over-capacity would have a negative impact on the service in Wallingford. This is the only N-S route for this neighborhood.	5/29/2015 8:37 AM
95	It looks like there are options for those of us who take the 26, but it will take a transfer and more time for me to get to/from work with this proposal. the 26X route involves much walking both to the bus and once off the bus to get to work since it does not appear that there is a stop at 7th/Blanchard anymore. So then maybe I wait 20 minutes for a connection which is not a good option. If there were actually going to be more frequent buses so that missing a bus didn't mean waiting another 20-30 minutes to get the next or that a connection was only 2-3 minutes away, I would only be moderately inconvenienced, but I am extremely skeptical that this will happen. I anticipate that I will have to walk farther, wait on connecting buses 20 or more minutes and still have bus service times that are infrequent, often late or not arriving (i.e. when OneBusAway says "scheduled arrival" I have figured out that probably the bus is not coming, this seems to happen monthly).	5/29/2015 8:33 AM

96	Your cancellation of 242 makes my commute from Maple Leaf to Redmond far more difficult and will probably lead to me returning to driving alone to work instead of using transit.	5/29/2015 8:28 AM
97	I live on Wallingford Avenue below 40th and work downtown so the 26 is my bus - a bus that is full every time I ride it. Within a quarter of a mile of my home, in the area serviced by the current 26 route (in other words, along 35th and up Wallingford) there are four new huge housing projects under construction. I do not believe all these new residents will walk up the hill to 40th to catch the 26X, so this proposed change will dump hundreds more cars on the streets leading into and out of Seattle. Current residents of this area, and these new residents, should continue to be served by the bus that already makes its way right through the middle of this rapidly developing neighborhood.	5/29/2015 8:08 AM
98	Route 941 seems a poor service investment. Could route 65 be improved instead? Why does route 73 jog via Roosevelt? A direct path seems better.	5/29/2015 8:00 AM
99	Removal of routes 71 and 72 and no connection with route 73 eliminates 3 of the 4 options I have to commute. Need to keep 72 and 73 and continue with downtown for both	5/29/2015 7:58 AM
100	On the proposal grid, it appears that route 73 will not operate on weekends. Is this true?	5/29/2015 7:05 AM
101	I absolutely hate it that you are taking out a route I use EVERY DAY and offer NOT ONE acceptable alternative! The current route 66x from Northgate to the Ferry terminal past Fred Hutch, through downtown is ALWAYS crowded during peak hours yet you are ELIMINATING THAT ROUTE!!! I don't want to have to drive to Northgate to get on a bus via the freeway and then have to take another bus from first hill to get to work! I think this proposal is thoughtless and mean spirited. Not everyone wants to take the stupid train to capitol hill. A lot of us who work DOWNTOWN just want to continue to take ONE bus to work! Your plan will drive us back into our cars because there will be no easy way to get anywhere we want to go! Please reconsider taking this very busy route away!	5/29/2015 6:04 AM
102	The web site I read said that you're going to stop ALL service on the 73 on weekends. Where's that in your damn survey? THAT IS UNACCEPTABLE!!!	5/29/2015 4:37 AM
103	I live on Ivanhoe PL NE Seattle, WA. 98105. Not sure how I get to the new University Light Rail station from my house. Can you help explain? Thank You. jr.weissman@gmail.com	5/28/2015 11:42 PM
104	-I think the many connections between Husky Stadium station and U-District are important and should not be changed. -I think the service between the station and U-Village looks pretty light and might not be enough for people living in the area -I think changes to the 31/32 and 44 are very helpful -It would be nice to have a connection from Fremont to Husky Stadium, possibly either the 31 or 32 could be modified for this, or a similar route added	5/28/2015 11:17 PM
105	I primarily use D-Line, 44, 40, 16, 5. When leaving my car on Capital Hill, I use the 10 & 49. I use other buses to connect to these such as the 43 & 16. I am retired, prefer to use the bus to avoid having to pay for downtown parking, am pleased for all these truly global changes by Metro, and I am sure it will be beneficial to hundreds of thousands of persons who would like to stop driving so much. I often go days without using my car due to the ease of using the bus, including the Central Link to the airport. Driving in Seattle is burdensome and parking rates are hurtful, which is the kindest word I will use. I'm a retired senior and deeply appreciate the Reduced Rate ORCA pass.	5/28/2015 11:08 PM
106	I really like the more frequency in general, especially at night, especially serving my neighborhood as it relates to UW and other neighborhoods. I am completely dependent on the bus because I am 1) too disabled to drive and 2) too poor to own a car so any increase in bus service in any way is fantastic by me. I wish more people would ride the bus. I think you should do a PR campaign getting more people to ride the bus, there's too many cars in Seattle!!!! But again thank you so much!!! I would not be able to hold any jobs without the bus due to my disability and extremely low income. I love the bus!!! I think the changes you did are good. I get all my errands done, go to my jobs, and go to social events exclusively using the bus and I love it. I think that you could get more funding for the bus and expand its service even more by getting more people to ride it. I think a lot of people think the bus is dirty or scary or inconvenient for them, i wish that could change above all things since the bus is the best thing ever	5/28/2015 10:41 PM
107	Connecting SPU / Front to Lightrail is key t reducing congestion on and around Aurora Ave and Fremont.	5/28/2015 10:40 PM
108	Dexter is not a reasonable reroute for bus route 16. This will not create shorter transit times between Wallingford and downtown Seattle.	5/28/2015 10:34 PM
109	A lot of the buses that connect the northern University District to Downtown are being removed (71-73) and I get the idea is that the light rail will replace them, however the light rail station is way in the south of the University District and there aren't many buses that seem to go to the station so it seems that it'll be quite difficult to get there from the northern U-District. I live on Roosevelt and 56th and it seems like it'll be way more difficult to get downtown with these proposed changes.	5/28/2015 10:34 PM

110	I disagree with 48split. There are fair amount of high school students who ride 48 from North Ballard, Greenlake, Roosevelt neighborhood to Garfield High School. The split proposal will inconvenience many students. I can see having Express service between Medical center and Holy Name (Aloha) and Garfield High School. 48 route split is a bad idea. If you really have to split, make sure connection is smooth between 45&48.Current proposal does not work have any cosiderations of transferring the buses.	5/28/2015 10:24 PM
111	I would like most current bus routes that I use (74 and 76) going directly to the Light Rail stations. Also, stop increasing the prices and have ONE payment for Metro and Light Rail. I pay on the metro and my transfer takes me right on Light rail.	5/28/2015 10:14 PM
112	Do not delete the 242 route. Nothing in the proposed changes addresses the loss of service from this cancelation. Light rail certainly does not help in this situation. The 242 is the only option for many North Seattle residents who need to commute to the east side.	5/28/2015 10:11 PM
113	You have stated that these changes improve the integration of the Link Services with bus routes in the district. Your stated goals are: ==> Integrate with new Link light rail service ==> Create a more reliable, frequent, and easy to use network that emphasizes connections to the new Link service Why is Route 26 a repeated target of your misguided plans? First in 2014 and now again in 2015. Here are a couple of obvious reasons your proposed changes to the 26 route a pure fantasy. 1. The population density in the Wallingford area targeted is increasing rapidly because of continued planning approval for high density residential developments. 2. Neither the 26 or 26X go anywhere near the new Link light rail service, by a good distance. 3. Having to walk 5 or 6 blocks to come even close to a suitable bus route is not 'easy to use', especially in bad weather. The changes may appear trivial to you, but I can assure they are not. If you are resolving some internal battle over resources please don't make this service the victim, especially since you appear to have sufficient funding for many, many other improvements. Status quo is sometimes the correct answer as well. Disenfranchised riders would now need to drive into the downtown area, an effect that contradicts your goals. I am having a great deal of trouble holding back my vitreole on this issue since it is evidently a 2nd attempt at shutting down this route, for some political reason or another. There is no logic to the proposal and I would suggest strongly that you drop this totally irrelevant change from your plans. You have kept these proposals quiet for quite some time, only sending an alert 2 days before your period for comment closes. You probably don't have more than a couple of hundred responses to the survey, thereby using those statistics as an indication of disinterest and therefore implicit support. You couldn't be further from the truth. I would usually close with 'yours respectfully' but I'm afraid I can't do that on this occasion.	5/28/2015 10:09 PM
114	The only feedback I have is about the hyperlink on the first page of this E-mail. It took me to a search page that gave three choices, with advertisement that had nothing to do with the subject in the sentence. What does adds about Ford cars have to do with King County Metro?	5/28/2015 9:44 PM
115	I would love to have the 77 express route run more frequently and/or on weekends.	5/28/2015 9:28 PM
116	I think the plan as proposed provides a great inconvenience for transit riders living in Ravenna north of NE 65th Street and wishing to go downtown. Excepting peak travel on the 76X, we are faced with a convoluted trip to Husky Stadium Station, an unnecessary jog to the east, and then a transfer to Link -- all together adding time and a transfer to what had been a one-seat ride.The restructuring of the 73 would make a lot more sense if there was a functioning Link station at Roosevelt. From my perspective, the transit planners threw us under the bus, and, unless there is some equity for us, there we will remain without relief until 2021/22. It would be much more efficient and transit friendly for Metro to retain the old 73X on its current route with a 1/2 hour headway until the Roosevelt Link Station opens. Frequency in this case does not compensate for a longer trip and the inconvenience of the Husky Stadium link transfer.	5/28/2015 9:22 PM
117	It looks like you have replaced a straight connection from Pinehurst to Downtown on the 73 with a complex trip involving two transfers, as the 73 will go nowhere near the new light rail stop. How can this possibly be an improvement? I can be Downtown now in less than 45 minutes. I can't believe I will be able to do that with this new system. The new 73 route does not connect with the light rail station, and I can't walk from Stevens Circle up/down the hill/stairs to get to the new station. It doesn't appear that I will be able to transfer to another bus on Univ. Way that will take me Downtown via the Express Lanes/Bus Tunnel. Is that correct? Those of use who are not able to walk far or use stairs are going to have a much more complicated and longer commute from Pinehurst to Downtown. Is that correct? I'm not sure you are really thinking about true mobility issues with this new plan.	5/28/2015 8:57 PM

118	Yes, 3 things: 1. The proposal is bold and quite likely, a big reshuffle of N Seattle's bus map is long overdue. However, in 6 years' time light rail comes to 65th and Northgate, and again affects matters. Will you once again re-shuffle then? 2. In the same vein, Montlake and Pacific, where the UW stadium light rail station will open, is a very congested area. What kind of measures are you taking to make sure buses won't just get stuck getting to/from that station? 3. Last but not least: right now, to my knowledge there is no fare transfer between bus and light rail. Your new proposal practically forces NE Seattle residents, outside of commute hours, to take bus+rail if they want to get downtown by transit. So, will your new plan include a fare transfer? If not, is it equivalent to taxing the residents of this part of town. Thank you and good luck.	5/28/2015 8:54 PM
119	1. Will the 312 on Lake City Way be the only direct way (no transfers) from Maple Leaf (89th and Ravenna)to downtown if the 72 is cancelled? 2. There is a bus shelter/stop southbound on Ravenna between 90th and 89th that currently is used only for the 72. What will happen to the shelter/stop if the 72 is cancelled (it is basically in the front yard of my condo)?	5/28/2015 8:15 PM
120	i currently ride the 73 from the beginning of it's route each morning, early. i am disappointed that it is being closed. because i do not have a choice i will need to walk farther than am able due to health reasons to try and get a different bus	5/28/2015 6:49 PM
121	Why didn't you ask me about route 28 changes!! I and my neighbors would mourn the loss of the 28 regular route, and we only had the option to share the 28 express with the world, mainly because busses are already standing room only at morning and evening rush times, and that is with both the regular and express coming from and to Downtown very often! . You should NOT reduce any amount of busses during those peak times, especially with such high ridership #s. I catch the 6:30 or 6:50 express bus each morning, it is always full to standing, and that is when the local comes by right before. If you take away the local, that means I have much less chance of catching a bus at my needed time, and odds are doubled that I would be standing. It is ridiculous to do this to this ridership! Please come up with another alternative!	5/28/2015 6:24 PM
122	Direct service from Northgate Transit Center, or Greenwood, or Green Lake to Capitol Hill is still lacking in these changes. This is a route I would take frequently. The 48 experiences long delays, especially in the summer as people use it to travel to Greenlake and Golden Gardens. I occasionally take this bus from 85th to Mount Baker TC and would be personally affected by the addition of a transfer, but I feel it would be worth it. I often will see the 48 get backed up; last weekend I sat at Greenlake and knew that the 48 was running more than 45 minutes late, and watched three eventually go by tailing eachother.	5/28/2015 6:01 PM
123	Your multiple choice options are not impartial and are heavily weighted toward approval of the proposed changes. This is not an impartial survey.	5/28/2015 5:46 PM
124	I just want the 47 back as it connects me to downtown.	5/28/2015 5:40 PM
125	The proposed changes to the 16 will have a major impact on me and people I know who use the route (4 in all, other than myself). First of all, why was there no notice of the proposal posted on #16 buses? I did see a sign at a stop saying that changes due to the completion of the UW station would be discussed, but never dreamed in a million years that Metro could in any way associate such a profound change in a well-established bus route with the completion of that station. They have nothing to do with each other! People I know in Wallingford avoid downtown Fremont like the plague. It's congested to start with, but when the bridge is up, service will be very undependable, as opposed to the straight 20-minute shot downtown that now exists from Stone Way & 45th. The schedule of the 16 has been much more reliable since the Aurora Ave transit lane was established. The new Route 16 will be much longer than the present one, and the long journey from Magnuson Park will add a lot of opportunities to put the bus off schedule, especially during the winter rainy season. Also, I (and one other person I know) use the 16 to go to N Seattle Community College and Northgate now. This won't be possible in the future. We'll have to transfer at Green Lake, which may look OK on a paper map, but will be a major inconvenience. Thanks for the opportunity to comment, but the comment period should be extended longer.	5/28/2015 5:34 PM
126	Please do not cut the 242. In order to replace this route I would have three lines / two transfers - first to Northgate, then to Green Lake, then finally to Overlake. This could be acceptable with a line that transfers in Green Lake to the 242 but there are no bus lines that go that go from Ridgecrest to Green Lake. Finally, this line always operates at capacity.	5/28/2015 5:26 PM
127	Eliminating weekend service of the 66 and 73 effectively cuts off Maple Leaf from a direct route downtown. Eliminating 72 altogether is a disaster for those of us who live in the South Maple Leaf/North Ravenna neighborhood. There are plenty of people who live in NE Seattle who do not commute to the UW; many of us have jobs downtown and also appreciate the opportunity to take advantage of Downtown activities during the weekends. This proposal is all about the UW which is great for those that work/study there, but absolutely not useful for the rest of us. I don't know what sort of input Metro received in putting this plan together, but I think the proposal for essentially eliminating all of the busses that I and my neighbors use is perfectly awful.	5/28/2015 5:13 PM

128	I am really not excited about the 16 bus changing to go over the Fremont bridge instead of Aurora bridge. I will not use it any longer due to the change which is sad because I live at 45th and Meridian and it is an extremely convenient currently for my commute every day downtown to work. This change would likely cause me to drive more regularly to the office and therefore not utilize transit. The reason behind this is because traveling over the Fremont bridge will increase my commute time in general and then if the bridge is raising it will really add time. I hope you reconsider changing the 16 to go through Fremont.	5/28/2015 4:53 PM
129	Unless you restore service on the 28/28x route to operate north of NW103rd St. to NW145th St during the day and weekends, even infrequently, none of the changes are meaningful to me. Has a shuttle been considered to fill this need? Metro feels ok taking the taxes this area provides but doesn't give us the service we need for people who need to get to the 28 local service without walking several blocks to board the route 5, getting off at Holman Road and walking several more blocks and transferring to the 28 local to get where we are going. Until Metro gives us back at some of that service I will vote against any tax or proposal that goes to the voters.	5/28/2015 4:51 PM
130	A LOT of people use the Route 64 along the Stewart and 5th Ave. stops. Dropping this leg off the route is a mistake. It's fine if to take it along Fairview but keep the Stewart / 5th Ave leg.	5/28/2015 4:48 PM
131	Please consider NW quadrant of Seattle. It usually is left out in planning exercises and considerations. Rapid D-Line is not very successful for NW area (NW of 80th and 15th Ave). The NW quadrant of Seattle is under served and should see improvements especially in the west to east connectivity.	5/28/2015 4:46 PM
132	You need to consider the current realities of insufficient transit service in NE Seattle which these proposals would not address. 1) current service improvements did nothing to remedy overcrowded buses on NE 65th to downtown, which pass either pass by commuters or mean standing all the way. No one who gets on at Green Lake Park & Ride currently gets a seat. You only added one north-bound bus in afternoon, but in morning the buses (64, and 76, and also 71) get filled with Roosevelt HS students, leaving no room for their best of us. We could still have this problem on NE 65th if frequency is not increased b/c high schools do not offer school bus service any longer. 2) we need guarantee of 7-day/week service on 25th NE, as well as 15th NE. Traffic is terrible here on the weekends, esp. when there are Husky home games, but we have no service on Sundays, and little on Saturdays. Need easy connections via NE 75th as well, to Wedgwood business district. We are in a bus desert in this sense, a big problem for many elderly people who live in area, as well as general public. 3) new plan seems like it would make it much more difficult, and possibly more expensive, to get to U-District directly from Ravenna area. If there is no direct bus service. If transfer to Link to get into hear of U-District is necessary, does this mean passengers would be charged the higher Link fare? 4) what will option be to get easily to Northgate if #68 is eliminated and before Link goes to Northgate? 4) good to connect Sandpoint Way/Children's Hospital/Magnuson Park via NE 65th St., we need more East-West connections	5/28/2015 4:43 PM
133	I live on Eastlake & Mercer, and I am completely dependent on the 66. I catch it a minimum of twice a day, and often more. It is the ONLY route that goes by my home, my workplace (pioneer square) and a grocery store that wouldn't require me to walk several blocks lugging heavy bags with multiple back, hip and knee injuries to consider. PLEASE DO NOT DISCONTINUE REGULAR ALL DAY, ALL WEEK/WEEKEND SERVICE ON THE 66 ROUTE.	5/28/2015 4:39 PM
134	The splitting of long routes into shorter, independent routes sounds excellent and like a great way to improve reliability/frequency of routes. I've never really understood through-routing as a concept, and it makes trip planning extremely clumsy and frustrating. I would also love to see the expansion of live bus arrival tickers to more stops, especially those that are main hubs outside of downtown - 34th Ave Fremont and University District come to mind.	5/28/2015 4:36 PM
135	I commute between Bryant and First Hill. This is challenging with relatively few 64X buses in the evening, ending well before 6pm. This is my primary concern, being able to get from First Hill to Bryant.	5/28/2015 4:36 PM
136	Your response options don't really allow me to say what I really mean. These changes do not reflect an improvement in the service. As we all know, the link system will actually add time to the commute, and as traffic congestion worsens, will also increase missed connections between the light rail and connector buses. Now, I take one bus that gets me close to where I live or at least within reasonable walking distance. The link option does not allow me to take one mode of transportation and still get within reasonable walking distance to where I live. And, it now adds increased travel time, not less. Just like the routes that use to go from Northgate to the Airport, travel times to the Airport have significantly increased through the use of Link. I do support light rail, but think it should be in addition to the current bus service as another option, not a replacement for bus service.	5/28/2015 4:31 PM
137	no	5/28/2015 4:24 PM

138	Residents in Laurelhurst are very disappointed about the proposed elimination of route 25. I personally take 25 every day to go to work. 25 is the only bus that goes through Laurelhurst and has provided service to many people including students, people who come to Laurelhurst to work (usually lower-income), as well as Laurelhurst residents who go to work. Laurelhurst is also an old neighborhood, with many seniors, who rely on bus 25 to go to other places. Eliminating this service will significantly hamper the mobility of these people and more importantly force them to use automobiles, which is not sustainable. Metro proposed new route 941, but this new route does not really cover Laurelhurst, as it only goes on 45th street til about 47th Ave. It is unrealistic to expect Laurelhurst residents, living through the neighborhood, will come to the 45th street in order to catch a bus. The elimination of bus 25 can only result in lost ridership for King county metro and Laurelhurst being completely transit-unfriendly. We hope that you do not remove bus 25. We propose to link bus 25 to the new light rail station at the University of Washington. If King county metro feels there is not enough ridership for route 25, perhaps a smaller bus can be used, which was used in the distance past (before the frequency was cut to once per hour; it used to be twice per hour). Thank you for your consideration. Cynthia (206-327-9181)	5/28/2015 4:23 PM
139	I'm disappointed in the proposed changes to bus service on Capitol Hill. The proposal removes or makes travel within the capitol hill neighborhood more difficult. Many people use Metro to travel within the neighborhood. Focusing bus service to Link would not improve mobility in many situations. The proposal removes or eliminates many existing connections to and from other neighborhoods - such as Route 12 connecting north capitol hill to first hill. How about re-connecting the 10/12 or the recent proposed option of 2/12 integration?	5/28/2015 4:23 PM
140	I like that there will be more frequency in our neighborhood of View Ridge and a better ability to connect east-west and to other neighborhoods in stead of just heading downtown. However, I am not sure I understand the logic behind making such significant service changes before the Roosevelt Light Rail Station is complete. Those of us that live in View Ridge currently only have access to Routes 71 and 76. I understand removing these routes in favor of a more frequent route whose sole purpose is to direct riders to the nearest Light Rail Station. For my family and my neighbors, that Light Rail station would be the Roosevelt Station. With the current options proposed to us, we will need to make at least one transfer or walk 15+ blocks in order to get to the UW Light Rail Station. I am concerned that having to transfer will make public transportation options less desirable and force people to drive their cars more. I strongly urge you to reconsider your changes--at least for the next couple of years--to routes 71 and 76. Thank you.	5/28/2015 4:22 PM
141	I live on 65th and 23rd northeast. From what I can see, there will be bus service on NE 65 only during peak hours. - the # 76 If I am reading the proposal correctly, during non peak hours I would have to get home - to 23rd NE - from 35th NE or 12th NE. the peak only # 76 would be the only bus up and down 65th. This is a 10 - 12 block walk. This would be very inconvenient in bad weather and most unpleasant in the dark. If I were to have mobility issues, I would be stuck. I strongly suggest a shuttle of some sort up and down 65th.	5/28/2015 4:21 PM
142	The proposal to stop through routing on the 65 increases my daily commute by 5-15 minutes. The proposed changes guarantee that I will have to wait for a transfer, rather than just taking one of the through routed trips. I don't really care about increased frequency on off-peak hours. I only ride the 65 during peak hours. If peak hour frequency also increased, then the time I would have to wait for a transfer to the 31/32 might be OK. I will continue riding this route regardless of what proposed changes go into effect. But I would be happier if at least one peak trip on the 65 continues to through route to the 32. I'm OK with the northern end of the 71 being removed. The connection to downtown at UW makes sense.	5/28/2015 4:19 PM
143	If route 66x is changed to the freeway, there would be no bus route on northbound Eastlake after it splits to Fairview. The current route of the 66 can be altered - but it should not be taken off of Eastlake - there are several large companies here and that bus is used frequently during peak hours.	5/28/2015 4:18 PM
144	I'm thrilled with the re-instatement of the 47, excellent decision. If I had two suggestions it would be: -Extend the service of the 47 to evenings (it's dark in our neighborhood, and this option would make us feel safer). -Extend the 47 and/or 49 routes (or peak hours atleast) to run South of Pike/Pine downtown (potentially down 1st or 2nd ave), as this will connect so many downtown workers to their highrises. I moved to Capitol Hill for the proximity to work downtown and I have to take two buses/connect to get to 1st and Madison. Pretty frustrating. Question: Is the stop going to be available at Summit and Mercer for the 47 (Northbound)? So many people used to exit at that stop and with the new development, I'm sure more will also. Just curious.	5/28/2015 4:14 PM
145	No	5/28/2015 4:09 PM
146	Please route the 372 north along Montlake as is planned for the 65. For people trying to access the Husky stadium station from the north, the connection at Stevens Way is a haul and undermines choice ridership. by looping back along Montlake, at least the PM could be a seamless connection. At a very minimum, the stop at Stevens way needs to be directly in front of the land bridge connection, UW Architect be damned. We have a couple thousand people in Ravenna trying to get to the station, just tell RBCA where to send the letters. Also, ST is woefully short of bike racks at the Station. They'll need a couple thousand. A time competitive transit route to DT will get lot of people on bikes.	5/28/2015 2:41 PM

147	Making changes to the 26 based on efficiency regarding the new light rail system makes no sense. I use the 26 every business day just like many others - the bus is full most mornings and afternoons that I ride it. The 26X is not a faster option as described, it takes just as long if not longer than the 26. Eliminating the 26 causes a longer commute time due to a further distance to walk to the bus stop and/or a transfer in Fremont to catch another bus. in a 3 - 4 block area of the 35th and Wallingford Ave. N. stop there are two apartment buildings being constructed with over 100 new apartments and a commercial building going up as well. Eliminating the 26 and this stop will cause a tremendous amount of stress on the system and this area.	5/28/2015 2:19 PM
148	I am concerned about the closure of stops along Wallingford Ave N, especially at Wallingford Ave N and N 35th street, on route #26. Closing these stops would end non-transfer service for from my home to downtown. If the 31 and 32 take over these stops, I will have to transfer in Fremont to get to downtown. For a 65 year old woman in winter and in rainy Seattle, this is more than an inconvenience. Please provide through service to downtown for those of us who live in the area between 15 and Stone Way N and between N 40th Ave N and Lake Union.	5/28/2015 12:24 PM
149	I think they way that you've provided exceptionally scant information as to exactly how these routes would be changed (route, etc), and only provided "increased frequency" is almost masterful. The information you've provided is almost worthless, but you're gone through the motions of eliciting public opinion. Nicely done!	5/28/2015 9:41 AM
150	The proposal has a glaring problem: there remains no good connection between lower Wallingford and 45th Street (Central Wallingford). A simple solution here: 1. Keep 31/32 running on Stone Way & 40th as today. 2. Route the revised 16 along 35th street and up Wallingford to 45th In addition: the revised Route 26 only comes every 30 minutes during the day & evening?? Switch the 26 to short buses and run it every 15 minutes, please!	5/28/2015 9:17 AM
151	Seems like the route 255 which is operating really awful during peak hours will become useless at all and I personally will not have any other choice but to just drive by myself from Kirkland to Westlake. 255 is currently overloaded with people trying to get from Kirkland to downtown Seattle. I would suggest to just add more buses to this route.	5/28/2015 8:45 AM
152	I am at 43rd and Stone, and am upset about the Route 16 change. Currently this moves people from Wallingford and points north to downtown quickly and effectively, and I absolutely love how the route skips all the congestion around the Fremont Bridge and teleports everyone directly to downtown on Aurora. Rerouting every 16 bus through Fremont and along Dexter would add 15+ minutes to the route and possibly more if the bridge is up, and IMO really destroy the value that the 16 provides to the commuters of this route. The route is already long enough for riders further north and east of me in Wallingford; why make it longer for them? You're already increasing the frequency of the 16 which is nice; how about making every other 16 a 16X that follows the old Aurora route? That way riders along Dexter and in Fremont can still be served, and people like me who like the express aspect can keep zipping on into downtown with minimal delay. Thanks!	5/27/2015 5:46 PM
153	It's impossible to get from Capitol Hill to Fremont or SLU right now. I have to either take the 8 (which, honestly, it's faster to walk up Denny Hill than wait for the 8), or go all the way through downtown at 5pm. I spend an hour every day going four miles. I could go through the U district with the proposed changes - but that would mean two transfers - I'm about .7 miles away from the Cap Hill station - and there's not currently a bus that goes from Central over to that station. If there was I could take that...transfer..one stop to UW..and then take a bus to Fremont from there? Still sounds incredibly painful. On top of that a ton of the doctors offices/banks/things people have to do are in South Lake Union (Amazon - where I don't work but they clog up traffic like it's nobodies business). Please give them a bus route to make traffic better. I think they all live in Cap Hill? It'd also be great to be able to go to swedish without having to walk all the way to the 8 route, decide the 8 isn't coming, and then walk up to Belmont and Pine for a bus that is actually reliable. This feedback is very specific but I feel that the other diagonal (not UW -> Downtown) is being very neglected right now. It's so quick to get anywhere but where I need to go :(5/27/2015 5:30 PM
154	A direct connection between the 75 and the University Link Rail station is needed. Dropping bus riders off on the UW campus and expecting them to walk for several minutes to get to the light rail station to go downtown is ridiculous. The 75 should stop at the light rail station--people going to the UW could walk from there (after all, the UW didn't want the light rail station on-campus. Let them walk).	5/27/2015 4:05 PM

155	<p>Yes! Please DO NOT reroute the #12 bus from 19th Ave and Madison Ave. This bus route serves at least 6 different public and private schools, the Miller Community Center, the Community Health Clinic, several hospitals, museums, Town Hall, the ferry docks and the Pike Pine Corridor. Many kids ride this bus back and forth to their schools (ours do!) and to doctors appointments as do the elderly. It serves a mental health clinic connecting people who may not even be able to drive safely with other services. This bus would be used more frequently if there were more service added at night. This is a simple but essential city bus route. This vital north/south corridor will be poorly served by the #11 bus and there will be no coverage at all for many Capitol Hill residents. North Capitol Hill residents will be completely isolated from the Madison corridor where there so many schools and services. Please KEEP the #12 route as it is! Why not just bump the #10 route 3 blocks over to the Broadway station then back down the Pike Pine corridor? That would make so much more sense than removing the 12 from the 19th and Madison corridor to serve that purpose? Thank you for your consideration. I'm a big believer in public transportation and support adding bus service and all your efforts to get people out of their cars. Katharine Harkins 1233 21st Ave E Seattle, WA</p>	5/27/2015 3:46 PM
156	<p>I do not think the survey offers the right choices. You should have an "other" option, and an option of "I do not like the change, but will still take the bus because I have to". My proposal to make this plan better is to have 48 follow it's existing route from 65th to the hospital (or the new split route 48, which I think is a good idea). This would allow better access to Roosevelt High School, serve the new highrises that will be built at 65th and 15th, provide more convenient bus access on 15th, use a more traffic friendly route than U way, and not provide redundant and not needed service along Roosevelt Way and Ravenna Blvd because of the new routes. I must admit I was initially in a bit of a shock when I realized the new bus "improvements" would eliminate the four buses from my stop (southbound at NE 65th and 15th) that I have been riding for over 40 years, 71, 72, 73 and 48. I can hike to Ravenna Blvd. and University, but it isn't as easy as it used to be. Please consider keeping good-ol'-reliable 48 on its same path on 65th and 15th. I just don't think turning on Roosevelt and then going up Ravenna gains you anything (you will have other very frequent buses to serve there) while it loses you a very important intersection. David Hoff Dhoff@pacifier.com</p>	5/27/2015 3:02 PM
157	<p>I still don't see any easy connection path for the densely-populated area of Sand Point (between 50th and 75th) and the Link Light Rail station. There are loads of people who would like something better than a 40-50 minute commute to downtown on the 74. It seems obvious to connect the 75 directly to the Link Light Rail station without going through the U. I hope I'm wrong and I'm just having trouble seeing the new routes and how they interact.</p>	5/27/2015 1:05 PM
158	<p>Your survey questions are not useful because they don't cover the actual issues relating to the changes in your bus service. I live on Sand Point and the service will be less and will be clunkier by these changes because I live between NE 65th and NE 45th which where all the service is going to move to. Those of us between those points will now only have the 75 for service (except the peak time service of the 74). It will be difficult to get to the link station because of the need for a transfer from the 75 at some point to catch the linking line. The 75 is notoriously late and often overcrowded to to point that people are passed by and not picked up. I very much doubt that the increased pick up times will actually come about with it since i have waited as much as 45 minutes for a bus at times on the evening route. Those of us in that no man's land on Sand Point between NE 65th and NE 45th will not see any improvement in service.</p>	5/27/2015 12:51 PM
159	<p>Don't cut the 43 thank you</p>	5/27/2015 11:42 AM
160	<p>I believe that the current plan does not take into account the Rosevelt BRT plan from the city of Seattle and that the 70 or 73 should be modified to serve the BRT corridor. We need all-day access to eastlake and SLU from Maple Leaf, Rosevelt, and the U-district. Also, I believe the 73 should continue downtown as it does now via the I-5 express lanes.</p>	5/27/2015 10:50 AM
161	<p>Will the new route that replaces the 48 still give access from Geenlake to Roosevelt High School?</p>	5/27/2015 10:19 AM
162	<p>What about 242? I depend on that to get me to work every day without transfers. Your new plan means that I have to transfer twice to get to my destination on 148th in Bellevue, and it will take longer. This change makes me think I will have to move to the East side if I don't want to spend my life in traffic...</p>	5/27/2015 9:19 AM
163	<p>About Route 65, the "Proposed Changes by Route" map shows a loop through the UW campus running in the same direction all day. But the "Proposed Routes near Montlake Triangle" map appears to show Route 65 dead-ending on Pend Oreille Road, so that it doesn't go all the way through campus, just turning around on campus. Which is correct?</p>	5/27/2015 9:13 AM
164	<p>I like the 64 on weekdays, the 65, the 40, the 75, the 522. thanks for improving them.</p>	5/27/2015 9:05 AM

165	<p>If you turn the 26 into 26 Express, where would it stop? It's not clear from your map. If you remove the Latona & 45th and Thackery & 45th stops, you would be inconveniencing a lot of people and add many unnecessary transfers for those who work in the UW Tower neighborhood of the U. District - making the 44 EVEN MORE CROWDED. Seattle's bus service requires too many transfers, which exacerbates its unreliable and late service. A bus that's running 20 minutes late is not uncommon and, frankly, unacceptable for a major US city. Since the Light Rail will go nowhere near SLU or Westlake, keeping the 26 as is and/or ensuring stops in Westlake (on Dexter or Aurora) and on 45th (near I-5) are imperative. I would hate to end up in a situation -- again -- in which it's more convenient and cost-effective to drive, especially since it's everyone's goal to reduce the number of vehicles on Seattle's roads, which are unfit for the rapid growth in the area. Thank you for considering the public's feedback.</p>	5/27/2015 8:58 AM
166	<p>I live in Montlake. Please do not eliminate routes 25 and 43. Especially 43 as it is always crowded and is the only bus line that goes directly downtown. (I realize 25 goes downtown but it only operates during commuter hours) Our kids need the 43 to get around town without their parents taking them! If you are going to tell me that the University train station is going to compensate, please consider that it is a 20 minute walk from our house to the train station. Thanks, Carol Troup caroltroup@live.com</p>	5/27/2015 8:53 AM
167	<p>You will really be eliminating a valuable service to lower Wallingford as a result of eliminating route 26 (non-express). This route currently has many apartments units near the Wallingford and 35th Street 26 bus stop. This stop is an extremely important stop for commuters traveling to downtown and south lake union: I counted 378 apartments within 1 block of the 35th and Wallingford bus stop (This number was estimated by the number of mailboxes in multi-unit housing - I did not count single family homes in this number). Changing this stop to have 30's busses which take us to a transfer to 16 in Fremont is a total abandonment of this dense and high metro use resident population in South Wallingford - We need a bus that travels directly to downtown at the 35th and Wallingford bus stop. It is important to point out that at least 236 new commuters will be moving within a hundred feet of the 35th and Wallingford bus stop within the next year (i.e., dpd permit # 3014232 - 131 apartments (some with multiple bed rooms) with 14 Live Work and dpd permit # 3014233 - 80 apartments (some with multiple bed rooms) with 11 Live Work). That will be a total of 614 metro commuters abandoned in South Wallingford. Please contact me if you have any questions.</p>	5/26/2015 8:50 PM
168	<p>Yes, Concerns: The proposed east-west route on 65th and connection to downtown via the Meridian-Kirkwood-Woodlawn "bottleneck" and Fremont-Dexter route is poorly conceived, inefficient, unreliable, and degrades the residential quality of our neighborhoods. Please consider the following: 1. The intended goal of linking neighborhoods and parks with light rail (via 65th route) is only partially achieved (i.e., route east to Sand Point is good idea), but fails in providing direct accessibility west and south to Green Lake and Lower Woodland parks, arguably the most popular recreation facilities in the city (e.g., walking, running, swimming, ball fields, golf, tennis, rowing, and picnic). The proposed route south of Ravenna on Woodlawn, Meridian, Kirkwood veers away and uphill from the parks which reduces walkability, especially for anyone carrying sports gear or a picnic. Parking in east Green Lake and Lower Woodland parks is overloaded and spills into the adjoining side streets increasing congestion and aggravating parking for residents. 2. Routing the bus through the Woodlawn, Meridian, Kirkwood neighborhood is a traffic bottleneck because these residential streets are too narrow and are not designed to support safe two-way traffic and high-frequency transit with large-heavy-buses. During peak hours it will be very difficult to maintain schedules and uniform traffic flow because the narrow corridor (i.e., 24-ft wide on Meridian, Kirkwood) only allows one-way traffic. Buses facing oncoming traffic must stop, or pull out at an intersection, to allow safe two-way passage. This problem will only get worse with the proposed 7-15 service frequency during peak hours. 3. Elimination of the Aurora portion of the route effectively eliminates efficient and fast connectivity to downtown for the southeast Greenlake/TangleTown neighborhood. Travel time for downtown commutes will be increased due to the slower route on Dexter or commuters with need to transfer to the 26X; wasting time and losing the one-route commute. 4. The proposed route and increase in transit frequency will exacerbate the ongoing problems concerning excessive noise, traffic congestion, house shaking, and road safety in the Woodlawn, Meridian, Kirkwood neighborhood. Last December 72 members of this neighborhood submitted a signed a petition asking Metro to consider options to reduce bus impacts. Clearly, Metro has not listened to neighborhood concerns and has ignored public input. Solution: Change the proposed routes 16 and 26 as follows: a) connect the proposed 65th and Ravenna segment of Route 16 to Fremont and Dexter via East Green Lake Way and Stone Way, and b) connect the proposed Route 26X from Ravenna to downtown via Latona, 56th, Meridian, and Wallingford streets. This would: • link the transit network (i.e., Route 16) to the parks on level-wide roads that are suited for bus transit and easy/safe access to parks, • provide efficient, reliable, and faster connectivity to downtown for the majority of commuters in the highest density areas including Southeast Greenlake/TangleTown and Wallinford, and • reduce safety hazards in the "bottleneck" and greatly improve the residential quality of the Woodlawn, Meridian, Kirkwood neighborhoods.</p>	5/26/2015 8:25 PM
169	<p>I think that the elimination of route 68, especially during rush hours, is a mistake and will add congestion to alternate routes.</p>	5/26/2015 7:07 PM

170	The problem with replacing route 16 with the proposed 26x is that the new route does not go close enough to the Polyclinic, Group Health, the Library or Northgate Mall to be of much use to the elderly and (relatively) infirm who need access to these places. Walking from the Northgate bus barn up the steps to the Mall is impossible with a walker and challenging with a cane. It's a flatter hike to the Polyclinic, the Library or Group Health but it's considerably longer. The current swing the 16 does around Northgate Way puts the passenger within an easy flat and short walk to all the above. Your plan of creating a system with fewer but faster and more efficient routes sounds great, but does a disservice to a population of older users for whom proximity and ease of access mean more than speed and efficiency.	5/26/2015 6:39 PM
171	The proposed changes with more frequent bus service are very desirable and will greatly improve bus service in north Seattle. Thank you. Weekend bus service on proposed Route 73 would be desirable but probably not possible at this time.	5/26/2015 3:57 PM
172	I'm concerned about several things. I often ride the 73 from downtown to Maple Leaf (on 15th). I do not want to have to transfer at the University Station. This seems like it's going to add a lot of time to the route. Additionally, I don't like how the 73 veers off 15th. There should be bus service all the way down Roosevelt, and all the way down 15th. Many of these changes are going to create longer walks from the bus route to the stop. This is problematic, especially at night or in bad weather. I also often take the 66 from downtown to Maple Leaf, since it lets me stop at a couple of grocery stores, then re-board and continue my trip home. Again, I'll now need to make additional changes from downtown. I do like increased frequency for the 75 and 67. But I don't think East-West service has been improved at all, and this has been a problem for a while. There need to be more connectors between Roosevelt and 15th. The 73 (and 72) both do yeoman's work as far as serving my bus needs, and I'm disturbed that the 72 is on the chopping block and the 73 will involve a transfer when it didn't used to. Please consider the needs of older riders. It's not as easy for people who are in their 50s and 60s to make these long hikes between stops. Sure, some of the routes (like the 25, which I also take sometimes) are slower, and have lots of stops, but there is a certain type of ridership served by this. We aren't all millenials.	5/26/2015 3:54 PM
173	I support the increase in bus frequency for route 75, it would make my commute more convenient both in the morning and evening. I also support increasing the 75 schedule during the mid-day period. Having a reliable connection at all hours with route 75 and the new UW Link station is critical for me.	5/26/2015 3:11 PM
174	seems like south wallingford is just cut out with the rerouting of the 26. of course, it takes nearly an hour to get downtown on the 26 as it is, so i guess improved times will help some, but there's a large swath of wallingford that has no useful bus routes. before the change, it goes down wallingford to 35th but to have to walk all the way up to 40th or over to stone way? never mind.	5/26/2015 2:01 PM
175	I'd first like to note that there were no survey opportunities to assess the impact of removing routes. Secondly, I'd like to note that once you are east of 23rd/24th in Montlake, getting to SLU is incredibly painful. Worse, with the deletion of route 43, getting downtown is now painful and getting to SLU is ridiculous and not even worth the effort. With the deletion of route 43 I would stop using the buses and start driving again. It just would not be worth the effort. I would highly suggest considering making SLU a transportation hub. Right now everything is about getting from SLU to downtown and then going to your final destination. Also, I would consider better serving the Montlake area. With the coming construction changes to 520, the Montlake bridge, and the onramp / offramp, people are going to turn to public transportation to help out. Instead, service is being cut causing more transportation issues. A link station closer than UW could hep, as could a better replacement for the 43 line being cut. Or you could just leave the 43 line in and have it be easy to get downtown for Montlakers. Thanks for all your hard work; please take this into consideration.	5/26/2015 1:01 PM
176	I want to know what Metro has in mind for snow routes; as the number of option (routes) is reduced, reliability of the remaining routes will be very important.	5/26/2015 12:44 PM
177	Great job guys! Really like the proposal.	5/26/2015 11:26 AM
178	I take bus 242 for 15 years and don't have another way to go to work. Please keep it. Thank you	5/26/2015 11:18 AM
179	The 26 stop at 35th and Wallingford is the ONLY bus stop in the area and tons of people utilize this stop to get to work in South Lake Union and downtown. It is one of the reasons that people moved to this neighborhood. Removing the stop would hurt the working people and hurt the elderly population that lives in this neighborhood. You are doing a disservice to the King County public by deleting this stop.	5/26/2015 10:38 AM
180	I live currently in Wallingford and the bus stop at the corner of 35th and Wallingford gets me to and from work everyday. The number 26. I have never seen less than 5-10 people get on and off at that stop. Removing the stop is unacceptable and would prevent me and others from getting to work.	5/26/2015 9:35 AM

181	I need a bus from 45th & University to Sand Point....where I work. Now you have decided to discontinue the 30 and that does not make me happy at all. This just adds one more stress to working. I am not impressed at this point. What about having the 74 run both directions??? Where is the connection from the Sounder bus from Tacoma to the U district to Sandp Point to ge me to work by 7 am. I have no desire to get up andy earlier than I do now.	5/26/2015 7:56 AM
182	Elimination of routes 71 and 72 would make life harder for people who normally take those routes if they are not replaced with service direct to the UoW Link station (the station itself, not Stevens way) over their ENTIRE LENGTH. To make a trip to downtown that I now make on the 71 (starting 100 meters from my doorstep) I would have to either walk to 25th and board the 372, followed by a walk from Stevens way to UoW Link on the other side, or take the revised 16 service that reaches downtown by winding through traffic west of lake union instead of using the express lanes. My proposal for bus service around Link is simple: truncate all routes that travel from northeast Seattle to downtown at the UoW station itself. The 71 and 73 could certainly benefit from that connection, without forcing their riders to walk long distances from their homes to the bus or between Stevens way and the train, and if the 372 was routed to the station itself the 72 could be eliminated entirely. 76, 77, and 316 service through to downtown is redundant and contributes to highway congestion. It might even be possible to truncate the 312 and 522 at Link, which is likely to be faster than I-5 at some times of day. This could also have the added benefit of providing service from lake city way and 25th ave NE directly to the train without disrupting 372 service for those whose destination is the University itself. DART could be a useful tool in Wedgewood, Laurelhurst, Sand Point, Viewridge, and Windermere, but only if it is in ADDITION to the 71, rather than instead of. If regular bus service in those areas is replaced with sporadic and unreliable DART, people will just get in their cars instead. I applaud improvements in service frequency in the proposal (those are long overdue). The splitting of the 48 could prove problematic for students who travel from capitol hill or the south end to Roosevelt, Hazelwolf, Billings, and Bishop Blanchet. Perhaps certain 48 trips could become the 45 (or vice versa) at the UoW station during peak hours?	5/25/2015 10:32 PM
183	Concerning Route 16: By routing it out of the Northgate area, the NE Seattle neighborhoods further north are more cut off. It might be easier for residents of the NE neighborhoods further south to travel east-west, those further north would be more isolated from the west side of I-5. People in these neighborhoods will have to travel to the University district to transfer to a route that heads to the Wallingford, Fremont, Ballard area. This is especially worrisome considering proposed changes to the weekend schedule of route 73 which would make it all but impossible to do so on the weekends. Concerning Route 73: Without any weekend service, residents of the Jackson Park, Pinehurst, and (to a lesser extent) Maple Leaf neighborhoods will be practically unserved by Metro routes on the weekends when they are more likely to want to go to the University District, Wallingford, Fremont, Ballard, or Downtown for shopping and recreational activities. A reduction of frequency or shorter operating hours on the weekends for route 73 would be perfectly reasonable, but the elimination of weekend service seems like an oversight.	5/25/2015 9:35 PM
184	I find it hard to believe that the north end of the revised Rte. 16 will have much ridership east of the Roosevelt/University districts. You are propsoing to replace frequent, direct service to Green Lake/North Seattle College with less frequent, and less direct service on the revised rte. 26/26X, thanks to the jog over to 65th St. Why are changes being proposed for 2016 to routes that might serve the 65th St. Link station, which won't open until 2021? And, by the way, service to downtown via the rte. 16 is neither "infrequent" nor "unreliable".	5/25/2015 7:48 PM
185	Sadly I was unable to attend the Open House last week which might have cleared up my concerns and confusion.....as the information provided on the website appeared to greatly reduce my use of the system. I have had the privilege of good service for a number of years using the 71 route. It is steps from my door. This proposal will reduce my use of the system but might bring more people on to the bus system. I realize that giving everyone the same advantages I have had is the right thing to do. But based on how I look at the 16, 45 and 76.....I will not be using this system as much as I am now. I do not even know how to tell you to fix this.....	5/25/2015 4:06 PM
186	This questionnaire never offers the option to answer "this change would cause me to use transit less than I do now", which is the case for me regarding the swaps between rtes. 16 and 26/26X. And why are connections to the Roosevelt Link station being made now, when the station won't open until 2021?	5/25/2015 1:40 PM
187	Please install more electronic kiosks at major hubs in and around Maple Leaf, Northgate, Lake City, and keep timelines and real-time arrival departures accurate. Often when trying to go to and from the northern burbs to points south, and vice versa from downtown back north, it is unclear what the best transfer options are on say the 41, 75, 73, and 372, 306, 522 because sometime connection busses come early and then leave and the bus drivers from routes seem to have no clue about the other routes or issues impacting them. Please install more actual kiosks for adding to an e-purse besides the few of them downtown. While it is great that more busses etc will provide services so disabled riders can transfer a number of times to get to a destination without much time on the streets in wheelchairs etc, could some of the planning actually improve the lives of us who don't mind walking a block or two to get to the the connection stop and have that reflected in the TripPlanner recommendations? Overall I vote for more frequent stops that can get us to-from major hubs (Kenmore, Lake City, Downtown, Capital Hill, etc.) at any time of the day and night and then less service within these hubs.	5/25/2015 10:03 AM

188	If your going to radically change a route, i.e. 66x, don't use the same route number. It's nothing like the current route! It's very confusing. Also you've slashed the 66x so much why bother!!! WTF #\$\$#@#%#%#@%@!!!!!!!	5/25/2015 12:02 AM
189	It seems a little disingenuous to say that Metro is expanding service on the 73 bus. You're really reducing service by removing its trips downtown and ending the 71 and 72 bus routes. Please keep in mind that the new Husky Stadium Light Rail station is a solid 20-30 minute walk from most of UW's classes and offices. The trip downtown by lightrail may be only 8 minutes, but you're adding long walks or extra transfers to a lot of people's commutes by removing so many bus options to downtown. It sounds like the 74 bus will help fill in some of these gaps. At a bare minimum, could you please have it stop at all the downtown tunnel stops, like the 73 bus did? My transfer is at Convention Place, which is cleaner and safer than Westlake and some of the other tunnel stations.	5/24/2015 4:20 PM
190	I would like to see the use of shuttles between neighborhoods. This would be useful for both commuters and seniors and the disabled. It is particularly difficult for seniors and the disabled to access both light rail and Rapid Ride because of the distances between stops. There are also commuters who do not use either service because there is no place to park near the stations. It would not be necessary for them to drive if they were able to take a reliable, nearby neighborhood shuttle.	5/24/2015 2:07 PM
191	Route 48 reliability is not so important if the frequency is short. Random events like bridge openings, traffic lights, and wheelchairs cause variations that are a large proportion of 8 mins. Therefore keeping the route 48 in one piece and avoiding transfer times is more valuable than schedule reliability (as long as separations between buses is near 8 mins).	5/24/2015 11:36 AM
192	still worried about how I'll get from my neighborhood (bottom of Viewridge) to the UW Light Rail Station. It's not clear how close the 75 will get to the station. If I have to walk down to sand point, wait for a bus, walk a distance on campus to get to the light rail station, I'm probably just going to stick with the bus. When the Roosevelt station opens, the new East/West routes on 65th will be awesome.	5/23/2015 10:11 PM
193	This will effect many people who have disabilities. Some people with certain disabilities already have issues taking the bus and the changes will cause more issues due to bus changes and the lack of availability of reliable service. Light rail is much appreciated for those with disabilities yet the bus changes will effect some with certain disabilities immensely especially those who do not qualify or meet criteria for Access.	5/23/2015 2:33 PM
194	The RTS. that you are talking about I don't use as off on as the RT. 277 or the 540. The RT277 goes by my house and I can leave my car at home. In the afternoon I am able to take the RT540 and transfer to another bus at the KTC to get home faster then RT 277 for it takes the 405 and that can take up to 30 minutes longer to get home. If you put the 540 going to the Houghton P&R that means longer travel time. For we all know that 405 is a nightmare 90% of the time.	5/23/2015 9:19 AM
195	I insist that bus engine and brake sound reduction/mitigation measures be taken on Route #16 buses. I am disheartened to read Kevin Desmond's 12/12/14 response letter to Mr. & Mrs. Martin and others which failed to address sound related concerns. While I want to encourage more bus and transit options for Seattle, it should not come without reasonable sound mitigation efforts. Additionally, night time #16 buses should be smaller and quieter; never have I seen a #16 bus past 8PM with more than 1/4 capacity of riders. My wife and I moved within the last 2 years to the corner of Woodlawn Ave. N, and 65th street. We love the neighborhood, but have contemplated moving primarily because of noise from metro buses and trucks, which peak well over 90 decibels over 25 feet from our corner where buses start and stop at a stop light in both the north and southbound directions. Thankfully, trucks rarely travel by our house in the evening/late night hours. Metro buses, however, routinely shake our house well into the late evening hours. We have spent >\$10,000 on sound proofing and fencing materials in the last 2 years alone, primarily to mitigate sound from metro bus and truck traffic in our yard and inside our house and still plan more. While I use the #16 bus daily to get to work, I would gladly travel >0.5 miles, such as to Aurora/Route 99 to take the E line bus, in order to shift the #16 away from our residential intersection. Had we known about the metro and truck traffic noise we would experience living on our corner, we would not have purchased our home.	5/23/2015 7:22 AM
196	Northbound, I think both routes 16 and 26x should turn right onto 65th from Woodlawn and Latona respectively instead of twisting and turning and looping to maintain part of their current routing. If the 16 makes stops on 65th, Sunnyside, and Latona and then continues straight on 65th after crossing Ravenna Blvd, the areas formerly served would still be within comfortable walking range. Likewise with the 26, if it could turn right from Latona onto 65th and turn left on Ravenna Blvd it would still be very close to the areas previously served, but would as well as avoid twisting and turning through narrow residential streets, and save much time. The GreenLake Park and Ride Area could also be better utilized as a bona fide transit center for all the routes proposed to be serving that location. For those concerned about the Hearthstone retirement home no longer having bus service outside their door-- I ride the 16 several times a day usually and have never seen any of their residents ride the bus, only the employees.	5/22/2015 11:46 PM

197	<p>I live in the central district at 26th and Denny, but make frequent trips to north Seattle(Wallingford, Ballard, Ravenna, U-district). The discontinuation of the 43, especially when it combines/turns into the 44, makes those trips require a transfer, some of them out of the way, which are often unreliable. The 48 being split means that I also would have to make a transfer, rather than take a one-bus ride from the central district to Ravenna. It really seems as if these transit changes are designed to make the exact area of the central district in which I live, less accessible to the north end and more inconvenient/expensive, by forcing use of light rail and/or new route connections. Too many "one bus" trips turned into transfers, new routes making stops or forcing transfers in areas that are less accessible or unsafe. Make transit stops safer in the downtown corridor if you want to force folks to transfer there.The 43 and the 48 should be left alone. Being able to ride one bus, maybe two if I'm riding all the way to Ballard and the 43 does not become the 44, without transferring downtown, is the most convenient and safe option from the Central District. Same for the 48, being able to ride from the CD to the Roosevelt/Ravenna area on one bus, that essentially delivers "door-to door" service.</p>	5/22/2015 5:39 PM
198	<p>DeletionOf route73 from downtown service is a disservice to those of mobility and handicap needs. Deleting service frequency, especially weekends causes trip interference necessitating a transfer in transportation. New taxes by the city of Seattle has not increased service. Service is decreased by proposed changes. Considerable congestion exists at the university district. Making the area a drastically expanded transit hub as the proposed link changes imply could place an overwhelming strain on the area. Fare processes between Metro and Sound Transit are incompatible. Continuing route 73 to downtown Seattle as it now exists would be much easier for a rider not to transfer modes. It could save that traveler an approximate 15 minutes of possible transfer time. Maintaining the route to downtown would not save money, nor would it inflate link ridership. Some important things downtown service would do is: decrease the added congestion to the university district as the link proposal implies. It would alleviate an unnecessary and disparate mode change by any type of rider, it would form a continuous ride. At the U District, as it is now the 73 has finished pickups. Proper transportation would then carry them through rather than disrupt the ride. If the riders are on take them on through and alleviate congestion rather than cause busloads of it.</p>	5/22/2015 5:25 PM
199	<p>I have been riding route 66 for years from Roosevelt NE in the U District to downtown. I see by the proposed maps that it will be moved to the freeway heading south, and will no longer serve the U District. I also see on the map that the bus I would take once the changes are in place would be the 70 on University Way NE. I suppose this will work, but many of the people on my bus come from the Northgate park and ride and get off at either Fred Hutchinson or further down the line toward downtown. I'm not sure exactly why the 66 is being rerouted. Most of the people who ride that route work downtown and are not University of Washington students. Is the purpose of the move to get the buses off Roosevelt now that there's a protected bicycle lane? I'd vote for keeping the 66 right where it is. Thanks</p>	5/22/2015 5:12 PM
200	<p>I am opposed to the elimination of Route 71. To compensate for the removal of this route, I would either have to walk nine more blocks to catch the bus than I do now, or take two busses instead of one. There is a great travel time advantage to keeping the 71 so it can collect people along the east/west run and then with the route turning north/south for access to the University of WA campus.</p>	5/22/2015 4:04 PM
201	<p>I am opposed to the elimination of Route 71. To replicate my use of that route, I would have to transfer busses whereas now I don't. It is beneficial to have a route that runs east/west, then turns north/south to the University District. The other option would be for me to walk 9.5 blocks instead of the 0.5 blocks I must walk now.</p>	5/22/2015 3:53 PM
202	<p>The #71 route has low ridership past 40th Ave NE (PCC) in part because it's hard to access and there is minimal need among the affluent there. But it connects areas where elderly and not so affluent also live. The 65-71 combination, when running in sync [rarely] provides a lot more access than you realize. Because the area is poorly served and it's hard to get to stops, people don't use it; because people don't use it you cut service. If you cut that access to the future Roosevelt station now, will it come back? But i am one of a growing number of citizens dependent on good service to that area. I gave up my car for ecological reasons 5 years ago and now because of health/disability i cannot walk as far as you want us to get to more widely dispersed stops. I do not trust DASH service. What can you do to make it possible for me with my .25 mile walking limitation to catch busses i need to places i need to go?</p>	5/22/2015 2:53 PM
203	<p>Route 25 is an important route that links Eastlake/Portage Bay to Montlake and is the only direct route to University Village. Alternatives can take up to an hour with transfers to go a fairly short distance. I ride the 25 to downtown and U Village from Portage Bay often. Ridership dropped dramatically after the frequency of trips was reduced. If it ran more frequently more would ride it. I found the 49 & 70 to be convenient to downtown, but no good route to U Village. Consequently, there's a lot of traffic to U Village that is getting worse every year with little bus coverage for those in the surrounding areas of Eastlake, Portage Bay and Montlake to U Village shopping. I hope something can be done to alleviate this gap. Best regards</p>	5/22/2015 12:30 PM

204	<p>1) For years, Metro has struggled to work away from a Seattle-centric (downtown Seattle) orientation. This plan reverts to that 1940's orientation, sacrificing neighborhood connectivity for a slavish dedication of connecting to downtown Seattle (via Link). Virtually all of NE Seattle that now is connected directly to the vibrant University District will, instead, be connected to the Montlake triangle - overkill even for Husky fans, and very congested. Rt 71, 72 and 73 service into the U District are eliminated and not replaced. And the U District itself gets disconnected from much of Capitol Hill with loss of Rts 25 and 43. Seattle's hilly topography is largely ignored in your "grid" when considering the greater distances folks will have to walk to access service. You also force massive amounts of transfers to the UDist for those living along NE 65th, and revised Rt 16 will be very unreliable due to length and where it operates. The transfer environment at Stadium Station stinks. WAIT FOR LINK EXTENSION INTO U DISTRICT, AND PRESSURE ST TO OPEN THAT EXTENSION SOONER. 2) Your crappy area maps describing the proposed changes are too small to be able to read them without a great deal of difficulty. They are much smaller scale than Metro's existing service area maps on-line, with NO ability to enlarge. 3) It was a mistake to bill these massive changes of bus service as "improvements" related to Link extension; that hides the significant effects this will have on folks who don't go downtown much and thus think the changes won't affect them. 4 Many areas (e.g., Montlake, View Ridge) either lose service or face drastic reductions. DART service in the city is totally inappropriate. Hourly service on 941 only during daytime weekdays is too little, and doomed for failure. You force us to return to driving.</p>	5/22/2015 11:34 AM
205	<p>I'd like to see all day service along NE 55th continue either by restoring the 30 (or returning the 30 to its original route serving Magnuson park to Seattle Center) or by adding more day time runs to the 74. For those of us who want to go from our neighborhood to the north end of the u district (for the YMCA, Farmers Market, Scarecrow video, Blessed Sacrament) it can be a hardship to trek to 65th or to have all the alternative routes travel south of the u district in order to serve light rail. I ride the bus every day and almost never go downtown. I go from NE seattle to u district, Roosevelt, magnuson, Wallingford, seattle center, and capital hill. I will actively avoid light rail because of the tunnels.</p>	5/22/2015 10:09 AM
206	<p>Ted did a poor job of explaining his three for one change to Rte 73. Based on his poor illustration during the drawing of the new route, he makes it seem like the new route is going to make a circle down Roosevelt the up 11th and back down Roosevelt then to UW. Very confusing. He also says we are getting more service. That is true for weekdays when the route operates at a higher frequency to UW, but he fails to explain that all 73 service is cancelled on weekends. This is not more service, this is less service. The residents of Jackson Park are not very well represented so I guess I don't expect much to change but I did support the transit issues and find that I now get less service so I see no need to support transit in the future.</p>	5/22/2015 9:04 AM
207	<p>Hello, Thank you for giving riders the opportunity to express our opinions. This is regarding the route 242 being deleted. This is a busy bus route and it's often standing room only in the evening. It also services disabled riders who can only pick up this bus (one blind and one who can barely walk). What about them? This is the ONLY bus that goes directly between the Green Lake transit center and Redmond. The 542 is also being revised takes an additional 30 minutes EACH WAY. It's a milk run. The proposal from Metro is to take the 542 or go downtown to transfer. That would take an a minimum of 90 minutes each way to go 13 miles. My suggestion is for someone in a decision making position to try it round trip 5 days a week and then tell us that 242 is cancelled. It was my understanding that if Metro received more funds, this bus route continues. Metro received more funds and now this bus is route on the chopping block. I'd like to know how Metro is doing their accounting. I imagine there is an oversight committee outside of Metro that audits. If they don't, they should. I am very unhappy with this change and would like to know who else I can implore to keep this route. Thank you for allowing me to express my opinion.</p>	5/22/2015 8:31 AM
208	<p>Please!! Don't disappear route 72. Is the route we will use to get to my son's elementary school, from Lake City to Wallinford, without transfers. I ride the bus with my 2 kids everyday. Many persons that come to the food bank ride this route, many of them disable, old, or with kids. They just cross the street and don't have to carry their heavy bags. Many low income families that live in Lake City and don't have a car ride this route. Please don't disappear route 72!!</p>	5/22/2015 12:20 AM
209	<p>Please keep a regular route in Laurelhurst. Do not replace it with DART. If 941 is going to run every 60 minutes, it will have as low ridership as the 25. To increase the ridership, increase the frequency of service!</p>	5/21/2015 11:25 PM
210	<p>I like the idea of fewer routes with improved frequency of service.</p>	5/21/2015 9:43 PM
211	<p>Thank you!</p>	5/21/2015 7:49 PM
212	<p>Please maintain the current route for the 28 local and 28 x. The proposed route for 28x would additional commute time to an already lengthy trip. Removing the 28 local route with no access to the Dexter corridor would be significant impact on travel time and transferring to another bus is not desirable nor reliable.</p>	5/21/2015 4:32 PM

213	It's not what you're adding. It's what you're removing. The 242 fills a very specific need, and does so quite efficiently and effectively. It was designed to get people from Shoreline, Maple Leaf and Green Lake to work at Microsoft's Redmond campus in the morning, and back home in the evening. I can't remember the last time I was on a 242 that wasn't full. And a huge proportion of the riders take it every day, day in and day out, for years. It's working, because it's incredibly convenient.. If I have to do a transfer to get to work, the convenience is gone. In the bad weather, I'll end up back in my car, and so will a lot of others on the bus. Stop trying to kill it.	5/21/2015 3:53 PM
214	Please don't get rid of the 372 run east of the UW Bothell campus. I live in north Bothell and drive to the park & ride to catch the 372. It takes a good 20 minutes for me to drive to the park ride as is. There is no parking at the UW Bothell campus for me to catch the bus there and street parking near a college campus will be a nightmare. The Kenmore park and ride will take me longer to get to and if that is my only transit option, I'm afraid I will have to cancel my bus pass and just drive to work each day. With a child in day care, I need a reliable one-bus route. If the 372 east run goes away, I don't have any other options for commuting to work via transit :(5/21/2015 3:44 PM
215	RETAIN SERVICE FOR ROUTE 242! How can you consider cutting this?	5/21/2015 3:30 PM
216	I ride the 372 five days a week to UW Medical Center. I do work weekends. I would have appreciated having weekend service IF it extended father north. To add weekend service only to Lake City doesn't help me, and is redundant since I can take a 65 or 75 to Lake City already. Either way I have to walk 1-2 miles north or wait on Lake City Way for a 522. Might you consider weekend 372 service to Kenmore or Bothell?	5/21/2015 3:22 PM
217	I primarily use route 43 to get to the downtown area and around Capitol Hill. Eliminating this route means I will have to walk further to get to a bus or I will have to transfer, which means the trip will take much longer. I voted for and am willing to pay for increased and improved bus service. Eliminating a heavily used route is not the answer.	5/21/2015 3:16 PM
218	The elimination of route 30 severely affects my commute. While the 74 will run more frequently, it is already packed to standing room only. I have no other options to get to work. This is compounding the difficulty I'm experience due to my University of Washington office's recent move further away from the Ave. No other routes connect my home to my new work location, and the existing dependable route is marked for elimination. What is a 15 minute drive by single occupant car is now a 25 minute bus ride plus waiting time, which will become even more unpleasant once I'm forced to jam myself in a crowded articulated bus. Metro is not working for me -- it is not "getting me there."	5/21/2015 3:12 PM
219	I think your plans to remove the 43/71/72 are about 10-15 years ahead of reality. It would be more applicable when the University District light rail station opens. You would turn my current 1 bus commute to 2 + light rail (1 bus to Cap Hill light rail + light rail to UW stadium + bus to 45th Ave). I would probably start driving every day.	5/21/2015 1:33 PM
220	Nice job, Metro. What happened to the idea for the 2-way 74?	5/21/2015 1:03 PM
221	I'm a lecturer at the UW and I look for bus stops that are closest to my classrooms as the campus is so large. It appears that the 373 will no longer run down University Way NE, which concerns me as that is the closest bus stop.... How well are the Link Light Rail and bus timetables being coordinated? As tightly as they are in Tokyo?	5/21/2015 12:14 PM
222	MONORAIL!!! Keep on the plans to increase service to Northgate through Link. Link route to Ballard. I voted for the last levy, I'd vote for a new one to keep Metro routes steady or (preferably) growing.	5/21/2015 11:19 AM
223	I have some concerns about moving both the 31 and 32 off of 40th between Stone and Wallingford. My husband is blind, and relies on the stop at 40th and Ashworth to get to work in Fremont in the morning. Having to walk to Wallingford or rely on the very unsafe crosswalks at 40th and Stone would make his daily commute significantly more dangerous.	5/21/2015 10:34 AM
224	I ride route #32 every day of the week to go from Queen Anne to the University District and back for work. The route (32) already goes through several areas of Seattle and is usually crowded, with people having to stand for much of the ride from Fremont on. It sounds like you plan to add another area to the 32 route without increasing the frequency, so it'll end up more crowded on the bus. I think that route would benefit from additional times during the work week anyway.	5/21/2015 9:42 AM
225	I am most disappointed in the proposal of the elimination of routes 67 and 68 going on campus. This adds at least 10 minutes to my commute due to either having to walk further or taking the 75 which takes that much longer. Although there is more frequent service, it is still more inconvenient for me. I would rather have the 67 on campus with the 75 going to the station.	5/21/2015 9:40 AM
226	The 242 is not being replaced by anything. This is simply a reduction of service until many years from now when the Link rail begins to run past Northgate. The bus I ride every day, which is always full, will be cancelled, and no other options from my home are fast enough to make bus riding viable over driving.	5/21/2015 9:12 AM

227	This survey was limited to people who live north of downtown, but thousands of us depend on metro to commute to the University of Washington from all parts of the city. If you do not work close to the stadium (I work on the other side of campus and it is a long walk), this proposal decreases the options for bus service to University Way significantly. This will require yet another transfer or a reduction in service. Please approach this as a commute change for the entire county, not just north Seattle and downtown.	5/21/2015 7:24 AM
228	I live in Whittier Heights and work for one of the major employers in Fremont. The proposed changes to Route 28 will add at least ten minutes to my commute each day as I would have to walk up and down the hill from 39th Street where the bus would be routed on its way to Aurora. My first preference would be to keep the 26 and 28 running through Fremont as they do today. The 16 could continue running on Aurora or it could be diverted through Fremont as in the proposal, it makes no difference to me. If Metro does go through with this change, I would ask that special care be taken to ensure that the nearest Route 28 stop to the Fremont employment area has sufficient rain protection for all of the riders. The current large waiting area near the Chase Bank is great in this regard, and I can't imagine a single standard-sized bus shelter being sufficient. Failure to provide adequate waiting facilities seems like it would be just adding insult to injury for those of us whose trip home is about to become longer.	5/20/2015 11:47 PM
229	Did I miss the place to give feedback about the 28/28X? We've fought this before, I don't know why Metro keeps coming back to it. A lot of people use the 28 to get to the heart of Fremont. My husband works in Fremont, at Google. He rides the bus to work every day, so we only need one car. We ride the bus to visit him. the reroute would be very inconvenient, especially with a toddler. Please maintain the current routing through Fremont.	5/20/2015 10:01 PM
230	The proposed elimination of near 30 minute service via NE 75th and NE 65th would have a profound impact on students and seniors living in the Viewridge neighborhood. The DART option is only hourly and only runs to 7pm. If it is like other "on demand" Metro service it will not be reliable and timely. The 71 route has been in existence for 40 years in my memory and the new alternatives via 45th Ave NE and Sandpoint Way do not increase reliability and efficiency for this neighborhood as I see it. Seniors would have to either walk a mile or more to 45 Ave, NE or down a very steep hill to Sandpoint. The large sloping hills in Sandpoint make walking difficult for long distances. This would necessitate have an automobile with the proposed changes. Unfortunately many of the changes increase service to already well served areas in Northgate and North Seattle but leave the Viewridge area with less reliable service especially for retirees and students. What is needed is service to the Viewridge neighborhood along NE75 and NE 65th on a 30 minutes basis throughout the day and evening which expeditiously allows passengers to get to the University Metro station which will be open this Fall. I don't see how this proposal serves that goal. If there is disagreement with my study of the proposal, please have someone call me as I think that the current proposal does a disservice to Viewridge area seniors and students. My phone number is (206) 526-1623. Perhaps I have missed something.	5/20/2015 9:23 PM
231	Elimination of Route 43 will terribly inconvenience all riders who use it to get downtown. I urge you to please reconsider.	5/20/2015 9:07 PM
232	I am a supporter of Light Rail. It's for the common good and will offer more connectivity for some of the historically less dense, growing neighborhoods. My wife and I have no car. We live on 17th Ave. E., between Thomas and Harrison. The 43 and the 12 are the routes we use most. The 12 gets my wife to and from work with reasonable 3-block walks on each end, but the proposed change (no longer running on Madison) will lengthen her commute and likely cause her to incur the time cost of a transfer on many occasions, based on time of day and day of week, and longer walking distances. I use the 43 to get to and from work with a 2-block walk to the stop close to home and a walk of 5 blocks plus the Pike Place stair climb between the end of the line and my place of employment. Without that route, my commute will include a transfer, sometimes two, even more walking distance and a significant increase in time cost. Our household relies heavily on the 12 and 43. Curbing and altering service on the 12, and eliminating the 43, will cause a significantly negative effect on our working lives as our commute times will increase dramatically. Please do not curb the 12 or eliminate the 43. It will have a negative impact on our daily lives.	5/20/2015 9:06 PM
233	I've been looking forward to the University Link Station for months, until I saw the proposed route to funnel riders to it. It will take me longer to get to Capitol Hill and Pioneer Square using the Link (two buses before I even get out of the neighborhood), than it would to keep using the buses I take now. I hope you reconsider and put the route where working-folk can save time using public transportation, instead of hoping to convert phantom riders.	5/20/2015 8:33 PM
234	Please do not change the 540 to Houghton park and ride and cut out south Kirkland park and ride. Many, many many UW students take the 540 from South Kirkland park and ride to get to school. It would be very inconvenient for students if the switch is made. Please! Keep 540 to south Kirkland park and ride!!!	5/20/2015 8:07 PM
235	28x increased frequency and all day and weekend service will be great!	5/20/2015 6:44 PM

236	I don't understand why the shortened route 48 will get increased frequency, but the new 45 will not. The area served by the shortened 48 seems to overlap the area served by light rail. The area served by the new 45 does not have any alternative way to get to the U-District. The busses are absolutely packed every day now. There needs to be increased bus service between Greenwood and the U-District.	5/20/2015 6:01 PM
237	I like the changes to route 73 and 373 compared to earlier proposals that would have ended route 73 at Northgate.	5/20/2015 5:22 PM
238	With the funding cuts we previously lost Route 46 (the ONLY reasonably fast way to get from Ballard to the University district) and the Route 48X (a much faster way to get from north Ballard to the University district, especially during heavy traffic periods). Splitting the 48 route is an excellent idea for keeping this route on time, assuming it's implemented with this as the priority. However, the new 45 does not appear to have an Express route. The 48X was *heavily* used. Including an express 45 from north Ballard to the University should be a priority. I've reduced the amount I ride the bus to the U since the 48X went away; I would very likely return to riding the bus more often if there was a 48X/45X route. The old 46 was always full. It only ran in the morning and evening, but was a vastly faster way to get to the University than the 44 (or 48, for those of us half way between the two). With the masses of smaller condos/apartments/apodments being built in Ballard THERE NEEDS TO BE AN EFFICIENT WAY TO GET FROM BALLARD TO LOWER FREMONT, LOWER WALLINGFORD AND (MOST IMPORTANT) THE UNIVERSITY!! Making the 44 more frequent is a step in the right direction, but the simply truth is that the ride Ballard->University is so slow it's faster to bike -- or even run -- the commute than take the bus. There needs to be a faster route Ballard->University.	5/20/2015 5:02 PM
239	The only real negative thing I've seen is that dropping rt 43 means loosing any direct connection from the U-district to Group Health's main campus and nearby areas. The link capitol hill station might be fairly close, but it does seem to be a considerably longer walk.	5/20/2015 4:06 PM
240	I need to take route 242 from Montlake freeway station to northgate on a daily basis. Deleting this route greatly inconveniences my schedule since I do not see a proposed alternative. In order to instead catch the 555 which runs a similar route I must leave work early and I do not think my supervisor will approve.	5/20/2015 3:48 PM
241	The proposal is unclear in how commute times will be affected with the combination of the 28 and 28X, which are at capacity most days during peak hours. The key info that is not included is number of stops; the lack of stops is the primary reason for it being more expedient (and express). Please either give the info necessary to understand the change or do not change the route/s.	5/20/2015 3:24 PM
242	With the deletion of route 68 and moving the 67 to University Way, I'm worried about over crowding of buses. These are both fairly busy routes and even with the additional buses that will be running I don't know if that will accommodate those numbers. I also am interested to see how/which buses will go through the University of Washington campus and how that will affect the ability to move throughout campus. I don't know of any great ways to fix these problems, I'm just concerned they will be accepted because it will be "less" of a problem than what's happening now.	5/20/2015 3:06 PM
243	I would like more service from NE 145th St East/West to Aurora Ave	5/20/2015 2:15 PM
244	Route 45 should be through-routed with route 271, just as in the previous alternative 1. This would provide a new connection between northwest Seattle and Bellevue, which is currently lacking.	5/20/2015 2:03 PM
245	For many years I've thought it would be a good idea to split route 48 into 2 routes, so BRAVO! I can't wait. You could do this tomorrow as far as I'm concerned. I am sure it will make the buses that leave the UW after 4 pm much more reliable and because of that I'm more likely to use them.	5/20/2015 1:49 PM
246	I think there is one area in northeast Seattle which is being shortchanged in your plan, and that is Lake City, especially as it connects to the University District. Here's my specific situation (and I'm sure there are many others): I live at the north end of the U District, where it intersects with Ravenna Blvd. I rely on the 72 to take me to 123rd and LCW where I take classes. My current route takes about 30 minutes, including 15 minutes on the bus and 15 minutes walking. Without the 72, my best option would be the 372, but this increases my walk time to 30 minutes (15 minutes to the bus, 15 minutes on the bus, 15 minutes to my final destination) for a total commute of 45 minutes. Other alternatives exist, but would mean taking two or more buses. I previously lived at NE 92nd Street, where I caught the 72 to go downtown. Under your new plan, getting downtown would now necessitate a transfer (e.g. 372 to UDistrict light rail) except during commute hours when I could take the 312. I am a big believer in public transportation. I have ridden Metro for over 40 years. I do not own a car. I have studied your plans as they've developed, filled out surveys, etc. I strongly believe that transportation to/from Lake City is greatly harmed by the current plan, and that the plan has not changed in response to feedback. Over the past few years northeast Seattle has lost the 79 (while the 76 and 77 continue to exist), service on the 72 has been reduced to hourly after 6 pm and on weekends (while the 71 and 73 remain at 30 minutes), and now the 72 is planned for elimination. How is Lake City being well served by this? Joan Moritz jzmoritz@gmail.com	5/20/2015 1:06 PM

247	Thank you for maintaining 28x service to Broadview during peak hours.	5/20/2015 1:02 PM
248	Currently, there is no light rail station planned for Phinney Ridge, so I would like to see changes to the connecting bus services to facilitate fast and easy connection from Phinney Ridge to the link station being built on N 65th St.	5/20/2015 12:52 PM
249	I often take the 44 bus from Phinney Ridge to University Village. It would be helpful if the bus would go all the way rather than having to disembark and walk from 15th Ave in the University District to reach University Village. The 5 bus route should travel from Greenwood through Fremont on its way downtown. I usually walk after the last stop before the Aurora Bridge. The time difference between taking Aurora downtown and Westlake or Dexter would offer more opportunities and the time lost would be acceptable. The 5X bus should continue as it does now. I use the 28 bus is regularly, but a 25 minute wait is common to the point that I do not use it as often as I would. On occasion, I have walked from N 65th Street up 8th Ave N all the way to N 85th Street without seeing a bus. The 28 bus is also a great way to go to Carkeek Park if not for the infrequency of buses. I am a young 75 years old and don't mind walking, but, as I age the knees are not as good as they used to be, and hope that these suggestions will be considered.	5/20/2015 12:45 PM
250	Increasing the frequency of route 44 is great - please have the 44 run as often as possible. It is often overfull during peak times, and with the new housing being built in Ballard it seems likely that the route will be even more popular.	5/20/2015 12:39 PM
251	Let's do it fast! We need these changes!!!! Alternative #1 is so good!!!!!! The bus routes are too complicated right now and stop running too early in the evenings. I am still forced to drive primarily because the bus I ride is too far away and Lightrail is not as accessible for me and/or does not stop at the UW. I feel safer on the Lightrail. The Lightrail saves me money, reduces my travel time, helps the environment by lowering carbons, and reduces chances of being involved in traffic accidents or issued redlight tickets, parking tickets, and moving traffic violations. Go Alternative #1!	5/20/2015 12:38 PM
252	If you discontinue service on the 73 on weekends, while keeping 373 service as it is now, how is someone supposed to get from Shoreline/Jackson Park to the University on the weekend? Parking is only free on campus on Sundays and after 12 noon on Saturdays. I often have to be on campus early morning on Saturdays. I guess I have no choice but to drive or get someone to drive me.	5/20/2015 12:08 PM
253	In general, this plan seems like a good way to allow transit riders access to improved downtown travel via the link. The amount of increased East-West bus service also seems improved. However, as a resident of Sand Point, it's still very difficult to travel the full width of Northern Seattle, i.e. all the way to Ballard or Golden Gardens. Currently on a week day this trip requires at least 1.5 hours in one direction and a bus change. I'm not sure how schedules would sync up under the proposed changes, but it would be helpful if these types of trips were as short as possible. When you have to ride the bus for so long, even a 15 min wait for a connection becomes a burden.	5/20/2015 11:47 AM
254	Please ensure that morning and afternoon times continue to include instances when the 44 (from Ballard) changes to 43 and travels to Downtown Seattle.	5/20/2015 11:35 AM
255	I saw the improved frequency of the number 67 which excites and encourages me, but will I be able to still take it from my Northgate Neighborhood to my workplace on campus? If it no longer does that, then the improved service does me NO GOOD. So, don't change the Northgate to UW campus routing. I NEED TO GET TO WORK!!! (I don't have a car and most of the people around me who commute from there to UW campus don't either.)	5/20/2015 11:29 AM
256	I was told this survey would allow me to weigh in on Metro's proposed changes to Route 28 Local and the 28 Express combination, eliminating some stops. I would like to see more on that. Currently, both the 28 and 28E are frequently running late/inconsistent on weekday mornings where I get on at 70th and 8th.	5/20/2015 11:21 AM
257	The elimination of the #43 is WRONG !!!!!!!!!!!!!!!!!!!!!!! It serves a unique area. There would be little bus service to the area between the 48 (23rd Ave) and Broadway. It would make it harder to get to Group Health from the UW. Faster service to downtown does not replace this. The mobility impaired would especially find it difficult not to have stops near Group Health. University Station does NOT serve the heart of the U.District. Getting to the University Station from 45th would require another transfer. When the 43rd and Brooklyn station is complete, this would alleviate the delay---but that is not scheduled for several years. The various improvements in time etc. do NOT eliminate the need for the #43. You WILL increase car traffic if you eliminate the 43 !	5/20/2015 11:15 AM
258	I love the new 16 route, as I often want to go to Green Lake on the bus, right now it is too complicated and slow. I love the new 65, which I could use to travel to the airport easily with the stop at the light rail station. I was wondering how I was going to do this, and with this proposal it is clear. My only wish is that the light rail service is fast enough so that the trip to the airport is under 45 minutes.	5/20/2015 11:14 AM

259	A general comment I would like to make to Metro, Sound Transit, & Seattle Street Car management is that there are commuters on the Saturday & Sunday, as well as Monday thru Friday. It would be very helpful for many hospital employees who live in the Seattle city limits to be able to get to work on First Hill & the U-district in a timely manner on the week end. We live in the city for a reason; to be able to use public transport. I would love to ditch my car, but unfortunately, I will be working 2 week ends a month for the rest of my career & King County Metro isn't reliable on the week end.	5/20/2015 10:30 AM
260	I live 1/2 blocks from route 71. Route 65 is a 7 block walk for me and that distance is becoming more difficult as I age. You mentioned a route through Wedgwood. That might work if it comes along NE 75th.	5/20/2015 10:30 AM
261	The reroutes of 16/67 will make it increasingly difficult for those who are travelling to or from the neighborhoods surrounding North Seattle Community College.	5/20/2015 10:26 AM
262	Please do not remove the current 28X route. It greatly improves my commute vs. taking the regular 28 route. Adding a couple more buses in the morning isn't useful if the route takes much longer to get downtown.	5/20/2015 9:54 AM
263	I am worried about the deletion of the 43 with the current proposal. I live near Group Health on Capitol Hill and commute to UWMC and the 43 has been the bus I take everyday to commute. If the 43 is deleted, I will have to either walk a half-mile to the link station or a 1/2 mile to the 48. While I am young and able to make this walk easily, there are many 43-users who would find it difficult to add this lengthy walking commute into their daily commute. The 43 is really the only bus that currently connects downtown, almost all of Capitol Hill, Montlake, and the U District. I feel that deleting this route cuts out a huge corridor and would make it very difficult for people living around 14th-18th in between Pine and Aloha to commute to either downtown or UW.	5/20/2015 9:48 AM
264	The proposal to split 48 into 45 and 48 contains info on future 48 but nothing except the route for 45. Currently I walk to either Aurora to take E downtown or to Greenwood 85th to take 5. E gets me to Amtrak efficiently except during rush hour. When U-link is running I would seriously consider 48 (45) to Link and light rail to King Street, but there is no data on frequency for 45. Also I would be more likely to attend stadium events with better transit service in the evenings. I currently drive to work because best schedules take 90 minutes or so including a quarter mile walk and driving takes 25 minutes to an hour. Other than dedicated buses geared to union hours there is no respect for folks who work in centers of employment that are removed from downtown Seattle. This includes synchronization of traffic signals, which affect buses as much as personal vehicles.	5/20/2015 9:27 AM
265	I do not approve of the idea of deleting the 72. The 72 is the only accessible route from my place of residence which would not require transfers from the U District to get downtown, and if it is deleted, I would have a much harder time of getting downtown because there would be more wait time for a transfer that would get me there.	5/20/2015 9:16 AM
266	I ride 71X, 72X, 73X, or 74X every day on my commute between the U District and the Downtown transit tunnel. These routes are incredibly crowded during peak hours, especially during the summer when a large number of students have internships downtown. In the evening rush hour, not everyone who wants to get on at Westlake is able (sometimes University Street too) and the bus often passes Convention Place without stopping. In the morning, the 74 is crowded with commuters from Northeast Seattle, so it is a challenge to squeeze onto the bus, let alone get a seat, at stops in the U District. I saw you plan to cut 71, 72, and downtown service on 73. Even with a few more runs of the 74, I am concerned that I and other commuters from the U District will have to wait much longer because of buses passing us by with no room. I much preferred the early proposal to run the 73 (and 74) frequently to downtown during peak hours. Please don't cut this bus service until the core U District light rail station opens. After a lot of digging, I figured out that there are several routes being added for frequent service between the core of the U District and the Husky Stadium light rail station. This adds a transfer to my route, but it might be acceptable. On the proposal for route 73, you say "For service between the University District and downtown Seattle, use Link light rail or route 74 (peak periods only)." Please be more specific about the improved service to the light rail.	5/20/2015 9:07 AM
267	I would like to keep Route 30 to go to NOAA campus from U-District.	5/20/2015 8:19 AM

268	<p>Route 16 and 26 go through neighborhoods. The buses are very noisy and impede traffic. Increasing the frequency above 15 minutes would have a very negative impact on the neighborhoods. As it is houses shake, no one outside can talk because of the engine noise, cars have to pull to the side of the road often stopping in areas where parking is tight, and the noise from the buses blaring their route numbers and that they are about to make a turn which penetrates inside the houses even with closed windows are problems. Buses going every 7 minutes would have a dramatic negative lifestyle impact. Every 20 minutes is an acceptable compromise, with 15 minute intervals during rush hour. Even better than increasing service would be if the buses actually ran reliably. It also wasn't clear to me from the map that the 16 bus route would go all the way downtown. It needs to, or it becomes useless for many people. By the way, I am not part of the 72 signatures that the Martin family has but together claiming that they are our neighborhood representatives. They are not the neighborhood representatives; just people who bought on the bus route and now regret it. Most people do not want to have to walk all the way to Green Lake Way to catch a bus. Also I am happy to have an east-west bus line, although for me one into Ballard would be more helpful than one to Magnuson. Why don't I take the bus more often? First: It is too expensive (The cost for a one way ticket is the same as an all day pass in Austin., TX). If two people in a family want to ride, the car becomes a cheaper option. Or not going where parking is expensive and just driving. Second: The 16 route is very unreliable on the return route from downtown. You wait forever, then 2 or 3 show up at once. Waiting for a late bus in the dark rain is no fun. Third: When you have a lot of heavy shopping, work materials, etc. to carry transfers are a horrible idea. Thanks for asking for our input on these proposed changes. K. Janney</p>	5/20/2015 8:06 AM
269	<p>I understand the need to delete some service to provide more frequent and reliable service on other more used routes. The deletion of route 68 is one of these deletions. I live in Wedgwood at NE 75th and 31st NE. The 68 route from the 25th-75th intersection provided a route to get to Northgate. I do not clearly see how to get to Northgate from my area without walking over to 15th or traveling south, to the U District and then going to Northgate. (This is one of those times when I will probably be using the car rather than the bus. Taking more than an hour to get to my medical appt or for shopping/movie and then even longer getting back, just is too much.) I will get looking for bus alternatives when the new plan is finalized. I may be missing something, like taking 273 or 65 north to connect with a cross to Northgate sooner than traveling to the U District. Note: you are doing a great job utilizing the feedback we gave you in Phase 2. Thanks.</p>	5/20/2015 6:25 AM
270	<p>Connection to University district is not very direct and Route 65 changes is affecting me in the U district as it appears to be one way in Stevens way, which I am not comfortable with. I would like it to be like existing near the Stevens way link in campus.</p>	5/19/2015 11:06 PM
271	<p>It will be greatly beneficial if route 65 goes on Stevens Way through the university campus in both directions. The current proposal will force people to walk longer while boarding towards Wedgwood.</p>	5/19/2015 11:03 PM
272	<p>I would love a direct route between Greenwood / Phinney Ridge and Capitol Hill. This is my current biggest problem with riding transit is it takes too long to get from Capitol Hill (where I am frequently on week nights) and Greenwood (where I live).</p>	5/19/2015 11:02 PM
273	<p>Very excited by 45/48 proposed split. Increased frequency of the 44 and new 45 routes should help to reduce connection time with the D line, a critical connector. Frequency is the smaller part of the current problem--transit time is excessive, especially on NW portion of current 48. Reduced or staggered stops on 44 & 45 could really help. Longer light on 85th at Aurora, a frequent 10+ minute wait at rush hour, could also really help. Thanks, Metro!</p>	5/19/2015 10:03 PM
274	<p>The 30 is an invaluable east-west connector for me. I use it to get from Sand Point to the Ave. There is no other route that provides that service. Please try to save the 30!</p>	5/19/2015 10:03 PM
275	<p>No, I live in the border of the Central Area and Capitol Hill. I do not use north end services often</p>	5/19/2015 9:28 PM
276	<p>Please keep the 41 the way it is (really great)! I use the 41 and 73 most frequently. I end up driving every Wednesday around 6pm, from Pinehurst to UW, because the 73 is either extremely late or never shows up around that time for some reason! I have to run home and drive (and sometimes pay for parking which is tough for a poor graduate student!) so that I don't miss class. In the future, I would love to see better services going east to west in north Seattle. At times, this survey described north Seattle as Green Lake and Sand Point; although it's true that both these neighborhoods are north of downtown, what about Broadview, Bitter Lake, Lake City, Haller Lake, etc.?</p>	5/19/2015 9:22 PM
277	<p>How would Ravenna residents get to Northgate if 68 on 25th is eliminated?</p>	5/19/2015 9:12 PM
278	<p>I like the idea of more service connecting the Wedgwood area.</p>	5/19/2015 9:03 PM

279	The rerouting of routes 31 and 32 off of stone way cuts off bus transportation for many UW students and families living off campus. I work night shift at UWMC and have relied on the bus for transportation but the proposed changes increase my distance to the bus stop from 3 blocks to 8-10 depending on the stop which can be a safety hazard as a young female walking alone at 11pm. Without the bus I have no way to get to work. The 16 is also frequently used to get to NSCC and northgate and sending it straight to sandpoint after Greenlake will increase commute time for school, work, and errands. Could the 16 be routed to Sandpoint after stopping at North Seattle Community College thereby serving both areas? Even if it did not stop at the north gate transfer center it would be helpful if it stopped on Mercer between 95th and 105th in order to connect with the busses up there.	5/19/2015 7:42 PM
280	Bring back the 48X... or call it the 45X after the changes take place. Whatever you call it. Improve the direct connection between 85th and Aurora to the University of Washington Medical Center	5/19/2015 7:16 PM
281	I see that there is a proposal to delete the route 71. I think this is a terrible idea, and would probably result in my finding a new neighborhood to live. I live near 65th Ave NE & NE 35th Ave. The connection to downtown via route 71 is very key in making this area a reasonable one in which to rent. I see that in place of route 71, the recommendation appears to be: 1. Take the route 16. I used to occasionally take this route from work downtown to Wallingford or Green Lake. It stops everywhere, and is fairly unbearably slow even to those neighborhoods. It looks like the revised route would go past Greenlake, and across 65th. This would be an extremely indirect and long way to get home. I would guess 45 min - 1 hour during regular commute times. 2. Take the 65 to the ULink station. It would be roughly 20 min to get to the ULink Station, and then some waiting time for the train, and finally the ride downtown. Likely also 45 minutes or more. I road the bus for about 4 years as my only means of transport, and generally found that if I needed to change buses, it was almost not worthwhile taking the trip given the delays that any 2 buses might have. I think the point of the work you are doing is to improve transit for Seattle residents. The deletion of the route 71 certainly does not do that for my neighborhood.	5/19/2015 6:12 PM
282	Really appreciate expanded services for 372X--thanks!	5/19/2015 5:27 PM
283	More routes servicing NW seattle. Hard to get from Ballard to FH	5/19/2015 5:22 PM
284	First of all, this is a terrible survey that doesn't actually give a range of responses that would be helpful - it's leading and I don't feel like I got to really show how I feel about some of these changes. Second, some of these changes are actually really great but I have to protest the deletion of the 71 service. Granted, the 71 is pretty unreliable time-wise BUT it at least provided a convenient way to get from NE Seattle to the U-District and downtown. I understand the link will make getting downtown via one line moot, however I think having to change modes of transport becomes more time consuming and inefficient. As a View Ridge resident, my concern is that the neighborhood is not hugely walkable (have you seen the hills??) and I know that I and others would be affected by the feasibility of getting to the 75, 65, or other lines that may or may not exist anymore in a way that makes sense to walk to a bus, take a bus, then take the Link downtown. It just seems.....a lot. I can see the logic behind this DART idea but what will you do when there are so many requests for pick up/drop off, people can't get the service they need? And why only during the day hours?? Not everyone works 9-5. This is so disheartening.	5/19/2015 5:17 PM
285	the light rail doesn't go everywhere and just because it goes from the u district to capitol hill doesn't mean it goes where everyone needs to go so there is still a need for more than one other direct route!!	5/19/2015 4:22 PM
286	Could there be a bus that connects U-Village to the U-district along N 45th St.? As far as I know, there are no buses that do this, and it would make my commute MUCH faster if there was a bus that went up the ramp (N 45th St.) instead of winding through campus.	5/19/2015 4:07 PM
287	I like the increased frequency changes to 372X. I currently take the 72 and would prefer to take this bus rather than the 372. However, this change isn't that detrimental to my commute.	5/19/2015 4:01 PM
288	Further improving the frequency of the 75 would be helpful. An east-west route from Sand Point to greenlake will be very nice. The U village to lightrail bus seems a bit unnecessary.	5/19/2015 3:51 PM
289	Your proposal seems to completely ignore the large number of commuters who are traveling from north Seattle to SLU. Currently the 66X is quite crowded leaving the U District (and picks up more riders along Eastlake), and *many* of these riders get off in SLU. Your proposal does two things to these riders: (1) those getting on the 66X during peak hours in the U District will now be experiencing the unending line of vehicles exiting I5 at Mercer; I have a great view of this line from my office window; it's terrible. And I'm sure a bus lane isn't in the plans. (2) those getting on the 70 along Eastlake (or in the U District off-peak) will be stuck with a *much* longer ride vs. the 70. SLU isn't getting a light rail connection, but what it is getting is many more jobs and businesses. And lots more traffic if you make the changes listed in this proposal. You should be making its bus connections more plentiful and more pleasant, but your proposal does the opposite of both. I suggest that you give commuting to SLU from the U District a try before you make the currently bearable commute completely miserable.	5/19/2015 3:47 PM

290	Several comments 1) it seems that you' be sending buses down Revenna Blvd west of 15th NE the parking will have to be removed so that buses can make those corners. 2) Regarding mobility. IT will be quite a distance from Stevens in the UW to the Stadium lightrail link. Maybe you all should have some golf carts handy to move people that need the help. - at least till the lightrail link on Brooklyn and 45th opens then you'd be able to bring buses closer to the link. 3)I think you should bring one more line to the U District via the north side of UW instead of sending all those buses through Stevens way in the UW. I think this will cause way more traffic jams on Stevens WAy and all through out the south side of UW.	5/19/2015 3:46 PM
291	I like that you don't overlap routes of the 73 and 373 as much. This provides better access to bus in NE Seattle.	5/19/2015 3:14 PM
292	I would be distressed if the #43 is eliminated. It is the bus I take most often to work on Capitol Hill and to downtown. On occasion I also take it to the University District. Transferring is unreliable in terms of time, especially with the #8 that is chronically late. Added time to transfer, and inclement weather waiting for transfer buses, will at times cause me to drive when I otherwise would use Metro.	5/19/2015 3:04 PM
293	I travel from West Seattle to the university of Washington as a student every day of the week, so I'll definitely take advantage of the light Rail services as they would get me to campus a lot faster as opposed to the 71-73 express buses. I'd just like to emphasize that connecting bus routes from the light Rail to 15th avenue NE with frequent times would be greatly helpful and I'm sure will also serve the majority of UW's commuting students since that's the easiest way to get to the various class locations.	5/19/2015 3:04 PM
294	I love public transportation but I currently find most of the routes to be infrequent enough and unreliable enough to depend on for commuting or events that have specific start times. My favorite routes are 16, 26, 44, 48, 66 and 70. Late evening service is important too - if you take the bus somewhere in the early evening, you want to be able to take it home too!	5/19/2015 2:54 PM
295	I feel that splitting the 48 would make transit from Capital Hill and North Seattle much more difficult, and I would be left without a good route to do that. I also feel that changing route 16 would make my commute much more difficult, as I use that bus frequently to travel between Northgate and South Lake Union.	5/19/2015 2:47 PM
296	No, but I love the plan!!	5/19/2015 2:46 PM
297	I have a hard time believing the UW link station transfers to bus are going to work as smoothly as you do, but I'll wait and see. Or take Community Transit 512 like I do most of the time from downtown Seattle to UW since the 71/72/73 are generally too jammed.	5/19/2015 2:41 PM
298	An express bus that goes from Capitol Hill to Ballard/Fremont would be amazing.	5/19/2015 2:36 PM
299	Please keep in mind that many students and workers live in Eastlake and commute over to the University; the cutting of routes means we have less options to make this trip. Right now it looks like you might be limiting us to just the 70 and 73? The 70 is never on time, so I might actually start using transit less because it becomes so unreliable. Also, the options allowed for this survey are frustrating; there is no option for us to indicate if we would use transit LESS based on certain changes. I don't feel like all response options are available, and there is no "write-in" option. This may give you some misleading end results...	5/19/2015 2:18 PM
300	I do not want to be forced onto light rail that only goes to Husky Stadium. Metro should continue offering buses that go from downtown directly to the U-District. Husky Stadium is *not* the U-District. Please keep at least 1 frequent bus that serves downtown to the U-District. This kind of redundancy is essential for a resilient transportation system.	5/19/2015 2:16 PM
301	Keep the D line, it is great!	5/19/2015 2:16 PM
302	I'm generally impressed with how Metro has handled these difficult decisions! However, I have one mid to major concern. It appears that both routes 373 and 373 are M-F only. One of them needs to run on weekends to connect Jackson Park to the U District. Please, pretty please.	5/19/2015 1:55 PM
303	The removal of the number 19 bus line was a very bad decision. The commute from Magnolia to Downtown takes forever, buses are almost always late and an express bus would be preferred. All the proposed plans completely ignore the Magnolia neighborhood. That is very bad.	5/19/2015 1:38 PM
304	I strongly support higher frequency and better coverage, even at the expense of "one-seat rides".	5/19/2015 1:32 PM
305	More frequent all-day service is helpful for graduate level students like myself who take evening classes at the UW main campus. Thank you!	5/19/2015 1:28 PM

306	<p>I live on Route 16 off Kirkwood St. I believe in public transit and I'm glad to see all the light rail efforts underway. I do not personally ride public transit and will not be riding it now or in the future. (RE: Route 16) The street (Kirkwood) I live on is not able to support any more bus traffic and is not a legitimate bus accessible street to begin with. These busses disrupt a normally quiet neighborhood which has very limited ridership from the immediate neighborhood; however the neighborhood/street bears the negative burden of commuters riding the bus from other parts of the route. I do not want to see any bus traffic increased on my street and would like to see the bus route changed, to be moved off of Kirkwood street and to a more appropriate bus accessible street. Safety is also a concern, in that bus speed is predominately higher than the street allows and the bus often has to wait or pull over due to the inability of the street to accommodate 2 way (meeting vehicle) traffic. Moving to another street would also speed up the bus, if it had more room to operate/navigate. I would also like to see/hear what initiatives our transit system is considering in regards to mitigating the noise level of the busses currently in operation and the purchase of new busses which will take into account noise produced by engines, braking and general bus operations. Busses need to be quieter and take into account the quiet neighborhoods in which they operate. Thank You for the Survey and hearing my voice, it is very much appreciated. Jim Decker Ph: 425-577-0472</p>	5/19/2015 1:19 PM
307	<p>I could be wrong but the proposed transit maps look like "my recent tax increase" didn't pass for METRO – because again you are reducing service and that which seems like a bait and switch routine. Seattle voters have a short term memory. In my neighborhood I'm experiencing compression of the major arterials and jamming one lane with traffic were there were 2 lanes, traffic flow especially towards the freeway is screwed. Just trying to make a trip to the grocery store is hazardous detail and you can't do that on a bus. Trying to change bus transportation does not change fix or make street access better.</p>	5/19/2015 1:19 PM
308	<p>South lake Union needs more connection from downtown - options are very limited for getting to the sound transit.</p>	5/19/2015 1:10 PM
309	<p>Fix the 32 route. The buses get hung up just before Stevens and Garfield heading west and just before Queen Anne Ave heading back toward the University. Sometimes they add 10-15 minutes to my commute right before those stops. Why is that? It's really annoying when I arrive at the stop less than a minute after the bus pulls away and I have to wait 30-45 minutes for the next one (prior to my 45 minute bus ride). This is entirely too long for a trip between Queen Anne and the UW. More frequent 32 buses are needed. Also, what's with the B Team drivers for the 32? It seems like they're really bad at knowing how hard to press the pedals. I happen to live on Mercer Place and can feel my condo vibrate as the D Line and 32 buses go up and down from Mercer St. Can you either teach your drivers how to go up that hill without barreling along at such a speed that they crack the plaster in my walls? Or maybe you can send the buses down further to avoid driving up a road that's not built to handle such heavy truck traffic.</p>	5/19/2015 1:09 PM
310	<p>The 43 is very convenient for traveling downtown. Since there are only a couple stops for the new light rail which will require busing for access, commuting downtown will be longer/less convenient having to split the trip into two modalities.</p>	5/19/2015 1:06 PM
311	<p>I would like to thank yo for hearing the requests of riders of routes 48 and 67. 48 has been very unreliable due to the long length of the route and I appreciate the increase in service as well as the split to the 48 and 45 routes. Route 67 service is the most direct way for riders to get to Northgate from the UW and having dedicated service would be awesome. Thanks so much!</p>	5/19/2015 1:05 PM
312	<p>I would be happy to use mass transit if it did not take over 2 hours and 3 transfers to get from 128th/Airport and Highway 99 in Everett to Ballard. I do not understand why I need to go downtown to go north back to Ballard. I can connect from the Swift to the E Bus in Shoreline but it takes two more transfers to transfer to the D Bus at 3rd NW and 105th. If the D Bus went all the way out to Aurora then the E would connect with the D and it would take you down town via Ballard which many of the people that work at the hospital want to get to in the first place.</p>	5/19/2015 12:58 PM
313	<p>I really like the idea of shortening (splitting) route 48 to improve reliability of service.</p>	5/19/2015 12:58 PM
314	<p>Changes/eliminations to route 73 will cause me to take routes 67 and 75 from mapleleaf/northgate to the UW hospital. I appreciate the frequency of service on weekdays. But I am a SHIFT WORKER that works weekends too (there are lots of hospital workers on this schedule). Please, please make sure the 67 and 75 continue to operate the weekends and start EARLY before 6:00 (need to get to work by 6:30 AM) and also run late with a routes operating AFTER midnight please (we get off after 11:30 PM) Thank you.</p>	5/19/2015 12:47 PM
315	<p>The Route 16 buses do not belong in the narrow Green Lake neighborhood streets. Certainly not the loud diesel engines! This route needs to be remapped off of Woodlawn Ave to Green Lake Way or another large arterial. The buses are loud, dirty and too frequent already. Express buses and frequent buses belong on large arterials like Aurora, not in neighborhoods with bikers, pedestrians and children. Thank you.</p>	5/19/2015 12:32 PM

316	Before you change routes 66 and/or 67, you should do an on-bus survey of the current riders of those routes. The University is just finishing moving about 150 staff members from campus to Roosevelt Commons West (4300 Roosevelt Way NE). Many of those staff, including myself, ride from Northgate to Roosevelt at 45th. Note: our destination is NOT downtown. In addition, there are a number of elderly riders who get off one stop farther south at the Roosevelt clinics (NOT the Medical Center). Your proposed changes would leave us without reasonable bus service to work or to obtain medical care. Routing 67 down University Way is not a good option. Most of the students who ride that bus are going onto campus, NOT to the Medical Center and NOT to the light rail station. I don't know how you "heard" what have "heard" about the desires of potential riders in the Maple Leaf area (who are about to loose their own route 68 to UW), but I would suggest you make an effort to listen once more, and perhaps to more of the people who already depend on Metro bus service for their commute. Brion Norton	5/19/2015 12:05 PM
317	Increase frequency of Route 28 to the end of the line in Broadview.	5/19/2015 11:59 AM
318	While i think that the removal of the 68 is actually a good choice, getting rid of the 71 and 72 is a ridiculously poor choice. the 71, 72 and 73 are incredibly overcrowded by university of Washington students already and reducing these to one bus, even with more 73 arrivals will cause many people to miss their busses constantly. This will not be further compensated by the addition of the link rail because, although this may be useful for football games, the husky stadium is too far away from main campus to be used for purposes other than transport to and from husky stadium or the UW medicine. please reconsider the removal of the 71 and 72 routes, especially the 71 as it routes down 65th and i, along with a full bus of people, use it every day.	5/19/2015 11:38 AM
319	The 16 is how I get from Wallingford to Northgate. Now, the 26 will go to Northgate, but I'd have to walk to Fremont to catch the bus. This is inconvenient. The 26 bus stops aren't nearby, and the 16 bus stops are, but Sandpoint and Northgate aren't close.	5/19/2015 11:37 AM
320	The 12! I'm upset about the 12 being re-routed. There are many buses that go from east capitol hill to downtown (especially if you didn't delete the 43), but the 12 is the only bus that goes from east capitol hill to first hill. I ride this bus daily and my commute would be severely disrupted if this route were to change.	5/19/2015 11:37 AM
321	Having a route that connects the residential areas near Cowen Park and the western side of the University District to downtown with a single bus is important to me. The current routes 71, 72, 73, and 66X provide this connection, but this route will be greatly reduced to fewer 66X connections. It is important that there is a single bus that continues this route during both peak and off-peak hours to maintain a reasonable commute between residential areas downtown without transfers.	5/19/2015 11:28 AM
322	This reroute overwhelmingly impacts Wallingford in a negative way by the reroute of 31/32. I will probably use transit less if this proposal goes through.	5/19/2015 11:27 AM
323	Emphasis should be maintained on easy, quick transfers between all day routes and the new UW light rail station	5/19/2015 11:27 AM
324	More/quicker bus opportunities between Greenwood and UW!!! Right now you have to get to 85th street and catch a local 48. S-L-O-W and P-A-I-N-F-U-L. So many neighborhoods mentioned here that connect through to UW EXCEPT Greenwood! C'mon!!!	5/19/2015 11:25 AM
325	An additional route from UW to the Edmonds ferry terminal would made commuting much easier for professionals and students living on the Kitsap Peninsula.	5/19/2015 11:21 AM
326	I need to be able to travel between Downtown and University District every day and sometimes multiple trips in one day. The 71, 72, and 73 has been awesome for me - cutting two bus lines and reducing the areas 73 reaches would impact me greatly in a negative way and I am afraid of losing my convenient transportation.	5/19/2015 11:18 AM
327	Living in Ballard, we are lacking a plan like the Link that connects the neighborhood to the airport. We have D line for downtown. But it seems like we could use a better plan for faster access.	5/19/2015 11:18 AM
328	I don't see a direct route up 15th Ave from UW to Roosevelt High School. The revised 48 turns at Ravenna and the 73 doesn't go on 15th near the University. This would make it harder for me to volunteer at Roosevelt during the day (I am a professor at UW) or for high school students to take classes at UW.	5/19/2015 11:16 AM

329	<p>Why are you getting rid of the 71? There's nothing here to replace it! I live at 44th and 65th and I use the 71 every day (and I mean every single day, not just Monday through Friday) to get to and from the U District. Now, there's no bus that goes directly from my neighborhood to the U District every half hour. If anything, you should be increasing the 71's frequency, not taking it away (although I do think it would help service if the stops were every three or four blocks instead of every other block on 65th). Many members of the UW community live in the Wedgwood/Bryant/Sand Point area and the bus service as it stands now works well for us. I chose where I live because the 71 offers a direct route. The proposed 941 route will drop you off below U Village, which means you have to transfer to get up to campus. On the 76 or the 16, you would have to transfer at 15th Ave. The 65 also drops you off by U Village or on the far south side of campus, plus anyone who doesn't live right on 35th will have to walk or transfer. There are no options for my neighborhood that don't have me transferring or a walking at least ten blocks. Please don't take the direct bus from the Wedgwood/Bryant/Sand Point area to UW campus away! I know you all are really excited about this new light rail connection, but we don't all live near it, I won't be using it very often. I don't want the route I use and rely on every day being sacrificed for the light rail connection. I'll add at the end of this that I don't have a car and am adept at using the bus routes as they currently stand. I actually don't have a problem getting around at all. However, if this goes through, I think I will have to stop using the bus every day because I don't want to have to worry about transferring buses to get to work. I guess I'll start carpooling, probably with other neighbors who get cut off from UW. There's always a group of us waiting at our stop for the 71 each morning.</p>	5/19/2015 11:12 AM
330	<p>Reducing connection service between University Way NE and Downtown is hugely inconvenient for customers who work in the North end of the U District. While the light rail service purports to be much faster than buses making that trip, the added walking time erases any benefit. This reduction in service should have been postponed until the Brooklyn Street station opened. The Husky Stadium station is simply inconvenient when trying to reach most locations in the U District.</p>	5/19/2015 11:04 AM
331	<p>Maintain service of route 72 through the wedgewood neighborhood Increase service of route 309X</p>	5/19/2015 11:04 AM
332	<p>I would really like to see an end to the practice of reducing the number of trips for the 373 route whenever the UW is not having classes. There are so many of us who work at the UW, regardless of the class schedule (medical, administrative, etc.) that it makes no sense to cut back on frequency of trips just because students are on break.</p>	5/19/2015 11:00 AM
333	<p>Please do not eliminate route 43. I live on 18th avenue and work at UW. My stop is on 15th Avenue and Campus Parkway. I will have to walk 6 blocks to catch the 48 or take two buses and the lightrail in order to get to work. That seems unreasonable.</p>	5/19/2015 10:53 AM
334	<p>I would like the route on 42nd to stay there. Very helpful for commuting for that neighborhood of 7th-9th.</p>	5/19/2015 10:53 AM
335	<p>My biggest concern is with the elimination of the 71 and 72 routes that run along University Ave. The stadium light rail stop is actually quite a stroll from the western parts of campus and the U District. It will be inconvenient and confusing for many people who are used to having easy and frequent bus options between the U District and downtown to now have to get over to the stadium.</p>	5/19/2015 10:51 AM
336	<p>I would like to see more service to Shoreline. Ideally, there would be routes that circle from Shoreline CC to UW and back at peak times. The 355 is PACKED at peak times showing that people want to ride the bus. The issues are that there aren't enough seats for the peak routes and the buses struggle to get through downtown at the start of the routes to Shoreline and end up late. Very late sometimes. Thank you for trying to make transit better-I really appreciate it.</p>	5/19/2015 10:50 AM
337	<p>Would it be possible to have reader boards (similar to what is available at train stations) at some of the busier bus stops showing when the next bus is expected?</p>	5/19/2015 10:49 AM
338	<p>There's no mention of Lake City neighborhood. I commute from Lake City to University of Washington and cutting this route would impact to the morning and afternoon commute.</p>	5/19/2015 10:45 AM
339	<p>Please stagger the times of the 73 & 373. Currently they run within 5-10 minutes of each other and that leaves a 25-30 minute gap until the next set of buses to the UW from 15th AVE NE in Maple Leaf. Deleting weekend service of the 73 decreases my transit options. Terminating the 73 in the University district decreases my transit options from Maple Leaf to downtown. They are now limited to peak times on weekdays only on the 77. Currently, if you want to get downtown from the U-district you go to University Way and have very frequent service on the 71, 72, 73, or 74. This service has been amazing, reliable, direct and very useful to me. It is not entirely clear how I will make this trip via transit with the proposed changes. It doesn't feel very efficient to travel by bus from University Way east to Husky Stadium and then transfer to light rail. I could see myself opting for a Car2go when heading downtown instead of transit until the U-district station opens.</p>	5/19/2015 10:39 AM

340	I had heard that the 27 would be returning to full service in June, but I did not see it on this particular proposal, so I am concerned. The 27 connects my family to other bus lines (i.e. 48 and downtown). Without it, we do not have any good alternatives (we are near the lake and have a toddler and in the fall will also have an infant). We rely very heavily on the bus services to connect us to childcare and our jobs (at the UW and downtown).	5/19/2015 10:36 AM
341	East-west connectivity in north Seattle is poor, i.e. routes linking UW to Wallingford/Fremont/Ballard. The proposed changes to routes 31/32 would DECREASE the usefulness of the metro system for my commute to work. This would result in fewer metro trips and a longer commute.	5/19/2015 10:35 AM
342	The proposal has many improvements for those of us in the Greenlake who ride the bus daily (weekdays). I am hoping that the proposal to split route 48 is going to be a great benefit to the reliability and predictability of this run that is so important to the many residents who either work or attend school at the UW or the UW medical center, or people who need to go to UW medical center/hospital. Greenlake residents would also likely ride the bus even more on weekends if it were easier to get from Greenlake (Woodlawn and Ravenna) to University Village, Queen Anne, Eastlake, Ballard.. Right now, we can take the 26 to Fremont and Seattle, and the 16 into Wallingford and Seattle. I would not want to lose that capability. The Greenlake community has great bus service--I purchased my home here because the bus is literally at my door (48, 16, 316, 26)--but it could be better, and I think that your proposal is working toward that. One big gap for me is the difficulty of getting to University Village/Union Bay area for medical care and for shopping. I think that is being addressed in the proposal. The Greenlake Community has a wonderfully heterogeneous demographic--from infants to the large elder community at the Hearststone retirement and assisted care facility. The population density has skyrocketed in the 8 years that I have lived here. Parking has become intolerable. I have a parking spot in my building, but there are no places to family or friends to park if they visit. Many condos and apartments are being built that have a off-street parking for a fraction of the people who will inhabit the building, due to the Urban Village zoning. Improved mass transit in these areas that Seattle is designating as Urban Village is critical. I am very pleased that the voters supported \$\$ for this, and I appreciate that you are doing these surveys. Thank you.	5/19/2015 10:34 AM
343	Without the 43, the central district is underserved in transportation options. Splitting this route in 2 will only increase the time it takes for underserved populations to reach the university. Less money invested in door to door service for wealthy and/or gated communities would allow for more transportation to areas that depend on it for their jobs and children.	5/19/2015 10:34 AM
344	I'm concerned about the proposed cutting of route 72. I often take this route north to Lake City. The 372 would get me close to where I need to go and more service of that route would be nice, but the stops are fairly far away from one another up that way. I could support the proposal if more stops were implemented for route 372, particularly among Lake City Way.	5/19/2015 10:32 AM
345	The Roosevelt corridor from 45th up to Northgate Way needs direct and regular service. With the removal of route 68 and the westward shift of the 66, the 67 is the only bus that provides a straight north/south route that goes up 11th/12th and Roosevelt to Northgate. The proposed changes to the 67 and the 73 will provide coverage going up Roosevelt and 15th, respectively, but those routes need to be in place as proposed to compensate for the removal of the 68 and the westward shift of the 66.	5/19/2015 10:27 AM
346	The removal of route 71 is unacceptable. It will force me to commute to the UW more frequently by car because I will not walk on rainy days for at least half a mile in the rain.	5/19/2015 10:24 AM
347	I would rather see a few more routes for the 373x. If you miss the 5:35 pm bus to Aurora Village the next one isn't for an hour, which is a long time to wait. Alternatively, I've walked to catch the 73 and between walking and waiting, and then the LONG busy bus ride, the next 373x has passed the 73! This is frustrating service. 1) add a 6:00 PM 373x route to Aurora Village (picking up at Stevens Way) 2) add an 8:05 AM route to University Village (Starting at Aurora transit center) Alternatively- make a few of the 73 routes a quicker express bus making fewer stops.	5/19/2015 10:21 AM
348	Please do not cancel route 43...without it Montlake has no way to get to Capital hill or downtown	5/19/2015 10:21 AM
349	Whoopee ! Now I'll get to take THREE buses to get to and from work instead of two !	5/19/2015 10:20 AM
350	I notice that the route for the proposed 45 bus uses University Way instead of 15th ave NE. For those of us who commute to the main UW campus this represents reduced convenience. The convenience reduction is not severe enough to impact my decision to use transit, but I would ask that the switch to University Way be informed by data on whether the majority of route users head east or west from the current routing and whether the reduction in convenience for eastbound commuters would be alleviated or exacerbated by travel time differences between the 15th ave and University Way options.	5/19/2015 10:12 AM

351	<p>Moving 31/32 from Stone Way to Wallingford Ave, would be a profound negative impact on my life and many other riders. I live at 41st & Whitman and work at UW at Bloedel Hall. I take the 31/32 everyday to work. Right now, according to Google, via 31 or 32, the trip takes me 20 minutes w/ .3 miles walking distance. Once in Wallingford, the 31/32 travels east in a fairly straight line. If the 31/32 is moved to Wallingford Ave, it would take me (according to Google) 12 mins to go .5 miles (up a steep hill) just to get to the closest 31/32 bus stop. Alternatively, I would take the 44 which would take 28 minutes with a walk of .45 miles. (An increase of my commute by 40%). Or it might take longer depending on where the 44 stops get moved when the stadium opens. Not only that, I have walk north to only ride the bus back down south. My commute to work turns into 3 sides of a rectangle - not very efficient and pretty maddening. The bus stop at 40th and Stone is very busy, and many people would be affected by this change. I'm all for positive changes to bus service, but it seems like Stone Way riders are getting the short-end of the stick.</p>	5/19/2015 10:09 AM
352	<p>If the new route 67 could still be run on campus you'd save 20 minutes of commute time from my day. I appreciate the added hours and frequency, but I'm must walk 10+ minutes additional to and from the bus versus on-campus access. This, partnered with the change of route by the transit center adds 30 minutes of commute time to my day. I know the extra exercise will be a good thing, but I don't look forward to the winter. If the travel time on the bus is reduced by at least 10 minutes each way this would be acceptable to me, but I'm not sure if the new route will provide this time savings. It is pretty awful currently that it regularly takes me 45 minutes to get from the U district to Northgate in rush hour (30 mins in good traffic). Additionally, I am curious why so many changes have been made to Northgate transit center service a full 5 years ahead of when we get light rail. It seems like there will be fewer choices of routes (with increased frequency). The increased frequency is appreciated, but the reduction of routes is definitely not. There used to be a convenient way to get to U-Village and central campus from Northgate. This is no longer the case. The 75 does not count as it is a "milk run" that takes 45 minutes to get to the end of the route. I could literally jog home faster than if I took the 75.</p>	5/19/2015 10:08 AM
353	<p>I support all of the proposed changes that affect me.</p>	5/19/2015 10:02 AM
354	<p>I would take advantage of the added times during midday for rt 65. I appreciate that the route is not significantly changed as this is how I get to my job at UW.</p>	5/19/2015 10:01 AM
355	<p>You mention adding weekend service between University district and Lake City. Does that mean you would stop at 145th street (where lake city changes to Bothell Way)? That doesn't help much really need to continue further north. By REMOVING 72 you make any reasonable connection from Lake City to University District (ie, University Avenue) very difficult ... multiple transfers, etc. Don't like that option very well.</p>	5/19/2015 9:59 AM
356	<p>This nicely addresses the need for most folks to get downtown using light rail, but it just means more transfers to get places now. I would rather sit on the same bus that came less frequently, then have to transfer 2 times if I were going downtown (or the airport). For example, I would rather walk up the hill to the 71 and take it all the way downtown to transfer to light rail instead of taking a combination of busses to get to Husky Stadium to get on light rail. Even if the busses are more frequent, transfers still take a lot of time and are a hassle - especially if you are going to the airport and have just a small suitcase to lug around. And, for those of us that don't go downtown very often, it is a shame that you are removing the route 30 altogether. Because I don't always work at peak travel times, I often find it easier to walk the 1.8 miles to work instead of walking part of the way and taking one or two different busses. I know you have to do what is best for the majority, so I will just work around whatever you folks think you need to do.</p>	5/19/2015 9:56 AM
357	<p>It feels like the University community is being short-changed by these changes. Many routes which used to serve campus (and students commuting to campus) now serve the transit station, giving better access to working professionals trying to get downtown, but adding a significant walk by avoiding the campus entirely. I would see a 10-15 minute walk added to my commute because Route 67 no longer travels on campus and my building is not near the new light rail terminal. If you are going to force UW students to purchase a U-PASS membership, please don't make us hike from the bus to our buildings, too! The result would be a significant decrease in my utilization of Metro services because of the added inconvenience.</p>	5/19/2015 9:56 AM
358	<p>the 372, which was designed to be an EXPRESS bus from Bothell to UW will still be nothing more than a way to support Lake City and leave Bothell residents with an untenable commute. Only Metro could turn a 10 mile commute into 1.25 hours of sheer bouncing, steaming, nauseating HELL!!!! The UW forces us into this HORRIBLE bus system which seems to utilize planning methodology from the 1950s. Let us stop at every corner in the city and punish employees who cannot afford to leave in the city by making their commute utterly miserable. Of course, the Metro planners have totally ignored all of the money spent in the 1990s to add the bus lane on Bothell Way to speed up bus service. If is quick between downtown Bothell and Lake Forest Park and then it is bounce, stop, bounce, stop, bounce, stop, bounce, stop so that the City of Seattle folks don't have to walk more than a block to the bus. Only the morons at Metro could think that EXPRESS means 95 stops!</p>	5/19/2015 9:54 AM
359	<p>Cutting direct access from Stone Way to the University of Washington is foolish given the amount of use this service currently sees.</p>	5/19/2015 9:53 AM

360	I think that an east-west route along 65th street would be very beneficial for connecting Ballard-Phinney Ridge-Wallingford-U District. I will look again at the proposed changes to the 16, but it doesn't sound like it goes far enough west to be accommodating for my needs. I also would suggest a few express routes for the new proposed 45 bus in early morning and evening for UW commuters. Thank you.	5/19/2015 9:52 AM
361	While the light rail station in Capital Hill is centrally located, there is a challenge of getting around due to the hills. I think it is important to maintain connections to the areas in Capital Hill that are not near the light rail station. In particular would the area between Madison st., 15th & 19th that would be the bus lines 48, 43 and 49. These are the only routes that connect the U-district to the areas of Capital Hill that walking to the one and only light rail station would be very inconvenient.	5/19/2015 9:52 AM
362	The 31/32 service picking up from stone way and 40th going to the U district is one of the busiest stops that I use. Moving 31/32 service over to Wallingford Ave would make commuting to work and school much more difficult for me and others living in the neighborhood. I strongly request that you please keep this route as is to maintain an easy commute for the many people in my neighborhood who use this stop.	5/19/2015 9:49 AM
363	Having a bus stop every block may be beneficial for those that can't walk far, but it really slows down the service. Maybe we should space out stops in between transfer points.	5/19/2015 9:49 AM
364	Currently it just spends me less than 5 minutes to University Way and 50th st to take route 71/72/73 to Westlake and transit to LINK very smoothly, and there are so many 71/72/73 buses and I don't need to wait too long. But if 71 and 72 are removed, and I have no idea how could I go to LINK at Husky Stadium rapidly, I might still choose to take 73 to Westlake. Obviously by then route 73 will be much less than combination of 71, 72 and 73. So it seems not very good change for me. Or could you give me suggest how could I get to LINK at Husky Stadium from Brooklyn Ave and 52nd St quickly? Thanks.	5/19/2015 9:44 AM
365	Please reconsider getting rid of the 72X. I know a lot of people rely on this bus to get downtown from north Seattle and it is much more convenient then the 372X which stops on campus AND then having to transfer to a different bus.	5/19/2015 9:43 AM
366	We need more spaces at Park and Rides.	5/19/2015 9:42 AM
367	Seems like the Metro is always catering more to North Seattle more than downtown needs. Regardless, I'd rather see the prices drop. Public Transportation should be more affordable--not a privilege for tech employees who want the convenience of quick travel without having to live downtown.	5/19/2015 9:42 AM
368	I think it's a problem to move the 67 from 5th Ave to Roosevelt. For example, I live on 1st Ave NE. Therefore, I walk to 5th Ave each day to catch the 67. Under the new proposal, I would have to either catch the 66 and walk from its last stop to my job at UW Med Center or walk all the way to Roosevelt to catch the 67, which is quite far. Either way, my commute times would be increased by 15 minutes each way, which is a lot of time. I would prefer to have the 67 & 68 route maps maintained mostly as they are, but possibly rerouted to stop closer to the UW stadium light rail stop.	5/19/2015 9:41 AM
369	Getting rid of 72 is a terrible idea. It both takes me to work at UW and it takes my daughter to Roosevelt High School. Beyond it impacting me personally, its a lifeline for students both in high school and at UW. It makes it, therefore, also a lifeline to their parents. Getting rid of 72 is bad for parents and kids. It will result in more driving by car which will cause more traffic, more pollution, and more accidents. Keep 72!	5/19/2015 9:40 AM
370	By having both Routes 31 and 32 go on Wallingford Avenue rather than Stone Way you are inconveniencing a large number of people who get on those buses at the Stone Way & N 40th stop. You're basically relegating everyone who lives about 40th Street and who needs to commute to the UW to ride the 44 which is always stuck in I-5 traffic or to walk about a mile to catch the 31/32 that get to UW very quickly. So unless the proposal somehow fixes traffic on 45th street it's basically screwing everyone who lives around Stone Way above 42nd Street. I know that current proposal somehow increases the availability of the 44, but having them more frequently is not going to keep them from getting stuck in traffic. Some possible solutions would be to have either the 31 or 32 go on Stone Way as they do now and the other go on Wallingford Ave. For people going to Fremont it will not matter which bus they take, but for everyone who lives in a large swath of Wallingford they can still get to/from home/UW conveniently (i.e. without having to walk across the UW campus to catch the 44 and then sit in traffic). Alternatively, just leave the routes the same and have the few people who catch the bus on Wallingford walk over to Stone Way as there are (and with all of the new apartment complexes will be) many more people who live either on Stone Way or between Stoney Way and Aurora who would all of a sudden not have a convenient bus to the UW. I hope you think hard about taking both of these buses off of Stone Way as you are going to be affecting a lot of people who chose to live there due to the convenience of these buses. Additionally, realize that the 44 is not really a valid solution for many of these people due to the insane I-5 traffic that one is subject to riding that bus anytime between the hours of 6AM and about 8PM.	5/19/2015 9:39 AM

371	The 71,72,73 express busses are usually very busy. On my way to downtown I have a handful of times where the bus was too full to sit down, or even on-board. A reduction of these bus routes would increase this problem. I understand the link light rail is extending to husky stadium, but metro users on the opposite side of campus, on University Ave, would still take the 71-73 to downtown since it will be more convenient. I'm worried the Express bus from U-District to downtown would be even more crammed than before with these revisions.	5/19/2015 9:39 AM
372	I noticed you will delete route 68 the reason being that it is a duplicate. However the 68 is the ONLY bus that travels on the north end of Roosevelt Way NE (i,e between safeways and northgate avenue). Deletion of 68 would result in unnecessary disruption and inconvenience to a lot of travelers.	5/19/2015 9:39 AM
373	The 48 should be the north bus number and the 45 should be the south bus number. Breaking them in two is going to limit peoples ability to get to work from one end to the other. You are going to segregate neighborhoods in the south	5/19/2015 9:38 AM
374	I think the proposed rerouting of routes 31 and 32 along Wallingford Ave rather than Stone Way N is a misguided. While I understand something must be done to compensate for the loss of the 26 route in this area, I think that the much higher density of housing in the Stone Way corridor (and west of Stone Way to Aurora) argues that at least ONE of the 31 or 32 routes should maintain its original routing south along Stone Way from 40th. With both routes moving along Wallingford Ave it requires much more walking uphill for anyone living along Stone Way (and particularly west of Stone Way). However, I think that the rerouting of these routes to 34th rather than 35th is a good move as the congestion through central Fremont is a real drag on these routes.	5/19/2015 9:38 AM
375	Weekend and evening routes are important to my well-being and lifestyle and safety. Also, any further connection between UW and Ballard is great.	5/19/2015 9:38 AM
376	Thank you for proposing Route 45! If the times are consistent and the buses not overcrowded, this will lead to me taking the bus 3 to 4 times each week rather than driving to work.	5/19/2015 9:37 AM
377	splitting the 48 is crazy - if you are encouraging use of the transit system, don't make it more cumbersome by increasing the number of transfers to get from one place to another. The 48 is standing room only as it is now, and with the removal of the #4 route for months, and then splitting up other routes and suggesting that more people take the 48 (example #8 and #43 sites) is just plain crazy. During fall/winter rainy days I've had THREE fully packed buses pass me up at the Yesler and 23rd stop on a routine basis causing me and others to be extremely late for work and starting our day off on a really bad foot. The number 48 has more schools (college, universities, private and public schools) on it than any other route in the city, and no increased in buses during peak school hours in the morning and afternoon to adjust for that fact. Seattle Metro used to be top in the nation in service, convenience and cleanliness of buses...no longer....and I find that really sad.	5/19/2015 9:37 AM
378	I am absolutely appalled that the route 43 will be eliminated. That is the worst idea ever! That is the only bus I take to Capital Hill. You just put another car on the already congested Capital Hill roadway. The 941 idea that would allow people to reserve special pick ups is outrageous! Everything comes at a cost. Too bad if you moved into a neighborhood that doesn't have good bus service. The first thing I did when I looked for a house 30 years ago was check out the bus routes. I will find it difficult to approve/vote for any increases to Metro if this essentially public funded free taxi is allowed. Many of the suggestions may be good but without knowing the cost involved with each it is hard to prioritize them. Next survey should say this option will cost \$x million. Is it worth it to you? I doubt very much if there is enough money for all of this and some of the changes sound pretty frivolous and should not even be considered.	5/19/2015 9:35 AM
379	45th Ave NE south of NE 65th street will not accommodate buses. 40th Ave NE would be a better choice.	5/19/2015 9:35 AM
380	Denny is an area that troubles me. One of the only cross town bus is the 8 but it gets stuck going east during rush hour due to the I-5 traffic/on ramp. The bus which works fine during non-rush hour times, becomes almost useless between 4:30 - 6:00 pm, is there an alternative way to get cross town? I would be interested to see a proposal that circumvents some of this traffic but still provides crosstown service. Thanks for listening.	5/19/2015 9:34 AM
381	I'm very excited about the proposed change to route 372X - a huge number of students and professionals utilize this route, making buses full to capacity during peak hours. Increased frequency and service hours would be extremely convenient and ensure better safety of all bus passengers without squeezing them all in like sardines in a can. I would utilize the transit system more often should this change be made.	5/19/2015 9:31 AM
382	I think there should continue to be a connection between Ravenna/Roosevelt and SLU that takes surface streets. It appears that this is being cut or redirected to I5, which could be a mess depending on the traffic. I have to say that the maps for the proposed changes are pretty confusing, so whatever you could do to improve them would be appreciated.	5/19/2015 9:30 AM

383	Eliminating the #72 would greatly impact access from Lake City to the UDistrict. I'm not talking about the campus or link connections. I'm talking about being able to run errands between the two areas by bus without having to make connections -- sometimes more than one. It would impact those who need services in the UDistrict or Lake City or anywhere in between. Access to the grocery stores, small businesses, doctor appointments, etc. -- the everyday things people have to do. You are forcing people to use the link by eliminating bus routes and access to local venues. I know someone has to pay for the link, but forcing people to walk from the UW campus to the link to get downtown is just stupid. Right now, I can take the 72 to downtown -- one bus -- no transfers. The changes will force me to make other choices by having to take the 372 to Lake City and catch the sound transit 522 to downtown. I don't need to use the link and taking away the bus service still won't get me to use it. My next step will be to buy a car.	5/19/2015 9:30 AM
384	I ride a bus from the "East Side", so these changes will not affect my transportation as much as they probably would people that commute in the UW District and around it. Hope we have enough funding to offset or, at least, delay the transportation nightmare that is looming over Seattle and is getting darker by the month... Thanks.	5/19/2015 9:29 AM
385	Patients to SCCA clinics take the 66X bus now that drops them off at SCCA. By changing routes off of Eastlake Ave E, patients will have to walk up a steep hill on Aloha to get to the clinic. This is a would not be possible for most patients coming to the clinic. Please reconsider.	5/19/2015 9:27 AM
386	Love the new 16 route!	5/19/2015 9:27 AM
387	You didn't ask about deleting the 72 route...just adding more frequency to the night shift of the 73 bus isn't going to make up for getting rid of one whole route. To get home, I take the 72, and can take the 73 if I walk a bit more. But that means I only wait maybe 15 minutes. By getting rid of the 72, I now have to increase my wait time to 30 minutes, and I am much less likely to be taking public transit then.	5/19/2015 9:27 AM
388	I notice that there is nothing about providing bus service to get people from Woodinville to UW Bothell in order to take a 372. As it stands right now, the 372 is the closest bus stop to me and it's about 3 miles from my home. Walkable, but time consuming. It is also the only bus that travels down the corridor and I have seen nothing about replacing it with any other bus. Moving it back to UW Bothell, without any sort of bus running to UW Bothell would make walking to the bus impossible. Is there any thoughts about having a shuttle of some sort ferrying people to UW Bothell from bus stops that would be losing all bus service due to this change?	5/19/2015 9:26 AM
389	I rely on the 71E to get me from my home in Wedgwood to my work in the U District every day, but getting home is more complicated, as that route frequently gets snarled up coming out of downtown. As long as there is a direct connection between NE 65th Street (around 45th ave NE) and University Way NE (Around NE 45th Street), I'll be happy. If integrating some of the downtown part of the route with light rail improves reliability north of the Ship Canal, I'll be happier. I would definitely be interested in transit that takes me downtown during non-work times, and am looking forward to being able to take the train to the airport. Thanks!	5/19/2015 9:24 AM
390	An express bus or shuttle that takes people from north UW campus to the University Stadium light rail station. A fast, convenient way for students to get downtown (faster than the buses currently offer) would do a lot for ridership on light rail. This would be a temporary solution until the U-District station is opened.	5/19/2015 9:24 AM
391	The proposed changes to improve frequency and extend the times of bus routes in Seattle Metro is generally beneficial, however, this will not alleviate the larger problems of heavy traffic on Seattle roads. Improving the bus system is a short-term fix, but improving roads and installing an East-West light rail system will contribute to the long-term well-being of Seattle citizens.	5/19/2015 9:23 AM
392	Do not delete route 68. 372X only is not enough for those of us live along 25th Ave and commute to UW Seattle. We love route 68.	5/19/2015 9:23 AM
393	U District to Fremont, can we do this from 20th Avenue NE (old route 30) again ?? MORE FREQUENT SERVICE East/West to Fremont and Queen Anne please Splitting the 48 (aka Forty LATE) can help. Please keep this southern route to UW/Mount Baker on schedule. Worst bus I have ridden in Seattle. Finally - the light rail is not here. We need more bus service NOW. Thank You.	5/19/2015 9:21 AM
394	I don't see a plan for those of us who live in the Eastlake/U-district area to take a bus to Northgate. Perhaps I just missed it, but I usually travel by bus to shop there rather than drive. I would hate to see access to Northgate deleted for my area. Also, I take a 71 bus now to get to 65th & Ravenna on a regular basis and don't see a replacement for that. Otherwise great job on rerouting the buses.	5/19/2015 9:21 AM
395	Stops along 15th from 40th to 55th, in the U district are essential to many UW students	5/19/2015 9:21 AM
396	Improve bus movement on 35th ave and 45th street with stoplight prioritization for buses more dedicated bus lanes and enforcement of no stops or parking along north 35th Ave ne between hours of 4-6	5/19/2015 9:21 AM

397	I use route 68 to get to work and get home. IF you must eliminate it, then the revised 372 MUST stop at NE 60th Street. I have arthritis in my hip and I cannot use the stops at NE 65th Street and NE 55th Street because they are too far from my house. I have NO OTHER OPTIONS. I work at the University of Washington Medical Center and I cannot afford to pay for parking there. The LINK lightrail will not help me at all.	5/19/2015 9:20 AM
398	Eliminating the 71, 72, & 73 between the U-District & the transit tunnel will greatly affect my ability to use transit. I already work on a tight time schedule to ensure I make it to work early and can leave on time to make the first Sounder train south each day. Without frequent/reliable/quick service between the UW Tower and Jackson Street, I don't have the luxury of assuming I can make that train home. Due to child care restrictions of having a child in care 10 hours or less per day, I need to make these connections. I may end up driving every day to work to ensure I can pick up my child from care every day due to the lack of convenient service. Once light rail reaches the U-District at the UW Tower, I would revise my habits and probably take transit again.	5/19/2015 9:20 AM
399	Outside of the 372X route, I will have no other useful routes without having to make several connections. The Link Connections are basically irrelevant to me at this time. At least a mile walk to the nearest station, then another mile walk to get to my intended destination once departing light rail.	5/19/2015 9:20 AM
400	I love that there is a proposal to have the 372X run on the weekends, but I read that it will only go to Lake City on the weekends, which I think is a mistake. While Lake City does cover a portion of the normal route, that means it will not affect almost half the people who normally take that bus. If possible it would be nice if the 372 could do more of it's current route if it does run on weekends.	5/19/2015 9:17 AM
401	VERY supportive of new 45 bus - the 48 has been unbearable this last year. We need more frequent service from 4 - 5:30 pm.	5/19/2015 9:16 AM
402	No	5/19/2015 9:15 AM
403	Don't change my 12 bus route to/from work -- from Interlaken to 1st Hill. PLEASE!!!	5/19/2015 9:15 AM
404	Metro buses are dirty and dangerous. I would not consider riding buses because of the skanky passengers, grime and smells. I especially would not consider riding buses in Seattle at night. I've watched too many people in years past being harassed on buses by other passengers, or endured foul-smelling mentally ill people on buses. It's not worth it.	5/19/2015 9:14 AM
405	What about route 28x? That bus is packed all hours it runs and now you are proposing added more stops and making it a longer trip by going through Fremont before getting on Aurora? By extending this route you are not providing any service to those of us who live on the market st corridor between market and 65 without making a transfers to get downtown I for one know to will cause me to drive again as it would make the commute to downtown about 40 mins and I could drive it in 20.	5/19/2015 6:37 AM

406	<p>For residents of Meridian Ave N/ Kirkwood Pl between 56th and 65th the proposed changes to Route #16 would make our already-dire situation with the bus even worse. You are ignoring our feedback! 1. The proposed route for #16 won't go to Northgate, it will go to Sands Point. How many low income, disabled and elderly people need to go to Sands Point on a regular basis? Not many. 2. You're sending articulated, double-length, diesel buses down a narrow street, and now you want to do it EVERY SEVEN MINUTES. My neighbors have had car mirrors ripped off by the bus (twice) and once neighbor had an entire quarter panel from the front of their car torn off by the bus. Meridian Ave. is narrow between 56th and 65th. The city calls this part of Meridian Ave N. an "arterial" but it is not anything like, say, 50th or 45th. It's dangerous for bikes and pedestrians -- a lot of people walk down to Green Lake this way. 3. The #16 will no longer run down Aurora to downtown, it will go over Dexter Ave -- much slower for people going downtown. I will either take the #26 or I bike. 4. The buses run all hours of the night, even though the routes ostensibly stop at 1 am. The #16 bus routinely rolls through -- empty -- at 2 am and 4 am, presumably going to the bus depot. WHY IS THE BUS GOING PAST AT 2 AM and 4 AM? For those of us who live along this stretch and (like everyone else in Seattle) have no air conditioning, it is seriously noisy in summer when the windows are open. I'm sure the dB level violates city standards. It does not have to be this way. Was it your goal to force everyone along this route to buy expensive, energy-consuming air conditioners, because we cannot sleep? If a PERSON were doing this, we'd call the police! 5. Except for rush hours, the #16 is mostly empty during midday and evenings. We used to live on CapHill and the #10 bus -- fully electric -- stopped directly behind our house. It was quiet, and not a problem at all. And where I grew up (in NYC) smaller "feeder" routes used "jitney" buses (like the MS Connector buses) to get people from residential neighborhoods like ours to bus terminals -- nobody ran big diesel buses (much less double-sized articulated ones) through residential neighborhoods except for large arterial streets. This is just poor planning and fleet management by the city. Here's what I'd propose instead: - #16 continues up/down Stone Way across 45th and 50th and follows E Green Lake Drive to Ravenna/ bus stop at shop corner.. This takes people from downtown/Fremont/Wally to Green Lake, where the fields, courts and park are. It also goes past several retirement homes including the Hearthstone this way. Nobody wants to go to our little stretch of Meridian, and it is easy for those of us who live on this stretch of Meridian to walk one block over to Green Lake Way. - #16 turns on Ravenna and goes across to 65th to connect up to the new light rail station at Roosevelt. This lets people taking light rail get to Green Lake Park easily. The #16 then continues along 65th to Sands Point, completing that route. - The #26 runs along 45th to Meridian to 56th to serve Tangletown neighborhood, then across 56th and N on Latona (as it does now) then to 65th P&R => Northgate to serve people who need to get to Northgate. 56th is much wider than "Kirkwood Place" (what Meridian is called from 56th - 59th) or Meridian 59th - 65th. I think this makes a lot more sense and gets people to Green Lake Park and downtown -- and intersects with the new light rail station in a better manner.</p>	5/18/2015 10:12 PM
407	<p>Deleting the 43 will force me to get back into my car to go downtown.</p>	5/18/2015 10:01 PM
408	<p>I live at 75th ne & Roosevelt. Currently I use 66, 72 or 73 to commute daily from 75th NE/Roosevelt to SLU. The proposed bus routes completely removed the possibility of direct transport from maple leaf to SLU, as 72 being removed, 73 being shortened, and 66 being only available at peak hour and won't have stops in local streets. the proposed bus routes makes it not harder to commute to SLU but also hard to downtown from Maple Leaf/north Roosevelt. we cannot depend on the link train because: 1 the Roosevelt station is on 65th ave ne, which is too far for people I've beyond 75th ave ne, 2 the link station in Roosevelt and Northgate won't be ready till 2021, and this proposed bus routes will take effect next year.</p>	5/18/2015 8:55 PM
409	<p>The new 16 route is excellent. I will definitely use this route more than I currently do. Please make this change. Thanks.</p>	5/18/2015 8:39 PM
410	<p>I live in Mount Baker within walking distance of the light link and work at the NOAA campus on Sand Point Way NE. I'm disappointed that these proposed changes do not include a direct connection to the UW light link from the NOAA campus during peak hours. Montlake Blvd is one of the most congested roads in Seattle. At rush hour, transit from UVillage to the Montlake cut can take 20 minutes. A direct bus connection to the light link from the NOAA campus would allow for a meaningful transit alternative to this bottleneck. Please consider providing this direct connection.</p>	5/18/2015 7:41 PM
411	<p>Asking people to take two modes of transportation (bus and rail) between Downtown and NE Seattle might be a "turn-off" for some people, but if the trip was faster as promised, it might make transit more "people friendly." However, until LINK stations open in the University District (west of the UW campus) and in the Roosevelt district are open, these "ehnnancements" won't work for too many people. Also, where are stops for the the routes that are proposed to terminate near the station located near Husky Stadium going to be? If they're near the Medical Center, that's too far away for a lot of people--they need be a LOT CLOSER!!!</p>	5/18/2015 5:59 PM

412	<p>I live in Ravenna on the edge of Roosevelt (a block east of Roosevelt High School). The overall changes would be detrimental to my transit situation. I commute to the Eastside (Redmond) and to downtown. For my commute to downtown, in the current service pattern, I have: All day: 71X/72X/73X direct to downtown, frequent, from 15th and 65th NE. Peak time: 71X/72X/73X, as well as 76 and 316 further away. With the new changes, I would have: All day: 16 (which looks like it will be slower as it goes through Wallingford, the Fremont bridge, and Westlake to downtown). Peak time: 76 and 316. I will also have the option of taking a bus to Husky station and light rail from there. However the 48 which I would take is now further away onto Roosevelt, and this is still a 2-seat option instead of a 1-seat option. I know that in 2021 the Roosevelt station opens and we get a great 1-seat option to downtown, but I do not want to lose convenient transit to downtown in the meantime between 2016 and 2021. For my commute to Redmond, I can currently take the 542 and 242 at peak. The 242 being cancelled is a bit inconvenient for my Eastside stop but I see how it makes sense, and I can live with it. Off-peak, going to Redmond, I can currently take the 48 from 15th and 65th to the Montlake flyer stop and catch a 545 from there. With the new changes, I would take the 45 from Roosevelt (so 5 minutes further away) which would drop me by Husky station, then I would need to walk across the Montlake bridge (5 minutes at least) to the flyer stop to catch the 545. So this is less practical. I know one option under consideration was to have the 45 intertwine with the 271, providing a connection to Bellevue. This would be a great option, as I sometimes have to go to Bellevue, and also the 45 would then stop by the Montlake flyer station. I understand that Metro backed off on this idea after undoing the cut to the end of the 271 and being concerned about reliability. If the tail of the 271 could still receive service in a different way, and the 45+271 option was still present, it would be great. Thank you.</p>	5/18/2015 4:56 PM
413	<p>I am very excited about the improvement to route 67. I would use it to get to work at the U of W.</p>	5/18/2015 3:34 PM
414	<p>The destruction of all the continuous-to-downtown routes (66, 67, 71, 72, 73, 74 and 79) will have negative impacts on my twice daily use of the bus. The 79 should be restored to service because its unique routing (U District to South downtown business district via I-5, exiting under the Seattle Municipal Tower) ensured both a high/loyal ridership and an excellent short commute time. In its demise, I now regularly have to juggle 66-67-355 routes and 71-72-73-74 options via the bus app whose accuracy the county does not seem interested or able to improve. Replacing a single continuous-to-downtown route with 2 chopped up routes only succeeds in injecting a connection and resulting wait into every rider's commute. Add congestion and uncertainty about approximate arrival times to this and the result is: both longer commute times and dissatisfaction of riders will result. In these proposed changes intended to ferry light rail riders to the UW Husky station, there seems to be no awareness that traffic near the UW Husky station is already a mess; adding buses will make it worse. Trying to inject more buses into this corridor will only increase traffic and as a result increase commute times. There's little use in trying to ferry potential light rail riders to the station. It would be better to wait until the U District and Roosevelt stations are in operation before destroying all the neighborhood bus routes. I hope the county is planning a lot of stops on NE Pacific street for when riders get fed up waiting in gridlock and demand to get out of the bus and walk to the light rail station.</p>	5/18/2015 2:15 PM
415	<p>If I understand correctly that route 372x will be making more stops between NE 95th St. and NE 65th St., then this change makes the other proposed changes for NE Seattle very worthwhile. I was concerned that I would be out of luck for using busses in the NE Seattle area because it would have been more than 1/2 mile to any bus stop. If route 372x will not have more stops than it currently has between the above mentioned streets, you've left a huge gap in service area that will leave many without useful options for bussing. I am excited to see a frequent service grid emerge with this plan, and am grateful for it. Currently it takes 2 to 4 times as long to bus to Ballard than to drive, and I'm looking forward to having bussing to and from Ballard and similar areas become a useful possibility for people who live in my area. Thank you for all of the time and effort that has been put into this project.</p>	5/18/2015 1:21 PM
416	<p>I am quite disturbed by the fact that the bus routes 28 and 28x have been somehow lumped in with routes that service the University District and NE Seattle. The 28 is a NW bus route. Living in Broadview we already have to contend with the fact that we only have bus service during peak periods. I have learned to live with this, using the bus only to commute to work daily - I no longer use public transportation to go to Seattle for social outings or sporting events BUT by combining the 28 and 28x I will no longer ride that bus for work. The changes to the route will extend my travel time to downtown Seattle to an unacceptable length. I have already begun exploring other options and now I ride the 304 Richmond beach express.</p>	5/18/2015 1:00 PM
417	<p>I NEED Route 71. At age 80, 10 blocks is too far for me to walk to a bus stop, especially on my way home. Fortunately, I still drive, but many elderly and physically riders do not. We will be left without a way to get to the U District and downtown. There MUST be a route that follows the current #71 route. A close bus stop was important to me when I bought my home, and is even more important now, 15 years later. What are folks like me supposed to do? We are not employed, and need transportation to grocery stores plus downtown all days of the week, all day long. #31 is necessary for me to get to Seattle Center. Many changes will force elders and infirm simply to stay at home. HUGELY UNFAIR!!!!</p>	5/18/2015 12:43 PM
418	<p>Appreciate faster connections, just hope reliability and consistency also worked on. I often find I have to take an earlier bus since I don't trust that the bus I really need will come on time.</p>	5/18/2015 10:59 AM

419	Hi, I am reading your changes to frequency for the 316 bus however I do not see any changes in the times the bus runs. We ride the last 316 out of our area (greenlake, woodlawn and Latona) at 824am and the bus is always full. We, and many other riders would appreciate extending the peak times to accomodate today's work force who can arrive later and work later. If there were busses leaving the area until 9 or 9:30 and coming back from downtown until 7 or 7:30 that would be very useful and with the changes to the 16 bus I am sure they will be a much needed addition to a rapidly growing area (Greenlake). Thank you.	5/18/2015 10:40 AM
420	The number 16 runs in front of my house. I don't have anything against a bus system, but Kirkwood PI N is an awful street to have a large bus running up and down. It's too narrow. Cars have been scraped, mirrors have been knocked off, and animals have been killed. A bus and a car CANNOT both fit on that street. So to increase the frequency even more is ridiculous. Why not have that bus go down GL way? That's wide enough for 2 cars. PLEASE PLEASE reconsider this. It is so awful and so loud as it it. Thank you Julia	5/18/2015 9:37 AM
421	I personally like the increased busses planned for route 16 and want it to continue along Meridian as planned	5/18/2015 8:35 AM
422	I would very much miss the 25. I use it to get to Magnuson Park, to U Village, to my mechanic, and to the UW. If the 43 and 48 are the powerhouse buses that get me most everywhere that I need to go regularly, I still need the 25 to round out my usage.	5/17/2015 11:02 PM
423	I echo the concerns expressed by Doug and Judy Martin, neighborhood representatives (dated Dec 5, 2014, addressed to Mr. Kevin Desmond). I live on Kirkwood PI N where route 16 travels. I am in favor of moving the route off of this residential street to a route more suitable for bus traffic (how about Green Lake Way?)	5/17/2015 4:44 PM
424	Since I live just west of I-5, most of these changes will complicate my life with a probable steep learning curve and dubious improvement as I see a strong likelihood of needing additional busses to carry our simple errands	5/17/2015 1:36 PM
425	More direct transit opportunities from NE Greenlake to major hubs, particularly to Montlake/UDistrict, Capitol Hill, and Downtown.	5/17/2015 1:35 PM
426	Re:: changes to Rte 16, could you maybe just leave it alone? I've accepted the fact that Link isn't ever going to make my life any easier, but why should Metro make it harder? I often ride to downtown, but sometimes ride to Green Lake or Northgate. Hard to imagine that anyone wants to ride to Sand Point (which, of course, would mean that the northern end of the route would be cut). In case you've forgotten, people don't want to transfer between routes or transit modes. p.s. If I ever want to take my dog to the Magnuson off-leash park, we'll drive!	5/16/2015 9:43 PM
427	I live off the 71 bus route in Ravenna, and it brings me into the U District. Living across the street from this route has been so convenience, to get either to the Ave or to downtown. I am concerned that it will be more difficult for me to get to the ave or to downtown from where I am. I can go east/west on 65th street with the new 16 route which is good especially because it will run all day, but how do I get to the Ave? How do I get downtown? Many of these changes may be good but at the moment they will be a major disruption in my work commute, my socializing, and my general ease of using the transit system.	5/16/2015 8:14 PM
428	There needs to be a way to get from Ravenna to downtown earlier on weekday mornings. I have not seen anything written on proposed timetables for the additional AM RT 76 runs but the current 1st AM runs of the 64 & 76 routes barely (and sometimes do NOT) get me to downtown by my required start time of 6:30 AM. Local bus RTs as they currently exist take too long and the proposed transferring to Link will involve waiting for a bus AND again waiting for the LINK adding additional commute time (and cost??). Also, I would like to address the holiday schedules and especially the last week of the year schedule when Metro takes the first AM run of the 64 & 76 offline leaving no way to get downtown on time without taking a local that doubles my commute time. Why remove the first bus? Most people can go into work early but can't go in late, forcing me and fellow riders to drive for a week. If the new proposals will not add additional runs during this time, at least make a shuttle between the Greenlake P&R to downtown similar to the 41. Bottom Line: There needs to be an express bus run from Ravenna to Downtown and it needs to start earlier in the morning and afternoon and go later.	5/16/2015 3:35 PM
429	I am very concerned about the decision to remove the #43. Having to transfer to get from Montlake to downtown Seattle would be inconvenient and have more chances of buses being late. Because I ride non-peak hours, I don't consider the transfer locations to be safe options in the early morning/evening.	5/16/2015 2:26 PM
430	Since the 72 and 68 are deleted, the 372 should become a local bus between U Village and Lake City. There should be a clearly marked path between UW campus stops (Okanogan Lane, Garfield Lane) and the Husky Stadium Link station.	5/16/2015 2:23 PM

431	I didn't see any place to give feedback about the proposed axing of the Route 43. I absolutely reject the idea that substituting service on the east side of Capitol Hill on the 48 that necessitates a transfer in the U-District to the 44 is an adequate substitute for the Route 43. My late-night trips on the 43/44 are a convenient solution for me to get between the hill and home in Wallingford. Having to stand around the U-District late at night for unreliable transfers adds a lot of stress and time to my travels. I am hearing a lot of similar concerns from other users of this route, which is well used and can't be substituted adequately with any of the proposals Metro has put forth. Please retain the 43/44 connections.	5/16/2015 1:34 PM
432	The loss of the #12 bus route not only affects all of us who use it in the neighborhood, including people who could NOT manage walking up the hills for the 10 and or 43, but it absolutely affects St. Joseph's church and school, Holy Names Academy, The Nova School, Stevens Elementary School, and the Hebrew Academy. These schools NEED connections which are close by to protect the children attending them. They should be able to get to their schools readily and safely, whether in kindergarden or high school. The light rail does NOT make this any easier without the #12 bus. Please let us keep our reliable bus service that takes many to hospitals, doctors' offices and various shopping areas as well as work!	5/16/2015 12:56 PM
433	1. Transit riders from the Wallingford Avenue N. Corridor will need to transfer from route(s) 31/32 in Fremont for downtown service. Therefore sufficient capacity on routes 16, 40 and 28 will be needed to handle this additional capacity. In addition, there needs to be shelters at this transfer location to accommodate the additional passengers waiting during inclement weather. 2. The proposed additional service on route 16 will increase left turn movements from N. 35th onto Fremont Ave. N. This is currently a highly congested intersection because of eastbound general purpose traffic prevents buses from making the turn, causing missed signal cycles and huge traffic backups. For this proposed (and needed) service change to succeed, SDOT must fix this intersection with a transit-only turn signal phase, a right turn lane from 35th onto Fremont Ave N. or other solutions. 3. The walking connection between routes 31/32 to the University Link station must be addressed.	5/16/2015 9:52 AM
434	Please don't delete route 72, I take it to work every day.	5/16/2015 6:23 AM
435	The utility of Route 16 is completely destroyed by these changes to a route that has existed for a long time. I bought a house 22 years ago, in Wallingford, with a plan to age in place and not depend on a single occupancy vehicle when I am a senior citizen. The 16 provided a direct route to Northgate and Downtown for doctor visits and shopping. The 16 provided a direct route to entertainment and cultural venues, the Seattle Center, the main library, and Pioneer Square. The 16 goes directly to and from Colman Dock. Wallingford will soon have a permanent high school. When the Lincoln High School site was occupied by interim high schools, I saw the school band and athletes traveling to the Seattle Center. How are the ballerinas going to get to the Seattle Center? There are various small schools that transport groups of children on field trips on the 16. I always take my in-laws from out-of-state to see the sights on the 16. The proposed changes to Route 16 are a great loss of mobility to seniors, youth, and anyone who is happy to take Metro rather than drive.	5/15/2015 11:20 PM
436	Any additional service on 5th Ave NE would have to include a stoplight at the corner of Banner Way and 5th NE. When drop offs at the 65th Street Park & Ride in the p.m make the 4 way stop congested, the transit slows down for SO long in all directions. This is an ongoing problem the City has to face quickly before buses, bicyclists or pedestrians get hit.	5/15/2015 8:15 PM
437	Stoneway is far enough east I don't want to have to go the UW every time I want to Downtown or North.	5/15/2015 7:31 PM
438	I recommend that route 16 should run along the wider East Greenlake Way N than Meridian Ave N and Kirkwood Pl N. It should also continue along Hwy 99 instead of local streets.	5/15/2015 6:56 PM
439	The proposed change in 16 cuts service almost in half between Green Lake, Bishop Blanchet High School, North Seattle College, and Northgate - major transit destinations, and cuts service almost in half to downtown from between North Seattle College, Licton Springs, and North Green Lake. As a result, I will likely drive more. It reroutes frequent service to an east-west route between Green Lake and Sand Point. Although it will be very convenient to have this route, it will not be heavily used and could have much less frequent service. The result will be that 16 remains well used from downtown to Green Lake, but will be sparsely used between Green Lake and Sand Point -- this will leave empty buses for almost 1/2 of their trip. , a poor use of equipment, fuel, drivers time, and money. A better result would be to have an independent crosstown Sand Point to Ballard route via Green Lake at a frequency commiserate with its traffic.	5/15/2015 6:53 PM
440	I do not like that route 71 is discontinued. We need an all day route from this area to downtown Seattle. There are people who need to connect downtown with buses that serve areas that the light rail does not serve. It does not make sense to either take three buses to get to these areas or a bus, then light rail then a another bus. Three transfers are too much.	5/15/2015 6:38 PM
441	Bus 43 is very useful for transit from Montlake to Downtown and very reliable, it would be good to keep it.	5/15/2015 6:20 PM

442	Why in the world would you reroute 31 and 32 off of Stone way and via 40th to 34th and via Wallingford Ave? The 31/32 is primarily used by students and those who work at the UW. Stone way is growing rapidly with large scale condos significantly comprised of those who work and study at the UW. These busses are constantly full during peak hours. The south Wallingford demographics are single unit dwellings who work downtown. Lastly, the service downtown in Wallingford is not served well because it is the end of very long routes. This causes busses to be often full, off schedule or otherwise unpredictable. This is going to be exacerbated by the 16 starting even further away.	5/15/2015 6:10 PM
443	i dont care for having to transfer from bus to light rail to get downtown from maple leaf but if the frequency of the 73 and the new 67 are increased i guess it is an acceptable trade	5/15/2015 5:57 PM
444	How is one supposed to get from Portage Bay to the north end, to the UW, to downtown, especially if one is older and cannot walk a half mile to Eastlake transportation or a mile to Montlake? The 25 connects so many areas and is the only accessible bus in Portage Bay and parts of Montlake.	5/15/2015 5:20 PM
445	the problem is, the proposal is extremely hard to understand. I can't figure it out at all. I already don't use metro as I used to because of the reduced bus lines (route 16) and I can't understand what the new routes will do - it looks like there will be even less service on the North/NW end than there is now?? please make the proposal easier to understand, it's TOTALLY obscure unless you're an engineer.	5/15/2015 5:01 PM
446	The deletion of route 71 affects me badly. When the 76 is not available, which is most of the day, I will have to transfer at least once or possibly twice to get to the Roosevelt or Ravenna areas. There will be no direct service for my son to get to school at Roosevelt High school. Your re-routes of north and northeast busses through south lake union will cause serious delays on those routes as traffic is stopped in that area much of the day. Reliability will not be enhanced.	5/15/2015 4:37 PM
447	Have both 73 and 373 run on University Way and then 15th NE. If they are different and one is on Roosevelt, but still go to the same place, which road do i and wait at the bus stop for?	5/15/2015 3:41 PM
448	From my reading of the proposal, existing commuters on 72/73 will have to use 73 -> transfer to rail. It wasn't clear how long these transfer times would be or how close the 73 will actually be to the rail station (walk could be up to 1/2 mile?). This worries me.	5/15/2015 3:24 PM
449	Do not change route 16 in green lake area because people who want changes in route do not use the bus anyhow, they drive their cars. However, for people who use the bus would be farther away from bus stop, including senior citizens. Thank you.	5/15/2015 2:39 PM
450	I like the idea of bus 373X using 15th ave NE instead of University way NE.	5/15/2015 2:07 PM
451	Eliminating all bus service between the U-district and downtown except for route 70 is crazy. It's a good idea in 2021 when the U-district light station opens, but it's too soon in 2016. The UW stadium station is too far from where everyone lives in the U-district to reduce bus traffic by as much as your thinking in 2016. I like the new campus loop the 65 makes.	5/15/2015 1:50 PM
452	One of my biggest complaint is payment and connecting with another route. I do not like the idea of paying metro, then transfer to light rail and pay again. I believe some of the changes will effect the elderly and riders with disabilities.	5/15/2015 12:45 PM
453	How keep a schedule on a DART route like new 941? How be sure to connect with LINK station in time?	5/15/2015 12:25 PM
454	I'm concerned about the elimination of the 68 bus route and service along the 75th/25th Ave. corridor. Many college students and UW staff live in this area and ridership on the 68 bus is high during commute times. Also many Eckstein Middle School students rely on this bus route to get to and from school and will now have to transfer from the 16 to the 67 or 73 to access Maple Leaf/Northgate neighborhoods. Also, there are fewer Northeast neighborhood routes that will access the UW campus. The 67 no longer runs onto campus and 75 primarily serves Sand Point/Lake City. The 373 will continue serving the dense group of students living near U Village and Lake City, but does not serve neighborhoods directly north of campus. The new 73 route may help backfill the loss of the 68 but it does require more walking for residents who live near the denser areas along Roosevelt. The other area of limited bus service is Nathan Hale High School, which is primarily accessible via Lake City Way (75, 373) and 35th. Nearly all the students in the reference area are considered in the "walk zone" even though that zone includes steep hills, few sidewalks and crossing high volume arterials, such as Lake City Way. This might be a prime area for a DART route that just runs during the peak hours of school access and provides a safer option for students (many of whom have instruments and bulky backpacks). Encouraging more transit ridership would also help relieve car congestion around the school.	5/15/2015 12:04 PM
455	I do not think Metro 43 should be eliminated.	5/15/2015 11:29 AM

456	The deletion of route 43 would result in a longer commute for me as I live on 24th & E. Roy St. I could need to take the 11 or 12 which are a much longer walk. I may need to drive downtown if the 43 is deleted. Thank you	5/15/2015 11:28 AM
457	I support any alternative that provides more direct service between link light rail at Husky Stadium and NOAA's Sand Point Campus/Lake City via Sand Point Way.	5/15/2015 10:54 AM
458	Don't change the 11 bus route to go down Madison. I live on 23rd and work on Pine. I use the 11 to get to and from work every day, and under the new changes, it would be much less convenient for me to take the 12 instead. I have to go so far out of my way to get to and from each bus stop, I might as well just walk. The 11 bus is crowded with Madison Valley/CD/East Capitol Hill dwellers like me who are in the same situation, and I am sure none of them would be happy about this change either. We need a convenient way to get to Pine/Pike, both in Capitol Hill and downtown. If anything, you should make the 11 run more frequently on the same route.	5/15/2015 10:49 AM
459	It is absurd to cut bus service in the Portage Bay-East Lake area. At a time when we are trying to get people out of their cars you have been doing everything to put them back in their cars. The distances between bus stops are much too long' busses don't have clocks installed so that riders never know if a bus is on time or not. I have lived in European cities and have never needed a car because of the innovative public transportation. Rome has small busses that go to off beat neighborhood, busses and trams in Amsterdam, rome, Paris and every other Italian, French or Dutch city run frequently. Many as often as every six minutes. The cost of pollution should be taken into account as a cost we will eventually pay and it might be better to charge a veery low fee for bus service so we will not have to pay a very large tax for cleaning up our air. We need progressive, forward thinking people to run public transportation. Thank you for reading this	5/15/2015 10:38 AM
460	I suggest moving the 373 to match the routing of the new 73.	5/15/2015 10:34 AM
461	I think many of the changes make sense and will be an improvement, but only in areas that already have adequate bus service. The Lake City neighborhood is conveniently left out of these proposals, and as one of the most low-income communities, filled with residents who rely on public transportation every single day, that is unacceptable. Lake City is obviously not a destination for most people to try a new restaurant or bar, and that is unfortunate. However people still live and work in this neighborhood and need adequate service!!! I work at a nonprofit organization in Lake City 40 hours a week. It's not my home but I consider it to be a neighborhood that I care about. Deleting the 72 route will be a huge blow to the many people who rely on it here and who don't happen to live as close to the less convenient 372. The majority of UW students have the luxury of living close to the routes that will be maintained should this proposal goes through, but not everyone who lives in the U-district is a student or has that luxury. It is one of the few affordable places left in this city, especially for single people to find housing, and that should go into consideration. Those of us without personal vehicles who need reliable transit *throughout* the city should be thought of and prioritized rather than those who only use transit when they want to go downtown, or to Centurylink, without having to park their cars. It's great that there will finally be new light rail stations in Capitol Hill and at the Husky Stadium, but it's not enough, it will not be as convenient (the Stadium station in particular). These changes are too much too fast, and you're a little too eager to give yourselves a pat on the back to say the least. I sincerely hope you will weigh all of the available options and consider my perspective.	5/15/2015 10:32 AM
462	Your proposals do not deal with people in Madison Park who just want to get to Downtown Seattle. To transfer to another bus on Capital Hill further delays the journey and is not realistic.	5/15/2015 9:48 AM
463	The north Seattle changes look great.	5/15/2015 9:45 AM
464	Routes 71/72/73 have become extremely crowded at certain times of the day, from Univ. Way southbound - also sometimes at night from downtown northbound. I do not understand why this extreme crowding has occurred, except that it may reflect a greatly increased number of students at UW? I am sometimes concerned that this might be dangerous; if the bus has to stop shortly, dozens of people would fall forward onto others, and many could be hurt. Drivers are now asking everyone to move back, move back "Squish in" one new woman driver is saying - but this packing of buses might be 1) overweight (is there a law on maximum weight?) and 2) dangerous in case of accident or sudden stops. I think Metro needs much more frequent bus service at all times, to avoid this overpacking of buses. Also my problem has been long waits downtown in Westlake, for 71/72/73. Service from Westlake in the tunnel northbound is not nearly often enough. I have given up waiting, and I now use 66 and 512 only (the past four months. I never wait in the tunnel at Westlake - I only use it southbound. You should look at the crowds waiting to go northbound in the tunnel. I hope your changes are accounting for these problems and issues. Lastly: I have complained that the C route on the Viaduct and the bridge, are way too fast. That improved for a week, but again the C drivers are going over the speed limit. This might have disastrous consequences in case of accident due to bad weather, MOTORCYCLES, speeding cars, etc. METRO buses cannot exceed the speed limit. Watch for that, I'm serious.	5/15/2015 9:38 AM
465	You have put a lot of good thought into this. BRAVO	5/15/2015 9:19 AM

466	The elimination of Route 71 will impact about 95% of my current bus use. Currently my trips are simple, with at most one transfer to reach my destination. With your new system I will have to transfer up to three times to reach the same places. Even with more frequent trips I cannot imagine that this will be faster. In some cases I will no longer be able to reach my destinations at all by transit and will have to eliminate many activities, negatively impacting my quality of life and my health. It seems to me that these changes mainly benefit people who work downtown and only use transit for that purpose, and will hurt the vast numbers of us who use transit for other purposes.	5/15/2015 9:05 AM
467	I think that the 45 should run more often. I don't think that splitting the route will make much of a difference to how busy it is because if someone needs to ride the entire route, they're still going to get on the 45 and then transfer. I think that if the 48 is going to run more often on its new route then the 45 should run more often as well.	5/15/2015 8:37 AM
468	Route 26 is the ONLY route to downtown that services Wallingford. I will have to walk over a mile to Fremont to catch the nearest bus to get to work if the proposed changes take effect. A route that services Wallingford Ave to Fremont is required, the proposed changes to route 26 will remove the only transit option in the area. If the 26 and 26X are combined (a good idea as some people, including some metro drivers, think the two routes follow the same path) then the route that the 26 local currently services will need to be covered by some other means.	5/15/2015 7:51 AM
469	Right now I live one block from Route 66 which I take to Fred Hutch or downtown Seattle. The ride takes no more than 20 minutes. Your proposed changes would make it very difficult for me to reach the same destinations. When the Link Light Rail at 65th and Roosevelt opens, I see that as a good possibility for public transit. But I believe that will not happen till 2021. Why change things so drastically at this point?	5/14/2015 11:09 PM
470	I'm concerned that the proposals to combine routes 28 and 28X are not addressed in this survey. The change will result in no bus from Ballard to Fremont or South Lake Union neighborhood from Ballard. The literature is unclear where the combined 28/28X stops are going to be. Today, the 28X doesn't stop beyond 8th and Market. Since it will now be going down 8th to Leary then up 39th, will it make any stops along the way to connect to e.g. the 40, so I rider can get to Fremont or South Lake Union? I need more information in order to make an informed opinion and request Metro provide more detail of this bus change to the public. I think it's disingenuous to hide the change to this bus route beneath improvements designed to improve access to Link Light Rail.	5/14/2015 10:41 PM
471	I am NOT in favor of the deletion of route 242. I would accept the changes if route 542 was extended to Northgate TC (some or all trips).	5/14/2015 10:27 PM
472	The proposed changes to the 28 and 28X would have a significant negative impact on transit use. Using the same bus number for buses that terminate in two locations would make riding the bus more confusing. Currently the 28X runs every 10 minutes at peak times and is usually standing room only by 65th street. Having it extend further south before expressing will only make the crowding worse. It will also make the trip take longer. (From far northwest seattle, there are no fast connections to south lake union and downtown.) The 28 also currently provides stops in Fremont and South Lake Union, two major employment centers. These stops will be eliminated by making all runs this "pseudo-express" The proposed changes claim to use Seattle money to improve the buses, but the only difference is going from 20-30 minute peak headways to 10-30 peak headways on the 28. Since the 28X already has peak headways of about 10 minutes, this looks like a reduction in headways. With the lengthier trip on the 28x, this would be longer trip for no gain. BETTER PLAN: Use Seattle resources to extend 28 back to broadview for all regular service. This will provide the critical link between northwest seattle neighborhoods that is currently missing. (The current routing requires longer walks + two additional transfers.) Update the 28X to stop at every other stop along 8th Ave NW. This will speed up the runs and allow for faster, more reliable trips.Add additional runs on the peak-hour 28. This will provide additional coverage for the skipped stops and provide the service to Fremont and South Lake Union. ALTERNATIVE PLAN: Have the 28 continue down it's 3rd NW routing to NW 145th and then continue down 145th to I-5 to Stewart and then down to its downtown routing. This would add the missing service on 145th and allow a fast trip from far northwest Seattle to downtown. This could then be the all-day routing with the a "local service" and an "express service" built into the same route.	5/14/2015 10:13 PM
473	The loss of #71 between View Ridge to downtown is potentially a major disruption as it is an artery to downtown. My wife and I find this a real life-line since parking downtown is so difficult and when we really need to get downtown this is a reliable bus line. It is especially useful since it operates in the evening. The new #16 goes to where I work on Westlake Avenue so this is a bonus (since the #30 was discontinued). I am thinking the #16 could take a long time getting from NE Seattle to downtown though. The new #941 van is only proposed to come once an hour and not at all in the evenings. This seems not frequent enough. Plus the schedule seems unpredictable since there will be stops in the DART area which add uncertainty. Linking NE Seattle to the new light rail station at the University would seem like a priority.	5/14/2015 9:30 PM
474	It appears that the removal of the 71,72, 73 lines as they run today is done just in order to increase the ridership of the light rail until the station at 65th is completed. I think that this is an artificial move that makes for a lengthier commute and would backfire.	5/14/2015 5:52 PM

475	The community of Montlake seems to be getting worse service through all of this. Right now, I have the option of taking either the 25 or 43 downtown (and points in between). With the new proposal, I would have to take the 48 away from downtown to the light rail which would backtrack my route to go downtown. If I want to go somewhere on Capital Hill such as Group Health, I would have to take the 48 to the 8. And if I want to get to Fairview Ave, I would have to take the 48 to UW to pick up the 70. It seems that for every place I want to go, where I can get to with a single bus today, I would need to take either 2 buses or a bus and train, often heading away from my destination. All in all, this will significantly lengthen my trips and I'm going to end up driving more than I do today. In fact, I think getting on a bus or train will become the exception for me instead of my first choice like it is today.	5/14/2015 5:49 PM
476	Increasing the frequency of route 70 might not actually help during peak evening hours- the problem is that it gets stuck downtown, and no matter how many trips it should be taking, they will all get stuck, together, downtown. The problem will still exist: no buses will pick people up. I propose a reroute of 70 away from any traffic snarls downtown and in SLU so it can efficiently get to eastlake bordering south lake union; this way, SLU bussers can walk to the stop and actually take the bus through eastlake in a timely manner.	5/14/2015 4:47 PM
477	Please do not eliminate route 25. As light rail starts up on Capitol Hill and the UW, it will be more used. For instance, we live near Roanoke Park. It's 1.5 miles uphill to the Capitol Hill rail station, and 1.5 miles downhill to the UW station. We need a bus which will at least enable people to reach the US station area.	5/14/2015 4:21 PM
478	Looks like a reasonably well-thought-out proposal, thanks for taking the time.	5/14/2015 3:07 PM
479	I take the 72 bus to get to and from Lake City everyday for work. It seems to me Lake City is being completely ignored in this entire process and cut off from much of the rest of the city or at least where I currently live. None of the changes to other routes, such as 372, are viable alternatives to the current 72. While the 372 goes near my work it goes nowhere near where I currently live in the U District. I will be forced to move, get a new job, or purchase a car under the current proposal. I don't understand the complete ignoring of Lake City or understand Metro's jumping the gun on transit six years before it arrives where people actually live as opposed to a stadium.	5/14/2015 3:05 PM
480	Thank you for listening to the community and I really appreciate the service to connect the new Link station with Seattle Children's.	5/14/2015 2:53 PM
481	Many older people have mobility issues, and would absolutely need bus service close to light rail.	5/14/2015 2:52 PM
482	I really need reliable all day service from downtown (not First Hill) to the Greenlake park and ride. Nothing in this proposal seems to do that. Having to transfer from the link station to another bus or walk from 15th down to the park and ride doesn't help. There are many many occasions on which I end up driving downtown during the week because I know I'm not going to be able to quickly get a bus back to the Greenlake park and ride mid-day.	5/14/2015 1:19 PM
483	You propose to eliminate the only TWO ROUTES I USE: 25 and 43. How do I get downtown? Montlake seems to have been left out of your considerations. My important routes are to the University Meany concerts and downtown. Do you expect people to transfer all over to make these simple trips? PLEASE RECONSIDER. What about smaller vehicles?	5/14/2015 1:07 PM
484	We live around 19th NE and NE 77th, and the elimination of the 72 & 68 routes would be devastating for us. We are both retired, and my wife is legally blind. We now can walk a block to get to a bus, but now will have to walk five blocks in either direction, negotiating some very steep hills. Metro has tried to kill the 68 & 72 routes many times over the years, yet both remain packed. The 68 bus in fact often has to pass people up at some stops. I don't see what this has to do with Light Rail, which won't be available for another six years. As for mobility needs, since the Roosevelt Light Rail station will be such a long walk for us, and there won't be any buses stopping near our house any longer, how about some circulating, "hop on, hop off" small shuttles with no fixed stops or schedules, designed to help users get to and from the Roosevelt Light Rail station?	5/14/2015 1:05 PM
485	Still need better connections between NE Seattle and UW link station, meaning routes that go from Sand Point, View ridge, and/or Hawthorne Hills to the station via Montlake. Without this link, transit will take much more time than driving either to downtown Seattle or to the East side. Not sure how to make this possible, but there needs to be more park and ride options near the 520 bridge and/or the UW link station to reduce car dependency. Thanks	5/14/2015 12:21 PM
486	I am concerned about safety issues along 45th Ave NE, especially between NE 65th Street and NE 55th Street. This is a relatively small road that gets smaller with parked cars on each side of the street with a lot of cars. Several years ago the City installed a traffic circle at the intersection of NE 62nd Street and 45th Ave NE, largely in response to the communities complaints about speeding traffic. This is also a popular bike and walk path so there are vehicles moving at a mix of speeds. As an alternative, I suggest traveling along 40th Ave NE which would add easy connection to a City park and two grocery store, and allow easier connections with Route 65.	5/14/2015 11:52 AM
487	I am concerned that the new proposals for 16 and 26X will result in overloads of 26X buses at Stoneway and 40th, when passengers from the north and heading downtown get off there to transfer from the 16 to the 26X. Has this important transfer point been considered in the planning for the changes to these routes?	5/14/2015 11:43 AM

488	I live in North Capitol Hill and commute to UW. I also use the 12 to get downtown. The 12 is supposed to come every 5-15 minutes but every half hour one of the buses just doesn't show up. So this should be changed to really reflect what you say in your promotional materials. As I commute to UW I currently use the 43 and the 48 interchangeably. I like having two different lines in case one doesn't show up or is delayed. Right now, during the school year, these buses are crowded at the end of the day. I am scheduled for knee surgery and cannot stand and be jostled during the bus movement. I must have a seat and I have had to ask a younger person to relinquish his seat. The buses should not be so crowded but nothing in your proposed changes talks about relieving the overcrowding.	5/14/2015 11:42 AM
489	Please retain Route 25, or provide something similar. The 25 allows riders to easily get to Eastlake and the University Link station and bus transit hub. Route 25 is one of the few routes that serves the residences between the two north south corridors of Eastlake and 23rd/24th and the University, as well as providing service to University Village and Children's Hospital. It also runs right past my home, which I appreciate. I anticipate using it more as I age and eventually give up my car. Please consider that there is plenty of North/South service (thank you!) but relatively little East/West service.	5/14/2015 11:30 AM
490	The 43 was the most convenient route from E of I5 up through Capitol Hill to DT. If I was coming from W of 15 on the 44, sometimes the 44 would change into the 43. The commute took less than 30 minutes. It was wonderful. Without the 43, there's only the 48 that goes up 23rd and people would have to transfer on the 8 to ride through Capitol Hill to DT. The 48 would get over crowded. I am currently a morning and evening commuter and I take the 48 or the 43. Both buses are crowded/standing room only. It would be a HUGE mistake to eliminate the 43!	5/14/2015 11:26 AM
491	Please continue to route 540 through Kirkland park and rides.	5/14/2015 11:17 AM
492	My concern is that service on 25th connects through the transit area on the ave rather than providing dropoff or pickup at 25th/montlake. I am concerned that there is less of a direct route north or south. Furthermore, connection to Northgate is now more challenging.	5/14/2015 11:05 AM
493	I like a lot of the proposed changes & think they will definitely help improve and increase transit usage in NE Seattle and some in NW Seattle. I think the more routes that connect efficiently through the University Link the better.	5/14/2015 11:04 AM
494	I do believe that splitting the 48 is an excellent idea. Having the 45 start and end north of the Montlake bridge (at the Link station) will be the single best thing that will help this bus's reliability. The idea to reroute from Greenlake using the old (65th to 15th to Pacific) to the new (65th to Roosevelt to Ravenna to University Way to Pacific) is my area of concern due to heavy traffic during rush hour (morning and particularly in the afternoon). I just want to be sure that you have considered three things: 1) Will flow out of the U District on University Way during rush hour be slower due to the 1 north-south lane than it is on 15th with its 2 north-south lanes? 2) Will westbound buses in the 5-6pm slot find it easier to turn left from 12th to 65th than they do now from 15th to 65th? I hope so, since this is a real bottleneck. 3) Will all of the students who ride the 48 now up 15th to housing between 50th and 65th be well served by the route changes? I cannot figure out what will be left heading north on 15th past 50th in the new configuration, except for the 373X, but perhaps the idea is to have them ride up University Way instead. There are many riders heading north from campus and the U District during the afternoon rush hour, using buses on University Way and 15th Ave NE. Campus stops along 15th Ave NE from Pacific to NE 45th have been renovated in recent years and accommodate many riders with shelter and a huge sidewalk. Moving over to University Way would not provide nearly as much shelter, or space, would force people to cross the busy 15th Ave NE, and would bring people closer to all of the crime and marijuana smoking that occurs on University Way. With the changes to routes 71,72,73 and 48, it seems you are eliminating too many north-south buses and are asking them to travel on University Way instead of 15th. Please consider having the 45 continue to travel on 15th to 65th. Otherwise, I think University Way could become extremely congested with buses and have overcrowded sidewalks during the evening rush hour.	5/14/2015 10:57 AM
495	I support frequent bus service from the Link stations to the surrounding neighborhoods (hub and spokes). Frequent bus service means moving away from the heavy articulating buses which cause costly wear on the roads and increased use of smaller buses. My experience on transportation systems in other cities is that riders like (1) a readerboard counting down the arrival of the next train/bus and its route number, (2) simple on/off procedures for buses so it's clear which doors to use, (3) utilitarian seating, enough bars to hang on to when having to stand, and wide enough aisles to accommodate people getting on/off as well as those standing. Move away from paper schedules and provide real-time information at the Link stations and bus stops on train and bus arrival times for connections. My observation in other cities is that Seattle bus stops are spaced relatively close to each other--perhaps necessary given the climate and hills--but for the most part people in other cities walk farther between their connections.	5/14/2015 10:45 AM
496	Please improve connections to Fremont from all parts of town, especially downtown/Belltown/Q. Anne.	5/14/2015 10:31 AM

497	Routes 71 and 68 are the buses that I always take. THEY ABSOLUTELY SHOULD NOT BE DELETED! I can't imagine how people who live in NE Seattle would get downtown or to the U District without the #71 bus! I take the #68 bus to Northgate all of the time. I catch it at NE 60th St. and 25th Ave N.E. This will be gone! I am very upset. I am turning 70 this year. It is really not realistic for me to have to walk 10 or 20 blocks just so I can take a bus!	5/14/2015 10:28 AM
498	I encourage you to reinstate the 45/271 through route. This would be beneficial for those in Northeast Seattle that need to get to the east side, i.e., transfer from the 16 to the 45/271. I also encourage you to re-route the 271 to serve Evergreen Point, and thereby avoid the frequent backups on 84th Ave. Thank you for the good work.	5/14/2015 10:18 AM
499	I work at the Hearthstone retirement Community where many of our residents use #16 & #48 to go to Northgate Mall and medical appointments on Meridian. The proposed changes, although fine for me personally, would be a burden for those with limited walking ability where 2 blocks is a long way. You might argue that they could use Access which would take them door-to-door, but Access adds hours to their trips.	5/14/2015 9:52 AM
500	Do not delete the 72, especially in early mornings. People depend on this route for an efficient way to work in the South Lake Union/DT area. Eliminating this early morning service will leave some North of the U-Dist without an efficient bus route nearby or will add to a longer commute when having to switch to the 70 etc... Could you add a early morning 70 to the Lake City Area to make up for this deletion?	5/14/2015 9:26 AM
501	The residents of Meridian Ave. N between N 64thSt. and N 56th St. are TOTALLY AGAINST your plan to increase service on the #16. Our street is TOO NARROW TO ACCOMODATE THESE LARGER BUSES!!!! If you add more buses every 7 minutes we will have a huge back up of oversized,loud busses sitting on our street!!! WHATS THE MATTER WITH YOU PEOPEL WHY DON'T YOU COME AND LOOK AT THE STREET! THESE BUSES ARE TOO LONG, TOO WIDE AND TOO NOISEY FOR A RESIDENTIAL AREA!!! YOU ARE CHANGING EVERY ROUTE EXCEPT THE ONE THAT WANTS TO BE CHANGED!!! The buses constantly are hitting cars, taking off rear view mirrors, speeding down a narrow street with many children on it, as well as keeping everyone awake night and day, with the loud engine noise right on top of us! There is absolutely no reason why the bus can't be moved to Green Lake Way, the street is wide enough to handle those buses! Please start listening to us and make the wise decision to move these huge buses off a route that they obviously have outgrown!!!!!! The people of our neighborhood are willing to walk several blocks to catch a bus and then be able to come home and sleep through the night undisturbed! We have a wonderful, caring neighborhood of families and look out for each others children, we deserve some peace and quiet in our neighborhood. Not to mention the fact that you are causing damage to our homes with shaking that is happening with these bigger buses, the foundations of our homes are in danger of permanent damage!!! Please listen to us and do the right thing! Judy and Doug Martin	5/14/2015 9:15 AM
502	Frequency of the 16 bus through the neighborhoods of Greenlake and Wallingford is of great concern. There are many proposed alternatives to increased frequency on this route in Greenlake and we have been told that the routes 70year history through this area is the reason it is staying. We have documented bus collisions with numerous parked vehicles, damage to personal property, excessive noise pollution from bus frequency and an overall dissatisfaction with Metro's response to our communities concerns. While some routes are getting moved OFF of surface streets, the 16 is increasing is frequency. This is unacceptable. We propose a shared route system where other suitable routes are considered for 3-5 year durations. Why not give the residents a break from the constant bus traffic. Let us all bare the burden of the noise, accidents, house devaluation., etc. increasing the frequency of a low passenger 16 route is not the right solution. Let's develop and grow together and consider intelligent alternatives to outdated ideas.	5/14/2015 8:38 AM
503	I live near 85th N & Ashworth Ave, just north of Green Lake. With the changes to Route 16 & 48, I would no longer have direct access via bus to downtown or to Northgate, except when some express busses run or unless I make transfers. Other than express busses there would be no local service for me, except to UW. Please reconsider doing away with the transit between Northgate & downtown via the current route 16. Why can't you leave 16 the way it is and add, or revise, another route for the Sand Point to Green Lake?	5/14/2015 8:35 AM
504	Please keep 71, 72 or 73 to downtown. This proposal would eliminate 3 route options for my daily commute	5/14/2015 7:53 AM
505	You are destroying a single family neighborhood by increase the number of trip of the Route 16 thru Greenlake. Your proposed increase from 3 to 7 trips (or 6 buses to 14 buses) per hour on narrow streets puts children and families on this route in danger.	5/14/2015 7:42 AM
506	The Proposed All-Day Routes Map is almost impossible to read on the computer, it is so small and busy. I needed to pull out a magnifying glass to understand anything. Can't you break it up or put in a way to enlarge an area? Please consider improving coverage at Hallar Lake by having one of the 345/346 buses turning right at 122nd st and Meridian and the other turning left to go around the lake. Then they can meet up at 128th and Meridian and continue on their routes. Just a small changem shouldn't affect schedules, but will GREATLY IMPROVE CUSTOMER SERVICE AND METRO COVERAGE OF THE AREA!	5/14/2015 7:17 AM

507	moving the morning time of the 73 to 6:00 am greatly affects my neighborhood as we have several residents that work for UW medicine and this would affect our work hours	5/14/2015 6:07 AM
508	I thought maybe the 255 would run to the train station at UW more often especially on weekends when bus service from the Eastside to downtown Seattle is sparse.	5/14/2015 1:59 AM
509	I really like the proposed route 16, and the frequent route 65 service to the University Light Rail station along 35th NE.	5/13/2015 11:20 PM
510	Routing a number of bus routes heavily used by UW-Seattle students on Montlake and Pacific instead of on Stevens Way is going to make connections less reliable, not more, particularly during rush hour when Montlake Ave. gets EXTREMELY backed up. For example, when Pend Oreille Road was closed for a week during spring break, what is normally an 11-minute bus ride between NE 65th St. and the Stevens Way & Garfield Lane stop on the 372 became a 25-minute bus ride because of backups on Montlake. I strongly strongly strongly encourage you to reconsider routing the 372 and 65 away from the main campus route. Even though the proximity to other transit stops along Pacific (at the UWMC) and the light rail station would indeed have benefits, the unreliability of travel along Montlake is going to cause more delays. If you must make this change, at least preserve route 68 through campus so students living along the 25th Ave NE corridor (of which there are thousands) can still have a somewhat reliable connection to campus. Or, split route 372 into two versions, one that goes down Montlake and Pacific, and another that goes through campus along Pend Oreille Rd. and Stevens Way, and let travelers decide which of the two routes best serves their needs. Routing these buses ONLY along Montlake is, in my opinion, unacceptable for UW students and for those needing reliable connection times to buses towards East Side.	5/13/2015 10:26 PM
511	I appreciate your decision to keep the 73 alive. However, I still don't like two things about it. First, you tout the change as "more frequent services" while changing the start hour from 5 am to 6 am, which would inconvenience those who need to start work early. The start time should remain 5 am. Second, you removed the weekend service. I strongly ask that you reconsider this decision and retain the weekend service. Even every 30 min. on Saturdays and every hour on Sundays would be better than nothing. Thank you for reading.	5/13/2015 10:15 PM
512	I wish the 542 would run a little later than peak times in the morning so I could volunteer at my daughters public school and still be able to take a bus to work at Microsoft.	5/13/2015 10:08 PM
513	preserve the existing 32 as is, and preserve the section of the 66 between Downtown Seattle & the REI on Eastlake As-IS!!	5/13/2015 9:36 PM
514	Please reconsider the routing of Route 70. In Alternative 1 route 70 terminated at the University Link Station and gave Eastlake residents access to light rail. In the current scenario Eastlake is completely cut off from light rail and always will be. Connections to the heart of the UDistrict aren't terribly useful when better services exist in both South Lake Union and Downtown. Perhaps access to local markets could be solved by having the 70 terminate at University Village which would allow it to serve the Link station and give Eastlake residents more shopping options. Overall the proposed changes would probably cause me to drive more.	5/13/2015 9:26 PM
515	I like the additional late night and weekend service for 372. I think that is very important to connect the University of Washington and 25th Ave NE Stops. I also like the new route 16 that runs along 65th st. That is a huge improvement. I think the frequent service along these major streets is so important!	5/13/2015 9:09 PM
516	Please keep route 72 and 73 the same. This proposal would eliminate 3 route options for my daily commute to downtown seattle	5/13/2015 9:09 PM
517	Please keep 72 or 73 between northeast seattle and downtown. New changes would eliminate 4 route options that I could use to commute.	5/13/2015 9:00 PM
518	Optimize connections between Stevens Way and the UW Light Rail Station. Routes 75, 48 will function, but it would nice to see a route that travels along Stevens, turn onto 15th Ave NE, and then on to NE Pacific St, so that the campus can have convenient connection to the Light rail station.	5/13/2015 7:54 PM
519	The 73 should loop all the way to the Light Rail station at Husky Stadium until the UW Tower Light Rail Station opens, otherwise it's rather pointless to have it terminate short of a connection where people once could ride it all the way downtown from as far north as Jackson Park! Also, if the intent is to make one set of changes to routes now rather than small changes now, and then again in 2022 when more stations open (Cap Hill), then why isn't there a focus on having smaller and more frequent bus runs to the new stations opening in Northgate (or, at least, make sure that the routes that would connect to the light rail there would be synchronized with the light rail schedule.)	5/13/2015 7:54 PM

520	I live in the Broadview neighborhood. I purchased my house prior to the deletion of the Metro route 28 on 3rd Avenue NW and 8th Avenue NW north of NW 125th Street. The continuation of only peak period limited service to the Broadview neighborhood does not serve my needs or the needs of my area. For me to support any current, or future, changes of Metro Bus service will be difficult since my neighborhood has no bus except peak period service. Bus service in the Broadview neighborhood north of Carkeek Park is what I and my neighbors, to use bus service. I would use the bus service regularly if the 28 travelled north of Carkeek Park.	5/13/2015 7:46 PM
521	Please don't cut service to NSC at North Gate for the 16. This proposal does not serve that need and takes away the only bus that travels along Green Lake that takes that route.	5/13/2015 7:32 PM
522	The current system serves my needs perfectly, allowing me to get between Wedgwood and downtown, and Wedgwood and the U District, on one convenient bus. With these changes I will have to transfer at least once per trip to get downtown, and perhaps more than that to reach the U District business area. This will save me neither time nor stress, and will probably cause me to curtail any evening trips for the sake of my personal security. This was not what I envisioned when I voted for Prop. 1, and causes me much distress as I was hoping for more usable transit, not less, as I age.	5/13/2015 7:03 PM
523	You say to merge the Link Light Rail with Metro you need to modify several routes. I see this as a way to force, not entice citizens of Seattle to ride the light rail system when it finally gets completed. I was not one of the citizens who voted to tax our vehicle registrations to support Metro, however, since this socialistic method of fund raising was enacted, then why are we not seeing that money (\$240 from myself alone) used to supplement the existing system rather than revise existing routes and force our people to take multiple rides to reach the same destinations?	5/13/2015 6:54 PM
524	I think that sending Route 67 down Roosevelt in Maple Leaf is going to cause traffic problems because the buses will be running every eight minutes, and Roosevelt is one way in each direction because of the bike lanes that have been installed. There is no where for the bus to pull over so traffic is going to be constantly congested and backed up worse than it is now on Roosevelt. Roosevelt is already a very busy north-south route and adding eight buses an hour in each direction isn't going to help matters any. Also, taking a useful bus route (i.e. 66 and 67) off of 5th Avenue NE is going to impact everyone that uses those routes, especially the people that live west of 5th Ave NE. I personally cannot walk over to Roosevelt in order to catch a bus. You are also making it impossible to get to the Northgate Transit center in a direct and quick way, especially by removing the 66/67 off of 5th. Your current proposed 66 route isn't going to make it easy to get to the Northgate transit center since it hardly ever runs. *****I REALLY HOPE YOU ARE GOING TO RESTORE FREQUENT BUS SERVICE TO THE NORTHGATE TRANSIT CENTER LIKE YOU HAVE NOW ON 5TH AVE NE ONCE THE LIGHTRAIL STARTS RUNNING TO NORTHGATE? I IMAGINE YOU HAVE STARTED TO PLAN THOSE ROUTES NOW IN ORDER TO HAVE THEM FIGURED OUT BY 2021? *****	5/13/2015 6:05 PM
525	STOP PUTTING MORE BUSES DOWN UNIVERSITY AVE. The 48 service currently goes down 15th, A TWO-LANE ROAD. Moving the 45 service to University Ave., A SINGLE LANE ROAD, IS STUPID Run the 45 service down 15th instead of University	5/13/2015 6:02 PM
526	As someone who rides the #8 multiple times a week with a mobility scooter, it is a hassle transferring between buses. Deploying the ramp on the newer buses is faster and more reliable than the lift on older buses. It would be nice to see more new buses on the #7.	5/13/2015 5:45 PM
527	I use routes 30, 74, 75 and 65 most frequently. I want to be able to access those routes at times other than rush/commuter hours. I am elderly, do not drive and rely on bus service during all parts of the day.	5/13/2015 5:43 PM
528	I do not understand your rationale of removing the 16 from Northgate to send it to Magnusson Park. Northgate will no longer have direct access to the heart of the Wallingford/Stone Way entertainment and shopping district. No, the 26X is NOT a suitable substitute, as it crosses 45th at the sketchy end by I-5, almost a MILE from where the 16 currently hits 45th. It completely avoids the restaurants, shops and theaters on 45th between Meridian and Stone Way. I will not be willing to take 2 buses just to get home to Northgate from Wallingford late in the evening, and will most likely have to go back to driving instead. Is that what you consider an improvement? This entire project was supposed to be about making things more frequent and convenient for your paying customers. Removing/diverting routes is completely counter-productive in that respect, especially ones that do not have a reasonable alternative.	5/13/2015 5:42 PM
529	I think splitting the 48 and the 8 into two routes will really help them keep on time. I think the changes to the 16 and 26 make sense. More buses using Aurora mean fewer buses waiting for the Fremont bridge opening/closing, which has caused some delays in my experience. Buses using Aurora also means easier transfer to the E line, esp. going North toward Shoreline. But most of all, thank you for connecting Sand Point with the revised 16. I believe that route will be very useful to me; Sand Point has been a difficult part of the city for me to use the bus to visit, and it looks like that will be remedied by the new plan. And thank you for actually listening to rider feedback. After the monorail debacle it means a lot to be heard.	5/13/2015 5:41 PM

530	In general more frequent and faster connections will be an improvement. However, I'm unclear on how I would get to the U-district (University Way) from downtown with these new changes. Would I have to take the train/subway and then transfer from Husky Stadium? Having to transfer from Husky Stadium rail to a bus to go the mile or so up the hill to University Way would be a deterrent from taking public transportation on this route.	5/13/2015 5:41 PM
531	It seems to me that getting from my house on 28 Avenue NE just north of 65th to downtown is made more complicated. There doesn't appear to be one bus to take. I'd have to transfer buses, walk further or switch to the light rail. As an older person with somewhat limited mobility, more changes make the trip more difficult.	5/13/2015 5:28 PM
532	Revising Route 65 to serve South Lake Union is a waste of time and precious resources because the current Routes 40 and 70 as well as the South Lake Union Trolley provide coverage. Previously Route 62 served the area exclusively but Metro deleted it because of low ridership.	5/13/2015 5:25 PM
533	There is still no good East-West route for Northwest Seattle. I cannot get from the "wrong" side of Aurora to the U Link station in under 1 hr and 30 minutes (E to the 48) vs a car commute of 15-30 minutes depending on traffic. Since the 48 is being broken up, it sounds like my bus option would be increasing to 3 buses. I would love to take the bus if the rapid ride actually was quick on Aurora or there were a more direct line from Northgate to UWMC (right now it still seems like the only option would be the 67 along Roosevelt?) It doesn't seem like much was done to address the Crown Hill / Greenwood accessibility to anywhere but downtown.	5/13/2015 5:21 PM
534	where can I comment on the stupid stupid stupid plan to start route 8 at 23rd - making it impossible to get to SLU without going downtown? I have been trying to comment on this AND THERE IS NO PLACE TO COMMENT ON IT.	5/13/2015 5:13 PM
535	I would like Route 30 to be continued as its deletion will make it more difficult to get directly to the University District.	5/13/2015 5:08 PM
536	I am seeing conflicting info on 372X. Will it go on to main UW campus, or will it circle campus (traveling along Pacific)?	5/13/2015 5:07 PM
537	Please don't remove all buses from University Way.	5/13/2015 5:02 PM
538	I commute from the Eastside to North Seattle. Currently, if I work later than about 7:00, I have to take the 545 and transfer to the 48 at Montlake (which, as an aside, has become an unmitigated nightmare of late). The proposed revisions would require either transferring from the 545 to the 48 at Montlake (assuming that stop ever reopens), and from the 48 to the 45 somewhere in the U-District; or walking half a mile to where the 45 starts. Again, I commute from the Eastside to North Seattle. Every day. I reiterate this because, as far as I can tell, no one at Metro realizes anyone ever does such a thing.	5/13/2015 4:47 PM
539	I currently have two options for my daily commute from Fremont to the my workplace in the U District. I can catch the 31/32 at Stone Way & 38th, then transfer to the 71x/72x/73x to get to upper campus. This is the fastest option, with the least amount of walking and wait time between transfers. My other alternative is to catch the 16 on Stone Way & Bridge, then transfer to the 44 to get to my office. This option nearly always results in a lengthy transfer wait due to just missing a 44 and/or the 44 running behind. With the proposed move of 31/32 off Stone Way, I think I would use the increased service of the 16 & 44. However, I'm still leary that this will actually increase my transit time, as I only have one bus option at my transfer point.	5/13/2015 4:46 PM
540	I wish the frequency of the new 26/26x route could be increased during off-peak hours, as that is when I travel on it (currently the 16 from Green Lake to Fremont and Queen Anne.) But the new routing doesn't effect me. I am glad that the 26 will no longer be parking in front of the businesses in the Circa Building at Green Lake--that will help those businesses quite a bit!	5/13/2015 4:42 PM
541	Removing the downtown stops for the 64X will absolutely impact my commute. And removing the 71 & 72 erase all options I have if I can't take the 64X. I will continue to take Metro and use the light rail because it is the only way I can get to work downtown. But these changes add 1 - 2 connections to my commute and make any stops much farther from my home and work. I understand the reasons behind these changes, but I feel that removing the downtown stops for the 64X will negatively impact half the riders who take that route. It is quite an addition to commute time, connections and distance to stops. I am happy for the expansion of light rail, but very disappointed about the impact it will have on me and my neighbors.	5/13/2015 4:38 PM
542	I am affected by rts 8, 10, 11, 12, 43 and 48 are in my Capital Hill neighborhood. Planned changes to rt 12 are not acceptable to me. This rt serves many people, and myself, needing to visit doctors and appointments on First Hill (Swedish). I do not need nor want to have to transfer at the hoity-toity new Cap Hill tunnel station, just because it is there. As a former employee of KC Metro, I find it hard to believe that this organization is now letting newly appointed Transit Planners, with no historical knowledge of the current riding public, propose and possibly change long-established needed routes. Leave these routes alone, please ! Just because there will be new underground transit facilities does not mean that the whole transit system needs to be changed nor adapted to connect with them.	5/13/2015 4:38 PM

543	I would like to see more frequent service to and from Magnolia during peak period times. Is there any way to get a DART bus to service Magnolia to the North side of Queen Anne or Fremont so that Magnolians can get frequent buses to the UW? They could switch to a bus going to the UW in Fremont. It is my observation that the 31 going to and from the UW is mostly used by people getting on at the UW and getting off at Fremont. Magnolians could suffice with a DART bus that would take them closer to their homes, not just service to the Magnolia village.	5/13/2015 4:29 PM
544	No. I like the proposed changes for the routes I use.	5/13/2015 4:23 PM
545	It is not clear how the Dial-a-ride works. Riders frequently connect from one route to another how can riders plan connections on a route that may have dial-a-ride excursions? Also, routes 16 or 74 be taking riders into the NOAA Western Regional Center on Sand Point Way will they merely be using this as a starting point heading south? If these routes enter the complex, they should pick up riders. A continued concern that my family and co-workers have is transit not be faster than driving alone. Buses HAVE to get out of traffic. Ridership will greatly increase if there are bus ways or dedicated freeway lanes during peak hours for transit. Thank you	5/13/2015 4:05 PM
546	As to weekend service on 372: what about parking in Lake City? Weekdays I get picked up in Kenmore, weekends I need to get myself to Lake City. And also for regular 372 service: do the people in Woodinville have somewhere to park in Bothell?? I see NO mention of more space at Park and Rides or new Park and Rides.	5/13/2015 3:43 PM
547	64X and 66X: How does Metro ensure reliability issue on these two routes as they all use Mercer St. entrance/exit of I-5? Peak time delay can be as long as 30 min (per my limited experience with route 309). Limited transit options for NE South Lake Union and Eastlake: without 66, route 70 is very unreliable during the peak time (similar due to Mercer St. congestion). There is urgent need to improve the public transit system in South Lake Union area, both infrastructure (transit lane please!) and route connections (e.g. no transit service on Mercer corridor).	5/13/2015 3:14 PM
548	I have concerns about older and/or disabled adults and what's proposed for #16 and #26. These proposed changes will not serve us well.	5/13/2015 3:08 PM
549	Keep the new route 67 that goes from Northgate Way and 5th to the UD and make it go as often as possible. It is hard for those of us that live in west Northgate to easily get to the UD as well as to the bars and restaurants in Roosevelt/Ravenna.	5/13/2015 3:01 PM
550	The northeast Seattle proposal rocks!	5/13/2015 2:25 PM
551	Please don't delete Route 30. Many people from NOAA, who work at the Western Regional Center (WRC) just off Sand Point Way NE, use bus 30 because it comes onto the WRC campus. Deleting Route 30 would require people to walk between the WRC campus and Sand Point Way NE --- via NOAA Drive --- in order to use the Route 75 bus. This twice-daily walk --- morning and evening --- would not be easy for some. Also, Route 30 conveniently accesses several areas --- like 50th and University Avenue --- not reached by Route 75, as Route 75 cuts through the UW campus. Thank you for the opportunity to comment. Mike	5/13/2015 2:24 PM
552	Deleting the Route 43 bus saddens me greatly. It suggests that no-one at Metro has looked at the topography of Seattle. Yes, the Route 12 is relatively close to the current route 43, but getting to the 12 (especially on the way to work), means a big up-hill slog that leaves one sweaty--not the way to start the work day. Please reconsider the #43 route.	5/13/2015 2:03 PM
553	Please consider better connections between the waterfront and North Seattle! You took away the Cedar Street stop on the 16 line, and now it takes two buses to get to Elliott West where I work. This is causing HUGE traffic jams. Everyone who works a mile from downtown uses their car instead of mass transit. A bus that travels along the interbay from North Seattle would be VERY useful !!!	5/13/2015 2:02 PM
554	Even though the 48 frequency is increased from North Capitol Hill to UWMC and the University District, I worry "every 10 minutes" is still not enough without the 43. At peak times, the busses (currently 43 and 48) are often very full from 23rd and Madison to the UW Medical Center. Every 5-7 minutes at peak times would be much preferred.	5/13/2015 1:48 PM
555	Greater frequency for 64X, 76, 74X, and 316 would be GREAT!!! Much-needed, as these buses tend to be packed to the gills.	5/13/2015 1:33 PM

556	The removal of the 43 bus will add a bus transfer to my trip to the U-District. I am near 15th E and can not walk hills to reach 23rd or Broadway. The new train will not help as I have to go to NE 50th and I can't walk to it anyways. The proposal will make my commute longer and less predictable. There seems to be a "hole" of service along the 15th E corridor. It is likely that these changes would force me to move or consider driving every day.	5/13/2015 1:26 PM
557	All the buses going from downtown to and over Capital Hill seem to leave and cross Broadway at the same time making catching an alternate route if you miss one impossible this should be changed.	5/13/2015 1:13 PM
558	I am very angry about your proposed route for 16! Route 16 runs past our house at ALL hours of the day and night. Its loud, its smelly, its FAST!!! The route on Meridian Avenue North is WAY TOO TIGHT - our cars have been hit and damaged MULTIPLE times by the bus because it can't fit down this street! It's terrible! There are other, adjacent streets that are wider (Latona, for example) and much more able to handle the traffic and have room so cars can actually pass one another and cars parked do not get hit. There are families and lots of people who walk and bike and it's dangerous. We have asked repeatedly to have it moved to a wider more bus appropriate street. ARE YOU LISTENING! There is ABSOLUTELY NO reason for me to even use this route! Its very easy and convenient for me and everyone else in the neighborhood to walk over to Latona or 65th park and ride and pick up a bus to anywhere. You should kill this route -- it makes no sense to have it run through Green Lake and ruin the quality of life for the people who live there.	5/13/2015 1:11 PM
559	Nothing specific was mentioned about routes 30, 71, and 76. I use these routes DAILY for my transit from Wedgwood to NOAA Sand Point. Will there still be service to or near NOAA?	5/13/2015 1:06 PM
560	Splitting the route 48 as proposed is unhelpful. The new route 45 is through-routed over Lake Washington, which would create the same variable delays in service from the UW to NW Seattle that the current route 48 suffers. No reliability would be gained.	5/13/2015 12:59 PM
561	It is not clear how service between the U district and Sand Point will be enhanced or even maintained with the elimination of route 30 and the changes to routes 16 and 75. It looks like one would have to take two buses instead of one, particularly if one wants to go to the NOAA facility at Sand Point.	5/13/2015 12:38 PM
562	Why are neighborhoods west of Fremont/Wallingford not included? Ballard is a large neighborhood, even having a bus route from 15th ave NW would be convenient. I was very frustrated when I moved into my apt on 24th ave NW a month before the direct bus line to the NOAA campus on Sand Point was shut down. Any direct route from Ballard to Sand Point (or anywhere with a more convenient route) would be advised. Consider the influx of tax payers to this area and the ever increasing construction of condominiums (with very little parking available) taking place currently and into the future. Thank you. I would love the opportunity to take advantage of the Seattle Transit system however services to/from Ballard are severely lacking, especially west of 15th Ave NW.	5/13/2015 12:26 PM
563	This looks pretty good! I'm a little disappointed that the 43 is cut entirely, but with the improvements to the 48, the 8, and the 11, I can live with it - eventually I think I'll probably even like it better!	5/13/2015 12:20 PM
564	I am very angry about your proposed routes! They are not respectful or considerate of the people who live in these neighborhoods. In particular route 16 runs past our house at ALL hours of the day and night. Its loud, its smelly, its FAST!!! The whole house shakes -- I mean really! There are families and lots of people who walk and bike and it's dangerous. We have asked repeatedly to have it moved to a wider more bus appropriate street. ARE YOU LISTENING! There is ABSOLUTELY NO reason for me to even use this route! Its very easy and convenient for me and everyone else in the neighborhood to walk over to Latona or 65th park and ride and pick up a bus to anywhere. You should kill this route -- it makes no sense to have it run through Green Lake and ruin the quality of life for the people who live there.	5/13/2015 12:17 PM
565	Transit between NE and NW neighborhoods is slow and lacking. More buses between Ballard and U District, stopping in Fremont, Wallingford, etc. would be helpful. I do not live or work up North, but when I am up in the U District visiting friends, it would be nice to get to Ballard or Fremont without having to transfer.	5/13/2015 12:16 PM

566	<p>I very much appreciate the idea for the new DART Route 941 to get from my home near Princeton and Sand Point to the new Link light rail station at Husky Stadium, but it must run more frequently than once per hour or I am not likely to take advantage of it. When I arrive at the light rail station from downtown or the airport, exhausted, I'm not going to be willing to wait half an hour or more for the 941, even if it will take me to my door. I used to take the bus to work every day, and frequently took bus/light rail to the airport or downtown. I want to do that again. Please run Route 941 every 15 minutes. It is good news that you are increasing the frequency of 75 and 48. No one should ever have to wait longer than 10 minutes for these important routes, and your goal should be under 5 minutes. Realistically, I suspect you have many potential riders, like myself, who really WANT to take transit every day and replace our cars. However, every time we try to take the bus we are stymied by long wait times. The degree of frustration is so high that we give up and turn away from public transit. A great deal of research has shown that people make decisions emotionally. When we think about riding the bus, we think about the frustration we felt waiting for the last bus we took. Further, a new generation is growing up despising public transportation. My son takes the bus to school every day. He has to transfer, and his wait times are so long that he hates the bus. He is desperate to buy a car. He is going to carry that emotional conviction with him for the rest of his life. That's one more vote lost for your cause. Whenever you have declining ridership, the solution should be to INCREASE the frequency of the routes. This will lead to an increase in ridership. Additionally and maybe even more importantly, a fast, reliable public transportation system with minimal waiting will launch a new generation of strong advocates for transit. I suggest looking to European models of public transportation. For example, in many German cities, streetcars and buses run every 5-10 minutes and cover the entire city with no more than a two-block gap. Transfers are almost always required, but due to the frequency of transit routes, no one minds them. The reason people hate transfers here in Seattle is because of the 20-minute wait in the middle of their rides. If cost is an issue with this plan, see the next paragraph. I also believe that your current funding model is flawed. I keep seeing news articles claiming that public transportation in Seattle is "running a deficit." This is an inaccurate way of assessing the situation. Public transportation income should include not only fare revenue but also (1) money saved by businesses when their employees spend less time driving in traffic; (2) reduced healthcare costs due to less contamination of the air from automobile exhaust fumes; (3) other similar benefits to society. It is important to document these cost and revenue benefits of public transportation and not to accept the idea that fares have to pay for all public transportation costs. Metro Transit needs to launch a new approach to dramatically increase ridership by making the transit experience more pleasant. That means significantly reducing wait times and walk times. Perhaps you should reach out to private foundations; write a proposal for a major funding initiative that will enable you to invest in the future and reach an untapped population of new customers. If you can convert a significant number of automobile commuters to transit commuters, revenue for your system will increase, pollution and carbon emissions from automobiles in the King County area will decrease, King County health costs will decrease, and millions of people's lives will be improved because they will spend fewer hours each year waiting in traffic, breathing exhaust gases, with their blood pressure spiking. That's an extremely laudable goal, highly worthy of investment. Thank you for taking the time to read my comments. I appreciate everything you do to improve transportation in the Seattle metro area.</p>	5/13/2015 12:10 PM
567	<p>I did not see an opportunity to comment on the 372X. I normally catch this bus in Woodinville. I could catch it in Bothell, however there is limited parking at Bothell P&R. Is there any plan to increase parking availability in Bothell along the 372 route? Thank you!</p>	5/13/2015 11:59 AM
568	<p>I do not understand why you have to change route and time table of any bus lines that serve North Seattle. North Seattle (or North of U district) would not have any access to Light Rail till 2022. Please wait to mess with any of bus routes that serves this area until any light rail station after University of Washington stadium is opened. This creates more inconvenience for residents that you may think.</p>	5/13/2015 11:53 AM
569	<p>This new proposal is better for North Capitol Hill residents than the earlier two, because it better mitigates the negative effect of taking out the 43. However, residents who currently use the 43 to get from Capitol Hill East of 15th to the U-District will either need to walk to 23rd Ave (through a non-safe neighborhood at night and being exposed to significantly more noise at the bus stops) or take two buses. Both alternatives make commutes longer, even though the 48 would run more frequently. For those Capitol Hill residents who live closer to the new light rail station, they might still need to transfer at the UW light rail station because it is located at the fringe of the U-District until Brooklyn opens.</p>	5/13/2015 11:42 AM
570	<p>What about Route 71? Will route 16 provide this service from 54th NE to Roosevelt and NE 65th. We need an east west connection along NE 65th (high hills) and the University District. It would be good to keep this connection until the light rail station is completed at Roosevelt & NE 65th. Route 75 is primarily service for students and staff of UW. The increased ridership will mean possibly overcrowded buses during certain times. Also, traveling through the UW to reach the light rail station means more traffic through the UW campus. The UW campus is not safe at night. Will the station at Stevens way be improved to assure pedestrian safety? What is the DART service? Does it operate on a fixed schedule? What stops will be fixed and what is meant by flexible stops?</p>	5/13/2015 11:29 AM

571	I like the idea of # 16 going near U Village, but don't want to sacrifice the ability to get from Green Lake to Northgate, as I do now on the #16 route. I am a Senior resident and use # 16 to get to Meridian and Northgate Way for Dr. appointments and I appreciate being able to do this without a transfer needed. I also go on to 5th NE and Northgate Way for errands in that area.	5/13/2015 11:27 AM
572	You have totally eliminated service to my area -- NE 80th and Ravenna Your expectation that I can hike a half mile to a bus stop is contemptible. But I know that my comments will mean nothing to your grand plan. They have not in the past and they will not in the future.	5/13/2015 11:24 AM
573	I voted for Prop 1 in November because I believe in mass transit and am a firm supporter of it. I had no idea I could be voting to have my bus service on route #26x diminished and the proposed change to this route seems ill-advised. If you haven't heard from other 26x riders, I suspect it is because, like me, they'd never imagine anyone would change what is probably one of the best functioning routes in the City! This route currently operates at peak (congested rush hour) times only. It functions VERY WELL, albeit is often very crowded (standing room only) by the time it departs it's last southbound stop at the north end of the Aurora bridge, before getting onto Aurora towards downtown. In other words, it is consistently filled to or nearly to capacity. The same is true northbound around 4:00 pm and onward - standing room only heading out of downtown. My first concern here is that by eliminating route 26 (non-express) altogether, many route 26 riders would use the 26x, further overcrowding it. The route 26x buses typically are punctual, with the punctuality understandably diminishing somewhat as rush hour progresses. That is to be expected in the late afternoon because bus drivers who have carried riders to the north-most point on the route (Greenlake) then turn around and head back south through rush hour traffic to pick up the next load of downtown riders. My primary concern with the proposed changes to route 26x is that having #26x go so much further north to Northgate to drop riders before coming back downtown during the evening commute seems like a way to ensure significant delays - and reliability and punctuality will become a thing of the past. Sometimes I take the 355 x at the end of the day, and it suffers from having to fight its way back downtown during rush hours from further north and - as a result - not infrequently is 25-45(!) minutes behind schedule during the afternoon commute. PLEASE DO NOT CHANGE Route 26x to extend it to Northgate. That is what the new Link service to Northgate was supposed to do! I do not believe your Metro + Link proposed changes will "improve service" for current 26x riders (like me) who already pack ourselves into our buses going both north and south during rush hour, but are happy to do it because the bus is so reliable. You risk rendering dysfunctional one of the best functioning routes in the City! Please reconsider! Thank you.	5/13/2015 10:56 AM
574	What about any bus routes via Ravenna ave NE? I live at the Ravenna ave NE and 89th St and as far as I can see both existing routes #72 and #372 will be either relocated (#372) or cancelled (#72). I am afraid that as a 85 years old woman with impaired mobility I am going to be left without any means of public transportation. Erika	5/13/2015 10:54 AM
575	Route 72 - Please do not cancel this route! As we age, and when we finally retire in the next year or so, we anticipate using the bus even more than we do now, especially in the daytime. Our closest bus stop is at 15th NE & NE 80th. To cancel Route 72 decreases the number of daytime buses available to us. As we age and walking becomes more challengeing, walking to Roosevelt NE or 25th Ave NE to catch a bus will not be a viable option.	5/13/2015 10:42 AM
576	Dear Metro, Please, pretty please, do NOT delete route 30. I, along with many other commuters, take this bus to and from work at the NOAA main campus and other stops every day. There are a lot of NOAA commuters that would have a very difficult time making so many connections, as well as making the long walk to/from the 75 bus stop. The 75 route is not convenient (or physically possible) for NOAA commuters as some of them are handicapped and cannot walk the 0.4 - 0.5 miles to and from (from is a very long, uphill walk) the 75 bus stops every day. My route 30 buses to and from work are crowded every day, so much so that some riders do not have seats and have to stand. I understand that changes need to be made, however the 30 does not go near Husky Stadium and it's daily commuters would be in a terrible position, many having to drive to work, adding to the traffic problem. The 75 does not wind through the Sand Point neighborhoods as the 30 does, leaving a lot of commuters on my route to have to make multiple connections as well. I attended meetings and lobbied for all my friends, family, and acquaintances to vote for the bus legislation last year, in hopes that my bus route was not discontinued. This seems like it was a complete waste of my time and energy, as you were proposing to cut this route for the lightrail, which many of us will never use. If the 74 would go both ways in the morning and afternoon, to accommodate all of the NOAA commuters I would be okay with the changes, but as of now, there are only 74s going the opposite direction of the NOAA commuters. Our route was already cut to mornings/afternoons, and it is not a good choice to completely eliminate it. I am happy to do whatever it takes to keep it going. Please consider your fellow government employees, contractors, and the handicapped when making your decision to keep the 30 running. Thank you, Kristin Fonte	5/13/2015 10:28 AM

577	Wow, so many changes. But, it seems like service isn't going to improve for the North College Park neighborhood. I'm actually glad to see changes to the 48; it's unreliable, overcrowded, and slow. But, under the proposed changes, it not longer services North Seattle at all, so none of that helps my area and I would need to use the new 45. But this new route looks even slower and more crowded. How does the 45 fix the 48 problems in North Seattle? If you think it will, you should say why in the route proposal your circulating, because it looks worse. The 48 is slow from North Seattle because it goes to one high school, then Greenlake, then the library, then another high school, and then it picks up UW students North of the UW. The new 45 may get fewer students from the second high school, but isn't their a new transit center being built on 65th, so that's going to be slower. It also goes on the AVE which is one lane and very crowded. Besides, isn't there already many other buses that service the North U. District? And, why haven't you brought back the 48X route or something like that? I'm thinking something like the 355, but I wish it had just one stop closer to the UW. But, I-5 is bad during peak hours, anyway, so putting an express on surface streets is better.	5/13/2015 10:26 AM
578	LATER SERVICE FOR ROUTE 67 IS UNNECESSARY AND A WASTE OF MONEY DO NOT REMOVE ROUTE 68!!	5/13/2015 10:26 AM
579	i would like to comment on proposed DART 941. I live on NE 86th St, on what is now the last leg of the 71. Since January, 1989 I have had to deal with your buses coming up at on our street until 2:00 am each morning. I deal with the dust, noise and the inconsistency of ;your drivers at the speed they come up the street. There is no chance of me leaving my windows open at night during the hot summer nights due to the noise your buses generate. Now that you are deleting the 71, you have replaced it with DART 941 which will do the same. The one saving grace is that the proposal is to have it end at 7:00 pm, not 2:00 AM. My question to you is why not route the last leg off of 86th street and onto another street? You could route it on NE 75th ST and have it turn right off of that. The turn radius should allow for that. You could also route it off of NE 87th or 88th since when our street is occupied that is what you do. There is no reason to have the last leg of this bus on a residential street especially when the passenger load is minimal. If that can't be done, NE 86th street has done its due diligence of hosting the last leg (26 years) and it is now time for some other residential street to do so.	5/13/2015 10:18 AM
580	doing away with 242 would be a major blow for me and I would likely drive to work every day if 242 went away.	5/13/2015 10:15 AM
581	When the light rail reaches 65th street, you better have a plan for the parking. Increase parking spaces at the 65th P&R would be good.	5/13/2015 10:00 AM
582	For those of us who live on Dexter, eliminating route is a bad idea. With the frequency of new condos going up ON DEXTER ITSELF, plus limited parking, 2 Dexter Buses is nearly enough to handle to daily M-F commuter traffic. As it is, during peak hours we pay more to stand in the aisles (overcrowded buses). I am VEHEMENTLY AGAINST eliminating ANY of the buses that currently run on Dexter Ave N. Because I'm partially disabled, having a bus on Aurora would be troubling, and difficult to manage. I bought my condo in part because it's across the street from a bus stop, which allows for my greater independence and mobility.	5/13/2015 9:58 AM
583	Please bring the 47 back as soon as possible!	5/13/2015 9:56 AM
584	I am really happy to see that you have included a revision to keep route 73 as that is an important route for me! Though I am a little nervous having to make a connection from my neighborhood to get downtown now (instead of having a straight shot) it seems like the concern about frequent and reliable bus service to fill in the bus portion of that leg makes me feel a little more at ease about the whole thing. I know it will take getting used to, but overall I am excited to explore the new service revisions for myself on foot! Thank you!	5/13/2015 9:50 AM
585	I wrote this to you before (on the previous request for feedback), but it was ignored, so I'm trying again: PLEASE do not run the 31/32 up Wallingford Ave. instead of Stone Way. This makes no sense, as Stone Way is among the fastest growing commercial-residential corridors in North Seattle. I live on Stone Way and 40th St., and I count 5 city-block-long, multi-story residential buildings going up **right now** on Stone, all within four blocks of my home. There is similar development across Stone in the narrow strip of Fremont between Stone and Aurora (developments such as the Velo building). In contrast, Wallingford Ave. has no new development, and will never be upzoned from its current single-family-home focus. It is almost exclusively residential with no capacity for growth. Why would you choose to run the 31/31, which so many people depend upon to commute daily to the U District and/or to transfer there, up Wallingford Ave instead of Stone Way? Please rethink this, as it is a poor long-term decision. Since so much of Stone Way is currently in development, you will not receive a lot of feedback from people living here. In your plans to change Capitol Hill, I note that many, many people rejected the proposed changes and you responded. Future residents of the many multi-family buildings in development on Stone Way will not have this opportunity to respond to and reject this change. IF you make this change, the people moving to the area and commuting east-west will be car-bound rather than transport riders, as I am. Future residents of Fremont between Stone Way and Aurora will not make the .5 mile walk to Wallingford Ave to commute east-west to the U District, so they will drive. I have been living here without a car for many years, supporting transit. Please do not ruin my neighborhood.	5/13/2015 9:45 AM

586	Eastlake area will lose two bus services, #66 and #25. It will be less convenient after the revision. Taking #70 to get downtown takes so long time with a lot of passengers and traffic. We need a bus route taking Eastlake avenue to get downtown, such as current #25 & #66 routes. Thank you,	5/13/2015 9:33 AM
587	I would like to see Route 72 retained as it provides the only direct (one bus) service from Lake City to the Roosevelt area and north University District. Apparently, the alternative for me will be to take two buses (the 65 and the revised 16) to get to the Roosevelt area. But two buses is usually less efficient than taking one even if you are successful in increasing the frequency of buses. I think during the afternoons especially buses will be late, will come almost together, and riders will often have to wait longer than 15 minutes to transfer. In my experience, one bus is more efficient than two because of the transfer time. I'm sorry Metro has used the opening of the U of W Link station as a reason to cut routes through neighborhoods. I'm speaking specifically here about the routes 43 and 72. I no longer use metro to go to work. But I do use the bus service regularly to travel through the neighborhoods of north Seattle and Capitol Hill. Some of the changes you are proposing will make it more difficult for me to travel throughout this area. Old reliable one-bus routes will be eliminated, frequency will be increased, but except on routes 75 and 372, at an expense in time--the time in waiting to transfer. Right now I only plan to use the Link from the University to get to the airport. I think the University Station is going to be crowded and noisy, and I believe that Montlake area will be every more of a bottleneck than it is now with traffic and transit slowdowns.	5/13/2015 9:22 AM
588	If you look at the ridership numbers for Route 30, you will see that most riders go from NOAA to the University District. This is due to the fact that most of these people connect there with routes to the downtown area or south of Seattle. The new routes lose this connection. Route 16 takes a roundabout way to get to the downtown and misses the University District, and in order to use 75, NOAA riders will have to walk about one-half mile to and from the transit stops on Sand Point Way. Over the past five years my transit ride has gone from using one bus to three, and I am now afraid that the next change will be me back in my car.	5/13/2015 9:22 AM
589	Thank you for your hard work.	5/13/2015 9:13 AM
590	Yes, better service is needed from the U-district to downtown transit tunnel, Routes 70,71X,72X, 73X. Many commuters use these routes to make connections in the tunnel and on 3rd avenue from the U-district. Link Rail isn't helpful here. Many board the bus on University Way, 15th NE and NE Campus Parkway, Light rail tunnel is too far to walk. Please add more buses and frequency of these routes. Thank you!	5/13/2015 9:07 AM
591	I drive from north Bothell to the park & ride at 10303 Woodinville Dr. If you cut this part of the 372 route, I don't know how I will get to work at the UW Seattle campus. Kenmore park & ride is too far (it already take 20 minutes to drive to the park & ride I'm using now!) and there is so much student housing near the Bothell campus that finding parking there is really unreliable. There needs to be a park & ride option near the Bothell campus for those of us who live north of the city to use when commuting to Seattle.	5/13/2015 9:01 AM
592	Need more frequent service in Ballard running on 15th Ave NW	5/13/2015 9:01 AM
593	The idea of chopping up bus routes, as happened in South Seattle, did not work for me. It now takes me an hour and a half for the 10 mile commute from the U district to my house in SE Seattle. Even when buses are scheduled to come every 10 minutes, this 10 minutes--or 20, or 30 depending on the traffic, can mean missing a connection. It is very uncomfortable to wait on the street for a bus in the winter and spring.	5/13/2015 8:57 AM
594	Cutting the 73 service on the weekend is a hardship for me to get to work. I will have to either transfer at Northgate or walk 20 minutes to catch the 372 over in Lake City (from Jackson Park).	5/13/2015 8:55 AM
595	Increase the quantity of route 15X - more buses are needed. In the morning, it is standing room only to downtown. A large number of folks are left at the Market St bus stop as the 15X is full. The PM 15X service is quite limited for those that work after 5 PM.	5/13/2015 8:47 AM
596	I don't see any additional mention of services to the South Lake Union area going up Eastlake Ave. I see the 66 being taken away and added to the services already servicing Capitol Hill and UW. Increasing frequency of the 70 is just going to mean more buses arriving at the same time at the stops as during peak hours they can't stay on time and are almost always running late so connections are not met downtown. Congestion needs to be addressed not only service. Nothing is done about cars driving on 3rd ave during times it is buses only. Nothing is done about the congested areas where the buses get hung up and delayed during their regular route. If you don't fix congestion too there is no hope for the 70. Especially when the drivers act as if the rider is an inconvenience to them. At one point we were told the Lake Union trolley was going to go up Eastlake but it stops at Fred Hutch.	5/13/2015 8:45 AM
597	Any routing that relies on connections through Montlake reflects a disconnect from reality. There is not reliable traffic flow at any time of day. Until the Montlake situation is corrected/replaced/fixed, the light rail station will serve those with pedestrian accessibility only.	5/13/2015 8:31 AM

598	You could better explain where route 48 will split. It provides good service to UW now. Where will riders have to switch? If it is near Uw then perhaps the two could overlap on campus to allow riders to stay on one bus to the campus destination. Please be advised that this survey interface is terrible on my iPhone. I only have time to answer on my commute (so on my phone). It was a struggle to use the interface. It is something with the pop up window that is not mobile friendly. I gave on one or two prior surveys. I barely got this one to work.	5/13/2015 8:28 AM
599	Why can't the 177 or 178 buses at Star Lake prior to 6:00 p.m. Multiple buses stop at 2nd and Jackson in comparison to one 192. The route passes the bus stop it doesn't make sense and there is room on the bus. By the time the 192 comes on many occasions it is standing room only.	5/13/2015 8:03 AM
600	As the 71 is going away and this is the only non-commuter hour and weekend service from the Wedgwood area between 85th Street & 40th Ave NE to downtown and the U-District, it's essential that expanded # 65 bus service running along 35th Ave NE go forth as proposed. This will now be the only off-hour and weekend options for getting downtown via a light-rail station. This route needs to be frequent enough to connect riders to the Stadium light rail station in order to have a reasonable commute time since the 71 is going away. It does seem, however, looking at the proposed new routes that the Wedgwood area got the short end of the stick, particularly people who live between 35th Ave NE & 55th Ave NE and are north of 65th st street and this is large pool of riders. If the #65 expanded service proposal changes, there must be an all-day alternative to get Wedgwood riders to a light rail station.	5/13/2015 8:01 AM
601	I like the increased Sunday service on the new route 45 very much. I take the route 48 every weekday afternoon. Service on that route can be very bad. Just last week I had to wait at 15th NW and NW 85th for 35 minutes for an eastbound bus. This was from just before 6:30 PM until 7:05 pm. I hope the planned splitting of the route helps. I know it's not completely the fault of the route, because I have had some bus drivers on the 48 who are always on time. The only other improvement in general that I can think of is better security on all Metro buses. I take the D every weekday afternoon and I have only seen fare enforcement officers 2 or 3 times. I'd like to see them more often. I would also like to see uniformed security stationed on buses.	5/13/2015 8:00 AM
602	Definitely support the increase in frequency of the 48, and splitting the route to increase reliability. The one part of all bus routes that is particularly frustrating is that when there are delays, buses are often backed up so that frequently there will be 3 route 48 buses within a couple minutes of each other. This also happens with the other bus I take every day, the 271. I understand that delays are unavoidable, but it seems that if 2 buses are next to each other, the 2nd bus should wait at a given stop for 5 minutes or more, so that the buses are spaced out again. Having 2 buses following each other doesn't help. If the buses were to space themselves out, the average overall time that anyone would need to wait would be reduced since, in affect, the frequency of the buses would be increased, instead of having 2 or 3 buses, 1 of which is really crowded, followed within minutes by buses that are basically empty. Since we now have phones and other technology to deal with this issue, it's very frustrating that the service doesn't adapt to the reality of traffic to better serve the riders, which is the whole point of the buses.	5/13/2015 7:55 AM
603	To Whom it May concern - you are taxing greatly the commuters in and around Woodinville. Please be reminded Woodinville has commerce areas that do very well and many commuters who use the Woodinville Park and Ride. You have cut 522 routes already many of them only go to Bothell and do not go on to Woodinville, now you propose to do the same with the 372 that has been a life line on cold winter days if I have to catch a 522 out of Seattle that only goes to Bothell then I can catch a 372 connection. The 311 tripped is packed standing room only every trip home from Seattle and it's dangerous in winter. I have endured an 8 hour bus ride on a un-heated 311 bus in freezing weather stuck on the 520 bridge in a snow storm. The 522 used to be a better winter weather bet. And oh by the way, I voted and we approved more money to increase bus service and here you are cutting it. How about not cutting service to Woodinville, how about increasing service? That would be nice. Thank-you	5/13/2015 7:43 AM
604	I was hoping the changes would include adding more routes to 373, such as an earlier route and weekend routes. Looks like the change to staying on 15th rather than University Ave might work fine...it wasn't clear to me in the information, but it looks like 373 will continue to serve the stops on campus, which is important for my personal commute. Thank you!	5/13/2015 7:18 AM
605	The amount of time it takes to ride th bus has increased over the past 2 years. I cna drive to work in 15 minutes. When I started taking the bus it took between 30-35 minutes to get to my office, it now takes over an hour (very bad service). On my trip home it use to take 40-45 minutes, now it's any where from 50-90 minutes. Your reversions will add time and thenumber of transfers I will need to take. Once you put the changes in place I will drive to work again. Also I want to understand since we are payiong 60.00 on car tabs and our mayor wants to increase property taxes to add money for Metro to increase services for Seattle redidents WHY ARE YOU TALKING ABOUT CUTTING SERVICES TO SEATTLE RESIDENTS? Both Metro and the Mayor should be embarassed by this plan.	5/13/2015 7:17 AM
606	No	5/13/2015 12:14 AM

607	It appears that Broadview (especially north of Holman) is getting worse service with this proposal. Combining the 28x with the 28 likely means a slower trip downtown. Is this correct? What I'd really like to see is both routes kept and both running north to 145th.	5/12/2015 11:41 PM
608	I'm disappointed that neighborhoods of Phinney Ridge/Greenwood/ and Ballard aren't included. Those of us living in these neighborhoods also need better east-west service. In order to go to Capital Hill from Phinney Ridge, we currently have to take the 5 downtown, then transfer back north & east to Capital Hill. Please put something on the table for east-west accessibility from the NW neighborhoods to Capital Hill. Thank you for your consideration.	5/12/2015 11:41 PM
609	As a Maple Leaf-to-Westlake commuter, I'm trading the 72/73 for the 67 + LINK. I think this will be an improvement, but it all depends on how smooth the transfer is from LINK to the 67 on the way home. If its a <5 minute wait under a shelter, wonderful. If it's 8-10 minutes in the rain, not so much. Metro absolutely needs to nail the reliability of LINK-to-bus transfers.	5/12/2015 11:26 PM
610	Creating a reverse commute route (even one bus each way) to connect the 8th Ave. NW corridor and the D with schools, the #345, and the 130th St. housing/job/service corridor over to Aurora. (This could even create better #40 transfers (to/from Broadview/Bitter Lake) than the ridiculous ones with the 5.) This route could be a foreshortened pattern of the peak 28X, and become existing runs in the opposite directions... The creation of the 25 seems very promising for closer schedule adherence; the next step should be to work on placing bus stops where they'll be easier for transfers at NW intersections.	5/12/2015 11:19 PM
611	I had heard the 28 route was going change but I didn't see any questions about it. I like the 28 route as it is, although improving service speed and reliability would be great.	5/12/2015 10:59 PM
612	There needs to be some bus stop consolidation on Route 44. Its nice to have increased frequency. But - in places it seems that stops are spaced more frequently than 1/4-mile -- sometimes even a couple blocks away. That's too close together. Improve frequency and speed of the route 44.	5/12/2015 10:49 PM
613	The addition of more frequent late-night and weekend service is appreciated. This is a world-class large city, not a small town that shuts down at 8pm.	5/12/2015 10:39 PM
614	Please continue to consider better east-west service for the North Seattle area, such as a route that connects Ballard to Sand Point. Thanks for all your hard work!	5/12/2015 10:10 PM
615	If you take out commuter 71 and 76 and do not have any other plan but 65 or 75 you are breaking an already broken route. I take 71 and walk part way to work because 65 is to crowded and in summer you take buses away from it. 73 I need more service there its horrible especially holidays. I take three buses one day a week to 91st and 15th...I do not care about light rail connect. I would rather have better trained bus drivers...they are mouthy and take off before you sit down many times...or they run a lift and kneel bus without need when they are already behind.	5/12/2015 9:57 PM
616	Yes. If you are going to break route 48 into two routes, please consider extending the new route 45 to serve Ballard and Fremont. The end of this route should be a destination, not the middle of nowhere. In Greenwood, we have been waiting for an opportunity to gain direct transit connections to the destinations most proximate to us - Northgate, Ballard and Fremont. The new route could share a terminus with route 40 and create new cross-town connection opportunities similar to the opportunities the NE service chance will provide with route 60. This would be a big deal for our neighborhood. Also, please more videos of Ted Day - he's fantastic.	5/12/2015 9:41 PM
617	I live in Wallingford and am satisfied with the new routing and plans for the 16 and 26X. I do have concerns about reliability - particularly with the 26X being extended to Northgate - as well as capacity during the morning rush hour.	5/12/2015 9:38 PM
618	Since I live n Ballard I would I like to see if you can expand the 44 route to the old route 61, this help serve Sunset hill area and North Beach Area during off peak and Weekends.	5/12/2015 9:36 PM

619	<p>It is good news that frequency is increasing on routes in the north, but this is still woefully inadequate. I have traveled the world, and third world countries have better public transportation than Seattle. I have lived in Vancouver, BC, and buses do not even post schedules; instead, they post frequency (in terms of minutes, which is usually a single-digit numeral, by the way) according to time slot (e.g., "before 6am," "7a-10a", "11a-3p", etc., etc. It is so frequent you do not even have to think twice about whether or not it is worth going to wait for a bus. Additionally, we need to continue to give multiple modes of transportation along routes. Sound Transit should have *never* discontinued the airport bus service (#194) when the lite rail opened to the airport. Major cities have more than one (usually several) ways to get along the same general direction (redundancy). So it would not be a good idea to replace transit routes from Capital Hill to the University district, just because there is going to be lite rail service (which will not be frequent enough in any event). This is especially critical as Capital Hill has become a night-life center, and there is nowhere left to park (not a concern, if there were public transportation options for getting there and back!). Finally, why is it that service in the north increases while service in the Central District continually gets cut or removed (or service dwindled such that riders abandon the service because it is so pathetic)? The most densely-populated part of the city gets less service? This makes no sense.</p>	5/12/2015 9:30 PM
620	<p>I am definitely a little disappointed that the more radical of the changes originally proposed aren't taking place. I really want to see more frequency on fewer routes. The 12, for instance is a boondoggle and I am really hoping it goes away at some point in the future. That said, I'm super excited about the new 16. I will definitely take advantage of it.</p>	5/12/2015 9:23 PM
621	<p>NE 65th St riders still have a three-bus ride to connect to downtown or have to meander through Wallingford in order to reach downtown.</p>	5/12/2015 9:19 PM
622	<p>I love the increase in service of the 76!! But since it is peak hours only, what about getting from Wedgwood to downtown during non-peak hours since it looks like you are proposing to eliminate the 71??? This concerns me a lot! Also, how will the Roosevelt students get to Wedgwood after school? Thx.</p>	5/12/2015 9:18 PM
623	<p>I am writing re: the changes proposed to the 28, which I oppose. I live on 70th just off 8th. On the 28x, which I ride daily during the a.m. and p.m. peak, the changes would result in more time on city streets rather than Aurora, and slower service. The times I use the 28--weekends or later in the evening--the roads are clear enough that the trip time is pretty good, so converting it to a 28x ride then wouldn't be a significant improvement. I see no compelling reason to include Bus 28 in these changes. It doesn't strike me as being connected to the arrival of Link at Husky Stadium. I recall it was included in earlier proposed changes--its seems like an add-on here, not a change relevant to the light rail in a neighborhood not really affected by light rail. It's telling that the introductory question about where you live doesn't include Ballard or Whittier Heights, the neighborhoods most affected by the proposed changes to the 28. It's also telling that none of the survey questions reference the 28. Why is this route even involved? If you do eliminate the 28, I'd emphasize the importance of adequate frequency during the a.m. peak. The 28x is often at standing capacity at Market Street; if 28 local riders going to South Lake Union had to take the 28 local and transfer at Leary Way NW, there may not be space for everyone beginning at Market Street. I'd add one other point--I purchased my condo in part because of the proximity of fast buses going to Downtown (28x), and buses going to downtown Fremont (28). From my perspective the change would be a degradation of service and make this neighborhood less transit-friendly. I've been able to go grocery shopping in Fremont on the 28, but I don't think that would work if I had to transfer to the 40 on Leary. First of all, transferring with groceries would be a pain, secondly the 40 is often a short bus, and crowded. On the other hand, on the 28 I know I can get a seat on the trip going north at 34th and Fremont. So I'd likely drive my car more with these proposed changes. Sincerely, Newell Aldrich newell_aldrich@yahoo.com</p>	5/12/2015 9:08 PM
624	<p>I live midway between the 16 route and the 26 route in Wallingford. Thank you for not messing with the Wallingford to downtown parts of these routes. I do not want to have to go to the University District to use light rail, because it is faster to just walk a few blocks and catch the 26 Express, which is a great route for my daily commute. I occasionally go to the U District to catch the 70 series express buses when I'm desperate, and it doesn't save any time because of the backups on 45th. Until the light rail system goes far enough north to make a dent in the freeway traffic, 45th will be slow west of the freeway.</p>	5/12/2015 9:07 PM
625	<p>I live in Laurelhurst and have been eagerly awaiting the U Link station thinking that I will finally be able to take transit more than I currently do to my job downtown. As you know, the Metro Trip Planner tells you to take the route 25 to the U District and transfer to the routes 71, 72 or 73 as that is the fastest way downtown. I thought that with the U Link station I would now be able to get to downtown even faster and MORE frequently. But, NO... "due to the low ridership on the route 25" --according to your website this is the reason given for deleting the route, but we all know why ridership is low--IT ONLY RUNS EVERY HOUR! Anyone who needs reliable transportation to get to work would not take this bus. I usually try and get a ride to the U District instead of taking the route 25. It is faster to ride my bike than take two buses to work. I am very disappointed that METRO is continuing to not serve Laurelhurst even though we will now have a light rail station very close. You should serve the neighborhood with a shuttle but not one that only runs once an hour (as it says the DART now will). This makes no sense. I want to ride transit but I can not if it only runs once an hour.</p>	5/12/2015 9:06 PM

626	I really think this proposal is an improvement over the previous two alternatives, but am still concerned about connections from Eastlake to downtown and the U District. I often decide not to go to Eastlake (either from work downtown or from home in the U District) because getting back to the U District via transit is pretty tough in the evenings as is. This proposal seems to reduce the evening service along Eastlake if I have understood it correctly. Otherwise, I'm pretty excited about having grade separated, frequent service to downtown!	5/12/2015 9:04 PM
627	are you aware that there are 650 additional housing units being planned around the Issaquah Highlands? are you planning additional bus service for this area? Every day, I ride buses with 20 to 30 people standing from Seattle to Issaquah Highlands.	5/12/2015 9:04 PM
628	I am shocked 68 is being eliminated. It is full so much of the day, seniors, Uni students, commuters and the like. It takes many to a major shopping center (Northgate) and to the Transit Center. These two destinations, especially the latter, are vital to folks in Ravenna neighbourhood (long ignored and overlooked) and stops along the way. We needed a bus for so many years. When it was new I thought I was seeing a miracle and didn't believe it. Now I will be experiencing a nightmare but do believe it. The closest was a 10 block walk to 82 or 65th which I cannot do. Now # 68 is soon to be history...very distressing to me. I may have more opinions as I study the proposed changes for various routes. This is my input for today. Do you know how close the 372 stop will be to the Univ. Light Rail stop at Husky stadium? Closer than the light Rail stop at SeaTac I hope. That one was not designed for people in mind...bionic sprinters or athletes or 1000% healthy walkers perhaps...what a shame.	5/12/2015 9:00 PM
629	It appears that there is no ability to get from Sand Point and the University link station without transferring for all trips during the day which is not an improvement to get anywhere south of the canal which is a disappointment.	5/12/2015 8:59 PM
630	I live in Crown Hill and work on Dexter Avenue North. If the proposed changes to the 28 and 28Express routes are made, as well as the ones to the 26 and 26Express routes, how am I supposed to get to my job? The Express routes only make one stop on Aurora, too far past where I work on Galer. I would have no choice but to go to Aurora and take the E Line and get off at the Galer stop. Unless there is an added stop or two on Aurora to the Express routes, one of them being at Galer, this is going to be a huge inconvenience to me. And also if the Express routes are combined with the local routes, will they no longer run at all on the weekends? That's going to cause a lot of problems who use the local 26/28 routes on the weekend. Having lightrail in the U District means nothing to people who live in Ballard or Crown Hill and are trying to get downtown each day without having to make multiple transfers. Taking a route that runs completely from there to downtown and making it so that people now have to transfer to another bus to complete their trip is not an improvement in efficiency. It's an inconvenience that will lead to more people driving instead of taking the bus.	5/12/2015 8:58 PM
631	I have heard that the 19 might be "coming back" during peak hours. Is this true? I hope so. The 24 (what I must use now) winds thru Magnolia and it almost doubles the time it takes to go to downtown.	5/12/2015 8:28 PM
632	East- west connection loop for north seattle along 125th st- right now the only way from lake city to broadview is 4 buses- though northgate or shoreline	5/12/2015 8:16 PM
633	I work in the U District and live in Shoreline. I ride the bus every day to UW tower because parking is very expensive. I would like to have lots of parking at any Link stop because there is no walkable bus near me; I would have to drive to a Link stop to ride the Link to the U District in order to utilize Link. If I had to drive to a park n ride, get on a bus to go to the Link station, I would not use Link.	5/12/2015 8:13 PM
634	Connecting Sand Point, View Ridge, Bryant, Ravenna, Roosevelt, Green Lake, Wallingford and Fremont makes tons of sense (although it would have been nice to keep the 71 route number) especially since it will be a very busy bus because of Green Lake P&R connections, and when light rail comes to NE 65th Street.	5/12/2015 8:07 PM
635	I am a bit disgruntled by the fact that the 65 will not have service every 15 minutes on Saturdays. I ride the 71 quite frequently in the midday and on weekends, and people almost never use the View Ridge loop. I believe that money would be better spend increasing frequency on the fairly trunk route 65 rather than making an hourly DART route going through neighborhoods that will almost never use it.	5/12/2015 8:04 PM
636	I don't understand how changing the route 16 onto Dexter from Aurora Improves service. Taking the bus off of Aurora will make the trip downtown far longer and much less reliable. This is a decrease in service, not an improvement and it will definitely affect my use of transit to go downtown and will affect my decision as to whether to go downtown or to shop at Northgate or at Alderwood mall, both of which are easy to drive to with plenty of parking. This change in service will definitely decrease my likelihood of going to cultural events downtown, particularly at night, when unreliable service makes waiting for the bus very unattractive. Also, I voted for the taxes to support improved bus service and I've gotten decreased service. I will not vote for transit improvements in the future. It's a waste of money.	5/12/2015 7:57 PM

637	First, I don't see how changing the 16 route by using Dexter instead of Aurora Avenue improves service. This change would increase the time to get downtown. Second, I am disappointed that after voting to increase taxes to improve bus service I am getting a decrease in service on the 16. Not much improvement on the 44 and a decrease in service on the 31 and 32 as they will no longer come through to Stone Way. I will not be voting for increasing taxes to improve transit in the future. It's a waste of money.	5/12/2015 7:48 PM
638	I am deeply disappointed to see that Lake City, particularly south of 125th St., has been completely neglected in any of these N.E. Seattle transit improvements. This area is underserved, with chronically delayed and overcrowded buses, which contribute to my 13-mile commute to lower Queen Anne taking up to 2 hours each way. PLEASE FOR THE LOVE OF GOD make some transit improvements to Lake City!	5/12/2015 7:45 PM
639	If 48 needs to be split into 2 routes, it would make my commute longer. Maybe have the regular route still operate at least some of the time.	5/12/2015 7:38 PM
640	Do you have a bus from light rail at Husky Stadium by Children's Hospital? That is greatly needed.	5/12/2015 7:32 PM
641	On the Route Map for revised Route 16, it looks like Route 16 will no longer go to the Ferry Terminal, Pioneer Square/S. Jackson St., yet neither did I see any marks indicating that portion of Route 16 would be eliminated. Please advise.	5/12/2015 7:22 PM
642	I do not take the link light rail now and I do not plan on taking it in the future I am scared of it.	5/12/2015 7:20 PM
643	Northgate to Wallingford & Fremont: Currently the #16 serves the north end of the mall on NE Northgate Way, where several senior living centers are located (on 3rd NE and 5th NE). The stop on NE Northgate way beside the Petsmart is always in use by seniors and those in mobility scooters, to access the hospitals and clinics along Meridan Avenue. You are completely eliminating this segment and replacing it with nothing. This is neither helpful or more frequent service. For those of us going further, to Green Lake or Wallingford, we must now make our way to the Transit Center - a good 15 minute walk for a fit person, in order to catch the replacement line, the 26X. You are replacing a service that currently runs 3 times an hour with one that runs twice an hour. Again, neither helpful or more frequent service. Unlike the 16, which runs down Meridian Ave N to NE 45th street, and along NE 45th for all the shopping and restaurants, you propose using the 26X which goes down Latona Ave NE, and crosses NE 45th just by I-5, almost a mile away. This effectively bypasses the best part of Wallingford! So, no direct access to Wallingford from Northgate any longer. Great, more diminishment of service. I see absolutely NO benefit for passengers in Northgate with the reroute of the #16. This also has nothing to do with the UW Stadium light rail station opening. You are just messing up connectivity in Northgate SIX YEARS before the station there is due to begin service. This is just incomprehensible. Elimination of the #68: While I see the #67 reroute will cover some of this eliminated route, what are people who live on NE 75th St between Roosevelt and 25th Ave NE going to do for a bus? Have you seen how steep that hill is? Do you realize that the 372 on 25th Ave is always standing room packed during peak commute hours? Also, with this change there will be no bus route between Northgate and UW Village - yet another shopping area eliminated for those reliant on public transit. Please explain to me you rationale for making all these changes to bus routes that run between Northgate and the UW area, when they have no bearing on the UW light rail station opening to serve all points SOUTH of there. With the exception of tweaking timetables for more efficiency and less overcrowding on existing routes, no route changes should even be considered until the Northgate light rail opens in 2021. THEN some of these changes might be justified, but not until then. With each and every route change north of the Montlake Cut and the new UW station, you are creating the need to change buses at least once where before there was just one bus ride. You are also making people walk further, which has a deeply negative impact on the elderly and disabled. This is NOT what I voted for when allowing you the extra revenue to IMPROVE bus service! You propose deleting SIX bus routes from the UW northward, yet the 4 routes you are creating (reviving) are all SOUTH of Montlake. How is this an improvement? How is this expanding bus service since getting all that additional funding from sales tax and car tab fees? How are we supposed to take you seriously? This is NOT acceptable, unless you are planning on encouraging more people to drive to work.	5/12/2015 7:17 PM
644	Why do I have to take a bus to campus and then walk to the rail station instead of being dropped off at the station. Also I had trouble with your survey. When I tried to move to the next question and touched the screen it thought I was either changing or marking an answer. Also your set five choices don't speak to every ones opinion of the questions.	5/12/2015 7:09 PM
645	I would like to see lite rail go to Lynnwood/Mill Creek so we wouldn't be slowed by traffic stalls	5/12/2015 7:02 PM
646	28 should stay on the Fremont bridge. West Greenwood to Fremont core is a needed route and the only one is the current 28.	5/12/2015 6:56 PM

647	The 71 all day service (every 30 minutes) from Wedgwood at 85th st is essential as there is no other direct service from downtown Seattle to Wedgwood. Keeping the 76 is great as this will be a shorter trip to downtown than having to make a connection to a light rail station, however with the current proposal there is no good option to get downtown during non-commuter hours. It's okay if you're near 65th st but if you're at 85th st near 35th ave the options are almost nonexistent.	5/12/2015 6:50 PM
648	I very glad that the 26 (to be 26X) will not be eliminated along Latona!	5/12/2015 6:50 PM
649	I just moved to Maple Leaf under the assumption that I would continue to have good options for commuting to the Eastside. The 242 route provides me a means to walk to the bus stop and then walk to the office as well. It offers a single route that gets me where I need to go with no transfers. It lets me focus on work or whatever else I need to do on my commute since commuting from Maple Leaf takes a long time. This change will make working on the bus significantly harder and potentially longer if I end up spending a lot of time waiting for connections.	5/12/2015 6:43 PM
650	I think more distributed to the neighborhoods bus routes are better. It is often difficult to get to the major corridors to get to the bus. The mobility needs of older people are not well served by the changes proposed by Metro.	5/12/2015 6:38 PM
651	I'd like to see less of the Sound transit trains being set up due to the high cost of implementing this from a structural and also a service perspective as well as the increased traffic issues due to setting up the tracks, more vehicles on the roads, too much disruption already in the downtown tunnel due to the use by trains and buses and the additional cost of paying for the train service by passengers. People are already paying much higher rates for ORCA cards, including the Reduced Fare Orca card. I strongly encourage you not to cut the bus #43 as it is so convenient and is currently covered by the Orca card. People with disabilities and seniors are particularly impacted by this proposed cut to bus service and increase in fares. If this change is going to be enforced, it would have to include the cost of the Sound Transit service, including the train, be included in the Reduced Fare Orca card without yet another increased cost of the ORCA card.	5/12/2015 6:33 PM
652	I am extremely disappointed that Lake City (especially south of 125th St.) has been completely neglected as you look at improving service in NE Seattle. My daily commute from Lake City to lower Queen Anne is a nightmare, with overcrowded, chronically late buses taking up to 2 hours each way for a 13-mile trip. PLEASE FOR THE LOVE OF GOD make some improvements to Lake City service!	5/12/2015 6:24 PM
653	While the 67 is nice, it does not meet the need for a speedy and direct connection between Northgate and the new UW station.	5/12/2015 6:15 PM
654	Please, please, please DO NOT do away with the current route of the 71 bus that serves the U District and downtown. I rely on it to commute to the UW, and frequently use it to get downtown. I'd have to walk 15 blocks to get to the 65, or 10 blocks if the 71 went only on 65th, and then transfer. This might not be a problem once light rail comes to Roosevelt, but that's six years away! Those of us who live half-way between Sandpoint Way and 35th will be basically stranded.	5/12/2015 6:06 PM
655	All these questions and you don't even ask about the changes to route 28/28X. They are the same changes, I believe, as proposed before. Given that, and that you don't ask for responses, I have to assume that you're determined to revise the route with or without public response. Nevertheless, I'll reiterate my objection -- mainly, that the route through Fremont is heavily used by riders and that rerouting onto 39th Street imposes a hardship on these many riders. 39th Street is steep, heavily trafficked, and a significant climb above the center of Fremont where many people board and disembark. For me personally, it would be the final straw. Several years ago you chose to eliminate stops both near my house and near my business. I now have to walk several additional blocks to ride the bus. Elimination of these stops has had minimal effect on the timeliness of bus service so it is a pure inconvenience. If you implement the route change away from 36th Street, you are adding several more blocks to my walk. For the price of a ride, I can deal with inconvenience or delay, not both. This proposal promises both and makes the revision a bad deal.	5/12/2015 6:02 PM
656	Thanks for listening! I can't wait.	5/12/2015 6:02 PM
657	My family are heavy transit users. There are the following needs: 1) Route 50, that serves seaward park: It is EASY to get OUT of seaward park area to light rail, but HARD HARD to get from light rail back to seaward park. 2) North end: UPREP: Corner of 25th Ave NE and NE 80th: We need a great route from this intersection to/from the husky stadium light rail. (We have multiple kids at uprep) Thank you!	5/12/2015 6:01 PM
658	I want to know that if we are gaining more transportation modes that the safety of pedestrian traffic is not compromised.(no one gets hit by a vehicle, and the buses we have are well maintained and checked on regular basis) I am possibly not educated in how much all these changes are REALLY going to affect the amount of single drivers on the road. BUT I pray to God that more incentives and such are making people smarter and living more green for our city's health. I am among many commuters that give up on the bus more often and carpool with another driver to get to the Eastside for work, from Ravenna/ Wedgewood/ UW/ Sandpoint. The 542 is AWESOME, but it doesn't run late enough or on the weekend.	5/12/2015 6:00 PM

659	None of these route changes or improvements are in my neighborhood or neighborhoods I travel to or through regularly.	5/12/2015 5:58 PM
660	PLEASE KEEP THE ROUTE 73	5/12/2015 5:57 PM
661	I take the 71 on a regular basis at 40th ave & 75th st in the middle of the day to get downtown. I am concerned about the deletion of this route. I am not sure if taking the 65 to the light rail will be a sufficient alternative. Also the 941 doesn't seem to operate very often. I understand we could reserve pick up times. I would need more information about this service to feel comfortable with the change.	5/12/2015 5:55 PM
662	1) Could the 65 be extended to the layover area Metro built at 143rd & Linden? This would provide a nice crosstown along 145th Street and provide connections to the E-Line and Sound Transit's service along I-5.	5/12/2015 5:54 PM
663	Will the 43 continue its' same route? The train goes from one side of Capitol Hill to the UW - what about the other side of Capitol Hill?	5/12/2015 5:53 PM
664	No matter what else you do, if you cut route 71, a huge chunk of residential area west of Sand Point and east of 35 ave. will have no service. If I continued to live where I am, I would be UNABLE to use 95% of the current public transportation I rely to get to work and school, and I know I am not alone.	5/12/2015 5:52 PM
665	None of the changes seem to help the Capitol Hill area except in the Pike-Pine corridor(\$\$\$) and it seems all resources are going to the richer north end of Seattle as always. There are those of us who do not drive and live in and take transit in the CD/Capitol Hill that the elimination of the 43 will greatly affect. Instead of taking one bus to the Green Lake/Wallingford area I will now have to take up to 3 buses. That is not expectable. I know everyone wants the "Poors" out of Seattle to make way for all the tech dollars, but really? The tax payers of Seattle passed a tax increase so that service would not be impacted as much as it would be in most of King County and this is how the funds are being used. Only the north end, Madison Park and Part of Capitol Hill are being listened to and accommodated? WOW!!!	5/12/2015 5:50 PM
666	It seems that many of the changes were part of the cuts proposed by Metro before revenues rose back up! Seems like it's all kind of a scam....	5/12/2015 5:49 PM
667	You are abandoning bus riders who have to walk to catch a bus to get anywhere. You've already eliminated every other bus stop increasing the walking distance for seniors and the disabled. Now you propose to eliminate direct bus service downtown via the University District for everyone who regularly uses the local 73 for doctor appointments and shopping. By concentrating on connecting to the link light rail, you are leaving non-commuters in the lurch. I have no use for the link light rail - I need an easily accessible bus route.	5/12/2015 5:48 PM
668	As an older person with no car, I can now take the #31 directly from Magnolia to Campus Parkway during midday hours, then stay on the bus as it becomes the #65 and travel to 35th Ave NE and NE 82nd Street (Seattle Audubon), where I typically need to go to purchase 25 pounds of birdseed every six weeks. Breaking direct link between the #31 and #65 would add as much as an hour to a trip that normally already takes an hour and a half at minimum, and would mean having to board and reboard buses while carrying a heavy load around on the return run. No faster alternative ways to get from Magnolia (where I live) to NE 82nd Street exist. I do appreciate the fact that service levels on the #31 have been maintained, but do not like having the direct connection with the #65 broken and ask that this through connection be maintained. Please keep me informed as you continue to revise the forthcoming changes. My email is: essay@nwlink.com -- thank you.	5/12/2015 5:48 PM
669	none	5/12/2015 5:47 PM
670	These changes look AMAZING!!!!!!! Thank you all for your hard work on crafting a thoughtful, smart, transit proposal. I am super excited for these changes to happen. The new route 16 makes East-West travel from Northeast Seattle WAY easier. And the increased frequency of route 75 will make it much easier to connect to/from the Light Rail. These changes will allow me to take transit for SO MUCH MORE of the traveling I do around Seattle. I can't wait! Thank you for all of the hard work and thought that you put into this.	5/12/2015 5:47 PM
671	71 eliminated????? For all we older folk who have no cars and only use 71 ALL the time.... this is horrible!!!!!!!!!!!!!!	5/12/2015 5:44 PM
672	I am very disappointed that Route 71 is to be discontinued. This route serves View Ridge well from early morning to late evening 7 days a week. The DART service cannot compare to the current service. While DART may be convenient to a few people, eliminating a key route in this area is a poor decision. If one insists, DART may be added for the few elderly people that may take advantage of this service during the peak daytime hours but you are doing a disservice to University students and employees that routinely use this route. Route 941 times are insufficient, it does not run on weekends, and it requires walking up or down a steep hill to get to the bus stop. I thought with the increase revenue that was provided to Metro that this route would be maintained. I believe it is a big mistake to eliminate this route.	5/12/2015 5:42 PM

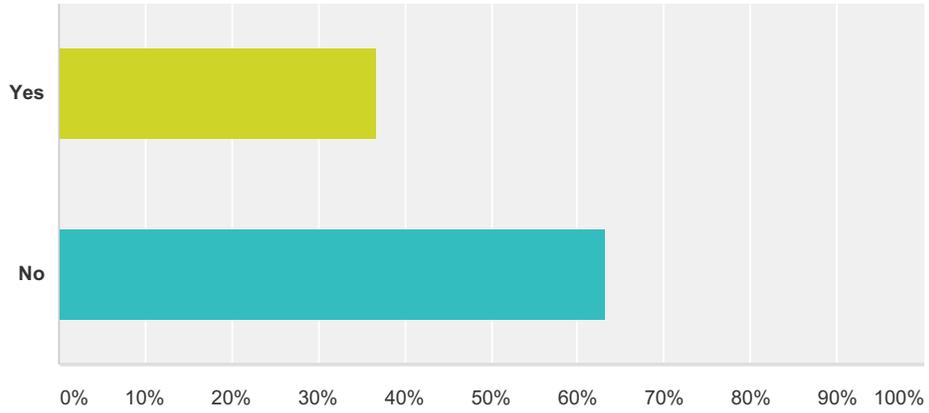

673	I hate the fact that route 72 is being deleted as it provides a direct route to downtown Seattle and would be replaced by route 372. I don't have a problem with transferring to Light Rail at Husky Stadium but route 372 is routed on to the UW Campus and for passengers to transfer they would have to walk across the campus to do so and that is a bunch of BS. Why can't route 372 be routed down Montlake Boulevard to the light rail station and then routed onto the campus. Under this proposal passengers will be FORCED to walk through all kinds of weather to be able to get to downtown,. Again I repeat that is a bunch of BS. Either route 372 directly to the light rail station or keep route 72 and route that to the light rail. The taxpayers in Seattle voted to increase their taxes to support Metro and maintain and improve service but instead the riders of route 72 are not getting what they voted for. In short Metro is giving them the shaft and that is a bunch of BS. And if you don't know what BS that stands for bull shit.	5/12/2015 5:40 PM
674	The best part of this proposal for me is the frequent all day/evening service for Sandpoint. Right now I can't use the bus as I work from 11:30am to 8:00pm in Sandpoint.	5/12/2015 5:38 PM
675	A mini-van for which I need to make a reservation is not at all useful. The reasons for the DART service include narrow and winding streets, not at all applicable to NE 65th St, which forms the bulk of the current route 71. If the current route 71 is considered redundant with other buses in the area and there is overlap with other 70 routes, why not run it down to the University Light Rail station? Then we could transfer to go downtown. Or run it to 15th Ave NE for a transfer to campus. No other route serves View Ridge. The half-hourly service is reasonable, especially since the 71 is mostly on-time, except when it comes from downtown. Besides we have One Bus Away, so we know when it is coming.	5/12/2015 5:37 PM
676	I hate the proposed changes to Route 73; I need that route frequently and seven days a week from 6 AM - 11 PM. If weekend service is ended, I will drive to the U District from 15th Ave NE & NE 125th.	5/12/2015 5:35 PM
677	I hope that the new 28X route will make a stop in Fremont. I have been frequently using the stop at 34th & Fremont to get downtown on the 26, 28, and 40. It looks like now only the 40 will be available at that stop, and it's the slowest bus ever. I would walk a few extra blocks to be able to get on the 28X, so I hope it makes the stop at Fremont & 39th, or wherever it crosses Fremont Ave.	5/12/2015 5:35 PM
678	I think the changes are great, in general. I still have reservations about the fact that the 75, my regular bus, won't stop at the new Husky Stadium Link station, and will require a hike to get from UW Stevens Way to the Link station.	5/12/2015 5:32 PM
679	More frequent buses on route 41 and having more of them go all the way to Lake City. Routes connecting to Northgate Transit Center (like the 66) should make fewer stops to reduce travel time. Also more convenient park and ride parking spots (closer to the bus stop) at Northgate.	5/12/2015 5:31 PM
680	i wish there was more transport from downtown Seattle to commuter areas., People that live in Seattle cannot go to so many places because the transit only goes downtown in the morning and in the evening transport only leaves Seattle. This policy cheats many taxpayers.	5/12/2015 5:31 PM
681	I think the 73 should have a more direct connection to the University of Washington/Husky Stadium Link Station. It appears the 73 is doing a loop through UW without connecting to the triangle parking lot near the UW Medical Center/Husky Stadium Link station. This connection is excellent otherwise.	5/12/2015 5:31 PM
682	I really like having the option of reliable transit from Maple Leaf and the Northgate Transit center to the new light rail at UW. We would take advantage of that not just during rush hour, but for evening and weekend sporting events when I-5 is impassable. Thank you for working on these new routes and giving us a chance to comment.	5/12/2015 5:29 PM
683	Please keep the 48 together. The light rail doesn't do anything to provide access to the Central District from Greenwood, and it is very important to me to have a route there without transfers.	5/12/2015 5:28 PM
684	I use the Route 25 every work day. Our bus is frequently standing room only in the morning. For many of us in Montlake it is by far the most convenient bus to take. I strongly oppose cancelling the route.	5/12/2015 5:23 PM
685	This is regarding route 73. I live at NE 123rd st and 15th Ave NE and my husband work at UWMC. He currently takes route 73 to get to work on Saturday and Sunday for his shift that starts at 6:30 AM. Your proposal, despite of people wanted to have more weekend service, cut off his method of transportation. What this means is I have to drive him early in the morning on what you considered as people's "weekend". New proposal for route 73, which would be effective in 2016, clearly ignore any people who work at Medical Center and live in north of Northgate way. Hospital operates 24/7 and there are quite large group of employees who live in north Seattle area. By having this new proposal, you're forcing them to drive to University instead of currently way of them taking bus. Also this would increase vehicular traffic on weekend (Sat and Sun) to univeristy district for people who would like to go to games, as well as farmer's market. I believe you're new proposal actually enforce people to drive more on Sat and Sun by cutting route 73 on those two days and show that you do not care for people whose only method of transportation is Metro. Please bring back route 73 weekend runs even if it is hourly. Thank you for your consideration.	5/12/2015 5:22 PM

686	Must know more before a solid opinion is forthcoming	5/12/2015 5:22 PM
687	Cutting the 26 when it was already packed was absurd. It had plenty of demand and yet you choose to service low usage routes for people who live in the suburbs by choice. Your 26X solutions are inadequate.	5/12/2015 5:21 PM
688	Having more buses on the weekends.	5/12/2015 5:16 PM
689	don't change the 28X	5/12/2015 5:13 PM
690	As long as my stop at N 34th Street for the 26, 28 and 40 won't be gone, I'm okay with the changes.	5/12/2015 5:12 PM
691	I live within walking distance of the future Roosevelt Station, but I commute every week day, so five years will seem like a long time to wait for light rail. As such, I would like to add the following comment: more frequent bus access to UW Station from North and NE Seattle will be pointless if it takes longer to connect me from my house to Husky Stadium than it does to connect me from my house to downtown via bus on I-5 express lanes. I could see this happening given the massive amount of congestion on Montlake and Pacific. Since no new bus-only lanes are included in any of these proposals, has anybody approached the UW to consider making Stevens Way a bus-only road during peak congestion hours? .	5/12/2015 4:55 PM
692	!This is a huge problem for all the Garfield and Holy Names high schoolers who currently take the 43 route from 23rd north to 65th st near Roosevelt High School and then transfer to 71 or other routes by Roosevelt HS to get home. I cant see how my kid can get home anymore!! Please make plans for all these kids, who fill the after school 43 and 48 buses heading north and need to get to Roosevelt HS to transfer or walk home.	5/12/2015 4:23 PM
693	Please do not cut the 242 route. It is full every morning and helps to 1) alleviate an already over congested 520 and is one of the few buses that helps riders transit from Seattle to the eastside. The proposed alternatives will add an hour to commutes to the eastside of those who choose to travel via public transit and spare the environment extra emissions and extra fuel. How about raise toll and parking rates to encourage single drivers to take public transit, currently based on the amount of commuters the toll rates / parking fees are not exceeding the demand.	5/12/2015 4:00 PM
694	How do people who live on 25th get down to light rail, especially on the weekend? I currently use 372x or 68 to transfer to 70s to get to downtown. There are no buses purposed for the 25th and 75th corridor. We voted last year to expand Metro services to take place in June. Now those purpose are obsolete due to the light rail at Husky Stadium. So how do people in the 25th Ave and 75Th get to 1) the light rail station and 2) the U-District?	5/12/2015 3:55 PM
695	Living at 46th & Burke in Wallingford, it seems that me and my neighborhood are one of the few losers in this proposal. Route 16 turns into a slow milk-run though Fremont and Dexter while the 26X comes every half-hour off peak and is 7 blocks from my apartment. While nice to have a bus to Fremont, I'd much rather have a fast bus downtown. On paper, 44 to Link makes sense as a great way to get downtown. However, we all know 45th Street sucks for reliability, Route 44 is already packed, and it'll get worse as more people would be drawn to Link. If this were 2021 with U District Station opening much closer to Wallingford, this would be a different story and the 44 would be a lot less painful. Some back-of-napkin calculations based on the current 26 travel times from OneBusAway and person experience: my commute to the Central Business District will be somewhere between 10 to 20 minutes longer each direction by adding a 7-block walk to the 26X, using 44 to get to Link including the transfer time into the 100' deep station, or slogging it out on low-speed Dexter with the 16.	5/12/2015 3:21 PM
696	Rerouting 73 off of The Ave and down 11th makes it a lot less convenient for riders who have UW central and north campus their destination. I ride this bus everyday and these stops are heavily utilized by both boarding and disembarking riders. It's going to make using metro a lot less convenient for me.	5/12/2015 3:15 PM
697	I don't mind that some of the routes are going away, but I feel they are being replaced by a better system and would provide more options for us. Especially in getting to the Sound Transit Station at the University. Plus the other options for getting round the area will be much easier and efficient for me. Great job, just get it finished tomorrow, I want to start using it right now! Thank you.	5/12/2015 3:09 PM

698	Since route 72 and 71 are the two routes I normally use to get to the U District and downtown, eliminating them will make bus use much more difficult for me personally.	5/12/2015 2:45 PM
699	My main concern is the few number of buses that actually go directly to the Light Rail. The new configuration would add a half mile walk between the bus I take and then to the UW Light rail. For airport transport this is lugging luggage a long way, it is not useful in bad weather and, well, I ain't getting no younger, as they say. The STEven's way option is hilly as it exists now and a long walk for many types of people. Why not get these lines all the way and make a seamless transition between bus and light rail? This baffles me. The increase in frequency is great. The new E-W options are great. But my main route is either downtown or the airport and this arrangement makes it a much more challenging option and I presume I am not the only one. Are there not more options for direct transfers AT the light rail? Is the traffic designed so poorly that it cannot be accommodated? It would accommodate truck after truck of dirt. Why not busses?	5/12/2015 2:42 PM

Q23 Would you like to give us feedback on changes being considered for Capitol Hill and the Central Area, including Montlake, Madison Park, and Madison Valley?

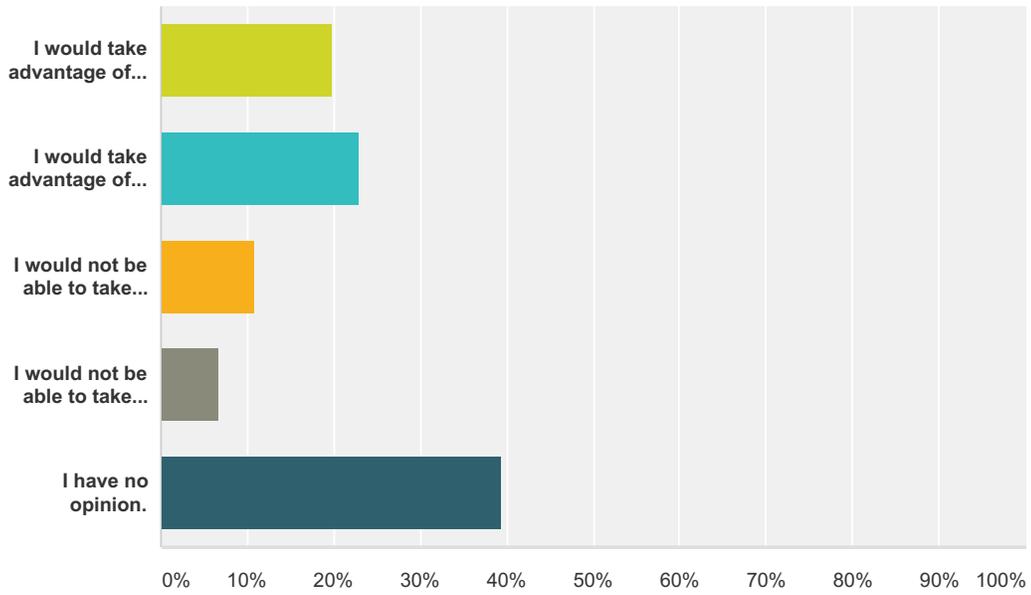

Answered: 1,551 Skipped: 421

Answer Choices	Responses
Yes	36.75% 570
No	63.25% 981
Total	1,551

Q24 How would these frequency improvements affect you?

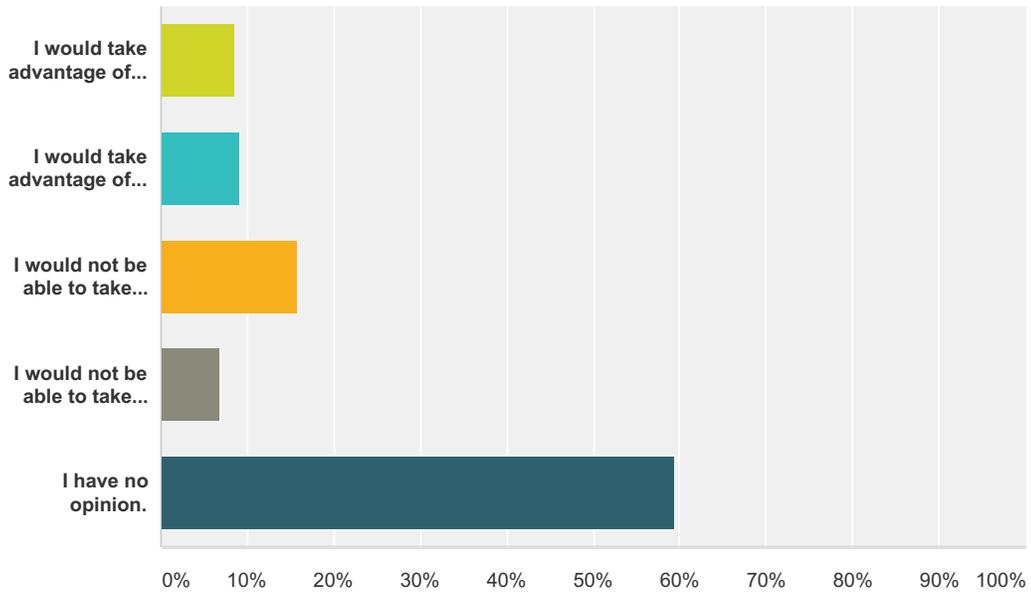

Answered: 1,389 Skipped: 583

Answer Choices	Responses
I would take advantage of them and use transit more than I do now.	19.87% 276
I would take advantage of them and use transit the same amount as I do now.	23.04% 320
I would not be able to take advantage of them, but could accept these changes.	10.80% 150
I would not be able to take advantage of them, and could not accept these changes.	6.77% 94
I have no opinion.	39.52% 549
Total	1,389

Q25 How would a revised Route 11 affect your use of transit?

Q26 What do you think about the proposal to split Route 8?

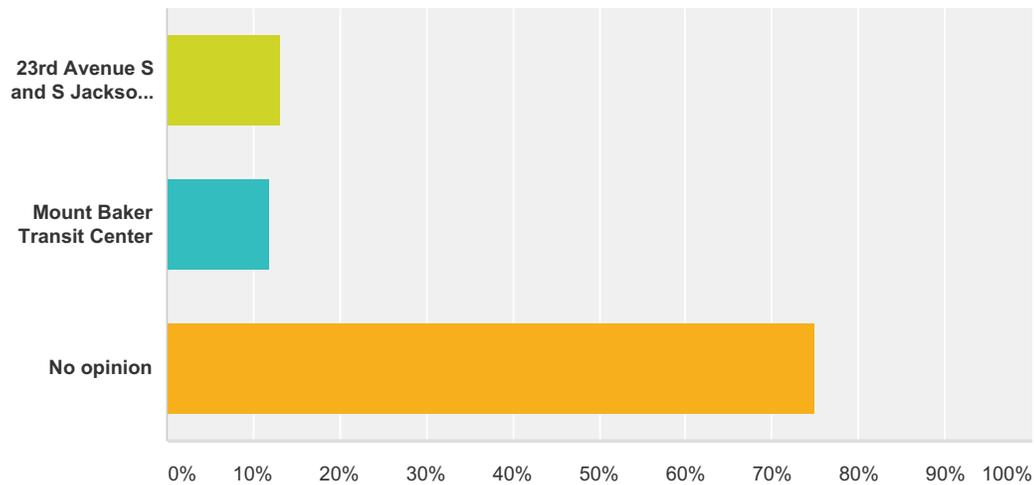

Answered: 1,241 Skipped: 731

Answer Choices	Responses
I think this change should be made to improve the reliability of the service.	22.56% 280
I don't think this change would improve the reliability of the service, but could accept it.	6.20% 77
I don't think this change should be made because the reliability improvements do not outweigh the negative impacts on the connections provided by the way these routes are through-routed now.	8.46% 105
I have no opinion.	62.77% 779
Total	1,241

Q27 If Metro splits Route 8 into two routes, where would you prefer the split to occur?

Answered: 1,245 Skipped: 727

Answer Choices	Responses
23rd Avenue S and S Jackson Street (currently proposed)	13.25% 165
Mount Baker Transit Center	11.89% 148
No opinion	74.86% 932
Total	1,245

#	Other (please specify)	Date
1	I thought the 8 proposed in Alternative 1 was vastly superior to the one proposed here. I thought the 38 routing was sub optimal and seemed to exist mostly to serve a chunk of Madison that already has plenty of other options, especially with the new 11.	5/31/2015 9:50 PM
2	Neither of these areas are particularly desirable areas to have to switch buses during night time hours in terms of safety, especially considering there is no security at Mount Baker TC.	5/31/2015 11:03 AM
3	The 38 should be extended a bit north to Garfield High School. Having the 8 go to Mt Baker Transit Center is almost as long as the existing route, and not much of an improvement. The ideal thing would be to get the 38 to Capitol Hill Station somehow.	5/30/2015 9:22 PM
4	I'd prefer that the split happened at Capitol Hill Station, to encourage transfers to Link. If that's not possible a split at the Mount Baker "Transit Center" is a much better option than 23rd Avenue S and S Jackson Street.	5/30/2015 12:30 AM
5	My first choice would be to have the routes split at Capitol Hill Station... but if there's no way that could be done... the Mount Baker "Transit Center" is a *much* better option than 23rd Avenue S and S Jackson Street.	5/30/2015 12:22 AM
6	I strongly support Metro's proposed change. I think that Jackson is the perfect place to break up the route, not least because I think that it could eventually turn into the modified Route 106 that Metro has previously proposed. Splitting at Mount Baker is almost pointless, since it means that everyone between 23rd/Madison and Mount Baker has to suffer the unreliability of Denny.	5/29/2015 8:52 PM
7	If the routes split i would like to see more orca machines on the street and not just at the main transit runner stops ... 23rd & jackson would be an ideal location	5/29/2015 6:41 PM
8	Note: I currently use route 8 to get to Mount Baker Transit Center. However, it's already faster to transfer to the 48 at John Street. So for even for me, the 8 doesn't need to serve Mount Baker Transit Center.	5/29/2015 2:13 PM

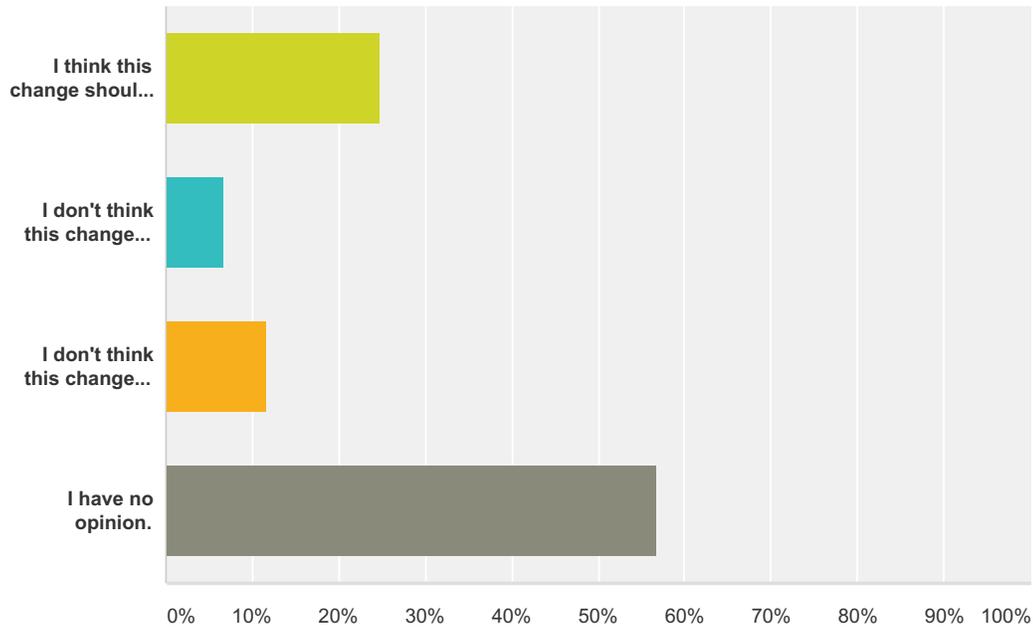

9	Currently take 8 to Link at Mt Baker. Would be able to take it the other direction now to Cap Hill Link, but unsure how new changes would affect real world route reliability given traffic, etc. This would provide both options, however.	5/29/2015 12:14 PM
10	Splitting Routes 8 and 48 along the racial lines of Seattle indicates a shift towards re-segregating the city. The negative impacts include increased and concentrated poverty among blacks, and may lead to higher unemployment and lower school completion rates.	5/29/2015 9:57 AM
11	No if. Please break route late.	5/29/2015 8:03 AM
12	I seldom visit these parts of town and when I do, I prefer to drive.	5/28/2015 11:10 PM
13	I would assume whichever is safer for riders...	5/28/2015 10:45 PM
14	When route 11 was split into two routes, reliability did not improve! I doubt it will improve in the case of route 8 either, but I can accept it. It's worth a try.	5/28/2015 6:15 PM
15	i would have preferred to see the routes specifically on your explanation area. i couldnt figure out what was listed there for this route.	5/28/2015 4:43 PM
16	I support any terminus that will make electrification more likely.	5/28/2015 4:22 PM
17	My neighbor who is in her 60's will have to walk an additional 3 or 4 blocks if the bus split starts on Jackson. She would have to take the 48 to the Mount Baker Station to get to the 8, which adds more time and stress to her commute. Stops that were convenient for people with small children, groceries to carry and disabilities were removed, so to add even MORE changes that impact these people is moving into ridiculousness.	5/28/2015 4:14 PM
18	Route 8 - Honestly it's the only route to get people from Seattle Center up across 5 without going downtown. Unfortunately it's super backed up by all the people waiting to get on I-5. Can we just let the drivers use the left lane and cut out half the stops so merging isn't such a problem. It's like...you can see the bus is 4 blocks away but those 4 blocks take 10-15 minutes. But only the right lane is backed up right there on Denny. The bus is just very unfortunately stuck in a lane waiting for a highway it's not going to get on. Or make a bus lane there - but that's expensive :P. Oh! Or we could route the bus along a street /one block off/ Denny?? I'd be thrilled.	5/27/2015 5:34 PM
19	NO UW DISTRICT TO SAND POINT!!!	5/26/2015 7:58 AM
20	It would be better if the split route 8 could serve Garfield High School, perhaps doing the turnaround at 21st and Jefferson like was proposed last year.	5/26/2015 2:44 AM
21	There was no comment box for the 48, but splitting that route would be a really bad idea. It cuts off students in the south and central areas from K-12 education north of the canal. It also serves to separate the white areas of the city from the non-white areas. I can't help but wonder if this was the underlying motivation.	5/25/2015 10:40 PM
22	My son will attend Washington Middles School (2101 S. Jackson) in the fall. He may take #8 to school. It would be great if the #8 went closer to the school, perhaps by looping around 20th Ave S instead of 23rd. These are 11-year-old kids on the bus!	5/23/2015 11:59 AM
23	My son will attend Washington Middle School (2101 S. Jackson) in the fall, and may take the #8 bus. It would great if the #8 could go closer to the school, perhaps by looping around 20th Ave S instead of 23rd Ave S. These are 11-year-old kids going to school on the bus!	5/23/2015 11:50 AM
24	Please split the route at the transit center. This provides access to the Link lght rail. Do not split at Jackson.	5/21/2015 4:17 PM
25	I generally take route 8 from Aurora Avenue and Denny Way to routes east. Frequency of route 8 is generally OK but occasionally is quite late due mostly to traffic issues. More buses would help alleviate this issue.	5/20/2015 12:50 PM
26	I work at a school 10 blocks from 23rd and Jackson- what a waste of time to have to transfer, Also please take into account the Lighthouse for the Blind which uses #8 a lot. A lot of the passengers are blind/deaf and use the #8. Splitting at Mount Baker would help them to continue on this route without transfers	5/19/2015 9:22 PM
27	This route should extend to a light link center, so that people can continue to access the southern parts of the city without going downtown.	5/19/2015 10:11 AM
28	What about the South End. We ALWAYS are the last to be considered. You took away one of the busiest routes in the South End of Seattle. Bus #133. This Bus was always packed and sometimes standing room only. In order to get to the U-District from the South end we would have to transfer busses 3 times and it would take a lot longer then just driving in the traffic. Infact, there isn't a bus that can get me to work ontime.	5/19/2015 9:58 AM
29	Do not split it	5/19/2015 9:36 AM

30	This does nothing to impact the West to East trip. It recently took an hour to travel between the Dexter and 15th Ave bus stops, and service is typically 20+ minutes late. You'd be better off improving traffic flow on Denny, especially putting in a "no right on red" turning eastbound on Denny at Westlake.	5/19/2015 9:26 AM
31	I said I did not want to give feedback on Capitol Hill and Central Area proposal and yet I cannot skip it. This is a very badly designed feedback system!	5/19/2015 9:22 AM
32	Madison Valley was also a reasonable option.	5/18/2015 12:48 PM
33	Madison street	5/16/2015 4:15 PM
34	I don't consider these to be safe locations.	5/16/2015 2:27 PM
35	same comment as before - the entire proposal is impossible to understand at all, so how can I comment?	5/15/2015 5:02 PM
36	My observation is that reliability problems are heavily centered on Denny Way, and not significant between the proposed split point and Mt. Baker TC. Having access to Link at the south end should be an important goal, and introducing a bus transfer so close to that point seems counterproductive.	5/15/2015 12:22 PM
37	The 8 needs more late-night service too. 3 times per hour minimum. And once per hour on weekend nights is not nearly often enough. The 8 is a very key link to the near-south to people in the CD. Stopping it at Mt. Baker instead of the currently proposed Jackson St. hooks it up with a lot more buses AND Link, at very little marginal cost.	5/15/2015 10:05 AM
38	If the split is an attempt to improve the timing of this run, you cannot realistically expect any improvements on delay unless the 20-30 minute back up on Denny Way from lower Queen Anne up to Denny and Stewart is addressed. Traffic attempting the crawl up Denny to reach the 1-5 entrances make this the most inefficient of all through ways. As important as it is to have a route that reaches the edge to downtown and allows for people to reach the South Lake Union/Cascadia core, I can only foresee 4 or 5 number 8 busses along Denny after I've given up and started walking up toward Olive.	5/15/2015 9:24 AM
39	Capitol Hill station. (That is the point of having this restructure.)	5/14/2015 1:09 PM
40	I think splitting this at 23rd Ave S & S Jackson as proposed is the best option for more efficient & reliable service. When I lived in this area I usually gave up on taking the 8 and would walk up to 23rd Ave E from MLK because the frequency was low and reliability was terrible.	5/14/2015 11:06 AM
41	I thought the more northerly split previously proposed made sense.	5/14/2015 11:05 AM
42	There is more infrastructure to support transfers at the Mt Baker station than 23rd and Jackson	5/13/2015 7:43 PM
43	No splitting of this route is acceptable. This proposal borders on racism by requiring some of the poorest riders to take two separate bus routes rather than one through route.	5/13/2015 7:09 PM
44	If you do split the route at 23rd & S Jackson, please continue to improve the stop/facility to handle the increased traffic when people need to transfer between the two routes. To me Mount Baker Transit Center seems like a safer place to do that, but 23rd/S. Jackson seems better in terms of location and avoiding traffic delays.	5/13/2015 5:46 PM
45	Splitting Routes 8 and 48 along northern and southern boundaries re-segregates the routes along racial boundaries, with chiefly whites using it north and blacks using it south of the understood demarcation line of 23rd Avenue South and South Jackson Streets. It is deplorable that Metro transit engages in re-segregating this so-called "progressive" city because it shows how whites have a vested interest in maintaining privilege in "their" city, and the powerlessness of the few blacks who have done very little to stop it. Although community members will couch gentrification in terms of making progress and improving service, I see nothing good from dividing the city along artificial racial barriers to the exclusion of others.	5/13/2015 5:32 PM
46	Prefer the original "Alternative 1" split.	5/13/2015 5:30 PM
47	Closer to Capitol Hill, in order to separate the portion of the route that experiences heavy traffic from the remainder of the corridor.	5/13/2015 5:29 PM
48	MLK. IT IS RIDICULOUS TO EXPECT ANYONE LIVING IN MADISON VALLEY TO CLIMB THE HILL TO 23RD TO GET TO SLU WITHOUT GOING DOWNTOWN. THIS IS AS TERRIBLE TERRIBLE TERRIBLE IDEA.	5/13/2015 5:15 PM
49	OF COURSE THE 8 SHOULD TERMINATE AT THE MT BAKER LIGHT RAIL STATION!!! AND KEEP THE FREQUENCY ON ROUTE 8 UNTIL 1 AM SO WE CAN CONNECT WITH LATE LIGHT RAIL TRAINS FROM SEATAC THAT TERMINATE AT BEACON HILL STATION. You can terminate route at either Beacon Hill station or Mt Baker station, it doesn't matter as long as the 8 connects to trains that arrive after midnight. Transferring buses at 23rd and Jackson after midnight is not safe, so it can not be a transfer point for any bus so late.	5/13/2015 4:40 PM

50	Ridiculous !! More public confusion and more waiting times for transfer connections.	5/13/2015 4:40 PM
51	Capitol Hill Station. That protects the maximum number of riders from the 8's unreliability due to Denny Way.	5/13/2015 2:27 PM
52	Please consider people who take #8 to connect to the LINC!	5/13/2015 1:11 PM
53	Mount Baker provides the Link connection that is best for the CD and MLK corridor. If the whole spirit of this exercise is to improve the transit network by leveraging Link, then this decision should be a no-brainer.	5/13/2015 9:31 AM
54	Better connection to Link at Mt. Baker for CD residents. This whole exercise is supposed to be about leveraging Link connectivity as part of the new network, right? (Fixing Mt. Baker TC itself is a separate problem.)	5/13/2015 9:13 AM
55	Did you look at a turn around near Group Health on Capitol Hill? That would be my personal preference. But Metro should go with whatever serves the system best.	5/13/2015 8:51 AM
56	I do not think that the route should be split.	5/13/2015 7:32 AM
57	Since the 8 typically runs 10-20 minutes late every day, would hope that this split would mean you could count on the 8 to be on time to get you where you need to be on time. Currently, you must catch it at least 30 minutes prior to when you want to leave in order to hopefully make your schedule.	5/13/2015 7:13 AM
58	I think the route has to split at either the Mt Baker Transit Center OR further north than 23rd Avenue and S. Jackson. Perhaps the Group Health on Capitol Hill (16th & Denny) would be better. I often use the 8 as an alternative from the Mt. Baker Transit Center, when connecting with the light rail on the 23rd/MLK corridor and would wish to keep this option, if possible.	5/12/2015 9:36 PM
59	Or at 15th Ave & John, so that central district residents still have a connecting to Group Health.	5/12/2015 9:22 PM
60	8 --> MBTC, especially with proposed frequency increases and planned work on improving bus<->rail connection, is a faster way for me to get to the airport, even once the Capitol Hill Link station opens.	5/12/2015 8:30 PM
61	I'd actually prefer this to be further North; e.g. at 19th and John. It seems like between 19th and Fairview is the busiest part of this route.	5/12/2015 7:40 PM
62	23rd and Union seems like a better split.	5/12/2015 7:33 PM
63	Either could work well.	5/12/2015 7:25 PM
64	I would use only the portion of the route from Queen Anne to 23rd Avenue East.	5/12/2015 5:50 PM
65	An alternative to the reasonable Mt Baker TC would be along MLK near Garfield HS near Cherry, with the added benefit of linking 38 riders to the 3 for First Hill hospitals access.	5/12/2015 5:45 PM
66	WE NEED ROUTE 71 !!!!!!!!!	5/12/2015 5:45 PM
67	This split should be made at CHS since Denny is a parking lot causing the performance problems.	5/12/2015 5:25 PM
68	Again until i get solid info must decline most opinions	5/12/2015 5:24 PM
69	Splitting this route would just separate south seattle from the rest of seattle more than it is right now.	5/12/2015 5:23 PM
70	Ending Route 8 at a transit center makes significantly more sense in terms of building the best overall network with the highest number of transfer possibilities. With Route 8 ending at 23rd & Jackson, the total number of transfers isn't significantly higher, whereas Mt Baker TC offers many more buses and Link Light Rail connectivity. Why end a route so close to a Link transfer point but not quite go the final mile?	5/12/2015 3:24 PM
71	At the Capitol Hill light rail station.	5/12/2015 2:33 PM

Q28 What do you think about the proposal to split Route 48?

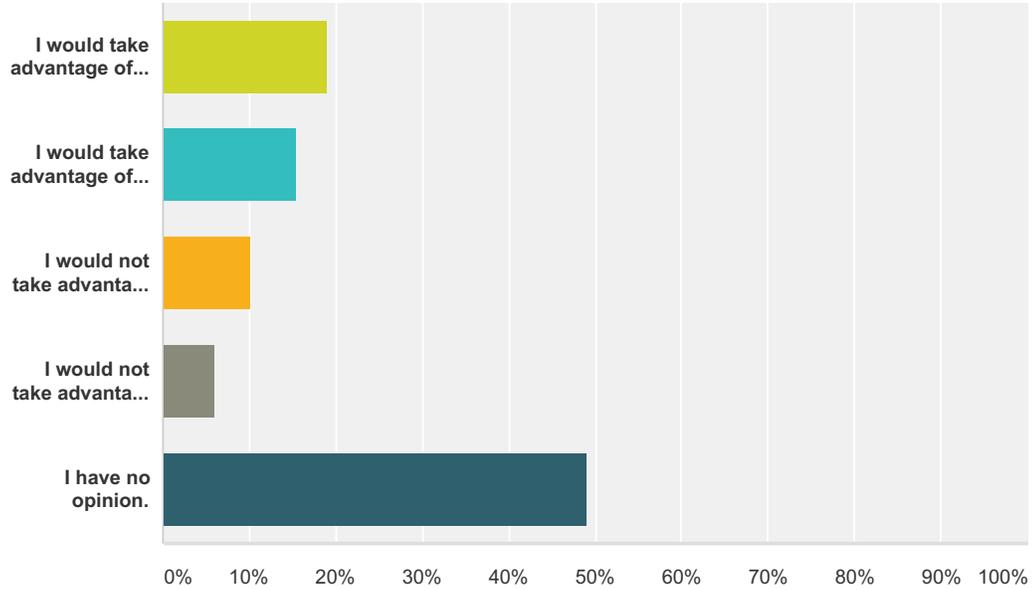

Answered: 1,287 Skipped: 685

Answer Choices	Responses
I think this change should be made to improve the reliability of the service.	24.86% 320
I don't think this change would improve the reliability of the service, but could accept it.	6.68% 86
I don't think this change should be made because the reliability improvements do not outweigh the negative impacts on the connections provided by the way these routes are through-routed now.	11.73% 151
I have no opinion.	56.72% 730
Total	1,287

Q29 How would your use of transit be affected by proposed frequent, all-day connections to the Capitol Hill Station?

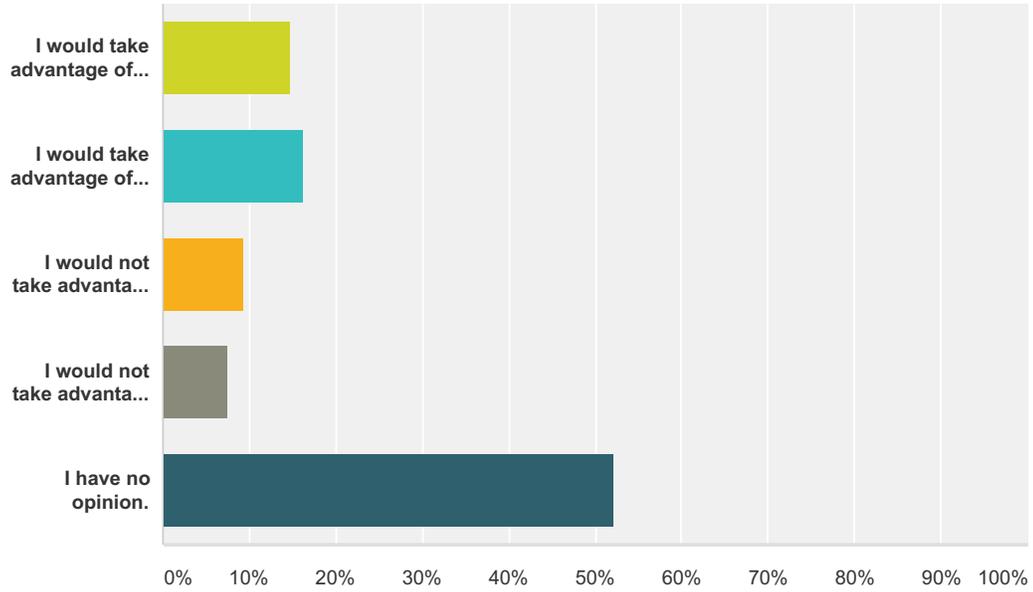

Answered: 1,270 Skipped: 702

Answer Choices	Responses
I would take advantage of these connections and use transit more than I do now.	19.06% 242
I would take advantage of these connections and use transit the same amount as I do now.	15.35% 195
I would not take advantage of these connections, but could accept these changes.	10.31% 131
I would not take advantage of these connections, and could not accept these changes.	6.14% 78
I have no opinion.	49.13% 624

Q32 Do you have anything else to share with us about Metro's proposal for Capitol Hill and Central Area bus service, such as ideas for how to make the proposal better meet the mobility needs of your community?

Answered: 393 Skipped: 1,579

#	Responses	Date
1	Good connections between #8 & #48 are needed if the route 43 is eliminated. Look for east-west routing between 19th Ave E. and 24th Ave E. that is not too steep so that an extended 12/ modified 43 could operate from north Capitol Hill through Montlake to the University District.	6/1/2015 1:11 AM
2	No	6/1/2015 12:32 AM
3	Ending bus service on 19th at John where the #12 turns to go to downtown is a huge negative impact on many riders - it is a very busy route and for there to be blocks with no bus service would be a hardship to students and people who work downtown. Currently the 43 goes all the way do Madison and then turns - that will now end as well and people who do not want to be forced to take the light rail will have to get off on 19th and John and walk to Madison - one again this makes no sense especially since we keep being told by Metro publicity that service is being expanded - it is not expansion if you have to get off and walk 9 blocks to transfer to another bus to go to the University district. I voted to improve and maintain existing bus service in Seattle. There was no indication at the time that measure was put on the ballot that there would be suggested changes involving the light rail that would diminish service. I feel that Metro and the City of Seattle were not honest with their plans with the tax payers of Seattle.	5/31/2015 10:13 PM
4	I think the level of service on Pike/Pine is massive overkill. The walk to most of those locations along Pike/Pine from the Cap Hill station is not significant. Moving the 49 to Madison connected a lot more people to the Cap Hill Light Rail Station that would have a significantly harder walk.	5/31/2015 9:54 PM
5	Please DO NOT discontinue bus route #4!!!!	5/31/2015 9:32 PM
6	My only concern is that the 12 will no longer provide access to medical facilities on Madison.	5/31/2015 9:20 PM
7	Do not change route 12. For most commuters in this area/on this route, access to downtown is more important than access to the light rail. The 12 needs to continue on Madison to allow access to the more south regions of downtown. The 10 can be used for access to light rail.	5/31/2015 8:53 PM
8	* I strongly advocate for restoring the originally-planned routing of the 49 to Madison. That will give the western Madison corridor an actual connection to Link. I would regularly use it to get from Capitol Hill station to First Hill. (The current 60 is too infrequent to rely on.) * I favor keeping the current 11 routing rather than keeping it on Madison all the way, to provide better access to the Capitol Hill shopping district. The 12 could be put back on Madison if desired for intermediate coverage, as outlined here: http://seattletransitblog.com/2015/05/14/how-metro-should-revise-alt-3/	5/31/2015 8:21 PM
9	The effort to realign service around CHS is aggravating because I do not anticipate using light rail for most of my transit needs.	5/31/2015 8:19 PM
10	I like the #11 running from Madison Park to the Pike/Pine corridor.	5/31/2015 7:11 PM
11	The #12 route serves at least 7 different schools: Stevens, St. Joe's, Nova, SAAS, Northwest and O'Dea, Seattle University, 3 clinics: Country Doctor, Sound Mental Health and the Polyclinic, 2 hospitals: Swedish and Virginia Mason, The Miller Community Center and playing fields, 2 grocery stores, the Town Hall, the Frye Museum, the main Seattle Public Library, the ferry docks and even the court house is served by the #12 bus route. Many children, elderly, and mentally ill residents rely on this route for basic services. The #11 bus serves Madison Park not north Capitol Hill so adding service to this line is not helpful here. I think making the 10 bus take a bump in it's route to connect to the light rail makes more sense than pulling the #12 off it's route.	5/31/2015 3:36 PM

12	As near as I can tell, I'll be limited to a Route 48 to get to work in the U District. I work an alternative schedule including Sunday evenings. Relying on one route is never good. And the Light Rail won't get me anywhere near home on Capitol Hill.	5/31/2015 3:16 PM
13	The new proposal for the Route 11 is terrible. There is no longer any service planned from Madison Park to Pike/Pine. The Rapid-Ride should cover Madison fine, please leave the 11 alone as it is widely used as is. Madison Park needs easy access to Pike/Pine.	5/31/2015 2:59 PM
14	I live, work, and spend the majority of my leisure time and money in central Seattle, including CD, Capitol Hill, Downtown, and Belltown. My use of Lightrail is primary to Sea-Tac and the stadiums. My primary transits needs and survey responses speak to travel within core Seattle. Frequent service from the Pike/Pine Corridor, including late night, would be benefit work commutes, non-work shopping and entertainment, and tourist travel. Unfortunately the proposed rerouting of the 11 away from Pike/Pine means those of us east of E Madison & 23rd loss safe and convenient travel to Pike/Pine. The 12th on 19th and 10th on 15th would be furthest eastbound routes from Pike/Plan. While understanding the hospital and business transit needs on Madison Ave this route does not service the same variety of services and attractions as Pike/Pike. Primarily a business district, evening/night foot and police traffic is limited, which is a personal concern for travel outside of daylight. Since many of the questions speak to multiple bus routes I did want to say that more frequent and reliable service on the 8 to the new station would be a huge benefit.	5/31/2015 11:40 AM
15	Please see my previous comments re access to Wedgwood from Capitol Hill. A link from the E. UW Campus light rail station up Montlake Blvd & continuing north on 25th NE (University Village) would be very useful to me. Several of your map links aren't currently working and I am having a hard time figuring out what is being proposed.	5/31/2015 11:19 AM
16	The proposed change to Route 12 restricts access to the many health care providers along or near to Madison Street: Swedish, Virginia Mason, Minor & James, Polyclinic, Hearing Speech & Deafness Center, and others. If the proposed changes are made, those of us who use these providers will no longer be able to reach them without transferring buses and/or walking a substantial distance. That will be particularly difficult for senior citizens and those with mobility issues. Please keep route 12 serving Madison. Thanks.	5/31/2015 9:43 AM
17	Route 12 should continue to run on Madison street so that it provides convenient access to all the medical offices that are on Madison. This is important, as the current proposal would require passengers to transfer busses or walk a long distance in order to reach doctors offices on Madison. Elderly riders especially would be impacted by this change.	5/31/2015 8:29 AM
18	In order to earn a living, my wife needs the 12 to commute during bankers hours, and that route is already SRO during those times. The later-evening 12 always appears empty, and has been on the dozen or so occasions I've used it in the last year. I need the 43 for what's already a time & walking intensive commute for my off-hours job at a music venue. It (the 43) only works one-way and involves more than a mile of walking. At 2am when my work day is finished, my public transit options range from walking that same mile+ uphill and waiting 3 hours for a 43, and walking as long to catch a bus to Columbia City or Rainier Beach, then waiting for a transfer, and ultimately getting home in 2 hours. I understand and appreciate the light rail. I've voted for it at every turn. It's good for the city and the neighborhood. I understand and accept that you must curb bus service to account for it. Please don't curb that bus service which allows the existing residents to commute and earn a living.	5/31/2015 4:13 AM
19	My wife and I live on 17th Ave. E., between Thomas & Harrison. My wife uses the 12 to commute during 9-5 M-F rush hour times. The 12 is already running at standing-room capacity during those peak periods. Please do not curb service on the 12 during normal rush hour periods. I use the 43 to commute off-hours, as I work at a music venue on the waterfront. The 43 ends where I then walk more than a mile to work. As Metro's system exists, I am only able to perform that commute on the way to but not from work. At 2am when my shift is done, between long walks and transfer times, my public transit options range from the silly to the scary. Because of that, I often sleep at work and then walk another mile+ to the 43 to get home the next day. The 12 and 43 are barely making our working lives possible. Please do not curb the service on these routes.	5/31/2015 2:46 AM

20	<p>The northeast Seattle and route 48 changes are excellent, and I wish more of the 520 changes have been retained, but on Capitol Hill all three alternatives have as many disadvantages as advantages, and this third one threatens to be worse than the status quo in a few ways. So please take the time to do Capitol Hill right even if it means more rounds of proposals and possibly going into later next year, but don't hold up the other areas' changes to wait for Capitol Hill. The two biggest flaws in this proposal are the gap between mid Madison and Pine Street, the gap between 23rd/Montlake and Capitol Hill Station, and the gap between Madison Street and any Link station. Secondly, it overserves 19th Ave E and implicitly promises that level of service will be there forever. A lot of people in the Summit area go to mid Madison (17th to 29th), and a lot of people in mid Madison and Madison Park go to nightlife/shopping/friends around Pine Street and Summit. The current 11 serves these but the all-Madison 11 does not. Instead it serves the hospitals, library, lower downtown, and the ferry terminal. That's a significant market but I think it serves fewer people than the current 11 does. What western Madison needs is a route to 23rd, which the current 12 almost does and Madison BRT will do. But that's "in addition" to the current Madison-Pine service, not "instead of" it. David Lawson of the Seattle Transit Blog has another proposal: http://seattletransitblog.com/2015/05/14/how-metro-should-revise-alt-3/ . It restores the current 11, moves the 10 to 15th-John-Pine, the 49 to Broadway-Madison, and the 60 to 12th-Boren-SLU. This would give better overall Capitol Hill service. It addresses Madison-Pine trips (11), it gives 15th a nearby Link transfer (10), it connects Summit to the businesses on 15th, it doesn't connect Summit to useless stops on 19th, it gives western Madison direct access to Capitol Hill Station, it preserves Beacon Hill's service to First Hill and gives new access to western Capitol Hill and SLU. If the #11 change goes through, please monitor the mid Madison to Pine market to make sure it's not making too many people's trips less convenient or discouraging them from using transit. If the #12 change goes through, consider changing the route number. For people living in the middle, it's a quite different route than the longstanding 12. We're used to the 12 being just outside our area of practical use, and it would take some adjustment to remember that it now goes to our area. Moving the 12 to Pine-John-19th restores a good service level in Summit and central Capitol Hill to 19th, but it leaves a gap to 23rd. 23rd and 15th have more ridership than 19th. If 19th should have any service, it should be peak-only or infrequent daytime. What bothers me is how 19th is cutting into more frequent service in higher-volume areas, and how somebody going from John or Summit to 15th or 23rd finds he can't go those places without transferring but he can go to 19th. The most important feature of this proposal is the 15-minute evening/Sunday service in several Capitol Hill and northeast corridors. This is the #1 issue with using transit on Capitol Hill. The 8, 10, 11, and 43 all drop to half-hourly, and even where they overlap they aren't evenly spaced, so instead of giving 15-minute service where they're combined, it's 10/20 or 5/25, which is not much more useful than a single 30-minute route. So please keep the full-time frequent service in all future changes. But note that even 15 minutes does not make a good transfer; e.g., between the 8 and 48. The 8 will be 15-30 minutes evenings and weekends, and the 48 evenings. That does not replace the 43 very well, and 48+11 transfers have the same problem. So although this proposal makes the grid better in some ways, it does not do so completely.</p>	5/30/2015 10:16 PM
21	<p>I am against the revisions to the #12 route. People will not be using the Capitol Hill link station for weekday commuting (who goes from Capitol Hill to south Seattle?) and moving the #12 route off of Broadway affects many, many students, schools and medical services that people use all the time, not to mention the people who take the #12 downtown every day to work.</p>	5/30/2015 9:47 PM
22	<p>Everyone getting on the 12 in capitol hill on 19th is stuck midway between the train stops. We'd have to go backwards on the bus to the Broadway station to go forward on the train to the UW stadium. I ride the 12 every day to work on the south side of downtown- the proposed route change would eliminate this possibility. Many people in the neighborhood get off @ Swedish, Polyclinic, Virginia Mason and rely on this route. The proposal would make the 12 overlap significantly with the 10 and that doesn't seem to make sense for those of us near the origin of both routes. I fought hard to get people to vote for increased funding for metro services to maintain our 12 route services and I was so thankful when it passed; now I feel like I may be getting screwed in the whole process and I am very disappointed. It feels very much like a bait and switch for those of us that rely on the 12 route and I may end up wishing that I could have my tax money go elsewhere.</p>	5/30/2015 9:34 PM
23	n/a	5/30/2015 9:26 PM
24	<p>I would like to see Bus Route 12 stay on the Madison corridor and not get moved to the same streets that several other bus routes run.</p>	5/30/2015 8:27 PM
25	<p>Restoring the 47 will be a huge advantage to many apartment/condo dwellers who have no, or few, cars. Taking away the 47 was a huge blow to them, probably not necessary once prop 1 was passed. My neighborhood was devastated at the thought of totally losing the # 12 from Madison to Galer. It was as if no one looked at the 3D nature of the landscape. Going to 15th or 23rd is not a huge distance, but the elevations are almost straight up. People pushing strollers, carrying babies, or old people, would be unable to reach transit. So the new plan for #12 is much better. We will miss having direct services to Seattle U and to clinics on Madison, but this is MUCH better than the original option #1.</p>	5/30/2015 6:54 PM
26	<p>Keep the 48 from mt.Baler Transit Center to Loyal Hts. as is.</p>	5/30/2015 6:04 PM

27	It would have been nice if saying "no" to giving feedback on this section had forwarded me to the next section. but it let me click through okay without answering anyway.	5/30/2015 6:04 PM
28	I need to commute from Montlake to the South Lake Union. Currently there is no route which would take me there.	5/30/2015 3:56 PM
29	The improvements sound great for frequency and speed, but I am not seeing how they maximize the potential of the Link. Perhaps the routings are too complicated or unfamiliar to me to have a full realization.	5/30/2015 1:24 PM
30	Montlake is a very sparsely serviced area. We need more stops.... more bus service to get into main areas of city.	5/30/2015 11:43 AM
31	Dropping 43 is a disaster. It links north capitol hill and U district to Group Health and downtown. A simple 10 minute trip will require a transfer. Surprisingly poor choice of a change in service.	5/30/2015 10:37 AM
32	Good idea to have the 12 go down E Thomas/John. I could easily take the 12 to get to the Link if I wanted. I suggest it then goes down Broadway (or even Boren) to serve Madison between Broadway/Boren and downtown to improve service between North Capitol Hill and First Hill/Downtown (thinking ferry terminal).	5/30/2015 10:20 AM
33	I think there's too much focus on serving Downtown Seattle via Pike/Pine... you really need to get as many routes within a block of Capitol Hill station to encourage passengers to transfer to Link.	5/30/2015 12:34 AM
34	If the 43 goes away I will start driving downtown. 23rd from Montlake to the university light rail station is a parking lot at evening rush hour.	5/29/2015 11:11 PM
35	<p>When Metro first released Alternative 1, I was positively delighted. It was an amazing and commendable plan, and I was really excited at the idea that transit in Capitol Hill and the CD might actually become usable. Meanwhile, Alternative 2 seemed almost like a foil -- specifically designed to highlight how much better Alternative 1 would make use of our limited service hours. So imagine my disappointment when, a few weeks ago, Metro released a single proposal that would be less functional than *both* alternatives. First, the good parts, since I know that you have very hard jobs and you get a lot of criticism from the public [sadly including myself -- though I did make a point of sending you an email praising Alternative 1 :)]. Then I'll talk about the bad, and how I think it could be better. - The proposed Route 8 split is perfect. I hope that the southern route eventually becomes Route 106, as previously proposed. But in the meantime, this will definitely make the southern route more reliable, and it's a very clever way to avoid taking away service from 23rd/Jackson without forcing any single bus to make the full detour. - I'm extremely happy that the 43's current routing is deleted. It's one of a very small number of buses in Metro's system with no unique stops (barring the 47's temporary deletion), and buses like that just shouldn't exist. - I didn't like the idea of putting the 49 on Madison, or sending the 8 on Madison, and I'm glad to see those removed. - While I liked the idea of sending the 8 to Madison Park, it seems hard to believe that Madison Park and Madison Valley residents would like the idea of losing their only downtown bus. I'm glad that downtown service has been restored. - I'm glad that the map now shows the 47, a bus that becomes much more important in a world without the 43. The bad: - Despite what I said about the 8, I think there's a missed opportunity to improve reliability. Most of the congestion on Denny is west of Capitol Hill Station, not east of it. The trip between CHS and 23rd/Jackson will be needlessly unreliable. - The 11 is an interesting case. On the one hand, it's a single arterial street, and so the idea of a single bus is appealing. And the Seattle DOT seems dead set on having Madison BRT. On the other hand, as you know, demand is totally inconsistent. Boren/Madison will probably constitute 25-50% of all non-downtown boardings on the entire route. Demand falls after 12th, and almost disappears entirely after 23rd. And to be honest, most people just don't want to go to 3rd and Madison. - I'm really not a fan of the 12, or of 19th Ave service in general. Pretty much no one ever uses that service. There are better uses for those service hours. - I think there's a big missed opportunity in keeping the 9/49/60 on roughly their current routings. The gap in 12th Ave service remains. Even aside from that, Broadway is not particularly congested, and there is quite a bit of demand for service that crosses CHS. I frequently want to travel from Broadway/Roy to 12th/Jackson, and even though it's a straight and uncongested trip by car, it's extremely difficult by bus. What I'd change: - Modify the 11 to follow the 43's current routing between downtown and 23rd, and otherwise maintain its routing on Madison. This would provide better connectivity to CHS and the heart of downtown. - Modify the 12 to use the current turnback routing (stopping at 15th), running at whatever frequency is needed to adequately meet First Hill demand. - Eliminate service on Madison between 15th and 23rd (yes, really). Instead, provide 10-minute frequency on the 2 and the 11. Everyone along Madison is a maximum of 5 minutes away from either the 2 or the 11 by foot, and both of them go downtown, so no one is losing service -- it's just being streamlined. - Split the 8 at CHS, either in addition to or instead of the 23rd/Jackson split. - Combine and replace the 9, 36, 49, and 60 into a single route that runs between the U-District and Othello. I realize you're not going to make this change this time around, but I'm still going to ask for it every time you have a survey. :) - In lieu of a 9/36/49/60 route, consider modifying the 9 so that it runs along Boren all the way to SLU. This is less redundant with Link and with my proposed Route 8, and it provides a key crosstown connection that does not exist today.</p>	5/29/2015 10:43 PM

36	I like the idea of every 10 minutes through the pike/pine corridor. When I lived on Capitol Hill, I found that later in the evenings, buses would get clumped together. So three buses would show up at a stop at one time (49,12,10) and then it would 20-40 minutes before the next buses. It would have been more helpful for a lot of people who could have ridden any of those buses to get up onto the hill home to have them spread out in arrival time.	5/29/2015 7:39 PM
37	No thanks	5/29/2015 4:36 PM
38	See my prior comment -- relates to 48 service on capitol hill.	5/29/2015 3:25 PM
39	I said I did NOT want to comment on this portion of service, but was forced to answer all the questions anyway? Survey needs to allow this section to be skipped, if requested.	5/29/2015 3:14 PM
40	(specific routes in next question) The previous question stated that routes 10, 12, 47, and 49 would be improved to increase service along the Pike/Pine corridor. This cannot be true. Route 12 is being moved off of the Pike/Pine corridor, and route 47 never ran on it. (I personally live on the John Street corridor, so I would benefit from these changes. Just thought the survey was misleading.)	5/29/2015 3:02 PM
41	I hope that Metro WILL NOT DELETE ROUTE 25. I have family that lives on Lakeview Blvd and it is very difficult to get there now as it is with the very limited Route 25 schedule. There is no convenient way to get to Lakeview Blvd. from downtown Seattle using Public Transportation. Since Route 14 no longer serves Summit it is quite a long walk to get to Lakeview Blvd. I hope Metro will consider not deleting this route. If so, I hope Metro will add service to Summit Ave again.	5/29/2015 2:12 PM
42	I would like to see the new route 11 actually become a BRT.	5/29/2015 12:33 PM
43	Route 43 is a good option for me, and I don't understand why it's being eliminated. Also, the eastbound stop at Westlake and Denny has a terrible smoky odor emanating from the adjacent building.	5/29/2015 12:29 PM
44	The changes proposed would not affect my use of the routes, as I depend on them now. However, I really appreciate the effort to improve frequency. That's a real consideration, especially in inclement weather.	5/29/2015 11:35 AM
45	Clearer written descriptions of proposed changes would be a big help in understanding just what the options are. At present, the descriptions of changes to at least the 67/68 are not clear at all. From the map, it seems as if there will be no service at all on 75th St between 25th and Roosevelt, but the text description does not support this. So I am baffled about just what is being proposed for these routes. I did not look at other routes, but if there is this level of disconnect between maps and text descriptions for other routes, I would expect a great deal of confusion on the part of current riders.	5/29/2015 11:11 AM
46	True shame to lose trolley service. Hopefully that can be rectified eventually.	5/29/2015 10:52 AM
47	I mostly bike commute but concerned about loss of frequency of service from the eastside of capitol hill to UW with loss of the 43.	5/29/2015 10:17 AM
48	Need route 49 or some route to continue as the 49 is now - Summit & Pine direct connection to 15th & 42nd.	5/29/2015 10:14 AM
49	Especially in Montlake, improve sidewalks at key access points, taking into account fall risk where tree roots and untended plantings make walking unsafe and signage not visible. Improve visibility of street signage along main routes. Enlarge letters and use reflective, high-contrast materials. Better coordinate/regulate bicycle traffic on routes designed for primarily pedestrian access. Currently bicyclists ignore stop signs, ride on sidewalks, etc., putting themselves, walkers and drivers at risk.	5/29/2015 9:59 AM
50	I like the all night frequency proposals for the Pike/Pine Corridor because it provides enough bus service in the area. Once Metro implements this plan, walking home in the cold rain will be a thing of the past.	5/29/2015 9:59 AM
51	I would like to take advantage of the new light link connections for an easier trip to the airport and for other downtown trips. However, I am concerned about the connectivity between the east side and the light link system. Concerns I have regarding the proposed changes to route 540: - there is less parking available at the Houghton P&R then there is at the South Kirkland P&R, so deleting the South Kirkland stop will likely overload parking at Houghton and not provide the intended connectivity for many potential riders. - It is important for the 540 to run all day and not just at peak times. (including late night travel) This would allow commuters much-needed flexibility and accommodate airport trips for red-eye flights. - The plan calls for a connection between 255 and 540 to re-include the South Kirkland P&R. This bus should also have at least one or two late-night trips added for the same reason. Thank you for the opportunity to comment.	5/29/2015 9:37 AM
52	Please maintain the 25 and 43 bus routes.	5/29/2015 9:29 AM
53	No.	5/29/2015 9:28 AM

54	I appreciate the opportunity to comment, however, I find the information provide is too skimpy to thoroughly grasp the change to route 11. It would have been better to provide specifics of the proposal such as where the bus stops would be downtown (on the newer portion of the route). You state that the frequency would be improved, but that is not evident in the summary as it states that it would be between 8 - 15 minutes during peak hours. The only improvement that offers if somehow you stick to the schedule. I have been a rider of the # 11 for 20 plus years. In the last 10 years the reliability of the route from downtown to Madison Park during peak hours has been just short of miserable. The schedule states that it should run every 15 minutes during peak, but experience is that it runs at best every 20 - 30 minutes. So if the new proposal is to represent improved service it MUST improve the reliability of the schedule and the only way to do that is to add more buses to ensure that you truly stick to a 15 minute schedule. As far as the change itself to the route, I'm not pleased but it is better than eliminating it. Finally, I urge and request that you improve the reliability of the route 11 peak hour service. The residents of Madison Valley and Madison Park have not been adequately served by Metro for the last decade. I certainly hope that with this change the service improves.	5/29/2015 9:17 AM
55	You asked if I wanted to address Capitol Hill/Central Area, I answered no, and then you proceded to ask me a bunch of questions about it anyway. I'm glad I didn't say Yes.	5/29/2015 8:48 AM
56	I am disappointed that the frequency improvements of the 8 extend only to weekdays. To have a bus connecting core neighborhoods like just so close to the city center drop to 30-minute frequency after 7 PM should not be acceptable. Meanwhile, the Pike/Pine corridor looks a bit over-served, given that Link will also be running. A shift in resources to keep the 8 frequent between Capitol Hill and Uptown later in the evening would be welcome.	5/29/2015 8:46 AM
57	The 8 is a broke route because of Denny. Try catching the 8 at Seattle Center on a random weeknight (it is even worse during the summer and December) and try getting to 19th and Thomas. It is sometimes an hour long commute. The 8 needs a dedicated bus lane, better timed lights, going Eastbound the removal of the left hand turn onto Dexter, less SLU bus riders at Westlake and Denny, removal of parking spaces on Olive/Thomas going Eastbound to Cap Hill or something else I can't think of. Otherwise, the 8 will continue to be a broken bus in the evening. Living on 19th and John, I am sad that the 43 is being removed but I can understand. Also, there should be increased bus service on 15th in the U-District to the Light Rail station until the new Roosevelt stop comes online. Especially given the loss of the 71,72,73 to downtown. A lot of students and staff take those buses to Downtown from the Ave.	5/29/2015 8:41 AM
58	Service should be maintained for the current route 4.	5/29/2015 8:38 AM
59	Please keep 12 available on 19th Ave E. Many use that route to get to school	5/29/2015 8:28 AM
60	Please DO NOT REMOVE route 43!!! I use this everyday to commute to work, and the new capitol hill link station is too far away from me to be convenient for commuting. I work at UW hospital and route 43 is the only logical way to get to the hospital for people in capitol hill. The parking at UWMC for employees is horrible (We pay for parking, and it is approx 3/4 mile away from the hospital--closer to 1 mile now with the convoluted pedestrian detour around construction). It takes me roughly 30 minutes to commute by bus from my door to the hospital in the morning on route 43 (including walking time, etc). It would take me 40 minutes total (at least) of walking to get to the capitol hill link station, and from the UW link station to the hospital in the morning, not to mention the actual time in transit on the link. I'm afraid 40 minutes of walking + transit time on the link (even if it is just 5 minutes), would be burdensome enough to make me start driving to work everyday again. Even with the almost mile walk from the parking lot, my transit time would be less when driving than using the link. (this is important when I need to be at work at 5:45 am)	5/29/2015 8:26 AM
61	I liked alternative one routes 49 and 8.	5/29/2015 8:06 AM
62	The plan is to delete the 25 route because of low ridership. I take the 25 every morning to work but don't take it in the evening because it is so infrequent, unreliable, and the arrival times don't work for my schedule. So instead I take overcrowded busses that service the East Side via SR 520. I think you will find that other commuters do the same as the morning busses are quite full and the evening are not. I also understand that the streets are narrow and difficult to maneuver for the full size busses along this route. Have you given any consideration to utilizing a smaller vehicle to service the Montlake Community? Once the 25 is cancelled, I will be adding to the overcrowding of the SR 520 busses both morning and evening. The 48 takes too long to get downtown so I will not use that route. I am capable of walking the over one-half mile to get to SR 520 but others in the neighborhood are not so fortunate. I applaud the links you will provide to the Light Rail but you have left a gap in the overall transit service by eliminating Route 25.	5/29/2015 7:44 AM
63	No, except that it's about time, especially with the #8 bus. Going to Capitol Hill from Lower Queen Anne isn't a problem since I catch the bus at the very beginning of the line. But coming from Capitol Hill is a problem because the bus is constantly late and always trying to catch up. So I'm really glad about the upcoming changes.	5/29/2015 1:38 AM

64	<p>If th 48 is split it should be at Mount Baker. I like the old alternative 1 where the 49 went to Broadway and Madison and then to 1st Avenue. The route would have access to the link station and fill in a piece of Madison where additional transit is desirable. The 11 should remain as is and would serve the Pike/Pine corridor. The 12 should continue to serve 19th Avenue and then Madison to 1st Avenue. People are use to that service, Moving only the 49 would be the least disruptive to transit riders. I notice that large group of students and a majority of rides exit the 49 at the Central College and also enter there. However these students will be able to use the 11 or Link to get downtown if the 49 route to 1st was inconvenient. Students would still be able to arrive there The 10 could be routed along E. John and continue downtown. This would provide some mitigation for the loss of the 43 as the 10 would give them access to the transfers on Broadway and a route downtown.</p>	5/29/2015 12:33 AM
65	<p>To make up for the lack of a 'Summit' station (i.e. something near convention place / i-5 / melrose), those Pike/Pine buses should really be 10 min or better, 7 days a week, until late. Moreover, the 8 needs to run more frequently into the night on weekends, as LQA / Belltown / Capitol Hill / CD (chuck's!) is a common path of revelry.</p>	5/28/2015 11:07 PM
66	No	5/28/2015 10:46 PM
67	<p>Please do not split 48 route. There are manyGarfield High School students who comes from NW Seattle, Greenlake, Roosevelt area. I am sure many Holy Name students use 48 as well. The split will make commute much harder for students. Adding express service between medical center and Aloha (Holy Name) and Garfield High School would be nice. Current split proposal also do not have smooth transfer between 45&48. If you really have to split, please make sure the transfer is easy for riders.</p>	5/28/2015 10:38 PM
68	<p>All positive I'm sure, so I don't see why the 26 was singled out. It makes it abundantly clear there is another agenda at play. I would stop short of the word manipulation at Metro, maybe some concession or other, but this affects people's lives.</p>	5/28/2015 10:12 PM
69	I live on Lakeside S and miss the all-day service on Route 27.	5/28/2015 8:48 PM
70	<p>Removing Routes 43 and 25 would make it really inconvenient for me. I am 79 years old and walk rather slowly. Now I can take the 43 bus to Group Health on Capitol Hill without having to transfer, although it takes me fifteen minutes to walk to the nearest 43 bus stop from my home. My husband and I use the 43 bus to go downtown in the evening for symphony concerts. What are we supposed to do, walk to and from the University link station? Although the 25 bus service has been cut back again and again, it was the closest stop to our home and we have used it to get to the University and downtown during the day.</p>	5/28/2015 7:51 PM

71	<p>The Comments and points that I am about to make revolve mostly around people in my neighborhood and their ability to access Capitol Hill and Downtown. I live in Madison Valley and take the 8 to work every day. I have broken the discussion into pieces based on route. Route 11 This Route currently connects Madison Park/Valley with the Pike/Pine corridor and the retail core of downtown. The proposed changes will completely change the destination of the route and this neighborhoods ability to traverse the city. Under the proposed changes the route will serve the financial district area of downtown and require anywhere from a 1 to 5 block walk to get the rider to the old route. Madison BRT - I want to point out Seattle's current plan to install BRT from the Ferry Terminal to MLK via Madison. If the city is successful in this it will mean that the 11 and the new BRT line will have the same route except for MLK to 43rd Ave E. This new BRT should be fully considered and planned for when developing a new plan for the 11. If the 11 is realigned off Pine to Madison now, I fear it will be eliminated with the BRT begins service cutting off Madison Park from bus service. The Madison Park neighborhood needs to continue to have access to an All-Day bus route to downtown/Capitol Hill. http://www.seattle.gov/transportation/MadisonBRT.htm</p> <p>Route 12 With the 43 eliminated I understand the desire to have a bus that serves John and Thomas Streets into Downtown. However, the realignment of the 12 to Thomas from Madison means that there is a 4-5 block gap between the northern neighborhood of 19th Ave E and its current destination. Also, Thomas Street is incredibly narrow and buses currently have to stop to pass one at a time. The Right turn from 19th Ave E on to Thomas may prove difficult or nearly impossible for many drivers in both articulated and fixed buses. It will also require the movement of overhead bus lines to allow for the turn. Summary of Disadvantages</p> <ul style="list-style-type: none"> • The new changes will provide no direct service from the back side of Capitol Hill, Madison Park/Valley to the Pike/Pine Corridor without a 1.5-10 block walk. • The Madison BRT plan could make several of these changes unnecessary and require they revert to old routes after implementation or be eliminated. • The new route would create a large number of bus to bus layovers not bus to light rail to maintain current service routes. <p>My Recommendation Route 12 and Route 11 should stay in tacked until the Madison BRT is running. At that time the 12 should adjust its route to serve more of 19th in North/South function and rely on the BRT to connect people to Downtown. Route 11 should remain in tacked entirely to continue serving Madison Park to Pike/Pine with a transfer to the Madison BRT to service the financial district portion of downtown. Route 10 should realign to E John St at 15th Ave E and serve the John/Olive Corridor to downtown at Pike/Pine. There is one bus stop that will lose service on 15th Ave E and that change will effect fewer people than the current proposal. Route 8 – Question of Planning With the creation of the Capitol Hill Light Rail Station the Central District makes obvious sense as a turnaround place. When considering the constant late status of the 8 I would like to ask if though is being put into whether making right turns at the turn around location or left turns at the turn around location will be faster. This turnaround route contains very active crosswalks at each turn. It also has left turn lanes and left turn arrows at each turnaround intersection in the turnaround route.</p>	5/28/2015 6:56 PM
72	<p>The current route 11 via E. Pine St. takes me to several destinations that I travel to daily or several times a week: Seattle Central College, businesses on E. Pine & Pike, department stores downtown, the Pike Place Market and the Link station at Westlake. The proposed route 11 will take me near no destination at all except the Central Library. Everyone will have to walk three blocks just to get to the bus tunnel. I do not understand why route 12 is getting our destinations and we will have to ride through Pill Hill, which is useful only a few times yearly.</p>	5/28/2015 6:22 PM
73	<p>Please restore the 47</p>	5/28/2015 5:41 PM
74	<p>Like the idea of more bus service, don't want to cut routes.</p>	5/28/2015 5:40 PM
75	<p>I work with blind and Deaf-blind people who currently use the #8 bus from their workplace at LightHouse for the Blind to Madison Valley, Central District, Capitol Hill and Seattle Central College, and the Seattle Center. Breaking Route 8 at 23rd and Jackson would impede their commutes. I think splitting Route 8 at the Central Link station on Rainier, south of the Lighthouse for the Blind, would be a more sensible alternative.</p>	5/28/2015 5:10 PM
76	<p>If frequency on the 8 between 23rd and the CHS is increased to match the current combined frequency of the 8 and the 43, then I'm cool with it. However, since I live on 25th and E Madison, a deleted 43 and a 12 that only goes to 19th would really be a service cut without at least a doubling of 8 frequency (including weekends and late night). Also, an all Madison 11 is less useful than the Westlake via Pike/Pine corridor current version. My stop is 25th and E Madison or 23rd and E John, and I basically go to my lab in Montlake (NWFSC), gym on Broadway (Gold's), or occasionally to the downtown shopping core (Westlake). It seems like the 48 NB to UW will have an improved frequency that makes up for losing the 43, but I'm not convinced (especially on weekends and late night...when I'm coming/going to the gym or late cocktails) that my east-west service (between the CHS, PikePine, and home) will match what I currently have. To sum up: My morning commute from 25th/23rd and John to Montlake will be the same or slightly improved due to a high frequency 48. My afternoon commute from UW (Montlake) to Gold's Gym on Broadway will be VASTLY improved for obvious reasons. However, I think my EB late evening commute from Broadway to 25th and E Madison will suffer a bit unless all E John service extends to at least 23rd (like what the 43 does now) and improved 8 frequency is extended to evenings and weekends. In the revised plan it seems like there is a gap that might create degraded service for a strip along the east side of Capitol Hill. And I definitely do not like an all Madison 11 over a PikePine to CBD 11.</p>	5/28/2015 4:53 PM

77	the frequency is good. if it needs to be even more frequent on some routes as usage grows, please be open to increasing it	5/28/2015 4:46 PM
78	Please make sure that the #12 continues to run on 19th Avenue East, north from E Thomas St, all the way to Stevens Elementary School at 19th & Galer -- and to downtown somewhere near 1st & Madison. Thank you!	5/28/2015 4:37 PM
79	The bus stops along 23rd ave need to be re-evaluated. The 48 makes a stop on 23rd and Jefferson, but there are no more stops until 23rd and Yesler. That is a long walk. But there is a stop on 23rd and Cherry and 23rd and Jefferson. That is one block. Both of those stops serve busy streets, but I sure would like my stop back on 23rd and Alder or Spruce. Along the 3 and 4 route going to Madrona/ Judkins Park on Jefferson, there are a few more places where the bus stops were removed. These stops are on hills (going uphill) and can make or break you when you have a toddler, groceries and it is hot outside. I don't drive. Many of my co-workers and folks in my community depend on Metro to get us to and from work, school and activities.... And we pay taxes, we pay for bus passes and feel shorted by Metro's ill consideration of how changes impact us. We don't think the long term "rerouting" of the 4 would ever be considered in Capitol Hill or Madison Park. Madrona has TWO buses that empty out after MLK, but they are still in operation.	5/28/2015 4:34 PM
80	Focus on dedicated bus lanes - prioritize bus right-ways. And in areas away from downtown focus on west/east corridors to improve access instead of Planning mobility	5/28/2015 4:32 PM
81	Maintain Route 12 service between Capitol Hill and First Hill. Maintain Route 11 service between Madison valley, Capitol Hill and downtown. Madison already works well as a transfer point for riders on Route 11 traveling to First Hill or mid-downtown and as a transfer point for riders on Route 12 traveling to Pike/Pine or north-end of downtown. It would be nice to see how those patterns could be enhanced in the adjusted proposal.	5/28/2015 4:30 PM
82	You should not move the route 12 to Pike/Pine, but keep it on Madison, by way of Broadway. I heard Mayor Murray say they were going to improve bus service on Madison. The 12 should continue to serve Seattle University, the hospitals, the library, the southern half of downtown, including the government buildings and the ferry terminal.	5/28/2015 4:27 PM
83	I ride the buses every day of the week to work on Capitol Hill and back to White Center. I like having a short ride up Capitol Hill to land me rather close to Broadway & Madison. There are a lot of transient peoples along Broadway, in alleys, around QFC, sometimes there is serious crime. I'd prefer to be close to the Poli Clinic when I get off, but East John is too far away. I'd like more ways to go to the Seattle Public Library downtown on either morning or early evening commutes. I'd like the 3rd & Pike area to be more clean and less drug dealing or loitering of many types of people, not just commuters. I'd like more room on evening buses as we are packed during rush hour. 125 is not frequent enough for me. I take the 120 because it comes more frequently but it results in me walking uphill for several blocks at the end of day, then up stairs. So I'm very tired in evening. I'm 68 and still working full time. I thank Metro for all the good drivers and good rides, I'm so appreciative. Thank you everyone.	5/28/2015 4:17 PM
84	no comment	5/28/2015 4:10 PM
85	I'm glad to hear that there will be more frequent service from downtown at night. After 8:00 p.m. (or possibly even earlier) on the weeknights, there's a 30 minute window where there's no bus service that serves N. Capitol Hill.	5/28/2015 4:07 PM
86	The new 12 is useless. It's a neutered 43 that goes nowhere in particular.	5/28/2015 3:00 PM
87	We live in North Capitol Hill and my sister and I take route 12 to and from school at Seattle Academy every day. Several of our friends in the neighborhood do the same. We would not be able to do that if you change route 12 as proposed. Our parents would have to take us by car instead, but that isn't always possible. Please consider keeping route 12 the same as it is now!	5/28/2015 2:36 PM
88	1. PLEASE increase the frequency of the 9 and the 60. I really want to use the 9 to get to places like Loew's and Seattle Boulderling Project which are way down Rainier Ave, but the current 30 min frequency is very frustrating, and the end of service at 7pm makes the route useless for heading down Rainier Ave for errands or recreation after work since it will be difficult to return home to Capitol Hill later in the evening. The First Hill Streetcar will make Seattle Boulderling Project walkable from the 12th and Jackson station, but Rainier Ave is a great corridor that I would visit more often if I could take direct transit without having to stand at a bus stop for as much as half an hour. 2. Please extend the Broadway bicycle track up to Roy St. I know the streetcar will get there someday, but we need a bicycle track up there now! As is currently I have to do a hop across lanes to get into the cycle track when heading south on Broadway from north of Denny. But then again, less access to the quiet north end of Broadway might help keep the nouveau douche population in their colonized and homogenized Pike/Pine corridor.	5/28/2015 9:40 AM

89	I think that it is a problem that there will be no bus service on 19th between Thomas and Madison if you do the proposed changes to the 12. If you must change the 12, why don't you have it go to Madison and turn right to Pine or Pike and then take that street down to downtown (if you don't want to replicate the 11). Then people can easily transfer from the 12 to the 11. Otherwise, there is no easy way for people to make that change. There are often elderly and disabled people on the 12, and I think they would benefit from an easier transfer. Thank you!	5/27/2015 10:09 PM
90	Given who the current #12 serves: many students, elderly and folks with health challenges and what it serves: schools, hospitals & clinics and cultural sites, it would be a tremendous loss to have it moved. My children ride this bus to and/or from school everyday. It is essential it is to keep the #12 bus on it's current route down 19th and Madison. The #12 route serves at least 7 different schools: Stevens, St. Joe's, Nova, SAAS, Northwest and O'Dea, Seattle University, 3 clinics: Country Doctor, Sound Mental Health and the Polyclinic, 2 hospitals: Swedish and Virginia Mason, The Miller Community Center and playing fields, 2 grocery stores, the Town Hall, the Frye Museum, the main Seattle Public Library, the ferry docks and even the court house is served by the #12 bus route. Many children, elderly, and mentally ill residents rely on this route for basic services. The #11 bus does not serve Madison Park not north Capitol Hill so adding service to this line is not helpful here. I think making the 10 bus take a bump in it's route to connect to the light rail makes more sense than pulling the #12 off it's route.	5/27/2015 10:07 PM
91	Please do not eliminate the 43.	5/27/2015 5:42 PM
92	I'm a little bit sad about Route 12 going away. I currently take either the 11 or 12 and that provides decent reliability (though sometimes there's that silly situation where all the busses are 25 minutes away). If we got rid of 12 and didn't at /least/ double the 11 to keep service consistent with frequency now I'd be upset. If the "increased frequency" of the 11 is 2x ++ that would make me really happy.	5/27/2015 5:37 PM
93	Yes! Please DO NOT reroute the #12 bus from 19th Ave and Madison Ave. This bus route serves at least 6 different public and private schools: Steven's, St. Joe's, Nova, SAAS, Northwest and O'Dea, the Miller Community Center, the Community Health Clinic, several hospitals, museums, the Town Hall, the ferry docks and the Pike Pine Corridor. This bus line is commonly used by children, the elderly and the mentally ill. Many kids ride this bus back and forth to their schools (ours do everyday) and to doctor appointments. It serves a mental health clinic connecting people who may not even be able to drive safely with other services. This bus would be used more frequently if there were more service added at night to this route. This is a simple but essential city bus route. This vital north/south corridor will be poorly served by the #11 bus and there will be no coverage at all for many Capitol Hill residents. North Capitol Hill residents will be completely isolated from the Madison corridor where there are so many schools, services and cultural centers. Please KEEP the #12 route as it is! Why not just bump the #10 route 3 blocks over at John St. to the Broadway Light Rail Station then back down the Pike Pine corridor and add service? Wouldn't that make so much more sense than completely removing the 12 from the 19th and Madison corridor to serve that purpose? Thank you for your consideration. I'm a big believer in public transportation and support adding bus service all over the city. I applaud all your efforts to get people out of their cars.	5/27/2015 4:40 PM
94	Yes! Please DO NOT reroute the #12 bus from 19th Ave and Madison Ave. This bus route serves at least 6 different public and private schools: Steven's, St. Joe's, Nova, SAAS, Northwest and O'Dea, the Miller Community Center, the Community Health Clinic, several hospitals, museums, the Town Hall, the ferry docks and the Pike Pine Corridor. This bus line is commonly used by children, the elderly and the mentally ill. Many kids ride this bus back and forth to their schools (ours do everyday) and to doctor appointments. Katharine Harkins 1233 21st Ave East Seattle, WA 98112	5/27/2015 4:02 PM
95	Hello, I have heard talk of cutting the route 43 bus line. I would like to strongly disagree with this choice as it is a main bus line used to get to downtown seattle/montalke/u-district. the only convenient way for me to catch the commuter bus at the montlake 520 station to get to redmond to visit my family. While improvements to other capitol hill-downtown bus lines are appreciated, please reconsider canceling the route 43. Thank you for your time. Best, Whitney Sullivan long time capitol hill/u-district resident	5/27/2015 2:48 PM
96	More frequent and reliable service between lower QA and the U-Dist (route 32). Also just updating the tech of the rapid ride lines, whose readerboards and pay stations are frequently down.	5/27/2015 2:19 PM

97	The NEW #12 would be basically the ONLY alternative to the deletion of the #43 going downtown for anyone further north of madison. It is extremely important to at least have the #12 run frequently and also some later at night. Also, it would be nice to have NO intermediate stops from downtown up to Capitol hill station, stop at 15th, stop at 19th, from there the stops are fine. The train stations will not serve our area at all as built. Its a 20-25 minute walk to the Capitol hill station The #11 is already VERY slow/ too many stops/ too much traffic on Madison already. I just do not see it getting faster. Delete some stops!	5/27/2015 12:29 PM
98	Don't cut the 43	5/27/2015 11:45 AM
99	I believe that Pike/Pine is over served in this plan and that the route 49 should be getting more late-night service to connect two of the most common late evening neighborhoods.	5/27/2015 10:53 AM
100	The service between Capitol Hill and the Eastside (Bellevue, Issaquah, and Mercer Island) is dependent on the bus/train availability in the tunnel which is overcrowded to the point of not being usable. It is useless to improve the service from the hill to the tunnel without better service in the tunnel. We need more buses until the train comes.	5/27/2015 10:36 AM
101	Please see my feedback that I typed earlier. I probably should have placed it in this section. Thanks	5/27/2015 8:55 AM
102	Montlake is a community with a high percentage of families, it is extremely unlikely that those families would walk down the hill to the light rail station in UW to then take light rail downtown. Losing the 43 would negatively impact everyone I know in this neighborhood and we'd be forced to get our cars more, the very thing we are hoping to avoid by moving in this neighborhood in the first place.	5/27/2015 6:59 AM
103	This survey overly constrains the responses. Route 48 should be divided, but the southern break-point should be the Mt Baker Transit Center, not S Jackson. Removing Route 43 makes getting to the U from addresses east of Broadway much more difficult. The claim that the proposed change in Route 12 provides a substitute service makes no sense to me. Moving Route 12 off Madison St makes connections to First Hill and the southern parts of downtown much more difficult. More frequent service on the Pike-Pine corridor can be achieved in other ways. It is very difficult to understand how these changes are related to the opening of two new light-rail stations. Most of them seem intended to deal with other problems with the current service map. And some of them do that only at the expense of producing new problems.	5/26/2015 5:20 PM
104	No.	5/26/2015 3:59 PM
105	na	5/26/2015 3:13 PM
106	Ya, the whole point of me taking this was to object to the deletion of route 43, which of course, you don't ask about. Looks like you want to kill it without any feedback.	5/26/2015 12:03 PM
107	We need to retain 43 or find a better substitute, because it leaves two gaps: downtown service from Montlake, and service to UW and northbound LINK from upper Capitol Hill (Group Health, 15th Ave and John/Thomas corridors). One way to fill this need might be to extend the revised 10 or 12 to terminate at the Montlake Triangle or Montlake Lid.	5/26/2015 11:15 AM
108	The primary goal of this project is to improve access to and encourage usage of the light rail system. After all, it is called the "Link Connections" project. At the very least, the proposal should make access to light rail no harder. As a Madison Park resident, Route 11 is my access to greater Seattle. The current 11 is a long two blocks from the new Capitol Hill Station - not optimal, but feasible for many users. Metro's proposed 11 worsens Madison Park access to light rail. It makes Capitol Hill Station harder to reach. The 3+ block walk to University Station after a much longer ride across Seattle is not a reasonable alternative. I am mindful of the history of an electric trolley the length of Madison Street, the allure of the only straight shot from Sound to Lake, and the anticipation of a BRT. But these are the goals of a different project, one that should be addressed when Move Seattle is passed this fall and funding for the Madison BRT becomes real. This effort should focus on Link Connections. Please keep 11 as-is. At the very least, don't take away the 2+ block access of 11 at Pine and Broadway to the Capitol Hill Station.	5/26/2015 10:09 AM
109	NONE	5/26/2015 7:58 AM
110	Some form of service from 23rd to Pike/Pine needs to be preserved. Right now that is provided by two routes, 11 and 43, and to go from two to nothing is not at all useful and a major loss.	5/26/2015 2:45 AM
111	Splitting the 48 could provide improved peak service to and from the UW, but at the cost of separating the northern and southern areas of the city from one another. It would also insert a transfer into trips from the rainier valley and central district to K-12 education north of the ship canal. This would add travel time for students taking those trips and provide a disincentive for parents to send their children to school on public transit. It could even cause some parents to choose not to send their children to schools north of the ship canal.	5/25/2015 10:48 PM

112	We need the direct route the 43 currently provides between Capitol Hill and the UW stops on 15th. Having to take the 8 to a connection with the 48 would be unreliable and, when the weather is bad, really inconvenient. It would also add to the travel time. KEEP THE 43!	5/25/2015 12:24 PM
113	It takes forever to get from Capital Hill back north through the U district and then to points north (Lake City, Kenmore) particularly nights. Any chance there could be some express busses going that way that just stop one place in these hubs and then people could walk to wherever and not hold up the increasing riders that will be living in the north and suburbs	5/25/2015 10:06 AM
114	no	5/25/2015 9:25 AM
115	Again the 12 is nothing like the current 12 and therefore DON'T CALL IT 12!!! The 11 is horribly slow- recall it the slow boat to China!!!! So taking the 12 away will create the problem the 8 had and it wouldn't solve anything!!	5/25/2015 12:06 AM
116	Removing the #43 bus will negatively impact the community. Getting to downtown will now require transfers or a 7 block walk up a steep hill to an uncovered bus stop, not the most ideal situation in during our wet winters. Transfers are unreliable and greatly increase the amount of time to get anywhere.	5/24/2015 12:39 PM
117	I don't understand why route 11 is being altered to run the entire length of Madison. Isn't that what BRT is doing? Why duplicate the service? Also, I get the impression that people who are travelling from Madison tend to want to go down the Pine corridor to downtown, rather than get dumped several blocks south of their ultimate destination. Is there really the demand at the waterfront to warrant redirecting 11 from the current Pine/Pike route?	5/23/2015 10:44 PM
118	I don't ride these routes often enough to be able to give any input.	5/22/2015 11:48 PM
119	I live at 26th and Denny, and work on Pike and Melrose. The move from the 11 making a stop in the pike/pine corridor to only running down Madison, makes the trip I take daily more inconvenient and challenging. I have some mobility issues and adding a transfer and/or a lengthy walk to my daily commute is a terrible option. I also travel in the very early morning, which means that having a stop a short walk to/from my home and to/from my workplace is also a safety issue. Not to mention transfers are often unreliable, making my commute longer and/or causing me to spend more time in commute to ensure that I arrive places on time. Same issues as splitting the 8 and the 48 into new lines for half of the service area. Or eliminating the 43. A two bus trip for folks over here to get from the CD to the center of Capitol Hill, where as currently it is one 7-10 minute ride?! Or a two bus or more trip to get to Rainier Beach or Ravenna, Ballard or Wallingford?!? Why is it that this specific area of the CD is being cut off from convenient "one bus" trips to the far north or south of the city, or even the center of the next neighborhood?!? What about the many Seattle Central students who live in the CD?! Some of these changes force people to make transfers in inconvenient, inaccessible (the steep hill from 23rd ave down to MLK is NOT accessible for everyone) or dangerous areas (downtown), or to pay extra to connect to light rail. If Metro's whole intent is to shuffle more riders onto light rail connections, I certainly hope that Sound Transit and Metro can make the change to inter-agency transfers, or you are certainly making people then pay twice for a trip that formerly would have cost them one price. It almost seems as if these particular changes are bent on catering only to the upper middle class folks who ride busses from their condos to their cushy jobs at one of the many tech companies or UW. People who can afford to transfer to any mode of public transit because their jobs subsidize or pay for their transportation costs, or can afford to be late to work because they have the luxury of not being fired for being 10 minutes late. Please consider the rest of the population in the CD and south end and leave these busses alone.	5/22/2015 6:28 PM
120	The areas lack north south service as metro has lacked cross town service. The newer route 65 is a step toward service. A better example is if route 65 continued to Aurora Avenue.	5/22/2015 5:31 PM
121	Love added frequency of route 49	5/22/2015 12:32 PM
122	The frequency improvements here and elsewhere sound good, but weighed against the loss of service elsewhere, remain too drastic in their effects. Seattle isn't ready, and transit isn't well-funded enough for these grandiose plans.	5/22/2015 11:40 AM
123	*Capitol Hill service is already very good; I think it's been a mass oversight that responses resulting in using transit about the same were disregarded. It is difficult for many in this neighborhood to use transit any more than they already are--that doesn't mean that there wasn't enthusiasm over Alternative 1 options. *The same goes for this round of proposals--while I think many of the changes are great improvements, it is impossible for me to say I'd use transit any more than I do. I bike, walk, or use transit; I do not use a car and I cannot reasonably claim to use transit more. *The true investment that would result in greater transit use in this area would be to provide more night/weekend service on the 8. The current service levels are abysmal during these times, and I know many who instead utilize Lyft/Uber/Car2Go instead of waiting the 45 minutes (because the 8 is always late) for the next bus. *To help provide this investment, reduce service in the Pike/Pine corridor. It duplicates too much service and is unnecessary.	5/21/2015 10:00 PM
124	none	5/21/2015 9:45 PM

125	No, but thank you!	5/21/2015 7:50 PM
126	I need more frequent service on Route 50 between Rainier Ave. S. & Link Light Rail at Othello Station; then I could use Metro & Link Light Rail to get from home to work at the University!	5/21/2015 7:44 PM
127	Please split the 8 at Mt. Baker Station so that people can use it to get to that light rail station. This proposal removes a way to take the 12 to the south end of downtown from 19th. That is a really useful service. There is already a way to get to the north end of downtown from the north part of Cap Hill (the 10). Why do we now have two buses to the north end of downtown and none to the south? Please keep a the connection to the south end of downtown. Keeping the 43 would provide a connection to the light rail (which the 10 does not provide). This proposal takes away the ability to take the 43 from the 24th ave corridor to downtown. I appreciate you prefer for people to take the 48 to the link but that is two seats and there for cumbersome. Plus some people may no be comfortable with traveling underground in the bore. please retain the 43 bus to provide flexibility in this corridor. Please send the 541 south over capitol hill from 520 rather than north to the U-district. There is plenty of connectivity going north from montlake but, with the 43 going away, none heading over capitol hill from montlake. use the 541 to fill this gap.	5/21/2015 4:33 PM
128	Eliminating route 43 means longer walks to uncovered bus stops up the steep hills of the neighborhood. More trips would require transfers, and it would not improve service. 43 is heavily used	5/21/2015 3:36 PM
129	I am very disappointed in the elimination of Route 43 which is the primary route I use. Eliminating it will mean a much longer walk to a bus stop and many rides will require transfers. This area of Capitol Hill has very steep streets, and many of the bus stops do not have shelters, which makes waiting for the bus in the rain unpleasant. I voted for improved bus service; this is not an improvement.	5/21/2015 3:25 PM
130	The main reason I use Metro is that I can take one bus downtown to the retail core. This would no longer be the case and it will impact my ability to use Metro. Requiring us to take 2 buses to get to the Broadway light rail station pretty much guarantees I will not be able to use that either.	5/21/2015 12:58 PM
131	Running buses until midnight is not "late night service". That's basic service. I think most people have something more like 2:30am in mind, for obvious reasons, and a more reasonable level of late night service would aim for something closer to 3:00-3:30am to adequately serve the wait staff at Capitol Hill's numerous late night venues (read, actual "late night", not the definition you're working with), who can no longer afford to live on the Hill. Perhaps surveying people about what terms like "late night service" and "the needs of the community" mean might be a reasonable step to take before planning service changes like this. On the other hand, thank you for getting rid of the 43. Fingers crossed that you don't decide to have 44s now spontaneously change into 12s at random times during the day.	5/21/2015 10:42 AM
132	Thanks!	5/21/2015 9:41 AM
133	Need to have some connection to Cherry Hill	5/21/2015 8:54 AM
134	Better service from the Eastside, Issaquah and Sammamish, seem to be forgotten in all the new proposals, I am sure you are getting plenty of tax money from us, the biggest growing area with the least amount of public transportation to get into the city, the city of sammamish has no public transportation during non-commute hours monday-friday and nothing on the weekends.	5/21/2015 7:38 AM
135	Please keep the 43.	5/21/2015 7:32 AM
136	Changing the 12 route is a big negative. It's the easiest way to get to the southern end of downtown. I was disappointed when the 10 route was changed years ago to just go downtown on Pine and return on Pike. I am even more disappointed that the plans are to do the same with the 12. It's a pain to get to the city and county buildings now. Please don't cancel the 43. It's one of the best routes in the city. The new light rail station at Husky Stadium is not remotely convenient to get to activities on the west dude of UW campus. That would be a very long hike. I love the 43!	5/20/2015 9:55 PM
137	Please don't eliminate route 43!	5/20/2015 9:08 PM
138	Keep the 43-it is by far the best connection from the top of Capitol hill to the u- district	5/20/2015 5:06 PM
139	I use the #11 now to get to the shopping areas of 6th & Pine as many others in Madison Park. I am older and the proposed changes will make it impossible for me to be independent. If you must make changes why not have the bus turn right at Madison and 4th and make a left at Pine and a left at either 3rd or 2nd and back to Madison to pick up the proposed route. Your proposed route will only encourage more driving and cars in downtown Seattle. Thank you.	5/20/2015 4:18 PM

140	(Duplicate of a previous answer): Losing rt 43 means losing direct connections from the U district to Group Health's main campus. See if there's some way to preserve that.	5/20/2015 4:09 PM
141	I live on 17th Ave E, one house in from E. Thomas. The 43 bus route is about five steps from my front door. I take this route to go downtown, my daughter takes it to visit her friends in Montlake, and I take it to commute to the main campus of UW. We take the 43 to Broadway, to downtown for work and for entertainment. While on the bus, I see older people and people with small children who are going to Group Health Hospital, or to the library in Montlake. I see high school kids commuting, I see people going to UW or to SCCC. In the evenings, I see students from UW heading to Capitol Hill for night life. And--with the 43, all this can be accomplished on one bus. No transfers, no waiting in the dark, in the rain, on unsafe corners. No need to cross busy streets. No need to walk up or down a steep hill (15th E to Broadway and 15th E to 23 E are VERY steep hills). No need to walk by unsafe areas at night. PLEASE SAVE THE 43! In general, what concerns me the new proposal is that without the 43, there will be too many transfers from one mode of transportation to another--this doesn't work if you have physical limitations, kids, baby stroller, whatever--it's a deterrent to taking public transportation. -access to stops near Group Health, 15th Ave E, 19th -23rd/Bway bus transfers means a long walk on a significant grade, or having to take several buses -no benefit of time savings -when I head to the University District, it is always beyond where the light rail stop is--I don't want to have to take a bus to light rail, to walk to another bus to get where I want to go--when I now can take ONE BUS. Please don't cut off this part of Capitol Hill/Montlake from single-mode transit options. If there were more light rail stops in between Broadway and Husky Stadium, I could see the rationale for reducing/eliminating buses, but connecting those two points does provide enough service for the needs of this part of Capitol Hill--15th Ave E and 19th Ave E are growing in density--please don't make us all schlep down to Broadway or up to 23rd Ave E to take public transportation. Honestly, without the 43, I will drive instead of taking the bus. Thank you, Connie Chaplan	5/20/2015 4:07 PM
142	I need to take route 242 from Montlake freeway station to northgate on a daily basis. Deleting this route greatly inconveniences my schedule since I do not see a proposed alternative. In order to instead catch the 555 which runs a similar route I must leave work early and I do not think my supervisor will approve.	5/20/2015 3:49 PM
143	Eventually I would like service to start at 3am so I can make it to the airport for an early flight.	5/20/2015 2:18 PM
144	Route 49 should be just as frequent on Sundays as all the other days. I personally use the route on Sunday nights more than any other time, and know many others who do as well (to make it from the University District to compline at St Marks Cathedral and swing dancing at Century Ballroom).	5/20/2015 2:09 PM
145	I think cancelling the 43 route is a bad idea. While it's true the route is covered by other buses, the increases on those routes (e.g. 48) are not equivalent to doubling the number of buses, which is what would need to be done. The stretch from Montlake (SR 522) to Madison is already overcrowded, with most buses being full at peak times. Removing almost half those buses will not make it better. Additionally, the proposed connection at the Husky Stadium light rail is too far from the actual station. When people will be running up the stairs for connections the additional overpass crossing could easily cost people 15 minutes while they wait for the next bus. That's the kind of reason people don't take transit. That exact problem already exists at the Mt Baker light rail, where the inconvenience of crossing Rainier then going up the huge escalators means people don't bother. I understand the stations are ST not Metro, but there needs to be a better understanding of what drives the convenience of connection points.	5/20/2015 1:42 PM
146	I miss the route 5 connection to the Northgate Mall. At present, I need to transfer to a route 40 bus at Holman Road which can be a long wait.	5/20/2015 12:55 PM
147	Let's do it fast! We need these changes!!!! Alternative #1 is so good!!!!!! The bus routes are too complicated right now and stop running too early in the evenings. I am still forced to drive primarily because the bus I ride is too far away and Lightrail is not as accessible for me and/or does not stop at the UW. I feel safer on the Lightrail. The Lightrail saves me money, reduces my travel time, helps the environment by lowering carbons, and reduces chances of being involved in traffic accidents or issued redlight tickets, parking tickets, and moving traffic violations. Go Alternative #1!	5/20/2015 12:39 PM
148	Route 43, which will be discontinued, offers the ONLY 1-bus service between south Capitol Hill/East Olive Way to the University District. Keep in mind that it is a steep hill and the 2-3 blocks UPHILL to the Capitol Hill subway station are a difficult walk for many people. If route 8 runs every 15 minutes Denny-Olive-Broadway, this would alleviate the cancellation of route 43.	5/20/2015 12:37 PM
149	It looks like to go from Capitol Hill on John Street to the University District, it would require 2 buses, instead of just taking the 43, which would make me not take the bus anymore.	5/20/2015 12:09 PM
150	More late night services from Capitol Hill to the U-District (or North Seattle) would be most convenient for me as I don't have a car and have limited means for getting home late at night from Capitol Hill events, so I would use a late night bus service. (And going through Downtown late at night by myself is scary and I don't want to do that.)	5/20/2015 11:34 AM

151	As I mentioned previously, I feel that deleting the 43 is eliminating a huge link from Capitol Hill to both Downtown and the U District. I think getting rid of this route would make commutes a lot difficult for people between 14th and 18th and Madison and Aloha.	5/20/2015 9:51 AM
152	PLEASE do not eliminate the Route 12 bus that stops on Marion at 1st Ave. Many ferry commuters, shoppers, and people needing to go up the hill to the hospital complexes at the top of the hill need this link to allow them to use public transportation from the ferry terminal. This route provides a vital and much appreciated link for a large ridership. Another huge improvement would be to restore the combined 10/12 route and once again allow it to come all the way down to 1st Avenue. Many of our commuters needing to get to Seattle Central Community College now have to walk 8-10 blocks to 4th and Pine, or just walk all the way up to Broadway- large ridership affected and requires catching an hour earlier ferry to make classes, etc.	5/20/2015 9:28 AM
153	NO.	5/20/2015 8:21 AM
154	More roads.	5/20/2015 8:12 AM
155	It will be so nice to be able to get to Capitol Hill from all over the city without having to look for parking!	5/20/2015 8:07 AM
156	The 8 desperately needs more night and Sunday service. As I often work until late and on weekends at Seattle center, I am appalled at the scaling back of proposed Alt 1 service improvement on the 8. Better midday and peak service will be great, but past 7:30pm M-S and all day Sundays, the 8 is nearly useless at 30 minute headways. SLU and Capitol Hill are growing by thousands of people a year, and this is the night and weekend service we deserve? While at the same time, 15th ave, which is adding far fewer housing units, gets a 10 bus way more often than the neighborhoods where they're building 40 story apartment buildings?	5/20/2015 12:30 AM
157	I no longer live on Cap Hill, but man, I wish the split had happened when I lived up there! It's such a great idea, and I really hope it goes through, catching the 8 to work was a nightmare sometimes.	5/19/2015 10:54 PM
158	I don't quite see what will replace the direct (no transferring) to downtown service from 23rd and E John area to the downtown area of Pike and Pine. The 43 currently provides this The 8 does not go through downtown. As I understand the 11 revisions it will not go down Pine but down Madison to Marion. Riders will have to take the 8 and transfer to the 10 on 15th to go down to the downtown area around 4th and Pine. Conversely coming up from 4th and Pike will require a transfer to get down to 23rd. The area west of 19th and 15th is served by the 10 12 and new station. For seniors and low mobility riders it is harder to walk up the hill so it would mean transferring. If I understand the revisions correctly this means there is no direct service to that part of downtown from 23rd without transferring and taking even more time than currently.	5/19/2015 9:42 PM
159	Please extend the #8 split to Mount Baker station. I use Metro exclusively for transport and use the #8 to work at a school about 10 blocks from 23rd and Jackson. What a hassle to have to transfer to ride an additional 10 or 12 blocks. A bit too far to walk but a waste of time to have to transfer. Also consider Lighthouse for the Blind. People who work there ride #8 a lot. Many are deaf/blind also. Cutting the #8 at 23rd would force them to make a transfer which would be very difficult!!! Also good to connect to the Mount Baker station for folks farther south that want to connect to the airport.	5/19/2015 9:31 PM
160	I like the original idea of moving the 49 to Madison. While Pike/Pine might have been underserved before, now it appears to be massively overserved. The revised 12 to replace the 43 is fine, but the current 12 should be retained with a short turn at 15th and Madison. The 11 should move back to the Pike/Pine corridor. This will also enhance E-W connectivity. The 9 should go to Group Health instead of Aloha St to help move people from 15th to/from the Link station. Overall, this proposal is far too conservative.	5/19/2015 7:19 PM
161	Get the damn First Hill Streetcar running! Previous service changes were made with the idea that the streetcar would be in service by now (such as the elimination of the Issaquah-First Hill express rt). Now there is no smooth transfer between commuter routes coming from the suburbs or the train to First Hill/Capitol Hill. Many of us end up walking up/down First Hill or driving. Further streetcar delays needs to be communicated better, and please tell us about the financial side - we are paying for a service that hasn't materialized.	5/19/2015 5:49 PM
162	Please maintain the 43 bus	5/19/2015 5:06 PM
163	I currently ride bus 11 and have for over 20 years. The current route is perfect for me. Changing the route to go down Madison Street would greatly impact my use of transit. I work at 7th and Stewart and am fine walking a couple of blocks from the current route. The new proposal coming down madison will more than triple my blocks walked in downtown. Currently I see riders using the bus 11 route to get to Seattle community college and also to the bus tunnel. These riders will also be impacted by the revised route. The current bus 11 and 10 routes are standing room only during peak times and by removing the bus 11 and moving it to madison the problem will be worse. If the changes are implemented, I will most likely be driving my car to work instead of taking transit. The added time and distance makes it very inconvenient for my work location.	5/19/2015 4:02 PM
164	Better connections to North Seattle from the Capitol Hill area would be convenient.	5/19/2015 3:53 PM

165	There is no direct connection between Dexter Ave and the University	5/19/2015 3:41 PM
166	No, I do not have anything else that I would like to share with you about the Metro's proposal for Capital Hill and Central Area bus service.	5/19/2015 3:26 PM
167	Use the new lower entrance style buses with easier access for elderly and wheel chairs to reduce the time between stops	5/19/2015 2:29 PM
168	The proposal in phase 3 is much better than what was previously proposed. I appreciate the thoughtfulness put into this. However, I don't agree with the deletion of the 43. This is the bus I primarily take to downtown. I am lucky enough that I can walk about 5-6 minutes from 24th and Harrison to get to the 11. Those who live past me and on the 23rd/24th corridor don't have that option. They'll have to take the 48 and transfer to the 11 or take the 48 and transfer to the 8 and transfer to the light rail or another bus to go downtown. I don't understand how service will remain for 19th and 15th to downtown, but not 23rd. Why aren't one of those bus routes reduced (they're close in distance and not up a hill) compared to 23rd. I also appreciate that the #11 will run more frequently, however, the trip takes longer than the #43. There are a lot more stops and lights at the #11. Although I live close to it, I avoid taking this bus when I can because there are so many stops. Also, I rely on the bus for 98% of my travel. I'm likely to switch to Uber rides at night because a bus every 30 minutes to anywhere close to 23rd is not realistic. I've been lucky to have the 11 and 43 to get there. Now I'll have the 11. As a woman, I don't feel safe being downtown waiting for the bus for a while late at night - I'd probably take an uber home. I strongly believe the #43 should remain in service. It isn't fair to have more service for central Capitol Hill than other areas of Capitol Hill.	5/19/2015 2:27 PM
169	Please increase the route 9 to Rainier Beach. I work on FH at Swedish and ride the 9 from South Seattle. We need bigger buses and frequent time frames.	5/19/2015 2:25 PM
170	I checked the box that said No, I do not want to offer feedback on X routes, and still had to answer the questions? Also I would recommend including maps of proposed routes and changes in the survey itself instead of asking me to memorize what's changing and where. Survey design needs more work before this is so widely distributed!	5/19/2015 2:22 PM
171	Discontinuing the coaches with stairs should be a priority to improve access for families traveling on Metro with strollers and small children (we do so every day!)	5/19/2015 1:30 PM
172	Bus Noise Mitigation should be a priority Consider technologies to reduce overall bus NOISE Thank You	5/19/2015 1:22 PM
173	Trying to change bus transportation does not change fix or make street access better.	5/19/2015 1:20 PM
174	Clean the buses please.	5/19/2015 1:11 PM
175	The 43 is very convenient for traveling downtown.	5/19/2015 1:09 PM
176	I asked to not give input for this area since I don't live there and don't use those routes (checked the "no" box), but it took me there anyway so I had to choose no opinion for all questions.	5/19/2015 1:00 PM
177	I do not see anything here about route 43, which is the bus I currently take the most. What are your plans for route 43? From where I live on Capitol Hill, it would be quicker to go to the University District by bus (via route 43) than by light rail and I am hoping that this will still be an option. Thanks.	5/19/2015 11:39 AM
178	I find it really difficult to take the bus when I have to transfer in downtown. I feel that there should be buses that do direct stops to First Hill area to reduce the amount of transferring and if this were to happen I would rely solely on the bus system.	5/19/2015 11:25 AM
179	It would be nice to have a First Hill Express from White Center/West Seattle.	5/19/2015 11:23 AM
180	In the evening, I also rely on bus 49 in addition to the 70's that go Downtown so the increased frequency is a good change.	5/19/2015 11:20 AM
181	the changes to Broadway have been extremely unsuccessful; traffic is much worse. You now have a gigantic bike lane that is very little used. It would have made much more sense to have the streetcar run on a dedicated lane instead of sharing with cars. One can only imagine how much worse traffic will be with the addition of street cars.	5/19/2015 11:19 AM
182	I said no to this section but it didn't skip	5/19/2015 11:02 AM
183	The new proposal for the #11 Madison that has it traveling on Madison St the entire way from Madison Park to Downtown is a HUGE improvement over the previous alternatives. One tweak that would make it even better yet would be to have it loop around to the North when it gets to 1st Avenue, rather than to the South. It could then turn back to the East on Spring St, University St, or Pike St.	5/19/2015 10:52 AM

184	Not everyone in u-district live near the husky stadium to take use of the light rail link. 71, 72, 73 are the most popular route connecting us to downtown seattle and international district. Cutting them will cause problems and changes to many of our daily commute!!!	5/19/2015 10:47 AM
185	Please do not eliminate route 43!	5/19/2015 10:40 AM
186	Without the 43, the central district is underserved in transportation options. Splitting this route in 2 will only increase the time it takes for underserved populations to reach the university. Less money invested in door to door service for wealthy and/or gated communities would allow for more transportation to areas that depend on it for their jobs and children.	5/19/2015 10:36 AM
187	I live at 19th and Thomas and go to school at the University of Washington. Currently, I take the 43 to school every day and it takes between 20-25 minutes and drops me off one block from my school. If this bus is cut, I will have to take the 8 to the capitol hill light rail, to Husky Stadium, then another bus to get to the northwest side of campus for class. This is TWO transfers, which, no matter how frequently service is, will extend my daily commute. I only live a few miles away from school. Those living further out and those who have mobility issues will be even more affected. Rather than displacing regular transit riders who rely on the bus system every day, Metro should be working in partnership with the city to get DRIVERS to use the light rail instead. There should be free park and rides available at all the light rail stations.	5/19/2015 10:27 AM
188	I thought I said I didn't want to provide feedback on Capitol Hill/Central Area?	5/19/2015 10:13 AM
189	Increased frequency of 49 is huge. Also very glad the 47 is returning to west Capitol Hill.	5/19/2015 10:01 AM
190	Your survey asked if I wanted to comment on cap hill/central area to which I replied NO and then the survey forced me thru all those questions anyway. HmMMM ... Is Metro REALLY listening????	5/19/2015 10:00 AM
191	I take the #43 every day to work in just NE of the U-District. As it stands, this line gets me to within two blocks of my workplace, and one block of my home. As someone with a disability the elimination of this route presents and undue hardship. The alternatives have me taking two or three connections to get to/from the same locations. This is not efficient or helpful.	5/19/2015 10:00 AM
192	I am very concerned about deleting route 43. For those who are coming from the U-District to the mid-north side of Capitol Hill/ Montlake area would now have to take two buses to get where they need to go. The train station does not work for everyone location wise. I am late all the time by just taking one bus. I cannot imagine trying to catch two buses every day and making it on time anywhere. Please reconsider routes.	5/19/2015 9:44 AM
193	I am concerned that daily link service every 8 minutes will not be frequent enough; especially to meet the demand of riders transferring from the Sounder train. From the proposal and map, it's hard to tell how many buses will connect directly to the Husky stadium link station. I would like to know which routes besides 65 will stop there.	5/19/2015 9:41 AM
194	Do not delete route 43.	5/19/2015 9:38 AM
195	Splitting the 48 is crazy - if you are encouraging use of the transit system, don't make it more cumbersome by increasing the number of transfers to get from one place to another. The 48 is standing room only as it is now, and with the removal of the #4 route for months, and then splitting up other routes and suggesting that more people take the 48 (example #8 and #43 sites) is just plain crazy. During fall/winter rainy days I've had THREE fully packed buses pass me up at the Yesler and 23rd stop on a routine basis causing me and others to be extremely late for work and starting our day off on a really bad foot. The number 48 has more schools (college, universities, private and public schools) on it than any other route in the city, and no increased in buses during peak school hours in the morning and afternoon to adjust for that fact. Seattle Metro used to be top in the nation in service, convenience and cleanliness of buses...no longer....and I find that really sad.	5/19/2015 9:38 AM
196	I don't think that the deletion of route 43 makes sense. It will make many people's commutes take much longer, especially if they don't live near any of the light rail stations	5/19/2015 9:38 AM
197	Sorry I think I included my comments on about the 8 in the wrong section, please see written answer from the last section. Thanks!	5/19/2015 9:36 AM
198	I am strongly opposed to the elimination of the heavily-used, convenient 43 route. The transfer requirement makes absolutely no sense.	5/19/2015 9:36 AM
199	Is bus 47 coming back? That would be excellent. :)	5/19/2015 9:31 AM
200	No - but I'm pretty sure I said "no" to giving feedback for this neighborhood, but your quiz still directed me to these questions. Sorry my feedback isn't very good - I don't use these buses so I have no way to gauge their proposed benefits.	5/19/2015 9:29 AM
201	There needs to be a direct connection from Montlake to Downtown Seattle.	5/19/2015 9:29 AM

202	Increased transfers are NOT an improvement in service, especially in a region with frequent rain. Please do not eliminate the #43 route! None of the proposed options provide suitable coverage. I currently live on 13th and Republican and work in north U-district. The 49 is extremely slow and represents a substantial walk after exiting the bus, and using light rail would add more walking to both the front and back end of my trip, plus a transfer. My commute would take the same amount of time, but would be more work. I will definitely need to resort to driving more often.	5/19/2015 9:28 AM
203	no	5/19/2015 9:25 AM
204	It looks like West Seattle gets the giant middle finger. Maybe I just need to quit working for UW and find a mom and pop business that needs employees in West Seattle. Buh-bye!	5/19/2015 9:25 AM
205	I utilize the 43 bus from north/east Capitol Hill to the University District to commute to/from work 5 days a week. This is a fantastic route that has many stops close to my home that I can easily walk to (15th and E Thomas; 17th and Thomas; 19th and Thomas.) I urge you NOT to eliminate the 43. The other proposed options are very inconvenient for myself and a serious burden to folks with disabilities/mobility issues. For example, there would be no non-stop service between 15th and 23rd on Capitol Hill. Riders would need to transfer from a 12 or 8 to a different bus on 23rd to go to the U District, extending their overall trip time. The 43 bus route is packed every morning when I ride it, so I do not understand how this route was chosen for elimination. I would not utilize Link Light Rail because the stations are too far away from my origin and destination points. My trip would be longer than it already is and include multiple legs/transfers & more walking time, whereas my current bus route is a single bus ride and a short walk. Ultimately, the elimination of the 43 route would motivate me to drive to work. I have been a bus rider for over 5 years, even though I own a car. The elimination of the 43 would add time to my commute and it would make more sense for me to drive to my workplace if this moves forward.	5/19/2015 9:23 AM
206	Don't cut any service. There is no light rail yet	5/19/2015 9:23 AM
207	No. I said some screens back that I did NOT want to give feedback for Capitol Hill and Central Area proposal and yet I was forced to click through every page of it! This is a VERY badly designed feedback system.	5/19/2015 9:23 AM
208	For me Route 11 should go to the Capitol Hill Link Station OR to Pike/Pine downtown. The change to this route going straight down Madison St. is going to make things even harder for someone without a car in Madison Park. For those that work downtown it is great, but for anyone who wants to get north of Madison it will make it even more difficult than it already is.	5/19/2015 9:20 AM
209	I cannot believe that metro is deleting the 43 - one of the most used routes. Sure you want to improve connections from Capitol hill to the U-district and downtown- but you will be eliminating a link from central Capitol Hill to the the most eastern part of Capitol Hill as well as the Central District. THIS IS MADNESS.	5/19/2015 9:20 AM
210	Bus 43 should remain as it services a large portion of Capitol Hill for which it would be inconvenient to take the Light Rail.	5/19/2015 9:20 AM
211	The 12 connecting north Capitol Hill and 1st Hill is my commute and that of many of my neighbors. I would now have to drive to have the same commute timing/access.	5/19/2015 9:19 AM
212	From what I have read about the changes, I think that they are improvements that will help us to move around the city more easily. I appreciate the proposal to split route 48 especially. I think that it worked very well when route 43 was split into the 43 and 44, and I think that splitting route 48 will improve on-time and predictability. There may be a negative impact on some high school students from Bishop Blanchet and perhaps Roosevelt. Some may be required to transfer after the split. I look forward to more efficiencies and new transportation routes. Our city has changed dramatically in the last 20 years and it's time to re-think our plans. Thanks for taking the time!	5/19/2015 9:18 AM
213	I depend on the RT 43 to get to and from work. I have mobility issues and cant depend on the RT 8. Even if you vastly improve the RT 8 the light rail stops in the U District is still too far from work. Please do not discontinue the RT 43!	5/19/2015 9:18 AM
214	VERY supportive of improvements to 48 and new 45 bus - need more frequent service between 4 - 5:30 pm.	5/19/2015 9:17 AM
215	Improve security and clean the buses more frequently.	5/19/2015 9:16 AM
216	LOVE the idea of moving the 540 to service Houghton P&R!! Thanks for keeping the 277!	5/19/2015 9:13 AM
217	Eliminating the 43 will force me to drive to get downtown, especially in poor weather.	5/18/2015 10:03 PM
218	I would prefer that route 43 does not close. I use this line every day.	5/18/2015 8:08 PM

219	Run both the #8 and 38 between the MT Baker TC and ML King and Madison (if a "terminal" can be located for the #38). Current Route #8 serves a popular, low-price grocery store (Grocery Outlet) that many people in the Rainier Valley and Central District shop at--preserve this connection. KEEP THE ROUTE #4 TO JUDKINS PARK AND CENTER PARK DURING SDOT CONSTRUCTION ON 23RD!!!! DON'T TURN IT AROUND AT 21ST AND JAMES!!!	5/18/2015 6:07 PM
220	I have a suggestion as changes in existing routes are being considered that would improve traffic flow and safety. Bus 31/32 route passes down my street on N 35th Street between Wallingford & Stone Way. This is a VERY NARROW residential street. With parking on both sides of this street it is not possible for a bus and car to pass opposite directions simultaneously on N 35th Street. It is barely possible for two private passenger vehicles to pass simultaneously down this street. In addition to traffic congestion there are safety concerns. Buses & cars always drive faster than the speed limit. It is not possible to exit a parked car safely because opening a car door impedes traffic flow. I've frequently seen parked cars dinged and clipped by passing buses and/or cars trying to navigate this narrow street. Three different cars parked directly in front of my house have been seriously damaged or totaled by vehicles trying to navigate our narrow street unsuccessfully. Parking and traffic have both increased in the past couple years a trend likely to continue due to the North Transfer station remodel with the addition of a new recycling building and two small parks, the new Brooks headquarter building (Leed certified=more cars parked on the street), new businesses: Evo (snowboard shop), the Whale Wins (restaurant) and Jewel (restaurant) and additional multi-unit housing. I propose an improvement would be to move routes 31/32 to 34th between Wallingford & Stone Way, about a 5 block segment. The North Transfer station remodel has improved the N 34th Street corridor with safe bike lanes, etc. N 34th Street is a commercial, non-residential street and broad enough to allow buses to travel in both directions along with cars and bicycles. It is also possible to exit a parked vehicle without swinging your car door into traffic as you exit a vehicle. Thank you for considering this request. I've lived on this street for 16 years and have never understood the rational behind having any large or commercial vehicle, especially Metro buses, routed down this street. Andrea Hanson 1510 N 35th Street malibuhanson@gmail.com	5/18/2015 2:38 PM
221	I do not know the Capitol Hill very well and currently do not go there very often (mostly because it currently takes a long time to bus there). However, I would like to go there more, and I believe the frequent service grid will make bussing to/from and throughout the area much easier, faster, and reliable. Thank you for the time and effort that has been put into this.	5/18/2015 1:24 PM
222	I currently ride the 12 from downtown to Capitol Hill 3 days a week to get to the gym. I would ride the 11 instead	5/18/2015 1:04 PM
223	Please consider there are people who work on Capitol Hill from 07-1930. I can take a bus from GL to First Hill, but can't quite make it to work before 7, unless I get there at 630. It takes me an hour to get back to GL from Capitol Hill and it is 5 miles. Please consider a bus system that works for 7-1930 people	5/18/2015 9:41 AM
224	The current route 12 provides critical access to the medical facilities along Madison as well as the southern end of downtown. There are already PLENTY of routes that service the Pike/Pine corridor to and from Capitol Hill. It would be devastating to change the route of the 12 and eliminate the portion that goes along Madison. Please, please, please do NOT reroute the 12.	5/18/2015 9:20 AM
225	Can not accept the elimination of route 25. Would not be able to get to Link connections without this bus service.	5/18/2015 7:54 AM
226	My concern is elimination of the 43. Since it goes through campus it is a low-walking solution for coming down 23rd. Taking the 8 to the 48 is certainly doable, as long as the 48 still does on campus as it currently does.	5/17/2015 6:00 PM
227	So, maybe you could just let us comment on service changes we are concerned about?	5/16/2015 9:45 PM
228	I think that this proposal lacks the best parts of proposal 1: specifically having the 8 cut off at Madison Street. I am fine with having it not continue down Madison Street, but I think truncating it there would improve its reliability more than continuing to Jackson Street. I also like having the 49 continue through First Hill instead of downtown.	5/16/2015 4:22 PM
229	I am concerned about the decision to eliminate the #43. It provides the only direct connection from Montlake to downtown Seattle. The proposed options require a transfer, which increases the change of late buses, etc. I ride the bus early in the morning and don't consider the transfer locations to be safe.	5/16/2015 2:31 PM
230	No comments for the Capitol Hill revisions.	5/16/2015 2:26 PM
231	Again, I reject the proposed cancellation of the Route 43, which provides convenient late-night service and continues as the 44, and is a very important part of my transit ridership. Proposed additions on the 48 don't make up for having to transfer in the U-District late at night to continue to Wallingford/Ballard.	5/16/2015 1:36 PM
232	See previous statement!!! We need the #12 19th Ave East route kept in place!!	5/16/2015 1:01 PM
233	Add service to 12th Avenue.	5/16/2015 9:55 AM

234	The combination of 43 and 48 between SR 520 and Madison Valley/Heights has made for a highly reliable bus corridor. even if one route is delayed, you're likely to catch a bus within a few minutes. The change to delete 43 and rely on high reQUENCY 48 makes me nervous.... that 48 will have to be highly reliable to continue to make bus transit an easy choice.	5/16/2015 8:46 AM
235	You must continue to serve the poor working citizens of the city, while protecting them from the hooligans who ride the late night buses, as well as the drivers.	5/15/2015 8:19 PM
236	Bus 43 is very useful, it would be good to keep it	5/15/2015 6:22 PM
237	I do not like the new routes 11 and 12. The 11 would be a diesel bus on a very steep hill and would not provide a connection going North to Capital Hill such as the current connection that goes along 19th or the earlier proposal to go along Broadway. While there would be a new more direct connection to Madison Valley, a connection to Capitol Hill is more important. Already, the First Hill Streetcar is completely useless for people who live or work on the downtown side of First Hill (such as at Virginia Mason, Royal Manor, Cielo, 1000 8th Ave Apartments, etc.) because of the Broadway route chosen. Limiting the bus service on Madison St. to Madison St. itself would eliminate any direct connection to Capitol Hill for people in this very dense part of the city. While Capitol Hill is walkable from some parts of First Hill, for many people who live/work near downtown this is not a plausible option considering the steep grade. While there is no way to make everyone happy either Alternative 1 or Alternative 2 would be preferable to this option. One more point: it appears part of the idea with the new 11 is that this service will go away if Madison BRT comes along. Again, the net effect of all this would be to reduce important connections between First Hill and Capitol Hill. If BRT is "instead of" and not "in addition" to bus service connecting downtown, First Hill and Capitol Hill, then we are better off without it and I will be voting no this fall.	5/15/2015 5:25 PM
238	I would like a route that goes from Madison and crosses over to the main shopping corridor around Nordstrom.	5/15/2015 5:18 PM
239	same as before - the entire proposal is impossible to understand so how can I comment? we do need MORE busses, MORE frequently, with better connections and we also need CLEARER explanations of the routes, the schedules, and the entire system.	5/15/2015 5:03 PM
240	Please restore service on route 25 to a level that encourages ridership. Metro has cut this route to a point where it's no longer frequent enough for commuters to take it, and then has proposed eliminating the route because no one rides it. The reason no one rides a bus that only comes once an hour is *because* the bus only comes once an hour, not due to lack of demand along the route. Prop 1 was supposed to provide funding to restore routes like this one, not to cut it further.	5/15/2015 4:06 PM
241	I think you've done a great job with the proposal for this area - support for the new light rail station and access to other areas of the neighborhood are both there. Thank you!	5/15/2015 2:03 PM
242	I am opposed to deletion of route 25. I used this route for many years to travel to and from work. Even though service had been reduced to a low level it still was about 1/2 full every time I rode it before retiring a couple of years ago. I think a smaller (narrower) vehicle on this route would make sense since some of the roads along the route are narrow. It is hard to imagine that we voted to tax ourselves for improved transit service and it is actually getting worse in my neighborhood.	5/15/2015 12:46 PM
243	Absolutely love better service to Seattle Center/Queen Anne!!!	5/15/2015 12:01 PM
244	Can not accept deletion of Route 25. Will not be able to get to Link connections with bags or luggage from Portage Bay area of Montlake over such distances without existing Route 25. Why does survey for this section of proposal only list chgs as "improvements" without asking feedback on proposed route deletions which clearly are not improvements?	5/15/2015 11:53 AM
245	People who don't use Metro no, like myself, because it is impossible to turn in a 10 minute car drive into a 40 minute bus ride each way would do so. I desire faster, more reliable connections between Montlake and Seattle University running into the evening.	5/15/2015 11:32 AM
246	please don't delete the 43	5/15/2015 11:29 AM

247	<p>Eek Capitol Hill service is completely illegible. I like the idea of an all Madison 11 in advance of the SDOT BRT upgrades coming though, and from a network legibility standpoint. I'm kind of opposed to bringing back the 47, as a route that operates every 35 minutes and with no night service, :(It looks that is a Prop 1 addition, but this is a chance to reinvest the changes in a more comprehensible and efficient network. Add service to the other Pike/Pine routes if that's the main concern. I actually liked the Madison 49 from Alt 1, I'd bring that back, especially if the all Madison 11 is dropped. Overall it seems like we are not really using the new Capitol Hill Station well at all. The 8 connection is great since that route doesn't go downtown, but the only other routes stopping there are the 49 and the 12, both of which already go downtown. With the Madison routing from before the 49 at least hit more destinations on Cap Hill and provided a link to CHS for people further south on Broadway, but the 12 is especially egregious. I doubt many people headed downtown will transfer there, so there's duplicative slower service.</p>	5/15/2015 11:14 AM
248	<p>I am outraged that Metro is cutting both the 25 and the 43 - especially the 43! This is the route my kids, and others in Montlake, take to get to their school at Pike & Summit. I simply cannot believe that Ted Day of Metro is saying these proposed changes will mean improved service when Montlake is cut out of all direct routes to the Pike/Pine corridor and to downtown. There are plenty - PLENTY - of routes between Capitol Hill and these locations. Why is Montlake getting the short end of the stick? These changes will result in more cars on the road - I will have to drive my kids to school now instead of sending them on Metro. The 43 is a well-used route - there are always plenty of people on that bus. What are they supposed to do now? Take 2-3 different routes just to get downtown? That is not something my 11-year old should be expected to do - he already has to walk 5 blocks to get to the bus and 2 blocks at the other end. A transfer is a deal-breaker. And if I have errands to run downtown, I'll be driving rather than take the extra time it will take for me to transfer. I simply cannot express how upset I am over this. These proposed changes are extremely short-sighted, and awful for my neighborhood. Please, PLEASE rethink this and give Montlake our service back! Barbara Chin barbarachin@mac.com</p>	5/15/2015 10:53 AM
249	<p>Don't change the 11 bus route to go down Madison. I live on 23rd and work on Pine. I use the 11 to get to and from work every day, and under the new changes, it would be much less convenient for me to take the 12 instead. I have to go so far out of my way to get to and from each bus stop, I might as well just walk. The 11 bus is crowded with Madison Valley/CD/East Capitol Hill dwellers like me who are in the same situation, and I am sure none of them would be happy about this change either. We need a convenient way to get to Pine/Pike, both in Capitol Hill and downtown. If anything, you should make the 11 run more frequently on the same route.</p>	5/15/2015 10:50 AM
250	<p>No</p>	5/15/2015 10:40 AM
251	<p>I can't believe you are ignoring the deletion of the 25 in your survey! 110 people responded that it was a concern and it isn't even on the menu!? Also, the frequency along 24th Ave for Montlakers is GOING DOWN, not up! The 25 bus has been around since the 1930's, so why would we have less public transit options today?! Never mind the fact that the 25 used to also run on weekends about 15 years ago... Looks like we will also lose the battle along 24th Ave as we had 2 buses now only going to 1, so a roughly every 7 minute or less frequency to 10 or 12 depending on time of day.</p>	5/15/2015 10:16 AM
252	<p>Continuing the 8 to Mt. Baker makes much more sense, but it also needs more night and weekend service. It's only another mile so it won't slow it down heading back to Capitol Hill. Housing on Capitol Hill is getting so expensive-- many people who now choose CH because of convenient transit are getting priced out. Keeping the 8 service will enable them to consider the CD and still have access to all the reasons that draw them to Capitol Hill, including access to Seattle Center, SLU, etc. Don't cut the 8 off at the knees!!</p>	5/15/2015 10:14 AM
253	<p>My Issue is with Route 11!! I am elderly (87) and would now have to walk to QFC from Madison. I could not get to downtown shopping without a long walk or a bus change. This will seriously impact my access and mobility to the world. I will not be using the light rail because of the long elevator. Walking back to Broadway and Pine to catch a second bus is very difficult. Please keep the 11 as is. PLEASE!</p>	5/15/2015 10:03 AM
254	<p>There are several routes serving Capital Hill's Broadway area. There needs to be an express route from 4th and Pike to East Madison and 17th, this would move people more quickly to the Central Area and on to Madison Park which is not addressed in your proposal's.</p>	5/15/2015 9:57 AM
255	<p>Higher frequency, especially at night, is a must for the 8. I would rather see the 12's off-peak service go elsewhere to increase frequency on the crucial corridors. Maintain today's routing of the 11, as the all-Madison proposal doesn't really serve anybody well, transfers to Link from that route are important and the Pike/Pine routing maintains a better vector into Downtown. I fully support David Lawson's Capitol Hill restructure proposal (http://seattletransitblog.com/2015/05/14/how-metro-should-revise-alt-3/) and would love to see it implemented. Thanks so much for doing this! I look forward to better bus service in Seattle!</p>	5/15/2015 9:53 AM
256	<p>In general, greater frequency. ALSO: drivers should not leave a stop before the posted departure time. This sometimes happens, resulting in missing a bus (and other connections.) On the other hand, buses should not be late, ideally, but of course traffic affects bus efficiency.</p>	5/15/2015 9:42 AM

257	None. Thank you for the opportunity to participate in this survey.	5/15/2015 9:26 AM
258	By eliminating Route 43 you will make it almost impossible for me to get easily from Wedgwood to the main Group Health facility on 15th Ave E on Capitol Hill. With your new system a relatively stree-free trip with one transfer will take me at least two, if not more.	5/15/2015 9:15 AM
259	Cutting route 25 is problematic for anyone in the Roanoke Park area not able to walk up the hill to Harvard to catch a 49 downtown or down to Eastlake to catch one of the 70s. It also makes a commute to the UW more difficult as there would now be now direct route. One would have to go to the U district and transfer. The lowered level of service already on 25 makes the commute more difficult, but if one can schedule well, it's manageable. Having no 25 would be a real barrier.	5/15/2015 8:44 AM
260	Instead of using proposed Route 38 from Mt. Baker TC to the CD, I would prefer having the existing Route 4 modified to run like this: a) Mt. Baker TC to Jackson St. via MLK (drop the deviation thru Judkins Park) b) Jackson St. to 23rd Ave. c) 23rd/Jackson to Jefferson on 23rd and then continue to First Hill/Downtown via existing route. This routing would connect Rainier Valley to First Hill/Harborview without requiring a trip to downtown Seattle. I know that moving the trolley wiring is a big problem for Metro, but in the long run, the 4 would be very useful if it moved to the Mt. Baker TC.	5/15/2015 6:43 AM
261	I don't go to Capitol Hill and Central Area often. I live on the west side of Northgate Mall and would like the #16 or 316 to improve on frequency and decrease the time it takes to go to and from downtown. I spend 3 hrs a day commuting to and from work on #16, or #40. Both buses tak 1-1/2 hours or longer from downtown to 105th Meridian. Always running up to 20 minutes late afternoon. Only two buses directly to downtown without transferring. Please improve the bus service west side of Northgate to downtown.	5/14/2015 11:20 PM
262	An initial proposal had the 48 split and part through routed over the 520 bridge to the Eastside. Please consider this routing as it would provide a valuable connection from northern Seattle the eastside.	5/14/2015 10:17 PM
263	If you insist on getting rid of the 43, please consider extending the new route 45 further south. For instance, over the montlake bridge, south on 24th, west on aloha, south on 19th to at least thomas. I live around 17th and John - a very densely populated part of capitol hill with a lot of UW students and professors - the 43 is 90% of all my metro bus rides, and I'm a daily rider. Walking or busing to the capitol hill station adds much more time on my journey as the Husky stadium stop is nowhere near the law school building (43rd and 15th) that I need to get to everyday. Walking to the 48 is my next best option (and it's not a fun walk to hike back from), but the walk turns a 20 minute commute on the 43 into a 30 minute commute - potentially longer as timing my arrival is more difficult the longer the walk, and even with increased frequency on the 48, it can't match the frequency of having two bus options for going to UW from capitol hill (and vice-versa). As another option, consider an express bus along 23rd ave.	5/14/2015 5:55 PM
264	The community of Montlake seems to be getting worse service through all of this. Right now, I have the option of taking either the 25 or 43 downtown (and points in between). With the new proposal, I would have to take the 48 away from downtown to the light rail which would backtrack my route to go downtown. If I want to go somewhere on Capital Hill such as Group Health, I would have to take the 48 to the 8. The new routing of the 12 is not an option for me because there is a large hill I would have to climb to reach it. And if I want to get to Fairview Ave, I would have to take the 48 to UW to pick up the 70. It seems that for every place I want to go, where I can get to with a single bus today, I would need to take either 2 buses or a bus and train, often heading away from my destination. All in all, this will significantly lengthen my trips and I'm going to end up driving more than I do today. In fact, I think getting on a bus or train will become the exception for me instead of my first choice like it is today.	5/14/2015 5:55 PM
265	There is very poor connection to the Pike/Pine Corridor from Montlake Blvd. There are many shops and restaurants that we frequent and transferring from the 43 or 48 isn't convenient. It would be great if there was a bus from the Montlake Library area to Pike/Pine.	5/14/2015 5:21 PM
266	Take peak hour traffic patterns and street widths into account. Buses are often late or missing because they consistently get stuck on one street (i.e. Denny Way, route 8, going east between 5-8pm on weekdays; route 43, going east, slowed because John St is so narrow and other buses must pass by).	5/14/2015 4:49 PM
267	1) Just don't put in the Capitol Hill Streetcar. It is going to create huge messes. It's better to give up now even though there is an investment in the tracks. 2)Please keep route 25. We who live on north capitol hill will need it to get to a rail station, at UW. It is 1.5 miles uphill to the Capitol Hill station, and it is 1.5 mils uphill from the UW station back to Capitol Hill,. Really not feasable except with busses to the train station.	5/14/2015 4:25 PM
268	I think it sounds great. If you want some Capitol Hill feedback, how about this: Get rid of that #@***!! bike lane on Broadway that nobody uses, and bring back our BUS STOPS. I'm a bicycle rider and even I think those lanes were an unusually ill-thought-out use of public space. I see one bike per hour go by on a weekday. How can you not have a stop in front of Seattle Central?!	5/14/2015 3:09 PM

269	Sounds like service MIGHT be improved. The connections between Capital Hill, U OF W , downtown & SEA TAC sound impressive.	5/14/2015 2:57 PM
270	We rely on Route 25 which runs by our house on Boyer by Portage Bay, and takes us to downtown (appointments, shopping, entertainment), connects to SeaTac airport light rail, and gets us closer to the UW for senior citizen Access classes and University District banking. It is too steep a hill to walk over the top of Roanoke Park to Eastlake to catch buses there, and too long a walk to catch Montlake buses on 24th.	5/14/2015 2:08 PM
271	I am severely disappointed by Metro's unwillingness to stand by a proposal to improve frequency by reducing the number of buses that go downtown. The new 11 doesn't take advantage of any light rail connections whatsoever. It is hard for me to see how it is justified except to please Madison Park commuters. The new 12 doesn't connect with the improved 48. It is almost comic how close it comes to completing the grid there. My biggest problem with the proposal is nighttime headways, particularly on the 8. 30 minute headways at night are not acceptable. Not after the level of investment that Seattle residents have committed to preserving bus service. The 8 is, after Capitol Hill Station opens, probably the most important bus on Capitol Hill. You are proposing to cut off crosstown service at the knees, which will severely limit your ridership. What is the point of having sub-10 minute headways on a light rail line if there is no crosstown connector with similar headways? When the 8 is frequent, it is unreliable. When it is reliable, you severely raise headways. Yet still this route carries millions of people every year. The poison pill in this proposal is the new 11. Capitol Hill riders are being sacrificed in the name of Madison Park homeowners. Please consider rethinking this.	5/14/2015 1:22 PM
272	Elimination of Route 25 is terrible---how are aging citizens supposed to go east/west in the Montlake area? For those who can walk only a couple of blocks (of which there are many and the number is increasing) the change would effectively preclude their use of the bus or any transit option...reinstate that route, please....	5/14/2015 12:43 PM
273	Killing access to downtown via 43 (stops on 23rd) for changes to the 12 (stops on 19th) negatively impacts access to downtown. I will now have to walk 4+ blocks to take the 12 to transfer to a Link. I much prefer the closer access to the bus on 23rd Ave E and NO TRANSFER access to downtown. Adding transfers introduces additional time and stress to each bus trip.	5/14/2015 12:26 PM
274	I think it is a mistake to have only one line serving the Madison corridor; it sounds like this will create the need for many more transfer trips.	5/14/2015 11:45 AM
275	I can live with the reduced service between the top of Cap Hill and downtown thru the improvements to the 10 and 12 routes. But I still am opposed to the elimination of the direct 43 route between the University and the top of Capitol Hill. Having to transfer now to get from U District to top of Capitol Hill is insane. Do you not realize that many folks travelling to and from appointments at GHC, for example, are disabled, elderly, etc. and they will now be required to execute a transfer? Also, the 43 is always packed at peak hours (e.g. just this morning I got on at Aloha to go to UW at 9:00 and it was standing room only). I don't see how this demand is going to be accommodated. I can just imagine the hordes of people getting off the 8 at peak hour going north, or the 48 at peak hour going south, and standing along the sidewalks on 23rd waiting to transfer. Am sure the folks living in that area are going to love it. Are you going to expand the bus shelters there then? I just don't get your thinking here.	5/14/2015 11:13 AM
276	I am shocked that you would state you knowledge the need for better east/west connections and then you eliminate #25 - the only east/west connection that serves Montlake neighborhood. We need to connect to the East - to our Eastlake bus service - and West - to the University Link station and bus transit hub. Route 25 is one of the only route that serves the residences between the two north south corridors of Eastlake and 23rd/24th and the University. It also gets us to U Village and Children's Hospital. There are TONS of North South routes but very few that serve East/West - please reinstate #25	5/14/2015 11:10 AM
277	Coordinated schedules between Link & Streetcar & Metro at each stop would be great to minimize transfer waiting time.	5/14/2015 11:08 AM
278	Again, the planning has ignored the east -west connections in the Cap Hill, Portage Bay, Montlake neighborhoods. Please do not delete route 25. It gets us to U Village, and Children's Hospital - as well as to the link light rail station, and to eastlake connections. We have made the mistake of too few east west service FAR TOO OFTEN I think Ballard, think West Seattle. It is important to get citizens to the faster new service on the Eastlake Routes and the 23rd/U Station - BAD PLANNING!	5/14/2015 11:06 AM
279	I don't know why your'e asking my opinion about buses that I never take. I really don't know what the answers are for those.	5/14/2015 10:31 AM

280	I currently use route 43 and am disappointed it's slated for deletion. I live on 16th Ave E and Republican and work at the UW, as do many individuals in this part of Capitol Hill. Many of us get on route 43 on the Thomas/John area, and this convenience will be lost in the proposed model. Adjusting route 48 to access 19th Ave E or offering a different way to get closer to the 15th Ave area for people who are traveling toward the UW would be a good solution. As of now, it seems that this group (those who live in the 15th Ave E area) loses with the proposed changes.	5/14/2015 10:23 AM
281	I'm generally pleased with the latest proposal, but I agree with the Seattle Transit Blog analysis at http://seattletransitblog.com/2015/05/14/how-metro-should-revise-alt-3/ - in particular the recommendation to increase evening/Sunday frequency for the 8 and 11 from what is in the proposal.	5/14/2015 9:54 AM
282	thank you so much for keeping the 12 and providing connections to Group Health and Madison - this is better than what we had! There are more and more people in the Stevens neighborhood who are getting older and will not be able to drive. These changes will enable us to get to shopping and Group Health on 15th E, and downtown to SAM and the Symphony and other downtown attractions. I find it an excellent proposal and commend you for listening. Diann Shope	5/14/2015 7:06 AM
283	This is a better plan than the last proposal. Thanks for listening. I would love to see a light rail link between Broadway and Mt Baker stopping at 23rd and Jackson.	5/14/2015 12:35 AM
284	Please split the 8 at Mt Baker Station.	5/14/2015 12:08 AM
285	Glad to see the 47 back, but if you keep cutting its frequency that would not encourage people to use transit. While I agree to stop service earlier in the evening, during peak hours 20-35 minutes wait is too long. In the past one could walk in most cases to the 43, but taken that away the 47 will soon be doomed again.	5/13/2015 11:25 PM
286	It seems like the changes to 11 mean that the Madison Rapid Transit Option is pretty much gone. I think keeping the current 11 as is and adding a Madison Rapid Transit is a better option. I do like the changes to #8 as they will allow us to utilize the link rail.	5/13/2015 11:21 PM
287	Pike/pine does not end at Broadway, yet only one bus goes beyond that up the hill. If the fares are the same for link and the bus, that makes losing the 43 easier to swallow. Busses that go by the capitol hill station should go more different places.	5/13/2015 10:17 PM
288	Good service from the 3rd Ave. area (preferably Pine) up to Madison & Minor/Summit/Broadway Must be preserved/maintained with good frequency!	5/13/2015 9:53 PM
289	The effect of deleting route 43 means that residents in Montlake and along 23rd Ave. between Montlake and John now loose out on a direct bus connection between this area and downtown Seattle. This will have severe impact on these residents' commutes, forcing them to either accept extended commute times or take alternative transportation. The extended commute times will come from either having to transfer to the new Link rail, or to an alternate bus that crosses 23rd Ave. If they choose Link rail their commute to downtown will be in the tunnel prohibiting online access and forfeiting valuable work time during their commute. If they choose alternative transportation, their most likely form of transportation will be by car. This will increase congestion during peak hours that will impact all commuters within that area. Please rethink this decision and accommodate these residents and provide them with realistic public transport solutions!	5/13/2015 9:25 PM
290	I'm still concerned about getting to the streetcar early in the morning, as well as getting to 45th and Brooklyn from Husky Stadium. I guess I can walk to Thomas or John and if the bus ran often enough to the Capitol Hill station, which you claim it will, that *might* work. Maybe, if it runs every 10 minutes at 6 in the morning, which remains to be seen. But as far as I can tell, the train will dump me out at Husky Stadium in the dark, leaving me to navigate either the Burke-Gilman trail (uh, NO, not in the dark) or to walk across campus (I'm physically able, but campus isn't safe in the dark deserted hours--the raccoons alone make it hairy) or to navigate 15th with no lights or sidewalks. I don't see any increased service for buses heading from Husky Stadium to 45th and Brooklyn. I realize you're building another stop at 45th and Brooklyn (I would be really oblivious to miss the whole blocked-off street thing) but until that opens, I'm looking at two buses and a train to go from where I live (16th & Madison) to the light rail stop to where I actually work. That's going to tack on a good half hour, even in pre-traffic hours. I am not thrilled. I live only three miles from work and it looks like it's going to take at least 45 minutes to an hour to get there, even at zero-dark-thirty. How is this helping me again? Can you at least run a frequent shuttle to UW Tower until the stop is finished?	5/13/2015 9:18 PM
291	I do not support the proposal to cancel/delete the 43 route. It is the primary route I use to get downtown. I do not believe that the increased number of transfers I will have to make with these proposed route changes will be made easier by increased frequency of these proposed routes. It will take me as long, if not longer, to get to my destinations, especially since I would then have to walk further to those routes' bus stops. These changes will push me to ride my bike more and forgo using the bus.	5/13/2015 9:09 PM
292	NA	5/13/2015 7:47 PM

293	Mount Baker Transit Center has better infrastructure and accessibility for mobility impaired users as a transfer point than 23rd and Jackson.	5/13/2015 7:45 PM
294	I live in Madison Valley. I work at 5TH and Union until 11PM. Some nights I have to work right up to midnight. I see no way to get home on transit if the proposed changes go into effect. Route 11 MUST continue to run after midnight. Route 43 MUST continue in order to provide an OPTION. What will happen to those who want to get up to 23D AVE if the light rail breaks down? There I NO option. These are miserable proposals that ignore the need of the low-income uses of transit. Metro should focus on providing through routes, not chop up service so that riders all are forced onto one route and then have to transfer to another route in order to get home. Requiring transfers between routes absolutely does not improve reliability. It destroys reliability.	5/13/2015 7:17 PM
295	The changes eliminate the 12 route down Madison which I use frequently to get to Polyclinic & Virginia Mason. The new routes do not provide a direct route between central Capitol Hill and the medical offices on First Hill. The Link station with the connections give us much better service to downtown and access to the stadiums, sodo and the airport along with University so why do we need so many bus routes downtown? It would be much better to keep the existing 12 route for access to Madison as well as the southern parts of downtown.	5/13/2015 7:15 PM
296	The problem with reliability on the 8 is all eastbound between Westlake and Stewart. 4 times in the last week I have exits the bus somewhere in between there and walked the rest of the way. The bus is hampered by the stop at Fairview because the traffic backs up with cars getting on I-5 at Stewart. If the Fairview stop was eliminated, the bus cou,d go with the flowing traffic in the left lane and avoiding the delays on the 8.	5/13/2015 5:58 PM
297	Just to reiterate that transfer stops need to be safe for vulnerable people traveling at night, so any improved lighting and so forth would be helpful.	5/13/2015 5:50 PM
298	I like the new proposals to increase frequency and to add late night routes 8, 10, and 12 given the exponential growth of Capitol Hill and Central Area. That way, no will get stranded on cold, rainy nights during the week-ends and week days.	5/13/2015 5:35 PM
299	Please note that I elected to not give feedback on this section, but was forced by the survey to answer these questions.	5/13/2015 5:31 PM
300	I primarily use Route 10, which has excellent frequency during the weekdays and acceptable frequency on the weekends. I hope that no negative changes are made to this route.	5/13/2015 5:30 PM
301	Madison is an important street with a lot of health care facilities. It's also one of the few ways for me to get to south downtown. I am very concerned that you are moving the 12 from Madison to support the additional load of pike/pine late night revelers.	5/13/2015 5:26 PM
302	I don't understand why if you live South of John or east of 15th you are basically going to be left with no options. There will be one bus (route 10) that will be filled to overflowing all of the time and has no plans to increase frequency during the day in the present proposal and specifies that it runs around every 8 minutes now, which it absolutely does not. The proposed revision of the 11 takes away any possibility of connections North of Downtown (Queen Anne, Ballard) without walking 4/5 blocks. I would personally have to add 20-40 minutes into my currant commute times to factor in missed connections and be passed by because of full busses. These revisions will greatly push me in the direction of using a car or other personal transportation other than Metro.	5/13/2015 5:21 PM
303	Route 8 must operate to/from Mt Baker station in order to travel to/from Seatac. Especially after midnight, when transferring buses at 23rd & Jackson is not safe. Late night northbound trains go only as far north as Beacon Hill. It leaves me and others coming late from Seatac with no transit options to residential areas served by 8. Routes 8 and 48 should also operate at least until the last train northbound train arrives Mt Baker station. It doesn't have to be frequent, just make sure that at least the last train from Seatac has a connection to route 8 or 48 at Mt Baker or Beacon Hill stations.	5/13/2015 5:17 PM
304	THE CHANGES TO ROUTE 8 ARE NOT AN IMPROVEMENT. THOSE BUSES ARE CLOSE TO FULL BEFORE THEY GET TO 23RD. NO ONE IS RIDING UP THE HILL AND GETTING OFF AT 23RD. THIS IS A TERRIBLE TERRIBLE TERRIBLE IDEA. YOU WILL BE FORCING THIS REGULAR BUS RIDER INTO HER CAR. I AM NOT ALONE.	5/13/2015 5:17 PM
305	i am very sad that the 25 route is being deleted. This serves a part of the city where no buses run. Please reconsider this.	5/13/2015 5:01 PM
306	Nope.	5/13/2015 4:48 PM
307	Already stated my concerns in previous pages.	5/13/2015 4:41 PM

308	Not a comment on the proposed changes, but I have a comment on the survey itself. When the survey asked if I wanted to give feedback on the Capitol Hill and Central Area is said "no". And yet the survey still took me through each question. That is not very user friendly.	5/13/2015 4:38 PM
309	I have some concerns regarding the change in the 12's route. This bus is always packed with riders that get on the bus near the beginning of the route and continue most of the way downtown. If the 12's route was changed, many of these people would end up changing buses and taking the 11 down Madison.	5/13/2015 4:26 PM
310	I do not like the changes to the Route 11. It will definitely put me back in my car to commute to work	5/13/2015 4:18 PM
311	Very sad to see the 43 route disappear as it allowed me to go north/south and east/west without having to transfer. Happy that the 48 will come more frequently as getting to the UW becomes more problematic if you live on the south east side of the hill and not near the Broadway station. I can live with the proposed changes.	5/13/2015 4:03 PM
312	The elimination of Route 43 severely impacts the ability of Montlake residents in my neighborhood to use Metro. Currently, I can walk two blocks and catch a bus that will take me to Capitol Hill or downtown. The proposed deletion of the 43 and the reliance on the 48 or the 12 means that either I will need to transfer to the erratic 8 or walk up a very steep hill to catch the 12. These changes significantly degrade Metro's service to my neighborhood and will make it difficult for older residents to effectively use bus service as a primary mode of transportation in the city. As traffic congestion increases and parking rates go up, I've increased my reliance on Metro. The proposed plan will make using Metro much harder.	5/13/2015 3:44 PM
313	I and numerous others in Portage Bay and Montlake voted for the new tax hike to avoid deletion of routes like 25. Despite my raised taxes I will now be without a bus route.	5/13/2015 3:37 PM
314	The Capitol Hill Transit Station is not convenient for me to and from the U. of WA where I work on campus whatsoever. I much prefer Route 49 from Broadway to Campus Parkway, close to Meany Hall. The Univ. Transit Station is many block away from where I work on campus, adding much more time to trip, plus long walk to Meany Hall.	5/13/2015 2:52 PM
315	Route 12 is the only one that effectively connects Capitol Hill and First Hill with south downtown. There are two new 40 story office buildings being built near Madison and Marion and the buses will be very useful with all of the additional workers in the area. I ride the 12 every work day. It is efficient and full. Please do not change the route of the 12. Route 10 is very effective at bringing people along the Pike/Pine corridor to Seattle Central (very busy) and Capitol Hill. I certainly enjoy using it when I need to shop after work. If you mimic that route with the 12 it will lead (in my opinion) to the eventual elimination of a valuable service. Thank you.	5/13/2015 2:50 PM
316	There will be too many half-empty/poorly-headed buses on Pike/Pine. Fewer routes through that corridor is better, with the platform hours put to better use improving frequency on another route that could be timed better with Link.	5/13/2015 2:37 PM
317	My main problem is shifting route 12 off of Madison and on to John/Thomas Street. I live in North Capitol Hill, and this change would make it impossible to get to the south end of downtown (e.g., 5th and Madison) without changing buses or walking an additional six blocks or so. Route 12 would then become a duplicate of route 10. I realize that this change is proposed in order to have a stop at the new Capitol Hill transit station, but why not just leave route 43 in place? I use Route 12 a lot, but I would not use it if this change were made. I also object to the elimination of Route 43. I use this route to get from downtown to parts of Capitol Hill that are not serviced by Route 10. Route 43 also lends added frequency to the Capitol Hill service provided by Route 10. If I am traveling from North Capitol Hill to the SeaTac airport (particularly with luggage), I would not use the new Capitol Hill transit station. It would be much more convenient to take Route 10 down to the 5th & Pine station and pick up the light rail from there. Moreover, I travel to the airport infrequently -- no more than once per month -- whereas I take Route 12 down Madison several times a week. The proposed change in Route 12 would be a major inconvenience to me. PLEASE DO NOT MOVE ROUTE 12 AWAY FROM MADISON STREET!	5/13/2015 2:13 PM
318	I would prefer the route 12 to continue to serve Madison, including the library, the government buildings, etc	5/13/2015 2:09 PM
319	Deleting the Route 43 bus saddens me greatly. It suggests that no-one at Metro has looked at the topography of Seattle. Yes, the Route 12 is relatively close to the current route 43, but getting to the 12 (especially on the way to work), means a big up-hill slog that leaves one sweaty--not the way to start the work day. Please reconsider the #43 route.	5/13/2015 2:07 PM
320	I travel from 15th E to NE 50th every day on the 43. I can not walk hills so the proposed changes means that I would have to add a transfer to my bus route making my commute both longer and less predictable. The removal of the 43 route will most likely mean I'll need to move or drive to work every day.	5/13/2015 1:30 PM
321	Do not cut the #4 bus during construction on 23rd Avenue! Expecting the existing routes to serve all those extra people that no longer have the #4 available to ride is unreasonable. Please find an alternative that continues to provide regular service to downtown and Queen Anne from the South Central District.	5/13/2015 1:28 PM

322	Splitting the 8 is good but there should be something done about the stop at Stewart and Denney heading East when traffic backs up on Denny from I-5 south ramp the bus always gets delayed because it is hard for the driver to get in and out of the right lane with the traffic if that stop was eliminated much of the delay would vanish.	5/13/2015 1:16 PM
323	You are changing a commute from Madison Park to downtown from a single bus ride to a commute that requires 1 of more transfers. We chose to live here (at GREAT expense) to have a quick commute. We pay for this "luxury". You are doubling this very easy, very quick, low impact to traffic, commute.	5/13/2015 1:14 PM
324	We need to be sure that East-West commuting remains reliable and frequent for Central Area residents. Removing the 43 and altering the 8 leaves only the 11 and 12 as possible options (and longer walks to the relative bus stops). The proposed changes to the 11 and 12 help remedy the loss of the 43, but if those were later cut in the future, it would make it that much more difficult to get downtown from the Central Area not served by light rail.	5/13/2015 12:50 PM
325	These proposals look great - much better than the first round. Thank you for hearing us and for being creative! I'm so impressed.	5/13/2015 12:22 PM
326	Thank you for increasing frequency on the 8 and 48! I use these routes frequently and they are often crowded and the 8 is often delayed. I think the 8 could split at 23rd and Jackson or Mt. Baker Light Rail. As long as the 48 (or something) still runs from farther north down to the light rail then I don't know if we also need the 8 to go there. The 8 is late all the time, so it would be great to have them be more frequent or split it in a way that makes service more reliable. I'm really looking forward to these changes! In my opinion, people are very hesitant to transfer buses, but if they come every 10 minutes or less, then it is a lot easier to plan a transfer into your commute.	5/13/2015 12:21 PM
327	I would like a route that connects Capitol Hill with the Central Area, specifically The Bush School. As it is, students trying to get from points North to The Bush School have to change buses, which makes the bus transportation from Capitol Hill untenable. As it stands right now, almost no one from The Bush School uses the bus to get to school because there is no service near that location. This affects a lot of people. In general I would like more North/South connections when you get further East, so that we don't have to head toward downtown and then back out again to go travel along N/S corridors. I'm glad you are connecting the Rainier area with the Central Area, but why not extend it to Capitol Hill? We need a grid to be overlaid on top of the spoke system. Thanks.	5/13/2015 11:45 AM
328	What part of NO does this survey not understand -- I said I had No opinion yet I had to got through all of these questions. I would have abandoned it, but I was concerned that my previous answers to the earlier questions would not be recorded.	5/13/2015 11:26 AM
329	none	5/13/2015 10:58 AM
330	I didn't want to give feedback for this section of the survey, but it clicked through anyway. Please design survey better next time.	5/13/2015 10:22 AM
331	Please bring the route 47 back as soon as possible! It is difficult for people on north Bellevue Ave to reach the 49 or 43!	5/13/2015 9:58 AM
332	Bus #49 should run on time schedule after revision. I request #49 route will connect Eastlake area and Capitol Hill station, replacing #25.	5/13/2015 9:42 AM
333	I see there is no question on elimination of the Route 43 which goes by Group Health. I'm sorry to see that service eliminated. I use it periodically, and will not be using the Link service as I would rather ride the bus or if necessary drive. As long as the Route 49 runs from the U District I will use it, but elimination of the Route 43 means it is likely I will also drive more.	5/13/2015 9:30 AM
334	I really hate the idea of diesel buses huffing up Madison in downtown and on First Hill. Truthfully I live walking distance to Capitol Hill Station and will plan to do that! So, bus route changes don't affect me hugely.	5/13/2015 8:53 AM
335	Having more reliable transportation options are necessities for this make this proposal work. Based on a recent Seattle Times article, building a reliable grid offer more affordable transit options to the ever growing population in Seattle and surrounding areas. Make transit work is a integral element to an expanding populace The city is making the "right steps" in achieving this!	5/13/2015 8:42 AM
336	It would be great to have good connections between the hospitals and light rail. It seems as some of these changes would address those connections.	5/13/2015 8:34 AM
337	I work on the waterfront at pier 70, and there is a need for better connection to all of these services for those who are no physically able to do the hills involved to get to good transit.	5/13/2015 7:22 AM
338	Very poor service. Explain why all the buses going from downtown to Capital Hill leave at the same time? Poor planning 2, 3, 4, 10, 11, 12 and 49 all run at the same time. Who thought this up?	5/13/2015 7:19 AM

339	Hoping that these changes will mean reliable, on-time bus service to and from Capitol Hill and more frequent trips could mean people can count on the schedule to get them where they need to be on-time. Additionally, this continues regular service to the Group Health on Capitol Hill making it easier for patients and the infirm to get directly there via bus.	5/13/2015 7:15 AM
340	No	5/13/2015 12:18 AM
341	I like the late night service additions especially to take the bus back to downtown from Pike-Pine, to buses north to Fremont/Ballard	5/12/2015 11:01 PM
342	I only use the 48 and usually only north of the Ship Canal.	5/12/2015 10:41 PM
343	I live in Madison Park and am disappointed that the 11 has no good connection to light rail on Capitol Hill. I'm also disappointed that proposed 11 is Madison only -- not nearly as convenient as the present route 11 for downtown shopping. The current route 11 OR the old alternative 1 meet my needs better than this proposal. I definitely prefer including the Pike/Pine corridor to the all-Madison route.	5/12/2015 10:32 PM
344	I really like the alternative 3 proposal the best. In the previous proposals I was really sad to see route 43 eliminated. Once the new Link line opens that will be my primary route between my home and downtown. However, I also use the bus to get between destinations on Capitol Hill, so I appreciate how this proposal revises route 12 and continues route 49 service on Pike/Pine. I'm also looking forward to more frequent service on route 8. Thanks for taking the feedback and coming up with this thoughtful proposal.	5/12/2015 10:13 PM
345	I would like to see the Routes 43 and 49 combined, The only different s is that where it turns when after it leave Pike street, and when it get to Campus Way. at U W. 49 Turns on Campus Way and 43 Continues on 15th Ave NE.	5/12/2015 9:42 PM
346	You have gutted service in the recent past in the Central District (primarily), so to tout these recent changes as some kind of "improvement" is a mischaracterization. Have any of you ridden any buses in Capital Hill or the CD recently? They are packed and turn riders away. This is deplorable. The 27 used to be a service that was used on weekends by people in Leschi, and served several retail businesses in Leschi along the lake. Then it was gutted and turned into a 9-5, M-F commuter line (and is packed). This will change the character of the Leschi lakeside area permanently.	5/12/2015 9:38 PM
347	Since the 11 will replace the 12 on the Madison corridor, it will be important to have reliable connections between the 11 and the 10 at 15th Ave E, so that people accessing south downtown may still access Volunteer Park and Interlaken Park with reliability.	5/12/2015 9:38 PM
348	Suggestion for route 8: Splitting it at 23rd & Jackson feels like dropping of riders in the middle of nowhere. The point of serving the CD area is to bring riders OUT of that area TO places, not as a destination. This simply adds another bus transfer for CD riders. Suggestion for route 10: Increase service to 10 minutes and ditch the 49. Suggestion for route 11: Maintain 15 minute service to 23rd Ave & Jackson street, 30 minute service to Madison Valley and 10 minute service on the entire route during peak times. Suggestion for route 12: Keep the 12 during peak hours and ditch it during off-peak. Suggestion for route 49: This is redundant service with Link service. The point of these changes is to reduce redundancy. Pike/Pine riders can take route 10. Route 49 should terminate at CHS or through-route with current 43 by turning east on John St. Suggestion for route 43: Keep current route 43 between the U and Broadway, and then through-route it with route 49 between CHS and the U-District. This enables Montlake riders service to downtown and Capitol Hill and prevents the 49 from being a redundant route.	5/12/2015 9:30 PM
349	The elimination of the 43 will leave a big gap in service. For people on 23rd or 24th Ave E there will ha a loss of connections to Capitol Hill. The area at 23rd and E John is not well suited for transfers with a signifigant hill separating stops and the 8 is one of the least reliable busses in the area so it will not be a good situation for local residents. Also in inclement weather the 8 is usually one of the first busses cancelled making connections even worse. The updated 12 is too far and up a ateeep hill from 23rd ave E for anyone with reduced mobility. The 43 should be continued as at least a direct connection to serve the area between the Capitol Hill and the University stations. It is bad enough to be losing a direct trip to downtown but if you eliminate the 43 connection to Capitol Hill you are denying viable connections to a large area to get to the new light rail.	5/12/2015 9:27 PM
350	please - go back to the more radical changes to make service more frequent on fewer but well used routes!	5/12/2015 9:26 PM
351	Looks really good to me. I had concerns about loss of service on Pike/Pine (I live a block off it on Belmont) but this proposal looks great. I like that the 47 is back. I'm sold on the elimination of the 43, #12 route works for me too. Only real suggestion is that the #8 bus needs better than 30 minute service on weekday nights.	5/12/2015 9:17 PM
352	are you aware that there are 650 additional housing units being planned around the Issaquah Highlands? are you planning additional bus service for this area? Every day, I ride buses with 20 to 30 people standing from Seattle to Issaquah Highlands	5/12/2015 9:05 PM

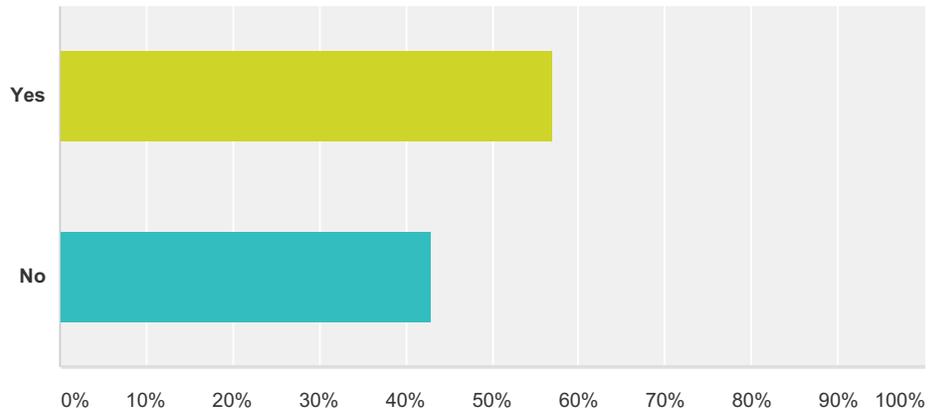

353	I do not see any improvement in getting from Sand Point to Capitol hill without a transfer. Current have to take bus to Campus Park Way and transfer -- it appears a transfer is still required and the trip may take longer.	5/12/2015 9:03 PM
354	I said I use route 545 and didn't want to say anything about the Capitol Hill and Central Area proposals, so why ask me about them?	5/12/2015 8:50 PM
355	It would make sense to ensure that the level of connectivity being provided to the cap hill station is also provided for stations south ESP columbia city station and	5/12/2015 8:43 PM
356	I'm sad to lose my single seat ride to work (north Capitol Hill to UW medical center, via the 43). It's not clear that the revised 8/12 + link will be faster for me than the 43, and even if it is, it will likely be less convenient. Also, Montlake seems to lose a lot of connectivity in this plan.	5/12/2015 8:35 PM
357	nope	5/12/2015 8:18 PM
358	It feels like you are making it harder to get from the southend to the U-district. Of course we have light rail - but it doesn't start early enough in the am.	5/12/2015 7:35 PM
359	I feel there are better ways metro and sound transit should use their money they add more link light rail I would never take it I always take the bus	5/12/2015 7:22 PM
360	No	5/12/2015 7:11 PM
361	The survey is skewed to show only the improvements in this proposal. It is a shame.	5/12/2015 6:42 PM
362	Getting rid of the 43 before Brooklyn Station opens is a mistake. The 8 will not be any more reliable since Denny will still be Denny so not only are you asking people to trade a one seat ride from eastern Capitol Hill to the University District for a connection, but one of those buses will be horribly unreliable. And the connection will be unpleasant since you have to cross two streets. This change makes me a car commuter.	5/12/2015 6:33 PM
363	I think your doing great! I'm still not proof positive how much I will use these varied buses. But I look forward to seeing! Thank You	5/12/2015 6:33 PM
364	I live on Madison St- your proposal would cut me out of bus service entirely. I live 1700 Madison and work at Madison and 2nd in the federal building- right now the bus goes right by both places- if you cut me out of bus service entirely, I will lose my job- I am 60 years old and cannot walk that route and there are no other bus routes that will take me where I need to go. You are cutting an entire section of the city off from the bus- what idiot did this?. I can live with the fact that most of the people who make these decisions don't ride the bus but this is even stupider than most. You just walked back a proposal that would end the #12 bus at 15th and Madison- this is even worse	5/12/2015 6:27 PM
365	more # 70 buses and move back the time the #70 stops running. it should run later with buses leaving downtown around 9 or 10 pm right now the 71 72 73 busses leaving downtown around 7 pm are overcrowded.	5/12/2015 6:21 PM
366	No.	5/12/2015 6:07 PM
367	The #27 is the only bus to where I work in leschi. It is absent from all these proposals!	5/12/2015 6:03 PM
368	Capitol Hill is a congestion mess of dirty crazy kinda scary area's. I think more buses with be helpful with getting things moving.	5/12/2015 6:02 PM
369	Most of these restructures are improvements for the areas of Capitol Hill north of Madison, and provide some modest improvements to Link, but the gravitational pull of having ONE link station for all the densest neighborhoods in the city, including the CD, seems to have brought with it an absence of a sensible gridded frequent network for the southern portion of this block of the city. Central Area riders are left with slim pickings with respect to access to frequent corridors and connections to link, barring slogs on congested streets, steep hills, or infrequent (and likely painfully slow) mixed-traffic street cars. This alternative, in many MANY ways, is fundamentally worse than both Alternative 1, and the current network. Yes, there are improvements, which the survey seems designed to point out, but there are sacrifices, which the limited response options are woefully inadequate in addressing.	5/12/2015 5:59 PM
370	Removing the #12 currently on Madison will affect many people. There are many people that use Madison for going to Swedish, Virginia Mason and going to class at Seattle University. How does Metro propose for disabled people that have appointments to the hospitals on First Hill ? These people cannot walk from Pine or Pike St. to them. Also, during the winter it will cause me to miss work when there is inclement weather. I find it hard to believe these issues have not been taken into consideration.	5/12/2015 5:57 PM
371	Given the frequency of the Route 8, perhaps swapping the frequencies of Route 12 and 47 should be considered to reduce duplication. Run the 47 every 15 minutes and the 12 every 20 to 35 minutes.	5/12/2015 5:57 PM

372	What is it with you people wanting to change the way the Route 12 is now? Do you not get that we the ridership like it that there are those of us who use it every day the way it is now to get to First Hill and the south end of downtown. I swear you don't actually get on the buses to see what the riders want you just set at a desk and theory think you are listening and what you are really doing is dictating what you think will work. Keep the 43 and keep the 12 running the route it is currently on. How hard is that! Oh right you need to make it difficult.	5/12/2015 5:56 PM
373	We lost our bus service on the north end of Bellevue/Summit -- first #14 was changed to #47, which was later discontinued. There are several new apartment buildings in our area, but no buses that serve it. We now have to walk up the hill to catch the #49 or all the way down to Pine, or use the very infrequent #25 to get downtown.	5/12/2015 5:55 PM
374	Um, I chose "no" that I didn't want to answer questions about this Capitol Hill/Central Area part, and was given the questions anyway.	5/12/2015 5:54 PM
375	I am glad to see the long-overdue increase in frequency for Route 11. Most of the proposed changes look like good ideas to me at this point.	5/12/2015 5:51 PM
376	Thank you! The Capitol Hill proposals are brilliant. We were in panic about losing the 12 down 19th and this not only keeps it, but restores the connection we used to have to Pine and Pike downtown. Going to Madison and then transfer to get to the 4th and Pike downtown area has been painful and the original proposal which removed the 12 was even worse. This one is lovely!!!!	5/12/2015 5:47 PM
377	WE NEED ROUTE 71!!!!!!!!!!!!!!!	5/12/2015 5:45 PM
378	I have been avoiding Broadway on Capitol Hill because the rail makes it a traffic mess -- I don't like walking along stagnant traffic or transferring to/from rail or transferring from a bus in bad traffic & pollution. I now prefer to travel on 12th, 15th, 19th -- if I go to Capitol Hill. My trips to Capitol Hill have decreased & I now drive there when I do go.	5/12/2015 5:44 PM
379	My response is in reference to the 12. In my opinion, the 12 offers a great service for people to First Hill. I catch the 12, heading downtown, at 19th and E. Mercer. By the time the bus gets to 19th and E Madison, it is standing room only. This occurs between 7-9am that I have personally witnessed. There are elderly and handicap riders that take that bus for easy access to the hospitals on First Hill. Having to walk up from downtown is not as user friendly for those riders. The 12 also services people going to Seattle University, O'Dea and hospital workers. I work near Virginia Mason and LOVE taking the bus to work as it is fast, and saves on gas and high parking prices. in my opinion, people traveling east to west are not likely to use the north to south new transit system. I have absolutely no use for it in my travel needs. Not having the 12 as my transportation to work will force me to drive to work in my car by myself and pay the high parking price.	5/12/2015 5:41 PM
380	I do not wish the #12 as it presently exists to disappear. I am disabled and this will mean a major change in my life. It is unclear whether the revised #11 will stop at 15th, 17th, or any of the present stops near Trader Joe and Temple De Hirsch.	5/12/2015 5:37 PM
381	The 11 needs access to Pike/Pine...	5/12/2015 5:27 PM
382	None!!	5/12/2015 5:25 PM
383	We need a stop (maybe the #8) closer to the light rail at 23rd near McClellan.	5/12/2015 5:25 PM
384	Don't cancel the 25 bus	5/12/2015 5:24 PM
385	Unless you fix the mess between Westlake and I-5 on Denny for the Rt 8, it's always going to be late during peak commute. Also, thank you for letting logic apply to not reroute the 255 away from downtown and forcing Kirkland riders to the UW Link station.	5/12/2015 5:22 PM
386	Route 43 provides direct service from Capitol Hill to UW that is not duplicated by any other routes for the area in Capitol Hill around 15th Ave. I would like for this route to be maintained.	5/12/2015 5:21 PM
387	The Eastside needs a better, more efficient and quicker way to get to downtown Seattle (pike's place) and a lot of times the park and rides are too full and transferring takes too long so more straight away buses from more neighborhoods on the Eastside.	5/12/2015 5:11 PM

388	<p>The new proposal really cuts off the area east of Capitol Hill proper (23rd Ave, Madison Valley) from the Broadway and Pike/Pine area on Sundays (and to a lesser extent weekday evenings and nights). Today the 43, 11, and 8 provide this connection with 8 buses an hour during the day on Sundays. Admittedly they're not scheduled for even headways. Under the new proposal there are only 2 trips an hour on the unreliable 8, 2 trips an hour on the unreliable 11 that no longer connects directly to Pike/Pine, or a ride on the somewhat frequent 48 well out of the way into Montlake (I hope the bridge isn't up) to transfer to Link to ride back to the Hill. Those who are able could walk up to 19th to get better odds with the new 12. Weekday evenings and nights are a similar story. Not only is this proposal a big step back in usefulness from Alternative 1, in my neighborhood it's a lot worse than our existing service. I'm very disappointed to see Metro sacrificing frequency and utility in high-ridership areas in order to satisfy people who refuse to make a transfer between frequent services. How does this better connect to Link when my transit options to get there are worse than they are today?</p>	5/12/2015 5:05 PM
389	<p>I would like to either keep the 11 as it is now, or have a route that connected the Capitol Hill Link station with Madison park as was proposed in one of the earlier proposals (I believe the proposed 8N). Especially in the summer, I feel like this is a popular route for people on Capitol Hill</p>	5/12/2015 4:52 PM
390	<p>Often there seems to be two #10's before a #49 arrives. Need to have more 49's as more convenient for N. Capitol Hill. Looks like this proposal does that so I am strongly in favor of the proposal.</p>	5/12/2015 4:26 PM
391	<p>Cutting the 242 is a disservice to the community. It's the only Shoreline bus that takes riders to the eastside, without any useable alternatives. Before cutting routes, decision makers should have to bus to work using 2-3 buses and see how they like the "alternative". Bus changes make for an unreliable commute due and adds typically 30 minutes to an hour.</p>	5/12/2015 4:03 PM
392	<p>While I like the idea of Lake to Bay service on Madison St. (revised rt. 11) my concern is that this means that all the buses will be Diesel and no longer Trolley Buses ... Madison/Marion from 1st to Boren are some of the steepest hills in Seattle and the Diesel buses on weekends are less than optimal at times. Another concern is that Pike/Pine will get sub-15 minute service with like 5 bus lines AND link ... would be nice to take some of that increased bus frequency and put it on the 11 ... the 11 will be a looooooong route ... that may easily fall behind schedule ... more frequent (10min) service during the day would help alleviate that. Regardless this will be a good exercise in behavior modification to prepare for eventual BRT service in the corridor. Lastly ... I really really hope this means that we'll see 60foot buses on Madison ... especially at Peak times. Thanx</p>	5/12/2015 2:38 PM
393	<p>The new proposal is disappointing. The changes to the 11, including running diesel buses on the steep hills of Madison downtown, are crazy. It would be better to just leave it alone if Madison Park wants that. I'm unhappy the 49 reroute to Madison was deleted in favor of retaining the current routing. The split of the 8 at 23rd/Jackson won't help reliability of the Madison Valley segment since that is still tied to the E-W segment on Denny, which is the problem.</p>	5/12/2015 2:36 PM

Q35 What would you like to tell us about this route or these routes?

Answered: 727 Skipped: 1,245

#	Responses	Date
1	16: Keep routed north to Northgate, keep on Aurora Ave N. 26: Keep on Dexter Ave N. and Wallingford Ave N. between 35th & 40th. Possibly use extended #26 through Roosevelt, Wedgwood, and Sand Point as east-west connection if #71 routing change (see below) not adopted. 31 & 32: Route along Stone Way N. between 35th & 40th 67: Keep on Roosevelt Way/ 11th Ave NE couplet into U-District. Use Campus Pkwy to reach UW campus, and route along Stevens Way through campus. 71: Keep route as a Sand Point - Green Lake - Fremont - Seattle Center connection. 73: Keep on 15th Ave/ University Way NE into U-District. Follow NE Pacific St., and turn back by looping around Montlake Triangle next to UW Med Center LRT station.	6/1/2015 1:19 AM
2	Route 72 is duplicated with other routes and is no longer needed. The buses are too big for parts of this route (i.e the NE 80th corridor), and are causing extreme damage to the streets. I strongly support the elimination of this route. .	6/1/2015 12:00 AM
3	I hope that route 26 continues to go down Wallingford Ave instead of the proposed changes. I take that bus into downtown four mornings a week and it is always very full. The proposed change would leave these commuters with the option of a route that doesn't go downtown, therefore giving the option of either transferring buses or walking a ways out of their way to catch a bus that goes directly downtown. I don't think this will be desirable to many and may discourage people from riding buses. So please consider keeping the 26 route as it is. Thank you.	5/31/2015 11:33 PM
4	I sometimes use the 8 as a backup plan if I miss a downtown connection at Queen Anne and Mercer. The 8 could become a reliable connection for me to LINK from work.	5/31/2015 11:20 PM
5	Ending the 12 will make it hard for commuters and students to get to work and school in the morning since it will now be ending at John and 19th. What about improved service to help all those people who have to get from North Capital Hill to Madison? Are they supposed to walk for blocks now to stand at a very crowded #8 bus stop on Madison and 19th? That stop is already jammed in the morning. Ending the #43 limits a lot of flexibility getting to the U district. Once again people will now have to get off the bus at 19th and walk to 23rd and get the 48. Once again not an "expansion of service". The 48 is going to get jammed up in the traffic going down 23rd after the lanes are reduced (another not convenient idea) - having the 43 come up from downtown gives people more options to get to the U District in a more timely way. I do not support either of these changes to service.	5/31/2015 10:18 PM
6	I liked the Alternative 1 routing of the 49 significantly more. The routing of the new '12' is remarkably silly and those bus hours would be better served increasing the frequency of busses that don't run 4 blocks parallel to two other frequent routes.	5/31/2015 9:56 PM
7	Why are the routes I use most not options for comments? #2,3,4,27?	5/31/2015 9:34 PM
8	Removing the Wallingford stops and replacing it with nothing - this will require longer walking commutes and more frequent transfers to access downtown. The 31 and 32 are much longer routes toggged to the same place and are not good substitutes. Please reconsider this change or provide a closer stop, possibly the 16 closer to Wallingford Ave.	5/31/2015 9:08 PM

9	<p>First like to say that the new route 16 is a home run! Quick service, 7 days a week, 5am to midnight from Sand point to Green Lake with easy transfers along NE 65th to points south and north is great! The cancellation of Route 71 is another matter. Route 71 has existed for over 50 year serving the View Ridge Community, roughly bordered by 40th AVE, NE on the west, NE 75th on the north, Sandpoint Way on the east and NE 65th on the south. We have 30 minute bus service, 7 days a week from about 5AM to 1AM the following morning. The bus route has many stops along NE 75th, 55 Ave, NE 65th and on the return NE 50th. We have ONE bus service to the University District, close service to the University and downtown. View Ridge has a large number of seniors and students who regularly ride the bus. The proposed changes will be very difficult also for all ages with walking problems, especially since equivalent service to the University, University link tunnel, and downtown will require a bus transfer. This ONE bus service every 30 minutes, 7 days a week from 5AM to 1AM the following morning is being replace by a new DART route 971 which travels south on 45th AVE, NE. This leaves most of the east part of View Ridge with no scheduled service unless the rider calls 2 hours in advance and limited off route service will be available. Alternate routes to the University and the new University link are available but this requires a transfer. The amount of walking for those living near NE 75th, 55 Ave, NE and NE 50th is increased tremendously. Also the DART is 1hr service and does not run on weekends and after 7pm, a severe limitation for those of us going to the University or downtown for evening activities on nights and weekends. Also there is no convenient access to the University as there was with bus service along University avenue. What is needed is regular 30 minute service to the View Ridge neighborhood along NE 50th, NE 75th, 50 Ave, NE and NE 65th, 7 days a week, 5 AM to midnight daily. Important in any use of the proposed route 16 or proposed route 65 is the use of these streets. If route 71 is eliminated, we will find it extremely difficult to get bus use on these streets once it has been largely eliminated. These streets have had bus service for 40 year and so people expect buses to be on those streets. If the service is eliminated, it would be almost impossible to get that service back and those no convenient service to View Ridge in the future will be possible. What View Ridge residents want is one bus service to University District and downtown, with a bus every 30 minutes, 5AM to midnight, 7 days a week using the already existing route along NE 50th St, NE 75th, 55 Ave, NE and NE 65th. That is the service we currently have and should expect with any change. Using routes 16 and 65 as currently proposed are not acceptable alternates due to impossible amounts of walking for people with walking issues and vastly increased walking for the rest of us living in View Ridge, north of NE 70th. Perhaps routes 16 could be modified to allow the required service by being routed through View Ridge either north on 55 Ave, NE and the east on NE 75th and finally south on NE 50th. Perhaps every other bus could service View Ridge so we would get 30 minute service. Alternately, perhaps route 65 could be modified to service View Ridge along the route currently taken by route 71. However, this still means a bus transfer in many cases. Perhaps a better solution would be change DART route 941 to a regularly scheduled 30 minute, 5 am to midnight, 7 day a week METRO bus servicing the View Ridge community along NE 75th, 55 Ave, NE and NE 65th and then proceed south to the University Link via 35th Ave, NE. This would allow equivalent route 71 service thru View Ridge and get us conveniently to the University and the University Link Tunnel. Access to the University District would not be as good but a one bus transfer along NE 65th or at 35th Ave, NE to route 65 or route 16 would make this doable. DART as it is currently proposed will probably lead to less ridership and more autos on the road due to its routing and lack of regular schedule thru the View Ridge community.</p>	5/31/2015 9:02 PM
10	<p>PLEASE DO NOT MOVE ROUTE 26 AWAY FROM SOUTH WALLINGFORD! Our neighborhood is not getting a light rail, but removing the 26 will force residents to walk over a mile to the nearest transit access. This is unacceptable, when all other neighborhoods are getting more options but we are being abandoned by the transit system.</p>	5/31/2015 9:00 PM
11	<p>Do not re-route this to John/Thomas, which duplicates part of route 10. Keep it on Madison for access to downtown, which is more important for this contingent of commuters than light rail access.</p>	5/31/2015 8:54 PM
12	<p>Please see earlier comments on 71 and View Ridge.</p>	5/31/2015 8:35 PM
13	<p>I am very happy about the proposed increase frequency in this route (16). I use it to get from downtown to Wallingford, so the exact footprint it takes to get there and where it goes afterwards do not personally affect me greatly.</p>	5/31/2015 8:35 PM
14	<p>Please split the route at Mt Baker transit center!</p>	5/31/2015 8:28 PM
15	<p>Please, please, through-route the 271 and 48 with some North Seattle routes. I regularly want to get from the SR 520 corridor to northern Seattle; without the 271, I would need to walk from Montlake to Pacific Street. The 271-45 through-route was one of my favorite parts of the original proposal. I've heard that people from the Central District and eastern Capitol Hill are feeling similarly about breaking the 48 through-route; I greatly appreciated the 67 through-route in the original proposal. Restoring this through-route would probably allow upgrading the 67 frequency to its originally-planned 12 minutes, which would be a great boon to northern Seattle residents.</p>	5/31/2015 8:24 PM
16	<p>Please revisit removing them from Stone Way- Look at increasing apartment density on that route</p>	5/31/2015 8:08 PM

17	<p>Rts 28/28X: I'm concerned about the Rt 28/28X change for several reasons: 1) Travel times - I have not seen travel times or stop spacing published with this proposal. Presumably 28X riders will have a slower trip due to extra stops, and 28 local riders MIGHT have a faster trip. The section of NW/N39th St between Leary Way and Fremont Av backs up from the EB stop light crossing Fremont Av. It also can backup WB in the afternoons getting off Aurora. Will any stops be removed from 8th or Leary? Will stops be added on 39th? Can you work with SDOT on the signal timing at Leary & 39th as well as 39th & Fremont? 2) Reliability - I've also not seen whether the new 28 will continue to be linked to the 132 (or something else). The NB 28 local is notoriously behind schedule, probably b/c of the long trip it's making to become the 28. It's very unreliable for Ballard High arrival times. Even the SB 28 is very unreliable on weekends - not sure what that's about. 3) Capacity - Apparently this proposal is supposed to retain the same total # of trips and seats that the 28 & 28X currently have together, but that seems neither likely (at 10 min headways) nor adequate. The 28X is jammed from Market St on in the morning - enough that the bus is delayed by people trying to get to the door to get off at Prospect St, Denny, Bell & Virginia. (Sometimes we have pass-ups at market st). I have a hard time imagining that trips every 10 minutes in the peak of the peak will accommodate both sets of riders even with standees. In addition, more people will need to get on south of Market St. 4) Destinations - The planning around Rt 28 seems to be associated mainly with Fremont services. While Fremont is an important destination, many riders of the 28/28X use more of the northern part of the route(s) - eg north of NW 85th St, so their needs are not addressed by the focus on Fremont. Other observations - * Please don't call this the 28X. It's a 28. Period. There won't be 2 versions to distinguish any more, it will make all the marked stops on its route, and it's not going to operate only in the peak (like the 15,17,18 - which, oddly, lost their X designations on the timetables but retain them on the coach destination signs..). And it's not going to be significantly faster than its local predecessor; calling it "express" is disingenuous to the riders of the local whose trip will be only minimally faster and rude to riders of the X who'll have a slower trip. * Whatever comments Metro gets on this route should be considered incomplete. Few 28/28X riders will give comments b/c all the public info through 3 recent stages of outreach has been labeled U-Link and Link Connections, with sub heads about Capitol Hill & NE Seattle. The text and email alerts all had the Link Connections reference. No one who rides the 28 thinks this affects them and likely didn't read further. They have not been paying attention to this potential change, and may think that the earlier proposal to make this change with service cuts became moot, since the Seattle service cuts aren't happening. A minimal number of Rider Alerts went up at selected stops very recently, including SB 8th Av NW south of Market St, where the 28 local stops. But there was no sign at the 28X stop ON Market St, east of 8th until about a week before these comments were due. This is the location most affected b/c these people will have to move to a different stop. Because of this lack of clear outreach, I would not make definitive statements about "what we heard" about the 28/28X during this Link Connections process.</p>	5/31/2015 5:41 PM
18	Do not delete Route 43. Route 48 will not be able to handle both volumes.	5/31/2015 4:55 PM
19	<p>I am a 13+year rider of Route 13; I catch it a quarter block from my house and take it to work downtown. Because it is such a long route from where it leaves Northgate along the winding streets, it is sometimes late by the time it gets to where I pick it up @ 54th Ave. N. and Meridian. I would very much like to see your proposed change of the #16 go over the Aurora Bridge and then turn onto Dexter instead of going through Fremont; there is too much congestion already with routes 26, 31, and 32. It would be foolish to add to that congestion. I have appreciated the fast route down Aurora on the #16 and would like to know if this change has to do with the tunnel construction next to Aurora; I would like an answer to that question, if possible. There is a history of the Route #16 being a no-show where I board at 3rd Ave. & Pine. I get off work around 10 or 11pm and oftentimes, the reader board will say Route 16 is 4, 5 or 6 minutes late and then it does not show up at all. This was happening frequently in late January and again in April. When this happens, I am forced to take the more reliable Route 26 and then walk 10 blocks home after working 12 & 13 hour days on the weekends. Reliability on the #16 is extremely important to me since it is my main route. Thanks for allowing me to share my ideas.</p>	5/31/2015 4:05 PM
20	My children currently take this bus from cap hill to Greenlake but if they always have to transfer in the u district to do so it won't make sense for us time-wise or be as safe as getting on at home and off at their destination. I won't leave my 12-yr-old alone at some transit station. So we will have to drive.	5/31/2015 3:40 PM
21	As I stated in a previous comment, I am strongly opposed to the proposed changes to the routing of route 16 to surface streets between Wallingford and downtown, away from Aurora Ave. These changes would greatly reduce the efficacy of the route as a commuting option for the growing population of the Fremont and Wallingford neighborhoods, by increasing the trip times between these neighborhoods and downtown.	5/31/2015 3:34 PM
22	Being able to catch either a 43 or 48 in the evenings after 9 p.m. makes a huge difference for me getting home from the U-District. The Light Rail station on Capitol Hill is nowhere near my home; it won't help me at all.	5/31/2015 3:18 PM
23	Please ensure that Madison Park has sufficient access to the Pike/Pine area. Moving the 11 to Madison from Pike/Pine is no longer a usable route. Please either leave the route alone, or provide another option. The 43 was also canceled leaving us no option to Pike/Pine.	5/31/2015 3:00 PM

24	<p>We (wife and husband) use bus #11 to get to/from downtown Seattle for shopping, eating and entertainment. Downtown Seattle has become progressively car UN-friendly in the last few years so we rarely go downtown by car. If bus #11's route changes from it's present route to the more southern route we last saw proposed, route 11 will require us to make at least one transfer to get to where we want to go in downtown Seattle and become essentially useless to us. We have supported Metro in the past, including voting for taxes to prevent the loss of services and to keep rates low, especially for lower income users. If route 11 is revised from it's present routing, we will not likely support Metro in the future. Please don't change the routing of bus #11.</p>	5/31/2015 1:47 PM
25	<p>Yes. For those in-close/not-suburban households within the area ROUGHLY between S99 & I-5 between about N/NE 65th & N 35th, these changes will have seen the spending of \$1.9 MMM and, all things taken into consider, zero net benefit/deficit. I live in Wallingford, so I'm looking at this from my on neighborhood's benefit/cost. But I'm not a nimby, and I have a BA in Planning (Transportation), so I am basing this on some technical background. For getting downtown for work or Seattle Center for fun, clear deficit. Longer trips with worse traffic, though more frequent departures. Robbing Wally to pay Fremont. Only way this might net out is if expected donnybrook on Aurora comes to fruition after after/if they bring down the Viaduct, although a lot of that traffic may try to use Dexter and QA Ave to dodge that blockage, which would neutralize that potential add. As far as the 16 (my most frequently-used) route is concerned, I strongly believe this is a significant net negative). For going to Northgate/NSCC area, maybe not a frequent trip for non-shoppers/non-students, a little roundabout. Not fatal, not positive though. For going to the airport, maybe neutral. If the inescapable N-S traffic clog comes about when they take the Viaduct out of action, then the my 35 minute walk with luggage or 30 minute walk to the 44, 44 to University Station might net out as a benefit. Right now, I 16 or 26 to Westlake, then Light Link (which is great) but would become a little tougher. With no traffic clog, people in my hood who take bus+Light Link or ride+Light Link to SEA is the same or maybe better than it will be once Metro reroutes/schedules on this current plan. So for this chunk of four (plus two half-) census tracts that represent mostly walkable, traffic-suppression behavior voters who probably overwhelmingly supported paying for Sound Transit's giant cost, we're not really netting positive benefits, just a mix that totals out to neutral. It's sad. The one thing that might make this net out is if you could get them to keep the Viaduct in place reinforced, which would rationalize a lot of N-S trips and actually make the Murray Memorial Tunnel additive, but that's outside your brief. And I guess my "objections" (survey didn't provide any choice between can't live with it and neutral, so I had to lie and say I can't live with it) are that, over a billion dollars later, this set of voters with good car/energy consumption habits will, GENERALLY, be no better off transit-wise than they were before the expense and effort. Not much worse, maybe not worse at all, but no better. POSSIBLE SOLUTION Maybe the solution is something like bringing back the 6 and routing that through Fremont while leaving the 16 roughly intact so there's some Green Lake -->Wallingford-->Downtown without the rococo of the Fremont/Fremont Bridge/Dexter detour. Best wishes in your complex tasks.</p>	5/31/2015 12:35 PM
26	<p>(Providing a copy of my previous response for specific route feedback tracking.) I live, work, and spend the majority of my leisure time and money in central Seattle, including CD, Capitol Hill, Downtown, and Belltown. My use of Lightrail is primary to Sea-Tac and the stadiums. My primary transits needs and survey responses speak to travel within core Seattle. Frequent service from the Pike/Pine Corridor, including late night, would be benefit work commutes, non-work shopping and entertainment, and tourist travel. Unfortunately the proposed rerouting of the 11 away from Pike/Pine means those of us east of E Madison & 23rd loss safe and convenient travel to Pike/Pine. The 12th on 19th and 10th on 15th would be furthest eastbound routes from Pike/Plan. While understanding the hospital and business transit needs on Madison Ave this route does not service the same variety of services and attractions as Pike/Pike. Primarily a business district, evening/night foot and police traffic is limited, which is a personal concern for travel outside of daylight.</p>	5/31/2015 11:41 AM
27	<p>With the proposed changes made to 11, there would no longer be a simple and easy means to travel from Madison Valley to downtown/Pike Place. Understandably, a direct route from Madison Valley to a number of businesses and medical centers on Madison is desirable, but the destinations and stops in between the proposed changes to the 11 are not interchangeable with the current access the 11 provides. Additionally, re-routing the 11 would cut off a direct line from Madison Valley and Central District to 3rd Ave downtown, which is a major connecting point for a number of other transit lines not served by Link rail.</p>	5/31/2015 11:21 AM
28	<p>Please see my previous comments re the elimination of route 71.</p>	5/31/2015 11:20 AM

29	<p>1. Increasing bus frequency on the 16 before the light rail on 65th opens is a waste of resources. More buses on a slower route will do nothing for increased efficiency. Less people will use the 16 because it is slower. During peak, the bus doesn't fill up until it reaches Aurora, and people along Aurora have a lot of options so increased frequency now wont help anything. 2. If the 16 does go to Dexter instead of Aurora, the 26x should go away and a 16x should be created which would bypasses Dexter and take Aurora with no stops on Aurora until Denny way. The only issue for me would be if the new 16x bypassed my stop on 59th and kirkwood pl N. 3. This change will probably make my commute to pioneer square faster once the light rail at 65th opens, even if the 16 stays on Aurora. Too bad 2019 is so far away. 4. I support things staying the same until the light rail opens The sand point connection doesn't affect me. In order to satisfy riders of the 26, have the 26x take Aurora. 5. People on my route have petitioned to move the 16 off its current route in Wallingford and Green Lake because of the narrow streets north of 55th. I don't necessarily support moving the route with its current frequency because it is convenient for me, but I do think increased frequency will cause problems and become a hazard in the neighborhood. Street parking could be removed but that would piss a lot of people off and it would be an inconvenience. You can't please everyone but I don't think increasing the frequency of the 16 is a good idea. 6. Please don't change the 16 downtown, I like that it goes all the way to Jackson st.</p>	5/31/2015 10:22 AM
30	<p># 10. Thanks for extending the hours and keeping the geography of the route as is. #12. The proposed change to Route 12 will impede access to health care providers along or near to Madison Street: Swedish, Virginia Mason, Minor & James, Polyclinic, Hearing Speech & Deafness Center, and others. If the proposed changes are made, those of us who use these providers will no longer be able to reach them without transferring buses and/or walking a substantial distance. That will be particularly difficult for senior citizens and those with mobility issues. Please keep route #12 serving Madison. Thanks.</p>	5/31/2015 9:45 AM
31	<p>Route 72 does not seem to be included in this proposal. However, during peak commute times, these buses are overcrowded.</p>	5/31/2015 9:39 AM
32	<p>What happened to the 72 bus which serves my neighborhood and is packed with commuters?</p>	5/31/2015 9:23 AM
33	<p>Please re-consider bus 16's route on Kirkwood Place N. by working with the neighbors on Kirkwood Pl. N to re-route the bus. Please contact doug@martinenv.com as he is coordinating the neighborhood response. Thank you Vivian Ma 5721 Kirkwood Place N</p>	5/31/2015 6:34 AM
34	<p>Please do not re-route 16. I live in the community and commute every day. The current route works the way it is. Please do not change its current path as an express bus. Thank you.</p>	5/31/2015 3:37 AM
35	<p>comments were made in the previous section. In order to earn a living, my wife needs the 12 to commute during bankers hours, and that route is already SRO during those times. The later-evening 12 always appears empty, and has been on the dozen or so occasions I've used it in the last year. I need the 43 for what's already a time & walking intensive commute for my off-hours job at a music venue. It (the 43) only works one-way and involves more than a mile of walking. At 2am when my work day is finished, my public transit options range from walking that same mile+ uphill and waiting 3 hours for a 43, and walking as long to catch a bus to Columbia City or Rainier Beach, then waiting for a transfer, and ultimately getting home in 2 hours. I understand and appreciate the light rail. I've voted for it at every turn. It's good for the city and the neighborhood. I understand and accept that you must curb bus service to account for it. Please don't curb that bus service which allows the existing residents to commute and earn a living.</p>	5/31/2015 3:32 AM
36	<p>I am concerned about the proposal to discontinue direct service between northeast Seattle and downtown outside of peak weekday hours. A direct downtown route is more predictable, faster and more convenient for me. My current direct downtown connection is Route 71. My closest bus stop is at NE 85th St and 35th Ave NE. There are frequent traffic delays and congestion on NE 45th St and on Montlake Blvd. The proposed southbound Route 65 appears to go through UW campus and to Campus Parkway NE prior to reaching the UW Link Light Rail Station. The extended route plus the additional waiting time to transfer seems likely to extend the time it would take me to get to and from downtown. The current downtown route 71 is (already) a 45 minute bus ride for me. The proposed new route 941 wouldn't offer me good bus service. It is scheduled to run (only) every 60 minutes. It is not a direct downtown route.</p>	5/31/2015 1:33 AM
37	<p>Please arrange to have these routes run daily and more frequently and thus get people to the new Light Rail station quickly</p>	5/31/2015 12:05 AM
38	<p>I gave extensive feedback on the 8, 11, and 12 in the Capitol Hill section.</p>	5/30/2015 10:18 PM
39	<p>Please do not take away our weekend service on 85th, 40th and 75th literature 71 provides. We need that connection to link</p>	5/30/2015 9:38 PM
40	<p>just make 71 a every 30 minute service that STOPS AT SLU during peak times! or find another way to make this basic regional connection (NE seattle, east of 35th and near Sand Point-- SLU)</p>	5/30/2015 9:32 PM

41	I use route 71 primarily in the late afternoon or evening. Sometimes I return as late as 11 pm and am comfortable walking the 2 blocks to my home. Is this route going away? If you want riders to funnel toward the light rail station at Husky Stadium, are there places in the outlying neighborhoods that one can park a car to access a transit line with more frequent pickups? Sometimes if I miss the bus I will drive over to the Roosevelt neighborhood and park near the high school and catch the 71 at NE 65 St and Roosevelt Way NE.	5/30/2015 8:57 PM
42	The proposed changes for route 16 do not meet your stated goals- in fact they do the opposite. The new Green Lake to Sand Point connection does not make it any more efficient for me to use the light rail. We currently have options for taking the bus to Fremont and do not need to divert the bus to this area. The existing bus lanes and infrastructure on Aurora are the fastest and most efficient connection to downtown. I do not see a reason to change the route to a less efficient street system in Fremont, a bridge without a dedicated bus lane and a bridge that opens for marine traffic. This proposal increases the time it would take to reach downtown- exactly the opposite of your stated goal. The current time is about 25 minutes with no traffic. If the time increases much more, it will be impractical for people to live in Wallingford and work downtown. Please leave the current routing from Wallingford to downtown.	5/30/2015 8:33 PM
43	I would like to see the #12 stay on Madison instead of heading over to John, seems redundant with many other routes.	5/30/2015 8:28 PM
44	I'd like to know what changes are proposed.	5/30/2015 8:17 PM
45	My suggestion would be to start running the 373X, 67, 347, and 348 earlier in the day—as early as the current 73 —because Olympic Hills, Jackson Park, Pinehurst, and eastern Victory Heights communities will lose early morning bus service. The other suggestion is to have the 73 transfer to the UW station at the Montlake Triangle—not Stevens Way—because it would be faster. If you want people to ride transit, then service has to be fast, convenient and comfortable. Olympic Hills, Jackson Park, Pinehurst and the eastern part of Victory Heights will be receiving the opposite when the 73 is reduced.	5/30/2015 7:49 PM
46	I live in Maple Leaf, west of 5th Ave NE on NE 90th Street. I'll summarize my comments into a succinct plea, and that is to PLEASE KEEP THE CURRENT BUS ROUTE 66 ON 5TH AVE NE FROM NORTHGATE!!!!!! If you continue to read my comments I'll explain why I say this... I have mobility issues and cannot walk very far. Right now I'm using crutches to get around, and on a good day I use a cane. I often use the 66/67 to get to both the U-District and to the Northgate Transit Center. I work in the U-district and when I want to get downtown I take the 41. I am very upset that you are taking the current 66/67 bus service off of 5th Ave NE. Walking over to Roosevelt to catch the proposed new route 67 doesn't work for me. I will have to drive over there to use the proposed southbound 67. You are also making it impossible to get to the Northgate Transit Center. I'll have to drive up to that Park 'n Ride in order to use the 41 in the future. These proposed changed to the 66 and 67 bus routes do not serve people on the west side of Maple Leaf well at all, especially those of us who live west of 5th Ave NE. Another problem with removing the current 66 bus is that there is no way to get to Roosevelt in the U-District, and to Eastlake. I have also looked at the proposed new route 67, and it's going to be a slow ride down to the Stadium light rail station. Roosevelt in Maple Leaf is really backed up already since there's a dedicated bike lane, only one lane of traffic each way with no place for buses to pull over, and a new, popular Maple Leaf Reservoir park that draws a lot of people who are crossing Roosevelt to get there. Then when you get to University Ave NE that is going to be slow going as well. This is a milk run bus route, and it is going to take forever. Looking at the travel times you have published, you are saying it's going to take 30-40 minutes to get from Northgate to the Stadium station on the new route 67. Add on the time it's going to take to get to the light rail platform, wait for a light rail train to show up and then get downtown and you are talking over an hour of travel time. This is not efficient! In contrast the 41 will get to downtown still much faster from Northgate, and in six years the light rail will be running from the Northgate station. I really, truly hope you'll be restoring bus service up to the Northgate transit center by then!!! I get that you are trying to funnel people to the Stadium light rail station, and that makes sense from maybe NE 80th Street and southward. However if you live north of 80th, and certainly on NE 90th Street like I do it makes much more sense to go to the Northgate Transit Center and take the 41 from there, especially when the current 66/67 bus route is an efficient and quick way to get to the transit center. Just as the airlines say the closest exit may be behind you, in Maple Leaf the fastest way downtown is to go north to the Northgate Transit center and then take the 41 express bus from there. SDOT recently started to do a study called "Roosevelt to Downtown HCT Project Definition" and if you look at the map that shows their route you will see that it is the current Metro bus route #66 from Northgate down to Westlake!!!! I don't understand this duplication of effort between Metro and SDOT, especially when the current bus route #66 is already serving the exact corridor that SDOT is proposing. You could just leave the current bus route #66 in place and save everyone a lot of time and money. Here's the link to the SDOT project: http://www.seattle.gov/transportation/roosevelthct.htm In summary: Please keep the current bus route #66 intact!!!! Thank you, Ann Testroet ann.testroet@gmail.com	5/30/2015 7:20 PM
47	thanks for an option that restores the #47 and does not remove the #12 along 19th!	5/30/2015 6:55 PM
48	See my previous comments	5/30/2015 6:05 PM

49	Do not increase the frequency of these buses. Kirkwood Pl. N. cannot handle more traffic. The street is too narrow. To increase the frequency, move the route to a safe and wider street, such a Latona or Greenlake Way. It is not safe for our community. A bus and another vehicle can't pass at the same time which creates congestion and more noise pollution. Please.	5/30/2015 5:17 PM
50	Losing route 71 will be a great inconvenience. Having to transfer and pay two fares to get downtown is just no improvement in the service I voted (and pay) for.	5/30/2015 3:17 PM
51	Olympic Hills, Jackson Park, Pinehurst and the eastern part of Victory Heights will be the losers when the 73 is reduced. We will have diminished early morning service. Here's what you need to do to fix this: My suggestion would be to either start running the 73 at its current time or else start running the 67, 347, and 348 earlier in the mornings.	5/30/2015 3:10 PM
52	Both 71 and 76 are more filled that most buses. Many are standing room only leaving downtown in the evening and in the morning going to town. About half of those using 71 mid-day go to the 'Ave Transferring to a Route 73 would be a major inconvenience.	5/30/2015 2:12 PM
53	Please do not eliminate these routes.	5/30/2015 12:53 PM
54	Very bad idea to drop 43. Serious impact on north capitol hill, group health, and U district	5/30/2015 10:39 AM
55	I live in North Capitol Hill/North Madison Valley and use this bus every day. For myself and others living in this area and working at our hospitals on First Hill - and there are quite a few of us - this is our reliable, direct commute to work at Swedish, Virginia Mason, Minor and James, Polyclinic, and Harborview. Having Route 12 go down Pike/Pine instead of Madison doubles the distance I will need to walk in order to get to work: I now walk half a mile, the proposed change will make it a mile (uphill). If I choose to transfer to the 11, I will still need to walk additional distance to Madison and wait for the 11. The proposed change will mean that four routes serve the Pike/Pine corridor - and reduces the number of routes along the E Madison corridor from two to one. We do not need four routes along Pike/Pine: three is sufficient. We need better linkages between North Capitol Hill and First Hill.	5/30/2015 10:02 AM
56	if metro bus service in tunnel to UW is to be eliminated do to link service how is this a good thing link will have station at Husky Stadium requiring one to cross montlake blvd and than catching metro bus to the AVE most likely extending the time sounds like LINK BUS combo take twice as long from downtown to Univ Ave than before	5/30/2015 9:37 AM
57	To meet my needs the 11 needs to take me to Pike/Pine downtown, not Madison. I use it for access to Capitol Hill restaurants, downtown shopping, Pike Place Market and the Paramount Theater. For me, service along Madison would be MUCH LESS CONVENIENT.	5/30/2015 8:31 AM
58	While I appreciate the idea of trying to emulate Madison BRT with the 11... it's really a shame that this line will no longer use trolleybuses. I'd love to see a way to preserve the trollies in the next proposal. I support the split of 48, but Metro really needs to stop dragging their heels on electrifying this route. That should be done BEFORE Link opens.	5/30/2015 12:34 AM
59	If this is taken away I will never vote for another metro levy	5/29/2015 11:11 PM
60	Per the earlier comment, please do not move the 16 from Aurora to Dexter. Also, please do not remove NorthGate from the 16. Thank you	5/29/2015 9:37 PM
61	I own a business and I work in my business from 11-8 or 10-7 on Tuesdays, Wednesdays, Fridays, and Saturdays. I work on my feet in my business as well, and I'm in my late 40's. The last thing I want to do after a long day at work is wait for the bus but all of these routes run so infrequently after 6:30 p.m. it seems, and they are also very late most of the time. What I end up doing is walking, which I can do in 19 minutes. I really would rather not walk home after working all day on my feet, but this is often preferable to getting to the #2 or the #12 bus stops, waiting 20 minutes, then walking or getting on the #11 (which runs direct from my business to my home.) All of these bus options take 30 minutes- there is NO staggering of buses at the bus stops, leaving me with little choice when it seems like I have several choices, if I close up shop 1 or 2 minutes later than usual (then have to either wait 30 minutes or walk for 19).	5/29/2015 9:26 PM
62	65 - Higher frequency needs to be maintained on the route 65 during nights and weekends. A 30-minute headway is way too long. 71 - With the elimination of the route 71, NE Seattle is losing a (relatively) fast direct route between Downtown Seattle and NE Seattle. Even with Link Light Rail, NE Seattle needs frequent direct reliable bus service to and from Downtown Seattle.	5/29/2015 8:59 PM

63	I would like to plead for Route 26 to stay put in the Wallingford neighborhood. Specifically, the stops at 35th & Wallingford are a lifeline for me. I live in the neighborhood and work at KING 5 in South Lake Union. I commute via bus 10 times a week. Because the News keeps odd hours, I often commute late at night and am grateful for a bus stop only two blocks from my apartment. If the stops are eliminated, I would be forced to walk 10+ blocks late at night. Toss in our unpredictable weather and it's no longer an inconvenience, it's also a major safety concern. My only alternative would be to purchase a vehicle and add to car congestion, which I've been able to avoid thanks to Metro. I moved to that neighborhood in large part due to public transit options. When KING 5 is torn down in the near future, my work place is moving to Pioneer Square. As uncertain as that commute stands, it's been some comfort knowing I could still get downtown on the 26. If this route is taken away, my neighborhood will be totally isolated from public transit. Please consider keeping Route 26 at 35th & Wallingford. Thanks for taking the time to consider our concerns. Jennifer King 206-818-3962 jmking14@hotmail.com	5/29/2015 8:38 PM
64	These are routes that can tend to get horribly backed up because of traffic. I am uncertain how a 10-15 minute arrival time can be maintained during high traffic times. But they are important people mover routes	5/29/2015 7:41 PM
65	We very much need later night service and some weekend service on this route. Thank you for the proposal. If you implement nothing else, please implement this. Currently night students and staff are stranded at times when classes regularly break for the night. a huge problem.	5/29/2015 5:07 PM
66	Keep 16 on Aurora! This proposal makes it harder for Green Lake and Wallingford residents to get Downtown.	5/29/2015 4:46 PM
67	Please retain current routes and schedules on routes 71, 72, and 73. These are heavily used (and not just by me!) as all-day service in northeast Seattle, connecting downtown, the University District, Ravenna, and the neighborhoods north between/to Lake City and Maple Leaf. The proposed changes represent a substantial degradation of service for the current users of these routes.	5/29/2015 3:59 PM
68	By taking away two stops on Linen going South, you essentially made it impossible for those who don't or can't walk five blocks in winter weather to use the bus easily during bad weather. Just puts us back in our cars. Nice work guys...not!	5/29/2015 3:59 PM
69	Please do not remove this route. It is the only connection to and from Laurelhurst. The only reason why it has a low ridership is that it is very infrequent and it does not connect well to other places (for going to downtown it is very slow and it does not touch conveniently Campus Parkway for faster buses). By removing 25, the accessibility of public transport in Laurelhurst becomes even worse than it is now. If you're increasing the level of service everywhere, please do not decrease it in Laurelhurst. If the 25 would connect to the Light Rail and go more often, the ridership will increase.	5/29/2015 3:35 PM
70	It is a critical route for Whittier Heights, Crown Hill, and north Ballard. W/o it, patrons will have to walk 6 - 8 blocks to either a 5 or D to head south to Fremont or Ballard and from there to downtown. Light rail station from downtown to U District does not help Fremont nor Ballard. Thanks for allowing us to comment. I found it disconcerting that Ballard was not even listed as an area for a bus patron to check. Yet several routes going through it - 28, 28x, and 40 were routes to be affected.	5/29/2015 3:17 PM
71	The proposed changes for the 70 route are great. I think adding more frequent trips and adding trips on the weekends would be best. It doesn't matter what time of day it is or what day of the week it is, trying to get on a 71, 72 or 73 at Eastlake/Garfield is impossible sometimes. But having the 70 as an option helps speed up the time and eliminates the need for the other 71, 72 and 73 buses to stop there - they rarely have room anyways. Route 66X should run more frequently all the time. This is our bus of choice, but having to wait upwards of 20-30 minutes sometimes is frustrating. For people that rely on transit to get from point a to point b, waiting for a bus to show up is the worst part. And taking the 66 beats taking the 70 almost any day of the week, but we end up taking the 70 all the time and transferring once in the U district because we couldn't wait for the 66. The 66 is a vital lifeline between downtown, eastlake and northgate. It only makes sense to increase frequently!	5/29/2015 3:12 PM
72	8: There needs to be some kind of fix to Denny Way downtown so that the 8 becomes reliable. How about a transit-only lane? For example, every afternoon, a line of cars needlessly blocks multiple eastbound 8 stops while those cars wait forever to get onto southbound I-5. 11: You must make sure there is a quick transfer between route 11 and the First Hill Streetcar at Madison and Broadway. Also between 11 and 2 along Madison in the vicinity of 12th Avenue. 12: I'm not sure why route 12 needs to stick around, especially if it no longer serves to connect north Pioneer Square and First Hill with Capitol Hill. I live 15 blocks southwest of Aloha & 19th (the business area toward the end of the 12) and never take the 12 to get there. The 8 (and for now, 43) and the 10 seem sufficient for accessing that area. I get that the new 12 helps replace the 43, but won't it be faster to use the light rail anyway? As long as it's fast to get in and out of Capitol Hill and Westlake stations--Westlake could use some more exits.	5/29/2015 3:05 PM
73	(Mentioned previously but probably in the wrong place). I understand 71 would turn into an east-west shuttle. I hope it will continue running up 40th to its current terminal location at 35th & 85th. Having it terminate at Husky Station would be excellent.	5/29/2015 2:20 PM

74	Please see my notes in the previous section regarding Route 25.	5/29/2015 2:14 PM
75	25) I live in Eastlake, my best friends live in Montlake. I can either walk for 40 minutes, or MAYBE the 25 will come, or I could bus to UD and then to Montlake. It'd be cool if the 25 was more frequent but I realize that not a lot of people need to go east/west on that latitude. 44) Most unreliable bus in the world. I've been late to so many classes when I had to rely on this bus to get me to UW. The worst part is how onebusaway says one bus is really late and one is really early, so that one just doesn't come at all?? Where does it go??? The 44 definitely needs to come more frequently. 66) HOW can it take 45 minutes to get from Eastlake to Downtown? 71-73) Have you ever tried to go downtown from the ave during rush hour? It's impossible unless you walk all the way up to 50th where there are less people. Hey Metro thanks for doing this you guys rock :)))) also I know you probably don't have any control over this, but the drawbridges really mess up transit. Why can't boats be limited to passing during not rush hour? That'd be great.	5/29/2015 2:13 PM
76	Tech workers at Amazon do not need to be at work by 9am. Many go in a bit later than your commuter routes run. These workers have cars and money and rely heavily on driving and Car2Go due to the lack of fast commuter options that go directly to SLU. Please extend the hours of these routes (and the 309) to 10am and 7pm for morning and evening commutes. My neighborhood (Olympic Hills/Pinehurst) is full of these workers and it shouldn't take them so long to commute by bus. Also, I'm a bit disappointed that the 73 will no longer be running on weekends. I think this will make sense once the Northgate LINK is operational, but this will be an inconvenience to us. We live around 130th St. and use this bus to go to visit friends, cafes and playgrounds in Maple Leaf on the weekends. I also use it to get to evening and weekend events at UW. Many students live near Northgate Way & 15th or further north and they may use this bus to go to campus on weekends to study. I guess, given the choice, it is better to have frequent service on weekdays than infrequent service on weekends, but if more funding becomes available, I hope you will restore weekend service, too.	5/29/2015 2:01 PM
77	By the proposed elimination of Route #71 through the View Ridge neighborhood, this will cause myself and several of my neighbors NOT to use public transportation because of inconvenience of the new proposed Route 941. PLEASE RECONSIDER REINSTATING Route #71. Thank you.	5/29/2015 1:40 PM
78	I use this route frequently, and don't see a replacement or improvement. Don't understand why it's being eliminated.	5/29/2015 12:30 PM
79	I already said my piece at the end of the Northeast Seattle change section. Please refer to those comments. Any changes to Route 16 are unwelcome, except getting the actual arrival times to be more reliable in your app.	5/29/2015 12:24 PM
80	The #75 buses almost always run late. It this is to continue, please change the schedules so that riders do not waste so much time arriving at stops and having to wait 10 or 15 minutes longer than should be necessary. Most of the drivers now are friendly and helpful as opposed to those in the past on this route. I can almost always depend on the #73 buses being on schedule and the drivers being friendly and helpful.	5/29/2015 11:56 AM
81	I use Route 8 between Capitol Hill and MLK/E Union. The proposal to split the route at 23rd/E Jackson would help me a lot, but may complicate the commute for those coming from south of E Jackson. I don't use the route for work, but am concerned about potential hardship on those who do.	5/29/2015 11:40 AM
82	For the past several years, both these routes have been routed through the bus tunnel, with my using the Pioneer Square exit/entrance. Now that Metro Transit has some \$, there needs to be an action developed to address the infrastructure needs at this exit. It has leaked for years without any attention being paid to this except for cones and caution signs out up around the leaks. The water damage is all over , the walls are continuing to be damaged as are the pavement tiles. Without this being addresses, the deferred maintenance on this exit will continue to increase, costing us more tax dollars in the long-run. Plus the dirt and garbage in the 2 exits needs to be addressed and cleaned up - I'm willing to meet with Metro staff to walk them through this and discuss the issue.The panhandling on the steps down to the boarding area as well as on the boarding platform itself needs to be addressed as well. Please feel free to contact me at my email address: TEDunne@aol.com.	5/29/2015 11:38 AM
83	Please read comments already noted on other text boxes. To summarize: is there going to be service along the 75th St corridor between Roosevelt and 25th? Currently, route 68 (which changes from 67 at some times in the U district) serves this corridor, the only bus service on a very hilly area.	5/29/2015 11:13 AM
84	Excellent change to make a better conenction from light rail station. Thanks.	5/29/2015 10:53 AM

85	<p>Because auto traffic is heavy, 23rd Ave is steep, sidewalks are not maintained and street signs along the route are old, dirty, missing or in some areas not visible in the central Montlake area, it is treacherous for pedestrians trying to access bus stops as well as library, school and 23rd Ave businesses. Bicyclists on this route ignore stop signs, speed, ride on sidewalks and put pedestrians at risk. Another point along this route, which I walk, drive or take the bus on daily, is at the south end of the Montlake bridge. As a pedestrian I have been knocked down and injured by a bicyclist speeding on the sidewalk in the rain, presumably following bicycle route signs to Seward Park. I have been hit by a car turning south onto Montlake when in the crosswalk with a green light. I have had multiple near misses from buses at the same location trying to beat the red light or pulling away from a stop, as well as many other near misses as both a walker and driver on the same route. More attention also needs to be paid to this high-risk intersection with cars merging from 520 and crossing one to three lanes. When there are Husky Stadium events with many more walkers and bicyclists and drivers there is inadequate planning for the safety of all groups. It is the bicyclists above all who ignore common sense and rules of the road. I am a former bicyclist who now feels unsafe riding in my own neighborhood or to work. I am a walker who now fears being hit on a sidewalk or tripping again on uneven, broken pavement. I am a driver who fears hitting or being hit again one of the many drivers and bicyclists in the Montlake and U District areas who ignore stop signs. Bicyclists have no incentive to change their behavior because they know no one can identify them. There should be mandatory licensing for bicyclists to pay for the costs of marking special areas for them to ride safely and SEPARATELY from pedestrians, cars, and buses.</p>	5/29/2015 10:22 AM
86	<p>Best route for me to get from Eastside of Capitol Hill to UW. Do not want to lose frequency of service on 23rd through Montlake.</p>	5/29/2015 10:18 AM
87	<p>Please extend the early am frequency on the 65 route going southbound to UW. Since it was extended a year ago it has become crowded and is routinely late. A large issue with the 65 route is the limited schedule when UW is not in session. Metro should know most patrons who ride during that time are UW hospital staff and staff from Children's hospital. Also, please expand the times the 64x runs as it does not accommodate all work schedules as it currently exists.</p>	5/29/2015 10:08 AM
88	<p>Why did Metro eliminate Route 47 last year only to bring it back? Was it to replace Route 43? I hope so, because there are plenty of residents on the North end of Capitol Hill (Denny Way to 23) who need reliable bus service. Also, it's disheartening to be stranded late at night at the bar and all the buses no longer run. Hopefully Route 43 will have late frequent service.</p>	5/29/2015 10:01 AM
89	<p>I commute on the 16 daily. It is consistently standing-room only and occasionally over-full by the time it gets on Aurora going south. Almost 1/3 of the riders disembark in SLU. The majority of the remainder leave in the downtown core. Changing this to a Fremont connection just makes it a worse version of the 26. The 26X is not a great replacement: it is already slower than the 16, and doesn't come into range of nearly 1/3 of the passengers who currently ride the 16 (those who get on after 45th & Wallingford going south). The 16 is currently just barely meeting demand for SLU & Downtown commuters: making it into a Fremont connection would just make things worse.</p>	5/29/2015 9:36 AM
90	<p>The 43 is a very necessary route and although I'm very excited about light rail coming to link the U district and capitol hill I am very disturbed by the proposal that critical routes between the two stations will be severed. I really hope that this is reconsidered! I rely on the 43 on a daily basis and live too far to walk to either of the light rail stations. To have to catch a bus to the light rail station and have to transfer is just backpedaling in my opinion. The 43 route is imperative. Please reconsider before destroying this route. The 25 is also important but not nearly as crucial as the 43.</p>	5/29/2015 9:32 AM
91	<p>Most of my comments were provided earlier in the survey but in case they get overlooked in that section, I will repeat them here. The service on Route 11 has got to improve. I've been a rider of route 11 for 25 years or more. The peak hour service in the last 10 years has been miserable. Even though the schedule states that it runs every 15 minutes during peak from downtown, the actual experience is more like 30 minutes. It has often taken close to an hour to get home after getting to the bus stop to catch a bus at the scheduled time but having the service run very late and then given the overcrowding that results, the bus runs further behind en-route resulting in close to an hour trip of just about 4 miles. That is a miserable performance. So the new proposal has got to improve the peak hour service. If the proposal is to keep peak hour service to every 15 minutes, Metro has to add more buses on the run to ensure keeping it to every 15 minutes. The service MUST improve. There is no reason that people should drive their car downtown from Madison Park/Valley, but many do because the service is miserable during peak hours. I would not recommend to anyone to take the #11 if they didn't have to and I am a major supporter of public transit and for leaving the car at home. But there is a point where I draw the line at supporting public transit and for me Metro has reached that point with the current poor service during peak hour on the #11. So I hope that the new proposal will improve peak hour service for the # 11. Thank you for the opportunity to provide feedback. .</p>	5/29/2015 9:28 AM
92	<p>See earlier comments</p>	5/29/2015 9:13 AM

93	Unless I have missed some critical information, the loss of route 68 means I start commuting in a personal vehicle rather than public transit which I currently use. From the information I have read, the 68 is claimed to be a "redundant" route to the 372. This is just not true and I think a poor argument for the many people I share rides with that live north of University Village and travel along 25th Ave NE then west to/toward the Northgate Transit Center. The 372 is a north/south route. As far as I can tell, this would make my commute to and from work a longer walk and three bus as opposed to two bus commute. This is no longer acceptable for me. It would add an additional wait to an already lengthy commute. I am all for more frequent runs N/S and E/W, but there are key destinations (transit centers) that might require a few exceptional routes. Seattle's roadway grid just does not make certain N/S and E/W routes possible. Without certain exceptions, users would be required to make more transfers. Not good. Please reconsider the 68.	5/29/2015 9:12 AM
94	I am disappointed that the thru-route between the 48 (north section) and 271, along with the frequency improvements to the 271 proposed in alternative 1 did not go through. Please consider putting this back, along with whatever reliability improvements to the 271 are needed to make it work.	5/29/2015 8:56 AM
95	I am really looking forward to the return of Route 47. I used this route daily to commute into downtown as Route 8 has become so unreliable it is faster to simply walk into downtown from where I live. Additionally, routes 43 and 49 do not speed up my commute given where I work and live. Route 8 has become (already was?) a joke of "reliable" service. The traffic buildup for the on ramp to I5 South makes taking the 8 Eastbound a nightmare in the afternoons. Specifically, the need to be in the same lane as the I5 South traffic for the two stops at Westlake & Denny and Fairview & Denny make these two stops add a solid 10+ minute delay to each bus, EVERY DAY, starting before 5pm. If you want to improve "frequency and reliability," please address the dis-function in this Route that will no doubt increase as more new office buildings are opening along Denny Way.	5/29/2015 8:56 AM
96	16 looks like a good idea. It'll take for bleedin'-ever to get from NE to downtown, but that's not the purpose. Getting to Fremont is great, and maybe close to Seattle Center. Yay. 65 - don't run it through campus during peak hours - too much time eaten up - Montlake is slow enough at that hour anyway, don't drag things out getting to the station. 76 - if you're going to make the 65 take so long to get from Wedgwood to the Link station, please please please make good on your plan to increase frequency of the 76. 941 - Once an hour - that's a joke, right? What have you got, one driver and one little van? Sad. And not worth gambling on there being a seat.	5/29/2015 8:53 AM
97	I take the 26 twice a day, 5 days a week most weeks. the 26X will not meet my travel needs at either end. I see there are alternatives in the 31/32 and connecting to the 16, but will likely add walking distances, waits on connections for me to get to work. If the 31/32 and 16 routes are really going to help me replace the single bus, they will need to be faster and arriving more often to be acceptable alternatives to the 26. I think its great that metro is increasing opportunities for folks on the east side, but not sure why that should come at the expense of my current convenient commute.	5/29/2015 8:42 AM
98	Magnolia is becoming increasingly isolated with bus route reduction, especially with routes 24, 33, and 31. Distances from parts of Magnolia not served by bus to a bus stop are in excess of those relatively short distances proposed between stops, particularly in the UDistrict and UWa. Seems as though this is inequitable treatment.	5/29/2015 8:36 AM
99	Your cancellation of this route makes my commute from Maple Leaf to Redmond far more difficult and lengthy. It would probably result in me returning to driving alone to work rather than using transit.	5/29/2015 8:30 AM
100	See my previous comment	5/29/2015 8:29 AM
101	Please do not remove this route!!! the link does not relieve all of the traffic between north capitol hill/ montlake, and UWMC! this is an integral route for many many hospital employees.	5/29/2015 8:27 AM
102	It is disingenuous to tie the discontinuation of the 26 to the opening of the new light rail - these two discussions are not connected. And it is a bit deceptive to number the 26 and the 26X the same. One travels along Dexter, 35th Avenue and Wallingford Avenue; the other travels across the Aurora Bridge and up 40th Avenue. For this part of their routes, they serve completely different constituencies. For the people who ride the 26, the opening of the Husky Stadium light rail has no impact one way or the other on their commute between home and work. We are much too far west, and travel north/south on the other side of Lake Union. But the discontinuation of this service, at a time when there are at least four major housing projects under construction at the bottom of Wallingford Avenue, does not make good sense. Future use of the 26 could reasonably be expected to grow with the increasingly dense population of the area. Do we want all these new residents to drive to work in South Lake Union and downtown Seattle? I don't think so!	5/29/2015 8:21 AM
103	The 373 currently only runs during peak times and when the UW is not in session, it runs less frequently during these peak times. I am an employee at the UW (Staff) and I ride this bus every day to work. The majority of the people who ride the bus are staff or faculty, not students. Therefore, this bus should NOT decrease the amount of times it runs during peak times when the UW is not in session as most staff and faculty continue to work at the UW even when it is not in session for students.	5/29/2015 8:11 AM

104	eliminating 71 and 72 and stopping service to downtown for 73 eliminates 3 out of 4 options for my commute. Keep 72 and have 72 and 73 service downtown	5/29/2015 7:59 AM
105	Read my previous comments.	5/29/2015 7:45 AM
106	Please see my comment above. I just want to repeat here that I take the 66 daily. it picks me up one block from home and stops one block from my job. Taking this route away with no good alternative is thoughtless and cruel. I am elderly and do not bicycle or even walk very well and the arrogance of planners who force people into those alternatives when they may not be able to use them is appalling! The current train routes do not go anywhere that help me and removing the only bus route I can use will force me back into my car. is that really what you want? I don't care if you change the number of the damn bus but PLEASE don't remove the route from Northgate to downtown via Roosevelt! This route is always crowded during peak hours. What good will it do to send it to first hill via the freeway? Who thought that was a good plan? it stinks. If a bus no longer goes past Fred Hutch and down Stewart there will be MANY more people driving to work!	5/29/2015 6:15 AM
107	Stopping all weekend service is a transit-killer! At that point I HAVE to own a car and once I spend money for a car, why should I ride Metro at all. You're cutting your own throats!	5/29/2015 4:38 AM
108	Sad to see the 48 terminate before Roosevelt and 65th. Please ensure transfers and bus stops are synchronized. It would be great if the 48 could go all the way to Rainier Beach. Let the 11 and 12 remain as they are. Route the 49 to Madison and to 1st Avenue downtown. These routes would nicely fill the variety of needs on Madison. The 10 could be routed along E. John to downtown (somewhat sad to see the 43 disappear).	5/29/2015 12:41 AM
109	My daily commute is Fremont (34th and Fremont) to Bellevue / Pine. Usually on the way to work, I take a 10/11/43/49/soon 47 downhill and then a 5/16/40/28/26 now. However, if it's fast to get from capitol hill to u-district, and there are good connections at udist from the 31/32 (made more frequent), then that's suddenly a viable way for me to get home. It would get me to spend more money on Broadway, since there'd be a lot of "oh i'll just stop here on the way home." (I guess this is kind of a fat chance. Next best thing is good access from the BGT and proper stairwells that you can roll a bike down.) Also, I'd hope that the 47 and 12 still stop at Bellevue and Olive Place...? The 'stop' is obscured by the route labels on the map. It best not be deleted altogether. I dunno! It'll probably be ok. Not optimal. Not disastrous.	5/28/2015 11:37 PM
110	As a resident of Licton Springs who works in the U District, I appreciated, and greatly miss, the convenience of the former 48 express (E line to transfer at 85th & Aurora). It would be nice if that could come back! The 355 is a decent alternative for the morning commute, but inconvenient for the 5pm commute back home. Thanks for asking!	5/28/2015 11:18 PM
111	Eliminating 26 (not express) and forcing 16 onto Dexter will not increase speed to downtown.	5/28/2015 11:17 PM
112	I would like the 545 to continue to come frequently, and into the evening. It allows me to work late in Redmond and return to First Hill when needed.	5/28/2015 11:14 PM
113	As a resident of Bryant, the elimination of the 71 bus has a high impact on me. During off-peak hours, to get downtown without a very long ride on the re-routed 16 bus, this means I must walk 5-6 blocks to catch either the 372X or the 65, and then transfer at the UW to Link Light Rail, which involves another long walk. I am concerned about the connection from the 372X or 65 to the UW Station. The current stops along Stevens Way are very far from the UW Station, about an 8-10 minute walk. Whereas with the 71 I can now walk one-block to catch the express downtown, I must now walk 13-15 minutes total between getting to either the 372X or 65 and then the transfer at the UW. Given the length of the walk and the delay associated with making the connection, I think it far less likely I will use transit to get to downtown anymore. PLEASE place a new stop for the 372X and 65 right on Rainier Vista on the UW campus, to minimize the walk. I would prefer the 71 bus be kept in service until the Roosevelt Station opens. I do like the re-route of the 16 bus as a neighborhood connector, but the route is too long and slow to be used as a viable means to get downtown from Northeast Seattle.	5/28/2015 11:09 PM
114	I have expressed twice already at previous comment section but I will say it again. Split rkute of 48 is a bad idea. Garfield High School Students ride 48 from NW and North Seattle. It is the only bus to get to Garfield High School. Split will make their commute much worse. Please don't split the route. If you have to do it, please make transfer a breeze both direction.	5/28/2015 10:46 PM
115	Disappointed to see fewer daytime stops. Route 70 is significantly slower to/from downtown, and the Eastlake neighborhood already is out of light rail reach. Bummed to see this route decreased.	5/28/2015 10:32 PM
116	Please see my previous comments. There is no apparent reason for the change to the route, it simply does not benefit your goals. It is abundantly clear there is nobody with sufficient logic at Metro, the County or the City to see this.	5/28/2015 10:14 PM

117	This route is crucial for the people that live along it. No amount of increased service on other routes can compensate for its loss, nor has any mitigation been proposed. It is an absolutely essential service for many residents of North Seattle.	5/28/2015 10:14 PM
118	#5 I use between Greenwood/N 85th St and downtown, 3rd and Pike/Pine. Would like to see LESS bus stops than what appears to be every two blocks. Make the stops three or even four block apart. Speed this thing up. This particular line is full with aisles packed with standing customers during the morning/evening rush hours, and during the day, it's more often packed with few empty seats from my personal experience.	5/28/2015 9:38 PM
119	See my comment on Question 22.	5/28/2015 9:23 PM
120	I would only restate what I wrote before. The old 73 provided direct service from Pinehurst to Downtown that is easily accessible to those of us with mobility issues. This will be far more difficult, or impossible, with the changes. If I want to get to the Light Rail station, I will have to transfer on University Way to a bus that will take me to the Station, then transfer to Light Rail, then reverse that on the way home. It doesn't look like there will be a way to transfer to a bus that goes down University Way onto the Express Lanes/Bus Tunnel to get me to work. I'm very disappointed at these changes.	5/28/2015 9:02 PM
121	1. 77 and 373 need a boost. Those buses are a huge hit and are perennially full. In particular, 77 (my main bus line) should continue past 8:30 till around 9:00, and likewise its frequency going back shouldn't drop to 30 minutes before 6:30. 2. If 73 become another connector line like 67 will be, it needs to get near the train station faster. Meandering from 15th right to Roosevelt, then through campus will be very slow. Getting downtown midday via 73+train will take an hour at least.	5/28/2015 8:59 PM
122	The cutback in service is unfortunate.	5/28/2015 8:49 PM
123	25 is the stop closest to our house and we take it downtown or to the University during the day. We wish we could take it to Symphony concerts in the evening, but it stops running around 6pm and we have to walk 15 minutes to a 43 bus stop. What will we do when you cut out the 43? Although it takes me 15 minutes to walk to the 43 bus stop, once I get on the bus, it goes directly to Group Health on Capitol Hill, without having to transfer. I think it is important to keep this bus route.	5/28/2015 7:58 PM
124	The Comments and points that I am about to make revolve mostly around people in my neighborhood and their ability to access Capitol Hill and Downtown. I live in Madison Valley and take the 8 to work every day. I have broken the discussion into pieces based on route. Route 11 This Route currently connects Madison Park/Valley with the Pike/Pine corridor and the retail core of downtown. The proposed changes will completely change the destination of the route and this neighborhoods ability to traverse the city. Under the proposed changes the route will serve the financial district area of downtown and require anywhere from a 1 to 5 block walk to get the rider to the old route. Madison BRT - I want to point out Seattle's current plan to install BRT from the Ferry Terminal to MLK via Madison. If the city is successful in this it will mean that the 11 and the new BRT line will have the same route except for MLK to 43rd Ave E. This new BRT should be fully considered and planned for when developing a new plan for the 11. If the 11 is realigned off Pine to Madison now, I fear it will be eliminated with the BRT begins service cutting off Madison Park from bus service. The Madison Park neighborhood needs to continue to have access to an All-Day bus route to downtown/Capitol Hill. http://www.seattle.gov/transportation/MadisonBRT.htm Route 12 With the 43 eliminated I understand the desire to have a bus that serves John and Thomas Streets into Downtown. However, the realignment of the 12 to Thomas from Madison means that there is a 4-5 block gap between the northern neighborhood of 19th Ave E and its current destination. Also, Thomas Street is incredibly narrow and buses currently have to stop to pass one at a time. The Right turn from 19th Ave E on to Thomas may prove difficult or nearly impossible for many drivers in both articulated and fixed buses. It will also require the movement of overhead bus lines to allow for the turn. Summary of Disadvantages • The new changes will provide no direct service from the back side of Capitol Hill, Madison Park/Valley to the Pike/Pine Corridor without a 1.5-10 block walk. • The Madison BRT plan could make several of these changes unnecessary and require they revert to old routes after implementation or be eliminated. • The new route would create a large number of bus to bus layovers not bus to light rail to maintain current service routes. My Recommendation Route 12 and Route 11 should stay in tacked until the Madison BRT is running. At that time the 12 should adjust its route to serve more of 19th in North/South function and rely on the BRT to connect people to Downtown. Route 11 should remain in tacked entirely to continue serving Madison Park to Pike/Pine with a transfer to the Madison BRT to service the financial district portion of downtown. Route 10 should realign to E John St at 15th Ave E and serve the John/Olive Corridor to downtown at Pike/Pine. There is one bus stop that will lose service on 15th Ave E and that change will effect fewer people than the current proposal. Route 8 – Question of Planning With the creation of the Capitol Hill Light Rail Station the Central District makes obvious sense as a turnaround place. When considering the constant late status of the 8 I would like to ask if though is being put into whether making right turns at the turn around location or left turns at the turn around location will be faster. This turnaround route contains very active crosswalks at each turn. It also has left turn lanes and left turn arrows at each turnaround intersection in the turnaround route.	5/28/2015 6:57 PM

125	am i mentioned early in this survey, due to it be reorganized i am loosing my early morning bus and need to walk further than i should (health reasons) to get a different bus	5/28/2015 6:52 PM
126	The current route 11 via E. Pine St. takes me to several destinations that I travel to daily or several times a week: Seattle Central College (daily), businesses on E. Pine & Pike, department stores downtown, the Pike Place Market and the Link station at Westlake. The proposed route 11 will take me near no destination at all except the Central Library and the ferry terminal (useful every few months). Everyone will have to walk three blocks just to get to the bus tunnel. I do not understand why route 12 is getting our destinations on Pine St. and we will have to ride through First Hill, which is useful only a few times yearly for a doctor's appointment. I will very much miss being just a few steps from Westlake Station and will probably use the bus less frequently for those sorts of trips. However I will appreciate more frequent service in the middle of the day and in the evening for the 11, though it means walking quite a bit more.	5/28/2015 6:26 PM
127	Please see my earlier comments. Do NOT lessen the # of busses available during peak hours. If currently 4 every hour, you should give us 5 or 6, not less!	5/28/2015 6:26 PM
128	The #16 works well as it is. The only place it doesn't work well is when it hits congestion at Northgate mall. Any bus you put in its place will still have to deal with that congestion. The new route not only does not make sense to me, as a direct consumer of the route on a daily (and weekend) basis, but it doesn't make sense because it's not broken. It's a good, efficient route. It takes 20 minutes to get downtown, thanks to Aurora Ave, and once it has to go through Fremont, this will all change. I used to take the 28 when I lived in Ballard, and the Fremont bridge severely impacted the reliability of the service. The system is broken, and you do need to do improvements, but this route isn't broken. I won't be able make appointments at Northgate and downtown reliably, and because of a heart condition I can't walk up to Fremont to catch the E line. Also, there are two retirement homes along the route and this will impact people's access to Northgate and downtown. I see people get on the bus from these places in wheelchair/scooters. I can't imagine someone in a scooter or wheelchair transferring to a 26 in winter so they can get to Northgate. Stop drawing lines on maps and think about the impact that these kinds of changes have on PEOPLE, not just traffic. This has nothing to do with the UW Sound Transit station. How could any relationship be drawn between the two?	5/28/2015 6:18 PM
129	Please restore it.	5/28/2015 5:42 PM
130	Please do not cut the 242! There are no other options for this line. It's constantly packed.- people use it a lot. Please do not cut it.	5/28/2015 5:28 PM
131	8: extend the proposed increased frequency to 15 minutes for evenings and weekends. It should at least replace the E John service to current 8 + 43 levels. Additionally, I can see the 8 being split as far north as possible, since the MBS will not be as important of a transfer node when the CHS opens. 11: lose the all Madison version and restore to PikePine-CBD, or to the CHS...I don't mind transferring to the shopping core but only to high frequency LRT. Bus to bus transfers seem cumbersome and unpredictable. Also, I hate losing the 11 home (post cocktails and Rancho Bravo) from PikePine. 43: This is tough. I understand the rationale of the new 12 flavor of the 43, but it really puts a gap in E John, and along 23rd, and forces a chunk of E. Capitol Hill to make bus to bus transfers or longer walks. The 8 can sort of make up for this IF high frequency is extended to evenings and weekends. 48: This bus currently seems to have the least amount of issues of any that I frequently ride, so improved frequency seems fantastic and useful.	5/28/2015 5:22 PM
132	Don't split route 8 at Jackson. Splitting the 8 that far north would inconvenience many blind people who work at Lighthouse for the Blind. If you must split the #8, divide it farther south near where MLK meets Rainier Avenue and the Central Link station. Thanks for respecting riders who must use public transit!	5/28/2015 5:19 PM
133	I simply can't believe that Metro is cutting off Lake City/Maple Leaf from the UW/Downtown - this is ridiculous.	5/28/2015 5:15 PM
134	In my previous comments, I said the change in the 16 to go through Fremont would not be workable for me. I wouldn't take the bus any longer because it would increase my commute time. I would likely start driving if this bus route changed to go from downtown through Fremont.	5/28/2015 4:59 PM
135	We need service north of NW103rd ST to NW145th St. during the day and weekends even if it an infrequent shuttle. Not everybody that uses transit out here needs to travel only to downtown and only during commuter hours.	5/28/2015 4:53 PM
136	Consider routes 15X, 18X and Rapid D line in this as well. Why were those left out in teh planning stage?	5/28/2015 4:48 PM
137	i would like to see them all on a map so i could see how they work together with the light rail	5/28/2015 4:47 PM
138	do not stop route #372 at UW Bothell!!! many people who ride to work in points East would lose service.	5/28/2015 4:46 PM

139	I live on Eastlake & Mercer, and I am completely dependent on the 66. I catch it a minimum of twice a day, and often more. It is the ONLY route that goes by my home, my workplace (pioneer square) and a grocery store that wouldn't require me to walk several blocks lugging heavy bags with multiple back, hip and knee injuries to consider. PLEASE DO NOT DISCONTINUE REGULAR ALL DAY, ALL WEEK/WEEKEND SERVICE ON THE 66 ROUTE.	5/28/2015 4:41 PM
140	Please make sure that the #12 continues to run on 19th Avenue East, north from E Thomas St, all the way to Stevens Elementary School at 19th & Galer -- and to downtown somewhere near 1st & Madison. Please improve frequency on these routes. Thank you!	5/28/2015 4:38 PM
141	This route is an important part of my daily commute to Seattle Children's Hospital. When it is eliminated, my only option will be the #75 which requires considerably more walking between segments of the commute and between the bus stop and my final destination at the hospital. Since I am disabled, this will be a challenge for me and may result in an earlier retirement than I had hoped for. I am disappointed that your plans involve removing existing bus services in order to increase bus service elsewhere, although I can understand a goal of serving the most riders rather than the greatest need. I will use the new light rail little if at all, because I use a walker and I expect that accessing the light rail tunnel will be as awkward and unpleasant as the downtown tunnel. And my personal strong preference is for more bus stops and fewer transfer points rather than more frequent service between shorter segments. I assume that I am currently in the minority with these preferences, but as the population of Seattle ages (as I have), their preferences may also change.	5/28/2015 4:36 PM
142	70 or new: I would suggest a direct weekend trip bus direct from u-district (and north) to Seattle Center in the summer. Also; similar with the 30; might be better split in Fremont: so one side was West/east corridor; and the. It's north/ South	5/28/2015 4:36 PM
143	Buses leaving the UW at peak times are packed and occasionally leave folks for the next bus. Please use articulated buses for each of the peak times. Increase the frequency after 6pm northbound and include an earlier southbound bus in the morning. Thanks for taking my comments into consideration. I have been a regular daily commuter for the past 20 years. Keep up the excellent service.	5/28/2015 4:34 PM
144	I strongly encourage Metro to continue service of the 64 in Downtown Seattle. By the time the 64 that I usually take (arrives at NE 110th St. and 35th Avenue NE at approx. 7:18 a.m.) finishes its stops on 5th Avenue Downtown, the bus is probably three-quarters empty. I love that the bus continues up to First Hill, as I have occasion to go there several times a year. However, most of this route's riders (at least at that time of the morning) ride the bus only to Downtown. Even then, there are many riders who have several blocks still to walk to reach their destinations, or who wait at 5th & Seneca to catch a bus that continues down 5th Avenue. Taking the 64 out of Downtown and sending it only to First Hill would be inconvenient to many, many riders. As for me, it would force me to either (1) leave my house much earlier each morning so that I could take the 64 to a point where I could transfer to a Downtown bus (because the 64 often runs late, transfer times can't be guaranteed), or (2) wait on busy, unsafe (and, in winter, dark and rainy) Lake City Way in order to catch a 72 (which, again, would necessitate leaving my house much earlier because the 72 takes a lot longer to get Downtown) or a 312 (which in my experience is usually full or almost full and uncomfortable by the time it reaches what would be my bus stop). I assume other riders would have similar problems. In short, Metro would be making a mistake if it causes such drastic changes to be made to the 64's route. Please keep route 64 in Downtown Seattle, if only for the one stop at 5th & Pine.	5/28/2015 4:29 PM
145	You should not move the route 12 to Pike/Pine, but keep it on Madison, by way of Broadway. I heard Mayor Murray say they were going to improve bus service on Madison. The 12 should continue to serve Seattle University, the hospitals, the library, the southern half of downtown, including the government buildings and the ferry terminal.	5/28/2015 4:27 PM
146	Residents in Laurelhurst are very disappointed about the proposed elimination of route 25. I personally take 25 every day to go to work. 25 is the only bus that goes through Laurelhurst and has provided service to many people including students, people who come to Laurelhurst to work (usually lower-income), as well as Laurelhurst residents who go to work. Laurelhurst is also an old neighborhood, with many seniors, who rely on bus 25 to go to other places. Eliminating this service will significantly hamper the mobility of these people and more importantly force them to use automobiles, which is not sustainable. Metro proposed new route 941, but this new route does not really cover Laurelhurst, as it only goes on 45th street til about 47th Ave. It is unrealistic to expect Laurelhurst residents, living through the neighborhood, will come to the 45th street in order to catch a bus. The elimination of bus 25 can only result in lost ridership for King county metro and Laurelhurst being completely transit-unfriendly. We hope that you do not remove bus 25. We propose to link bus 25 to the new light rail station at the University of Washington. If King county metro feels there is not enough ridership for route 25, perhaps a smaller bus can be used, which was used in the distance past (before the frequency was cut to once per hour; it used to be twice per hour). Thank you for your consideration. Cynthia (206-327-9181)	5/28/2015 4:24 PM

147	There is a suggestion that the # 64 will no longer go downtown. We will miss it!!! the # 71 goes away, right? This leaves only the # 76 for us. This bus will be crammed with people - everyone who is now spread between the # 64 , the # 71 and the # 76. And we need something running up and down 65th in non-peak hours.	5/28/2015 4:24 PM
148	66 is used primarily during peak hours along Eastlake and all the way to Northgate. It is the only direct connection from the north end of Seattle to the Eastlake corridor. All other routes either go downtown, along the west side of the lake, or only to the U-district, necessitating a transfer. The proposal to move the 66 to I5 ignores the many people who commute from the biotech and research institutions along Eastlake. Please consider leaving the 66 on Eastlake.	5/28/2015 4:21 PM
149	Going home at night on 120 or 131, the buses are packed. Could this be helped?	5/28/2015 4:19 PM
150	It is kind of restrictive time coming from Redmond - last bus is at ~9am ... please add service till atleast 9:30AM	5/28/2015 4:17 PM
151	Just what I mentioned in my previous feedback. 47 = happy North Capitol Hill! Thanks for listening to the people.	5/28/2015 4:15 PM
152	I'm looking forward to the increase in service, particularly in the evening. The current half-hour windows, when combined with the 43 also coming within minutes, means there's a large gap where there aren't any buses that go east of Broadway and north of Pine.	5/28/2015 4:08 PM
153	If the 277 bus will continue during the summer	5/28/2015 4:07 PM
154	On most Fridays the 26X bus (arriving at 45th around 7:53am) gets stuck behind a garbage truck for a lengthy amount of time. That needs to be fixed.	5/28/2015 4:06 PM
155	We live in North Capitol Hill and my sister and I take route 12 to and from school at Seattle Academy every day. Many of our friends do the same. We wouldn't be able to do that if you change route 12 as proposed. I'm not sure how we'd get to school. Please keep route 12 the way it is now!	5/28/2015 2:38 PM
156	Making changes to the 26 based on efficiency regarding the new light rail system makes no sense. I use the 26 every business day just like many others - the bus is full most mornings and afternoons that I ride it. The 26X is not a faster option as described, it takes just as long if not longer than the 26. Eliminating the 26 causes a longer commute time due to a further distance to walk to the bus stop and/or a transfer in Fremont to catch another bus. in a 3 - 4 block area of the 35th and Wallingford Ave. N. stop there are two apartment buildings being constructed with over 100 new apartments and a commercial building going up as well. Eliminating the 26 and this stop will cause a tremendous amount of stress on the system and this area.	5/28/2015 2:20 PM
157	I would like to request keeping bus #25 from Laurelhurst to Roanoke and Lakeview to downtown. This is an excellent and necessary route for a number of people living on Boylston who can not walk down hill due to knee problems. There are at least three of us and also two elders who take taxi or drive to work if #25 is not available. Please note that the bus is full during peak hours of 7:48 and 8:52 in the morning at Boylston/Roanoke stop and standing room only by the time it reaches end of Lakeview. The bus also fills up during peak hours in the late afternoon. Please consider keeping this bus for during peak hours. If not, a number of us will end up having to drive to work and unfortunately will add to additional traffic jam and population. Please, please consider this as the bus on Eastlake is not an option. Additionally, can you please consider moving the morning bus to an earlier time of 10 minutes earlier for the 7:48 and 8:52 slot? This would allow those working downtown to arrive at work around 8:00 or 9:00 instead of arriving into work late everyday if dropped off at end of downtown. Also great if you can pick up the bus 10 minutes later for the last two evening pick-up so that we don't have to leave work early to catch the bus. Thank you.	5/28/2015 1:51 PM
158	I think that eliminating service to Wallingford Ave and N 35th would be unwise. When I ride the 26 during commuting hours, I am always at the stop with 8-10 people and multiple people always disembark with me on my return trip. If you eliminate this stop, the nearest bus stop would then be half a mile away at N 40th. Additionally, over one hundred apartment units are being built on Wallingford and N 34th, which will certainly increase the demand for the 26 at that particular stop. And there are no other bus routes that service the area by Gasworks. Please reconsider this route change.	5/28/2015 1:48 PM
159	The 8 and 44 routes can be almost unusably slow. I know it's the cars' fault, not the buses, but there's gotta be some way to speed up mass transit. Lately it's faster to walk from Belltown to Broadway at rush hour than to sit in traffic on the 8.	5/28/2015 9:42 AM
160	Increase frequency of the 26!! Route the revised 16 up Wallingford Ave from 35th to 45th! This maintains the Wallingford-Downtown connection, and also provides service from lower to upper Wallingford.	5/28/2015 9:19 AM
161	It is overloaded. Please add more buses to this route. It is impossible to get on this bus during peak hours, and they are constantly late. Otherwise people will just prefer driving from east side, which will make the situation in downtown even worse.	5/28/2015 8:48 AM

162	The proposed changes, removing route 26 stops and retaining only route 26x, force those in Wallingford to use route 31/32 and then transfer in Fremont for access to South Lake Union. Further, routes 31/32 have decreased frequency and service hours compared to the current route 26. As such, I am opposed to these changes. That said, if the changes move forward, routes 31 and 32 could be purposely staggered to help offset the decreased frequency and enable arrival in Fremont at 15-minute intervals.	5/28/2015 8:36 AM
163	Given who the current #12 serves: many students, elderly and folks with health challenges and what it serves: schools, hospitals & clinics and cultural sites, it would be a tremendous loss to have it moved. My children ride this bus to and/or from school everyday. It is essential it is to keep the #12 bus on it's current route down 19th and Madison. The #12 route serves at least 7 different schools: Stevens, St. Joe's, Nova, SAAS, Northwest and O'Dea, Seattle University, 3 clinics: Country Doctor, Sound Mental Health and the Polyclinic, 2 hospitals: Swedish and Virginia Mason, The Miller Community Center and playing fields, 2 grocery stores, the Town Hall, the Frye Museum, the main Seattle Public Library, the ferry docks and even the court house is served by the #12 bus route. Many children, elderly, and mentally ill residents rely on this route for basic services. The #11 bus does not serve Madison Park not north Capitol Hill so adding service to this line is not helpful here. I think making the 10 bus take a bump in it's route to connect to the light rail makes more sense than pulling the #12 off it's route.	5/27/2015 10:07 PM
164	76 - I'm glad to see the increase in this route from 8 to 11, but that will not make up for the decrease in the 64x serving downtown (only to South Lake Union). The 76 needs to be increased more to make up the difference. 14 trips during the peak hour would only 'just' cover the current combined trips of the 64X and 76. This should be the absolute minimum.	5/27/2015 7:40 PM
165	How will passengers depending on UW and UWMC service, boarding at 15th and John, manage the hillclimbs to access other routes. Elderly and disabled need the 43.	5/27/2015 5:47 PM
166	I am at 43rd and Stone, and am upset about the Route 16 change. Currently this moves people from Wallingford and points north to downtown quickly and effectively, and I absolutely love how the route skips all the congestion around the Fremont Bridge and teleports everyone directly to downtown on Aurora. Rerouting every 16 bus through Fremont and along Dexter would add 15+ minutes to the route and possibly more if the bridge is up, and IMO really destroy the value that the 16 provides to the commuters of this route. The route is already long enough for riders further north and east of me in Wallingford; why make it longer for them? You're already increasing the frequency of the 16 which is nice; how about making every other 16 a 16X that follows the old Aurora route? That way riders along Dexter and in Fremont can still be served, and people like me who like the express aspect can keep zipping on into downtown with minimal delay. Thanks!	5/27/2015 5:47 PM
167	The #12 links all of north Capitol Hill and the Madison corridor with 6 different schools: Steven's, St. Joe's, Nova, SAAS, Northwest and O'Dea, The Country Doctor Community Health Center, the Miller Community Center, Sound Mental Health, Swedish Hospital, Virginia Masson, the Polyclinic, The Frye Museum, The Town Hall, the Central Co-op, The Seattle Public Library and the ferry docks. Please do not reroute this bus off of the 19th Ave/Madison corridor. It serves many children, elderly and mentally ill residents -- and many others in these neighborhoods. This is a vital route and it will not be served or not well-served by just adding service to the 11 bus which goes out to Madison Park not up to this side of Capitol Hill. Please consider adding a bump out on the #10 bus route. Just adding some service to the #10 in combination with a three block deviation off of 15th and down John St. then back across to the Pike/Pine Corridor would add the link to the light rail station on Broadway without sacrificing the #12 route which serves vulnerable populations and links all kinds of vital services. The 12# will become better used if there is actually more frequent and reliable service on it's route. Many thanks for all your efforts. You do essential work that is making Seattle a better, more livable, and sustainable city.	5/27/2015 4:40 PM
168	The 75 needs to stop directly at the new light rail station. Commuters should not have to get off on the UW campus and walk several minutes to the link light rail station in order to get downtown. That is not rapid transit and does not serve the NE area of Seattle.	5/27/2015 4:08 PM
169	Please see earlier comments. I do not think the route for 48, or 45/48 should be changed to eliminate the stop as NE65th and 15th Ave NE as proposed. The proposed change adds redundant service at the cost of eliminating an important intersection next to Roosevelt High School and proposed highrise development.	5/27/2015 3:08 PM
170	very convenient and necessary, please reconsider cutting this route.	5/27/2015 2:48 PM
171	Consider connecting this route directly to the Light Rail station, at least during peak hours -- this would give the people who use the 74 an alternative that would use light rail.	5/27/2015 1:07 PM
172	43 - I still would like this route to downtown or at least the Capitol Hill station. 11 - less stops 12 - less stops, more frequently if deleting the 43	5/27/2015 12:31 PM
173	Don't cut	5/27/2015 11:45 AM

174	I am happy to see that there will be an increase in the frequency of both routes 74/76. These are the only routes that allow me to get from downtown Seattle to home in one trip and with the cutting of route 30, it is important to me that more times are added on this route. The only thing that would make this better would be to add additional morning routes for the 74 and additional evening routes on the 76. Currently, the earliest I am able to get to work is at 7am by taking the earliest 74 and sometimes, I need to be there earlier and then have to drive, pay for parking, etc. which is not sustainable. 74: -More and earlier routes 76: -More afternoon/evening routes	5/27/2015 10:55 AM
175	I currently use the 316 which works for commuting to work but it would be nice if there was a faster/easier way downtown during off peak hours. I think the proposed changes which include adding the 26X would alleviate this problem by providing express service during non-peak hours.	5/27/2015 10:21 AM
176	The same thing I said before - currently 242 provides a quick and convenient way to get from Shoreline to Bellevue. With these changes you will be making me transfer buses twice each way between Shoreline and 148th in Bellevue. Why remove this service? This change makes me believe that I will have to move to the east side to keep from spending half my life waiting in traffic...or waiting for the next bus.	5/27/2015 9:22 AM
177	Please clarify the new route for the #65. Please see earlier comment on the discrepancy between the 2 maps. Would the 65 go all the way through campus, or would it turn around and go back the other way. Would the loop through the UW campus be in the same direction all day? If so, which direction? Thank you.	5/27/2015 9:17 AM
178	Reiterating point earlier: If you turn the 26 into 26 Express, where would it stop? It's not clear from your map. If you remove the Latona & 45th and Thackery & 45th stops, you would be inconveniencing a lot of people and add many unnecessary transfers for those who work in the UW Tower neighborhood of the U. District - making the 44 EVEN MORE CROWDED. Seattle's bus service requires too many transfers, which exacerbates its unreliable and late service. A bus that's running 20 minutes late is not uncommon and, frankly, unacceptable for a major US city. Since the Light Rail will go nowhere near SLU or Westlake, keeping the 26 as is and/or ensuring stops in Westlake (on Dexter or Aurora) and on 45th (near I-5) are imperative. I would hate to end up in a situation -- again -- in which it's more convenient and cost-effective to drive, especially since it's everyone's goal to reduce the number of vehicles on Seattle's roads, which are unfit for the rapid growth in the area. Thank you for considering the public's feedback.	5/27/2015 8:59 AM
179	See my previous notes, eliminating the 43 would put all Montlake families back into their cars, the very thing they were hoping to avoid by moving to my lake in the first place!	5/27/2015 7:01 AM
180	Keep the 26 local - I previously gave a detailed assessment of the reasons why this route is very important to the south lake union residents - this is a very dense part of the city and it is getting much more dense as new apartments are built near the 35th and Wallingford bus stop. The commuters at this stop travel to south lake union and downtown. Having only a 30's bus will not provide us with the necessary service. Please contact me if you have any questions 206 890 0617.	5/26/2015 8:56 PM

181	<p>Concerns for Route 16: The proposed east-west route on 65th and connection to downtown via the Meridian-Kirkwood-Woodlawn "bottleneck" and Fremont-Dexter route is poorly conceived, inefficient, unreliable, and degrades the residential quality of our neighborhoods. Please consider the following: 1. The intended goal of linking neighborhoods and parks with light rail (via 65th route) is only partially achieved (i.e., route east to Sand Point is good idea), but fails in providing direct accessibility west and south to Green Lake and Lower Woodland parks, arguably the most popular recreation facilities in the city (e.g., walking, running, swimming, ball fields, golf, tennis, rowing, and picnic). The proposed route south of Ravenna on Woodlawn, Meridian, Kirkwood veers away and uphill from the parks which reduces walkability, especially for anyone carrying sports gear or a picnic. Parking in east Green Lake and Lower Woodland parks is overloaded and spills into the adjoining side streets increasing congestion and aggravating parking for residents. 2. Routing the bus through the Woodlawn, Meridian, Kirkwood neighborhood is a traffic bottleneck because these residential streets are too narrow and are not designed to support safe two-way traffic and high-frequency transit with large-heavy-buses. During peak hours it will be very difficult to maintain schedules and uniform traffic flow because the narrow corridor (i.e., 24-ft wide on Meridian, Kirkwood) only allows one-way traffic. Buses facing oncoming traffic must stop, or pull out at an intersection, to allow safe two-way passage. This problem will only get worse with the proposed 7-15 service frequency during peak hours. 3. Elimination of the Aurora portion of the route effectively eliminates efficient and fast connectivity to downtown for the southeast Greenlake/TangleTown neighborhood. Travel time for downtown commutes will be increased due to the slower route on Dexter or commuters with need to transfer to the 26X; wasting time and losing the one-route commute. 4. The proposed route and increase in transit frequency will exacerbate the ongoing problems concerning excessive noise, traffic congestion, house shaking, and road safety in the Woodlawn, Meridian, Kirkwood neighborhood. Last December 72 members of this neighborhood submitted a signed a petition asking Metro to consider options to reduce bus impacts. Clearly, Metro has not listened to neighborhood concerns and has ignored public input. Solution: Change the proposed routes 16 and 26 as follows: a) connect the proposed 65th and Ravenna segment of Route 16 to Fremont and Dexter via East Green Lake Way and Stone Way, and b) connect the proposed Route 26X from Ravenna to downtown via Latona, 56th, Meridian, and Wallingford streets. This would: • link the transit network (i.e., Route 16) to the parks on level-wide roads that are suited for bus transit and easy/safe access to parks, • provide efficient, reliable, and faster connectivity to downtown for the majority of commuters in the highest density areas including Southeast Greenlake/TangleTown and Wallinford, and • reduce safety hazards in the "bottleneck" and greatly improve the residential quality of the Woodlawn, Meridian, Kirkwood neighborhoods.</p>	5/26/2015 8:28 PM
182	<p>I think that improved frequency on routes 16, 73 and 373 are beneficial changes, but I also think there needs to be more convenient service to northgate area on weekends (for example, not cancelling 73 service on the weekend). I would be very disappointed at the loss of route 68, as it is the most convenient and my most frequently used route between Northgate and the university district.</p>	5/26/2015 7:13 PM
183	<p>Weekend service on Route 73 would be desirable but probably not possible.</p>	5/26/2015 4:00 PM
184	<p>This is a bus I frequently take from downtown to Maple Leaf, going down 15th. I do not like the proposed changes at all (and it looks as if service on 15th is being curtailed). While Roosevelt also needs more bus service, I don't think it should come at the expense of service on 15th NE.</p>	5/26/2015 3:57 PM
185	<p>I submitted several comments to a wrong section in the survey because I thought it as the only opportunity to do so. Please read those comments.</p>	5/26/2015 1:05 PM
186	<p>Thank you for changing the the proposal to include an acceptable replacement for the 68. I was deeply dismayed at some of the previous proposals.</p>	5/26/2015 12:51 PM
187	<p>I don't know why you would kill this route. I think you probably think that with the light rail, this route becomes unnecessary. The whole top of the hill is now cut off from the U District. Why?</p>	5/26/2015 12:06 PM
188	<p>373 is not a reliable route. It is regularly late and one cannot depend upon it.</p>	5/26/2015 11:33 AM
189	<p>Please keep 242 route</p>	5/26/2015 11:19 AM
190	<p>We need to retain 43 or find a better substitute, because it leaves two gaps: downtown service from Montlake, and service to UW and northbound LINK from upper Capitol Hill (Group Health, 15th Ave and John/Thomas corridors). One way to fill this need might be to extend the revised 10 or 12 to terminate at the Montlake Triangle or Montlake Lid.</p>	5/26/2015 11:17 AM
191	<p>The proposed deletion of the stop at 35th and Wallingford is absolutely ridiculous. This is the only stop in this neighborhood and tons of people utilize this stop daily to commute to and from work (in South Lake Union and downtown). Deleting this stop is unacceptable.</p>	5/26/2015 10:40 AM

192	The proposed changes for route 26 would severely and negatively impact the commute of many people. The revision I am concerned about is the deletion of the route down Wallingford Ave/35th, for which Metro has proposed using routes 31 and 32 as alternates. These routes do not service downtown and are not an acceptable replacement for the morning/evening commute. Additionally, I notice two very large buildings being built by AMLI residential close to my cross street (Meridian and 34th). When these buildings go up and are rented by likely hundreds of people, there will be greatly increased demand for bus service in the Gas Works/South Wallingford area, which will not be sufficiently met by the proposed modified routes. From my experience the 26 bus is already quite heavily used, and this must be Metro's observation as well as it dedicates a double-length bus to the route. With current and projected usage levels, if anything Metro should probably be considering adding routes through this area, not removing them. Please reconsider the proposed changes to route 26.	5/26/2015 10:38 AM
193	Please keep 11 as-is. At the very least, don't take away the 2+ block access of 11 at Pine and Broadway to the Capitol Hill Station. Please keep 12 on Madison and 11 on Pine/Pike corridor. Make the big changes to these routes after Madison BRT becomes a reality.	5/26/2015 10:10 AM
194	The bus stop at 35th and Wallingford Ave is use frequently by hundreds of individuals working downtown and in south lake union. This includes elderly passengers. This is the ONLY stop in this area to downtown and it would prevent a lot of people from being able to get to work and may reduce ridership. The proposed deletion of the 35th and Wallingford Ave stop is unacceptable and should be revised.	5/26/2015 9:53 AM
195	You should not discontinue this route. This is the best route for those of us who work at Sand Point. The 586 left us off at 45th & University. Your are just causing more stress for those of us who already leave very early from Tacoma to the U District to get a connection to Sand Point.	5/26/2015 8:01 AM
196	The through-route of the 48 and 67 was a major benefit in the first proposal. It should be put back because the 48 will be reduced to a "local shadow" between two light rail stations without some form of destination besides Mount Baker and University stations. Service to Roosevelt should be continued until Roosevelt Station is online. Routes 11 and 43 provide service from 23rd to Pike/Pine. This should be preserved because a complete loss of service from western CD to this busy commercial and nightlife area is a major loss.	5/26/2015 2:48 AM
197	Overall, I think the proposed changes to routes 11 and 48 sound great. I commute from Madison Park to the University of Washington by means of these two routes combined (transferring at 23rd Ave) and would really appreciate the increased frequency of these two routes. The only comment I have to add is that it would be even better if the timing of the 11 and the 48 could be coordinated to avoid long delays when transferring from one to the other. The increased frequency alone should help with this issue, but perhaps more explicit consideration of the relative timing of the pickups and dropoffs near 23rd and Madison would also help. Either way, I look forward to the increased frequency of these routes. Thanks!	5/25/2015 10:51 PM
198	Improved service frequency in the reverse peak direction is badly needed to relieve crowding between UWB and Seattle.	5/25/2015 10:50 PM
199	I disagree with the cancellation of the 25. There are no other routes going through the Montlake neighborhood west of 24th Ave. If there were more frequent trips for the route during the morning commute hours traveling downtown and more on-time and frequent trips during the evening towards Laurelhurst, there would be higher ridership.	5/25/2015 10:23 PM
200	Concerning Route 16: By routing it out of the Northgate area, the NE Seattle neighborhoods further north are more cut off. It might be easier for residents of the NE neighborhoods further south to travel east-west, those further north would be more isolated from the west side of I-5. People in these neighborhoods will have to travel to the University district to transfer to a route that heads to the Wallingford, Fremont, Ballard area. This is especially worrisome considering proposed changes to the weekend schedule of route 73 which would make it all but impossible to do so on the weekends. Concerning Route 73: Without any weekend service, residents of the Jackson Park, Pinehurst, and (to a lesser extent) Maple Leaf neighborhoods will be practically unserved by Metro routes on the weekends when they are more likely to want to go to the University District, Wallingford, Fremont, Ballard, or Downtown for shopping and recreational activities. A reduction of frequency or shorter operating hours on the weekends for route 73 would be perfectly reasonable, but the elimination of weekend service seems like an oversight.	5/25/2015 9:35 PM
201	The proposed change replaces direct service between west Wallingford and Green Lake/North Seattle College on rte. 16 with less frequent service and less direct routing, which will require either a long walk or a bus transfer on the notoriously unreliable rte 44. While frequency on rte. 16 is increased, the proposed change moves it to a slower, less reliable route to downtown Seattle. The revised rte. 26/26X will use the faster route to downtown via Aurora, but will operate less often and will also require either a long walk or a bus transfer. And why are connections to the Roosevelt Link stations being created in 2016, when the station won't open until 2021?	5/25/2015 7:51 PM

202	The proposed changes replace direct service between west Wallingford and Green Lake/North Seattle College on rte. 16 with less frequent service and less direct routing, which will require either a long walk or a bus transfer on the notoriously unreliable rte 44. While frequency on rte. 16 is increased, the proposed change moves it to a slower, less reliable route to downtown Seattle. The revised rte. 26/26X will use the faster route to downtown via Aurora, but will operate less often and will also require either a long walk or a bus transfer. And why are connections to the Roosevelt Link stations being created in 2016, when the station won't open until 2021?	5/25/2015 1:49 PM
203	Having the 11 as access to Capitol Hill from Pike downtown is very useful, both because the 10 is often crowded, and because it goes further up the hill after 15th, where the 10 turns north. Please don't change this.	5/25/2015 12:25 PM
204	I would like to see a express/semi-express route from Auburn/Kent, that arrives at Swedish Medical Center Issaquah by 0640 am M-F if possible. And would return leaving Issaquah between 1945 and 2000 returning to Auburn/kent area. My current commute is 1 hour each way and it is very difficult week days after such long shifts. Thank you for your consideration.	5/25/2015 9:32 AM
205	changing the 540 to go on 405, and to not serve the south kirkland park and ride seems like a bad idea. 405 traffic in the afternoons is already awful, and these changes would just make this route take longer. The 255 is always packed, causing people just needing to get to the s kirkland p&r to get on the 540 or wait sometimes 30 minutes at peak times just to get there. eliminating this option will impact people who take the 540 and the 255 negatively.	5/25/2015 9:22 AM
206	thank you for having these routes and for having them run til fairly late between UW and the bryant/sandpoint areas.	5/24/2015 5:25 PM
207	Removing the #43 bus will negatively impact the community. Getting to downtown will now require transfers or a 7 block walk up a steep hill to an uncovered bus stop, not the most ideal situation in during our wet winters. Transfers are unreliable and greatly increase the amount of time to get anywhere. The #43 is the bus I and most of my neighbors use to get around the city.	5/24/2015 12:40 PM
208	See my earlier comment on Capitol Hill changes. Relates exclusively to route 11.	5/23/2015 10:45 PM
209	Leave Route 48 as it is now. Right now I can get to my medical providers using 1 bus and going from the Greenwood area to Capitol Hill. If you split the 48, I'll need 2 buses at which point, I'll probably drive.	5/23/2015 2:12 PM
210	Route 11: I'm happy about the increased frequency, but disappointed in the rerouting down Madison Ave, leaving no direct route from Madison Valley to Pike/Pine downtown. One proposal would be to have the buses alternate routes, so one goes on the old route, one on the new, etc. Route 8: Please route closer to Washington Middle School at 2101 S Jackson St. You have 11-year-old kids on the bus in the mornings and afternoons!	5/23/2015 12:03 PM
211	I am glad Route 11 is proposed to be more frequent, but disappointed in the route change to go down Madison, and not remain going downtown to Pike/Pine. One suggestion would be to have the buses alternate routes--one down Madison, one down Pike/Pine, etc. (Perhaps the buses should have separate numbers for clarity.)	5/23/2015 11:54 AM
212	I think the RT 277 and RT540 should not be changed from the way they are running now. However the buses should run more then they do now. At least you should have the 540 run all day just like the RT271 does. Metro and ST. make it very hard for those of us who live in Kirkland and Redmond to get home in the middle of the day. To get to Doctor's appointments one has to add on at least 1 hour if not more for travel time to get to the appointments of time. WE need our buses on the eastside to be able to get to work without having change to 2 or 3 buses everyday.	5/23/2015 9:29 AM
213	I insist that bus engine and brake sound reduction/mitigation measures be taken on Route #16 buses. I am disheartened to read Kevin Desmond's 12/12/14 response letter to Mr. & Mrs. Martin and others which failed to address sound related concerns. While I want to encourage more bus and transit options for Seattle, it should not come without reasonable sound mitigation efforts. Additionally, night time #16 buses should be smaller and quieter; never have I seen a #16 bus past 8PM with more than 1/4 capacity of riders. My wife and I moved within the last 2 years to the corner of Woodlawn Ave. N, and 65th street. We love the neighborhood, but have contemplated moving primarily because of noise from metro buses and trucks, which peak well over 90 decibels over 25 feet from our corner where buses start and stop at a stop light in both the north and southbound directions. Thankfully, trucks rarely travel by our house in the evening/late night hours. Metro buses, however, routinely shake our house well into the late evening hours. We have spent >\$10,000 on sound proofing and fencing materials in the last 2 years alone, primarily to mitigate sound from metro bus and truck traffic in our yard and inside our house and still plan more. While I use the #16 bus daily to get to work, I would gladly travel >0.5 miles, such as to Aurora/Route 99 to take the E line bus, in order to shift the #16 away from our residential intersection. Had we known about the metro and truck traffic noise we would experience living on our corner, we would not have purchased our home.	5/23/2015 7:23 AM
214	I have already given my input above.	5/22/2015 11:49 PM

215	The 8 should not be split into two routes, nor should the 48. This turns "one-bus" trips into multiple bus/transfer trips which can be inconvenient, unsafe and more expensive. The 11 should continue to serve the Pike/Pine corridor. Why make such a short trip into a two bus trip, for those who cannot walk from Madison over to Pike/Pine, or who prefer not to for safety and/or convenience. The 43, 44, 43/44 are a necessary connector for the Central District to Ballard/Wallingford, without having to transfer, or go downtown. Which is stressful and often dangerous. All of these revisions seem to hinge on the idea of getting people to transfer to the light rail. Make inter-agency transfers so that you aren't forcing people to pay twice for a trip that would have cost them one price in the past.	5/22/2015 6:39 PM
216	65 provides a good service for short trip riders	5/22/2015 5:32 PM
217	I already mentioned that I'm not sure why the 66 is being removed from Roosevelt/Eastlake. I understand the 70 will cover some of that area, but the current 66 route is heavily used and relied upon. I think it should stay the same as it is currently.	5/22/2015 5:14 PM
218	Please don't change 48 route on 15th avenue NE. Or the split of current route 48 is acceptable only if new proposed route 45 is on 15th Avenue NE.	5/22/2015 3:12 PM
219	The bus system is still vestigial; it reflects a radial trolley system from early 20th C and this layout has led development and people's expectations, so to some degree it must remain. But there is, in my experience and in listening to others, much more need than you realize for an orthogonal system that includes N-S and E-W shuttles that avoid the central I-5 corridor and UW/Downtown tropisms. . You continue to increase distance between downtown stops, making them less accessible for people with disabilities. You put greater distance between routes and don't overlap those that are close parallel alternatives so that riders can't take advantage of both routes. I would ask for more systemic thinking and rider-centric approaches to scheduling. . I have kept a record of the daily slights and insults i suffer from Metro and its drivers -- being driven by while standing next to the stop post, runs that simply never arrive, occasionally busses arriving before the prior time point schedule, and the intense rudeness of some drivers. I have complained about some of those and never got any response. But i don't want apologies, i want better thinking and action. I used to brag about Metro when traveling; now i apologize to visitors. . Since Metro, Sound Transit and Pierce and Community Transit are public utilities, i expect better cooperation among them. I expect ORCA to be totally integrated with them and i object to how hard it is to get access to ORCA if you don't use the downtown tunnel daily. [Only one ORCA machine in ALL of North Seattle!!! What is that about? -- and the computer still will not recognize my ORCA card so i can't refill it online]. I expect Metro staff and officials to ride Metro regularly so they are aware of how the system works and doesn't.	5/22/2015 3:08 PM
220	I live in Eastlake and use the 70/71/72/73 buses to get to and from my early morning job as a resident physician at Harborview and the University of Washington Medical Centers. I have two concerns: First, there is conflicting information on the King County Metro website regarding the routing of Route 70. The specific "proposed changes by route" lists no route change for Route 70. However, the "interactive map" shows Route 70 as having a northern terminus at the University of Washington Medical Center/future Link station. This obviously needs to be clarified and I would definitely prefer that Route 70 terminate at the new Link station as this would afford a "one seat ride" for Eastlake residents to the UWMC and light rail. Second, I currently go to work very early and catch the early morning 5 am 71/72/73 routes to downtown or UW. I see that these routes will no longer serve Eastlake, but that improved frequency and operating hours of Route 70 will make up for this. However, the current proposals show that Route 70 will begin running at 6 am, a full 1 hour later than current service. This will make it impossible for me and other early morning commuters to take transit to work. Please consider starting Route 70 at 5 am rather than 6 am. Even if the early morning frequency is only every 20 or 30 minutes rather than the current 15 minute headway that would at least keep the option of transit open for such commuters. Finally, if it is really not possible to run the Route 70 at 5 am, please consider an extra Night Owl 83 route at approximately 5 am. Thank you.	5/22/2015 2:58 PM
221	I like the idea of this route not turning on to University Avenue, but staying on 15th.	5/22/2015 2:45 PM
222	Please keep 25 or provide good link from Eastlake/Portage Bay to U Village. Today only the 25 provides this important link and with reduced schedule and no direct link, traffic to U Village is dramatically worse.	5/22/2015 12:34 PM
223	Folks along this route have a long-standing orientation to the University District. They ride at all times of the day and night (though, of course, like other riders, use is lower at night - but not bad). The total disconnection from the U District (other than the extreme LOWER end, and drastic elimination of evening and weekend service north of 65th, is traumatic and will force more use of cars. With only hourly 941 frequency, timely operation would be essential, but DART operation would eliminate that.	5/22/2015 11:45 AM
224	I like the fact that I can get from my home in Jackson Park to downtown Seattle without changing busses. The proposal does not seem to address evening or weekend transport. I would use the transit in the evenings and weekends to avoid downtown parking but this seems to not be a consideration. Why should I pay for expanding transit to the suburbs and trendy Seattle neighborhoods if my service is only going to be reduced? If you are going to implement these changes, then you should explain what the alternatives are for the services you are eliminating.	5/22/2015 9:10 AM

225	I am extremely upset about the proposed deletion of route 242. This is the only bus route that goes directly from the Green Lake transit center and Redmond to service Nintendo and Microsoft. This is a very busy route and is often standing room only in the evenings. It also services disabled riders who pick it up between Northgate P&R and Green Lake. Metro suggests taking the 542 or going downtown to transfer. That would take 90 minutes each way to go 13 miles! I suggest someone who keeps putting this bus on the chopping block try that commute 5 days a week. Every time Metro goes out and ask for funds from voters, I vote for it. If this bus route is deleted, I will not only vote against any future fund increases, but I will ask my friends and family to do the same. Metro received more funds in the last vote and still this route is on the chopping block. Where did the extra funds go? Thank you for allowing riders to express their opinions.	5/22/2015 8:43 AM
226	Don't disappear it. We live in a low income neighborhood and we ride this route. The 372 doesn't have the same stops, and old people, disable, or with kids would find very hard to walk. People come to the food bank with heavy bags will have to walk more to catch the bus. This route would take us to my son's new Elementary school in Wallingford without transfers. The residents of Lake City need this route. We already have to walk a lot to catch the 72, the 372 is farther. Thank you for considering. Please think in the low income residents, that don't have a car.	5/22/2015 12:33 AM
227	More night/weekend frequency on the 8 is vital to increasing ridership in this area.	5/21/2015 10:02 PM
228	372 is currently overloaded, so more "runs" on this service should improve rider satisfaction.	5/21/2015 9:46 PM
229	I am strongly concerned about the elimination of Route 43, which will sever the connection between downtown and Capitol Hill and the Montlake area. It will now become necessary to take two buses to travel from Montlake to downtown, or a bus plus light rail (at Husky Stadium). This appears to be a considerable increase in inconvenience in this travel corridor, especially if light rail fares are higher than bus fares (though I presently have no information to this effect).	5/21/2015 8:46 PM
230	The Rainier Valley needs more frequent East-West Routes between Rainier Ave. S. & Link Light Rail on MLK, so that they can take advantage of the new Capitol Hill and University Link Light Rail stations. I need more frequent service on Route 50 between Seward Park Ave. S., Rainier Ave. S., & Link Light Rail on MLK, so that I can stop driving to work at the University. Route 50 running twice an hour is not acceptable. I won't use Metro & Link Light Rail (or Metro alone) for my daily commute if I have to transfer more than once and if it takes more than 50 minutes to get from Rainier & Othello to the University of Washington. In addition, I'll still have a 10-minute walk to work from any bus stop in the U-district, or from University Station. It shouldn't take more than 1 hour to get from point A to point B in Seattle, unless you are going from the north city limits to the south city limits. (It takes less than time than that to get to Bellevue!)	5/21/2015 8:03 PM
231	Based on proposal, #71 will be eliminated. It will require residents to transfer buses at University to downtown. It will give many residents along 65th street hardship to go to downtown. #71 is always full with commuters, and we need to keep #71; not eliminated. There are many elderly people lives in that area, who uses bus daily as their transportation. 65th street has many steep hills, and we depends on the bus to carry ourselves as well as grocery bags etc. Please reconsider the elimination of route 71. If you live there like myself, you will know why we need #71. Sincerely, Resident at 75th & 35th.	5/21/2015 4:40 PM
232	Maintain the current routes for 28 local and 28 express. The proposed route for the express would additional commute time to already lengthy commute. 28 local route to access the Dexter corridor is desirable and in demand from the Crown Hill, Balkard, Greenwood, Phinlard neighborhoods. Transfers to another bus not practical andceould add to commute time.	5/21/2015 4:38 PM
233	Stop trying to kill it. It's efficient, it's effective, it's full every day, every bus that I'm on. Your proposed changes do NOTHING that is remotely like the benefits and convenience of the 242. You're going to put a couple hundred people back in their cars.	5/21/2015 3:55 PM
234	Please reconsider canceling the east run of the 372 or work with UW Bothell campus to offer a park and ride option. For those of us who need a park and ride to commute, starting the route at UW Bothell as is will not work. Kenmore is too far to travel to park and ride if you live in north Bothell. The amount of time it would take to drive there and then take the bus would be better spent just driving to work. With a young child in day care, I need a one bus run in the event I need to leave quickly to pick up a sick child.	5/21/2015 3:48 PM
235	DON'T CUT THIS ROUTE!	5/21/2015 3:31 PM
236	For reasons articulated earlier in this survey, eliminating the 30 is ridiculous. Commuting between Sand Point and the University of Washington should be a simple and economical matter. Reducing the connection to the 74 (already jam packed/standing room only most of the time) and the 75 (which takes me nowhere near where I work on campus) is absolute lunacy.	5/21/2015 3:14 PM
237	Already mentioned that removing this service is 15-20 years too soon. The 43 goes past the UW Stadium and would be obsolete only when the U District light rail station has been opened.	5/21/2015 1:40 PM

238	Having a way to get into the downtown retail core without requiring that we transfer buses is very important.	5/21/2015 12:59 PM
239	I love this bus. I live in northgate and work in South Lake Union. I hop on at Northgate P&R and have a 15 minute bus ride instead of 25-30 minute slog to Convention Center. I walk 15 minutes to work from there. Please keep or improve routing from Northgate to SLU.	5/21/2015 11:23 AM
240	See my earlier comments regarding these routes.	5/21/2015 10:43 AM
241	Wish we could have #10 bus past WESTLAKE to SEATTLE ART MUSEUM et al so didn't have to walk through evil BLADE DRUG CORRIDOR (especially in bad weather.) PLEASE!	5/21/2015 9:43 AM
242	As noted, the 67 and 68 no longer going on campus adds at least 10 minutes to my commute. Even though the 75 does still go on campus, it takes at least 10 minutes longer. Thus, I can walk further or ride the bus longer. On that note, the changes are definitely less convenient for me.	5/21/2015 9:42 AM
243	Cancelling this route makes sense when light rail is running up I5. Until then, this is a very useful bus that I ride every day. There is no other convenient connection from Shoreline to Redmond	5/21/2015 9:14 AM
244	It	5/21/2015 9:12 AM
245	I work on first hill, there is not a bus that will bring me directly to first hill from Sammamish, Issaquah, we did have a bus that brought us up to first hill, that was cut, now it takes 2 buses to get up here or get home, we are where the major hospitals are. You should make it easier for the eastside, have you tried walking up the hills to get to work when it's raining or walking down the hills in the rain without slipping and falling. Because of this you have to carry multiple items to and from work for walking and such depending on the weather. The buses are always late, when sitting in the tunnel, on hot days the buses do not have the A/C on which makes the bus stifling. I don't mind walking, when it's nice weather it actually faster for me to walk down the hill to catch the bus, than standing around waiting for a bus to be late, than not catch the connecting bus.	5/21/2015 7:44 AM
246	The current Route 28 is a great, well-used local route. Many of us who work in Fremont have specifically chosen housing close to that route so that we can have an easy, car-free commute. Now Metro is proposing to make all trips on this route go downtown in the name of efficiency. However the new route will be slower for those who currently take the 28X downtown (since it will be going quite a bit farther south before starting an express routing on Aurora), and it will be slower for those who take the current 28 local to Fremont (because riders will need to walk from 39th to the major Fremont office areas). This doesn't sound very efficient to me.	5/20/2015 11:52 PM
247	I take the #71 to and from View Ridge and walk to work in Magnuson park. I am ok with this route deletion because I believe the changes to other routes will make up for it. However, I have seen signs posted at bus stops in View Ridge along this route alerting people that the #71 will be deleted and that they should contact Metro if it will affect them. These signs are in the new #941 DART area. However, the signs don't say anything about the #16 service that is nearby nor the #941 DART service. It might be worth it for Metro to reach out to residents in this area to let them know about these services that will be more frequent than the current #71 and possibly more convenient. I am especially happy about the split #48. I used to take it to work at the university from Beacon Hill but it was so frequently late that I switched to a Link-#71,72,73 route because even though the published timing for my link route was longer than the published time for the #48, the average and max time for the #48 made it unworkable for me. I may start taking the #48 to see if it is better. Thanks for coming up with great solutions to these tough problems.	5/20/2015 11:17 PM
248	Please continue to route the 28 through Fremont. The area is a growing place for businesses to have their offices. My husband works at Google and takes the bus there every day. Making it more inconvenient for him to reach the center of Fremont would not aid our family, and we really would like to continue to only have one car. Not everyone commutes downtown, and bus line is used by many to reach Fremont without transfers. We chose our house along the 28 route expressly because we wanted a route to Fremont without transfers.	5/20/2015 10:04 PM
249	Please see my note to the previous question.	5/20/2015 9:56 PM
250	See previous comments on effects of the proposal on Viewridge residents	5/20/2015 9:25 PM
251	Please don't eliminate route 43!	5/20/2015 9:08 PM
252	Who decided where to route this? Instead of picking up dozens every half hour who would ride the 74 to Capitol Hill and beyond, you route it where no one goes downtown????	5/20/2015 8:36 PM

253	Please do not take away the direct South Kirkland park & ride to UW bus!! The proposed plans include relocating the 540 to Houghton park and ride, but there are many many students as well as older adults that rely on the 540 to get to UW in a timely and reliable manner!! There are 3 UW students in my neighborhood alone that rely on this 540 from the south Kirkland park and ride. I know many students that also drive to south Kirkland park and ride as well to get to school. If the king county and sound transit are very insistent on relocating it, can you guys please put an alternative route that links south Kirkland park and ride and UW? Thank you very much!! Please take this into consideration in deciding the 540!	5/20/2015 8:15 PM
254	The proposed changes include taking a direct bus from South Kirkland park & ride to UW away. This would impact a lot of UW students that take the bus from south Kirkland park and ride to school. In my neighborhood alone there are at least 3 students that really need this bus! There are many young adults and 30-50 year old people that take this bus in the morning to get to work or to school. Please do not relocate the 540 to Houghton park and ride, or at least provide an alternative direct route.	5/20/2015 8:10 PM
255	Love the proposal of higher frequency at peak times, all day and weekends. Busses get very crowded During peak times.	5/20/2015 6:47 PM
256	I think changing the 32 from Stone Way to Wallingford Ave doesn't make a lot of sense. Stone Way is a much larger street to accommodate the frequency of the 32 buses. When I drive my small car on Wallingford Ave I have to be very cautious that there aren't cars coming out of the cross-streets. It's a narrow street with limited visibility.	5/20/2015 6:20 PM
257	The north part of the current route 48 needs to have increased frequency and/or the 48X should be reinstated. The busses are completely packed (sardine-style) every day.	5/20/2015 6:04 PM
258	Please ADD more busses and/or a new north Ballard/ crown hill route into downtown! We have only one bus route And you are proposing changes?? MORE people live up here in crown hill that care about our environment and WANT to use the bus but we have NO options?!!! Please do not change or cut the only route we have. If you want to get cars off the road, start working with the people who are willing to give them up to commute into downtown if there are busses to do so.	5/20/2015 6:02 PM
259	Please keep it and increase its frequency	5/20/2015 5:06 PM
260	I am an older person. I use the #11 bus from Madison Park as many do, to shop or for other activities downtown. Your proposed changes will take away my independence. Regarding the new route, why not take a loop from Madison and have the bus turn right on to 4th to Pine, left on Pine and left on 3rd or 2nd back to Madison to complete the new route. The new route means more cars and need for parking in downtown Seattle. Thank you.	5/20/2015 4:29 PM
261	PLEASE KEEP THE 43! I live on 17th Ave E, one house in from E. Thomas. The 43 bus route is about five steps from my front door. I take this route to go downtown, my daughter takes it to visit her friends in Montlake, and I take it to commute to the main campus of UW. We take the 43 to Broadway, to downtown for work and for entertainment. While on the bus, I see older people and people with small children who are going to Group Health Hospital, or to the library in Montlake. I see high school kids commuting, I see people going to UW or to SCCC. In the evenings, I see students from UW heading to Capitol Hill for night life. And--with the 43, all this can be accomplished on one bus. No transfers, no waiting in the dark, in the rain. No need to walk up or down a steep hill (15th E to Broadway and 15th E to 23 E are VERY steep hills). No need to walk or wait by unsafe areas at night, no need to cross busy streets. PLEASE SAVE THE 43! I want to take one bus, not take the 8 to the 48 to the blank to the bleep to the whatever to get where I need to go. 43 = ONE BUS! In general, what concerns me about cutting the 43 for this part of Capitol Hill are: -access to stops near Group Health, 15th Ave E, 19th - 23rd/Bway bus transfers means a long walk on a significant grade, or having to take several buses -no benefit of time savings -when I head to the University District, it is always beyond where the light rail stop is--I don't want to have to take a bus to light rail, to walk to another bus to get where I want to go--when I now can take ONE BUS. Please don't cut off this part of Capitol Hill/Montlake from single-mode transit options. If there were more light rail stops in between Broadway and Husky Stadium, I could see the rationale for reducing/eliminating buses, but connecting those two points does provide enough service for the needs of this part of Capitol Hill--15th Ave E and 19th Ave E are growing in density--please don't make us all schlep down to Broadway or up to 23rd Ave E to take public transportation to the U District. Thank you, Connie Chaplan	5/20/2015 4:09 PM
262	I need to take route 242 from Montlake freeway station to northgate on a daily basis. Deleting this route greatly inconveniences my schedule since I do not see a proposed alternative. In order to instead catch the 555 which runs a similar route I must leave work early and I do not think my supervisor will approve.	5/20/2015 3:49 PM
263	I do not accept the changes. There is no info given on how the commute will change with added stops. And the 28X will be significantly slower during peak time when it is using busy, smaller arterials rather than taking 99 for as long as possible.	5/20/2015 3:27 PM
264	Why does the 48 sometimes terminate its service at UWMC? Many passengers get off at the next stop on Montlake Bridge, which the bus goes directly past after terminating.	5/20/2015 2:41 PM

265	Route 16 is a great idea! This is my favorite part of the new proposal. It would personally be useful to me if this route ran through Greenwood as well, but this is a vast improvement from the current status quo of horrible east-west service. The north part of route 48 (proposed route 45) should be through-routed to Bellevue, like in option 1 before. This would be much better than the current proposal. Current bus service between Greenwood and the eastside of the lake is nonexistent. Reliability could be sacrificed for better connections. Route 75 should be just as frequent on Sunday as all of the other days, considering all the recreational users of this route since it goes by Northgate mall and U Village (major Sunday shopping destinations) and Magnusen and Matthews Beach parks.	5/20/2015 2:17 PM
266	Every morning when Garfield High School is in session the bus is WAY overcrowded. Often the bus is full around 23rd Ave E and E Galer Street. No other passengers can be fit onto the bus. This happens EVERY SINGLE DAY. Please, please add more buses between UW Hospital and Garfield HS during the peak morning times 7:20-8:10. This has been a problem for the past 14 years I have been riding this route in the mornings.	5/20/2015 1:34 PM
267	In addition to my detailed comments earlier in the survey, I'd like to add that Route 72 is the only connection between the University District and Lake City. I urge you to include this route in some form in your service plans. Without this route, an entire section of northeast Seattle will not be served at all.	5/20/2015 1:10 PM
268	Thank you for maintaining peak hour service to Broadview. Please add a stop on Aurora at Galer, or move the stop from Prospect to Galer if the Mercer stop isn't coming back.	5/20/2015 1:04 PM
269	See comment on question 15. The south side of Capitol Hill north of the Pike-Pine corridor needs continued ONE BUS service to UW.	5/20/2015 12:39 PM
270	Discontinuing the 73 on weekends without putting the 373 on weekends as well leaves travellers in the north end stuck if they want to get downtown on the weekend. People don't just work M-F. It would also be nice to have just one more 373 in the evenings, at 7.30 or so, so that people coming home late from campus don't have to walk/transfer in the dark.	5/20/2015 12:12 PM
271	It looks like eliminating the 43 would mean going from central capitol hill to the university district would require 2 buses, and in that case, I wouldn't take the bus anymore.	5/20/2015 12:10 PM
272	Please do not combine 28 and 28X. I rely on the 28X to commute downtown. If there are additional stops on this route, my daily commute times will increase substantially. I specifically avoid the 28 for this reason.	5/20/2015 11:38 AM
273	Happy to see that the 44 will have increased number of routes. Currently the morning (7:30-8:30am) and evening (5-6pm) commutes from the U-District to Ballard are increasingly crowded and slow. Currently the demand is so high, due to new housing developments in Ballard, the bus is already full by 15th Ave in Ballard. I often take the 45th and Roosevelt stop home to Ballard (via 44) and is not unusual for me to wait for a 2nd bus as there is no room to accommodate passengers. Bus drivers should require passengers to pack in tighter, as often time there is space, however, it is not enforced by the conductor. The 40 is unreliable and could benefit from increased frequency to downtown and SLU. This route is increasingly crowded/ late in particular as other routes have been cut in Ballard, such as the 61 and the 17 only runs during peak hours.	5/20/2015 11:38 AM
274	I would like to know their frequency and their route (or where specifically it will be stopping - a map of the routes), so I can plan accordingly. Thank you! :)	5/20/2015 11:36 AM
275	What I said before - keep the number of runs but increase consistency and correct arrival/departure times.	5/20/2015 11:23 AM
276	Rerouting these routes will make it harder for anyone to travel to or from North Seattle Community College. This is a commuter school, so this will have a negative impact on these students.	5/20/2015 10:29 AM
277	These buses are too crowded and at peak times, especially on Fridays, I am waiting for 2 or 3 buses before there is one with even standing room. Please make them more frequent. I am worried that eliminating the 71 and 72 will make this problem worse. A shuttle service that goes from the U-link station to various points on campus would be a wonderful addition!!!!	5/20/2015 10:10 AM
278	Please do not combine the 28X and 28 lines and remove the route going down 99. This route makes the commute downtown much quicker. Adding a couple extra buses in the morning won't mean anything if the route takes 15+ minutes longer.	5/20/2015 9:56 AM
279	I live on 16th and Pine and use this route everyday to commute to UWMC. It is easily the most accessible route for me and has been a very reliable form of transportation. I am concerned that cutting out this route would make it very difficult for people who live in my area of Capitol Hill to commute to either Downtown or the U District. Every time I take the 43 it is almost full. It is a highly used bus route and acts as a vital link between several different neighborhoods (downtown, capitol hill, montlake, and u district).	5/20/2015 9:53 AM

280	See prior section's notes. PLEASE do not eliminate the #12 existing route that stops on Marion and 1st Avenue. Many ferry commuters, shoppers, and people needing to get up to the hospital complexes at the top of the hill are dependent on this bus to get us up the hill and allow us to walk on the ferry and use public transportation in Seattle. This is a vital and important link for us. Please make it a priority. Thanks.	5/20/2015 9:32 AM
281	Please continue the current level of service or better between the core U District and the Downtown transit tunnel during peak hours.	5/20/2015 9:15 AM
282	I would like to see a bus that picks folks up at Southcenter and takes them directly down I-5 to the University of Washington.	5/20/2015 8:49 AM
283	Please keep Route 30 from U-District to NOAA campus in Sand Point.	5/20/2015 8:21 AM
284	See previous comments. Please do NOT run this route every 7 minutes. That is far too often for the capacity of the streets and the neighborhood feel of the area.	5/20/2015 8:08 AM
285	Please provide more frequent service on bus 197 to Federal Way Transit Center especially after 6pm and weekend. I'd rather take bus 197 to U district in the weekend than drive.	5/20/2015 8:06 AM
286	The 8 needs more frequency especially nights and weekends. 30 minute headways is not acceptable before 10pm on any day of the week or weekend.	5/20/2015 12:31 AM
287	I would like the 65 route to be as existing, since it seems to be one way in u district in the proposed change. It will be difficult for students in campus to go a round trip. It will be great if we get 65 going the other way through stevens way.	5/19/2015 11:10 PM
288	Route 65 must go through Stevens Way in both directions for ease of University students. The current proposal necessitates longer walk times for students in certain departments when boarding towards Wedgwood.	5/19/2015 11:06 PM
289	It's not just a matter of having east-west connections, but of having them where they're needed. Current and proposed east-west connectors run north and south of where the 30 goes, but I didn't see any proposals that would be able to get me from Sand Point to the Ave or vice versa. The slope and hills are too much to bike or walk over, so bus service is really important for this specific area.	5/19/2015 10:07 PM
290	Please see my earlier notes about eliminating the 43 along E. John as a direct route to downtown and rerouting the 11 down Madison to Marion instead of Pine. If I am understanding these changes correctly (your interactive map was not helpful) direct downtown service from the 23rd Ave area (John and Madison) would be eliminated meaning seniors and limited mobility riders would have an additional transfer rather than direct ride.	5/19/2015 9:47 PM
291	I cannot figure out why a stop at the stadium helps folks that need to go to the U District? I never stop at the stadium, but go 45th and 15th to the heart of the U District. Is it principally for sports fans???. Do you have to walk from there to get to 45th? Maybe I am missing some essential point to this connection????	5/19/2015 9:35 PM
292	I'm sorry to see the # 43 go, but I guess it is okay if there are more #48 and #8 buses. I'm a bit sorry that #11 is going to go to Madison and not get up to Pike/Pine, since the other nearby bus for me to get downtown (the #2) also heads toward the southern part of downtown first, but I can accept the change since there will be more frequent service. Thank you for not changing the east-west part of the number 8 route! I would have been really inconvenienced in getting to Seattle Center if the original proposal had gone through. The currently proposed divisions of the #8 and #48 make sense.	5/19/2015 9:24 PM
293	Thank you for keeping seattle direct service	5/19/2015 9:09 PM
294	Moving both the 31 and 32 off Stone Way to Wallingford Ave cuts off several neighborhoods bus access to UW. I understand that something may need to go down Wallingford Ave. Would it be possible for one to follow the new route down Wallingford Ave to 35th and the other remain on the currant route staying on 40th ave to Stone Way then going down Stone to 45th? That way both neighborhoods have access to the University and if someone is trying to get to Magnolia or Queen they can still switch busses if necessary at one of the overlapping stops on 35th ave.	5/19/2015 7:49 PM

295	I see that there is a proposal to delete the route 71. I think this is a terrible idea, and would probably result in my finding a new neighborhood to live. I live near 65th Ave NE & NE 35th Ave. The connection to downtown via route 71 is very key in making this area a reasonable one in which to rent. I see that in place of route 71, the recommendation appears to be: 1. Take the route 16. I used to occasionally take this route from work downtown to Wallingford or Green Lake. It stops everywhere, and is fairly unbearably slow even to those neighborhoods. It looks like the revised route would go past Greenlake, and across 65th. This would be an extremely indirect and long way to get home. I would guess 45 min - 1 hour during regular commute times. 2. Take the 65 to the ULink station. It would be roughly 20 min to get to the ULink Station, and then some waiting time for the train, and finally the ride downtown. Likely also 45 minutes or more. I road the bus for about 4 years as my only means of transport, and generally found that if I needed to change buses, it was almost not worthwhile taking the trip given the delays that any 2 buses might have. I think the point of the work you are doing is to improve transit for Seattle residents. The deletion of the route 71 certainly does not do that for my neighborhood.	5/19/2015 6:13 PM
296	Please revise it rather than deleting it! I don't think the proposed DART service is going to be feasible and accessible to most residents. Thanks!	5/19/2015 5:18 PM
297	The 43 route is very important to me, living about halfway between the U district light rail and the cap hill station near 24th ave east. As of now I can take either the 43 or the 25 bus to get downtown with no transfers and in a quick and efficient manner. Once the proposed changes take place it will take me THREE transfers just to get downtown. I would have to catch the 48 up to 23rd and E Thomas and transfer to the 8 up to Broadway and E John THEN I would transfer a 3rd time to the 49 or the light rail heading downtown. Nowadays I can just take the 43 or the 25 straight downtown. It really makes no sense to completely gut these routes that work so well just because of the light rail station. I ask that you reconsider keeping the routes 43 and 25. Especially the 43. I was born and raised in Seattle and have always been a fan of mass transit, busses and light rail. I don't have a car and rely on Metro to get around town. I feel like deleting and severely limiting the routes in between the light rail stations will be detrimental to our transit. Thank you for your consideration.	5/19/2015 5:17 PM
298	Please don't make change the express from heading up market st. Winding through Fremont will add to much time to this route making it almost like a local.	5/19/2015 5:02 PM
299	This is my major route, My main interest is to go to the north side of the University of Washington. The proposed route changes will not help me get there. I may have to drive further to get to a convenient bus.	5/19/2015 4:04 PM
300	Please don't change this route. see previous comments. Changing the route to go down madison is a major inconvenience for me and alot of other riders.	5/19/2015 4:03 PM
301	You should increase the frequency of the 66X and retain its current route.	5/19/2015 3:54 PM
302	The 75 is far too infrequent on the weekends. I have had to wait for 90 minutes to catch at 75 from U Village once. The 30 and 74 should run on the weekends.	5/19/2015 3:54 PM
303	It would be great if one of these would go to the university	5/19/2015 3:42 PM
304	Bus 41 is HUGELY popular. I cannot express to you all how popular this route is. I can say that I have waited several times at Westlake Station in the evening and at the Northgate Transit Center in the morning because the 41 is packed. Like sardine packed. Like Escape from Saigon packed. OMG. Please have more 41 buses. Light rail cannot come fast enough. Love,me	5/19/2015 2:47 PM
305	#8: In the previous proposal (#11 and 43 cut) I would have had to rely on this bus. I'm glad I won't have to rely on this bus because the commute time is too long during rush hour. I strongly recommend this bus goes to the Mount Baker Station rather than end in the Central District. This would give people more options for transferring buses. I'm worried that the new #38 may eventually get canceled or have reduced trip times and there will be less service to Rainier Beach. #11: I'm glad to see an increase in service time for this bus route, however, I don't like that this is the ONLY direct bus route from my area (Harrison and 24th) to downtown. I'm lucky that I can walk to this bus stop, but those after me have a longer walk time. I also don't like having to rely on this bus route because it has so many stops and stoplights. This route takes longer than the 43. #43: I strongly disagree with the deletion of route 43. This is the bus I primarily take (90% of the time) to downtown. This is the bus my entire household takes to go downtown. I don't understand how direct service to downtown for the 23rd/24th corridor will end. For some it will be 1 bus to downtown and for others it'll require a transfer. Because the distance to downtown is so short, it doesn't make sense to lengthen people's commute times by making them transfer to other buses. I also don't understand how the 12 and 10, which are 4 blocks apart, have improved service and 23rd has a significant reduction in service. This isn't fair. I rely on the bus for majority of my commutes and will consider other options for my day-to-day travel.	5/19/2015 2:36 PM
306	More frequency and weekends for those who work at Swedish on the weekends.	5/19/2015 2:25 PM

307	This route is never on time, sometimes getting to the point that it is upwards of 30 minutes late. And then two buses will come right in a row instead of staggering to adapt. How is this useful? If you are cutting routes such that the 70 is the only bus serving an area, work really needs to be done to keep it on time!	5/19/2015 2:23 PM
308	66X and 67 serve an important route through the Roosevelt neighborhood. Please ensure there is frequent service. 71, 72, 73 are important to serve the route between downtown and the U-District. These buses are typically very full especially at peak times. Please do not limit service in order to force these bus-riders onto Sound Transit trains to Husky Stadium. Husky Stadium is not the same as the U-District. We need frequent reliable service between downtown straight to the U-District, at least until the new station at Brooklyn opens in 2021.	5/19/2015 2:20 PM
309	I stopped taking the bus because it became too hard if you are not going to downtown Seattle from the suburbs. Making less transit available in the U-District for those of us who live north means that we have to find other ways to get to work - I am now driving every day. Too bad - it was cheaper to take the bus.	5/19/2015 2:03 PM
310	Route 73 needs to run on weekends to provide bus service from Jackson Park to the U District.	5/19/2015 1:57 PM
311	We need the number 19 route back, which was an express route to Magnolia. Your new plans don't improve anything for Magnolia. In fact, in the last two years bus service in that area turned horribly bad.	5/19/2015 1:40 PM
312	48 - This split into 45 and 48 is a great idea and should be implemented. 70 - I think this route could also use review--it is a long route that overlaps with other routes in places and hits terrible rush-hour traffic where estimates are sometimes double what it takes. With other North-South routes under consideration with these changes, I think route 70 should also be looked at.	5/19/2015 1:35 PM
313	I do not want to see any additional bus traffic on Route 16 And is it related specifically to Kirkwood Pl. N. St. Thank You, Jim	5/19/2015 1:23 PM
314	The D Line and 32 route shake my condo when they come up Mercer Place. Please find a way for them to drive up the road without causing so much shaking or send them a different way. The 32 route also comes too infrequently. Waiting 25-30 minutes for the next bus on top of a 45 minute commute to the UW is intolerable.	5/19/2015 1:13 PM
315	Splitting this route seems like a good idea to me, though I would only use the newly created route 45. Waiting for delays caused by needing to cross Montlake really degrades the reliability of this route. There is still the 355 for those looking to quickly get downtown from the Greenlake/Phinney Ridge area...	5/19/2015 12:58 PM
316	I would run these routes 24/7 weekdays and weekends to and from the UW medical center. I am not sure why metro stops service at midnight and starts at 6:00AM. SHIFT WORKERS need to get to work on at 6:00-6:00 AM even on weekends, some of use get off at 11:30 and need to get home on routes leaving at midnight and even after if we miss the late bus. 24/7 coverage to the UW medical center and the UW campus.	5/19/2015 12:52 PM
317	Please phase out the diesel engines on this route. The electric buses are slightly better in terms of noise and pollution.	5/19/2015 12:34 PM
318	I would love to see increased service on the 372 route. Usually the 372 buses are crowded and standing-room only during peak travel times. Having more buses on this route would probably help alleviate that. I also approve of extending the hours of the route. Sometimes I am not able to utilize this bus route because there are no buses available during certain times of day. I do not like how the proposed route will not go all the way to Woodinville, because sometimes I need to take this bus to Woodinville and will no longer have that option.	5/19/2015 12:34 PM
319	These routes are great and convenient, just outside my door. I dont want them to be changed or taken away. However, the buses need to be upgraded to the hybrid buses like every other route has. I hate the pollution and the noise of the double long buses.	5/19/2015 12:09 PM
320	Please see my previous remarks. I think your proposed changes will leave stranded a lot of riders who do NOT commute to downtown.	5/19/2015 12:08 PM
321	The full 28 route (now express, during peak times only) should run to the end of the line in north Broadview all day and on weekends.	5/19/2015 12:03 PM
322	Currently, during afternoon/evening commutes, the bus leaving UW campus is packed to capacity and leaving riders on the sidewalk. Part of this is because there could be more frequent buses, and part is because students use the commuter bus to get from campus to U Village. Many of us who commute on the 372X would appreciate a shuttle or short route from campus to U Village and back.	5/19/2015 11:56 AM

323	This is currently the bus I take the most as it is the best option for me to go from where I live on Capitol Hill to the University District. It sounds like you are interested in improving the service between Capitol Hill and the University District. Currently the service on this route is not great (on the weekends and evenings). I am hoping that service can be improved on this route. (The light rail does not go that close to where I live so it is not a good option.) Thanks.	5/19/2015 11:45 AM
324	i think that the 68 is an excellent route to remove because it can be compensated for by the 65 route change and increased 372 use. the 372 is also an excellent route to increase and will improve reliable transport to the university of washington. the addition of sunday service will also prove very helpful for myself and many other students at UW. The removal of the 71 and 72 routes will cause overcrowding and huge delays in the bus routes that the 71, 72, and 73 currently service. the 71 in particular is already overcrowded and there isn't really a route that is set to replace its route between university ave and NE 65th street.	5/19/2015 11:43 AM
325	The 16 is currently Downtown-Wallingford-Northgate, which is great, but changing the destination from Northgate to Sandpoint is bad. Traveling Wallingford to Northgate already involves a lengthy ride on the 16, but now it would involve walking out of my way to a 26 or 26X bus stop, and then going to Northgate. This is inconvenient and unhelpful. Don't change the 16 route to go to Northgate. Keep the 26 and 26X as they are.	5/19/2015 11:41 AM
326	Please maintain frequent bus routes between the western side of the University District and downtown. The improved frequency of the 70 is good but it does not include all of the university district. It is important to keep a single bus connection between the northwestern parts of the University District and downtown until the Ravenna Link station is operational.	5/19/2015 11:33 AM
327	Reliable, frequent connections to the new uw station will be critical for me	5/19/2015 11:29 AM
328	It would be nice to have direct service from West Seattle to First Hill. It is complicated and difficult to transfer in downtown and if there was a direct service, I would definitely rely on the bus solely.	5/19/2015 11:28 AM
329	I do not like the proposed 31/32 reroute. Stone way is a more major street that should have e/w bus connections to campus.	5/19/2015 11:27 AM
330	BETTER BUS SERVICE FROM GREENWOOD TO UW. ONE BUS FROM 85TH STREET (48) DOES NOT CUT IT!!	5/19/2015 11:26 AM
331	Please provide direct service from West Seattle to First Hill. Having to transfer in downtown is very difficult.	5/19/2015 11:25 AM
332	I'm disappointed that the 43 is being cut. I fear that transfers between the 8 and 48 will not work well and that getting from the top of Capitol Hill to the U District will take longer and be less reliable than it is right now. Taking the 8 from SLU to Capitol Hill during rush hour is atrocious -- extremely crowded buses, extremely late buses, and unpredictable timing. I don't think cutting the route will do enough to improve reliability of this route and I would love to see extra steps taken to make Denny more transit-friendly so the 8 doesn't sit in slow-moving traffic along with all the single-occupant cars.	5/19/2015 11:23 AM
333	I really need these routes and use at least one of them every day of the week, sometimes more than once within one day. They are very important for me to be able to commute between home, school, and work.	5/19/2015 11:22 AM
334	Do not remove this route. There needs to be a route that runs the whole length of 65th and then drops you off at the University of Washington campus. None of your proposed routes address this issue.	5/19/2015 11:13 AM
335	Moving to peak-only runs on the 66 route will result in more car traffic from the north end to South Lake Union and between the UDistrict and SLU.	5/19/2015 11:10 AM
336	The service is reliable but more frequent service is desirable for those who live in wedgwood	5/19/2015 11:07 AM
337	The 216, 218, and 219 buses are always crowded both coming into downtown, and leaving downtown. More buses need to be scheduled on these routes. People are paying fares so they should be entitled to a seat on the bus, but these buses are usually packed full and there is standing room only.	5/19/2015 11:07 AM
338	Making better use of Houghton Park and Ride is important. South Kirkland Park and Ride is already crowded even with the new parking structure. Have you considered using 116th Ave NE to connect Houghton Park and Ride with South Kirkland Park and Ride instead of using 405? It seems that it would be a faster route at times and add a few more useful bug stops.	5/19/2015 11:06 AM
339	Please consider not eliminating route 43. I live on 18th Ave and work at UW. I pick up the bus at 19th and Thomas and get off at 15th and Campus Parkway. If the 43 is eliminated i would have to walk 6 blocks to get to the 48 OR take two buses and the light rail in order to get to work. I think that walking 6 blocks or making three transfers is an unrealistic expectation. I moved to my current residence in order to avoid excessive transfers.	5/19/2015 11:00 AM

340	It would be nice to have a quicker route from Ballard to the U district, especially during busy commuter times. With all the stops between Ballard and the U district it takes about 30 minutes for the bus to travel about 3 miles. An express bus between the two neighborhoods would be beneficial to many people, or at least eliminating some of the stops between the two neighborhoods. The buses also feel very outdated and not well maintained. With the traffic and frequent stops the ride is jerky and uncomfortable. During this summer this is exasperated by the heat because these buses do not have any kind of air conditioning, so riding home after work is pretty brutal.	5/19/2015 10:59 AM
341	Getting rid of routes 71 and 72 will void the service to Lake City. Getting rid of both would increase congestion on other routes which is already a deterrent for not riding metro in the first place.	5/19/2015 10:55 AM
342	The new proposal for the #11 Madison is far superior to the previously offered alternatives. One tweak that would make it even better would be to have it loop back to the North when it gets to 1st Ave, rather than to the South. The loop back could be on Spring St, University St or Pike St, all of which are one-way to the east.	5/19/2015 10:54 AM
343	Please do not eliminate the 72 or 73 routes. How do folks get from Lake City to University District.	5/19/2015 10:47 AM
344	Not everyone in u-district live near the husky stadium. 71, 72, 73 are the most popular route connecting us to downtown seattle and international district. Cutting them will cause problems and changes to many of our daily commute!!!	5/19/2015 10:47 AM
345	77 - would be great if service was increased on this route, especially to make up for the 73 no longer travelling to downtown 73 - stagger times better with the 373. Don't delete the service to downtown or the weekend service. 373 - stagger times better with the 73	5/19/2015 10:45 AM
346	I had heard the 27 was coming back. My family and I are in a bit of a bind without it and have had to considerably alter our schedules to make our transportation work. I do hope that it is coming back.	5/19/2015 10:41 AM
347	This is an important route, and the proposed changes will be very inconvenient. Please keep this route!	5/19/2015 10:41 AM
348	Per previous comment - The shift of routes 31/32 to Wallingford Ave creates an even bigger "hole" in east-west transportation service for the intersection of the Phinney/Wallingford/Fremont neighborhoods. For me personally, this will DECREASE my number of metro trips and INCREASE my commute times. (I live east of Stone Way and north of 40th). The 44 is the only other viable alternative to get to UW from these neighborhoods, and it is as slow as molasses during peak times (not to mention extremely overcrowded).	5/19/2015 10:37 AM
349	Increase service of these routes during peak rush hour times from downtown to the u district. Everyday I watch multiple busses go past with full capacity and people unable to get on.	5/19/2015 10:34 AM
350	I am reliant on this route daily for commuting to school in the U-District and work downtown. It is the only route that runs regularly and is near enough for me to walk to. If this route is cut, my commute to work and school will increase significantly.	5/19/2015 10:29 AM
351	Expanding this route to include weekends and more frequent weeknight routes would be extremely helpful to many people that I currently ride with to the University of Washington as many of us have to work nights and weekends at UW.	5/19/2015 10:28 AM
352	route 71 is essential for my daily commute to the UW. Its removal would increase traffic congestion at the UW because I refuse to walk in the rain for half a mile and therefore be forced to take the car to work instead.	5/19/2015 10:27 AM
353	Extra service please! Between 5 and 6:30 pm	5/19/2015 10:23 AM
354	This is a vital route from Montlake thru Capitol hill and Downtown on one bus...very accessible, please do not cancel	5/19/2015 10:23 AM
355	Can you please increase the frequency of 269 route in the peak hours especially in the evenings.	5/19/2015 10:20 AM
356	Moving the 31/32 off of Stone Way would impact many many riders. I walk from right next to 99, and I've even seen people crossing the 99 pedestrian bridge at 41st & 99 to get to the 40th and Stone stop. 31/32 provides direct service to UW and UW hospital for people that live south of 45th.	5/19/2015 10:12 AM
357	I am sad to see route 30 disappear. It would be nice to see it back on the weekends, even if it were only every hour, during the 8a-7p time frame	5/19/2015 10:04 AM
358	Is a little disappointing that it won't run in the evenings - would be nice to have service from Eastlake all the way north to Roosevelt/Green lake all the time.	5/19/2015 10:04 AM
359	Please retain route 43. To eliminate the #43 presents an undue hardship to those of us on SE Capitol Hill heading to the U-District on a daily basis. Elimination of this route is a mistake rendered by Metro planners who do not understand where and how people move about the city.	5/19/2015 10:02 AM

360	More Frequency during peak hours. The wait between buses is often more than the scheduled time, and as an everyday rider on this bus line I have often waited more than 45 mins between busses. This is mostly due to the increased traffic on Broadway and 10th Ave E, as well as constant construction. Morning traffic on 10th Ave E near the Roanoke I-5 on-ramp is particularly bad. Which causes many delays and inconsistencies in wait times.	5/19/2015 9:59 AM
361	It appears you are eliminating or greatly restricting the bus routes that currently travel from the U District to the downtown bus tunnel or central downtown. Have you considered not everyone wants to use light rail? Although the light rail is wonderful the proposed change in bus service will require me to travel to the Medical Center/Stadium to catch it meaning my commute may actually increase. I already make 3 transfers a day to get from Vashon to the U District and your proposed changes appear to add a 4th. I am happy to commute in to Seattle because I love my job, but recent changes in Metro services are making that commute a very negative experience. The smaller buses on Vashon mean we are standing room only with riders sitting directly behind the windshield during commute times (this can't be safe!). And the thinner, smaller seats found on many new buses are immensely uncomfortable. Do the people who design these buses or make the decision to buy actually commute on them? I and other long time bus riders believe not. I appreciate the better gas mileage and lower carbon footprints but if you want more people to get out of their cars and on to buses you need to find a middle ground.	5/19/2015 9:59 AM
362	Routes from the South End. Burien/Seatac/West Seattle...	5/19/2015 9:59 AM
363	I commute from Roosevelt and 75th st to central UW campus. These two routes have been my primary bus routes since moving here, and neither will provide acceptable service (without a 10-15 minute walk) after the proposed changes. No new route serves my needs.	5/19/2015 9:58 AM
364	Removing direct service from Stone Way to the University of Washington will inconvenience a large number of users who live in this rapidly expanding mixed-use neighborhood. Either 31 or 32 could still go up Stone Way instead of routing them both up Wallingford Avenue in order to serve those users. Please consider making this change.	5/19/2015 9:56 AM
365	This route is negatively impacted by the short-term riders that get on at UW and get off only a few blocks north (and visa versa). This makes it difficult to board and get off the bus. Also fills buses so I may have to wait for a couple to pass by before I can get on.	5/19/2015 9:51 AM
366	I do not completely understand the proposed changes for route 28 and 28X. Would 28 local be deleted entirely and replaced with a slightly modified 28X that runs all day and skips most of Fremont? This was my main point of interest for taking the survey but it appears not to have been addressed. 28 is an important route for my neighborhood and it is usually a full bus.	5/19/2015 9:50 AM
367	can we reduce the number of stops? Having 3 stops that serve Magnuson park is excessive and slows the flow of the buses down. It takes far too long to get from Lake City to UW at that rate.	5/19/2015 9:50 AM
368	We need more spaces at Park and Rides. The Park and Rides in Bothell and Kenmore fill up early and some commuters cannot get space. I am concerned that eliminating the 372 route between UW Bothell and Woodinville will cause Woodinville commuters to drive in to the Bothell or Kenmore Park and Ride, worsening the situation. Doesn't matter how fantastic the bus routes are, if we can't park we can't use them. Very frustrating that so many unused lots/spaces surround the Kenmore P&R, yet commuters are not allowed to park in them. Please acquire this space or make arrangements with owners to utilize. Also I am concerned about the impact of eliminating some of the other bus routes on UW campus, such as the 68. 372 gets overcrowded leaving campus and some commuters have to wait for later buses. I am not sure if the increased frequency will alleviate this problem. Would like to see a strategy to encourage local residents who are just riding a stop or two to walk or take alternative buses, so that long distance commuters can get home.	5/19/2015 9:49 AM
369	The 31/32 service picking up from stone way and 40th going to the U district is one of the busiest stops that I use. Moving 31/32 service over to Wallingford Ave would make commuting to work and school much more difficult for me and others living in the neighborhood. I strongly request that you please keep this route as is to maintain an easy commute for the many people in my neighborhood who use this stop.	5/19/2015 9:49 AM

370	I wrote this in an earlier feedback form as well, but I will write it here again to make sure that it shows up with respect to the correct routes. By moving both routes 31 and 32 off of Stone Way you are inconveniencing a large number of people who live in a large part of Wallingford who need to commute to the UW/hospital (they might have even chose to live there due to the convenience of these buses). At the very least you should consider having one of the 31 or 32 remain on Stone Way due to the large number of riders who catch the bus at the Stone Way N & N 40th stop. You probably think that many of these riders can take the 44 on 45th Street instead, however, that bus is plagued with sitting in I-5 traffic (and just traffic on N 45th Street). For the past two years I and many others in my apartment complex and others have walked ten minutes to the 31/32 rather than a two-minute walk to the 44 due to the traffic. The current changes basically relegate all of us to the 44. The 44 may be less crowded in the future due to this proposal having it come more frequently, however, unless the proposal also deals with I-5 traffic, those buses will still be sitting in traffic. I hope that you seriously consider how these changes will affect Wallingford between 40th and 45th Streets and realize that taking the 44 is not a viable solution so that you think about alternative solutions that have at least one of the buses remain on Stone Way, or at least go up a side street that is closer to it (e.g. Interlake Ave and use Stone Way as a snow route). Thank you.	5/19/2015 9:47 AM
371	This route is a lifeline for students who live in Maple Leaf and work at the University, especially at the UWMC. We work odd hours and late hours, so the increased service of route 67 would be a lifesaver!	5/19/2015 9:47 AM
372	i wish this ran more frequently during the peak hours-to lighten the load of people in the morning and especially the afternoon-sometimes it is standing room only. i like that the 311 is direct and would prefer not to take routes that take longer or require transfers (longer and risk of missing and waiting for the next bus) eg 255 or 277. the 311 is a great, fast, direct line to the UW but running more often would be helpful in getting to work on time w/o making a super early trip 520 or taking the 550 and being a bit late	5/19/2015 9:47 AM
373	The route 68 is a frequently used route and if deleted the burden on route 372x would be too much to be handled. So, the route 68 should still be in use at least at the peak hours.	5/19/2015 9:46 AM
374	I 100% support the proposal to increase the frequency of the 372X and add weekends. However, I really hope terminating the 72 route is reconsidered. I say this only because I think it is important to keep a route on Lake City Way that goes all the way downtown.	5/19/2015 9:46 AM
375	Please bring back the express service on this line! It cuts the commute to UW in half.	5/19/2015 9:46 AM
376	Please do not delete this route. Per comments on previous page. It causes those coming from U-District to areas of Capitol Hill to take 2 buses instead of one. (48 then to the 12).	5/19/2015 9:45 AM
377	It is a great idea to eliminate the routes that duplicate express service downtown with the implementation of light rail. What is really needed now is an express bus route to Northgate from the U District. 2) Great job in being able to start Link service 6 months earlier than planned and underbudget!!	5/19/2015 9:44 AM
378	Please do not suspend 2 of these routes, many people live closer to this bus stop and would prefer these routes over going to husky stadium	5/19/2015 9:43 AM
379	I catch the 540 bus from South Kirkland Park and Ride and it is proposed to be cut from South Kirkland Park and Ride. This is the fastest and most direct route in which I can arrive at work. If the 540 is cut from South Kirkland Park and Ride I would have to transfer to different bus routes and my commute will take longer. Currently if I try to take the 556 or 271, the times do not work out with my schedule, they are either too early for me to catch or it arrives at my work too late.	5/19/2015 9:43 AM
380	Starting the route at UW Bothell instead of starting at Woodinville Park and Ride is a poor decision on the transportation's behalf. It forces people who take that route to have to park at UW Bothell, which is limited because of the students that already park there for UW Bothell and Cascadia Community College, and acquiring a parking pass for UW Bothell is ridiculously expensive. It will increase traffic congestion at UW Bothell, with the people that take the 372x having to park there instead, and make it more inconvenient for the students who already attend the school to park. The surrounding areas would also become more congested with people parking their cars nearby the campus to take the bus, leading to more potential hazards.	5/19/2015 9:43 AM
381	48 should not be split. Currently it lets people from both ends of the city work at a distance from where they live. When you split it you are segregating the richer neighborhoods from the poor neighborhoods. That is going to generate a big back lash.	5/19/2015 9:41 AM
382	I think it's a problem to move the 67 from 5th Ave to Roosevelt. For example, I live on 1st Ave NE. Therefore, I walk to 5th Ave each day to catch the 67. Under the new proposal, I would have to either catch the 66 and walk from its last stop to my job at UW Med Center or walk all the way to Roosevelt to catch the 67, which is quite far. Either way, my commute times would be increased by 15 minutes each way, which is a lot of time. I would prefer to have the 67 & 68 route maps maintained mostly as they are, but possibly rerouted to stop closer to the UW stadium light rail stop.	5/19/2015 9:41 AM

383	I stopped using Metro bus service 3 years ago because route 48 was unreliable and overcrowded. As I mentioned earlier in the survey, if Route 45 is introduced and eliminates the problems associated with Route 48, I will once again be a regular bus commuter. My fingers are crossed.	5/19/2015 9:40 AM
384	Getting rid of 72 is a terrible idea. It both takes me to work at UW and it takes my daughter to Roosevelt High School. Beyond it impacting me personally, its a lifeline for students both in high school and at UW. It makes it, therefore, also a lifeline to their parents. Getting rid of 72 is bad for parents and kids. It will result in more driving by car which will cause more traffic, more pollution, and more accidents. Keep 72!	5/19/2015 9:40 AM
385	This route is the only route that covers Roosevelt Way NE between safeways and Northgate Avenue, why delete it?	5/19/2015 9:40 AM
386	Please extend this to later in the evening. Many UW students need to be able to get easily home between 6-9 pm on week days, instead of the cut off at 6.	5/19/2015 9:40 AM
387	Do Not delete this route	5/19/2015 9:38 AM
388	would like to keep route 71	5/19/2015 9:38 AM
389	While I am not opposed to changing the route for 372 to allow for service more often; this change is going to neglect the people who pick up the 372 before UW Bothell. In this stretch of corridor, there is no other bus. I already walk 3 miles to get to this bus stop, which is on the limits of being commutable. Adding another couple of miles to this walk would mean I may as well not take the bus. You should really consider having a regularly scheduled DART, shuttle, or something running the deleted length of the 372 on a time table that gets people to UW Bothell before the 372 is scheduled to arrive, at least as often as the 372 runs now. These people wouldn't be able to take full advantage of the additional service times (though they could possibly stop and have a coffee while transferring one way or the other) but they will at least not be losing any current service. Maybe it would be possible to communicate a cooperative need with whichever agency runs 120 by Canyon Park to see if they could benefit from extending their routes and bus frequency to pick up and drop people off at UW Bothell as well.	5/19/2015 9:37 AM
390	The proposed routing appears unworkable as it introduces buses to streets that are too narrow for them.	5/19/2015 9:37 AM
391	This route should stay as-is. The bus is almost ALWAYS full; requiring a full bus to transfer on every trip makes no sense.	5/19/2015 9:37 AM
392	PLease save my current #12!!!	5/19/2015 9:36 AM
393	The 106 bus is a joke it takes to long to get to town and back home. The route was faster when it took the freeway to town and back. This route needs to stop site seeing around Georgetown and Beacon hill, and get people to work much faster then 1hr and 45min.....	5/19/2015 9:34 AM
394	If you delete the 72, increase the daytime and nighttime frequency of the 73 to more than just every half hour! If I have to wait half an hour to take a 15 minute bus ride home, I'm not going to ride the bus. I imagine this will be more troublesome for people who don't have an option to not ride the bus.	5/19/2015 9:32 AM
395	SCCA patients use this bus to get to clinic for treatment. Without it, they would be forced to take the 70 which drops them off two blocks from SCCA and makes the walk up a steep hill, many of whom would not be physically able to do. Please reconsider.	5/19/2015 9:30 AM
396	This route is essential to the connectivity of Seattle as it is the only route the services Montlake to Downtown Seattle.	5/19/2015 9:30 AM
397	Please do not eliminate this route!! Increasing transfers are NOT an improvement in service, especially in a region with frequent rain. None of the proposed options provide suitable coverage. I currently live on 13th and Republican and work in north U-district. The 49 is extremely slow and represents a substantial walk after exiting the bus, and using light rail would add more walking to both the front and back end of my trip, plus a transfer. My commute would take the same amount of time, but would be more work. I will be forced to drive to work more often when I would normally prefer to bus.	5/19/2015 9:29 AM
398	Do not remove route 67/68. That is really helpful to us living around 25th Ave, not far from UW Seattle campus. Also the buses for 372X usually are those old, high-floor ones. If Metro can change them to newer versions with low-floor and hybrid engines. Thanks,	5/19/2015 9:28 AM
399	Please add new 16 connection and increase frequency of 65!	5/19/2015 9:28 AM
400	I just want to let you know that I hate taking this bus. Everything about the experience is disagreeable and the only reason I do is because of Amazon destroying accessibility to streets and parking in SLU.	5/19/2015 9:28 AM

401	71E is my regular commuting bus--I take it from NE Seattle (65th & 45th Ave) to the UW Tower (University Way and 45th street). No transfers, no fuss. I love it! Coming home is a bit more fraught, as the buses are frequently tied up downtown. Anything done to fix that would be super nice. thanks!	5/19/2015 9:27 AM
402	The 65 is consistently late or running too early almost every other day. I take this twice a day. Also I am unsure how the 65 will connect at the Stadium light rail station if it will also go into the University route on Pend Orielle... I hope it can still do both somehow	5/19/2015 9:27 AM
403	If you must eliminate the 68, which I take to and from work, you MUST have the 372 stop at NE 60th St. I have arthritis in my hip and the stops at NE 65th St. and NE 55th St. are TOO FAR from my house. I work at the University of Washington Medical Center and I cannot afford to pay for parking there. The LINK lightrail is not helpful to me and I will never use it.	5/19/2015 9:26 AM
404	I am so very disappointed that you would cut route 43. 48 runs north and south through Seattle, but provides no direct way to get downtown from what is considered a very central part of Seattle. What's more, the goal of living in town is to have it be easy to get downtown. You'd be making it remarkably more difficult to do so. The light rail is much too far from almost all of Montlake, and not a remotely reasonable way to commute. You'd be leaving that as the only direct connection to downtown. As someone who lives in town and doesn't have a car because they rely on public transportation, how should I get to work? It seems insane that I would live less than four miles from my office and yet it would take two buses and well over an hour to get to work. Particularly when you think of the higher property taxes I pay. What in the world are those for, then? I have always presumed that the goal of public transportation was to keep cars off the road. If you remove route 43, you will force me to get a car. No other option is viable. As a taxpayer living in Montlake, I am outraged at this proposal to cut off basic bus service from a main thoroughfare to downtown.	5/19/2015 9:26 AM
405	The former 30 route would take me to Fremont AND Queen Anne (Seattle Center) from 20th and Ravenna. Please bring back a direct route to the Seattle Center from the University District/Ravenna.	5/19/2015 9:24 AM
406	I use this route in order to get back to View Ridge from the University District.	5/19/2015 9:24 AM
407	I utilize the 43 bus from north/east Capitol Hill to the University District to commute to/from work 5 days a week. This is a fantastic route that has many stops close to my home that I can easily walk to (15th and E Thomas; 17th and Thomas; 19th and Thomas.) I urge you NOT to eliminate the 43. The other proposed options are very inconvenient for myself and a serious burden to folks with disabilities/mobility issues. For example, there would be no non-stop service between 15th and 23rd on Capitol Hill. Riders would need to transfer from a 12 or 8 to a different bus on 23rd to go to the U District, extending their overall trip time. The 43 bus route is packed every morning when I ride it, so I do not understand how this route was chosen for elimination. I would not utilize Link Light Rail because the stations are too far away from my origin and destination points. My trip would be longer than it already is and include multiple legs/transfers & more walking time, whereas my current bus route is a single bus ride and a short walk. Ultimately, the elimination of the 43 route would motivate me to drive to work. I have been a bus rider for over 5 years, even though I own a car. The elimination of the 43 would add time to my commute and it would make more sense for me to drive to my workplace if this moves forward.	5/19/2015 9:23 AM
408	Please don't delete it! I take this bus to and from work every single day.	5/19/2015 9:23 AM
409	Please don't change the 11 to go downtown on Madison! Keep it the way it is or connect to the Capitol Hill Link Station.	5/19/2015 9:21 AM
410	I shared some in the comment box for question 16 (I think). I am in favor of splitting route 48. I am in favor of increasing service on route 49. I think that removing route 43 makes sense, given the increased access with light rail. Not sure how access to the area around 19th or 15th avenues on Capital Hill will be configured with the elimination of route 43. Seems like it would require more transfers.	5/19/2015 9:21 AM
411	What is happening to 255 and 540? and why are you taking 242 out?	5/19/2015 9:21 AM
412	The buses themselves are quite old and need to be replaced. They often smell badly of mold/mildew, and even tobacco, alcohol, and other unpleasant odors. The "wires" the 44 uses are more of a problem than they are useful, as the bus may at anytime unexpectedly disconnect or lose power, which is highly inconvenient for all riders involved. By replacing these aging buses with updated models, the route will be much improved and will be a more comfortable experience for drivers and riders alike.	5/19/2015 9:21 AM
413	I used to ride the 48 often and it was awful. I often times chose to driver rather than take that route. Extremely unreliable and crowded during rush hours. Anything that can be done to improve the reliability and crowds on that route will be appreciated by the riders.	5/19/2015 9:21 AM
414	when is the metro system ever going to pay any attention to West Seattle to the University of Washington, i would take the bus if there was a direct route	5/19/2015 9:21 AM

415	Bus 43 should remain an option for Capitol Hill commuters.	5/19/2015 9:21 AM
416	DO NOT DELETE THIS ROUTE!!!!	5/19/2015 9:20 AM
417	During winter, routes around the commute times buses are late and crowded; using the smaller metro buses. Transit seem to link these routes serve only UW students. Please use the larger buses. Also, how about increasing service to this area?	5/19/2015 9:19 AM
418	I made a comment earlier in the survey that said if the 372X runs on weekends, it would be nice if it went further than just to Lake City.	5/19/2015 9:19 AM
419	Please do not take away the most important route in the city!	5/19/2015 9:19 AM
420	THANK YOU! PLEASE ENACT LATE NIGHT BUS SERVICE AS SOON AS POSSIBLE! THIS IS FANTASTIC!	5/19/2015 9:17 AM
421	Eliminating the 43 is insane! Don't do it! This does not help people who rely ONLY on public transportation!	5/19/2015 9:16 AM
422	It would be great if we could increase the frequency of this route; my bus is totally packed especially during the school year.	5/19/2015 9:15 AM
423	25-The 25 is a fast, reliable, solid bus. I think deleting this route would be in error. 49-The 49 currently runs off schedule an egregious amount. Efforts need to be made to improve service immediately.	5/19/2015 9:13 AM
424	The proposed changes to route 540 (stopping service at South Kirkland Park and Ride and moving service to Houghton park and ride) is a terrible and inconvenient option, and has absolutely no impact on new Link connections in the U-District or anywhere else along the route. Please do not discontinue service to the South Kirkland Park and Ride stop on the 540 route.	5/19/2015 9:11 AM
425	1. The proposed route won't go to Northgate, it will go to Sands Point. How many low income, disabled and elderly people need to go to Sands Point on a regular basis? Not many. 2. You are sending articulated, double-length, diesel buses down a narrow street (Meridian between 56th and 65th) , and now you want to do it EVERY SEVEN MINUTES. My neighbors have had car mirrors ripped off by the bus (twice) and once neighbor had an entire quarter panel from the front of their car torn off by the bus. Meridian Ave. is narrow between 56th and 65th. The city calls this an "arterial" but it is not anything like, say, 50th or 45th. It's dangerous for bikes and pedestrians -- a lot of people walk down to Green Lake this way. 3. The #16 will no longer run down Aurora to downtown, it will go over Dexter Ave -- much slower for people going downtown. I either take the #26 or I bike. 4. The buses run all hours of the night, even though the routes ostensibly stop at 1 am. They routinely roll through -- empty -- at 2 am and 4 am, presumably going to the bus depot. For those of us who live along this stretch and (like everyone else in Seattle) have no air conditioning, it is SERIOUSLY noisy in summer when the windows are open. I'm sure the dB level violates city standards. It does not have to be this way. 5. Except for rush hours, the #16 is mostly empty during midday and evenings. We used to live on CapHill and the #10 bus -- fully electric -- stopped directly behind our house. It was quiet, and not a problem at all. And where I grew up (in NYC) smaller "feeder" routes used "jitney" buses (like the MS Connector buses) to get people from residential neighborhoods like ours to bus terminals -- nobody ran big diesel buses (much less double-sized articulated ones) through residential neighborhoods except for large arterial streets. This is just poor planning and fleet management by the city. Here's what I'd propose instead: - #16 continues up/down Stone Way across 45th and 50th and follows E. Green Lake Drive to the bus stop by the shops on Ravenna/ Green Lake Way. Green Lake Way is already the snow route for the #16, and it is wider than our stretch of Meridian Ave N. This takes people from downtown/Fremont/Wally to Green Lake, where the fields, courts and park are. It also goes past several retirement homes including the Hearthstone this way. Nobody wants to go to our little stretch of Meridian, and it is easy for those of us who live on this stretch of Meridian to walk one block over to Green Lake Way. - #16 turns on Ravenna and goes across to 65th to connect up to the new light rail station at Roosevelt. This lets people taking light rail get to Green Lake Park easily. The #16 then continues along 65th to Sands Point, completing that route. - The #26 runs along 45th to Meridian to 56th to serve Tangletown neighborhood, then across 56th and left/ N on Latona (as it does now) then to 65th P&R => Northgate to serve people who need to get to Northgate. 56th is much wider than "Kirkwood Place" (what Meridian is called from 56th - 59th) or Meridian 59th - 65th. I think this makes a lot more sense and gets people to Green Lake Park and downtown -- and intersects with the new light rail station in a better manner.	5/18/2015 10:17 PM
426	Eliminating the 43 will force me to drive downtown in inclement weather. The transfer would double the time of a downtown commute.	5/18/2015 10:04 PM
427	I feel very sad that 73 doesn't go to downtown any more, but stop at u-dist. There's no way for me who live at 75th ne/Roosevelt can have a direct bus to downtown. for 66 I am also sad that it doesn't serve local route any more. My daily travel to SLU would be so hard now. how about extending no. 70 to north so we have some direct line to SLU/downtown?	5/18/2015 9:17 PM
428	I would like this service to continue.	5/18/2015 8:09 PM

429	Please provide a direct connection from the NOAA sand point campus to the UW light link. This connection could also include Children's Medical and other large employers along Sand Point Way. It would certainly help with the congestion on Montlake Blvd.	5/18/2015 7:44 PM
430	Route 8/38: See my previous comments about this proposal. Route #45/48: I use the #48 to get to Greenlake (to visit a relative) on a regular basis. If this route is split, where will the two routes have their "terminals?" The 45 could be terminated near the Medical Center, but the #48 should have it's "terminal" in the U-District (use the current "terminals" for the #43, 44, 49 and 70). Route 16/26X: I know some people who rely on the 16 to reach an outpatient medical facility on College Way (just north of the North Seattle College). These people are elderly and have difficulty riding two buses--is there any way to divert the #26 so it serves these medical facilities? I know there's a "transit center" just south of the college (with service provided by Route 40, 345 and 346), but having a "one-bus" trip for these people would be extremely helpful. Route #9: This route serves a lot of riders who use it to travel between the Rainier Valley, First Hill and Broadway and has needed evening and weekend service for a LONG TIME. While the First Hill Streetcar is a step in the right direction in terms of providing all-day transit service, it still requires a transfer for people travelling between the Rainier Valley and First Hill/Broadway aress-- and the conection point between the Route #7 (which most of them would ride) and the Streetcar is not exactly convenient, since the Streetcar will be stopping in the middle of Jackson Street.	5/18/2015 6:20 PM
431	The revisions for the 66 will fit perfectly into my daily commute next year as I take my daughter from Maple Leaf to Hazel-Wolfe and continue to South Lake Union for work. However, I would have detested the proposed change a year ago.	5/18/2015 3:54 PM
432	I like that the route is being split into two sections and that the route is being retained from MLK to Seattle Center. I would like to see service occur every 10-15 minutes in the peak times as suggested. I feel that if this routing is improved then we won't have the need for Madison BRT. Saving money on new service, construction, and in general unnecessary at this time changes.	5/18/2015 3:46 PM
433	These routes need to be both kept in service and also kept as full routes that go all the way downtown. Chopping them up only creates waits due to the connection time at stops. Return the route 79 to service. My neighbors and I all loved it. It had great ridership and was a great benefit of my commute.	5/18/2015 2:17 PM
434	The proposed changes to route 16 seem like they will make it much easier to get around all of North Seattle (between NW and NE), and this is very helpful. The proposed changes to route 44 seem to be simply making it a more frequent route. I can never have any problems with making a route more frequent. My only request for this route would be to put better busses into use. It is currently a very loud, squeaky, bumpy ride. I understand that KCM has a limited number of busses of each type, so I'm not expecting this to be a possibility, but I thought it worth mentioning just in case. For route 48, I'm glad it will be split into two routes. I do not currently use it very much, but I know it has problems with reliability, and I assume this is largely because it is currently such a long route. Any routes that provide options for traveling East/West throughout North Seattle are appreciated. Route 65: I'm not sure if I will be using this route very much (I currently do not bus in its service area much at all), but I think it will become more useful to me when the frequent service grid comes into play. There are places in its service area I would like to be able to bus to but currently can't do without spending way too much time (at least 4x the time it would take for me to drive). I have high hopes for this route being a great part of the new frequent-service grid. Thank you. 372X: Please, if it is not in the plans, please add more stops between NE 95th St. and NE 65th St. Currently the closest stop is more than 1/2 mile from my home. With the 72 being removed and no more stops between the above mentioned streets, I could not use the bus system in NE Seattle besides the 316 going downtown and back during certain times only. 316: Thank you for adding a couple more routes in both the morning and afternoon. This feature is appreciated.	5/18/2015 1:34 PM
435	As mentioned earlier I am a resident of the Broadview neighborhood and I ride the bus downtown every day for work. If the proposed changes take effect I will no longer ride the 28/28x.	5/18/2015 1:05 PM
436	I like the rerouting/splitting of these routes, but this funnels almost all the downtown traffic through the University of Washington station. These routes should be diverted if necessary across Pacific Place to provide the closest possible connection between the bus and the rail. They already will be impacted by traffic coming off of Montlake, so I am concerned this connection won't be smooth and will require a significant amount of waiting/walking.	5/18/2015 12:53 PM
437	#71 takes me everywhere from my bus stop near my home - U District, Downtown, to grocery store, to church, and, combined with #31, Seattle Center. I am 80. I don't drive downtown or to Seattle Center, but I need to be able to get there to do the things I want and need to do. Parking is the added issue. there are already places I no longer go to because parking is impossible, and it's too hard to get there by bus. #71 is the only route that cuts through Wedgwood and View Ridge, reaching folks who cannot do the 10 block or more walks to take a bus on 65th St. instead of 75th. I am almost as far from 35th Ave. Give us old folks and handicapped a break!!!	5/18/2015 12:52 PM

438	While not an extremely busy route, the 25 services a vital E-W corridor. Walk times to alternate routes (43, 66, Montlake interchange) can be upwards of 15-20 min at normal walking pace, longer for elderly passengers, for members of the Montlake and Portage Bay communities, so this is a crucial intersecting route. I may have missed any previous section that purposefully called out the 25, so I noted my comments here.	5/18/2015 11:42 AM
439	Hi, I would like to propose changes in the times of the running of the 316 bus from Northgate/Greenlake to downtown. With the current workforce being able to work from home as well as working later in the evening the times that the 316 should be extended to 9:30 am (last bus leaving greenlake) and 7:30 (last bus leaving downtown). The express lane is still open during these times. With the changes to the 16 this will help with the increased ridership. This allows people who do not need to be downtown at 9 still get a bus that goes on the express lanes to the tunnel. Currently the 76 leaves 9 min after the last 316 but as far as Metro express buses that leave from the area, that is it. Otherwise we have to go to northgate to get the 41 but parking is impossible at that time. More express buses to downtown during an extended peak (leaving all the way up to 9:30a) from the rapidly growing area of Greenlake should be proposed. Thank you. Edgar Causin edgarec@gmail.com	5/18/2015 10:48 AM
440	Nothing more than I previously stated, but it's super important so please listen	5/18/2015 9:42 AM
441	I repeat... The current route 12 provides critical access to the medical facilities along Madison as well as the southern end of downtown where many people who live in north Capitol Hill work. There are already PLENTY of routes that service the Pike/Pine corridor to and from Capitol Hill that are very accessible and frequent. It would be devastating to change the route of the 12 and eliminate the portion that goes along Madison. Please, please, please do NOT reroute the 12.	5/18/2015 9:21 AM
442	some neighbors propose it being re-routed to go along Greenlake Way instead of Meridian; I disagree and prefer Meridian but would be open to N65th.	5/18/2015 8:38 AM
443	Elimination of this route is unacceptable! I cannot get to Link connections, or airport without this bus service. I voted for Prop 1 to preserve this service!!!	5/18/2015 7:57 AM
444	Reliability on Route 48 is definitely an issue, but I have concerns that the tradeoff of losing connections for people accessing the entire route due to splitting might not pay off with improved reliability. The traffic delays seem to happen at other points along the route, so by splitting the route you may be able to improve, but not eliminate the reliability issues. There are also a lot of people that make connections at the Montlake transfer area, which is not connected by the new Route 45.	5/18/2015 7:44 AM
445	I would really like to keep the 25 running. I could live with less frequent runs with a little more planning on my part, but this line really helps me get to some places that would be a struggle without it.	5/17/2015 11:06 PM
446	This route is already too busy, noisy, etc. and the proposal wants to increase the number of buses traveling? This is a bad idea - why not move the route to Green Lake Way or find another alternative - the proposal is not a good one for our neighborhood.	5/17/2015 4:47 PM
447	I don't see why there would be a need to cancel 71. The bus is not full in Wedgwood, but then don't use a big bus. Having it replaced by an irregular service on a different route is not an improvement. I suggest keeping 71 as it is but use a van rather than a bus.	5/17/2015 9:24 AM
448	Like I said, could you just maybe leave the Rte. 16 routing the same? It works fine as it is (Wallingford-GreenLake-Northgate). Link isn't going to serve all parts of Seattle. Please don't make me transfer to another route just so Metro can say it connects to Link!	5/16/2015 9:53 PM
449	I love this route. It is so reliable and convenient. Hardly more than a minute or so late. Please keep it. Without it, I will be stuck in Ravenna without a good way to get downtown outside of peak transit hours. It will be difficult for me to get to the university district. Both of these are very important to me and many of my bus commuting neighbors.	5/16/2015 8:18 PM
450	If cancelling the 242 is necessary to fund increased service elsewhere, so be it. But I prefer the 242 more than the 542, and it is more convenient for me than the 542.	5/16/2015 7:49 PM
451	Truncate the 8 at Madison Street and have the 49 continue through first hill, or terminate at the Capitol Hill light rail station.	5/16/2015 4:24 PM
452	If the split of the current 48 into route 45 and 48 will improve the on-time arrival of north-bound runs in the University District, then I'm all for it.	5/16/2015 4:19 PM

453	Routes as they exist now or proposals? Note: Me and my spouse on average take metro 2xs/ day, 5 days a week for the 19 years we've lived in Seattle to downtown Seattle. For my needs: There needs to be an earlier express morning run from Ravenna to Downtown and there needs to be an express run that starts earlier in the afternoon. I need to be at work by 6:30 AM so I take the first AM 64X or 76 run which sometimes gets me there on time (reliability over the years has been getting worse) and I get off at 3PM which forces me to take the 71,72, or 73 due to no express runs that early. Having express runs later in the evening would be helpful for late meetings, dinners etc..downtown.	5/16/2015 3:47 PM
454	I do not like the decision to remove the #43. It is the only direct bus from Montlake to downtown Seattle. Removing it will require a transfer. Because I ride very early in the morning, I don't consider the transfer locations to be safe.	5/16/2015 2:32 PM
455	Route 372 should run locally since the local buses (68, 72) are being deleted. Also, it's great that the 372 would run frequently on nights and weekends.	5/16/2015 2:27 PM
456	Please do not cancel the 43. It's a very valuable connection between the U-District and Capitol Hill via Montlake, and its nighttime continuation into the 44 is also very convenient for those making long trips from Capitol Hill to Ballard. Making a transfer is a pain; I always take the 43 just to avoid the uncertainty of transfers even if the trip will take a little longer.	5/16/2015 1:38 PM
457	See comments above!!!! 19th Ave. East MUST be kept on the# 12 bus route	5/16/2015 1:02 PM
458	Litmus test for me will be how long the average wait is at lk Washington/montlake stop for a southbound bus to take me to John/23rd. Counting on high frequency/reliability 48 to make up for loss of 43. 242 was a nice backup option for when 545 was late or bike racks not available, but agree it was a pretty low ridership route andj there are relatively good replacement options.	5/16/2015 8:49 AM
459	I take the 72 to work every day, please do not delete.	5/16/2015 6:25 AM
460	The proposed changes to Route 16 are terrible. If implemented and maintained the changes will change my future enjoyment of all that my hometown has to offer. I'll try to rally support for the current Route 16.	5/15/2015 11:28 PM
461	The proposal to re-route 16 between Green Lake and Sand Point is bad, as follows: 16 from Green Lake and downtown would continue to be well used. But 16 from Green Lake to Sand Point will be sparsely used. As a result, there will be frequent bus service heavily used over 1/2 of its route, but with near-empty busses over 1/2 of the route ... a poor use of equipment, fuel, and manpower. Further, it ends up almost cutting in half the service between Northgate, North Seattle College, Licton Springs, Bishop Blanchet High School, and North Green Lake to points south ... in spite of the fact that those are major traffic generators. A better use of resources would be as follows: Create a crosstown route from Sand Point to Green Lake to Ballard with a frequency appropriate to its ridership. Leave 16 serving Northgate, North Seattle College, Licton Springs, Bishop Blanchet High School, Green Lake, and downtown at a frequent (15 minute?) headway.	5/15/2015 7:06 PM
462	I am upset that this route is discontinued. This area needs an all day bus direct to downtown for those who need to transfer to buses that serve areas that the light rail does not serve.	5/15/2015 6:46 PM
463	Do not change these routes to move out of Stone Way. This area is growing, very quickly, in density and needs to have a route to the UW where a significant portion of the inhabitants work or study. South Wallingford (where the proposal suggests moving the 31/32) does not need this type of service and it is not an equivalent coverage as the 26 you plan to remove from that area.	5/15/2015 6:13 PM
464	I do not like the new routes 11 and 12. The 11 would be a diesel bus on a very steep hill and would not provide a connection going North to Capital Hill such as the current connection that goes along 19th or the earlier proposal to go along Broadway. I think either of these alternatives would be preferable to the Madison St. only option. Regardless, it appears the BRT planners want to put stops at 6th and at Terry, which would severely limit the utility of this line for the many people who live on 8th Ave. It may not seem much to walk an extra two blocks, but the grade here is extremely steep and it would not be worthwhile unless one were going to the end of the line. So I think there should be bus service in addition to Madison BRT to provide connections North and South of the street and this service should have a stop on 8th Ave. and Madison.	5/15/2015 5:33 PM
465	I think it will be difficult for families traveling during the day to end up at the business centers off Madison rather than along Pike/Pine with the shopping, entertainment and other activity centers. I'd like to have a route go all the way to Pike Place Market from Madison Park.	5/15/2015 5:21 PM
466	we need MORE bus stops, MORE busses along the route, running north at least as far as northgate mall. We DON'T ride the bus now because of these problems, and are even less likely to do so in the future if they aren't improved.	5/15/2015 5:05 PM
467	Please restore this route to at *least* service every half an hour, which will return ridership to acceptable levels.	5/15/2015 4:06 PM

468	These routes both need to be run on University Way and 15th NE. It would be really confusing to have to guess which road and bus stop to go to just to get to the same place.	5/15/2015 3:59 PM
469	72X and 73X are very convenient routes to get to/from downtown for me. The changes appear to cause me to require a transfer when I previously did not need to, without significantly improving travel time. Not a fan.	5/15/2015 3:28 PM
470	I like the proposed change to route 373X up 15th ave NE instead of University Way NE. Also, I would like to see this as more of an express bus. There are very frequent stops around 120th. It would be nice to keep it to every 10 blocks or so like it is elsewhere on the route.	5/15/2015 2:11 PM
471	I'm concerned that the removal of route 43 makes it difficult to complete trips between Montlake neighborhoods and the top of Capitol Hill. Although Link will provide a great alternative for trips between Husky Stadium and Capitol Hill station, it makes it difficult for trips that originate or end *between* those two stations, requiring a longish walk or a bus transfer. I don't have a simple solution to propose, but at minimum, I'd hope that schedules can be coordinated and timepoints enforced so that transfers between #48 and #8/#11 can be completed quickly and reliably.	5/15/2015 12:55 PM
472	I am opposed to deletion of route 25. I used this route for many years to travel to and from work. Even though service had been reduced to a low level it still was about 1/2 full every time I rode it before retiring a couple of years ago. I think a smaller (narrower) vehicle on this route would make sense since some of the roads along the route are narrow. It is hard to imagine that we voted to tax ourselves for improved transit service and it is actually getting worse in my neighborhood.	5/15/2015 12:47 PM
473	Hoping that stop will not be far from LINK station. Odd placement of the station, if bus gets off a hundred yards away. Same for DART 941 stop.	5/15/2015 12:29 PM
474	Can not accept deletion of Route 25. Will not be able to get to Link connections with bags or luggage from Portage Bay area of Montlake over such distances without existing Route 25.	5/15/2015 11:55 AM
475	If you take this route out, we need reliable, frequent service on 48 as it is used by many students going to Garfield and transferring to other buses.	5/15/2015 11:33 AM
476	Please don't delete this route, I would need to drive downtown if it is deleted. thanks	5/15/2015 11:30 AM
477	271 -- bring back the changes from Alt 1 -- cut off the Issaquah tail to its own route and restore the through route. Also move this route to serve the Evergreen Point Freeway Station by moving the routing to Bellevue Way or 112th and extending the 246 to serve the old Median coverage mission. 311 -- bring back the improved frequency by deleting the commuter routes than were slated for deletion before. For now leave the SLU routing abandoned if that's too big of a change.	5/15/2015 11:14 AM
478	I would like to see direct routes, even if they are less frequent, from the link light rail at Husky Stadium and NOAA's Sand Point Campus for commuters.	5/15/2015 10:56 AM
479	I am outraged that Metro is cutting both the 25 and the 43 - especially the 43! This is the route my kids, and others in Montlake, take to get to their school at Pike & Summit. I simply cannot believe that Ted Day of Metro is saying these proposed changes will mean improved service when Montlake is cut out of all direct routes to the Pike/Pine corridor and to downtown. There are plenty - PLENTY - of routes between Capitol Hill and these locations. Why is Montlake getting the short end of the stick? These changes will result in more cars on the road - I will have to drive my kids to school now instead of sending them on Metro. The 43 is a well-used route - there are always plenty of people on that bus. What are they supposed to do now? Take 2-3 different routes just to get downtown? That is not something my 11-year old should be expected to do - he already has to walk 5 blocks to get to the bus and 2 blocks at the other end. A transfer is a deal-breaker. And if I have errands to run downtown, I'll be driving rather than take the extra time it will take for me to transfer. I simply cannot express how upset I am over this. These proposed changes are extremely short-sighted, and awful for my neighborhood. Please, PLEASE rethink this and give Montlake our service back! Barbara Chin barbarachin@mac.com	5/15/2015 10:53 AM
480	Don't change the 11 bus route to go down Madison. I live on 23rd and work on Pine. I use the 11 to get to and from work every day, and under the new changes, it would be much less convenient for me to take the 12 instead. I have to go so far out of my way to get to and from each bus stop, I might as well just walk. The 11 bus is crowded with Madison Valley/CD/East Capitol Hill dwellers like me who are in the same situation, and I am sure none of them would be happy about this change either. We need a convenient way to get to Pine/Pike, both in Capitol Hill and downtown. If anything, you should make the 11 run more frequently on the same route.	5/15/2015 10:50 AM
481	I think bus service should be increased. I also think that we should consider using different types of busses. Small busses are less expensive to run and should be used when ridership is not high but where service is desperately needed.	5/15/2015 10:43 AM
482	See my previous comments.	5/15/2015 10:34 AM

483	I can't believe you are ignoring the deletion of the 25 in your survey! 110 people responded that it was a concern and it isn't even on the menu!? Also, the frequency along 24th Ave for Montlakers is GOING DOWN, not up! The 25 bus has been around since the 1930's, so why would we have less public transit options today?! Never mind the fact that the 25 used to also run on weekends about 15 years ago... Looks like we will also lose the battle along 24th Ave as we had 2 buses now only going to 1, so a roughly every 7 minute or less frequency to 10 or 12 depending on time of day.	5/15/2015 10:17 AM
484	Just repeating what I already said: Don't cut the 8 off at the knees! Keep it running to Mt. Baker before turning around. Adds redundancy between Jackson and Mt. Baker, and opens up more of the CD to people needing fast convenient access to Capitol Hill, SLU, Seattle Ctr., etc. Not to mention connection to more buses at the Mt. Baker transit, as well as light rail.	5/15/2015 10:16 AM
485	I repeat my request to PLEASE keep the 11 servicing Pike/Pine and DOWNTOWN. Downtown means the shopping and entertainment area of downtown. For seniors, even going to a movie on the bus will be nearly impossible to do without help.	5/15/2015 10:05 AM
486	As I already stated in this Survey, all of these routes are overcrowded at some times of the day - especially early morning and late evening. This seems to be a result of greatly increased numbers of UW students. Overcrowding slows down the service and is potentially dangerous.	5/15/2015 9:43 AM
487	By eliminating this route you will negatively impact most of my transit use, making it more complicated and less safe to get from Wedgwood to the business area of the U District and downtown (71). Eliminating Route 43 means I can no longer get to Group Health Capitol Hill easily. I may find Route 16 useful to get to Fremont and Seattle Center.	5/15/2015 9:23 AM
488	smart move discontinuing route 25. It never has many riders on it, and while convenient for folks who live in Montlake like me, it can't be profitable. My inconvenience is less important than the economic viability of Metro. With train service it will more than make up for it.	5/15/2015 9:12 AM
489	Cutting route 25 is problematic for anyone in the Roanoke Park area not able to walk up the hill to Harvard to catch a 49 downtown or down to Eastlake to catch one of the 70s. It also makes a commute to the UW more difficult as there would now be now direct route. One would have to go to the U district and transfer. The lowered level of service already on 25 makes the commute more difficult, but if one can schedule well, it's manageable. Having no 25 would be a real barrier.	5/15/2015 8:45 AM
490	If this route is going to be split the 45 should run just as often as the 48. It will still be equally busy as people will still need to ride that bus and therefore should run just as often.	5/15/2015 8:39 AM
491	This is the only route to service its area. Changing the 26 local's path will force me to walk over a mile to Fremont to catch the nearest bus to get to work every day.	5/15/2015 7:55 AM
492	#16, 316 only buses from the west side of Northgate to downtown Seattle. #16 takes 1-1/2 hours from downtown to 105th Meridian off Northgate way. Buses are slow and don't run often. If the #16 and #316 is discontinued for this route I would have to take 346 to go to Northgate transit center transfer to 41 to downtown Seattle and transfer to #1 or #13 or D line to 3rd and Ceder and walk to the waterfront which will take 1-1/2 hrs and three hrs daily for five days a week.	5/14/2015 11:27 PM
493	Keep it going downtown from Northgate Transit Center via Roosevelt and East Lake Avenues.	5/14/2015 11:12 PM
494	I provided my feedback earlier in this survey. I would like more details on the stops the new 28X route is going to make in order to better understand how a I would get from East Ballard to Fremont or South Lake Union by bus and how long that will now take since I would need to transfer buses. It's also not clear in the literature if the frequency of the 28X will increase during peak hours and if the ride will be longer if e.g. there are additional stops, since today, it makes no stops between Market and 8th until it gets downtown. Will it now be stopping all along 8th until Leary and will it stop somewhere between Leary and 39th? It takes me over 30 minutes to get to the International District from NW 65th in the morning commute and I'm concerned that my ride is going to take considerably longer if it starts making more stops.	5/14/2015 10:47 PM
495	The changes to the 28 and 28x seem unrelated to the new light rail and make the service much worse. Having the same route number sometimes go to Broadview and sometimes not would make the transit difficult to take. (This will be especially the case if the buses to different destinations were interleaved.) It would be better to continue to use separate bus numbers for the separate buses. Also, the 28x is extremely crowded during peak commute hours, with typical standing-room only starting at 65th st. Adding additional stops on the "Express routing" south of 65th street will only make things worse, especially without the interleaved local bus service. A better approach for increasing reliability on the 28/28X 1) Have the 28X stop at every other stop along 8th Ave NW. 2) Add additional peak runs to the 28 and 28X using existing routing A good use of the Seattle funding would be to extend the 28 back to Broadview. This would restore the connection between Broadview and Ballard that is missing now. It would also provide service to Fremont and South Lake Union.	5/14/2015 10:36 PM

496	I am NOT in favor of the deletion of route 242. I would accept the changes if route 542 was extended to Northgate TC (some or all trips).	5/14/2015 10:28 PM
497	Loss of #71 will be felt, we use this to travel downtown reliably - parking is hard downtown, driving often not an option - #71 travels in evenings - schedule is fairly predictable New #16 might take a long time getting downtown New #941 van only operates once/hour and not at all in the evenings. A better connection between NE Seattle with the new U Light Rail seems like a priority	5/14/2015 9:35 PM
498	These are the 2 routes that provide me access to Capital Hill, Portage Bay, Cascade, and downtown without needing to take multiple buses and backtracking. Unless the buses arrive every couple of minutes, the need to travel away from my destination and then transfer to another bus or train will add what I estimate to be 10-20 minutes to my trip, which would make it unacceptably long.	5/14/2015 5:58 PM
499	If you insist on getting rid of the 43, please consider extending the new route 45 further south. For instance, over the montlake bridge, south on 24th, west on aloha, south on 19th to at least thomas. I live around 17th and John - a very densely populated part of capitol hill with a lot of UW students and professors - the 43 is 90% of all my metro bus rides, and I'm a daily rider. Walking or busing to the capitol hill station adds much more time on my journey as the Husky stadium stop is nowhere near the law school building (43rd and 15th) that I need to get to everyday. Walking to the 48 is my next best option (and it's not a fun walk to hike back from), but the walk turns a 20 minute commute on the 43 into a 30 minute commute - potentially longer as timing my arrival is more difficult the longer the walk, and even with increased frequency on the 48, it can't match the frequency of having two bus options for going to UW from capitol hill (and vice-versa). As another option, consider an express bus along 23rd ave.	5/14/2015 5:55 PM
500	This is an important route downtown for many of us in Montlake. If you live between Eastlake and 23rd Avenue East, you have a long way to walk to get to transit, let alone new University Rail Station. I know it now has a smaller number of users, but I would guess it would increase with the rail station completion. If you could at least wait 6 months after the station opens and re-assess this it would be great. Thank you.	5/14/2015 5:23 PM
501	Consider small reroute changes to prevent these buses from getting stuck in traffic. The 8 is always sitting on Denny Way going east in the evenings. Is there a way to take the bus in the same direction but on a different arterial route? This is a huge problem in actually using the 8 to get anywhere from 5-8pm on weekdays (which is currently impossible no matter how many trips are added to its schedule). The 43 is great but is slow going east at the same time on weekdays because other buses must squeeze past on narrow John St.	5/14/2015 4:51 PM
502	Please do not eliminate route 25. Those of us who live in NOrth Capitol Hill will need it to get near the UW train station. It's 1.5 miles uphill to the Capitol Hill Station, and 1.5 miles uphill from the UW station to north capitol hill. Not feasible except with a bus to the train station.	5/14/2015 4:27 PM
503	More bus runs for this route.	5/14/2015 3:40 PM
504	Former Route 16 served the transportation needs of the general workforce and retired Seattle residents who need access to and from North Meridian and the Greenlake area. The proposed route changes (16 & 26X) eliminate access to this area and thus, I can't support these Metro changes.	5/14/2015 3:27 PM
505	With the deletion of this route what is the alternative for people who live in the U district and work in Lake City? And by living in the U District I mean up the hill not in the U Village where 372 passes through. I see no easy route than to use multiple buses and dramatically increase my travel time for what should be a straight forward trip.	5/14/2015 3:08 PM
506	Please do not eliminate #71 east and west on NE6th Street.	5/14/2015 2:57 PM

507	We rely on Route 25 which runs by our house on Boyer by Portage Bay, and takes us to downtown (appointments, shopping, entertainment), connects to SeaTac airport light rail, and gets us closer to the UW for senior citizen Access classes and University District banking. It is too steep a hill to walk over the top of Roanoke Park to Eastlake or Harvard to catch buses there, and too long a walk to catch Montlake buses on 24th. There are many retired folks who have spent much of their adult lives in this neighborhood, and eliminating Route 25 leaves us without an accessible bus route to and from our neighborhood. Please reconsider!	5/14/2015 2:11 PM
508	These buses are both so crowded - by the time they leave the park and ride they are completely jammed and often leaving people behind. Hopefully adding additional options in NE Seattle improves that. It would be really nice if the peak times were extended to run a little longer in the morning and start a little earlier in the afternoon.	5/14/2015 1:27 PM
509	30 minute headways on the 8 are not acceptable at night. This route connects Seattle's cultural capitals, Capitol Hill and the Queen Anne theater district. The ridership at night more than justifies 15 minute headways.	5/14/2015 1:23 PM
510	See previous comments....	5/14/2015 12:44 PM
511	Keep it! It is busy and convenient.	5/14/2015 12:27 PM
512	More connections from the Eastern part of wedgwood, Viewridge, Sand Point via montlake to the new UW light rail station.	5/14/2015 12:24 PM
513	This route runs along a narrow residential street in Greenlake. We are upset in the proposed increase happening. It will make our neighborhood a highway. It is unacceptable. Please work with us to find an option that is fair to the homeowners on Meridian and adjoining streets.	5/14/2015 12:01 PM
514	Disappointed that the proposed 520 bridge service streamlining & funneling toward the Montlake Link station will not occur. Thought that the proposal for this was well-thought-out, and had hoped that no longer running 255 service all the way downtown would improve reliability during the evening commute. The delays & bus-bunching associated with the leg of the trip that heads downtown are so significant -- 20-30 minutes on some evenings -- that they outweigh the extra-time and extra-transfer inconvenience of using Link from downtown up to Montlake & switching to the 255 there.	5/14/2015 11:55 AM
515	As I read the map, I see no service on the Boyer/Furman street, an extremely busy street providing access to the Eastlake/University corridor and the 23rd Ave UW/CapHill corridor. Boyer/Furman is over 2 miles long. The reason the street is so busy is that it provides a MAIN EAST/WEST corridor. Ballard is now built up considerably, but there is absolutely no service between Madison Park to Ballard on the street that everyone uses to make that trip (Boyer/Furman, over University Bridge, west along NE & N 40th to Leary). Route also provides a connection between the northeast Seattle neighborhoods/Children's Hospital and the Montlake area. Relying solely on a North/South and East/West pattern necessitating transfers and waits, without taking into account frequent traffic patterns of the common places people go, will not encourage transit ridership.	5/14/2015 11:53 AM
516	12: you say this service is more frequent than it really is. Please monitor the buses with GPS to find out if they are operating as frequently as you advertise. 11: you say this will be the only line operating on the Madison corridor. If the Madison corridor goes through First Hill then there should be more than one line operating there, as this is a very busy area and it would be a major inconvenience and time constraint -a logistical nightmare for handicapped patrons. 43: although parts of this provide duplicate service in certain areas I like having the option of two different lines as I try to get to work in a timely fashion. With only one line come the problems of delayed or missing drivers forcing people to wait in difficult weather situations. 48: pretty much the same as my comments for the 43. If you would really have the 48 coming more frequently, to make up for the lack of a 43, I would be all for it. However, in practice, only one line on a route usually translates to fewer buses.--a lesser frequency.	5/14/2015 11:51 AM
517	As noted in prior comments, I have a concern that the new plan fails to take into account the likelihood that passengers from north heading to downtown will get off the 16 at Stoneway and 40th and transfer to the 26X. This will allow them to avoid slow route through Fremont, etc. The problem will result in overload of 26X buses at this location. What planning has been done around this likelihood?	5/14/2015 11:46 AM
518	Please retain Route 25, or provide something similar. The 25 allows riders to easily get to Eastlake and the University Link station and bus transit hub. Route 25 is one of the few routes that serves the residences between the two north south corridors of Eastlake and 23rd/24th and the University, as well as providing service to University Village and Children's Hospital. It also runs right past my home, which I appreciate. I anticipate using it more as I age and eventually have to give up my car. Please consider that there is plenty of North/South service (thank you!) but relatively little East/West service.	5/14/2015 11:32 AM

519	I use these routes frequently and I think the changes are acceptable. I do wonder what the 66 service on 5th Ave will look like with moving the 67 to Roosevelt and if the frequency for getting folks to the UW will work out for people who live along that corridor. Since the 66 doesn't quite go right through campus and requires some walking, it is not quite as convenient as the 67 current route though they could transfer to a 73. By not having the 67 go through the UW campus will also add a bit more burden to folks, though they could also transfer to the 73 or other routes that go through.	5/14/2015 11:18 AM
520	Please continue to route through Kirkland park and rides	5/14/2015 11:18 AM
521	My thoughts about the elimination of the 43 are summarized in the previous section.	5/14/2015 11:14 AM
522	I am shocked that you would state you knowledge the need for better east/west connections and then you eliminate #25 - the only east/west connection that serves Montlake neighborhood. We need to connect to the East - to our Eastlake bus service - and West - to the University Link station and bus transit hub. Route 25 is one of the only route that serves the residences between the two north south corridors of Eastlake and 23rd/24th and the University. It also gets us to U Village and Children's Hospital. There are TONS of North South routes but very few that serve East/West - please reinstate #25	5/14/2015 11:10 AM
523	Please DO NOT DELETE 25! Cut it if you must, but it is an important route to U Village, downtown, University district, and Children's hospital. The extra service on the north south routes is USELESS without a way to get east-west in the Capitol Hill, Montlake, Portage Bay/Roanoke Park neighborhoods.	5/14/2015 11:08 AM
524	Please see my comments about having the 45 run on 15th instead of University Way. I am concern about University Way becoming overcrowded -- overcrowded sidewalks and bus stops that do not have the capacity that those on 15th have, and having extremely crowded buses since changes in the 71,72,73 are taking buses off University Way	5/14/2015 11:02 AM
525	I support the east-west route from Green Lake to Sand Point.	5/14/2015 10:49 AM
526	These are about the only bus routes that I ever take. They are about the only ones that stop near my house. PLEASE DO NOT DELETE THESE ROUTES! IF THESE ROUTES ARE DELETED, I MAY NOT BE ABLE TO TAKE THE BUS AT ALL!	5/14/2015 10:33 AM
527	I currently use route 43 and am disappointed it's slated for deletion. I live on 16th Ave E and Republican and work at the UW, as do many individuals in this part of Capitol Hill. Many of us get on route 43 on the Thomas/John area, and this convenience will be lost in the proposed model. Adjusting route 48 to access 19th Ave E or offering a different way to get closer to the 15th Ave area for people who are traveling toward the UW would be a good solution. As of now, it seems that this group (those who live in the 15th Ave E area) loses with the proposed changes.	5/14/2015 10:24 AM
528	I think the proposed 8/38 split should happen at the Mount Baker transit center because that works better with routes I typically use.	5/14/2015 9:56 AM
529	The residents of Meridian Ave. N, between N 64th St. and N 56th St. request that you move the #16 bus to Green Lake way. Our street is TOO NARROW for these huge buses and cannot handle more frequent buses on our street! If you add buses every 7 to 15 minutes it will be a joke!!! They'll backup a mile long on our little street! They belong on the wider street, our street should nothing more than a bike lane! NO ONE SLEEPS THROUGH THE NIGHT WITH THE NOISE OF THE BUS, OUR HOUSES SHAKE AS THE BUS GOES UP THE STREET, WE ARE AFRAID FOR THE CHILDREN OF NEIGHBORHOOD AS THESE BUSES GO FASTER AND FASTER ON OUR RESEDENTIAL STREET!!!! PLESASE DO THE RIGHT THING HERE, AND JUST THE MOVE THE BUS OFF OUR STREET!!!! WE HAVE PETITIONED METRO TO MOVE THIS BUS AND BEEN TOTALLY IGNORED! START LISETENING TO THE PEOPLE OF SEATTLE WHO MAKE UP YOUR NEIBORHOODS!!!!!! PLEASE!!!! WHAT DO WE HAVE TO DO TO GET METRO TO LISTEN TO A LOGICAL REQUEST????????? Judy and Doug Martin	5/14/2015 9:32 AM
530	Please reconsider deleting the early morning service on the 72.	5/14/2015 9:28 AM
531	The current 271 route does not allow easy transfer to SR-520 Buses as it cannot service Evergreen Point Station. It would be helpful to move this route to Bellevue Way / 112th Ave NE / SR 520 between BTC and Evergreen Point Station to allow for better transfer with other SR 520 routes. The Alternative - 1 proposals for 271/45 through route and truncating 271 at Eastgate should be included in the Final Plan	5/14/2015 8:28 AM
532	Please keep 71, 72 and 73 the same, or have one to downtown still. This proposal would eliminate 3 route options for my commute	5/14/2015 7:55 AM

533	The increased frequency of route 16 through single family neighborhood, on narrow streets which currently cause driving to be run off the road by metro buses, is extremely dangerous. Already the buses are poor neighbors, they do not give the right of way to pedestrians, they drive down the middle of the road running cars off the road, they speed through the neighborhoods to make up time, they pollute and they are infrequently used by people residing in the neighborhood.	5/14/2015 7:47 AM
534	The changes proposed to 31 and 32 seems fine; just continue to have a stop near the PCC in Fremont!	5/14/2015 7:16 AM
535	43 - is a valuable route covering a large area. Not all people are able to walk very far to use light rail at the UW or a combination of 48 & another route	5/14/2015 6:48 AM
536	Changing the morning start time of the 73 to 6:00 am greatly impacts my neighborhood as there are several residents that are employed by the University of Washington and depend on the 73 to get to work on time. This would mean changing works hours , that effects child care etc. and have a very negative impact. It is only one hour however on the riders end this is very significant.	5/14/2015 6:14 AM
537	Increase peak hours frequency, ridership will increase.	5/13/2015 11:26 PM
538	The proposed changes look great.	5/13/2015 11:22 PM
539	Like the changes to #8. Don't like the changes to #11. Was hoping to get the rapid ride + current 11	5/13/2015 11:22 PM
540	As mentioned in my previous comment, please do not route all these bus routes away from their current path through main UW campus. Montlake Ave. is far too crowded during rush hour. The proposed approach will likely add at least 10 minutes during rush hour for anyone needing to travel to West Campus (i.e. buildings near 15th Ave. NE) or anyone needing to connect to the East Side buses, such as 271 or 542. Improvements in service on the 372 will be erased by these delays, making overall travel times much slower. Please reconsider this choice.	5/13/2015 10:31 PM
541	As I stated previously, I request that you retain the weekend service for the 73, even with less frequency. I personally ride the 73 mostly on the weekend to go from Pinehurst to the U-District.	5/13/2015 10:17 PM
542	I stated this earlier in the survey but didn't realize I'd have an opportunity to comment specifically about one route. Please reconsider the Alternative 1 routing for route 70. It would be the only way Eastlake residents would be able to take advantage of the light rail. The current route going halfway into the UDistrict is not terribly useful when better services and shops exist in South Lake Union and Downtown. As an alternative one may consider, is having route 70 terminate at the University Village which could give access to the University Link station and access to a supermarket and other shopping.	5/13/2015 9:36 PM
543	The effect of deleting route 43 means that residents in Montlake and along 23rd Ave. between Montlake and John now loose out on a direct bus connection between this area and downtown Seattle. This will have severe impact on these residents' commutes, forcing them to either accept extended commute times or take alternative transportation. The extended commute times will come from either having to transfer to the new Link rail, or to an alternate bus that crosses 23rd Ave. If they choose Link rail their commute to downtown will be in the tunnel prohibiting online access and forfeiting valuable work time during their commute. If they choose alternative transportation, their most likely form of transportation will be by car. This will increase congestion during peak hours that will impact all commuters within that area. Please rethink this decision and accommodate these residents and provide them with realistic public transport solutions!	5/13/2015 9:25 PM
544	I realize the 43 route is a pain in the neck for Metro, and I know that because I ride it every day, twice. But it's always crammed with commuters, even early in the morning. I don't see how my trip to work is going to be easier if I have to take two buses and a train to replace the one bus I take now--even if those buses are frequent.	5/13/2015 9:21 PM
545	I do not support the proposal to cancel/delete the 43 route. It is the primary route I use to get downtown. I do not believe that the increased number of transfers I will have to make with these proposed route changes will be made easier by increased frequency of these proposed routes. It will take me as long, if not longer, to get to my destinations, especially since I would then have to walk further to those routes' bus stops. These changes will push me to ride my bike more and forgo using the bus.	5/13/2015 9:10 PM
546	Route 12 is a very important route to take people from Capitol Hill to the southern part of Downtown. Route 43 is very important route to take people from Capitol Hill to the the U-districts.	5/13/2015 8:38 PM
547	Thank you for preserving service along 19th Ave East. There's new development along there, and existing users, who rely on the 12, and will use the 'new 12' as well. With increased frequency and the elimination of the "first hill only" turnback on some trips, which served to confuse novice riders and make them less likely to use the service, more riders will take advantage of the service. It will be nice to have easy access to Link at Broadway, and central Broadway business district itself, from the new 12. The inbound turn from 19th to John -- that will be a tough one to maneuver I would think.	5/13/2015 8:17 PM

548	<p>The currently proposed changes to Route 16 should be REJECTED. This route goes right in front our home on Kirkwood PI N in between N 57th St and N 59th St. There have been numerous complaints and petitions from our neighborhood that the road is too narrow for the bus and the bus should be re-routed. It is dangerous and will be more dangerous with increased frequency. This is a residential area and the buses drive very fast and are very loud. Increasing the frequency of this route coming through our neighborhood is INTOLERABLE. The bus is mostly empty except during peak commute hours especially at night. It is unfathomable that this bus would come through the neighborhood every 15 minutes after 10pm rather than every 30 minutes - no one will sleep. When the bus comes to a stop - the houses around here shake and the brakes are extremely loud. I do not understand who would be commuting from Green Lake to Sand Point - there must be better options to address this need than increasing the frequency of Route 16. Do not do this. I do not approve of the proposed changes to Route 16 headed from Greenlake to downtown. It will drastically slow down my commute on the days that I take the bus. This does not seem reasonable - please keep the route on Aurora. I cannot begin to describe how upset the neighborhood is about the proposed changes to Route 16. They should be rejected. This route should be rerouted to Latona and not come through this residential neighborhood. I regularly have to pull my car over to the curb to allow the bus to go by, these streets are not meant for the bus.</p>	5/13/2015 7:54 PM
549	<p>The Broadview neighborhood only has a peak period bus. For this, or any, proposal to benefit me, or my neighborhood we need a bus route. This bus route was the Metro Route 28 north of Carkeek Park.</p>	5/13/2015 7:49 PM
550	<p>I'm sad the 12 will no longer provide service on Madison to downtown. However, if I understand the proposal correctly, this will be replaced by more frequent service on the 11, which would be VERY helpful. Increased reliability and service on the 8 will help users access critical social services (ie Bailey Boushay House).</p>	5/13/2015 7:46 PM
551	<p>Please don't cut service to North Seattle College at Northgate. This proposal does not have any route that would be a good replacement. The 26 is too far east.</p>	5/13/2015 7:35 PM
552	<p>I need route 11 to continue to run after midnight. I often get off work at 5TH and Union at midnight. Route 43 must continue in order to provide an option for those going to Capitol Hill, 23D AVE and the University District. Route 8 should not be split into two routes. Requiring riders to wait for and board two separate routes is a major inconvenience, decreases reliability and penalizes the lowest-income workers from South Seattle.</p>	5/13/2015 7:21 PM
553	<p>Stated earlier but worth repeating: the existing 12 route is our only route from central Capitol Hill to the medical offices on Madison and to the south end of downtown. The new routes give us multiple ways to get to central downtown (Link, 10 and 12 bus routes) but eliminate the access to Madison and south end of downtown. Please keep the 12 route to lower Madison!</p>	5/13/2015 7:17 PM
554	<p>Route 71 is the single most convenient route for me. You are eliminating it without providing a viable alternative. This bus was one of the reasons I moved to Wedgwood. Your decision to eliminate it makes me angrier than I can say.</p>	5/13/2015 7:08 PM
555	<p>The Boren & Yesler stop is one of the few left that stops from the University of Washington within a half mile of my home, and makes my commute significantly less painful. As someone with muscular issues, losing this stop would be a significant problem and have me rely on alternate transportation.</p>	5/13/2015 6:39 PM
556	<p>66X and 67: I don't like that you are essentially taking both of these routes off of 5th Ave NE. You have made it very difficult to get to the Northgate Transit Center. I have had four hip replacements and will be having a fifth one in a few months, and I also have RA so I can't walk far or ride a bike like you assume everyone in Seattle can do. Running the 67 down Roosevelt in Maple Leaf is going to be problematic (and not fast) because it's already been reduced to one lane in each direction because of the bike lanes that the city has installed there. There is no place for the bus to pull over so all of traffic is going to be backed up because of that. I think you should run a bus down 5th Ave NE that goes to the Stadium Station until 2021, and then you should route that bus to the Northgate Transit Center. I hope you are planning on reconfiguring your routes so that you make it easy to get to the Northgate and Roosevelt transit centers once the light rail makes it to those locations in 2021? Please say you are!!!!!! You've made it really hard to get to the Northgate Transit Center with these route changes.</p>	5/13/2015 6:16 PM
557	<p>Splitting this in Two makes sense. Running the north part of the route (the 45 section) down University Ave. is STUPID. 15th is a two-lane road, each time I am on that bus is gets filled with students catching it from residents north and EAST of 15th going to the medical center.</p>	5/13/2015 6:04 PM
558	<p>Late night northbound runs must operate from Mt Baker station in order for me to use transit. All trains departing Seatac after midnight only go as far north as Beacon Hill station, so if 8's terminus is at 23rd and Jackson then there is really no other option left to get to the Central Area and Upper Capitol Hill north of Jackson St during those hours. Even for those living near Jackson it's pointless, because the proposed 38 stops operating early. This makes the use of the light rail pointless for anyone living in dense residential areas north of I-90. It is critical that 8 operates as far south as Mt Baker station and that at least the last northbound train from Seatac connects with route 8 at Mt Baker. Frequency is not so important after midnight, as long as the last train at least connects to route 8.</p>	5/13/2015 5:58 PM

559	ST 545: Additional late trips past midnight on Fridays and Saturdays. Not being able to get back late on the weekend is the #1 reason that I take the bus into the city. A trip at 12:30am or 1:00am would be awesome.	5/13/2015 5:48 PM
560	Please retain service between sand point and Seattle Center and between sand point and University Way and UW campus.	5/13/2015 5:46 PM
561	I do not understand your rationale of removing the 16 from Northgate to send it to Magnusson Park. Northgate will no longer have direct access to the heart of the Wallingford/Stone Way entertainment and shopping district. No, the 26X is NOT a suitable substitute, as it crosses 45th at the sketchy end by I-5, almost a MILE from where the 16 currently hits 45th. It completely avoids the restaurants, shops and theaters on 45th between Meridian and Stone Way. I will not be willing to take 2 buses just to get home to Northgate from Wallingford late in the evening, and will most likely have to go back to driving instead. Is that what you consider an improvement? This entire project was supposed to be about making things more frequent and convenient for your paying customers. Removing/diverting routes is completely counter-productive in that respect, especially ones that do not have a reasonable alternative.	5/13/2015 5:43 PM
562	As an occasional rider of the service from the University District to Redmond, I am dismayed that no changes have been proposed for route 271 to serve the Evergreen Point freeway station, nor has any off-peak service from the University District to Evergreen Point been offered by this agency or by Sound Transit. Evergreen Point was a critical transfer point for university riders heading to the Eastside, and no adequate replacements have been provided.	5/13/2015 5:37 PM
563	THIS ROUTE IS THE ONLY WAY TO GET TO SLU WITHOUT GOING DOWNTOWN FROM MADISON PARK AND MANY POINTS SOUTH. HAS ANYONE LOOKED AT THE TOPOGRAPHY BEFORE PROPOSING THAT YOU CUT OFF ANY TRANSPORTATION AT THE VERY TOP OF THE HILL?	5/13/2015 5:18 PM
564	I would like Route 30 to be continued even if it runs just once an hour as its removal will makes travel direct to the University District difficult.	5/13/2015 5:13 PM
565	Very, very, very happy to see increased service on 372X---it is overcrowded on weekdays, and it would be great to have it on weekends. Please clarify (proposal is contradictory) whether route will travel on main campus or circle it via Pacific.	5/13/2015 5:09 PM
566	Please maintain bus service in Montlake. The 25 is a route that goes down many streets in Montlake that are not close to any other routes. Please reconsider deleting this route. Without a car it is imperative to have buses in Montlake. Also, I am sad because I always vote for transit, and recently voted for Seattle only increased bus services so I really don't know why this route has to be deleted.	5/13/2015 5:03 PM
567	Leave this route alone. Its serves my needs on Madison St via First Hill to and from downtown Seattle. You are already proposing too many changes to accommodate the Cap Hill underground station. Can't you newbies just stop fussing and fidgeting with the current routes ? Do any of you actually even ride these routes ..or do you just pay exorbitant fees to "consultants" to marginalize and restrict our current routes ? Ride the buses and see for yourself where people are going !!	5/13/2015 4:45 PM
568	Removing the downtown stops for the 64X will absolutely impact my commute. And removing the 71 & 72 erase all options I have if I can't take the 64X. I will continue to take Metro and use the light rail because it is the only way I can get to work downtown. But these changes add 1 - 2 connections to my commute and make any stops much farther from my home and work. I understand the reasons behind these changes, but I feel that removing the downtown stops for the 64X will negatively impact half the riders who take that route. It is quite an addition to commute time, connections and distance to stops. I am happy for the expansion of light rail, but very disappointed about the impact it will have on me and my neighbors.	5/13/2015 4:38 PM
569	I would like to see more frequent service to and from Magnolia during peak hours.	5/13/2015 4:31 PM
570	I do not like the changes to the Route 11. It will definitely put me back in my car to commute to work. It will not convenient to get to the downtown core to transfer to the monorail or another bus.	5/13/2015 4:19 PM
571	See earlier comments. Keep the 43!	5/13/2015 3:44 PM
572	I and numerous others in Portage Bay and Montlake voted for the new tax hike to avoid deletion of routes like 25. Despite my raised taxes I will now be without a bus route.	5/13/2015 3:37 PM
573	66X: Eastlake and NE South Lake Union will not benefit from 66X route change. Route 70 are not reliable during the peak time.	5/13/2015 3:22 PM
574	Again, you are not considering the older and/or disabled adults with mobility impairment. We have difficulty getting on one bus let alone multiple buses because of new transfers. Getting to the Northgate Mall and intermediary places, especially medical facilities must be considered.	5/13/2015 3:13 PM

575	372 is often VERY crowded depending on whether the UW is in session. Glad to see improvements to eliminate overcrowding and increasing frequency of trips!	5/13/2015 3:12 PM
576	It's okay to get rid of the 43, but only as long as the 12 takes up the slack heading along Bellevue and up Olive Way.	5/13/2015 3:00 PM
577	I prefer service on this route to and from U. of WA campus and Broadway.	5/13/2015 2:53 PM
578	Please keep its current route. It serves all of the people in Columbia Tower and the city and county workers in City Hall and King Co administration. The two new office buildings being constructed on Madison and Marion will lose an advantage if you eliminate the current route and have it mimic the 10. thank you	5/13/2015 2:52 PM
579	I would rather see the service hours used for route 49 on Pike/Pine instead used for improved frequency between the U-District and Capitol Hill Station.	5/13/2015 2:38 PM
580	The 12 serves Capitol Hill to the hospitals on First Hill, to the library, to the government buildings and the southern half of downtown better than any other route from Capitol Hill. The 10 can continue to serve Pike / Pine and the north half of downtown. Perhaps the 12 can go south on Broadway from John to Madison. I do like this 12 proposal better than when the service was eliminated.	5/13/2015 2:15 PM
581	My main problem is shifting route 12 off of Madison and on to John/Thomas Street. I live in North Capitol Hill, and this change would make it impossible to get to the south end of downtown (e.g., 5th and Madison) without changing buses or walking an additional six blocks or so. Route 12 would then become a duplicate of route 10. I realize that this change is proposed in order to have a stop at the new Capitol Hill transit station, but why not just leave route 43 in place? I use Route 12 a lot, but I would not use it if this change were made. I also object to the elimination of Route 43. I use this route to get from downtown to parts of Capitol Hill that are not serviced by Route 10. Route 43 also lends added frequency to the Capitol Hill service provided by Route 10. If I am traveling from North Capitol Hill to the SeaTac airport (particularly with luggage), I would not use the new Capitol Hill transit station. It would be much more convenient to take Route 10 down to the 5th & Pine station and pick up the light rail from there. Moreover, I travel to the airport infrequently -- no more than once per month -- whereas I take Route 12 down Madison several times a week. The proposed change in Route 12 would be a major inconvenience to me. PLEASE DO NOT MOVE ROUTE 12 AWAY FROM MADISON STREET!	5/13/2015 2:13 PM
582	Deleting the Route 43 bus saddens me greatly. It suggests that no-one at Metro has looked at the topography of Seattle. Yes, the Route 12 is relatively close to the current route 43, but getting to the 12 (especially on the way to work), means a big up-hill slog that leaves one sweaty--not the way to start the work day. Please reconsider the #43 route.	5/13/2015 2:07 PM
583	Please bring back the Cedar Street stop! It was very useful since I work a mile from downtown.	5/13/2015 2:03 PM
584	64X is fantastic -- I love how fast it goes along 65th St. My favorite bus by far.	5/13/2015 1:35 PM
585	Please Please Please improve evening and Sunday frequency for the 8. Evenings and Sundays are when events occur at Seattle Center (theater, opera, ballet, SIFF, etc.) and without more frequent service, I will drive to these events as I do now, or take Uber, because nobody wants to wait a half hour for the next 8 to show up after attending one of these events. It's late, and there's a decent chance it's raining out, and people just want to get home within a reasonable time frame. As you know, parking at Seattle Center is tight and/or expensive. You want less cars down there, so help us to use transit to get from Cap Hill to Seattle Center and back, in the evenings, by making the evening (& Sundays) frequency attractive.	5/13/2015 1:34 PM
586	I travel from 15th E to NE 45th every day on the 43. I can not walk hills so the proposed changes means that I would have to add a transfer to my bus route making my commute both longer and less predictable. The removal of the 43 route will most likely mean I'll need to move or drive to work every day. As a home owner I doubt I'll move as I like capitol hill. This will just add another car to the street.	5/13/2015 1:32 PM
587	#8 bus needs to run more frequently during peak hours. Bus often is way too full, which makes travel times very unreliable.	5/13/2015 1:30 PM
588	This route going away must be made up for in areas where the light rail is not stopping. Metro must not abandon city of Seattle riders!	5/13/2015 1:19 PM

589	<p>I know I have said this earlier in my survey, but I didn't realize this was the place to input my comments/state my case. Please, pretty please, do NOT delete route 30. I, along with many other commuters, take this bus to and from work at the NOAA main campus and other stops every day. There are a lot of NOAA commuters that would have a very difficult time making so many connections, as well as making the long walk to/from the 75 bus stop. The 75 route is not convenient (or physically possible) for NOAA commuters as some of them are handicapped and cannot walk the 0.4 - 0.5 miles to and from (from is a very long, uphill walk) the 75 bus stops every day. My route 30 buses to and from work are crowded every day, so much so that some riders do not have seats and have to stand. I understand that changes need to be made, however the 30 does not go near Husky Stadium and it's daily commuters would be in a terrible position, many having to drive to work, adding to the traffic problem. The 75 does not wind through the Sand Point neighborhoods as the 30 does, leaving a lot of commuters on my route to have to make multiple connections as well. I attended meetings and lobbied for all my friends, family, and acquaintances to vote for the bus legislation last year, in hopes that my bus route was not discontinued. This seems like it was a complete waste of my time and energy, as you were proposing to cut this route for the lightrail, which many of us will never use. If the 74 would go both ways in the morning and afternoon, to accommodate all of the NOAA commuters I would be okay with the changes, but as of now, there are only 74s going the opposite direction of the NOAA commuters. Our route was already cut to mornings/afternoons, and it is not a good choice to completely eliminate it. I am happy to do whatever it takes to keep it going. Please consider your fellow government employees, contractors, and the handicapped when making your decision to keep the 30 running. Thank you very much, Kristin Fonte</p>	5/13/2015 1:18 PM
590	<p>The Route 16 through Greenlake is extremely bothersome and dangerous. We have signed a petition as a neighborhood providing examples of the very limited space, the fact that cars have been struck by the bus numerous times and the fact that other streets in the area are wider with more space. The specific route is where 16 turns off 65th and goes down Meridian Avenue North through Tangletown. The street is narrow and does not allow for two cars to pass, cars have to wait for the bus to drive through AND the bus constantly strikes parked cars (hopefully it will not be a child or a biker next). The petition was submitted by our neighbors, Doug and Judy Martin, doug@martinenv.com (206) 527-1741. Did you not receive it? We feel our voices are not being heard. Why does the bus need to travel down a street that is entirely too narrow and very dangerous, loud, noisy.</p>	5/13/2015 1:15 PM
591	<p>Changing the 11 makes NO sense. Offering NO reasonable way to get to the Mt. Baker Rail to the airport is unacceptable.</p>	5/13/2015 1:14 PM
592	<p>extend service into the early evening so I can take transit home from the university</p>	5/13/2015 1:11 PM
593	<p>30 provides service in the corridor that I need. 71 and 76 are the only routes that service neighborhoods north of 65. Honestly, I am not clear about all of the changes so cannot comment intelligently at this point.</p>	5/13/2015 1:10 PM
594	<p>The 30 route is the only bus available to NOAA and it's employees. Your proposals do not provide for commutes out of Tacoma. Currently, I take 2 buses to get to work, your proposal leaves all of NOAA without any public transportation.</p>	5/13/2015 1:09 PM
595	<p>The proposed changes are great!</p>	5/13/2015 1:08 PM
596	<p>Canceling the 43 will be difficult for me as it is my primary connection between Madison Valley/Central Area and Capitol Hill/Downtown. The increased frequency of the 11 should help, but I worry about overcrowding and future reductions in service.</p>	5/13/2015 12:53 PM
597	<p>The changes to routes 16, 74X, and 75 do not provide the convenience of route 30 between the U district and Sand Point.</p>	5/13/2015 12:42 PM
598	<p>I have viewed the proposed changes (Alternative 1) for my bus routes and am really disturbed. At this time the #9 is a short walk from my home to go south. I really don't want to have to transfer from the #49 to get the #9. Please keep the start of the run at Aloha/Roy. And I definitely do not want to walk north or transfer from Madison to get downtown from the 49. It's absurd to have to transfer to get to the downtown core from Capitol Hill. Please don't delete the Pine/Pike section of the current route. I'd rather wait a few minutes than have to go out of my way to do the things I used to do with ease. Metro has been serving me well, but if these changes are made my bus riding future looks worse. And I have to say, I probably won't take advantage of this expanded Link service through Capitol Hill. It's wonderful to use to get from downtown to the airport, but for me it is superfluous. Hopefully, I will still be able to ride Metro with the same convenience I do now. I saw no information on an Alternative 2, but if it will keep the #9 and #49 routes as they are now, then that option gets my vote. Thank you.</p>	5/13/2015 12:32 PM

599	The 8 is frequently late, which is disappointing because it is the only bus that goes from some areas of the Central District to Broadway in Capitol Hill. When it is nice out, I can just walk there, but when it is dark, cold, and/or rainy, then I really need the 8 to be running on time and frequently. So many people use the 48 and it is ideal for people who work or study in the U District, but live in Capitol Hill or the Central District. I think many people would appreciate an increase in service. In an ideal world, you could stand at the 48 stop (without a smartphone with one bus away app) and know that a bus would come within just a few minutes. I look forward to the day when people seamlessly use buses and the link and praise Seattle for its efficient and cheap transportation. Unfortunately now, it seems as though we have many late or crowded buses and some of the highest fares in the country.	5/13/2015 12:25 PM
600	I am very angry about your proposed routes! They are not respectful or considerate of the people who live in these neighborhoods. In particular route 16 runs past our house at ALL hours of the day and night. Its loud, its smelly, its FAST!!! The whole house shakes -- I mean really! There are families and lots of people who walk and bike and it's dangerous. We have asked repeatedly to have it moved to a wider more bus appropriate street. ARE YOU LISTENING! There is ABSOLUTELY NO reason for me to even use this route! Its very easy and convenient for me and everyone else in the neighborhood to walk over to Latona or 65th park and ride and pick up a bus to anywhere. You should kill this route -- it makes no sense to have it run through Green Lake and ruin the quality of life for the people who live there.	5/13/2015 12:19 PM
601	Please just don't take this away!	5/13/2015 12:18 PM
602	48: it's very good that you're increasing the frequency of this route. I suggest running every 5-10 minutes throughout the day. 75: it's very good that you're increasing the frequency of this route. I suggest running every 5-10 minutes throughout the day. 941: Should run every 15 minutes, not every 60 minutes. At the 60-minute frequency, you are not likely to have sufficient ridership.	5/13/2015 12:13 PM
603	With the high frequencies of Link (including evenings, night, and weekends), it would be great to have the revised 8 better serve Capitol Hill station during these "off-peak" times.	5/13/2015 12:05 PM
604	I catch the 372 in Woodinville. I can catch it in Bothell however there is not enough parking in Bothell along the 372 route. Is there a plan to increase parking space for bus users in Bothell?	5/13/2015 12:01 PM
605	I do not understand why you have to change route and time table of any bus lines that serve North Seattle. North Seattle (or North of U district) would not have any access to Light Rail till 2022. Please wait to mess with any of bus routes that serves this area until any light rail station after University of Washington stadium is opened. This creates more inconvenience for residents that you may think. Please limit any change to Capitol Hill and downtown area, as well as any parts of city that will have light rail in 2016. Any change in non serving area is just a waste of time + money for now.	5/13/2015 11:55 AM
606	How about extending the 10 North through Boston, Fuhrman, Montlake to UW?	5/13/2015 11:48 AM
607	Having Routes 31 and 32 would directly impact my route because I rely on the Stoneway and 40th stop to get to school. I know several individuals who rely on these routes stopping on Stoneway to get to UW.	5/13/2015 11:48 AM
608	Will Route 16 provide service similar to current Route 71 between 54th NE & NE 65th and 15th? While the population riding the bus is not high the service is important for access to campus and the University District? It is not clear that routes 16 or the DART will provide people along the NE65th corridor easy access to the light rail station at Husky Stadium. If the 71 could be maintained until the completion of the station at Roosevelt this would allow people from Hawthorne Hills and View Ridge a more efficient transition to the light than discontinuing the service now.	5/13/2015 11:35 AM
609	Your alternative solutions to eliminating Route 72 is not acceptable. You've eliminated service to a whole community. Without access to a "convenient" bus stop -- something less than a half mile away will prevent my use of Metro. You obviously do not care about serving this community.	5/13/2015 11:27 AM
610	If route 72 has to be cancelled, why couldn't the only remaining route 372 still serve a loop between Lake City Way and 25th ave NE via Ravenna ave NE?	5/13/2015 11:02 AM

611	<p>This is a repeat of what I said earlier, but worth emphasizing in my opinion. I voted for Prop 1 in November because I believe in mass transit and am a firm supporter of it. I had no idea I could be voting to have my bus service on route #26x diminished and the proposed change to this route seems ill-advised. If you haven't heard from other 26x riders, I suspect it is because, like me, they'd never imagine anyone would change what is probably one of the best functioning routes in the City! This route currently operates at peak (congested rush hour) times only. It functions VERY WELL, albeit is often very crowded (standing room only) by the time it departs it's last southbound stop at the north end of the Aurora bridge, before getting onto Aurora towards downtown. In other words, it is consistently filled to or nearly to capacity. The same is true northbound around 4:00 pm and onward - standing room only heading out of downtown. My first concern here is that by eliminating route 26 (non-express) altogether, many route 26 riders would use the 26x, further overcrowding it. The route 26x buses typically are punctual, with the punctuality understandably diminishing somewhat as rush hour progresses. That is to be expected in the late afternoon because bus drivers who have carried riders to the north-most point on the route (Greenlake) then turn around and head back south through rush hour traffic to pick up the next load of downtown riders. My primary concern with the proposed changes to route 26x is that having #26x go so much further north to Northgate to drop riders before coming back downtown during the evening commute seems like a way to ensure significant delays - and reliability and punctuality will become a thing of the past. Sometimes I take the 355 x at the end of the day, and it suffers from having to fight its way back downtown during rush hours from further north and - as a result - not infrequently is 25-45(!) minutes behind schedule during the afternoon commute. PLEASE DO NOT CHANGE Route 26x to extend it to Northgate. That is what the new Link service to Northgate was supposed to do! I do not believe your Metro + Link proposed changes will "improve service" for current 26x riders (like me) who already pack ourselves into our buses going both north and south during rush hour, but are happy to do it because the bus is so reliable. You risk rendering dysfunctional one of the best functioning routes in the City! Please reconsider! Thank you.</p>	5/13/2015 10:59 AM
612	<p>Please do not cancel Route 72. Please see reasons in an earlier comment on this survey.</p>	5/13/2015 10:44 AM
613	<p>I think the proposed changes from the northern part of Route 48 to the new Route 45 are very poorly planned. I ride the 48 every day, and there are two locations at which the vast majority of riders either board or depart: UW campus firstly, and Roosevelt High School secondly. This proposal moves the route further away from both campuses, which does not make sense at all. Additionally, University Way NE ("the Ave") is a major bike and pedestrian corridor, whereas 15th Ave NE is a major transit corridor with large covered stops and ample room for buses. If you go to 15th Ave and NE Campus Parkway or 43rd Ave NE on any weekday afternoon, you will see that far more riders are waiting for the 48 at those stops than for any other route. Why would you choose to move the 48 away from those nice stops on campus that are so heavily utilized, and onto a local street that definitely does not need more traffic? I'm also a frequent bicyclist and pedestrian on University Way. The sidewalks on that street are already crowded. There is no room for the large volumes of 48 riders to stand around there the way that we currently do at the spacious stops on 15th Ave NE. And as a cyclist, it is already difficult to maneuver safely around the buses already operating on the Ave. For all of these reasons, I'm very opposed to the proposed rerouting of the current 48 route through Roosevelt, Ravenna and the U District.</p>	5/13/2015 10:30 AM
614	<p>DO NOT REMOVE ROUTE 68</p>	5/13/2015 10:27 AM

615	<p>The proposal for Route 11 is seriously problematic, and the list is neither short nor trivial. - If the idea is to be 11-as-proto-BRT, this runs a major perception/PR risk. Not only can the all-Madison 11 risk turning off current riders by degrading current service, but turn away future potential riders too. Without the absolutely necessary upgrades in transit and street infrastructure, running the 11 in this manner makes little sense. Public support will dissipate, and with it, support for SDOT funding. - The current 11 route is slow, but it is tolerable along Pine St. and at the very least directly connects to Link at Westlake Center (and runs in 'close enough' proximity to Capitol Hill Station). The new route has no direct Link connection whatsoever (which is a flaw of the all-Madison BRT concept as well but not a fatal one -- 'close enough'). So, like terminating the 8 at 23rd and Jackson, this cuts off the utility and usability of Link at the knees. (Terminate the 8 at Mount Baker, please.) Riders east of MLK/Madison will particularly suffer. There's no reason at all to justify or accept a two-seat ride to Link for a system that is positioning itself as a provider of high-quality connections in the central neighborhoods of the city. (Yes, the East Madison neighborhoods are "central".) - Afternoon peak reliability will almost certainly be degraded beyond acceptable limits (even against the currently low standards) by traffic on Madison queueing up for I-5 via 6th Avenue. Pine St. may suffer from traffic turning onto and crossing at Boren Ave., but not nearly like the multi-block clogs that can stretch from 7th to perhaps Boren or in extreme cases, as far up as Broadway. The takeaway is pretty simple, really -- until dedicated-ROW investments can be made in support of the true Madison BRT, just leave the 11 routing as it exists now (either almost or fully intact) and make strategic increases to frequency in the peaks and peak-fringes (6-10am and 4-8pm) where possible. The current 11 is making the best of a poor set of options in the absence of major infrastructure investment. (It's worth noting that the 8/38 concept originally proposed in Alternative 1 was very creative, if perhaps in need of refinement.) The risk is overcrowding Pine St., but there's even a possible quick fix for that too: Pike Street all the way to Madison eastbound, and Pike via Bellevue to get to westbound Pine. The public information process for this has been both extensive and engaging. It is good to see Metro taking the time and opportunity to communicate with the riding public -- please know the effort is appreciated.</p>	5/13/2015 10:01 AM
616	Yes, yes, yes! We love the 47!	5/13/2015 9:58 AM
617	<p>While I like the proposal to further increase frequency for route 44, what would really help would be signal priority. Often times it is not the frequency that is limiting on the 44, but that it is routed down some very congested streets and often trapped in traffic. Anything to help keep the 44 moving would be very helpful.</p>	5/13/2015 9:57 AM
618	<p>30 is the main route serving NOAA. Although 74 goes into NOAA, it really doesn't do anything for most NOAA employees because it is a peak service running the wrong direction for them (only goes downtown in the morning and only to NOAA in the afternoon - just the opposite of most work schedules). The new 16 will provide a connection to downtown in a roundabout way, but misses the U district and thus the U District connections many need to get south of Seattle. NOAA employees are eligible for transit subsidies, but when most are asked why they don't take transit they say the schedules are not convenient. The proposed changes seem to be a step in the wrong direction. What is needed is (1) a direct connection between NOAA and the U District Link Station and/or U District (75 stops about 1/2 mile away from NOAA); and/or make 74 run both ways in the morning and afternoon which would have the added benefit of providing another route between the U District and Downtown during peak hours which is something any rider of 71, 72 or 73 can tell you is really needed.</p>	5/13/2015 9:51 AM
619	<p>Please keep #66 route in Eastlake area. The current #66 will take passengers from Eastlake area to downtown faster than bus#70. We need #66 service continues to go through Eastlake Ave. instead of I-5. Thank you.</p>	5/13/2015 9:48 AM
620	<p>Please do not run the 31/32 up Wallingford Ave (no development) instead of Stone Way (massive development). See my previous comments.</p>	5/13/2015 9:47 AM
621	I love the changes to this route. It will improve service to upper NE Roosevelt.	5/13/2015 9:40 AM
622	<p>Route 72 should be retained and increased to every 15 minutes during the week because it provides one bus service to the Roosevelt and North University District areas. The alternative is two bus service which is always slower than one bus service. Route 43 should be retained because it provides direct bus service to east Capitol Hill and especially the Group Health CH Campus. Older riders and those in the neighborhood are not going to use the Link. Routes 16, 65, 75, 372 I like the changes in frequency and routing for these 4 routes.</p>	5/13/2015 9:36 AM

623	<p>It's the splitting up of the Route 48 that concerns me. I understand the motivation, and I agree that the 48 has definite timeliness issues in the latter stages of its route in both directions. And mostly I use the 48 to travel between Ballard and Greenwood / Green Lake / University District, so the change wouldn't affect me often. But when I do use the 48 to travel to the Central District, what appeals to me is the lack of transfers. I could ride the D or the 40 to downtown and then use the 3 / 4 or another east-west bus -- and I'd often get to my destination faster. I prefer the 48 because I have to wait for only one bus to get me all the way to my destination. With the 48 split into two routes, I would have to disembark in the U District and wait for the next bus -- which makes me less likely to take transit and more likely to just drive alone. That's what has happened to my transit habits with the splitting of Route 75 into the 40 and 75. The 75 used to get me from Ballard to Lake Washington fairly easily, but nowadays the wait of transferring at Northgate makes me more likely to drive than to use transit to get to Lake Washington. (Although in fairness I should say that I love taking the 40 to get to Fremont and South Lake Union.) One other point on the 48: In the mornings, a huge annoyance of the 48 is the gazillion people who board the bus starting about 10 blocks north of UW and then get off before the medical center. The bus is very much slowed down by this local glut of short-distance riders. Sometimes I've been on a 48 closely following another 48, which leaves one bus to bog down in the UW passengers while the other bus can get on with the route. Other times my bus has simply skipped the UW stops and left those local riders for another bus to handle. So my question is: Do the proposed revisions make any arrangements for that local demand? If the 45 will be picking up just as many (or more) short-term riders on their way to UW and light rail, then it's likely to be late and I'll miss connections to the 48 at the far end of the U District. Do you expect the increased bus frequency or other routes to help deal with that local ridership? Could there be an occasional "express" 45 that skips the local rider gluts and travels efficiently through the U District?</p>	5/13/2015 9:31 AM
624	<p>24 - shorten the route and not go as far south as Tukwila for reliability. Improve frequency for 24 and 33 on weekdays from Downtown to Magnolia during rush hour. From 4:30 pm to 6:30 pm add 1 or 2 busses. Route D, my first bus from Ballard to town, is late every night so I miss my connection at Elliott W and W Prospect 90% of the time, which is the route 24 that is scheduled to arrive at 4:50 p.m. The wait for the next bus is a minimum of 25 minutes. This is frustrating because on any given day I will count at least 3-5 D buses traveling north to Ballard, plus at least 1, sometimes 2 route 32 and 15 and 18 Express. Also, something needs to be done about the signal at Elliott W and W Prospect. It is frustrating to miss a connection because the signal takes 2 minutes to change and my connection will take off because the driver cannot be expected to wait. I realize Metro does not control the light however if you spoke to the City Traffic Division they might listen.</p>	5/13/2015 9:12 AM
625	<p>Better service needed on these routes to downtown transit tunnel. Link rail isn't helpful on these routes.</p>	5/13/2015 9:10 AM
626	<p>The 28 needs to come more frequently, even with the proposal it seems like it's not increasing that much, and I don't know what combining 28 and 28x means</p>	5/13/2015 9:10 AM
627	<p>I would like to see the #48 bus continue south to Genessee. This would take twenty to thirty minutes off of my commute because it would connect with the #50 bus. Alternately, it would be great if the #50 bus would connect with the Mount Baker Transit Center. Then it would only take one transfer to get to the #8, #14, and #48 buses. Chopping up the #8 bus would have the same negative impact on SE Seattle as shortening the #48 bus. It would require an additional transfer.</p>	5/13/2015 9:07 AM
628	<p>More busses after 8am but not past 10am, more busses before 4pm and after 6pm</p>	5/13/2015 9:07 AM
629	<p>There really needs to be a park & ride option near the UW Bothell campus if you won't be taking the 372 to any of the Bothell park & rides anymore. As housing in the city is more and more expensive, more of us are moving outside of the city where it is more affordable. There isn't a good way for us to get work and these proposed changes will make it even harder. I already get up at 5am to make it to work by 8am. If this change goes through, I'll need to get up even earlier to drive further to a further park and ride.</p>	5/13/2015 9:05 AM
630	<p>Eliminating the 66 through the Eastlake Ave area is removing our one option when the 70 is late/behind schedule again. Increasing the 70 frequency is great if the congested areas where they are getting held up and behind schedule are fixed. Congestion on Stewart St up to 3rd puts the return trip late thereby putting them late the rest of the day. Yes frequency is great when trying to make bus and train connections don't get me wrong but there are more issues than that which need to be addressed in the high car/bus traffic areas. Cars still drive all the way down 3rd during bus only times and they muck up the traffic and todate I've not seen one car pulled over by the many bike police riding around 3rd ave or a traffic cop trying to releave the congestion. All entities need to work together to make any changes Metro plans to make work.</p>	5/13/2015 8:59 AM
631	<p>Electrify!</p>	5/13/2015 8:53 AM
632	<p>Increase the frequency of the 15X route. Enroute to downtown, one half of the bus must stand. Frequently, passengers are left at the bus stop as the bus is full. PM service is quite limited for time.</p>	5/13/2015 8:52 AM
633	<p>I think this route should continue service to downtown Kirkland as it is the only bus to provide direct service from UW to Kirkland.</p>	5/13/2015 8:52 AM

634	65 - Really love the increased frequency on this route, and like the new routing that takes it both through UW Campus AND straight past the new LINK station. Good work! 71, 76, and 941 - Very good solution with new 941 replacing 71. I do want to say that I live on 40th NE in front of all of these routes, and was looking forward to LESS frequency in Alternative A, because the buses shake my house and frequently sideswipe parked cars while speeding by. PLEASE work with SDOT on repaving and strengthening 40th Ave NE between NE 85th and NE 75th, and with drivers to SLOW DOWN.	5/13/2015 8:28 AM
635	Please go forth with the proposal to keep the #76 as is with additional commute hour trips as this is the fastest way to connect riders to downtown in the north Wedgwood area, particularly those that are east of 35th Ave. Buses that run along 40th ave NE are great in terms of distance to walk to a bus. As stated earlier, since the #71 is going away, it is essential to go forth with the #65 expanded service as planned otherwise people in Wedgwood have no alternative between north Wedgwood and downtown during off-hours. Also, once the #76 becomes a surface street bus, the best route from Wedgwood to downtown would be from I-5 south to the Columbia street exit and then run north along 3rd (or other surface street). The I-5 to Stewart, to 3rd, and then south takes a long time (similar to the current #64 route) and makes for a long commute time if you work closer to the Pioneer Square area. The reverse would hold for the evening commute.	5/13/2015 8:09 AM
636	I mentioned this earlier. I take the 48 every weekday afternoon. Service can be very bad. Last week I waited 35 minutes for an eastbound 48 at 15th NW and NW 85th during the peak commute time. I have ridden regularly with some drivers on the 48 who were always on time, so I know it's not just the route. I do realize that the route is very long and does have several choke points.	5/13/2015 8:04 AM
637	I hope that the 48 bus route is split in a way that allows me to take a single bus from Ballard to the UW medical center. Currently I'm forced to take the 48 from Ballard to the UW Medical Center, then transfer to the 271 to Bellevue. Obviously I would not be happy if I needed to take a new route 45, then a 48, then a 271 to get to Ballard. Ideally it would be great to take a single bus from Ballard to Bellevue so I don't spend an hour and a half commuting each morning and evening.	5/13/2015 8:00 AM
638	I have already mentioned you cutting of service to Woodinville. Please do not make further cuts. You do have riders and Woodinville is a good place of commerce and shopping, it doesn't make sense to cut us off further from public transit. Thank-you	5/13/2015 7:45 AM
639	You mentioned in the initial email that the Sound Transit routes will have changes, yet your survey doesn't even touch on them. What are the proposed changes?	5/13/2015 7:39 AM
640	Deleting the 43 is inconvenient to the neighborhood riders straddling Montlake/Madison Park/Capital Hill/Central District, along 23rd Ave. The Link Lightrail provides a direct connection between Capital Hill and University District, which is useful for the riders in either neighborhoods, but does not necessarily serve the riders in between -- deleting the 43 is a disservice to those of us who do live in between neighborhood hubs.	5/13/2015 7:33 AM
641	This bus is always late in the morning, not sure how the first run of the day can be late. Same driver for past 6 rotations. Driver spends alot of tiem talking to his buddies. It's so bad I will stop riding the bus in June.	5/13/2015 7:21 AM
642	8 is an extremely unreliable service. It means waiting 10-20 minutes for a bus to arrive and they are always late. You never know which bus is arriving since they never arrive around scheduled times and it means missing multiple connections as a result. If you have a scheduled arrival somewhere, you must go out and wait for the 8 at least 30 minutes before-hand in order to catch a bus, since you don't know when they will arrive and can be sure that if you try to follow the schedule you will be significantly late to your destination. Since I began taking the 8 as part of my commute home at night, I have added 30-45 minutes on to a 2 hour commute.	5/13/2015 7:18 AM
643	More frequent reliable service; split up West Seattle routes that continue on to Ballard, Greenwood, and any place north of canal bridges, i.e., C should not become D, they should be separate routes. More reliable and frequent West Seatte bound routes.	5/13/2015 6:47 AM
644	As someone who lives along Boyer in Portage Bay, the 25 route is critical for the people that live in the area. Removing it will force a 20+ minute walk up and over I-5 along Roanoke to Eastlake or a 20+ minute backtracking to UW station which doesn't even serve SLU. All that is honestly needed would be an 8 and 9 am bus and a 4, 5, 6 pm bus each way. That would likely be 90% of the route riders. The 25 to downtown has every seat filled at 8 and 9 am and the 25 to UW is similarly filled at 5 and 6. The massive delays of the 5 and 6 pm buses hurt ridership, I'm sure.	5/13/2015 12:16 AM
645	To have one or both set up with easy transfers to Capitol Hill.	5/12/2015 11:46 PM
646	Please don't combine the routes. It appears service to downtown will be slower. Also, please consider running trips all day up to 145th.	5/12/2015 11:45 PM
647	I like this service and heard that changes could be to move onto Aurora, via 39th. I'm ok with that as long as the stop at 3rd NW stays - that's my stop.	5/12/2015 11:02 PM

648	I like the proposal to consolidate the route 28 and 28X. But - it looks like the proposal has changed from earlier. Why? Its not explained in the narrative.	5/12/2015 10:56 PM
649	Please don't reduce the service of the 41. It is fantastic.	5/12/2015 10:42 PM
650	I'd like the 11 to have a connection to light rail on Capitol Hill and I'd also prefer it remain on Pike/Pine downtown (rather than all-Madison). Of the current route 11, previous alternatives 1 and 2, and this proposal, this proposal is the LEAST preferable.	5/12/2015 10:40 PM
651	Route 8: I appreciate the increased frequency. Route 12: I appreciate that it replaces much of the deleted route 43 and provides an east/west connection on Capitol Hill. Route 49: I appreciate that this proposal maintains route 49 service on Pike/Pine	5/12/2015 10:15 PM
652	I want the 11 to still actually take us (those of us east of the hill crest at 23rd Ave.) to Downtown, by which I mean close to Westlake Park, and see no value in routing it just on Madison, which is a very single-purpose route. Downtown routing is multi-purpose. I preferred the older 11 Madison routing that included downtown, then swung south and gave access to the Ferry Terminal. That worked well until it was extended and the schedule became erratic.	5/12/2015 10:08 PM
653	8 ==> Split should access either be at Mt. Baker Transit Center OR Group Health Capitol Hill (16th & Denny) to reduce the number of connections needed to access North Capitol Hill. 11 ==> Needs to have reliable connections with 10 on 15th Ave E. to allow access to Volunteer Park and Interlaken Park from south Downtown (i.e. the Madison corridor). 12 ==> Late night access on weekends in order to accomodate Sporting events (i.e. Baseball or Sounders); could be seasonal only on game days but would be helpful to have a reliable bus following a game until about 1 AM. Other ==> First Hill Street Car should Late night access on weekends in order to accomodate Sporting events (i.e. Baseball or Sounders); could be seasonal only on game days but would be helpful to have a reliable bus following a game until about 1 AM.	5/12/2015 9:44 PM
654	I am happy with the new consolidation of the 26/26X and the new routing. I am concerned about reliability with the extension to Northgate as well as capacity during the morning rush hour. How are you planning to ensure both reliability and capacity on this route?	5/12/2015 9:41 PM
655	See my notes in previous questions	5/12/2015 9:38 PM
656	I live on 31st Ave NE and currently use the 74, 65, 71, 76 routes. With the proposal to delete Route 71, and the 74 and 76 lines operating only weekdays during peak hours, how can I get to the University District (The Ave) at off-peak times or weekends? Will I have to transfer at 15th Ave NE? How close will the 372X route get me to the UW Link station?	5/12/2015 9:37 PM
657	Have route 43 and 49 through-routed via CHS. Heading south, the 49 would keep its current routing until John St (CHS) where it would turn east on John and become current route 43. This connects the 10th Ave E neighborhood and the Montlake neighborhood with CHS while eliminating redundancy with Link if the 49 were to remain in service. Also, this gives Montlake riders only one transfer to downtown instead of the proposed two transfers.	5/12/2015 9:34 PM
658	The 43 should be continued as a link to serve the area between the Capitol Hill and University Link stations. 23rd ave E and E John is not a good spot to have to change busses with a hill between stops and having to cross an intersection with long poorly timed lights. Eliminating the 43 will cut off the connection to Capitol Hill and downtown for a large area either forcing backtracking to the University stop or forcing multiple connection from the 48 to the 8 to the light rail to get downtown. This is a huge gap in your proposed service.	5/12/2015 9:33 PM
659	Please keep route/schedule as is. Having to transfer to LINK at the UW Station is very inconvenient.	5/12/2015 9:33 PM
660	12 - get rid of it. 16 - this is a game changer! can't wait.	5/12/2015 9:26 PM
661	How about making the 76 have all day service, just with fewer buses off-peak? That way Roosevelt students can get home and Wedgwood residents can still get downtown without having to transfer. In addition, I'm confused on how Wedgwood residents get to UDistrict during off-peak hours.	5/12/2015 9:22 PM
662	Better weekday night service, please. 30 minute headways is inadequate for this busy route linking major close-in neighborhoods and Seattle Center which have lots of restaurants, bars, attractions, events and nightlife.	5/12/2015 9:19 PM
663	My only concern with the proposed change to the 26 route is that the 26 might become as unreliable as the 16 southbound. The 16 southbound is late a LOT. It is late on weekday mornings; it's late or sometimes doesn't show on weekends and evenings. I have no idea why. The weekday morning 26 and 26X southbound are usually on time, frequently down to the exact minute. If the extension to Northgate makes the 26 as unreliable as the 16 I am going to be really really annoyed.	5/12/2015 9:14 PM
664	Please reference my earlier comments re: Route 28 and 28x.	5/12/2015 9:10 PM

665	are you aware that there are 650 additional housing units being planned around the Issaquah Highlands? are you planning additional bus service for this area? Every day, I ride buses with 20 to 30 people standing from Seattle to Issaquah Highlands	5/12/2015 9:06 PM
666	I commute from the Northgate area to Bothell for work. I would like for these buses to run more often. It would ease the number of people who ride toward Bothell. Some days it is standing room only. I have a significant wait going to work and coming home. The buses are slightly late in the morning, but the evening commute is horrendous. The wait can be 20 to 330 minutes and most of the time it is because the bus is constantly late.	5/12/2015 9:02 PM
667	Improved frequency during the nighttime on this route would be extremely helpful.	5/12/2015 8:42 PM
668	This plan for 520 seems uninspired and costly compared to the previous Alternative 1 plan.	5/12/2015 8:35 PM
669	Please reinstate peak hour service with the 19.	5/12/2015 8:30 PM
670	I would love it if the frequency of the 71 was increased!	5/12/2015 8:09 PM
671	For me, the 65 is not nearly as attractive of an option as it was five or six years ago, due to the long detour to the Children's hospital that adds ten minutes to the route. I would personally like the old route to be restored, although if it helps many more people than it hurts, I am fine with it.	5/12/2015 8:08 PM
672	See comments above. Taking the 16 off of Aurora is a cut in service which will make the trip take longer and be less reliable. This is a decrease in service that seems to have no reason for being whatsoever. As I said above, this change means that I will be less likely to use downtown for shopping or for cultural events and it definitely means I will not vote for additional taxes for transit.	5/12/2015 8:00 PM
673	312: chronically overcrowded commuter bus, sometimes in AM skips stops south of 125th Street due to overcrowding. 24 & 33: chronically 20+ minutes late in AM going north, chronically overcrowded in PM heading south, these route need more frequent service badly. 312 needs more frequent service during later commuter hours in both AM and PM.	5/12/2015 7:55 PM
674	I commute home on the 8 almost every day, and am regularly frustrated by the huge variation in bus arrival times and long waits during rush hour; anything you can do to improve it will be a huge win!	5/12/2015 7:41 PM
675	Northgate to Wallingford & Fremont: Currently the #16 serves the north end of the mall on NE Northgate Way, where several senior living centers are located (on 3rd NE and 5th NE). The stop on NE Northgate way beside the Petsmart is always in use by seniors and those in mobility scooters, to access the hospitals and clinics along Meridan Avenue. You are completely eliminating this segment and replacing it with nothing. This is neither helpful or more frequent service. For those of us going further, to Green Lake or Wallingford, we must now make our way to the Transit Center - a good 15 minute walk for a fit person, in order to catch the replacement line, the 26X. You are replacing a service that currently runs 3 times an hour with one that runs twice an hour. Again, neither helpful or more frequent service. Unlike the 16, which runs down Meridian Ave N to NE 45th street, and along NE 45th for all the shopping and restaurants, you propose using the 26X which goes down Latona Ave NE, and crosses NE 45th just by I-5, almost a mile away. This effectively bypasses the best part of Wallingford! So, no direct access to Wallingford from Northgate any longer. Great, more diminishment of service. I see absolutely NO benefit for passengers in Northgate with the reroute of the #16. This also has nothing to do with the UW Stadium light rail station opening. You are just messing up connectivity in Northgate SIX YEARS before the station there is due to begin service. This is just incomprehensible. Elimination of the #68: While I see the #67 reroute will cover some of this eliminated route, what are people who live on NE 75th St between Roosevelt and 25th Ave NE going to do for a bus? Have you seen how steep that hill is? Do you realize that the 372 on 25th Ave is always standing room packed during peak commute hours? Also, with this change there will be no bus route between Northgate and UW Village - yet another shopping area eliminated for those reliant on public transit. Please explain to me your rationale for making all these changes to bus routes that run between Northgate and the UW area, when they have no bearing on the UW light rail station opening to serve all points SOUTH of there. With the exception of tweaking timetables for more efficiency and less overcrowding on existing routes, no route changes should even be considered until the Northgate light rail opens in 2021. THEN some of these changes might be justified, but not until then. With each and every route change north of the Montlake Cut and the new UW station, you are creating the need to change buses at least once where before there was just one bus ride. You are also making people walk further, which has a deeply negative impact on the elderly and disabled. This is NOT what I voted for when allowing you the extra revenue to IMPROVE bus service! You propose deleting SIX bus routes from the UW northward, yet the 4 routes you are creating (reviving) are all SOUTH of Montlake. How is this an improvement? How is this expanding bus service since getting all that additional funding from sales tax and car tab fees? How are we supposed to take you seriously? This is NOT acceptable, unless you are planning on encouraging more people to drive to work.	5/12/2015 7:18 PM
676	How does someone who can't walk very far get from campus to the rail station after traveling by bus	5/12/2015 7:12 PM

677	The 76 and 71 are great options for people in Wedgwood especially near 85th & 40th ave. the proposed changes to the 71 during non-commute hours leave no options to get downtown without lengthy transfers or driving and parking somewhere. There needs to be a better alternative from north Wedgwood to link to the stadium light rail station. It's great that the 76 would not change.	5/12/2015 6:56 PM
678	I just moved to Maple Leaf in November 2014 under the assumption that this route would continue to run since it has been running for the past 20 years. I rode this route in high school when I attended some day camps, I rode the route when I first moved to Washington and got my first job in 2006, and now I'm riding the route since I'm a homeowner in the area. I suppose there is some sentimentality tied up in seeing the bus ride go away, but the route provides a benefit to those commuting to Microsoft who want to walk directly to their office. Going via OTC adds yet another leg to a long commute. I just got married, too. I don't want my commute to be longer and force me to be away from my wife even longer. If the 242 is cancelled I may have to go back to driving my car and paying the 520 toll.	5/12/2015 6:47 PM
679	I think there should be a service every hour on the mark. I'm appreciative of what operates.... but I wish there was still a bit more.	5/12/2015 6:35 PM
680	What will happen to this route during the non peak hours - I found the site confusing. It looks like it will be going away,	5/12/2015 6:34 PM
681	Getting rid of the 43 before Brooklyn Station opens is a mistake. The 8 will not be any more reliable since Denny will still be Denny so not only are you asking people to trade a one seat ride from eastern Capitol Hill to the University District for a connection, but one of those buses will be horribly unreliable. And the connection will be unpleasant since you have to cross two streets. This change makes me a car commuter.	5/12/2015 6:33 PM
682	read my previous note- I thought that was what I was doing	5/12/2015 6:27 PM
683	more # 70 buses and later end time. should have buses leaving downtown until 9 or 10 pm instead of the current 7pm 71,72,73 are overcrowded between 7-9 PM because the 70 stops. I work around mercer ST and live on north eastlake ave and it can be hard to catch up bus home right around 7pm	5/12/2015 6:23 PM
684	The #12 is used by many people. I live right off of Madison by Swedish Hospital. For people that go to First Hill will need to walk many more blocks to their destination at Seattle University, HMC, Virginia Mason, Swedish Hospital; and other clinics in the area.. There are many people that use #12 to visit and have appointments at the hospitals. I don't think there was any consideration for people that have disabilities and for people that are discharged from the hospital. What are they supposed to do if they don't have friends or relatives to pick them up ? The #60 is not a viable option.	5/12/2015 6:22 PM
685	67 - Nice that this will be more frequent (especially if the 68 is being deleted, since some of us need to get between the UW Seattle campus and Northgate TC (well, further north, actually, but..)). And I suppose it'd be useful to people to have it connect to the LINK station, but is there any way to do this and still have the bus go through campus first? (I'm not looking forward to losing the Stevens Way part of the route.) 68 - I'm kinda bummed that this is being deleted. The recommendations to "North of NE 75th Street, use revised routes 67 or 373X. South of NE 75th Street, use revised Route 372X." aren't super helpful if you need to go from, say, U-Village to Northgate TC.	5/12/2015 6:04 PM
686	As mentioned, the 50 needs work in the seaward park area. It seems like a local rainier valley/seward park bus, running on a loop, to connect to rainier, mlk and light rail would be a great addition. Would be nice if #27 could rise from the ashes. It is the only bus to where I work, and the only way to get out of this neighborhood (leschi)	5/12/2015 6:04 PM
687	Burien to UW bus service is needed as well as more frequent service is needed in Burien-DesMoines area as soon as possible!	5/12/2015 6:02 PM
688	Routes 12 and 47: Consider swapping the proposed frequencies on these routes to reduce duplication of service along John Street with routes 8 and 12. Route 65: Consider extending route to the layover Metro built at 143rd & Linden to provide cross-town route along 145th Street and connections to Rapid Ride E and the Sound Transit service on I-5.	5/12/2015 6:01 PM
689	I am concerned about the deletion of route 71 b/c I take the bus everyday to downtown mid-day from 40th Ave & 75th St. I'm aware I could use the 65 and the light rail, but I don't know if this will be efficient. I'm aware I could use the 941, but it doesn't seem to operate often and I'm nnot sure how reserving pick up times will work out in practice.	5/12/2015 5:59 PM
690	People rely on this route. Removing it creates a large chunk of residential area between 35th ave. and Sand Point with no access to bus service. Many riders I see as I ride on this route (nearly every day) are elderly, and I myself am disabled; other routes would be prohibitively far away. It would be a really awful thing to do.	5/12/2015 5:55 PM

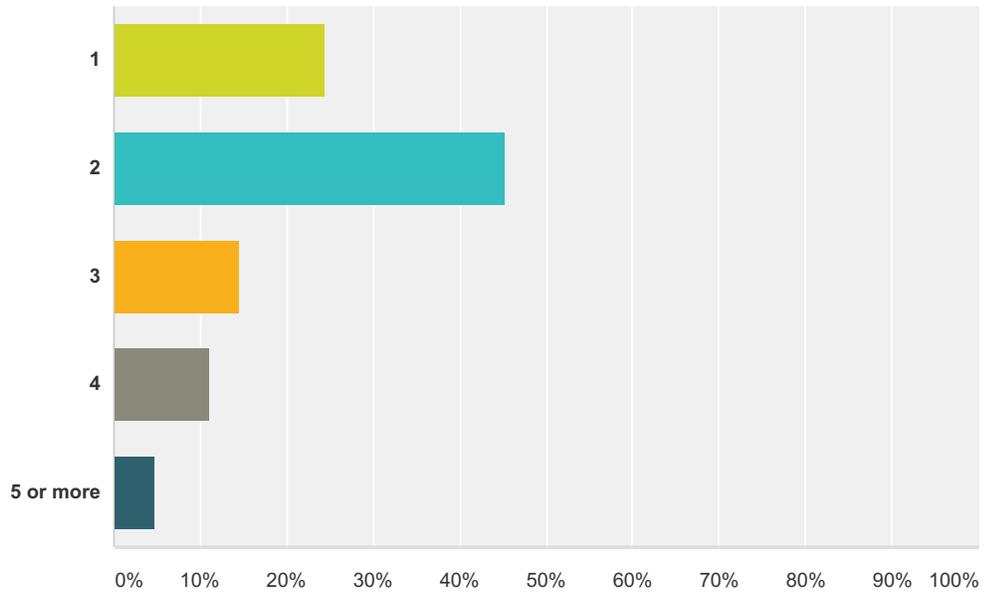

691	I see that the 67 will be covering Roosevelt north of 80th - a wonderful change! Finally getting 7-day/week service, and later service is what we've been wanting for years! thank you! I don't think you should eliminate the 72 at all. Why bother running the 372 on weekends, when it goes an entirely different way? Changing the number, and not covering certain areas? Not a good plan.	5/12/2015 5:54 PM
692	Please increase service 7 days a week on routes 12, 41 and 73. I bought my first car last year because of infrequent Sunday bus service on these routes. Now I drive more often -- which is much nicer than waiting at a bus stop with someone smoking pot. When Northgate link opens I will probably use that. In the meantime, I will probably drive to the U District and Capitol Hill from LakeCity/Pinehurst area.	5/12/2015 5:53 PM
693	See my earlier comment at this page: http://metro.kingcounty.gov/programs-projects/link-connections/have-a-say.html Here is the comment I wrote there: As an older person with no car, I can now take the #31 directly from Magnolia to Campus Parkway during midday hours, then stay on the bus as it becomes the #65 and travel to 35th Ave NE and NE 82nd Street (Seattle Audubon), where I typically need to go to purchase 25 pounds of birdseed every six weeks. Breaking direct link between the #31 and #65 would add as much as an hour to a trip that normally already takes an hour and a half at minimum, and would mean having to board and reboard buses while carrying a heavy load around on the return run. No faster alternative ways to get from Magnolia (where I live) to NE 82nd Street exist. I do appreciate the fact that service levels on the #31 have been maintained, but do not like having the direct connection with the #65 broken and ask that this through connection be maintained. Please keep me informed as you continue to revise the forthcoming changes. My email is: essay@nwlink.com -- thank you.	5/12/2015 5:53 PM
694	AS one of the many riders of the Rt. 277 Metro needs to keep this rt. for the people on the eastside who live in the Kirkland/Houghton/Kingsgate areas. What is Metro going to do with the Houghton P&R? I hope you plan on keeping that park and ride so anybody who goes to the University has a place to park. I have been told that the South Kirkland P&R is already out of room by 8:30 A.M. Your planners need to get there act together and listen to the riders of Rt. 277	5/12/2015 5:51 PM
695	Do not change the local 73.	5/12/2015 5:51 PM
696	Thank you for (1) keeping service on 19th and (2) getting us downtown near pine or pike.	5/12/2015 5:48 PM
697	The changes to them are awesome!!!!!! They will make using public transport to/from/around Sand Point and the rest of Seattle WAY more feasible. I can't wait.	5/12/2015 5:48 PM
698	Please don't discontinue this route. It is our only bus service. Route 65 is a 10-minute walk away so it doesn't matter how often it comes. How about a shorter bus and a shorter route? From NE 65th & 15th Ave NE east-west to 50th Ave NE? Or from the University station north and east on NE 65th St.	5/12/2015 5:47 PM
699	See my comments I already made. This route should not be discontinued except possibly to stop the the new UW link station rather than going via University Ave and then to downtown. Shortening this route would save money but would maintain a very important route for View Ridge, Wedgewood, and Bryant.Route 941 is a poor substitute and the DART system cannot compare to regular bus service. DART is good for elderly people in the community that need limited rides during prime daytime hours. It simply cannot provide the service needed for this area.	5/12/2015 5:47 PM
700	We have no way to get anywhere without 71....there are steep hills on 65th in all directions and to walk those hills , five, six blocks.....oh this is horrific!!	5/12/2015 5:47 PM
701	Either keep route 72 and route that to the light rail station at Husky Stadium or have route 372 go up and down Montlake Boulevard instead of routing it on to the UW Campus and FORCING passengers to have to walk across the campus because that is BS. Right now route 72 passengers have a direct route to downtown Seattle and you now want to make them walk across the UW campus to transfer to light rail. I repeat that is a bunch of BS or bull shit.	5/12/2015 5:45 PM
702	My response is in reference to the 12. In my opinion, the 12 offers a great service for people to First Hill. I catch the 12, heading downtown, at 19th and E. Mercer. By the time the bus gets to 19th and E Madison, it is standing room only. This occurs between 7-9am that I have personally witnessed. There are elderly and handicap riders that take that bus for easy access to the hospitals on First Hill. Having to walk up from downtown is not as user friendly for those riders. The 12 also services people going to Seattle University, O'Dea and hospital workers. I work near Virginia Mason and LOVE taking the bus to work as it is fast, and saves on gas and high parking prices. in my opinion, people traveling east to west are not likely to use the north to south new transit system. I have absolutely no use for it in my travel needs. Not having the 12 as my transportation to work will force me to drive to work in my car by myself and pay the high parking price.	5/12/2015 5:42 PM

703	It's still not clear how the revised #11 will affect the stops previously served by the #12. Rapid service from Capitol Hill to Downtown is great for able-bodied folks who can get to the new light rail station. How will folks on South Capitol Hill (Madison from 19th through Broadway) get to the library? Seems like there are big gaps now on the south part of Capitol Hill.	5/12/2015 5:40 PM
704	This route (41) is frequently packed and when leaving downtown during rush hour, most of the time it just drives through Convention Place Station because the bus is full. The timing of this bus is odd as well. They tend to stack up back to back and the full/late bus continues to become more full/late because of the amount of people waiting for it. I don't understand how pacing between buses gets so skewed considering that downtown is where the 41 route starts, so being late due to traffic probably shouldn't be a factor. Also it would be convenient if more of the 41 routes went all the way to Lake City.	5/12/2015 5:37 PM
705	The 73 should connect to the triangle parking lot bus stops at the UW Medical center instead of making a loop through UW. The connection to the Husky Stadium Link Station isn't clear and looks like a hillclimb connection.	5/12/2015 5:35 PM
706	The 11 needs a seamless transfer between the 10 and 11 to given access to Pike/Pine downtown. This could be done at Broadway Ave E or at 13th East by have the 11 go on Pine the south on Broadway Ave E or 12 Ave E, The 8 needs to be split at CHS so that the performance improves because of the Denny parking lot!	5/12/2015 5:29 PM
707	8: We need a stop closer to the light rail on McClellan (headed South on 23rd)	5/12/2015 5:26 PM
708	I use route 25 every work day. It is often standing room only in the morning. I strongly oppose cancelling it.	5/12/2015 5:25 PM
709	See earlier comments. It is clear that you do not want to address the real demand of people who use the 26, even as we continue to get taxed more and more to support Metro. Your solutions are not going to meet the needs of the people who use the 26/26x. Congratulations on serving a population that doesn't pay as much for bus service and chooses to live outside of the city. I pay more to live in the city and yet my bus service gets reduced as my taxes go up.	5/12/2015 5:24 PM
710	This is regarding route 73. I live at NE 123rd st and 15th Ave NE and my husband work at UWMC. He currently takes route 73 to get to work on Saturday and Sunday for his shift that starts at 6:30 AM. Your proposal, despite of people wanted to have more weekend service, cut off his method of transportation. What this means is I have to drive him early in the morning on what you considered as people's "weekend". New proposal for route 73, which would be effective in 2016, clearly ignore any people who work at Medical Center and live in north of Northgate way. Hospital operates 24/7 and there are quite large group of employees who live in north Seattle area. By having this new proposal, you're forcing them to drive to University instead of currently way of them taking bus. Also this would increase vehicular traffic on weekend (Sat and Sun) to univeristy district for people who would like to go to games, as well as farmer's market. I believe you're new proposal actually enforce people to drive more on Sat and Sun by cutting route 73 on those two days and show that you do not care for people whose only method of transportation is Metro. Please bring back route 73 weekend runs even if it is hourly. Thank you for your consideration.	5/12/2015 5:23 PM
711	Please do not eliminate route 25	5/12/2015 5:23 PM
712	Route 43 provides direct service between Capitol Hill and UW that is not duplicated by any other routes for the area in Capitol Hill around 15th Ave. I think this route should be maintained.	5/12/2015 5:23 PM
713	Leaving the 255 to downtown is the right decision. Forcing Kirkland riders to UW Link station would have resulted in a three-set commute and unacceptable transit times. The revised 540 route to the heavily underutilized Houghton P&R is a wise decision.	5/12/2015 5:23 PM
714	Would like this route to be more on a schedule, 10 min bus apart	5/12/2015 5:22 PM
715	The proposed changes to these routes have significant negative consequences for my neighborhood, and are a big step back from the excellent changes proposed in Alternative 1. Instead of frequent service to a variety of destinations around my neighborhood (including connections to Link, Broadway, and Pike/Pine) the new proposal includes overlapping services that provide connections that are *less* frequent than the bus service I have today. On Sundays the new proposal has a bus to Capitol Hill Station and businesses on Broadway from my house every half an hour, assuming that the 8 can somehow run reliably. Today, I have 15 minute service on the 43 *in addition* to the 8 for that same trip. My access is being cut by 67%. Even if I include a walk to the new 12 I'll still have only *half* the level of service that I have today. This is ridiculous for an area that your materials are promoting as having multiple "very frequent" routes. With the rerouting of the 11 my neighborhood also loses direct access to the Pike/Pine corridor. A trip that serves the heart of the corridor today would now stop several blocks away or require a transfer for the last half mile. The 8/38 proposal in Alternative 1 did a much better job maintaining this connection.	5/12/2015 5:20 PM
716	Needs more frequency	5/12/2015 5:18 PM

717	Needs to run more often than currently	5/12/2015 5:18 PM
718	Please fix the constant, consistent delays with these routes. Every single day, these routes are late by several minutes, and it really hampers my commute to and from work.	5/12/2015 5:14 PM
719	We need this route to stay the way it is so high schoolers from Garfield and Holy Names can get to near Roosevelt High School to get home.	5/12/2015 4:27 PM
720	More frequent 49"s would help with very crowded buses at morning and evening rush hours.	5/12/2015 4:27 PM
721	This route serves an important demographic of people, seattle based workers commuting to the eastside via public transit. It helps to remove congestion from 520 and saves riders money by not paying tolls each way. Additionally there are not other routes that can be used that offer the stops in Redmond of the 242 and cross over from Seattle. The 542 is NOT an alternative for those many workers that work along 148th (Tableau, Microsoft, Nintendo, Honeywell, etc), as it doesn't drop off on 148th. Cutting this route will add cars to an already full SR-520 as riders will no longer have an acceptable public transit alternative.	5/12/2015 4:08 PM
722	Aside from the previous discussion on how the Dexter rerouting will suck for Wallingford riders, the different day/night/weekend routing on the eastern end of the route in Sand Point seems confusing and unnecessary. Pick one corridor or the other.	5/12/2015 3:25 PM
723	The combination of these routes into the one you selected is great. I think it will be more efficient overall.	5/12/2015 3:14 PM
724	These two routes are the main ones I use to the U District and downtown, so eliminating them will make bus travel much more difficult for me.	5/12/2015 2:47 PM
725	PLEASE connect this to the light rail. This connects all of us in the N end to downtown and airport w/o a half mile, hilly, often wet connection.	5/12/2015 2:44 PM
726	12: I am glad to see 19th keep some service 11: shame there is no way to keep the route using trolley buses ... but YAY for the potential of 60' buses 11: needs better than 15min freq. No reason why Pike/Pine gets that AND link ... 11: due to the length of the route ... more frequency could also help alleviate the more-than-likely service delays that will be created due to hills/traffic 64X & 66X: are they no longer going to serve Swedish Cherry Hill? (or whatever is at Jefferson and 15th Ave) like the 64 does today	5/12/2015 2:43 PM
727	In general, I prefer the old Alternative 1 proposals. The current one doesn't do enough to enhance connections to Link, instead favoring the status quo.	5/12/2015 2:37 PM

Q36 How many persons, including yourself, live in your household?

1	'm	5/30/2015 9:39 PM
2	Not a true disability but like many urban dwellers I do not drive and do not have a car. Driving is not a real option for me. Under the original plan to end the 12 at Madison I would have had to sell my home and move.	5/30/2015 6:58 PM
3	I don't but my mother is likely to move in with me this year and she has impaired mobility due to arthritis, as well as vision/hearing issues, and I was initially rather worried about her ability to bus downtown without having to walk much, but I think it'll be okay.	5/30/2015 6:06 PM
4	I have occasional intermittent mobility issues when an old knee injury flares up.	5/29/2015 4:01 PM

5	Sometimes mobility due to joint/muscle issues, though not wheelchair user. Fatigue also an issue. So frequent, minimal walking and minimal transfer options are important with transit. It is my only form of transportation.	5/29/2015 10:16 AM
6	I minimize walking down hills. (for some time it was "cannot walk down hills")	5/28/2015 11:37 PM
7	PTSD (makes it dangerous to drive), neurological (feel weak a lot), chronic fatigue, insomnia	5/28/2015 10:51 PM
8	chronic autoimmune disease	5/28/2015 4:39 PM
9	I don't hear extremely well and I have stomach upsets due to allergy to wheat and milk. I like to sit up front in the bus. I don't like strangers pressing against me. Normally I'm fine but with crowded conditions I can become uncomfortable if someone is pressing against my body. So crowding is difficult for me.	5/28/2015 4:22 PM
10	I had open heart surgery 4 years ago	5/28/2015 4:12 PM
11	I have weird young-person hip problems. Most of the time I'm fine but sometimes it flares up and it hurts to walk more than a mile or so in a day. :(5/27/2015 5:38 PM
12	Can we please not have such a long survey that is poorly designed with no way to simply submit my opinion?	5/27/2015 9:23 AM
13	Why are you lumping people over 65 in one group?	5/22/2015 11:51 PM
14	difficulty standing for > 1 minute, due to leg vein problem can walk with no problem	5/21/2015 9:48 PM
15	I am not vision-impaired, but my husband is.	5/21/2015 10:44 AM
16	Lifting and carrying. Another person in the household cannot walk long distances.	5/20/2015 8:09 AM
17	Normally I don't, but on occasion my knee acts up and I have difficulty walking. This affects my choice of bus route since I normally walk steeply uphill for 6 blocks to catch the 48, and I can't do that when my leg gives me trouble.	5/19/2015 9:26 PM
18	Mental illness	5/19/2015 2:48 PM
19	Temporary mobility	5/19/2015 10:41 AM
20	Sensory integration	5/19/2015 10:05 AM
21	stage 3 renal failure. The bouncing, overly long bus ride makes me ill every day. Also, the fact that the 372 leaves us off SO FAR from the Park and Ride taxes my limited energy levels to the max.	5/19/2015 9:58 AM
22	I have a mobility disability that comes and goes. Sometimes I can walk easily, and sometimes walking 1/4 mile is very challenging. Bus stops that are more than 1/2 mile from me are sometimes useless for me.	5/18/2015 1:35 PM
23	Child has mobility issue	5/15/2015 5:22 PM
24	Cannot walk far in hot weather (heat sensitivity)	5/15/2015 10:57 AM
25	OLD!	5/15/2015 10:05 AM
26	I no longer drive due to a vestibular disorder. Walking and bussing are why I live on Capitol Hill.	5/15/2015 9:27 AM
27	one household member with epilepsy and unable to ever drive. We have transitioned to increased use of Uber, as Metro is too slow, inconsistent, too long a walk between destinations.	5/14/2015 11:55 AM
28	I am scheduled for my third knee surgery.	5/14/2015 11:52 AM
29	ENDURANCE, HEAT TOLERANCE HOT & cOLD	5/14/2015 7:20 AM
30	would rather not go into it...	5/13/2015 9:56 PM
31	Extreme fear of angry raccoons!	5/13/2015 9:21 PM
32	psychiatric, use of service dog	5/13/2015 7:47 PM
33	Living in a retirement community, I am speaking for almost 200 residents with multiple disabilities and I question whether the Americans with Disabilities Act is being fully adhered to here.	5/13/2015 3:16 PM
34	My wife has bad knees and cannot walk far. The proposed change in Route 12 would be a major hardship for her.	5/13/2015 2:16 PM
35	Crohn's disease	5/13/2015 10:22 AM

36	My disability is mental health related, it can be hard to be on busses that are crowded or without seating.	5/13/2015 9:54 AM
37	Temporary walking disability	5/13/2015 7:19 AM
38	Epilepsy, mild.	5/12/2015 9:44 PM
39	Plantar fasciitis in feet make it painful to walk even short distances. Also pregnant, while not a disability per session, still makes walking difficult.	5/12/2015 7:58 PM
40	U	5/12/2015 7:42 PM
41	I do not drive	5/12/2015 6:35 PM

85	I don't think metro did a very good job getting the word out about this. I have not seen signage at bus stops, in the tunnel, on buses and no driver announcements have been made. Metro's website did not clearly state on the main page there are crucial changes/eliminations being made to routes with clear survey links the initial survey period was only a month for something as important as this?	5/16/2015 3:58 PM

29	Seattle Transit Blog	5/26/2015 5:22 PM

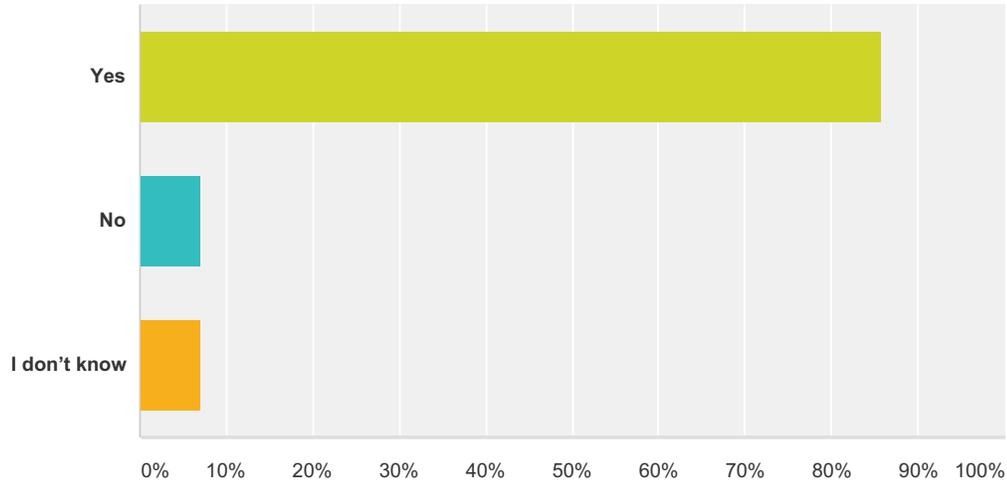

30	The sign at the stop mentioned proposed changes, but did not mention that the stop was a proposed closure. This is very misleading and is not how an organization gains and maintains the trust of those who both pay for it and make use of it. If you are doing something that is going to make people angry, at least own up to it and don't try to hide your actions. Show that you care about your customers, not only do we use the service, we pay for it and are the reason you have jobs.	5/26/2015 10:42 AM
31	Hyperbolic signs posted by someone not affiliated with metro along NE 65th st. They have large letters saying "BE AWARE!" and warn of changes to bus service that would add connections to trips from our area. You might want to send someone out to take them down, they might be scaring some people unnecessarily.	5/25/2015 10:55 PM

34	This survey, whatever source u are calling it.	5/24/2015 11:43 AM
35	It is still hard to understand what Metro is trying to do. Metro has already made up there minds on what is about to happen and all you are doing is getting feed back that will not make an different. However I do believe I have made some good comments over the years for all the riders on the RT.275/277 that had been saved for a number of years. I do Thank you for that.	5/23/2015 9:39 AM
36	Seattle Transit Blog	5/22/2015 11:54 PM
37	The information for the first two proposals was incredibly difficult to understand. I talked with a couple of friends to see what they'd figured out and we pooled our information. I have an advanced degree and speak English as my native language--and I had trouble figuring out what the proposed changes were.	5/20/2015 4:11 PM
38	E-mail sent to me	5/20/2015 12:41 PM
39	Just became aware, it was mentioned in a County Council member email to me and I was curious. Now I am a little apprehensive as I see route 71 will be eliminated.	5/20/2015 10:37 AM
40	Attempted to call DeAnna Martin, Community Relations person	5/20/2015 9:36 AM
41	Routes were not clearly presented at all on the map. It would have been nice to be able to show just one route.	5/20/2015 8:11 AM

49	There is also a billboard at my bus stop in the bus tunnel. However, not many people who take the same bus see this billboard. I don't know if the target audience is just the current ridership or if the target is for a larger audience. My impression is that you are only going for people who ride the bus into work, and are not interested in increasing your ridership, since you are not reaching out to them.	5/19/2015 11:12 AM
50	I had to do a lot of homework to get to the Metro site where bus route changes were described. And there was no coordination between City and Metro plans for the Madison St Corridor. That is very disappointing and confusing to the public.	5/19/2015 11:01 AM
51	I read the descriptions in the survey literature, and I've been a bus rider for many years and am familiar with some fo the routes. I will likely go read more now.	5/19/2015 10:38 AM
52	This survey	5/19/2015 10:15 AM
53	UW Transportation services-the links to metro and sound transit for proposed changes including proposed changes via map, routes, etc	5/19/2015 9:49 AM
54	I only new about it via flyers given out at the park and ride.	5/19/2015 9:46 AM
55	Talked with neighbors and co workers	5/19/2015 9:43 AM

56	All your meetings that I heard about were held at inconvenient times usually after 4:30pm on week nights. How about a couple on weekends during the day at library branches like NE library or at Urban Horticulture Center (on a weekend).	5/19/2015 9:42 AM

73	Seattle Transit Blog	5/15/2015 12:57 PM
74	I think it would be much more useful for people to plug in the routes they would most likely use, e.g., Montlake to Seattle Univ and then see how the proposed changes would affect someone who would use that route. This could be repeated for other trip plans. I could see that a trip that takes x minutes now would take y minutes under the proposal. I think your feedback would be of a higher quality that way. I am not sure I provided quality feedback because the route map of the changes was not easy enough for me to understand. Only major streets are highlighted and the frequency of proposed route stops is not available.	5/15/2015 11:38 AM

Q47 Did these resources help you understand the proposal being considered and how these changes would affect you?

Answered: 1,253 Skipped: 719

Answer Choices	Responses	Count
Yes	85.71%	1,074
No	7.10%	89
I don't know	7.18%	90
Total		1,253

#	Why?	Date
1	color maps and accessibility of METRO and neighborhood events. However with all the advertisement I don't think many people are aware of the implications of the changes. More time to get the word out is needed. The phase 3 map I saw was dated May 11th. That gave the community 2 weeks to understand the changes and the seek to get feedback to METRO. We need more time to brief neighbors	5/31/2015 9:07 PM
2	Not much time to respond!!!	5/31/2015 8:39 PM
3	In general, I found the Metro website posting helpful for me understanding the changes. I would have like the ability to look at an individual route on the map to fully understand some better (for example, the 66 is going to re-route to SLU and First Hill, but I couldn't find that on a map to understand what that means).	5/31/2015 8:38 PM
4	Only partially. I would have liked travel time comparisons. I also don't understand the bus-Link transfer environment at Husky Stadium. I can't tell for sure where the buses will be and how long it will take to walk from one to the other. I also don't understand whether travel between the UDistrict (west of campus) and downtown will be quicker via direct bus or bus/walk to U Station Link.	5/31/2015 5:47 PM
5	The route changes are clear.	5/31/2015 3:02 PM
6	clear description of what the proposed changes are.	5/31/2015 12:38 PM
7	maps and videos provided clear outline of proposals	5/31/2015 11:47 AM
8	The proposed changes are all presented as improvements in every description provided my Metro. Even in this survey, questions are framed "can you accept improvements made in frequency?" etc. An increase in route frequency is meaningless if the route no longer takes me where I need it to go. I'm fine with a positive outlook, but it tends to make understanding the proposed changes more difficult.	5/31/2015 11:29 AM

9	Several of the website links didn't work. No attempt was made to give specific substitutions for eliminated routes.	5/31/2015 11:26 AM
10	They did help me understand but it would have been nice to have numbers to back up the changes like daily usage on every route. I know you have the data and making it available on a map with in the metro website would have been nice and given everyone a better picture of why some of the changes are being made, like switching the 16 and the 26 at Dexter and Aurora.	5/31/2015 10:30 AM
11	I found the information not easy to access or clearly understand. The interactive map was not helpful or easy to clearly identify routes. I spent a lot of time trying to access and understand the information given.	5/31/2015 1:39 AM
12	They explained the cut to route 71 and lack of weekend service	5/30/2015 9:42 PM
13	I want to say somewhat. The maps were small when viewed on my desktop computer and it was not clear to me how I would be affected by the changes.	5/30/2015 9:00 PM
14	It had a map of the revised service route.	5/30/2015 8:34 PM
15	the website did. breaking it down through maps and by route and by region was very helpful. the posters at bus stops were distinctly not helpful because they didn't have any information on timelines for feedback/changes/etc on them, and if they did, it wasn't clear (and I read signs more than the average bear). this feels not totally open to me, like Metro doesn't want me knowing the deadlines for comments so I won't comment or something. I learned about the comment deadlines from a poster a neighbor made and put on our bus stop telling us all when the comment period would end and urging us to give feedback on how it would affect us. until I saw that sign, I had no idea I could even really give feedback, much less that it was time-sensitive. Other than the posters, I didn't see any outreach materials on these changes, and think they should have been readily linked from the service updates that are being implemented next week.	5/30/2015 6:11 PM
16	Too much information at once	5/30/2015 6:09 PM
17	It would have helped if the maps or descriptions were more specific/detailed.	5/30/2015 4:26 PM
18	Key information was not supplied.	5/30/2015 2:16 PM
19	The comparison map appears to tell me that 26 and 28 will be eliminated, but there is nothing in the text or in this survey about that. Very frustrating.	5/30/2015 12:55 PM
20	The maps of the proposed changes were really important. I couldn't visualize where the routes were going without them.	5/30/2015 9:47 AM
21	Lack of friendly maps.	5/29/2015 4:40 PM
22	I found the proposal very complicated and confusing, and it was hard to go through every route that I use (I ride the bus a lot) to figure out the impacts. The impacts to my current routes are mostly all negative, and it is very hard to figure out how to get around with the new changes.	5/29/2015 4:05 PM
23	got an overall idea but web site materials difficult to see exactly the impacts on routes I usually take.	5/29/2015 3:33 PM
24	The interactive map was helpful.	5/29/2015 3:20 PM
25	The notices of proposed changes all referenced changes in Seattle. Nothing in the notices indicated that Alternative A would ruin existing transit service for Kirkland transit users. With such a blunted notification to Eastside transit users, and with the resulting lack of participation by Eastsiders in the commenting process, I am both shocked and elated that you have chosen to leave Eastside routes alone.	5/29/2015 2:20 PM
26	Reasons	5/29/2015 2:12 PM
27	It was hard to get all the relevant information easily, but I was able to see which routes were being discontinued or changed.	5/29/2015 2:04 PM
28	Individual route diagrams (.pdfs) were great. Could have used a better comprehensive diagram though. Also, not all of the routs had maps.	5/29/2015 12:38 PM
29	Route 43??	5/29/2015 12:33 PM
30	As previously stated, the text description of changes to at least two lines, 67 and 68, were not clear. The map for the NE indicated that there would be NO service between Roosevelt and 25th along 75th St. This led me to believe that current service along 75th would be discontinued. Please clarify if current service will be discontinued, reduced, remain as it is, or increased along 75th St.	5/29/2015 11:17 AM

31	I found the interactive map lacking. It would be much more useful if the bus routes could be selected on the map so the full loop of the route gets highlighted on it. Too many of the single route # info sheets do not include a map of the loop. So determining the impact to my frequent locations was impossible to easily visualize. Very frustrating.	5/29/2015 10:20 AM
32	The resources provided plenty of information about the proposed changes, including descriptions with their justifications, maps, and time tables.	5/29/2015 10:03 AM
33	I'm dubious about how effective some of these changes will be.	5/29/2015 9:34 AM
34	Explanation of Route 941 or DART not clear at all.	5/29/2015 9:32 AM
35	The website only provide extremely brief summaries and I could not find a full description of the proposed changes for my neighborhood	5/29/2015 9:31 AM
36	It isn't clear how often a bus will arrive, what the schedule will be and how long it will take me to get to/from work	5/29/2015 8:45 AM
37	Yes, but limited in terms of actual changes in routes that pertain to me, i.e. old schedule and proposed schedule	5/29/2015 8:39 AM
38	There was no key on the route grid to explain entries.	5/29/2015 7:08 AM
39	Some of the links did not work	5/29/2015 2:45 AM
40	Easy to understand.	5/29/2015 12:57 AM
41	I did some squinting at maps. Even the link in the corrected email didn't work, fyi...	5/28/2015 11:38 PM
42	Clearly written, I guess	5/28/2015 11:15 PM
43	I liked seeing the results and being able to comment on them	5/28/2015 10:45 PM
44	Reasonably clear descriptions of the changes, with maps to help see where they apply to my commute.	5/28/2015 8:50 PM
45	No, the way I found out about this was through some private citizen's effort.	5/28/2015 6:22 PM
46	I looked up individual routes to see the maps of the proposed changes.	5/28/2015 5:23 PM
47	I thought they were very confusing. It was very hard to figure out what was changing.	5/28/2015 4:34 PM
48	It was extremely difficult to tell exactly where the 64 would be stopping under the proposed changes.	5/28/2015 4:31 PM
49	Yes, pretty good although my work computer can't open your links.	5/28/2015 4:24 PM
50	I still have questions about how the Fuhрман, Boylston and Lakeview residents be served without the bus #25?	5/28/2015 2:08 PM
51	I mean they were kind of confusing - there was a proposal 1 and a proposal 2, and now I can't find that anymore. But the quiz was good. In one proposal it looked like someone was going to delete the 11 AND 12 routes and I freaked because srsly I can't walk that far to a bus every day, and I'm car-free. But now I took the quiz and we're increasing the 11 route? Good.	5/27/2015 5:40 PM
52	It illustrated the route changes being considered.	5/27/2015 4:41 PM
53	Clear communication, though visual maps of proposed route shifts (especially splits) would be really useful.	5/27/2015 2:20 PM
54	Hard to use. Need to give access to a version of "Trip Planner" that uses proposed routes.	5/27/2015 1:09 PM
55	At least you had something on the web site...but Sound Transit's web site and questionnaire were much clearer and briefer!	5/27/2015 9:24 AM
56	But not well enough.	5/26/2015 5:22 PM
57	Clearer and concise information	5/26/2015 3:15 PM
58	Eventually. As previously commented, using a "proposed change" on a stop that you are planning on closing is misleading and cowardly.	5/26/2015 10:43 AM
59	The changes were clear but the public informational sessions and the deletion of the 26 bus stop at 35th and Wallingford was not clear. This is really unacceptable.	5/26/2015 10:42 AM
60	Clear communication.	5/26/2015 9:31 AM
61	Not very clear about times & service to Sand Point from the UW district.	5/26/2015 8:03 AM

62	Information was clearly presented, easy to understand, and available in multiple formats.	5/25/2015 9:38 PM
63	But I'm not clear that comments on the proposed changes will make any difference.	5/25/2015 7:58 PM
64	At first I thought I understood the route changes and deletions but then the information was difficult to integrate into my daily life and how I use the bus.	5/25/2015 4:11 PM
65	They were better than no information, but they were not super easy to read. They also require that you know the current routes, and that you remember what changes are already coming in order to fully understand the changes being proposed.	5/25/2015 9:24 AM
66	More landmark indications would help because the maps are solo ambiguous. What street areas are the new routes etc.	5/25/2015 12:08 AM
67	Way to much to read to understand what you are planning that is why so many riders aren't doing the survey.	5/23/2015 9:40 AM
68	Get feedback how others may be affected.	5/22/2015 11:55 PM
69	The map of the route (66) isn't clear - not sure if it will be on the freeway.	5/22/2015 5:17 PM
70	altho they were a little hard to decipher, partly because they were route specific, i could see how they were responding to the addition of the Link trunk line.	5/22/2015 3:12 PM
71	Only because I pressed. the web site is difficult to navigate, and the maps at their current scale are nearly impossible to read.	5/22/2015 11:52 AM
72	Rte 73 service is being eliminated on weekends. I don't know what rtes will be available on weekends because the other rtes on 15th Ave NE are Express or Weekday service to support the suburbs which voted down the transit package as near as I can tell	5/22/2015 9:15 AM
73	clearly explained most changes	5/21/2015 9:50 PM
74	Hard to understand, but it was informative.	5/21/2015 4:45 PM
75	Confusing and muddled	5/21/2015 4:40 PM
76	would have been easier if the website had route/map info for all routes vs. ones with changing routes. Removing buses all together requires thinking about alternate routes and maps would help with that.	5/21/2015 1:42 PM
77	The maps aren't detailed enough.	5/21/2015 12:17 PM
78	It is still confusing to me. It seems like north east Capitol Hill which is densely populated has long walks to the stops and for me a 73 year old with serious arthritis it is very difficult.	5/21/2015 9:16 AM
79	There's not clear info on the 28 route	5/20/2015 6:05 PM
80	Someone had to explain it fully to me.	5/20/2015 4:12 PM
81	Although I'm still not clear where the 48 may split.	5/20/2015 2:43 PM
82	They were detailed and clear.	5/20/2015 12:42 PM
83	Evaluating the usefulness of the new proposed route 941 was very difficult, as I've never seen this type of bus (with reserved pick up) before. It was difficult to judge how crowded such a route might be or how long the trips might take, as presumably the trips with lots of special stops would take longer.	5/20/2015 11:51 AM
84	I guess not because you didn't really include the 28 runs in your survey	5/20/2015 11:25 AM
85	the interactive maps were confusing and hard to read- Difficult to get specific information about how the changes actually will alter existing routes.	5/20/2015 9:37 AM
86	Some of the decisions made were complicated to understand as a rider because there are routes being cut or split that would simply make commute time longer due to transfers.	5/20/2015 9:25 AM
87	However, it would be helpful to show maps of the routes where just the times are being changed.	5/20/2015 9:19 AM
88	Offered clear, concise explanations.	5/19/2015 10:56 PM
89	I liked that the questions were specific to the routes I use	5/19/2015 10:09 PM
90	Because the actual changes that most concerned transit in my immediate neighborhood were not clear	5/19/2015 9:50 PM
91	But some maps of changes did not label streets so how can you tell how it might affect you	5/19/2015 9:37 PM

92	Metro's information was presented well, in general.	5/19/2015 7:20 PM
93	I don't want to have to click on all the bus routes to see how they are changing. Provide some sort of stratification by area, perhaps. Also, when you do click on the bus routes, actually show what the route is.	5/19/2015 5:20 PM
94	maps are easy to decipher	5/19/2015 4:06 PM
95	I was able to gain some knowledge about how these new proposals could affect me.	5/19/2015 3:29 PM
96	routes were clear. layout was set up in order of info I would need to make decisions.	5/19/2015 3:02 PM
97	The proposals were clear and easy to understand. I clearly saw the 43 was deleted and I'd be routed to less desirable options.	5/19/2015 2:38 PM
98	I really wanted to be able to look specifically at where I live and work and see what changes affect that area specifically (additions as well as deletions), rather than sifting through by bus #'s one page at a time	5/19/2015 2:26 PM
99	It's hard to sort through it all quickly but generally I think I understand.	5/19/2015 2:22 PM
100	"I would/ would not take advantage of this change"??? "Service will be made more convenient thanks to the voters"??? What the heck do those phrases mean? How am I supposed to understand what I'm voting for if the wording provided is so vague and cryptic?	5/19/2015 1:16 PM
101	Videos were helpful too.	5/19/2015 12:54 PM
102	The website has all of the information I wanted.	5/19/2015 11:43 AM
103	Somewhat, would help to have maps to show the new proposal.	5/19/2015 11:29 AM
104	it showed me that my major metro use and travel time would actually increase.	5/19/2015 11:28 AM
105	I learned that two of my most used bus routes were being deleted!	5/19/2015 11:24 AM
106	The buses I ride to get into town were not noted but they do bring transit users into Seattle, and affect resources.	5/19/2015 11:14 AM
107	But only after I did a lot of searching for the information I was looking for. It definitely was NOT obvious.	5/19/2015 11:02 AM
108	Helpful diagrams!	5/19/2015 10:55 AM
109	I like the map view, as well as being able to look at changes by route.	5/19/2015 10:54 AM
110	The changes to the bus I take were clearly spelled out.	5/19/2015 10:39 AM
111	Somewhat	5/19/2015 10:15 AM
112	Overall clear, but it does gloss over some changes (moving routes to different streets) that impact riders.	5/19/2015 10:14 AM
113	The option to view a map of each route with the current route and the changes was very helpful. Also, the tables showing the current frequency of service juxtaposed with the changes were helpful.	5/19/2015 10:08 AM
114	I had heard rumors of Metro's plans to eliminate the #43. This confirmed it.	5/19/2015 10:04 AM
115	Website 'interactive map' VERY difficult to understand the changes.	5/19/2015 10:03 AM
116	I am concerned that the 372 will be even more difficult to board if it becomes the link to Univ. Village. I have been unable to get on due to overcrowding. When this happens my 1.5 hour commute home turns into a 2.5 hour commute home because I am forced onto a 75 up to 125th and then onto a 522. But Metro does not give a damn about anyone north of 145th so I am wasting my complaint here.	5/19/2015 10:02 AM
117	I learned that changes had been proposed at all, but I am still confused about changes for route 28.	5/19/2015 9:53 AM
118	i think i understood them all, but we'll see when the changes actually come. since i did not see my route on the list i'm assuming all is well with it	5/19/2015 9:50 AM
119	Way too much information to give a lot of thoughtful feedback. Had to reply with gut thoughts. Plus lack of cost for options made it difficult to weigh whether it was worth it.	5/19/2015 9:44 AM
120	Clear diagrams are helpful!	5/19/2015 9:39 AM
121	The survey is set up to ask me questions about routes I never take and don't know much about. Also navigating all the different route numbers can get overwhelming. Thanks!	5/19/2015 9:29 AM

122	you are overthinking this. and remember, THERE IS NO LIGHT RAIL. Put the rail in place, see if people actually RIDE it, and only then consider changing our bus service - for the better of course. Please do not funnel everyone to a (as yet unavailable) light rail station, and think that we would love to transfer and waste more time.	5/19/2015 9:28 AM
123	None of the proposed changes will help me.	5/19/2015 9:27 AM
124	The proposal for changes part of the website was clear and easy to understand.	5/19/2015 9:25 AM
125	The resources supplied all the information I needed about the changes.	5/19/2015 9:24 AM
126	I have to move or change jobs once service is discontinued.	5/19/2015 9:21 AM
127	It's very hard to get the "big picture" of what's ACTUALLY going to happen in the near future. It's very confusing.	5/19/2015 9:14 AM
128	I could see how service was being gutted again.	5/18/2015 2:19 PM
129	I had to speak to an King County Metro staff member in order to gain a good understanding of the proposed changes for Alternative 3. The first information provided via KCM's website and on the Seattle Transit Blog was sparse and confusing.	5/18/2015 1:38 PM
130	too much spin.... these are not necessarily improvements.	5/18/2015 8:00 AM
131	route maps with the changes indicated would have helped too	5/17/2015 11:08 PM
132	Pretty clear.	5/17/2015 6:02 PM
133	all I could see was routes being chopped and changed not how I would get to where I need to go	5/17/2015 1:42 PM
134	I had to search on-line to find a way to comment..	5/16/2015 9:57 PM
135	I only knew the route 71 being deleted, but didn't know about the changes in other routes that would cover parts of the 71 until looking through the website.	5/16/2015 8:21 PM
136	I am still not sure I understand the proposals.	5/16/2015 3:59 PM
137	Seeing the proposed route maps on the Metro website.	5/16/2015 2:29 PM
138	I think the survey questions are very misleading and only talk about the benefits of the proposals while minimizing or ignoring the downsides.	5/15/2015 5:36 PM
139	can't figure them out at all.	5/15/2015 5:06 PM
140	maps could have been clearer	5/15/2015 3:30 PM
141	Double-speak use of "improvements" to mean changes or route deletions, clearly not always improvements.	5/15/2015 12:00 PM
142	I do wish there was a place i could see a map of the restored 47 route	5/15/2015 10:55 AM
143	My daughter is doing all this for me on my behalf. I could NEVER do this on my own.	5/15/2015 10:07 AM
144	Clearly explained what was proposed and the reasons and effects.	5/15/2015 9:46 AM
145	a lot of detailed information about existing route performance in the transit geeks section	5/15/2015 6:51 AM
146	Not that easy to comprehend.	5/14/2015 11:17 PM
147	The graphics about the bus route changes do not show where the stops will be and doesn't have any information regarding expected change in time that the commute will be. I also don't understand e.g. on the 28X info sheet here: http://metro.kingcounty.gov/programs-projects/link-connections/pdf/028x-info-05-15.pdf if the current frequency of 11/8 trips (not sure what that means) is better or worse than the proposed 10-30 minutes between buses.	5/14/2015 10:52 PM
148	I used the pdf map and the "Ted Talk" to better understand the proposed changes	5/14/2015 9:38 PM
149	gentleman handing out flyers on 4th and Pike Monday at 5pm on Tuesday was very helpful.	5/14/2015 1:13 PM
150	route changes were very confusing to understand from the maps and reviewing route-by-route is too confusing and time consuming	5/14/2015 12:26 PM
151	It all sounds sensible but I want it to actually work as described; I am dubious.	5/14/2015 11:57 AM
152	Better maps. I've had an easier time reading clear bus/subway route map overviews in NYC and Parish than I can read Seattle Metro.	5/14/2015 11:57 AM

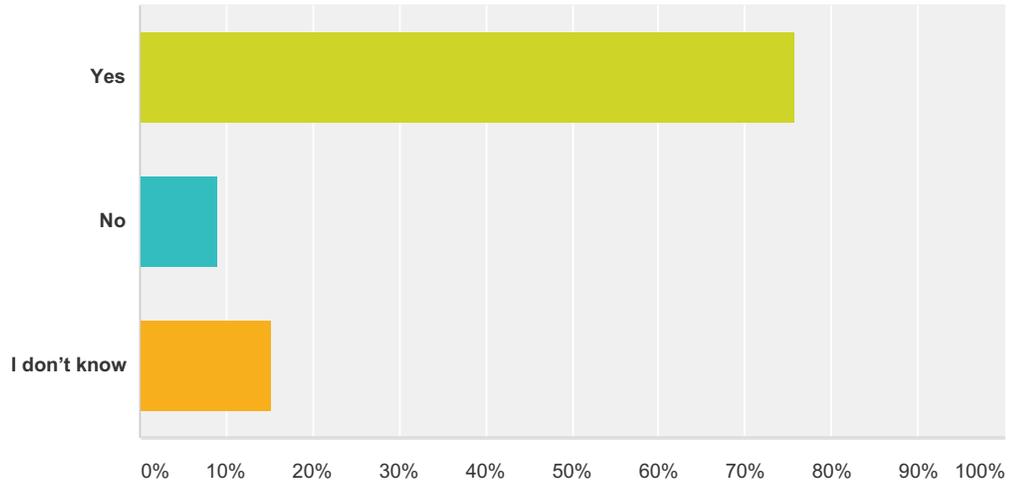

153	Good, clear comprehensive information	5/14/2015 11:34 AM
154	Videos showing route changes are very helpful.	5/14/2015 10:51 AM
155	The information wasn't readily accessible	5/14/2015 10:38 AM
156	Doesn't seem like the Eastside to UW was even a factor.	5/14/2015 2:04 AM
157	However, I have found that your site was very helpful and clear in providing details on all routes up for pending changes. Thank you	5/13/2015 8:59 PM
158	Plans were clear, and easy to understand.	5/13/2015 7:57 PM
159	They don't benefit me or my neighborhood.	5/13/2015 7:51 PM
160	I could understand the proposals being considered, but the effect is yet to be tolled!	5/13/2015 6:59 PM
161	The maps and descriptions in the pdf files about the specific changes to each route laid things out very clearly. I was able to compare the old route (usually dotted lines) with where the new route would go. Also having the specific reasoning explained was helpful, learning what the changes were supposed to accomplish was reassuring and useful.	5/13/2015 5:58 PM
162	Detailed description of proposed changes and their purposes.	5/13/2015 5:49 PM
163	Wasn't really clear on what would be given up to get the more frequent service on these routes.	5/13/2015 5:44 PM
164	The written information on the website clearly explained all the options before and after changes.	5/13/2015 5:37 PM
165	It's hard to see how the improvements / changes will work, since I already can no longer take advantage of the bus system due to working "3rd shift" and a lack of route availability close to midnight.	5/13/2015 5:25 PM
166	It's not all clear, but it does seem that service is being taken away from the heart of the U-District.	5/13/2015 5:05 PM
167	They made it possible, though by no means easy. Enough with everything being a pdf already, Jesus...	5/13/2015 4:51 PM
168	Because I use the 43 all the time, and I need to know what's going to happen with it.	5/13/2015 3:03 PM
169	Learned about changes to the routes I take regularly, especially the 12 (which I have been taking most days since 1986).	5/13/2015 2:18 PM
170	Liked the videos and especially the person drawing on the route map.	5/13/2015 1:18 PM
171	I need to visit other sites to learn all changes	5/13/2015 1:12 PM
172	VERY clear - love the maps. The writing was also easy to understand.	5/13/2015 12:24 PM
173	There were 2 initial alternatives provided for review. However it is not clear from the website how the final alternative was selected. The presentation by Ted Day describes the opinions for changing that were heard but not the opinions that were dismissed (such as eliminating Route 71).	5/13/2015 11:38 AM
174	Pretty clear you are eliminating service to my area. Expect me to walk (and I have mobility issues) a half mile to get to the #73.	5/13/2015 11:29 AM
175	It was hard to view the detailed map of the route changes. Very hard to zoom in and out. I would suggest not doing them as a PDF document. Do something similar like Google Maps that allow you to move around the map area more easily.	5/13/2015 11:28 AM
176	Lack of schedules for new and revised routes makes it difficult to determine viable alternatives.	5/13/2015 9:53 AM
177	I would have liked to have seen revised transit maps like those distributed at the March open houses.	5/13/2015 9:39 AM
178	Metro website had clear explanations of proposed changes. I liked the individual pages of info for each route (but all the clicking through and back was cumbersome).	5/13/2015 9:35 AM
179	It outlined it well but some information had to be gathered by viewing the maps and as they were not directly addressed	5/13/2015 9:03 AM
180	Working in the Downtown near Capitol Hill area, staying informed is a necessity.	5/13/2015 8:45 AM
181	Good maps.	5/13/2015 8:30 AM
182	Clear presentation including route map.	5/13/2015 8:05 AM

183	Pretty much. It wasn't clear if the changes for 373 would involve campus bus stops, looks like it just involves a minor change (15th ave instead of University Ave).	5/13/2015 7:22 AM
184	Would have liked some maps showing the changes in the survey - or a link to maps	5/12/2015 11:04 PM
185	The YouTube videos were very clear and concise. Great idea!	5/12/2015 10:15 PM
186	But I had to search around, first watch a video that wasn't even specific, but I noticed there that the 11 route had been re-located. Then I searched around to find a graphic of what the proposed new route was.	5/12/2015 10:11 PM
187	Changes are coming And they are good	5/12/2015 9:46 PM
188	The PDF with proposed changes each route are clear.	5/12/2015 9:45 PM
189	No clear map of the service changes are available. You have t search the route by route to find the changes.	5/12/2015 9:36 PM
190	Seattletransitblog.com offers a plain and user-friendly explanation that speaks to internet-users. unfortunately, Metro's website does not.	5/12/2015 9:36 PM
191	clear and concise, and the videos are awesome!	5/12/2015 9:29 PM
192	Confusion on Wedgwood to Downtown service off-peak. Confusion on Wedgwood to Roosevelt off-peak.	5/12/2015 9:26 PM
193	Very clear and well presented.	5/12/2015 9:22 PM
194	Materials are good overall.	5/12/2015 9:11 PM
195	Hard to make a personal use analysis. I was looking forward to a direct connection to the University and I don't see an improvement in the time factor to get from one place to another from Sand Point. One used to take a direct bus to the airport, now the only route is the train and It takes twice as long. It sort of appears the new route and time system doubles the amount of time of where I would like to go on the bus.	5/12/2015 9:09 PM
196	It described to me the proposed changes.	5/12/2015 8:10 PM
197	All the information was on the website, just took a while on my phone.	5/12/2015 8:00 PM
198	Liked the map.	5/12/2015 7:57 PM
199	Clear straightforward explanations; well done writers!	5/12/2015 7:12 PM
200	Because they told me what it was about.	5/12/2015 6:44 PM
201	To me it sounds like these buses will touch on more frequent service to some same stops & some different routes all together.	5/12/2015 6:41 PM
202	Rather vague	5/12/2015 6:37 PM
203	I don't like them, but I will be able to live with it.	5/12/2015 6:25 PM
204	The maps are hard to read. Would have been nice to have maps for all affected routes gathered into one document, rather than essentially having them all laid on top of each other.	5/12/2015 6:20 PM
205	More or less. The descriptions of the changes to each route, with the route maps, are helpful, but the maps are pretty small and lacking clear details (be nice if they were larger and better labeled).	5/12/2015 6:06 PM
206	Because I see papers posted all over the bus stops I frequent that some major changes are coming and with the light rail coming to my neighborhood I want to know it is affecting my community for the best/ the city for decreasing the traffic we have and pollution degrading my air quality.	5/12/2015 6:06 PM
207	Addressing specific areas one by one made it easier for me to assess the changes. Being able to see actual tentative maps would make considering the changes even more helpful.	5/12/2015 6:04 PM
208	Provided maps and frequency tables	5/12/2015 6:02 PM
209	Still not totally clear	5/12/2015 5:59 PM
210	You shouldn't take our Rt. 277 away for all of us who use that Rt.	5/12/2015 5:55 PM
211	Proposal chart of current & proposed is easy to understand.	5/12/2015 5:55 PM

212	There were a variety of way to view the changes, which helped to reinforce the changes that were being described. Importantly, there was one thing that was confusing: on the updates to individual routes, the "proposed" service section didn't make it clear if the numbers given were the proposed number of additional trips, or the proposed number of total trips. I assume it was additional trips, since often times the route was describe as being more frequent even though the "proposed" trips was lower than the "current" trips.	5/12/2015 5:51 PM
213	HORRIFIC!!!! NO ROUTE 71	5/12/2015 5:49 PM
214	They really aren't clear enough about what the differences are between the existing routes and the proposed routes.	5/12/2015 5:44 PM
215	Maps	5/12/2015 5:37 PM
216	I somewhat understand them. I was trying to see what route changes would impact me, and I'm not sure.	5/12/2015 5:29 PM
217	Lot of what if's	5/12/2015 5:28 PM
218	I would love to go into Seattle more often but the public transportation from east Kirkland isn't good and takes too long with transfers.	5/12/2015 5:14 PM
219	They helped, but a graphical/route map representation of all the proposed changes would have helped 10x more	5/12/2015 5:02 PM
220	They don't highlight or explain why the routes are being cut.	5/12/2015 4:10 PM
221	The map was a little dated looking.	5/12/2015 3:27 PM
222	I think so. It would be great not to have to navigate from pdf to pdf -- interactive map?	5/12/2015 2:45 PM
223	The information was clearly presented and comprehensive.	5/12/2015 2:39 PM

Q48 From the time you were notified, were you given enough time to provide meaningful feedback in Metro's and/or Sound Transit's decision-making processes?

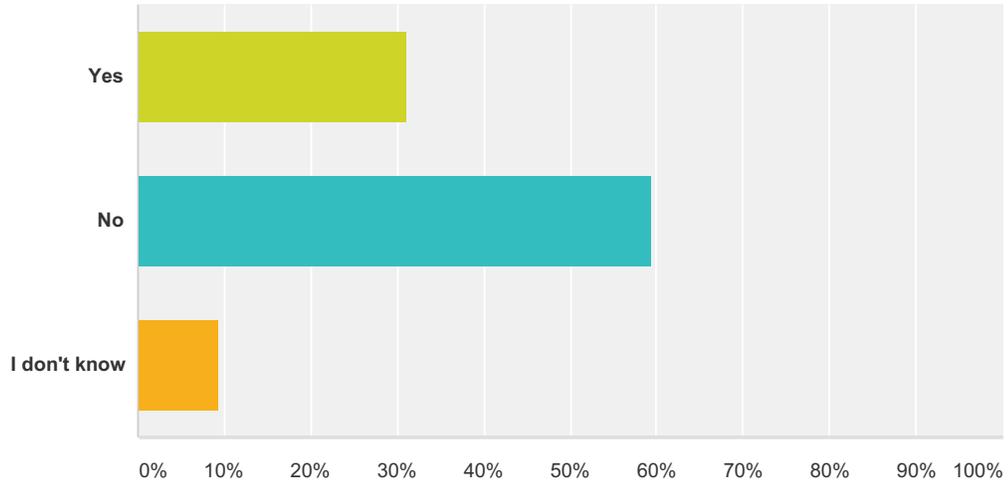

Answered: 1,251 Skipped: 721

Answer Choices	Responses
Yes	75.70% 947
No	9.03% 113
I don't know	15.27% 191
Total	1,251

Q49 Did you participate in the second round of public outreach about the Link Connections project in March?

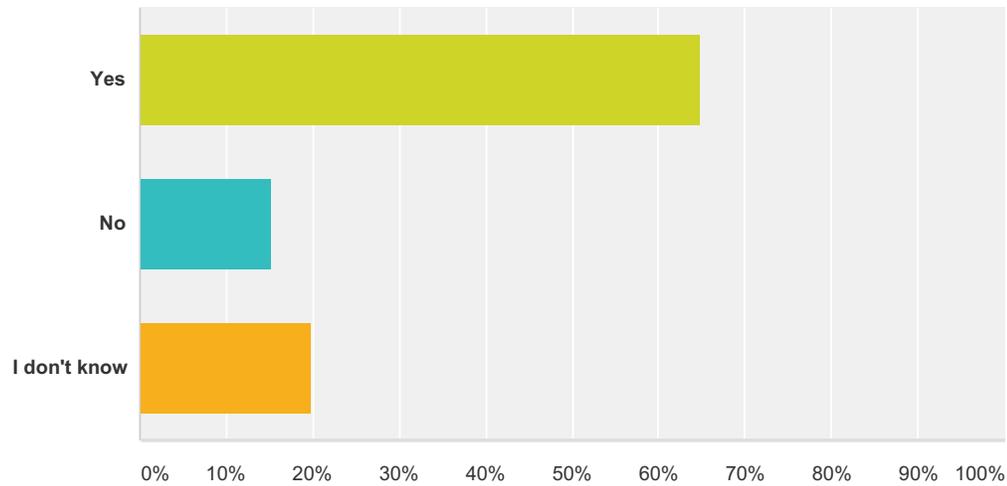

Answered: 1,256 Skipped: 716

Answer Choices	Responses
Yes	31.05% 390
No	59.47% 747
I don't know	9.47% 119
Total	1,256

Q50 Regardless of how you feel about the proposed changes, do you see how public feedback helped shape this proposal?

Answered: 413 Skipped: 1,559

Answer Choices	Responses	Count
Yes	64.89%	268
No	15.25%	63
I don't know	19.85%	82
Total		413

#	Why?	Date
1	Some blending of the two alternatives in the last round are apparent in this latest round.	6/1/2015 1:23 AM
2	There have been significant changes in response to public feedback.	5/31/2015 7:42 PM
3	It's nice that your proposals talk about "what we heard." Also the talks with Ted are charming.	5/31/2015 5:48 PM
4	Yes..... but I still don't think that the explanatory material was as clear as it needed to be in order to respond to survey questions.	5/31/2015 11:28 AM
5	I don't and I'm not happy. No one in my neighborhood that rides the bus regularly for work would be happy about this change. You may think that connecting to the light rail will make more people take it, but this route change (12) will only make it harder for active current riders to take the bus everyday.	5/30/2015 9:36 PM
6	No, I don't understand why Metro wants to cut off the west side of Maple Leaf (especially anyone living west of 5th Ave NE) from easily accessible bus service. Also anyone that uses buses in Maple Leaf to get to the Northgate Transit Center (which really is the most viable and efficient option for mass transit in our location) is losing consideration too. You're too singularly focused on herding everyone to the Stadium Light Rail station, and that's great within a certain radius but not when the Northgate Transit Center is a much closer and better option. As I said in an earlier comment, just as the airlines say the closest exit may be behind you, in Maple Leaf the best transit options means go north (to the Northgate Transit Center) to go south.	5/30/2015 7:30 PM
7	The notes on the new proposal included useful info about comments from the earlier meetings.	5/30/2015 7:00 PM

8	The feed back I heard about route 11 in March was a desire to keep the route the same -- one seat ride from Madison Park/Madison Valley to downtown (with the assumption that "downtown" was the Pike/Pine corridor). The only discussion I heard about an "all Madison" route 11 included a detour (a "notch" in the route) to connect to light rail on Capitol Hill. The current proposed "all Madison" route 11 doesn't provide either of these things.	5/30/2015 8:39 AM
9	I would have to be a Metro Transit planner to see whether and how public feedback helped shape the proposal.	5/29/2015 9:01 PM
10	This kind of overblown survey is well-designed to discourage public feedback.	5/29/2015 3:41 PM
11	Relatively few Eastside transit users realized that the notice of proposed changes for Capitol Hill and NE Seattle routes actually announced potential destruction of Eastside commuter routes. The current plan to protect routes like the 252, 255, 257, and 311 from destruction suggests that the process listened to those who found out about the cleverly concealed changes and protested.	5/29/2015 2:33 PM
12	The public uses mass transit and has the right to make decisions on how the city spends its tax dollars.	5/29/2015 10:04 AM
13	I will see when the final proposal comes out...	5/29/2015 9:33 AM
14	My concerns certainly weren't addressed.	5/29/2015 8:33 AM
15	I think the decisions are already made and "public feedback" is just a sham to make us think what we say has any weight. I believe all my efforts to save MY route are futile and that nothing the "public" has said will make one iota of difference to the plans already carved in stone by Metro and Sound Transit. All the "public" is good for, as far as these organizations are concerned, is paying your salaries.	5/29/2015 6:21 AM
16	I saw changes to the proposals based on feedback. I hope to see more.	5/29/2015 12:45 AM
17	At least the 11 goes all the way downtown! The first proposal was unacceptable.	5/28/2015 6:30 PM
18	The short youtube video about response to changes and the changes that were presented in this survey were helpful. It would have been cool to see breakdowns of how zip codes or income brackets wanted or didn't want service changes. The interactive map is pretty keen to look at proposed changes, though.	5/28/2015 9:50 AM
19	We submitted a petition with 72 signatures to metro during the public feedback period concerning Route 16 effects to our neighborhood. The proposed increase in transit frequency completely ignores our input to the process and further aggravates our concern for noise, safety, and congestion caused by bus travel on our very narrow streets.	5/26/2015 8:36 PM
20	The proposal has improved. It seemed poorly thought out at first and would have made busing to work ridiculously inconvenient.	5/26/2015 12:56 PM
21	The 8 continuing past Cap Hill link station	5/25/2015 12:09 AM
22	Yes I did, although I think Metro sneaked in some service cuts that left me skeptical. I'm not sure these are what the public actually want, given how crowded the 71, 72, and 73 buses are.	5/24/2015 4:23 PM
23	The request for feedback seems more a matter of protocol than actual interest. I've often thought that Metro could generate useful feedback by conducting interviews and discussions on the routes.	5/24/2015 2:19 PM
24	Most of the riders that I talk with don't want to give you feedback for they think you have already have the plans and are moving forward.	5/23/2015 9:42 AM
25	I am glad to see much public feedback but sometimes concerned that the voices of strident and vocal minorities may sway Metro to make unwise decisions.	5/23/2015 12:00 AM
26	I think it is difficult to get public feedback for such diverse areas.	5/21/2015 9:17 AM
27	I see how public feedback helped shape the return of route 73 to provide weekday transportation between pinehurst and the u district, and the new route 16 going east-west in north Seattle. However, I am not sure why Metro is using option 2 for all of the eastside routes and barely leveraging any of the advantages of the new husky stadium station for improved service to the eastside. Why run all of the buses on 520 through traffic to downtown when users can easily transfer to light rail and service can be improved?	5/20/2015 2:22 PM
28	I strongly feel the downtown-to-Lake City and the UDistrict-to-Lake City bus connections are not being considered in your plans, despite feedback alerting you to this oversight. I, for one, will be much worse off under the new plan and may need to curtail some of my activities due to the lack of a decent bus connection.	5/20/2015 1:18 PM
29	There was a considerable amount of extra service added, which I imagine can only be the result of complaints from riders due to a considerable lack of service on high traffic and high demand routes.	5/20/2015 9:26 AM
30	Neighborhood naysayers helped kill the best parts of the alt 1 proposal. Apparently metro listens to them.	5/20/2015 12:34 AM

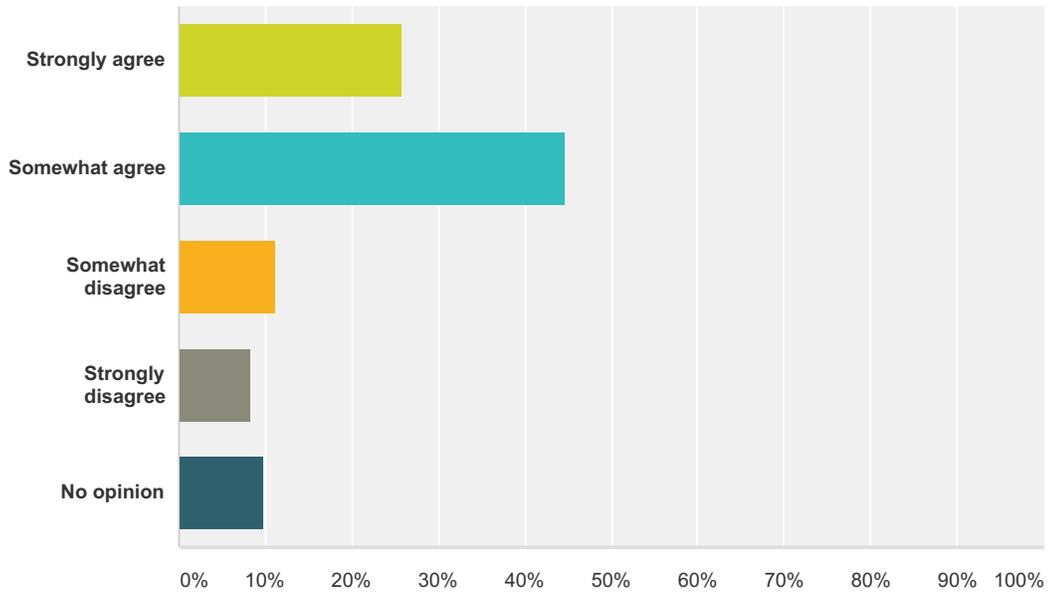

31	I see some parts, others are not clear to me.	5/19/2015 9:51 PM
32	Let me say that I started to give feedback on-line in March but found it overly involved to answer all the questions and gave up, intending to return but not managing to do so. I am glad that others made my main point about the proposed changes in the #8 and #11.	5/19/2015 9:30 PM
33	Changes appear to be made in response to earlier public feedback, perhaps to an excessive degree.	5/19/2015 7:21 PM
34	Phase 3 identified key takeaways from phase 2	5/19/2015 4:15 PM
35	I appreciate Metro will keep service from Madison Valley to downtown and that there will be 1 direct bus route that I can take to downtown. However, I don't agree with the deletion of the 43 and how it leaves the 23rd/24th corridor without direct bus service to downtown.	5/19/2015 2:39 PM
36	Great work! Well done.	5/19/2015 10:55 AM
37	Actually, the statements about the public feedback were very helpful. They were clearly worded and helped me understand the need being addressed.	5/19/2015 10:39 AM
38	Summaries of feedback are made available. Proposals have been revised with consideration given to the public's feedback.	5/19/2015 10:06 AM
39	well, the descriptions of why things were revised or cut were explained, whether it was public feedback or not is hard to say..or whether it was metro's stats that influenced...	5/19/2015 9:52 AM
40	No visible changes have really been made even though input has been taken.	5/19/2015 9:45 AM
41	I think \$ talked louder then riders	5/19/2015 9:44 AM
42	I find it difficult to believe that people want to eliminate the #43. The bus is regularly so crowded it is standing room only, and the number of people that get on and off at my stop indicates that I am not alone in finding this route useful.	5/19/2015 9:34 AM
43	My concern is with proposed changes to the Sound Transit route 540, and I don't see how any possible public feedback shaped the decision to propose these changes.	5/19/2015 9:14 AM
44	I see this a lot more for the Capitol Hill area than for NE Seattle, but I am grateful that public feedback was considered in making the proposed changes. Thank you.	5/18/2015 1:38 PM
45	It's a bit watered down from Proposal 1, but still is a significantly more workable option than leaving things the same.	5/18/2015 12:55 PM
46	I believe you ask for feedback, but then ignore it and proceed as you wish.	5/18/2015 8:02 AM
47	Especially for the Sound Transit proposals, the radical changes were scrapped.	5/16/2015 7:52 PM
48	My questions from the first round haven't been explicitly addressed, though they're fairly minor changes to implement at any stage.	5/16/2015 2:29 PM
49	There were some clear variances between the previous round of proposals and this one - such as the routing of the 49 and the origination point of the 38	5/15/2015 2:07 PM
50	Many people commented that can not accept deletion of Route 25, and proposal shows deletion of the route anyway.	5/15/2015 12:02 PM
51	I really don't see how cutting service to an entire neighborhood could be a response to public feedback! I know of many Montlakers who voiced their concerns over the loss of the 43, and yet it is gone!	5/15/2015 10:57 AM
52	Because 110 people voted (from your survey results) to keep the 25 route last time but was still largely ignored...	5/15/2015 10:19 AM
53	I saw where the survey said that people asked for more frequent service or late night service, but I don't know if that meant 3 people asked for it or 80% of the results showed that.	5/14/2015 6:01 PM
54	It's nice to see that Metro is finally listening- I was very happy to see that the need to travel from south lake union, through eastlake, to the U district was acknowledged. There is still one more step to take--figuring out how to prevent route 70 from getting stuck, instead of just increasing the service schedule--but at least it seems like Metro is getting there.	5/14/2015 4:54 PM
55	Neighborhood homeowners clearly watered down your restructure proposal.	5/14/2015 1:25 PM
56	As I said, the marketing comments reflect what they are being told, but the reality is not always the same.	5/14/2015 11:57 AM

57	The omission and cuts of the east-west routes are so ill-planned, you weren't listening...	5/14/2015 11:11 AM
58	I see that Capitol Hill people spoke up for Pike-Pine service, which was awesome. Doing without that would be extremely difficult--especially uphill, even for a fit person.	5/13/2015 9:24 PM
59	The one request I have been making is contrary to the final proposal. Perhaps more people reached out about the other view, but it is unfortunate.	5/13/2015 8:16 PM
60	It seemed that Metro made an effort to incorporate community feedback in their planning process.	5/13/2015 7:57 PM
61	the points provided in the video were very clearly outlined.	5/13/2015 7:48 PM
62	You have ignore the feedback as far as I can see. This will cause me to be more vocal and activist against the stupidity of parts of the 45 proposal. Your stupidity has provoked me to action.	5/13/2015 6:06 PM
63	Some of the specific things I remember I had concerns about on the prior survey were addressed and sensible changes were made to the plan, so it was clear someone was paying attention. I'm sure the things that were altered were items that many many people expressed issues with, but it's especially nice to feel like *I* was heard as part of that.	5/13/2015 6:01 PM
64	I didn't feel like the feedback that I provided was reflected in the revised proposal.	5/13/2015 5:50 PM
65	It provided positive input and let Metro know about how transit shapes communities and directly impacts lives.	5/13/2015 5:37 PM
66	I don't know what other people have said to judge whether Metro considered and either incorporate or didn't incorporate that feedback. seeing a summary of data on what was submitted and how that correlated to the changes would demonstrate this.	5/13/2015 4:28 PM
67	The 12 was not eliminated.	5/13/2015 2:18 PM
68	No disclosure of actual data--I have to trust the summaries presented.	5/13/2015 2:09 PM
69	Somewhat, because every time I've written about my bus route (#30), nothing has changed in the metro plans. I've also never received a response to my suggestion emails. I hope my feedback is making a difference. I will make sure the other riders I commute with will give feedback as well. There are enough people that commute on the #30 with me to hopefully make a difference in Metro's plans to cut our route.	5/13/2015 1:24 PM
70	I have seen many surveys posted in neighborhood blogs. I hope you are also reaching out to libraries because so many are on major bus routes which may be affected.	5/13/2015 12:27 PM
71	A lot of the routes I use had completely different proposals earlier. I can tell that a lot of listening and thought went into the changes. Thank you so much!	5/13/2015 12:25 PM
72	This is all for show -- you will do what you want. None of the feedback provided for "my" route has impacted in any change to your plans. You don't care -- you don't have to	5/13/2015 11:30 AM
73	I saw changes in this current proposal that were not present at the last round which I really appreciate because I know many of my neighbors have the same concerns I do!	5/13/2015 9:56 AM
74	I see how public feedback changed the Capitol Hill proposal, but public feedback did not change the 31/32 North Seattle proposal.	5/13/2015 9:49 AM
75	I'm not sure how much impact our opinions had or if changes were made by internal decision	5/13/2015 9:04 AM
76	It is very clearly stated and matches some of my own feedback.	5/12/2015 10:15 PM
77	Sort of -- at least for Capitol Hill and Eastlake. Not so much for Montlake or 520.	5/12/2015 8:37 PM
78	I can see how Metro tried to compromise between a consolidated and frequent network and the people living in areas with light transit use. This, I suspect, was due to public feedback.	5/12/2015 8:11 PM
79	Nothing I saw in the public feedback suggests changing the route of the 16 from Aurora to Dexter.	5/12/2015 8:03 PM
80	What the public said was clearly stated throughout.	5/12/2015 8:01 PM
81	You are proposing practically the same cuts and reroutes as you did before. I get the impression you only pretend to listen, then push ahead with your fixed agenda anyway. So much for voting you more money to EXPAND service and making getting to work more convenient! forcing multiple bus changes is NOT convenient.	5/12/2015 7:22 PM
82	I see that your public relations is extremely sophisticated. I also see you have only one proposal you will accept.	5/12/2015 6:45 PM

83	I can see that changes were made. However, it is impossible to answer "how public feedback" helped shape the proposal without specific figures per certain areas, and without having a more detailed idea of how Metro weighted and assessed these figures. So it's not possible to know exactly what the feedback was and what effect it had -- and how flexible the newest proposed changes are.	5/12/2015 6:08 PM
84	I can see that the major concerns are being proposed and available to vote on.	5/12/2015 6:06 PM
85	Commonly encountered complaints regarding restructures are evident in the changes to segments of the service areas which had service altered, and not for demonstrable benefits for the overall network and riders of the system as a whole.	5/12/2015 6:03 PM
86	For Metro could care less about the people who ride the Rt. 277.	5/12/2015 5:57 PM
87	Yes & No. Some changes are ok with me; others are not.	5/12/2015 5:56 PM
88	Seems to me the public is being railroaded into using link light rail by the proposed changes to certain bus routes from Northeast Seattle to downtown.	5/12/2015 5:56 PM
89	Because you are a government agency and you never pay attention to what the taxpayers say. You get an idea and don't pay attention to the people who object to those proposals. A prime example of that are these proposed changes as some of them are just BS.	5/12/2015 5:49 PM
90	I see that Metro listened to the concerns of Maple Leaf residents	5/12/2015 5:36 PM
91	It's clear that Metro gave more importance to vocal residents in relatively low ridership areas (Madison Park) who complained about having to change their travel habits than to the many residents in higher ridership areas who would have seen significant improvements under Alternative 1. The new proposal retains more consistency of routes while dramatically reducing service.	5/12/2015 5:24 PM
92	The revisions were done in response to varied public feedback, which was acknowledged.	5/12/2015 2:39 PM

Q51 I believe that taking the time to share my views will result in better decisions about bus changes that will be made after Link light rail begins service to Capitol Hill and the University of Washington’s Husky Stadium.

Q52 Please share any additional feedback you have about our outreach process.

Answered: 253 Skipped: 1,719

#	Responses	Date
1	Equal attention to deleted routes as well as the changed routes and increased frequency would help draw attention to the full implications of the changes.	6/1/2015 1:25 AM
2	The sign posted at the bus stop was not very obvious. Most people sit inside the covered area, and there were no signs inside that area to indicate that there would be changes. There should be more signs on the bus and signs inside the covered bus stops.	5/31/2015 9:02 PM
3	Please separate proposed changes that are truly Link-related (from a rider's understanding) from those that aren't. I think NW and maybe even North Central Seattle need more targeted outreach about how changes in those areas.	5/31/2015 5:51 PM
4	I wouldn't have known about the proposed changes to the routes that affect me if it weren't for seeing by chance a poster about the proposed changes earlier this week. Looking closer at other popular stops that I use along the bus route (16) I didn't see any other posters or notices. I would say the advertising of these proposed changes was decidedly lacking.	5/31/2015 3:41 PM
5	Please make sure you alert people that are losing their primary route better next time.	5/31/2015 3:02 PM
6	Good. Posters at Bus Stops guarantee that people who take the bus (the most affected) are the most engaged. But, of course, a \$billion+ change will change the individuals affected, so perhaps next time, USPS mailings, too.	5/31/2015 12:40 PM
7	It was slightly confusing. I didn't realize that there were "phases". So I thought the March deadline was the last opportunity for input. Didn't understand that it was the 2nd of 3 phases... But I am glad I at least got into Phase 3.	5/31/2015 12:18 PM
8	The phrasing of the survey questions was somewhat skewed to the positive and addressing multiple routes in one question make it difficult to give an accurate response. Ex. Questions describing improved frequency but that included both routes maps that stayed the same and some that had been rerouted. The later opportunity for specific route feedback was useful. Would be helpful to mention that specific feedback option will be forthcoming.	5/31/2015 11:53 AM
9	I am still confused!!!	5/31/2015 11:29 AM
10	You should send an email explaining everything to anyone who uses the orca website.	5/31/2015 10:33 AM
11	Survey is much too long and complicated	5/31/2015 12:09 AM
12	You did a good job of hiding the cut to route 71. I original was led to believe there was no change to the route until I accidentally stumbled on it harried elsewhere in the proposal.	5/30/2015 9:44 PM
13	The bus stop posters should have been put up earlier. I only saw them this last week- right before the comment period is closing.	5/30/2015 8:35 PM
14	I answered No to the question asking if I wanted to comment on Madison Park etc. Then it gave me the questions anyway.	5/30/2015 8:09 PM
15	I've been expressing this opinion for months, but that hasn't changed the loss of bus service that my neighbors are going to experience. I don't think that a lot of people understand the ramifications of what you are proposing.	5/30/2015 7:32 PM
16	It seems fairly passive, which doesn't reach the people who most need reaching (I say this as a former outreach coordinator). A more active approach with more clarity about the need and possibility of community members getting involved, and getting involved at different levels, would be really nice. It currently comes off like "we're going to do this, you can send in comments if you want, but this isn't really your process" and that's a tad unwelcoming. The website is great, though, and I think it could be even more effective if the other OR materials reflected the same spirit of recruitment and transparency.	5/30/2015 6:14 PM
17	The outreach process was a failure. I've mentioned it at bus stops while waiting for the bus. Others have no idea of what is planned except that bus service to N.E. Seattle will be greatly reduced in order to further the passenger stream to Sound Transit stations. METRO should be looking to serve the citizenry, rather than feed Sound Transit.	5/30/2015 2:18 PM

18	The maps were helpful. What would be great is if there was a way to pick a specific route and see the before and after map for that route.	5/30/2015 9:48 AM
19	Your maps are lousy. Find a way to put them up on Google maps or invest in a better GIS system.	5/30/2015 12:36 AM
20	Love you transit!	5/29/2015 9:19 PM
21	I hope my feedback will result in better decisions, but I rather doubt it. However, the one thing about this 3rd proposal that is better than the two previous versions is the decision to keep route 73 on 15th NE north of NE 65th -- apparently this is the very beneficial outcome of previous feedback about bad or nonexistent sidewalks being a safety issue for increased walking distance to bus stops on Roosevelt and 11th NE.	5/29/2015 4:16 PM
22	I've heard this all before and so far, Metro and Sound Transit simply say 'thank you for sharing' and so whatever they've already decided to do.	5/29/2015 4:02 PM
23	With questionnaires like this you do wonders for discouraging feedback. Not everyone has the time you do.	5/29/2015 3:42 PM
24	It will be important to have wifi and/or cell service in the bus tunnels from downtown to UW so that riders on Link can see the time they have to connect to appropriate buses once reach the station. Even more important with all the bus route changes coming so fast.	5/29/2015 3:35 PM
25	KCM seems to be doing several different planning/visioning/link processes -- I'm not sure how they fit together.	5/29/2015 3:27 PM
26	I do not think Ballard and Fremont bus reductions were clearly stated during the process.	5/29/2015 3:21 PM
27	I think the powers that be will do what is best financially, not necessarily what is best for the riders.	5/29/2015 3:15 PM
28	I didn't see any questions about eastside service. I hope the new UW Link station serves the eastside efficiently without delays in getting on the bus and onto SR-520.	5/29/2015 3:09 PM
29	The umbrella notices vaguely described the existence of alternative involving light rail and bus route changes affecting Capitol Hill and NE Seattle. The next time you do something like this you need to tender notification of alternative proposals using standard "rider alert" paper pamphlets listing each affected route and the consequences for that route under each alternative. If you tried to sneak the this set of changes under the radar, why would anyone expect that you wouldn't come back and make a second attempt at converting valued transit routes into unneeded rail feeders.	5/29/2015 2:57 PM
30	I hope that Metro will seriously consider the information it receives from public comments.	5/29/2015 2:16 PM
31	Get the Stranger on your side next time. Like it would not have been hard to put this effort on the front page of the Stranger. They'd have been all over that.	5/29/2015 2:16 PM
32	Don't allow the University of Washington to rule your decisionmaking.	5/29/2015 10:25 AM
33	I love Seattle but can see more and more how not getting help to conceptualize a more streamlined, fully accessible system for all neighborhoods from the very beginning is only creating more and more complicated transit issues. If only there had been thoughtfulness to better plan from the beginning so we had an easier fix to the issues now faced today.	5/29/2015 10:24 AM
34	I mostly bike commute and feel I will be little effected about any transit changes. I am looking forward to the improved access to SeaTac by light rail.	5/29/2015 10:21 AM
35	The few times I have contacted Metro in the past regarding issues, they have been unhelpful and rude. I do not feel my opinion really matters to them or that they truly consider what riders have to say.	5/29/2015 10:11 AM
36	:)	5/29/2015 10:05 AM
37	You could have posted flyers in the buses of the affected routes. You could have had more coverage in the newspaper.	5/29/2015 9:33 AM
38	I think the decision for certain routes (like the 68 and similar) have already been made by people who are looking at numbers and do not rely on those services. We can provide feedback, but it just does not matter. I understand it is a numbers game, but I would think there are many of us on routes that are being canceled that will not have an acceptable option and will have to get in our cars. It saddens me because I have been a long time public transportation commuter by choice, not necessity. Going from a two to three bus commute adds another transfer and more time to an already lengthy commute. That's my breaking point.	5/29/2015 9:21 AM

39	I don't know if I'll be given another place to make a comment, so I just want to say that I ride the bus to and from work 5 days a week, from almost the beginning of my route (76) until the bitter end (IDS). I've been riding Metro for 34 years. I care about the changes being made, I appreciate the efforts being made to listen to our needs, and I appreciate the subsequent adjustments. Please keep that open mind, and consider that many of us are already losing a significant portion of our workday to transit - if your solutions do not save us time and/or remove inconveniences, honestly, what's the use of changing?	5/29/2015 8:59 AM
40	It seems like putting brochures on the busses with the affected routes would be helpful, sample bus schedules so we could see what the change means for our commute times	5/29/2015 8:47 AM
41	Hopefully, public feedback will help make transit better!!	5/29/2015 8:45 AM
42	Time will tell, I guess, but I confess to a certain degree of cynicism. I am not sure whether or not my voice will be heard and my concerns addressed in a meaningful way. In other words, are you asking because you expect to learn important new facts, or because you are required to ask?	5/29/2015 8:26 AM
43	I feel that my opinions do not matter, and metro is good at wasting money	5/29/2015 8:01 AM
44	I think that there will still be people surprised. I am trying to remember if I saw and snail mail, which is where some pay attention.	5/29/2015 12:46 AM
45	I believe it's nice that Metro requests this input from its ridership. Clearly it's used but I don't think anything I say has any particular impact. Thanks for asking as it's a very Pacific Northwest thing to do.	5/28/2015 11:17 PM
46	Like I had said before, I think that the public transport needs to overcome the reasons why people are not riding and instead are taking cars. plenty of people could sell their car and rely on the bus but many choose to own a car. i think that your PR campaign needs to address the reasons why people are not riding to get more people riding, and then from there you can increase service even more with all that extra money	5/28/2015 10:55 PM
47	Great to have an opportunity to express my opinion as a metro rider and parent of high school student who also ride metro for commuting	5/28/2015 10:51 PM
48	This survey is a good format	5/28/2015 10:45 PM
49	Your survey is much too long and I imagine deliberately so. It would prevent most people from completing it, thereby keeping down the negative feedback. Makes you look better of course.	5/28/2015 10:18 PM
50	I often feel that King County and the City of Seattle try to continue to make the middle class pay more for services so we can provide services for the poor. Those of us going to work from the NE neighborhood need adequate bus service so we can pay our taxes to provide benefits for the poor. Please listen to what we have to say.	5/28/2015 10:18 PM
51	I don't know why the 242 is included in a service change driven by the UW light rail station.	5/28/2015 10:17 PM
52	The email from work opened up well, but the highlighted links to open up the survey pages does not work. I had to go through Google to find this survey.	5/28/2015 9:41 PM
53	Thank you. Please continue making Metro stronger and better.	5/28/2015 9:01 PM
54	I hope you listen to users of your service.	5/28/2015 7:58 PM
55	i tried to do the earlier survey but was unable to fill it out on line	5/28/2015 6:54 PM
56	Do everything you can to inform people who are directly affected. Don't hang a sign with 50 route numbers on it and say that you want to explain the impact that the new station will have on the routes. I would have never thought a change this major would happen to the 16 route because of the new station that is miles away. Put a sign on the #16 bus if the #16 bus is going to change. It's just common sense.	5/28/2015 6:26 PM
57	Don't know if this will help, but hope that it does.	5/28/2015 5:42 PM
58	I enjoyed participating in a previous Sounding Board, and am pleased with how Metro planners responded to community needs.	5/28/2015 5:24 PM
59	It has been proven to me that Metro is going to do whatever it wants to do and will justify their actions by ignoring what people in a particular area want or need. All of this "outreach" is just BS! Another way Metro wastes tax dollars.	5/28/2015 4:57 PM
60	Certainly hope that you will take public input into account for planning. don't know why transit problems in NE Seattle have been overlooked so far, despite lots of input.	5/28/2015 4:49 PM
61	In regard to question #50, I *hope* taking the time to share my views will result in better decisions - I don't necessarily *believe* that is the case :/	5/28/2015 4:44 PM

62	Too much focus on re-orienting bus service to connect with Link which makes little sense when Link only a single line. This proposal would require more transfers, more wait time, and more travel time when all is considered. I voted for more bus service in Seattle and it seems that the net is less bus service. Bummer.	5/28/2015 4:34 PM
63	Thank you	5/28/2015 4:24 PM
64	I appreciate it.	5/28/2015 4:17 PM
65	I don't think that the small pockets of neighborhoods (Fuhrman, Boylston, & Lakeview) that are not linked to Capital Hill and UW stations will be served well.	5/28/2015 2:10 PM
66	The poster I saw at the bus stop about finding more information online about proposed route changes was not specific enough in terms of the website address it provided. I had to look around on the website quite a bit, and I still didn't find a good place where proposed route changes are explained. I would appreciate if a link to the proposed changes was made more prominent on metro.kingcounty.gov website.	5/28/2015 10:45 AM
67	I highly doubt my voice will be heard, but call me cynical :)	5/27/2015 5:48 PM
68	Did you post notices about potentially rerouting the #12 bus on the #12 buses themselves? I do not believe I have seen them there. If a friend had not mentioned these potential changes to me I would have no idea I might be losing our bus service.	5/27/2015 4:43 PM
69	Please consider the rapidly changing city and the increased citizens living on capitol hill and the u-district and reconsider cutting some of these vital bus routes.	5/27/2015 2:50 PM
70	I have no confidence you care about my opinion.	5/27/2015 1:10 PM
71	Again.... It is very difficult to see how the changes proposed on and affecting Capitol Hill east of Broadway are related in any way to the opening of the light rail stations, and they adversely affect the way I regularly use Metro services without offering any obvious advantages. In general, the light rail stations are irrelevant to me Being able to get to the airport from Broadway instead of downtown is a welcome, if infrequently useful change that ST is making.	5/26/2015 5:27 PM
72	I and my wife ride several times a week. I didn't even know the feedback phase was happening. That was kind of disappointing.	5/26/2015 1:07 PM
73	Please keep route 242	5/26/2015 11:23 AM
74	I know that rider input is only part of a larger formula that includes funding, politics, and lobbying by businesses and organizations, but it's nice to at least be part of the process.	5/26/2015 11:20 AM
75	Better service to Sand Point from U district.	5/26/2015 8:04 AM
76	All in all I have to compliment you on your efforts to inform the public and provide us with opportunities to provide feedback. Thank you very much. I think you are doing good work even if I disagree with some of the proposed changes.	5/25/2015 9:40 PM
77	I have no confidence that input from myself or my neighbors will make any difference. I feel that decisions have already been made.	5/25/2015 8:00 PM
78	The outreach has been fine.....I just do not believe that my concerns can be addressed because I have had a positive connection to Metro.....and the Link service ...which will be positive for otherswill be less convenient for me....particularly as I age further.	5/25/2015 4:13 PM
79	I'm sorry to say that I don't trust you to do what's best for the public, based on decisions you've made in the past.	5/25/2015 12:28 PM
80	Hate the rerouting of the 66. Appreciate the increase of the 70 and 8 later. Can stay out a bit longer on weekends. Change in routes if totally different need to be renamed appropriate to route not attaching to an old route so it looks like your not deleting your routes!	5/25/2015 12:11 AM
81	This internet survey is an excellent way to get feedback from people who care. The public meeting format gives more weight to people who are loud, though it has the advantage of back and forth.	5/24/2015 11:46 AM
82	I'm enough of a cynic to believe that the outreach process is mainly window dressing.	5/23/2015 2:15 PM
83	This survey and the proposed changes were difficult to find on your site. I had to specifically look for them. It seems they should be easier to find.	5/23/2015 12:05 PM
84	Why you have already everything that you want.	5/23/2015 9:43 AM

85	I think this survey is a bit too long and would ot ve surprised if many people quit halfway through. I am ready to quit now.	5/23/2015 12:01 AM
86	Please make sure you are reaching out, often and in all accessible forms to the communities that absolutely rely on affordable, convenient and safe public transportation (the working poor, immigrants, students {not just at UW}, the homeless) not just the upper middle class folks who's employers subsidize their transit (Amazon, Microsoft, UW).	5/22/2015 6:47 PM
87	I feel many riders who will be affected are still completely unaware of these plans, due to the supposed focus on "Link". And most aren't aware that this Link extension will only reach the stadium site, with a full five (why?) years to get into the actual U District.	5/22/2015 11:55 AM
88	I've responded to metro changes numerous times over the past 15 years (I would have responded in March except the website didn't cooperate) and it is clear that my feedback is never part of the dominant master plan. Metro and the city of seattle have an agenda, and public input is only accepted to tweak the edges of the plan.	5/22/2015 10:15 AM
89	Come to all the neighborhoods that will be affected, and inform. Specially the low income people are not well informed and will be the most affected.	5/22/2015 12:37 AM
90	none	5/21/2015 9:50 PM
91	More effort should be made to address the concerns of those who commute from Seward Park and the Rainier Valley to the University of Washington. Transit ridership is high in the Rainier Valley.	5/21/2015 8:09 PM
92	One other general piece of feedback would that that you should consider making no bussing changes for the first 6 months after the link stops open. Then you will be able to make changes based on people's actual usage changes.	5/21/2015 4:37 PM
93	Please don't make me take 2-3 buses for my 20-mile commute instead of just one. I would seriously find a new job. Less money from Microsoft for Metro...	5/21/2015 3:34 PM
94	I sincerely hope that this is all being thoroughly planned and thought-through so that we end up with a system that works as well as Tokyo's transportation system. In other words, I hope that we are thinking long term about this and not letting cost now affect our future as so often happens in this city.	5/21/2015 12:19 PM
95	Please continue to provide feedback about the responses you've received and how you are specifically moving to address them.	5/21/2015 10:45 AM
96	Please do heed the comments! I hope many people are speaking out that too many buses are cancelled for adding only two light rail stops.	5/21/2015 9:16 AM
97	I had heard absolutely nothing about this until now, especially changes to the 28, which certainly is not at all a bus line you'd think would be affected by opening the light rail. Outreach to this end of town / the 28 route has been very poor. I only heard about this via a neighborhood blog.	5/20/2015 10:08 PM
98	Please call me at (206) 526-1623 regarding these proposals	5/20/2015 9:29 PM
99	This 'Have A Say' box that pops out into the website SUCKS! I clicked outside the box 3 times trying to fill this survey out, and that completely erases the progress made in the survey. Do not have it quit out automatically like that, or open this in a new window so the opportunity to erase all progress is minimized.	5/20/2015 8:17 PM
100	Tell sound transit to keep 540 at the South Kirkland P&R.	5/20/2015 8:11 PM
101	Please save the #43. I have no idea if community feedback influences any transit decisions whatsoever. What I've seen from light rail stations in other parts of town, it leads to decreased bus service in the vicinity which is only helpful for people who want to take light rail to light rail--everyone else has to schlep from one form of transportation to another--in the rain, in the dark, with kids, with bags, with physical limitations--whatever.	5/20/2015 4:13 PM
102	There is a big gap between office budgeters and users of public transportation. Transit riders are poorer than people who own cars, and the reason Seattle has no subway is because it is the 4th richest per capita urban area in the U.S., so people don't care about the buses. The decision to broaden the subway system HAS to come from "on high" because car riders are selfish. Emerald City...green city...HAH! It is a disgrace that a city of 4 million does not have a subway system. Stop resting on the laurels of Boeing, Amazon, Microsoft et al and realize that one of the two or three most important keys to the expected continued growth of Seattle is...transportation. Look how the subway rejuvenated Los Angeles. Seattle is on the VERGE of being great...make it arrive! Now, if we could just get a basketball and hockey franchise - and a 1000-foot skyscraper - we would be major league, not just triple A!	5/20/2015 12:54 PM
103	Metro & Sound Transit seem to have their minds made up already	5/20/2015 10:37 AM

104	How am I supposed to know if my feedback will be taken into consideration? I certainly hope it will though. By the way, this survey was missing a crucial option for people who would still take the bus (because it's better than the other options they have) but disagree with the proposed changes. Buses effect everyone, not just he people riding them.	5/20/2015 8:13 AM
105	Maybe link something up on the OneBusAway app to let users know about these surveys! I would love that.	5/19/2015 10:57 PM
106	I liked the look & feel of this survey	5/19/2015 10:09 PM
107	I would like to believe in the power of feedback but really when I look around Seattle and see the changes that have occurred in the last 10-15 years I think the older and poorer folks are pretty marginalized as far as feedback and needs.	5/19/2015 9:53 PM
108	The March part was kind of confusing because it was proposals made not taking into account the increased funding which was then made available. However, you seem to have sorted things out pretty well now. Thanks!	5/19/2015 9:31 PM
109	I appreciate that you considered hearing the commuters out before making the final decision.	5/19/2015 3:13 PM
110	This survey was way too long.	5/19/2015 2:49 PM
111	I've always felt that my opinion was valued when providing feedback to Metro.	5/19/2015 2:49 PM
112	Please see comments in other boxes re: survey design.	5/19/2015 2:26 PM
113	It's not clear that this kind of outreach really makes any difference.	5/19/2015 2:22 PM
114	Very comprehensive. Appreciated	5/19/2015 2:22 PM
115	I'm pretty jaded and don't believe I as one person make any kind of difference even when I do stand up and voice my opinion. All previous elections, City Council Mayors and Seattle government make it clear they have their own agendas. Kshama Sawant is a little to one sided for me but she has come into the council with gusto.	5/19/2015 1:50 PM
116	This survey is too long.	5/19/2015 12:37 PM
117	Some sort of public transportation from Tacoma, to Issaquah or close to Tacoma/south sound without having to go to Seattle first.	5/19/2015 11:42 AM
118	Very limited. Not geared toward potential users.	5/19/2015 11:14 AM
119	Your "outreach process" was severely flawed. I only became aware of it after talking to a neighbor, and initiating my own search for proposed bus route changes. Why did you not have flyers or ads in the #11 Madison bus (or the #8, or....) to alert riders that changes were coming?	5/19/2015 11:05 AM
120	thank you for working so hard to solve our transportation issues with limited funds. I do appreciate it!	5/19/2015 11:05 AM
121	You should do more outreach at actual transit stops. Simply putting up those red signs and directing people to a website is not enough. What if you had employees collect feedback from riders (maybe using tablet computers) while waiting for the bus?	5/19/2015 10:56 AM
122	I liked that you stated what you heard from people and then the proposed change. It made it clear how you understood the problem and how you want to resolve it.	5/19/2015 10:53 AM
123	Not everyone in u-district live near the husky stadium. 71, 72, 73 are the most popular route connecting us to downtown seattle and international district. Cutting them will cause problems and changes to many of our daily commute!!!	5/19/2015 10:48 AM
124	This survey was long and confusing. I welcome the service improvements, but couched within these positive points was the door to door service provided to wealthy communities and route splits for underserved communities. I don't want to stand in the rain to get to my job while others who are not in need get delivered directly to their door.	5/19/2015 10:42 AM
125	Good job!	5/19/2015 10:40 AM
126	It is apparent that the decisions have already been made, this survey is little more than window dressing to make the sheep feel "included". BS !	5/19/2015 10:27 AM
127	The only thing I would improve is the design of the signs posted on bus stops. They are difficult to read sometimes.	5/19/2015 10:06 AM

128	Your process for gathering information in the public interest is sorely lacking if you are considering eliminating one of the biggest, most crowded Capitol Hill>U-District routes-- the #43. Please reconsider those of us who actually depend on this route.	5/19/2015 10:06 AM
129	Thank you for the outreach. I do hope you will seriously consider the feedback recieved. And please be sure the decision makers are using your services! It's the worst form of management if these people have no experience getting around the sound by Metro, Sound Transit, Link or ferry.	5/19/2015 10:04 AM
130	Metro has ALWAYS done what they want regardless of public feedback.	5/19/2015 10:04 AM
131	I believe that my sharing may provide better discussions, but I do not think that it will change anything. The Metro is questionably managed (at the highest levels) and they're going to do what they want.	5/19/2015 9:49 AM
132	Again it would have been better to have some outreach presentations on weekends during the day say 10:00 not in the afternoon. Use NE public library, Urban Horticulture Center (this was used when there were going to be many changes to 65 route to accommodate Seattle Childrens Hospital). I attended one presentation there- on a Saturday morning. Evening on work nights bad idea.	5/19/2015 9:48 AM
133	I hope taking the time to share my views helps keep the 43, or some direct route from Montlake to Downtown Seattle in service.	5/19/2015 9:33 AM
134	i think you'll do whatever lines the city's pockets and sucks up to Big Business. I don't think the city cares about normal people.	5/19/2015 9:32 AM
135	a monkey should be taking this survey.	5/19/2015 9:28 AM
136	As long as I live in West Seattle, none of my opinions matter. That's the message that I receive on numerous occasions from Metro.	5/19/2015 9:27 AM
137	This is an exercise in futility, but I am still participating. I highly doubt that community feedback will be respected or heard. I think that Metro will continue with whatever plan their leadership wanted from the beginning.	5/19/2015 9:26 AM
138	Each time I've given feedback, neither time made a difference. My routes were eliminated and I've had to make alternate arrangements. The first time increased my commute time by 1.5 hours per day and this one will make it even longer. Given the choice of my current commute time of 3 hours per day and the new commute time of about 3.5 to 4 hours per day, I will probably start driving to work.	5/19/2015 9:26 AM
139	Seattle is growing at an exponential rate. The only way to keep up is to improve our transit system. Removing RT 43 is a step backwards. This is a mistake.	5/19/2015 9:23 AM
140	I highly appreciate that Sound Transit sent someone out to distribute handouts regarding the proposed service changes, otherwise I may not have heard about it or noticed the proposed changes in a timely fashion.	5/19/2015 9:16 AM
141	The outreach efforts are fine, but people need an easy to understand way to parse the upcoming changes. I still have no idea what my commute is going to look like in 3, 6, 12 months.	5/19/2015 9:15 AM
142	Metro is going to ignore our concerns about running articulated, long-haul diesel buses through our stretch of Meridian Ave N between 56th and 65th and make our noise, congestion and safety problems even worse. This is a *residential* neighborhood and street, not a thoroughfare, but Metro refuses to run these noisy and large buses on nearby wider streets such as E. Green Lake Way or Latona Ave. Previous attempts at outreach have been futile and presumably this will as well.	5/18/2015 10:23 PM
143	If the 43 is eliminated I will no longer wsupport any metro bond issues and will actively work to defeat any measures.	5/18/2015 10:07 PM
144	This survey was insanely long. When I asked to skip sections of it, the survey proceeded anyway. This seems intentionally long to stifle feedback from folks who don't have a lot of time to participate.	5/18/2015 2:20 PM
145	A simple map of the bus routes (like what is currently on the KCM website) leaves out some important information (such as where bus stops will be located). I think that having the option of seeing that would be very helpful for some in order to provide accurate feedback.	5/18/2015 1:40 PM
146	Too many people do not participate, especially older people, many of whom do not use a computer. Then there are those who do not believe that their needs will be listened to. I actually do not believe that you will not take my bus away, regardless. The older I get, the less listened to or attention paid to.. Just because we get old, we don't stop wanting to go places, experience what is going on in our city. I pay plenty of property taxes to be able to have transportation that I can use.	5/18/2015 1:01 PM
147	Thanks for asking	5/18/2015 11:01 AM

148	It is very long. You should be able to submit anytime even if you do not want to finish - this will allow more results.	5/18/2015 10:50 AM
149	Good job!	5/18/2015 8:41 AM
150	Answer to #51 above: I hope so, but I'm not sure! I believe you gather feedback, but then proceed as you wish. Your actions make me feel manipulated!	5/18/2015 8:04 AM
151	Thanks for asking the questions!	5/18/2015 7:46 AM
152	Outreach is good, my concern is what percentage of riders participate.	5/17/2015 6:03 PM
153	I won't know whther taking the time will results in better decisions unless the better decisions are actually made	5/17/2015 4:49 PM
154	Metro has ignored any suggestion or comment to date, why should one expect a different outcome now?	5/17/2015 1:44 PM
155	I am pretty much sure that Metro (my former employer) and Sound Transit have already decided what they're going to do, and that my input won't have much impact.	5/16/2015 9:58 PM
156	it could be better coordinated to advise the public and give them more time to respond. On buses, at stops, in the tunnel, driver announcements?	5/16/2015 4:02 PM
157	I never heard about the second round of feedback until after the comment period was over. These comment periods are not long enough.	5/16/2015 1:40 PM
158	Ted Day is a great presenter but the production values of the videos were basic. Surely KCDOT can do better!	5/16/2015 9:59 AM
159	Does service between Husky Stadium and the airport begin in March 2016 when the proposed changes take effect? I travel by plane maybe once every 15 years. I have no other use for light rail. I have been a frequent Seattle Transit/ Metro Transit rider all my life.	5/15/2015 11:37 PM
160	The questions weren't worded in such a way, or weren't specific enough, to accurately gauge opinion	5/15/2015 7:11 PM
161	I'm sure that much input has been asked for, but this is not a substitute for acting on behalf of riders and potential riders. People are used to and rely on the existing service, and I think this is discounted by planners in favor of theoretical benefits from more ideal designs. For the outreach to be genuine, if people say keep something the same unless there is a very strong and clear benefit to changing it, then you should do so, even if it is theoretically less "efficient" overall.	5/15/2015 5:41 PM
162	I only heard about this from a Nextdoor.com group member, an active concerned citizen. I would never have known otherwise. Would have been more aware if had received a mailing.	5/15/2015 5:07 PM
163	This survey seems carefully designed to provide support for current decisions. It is probably the most irritating and self serving survey I have seen in recent memory.	5/15/2015 12:50 PM
164	I appreciate the high level of detail of the proposed route maps. It took a lot of back and forth comparison between the 3 maps to determine where routes would be located. If possible, it would be great to have a master map with options for turning on/off the all-day, peak and other routes to see the full picture (I may have missed a master map if there was one).	5/15/2015 12:11 PM
165	It appears that public is being processed with all this "outreach" for naught -- comments are largely ignored.	5/15/2015 12:04 PM
166	I would like to see the specific ramifications of this proposal to Montlake addressed. There has been much said about Capitol hill, but Montlake seems to have been ignored.	5/15/2015 10:59 AM
167	#50. - I certainly hope so!!!!	5/15/2015 10:37 AM
168	This "proposal" was slated from the beginning and you are pretending to get buy in throughout this process, but many agendas of yours are coming through at the expense of many.	5/15/2015 10:20 AM
169	You aren't reaching the people who are least able to manage without the bus.	5/15/2015 10:08 AM
170	Metro has already decided what it wants to do and I don't feel the public has any influence on the outcome. Also this survey was advancing pages and I could not go back and view those pages. I'm not sure if it was my iPad, when I tried to select answers it wouldn't allow me to check the box I wanted to would advance and check something I didn't want. I speak English for example and not another language.	5/15/2015 10:06 AM
171	I would have more new, and frequent updates, on the major TV networks, inviting people to participate and showing how to be involved. Use TV.	5/15/2015 9:47 AM

172	I'm sure you did a great job at outreach for the Link connection changes, but Metro did a terrible job at outreach wrt to bus changes outside that area, e.g. 28/28X and it's not fair to the community to roll these changes out under the guise of Link Connection improvements and not doing any outreach wrt the proposed changes. I found out about these changes when it was brought up at yesterday's Ballard District Council.	5/14/2015 10:54 PM
173	Connections proposal had bus changes that significantly impacted Broadview. However, there was no selection of Broadview in the neighborhood selector.	5/14/2015 10:38 PM
174	I do hope that you will actually listen to feedback and not have forgone conclusions to what will happen.	5/14/2015 5:25 PM
175	I still don't even see a mention of Lake City anywhere in the proposal despite the strong impact it will have on the neighborhood's access to the rest of the city.	5/14/2015 3:10 PM
176	Awhile back I spoke with a Metro employee who was out talking with bus riders at the Northgate transit station. He seemed to be a manager or upper level planner, and I was impressed and happy that someone at his level was taking the time to talk with people about Metro issues face to face at a bus stop.	5/14/2015 1:31 PM
177	I have not seen any information about whether there will be free transfer between buses and trains. There should be!	5/14/2015 11:49 AM
178	Do you have something against the #68 bus? They were going to delete it when they said they didn't have any money. Now that they supposedly have money, THEY ARE GOING TO DELETE IT ANYWAY! I use it to go to Northgate and back. I don't go downtown very often. I have lived in Seattle since 1963. There was always a #71 bus that came up from downtown and went East on N.E. 65th street. It used to be called the #7 View Ridge. Why would you want to delete a bus rout that has been running for so many years?	5/14/2015 10:41 AM
179	I WISH YOU'D INCLUDE US IN MAKING THESE DECISIONS BUT NO ONE SEEMS TO BE LISTHENING! MOVE THE #16 OFF MERIDIAN AVE N. BETWEEN N 64TH AND N 56TH STREET - IT IS MUCH BETTER SUITED FOR EVERYONE ON A WIDER STREET THAT CAN ACCOMADATES BUSES - GREEN LAKE WAY - YOU ARE CHANGING EVERY ROUTE EXCEPT THE ONE THAT NEEDS TO BE CHANGED WHICH IS THE #16!!!!!! ADDING BUSES EVERY 7 TO 15 MINUTES WILL CAUSE BACKUPS ON OUR STREET AS THEY FIGHT TO TRY TO GET BY EACH OTHER ON THIS VERY NARROW RESIDENTIAL STREET WITH MANY FAMILIES!!!!!!!!!!	5/14/2015 9:40 AM
180	I called metro and left a voice message about my concerns and requested a call back. I never received the call back from Metro. Says a lot about the respect metro shows it "neighbors".	5/14/2015 7:50 AM
181	I think the process to involve the community is critically flawed. Why aren't there flyers in the bus itself? That is where most bus riders are and most are ignorant of these changes.	5/13/2015 11:25 PM
182	You should make the links for providing online feedback available directly in the emails you sent out regarding these changes - having the changes described in the email was great, but I had to hunt for a way to provide feedback. If the link was in fact there and I missed it, I apologize, but hope you will find a way to make it more obvious in the future, then. Thanks a lot!	5/13/2015 10:34 PM
183	This outreach process has been, in my opinion, very weak. It is my impression that you don't really want input, e.g., the times when the outreach sessions are held--in the morning when folks are on their way to work or at work already. But die seems cast--time will tell if those proposed routes and all those transfers prove to be more efficient. And if they're not, then I'll be on my bike and in my car.	5/13/2015 9:17 PM
184	Planning routes does involve community input but, ultimately, rests with those who control the purse strings and the planners who look at all the routes. It would make more sense to make incremental changes now, build out more link stations, then make more incremental changes, and so on, rather than such large changes now (or are more changes coming in 2022 to this degree?) The only reason I can see for the large number of changes is financial (eliminating and combining routes does this, as well as reducing frequency of some.) On the other hand, such changes without having buses terminate or stop at link stations that are ready for riders, that do not go to the destinations that they once did, will probably force riders off of transit and into their cars. Likewise, if riders have to take more time to divert to an E-W route to get to a link station to go N-S on light rail to get to their destination, rather than just take a N-S bus as now, they are likely to get in their cars. That is, unless it is more convenient to ride transit (faster, more timely, etc.) which means that the transit has to be running frequently and on-time (which is difficult with buses at times, especially during high congestion times.) Hopefully, community input as a whole will make a difference. By the way, in the future, hold community meetings on weekends or after 6 PM in community centers in each neighborhood... and advertise in the Weekly and the Stranger as well as Community groups, Facebook, etc.	5/13/2015 8:12 PM
185	Just like in the justice system where U.S. citizens are supposed to be considered innocent till proven guilty, but going to court and having to prove your innocence, proposals put forth in your outreach process have more often than not already been decided upon by Metro management and the King County council members	5/13/2015 7:02 PM

186	It seems like this is a done deal so why are you asking for feedback?	5/13/2015 6:17 PM
187	Took a while to realize that route 8 will split nowhere near Mt Baker station, which would make a commute between Seatac and the Central Area impossible late at night. This should be front and center in the proposal, but it wasn't. The "all day frequency" statements about 8 and 48 are also very misleading, since the routes will not really operate all day. In fact 48 even stops running before midnight. If you live in the 23rd ave corridor and want to use the light rail late at night, it will make you think that 48 operates even later than the light rail, but it's not true. This is a big misleading statement, and you need to fix it.	5/13/2015 6:11 PM
188	I am going to become more activist in blocking your stupid suggestions.	5/13/2015 6:08 PM
189	The more communication, the better. The signs at the bus stops alerting people to changes and how to comment were the most common form of outreach I saw, and they have been pretty clear if a little generic. But the details are easy to find once you get on the website, so that generality is ok. I appreciate that you took multiple stages of feedback, so the plan could actually be changed to address people's concerns before everything was locked down and set in stone. The new Trip Planner app is another good means of outreach, and I have been finding it very useful (I use the iPhone version, it works quite well.)	5/13/2015 6:06 PM
190	I feel reached out to, and I also feel that this process is unlikely to create the kind of transit improvement that would benefit me and my family.	5/13/2015 5:51 PM
191	Next time have the outreach sessions in ethnic areas that serve the working class, and not solely in upper class white areas that reinforce and protect white privilege. The well-to-do will always have transit options, yet the working classes do not.	5/13/2015 5:41 PM
192	Thus far the only changes that seem to Matter are the ones that keep Pike/Pine serviced up to 15th Ave and getting people to the light rail station. It is ridiculous to expect people to transfer 2 times just to get downtown. By eliminating "duplications" in routes, you will definitely lose frequency, and only cause a more frustrating commute experience.	5/13/2015 5:29 PM
193	I VERY MUCH DOUBT IT WILL HAVE ANY IMPACT AT ALL. METRO HAS NEVER SERVICED EAST WEST ROUTES WELL EVEN THOUGH THESE ROUTES PROVIDE MUCH MORE CHALLENGE FOR BIKING OR WALKING BECAUSE OF THE HILLS. WHY ARE YOU TRYING TO FORCE PEOPLE BACK IN THEIR CARS?	5/13/2015 5:21 PM
194	Survey was very difficult to use.	5/13/2015 5:16 PM
195	Thank you for listening / reading.	5/13/2015 5:10 PM
196	I got about a thousand text messages, with links to websites that only provided useful details in the form of pdf files that were incredibly annoying to try to read on my phone. So A+ work on that, folks.	5/13/2015 4:53 PM
197	Obviously KC Metro will go ahead with proposed changes, whether the general public likes it or not !	5/13/2015 4:48 PM
198	Even if my opinion doesn't change the decisions made, I still feel that I need to provide input and feedback. I rely on Metro and public transportation and it has been a fantastic service. I will have quite a lot added to my commute with the proposed changes, but because I don't have an alternative, will continue using public transportation. Thank you for giving riders an opportunity to provide feedback.	5/13/2015 4:44 PM
199	It's great to focus on connections to new light rail but there are a lot of riders that need more efficient connections elsewhere. A route that stops at Northgate and runs to Boeing Everett would be nice, for example. Direct routes from point to point would also be nice. My family uses light rail to the airport but it is a longer than necessary trip due to the circuitous route and it is not practical for people with small children, those with a lot of luggage, or those who have difficulty walking because the airport station is way too far away from the terminal. PDX and Reagan international, to name a few, got this right so why can't Seattle?	5/13/2015 4:11 PM
200	You don't reach out to older adults.	5/13/2015 3:20 PM
201	The link to Husky Stadium provides NO valuable service to the U. of WA for me as an employee. The purpose of the University is ACADEMICS, EDUCATION, and RESEARCH--NOT transportation to a sports arena! The Husky Stadium location is NOT convenient WHATSOEVER for my work on campus. I will not use it.	5/13/2015 3:01 PM
202	I certainly hope our feedback will be taken under consideration.	5/13/2015 2:54 PM
203	This survey could have been more succinct. Also I would TOTALLY advise you to skip the language and race/ethnicity questions as some minority groups will be afraid to answer them, log out, and deprive you of their feedback.	5/13/2015 2:46 PM
204	I never heard about the earlier proposals, do I did not provide feedback for them.	5/13/2015 2:19 PM

205	Please help our entire neighborhood understand why the route is staying the same in our neighborhood (well actually increasing in service) when the area obviously does not serve a bus lane well! Has anyone actually: - Looked at this area of the route - Looked at the petition and information our neighborhood put together outlining our issues - Looked at the number of citations from the bus for hitting parked cars (my own car has been hit over 3 times). - Looked at how fast the bus goes down the street, how cars have to wait for the bus to pass, how dangerous it is and how few stops there are on the street anyway, given it is residential and anyone could just walk over to Latona, which is a wide street with traffic lights, retail businesses, room for two cars to pass, a major road, not a side, neighborhood street. -- If you look at all of the above you will realize Route 16 needs to be changed!	5/13/2015 1:21 PM
206	Will since the 30 is slated to be cancelled, then my opinion does not matter, nor any of my co-workers who ride this bus every day, struggle with late drivers, have 1/2 hour wait times between buses, have to deal with the "crime ave" every day. Yeah, just what I need, a longer/ harder commute.	5/13/2015 1:20 PM
207	This survey is way too long and does not advance forward the way that it should.	5/13/2015 1:18 PM
208	Please make sure you continue reaching out to communities in the central district and international district where English is not the first language of many people. Translated information in libraries and community centers is key. Also, I would love for the one bus away app to be accessible to people without smartphones. It is so helpful and saves a lot of time. I have seen screens downtown with bus arrival times, which are helpful. We should have more of these at stops outside of downtown, which could also provide information about upcoming service changes and surveys like this one.	5/13/2015 12:30 PM
209	I think your current outreach process is good, and your website is very clear and explains everything well. I do wish I had heard earlier about these changes. I just found out about them now. I would have had comments earlier. Please continue your outreach efforts via e-mail and websites. Thank you for your responsiveness to the public.	5/13/2015 12:18 PM
210	It is not easy to make the changes that are necessary to make. You will always alienate some percentage of existing users but you might also gain a lot more users. Thank you for making this a public process.	5/13/2015 11:50 AM
211	Metro needs to provide a more transparent and thorough presentation of the feedback both positive and negative. It would be helpful to see patterns of ridership of what other factors were included in Metro decision making.	5/13/2015 11:40 AM
212	Thank you for reaching out. I do hope that my comments will help improve the outcome. I do not want my support for Prop 1 and associated increase in my property taxes to result in a DECREASE in the services I depend upon. I think you guys do a good work on a very challenging area of service, and I hope you will give consideration to my perspectives on Route 26x.Thanks!	5/13/2015 11:08 AM
213	I believe that your tabling event at UW occurred during the Finals week, and was poorly promoted, because I did not even hear about it, and I am someone who is very interested in public transit and hence would notice and hope to attend that type of event. Considering that UW is one of the biggest transit trip generators in the city, and that most of the proposed changes directly affect the U District, you'd think there would've been a lot more outreach to students, faculty and staff.	5/13/2015 10:34 AM
214	Please know that the public outreach effort has been very welcome. It is greatly appreciated knowing that Metro is taking the positions of its riders into account at a critical moment.	5/13/2015 10:03 AM
215	Thank you for providing various ways for us to share feedback, whether in person or online. Some of us are better served by doing this in writing, while others will benefit from the in-person presentations.	5/13/2015 9:36 AM
216	The meetings for proposed changes to eliminate the #34 and #39 buses and replace them with the #50 bus were well attended with unanimous feedback that these changes would have a negative impact on the neighborhoods. These comments were ignored. After these changes, many metro riders found alternate transportation options. How could Metro possibly think that getting to the ball parks and Alki beach would be more important to commuters in SE Seattle than getting to Garfield and the U District? And the changes were promoted as a big benefit to us!	5/13/2015 9:20 AM
217	I really hope the public is listened to. While the UW has a great impact on the traffic flow from outside of Seattle to the UW there are still a lot of working people in areas not being directly addressed and with all the building in the South Lake Union area, this area is getting very crowded and congested even with the Mercer changes. This area and up and down the Eastlake Ave corridor need to be looked at and reviewed as these changes make the 70 the only option and right now the service is sketchy, but that may be more on the operators than the route.	5/13/2015 9:07 AM
218	I would hope that riders opinions in all service areas matter and there's an equitable process for all neighborhoods. Particularly within the City of Seattle limits as taxes were increased to continue Metro service and I believe those taxes should go to additional services within the city limits and not increased east-west routes to the Eastside.	5/13/2015 8:14 AM

219	too many questions in the survey	5/13/2015 8:09 AM
220	Metro does not care about riders ar changes in bus service would have been mde a while back. Metro was one of the best bus system 5 years ago and now it almost unsable. It's slow, never runs on time.	5/13/2015 7:24 AM
221	I'm not sure if opinions help or if the decision-making is already a done deal	5/13/2015 7:23 AM
222	We need west- east transportation from Phinney Ridge, Ballard and Greenwood to Capitol Hill.	5/12/2015 11:49 PM
223	I am hopeful that attention will be paid to feedback.	5/12/2015 10:13 PM
224	I am tired of bus cut talks, changes done even though they say we get a say. I hate using metro as it has become so stressful.	5/12/2015 10:01 PM
225	I do not lay all of the blame for this sorry situation at the feet of Metro or its management or its union members. Part of the responsibility lays with the voters (and non-voters) in the county and State and our regressive tax system. Many, many questions on this survey do NOT allow me to give an answer that I can align with; it was not well constructed.	5/12/2015 9:46 PM
226	No Comment	5/12/2015 9:46 PM
227	There will be effects on neighborhoods outside the study area (like mine in Greenwood), and it's worth considering both the impacts and opportunities created beyond the study area.	5/12/2015 9:46 PM
228	These changes were advertised as "capitol Hill" changes. If eastside riders were specifically targeted, then I believe you would have a much larger response from them.	5/12/2015 9:37 PM
229	are you aware that there are 650 additional housing units being planned around the Issaquah Highlands? are you planning additional bus service for this area? Every day, I ride buses with 20 to 30 people standing from Seattle to Issaquah Highlands	5/12/2015 9:09 PM
230	Most of the changes that will affect Wallingford do not seem to have any connection to the new light rail station at Husky Stadium, except for the slightly increased frequency of the 44 bus. That's the only connection in this neighborhood to the light rail. None of the rest of the proposed changes having anything to do with light rail. Also, it would be nice to know when the UW stadium station will open and how often the service will be.	5/12/2015 8:06 PM
231	I really appreciate Metro taking the time and effort to hear what riders have to say. While I doubt that my concerns will be addressed, it's great to be able to share my thoughts and concerns about how Metro will change and grow in the future, hopefully for the better.	5/12/2015 8:02 PM
232	light rail does not go everywhere -- the south end still needs buses. we do not have the good connections with light rail like you are creating for Husky stadium. Why? seems like you are doing more to serve the north part of the city.	5/12/2015 7:38 PM
233	they will make what ever changes they want regardless of what people say	5/12/2015 7:26 PM
234	Keep up the great work.	5/12/2015 7:13 PM
235	I think it is a method to prove you have support, when in fact that is not clear.	5/12/2015 6:45 PM
236	I don't now the answer to question #33. Changes will need to be made to accommodate people that don't use this website or go to meetings with the public. I would like to know what is the percentage of people that have voiced their opinions on this matter.	5/12/2015 6:31 PM
237	I am sooo tired of web sites optimized for mobile, meaning that on my laptop I have to scroll a lot more because the site page no longer fits on my screen.	5/12/2015 6:21 PM
238	Have already done so above, thank you. I would however like to know whether Metro consulted its own drivers on these changes. My impression is that Metro often ignores or disregards direct input from drivers, and feel that this must often create a big gap in the information you have access to.	5/12/2015 6:11 PM
239	This is near my home, I am not only concerned about the price of my rent skyrocketing, but that it will being more crime around the area, or even more vehicles that I will have to watch out for. I hope that this is the best decision and I think the community as a whole can help shape the best choice for us all.	5/12/2015 6:07 PM

240	The feedback options on the survey questions were particularly limited, and seemed designed to garner support for proposed changes, despite obvious deficiencies relative to prior proposals. David Seater said it better than I could in his comment on SeattleTransitBlog.com: "Taking the Metro survey also doesn't look particularly helpful to provide useful feedback. All of the multiple choice questions are couched like this: Q: We heard that riders wanted increased frequency. We increased frequency by deleting the 43 and not adding additional service. Do you agree that increased frequency is important? A: There's no way to say, 'No, this proposal is WORSE than anything else you've proposed because I can do math' until you get to a generic free response section at the end." Comment here, for context: http://seattletransitblog.com/2015/05/12/metro-releases-next-u-link-restructure/#comment-620048	5/12/2015 6:06 PM
241	It would be simpler if there was just one website involved (not Sound Transit AND Metro), or at least to have a clearer explanation of their two different roles in this process.	5/12/2015 6:04 PM
242	What will happen will happen with or without my opinion. Metro couldn't be bothered to do a mailer there were only signs placed at some bus stops and I found out from another rider what the signs were about. Again I don't think you care about anyone who is work class or poor, because if you did you would have had better communication.	5/12/2015 6:02 PM
243	You don't want to listen to the Rides. You made up your minds way before this project was ever started . You are just doing this so you can say you got feedback.	5/12/2015 5:59 PM
244	This survey was well designed. It was great that you asked specific questions about many specific routes. It was easy to fill out given that most of the answers were multiple choice and did not require taking too much time to write in answers.	5/12/2015 5:52 PM
245	Please respond to our feedback. Many of us have been using Metro for years. Don't make changes that seriously alter our ability to continue to use Metro as we have been doing.	5/12/2015 5:50 PM
246	You have got to be kidding about question 51. I have never known a government agency to pay attention to anything the public has to say.	5/12/2015 5:50 PM
247	DO NOT REMOVE ROUTE 71!!!!!!	5/12/2015 5:49 PM
248	Sorry, the proposed changes just don't seem clear. It looks like the #12 may have been saved, but it isn't anything like the bus I rely upon. I really do not understand how folks on the South face of Capitol Hill will be able to travel. Resources are focused on Central Capitol Hill and the University.	5/12/2015 5:46 PM
249	I'm concerned that the outreach process seems to have been driven by "squeaky wheels" at neighborhood meetings rather than by strong transit fundamentals. If riders are "confused" by a large number of changes then the solution is to do a better job explaining the changes (and the reasons behind them) instead of scrapping them.	5/12/2015 5:27 PM
250	Thank you for the opportunity.	5/12/2015 4:29 PM
251	The city should not be looking to eliminate bus routes, or hampering the use of public transit in any way. The city should be looking to encourage bus use through economic incentives (such as increased tolls, higher parking meter fees) that discourage driving. Seattle is growing too fast, there is no more room for single drivers on the highways, and cutting bus routes, especially the ones that help transport riders from seattle to the eastside (and vice versa) will increase the number of cars on the road.	5/12/2015 4:13 PM
252	This survey was quite long and a bit confusing.	5/12/2015 3:28 PM
253	Everyone I have spoken to is unhappy about the elimination of 71 and 72, so I don't see how this feedback is influencing the plan.	5/12/2015 2:50 PM

Q53 We're moving to more electronic notification to keep people informed about Metro's service planning. If you use email and would like to stay informed about next steps in this decision-making process, as well as future opportunities to participate in decision-making, please provide us with the information listed below.
