2016 Capital Facilities Plan

Issaquah School District No. 411 Issaquah, Washington

Adopted May 25, 2016 Resolution No. 1070

The Issaquah School District No. 411 hereby provides this Capital Facilities Plan documenting present and future school facility requirements of the District. The plan contains all elements required by the Growth Management Act and King County Council Ordinance 21-A.

EXECUTIVE SUMMARY

This Six-Year Capital Facilities Plan (the "Plan") has been prepared by the Issaquah School District (the "district") as the district's primary facility planning document, in compliance with the requirements of Washington's Growth Management Act and King County Council Code Title 21A. This Plan was prepared using data available in March, 2016.

This Plan is an update of prior long-term Capital Facilities Plans adopted by the Issaquah School District. However, this Plan is not intended to be the sole Plan for all of the District's needs. The District may prepare interim and periodic Long Range Capital Facilities Plans consistent with board policies, taking into account a longer or a shorter time period, other factors and trends in the use of facilities, and other needs of the District as may be required. Any such plan or plans will be consistent with this Six-Year Capital Facilities Plan.

In June 1992, the District first submitted a request to King County to impose and to collect school impact fees on new developments in unincorporated King County. On November 16, 1992, the King County Council first adopted the District's Plan and a fee implementing ordinance. This Plan is the annual update of the Six-Year Plan.

King County and the cities of Issaquah, Renton, Bellevue, Newcastle and Sammamish collect impact fees on behalf of the District. All of these jurisdictions provide exemptions from impact fees for senior housing and certain low-income housing.

Pursuant to the requirements of the Growth Management Act, this Plan will be updated on an annual basis, and any charges in the fee schedule(s) adjusted accordingly.

STANDARD OF SERVICE

School facility and student capacity needs are dictated by the types and amounts of space required to accommodate the District's adopted educational program. The educational program standards which typically drive facility space needs include grade configuration, optimal facility size, class size, educational program offerings, as well as classroom utilization and scheduling requirements and use of re-locatable classroom facilities (portables).

Different class sizes are used depending on the grade level or programs offered such as special education or the gifted program. With the passage of Initiative 728 in November 2000, the Issaquah School Board established new class size standards for elementary grades K-5. The Board and District Administration will continue to keep class sizes near the levels provided by I-728; this will be done via local levy funds. There is also recently passed legislation that requires the State to fund Full-Day Kindergarten by 2018. The District will provide Full-Day Kindergarten for the 2016-2017 school year. A class size average of 20 for grades K-5 is now being used to calculate building capacities. A class size of 26 is used for grades 6-8 and 28 for grades 9-12. Special Education class size is based on 12 students per class. For the purpose of this analysis, rooms designated for special use, consistent with the provisions of King County Council Code Title 21A, are not considered classrooms.

Invariably, some classrooms will have student loads greater in number than this average level of service and some will be smaller. Program demands, state and federal requirements, collective bargaining agreements, and available funding may also affect this level of service in the years to come. Due to these variables, a utilization factor of 95% is used to adjust design capacities to what a building may actually accommodate.

Portables used as classrooms are used to accommodate enrollment increases for interim purposes until permanent classrooms are available. When permanent facilities become available, the portable(s) is either moved to another school as an interim classroom or removed.

Current state statues reduces K-3 classroom ratios to 17/1 will have a significant impact on the standard of service. A review of all elementary schools shows that 65 additional classrooms would be needed to meet the proposed 17/1 ratio. All sites are crowded, existing permanent facilities cannot house existing students and all schools use portable classrooms to house existing students. Existing portable classrooms already burden building core facilities.

The King County decision to no longer allow schools to be build outside the Urban Growth Boundary Line (UGBL) means District owned property planned for a new elementary school and middle school cannot be used. The State does not provide funding for property purchases.

Approved Bond funding provides for a new high school, new middle school, two new elementary schools, a rebuild/expansion of an existing middle school and additions to six existing elementary schools.

TRIGGER OF CONSTRUCTION

The Issaquah School District Capital Facilities Plan proposes construction of a new high school, a new middle school, two new elementary schools, the re-build/expansion of an existing middle school and additions to six existing elementary schools to meet the needs of elementary, middle school and high school capacity needs. Planning the need for new schools is triggered by comparing our enrollment forecasts with our permanent capacity figures. These forecasts are by grade level and, to the extent possible, by geography. The analysis provides a list of new construction needed by school year.

The decision on when to construct a new facility involves factors other than verified need. Funding is the most serious consideration. Factors including the potential tax rate for our citizens, the availability of state funds and impact fees, the ability to acquire land, and the ability to pass bond issues determine when any new facility can be constructed. The planned facilities will be funded by a bond passed on April 26, 2016, school impact fees and reserve funds held by the District. New school facilities are a response to new housing which the county or cities have approved for construction.

The District's Six-Year Finance Plan is shown in Appendix E found on page 21.

DEVELOPMENT TRACKING

In order to increase the accuracy and validity of enrollment projections, a major emphasis has been placed on the collection and tracking data of known new housing developments. This data provides two useful pieces of planning information. First, it is used to determine the actual number of students that are generated from a single family or multi-family residence. It also provides important information on the impact new housing developments will have on existing facilities and/or the need for additional facilities.

Developments that have been completed or are still selling houses are used to forecast the number of students who will attend our school from future developments. District wide statistics show that new single-family homes currently generate 0.464 elementary student, 0.176 middle school student, 0.156 high school student, for a total of 0.796 school aged student per single-family residence (see Table 2). New multi-family housing units currently generate 0.153 elementary student, 0.057 middle school student, 0.051 high school student, for a total of 0.261 school aged student per residence (see Table 3).

NEED FOR IMPACT FEES

Impact fees and state matching funds have not been a reliable source of revenue. Because of this, the Issaquah School District asked its voters on February 7, 2006 to fund the construction of an elementary school, one middle school, expand Maywood Middle School, expand Liberty High School, and rebuild Issaquah High School. District voters also approved on April 17,2012 a ballot measure that provided funding to expand two elementary schools, rebuild/expand two additional elementary schools, add classrooms to one high school and rebuild/expand one middle school. Due to the high cost of land and the limited availability of a parcel large enough to accommodate a middle school program, the School Board reallocated the moneys designated to build the middle school to expand the capacity of Issaquah and Skyline high schools. On April 26, 2016 voters approved bond funding for the construction of a new high school, a new middle school and two new elementary schools, the rebuild/expansion of an existing middle school and additions to six existing elementary schools.

As demonstrated in Appendix A, (page 17) the District currently has a permanent capacity (at 100%) to serve 7476 students at the elementary level. Appendix B, (page 18) shows a permanent capacity (at 100%) for 3954 students at the middle school level Appendix C (page 19) shows a permanent capacity (at 100%) of 5524 students at the high school level. Current enrollment is identified on page 8. The District elementary projected Oct 2016 FTE is 9283. Adjusting permanent capacity by 95% leaves the District's elementary enrollment over permanent capacity at the elementary level by 2183 students (Appendix A). At the middle school level, the projected Oct 2016 headcount is 4814. This is 1057 students over permanent capacity (Appendix B). At the high school level the district is over permanent capacity by 195 students (Appendix C).

Based upon the District's student generation rates, the District expects that .796 students will be generated from each new single family home in the District and that .261 students will be generated from each new multi-family dwelling unit.

Applying the enrollment projections contained on page 8 to the District's existing permanent capacity (Appendices A, B, and C) and if no capacity improvements are made by the year 2021-22, and permanent capacity is adjusted to 95%, the District elementary population will be over its permanent capacity by 2312 students, at the middle school level by 1458 students, and will be over its permanent capacity by 1141 at the high school level. The District's enrollment projections are developed using two methods: first, the cohort survival – historical enrollment method is used to forecast enrollment growth based upon the progression of existing students in the District; then, the enrollment projections are modified to include students anticipated from new developments in the District.

To address existing and future capacity needs, the District's six-year construction plan includes the following capacity projects:

| Facility Expansions | Projected Completion Date | Location | Additional Capacity |
|------------------------------------|------------------------------|-------------|------------------------|
| New High School | 2021 | Issaquah | 1600 |
| New Middle School | 2020 | Issaquah | 850 |
| Rebuild/Expand Pine Lake Middle | 2018 | Sammamish | 242 |
| New Elementary #16 | 2019 | Issaquah | 680 |
| New Elementary #17 | 2020 | Sammamish | 680 |
| Expand Cougar Ridge Elem | 2017 | Bellevue | 120 |
| Expand Discovery Elem | 2017 | Sammamish | 120 |
| Expand Endeavour Elem | 2018 | King County | 120 |
| Expand Maple Hills Elem | 2021 | King County | 120 |
| Expand Sunset Elem | 2017 | Bellevue | 120 |
| Briarwood Elem Portables | 2016 | King County | 80 |
| Creekside Elem Portables | 2016 | Sammamish | 40 |
| Endeavour Elem Portables | 2016 | King County | 40 |
| Grand Ridge Elem Portables | 2016 | Issaquah | 40 |
| Skyline High School Portables | 2016 | Sammamish | 56 |

Based upon the District's capacity data and enrollment projections, as well as the student generation data, the District has determined that a majority of its capacity improvements are necessary to serve students generated by new development.

The school impact fee formula ensures that new development only pays for the cost of the facilities necessitated by new development. The fee calculations examine the costs of housing the students generated by each new single family dwelling unit or each new multi-family dwelling unit and then reduces that amount by the anticipated state match and future tax payments. The resulting impact fee is then discounted further. Thus, by applying the student generation factor to the school project costs, the fee formula only calculates the costs of providing capacity to serve each new dwelling unit. The formula does not require new development to contribute the costs of providing capacity to address existing needs.

The King County Council and the City Councils of the Cities of Bellevue, Issaquah, Newcastle, Renton and Sammamish have created a framework for collecting school impact fees and the District can demonstrate that new developments will have an impact on the District. The impact fees will be used in a manner consistent with RCW 82.02.050 - .100 and the adopted local ordinances. Engrossed Senate Bill 5923, enacted in the 2015 Legislative Session, requires that developers be provided an option to defer payment of impact fees to final inspection, certificate of occupancy, or closing, with no fees deferred longer than 18 months from building permit issuance. The District adopts the positions that: (1) no school impact fee should be collected later than the earlier of final inspection or 18 months from the time of building permit issuance; and (2) no developer applicant should be permitted to defer payment of school impact fees for more than 20 dwelling units in a single year. The District's recent and ongoing student growth, coupled with the need for the timely funding and construction of new facilities to serve this growth, requires strict adherence to this position.

ENROLLMENT METHODOLOGY

Two basic techniques are used, with the results compared, to establish the most likely range of anticipated student enrollment:

- The student 3-2-1 cohort survival method. Examine Issaquah School District enrollments for the last 5 years and determine the average cohort survival for the consecutive five-year period. Because cohort survival does not consider students generated from new development it is a conservative projection of actual enrollment. For the same reason, these projections are also slow to react to actual growth.
- 2. Based on information from King County, realtors, developers, etc., seek to establish the number of new dwelling units that will be sold each year. The new dwelling units are converted to new students based on the following:
 - a) The number of actual new students as a percentage of actual new dwellings for the past several years.
 - b) Determine the actual distribution of new students by grade level for the past several years, i.e., 5% to kindergarten, 10% to first grade, 2% to 11th grade, etc.
 - c) Based on an examination of the history shown by (a) and (b) above, establish the most likely factor to apply to the projected new dwellings.

After determining the expected new students, the current actual student enrollments are moved forward from year to year with the arrived at additions.

One of the challenges associated with all projection techniques is that they tend to always show growth because the number of houses and the general population always increases. Enrollments, however, can and do decrease even as the population increases. The reason is as the population matures, the number of kindergartners will go down as the number of 10th graders is still increasing. To adjust for this factor, the number of school age children per dwelling is examined. When this number exceeds expectations, it is probably because the District is still assuming kindergarten growth, while the main growth is actually moving into middle school. When this happens, a reduction factor is added to kindergarten to force it to decrease even though the general population continues to grow. A precise statistical formula has not been developed to make this adjustment.

After all of the projections have been made and examined, the most likely range is selected. An examination of past projections compared with actual enrollment indicates the cohorts tend to be more accurate over a ten-year time span while dwelling units tend to be more accurate over a shorter period. The probable reason is that over a ten-year period, the projections tend to average out even though there are major shifts both up and down within the period.

Enrollment projections for the years 2016-2017 through 2030-2031 are shown in Table #1. Student generation factors are shown in Table #2 and #3.

TABLE 3

INVENTORY AND EVALUATION OF CURRENT FACILITIES

Currently, using the 95% utilization factor, the District has the capacity to house 15,989 students in permanent facilities and 4077 students in portables. The projected student enrollment for the 2016-2017 school year is expected to be 19,541 including K-5 FTE which leaves a permanent capacity deficit of 3552. Adding portable classrooms into the capacity calculations gives us a capacity of 20,066 with a surplus capacity of 525 for the K-12 student population.

Calculations of elementary, middle school and high school capacities are shown in Appendices A, B and C. Totals are shown in Appendix D.

Below is a list of current facilities. These facility locations and sites are shown on the District Site Location Map on Page 12.

THE ISSAQUAH SCHOOL DISTRICT'S SIX-YEAR CONSTRUCTION PLAN

The District's Six-Year Finance Plan is shown in Appendix E. Shown in Table #4 (page 14) is the District's projected capacity to house students, which reflects the additional facilities as noted. Voters passed a \$533 million bond in April 2016 to fund the purchase of land for a new high school, a new middle school, two new elementary schools, the rebuild/expansion of an existing middle school and additions to six existing elementary schools. The District does not anticipate receiving State matching funds that would reduce future bond sale amounts or be applied to new K-12 construction projects included in this Plan.

The District also anticipates that it will receive \$500,000 in impact fees and mitigation payments that will be applied to capital projects.

The District projects 19,541 FTE students for the 2016-2017 school year and 20,689 FTE students in the 2021-2022 school year. Growth will be accommodated by the planned facilities. Per the formula in the adopted school impact fee ordinance, half of this factor is assigned to impact fees and half is the local share.

Projected Capacity to House Students

| Years | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | 2021-22 |

^{**}The Issaquah School District, with voter approval, has front funded these projects.

^{***}School impact fees may be utilized to offset front funded expenditures associated with the cost of new facilities. Impact fees are currently collected from King County, City of Bellevue, City of Newcastle, City of Renton, City of Sammamish and the City of Issaquah for projects within the Issaq. School District.

^{****}Funds for portable purchases may come from impact fees, state matching funds, interest earnings or future bond sale elections.
