											-	-					Ti 24 su th	icent. New project to implement interim SWIF adopted by Board of Supervisors. This project will reconstruct the Horseshoe Bend Levee at the Breda reach (RM 4.46-24.72) to a more stable configuration in order to reduce flood risk to the urrounding areas. The project will also raise levee crest elevations to contain the 500-year (0.2% annual chance) flood. This segment of the levee has the lowest factor of safety rating of the Horseshoe Bend levee.
121 WLFL8 HSB BREDA SETBACK KENT 122 WLFL8 HSB MCCOY REALIGNMENT KENT	Green	Agreement	\$834,330 \$4,138		\$3,924,623 \$3,95,862			\$2,431,377 \$116,138	\$8,381,110 \$2,333,980	\$43,709 \$764,909	\$0	\$0	\$0	\$10,856,196 \$3,215,027			\$13,613,149 K TI U 1. le th P cc al	Kent. New project to implement interim SWIF adopted by Board of Supervisors. This PL 84-99 levee segment contains a 'Minimally acceptable' rating by the ISACE due to a slope deficiency at RM 24.3 (over steepened slopes from 1.3 to .7H:1V for 500 feet). The City of Kent constructed a secondary containment evee in this reach, set back from the river's edge, which is currently not part of ne federal levee. The only remaining structure between the two levees is a larget Sound Energy facility. The Horseshoe Bend Levee Certification Report alculated Factor of Safety (FOS) values for rapid drawdown of 1.08 and 1.55 at bout RM 24.3 and RM 24.4, respectively. River bed scour in this reach between 986 and 2011 is 2.7 feet at RM 24.24. Funding of \$400,000 covers the cost of najor modification to the federal levee so that the City of Kent's secondary ontainment levee can be incorporated into the federal levee project.
123 WLFL8 HSB NURSING HOME SETBACK			***	***		\$0					\$500,000		\$0	\$2,600,000			K Ti er ov m A st Ld	tent. New project to implement interim SWIF adopted by Board of Supervisors. The Nursing Home levee is over-steepened and does not meet current ngineering standards. The economic consequence of levee failure or vertopping to the lower Green River valley is extensive and could cause tens of nillions of dollars in damage. This capital project area contains a 'Minimally acceptable' deficiency by the US Army Corps of Engineers at RM 25. 5 (over teepened slopes from 1. 25 to 1. 7H:1V for 225 feet). The Horseshoe Bend evee Certification Report calculated a Factor of Safety (FOS) value for rapid rawdown of 1. 01 at RM 25. 57 (Section F). This is barely above the minimum OS (1. 0) from the US Army Corps of Engineers manual.
