

WHEREAS, the Washington state Department of Ecology and the Muckleshoot Indian Tribe have declared the shade deficit in the Green river a major cause of warmer water temperatures, and

WHEREAS, the Muckleshoot Indian Tribe has prepared a map of priority areas for regreening the Green river, and

WHEREAS, the Washington state Department of Ecology has implemented a total maximum daily load to reduce temperatures on the Green river, and

WHEREAS, a variety of activities are currently underway among the county, the tribes, local jurisdictions, nongovernmental organizations and others, and

WHEREAS, there is no single point of coordination among the activities to promote tree planting to increase shade in the riparian areas, and

WHEREAS, stewardship activities in the Miller/Walker basin have provided an effective model for collaboration and efficient action in reaching out to the public and increasing public interest awareness and action, and

WHEREAS, the need to accelerate public and private interest and action is vital for reducing lethal temperatures on the Green river through replanting of public and private property, and

WHEREAS, the county council has adopted the Strategic Climate Change Action Plan which includes a goal for replanting one million trees by 2020;

NOW, THEREFORE, BE IT MOVED by the Council of King County:

The work plan related to the addition of a basin steward for the Green river and recommended funding approach, submitted as Attachment A to this motion in accordance with the 2015/2016 Biennial Budget Ordinance, Ordinance 17941, Section 104, Proviso P2, as amended by Ordinance 18110, Section 43, is hereby approved.
