AN ORDINANCE relating to the organization of information technology service delivery within the executive branch; amending Ordinance 11955, Section 2, as amended, and K.C.C. 2.16.020, Ordinance 14199, Section 11, as amended, and K.C.C. 2.16.035 and Ordinance 14005, Section 3, as amended, and K.C.C. 2.16.0755, Ordinance 14005, Section 4, and K.C.C. 2.16.0757, Ordinance 14005, Section 6, as amended, and K.C.C. 2.16.0758, Ordinance 14155, Section 2, and K.C.C. 2.16.07682, Ordinance 14155, Section 3, and K.C.C. 2.16.07583, Ordinance 14155, Section 4, and K.C.C. 2.16.07584 and Ordinance 14155, Section 5, as amended, and K.C.C. 2.16.07585 and adding a new section to K.C.C. chapter 2.16.

BE IT ORDAINED BY THE COUNCIL OF KING COUNTY:

SECTION 1. Findings. The council hereby makes the following findings of fact:

A. The King County Strategic Technology Plan identifies a diffuse structure of technology functions spread throughout the county, with each county department having at least one technology unit, some with multiple units. There is a minimum of standardization among these various functions, with countywide operational oversight provided through the technology governance process. There is a need to align the standards, processes and procedures throughout the county's technology functions, to ensure operating effectiveness and efficiency.

B. The council by a 2004 budget proviso required that a business case be developed that included at

least two options for reorganizing information technology functions countywide: a status quo option and an option with some level of outsourcing and centralization. The business case was required to include a quantifiable cost-benefit analysis and a countywide information technology organizational structure for each option. The business case was required to include a preferred option and identify the criteria used to select the preferred option.

C. Responding to the 2004 Budget Ordinance, Ordinance 14797, the county engaged Pacific Technologies, Inc. ("PTI") to develop a new information technology ("IT") organization model, a quantifiable business case supporting that model and a plan for implementing it countywide. The project began in May 2004 with the delivery of a final report in December 2004.

D. As a result of the study, PTI concluded that the county's current IT organizational model is not aligned with the new IT vision and goals. The existing highly distributed IT environment, which has evolved without significant focus on countywide needs, serves as a roadblock to achievement of the county's newly-established IT goals.

E. The countywide IT Vision recommended is: "Utilizing information and technology to shape a better tomorrow by enabling effective public services and streamlining countywide operations."

F. The IT Goals recommended are: "Deliver responsive service to internal customers, the public, and other jurisdictions; Provide reliable, cost-effective technical and application architectures; Create countywide efficiencies for business functions and infrastructure that are common across the organization; Support a culture of effective governance, clear accountability and communication; Ensure IT security and privacy; Facilitate information sharing internally and externally; Recruit, deploy and retain an appropriately-skilled workforce; and serve as a leader in IT regional initiatives."

G. A recommendation report from the executive based on the PTI final report and forwarding the vision and goals recommends a phased approach to implementation beginning with the executive branch.

H. This ordinance implements the first phase of this recommendation and provides for a consolidated

IT organization within the executive branch that aligns with the countywide IT vision and goals, enables an improved response to meet the county's short- and long-term business needs and provides for improvement of IT management, operations and service delivery performance.

SECTION 2. Ordinance 11955, Section 2, as amended, and K.C.C. 2.16.020 are each hereby amended to read as follows:
