A. The director shall administer and implement the following rules and regulations for the disposal of sewage into the metropolitan sewerage system. The rules and regulations in this section shall be applicable to water pollution abatement activities, including the disposal of sewage into the metropolitan sewer system, whether delivered from within or from without the county.

B. The director is hereby authorized to develop and implement such procedures and to take any other actions as may be necessary to insure that local public sewers and private sewers discharging or proposing to discharge into the metropolitan sewer system are constructed and developed in accordance with applicable laws, regulations and plans and with the provisions of federal grant agreements that may be applicable thereto.

C. The procedures for certification for extensions and connections shall be as follows:

1. A request by a local public agency, person or state or federal agency for an extension to an existing department interceptor or trunk shall not be considered by the department for funding of planning, design or construction, and agreements therefor shall not be considered for approval by the council unless the director has received written certification from the legislative bodies of all cities and counties that have zoning jurisdiction over any portion of the area proposed by the requesting party to be served, or determined by the director as being capable of being served by such extension; and any other area in or through which the facility is proposed to be constructed. The certification shall state that such service and construction are consistent with the adopted land use plans and policies of such local governments. If a city or county cannot so certify, it shall issue a written statement to the director that the service or construction is not consistent with its adopted plans and policies, or that action on the application for certification must be deferred pending receipt by the city or

county of such additional, specified information and data as may be reasonably required for the consideration of the application;

2. Requests by a local public agency, person or state or federal agency for approval of a local public sewer facility connection to an existing interceptor or trunk shall be considered by the department only if the director has received a written certification as described in this section, but a connection involving service by a local public sewer facility that is located wholly within the boundaries of a city and has a potential service area contained wholly within those boundaries shall require only the written certification of that city;

3. The certification may be made by either the legislative body of the city or county or by such department or division thereof as the legislative body may designate. The issuance of the certification may be preceded by a reasonable analysis and consideration, by a city or county having zoning authority, of alternatives to the proposed connection or extension.

a. If the director has not received a certification or other statement from a city or county as described herein within ninety days of receipt by a city or county of a written application for certification, the city or county shall be deemed, for purposes of this section only, to have certified the proposal as consistent with adopted land use plans and policies~~((; provided, that))~~. ~~((i))~~If the certification has not been received by the director within sixty days of receipt by a city or county of a written application for certification, the director shall notify the chief executive and chair of the legislative body of the city or county of the certification deadline.

b. The director is authorized to develop such additional rules, procedures and forms as may be required to implement this section, to notify local public agencies, cities, counties and interested persons of the certification process and to assist the local public agencies, cities, counties and persons in compliance with this section.

c. Any questions concerning the applicability or scope of certification requirements shall be referred to the director for final resolution. Nothing contained in K.C.C. 28.84.050.C. precludes the department from

providing staff assistance to a local public agency, city, county or state or federal agency concerning waterborne pollutant removal, water quality improvements or sewage disposal alternatives; and

4. The certification provisions of this section shall not apply where an extension of or connection to an interceptor or trunk is required by formal order or directive of a state or federal agency with regulatory powers over the extension, connection or the metropolitan sewer system, or to the following interceptor extensions: that portion of the Phase 1 May Creek Interceptor System, as defined in the Environmental Protection Agency Project No. C-530749 Negative Declaration dated November 29, 1977, which includes the Honeydew Interceptor and a section of the May Creek Interceptor between existing Metro ((~~Manhole~~)) Maintenance Hole B and the confluence of May and Honey creeks; SLW 14 in the Comprehensive Plan, also known as the Madsen Creek Trunk; and GR 25 and GR 26 of the Comprehensive Plan, extending from 11th Avenue in Algona to Main Street in the city of Auburn. Copies of any formal orders or directives as referred to in this subsection C.4. shall be immediately forwarded to every city, county and other local public agencies within the county.

D. The following local public agency regulations and standards shall apply:

Two copies of any such documents that are in effect on the date of adoption of this section and that have not previously been submitted to the department shall be submitted to the director within six months following such date. Two copies of any of such documents adopted or placed in use after the date of this section, including any changes in or amendments of documents previously in effect, shall be submitted to the director within sixty days of their adoption; and

3. The following provisions shall apply to review and approval of such submittal documents:

a. The director shall review design and construction standards and standard specifications submitted

by a local public agency and, within thirty days following receipt thereof, shall either approve them in writing or return one set of each disapproved document with written reasons for disapproval;

b. The director shall review ordinances and resolutions submitted by a local public agency and, within thirty days following receipt thereof, shall notify the local public agency in writing of any inconsistencies with the department's rules and regulations; and

c. Within sixty days following receipt from the director of a disapproval or a statement of inconsistencies with the department's rules and regulations, the local public agency shall take the action as may be necessary to correct such inconsistencies and shall resubmit the corrected or amended documents as provided for their original submittal.

E. Local system plans shall be prepared and approved subject to the requirements defined in K.C.C. chapter 13.24 and the departmental policies and procedures that implement the code.

F. Detailed construction plans and specifications for proposed local public sewers shall be subject to review and approval by the director only when the director deems such review to be necessary. Each local public agency shall notify the director in writing of its intention to prepare the construction plans and specifications delineating the boundaries of the areas to be sewerred by map or sketch, and the estimated date for bid advertisement. Within ten days following receipt of the notice, if determined necessary, the director shall make written request for the submission of construction plans and specifications. If required to do so, the local public agency shall submit two sets of plans and specifications and shall obtain approval of the plans and specifications before advertising for bids. Within fifteen days following receipt of such plans and specifications, the director shall review the plans and specifications and return one set thereof to the local public agency with approval, or with required changes indicated. If the plans and specifications are disapproved, the required changes shall be made by the local public agency, and all required revisions of plans and specifications resubmitted in the same manner as provided for the initial submittal. If no communication is received from the director by the local public agency within fifteen days of the date of receipt by the director of

the plans and specifications, it shall be deemed that the director has approved the plans and specifications.

G. The following provisions shall govern sewerage standards:

1. New local public sewers or private sewers and extensions of existing sewers shall be designed as separate sewers and storm drains, except where the local public agency can demonstrate the necessity for a combined sewer extension; and
2. The design of sewers by local agencies and persons and the method of construction and materials used and the operation and maintenance of sewers and side sewers owned by local public agencies and persons shall be such that flow other than sewage and industrial waste (wastewater) will not exceed three and six one-hundredths cubic feet per acre in any thirty-minute period. Flow volumes of other than wastewater for any thirty minute period that exceeds this amount will be called excess flow.

H. The following provisions shall apply regarding inspection of new construction:

1. Local public agencies shall be responsible for inspection of construction of local public sewers as required to insure compliance with this section and with local standards. The director, however, shall have the right to spot inspect local public sewer and side sewer construction and to notify the local public agencies when, in the opinion of the director, the construction work does not comply with this section. Each local public agency shall notify the director by letter or send a copy of the "Contractor's Notice to Proceed" letter to the director in advance of the start of any public sewer construction.
 - a. The letter shall include the name of the organization responsible for contract administration and the name of the individual the director should contact during construction.
 - b. Upon receipt of notification from the director that any local public sewer construction work is not being performed in compliance with the plans and specifications therefor, the local public agency shall immediately take such action as may be necessary to insure compliance.
 - c. The construction of private sewers shall be subject to inspection by the director;
2. A leakage test shall be made of every section of local public sewer after completion of backfill by

an internal hydrostatic pressure or air test method; provided, that if the ground water table is so high as to preclude a proper exfiltration test, an infiltration test may be used. Other methods of testing must be specifically authorized by the director.

a. Allowable exfiltration leakage shall be no greater than five-tenths gallon per hour per inch of diameter per one hundred feet of sewer pipe with a minimum test pressure of six feet of water column above the crown at the upper end of the pipe. For each increase in pressure of two feet above a basic six feet of water column measured above the crown at the lower end of the test section, the allowable leakage shall be increased ten percent. Allowable infiltration leakage shall be no greater than four-tenths gallon per hour per inch of diameter per one hundred feet of sewer pipe, with no allowance for external hydrostatic head.

b. Air testing shall be in conformance with the latest edition of "Standard Specifications for Municipal Public Works Construction" prepared by the Washington State Chapter, American Public Works Association.

c. A record of leakage tests containing the location of the local public sewer tested, the date of test and the results thereof shall be submitted to the director prior to acceptance of each contract by the local public agency.

d. Side sewers shall also be tested for their entire length from the public sewer in the street to the connection with the building plumbing. The method of testing side sewers shall be determined by the local public agency, but in no case shall it be less thorough than filling the pipe with water before backfill and visually inspecting the exterior for leakage; and

3. Ground water or other water related to local public agency sewer construction, other than water used for leakage test, shall not be admitted into a public sewer without the written permission of the director.

I. The following provisions shall govern connections to the metropolitan sewer system:

1. No connection shall be made to the metropolitan sewer system without the prior approval of the director;

2. Local public sewers shall be planned so as to require the minimum practical number of points of connection to the metropolitan sewerage system. At each point of connection to the metropolitan sewerage system, the department shall timely construct, at its expense, such special ((~~manholes~~)) maintenance holes or chambers as are required, including the intervening connection from the ((~~manhole~~)) maintenance hole or chamber to the department trunk.

With the written approval of the director, the special ((~~manhole~~)) maintenance hole or chamber and intervening connection from the ((~~manhole~~)) maintenance hole or chamber to the department trunk may be designed and constructed by the local public agency at the expense of the department but subject to inspection and approval by the director. It shall be the responsibility of the local public agency to connect local public sewers to the ((~~manhole~~)) maintenance hole or chamber at its expense and in a manner approved by the director;

3. Each local public sewer connection to a department special ((~~manhole~~)) maintenance hole or chamber shall be hydraulically designed so as not to interfere with the measuring and sampling of flow;

Upon its completion, each such a structure and connection shall be owned, operated and maintained by the department, ((~~provided that~~)) except that the local public agency may use the chamber for measuring and sampling flows at reasonable times with the concurrence of the director; and

4. The director may require a metering ((~~manhole~~)) maintenance hole or chamber on extensions constructed after January 1, 1961, to local public sewers in existence on that date. The ((~~manhole~~)) maintenance hole or chamber shall be located on the extension near its connection with the local public sewer. The department shall construct and pay for any ((~~manhole~~)) maintenance hole or chamber required for extensions constructed prior to April 17, 1969. The local public agency shall construct any required ((~~manhole~~)) maintenance hole or chamber for any local public sewer extension constructed after the adoption of this section. The construction shall be performed in accordance with plans and specifications prepared or approved by the director and the department shall pay the additional cost of the ((~~manhole~~)) maintenance hole or chamber

as follows:

a. For pipe sizes eight inches in diameter through twenty-one inches in diameter, and with the measuring device placed in a department standard, four-foot diameter, ~~((manhole))~~ maintenance hole, the department shall pay one hundred fifty dollars per each such measuring ~~((manhole))~~ maintenance hole.

b. For special chambers and pipe sizes larger than twenty-one inches in diameter, the department shall pay as per agreement for each specific case. Upon its completion, each such ~~((manhole))~~ maintenance hole or chamber shall be owned, operated and maintained by the local public agency, ~~((provided))~~ except that the department may use the chamber for measuring and sampling flows at reasonable times with the concurrence of the local public agency.

J. The following provisions shall govern relating to private sewers:

1. The department shall not directly accept wastewater from the facilities of any person that are located within the boundaries of, or discharge wastewater into the local sewerage facilities of, any local public agency without the prior written consent of the local public agency;

2. Connection of private sewers may be made at the discretion of the director, either by the director or by others subject to inspection and approval by the director. Whenever a local public sewer becomes available, the private sewer shall be disconnected from the metropolitan sewerage system under the inspection of and in a manner approved by the director, and shall be connected to the available local public sewer in accordance with the requirements of the local public agency. All work of making connections, disconnections and reconnections of private sewers to the metropolitan sewerage system shall be at the expense of the owner or developer of the private sewers;

3. Two sets of plans and specifications for proposed private sewers shall be submitted to the department for review and approval. Written approval must be obtained prior to advertising for bids or proceeding with the work if bids are not called; and

4. The provisions of this section applying to local public sewers of local public agencies shall also

apply to private sewers and to owners of private sewers.

K. The following regulations shall apply to the use of local public sewers:

1. The discharge into any sewer by direct or indirect means of any of the following is hereby prohibited: subsoil foundation, footing, window-well, yard or unroofed basement floor drains; overflows from clean water storage facilities; clear water from refrigeration, reverse-cycle heat pumps and cooling or air-conditioning equipment installed hereafter, except for the periodic draining and cleaning of the systems; roof drains or downspouts from areas exposed to rainfall or other precipitation; and surface or underground waters from any source;

2. Where ((manholes)) maintenance holes in sewers have open, perforated or grating covers resulting in surface waters entering the ((manhole)) maintenance hole, the director may require the local public agency to adjust or modify the ((manholes)) maintenance holes, at the expense of the local public agency so that the entry of surface water is reduced to a minimum. Openings in ((manholes)) maintenance holes for new construction shall be limited to not more than three one-inch diameter holes; and

3. An additional charge will be made for quantities of water other than sewage and industrial waste hereafter entering those sewers constructed after January 1, 1961, in excess of the volume established for design purposes in this section. Any charge made in addition to the regular charge shall be based on metered records of flow taken and compiled by the department. If the director, elects to meter and record flow from such sewers, the local public agency will be given at least five days' notice in advance of such metering. Metering periods shall continue until excessive flow conditions are corrected.

a. The allowable volume of flow for any thirty-minute period shall be determined by taking the sum of the following items, subsection K.3.a. (1) to (3) of this section, inclusive:

(1) maximum dry-weather wastewater flow as measured in the preceding August-September period.

The flow shall be determined as follows:

(a) meter and record all flow for the period;

(b) discard all flow records for each day containing measurable rainfall and discard the flow records of the succeeding days;

(c) determine the maximum flow volume occurring in a thirty minute period for each day's metering; and

(d) average all of the maximum flow volumes to arrive at a maximum dry-weather wastewater flow;

(2) additional dry-weather flow resulting from new customers or equivalents added after the measured August-September period. The flow shall be determined as follows:

(a) determine the number of added residential customers and equivalents;

(b) multiply each such customer and equivalent by the departmental allowance of seven hundred fifty cubic feet per month; and

(c) reduce (b) from a monthly to a thirty-minute allowance by the formula:

cubic feet per month divided by $[30 \text{ days} \times 24 \text{ hrs.} \times 2] = \text{additional dry weather flow; and}$

(3) flow allowance for ground water infiltration and storm water inflow on which the metropolitan sewerage system was designed. The flow shall be determined as follows:

(a) determine the sewered area being metered in acres; and

(b) flow allowance = $3.06 \text{ cubic feet per acre} \times \text{sewered area in acres.}$

b. Flow volumes for any thirty-minute period that exceed the allowable volume of flow, as determined in subsection K.3.a of this section, will be considered to be excess flow.

c. ~~((Since))~~ Because excess flow is based upon a thirty-minute period, the volume so measured will be small. In order that the surcharge for excess flow will more nearly approach the cost of providing additional capacity in the metropolitan sewerage system, excess flow will be adjusted as though it were occurring for a twenty-four hour period. The flow will be called adjusted excess flow. Adjusted excess flow = Excess flow $\times 24 \times 2$.

d. Daily surcharges for adjusted excess flow will be the department current rate for each seven hundred fifty cubic feet of the adjusted excess flow. The daily surcharges shall remain in effect for ten days. If excess flow occurs again during the ten day period, and the new excess flow exceeds the former, the more recent excess flow will be used in lieu of the former and continue for ten days from date of its measurement.

e. If the new excess flow does not exceed the former excess flow, the former will be used for ten days from time of its measurement, at which time the new excess flow will be used for as many days as will complete ten days from the time of measurement of the new excess flow.

f. Amounts due the department as monthly surcharges for excess flows shall be shown as a separate item on the department's normal monthly billing to the local public agency, accompanied by appropriate records and calculations, and shall include only the surcharges for the previous month.

g. The surcharges for excess flows shall be paid to the department by local public agencies in the same manner and at the same times as regular sewer service charges; provided that a local public agency may offset against the surcharges amounts actually expended on local sewerage facility improvements or modifications that have been constructed by the local public agency for the purpose of reducing the excess flows and the plans for which shall have been approved by the director. If the local public agency elects to construct the improvements, it shall so signify in writing to the director within thirty days of receipt of the department's first billing of each specific excess flow surcharge. Upon receipt of the notice, the department will allow the local public agency one year to prepare approved plans and specifications and let a contract for the corrective work. Failure to meet the one-year deadline shall result in the original surcharge, as well as any intervening surcharges, becoming immediately due and payable.

h. Metering and metered records may be checked at reasonable time intervals by local public agency personnel accompanied by department personnel upon at least one day's notice to the department.

i. In the event of excessive infiltration/inflow under applicable regulations of the Environmental Protection Agency, such that the department will be denied federal grants in the absence of correction, the

director may elect to do the corrective work utilizing therefor solely surcharges collected from the local public agency.

L. The following provisions shall apply to disposal of materials from septic tanks and chemical toilets:

1. The discharge of materials from cesspools, septic tanks and privies into local sewer systems is prohibited;

2. Chemical toilet waste may be discharged into the local public sewer or private sewer system through a side sewer connection at the place of business.

a. The means of disposal shall be approved by the director, the local public agency and the Seattle-King County health department.

b. If the conditions in subsection L.2.a. of this section cannot be met, chemical toilet wastes may be discharged directly into the metropolitan sewer system in accordance with the provisions of this section;

3. No person engaged in the collection and disposal of materials from cesspools, septic tanks, chemical toilets, portable toilets and privies, as a business or commercial enterprise, may discharge into the metropolitan sewer system any of the materials so collected without having first obtained from the director a written permit to do so. This permit shall be in addition to all other permits and licenses required by law and shall be issued only to the holder of a proper registration and inspection certificate issued by the Seattle-King County health department to carry on or engage in the business of cleaning septic tanks and cesspools;

4. Any person required to obtain such a permit shall submit to the director an application for the permit on forms approved by the director.

a. A separate permit shall be obtained for each vehicle so used, which permit shall thereafter be carried in the vehicle at all times. No permit may be transferred from one vehicle to another except in the event of loss, destruction or replacement of the original vehicle, and then only with the approval of the director.

b. The name of the person and the permit number shall be prominently displayed in numbers and letters at least three inches high, in contrasting color on both sides of the vehicle;

5. The annual fee for a permit to discharge materials from cesspools, septic tanks, chemical toilets and privies into the metropolitan sewerage system, unless exempted in this section, is hereby fixed and determined to be the sum of two hundred dollars for each vehicle employed or used by the permit holder for the hauling and discharge of such materials. At the time of issuance of each discharge permit, there will also be issued an entrance control identification card for each truck under permit. No person may discharge into the metropolitan sewer system any materials collected from cesspools, septic tanks, chemical toilets and privies without first paying the permit fee, and registering with the proper entrance control identification card at the point of discharge into the metropolitan sewer system for each load dumped.

Annual fees shall be payable in advance and permit holders shall renew their permits on or before the annual expiration date of the permits. Fees for permits issued for less than a full year shall be prorated to the nearest full month. No refund of any permit fee shall be granted for cessation of operations prior to the expiration of the permit;

6. In addition to the permit fee, each permit holder shall pay to the department a gallonage fee. The gallonage fee shall be determined by the director and shall be adjusted at such times as the director may deem to be in the best interest of the department.

a. The director may waive the gallonage fee to permit holders dumping septic tank sludge from residences and businesses paying the department sewerage charges to local agencies. Claims for exemption of gallonage fees shall be made on forms provided by the department and shall be accomplished in the manner described thereon. The department shall bill each permit holder for the accumulated gallonage fee monthly. This billing shall provide for the subtraction of all volumes declared on valid gallonage fee exemption claims. Payment of gallonage fees shall be made within thirty days from the date of invoice by the department.

b. A late charge of twelve percent per year shall be assessed upon and added to any charge or portion thereof that remains unpaid after thirty days from the date of invoice. Failure to pay all charges due within sixty days from the date of invoice shall be considered a breach of the terms of the permit and shall result in

revocation of the permit;

7. Wastes discharged into the metropolitan sewer system in accordance with this section shall be discharged only at such points as are designated by the director and in a clean, inoffensive manner satisfactory to the director. Equipment and methods used by the permittee to discharge shall be subject to inspection by and approval of the director as a condition of granting the permit;

8. The discharge of industrial waste, or any waste other than domestic septage and chemical toilet waste, into a designated septage disposal site is prohibited unless specifically approved by the director;

9. A permittee hereunder shall be liable for the costs of any damages to property or personal injury caused by reason of ~~((his))~~ the permittee's operations. In addition, failure to pay the costs upon demand shall be cause for revocation of the permit;

10. A permit may be revoked or suspended by the department for failure to discharge at designated points, for any discharge that is in violation of the provisions of this section, or for the reasons set forth in this section;

11. Each permittee shall be required to obtain liability insurance in such amount and in such form as shall be determined by the director. The insurance shall afford bodily injury limits of liability of five hundred thousand dollars for each person and one million dollars for each occurrence. Evidence of the insurance coverage shall be provided to the director. Nothing in this subsection L.11. shall in any manner preclude any applicant from obtaining such additional insurance coverage as the applicant may deem necessary for ~~((his or her))~~ the applicant's own protection; and

12. The director is hereby authorized to designate the points of disposal of materials collected by the permittees, the places where permits may be obtained and the persons authorized to sign the permits on behalf of the department.

The director is further authorized to revoke or suspend permits for failure to comply with the provisions of this chapter, subject to the right of persons affected to appeal from the revocation or suspension as provided

in this chapter.

M. The following practices shall be prohibited:

1. No person shall discharge, directly or indirectly, into a sewer any material or substance that is prohibited by any county ordinance, rule established by the director, local agency rule or regulation or other applicable requirement.
2. No unauthorized person shall enter any department sewer, ((~~manhole~~)) maintenance hole, pumping station, treatment plant or appurtenant facility. No person shall maliciously, willfully or negligently break, damage, destroy, deface or tamper with any structure, appurtenance or equipment that is part of the metropolitan sewerage system.
3. No person, other than an authorized employee or agent of the department, shall operate or change the operation of any department sewer, pumping station, treatment plant, outfall structure or appurtenant facility.

N. The following provisions shall apply to user charges:

1. As required by federal regulations, each local public agency shall adopt and maintain a system of user charges to assure that each recipient of waste treatment services within the department's service area will pay its proportionate share of the costs of operation and maintenance, including replacement, of all waste treatment provided by the department.

Notwithstanding the obligation of the local public agency to collect the charges, the director shall have authority directly to assess, when in the opinion of the director it is necessary in order to comply with federal regulations, a user surcharge directly against industrial users within a local public agency in an amount determined by the director to be necessary to assure that the industrial users pay their proportionate share of the costs of operation and maintenance, including replacement, of waste treatment provided by the department. Any such surcharge is distinct from and in addition to sums to be paid by industries as industrial cost recovery, pursuant to provisions contained in this section or under such provisions as may be adopted by the council,

regarding the control and disposal of industrial waste into the metropolitan sewage system;

2. Each local public agency shall charge each recipient of waste treatment services within its jurisdiction, in addition to any surcharge to be assessed by the local public agency against an industrial user in an amount to be determined by the director to be necessary under federal regulations and separate from and in addition to any sums paid by industry pursuant to this section, a sum to be paid to the department for its waste treatment services to be determined as follows:

a. The local public agency shall determine, on a quarterly basis: the number of residential customers billed by the local public agency for local sewage charges; the total number of all customers so billed; and the total water consumption billed other than residential customers. The quarterly water consumption report shall be taken from water meter records and may be adjusted to exclude water not entering the sanitary facilities of a customer.

(1) Where actual sewage flow from an individual customer is metered, metered sewage flows shall be reported in lieu of adjusted water consumption. Total quarterly water consumption in cubic feet shall be divided by two thousand two hundred fifty to determine the number of residential customer equivalents for which each nonresidential customer shall be billed.

(2) The director shall develop such additional instructions and rules for preparation of the quarterly water consumption report as may be necessary to implement the requirements of this section; and

b. The director will establish a monthly user charge for each component agency based upon a rate for each residential customer or residential customer equivalent that the local public agency shall collect from its residential customers and equivalents;

3. Each local public agency shall charge each industrial recipient of waste treatment services within its jurisdiction as required by the department, in addition to the user charge, a surcharge in an amount to be determined by the director based on the average annual strength and volume of discharge by the industry. For the purpose of computing average annual strength, all wastes shall be assumed to have a minimum strength

equivalent to that of domestic sewage.

Each local public agency shall provide the director each quarter with a listing of the water consumption of each surcharged industry; and

4. Each local public agency shall maintain such records as are necessary to document compliance with the user charge system established under this subsection N.

O. The following provisions shall apply regarding capacity charges:

1. All customers of a public or private sewage facility who connect, reconnect or establish a new service that uses metropolitan sewage facilities after February 1, 1990 shall pay a capacity charge in an amount established annually by the council in accordance with state law. Users of metropolitan sewage facilities shall be subject to the capacity charge upon connection or reconnection to public or private sewage facilities and/or establishment of a new sewer service.

a. "Connection," for purposes of this subsection, shall mean physical connection of the side sewer serving either any structure, or an addition to a structure, to a sanitary sewer.

b. "Capacity charge," for purposes of this subsection, shall mean a charge levied on a property to recover capital costs needed to serve new customers.

c. "Discharge event," for the purposes of this subsection, shall mean discharge of sewage from a zero discharge structure's system that flows into the metropolitan sewerage facilities.

d. "Establishment of a new service," for purposes of this subsection, shall mean:

((~~(i)~~)) (1) change of structure use from single family residential to other than single family residential;

((~~(ii)~~)) (2) change of structure use following connection or reconnection to a sanitary sewer;

((~~(iii)~~)) (3) addition of a new structure to an existing sewer connection;

((~~(iv)~~)) (4) reuse of an existing sewer connection by a new structure following demolition of an existing structure or abandonment of sewer service;

~~((v))~~ (5) expanded or increased industrial or commercial use of a sanitary sewer connection; or

e. "Zero discharge structure" for the purposes of this subsection, shall mean a non-residential structure or building designed not to discharge to, and functions independently of, the metropolitan sewage system;

2. The capacity charge shall be a fixed rate per residential customer or residential customer equivalent determined annually by the council. The number of residential customer equivalents (RCEs) for multifamily structures shall be determined using the following scale:

Two to four units per structure	0.8 RCEs per unit
Five or more units per structure	0.64 RCEs per unit
Senior citizen, low income and special purpose housing	0.32 RCEs per unit

a. Senior citizen housing shall be multifamily structures of two or more dwelling units within which each dwelling unit shall consist of a room or a suite of two or more rooms, of which not more than one is a bedroom, for which occupancy has been limited to two persons, at least one of whom is age fifty-five or older.

b. Low income housing shall be multifamily structures of two or more dwelling units, each totaling not more than four hundred square feet, for which occupancy has been restricted, in at least fifty-one percent of the units, to persons with incomes not more than eighty percent of the median income of the county within which the housing is constructed, and for which rent is restricted.

c. Special purpose housing shall consist of dwelling units, that may be part of a larger care facility, consisting of a room or a suite of rooms, of which not more than one is a bedroom for which occupancy is limited to two persons, at least one of whom is physically or mentally disabled.

d. In the case of privately owned senior citizen, low income or special purpose multifamily housing, the requirements of subsection O.2.a., b. and c. of this section shall be contained in a permit, agreement, covenant or deed restriction in which the county, a local government, an agency of state government or the United States government is granted enforcement authority.

e. In the case of senior citizen, low income and special purpose housing owned by a government or nonprofit corporation, the requirements shall be integral to the establishment of the corporation as a legal entity or a legally enforceable condition of construction and operation of the housing.

f. If use of a multifamily structure that initially qualifies as senior citizen, low income or special purpose housing changes so that it no longer meets the criteria in subsection O.2.a., b., c., d. and e. of this section, residential customer equivalents shall then be calculated in the same manner as multifamily structures and the department will collect the incremental difference due for all payments from the time of disqualification until paid off.

g. The number of residential customer equivalents for nonresidential structures shall be determined by the department based on values of plumbing fixtures and/or estimates of wastewater flow from sources other than plumbing fixtures and acceptable to the department. An appropriate schedule of hydraulic capacity or loading values equating to residential customers shall be determined by the director;

3. Nonresidential structures with fixtures that are designed to have zero discharge to the metropolitan sewage facilities may be eligible to have a reduced capacity charge provided that the zero discharge structure's systems or fixtures do not present a human or environmental health risk. The following shall guide evaluation and award of a modified capacity charge for zero discharge structures:

a. For zero discharge structures, the number of residential customer equivalents shall be projected in accordance with subsection O.2.g. of this section; however, fixtures and sources that are engineered to function without discharging into to the metropolitan sewage facilities shall be given the value of zero for purposes of calculating the residential customer equivalents. These calculations will be determined by review of applicant-submitted engineering plans and specifications, site inspections and other materials deemed necessary by the department and such calculations shall be subject to approval by the department;

b. Zero discharge structures and systems may be required by the department to install monitor and alarm systems to confirm that the structure does not discharge to the metropolitan sewage facilities. Reporting

requirements shall be specified by the department; and

c. If a zero discharge structure's system discharges to the metropolitan sewage facilities, this shall be considered a discharge event and the structure shall be subject to a capacity charge in an amount equal to a single invoice, for one quarter or three months, calculated using the monthly capacity charge for conventional systems in accordance with subsection O.2.g. of this section at the rate applicable in the year of discharge. Any discharge from a zero discharge structure or system lasting ninety calendar days or less shall be considered a single discharge event. If a zero discharge structure has three discharge events during any fifteen-year period, the structure shall then be immediately converted to a conventional capacity charge calculation calculated using subsection O.2.g. of this section. The zero discharge structure shall then be assessed the full fifteen-year capacity charge rate applicable during the year of the third discharge event into the metropolitan sewage system;

4. The capacity charge is the responsibility of the current owner. The department shall collect the capacity charge directly from the current legal property owner. The charge shall be a monthly charge for fifteen years.

Each customer subject to the charge shall be billed by the department semi-annually or at such frequency as may be determined by the director. The total amount of the charge, hereinafter the "total amount due," may be paid at any time. The total amount due shall be the sum of all remaining payments discounted by an index reflecting fifteen-year mortgage and ten- and twenty-year investment rates that will be updated in December of each year;

5. When determining capacity charges applicable to a new connection, the charges may be reduced or eliminated to reflect a prior sewer connection and prior sewer service to the preexisting structure.

a. This credit against charges otherwise due shall be applied as residential customers or equivalents, which are also known as RCEs, under the following circumstances:

(1) the structure to be served by the new connection replaces a structure on the same lot that was

either connected to sewers prior to February 1, 1990, and was paying full sewer charges, or, if not connected to sewers, was nevertheless paying such full sewer charges before February 1, 1990; and

(2) the preexisting structure was subsequently demolished and sewer service abandoned and the time between abandonment of service and connection of the new structure to sewers was less than five years.

b. In the event the new connection replaces a connection made after February 1, 1990, the charges may be reduced to reflect past capacity charge payments. This credit against charges otherwise due shall be applied under the following circumstances:

(1) the preexisting structure that was connected to sewers after February 1, 1990, and paying full sewer charges, was reported to King County by the local sewer agency; and

(2) capacity charges were paid to King County on the property with no break in payments of five years or more; and

(3) the preexisting structure was subsequently demolished and sewer service abandoned and the time between abandonment of service and connection of the property to sewers is less than five years.

c. Credits permitted in accordance with subsection O.5.b. (1), (2) and (3) of this section will be determined using the county's accounts receivable record of capacity charge invoices paid on the structure. Credit may be applied only from the demolished structure to the replacement structure. The amount of the credit will be expressed as whole or fractional residential customer equivalents and shall reflect the percentage of the total amount due actually paid;

6. Credits authorized under subsection O.5. of this section shall be applied only when appropriate documentation for the demolished structure is provided to the department. Appropriate documentation shall consist of one of the following:

a. a demolition permit for a preexisting structure at the same address as the new structure that contains a description of the structure demolished;

b. in the case of a subdivision of a lot or parcel, a demolition permit for a preexisting structure at the

same lot as the new structures which contains a description of the structure demolished;

c. sewer service invoices for full sewer charges, for the level of service for which credit is sought, dated before demolition of the previously existing structure or structures that includes the service address and number of units if the structure was a multifamily structure; or

d. A dated permit issued by the local sewer agency confirming capping of the side sewer that includes the same address as the new structure and a description of the prior structure;

7. Credits permitted under subsection O.5. of this section shall be applied only from the demolished structures. The credits shall be applied in the following manner:

a. When a new single family home replaces a preexisting demolished single family home for which no capacity charge is owed, no capacity charge shall be collected;

b. When a preexisting structure is demolished and the lot or parcel is subdivided, the credit shall be applied in equal proportion to the new structure or structures within the new subdivided parcel.

c. When a preexisting structure or structures are demolished and the lot or parcel subdivided and new blocks are created, the credit from any qualifying preexisting structures within the footprint of the new block shall be applied in equal proportion to the new structure or structures within that block;

8. The following apply to capacity charge billing:

a. Capacity charge billing to a legal owner of a structure or the owner's representative shall commence as soon as possible and practical after the date of the sanitary sewer connection provided by a local public agency served by the department in accordance with the filing frequency determined by the director; and

b. Late notice to the department of commencement of sewer service to a property or failure of the property owner or the owner's representative to receive a capacity charge bill does not relieve a property owner of the responsibility for payment of charges and interest;

9. The following apply to delinquent capacity charge accounts:

a. If a customer fails to make a payment when due, an interest charge shall be computed on the

delinquent amount at an annual rate of not more than the prime lending rate of the county's bank plus four percentage points. This interest charge and a penalty of not more than ten percent of the past due amount shall be added to the account balance; and

b. When capacity charges plus interest charges and penalties are delinquent for more than thirty days, the department shall send a notice of intention to file lien to the property owner or owner's representative. The notice shall direct the property owner or representative to pay the total past due amount, plus interest and penalties, no later than fifteen days from the date of the letter or to make suitable arrangements to bring the account current. If the payment is not made within fifteen days, or suitable arrangements have not been made, the total amount past due plus penalties and interest will be certified as delinquent and a lien may be filed against the property with the recorder's office of the county. A lien charge to cover the cost of preparing and filing the lien will be added to the delinquent amount on the date of certification of the lien to the recorder's office of the county. Action may be taken by the department to enforce collection of the delinquent amount at any time after the charges have been delinquent for sixty days. The lien will be released when all past due capacity charges plus interest and late penalties have been paid.

The department is authorized to request the prosecuting attorney to bring suit for foreclosure civil action in the superior court of the county in which the real property is located and to request payment of its costs and disbursements as provided by statute, as well as reasonable attorneys' fees. Each account that has been submitted to the prosecuting attorney for foreclosure shall be charged for legal fees incurred in connection with the foreclosure, even when court proceedings are unnecessary;

10. Local public agencies shall, at the director's request, provide such information regarding new residential customers and residential customer equivalents as may be reasonable and appropriate for purposes of implementing the capacity charge;

11. The director is authorized to develop and implement such additional policies and requirements and to take such actions as may be necessary and appropriate for collection of the capacity charge and

administration of the capacity charge program as described in this subsection O.; and

12. As part of its rate-making authority, the council elects that capacity charges shall accrue as monthly fees recorded as operating revenues in accordance with Financial Accounting Standards Board Statement No. 71.

P. No person may connect a local public or private sewer to the metropolitan sewerage system unless the local public agency or person shall then be in compliance with this section.

1. If any local public agency or person shall construct a local public sewer, private sewer or side sewer in violation of this section, the department may issue an order to the local public agency or person to stop work in progress that is not then in compliance with this section or the department may issue an order to correct work that has been performed. The local public agency or person shall immediately take the action as may be necessary to comply with the order and with this section, all at the expense of the local public agency or person.

2. ~~((Other penalties.))~~ a. Any person failing to comply with or violating this section or rules and regulations developed by the director under this section shall, for each such a failure or violation, be subject to a fine in an amount not exceeding two thousand dollars for each separate failure or violation under this section.

b. The director may order the owner of any property from which prohibited discharges are entering any sewer to correct the condition, provided that if the property of the owner lies within a local public agency, the director shall first give written notice of the prohibited discharge to the local public agency, and only if the local public agency fails to correct the condition within ninety days after receipt of the notice, may the director directly order the owner to correct the condition.

If any owner shall not cause the condition to be corrected within thirty days following receipt of the department order, the department may proceed to enter upon the property and correct the condition, and the cost thereof together with a penalty of fifty dollars shall be a lien upon the property to be enforced in the manner provided by law for liens for local sewage charges.

c. Any person who shall damage, destroy or deface any structure, appurtenance, equipment or

property of the metropolitan sewerage system shall be fined in an amount not exceeding three hundred dollars, and shall be liable for double the actual cost of restoration or repair or double the actual amount of any irreparable damage.

SECTION 85. Ordinance 11034, Section 6, as amended, and K.C.C. 28.84.060 are each hereby amended to read as follows:

A. The director shall administer and implement the following fees, rules and regulations for the disposal of industrial waste into the metropolitan sewerage system.

B. The following provisions shall govern the applicability of this section.

1. This section shall apply to all nondomestic users of the metropolitan sewerage system including, but not limited to, commercial and industrial companies and government agencies. Indirect discharges from nondomestic users regulated by this section include, but are not limited to, liquid, solid or gaseous substances, or any combination thereof resulting from any process of industry, government, manufacturing, commercial food processing, business, agriculture, trade, research, the development, recovery or processing of natural resources, leachate from landfills or other disposal sites, contaminated nonprocess water, contaminated storm water and ground water.

2. This section shall not apply to the discharge of storm water into an existing combined sanitary and storm system unless the discharge results from industrial activity and the director has determined that the discharge may affect the county's water quality and biosolids objectives.

3. This section shall not apply to participant local agencies when collecting domestic and industrial waste and conveying the waste to the metropolitan sewerage system.

4. This section authorizes the issuance of wastewater discharge permits, authorizes monitoring, compliance and enforcement activities, establishes administrative review procedures, requires user reporting and provides for the setting of fees for the equitable distribution of costs resulting from the program established herein.

5. Industrial waste shall be accepted into the metropolitan sewerage system subject to regulations and requirements as may be promulgated by state and federal regulatory agencies or the county for the protection of sewerage facilities and treatment processes, public health and safety, receiving water quality and avoidance of nuisance. At a minimum, all industrial users of metropolitan sewerage system facilities shall comply with the applicable pretreatment standards and requirements developed in accordance with Sections 307(b) and 307(c) of the Act. This includes the pretreatment standards for existing and new discharges, which are defined in regulations promulgated under Sections 307(b) and 307(c) of the Act.

C. The director shall administer, implement and enforce this section. Any powers granted to or duties imposed upon the director may be delegated by the director to other department personnel. The director shall establish and publish administrative procedures for implementation of this section that shall include, but not be limited to, issuing permits and discharge authorizations, collecting samples, identifying and inspecting industrial users, monitoring, revenue/cost recovery, appeals, discharge approval processes, issuing waste discharge permits and discharge authorizations, conducting investigations of noncompliance, preparing enforcement actions according to the department's enforcement response plan and setting local limits.

D. The following discharge standards and limitations shall be applicable under this section:

1. Discharge standards and limitations shall be established to the extent necessary to enable the county to comply with current National Pollutant Discharge Elimination System requirements, as promulgated by the Environmental Protection Agency or the Washington state Department of Ecology, and to protect sewerage facilities and treatment processes, public health and safety and the receiving waters, air quality and biosolids quality.

2. Industrial users shall comply with all applicable pretreatment standards and requirements.

Discharges subject to federal categorical discharge limits shall be subject to those limits, or to county local discharge limits, whichever is most restrictive. In addition to concentration limits, permit limits may also include mass limits stated as total pounds of a pollutant allowed per day.

3. No industrial user shall ever increase the use of process water, or in any way attempt to dilute a discharge, as a partial or complete substitute for adequate treatment to achieve compliance with an applicable pretreatment standard or requirement unless expressly authorized by an applicable pretreatment standard or requirement. The director may impose mass limitations or flow restrictions on users ~~((he or she))~~ the director believes may be using dilution to meet applicable pretreatment standards or requirements.

4. No industrial user shall introduce or cause to be introduced into the POTW any pollutant or wastewater that causes pass through or interference. These general prohibitions apply to all industrial users of the POTW whether or not they are subject to categorical pretreatment standards or any other federal, state or local pretreatment standards or requirements.

5. No industrial user shall discharge any of the following pollutants, substances or wastewater directly or indirectly into any public sewer, private sewer or side sewer tributary to the metropolitan sewerage system:

- a. flammable liquids, solids or gases capable of causing or contributing to explosion or supporting combustion in any sewerage facilities.
- b. any solid or viscous substances or particulates in quantities, either by itself or in combination with other wastes, that are capable of obstruction of flow or of interfering with the operation or performance of sewer works or treatment facilities.
- c. any gas or substance that, either by itself or by interaction with other wastes, is capable of creating a public nuisance or hazard to life or of preventing entry by authorized personnel to pump stations and other sewerage facilities.
- d. any gas or substance that, either by itself or by interaction with other waste, may cause corrosive structural damage to sewer works or treatment facilities.
- e. wastes at a flow rate or pollutant discharge rate, or both, that are excessive over relatively short time periods so that there is a treatment process upset and subsequent loss of treatment efficiency.
- f. heat in amounts that will inhibit biological activity in treatment plant facilities resulting in either

interference in the treatment process or preventing entry by authorized personnel to pump stations and other sewerage facilities. This prohibition includes but is not limited to heat in such quantities that the temperature of the treatment works influent exceeds forty degrees Celsius, or one hundred four degrees Fahrenheit, or the temperature exceeds sixty-five degrees Celsius, or one hundred fifty degrees Fahrenheit, at the point of discharge from the industrial source to public sewers or the metropolitan sewerage system, or both.

g. food waste unless it will pass a one-quarter-inch sieve. The director shall establish rules on the use of food grinders to meet the one-quarter-inch criterion. The rules shall be based upon department biosolids criteria, impact on solid waste utilities, concerns of local health agencies and imposition of high strength surcharge fees.

h. any radioactive wastes or isotopes that exceed such concentration limitations as established by applicable Washington state Department of Social and Health Services regulations.

i. trucked and hauled wastes shall not be discharged into a sewer except at points in the metropolitan sewerage system designated for the discharge by the director.

j. any waters or wastes containing higher than ordinary concentrations or quantities of compatible pollutants, including but not limited to, biochemical oxygen demanding pollutants, suspended solids, pH and fecal material, may be required to discharge at a specific release rate or at a specified strength if, in the opinion of the director, the release of the waste in an uncontrolled manner could adversely affect proper handling and treatment in the metropolitan sewerage system.

k. storm water, surface water, ground water, roof runoff, subsurface drainage, cooling water and unpolluted wastewater unless specifically authorized elsewhere in this section or by rules published by the director regarding the acceptance of clean water into the metropolitan sewerage system. The rules shall be based upon existing sewer capacity, cost and availability of alternate disposal options, cost of implementing control measures to prevent contamination of storm water, surface water and ground water, cost of recycling or reclaiming clean water, benefits to regional water conservation using reclaimed effluent and adverse impacts to

water quality and public health.

l. any waters or wastes generated during construction activities, which may include, but not be limited to, contaminated storm water, surface water or ground water and wells constructed for the purpose of lowering the groundwater table unless specifically authorized by the director.

m. wastewater that imparts color that cannot be removed by the treatment process, such as dye wastes and vegetable tanning solutions that consequently impart color to the treatment plant's effluent, thereby violating the county's National Pollutant Discharge Elimination System permit.

n. detergents, surface-active agents or other substances that may cause excessive foaming in the metropolitan sewerage system.

E. The national categorical pretreatment standards found at 40 CFR Chapter I, Subchapter N, Parts 405-471 are hereby incorporated in this section. These categorical pretreatment standards shall be met by all industrial users of the regulated industrial categories.

F. Local discharge limits shall be developed and complied with as follows:

1. The director shall publish and revise from time to time local discharge limits, including best management practices, developed according to guidelines promulgated by the Environmental Protection Agency or Washington state Department of Ecology using data specific to the metropolitan sewerage system and its industrial users. At a minimum, local discharge limits shall restrict the following parameters: metals; organics; pH; temperature; fats, oils and greases of animal or vegetable origin; fats, oils and greases of mineral origin; and other toxic substances as required, including those defined in applicable state and federal regulations. These published local discharge limits shall, by this reference, be made a part of this section.

2. No industrial user shall discharge wastewater containing concentrations or mass limitations, or both, in excess of the published local discharge limits, except as provided for in this section.

3. Individual limits for specific companies or general permit limits for groups of companies may be established on a case-by-case basis for compounds not specifically listed in published local discharge limits or

at levels higher or lower than published local discharge limits. The individual limits may be higher than published local discharge limits only for companies or groups of companies that have demonstrated that no reasonable treatment method is available to meet published limits, and the volume and mass of pollutants discharged does not endanger sewerage facilities or put the POTW at risk of violating National Pollutant Discharge Elimination System limits, water quality standards, air quality standards, biosolids standards or worker safety standards. Individual limits may be lower than published local discharge standards when the volume of discharge or mass of pollutants, or both, such that lower limits are necessary to protect sewerage facilities and treatment processes, public health and safety, the receiving waters, air quality or biosolids quality.

G. Whenever deemed necessary, the director may require users to restrict their discharge during peak flow periods, designate that certain wastewater be discharged only into specific sewers, relocate or consolidate, or relocate and consolidate, points of discharge, separate domestic wastewaters from industrial waste streams and other conditions as may be necessary to protect the POTW and determine the users compliance with the requirements of this section.

H. In areas served by combined sewers, storm water connections made before January 26, 1961, and storm water connections made after January 26, 1961, that have no public or private storm sewer available within a reasonable distance may continue to discharge without authorization from the director unless the discharge has the potential to affect the county's ability to comply with all federal, state and local regulations and meet the county's water quality objectives as stated in this chapter. In such cases, the storm water shall be regulated as an industrial waste and be subject to all of this section. In some cases, the county may require the industrial user to eliminate or mitigate storm water discharges by implementing control measures that shall include but not be limited to installation of a separate storm sewer, detention, pretreatment, roofing, reuse, relocation of processing or treatment areas and discharging to receiving waters.

I. The following provisions shall govern compliance with applicable pretreatment requirements:

1. Compliance by existing users covered by categorical pretreatment standards shall be within three

years of the date the standard is effective unless a shorter compliance time is specified in the appropriate standards.

2. The director shall establish a final compliance deadline date for any existing user not covered by categorical pretreatment standards or for any categorical user when the local limits for the user are more restrictive than the Environmental Protection Agency's categorical pretreatment standards. In establishing such a compliance deadline, the director shall consider the potential for violations of National Pollutant Discharge Elimination System limits, biosolids quality, air quality and worker safety standards and the difficulty and cost to industrial users of changes in industrial processes and installation of new pretreatment equipment.

3. New source industrial users and all other new users including significant industrial users shall comply with applicable pretreatment standards within the shortest feasible time, not to exceed ninety days from the beginning of discharge. New sources and new users shall install and have in operating condition all pollution control equipment required to meet applicable pretreatment standards before beginning to discharge.

J. The following provisions shall govern waste discharge permits and authorizations:

1. Each person discharging or proposing to discharge industrial waste into a POTW treatment plant, public sewer, private sewer or side sewer tributary to the metropolitan sewerage system shall secure written discharge authorization, which may include, but shall not be limited to, a waste discharge permit, minor discharge authorization or general permit from the department unless otherwise provided in this section. The conditions and discharge standards in all written discharge authorizations shall be predicated on federal, state, county and other applicable local regulations and requirements and on the results of analysis of the type, concentration, quantity and frequency of discharge including the geographical relationship of the point of discharge to sewerage and treatment facilities. These conditions and discharge standards shall be re-evaluated upon expiration of the written discharge authorization and may be revised from time to time as required by county, state or federal regulations and requirements or to meet any emergency. Obtaining a written discharge authorization, however, shall not relieve a user of its obligation to comply with all federal and state

pretreatment standards or requirements, or with any other requirements of federal, state and local law.

a. Any person proposing to discharge industrial waste, but not holding a valid waste discharge permit or other written discharge authorization, shall apply to secure a waste discharge permit or discharge authorization unless the director has determined that written authorization is not required. Application to the department shall be made for permits at least sixty days before beginning discharge unless the industrial user is subject to categorical pretreatment standards under 40 CFR 403.6 and 40 CFR Chapter I, Subchapter N, in which case application to the department shall be made for the permit ninety days before beginning of discharge. Application to the department shall be made for all other written discharge authorizations thirty days before beginning of discharge. Any new source or new user meeting the definition of significant industrial user shall not discharge without a waste discharge permit.

b. Any person with an existing permit or written discharge authorization proposing to make a change in an existing industrial waste discharge that will substantially change the volume of flow or the characteristics of the waste or establish a new point of discharge, shall apply for a new waste discharge permit thirty days before making the change. Substantial changes may include, but are not limited to, a twenty percent increase in the authorized daily maximum flow, addition of a new process, product or manufacturing line that will increase or decrease the concentration of pollutants in the waste stream or require modification in the operation of the pretreatment system, addition of new pretreatment equipment or altering a sample site.

c. The director may grant permission to discharge without written authorization when the discharge is limited in concentration of pollutants, volume or duration, or when the user has applied for and is in the process of obtaining written discharge authorization.

2. All significant industrial users shall secure a waste discharge permit. Existing significant industrial users without permits and industrial users that the director has determined present a substantial risk with existing discharges shall, upon receipt of written notice, apply for a waste discharge permit within thirty days. Extensions of time for submittal of an application may be granted by the director, not to exceed a total of sixty

days. The director on ~~((his or her))~~ the director's own initiative or in response to a petition from an industrial user may determine that an industrial user is not a significant industrial user when there is no reasonable potential for the discharge to adversely affect the POTW's operation or to violate any pretreatment standard or requirement.

3. Persons who are not subject to federal categorical standards or who discharge less than twenty-five thousand gallons per day or who in the opinion of the director have no reasonable potential for adversely affecting the POTW's operation or for violating any pretreatment standard or requirement are not required to obtain a waste discharge permit. Instead, the director may require and issue some other form of written authorization, which may include, but is not limited to, a minor discharge authorization, a letter of discharge approval, or a general permit. The director may require industrial users to obtain a waste discharge permit when noncompliance with this section exists. Upon written notice from the department that a permit is required the person so notified shall apply for a waste discharge permit within thirty days. Extensions of time for submittal of an application may be granted by the director, not to exceed a total of sixty days.

4. Application for waste discharge permits and authorizations shall be made to the director in writing on forms provided by the department and shall include such data, information and drawings as to enable the department to determine which federal, state and local regulations apply to the discharge and to set conditions for the industrial user to comply with the regulations. The information shall include, but not be limited to, identifying information such as name, address, owner and contact person, other environmental permits held by the operation, operation and site descriptions including manufacturing processes, flow measurements, measurements of pollutants, pretreatment system designs and operation and maintenance manuals, spill control plans and certification statements. The department will act only on complete applications. Significant industrial users shall comply with all requirements of 40 CFR 403.12 (b) by the time of permit issuance or upon commencement of discharge, whichever comes first, unless the specific conditions of a waste discharge permit establish an alternate deadline.

5. Upon receipt of a completed application, the director shall determine if a permit, minor discharge authorization or other document is required and notify the applicant. Waste discharge permits and authorizations shall be processed in accordance with chapter 90.48 RCW, as amended, Public Law 92-500 and this section, which includes: public notice for discharges requiring permits; determination of applicable discharge limits and special conditions; review and approval of any pretreatment facilities; facility inspections; issuance of a draft permit; review of the application and any draft permits by appropriate federal, state and local agencies; and issuance of the final permit or written authorization.

a. If a permit is required, the director shall complete the public notice requirements and bill the applicant for the cost or the director shall instruct the applicant at its expense to publish notices twice in a newspaper of general circulation within King County and in a local newspaper serving the area where the industrial user is located and in other appropriate information media as the director may direct. The notice shall include a statement that any person desiring to present their views with regard to the application may do so in writing to the director, but only if the person submits ~~((his or her))~~ the person's views or notifies the director of the person's interest within thirty days of the last date of publication of the notice. The notification or submission of views to the director shall entitle the person to review and comment on the draft permit and to a copy of the action taken on the application.

b. Waste discharge permits and written discharge authorizations shall be issued with conditions to demonstrate compliance, meet applicable federal, state and local regulations and prevent violations of this section and the waste discharge permit or authorization. The conditions may include, but shall not be limited to, discharge limitations and standards, spill control measures, accidental spill prevention plans, slug control plans, monitoring requirements, maintenance requirements, installation of monitoring equipment, record-keeping requirements, reporting requirements, federal and state requirements, installation of sampling sites, flow restrictions, engineering reports, solvent management plans, implementation of best management practices and special studies to evaluate discharge limits or compliance status.

c. As a condition of the granting of a waste discharge permit or other authorization, the director may require the industrial user to install pretreatment facilities or make plant or process modifications as deemed necessary by the director to meet the requirements of this section and applicable federal and state standards. The facilities or modifications shall be designed, installed, constructed, operated and maintained at the industrial user's expense in accordance with this section and in accordance with the rules and regulations of all local and governmental agencies.

d. The director shall have the authority to require that an industrial user implement a technology based approach to limit pollutants discharged to the sanitary sewer through the application of AKART.

e. No industrial user may discharge industrial waste into a public sewer, private sewer, or side sewer tributary to the metropolitan sewerage system until inspection has been made by the department for compliance with conditions of the permit or authorization and with this section unless the director has determined that an inspection is not required.

f. A draft permit shall be issued for review and comment by the applicant, federal, state and local agencies and members of the public who wish to comment on the application or draft permit. All comments will be reviewed and addressed by the director before issuance of a final permit.

g. During the application processing, the department will consult with and provide copies of applications and draft permits to participant local agencies, the Washington state Department of Ecology and the Environmental Protection Agency, when appropriate, to ensure that the limitations and conditions of waste discharge permits or other written discharge authorizations will meet requirements of applicable federal, state and local regulations.

h. The director may deny a permit or discharge authorization when the applicant's discharge will not comply with this section or will create a public nuisance. The director may also deny a permit or authorization to protect public health and welfare.

i. Waste discharge permits and authorizations shall be issued by the director for a specified period,

not to exceed five years. A waste discharge permit or authorization may be issued for a period fewer than five years at the discretion of the director. Each waste discharge permit or authorization will indicate a specific date upon which it will expire.

j. If the characteristics of the proposed discharge or discharges meet the requirements of appropriate participant local agencies, the Washington state Department of Ecology, the Environmental Protection Agency, any other applicable state and federal laws and regulations and this section, the director shall issue a waste discharge permit or authorization to the applicant with appropriate conditions. A copy of the, final permit will be submitted to the Washington state Department of Ecology. The appropriate local agencies will be notified in writing of the issuance of such a permit and will be furnished with one copy of each draft and final permit or other written discharge authorization issued within its jurisdiction at no charge.

6. Discharge conditions published in a waste discharge permit or authorization shall remain in effect until the permit or authorization expires, except that the director may modify the permit or authorization for good cause including the following:

- a. to incorporate any new or revised federal, state or local pretreatment standards or requirements;
- b. to address alterations or additions to the user's operation, processes or wastewater volume or character since the time of permit or authorization issuance, for which the modifications may be requested by the industrial user;
- c. a change in the POTW that requires either a temporary or permanent reduction or elimination of the authorized discharge;
- d. information indicating that the permitted discharge poses a threat to the metropolitan sewerage system, the department's, county's or participant local agency's personnel or the receiving waters;
- e. violation of any terms or conditions of the waste discharge permit or authorization;
- f. to correct typographical or other errors in the waste discharge permit or authorization; or
- g. to reflect a transfer of the facility ownership or operation, or both, to a new owner or operator.

7. If the industrial user wishes to continue discharging after the expiration date, an application shall be filed for renewal of the permit at least one hundred eighty days before the expiration date or at least ninety days before expiration date for authorizations. Applications for renewal permits or authorizations shall be processed in accordance with the requirements of this section, with the exception of the public notice requirement. An industrial user whose existing waste discharge permit or authorization has expired and has submitted its application for permit renewal in the time specified herein shall be deemed to have an effective waste discharge permit or authorization until the director issues or denies the new waste discharge permit. An industrial user whose existing waste discharge permit or authorization has expired and who failed to submit its reapplication in the time period specified herein will be deemed to be discharging without a waste discharge permit or authorization.

8. A permit or authorization shall be subject to revocation upon thirty days' notice in writing if the director finds:

- a. it was procured by misrepresentation of any material fact or by lack of full disclosure in the application;
- b. a material change in the volume of flow or characteristics of waste was effected without notice to the department and application to the department for a new permit or authorization was not made and a permit or authorization issued as required in this section;
- c. there has been a violation of the limitations or conditions of the permit or authorization, and the industrial user refuses to take corrective action, or that a violation has continued after notice thereof;
- d. the industrial user has refused reasonable access to its premises for the purpose of inspecting or monitoring the discharge;
- e. the industrial user has falsified self-monitoring reports or tampered with monitoring equipment;
- f. the industrial user has failed to pay sewer charges or fines; or
- g. the industrial user has failed to provide advance notice of the transfer of a waste discharge permit.

At the time that a permit or authorization is revoked, the director may thereafter require disposal of the waste in some manner other than into a public sewer, private sewer or side sewer tributary to the metropolitan sewerage system at the expense of the person whose permit is revoked. The appropriate local agency and the Washington state Department of Ecology will be notified in writing of the revocation of the permit.

9. A permit or authorization may be suspended temporarily and further discharges halted by the director if the director determines that waste discharges are in violation of waste discharge permit or authorization limitations or conditions or county, state or federal standards and pose an immediate risk to public health and safety, receiving water quality or biosolids quality, or an immediate risk of damage, obstruction or interference with treatment facilities. The suspension shall be effective immediately upon written notice delivered to the industrial user's business premises or posting at the point of discharge.

10. A waste discharge permit or authorization shall not be transferred without prior notification and approval by the director. The notification shall be submitted at least thirty days before the date of facility transfer and shall:

- a. include a statement that the new owner or operator, or both, have no immediate intent to change the facility's operations and processes;
- b. identify the specific date on which the transfer is to occur;
- c. acknowledge full responsibility for complying with the existing waste discharge permit; and
- d. include a written agreement between the old and new owner or operator, or both, containing a specific date for transfer of permit responsibility, coverage and liability.

Failure to provide advance notice of a transfer renders the waste discharge permit or authorization voidable on the date of facility transfer.

K. Industrial users shall have the following responsibilities in discharging industrial waste into the metropolitan sewerage system:

- 1. It shall be the responsibility of every industrial user to control the discharge of industrial waste into

a public sewer, private sewer or side sewer tributary to the metropolitan sewerage system in compliance with this section and the requirements of a waste discharge permit or written discharge authorization issued under this section.

2. Whenever pretreatment facilities are required under this section, they shall be designed, constructed, installed, operated and maintained at the expense of the industrial user and in a manner prescribed by the director. The director may require dischargers to submit plans in the form of engineering reports and drawings for approval. The reports and plans shall be prepared according to federal and state requirements. The industrial user shall maintain records indicating routine maintenance check dates, cleaning and waste removal dates and means of disposal of accumulated wastes. The records shall be retained for a minimum of three years and be subject to review in accordance with this section. Approval of proposed facilities or equipment by the director will not in any way guarantee that these facilities or equipment will function in the manner described by their constructor or manufacturer, nor shall it relieve a person of the responsibility of enlarging or otherwise modifying or replacing the facilities to accomplish the intended purpose and to meet the applicable standards, limitations and conditions of a waste discharge permit.

3. Industrial users will be required to submit samples of industrial waste discharges to the director or to perform tests and report the test results to the director on a routine and continuing basis when:

- a. required by 40 CFR 403.12, as amended;
- b. requested by state or participant local agencies; or
- c. deemed necessary by the director for the proper treatment, analysis or control of waste discharges.

All such tests and reports shall be at the cost of the industrial user.

4. All sampling data collected by industrial users and analyzed using procedures approved by 40 CFR 136 or approved alternatives shall be submitted to the director whether required as part of a written authorization or done voluntarily by the industrial user.

5. To the degree practicable, the director will provide each permittee or applicant with information on

applicable county, state and federal waste analysis and reporting requirements, provided, however, that any failure or inadvertence to do so shall not excuse the permittee from compliance with the requirements. Specific requirements will be established by written permit or authorization.

6. All wastewater discharge permit applications and industrial user reports must be signed by an authorized representative of the industrial user and contain the following certification statement:

"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

7. When required by the director, the industrial user shall install and maintain at its expense a suitable sample site or control ((~~manhole~~)) maintenance hole in its side sewer to facilitate observation, sampling and measurement of wastes therein. The sample sites or ((~~manholes~~)) maintenance holes shall be located, if feasible, where it is accessible from a public road or street. It shall be constructed in accordance with plans approved by the director and shall be arranged so that flow measuring and sampling equipment and a shutoff gate or a screen may be conveniently installed by the director. The industrial user shall make access to the sample site or ((~~manhole~~)) maintenance hole available to the director at all times. Any tampering with flow or sampling equipment by the discharger or its employees is prohibited. When deemed necessary by the director, an industrial user may be required to obtain, install, operate and maintain, at its expense, an automatic sampler or analyzer, or both, or flow measurement device in order to monitor its industrial waste discharges in the manner directed by the director.

8. Any person becoming aware of the discharge of regulated substances, spills or slug discharges

directly or indirectly into a public sewer, private sewer or side sewer tributary to the metropolitan sewerage system shall report the discharge immediately to the department and one of the treatment plants of the county. This notification shall include the location of discharge, type of waste, concentration and volume, if known, and any corrective actions. Failure by any person aware of the discharge of prohibited or restricted substances, spills or slug discharges to report the discharge in the manner provided above shall constitute a violation, as that term is defined in this section, and subject the person to the penalties in this section. Each failure to report a discharge shall be considered a separate violation. Notification shall not relieve the person responsible from penalties or recovery of the cost of damages resulting from the discharge. Discharges of prohibited or restricted substances directly or indirectly into navigable waters, or into streams, ditches or sewers tributary to navigable waters, shall be reported to the United States Coast Guard or to the regional office of the Washington state Department of Ecology, in accordance with Section 311 of the Act, 42 U.S.C. 1321, as amended.

9. In order that employees of industrial users involved in discharge to sewers will be informed of the county's requirements, the industrial users shall make available to their employees copies of this section together with such other wastewater information and notices directed toward more effective water pollution control that may be furnished by the director from time to time. A notice advising employees whom to call in case of a discharge violation of this section shall be furnished and permanently posted in highly visible places such as bulletin boards and lunchrooms. Where lack of proper employee training is determined to have caused noncompliance with this section or with the requirements of a waste discharge permit or written discharge authorization, the director shall require industrial users to provide employee training.

10. Any direct or indirect connection or entry point that could allow prohibited or regulated substances to enter the industrial user's plumbing or drainage system shall be eliminated. Where the action is impractical or unreasonable, the industrial user shall label the entry points appropriately to warn against discharge of wastes in violation of this section.

11. All industrial users shall notify the director, the Environmental Protection Agency Region 10

Waste Management Division Director and the Washington state Department of Ecology in writing of any discharge to the sewer of a substance, that, if otherwise disposed of would be a hazardous waste as set forth in 40 CFR Part 261.

a. Notification shall include the name of the hazardous waste as set forth in 40 CFR part 261, the Environmental Protection Agency hazardous waste generator number, where required, and the type of discharge, be it continuous, batch or other. If the industrial user discharges more than one hundred kilograms, or two hundred twenty pounds, of such waste per calendar month to the POTW, the notification shall also contain the following information:

(1) an identification of the hazardous constituents contained in the wastes;

(2) an estimation of the mass and concentrations of the constituents in the waste stream discharged during that calendar month; and

(3) an estimation of the constituents in the waste stream expected to be discharged during the following twelve months.

Discharges of more than fifteen kilograms, or thirty-three pounds of nonacute hazardous wastes in a calendar month or of any quantity of acute hazardous wastes as specified in 40 CFR 261.30(d) and 261.33(e) requires a one-time notification. All notifications shall be submitted by January 24, 1991, for existing industrial users. Industrial users who commence discharge after January 24, 1991, shall submit notification no later than one hundred eighty days after the discharge of the hazardous wastes. Any industrial user required to submit notification under this subsection shall be required to submit only once for each hazardous waste discharged unless the discharge is changed according to 40 CFR 403.12(j). Notification requirements under this subsection do not apply to pollutants already reported under the self-monitoring requirements of 40 CFR 403.12(b), (d), and (e) before January 24, 1991.

b. Industrial users are exempt from the notification requirements during a calendar month in which they discharge no more than fifteen kilograms of hazardous wastes, unless the wastes are acute hazardous waste

as specified in 40 CFR 261.30 (d) and 261.33(e).

c. In the case of new regulations under Section 3001 of the Resource Conservation and Recovery Act (RCRA), 42 U.S.C. 6921, identifying additional characteristics of hazardous wastes or listing any additional substance as a hazardous waste, the industrial user shall submit notification as required under this section within ninety days of the effective date of the new regulations.

d. Any industrial user subject to the notification requirements under this section shall certify in writing at the time of notification that the industrial user has a program in place to reduce the volume or toxicity of hazardous wastes generated to the degree it has determined to be economically practical.

12. Industrial users shall maintain records relating to discharges to the metropolitan sewerage system. The records, which include, but are not limited to, routine maintenance, documentation associated with best management practices, waste disposal dates, manifests and disposal records for accumulated wastes, self-monitoring reports, analytical lab results, dates and times of sample collection and batch discharges, pH and equipment calibration log books, pH monitoring records and flow records, shall be retained for a minimum of three years and shall be subject to review in accordance with this section.

13. The director may establish rules by which required reports can be received electronically from industrial users. The rules shall establish the framework for electronic reporting that ensures the legal dependability of electronic documents submitted in accordance with this section.

L. The following provisions shall apply to the inspection and sampling of industrial users:

1. To carry out this section and ensure compliance with federal and state laws and regulations relating to water pollution, authorized and properly identified representatives of the county shall have the right to enter that portion of the premises of any person discharging industrial waste into a public sewer, private sewer or side sewer tributary to the metropolitan sewerage system, whether or not the discharge is officially permitted or authorized. The purpose of entry shall be for inspection, observation, measurement, review of operating and waste management records, including documentation associated with best management practices, sampling and

testing in accordance with this section, at reasonable times or for the purpose of handling an emergency, as determined by the director, at any time if the director determines that an emergency exists. Inspections shall be limited to that portion of the premises that contains a side sewer, measuring ((manhole)) maintenance hole, pretreatment facilities or facilities for the transportation, collection, concentration or treatment of wastes. All regular sanitary and safety requirements of the person shall be complied with by the representative during the inspection. Before entering the premises, representatives of the county shall state their purpose and present credentials and an administrative inspection warrant, if one is required.

2. A warrant shall not be required for entry and administrative inspections, including observation, measurement, sampling or testing, under this section in the following situations:

- a. with the consent of the owner, operator or agent in charge of the premises;
- b. if the discharge is permitted under an industrial waste discharge permit or other written discharge authorization;
- c. in situations where the director has determined that an emergency exists presenting imminent danger to the public or worker health, safety and welfare, the environment or water quality of a receiving water or interference or risk of interference or obstruction with the functioning of the metropolitan sewerage system, or violating the county's National Pollutant Discharge Elimination System permit limits;
- d. in any emergency circumstance where there is neither time nor opportunity to apply for a warrant; and
- e. in any other situation where a warrant is not required by law.

3. In the event an administrative inspection warrant must be obtained to enter upon the premises of any person disposing of industrial waste into a public sewer, private sewer or side sewer tributary to the metropolitan sewerage system, the director shall apply to the superior court for issuance of warrants for the purpose of conducting administrative inspections authorized by this section. For purposes of an administrative inspection, probable cause justifying the issuance of a warrant may be based either on:

a. specific evidence of an existing violation of the terms and conditions of a waste discharge permit, this section or any state or federal law or regulation relating to water pollution; or

b. evidence that reasonable administrative standards for conducting an inspection, including observation, measurement or testing of industrial waste, are satisfied with respect to a particular premises and that a specific premises has been selected for county inspection on the basis of a general administrative plan for the enforcement of this section or any county, state or federal laws or regulations relating to water pollution.

4. Consistent with federal pretreatment standards, pollutant levels for all regulated processes will be monitored at the point of compliance. The point of compliance shall be at the end of the regulated process following pretreatment or as specified in the waste discharge permit or written discharge authorization. The monitoring shall be before the addition of any dilution water.

5. The purpose of the inspection and sampling programs shall be to verify independent of information supplied by industrial users in accordance with this section, the compliance or noncompliance with applicable pretreatment standards and requirements, best management practices or special requirements as prescribed by the director.

6. The sampling programs shall be designed to provide sampling emphasis on those industrial users discharging the greatest volume and concentration of pollutants. Comprehensive sampling by automatic samplers will be augmented with grab samples taken on a random basis. Flow proportioned samples are preferred. At a minimum, significant industrial users will be sampled at the frequency required by 40 CFR 403.12, as amended. Those users with large industrial discharges can expect to be sampled quarterly or more often, while users with small discharges may be sampled once annually or as required by federal regulations or an National Pollutant Discharge Elimination System permit issued to the county. Industrial users also discharging high strength waste will be sampled or classified as part of the industrial surcharge program.

7. The inspection programs shall be designed to provide emphasis on those industrial users discharging the greatest volume and concentration of pollutants. A significant industrial user will be inspected

at the frequency required by 40 CFR 403.12, as amended.

8. The postviolation inspection and sampling program shall provide for additional inspection and sampling of any industry failing to comply with or violating any of this section or applicable state and federal requirements.

9. Except as otherwise stipulated below, information and data on industrial users obtained from reports, questionnaires, permit applications, permits, monitoring programs and inspections shall be available to the public or other governmental agencies in conformance with county ordinances and state laws and regulations. Industrial user information such as trade secrets may be withheld provided confidentiality is specifically requested by the industrial user at the time the information is provided or submitted to the director. Wastewater constituents and characteristics shall not be recognized as confidential information and will be available to the public without restriction.

10. A portion, or cocollected sample in the instance of fats, oils and greases, of any samples collected by department personnel shall be made available to the industrial user being sampled. If the industrial user has samples analyzed for comparison with the department's results, the comparison will be considered valid only if methods and procedures are the same as those utilized or approved by the department and those methods and procedures conform to and are consistent with the analytical methods established by the latest edition of the following references:

- a. Standard Methods for the Examination of Water and Wastewater;
- b. American Society for Testing and Materials, A.S.T.M. Standards, part 23, Water, Atmospheric Analysis;
- c. Environmental Protection Agency, Water Quality Office Analytical Control Laboratory, Methods for Chemical Analysis of Water and Wastes; or
- d. any other analytical method determined by the department to be required to identify and quantify a particular pollutant not adequately sampled by the above referenced methods.

11. If, as the result of a valid sample comparison, a discrepancy arises between the analytical results obtained by an industrial user and the county's results, and if a statistical summary indicates that the precision of the county's and the industrial user's results are within acceptable quality assurance/quality control standards, the two results will be averaged to determine the user's compliance.

12. The director may require any user to develop and implement an accidental discharge (spill)/slug control plan. An accidental discharge or accidental spill prevention plan (ASPP)/slug control plan describing facilities to prevent accidental discharge or slug discharges of pollutants and operating procedures to provide this protection, shall be submitted to the director for review and approval before implementation. The director shall determine which user is required to develop a plan and require the plan be submitted within ninety days following notification by the director. Each user shall implement its ASPP as submitted or as modified after the plans have been reviewed and approved by the director. Review and approval of the plans and operating procedures shall not relieve the user from the responsibility to modify its facility as necessary to meet spill control requirements.

a. Any user required to develop and implement an accidental discharge/slug control plan shall submit a plan that addresses, at a minimum, the following:

- (1) description of discharge practices, including nonroutine batch discharges;
- (2) description of stored chemicals;
- (3) procedures for immediately notifying the POTW of any accidental or slug discharge; and
- (4) procedures to prevent adverse impact from any accidental or slug discharge including, but not limited to, inspection and maintenance of storage areas, handling and transfer of materials, loading and unloading operations, control of plant site runoff, worker training, building of containment structures or equipment, measures for containing toxic organic pollutants, including solvents, or measures and equipment for emergency response.

b. Users shall notify the director immediately upon the occurrence of a slug or accidental discharge

of substances regulated by this section. The notification shall include location of discharge, date and time thereof, type of waste, concentration and volume and corrective actions.

c. Within five days following an accidental discharge, the user shall submit to the director a detailed written report describing the cause of the discharge and the measures taken by the user to prevent similar future occurrences.

d. Signs shall be permanently posted in conspicuous places on the user's premises advising employees whom to call in the event of a slug or accidental discharge.

e. A significant industrial user shall notify the POTW immediately of any changes at its facility affecting potential for a slug discharge.

M. The following provisions shall govern permit fees compliance monitoring and administrative fees and postviolation inspection and sampling program charges.

1. To cover the cost of drafting waste discharge permits as provided in this section, the director shall establish a permit fee. The fee shall be applicable to each new or revised permit issued after the adoption of this section. The permits shall normally be issued for a period of five years and the fee shall entitle the permittee to the review of two draft permits and the review and issuance of one final permit and one permit revision during the stated term of each permit. No additional charges shall be made for revisions or draft permit revisions initiated by the department. The cost for routine permit administration, including annual permit inspections, are covered under other provisions in this section. The director is hereby authorized to establish the permit drafting fee as part of the county's annual budget process.

2. Those permittees authorized to discharge heavy metals and those permittees authorized to discharge oil and grease shall pay a compliance monitoring and administrative fee. The fee shall be a unit charge calculated in accordance with the procedures hereafter set forth herein and in accordance with the following:

HEAVY METAL AND OIL & GREASE

MONTHLY COMPLIANCE MONITORING AND ADMINISTRATIVE FEES

The heavy metal and oil & grease monthly compliance monitoring and administrative charges for each industrial user shall be computed using the following formulas:

$$\text{Heavy metals monthly charge} = \frac{[Q_t - Q_s] [Cost_{HM}]}{12}$$

$$\text{Oil \& Grease monthly charge} = \frac{[Q_t - Q_s] [Cost_{OG}]}{12}$$

Where:

Q_t = measured sewage flow; 100 cubic feet/year;

Q_s = computed sanitary flow; 100 cubic feet/year;

$Cost_{HM}$ = unit cost for administering and monitoring for
heavy metals of permitted companies;

$Cost_{OG}$ = unit cost for administering and monitoring for oil & grease
of permitted companies;

Further:

$Q_t - Q_s$ = industrial wastewater discharged; 100 cubic feet/yr

Where:

Q_{ve} E O

748

Q_{ve} = sanitary volume exclusion per employee per day;
gallons/day;

E	=	average daily number of employees;
O	=	average number of annual operating days;
748	=	factor for converting gallons to 100 cubic feet;

Further:

$$\text{Cost}_x = \frac{\text{AM}_x}{\text{}^{\text{T}}\text{IF}_x}$$

Where:

Cost_x	=	unit cost for administering and monitoring heavy metals or oil and grease program;
AM_x	=	budget allocated to administering heavy metals or oil and grease program;
$\text{}^{\text{T}}\text{IF}_x$	=	total industrial flow discharged by heavy metal permittees or oil and grease permittees; 100 cubic feet/year.

a. The compliance monitoring and administrative fees shall be based upon the county's estimated costs for the total compliance monitoring program for the heavy metals and oil and grease programs. A review of the costs and their allocation will be conducted annually by the director, and unit charges may be adjusted to reflect the actual monitoring costs. Compliance monitoring and administrative fees shall include, but not be limited to, routine permit administration, program development, laboratory analysis and recovery of fifty percent of the costs of the key ((~~manhole~~)) maintenance hole monitoring program and industrial monitoring costs not recovered directly via fees for the postviolation inspection and sampling program.

b. Compliance monitoring and administrative charges shall be based upon the average monthly volume of discharge by each industrial/commercial permittee served directly or indirectly by the metropolitan sewerage system. The average monthly discharge volume will be based on water consumption figures of each

industrial/commercial permittee for the previous four quarters of the year. Each participant local agency shall provide the department each quarter with a listing of the water consumption of each industrial/commercial permittee served by the participant local agency and the department. Where actual sewage flow is metered, the metered flow shall be reported in lieu of water consumption.

c. The director shall not impose the compliance monitoring and administrative fee where the compliance monitoring payments do not exceed the department's estimated costs for monitoring and processing an individual account. The department reserves the right to thereafter reimpose the compliance monitoring and administrative fee for heavy metals or oil and grease, or both, whenever the director determines that the payments will exceed administrative costs.

d. The department will assign the responsibility for billing and collecting the compliance monitoring and administrative fees to each of its participant local agencies for those companies within the agencies' jurisdiction. The permit fee will be billed directly to the permittee.

3. The department shall have the right to impose an administrative fee to recover the cost of drafting minor discharge authorizations and general permits as provided under other provisions of this section.

4. Users discharging waste with a strength greater than domestic waste shall pay a high strength surcharge in addition to the basic fee. The surcharge for high strength industrial wastes shall be based on treatment or removal costs of those constituents whose concentration exceeds that contained in domestic wastes and that contribute to the costs of operation and maintenance of the metropolitan sewerage system. The constituents presently in this category are biochemical oxygen demand (BOD) and suspended solids.

a. The surcharge shall be the unit cost of treating BOD5 or suspended solids times the strength in excess of domestic strength. The unit costs for BOD5 and suspended solids are computed from the actual costs of operating and maintaining the metropolitan sewerage system by allocating costs to flow, BOD5 and suspended solids and dividing the allocated costs by the total amounts of flow, BOD5 and suspended solids treated in the metropolitan sewerage system.

b. The fees shall be determined according to the following surcharge formula:

The computation of the high-strength surcharge is described by the following formula:

$$\text{Surcharge} = Q_t [(BOD_M - BOD_d)UC_{BOD} + (SS_M - SS_d)UC_{SS}]$$

Where:

Surcharge	=	Monthly surcharge payment; \$/month
Q_t	=	Average month sewage flow; 100 cubic feet/month
BOD_M	=	Measured BOD waste strength for industry; mg/l
BOD_d	=	Defined BOD strength for domestic waste; mg/l
SS_M	=	Measured SS waste strength for industry; mg/l
SS_d	=	Defined SS strength for domestic waste; mg/l
UC_{BOD}	=	Unit cost of treating BOD; \$/mg/l/100 cubic feet
UC_{SS}	=	Unit cost of treating SS; \$/mg/l/100 cubic feet

And;

$$UC_x = OM_x + PC$$

$$(8.34 \text{ lb/gal})(7.48/\text{ft}^3)(100\text{ft}^3)(10^{-6})$$

TW_x SW_x

UC_x	=	Unit cost for BOD or suspended solids
OM_x	=	Allocated operation and maintenance costs to BOD or suspended solids;
PC	=	Costs of administering and sampling for the surcharge program;
TW_x	=	Total BOD or suspended solids handled by the county sewerage system; lb/year

SW_x = Surchargeable BOD or suspended solids handled
by the county sewerage system; lb/year

Surchargeable BOD and suspended solids is the amount that exceeds the established domestic waste strength.

c. The concentration of domestic wastes shall be defined by the director.

d. Treatment costs will be based on system-wide maintenance and operation costs allocated to the appropriate waste parameters. The director shall conduct an annual review of treatment costs and adjust charges to reflect actual operation and maintenance costs.

e. The surcharge shall be based upon the average annual strength and volume of discharge by the industrial user. Industrial users shall have the right to challenge the values the director develops by submitting a series of analyses from a state certified laboratory documenting the substitute values proposed by the industrial user. Satisfactory sampling techniques in such instances shall be subject to approval by the director.

f. The director shall establish the average annual waste strength for each industrial user either by direct measurement or by classification. Those users discharging in excess of 600 pounds per day of BOD and suspended solids will be monitored directly at a frequency of not less than twice per year. Those users discharging less than those quantities will be classified by user group and assigned a waste strength based upon measured values for representative industrial users within each group. Industrial users who can demonstrate a significant difference in waste generating operations from that of their assigned class leader shall have the right to challenge their assigned classification by submitting a series of analyses from a competent laboratory documenting the substitute values proposed by the industrial user. Satisfactory sampling techniques in such instances shall be subject to approval by the director.

g. There shall be a domestic type classification established originating from domestic type activities. All industrial users in the domestic type classification shall be assigned a waste strength equal to the domestic equivalent.

h. The average annual discharge volume will be based upon water consumption figures utilized by the industrial user for the previous four quarters. Each participant local agency shall provide the county each quarter with a listing of the water consumption of each surcharged user. Where actual sewage flow is metered, the metered flow shall be reported in lieu of water consumption.

i. Those industrial users whose high strength waste surcharge payments fall below the administrative costs for an individual account will be excluded from the program.

j. The county will assign the responsibility for billing and collecting the high strength waste surcharge to each of its participant local agencies for those industrial users within the agencies' jurisdiction. The county will review the local agencies' billing procedures annually to ensure that the agencies' user charge is being applied equitably and in accordance with federal regulations.

5. Any industrial user that believes the compliance monitoring and administrative fee or permit fee imposed on it by the director may be in error may appeal the action by following the appeal process outlined in this section.

6. Any industrial user for whom the director implements a postviolation inspection and sampling program under this section shall be responsible for costs therefore incurred by the county, including without limitation expert, legal and administrative costs. The costs shall be in addition to the other fees, penalties and costs for damages set forth in this section. Any industrial user subject to postviolation inspection and sampling shall be billed directly for the county's costs. The costs recovered by the county shall include all labor, supplies and special costs incurred for the inspection and monitoring effort. A review of the costs and their allocation will be conducted annually by the director, and unit charges may be adjusted by the director to reflect the actual sampling and inspection costs.

N. The following provisions shall govern violations of discharge requirements:

1. The criteria constituting violations shall be as follows:

a. A discharge violation will be considered to have occurred if the limitations established in or in

accordance with this section, federal or state pretreatment standards, specific requirements of an industrial waste discharge permit, written discharge authorization or any other pretreatment standards are exceeded, regardless of intent or accident.

b. A mass violation will be considered to have occurred if mass related limitations for specific pollutants have been exceeded. Mass related limitations will be based on daily average limits. A violation will be determined utilizing the formula: $(8.34) \times (\text{millions of gallons discharged per day}) \times (\text{concentration of pollutant in mg/L})$. The concentration used for the pollutant will be the arithmetic mean of those concentrations for samples collected during the period monitored over the operating day or the concentration of a flow proportioned composite during that period. The volume will be determined by either a water meter or sewer meter serving the monitored process and read immediately before and after sampling.

c. A violation will be considered to have occurred if special reporting requirements established by permit, provided for in this section, included in written documents from the director, or specified by general federal pretreatment standards in 40 CFR 403.12 as amended, are not complied with.

d. A violation will be considered to have occurred if special conditions, best management practices or requirements established by this section, waste discharge permit, general permit, major or minor discharge authorization, letter of discharge authorization or written orders from the director are not complied with. The violations include, but are not limited to, failure to pay sewer charges or fines, failure to complete the requirements of a compliance order, failure to meet the deadlines of a compliance schedule and inaccurate reporting.

e. Each discrete discharge that constitutes a violation under this section shall constitute a separate violation, or if the discharge is continuous, then each hour of the discharge shall constitute a separate violation, provided the director shall have the discretion to combine the discrete or continuous discharges and limit the number of violations for purposes of assessing penalties, if the violations are minor and do not pose significant risks to public health and safety or treatment processes and facilities, and the industrial user demonstrates to the

reasonable satisfaction of the director that it is using its best efforts and the most current technology to avoid the discrete or continuous discharges.

2. In accordance with 40 CFR 403.8, the director will cause to be published in a newspaper of general circulation within the county, at a minimum once every twelve months, a list of those industrial users that since the last previous publication were determined to be in significant noncompliance of the limitations established by this section and applicable pretreatment standards or other requirements under this section. This notification will summarize enforcement actions taken by the county during the same period covered by the publication.

O. The following provisions shall govern penalties and enforcement of the requirements of this section:

1. Any person failing to comply with or violating any of this section shall, for each such a failure or violation or for each day that the failure or violation occurred or continues to occur, be required to correct such violation and shall be subject to enforcement action or actions to be determined by the director. Depending upon the severity of the situation, the director may require the immediate cease of discharge and disposal of the industrial waste in some manner other than into the public sewer, private sewer or side sewer tributary to the metropolitan sewerage system, at the expense of the person responsible for the failure or violation.

2. The director shall develop and implement an enforcement response plan that contains guidelines indicating how the county will investigate and respond to instances of industrial user noncompliance. At a minimum the plan shall: describe how the county will investigate violations; describe escalating enforcement remedies and the time periods in which they will take place, including Notice of Violation, Compliance Order, Final Notice, Monetary Penalties, Postviolation Inspections and Sampling, Cease Discharge Notice, Emergency Suspension, Termination of Discharge and Supplemental Environmental Projects; identify by title the official or officials responsible for implementing each enforcement response; and reflect the county's responsibility to enforce all applicable pretreatment requirements and standards. In determining the type of enforcement action and the amount of penalties to be levied, the enforcement response plan shall consider the type and concentration of the pollutant causing the violation, the analytical variability for that pollutant, the volumes

discharged, the damages caused by or related to the discharges, the history of past violation by the same industrial user, the assessment of any prior penalties for similar violations and the number of violations as determined in accordance with other provisions of this section.

a. Upon determination that a violation has taken or is taking place, a representative of the county shall make a reasonable effort to notify the violating party immediately. The first notification may be verbal if followed by written notification. The written notification shall be entitled "Notice of Violation" and shall specify the nature and source of the violation. The written notice may be delivered to the business premises of an industrial user or submitted by regular mail to the permit holders' address, as given to the county. Following these notification procedures, applicable follow-up correspondence will be used to establish penalties and corrective action to be taken by the violator. Within fourteen calendar days of receiving a Notice of Violation, the violator shall submit a report to the director describing the circumstances surrounding the violating condition. In the case of a discharge violation, the violator shall also collect an effluent sample and submit resultant data to the director in addition to the report. Submission of this report shall in no way relieve the user of liability for any violations occurring before or after receipt of the Notice of Violation.

b. Upon determination that a violation has taken or is taking place, the director may issue a compliance order to the violating party responsible for the discharge, directing that the user come into compliance within a time specified in a schedule. Compliance orders may also contain other requirements to address the noncompliance, including but not limited to additional self-monitoring and management practices, evaluations of control measures or pretreatment equipment and installation of pretreatment equipment designed to minimize the amount of pollutants discharged to the sewer. A compliance order may not extend the deadline for compliance established for a federal pretreatment standard or requirement, and a compliance order does not release the user of liability for any violation, including any continuing violation. Issuance of a compliance order shall not be a prerequisite to taking any other action against the user.

c. Upon determination that a violation has taken or is taking place, the director may issue a final

notice to the violating party. Final notice places the user on notice that further violations, or failing to complete a requirement within a designated period of time, shall result in assessment of monetary penalties. Issuance of final notice shall not be a prerequisite to taking any other action, including assessment of monetary penalties, against the user.

d. For each failure or violation hereunder, the person responsible shall be liable for a maximum civil penalty of ten thousand dollars per violation per day, but not less than one hundred dollars per violation, per day. Issuance of a monetary penalty shall not be a prerequisite for taking any other action against the user. In addition to monetary penalties, the director may recover expenses incurred by the county associated with enforcement activities, including, but not limited to: any additional treatment costs; additional operational costs; costs incurred by the county from tracking down violators; any penalties, fines or other costs levied against the county for violation of state and federal permits resulting from discharges; and any other costs, including expert, legal or administrative costs or the withholding of any grant money, incurred by the county or the local public agency, to the extent permitted by law. In addition to any monetary penalty that reflects the gravity of the violation, a calculated amount based on the industrial user's economic benefit of noncompliance may be recovered by the director.

e. Upon determination that a violation has taken place, the director may require postviolation inspections and sampling of an industrial user as defined in K.C.C. 28.82.370. Costs for postviolation inspection and monitoring, as set forth in this section, shall be in addition to other fees, penalties and costs for damages set forth in this section.

f. Upon determination that a violation has taken or is taking place, or that the user's past violations are likely to recur, the director may issue an order to the user directing it to cease and desist all such violations and directing the user to:

- (1) immediately comply with all requirements; and
- (2) take such appropriate remedial or preventive action as may be needed to properly address a

continuing or threatened violation, including halting operations or terminating the discharge, or both. Issuance of a cease discharge notice shall not be a prerequisite for taking any other action against the user.

g. The director may immediately suspend a user's discharge, after informal notice to the user, whenever the suspension is necessary in order to stop an actual or threatened discharge that reasonably appears to present or cause an imminent or substantial endangerment to the health or welfare of persons. The director may also immediately suspend a user's discharge, after notice and opportunity to respond, that threatens to interfere with the operation of the metropolitan sewerage system, including, but not limited to, maintaining compliance with the county's National Pollutant Discharge Elimination System permit and biosolids quality requirements, or that presents or may present a danger to the environment.

h. In addition to other provisions of this section, any user that violates the following conditions is subject to discharge termination: violation of waste discharge permit or written discharge authorization conditions; failure to accurately report wastewater constituents and characteristics of discharge; failure to report significant changes in operations or wastewater volume, constituents and characteristics before discharge; refusal of reasonable access to the user's premises for the purpose of inspection, monitoring or sampling, as provided in this section; and violation of the limitations established in this section.

i. The penalties and enforcement provisions in this section are not exclusive remedies. The director is authorized to take any, all or any combination of these actions against a noncompliant user. Enforcement of pretreatment violations will generally be in accordance with the enforcement response plan. However, the director may take other action against any user when the circumstances warrant. Further, the director is authorized to take more than one enforcement action against any noncompliant user. Enforcement actions may be taken concurrently.

j. Where criminal enforcement action is considered in a particular case, that case may be referred to state or federal authorities.

3. Any person causing structural damage to a public sewer or treatment facility or causing resource

damage to receiving water quality or biosolids by discharges not in compliance with this section and the requirements of any permit or written discharge authorization, shall be liable for any such damage in addition to monetary penalties.

4. In accordance with this section, where the enforcement remedy is the assessment of a substantial monetary penalty, where in certain instances projects or activities remediating adverse public health conditions or environmental consequences of the violations may be included in the enforcement action, and where the size of the final assessed penalty may reflect the commitment of the user to undertake environmentally beneficial expenditures, the director may approve a supplemental environmental project other than those required to correct the underlying violation to be undertaken by the user in exchange for a reduction in the amount of the assessed monetary penalty. All supplemental projects must improve the injured environment or reduce the total risk burden posed to public health or the environment by the identified violation. Any supplemental environmental project must be shown to be of equal monetary value to the amount of reduction in the assessed monetary penalty. The director shall establish rules by which consideration and acceptance of a supplemental environmental project are determined. The rules shall be based upon categories of potential supplemental environmental projects including but not limited to: pollution prevention projects, pollution reduction projects, environmental restoration projects, environmental auditing projects and environmental public awareness projects. The rules shall also provide for public involvement in the acceptance of any project and in establishing the benefit of any project to the performance of the metropolitan water pollution abatement function by the county. Categories of potential supplemental environmental projects, except for public awareness projects, may be considered if there is an appropriate relationship or "nexus" between the nature of the violation and the environmental benefits to be derived from the type of supplemental project. A supplemental environmental project cannot be used to resolve violations at a facility other than the facility or facilities that are the subject of the enforcement action. Under no circumstances will a user be given additional time to correct the violation and return to compliance in exchange for the conduct of a supplemental environmental project.

5. The county does not allow for the affirmative defense of an enforcement action brought for noncompliance with applicable pretreatment standards based on conditions of "upset" or "bypass." For the purpose of this section, "upset" means an exceptional incident in which there is unintentional and temporary noncompliance with discharge standards because of factors beyond the reasonable control of the user. For the purpose of this section, "bypass" means the intentional diversion of waste streams from any portion of a user's treatment facility. The diversion or bypass of any discharge from any pretreatment facility utilized to maintain compliance with applicable pretreatment standards is prohibited except where unavoidable to prevent loss of life or severe property damage. "Severe property damage" means substantial physical damage to property, damage to the treatment facilities that causes them to become inoperable or substantial and permanent loss of natural resources that can reasonably be expected to occur in the absence of a bypass.

P. The director is authorized and directed to promulgate such rules, regulations and guidelines as the director deems necessary to carry out the purposes or provisions of this section, to ensure the department's compliance with the requirements of any federal or state law or administrative regulation relating to water pollution and any changes or amendments thereto and to ensure the department performs the metropolitan water pollution abatement function under chapter 35.58 RCW. Nothing herein shall prevent the director from seeking judicial or governmental agency assistance to implement the policies and requirements of this section. The rule-making process followed by the director shall provide for public participation. Before the adoption of any rule, the director shall notify users and the general public of the proposed rule. Notification will include but need not be limited to: newsletters; public hearings; or legal notices published in area newspapers.

Q. The director is authorized to delegate responsibility to participant local agencies where the participant agency has requested the delegation and where the director has approved its plans and procedures for implementation of the delegated responsibility.

SECTION 86. Ordinance 13680, Section 1, as amended, and K.C.C. 28.86.010 are each hereby amended to read as follows:

An operational master plan shall include the analysis of alternatives and their life cycle costs to accomplish defined goals and objectives, performance measures, projected workload, needed resources, implementation schedules and general cost estimates. The operational master plan shall also address how the organization would respond in the future to changed conditions.

R. "Reclaimed water" means wastewater that is treated to a sufficiently high level that it can be safely used for intended purposes.

S. "Residential customer equivalent" means the factor in cubic feet of water used to describe the discharge from a single-family residence. Commercial and industrial customers are converted to residential customer equivalents based on the volume of water consumption.

T. "RWQC" means the regional water quality committee, which is a regional committee as defined by Section 270 of the King County Charter, with powers and duties to "develop, review and recommend ordinances and motions adopting, repealing, or amending countywide policies and plans relating to the subject matter area for which a regional committee has been established."

V. "Sewer rate" means the amount in dollars, charged to a residential customer equivalent each month for use of the wastewater system.

W. "Shall" and "will" in a policy mean that it is mandatory to carry out the policy. "Should" in a policy provides noncompulsory guidance and establishes some discretion in making decisions. "May" in a policy means that it is in the interest of the county or other named entity to carry out the policy but there is total discretion in making decisions.

X. "Wastewater revenues" means revenues from the monthly sewer rate, capacity charge, grants and

other revenues, such as interest income and charges for services, available for the wastewater system.

SECTION 87. Ordinance 11033, Section 15, and K.C.C. 28.94.100 are each hereby amended to read as follows:

A. The county will provide public restrooms at transit centers that meet the following criteria.

1. The transit center has been designed and sited principally to facilitate transfers between different routes.
2. The transit center is to be developed off-street on property that the county either owns or controls through a long-term lease.
3. County service through the transit center makes significant use of "timed meet" schedules.
4. The transit center has capacity for eight or more in-service coaches; layover bays or terminal space do not count toward meeting this capacity requirement.
5. There is adequate space on the transit center platform to provide a restroom facility without compromising operating requirements.
6. A daily platform population of ~~((2,000))~~ two thousand or more patrons is projected. This includes transfer activity as well as trips originating or terminating at the center.
7. At least ~~((25))~~ twenty-five buses per peak hour pass through the transit center.
8. Independent of any decision to provide a public restroom, the level of operational activity at the

transit center justifies the on-site assignment of a service supervisor for all or a portion of the operating day.

B. If these criteria are met, the public restroom will be a ~~((uni-sex))~~ gender-neutral facility that will be used both by county employees and by the general public. The restroom will only be available to the public for those hours when a department representative is scheduled to be on-site to manage the service. During those hours, public access to the facility will be controlled by this supervisor.

C. If a local jurisdiction or adjacent property owners wish to expand hours of public access to the restroom beyond those available through the department's normal staff assignments, the local jurisdiction or property owner and the county may elect to enter into an agreement to share the additional operating costs for expanded restroom hours; provided, that such agreements shall be approved by the council as required by the King County Charter, ordinance and/or applicable state law.

D. The department shall not provide public restrooms at any of the county's customer facilities that do not meet the criteria above, including the Downtown Seattle Tunnel.

E. The county will not staff its customer facilities simply to maintain or expand hours of access to public restrooms.

SECTION 88. Ordinance 11950, Section 14, as amended, and K.C.C. 28.96.010 are each hereby amended to read as follows:
